Re: Virtual Preparatory Academy of Pennsylvania Cyber Charter School

To Whom It May Concern:

As you are aware, this firm represents Virtual Preparatory Academy of Pennsylvania Cyber Charter School ("VPA") which has submitted, through its founding Board of Trustees (the "Board"), an application to open a cyber charter school for the 2021-22 school year. That initial application was denied by the Pennsylvania Department of Education ("PDE") on January 27, 2020. The applicant is filing a revised application in accordance with the Pennsylvania Cyber Charter School law, 17-1745-A(g).

Attached as an exhibit to the Revised Cyber Charter Application is a revised Services Agreement ("Agreement") between VPA and Accel Online Pennsylvania, LLC.

I have reviewed this Agreement as requested by the Board. After discussions with Accel regarding the Agreement, I am advising the PDE of the following:

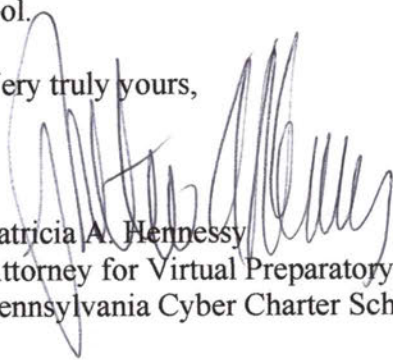

1. The revised Agreement represents an agreement in principle between VPA and Accel. The agreement in principle was presented to the Board at a Board meeting held on June 15, 2020. The Board gave counsel the authority to revise the Agreement at that time and authorized the Board President to spearhead any revisions to the Agreement.
2. The final revised Agreement attached as an exhibit to the revised and resubmitted application will be executed by both parties upon the award of a charter to operate a cyber charter school in the Commonwealth of Pennsylvania. Without a charter, VPA would unnecessarily be binding itself to the Agreement.
3. The final revised Agreement is unsigned subject to any additional feedback from the authorizer, and the parties have agreed to further negotiated language based on that feedback. This is particularly true given that the PDE, in its denial letter, offered issues with the original agreement; thus, VPA continues to be willing to engage PDE in dialogue on the substance of the Agreement.

4. No additional negotiations on this revised Agreement are contemplated unless specific revisions are requested by the authorizer or if any aspect of the delegation of responsibility is determined to violate federal or state law. As evidence by the revised Agreement, the parties agreed to negotiate in good faith an amendment to this Agreement to cure any violation.

5. The original Agreement evidenced and the revised Agreement reinforces that the ultimate control of the cyber charter school lies with the Board as the Board is responsible for the day-to-day operations of the cyber charter school. The Board retains the right to terminate the Agreement. Throughout the Agreement, there are multiple opportunities for Board to review of the performance of Accel. Additionally, Board will conduct reviews of the Service Provider's performance which reviews can include academic achievement, financial condition or substantial breach of any material terms and conditions of the Agreement.

Thank you for your consideration of the cyber charter school application of Virtual Preparatory Academy of Pennsylvania Cyber Charter School.

Very truly yours,

Patricia A. Hennessy
Attorney for Virtual Preparatory Academy of
Pennsylvania Cyber Charter School

Cyber Charter Application 2019
(Resubmission)

CYBER CHARTER SCHOOL APPLICATION FACT SHEET

This application fact sheet is intended to be a “finger-tip” summary of your application. The information furnished below must be an accurate representation of the application and must correspond to the information provided in the body of the application.

Proposed Charter School Name (Must Include “Charter School” in the Title):

Virtual Preparatory Academy of Pennsylvania Cyber Charter School

Proposed Charter School Location:

Address: 1800 Linglestown Road, Ste. TBD

City/Town: Harrisburg

Zip Code: 17010

County: Dauphin

Intermediate Unit: Capital Area Intermediate Unit

Proposed Start Date: September 2021

Federal Employer Identification Number: TBD- Application submitted

Contact Person: Richard Flynn, Board President

Address: [REDACTED]

Phone: [REDACTED]

Email: [REDACTED]

Indicate Number of Representatives per Group

Founding Coalition

Group	Number of Representatives
Parents	2
Teachers	
Business Partners	
Community Based Organizations	1
Museums	
Higher Education	1
Other Group - Identify: Businessperson with finance background	1

Grade and Age Ranges

Group	Grade/Age Range
Elementary	K-8
Secondary	9-12
Age of Kindergarten	Determined by students' resident district requirements
Age of Beginners	Determined by students' resident district requirements
Grades Educated	All grades Kindergarten thru 12 th grade
Kindergarten	<input checked="" type="radio"/> Full Day <input type="radio"/> Half Day

Projected Student Enrollment Year 1-5

Year	Enrollment
1 st Year	500
2 nd Year	1,000
3 rd Year	1,500
4 th Year	2,000
5 th Year	2,500
Total Number of Teachers	128

Does the cyber charter applicant have an existing retirement system?

Yes No

The Virtual Preparatory of Pennsylvania Cyber Charter School will implement a 403(b) program once the charter is approved. The Board of Trustees has secured one quote from Voya.

Does the applicant group presently have access to a facility suitable for the cyber charter school's administrative offices?

Yes No

The Board has identified a proposed administrative office location at 1800 Linglestown Road, Harrisburg, PA, that has several available office suites that would be suitable for the school. They are in negotiations now.

School Focus: Describe, in brief terms and on an additional page, the proposed cyber charter school’s mission, educational focus, and other essential characteristics.

The mission of Virtual Preparatory Academy of Pennsylvania is to provide K-12 students with an innovative college preparatory cyber school grounded in strong academics, character education and service-learning. Through compelling inquiry-based, project-based service-learning, and peer interaction, the Virtual Preparatory Academy of Pennsylvania will instill in all students an intellectual curiosity and a sense of their unique purpose and strengths.

The Virtual Preparatory Academy of Pennsylvania is built upon a strong research-based foundation that supports three pillars of student learning and success:

Pillar 1: All students will experience an organized and research-based curriculum leading to mastery of academic skills delivered through the use of collaborative technology.

Pillar 2: All families will be engaged in the students’ learning activities and provide support for the students’ academic progress maximizing the use of learning technologies and electronic communication methods.

Pillar 3: All students will, through peer interaction, develop interpersonal skills through project-based service learning, group assignments, and, through specialized counseling support and role modeling, begin to realize their true potential as citizens and participants in the global economy in which they live.

The Virtual Preparatory Academy of Pennsylvania model is built specifically to leverage on-line medium and incorporates audio, animation, language translations, and images to keep students interested and engaged. The curriculum is designed to capitalize on the best opportunities that the online venue has to offer for both synchronous and asynchronous learning. The on-line curriculum is capable of supporting the academic needs of a wide range of students, and it provides excellent support for English Learners by combining words and images, as well as audio and visual content. Specially curated web-based supplemental resources have already been collected and will continue to be collected by the staff to further enhance the curriculum to go above and beyond the typical vendor curriculum.

The school will integrate character education and service learning as part of its academic program and student learning activities. This approach will provide students with authentic learning experiences that are engaging, inspiring, and motivate them to learn while contributing to their community. Staff and students will work collaboratively to decide on the kind of service-learning projects they want to engage in depending on age levels. Some projects may address community needs such as poverty or the environment. Another project may include document local history or culture through interviews and photography. Other projects may include student mentoring or tutoring. In seeking feedback from Pennsylvania citizens in support of this charter application, the concept of character education and service-learning projects was overwhelmingly positive and the letters of support reflect that.

Overall, Virtual Preparatory Academy of Pennsylvania envisions a learning experience that combines the best of online learning with its capacity for flexible pacing and featuring an innovative, interactive curriculum taking place under the supervision of Pennsylvania state certified teachers providing synchronous instruction, one-to-one tutoring, family support, and organized peer interaction through project based learning.

The Cyber Charter School will serve approximately 500 students in grades K-10 during the first year, with

an anticipated growth to 2,500 students by year five. The educational program is based on the instructional needs of the target student profile.

The target student profile is not limited to any particular demographic. However, we expect student demographics to be consistent with the data from Pennsylvania Partnerships for Children and referenced in Kids Count Data Center 2019 publication “Percent of Pre-K thru Grade 12 Enrollment by Race and Ethnicity in Pennsylvania”. Instead, the Cyber Charter School is designed and organized to serve students and families who have chosen an online classroom setting for any of the following reasons, or other reasons relevant to the individual:

- Students who need flexibility in scheduling due to family circumstances, childcare needs, health care needs, or need individualized support by teachers during their academic growth years.
- Individuals who are self-directed and choose a wider range of academic options than those currently provided in Pennsylvania urban and rural school settings.
- Students of all ability levels seeking additional academic and learning opportunities suited to their individual talents and interests.
- Students whose families, who, for whatever reason, have not had a successful traditional school experience.
- Students that are high-risk/at-risk for successfully achieving high school graduation or equivalency.
- Students who seek out service learning and community building projects.
- Students from families that have limited or non-existent in-home support for their academic growth.

Online education in particular is growing in importance. Recent events due to the COVID-19 pandemic have proven that all schools, teachers, students and families need to be conversant with on-line learning and schools need to be prepared to host students in new learning situations when required to do so.

The Cyber Charter School’s educational approach features innovative curricula, a high degree of connectivity and personalized attention, intensive teacher training and inquiry-based student-centered learning. Its program focuses on practical application of knowledge and strong parent and community involvement with the Cyber Charter School. Through effective use of technology, it enables teachers to custom-tailor academic programs to students’ unique skills and interests, all aimed at optimizing the student learning experience. Virtual Preparatory Academy of Pennsylvania enables a personalized learning experience, tailor-made for each student.

