

Information on the 2025 Governor's STEM Competition

All Commonwealth public and non-public high schools, Career and Technical Centers, Charter Schools, and home-schooled students are invited to participate in the 2025 Governor's STEM Competition.

The Governor's STEM Competition requires student teams to research, design, and present a device or project that can make the quality of life better for Pennsylvanians. Teams must collaborate with a local member of their community or a business and industry partner to help identify a challenge faced by Pennsylvanians along with designing a solution to that challenge. The Governor's STEM Competition will provide teams with:

- An authentic experience that applies skills learned in and outside the classroom,
- Opportunities to learn new skills or refine existing skills desired for careers in STEM,
- An opportunity to explore career pathways.

Registration for the competition is currently open for teams of five students in grades 9-12. A team advisor must complete the registration form for all students participating in the competition by December 23, 2024. For the 2024-2025 school year, all registered teams will advance to the virtual state competition.

All important dates and competition information may be found on the Governor's STEM Competition website. If you have additional questions, contact your local intermediate unit or email govstemcomp@pattan.net.

To register, please use the [2025 Governor's STEM Competition Team Registration Form](#).
