

PENNSYLVANIA DEPARTMENT OF STATE

Version 3.0 – June 2024

The Pennsylvania Department of State (DOS) hosts a website that allows eligible Pennsylvanians to register to vote using DOS' online voter registration application. The Department of State intends to allow Partner Organizations (Posting Organizations and their Affiliates) to access the online voter registration application via a web application programming interface, or web API, which would allow Pennsylvania's to apply to register to vote through a Posting Organization's Application. Before accessing the web API or any of its associated tools or documentation, each Posting Organization must agree to the following:

Application. The software application that the Posting Organization proposes to connect to and communicate with the PA OVR Web API.

DOS. The Pennsylvania Department of State.

PA OVR Web API. The application programming interface offered and maintained by DOS to provide an interface between its online voter registration application and other web-based applications. The term includes the associated tools and documentation necessary to use the API.

Partner ID. A unique identification number assigned to each Partner Organization used to track applications submitted through the PA OVR Web API.

Partner Organization. An organization which is either a Posting Organization or an Affiliate of a Posting Organization

Posting Organization. An organization which has developed, or is developing, an application that will submit a complete set voter registration information to DOS on behalf of registrants who use the Posting Organization's Application, either through interaction directly with the Posting Organization or indirectly through one of the Posting Organization's Affiliates.

Registrant. Person applying to be registered to vote in Pennsylvania.

2. **Grant of Access**

The Posting Organization understands that the electronic signature on the Terms of Use will constitute the legal equivalent of its authorized representative's signature. Upon receipt of the Posting Organization's acceptance of, and its authorized representative's signature on, these Terms on DOS's website, DOS will grant Posting Organization access to the PA OVR Web API pursuant to the following registration, testing, and access procedures:

- a. Posting Organization must register with DOS and create an account by going to <https://paovrwebapi.vote.pa.gov/SUREWebAPIAdmin/>.

- b. The Posting Organization must provide all of the information requested in the online login form when creating an account. The Posting Organization account must contain accurate and up-to-date information at all times, including the Posting Organization’s representative’s current title and contact information.
- c. Upon registration, the Posting Organization will be contacted by DOS to arrange for testing of any Application that will connect to and communicate with the PA OVR Web API. DOS will provide a master text document in English and Spanish, and such other languages into which DOS may translate its online voter registration application. DOS will provide a link to the DOS Staging environment and an authentication key for the staging environment. The Posting Organization must demonstrate its Application in the staging environment and through supporting documentation (i.e. application screen shots) to DOS staff to verify functionality and language requirements. The Application must pass all test cases with the Test Matrix provided by DOS.
- d. Applications that do not pass the test requirements will not be permitted to use the PA OVR Web API.
- e. Once an Application successfully completes the test requirements, Posting Organization will be given production access credentials for its Application. Access credentials include the necessary security keys or other credentials necessary to access the API. The access credentials enable DOS to associate the Posting Organization’s API activity with its Application and the voter registration applications associated with it.
- f. The Posting Organization agrees to keep all access credentials in strict confidence. Access credentials may not be shared, sold, transferred, or sublicensed. Notwithstanding the foregoing, the Posting Organization may permit Affiliates to use its Application and the PA OVR Web API provided that
 - i. Posting Organization identifies each Affiliate by a unique partner ID for identification;
 - ii. Posting Organization represents and warrants that its Partner Organizations shall not have the ability to change or modify its Application; and
 - iii. each Affiliate identifies the Posting Organization’s Application as the vehicle through which it will access the PA OVR Web API below.
- g. If any Affiliate is hosting the Posting Organization's application on a separate server, the Posting Organization agrees to inform DOS. The Affiliate must create their own Posting Organization account, register separately with DOS, and submit the application for testing. DOS may modify the testing protocol at its discretion for a previously tested and approved Application. Posting Organization agrees to provide DOS with notice of new Partner Organizations as soon as practicable. Currently, Posting Organization acknowledges that the following Affiliates may use Posting Organization’s Application to access the PA OVR Web API:

-
-
- h. Once access is granted, posting of voter registration information is governed by the process set forth in the PA OVR Web API Posting Organization Technical Requirements document, www.dos.pa.gov/PAOVRWEBAPI. The posting process must include a Pre-Save Data Operation and an HTTPS post. The Technical Requirements document includes a technical description and diagrams of the posting process.
 - i. From time to time, DOS may make upgrades or modifications to the www.dos.pa.gov/PAOVRWebAPI website. To the extent that such modifications impact PA OVR web API, including Get Calls, DOS will provide the Posting Organization with sixty (60) days' notice before deployment. The Posting Organization agrees that its Application will comply with any modifications. DOS may revoke a Posting Organization's credentials for failure to comply with modifications. If DOS is required to make modifications on an emergency basis to respond to legislation, litigation, or other authority, DOS will notify the Posting Organization within 48 hours of determining that such modifications are necessary.
 - j. DOS reserves the right to cancel or revoke Posting Organization's access credentials at any time for any reason, including, but not limited to, the following acts or omissions by the Posting Organization or any of its Affiliates:

 - 2) sale of Applicant information to a third party;
 - 3) excessive submission of false or erroneous voter registration applications;

 - 5) display of inappropriate content in Posting Organization's Application; or
 - 6) interference with or disruption of <https://www.pavoterservices.pa.gov/Pages/VoterRegistrationApplication.aspx> or any other DOS website, servers or networks.
 - k. The Posting Organization agrees that it will track each voter registration application by Partner ID. Should DOS determine that it is receiving an excessive number of erroneous or potentially fraudulent applications, DOS shall notify Posting Organization of that determination and provide transaction ID numbers to Posting Organization. Posting Organization agrees to respond to DOS within 24 hours and to revoke the Affiliate's access to its Application at DOS' request. Posting Organization also agrees to investigate such registrations within the timeframe directed by DOS. If Posting Organization fails to respond to DOS' notification or to investigate such applications within the directed time, DOS reserves the right to revoke Posting Organization's Access Credentials.
 - l. At its discretion, DOS may permit Posting Organization to cure the condition that resulted in revocation. Upon satisfactory evidence of cure, DOS may, in its sole discretion, reinstate Posting Organization's access credentials.