Students are given continuous opportunities to succeed through the cultivation of multiple intelligences and talents. The supportive environment, along with daily exposure to content-rich programs derived from research-based teaching methods that engage children at all levels, means students will develop a life-long enthusiasm for learning.

Personalized instruction and continuous assessment are cornerstones of the Virtual Preparatory Academy of Pennsylvania model. The proposed Cyber Charter School staff will all have prior teaching experience at either brick and mortar schools or online environments. Staff will have received teacher preparedness courses from their graduate programs but have also received numerous hours of in-services on online student engagement, boosting achievement in the online environment, working with subgroups in the online environment, and many other topics. They will also receive many hours of professional development in both in person and online modalities. Along with participation in online professional learning communities’ staff will be trained in techniques of differentiated instruction, enabling them to

identify students' learning styles and to create learning activities compatible with the students' needs. At the same time, the Cyber Charter School will use varied assessments to enable students to demonstrate their understanding of concepts and skills. These assessments will also be used to develop further lessons that address individual student needs.

Virtual Preparatory Academy of Pennsylvania Professional Development Program design is based on needs as measured by surveys of professional staff and parents/guardians, interviews and observation; and the experience of the Virtual Preparatory Academy of Pennsylvania trained professional-development personnel, who remain up to date on new as well as tried-and-true teaching methods and strategies. At Virtual Preparatory Academy of Pennsylvania, more than 80 hours of staff development will take place before the school year begins, and ongoing training will continue throughout the school year, based on detailed assessments of staff needs.

Virtual Preparatory Academy of Pennsylvania is continuously developing and updating teaching strategies through instructional reflections and by maintaining a finger on the pulse of new research. This includes a specific focus on developing best practices in teaching in an online environment. These teaching strategies ensure that students are given every opportunity to succeed and that the Professional Development program remains fresh and useful. The School provides a 1:1 groundbreaking tutorial that supports students with mentoring, highly qualified teachers, learning coaches and mentors vested in the student's personal success. Virtual Preparatory Academy of Pennsylvania opens portals of opportunity. Our "pillars," the tenets of our model, create openings that give the school its unique personality and customized attributes.

Each pillar of the Virtual Preparatory Academy of Pennsylvania educational approach stems from proven research and our team's years of experience in effective instructional and administrative practices. Some of the underlying research that supports our approach includes the following:

Teaching to Multiple Intelligences: Virtual Preparatory Academy of Pennsylvania recognizes different domains of ability, or "intelligences," as described by Dr. Howard Gardner. Gardner's Theory of Multiple Intelligences provides a foundation for recognizing the different abilities and talents of students. This theory acknowledges that while all students may not be verbally or mathematically gifted, children are likely to have expertise in other areas, such as music, spatial relations, or interpersonal skills. Our program seeks to capitalize on children's various skills, experiences, and talents to provide them with multiple opportunities to learn and succeed.

For example:

- Visual spatial: Visual media, such as online videos and interactive web-based activities, help students acquire concrete concepts, such as drag and drop science activities and videos on Math concepts.
- Bodily - Kinesthetic: Students can submit a video project where they are able to act out the answer to a history research project or a science skill.
- Logical Mathematical - Students will have access to online calculators and will be able to work by themselves or with peers under the guidance of the teacher to engage in calculations in real time or asynchronously.
- Interpersonal - students will be able to interact with each other and with the instructor via live video conferencing and through in person meetups that will be scheduled.
- Musical - students will be able to showcase talents via open mic open house and can also be creative in courses by submitting an original song created to address a project or concept in class.

Reciprocal Teaching: Using reciprocal instruction, a teacher introduces a concept and then reinforces it by circling back to it in later lessons. The Virtual Preparatory Academy of Pennsylvania model is predicated on the balance between rigorous core courses in Language Arts, Mathematics, and Science and a Social Studies curriculum that applies basic core skills in a highly engaging manner, providing students with content knowledge rich in cultural literacy.

Differentiated Instruction: Differentiation is a teacher-driven effort to respond to variations among learners. Teachers can differentiate instruction in at least four areas: content, process, products/culminating projects, and learning environment. Virtual Preparatory Academy of Pennsylvania teachers are taught effective strategies for successfully tailoring all of these areas to individual student needs, ensuring that different learners are all given the best opportunity to succeed.

There is much evidence showing that students are more successful academically if they are taught in ways that match their readiness levels (e.g., Vygotsky, 1986), interests (e.g., Csikszentmihalyi, 1997) and learning profiles (e.g., Sternberg, Torff, & Grigorenko, 1998). Also, differentiating instruction is a key part of effective professional development. Expert teachers' pay attention to their students' varied learning needs (Danielson, 1996); "to differentiate instruction, then, is to become a more competent, creative, and professional educator."¹

An educated person in the 21st century will be the product of the educational philosophy of "deep and broad" student-centered instruction. He/she has a mastery of basic skills and knowledge built on a rich range of content knowledge that provides the foundation necessary to thrive in an increasingly interconnected world.

The educated person will be versed in the use of technology as a tool for communications, research, computations, analysis and a range of other purposes. He/she will have an understanding of national history and culture as well as a sense of the workings of the world and of his or her place in local, national and global communities.

The educated person will have been exposed to co-curricular areas such as music and art. He/she will have benefited from an educational experience designed to engender a strong sense of self and foster a love of learning.

The educated person will emerge from high school poised and prepared for success in the finest colleges and universities and beyond.

In summary, the philosophical underpinnings and the pedagogy that will be put into play in the proposed school is clearly related to the mission and educational philosophy. Specifically, it meets the objectives of the mission of the school:

- Providing Synchronous and asynchronous instruction.
- Using "world-class" content and college preparatory skill building in disciplines supporting the development of the core subjects of language arts, mathematics, science, and social studies, along with a wide variety of electives, career development courses, and other interests and mastery.
- Compelling inquiry-based learning.
- Project-based learning.
- Service-learning concentration.
- Peer interaction.

- Instilling in all student's intellectual curiosity and a sense of their unique purpose and strengths.

I. SCHOOL DESIGN

1. Mission Statement

A. *Briefly describe the core philosophy or underlying purpose of the proposed school.*

Mission: The mission of Virtual Preparatory Academy of Pennsylvania is to provide K-12 students with an innovative college preparatory cyber school grounded in strong academics, character education and service learning.

B. *What is your overarching vision of the school?*

Vision: Virtual Preparatory Academy will set the standard for academic excellence among public cyber charter schools in Pennsylvania by partnering with parents to promote individual student growth while positively impacting their local community.

In education, one size does not fit all, and the Virtual Preparatory Academy of Pennsylvania is dedicated to providing students and families with an online learning environment that can meet individual students' unique needs. The goal of the Cyber Charter School is to create a school that enables all of its students to become self-motivated, competent, lifelong learners. Virtual Preparatory Academy of Pennsylvania will provide a rich, rigor-filled, technology-focused, tuition-free public education, with engaging activities for the early grades and accelerated pacing towards completion of a high school diploma in the secondary education grades with online curriculum content and classes offered anywhere in Pennsylvania, all day, every day, 24-7.

2. Measurable Goals and Objectives

I. *What are the school's measurable academic goals and objectives to promote student learning?*

Academic Goals:

Based on the Future Ready PA Index, Virtual Preparatory Academy of Pennsylvania's Academic Goals are listed below. These were developed through review of current cyber charter school data, statewide averages for current state assessments, knowledge of the school focus on college prep, and alignment to Pennsylvania's long term Every Student Succeeds Plan.

PVAAS Academic Growth - ALL STUDENT GROUP

Definition: % of All Student Group Academic Growth Score

Subject	SY 2021-22	SY 2022-23	SY 2023-24	SY 2024-25	SY 2025-26
English Language Arts/Literature	74%	76%	78%	80%	82%
Mathematics/Algebra	66%	68%	70%	72%	75%
Science/Biology	70%	73%	75%	77%	80%

Proficient or Advanced on Pennsylvania State Assessments

Definition: % of All Student Group Scoring Proficient or Advanced on PSSA/PASA/Keystone Exams

Subject	SY 2021-22	SY 2022-23	SY 2023-24	SY 2024-25	SY 2025-26
English Language Arts/Literature	65%	68%	72%	74%	78%
Mathematics/Algebra	62%	65%	68%	70%	72%
Science/Biology	70%	73%	75%	77%	80%

Student Engagement as Measured by Regular Attendance:

	SY 2021-22	SY 2022-23	SY 2023-24	SY 2024-25	SY 2025-26
Regular Attendance %	90%	92%	95%	96%	97%

College and Career Measures

	SY 2021-22	SY 2022-23	SY 2023-24	SY 2024-25	SY 2025-26
Four Year Cohort Graduation Rate- All Students	NA	NA	70%	75%	80%
Five Year Cohort Graduation Rate- All Students	NA	NA	NA	80%	84%
Graduation Rate-Annual graduation rate percentage of students enrolled for all four years of high school	NA	NA	NA	88%	90%
Rigorous Course of Study- percentage of students participating in AP courses	2%	10%	15%	20%	25%

B. What are the school's measurable non-academic goals and objectives to promote student performance?

Non-Academic Goals:

- 1. Overall Parent Satisfaction Rates-** Parents/guardians must be partnered with teachers for a cyber charter school to be successful. Based on an annual parent satisfaction survey, Virtual Preparatory Academy of Pennsylvania parents will have an average 80% overall parent satisfaction rating in Year 1 and improving 2% each year to achieve 88% by Year 5.
- 2. Students are prepared for learning** as evidenced by participation in orientation events conducted by teachers. 85% of new students will complete orientation activities by the first week of school. The school will seek to improve this by two percentage points each year to achieve and maintain a 95% student orientation participation rate by Year 5.
- 3. Overall student participation in character education and community service events-** In Year 1, 70% of Virtual Preparatory Academy of Pennsylvania students will participate in a character education program or community service event. The school will strive to achieve a 5% improvement each year with a goal of 90% of students participating by Year 5.

3. Educational Program

A. Describe the educational program of the school, providing a detailed description of the curriculum and the content in all subject areas.

The philosophical pedagogy that will be emphasized and practiced at the Virtual Preparatory Academy of Pennsylvania will meet the mission and vision of the school. The statewide cyber charter school will use world-class content and college preparatory skill building in the core subjects of language arts, mathematics, science, and social studies while providing students access to other subjects such as fine arts, world languages and career focused electives. There will be an emphasis on inquiry-based and project-based service learning. Peer interactions will be in small and large virtual classrooms with both synchronous and asynchronous instruction. Class sizes will be conducive to ensure teacher-student engagement and promote the various methods of instruction. Our goal is to instill an intellectual curiosity and a sense of each student's unique purpose and strengths for their education.

ACCEL Schools' learning ecosystem, called the Accel Management Platform (AMP) for Education, integrates the best available courses with a powerful Learning Management System and Student Information System, providing students, parents, teachers, and administrators with a single sign-on, consistent user experience. The AMP system allows teacher to truly personalize learning and allows school administrators to operate an efficient online school centered on data.

Curriculum Overview

Virtual Preparatory of Pennsylvania's curriculum will meet Pennsylvania Core Standards. The curriculum will develop a foundation of basic skills and cultivate higher-order thinking skills. It will be simultaneously rigorous, engaging and relevant to students. The Cyber Charter School's curriculum and instructional framework is guided by online study learning models used nationwide. The Cyber Charter School's curriculum is also designed to meet the accreditation standards of Cognia (AdvancEd) as well.

Student learning will include online instruction and activities, off-line (print-based) activities and assignments, instructional staff/student discussion boards, project-based learning assignments, group instruction via electronic classrooms, and opportunities for collaborative projects. Courses at the school will offer off-line content and other age appropriate educational materials from nationally recognized publishers. This model offers a rich learning environment in that it combines a vast amount of age-appropriate learning resources available from a variety of sources including print, electronic media, and real-world experiences. This method of delivery relies on providing quality learning opportunities with the school's instructional staff guiding individualized student learning to facilitate student progress. Courses are structured around objectives, content, and assessments. The school's courses are designed to meet today's rigorous academic environment and Standards. The courses follow an objective-based learning structure. Courses are structured to include reading assignments, activities, projects, written assignments, oral or multimedia presentations, collaborative opportunities, or problem-solving and application assignments across all subject areas.

Students, learning coaches and teachers will utilize the available "Learning Guides" prepared by the course author to supplement textbook readings with additional supporting instructional material regarding a particular concept, guidance as to "what to look for" during the reading assignment, and additional reference materials from the Internet or other sources to expand on the concepts presented in the readings, stories, and supplemental texts.

Additional graded activities in each course may include but not be limited to:

- Research Papers
- Journals and Story writing
- Discussion board activities (classroom participation grade)
- Practice quizzes at the end of most topics
- Projects (both independent and collaborative)
- Oral or multimedia presentations

The Virtual Preparatory Academy of Pennsylvania's full-year courses are designed to contain approximately 180 hours of course work to complete or the equivalent of one Carnegie Unit or one year of study. Our semester courses are designed to deliver approximately 90 hours of course work to complete and are the equivalent of one-half of a Carnegie Unit or a high school semester.

The curriculum will, at all educational levels, be college-preparatory in nature providing a solid "Learning to Learn" foundation and designed to bring out the best in each student it serves. In every case, it has the flexibility to be tailored to a personalized level through individualized assessment and instruction. The

Virtual Preparatory Academy of Pennsylvania intends to provide advanced learner options through its programs and offer students opportunities for dual enrollment with community colleges and participating Universities.

Courses are rich with multimedia to keep students engaged throughout their online experience. Most of the multimedia is built using Flash technology. All courses contain a variety of flash tutorials that include audio, text, language translation and video components that reinforce course content and are designed to address various learning styles. All courses meet Web Content Accessibility Guide (WCAG) accessibility requirements. All of the courses have extensive, engaging self-check and practice activities for students to self-assess their mastery of the course content. A variety of Flash-based games including flashcard activities, crossword puzzles, drag and drop/matching activities, as well as basic self-check quizzes are provided. These activities can be completed as many times as the student desires until they have mastered the learning objectives and skills. The courses offer animations to demonstrate a concept where appropriate. For added motivation avatars are used that both entertain and teach concepts using flash technology. Avatars are used to present dialogues in foreign language courses as well as dialogues in instructional tutorials within core subjects.

Curriculum Offering

The curriculum for the Virtual Preparatory Academy of Pennsylvania includes a robust offering of classes in core subjects for all grade levels, Honors and Advanced Placement, credit recovery courses, electives, and Career Technology, along with an array of supplemental courses for specific student needs.

The curricular offerings were selected and make up a curated wholistic approach to offering instruction based upon Pennsylvania state standards. All curriculum providers have mapped the offered courses to Pennsylvania Standards thereby insuring the viability of instruction and congruence with Pennsylvania Core Standards. All the selected vendors have data available to support the effectiveness of their offerings, and the school's choice of the vendors is based on extensive evaluative information reviewed by Accel Schools in proposing the education program to be offered.

Grades K-5 Core Subjects and Electives: Accelerate Education

Courses in the elementary grades will focus on laying a solid educational foundation for students. By being both rigorous and engaging, they will capture students' attention, foster a love of learning, and lay the groundwork for student success in high school and beyond. To accomplish this, the Virtual Preparatory Academy of Pennsylvania will utilize the best available online curriculum, including but not limited to, Accelerate Education's online curriculum, to best meet the needs of all students within the target population:

- English Language Arts: The ELA program at the Virtual Preparatory Academy of Pennsylvania incorporates all five important building blocks of ELA development:
 - o Phonemic Awareness
 - o Phonics
 - o Fluency
 - o Vocabulary
 - o Comprehension
- Mathematics: The math curriculum builds essential skills while incorporating interesting challenges and puzzles. It is designed to continually build upon, reinforce and strengthen prior knowledge. The

curriculum provides ample opportunity for students to apply ideas, tools, and manipulatives in a real-world context.

- **Science:** Through the science programs, students explore topics through text and simple experiments; learn about grade level appropriate topics such as living and nonliving things, force and motion, light and sound, the solar system and the universe, electricity and matter, and scientific purpose; follow a lesson format in which they learn how to gather, organize, and interpret data and scientific information pertaining to concepts in the areas of physics, chemistry, biology, and earth science.
- **English Language Development (ELD):** The ELD curriculum uses a multimedia approach, including songs and animation, to help students gain fluency in English while at the same time advancing their math and ELA skills. Our online ELD program supports a variety of different first languages.
- **World Languages:** Students will begin foreign language studies at the Virtual Preparatory Academy of Pennsylvania starting in grade three. Spanish will be offered using an engaging format designed for teaching students to speak, listen, and read in these languages.
- **Social Studies:** Student will participate in a Social Studies curriculum that is engaging and multimedia rich. Students will have the opportunity to learn course content through a variety of styles and they will be able to demonstrate their learning in multiple ways.

Founded in 2011, Accelerate Education is a leading national online course provider. Accelerate Education’s courses have passed the most rigorous standards- based reviews, including the University of California’s extensive UC A-G online course approval process, as well as being fully accredited by the Cognia/North Central Association Commission on Accreditation and School Improvement (NCA CASI).

Grades 6-12 Core Subjects and Electives: StrongMind Curriculum

The Virtual Preparatory Academy of Pennsylvania will offer courses from StrongMind for grades 6-12 in both core subjects and electives. StrongMind provides immersive courses, both General and Honors, as well as a variety of electives that elevate the student experience and challenge the way they think. StrongMind’s robust digital courses empower and support students no matter where they are on their educational journey. The company’s digital curriculum has been awarded Emmys® (regional), CODiEs, Tellys, and EdTech Digest Awards.

Key features of the StrongMind curriculum include:

- Interactive Content- Courses incorporate simulations and other interactive content that keep students engaged and help them think creatively and critically. Interactive games permit students to use prior knowledge to problem-solve and take characters on a visual journey while practicing important science skills.
- Communication and Collaboration Tools- Teachers can communicate with students using discussion boards and can assign projects individually or as group, and those projects are embedded in the lesson.
- Curriculum is based on Universal Design for Learning (UDL)- UDL is a teaching and learning approach to help all learners be successful. StrongMind curriculum provides schools with tools, research-based content and formatting, and real-time student performance data to allow teachers

to meet the ever-evolving needs of students.

UNIVERSAL DESIGN: DIGITAL EDUCATION TO MEET THE NEEDS OF ALL STUDENTS

- Curriculum is based on Backward Design- The Backward Design Method is “backward” in that it starts with the end by first identifying the desired outcomes, goals or learning objectives (Wiggins & McTighe, 1998) for a course. The course developers then create appropriate assessments based on the desired learning outcomes. Finally, they design activities that promote those learning outcomes (Reynolds & Kearns, 2017).

Backward design provides the instructional design team with standardized, repeatable development processes. This method empowers teachers and students with a focused learning environment that promotes clear and concise learning outcomes. Advantages include:

- Students build the skills and knowledge needed to accomplish necessary learning goals.
- Unnecessary disruptions in the learning process are eliminated.
- Succinct objectives are maintained.
- Teachers spend less time planning courses and more time instructing students.

A study that compared a traditional model of curriculum design to backward design suggests teachers using backward-designed curriculum outperform teachers using a traditional-designed curriculum (Kelting-Gibson, 2005). Lessons using backward design scored higher on key components

including knowledge of content and pedagogy, selection of instructional goals, the design of coherent instructions and assessment of student learning.

A case study of the impact of the StrongMind curriculum on academic growth is available upon request.

Grade 9-12 Credit Recovery and Advanced Placement (AP) Courses: Accelerate Education

The credit recovery courses are designed to serve students seeking to recapture credit for courses previously taken. The program allows students to follow an individualized path based on pre-assessments and progress at their own pace while being excused from material for which they have demonstrated mastery. These individualized, self-paced, standards-based courses are intended to keep students on track for graduation.

AP Courses are available in Mathematics, Language Arts, Spanish, Science, and History/Government.

Elective and CTE courses: eDynamic Learning

The Virtual Preparatory Academy of Pennsylvania will offer additional Elective and Career and Technical Education (CTE) courses by eDynamic Learning. eDynamic Learning is the largest publisher of CTE courses in North America offering over 150 courses in middle and high schools. The CTE courses offered follow the National Career Clusters categories. ACCEL Schools curriculum department will work with the school board and leaders to develop an elective and CTE course offering for the 2021-22 school year and beyond.

All eDynamic courses are designed and written with engaging curriculum narratives that employ backwards design methodology to support best practices on how today's students learn. Each lesson is organized into manageable sections of text with the integration of visuals to keep students engaged. Teachers can also customize course units and lessons to provide more personalization for students.

Supplemental Curricular Resources:

To address the wide range of learners at the Academy, a variety of additional resources will be utilized by teachers. Students and teachers will have access to additional tools through supplemental resources such as but not limited to:

Brain Pop - is an online animated curriculum-based content that is aligned to state education standards. The site includes video, game, quiz, and activity sections for science, health, writing, reading, social studies, and math based on national education standards. <https://www.brainpop.com/>

Gizmos - interactive math and science simulations for grades 3-12. Over 400 Gizmos aligned to the latest standards help educators bring powerful new learning experiences to the classroom.

<https://www.explorelarning.com/>

IXL – an interactive online learning solution that helps teachers personalize instruction through comprehensive curriculum, continuous diagnostic, personalized guidance and analytics.

<https://www.ixl.com/>

Reading A-Z - an instructional content platform that provides Thousands of downloadable, projectable, printable teacher materials, covering all the skills necessary for effective reading instruction.

<https://www.readinga-z.com/>

Moby Max – a highly interactive online learning solution to find and fix learning gaps with adaptive, differentiated learning in all K-8 subjects. www.mobymax.com/

N2Y – a software package that works with the IEP stakeholder team with automated, daily data to streamline reporting, maintain compliance and inform decisions. <https://www.n2y.com/>

Newsela – an instructional content platform that provides teachers and students with access to 20+ genres of content to support core instruction, like primary sources, reference texts, essays, fiction, issue overviews, and more—all at 5 reading levels. <https://newsela.com/>

DIBELS – provides a battery of short (one minute) fluency measures that can be used for universal screening, benchmark assessment, and progress monitoring in Kindergarten - 8th grade

<https://dibels.uoregon.edu/>

Appendix A includes sample course scope and sequence and initial course provider alignments. The Accel Schools curriculum team will work with school leaders to provide tools so any gaps in the core curriculum are covered by supplemental content offerings. All school staff will have access to a database that will list all Pennsylvania Core Standards for all grades and the alignment to where those lessons can be found in the core or supplemental curriculum. Below is a screenshot for what the database would produce after a search for a state standard. The orange is the core curriculum and the blue/green columns show supplemental content options.

5.G.2	CC.5.G.2 Graph points on the coordinate plane to solve real-world and mathematical problems. B. Describe how your school will meet the educational needs of students with disabilities in accordance with Chapter 711. Provide a projection of the number and type of special education programs that will be operated directly by your charter school or through contracts. Provide a projection of the number and type of related services that will be provided directly by the charter school or through contracts.

Serving Students with Special Needs

Special Education policies and procedures are included in **Appendix B**.

Virtual Preparatory Academy of Pennsylvania will have an open enrollment policy: any eligible public school student in the Commonwealth of Pennsylvania can attend. The school will not discriminate in its admissions policies or practices on the basis of geography, intellectual or athletic ability, measures of achievement or aptitude, status as a student with a disability, test scores, disabilities, etc.

As a public school, Virtual Preparatory Academy of Pennsylvania will comply with 22 PA. Code Chapter 711-Charter School and Cyber Charter School Services and Programs for Children with Disabilities and with the Individuals with Disabilities Education Improvement Act (IDEA), 20 U.S.C.A. §§ 1400 et. seq. and implementing regulations, including Section 300.209 of Title 34 of the Code of Federal Regulations, and Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794 (sec. 504) and the Americans with Disabilities Act. Virtual Preparatory Academy of Pennsylvania will provide a free appropriate public education (FAPE) to children with disabilities, even if such children are progressing from grade to grade, including, but not limited to, identifying, evaluating, and planning educational programs, and implementing placements in accordance with those Acts. Virtual Preparatory Academy of Pennsylvania is prepared to serve as a Local Education Agency (LEA).

Accel will support the delivery of special education and related services at Virtual Preparatory Academy of Pennsylvania. Accel has experience supporting cyber schools in other states and the national director of special education is a Pennsylvania resident and has served other Pennsylvania cyber schools and districts for over 15 years.

Based on current cyber charter school data in the state, Virtual Preparatory Academy of Pennsylvania's

budget is based on 12.5% of student s having IEPs.

Procedural Safeguards Notice

Parents of children who receive or who may be eligible for special education services have rights under IDEA 2004. The Procedural Safeguards Notice provides a detailed explanation of those rights. Virtual Preparatory Academy of Pennsylvania will give parents a copy of the Procedural Safeguards Notice and the explanatory Procedural Safeguards Letter at least once each school year. Parents can also obtain a copy of the Procedural Safeguards Notice from Virtual Preparatory Academy of Pennsylvania at any time. An additional document will be available to help parents to better understand the Notice document. The Parents' Rights: Understanding the Procedural Safeguards Notice provides a summary of those rights. Parents will also receive the Parents' Right s documents upon initial referral or upon the parents request for an evaluation and in accordance with discipline procedures when a change in placement occurs.

Surrogate Parent

As part of the IEP process, Virtual Preparatory Academy of Pennsylvania will recognize a qualified adult must participate as the "parent" (34 CFR 300 .30) for the student. A surrogate parent is someone who acts on the child's behalf in matters relating to the identification, evaluation, educational placement, and provision of FAPE to the child. A surrogate will be appointed and trained on how to participate and make decisions on the child's behalf in the following situations: a biological, adoptive, foster, parent, or guardian are not available; a grandparent or step parent with whom the child lives or a person who is legally responsible for the child is not available; the child is an unaccompanied homeless youth.

Virtual Preparatory Academy of Pennsylvania will have a method in place to secure a surrogate when needed. When it is determined that a student is in need of a surrogate parent, the surrogate will be appointed within 30 calendar days. Virtual Preparatory Academy of Pennsylvania will maintain a pool of trained parent surrogates and may collaborate with Intermediate Units (IUs) when additional surrogates are needed.

Virtual Preparatory Academy of Pennsylvania will not allow the following persons to be appoint ed as a surrogate parent: employees of an agency already involved in the care or education of the student; school employees; or persons with a potential conflict of interest.

Identifying Students and Child Find

As a cyber school in Pennsylvania, Virtual Preparatory Academy of Pennsylvania will be bound by the Child Find requirements of Chapter 711 of the Pennsylvania School Code, "Charter School and Cyber Charter School Services and Programs for Children with Disabilities," as well as the requirements of IDEA 2004, Section 504 of the Rehabilitation Act of 1973, and the Family Educational Rights and Privacy Act (FERPA). The school's Director of Special Education will serve as the Child Find Coordinator and provide Child Find information to school staff, parents, and state and local organizations and agencies. These efforts will include compliance with the special education referral process, providing professional development to staff and Student Support Team (SST), participating in the Multi-Tiered Systems of Support/Response to Intervention and Instruction (MTSS/RtII) process, including universal screening

procedures, creating and maintaining written policies and procedures related to Child Find, and involvement in public awareness activities related to Child Find of implementation of students enrolled in Virtual Preparatory Academy of Pennsylvania. In addition to the Child Find procedures, the staff will provide a Student Assistance Program to supplement these efforts.

Pre-referral/Referral/Initial Evaluation

Students may be referred for special education evaluation by their parents, teacher, or the SST. The SST, consisting of general education teachers, intervention specialists, and school administrators will regularly review struggling students. The SST will consult with the parents and address struggling students' needs through the MTSS/RtII process. With parental consent, the teacher will implement and document interventions and the student's response to interventions. The student's responses to MTSS/RtII efforts are used as one data metric in the determination of special education eligibility. These interventions will not be used to delay or deny a parent-requested special education evaluation.

When a parent requests a special education evaluation, the process will occur concurrently with the MTSS/RtII process if the student is in need of academic intervention. Virtual Preparatory Academy of Pennsylvania will respond to the parent within ten days with the Permission to Evaluate-Request (PTE-Request) form and will send Permission to Evaluate-Consent (PTE-Consent) form to gain the parent's permission to evaluate. This form outlines the reason for the special education evaluation referral and lists the assessments that will be used. Parental input and any outside evaluations will also be collected during the evaluation process. Parental rights will also be provided during this process by providing the parents with Parents' Rights: Understanding the Procedural Safeguards Notice, the Procedural Safeguards Notice, and the explanatory Procedural Safeguards Letter.

The special education evaluation will be coordinated with the parent and an evaluator in close proximity to the student and completed within 60 days of Virtual Preparatory Academy of Pennsylvania's receipt of signed PTE-Consent form. Once the evaluation is complete, the parents will join an interdisciplinary team meeting to review the assessment results and determine the student's eligibility for special education, completing an Evaluation Report (ER). If the student is found eligible for special education, Virtual Preparatory Academy of Pennsylvania will convene a meeting to develop the student's Individualized Education Plan (IEP) with the IEP Team. The IEP Team will meet within 30 days after the completion of an Evaluation Report (ER). The IEP Team will include all required members including the parents.

Allowing for Differences in English Language Skills and Ethnic Background

Evaluations must take into account the child's English language skills and ethnic background to ensure that the testing and evaluation will not be unfair for children of any race or culture. Tests must be given in the native language or mode of communication that is most likely to give accurate information on what the child knows and can do academically, developmentally, and functionally, unless it is clearly not feasible. Evaluations also must take into account the child's disability to make certain the test measures what it is supposed to measure. For example, a child with a severe visual impairment should be provided with appropriately-sized testing materials to accommodate for his disability.

School Professional Development Related to Child Find

The school's Director of Special Education and SST leader will provide the entire Virtual Preparatory Academy of Pennsylvania staff with Child Find training and compliance progress updates. At the start of the school year, the staff will be provided training on documenting information received by parents regarding special education evaluation requests, including timelines and the importance of timeliness in responding and alerting the Virtual Preparatory Academy of Pennsylvania special education team. Subsequent professional development for school staff will include how to interpret universal screening results, intervention processes and results, as well as measures of compliance with Pennsylvania Special Education Evaluation Timelines.

The Multi-Tiered Systems of Support/Response to Intervention and Instruction (MTSS/RtII) Team

Special education will be represented in the MTSS/RtII process, providing guidance to the team on specific instructional and behavioral approaches for students. The special education team member will ensure that students are referred for special education in a timely manner, engaging parents in the process. As a member of the team, the special educator will verify that the struggling student has received appropriate instruction and that the student's difficulties are not related to Limited English Proficiency. Data related to academic achievement, behavior concerns, intervention results, and academic progress will also be reviewed.

Universal Screening

Virtual Preparatory Academy of Pennsylvania will administer universal screening instruments to identify students in need of instructional interventions and, potentially, special education evaluation. Systemic screening of students will be ongoing and will lead to identification, location and evaluation of those needing special education services. The special education staff will be thoroughly trained to understand their responsibilities concerning Child Find. Consistent with Child Find, parental notification activities will be combined with screening at the time of student enrollment and throughout a student's educational process. Initially, parents will be provided with a questionnaire about their student's learning styles and functional abilities. These responses will then be reviewed and validated through screening tools used by the special education staff.

Screening procedures will include but are not limited to ongoing analysis of the student's response to instruction; performance on statewide assessments; reviews of enrollment records, health records and transcripts/report cards. The screening activities will also include hearing and vision screens to be completed by the school nurse or a private physician as mandated under the Pennsylvania School Code.

Written Policies and Public Awareness Related to Child Find

Virtual Preparatory Academy of Pennsylvania's statement about Child Find will be accessible to the general public and will be located on the general school public website as well as through banner messages on homepages within the AMP system. In addition, a link to the Pennsylvania Parent Guide to Special Education for School-Age Children will also be provided.

Disproportionality

Virtual Preparatory Academy of Pennsylvania will collect and examine data regularly to ensure

disproportionality is not evident in the areas of identification, academic settings and placements, and disciplinary measures. In addition to cultural sensitivity and awareness training, the following practices will be implemented to ensure students are found eligible for special education services without unjust bias:

- Evaluations will be administered by trained and licensed personnel.
- More than one single measure or assessment will be used to determine a disability.
- Evaluations will not be discriminatory or racially/culturally biased.
- Evaluations will take into consideration the child's English language skills, including ethnic background.
- Evaluations will be administered in the child's native language, or mode of communication.

If there is any evidence of disproportionality, the school will review, and revise if needed, all procedures and policies that may be contributing.

Reevaluation

Virtual Preparatory Academy of Pennsylvania will remain in full compliance with regulations requiring triennial special education reevaluations to determine continued eligibility and need for special education services. Prior to conducting the reevaluation, the IEP Team will meet to discuss the need for reevaluation, review existing data, and determine additional data needed to best meet the needs of the student. The review of existing data will be documented in the Reevaluation Report (RR) form. If the team agrees that a reevaluation is needed, the school will then issue a Permission to Reevaluate-Consent (PTR-Consent) form to obtain signed parental consent for reevaluation. Virtual Preparatory Academy of Pennsylvania will not proceed with the reevaluation without parental consent and will make every attempt to receive consent.

Virtual Preparatory Academy of Pennsylvania will complete all reevaluations within the 60 days of the receipt of signed parental consent, as required by Pennsylvania statute. Reevaluations will be conducted by a qualified examiner at a location proximate to the child. All evaluations conducted by Virtual Preparatory Academy of Pennsylvania will take a child's English Language ability and disability into consideration. Once the evaluation is complete, Virtual Preparatory Academy of Pennsylvania will provide parents with a copy of the report. A multidisciplinary team will then review the report to determine continued eligibility. Once a child is found to continue to need special education services, and the RR form will be completed and provided to parents, then an IEP Team meeting will be scheduled to develop the IEP.

If the team, including the parent, agrees that reevaluation is not necessary, the school will provide the Agreement to Waive Reevaluation form to the parents, with reasons the reevaluation was waived. Parents must sign this form as an agreement to waive the evaluation. If parents disagree, the reevaluation must proceed. If at any time, the parent or school believes they need an assessment to benefit the child, the team can convene to discuss conducting a reevaluation. The only exception to the three-year reevaluation requirement involves students that have been identified as intellectually disabled, who must be reevaluated every two years.

If at any time, a parent believes that Virtual Preparatory Academy of Pennsylvania's evaluation was not

conducted properly, the parent has the right to request an Independent Education Evaluation (IEE). Following administrative policies and procedures, Virtual Preparatory Academy of Pennsylvania will respond to the parent's request for an IEE using the Notice of Recommended Educational Placement (NOREP) within ten days. Virtual Preparatory Academy of Pennsylvania will provide the IEE by an approved evaluator to the parent at the school's expense. The IEE results will be taken into consideration when considering eligibility for special education and the provision of FAPE.

Students who Enroll with an IEP

During enrollment families will be asked if their child has an IEP or 504 plan. Parents may provide a copy of the documents or Virtual Preparatory Academy of Pennsylvania will obtain the documents. Virtual Preparatory Academy of Pennsylvania will conduct IEP meetings within 30 days of enrollment for all new students to adopt the IEP, amend the IEP, or conduct an annual review. In addition to being active participants in the IEP Team meetings, parents will be provided with Notice of Recommended Educational Placement (NOREP) detailing the decisions of the IEP Team.

IEP Team Process

Once the evaluation team has determined a child has a disability and requires special education and related services, an IEP will be developed within 30 days of the eligibility determination. From that point on, the IEP will be reviewed yearly unless a meeting prior to the annual due date is necessary. The annual IEP will be implemented within ten school days of the IEP meeting. Special Education reevaluations will be conducted every three years or more frequently if needed. If a student has an intellectual disability, the reevaluation will take place every two years or more frequently if needed. An IEP meeting will take place within 30 days of the completion of the reevaluation report. The report will be provided to the parent at least ten days prior to the reevaluation IEP meeting. If a student comes from out of state, and the disability is not recognized in the state of Pennsylvania, the school will still provide FAPE and comparable services while offering to conduct a new evaluation. The IEP Team will include all required members including:

- Parents;
- A minimum of one general education teacher;
- A minimum of one special education teacher and any related service providers;
- A designated school representative knowledgeable about the special education programs, curriculum and resources (LEA);
- Student (if turning 14 years or older during the duration of the annual IEP or if the parent wants the student to participate prior to age 14);
- A qualified person that can interpret the evaluation findings; and
- Anyone else the parent would like present at the meeting that is familiar with the child and their education.

Parents are IEP Team members and Virtual Preparatory Academy of Pennsylvania will take all steps needed to ensure that one or both of the parents are present at each IEP Team.

The IEP developed will address:

- Any new evaluation reports,

- Student strengths,
- Parent input,
- Both present level academic and functional performance,
- Measurable yearly goals (and objectives if the student is alternatively assessed),
- How the disability affects progress in the general education curriculum,
- Services and programs with dates (including transportation needs),
- Progress reporting (at least quarterly during the school year) and how the progress will be evaluated,
- Participation in general education classes (and other activities) with children without disabilities,
- Accommodations (including supplementary aids and services), and
- Participation in Pennsylvania statewide testing.

The IEP Team will also examine behaviors, including how they may interfere with learning (or that of peers) and if a behavioral management plan should be created. The IEP Team will take into account if the student has limited English proficiency, communication and assistive technology (AT) needs, as well as eligibility for Extended School Year (ESY) services. If the student is transition age (14 years or older), transition assessments, annual goals, activities, and courses of study will be developed to support postsecondary goals.

Virtual Preparatory Academy of Pennsylvania will hold annual reviews of the IEP, including reviewing student progress within the existing IEP, reevaluating whether the student is benefitting from the program, and creating new IEP goals. If the student is not benefitting from the program, a new IEP will be developed and changes will be recommended regarding the student's placement.

Least Restrictive Environment (LRE)

To the maximum extent appropriate, children with disabilities will be educated with children who are nondisabled; and special classes, separate schooling, or other removal of children with disabilities from the general educational environment will only occur if the nature or severity of the disability is such that education in general classes with the use of supplementary aids and services cannot be achieved satisfactorily. In determining the educational placement of a student with a disability, the placement decision is made by a group of persons, including the parents, and other persons knowledgeable about: the child, the meaning of the evaluation data, and the placement options. Such decision must be made in conformity with the LRE provisions of the federal regulations. In selecting the LRE, the IEP team will give consideration to any potential harmful effect on the child or on the quality of services that he or she needs. A student with a disability will not be removed from education in age appropriate regular classrooms solely because of needed modifications in the general education curriculum. In providing nonacademic and extracurricular clubs and activities, each student with a disability will participate with nondisabled children in the extracurricular clubs and activities to the maximum extent appropriate to the needs of that student.

Virtual Preparatory Academy of Pennsylvania will provide special education and related services within the Least Restrictive Environment (LRE) for all students. This includes taking into consideration supplementary aids and services, accommodations, and ESY while ensuring the student is educated with

nondisabled peers, to the maximum extent possible, and making expected gains on IEP goals. The Director of Special Education will work closely with the general education teachers to ensure that every student receives accommodations, modifications, and all needed services to access and progress in the general education curriculum. Assistive Technology (AT) may include collaboration with PaTTAN AT consultants and Intermediate Unit (IU) staff, collaboration with Accel AT support staff, access to PaTTAN's short term AT loan library and AIM Center (Accessible Instructional Materials), closed captioning, speech to text, and text to speech. Accel has experience supporting cyber schools by facilitating the provision of text-to-speech and speech-to-text software, screen readers, magnification software, tablets, etc. for students with disabilities. In addition, available supports for hearing impaired students include closed captioning or American Sign Language during live instruction sessions. Extended School Year (ESY) will be considered by the IEP Team, at each IEP meeting, determining if potential regression over school interruptions or other relevant factors may interfere with the student's access to FAPE.

Continuum of Services and Placement

Virtual Preparatory Academy of Pennsylvania will have a continuum of special education and alternative placements available to ensure FAPE is being provided in the LRE.

- Consultative support will be provided for the general education teachers to provide modifications and accommodations to the general education curriculum.
- Itinerant, supplementary or full-time special education support will be provided via the telephone, Internet, live instruction sessions, as well as in person depending on the needs of the student.
- Direct related service support (for example: speech-language, occupational, or physical therapy, psychological counseling,) will be provided face-to-face at the providers' locations, via computer, in homes, community sites, and therapist offices.
- Related services will include: parent training, autism support, parent groups, student support groups, and itinerant hearing or vision support consistent with the student's IEP.
- Ongoing progress monitoring will be provided for every student: including frequent and thorough review of student performance, attendance or non-attendance, and participation data as reported to the student, parent and teacher through their respective home pages.
- Every conversation (phone, email message, live instruction session student attendance or non-attendance) and consultation with the student and/or parent as well as general education teachers will be carefully logged.
- Providers of direct/related services will be tracked with close scrutiny by the special education staff of any missed appointments or incomplete services.
- Intermediate Unit classrooms will be provided.
- Private placements will be arranged if required.

Alternative placements will be considered when the virtual environment, including the use of supplementary aids and services, accommodations, and ESY are no longer meeting the needs of the student. Alternative placements will include special classes, special schools, approved private placements, and home and hospital instruction. Accel has prior experience supporting cyber schools in

facilitating placements in both Intermediate Unit (IU) schools and in private placements. Resources to support alternative placement options may include collaboration with the student's resident school district, IUs, and approved private schools (APS Directory 2015, Approved Private Schools, School Districts, and Pennsylvania IUs). Once an alternative placement is agreed upon by the team, a NOREP and Procedural Safeguards will be issued to document the team decision.

Program for Alternatively Assessed Students

Virtual Preparatory Academy of Pennsylvania will provide a comprehensive program for students qualified to take Pennsylvania's alternative state assessment, PASA. To the greatest extent possible, these students will be included with their same age classmates so they may enjoy age-appropriate communication and socialization. Students participating in the alternative curriculum program may or may not have classes with their general education peers. For example, some alternative curriculum students will participate in only alternative courses, while others may participate in electives with their general education peers, in addition to their alternative core coursework. The LRE will differ for these two groups of students and is determined by each student's IEP team. The Alternative Education Program will include specially designed instruction to address each student's IEP goals as well as alternative curriculum resources. Accel will provide support for teachers and special education leaders related to data analysis and related service provision for these students.

Related Services

Cyber schools offer a vast range of options for the delivery of related services. Virtual Preparatory Academy of Pennsylvania will contract with Accel to support the delivery of related services. Related services provided to students will include, but are not limited to:

- Speech-language services,
- Occupational therapy,
- Counseling services,
- Social work services,
- Behavior therapy,
- Special transportation,
- Physical therapy,
- Audiology services,
- Social skills,
- Autism support,
- Parent training,
- Orientation and mobility,
- Closed-captioning, and
- American Sign Language translation.

Related services will be equally accessible to all students in Pennsylvania. It is anticipated that most students receiving related services will receive a combination of speech-language services, occupational therapy services, and counseling services. As determined by the IEP Team, the student may receive these services in a cyber setting and/or face-to-face. Services will be provided face-to-face at the providers' locations, via computer, in homes, community sites, and medical offices. Decisions as to the

location of service delivery will be made during the IEP team meeting with input from the parents of the student.

Students attending other cyber schools in Pennsylvania have been receiving services in both settings for many years. When the IEP Team determines that the services will be provided face-to-face, the services will be provided at a mutually convenient location for both the family and the provider. Options for locations include the student’s home, the therapist’s business location, libraries, community centers, and so forth. For services provided outside of the home, special transportation will be provided or the parent may choose to receive mileage reimbursement for transporting their child.

Virtual Preparatory Academy of Pennsylvania will provide related services by engaging IUs, private businesses, agencies, hospitals, adult service providers, and so forth. For each provider serving enrolled students, Virtual Preparatory Academy of Pennsylvania will maintain copies of licensure and certification, background checks, etc. consistent with Pennsylvania law.

Below is a list of the targeted vendors the school will consider:

No	Related Services Vendors	Types of Services	Phone No.	Website
1	Therapy Source, Inc.	Virtual, blended and traditional delivery of OT, PT, SLP, Special Ed. Teacher, School Psychologist	866-783-5301 x316	www.txsource.com
2	Presence Learning	Virtual delivery of SLP, OT, School Psychologist, Behavioral & Mental Health Services	415-512-9000	www.presencelearning.com
3	Maxim Healthcare Group	SLP, School Psychologist, Special Education Teacher	(440) 371-3880	maximhealthcare.com
4	Humanus	Special education teacher, SLP, PT, OT, School Psychologists,	1-877-630-4010	www.humanus.com
5	Global Teletherapy	SLP, OT, Mental health specialist	1-888-511-9395	globalteletherapy.com

Assistive Technology

Virtual Preparatory Academy of Pennsylvania will provide students with Assistive Technology (AT) as defined by IDEA 2004, any item, piece of equipment, or product system, whether acquired commercially-off-the-shelf, modified or customized, that is used to increase, maintain, or improve the functional capabilities of a child with a disability. Consistent with Pennsylvania Chapter 711, the IEP Team will consider assistive technology needs for every student with an IEP. Students will have access to screen readers, text readers, dictation and word prediction software, large monitors, alternative keyboards and mice, and other high- and low-tech AT devices as specified in the students' IEP.

National Instructional Materials Accessibility Standard (NIMAS)

Virtual Preparatory Academy of Pennsylvania will ensure timely delivery of print instructional materials in accessible formats to blind or other enrolled students with print disabilities. Virtual Preparatory Academy of Pennsylvania will work with Accessible Media Providers (AMPs), such as Bookshare, to provide eligible students files in the NIMAS standard. These files are based on the international DAISY (Digital Accessible Information System) standard, essentially the DAISY/NISO (National Information Standards Organization) Z39.86 2005 standard and is required by Federal IDEA regulation. DAISY is an internationally recognized technical standard used to facilitate the creation of accessible content. These files are electronic documents created by textbook providers, submitted to AMPs, and then requested by public schools. These files will be provided to eligible students as part of the school's accessibility provision and assistive technology considerations of the students' IEP teams.

Independent Living and Life Skills

As part of Virtual Preparatory Academy of Pennsylvania's postsecondary transition planning and alternative curriculum program, the school will implement independent living and life skills programming for students with IEPs. Designed to provide life skills support, this program will provide the instruction necessary for students to function independently as adults to the fullest extent possible. Independent living and life skills will be addressed in students' IEPs with appropriate transition activities and goals clearly determined and outlined after conducting thorough transition interviews and assessments with the students and their families. All goals and associated activities will be directly aligned with students' present levels. Activities may range from self-care to money management to community navigation. Frequent, regular progress monitoring and documentation of goal progress is an integral part of Virtual Preparatory Academy of Pennsylvania's life skills and independent living programming. As appropriate, the team may determine that intensive interagency collaboration is needed to best meet the independent living and life skills goals.

Language Instruction Educational Program (LIEP)

The Virtual Preparatory Academy will create an annual Language Instruction Educational Program (LIEP) per state requirements. The program, at a minimum, will:

- Be aligned to state academic standards for the appropriate grade level of the ELs;
- Include ELD instruction delivered by properly certified teachers who hold an ESL program specialist certificate or who are working in conjunction with ESL certified teachers;
- Incorporate the use of the Pennsylvania English Language Development Standards (ELDS);
- Provide equitable access to content for ELs at all language proficiency levels by providing

- research-based bilingual or sheltered instruction with fidelity; and
- Not limit the enrollment of ELs in any course or academic program for which they would otherwise be eligible.

The plan and evaluation results will be made available to all staff working with ELs as well as parents of ELs.

Identification

All Virtual Preparatory Academy of Pennsylvania families will answer a series of questions to understand a student's home language as a first effort for Child Find and to determine if they need any additional English language support. Students with positive responses to any of the Home Language Survey questions will be referred to the English Language Development Coordinator. These students will be administered the state approved placement assessment, now the WIDA Screener, within 30 days of enrollment at the beginning of the school year or two weeks of enrollment during the school year. A student who meets the Pennsylvania's entrance criteria is identified as an English Learner (EL). Parents will be notified annually using the state-approved parent notification form.

Individual Learning Plans

All English Learners in the Virtual Preparatory Academy of Pennsylvania will have an Individual Learning Plan (ILP), and the plan will be implemented with fidelity by all teachers and staff who work with the student. The ILP will detail strategies, instructional and assessment accommodations, modifications, goals for the student, and results on the state and local assessment data. The ILP will be updated annually or earlier if needed to reflect the student's language proficiency growth.

Program Models and Program Design

ELs will have equitable access to academic content for all courses in which they are enrolled. WIDA Can Do Descriptors will be utilized by integrating them into content area instruction via collaboration between the school ELL Coordinator and teachers. Below is an example WIDA Can Do Descriptors that will be utilized for programming and services.

By the end of each of the given levels of English language proficiency* English language learners can...

		ELP Level 1 Entering	ELP Level 2 Emerging	ELP Level 3 Developing	ELP Level 4 Expanding	ELP Level 5 Bridging	ELP Level 6 Reaching
KEY USE OF RECOUNT	LISTENING	Process recounts by <ul style="list-style-type: none"> Identifying familiar objects or places from oral statements Pointing to objects, people, or places based on short oral descriptions 	Process recounts by <ul style="list-style-type: none"> Sequencing labeled visuals per oral directions Identifying settings or time frames in narrative or informational scenarios read aloud 	Process recounts by <ul style="list-style-type: none"> Matching main ideas of familiar text read aloud to visuals Stating the next event in a series based on clues from narrative or informational oral texts 	Process recounts by <ul style="list-style-type: none"> Identifying main ideas and details in oral discourse Evaluating oral presentations of peers based on criteria for success 	Process recounts by <ul style="list-style-type: none"> Categorizing details of content-related main ideas seen and heard in videos or other technologies Sequencing a series of illustrated events from oral passages (e.g., <i>historical recaps</i>) 	Process recounts by <ul style="list-style-type: none"> Identifying key ideas expressed orally Identifying new information expressed by others
	SPEAKING	Recount by <ul style="list-style-type: none"> Answering select Wh-questions Naming and briefly describing past community or school events using visual support (e.g., <i>posters, photographs</i>) 	Recount by <ul style="list-style-type: none"> Stating main ideas or points of classroom conversations Restating details of content-related topics (in home language and English) in small groups 	Recount by <ul style="list-style-type: none"> Relating a series of events by expressing time in multiple tenses Connecting ideas in content-related discourse using transitions 	Recount by <ul style="list-style-type: none"> Paraphrasing and summarizing content-related ideas presented orally Connecting ideas with supporting details in a variety of oral venues 	Recount by <ul style="list-style-type: none"> Producing oral multimedia, content-related reports based on research from multiple sources Tracing the evolution of literary characters, themes, and plots from different venues (e.g., <i>digital text or video</i>) 	Recount by <ul style="list-style-type: none"> Restating new information expressed by others in extended speech Posing questions that elicit elaboration and responding to others' questions and comments

Annual Training of Staff

The Virtual Preparatory Academy will provide annual professional development related to English Language Development for all personnel as part of the school's professional development plan. The Virtual Preparatory Academy of Pennsylvania will also pursue technical support and staff training offered through PDE. Trainings will occur at the start of each school year and will be delivered by a certified ESL professional. A sign-in procedure will be utilized to ensure all staff attend the mandatory training annually. If staff are hired during the school year, the Virtual Preparatory Academy of Pennsylvania will ensure that the training will be part of the onboarding process.

Based on a review of current statewide virtual charter schools, the Virtual Preparatory Academy of Pennsylvania is expecting between 5% of the student population to be English Learners. The school has budgeted for a full-time licensed ESL teacher in Year 1 to support the start of the EL program and growing to seven ESL teachers by Year 5. The school may contract out for Pennsylvania language assistance services. The school will use local, state, and federal funding to provide the EL program.

Monitoring and Evaluation:

EL students will be monitored for their progress throughout the school year and assessed annually using the WIDA ACCESS assessments. Students who meet Pennsylvania's exit criteria on that assessment will be reclassified as Fluent and exit EL services but be monitored per state guidelines.

The EL program will be reviewed annually based on local and state data of English Learners and the general student population and other overlapping subgroups such as special education and free and

reduced lunch. The annual review will include looking at data regarding equitable representation, academic achievement, elementary and secondary programming, professional learning and teacher capacity, family engagement, and resource allocation.

Gifted Students

Students in grades K-8 will be offered gifted enrichment services and programs necessary to personalize their learning. The school will provide targeted supports and feature teacher-led differentiation including materials, enrichment activities, and specialized instruction. Students may be considered for acceleration and alternative placements. Students in high school will also be offered a robust program including Honors and Advanced Placement courses.

Students are identified as gifted through formal evaluation in the domains of general intellectual, general creative, specific academic, technical and practical arts, visual and performing arts, and interpersonal. Once identified, students are provided services necessary for the fulfillment of their exceptional potentials. The gifted program will incorporate the same educational standards as the standard offering but will also include enrichment activities which will expand upon lesson topics and programs, higher-level thinking and understanding. Gifted learners will be grouped together and given opportunities for group interaction through live learning sessions.

The gifted program will offer a great deal of flexibility. Gifted students may be placed in different curriculum levels for different subjects to support a specific need. A sixth grader with a high aptitude in math could be placed in Gifted and Talented Math 6 where students engage in eighth grade math content, while continuing to take sixth grade level courses in other subjects. For students identified as exceptionally gifted through formal evaluation, whole grade level acceleration, and acceleration in individual subjects may also be considered.

The high school program will further offer rigorous college preparatory curriculum that will provide students the opportunity to enroll in Honors and AP courses. Honors courses will offer advanced student opportunities to participate in extension projects, investigations, and activities that require integrated skills application and higher-level thinking. Placement in these courses will be carefully considered and included alongside continued gifted supports. Course selection will be made in close consultation with students and parents.

Success of intellectually gifted students will be determined by reviewing and assessing relevant data, including academic performance, performance on state assessments, benchmark assessments, AP exams, PSAT/SAT/ACT performance, and college acceptance rates.

Teachers will be provided professional development on serving students of high ability specific to grades served, identification of domains of ability, differentiating instruction and learning paths, and evaluating the student's success.

Through these supports, gifted students across the K-12 spectrum at the Virtual Preparatory Academy of Pennsylvania will be supported academically and emotionally and will have the resources and support

necessary for the realization of their exceptional potentials.

Referral Process & Multi-Tiered System of Supports

Engagement Protocol

The school engagement protocol is an accountability-focused approach to student and family engagement. This protocol sets a minimum level of daily expectation for students and families.

Components

- Definition of observable student engagement behaviors
- Process for identifying un-engaged students
- Implementation of an effective process to support identified students
- Resolution through successful re-engagement or determination of need for withdrawal

Expectations

- Common “non-negotiables” – i.e. standardized testing, communication, orientation/onboarding completion, attendance in class, course progress

Results

- If compliant: increased academic success, engagement, exiting from intensive supports
- If non-compliant: intervention plan, conference with school administration, withdrawal

The Student Services Referral for Student Support

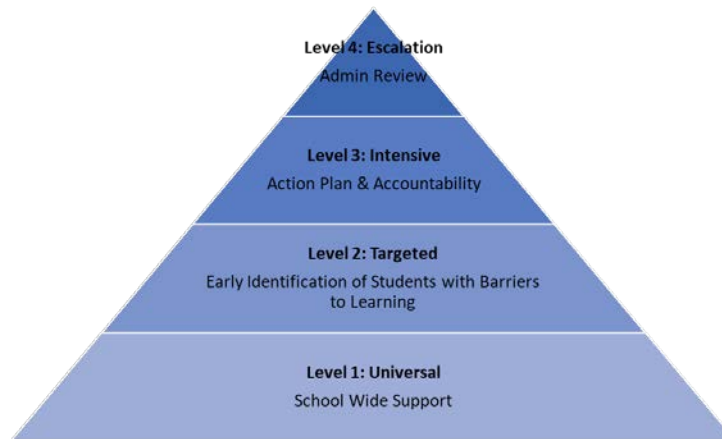

- A referral is a method by which the Student Services team becomes aware support is needed for a student. Student Services team members assist students in achieving success for those needing an additional layer of support through a tiered intervention process.
- Referrals can happen for several reasons, including but not limited to:
 - Onboarding Support
 - Social, emotional, and behavioral issues
 - Parent training
 - Student welfare concerns
 - Community referrals
 - Not completing assessments
 - No/Low attendance in live classes
 - No/Low progress in courses
 - No/Low attendance

Student Success Plans

The Student Success Plan is an essential part of the Student Services model. The success plan outlines the individual student needs and specific actions for a student to become successful with the goal of academic achievement.

Student Services, teachers, students and learning coaches develop the Student Success Plan together. The assigned Student Services team member facilitates the process, monitors the plan, and provides ongoing follow up.

Student Referrals and Support Multi-Tiers

Understanding the Multi-Tiered Levels of Support

Level 1: Compliant

- Student and family do not need additional services. School wide prevention and programming, along with teacher support provide the first level of service to all students and families.

Level 2: Targeted Support

- A student need has been identified. Student and family are unresponsive to standard teacher interventions and support. Student Services staff begins supporting the student/family to address the issue at hand. Student and family are engaged in the process.

Level 3: Action Plan & Accountability

- Student Services team member has been working with the student/family. However, the family is not complying and must be held accountable to meet the student's educational needs. Non-compliance may result in consequences as defined by the school.

Level 4: Escalation to Administration

- All available resources and interventions have been exhausted. The family is not compliant or is unengaged in the process. School administration determines course of action.

C. Describe the teaching methods that will be used to deliver instruction and assess academic performance. How will this pedagogy enhance student learning?

Instructional Practices

Learning best occurs when teachers are well prepared, best practices are employed, the students are engaged, and the lessons suit individual needs. The Virtual Preparatory Academy of Pennsylvania's educational approach will feature an innovative curriculum, a high degree of connectivity and personalized attention, intensive teacher training grounded in strong academics, character education and service

learning. Virtual Preparatory Academy of Pennsylvania's program will focus on practical application of knowledge and strong family and community involvement with the school

The Virtual Preparatory Academy of Pennsylvania's instructional approach stems from proven research and our team's years of experience in effective instructional and administrative practices. The fundamental elements of our instructional strategy are:

- **Synchronous and Asynchronous Instruction:** The Virtual Preparatory Academy of Pennsylvania integrates online instruction into everyday practice. The program features both live "synchronous" instruction as well as content-rich "asynchronous" lessons. The Virtual Preparatory Academy of Pennsylvania uses the best, standards-based content and leading online delivery methods to assure an exceptional learning experience.
- **Reciprocal Teaching:** Using reciprocal instruction, a teacher introduces a concept and then reinforces it by circling back to it in later lessons. The Virtual Preparatory Academy of Pennsylvania model is predicated on the balance between rigorous core courses in Language Arts, Mathematics, and Science and a Social Studies curriculum that applies core skills in an engaging manner, providing students with content knowledge rich in cultural literacy.
- **Differentiated Instruction:** Differentiation is a teacher-driven effort to respond to variations among learners. Teachers can differentiate instruction in at least four areas: content, process, products/culminating projects, and learning environment. Additionally, the Learning Management System provides the capability to personalize assignment selections through grouping. Virtual Preparatory Academy of Pennsylvania teachers are trained in effective strategies for successfully tailoring all of these areas to individual student needs, ensuring that different learners are all provided the best opportunity to succeed. During synchronous sessions teachers assess students on the content standard to be covered for the day. Breakout rooms are then created that allow students to receive enrichment on the standard, additional practice, or significant reteaching with another approach.
- **Student Engagement-** Teachers will have multiple data sources to monitor student engagement behavior and will be able to use that data to understand how students are spending their time in the system and offline. With this data, teachers can help get students back on track if they are struggling or need to be challenged.
- **Parent Engagement-** All parents will be provided orientation courses so that they can serve as effective Learning Coaches. Teachers and administrators will monitor and address parent engagement to ensure students have the support they need at home.
- **Progress Monitoring –** Teachers will monitor student progress using iReady tests. iReady provides a detailed view of how students are performing on recently assessed grade-level standards. It is good for tracking student progress in mastering recently taught standards, planning ongoing instruction and reteaching to accelerate student growth.
- **Safe and Supportive Environment:** Student safety is a priority at the Virtual Preparatory Academy of Pennsylvania. The AMP system online resources and communication tools are secure and password protected. Students, by design, do not interact with adults who have not undergone a required background check.
- **Communication Expectations-** Virtual Preparatory Academy of Pennsylvania teachers will be expected to provide parents/guardians and students with frequent and purposeful communication throughout the school year. They can communicate with their students via multiple pathways: phone, in-course

email system, web conferencing, and in-person (as allowed and needed). Teachers will be expected to maintain one-on-one relationships with each student and regularly communicate student progress with parents/guardians.

There is much evidence showing that students are more successful academically if they are taught in ways that match their readiness levels (e.g., Vygotsky, 1986) and expert teachers pay attention to their students' varied learning needs (Danielson, 1996); "to differentiate instruction, then, is to become a more competent, creative, and professional educator."²

In this way, the curriculum and teaching strategies at the Virtual Preparatory Academy of Pennsylvania will accommodate the needs of a diverse set of learners – those students who are eager to stretch their horizons on a challenging path and those students who require more time-on-task and personalized courses that spark their interest and open a world of engagement. Innovative and effective instructional methods include: cooperative learning, graphic organizers, role-playing, activating prior knowledge, personal connection journaling and the Socratic Method for discussions.

- **Student Experience** - Students will engage with a rich level of synchronous content resources throughout the week.
 - State certified Pennsylvania teachers trained specifically in the delivery of online instruction
 - Teachers will conduct whole class, small group, and one-one instructional sessions as needed to support student learning. Teachers will use a variety of formative assessments to guide them including analyzing student work on assignments, quizzes/tests, oral questioning, or student and parent feedback.
 - Courses mapped to graduation requirements using the Graduation Success Plan and one of the state pathways (Keystone Proficiency, Keystone Composite, Alternate Assessment, Evidence Based, or CTE) as a guide.
 - Courses structured to provide students the necessary knowledge and skills to achieve proficiency on the Pennsylvania System of School Assessment (PSSA), Keystone Exams, Pennsylvania Alternate System of Assessment (PASA) and other assessments and Graduation Tests.
 - Access to a broad array of elective courses
 - Daily access to communication with teachers and academic advisors.
 - Access to regionally located events around the state for tutoring, state testing, or experiential learning

Instructional Technology – The Virtual Preparatory Academy of Pennsylvania provides instruction primarily through a learning management system (LMS), Canvas, and a Webinar Platform (Big Blue Button).

All students will have an account in the Canvas learning management system. Canvas connects all of the digital tools students and teachers use in one easy place. The platform is intuitive, collaborative, and can be accessed anytime, anywhere, on any device. Because it is easy to learn, implement and use, Canvas

² All references from Tomlinson, C. (2001). Differentiation of Instruction in the Elementary Grades. ERIC Digests. Says elementary

allows all stakeholders to participate without the perceived obstacles often associated with new software.

Features of Canvas include:

- Graphic Analytics and Reporting which turns student performance and usage data into meaningful insights that can inform instruction.
- A badge and reward system that can be customized.
- A global calendar for assignments and course work providing students a way to manage their schedules and prioritize their tasks.
- Collaborative workspaces, discussion areas, ePortfolios, web conferencing and audio/video message capability provide students with a variety of ways to demonstrate learning.
- A dashboard and activity stream provides students with a snapshot of the latest and most relevant course information upon login.
- Notification preferences allow users to receive course updates when and where they want—by email or text message.
- Parent co enrollment connects parents to students' classes automatically—giving them the insight to be successful.

Through effective use of this technology, teachers, parents/guardians and students will be able to interact through webinars, online chat and email, enabling teachers to custom-tailor academic programs to students' unique skills and interests – all aimed at optimizing students' learning experience.

The Virtual Preparatory Academy of Pennsylvania's webinar software, Big Blue Button is used for synchronous collaboration between teacher and students and among students. When working on a project, students can go to the teacher's virtual office and work together on a project. They have use of a whiteboard, typed chat, voice chat and webcams to do this. Documents can be file transferred while in an online session and the moderator can share his/her desktop to show, in real-time, how to accomplish a task. If the student is given moderator rights, the student will be able to share his/her desktop or application with other students. They can all edit a document at the same time and can all view the changes simultaneously. Additionally, if a teacher is holding a whole-class meeting in his/her virtual office, he/she can create "breakout" rooms where collaborative groups can meet to discuss a project or work on content.

The Student Experience

Assumptions:

- Student attendance is crucial to their success. As a part of the Graduation Success Plan, student schedules for online and offline work time will be discussed. These schedules will be revisited periodically and adjusted to meet student needs.
- Student participation is essential to success. All students are expected to participate fully in their course schedules and communicate responsibly should any issues arise.
- Effective and timely communication is crucial. All stakeholders are expected to respond to all email and phone communications within 24 hours on school days.
- Student schedules will vary according to the student's GSP, the courses being taken, and the student's personal circumstances.

Student Services Team

The Student Services team empowers students to overcome academic, social, emotional, mental health or other challenges to ensure students are successful in school and in their community. This holistic approach includes early intervention, social development, support services, and linking families to school and community resources. Student Services team members and teachers work together with families to provide the wrap around supports needed to ensure students are motivated and stay on track for graduation.

Student Services Goals

- Create a positive and welcoming school climate at school start and throughout the school year
- Increase the capacity of students and families from a strength-based perspective
- Ensure students stay on track through early interventions, wrap-around supports, and engagement strategies
- Cultivate community partnerships to better support students and families with social, emotional, and medical needs
- Work through non-academic issues with students and families to remove barriers to school success
- Increase sustained enrollment to promote students to the next grade level and graduation

Social Emotional Learning (SEL)

Supporting the whole student is essential in increasing students' academic success, their college/career readiness, and ensuring they have the social and emotional skills necessary to thrive. By supporting the whole student through a comprehensive program, students will see positive outcomes in terms of academics, behaviors, and post-secondary success.

The Student Support Services Team creates a learning environment which supports the following core competencies for SEL:

- Self-Awareness
- Self-Management
- Social Awareness
- Relationship Skills
- Responsible Decision-Making

SEL curriculum is delivered weekly during homeroom time based on monthly topics. However, SEL is more than just a weekly 30-minute lesson. It is a systematic approach that infuses the core competencies into every part of the student's online school experience, across all classes, as well as when they are at home and in their community.

Topics include, but are not limited to:

- Planning for a Successful School Year
- How to Make Friends
- Stress Management
- Healthy Coping Skills

- Bullying
- Healthy Friendships
- Self-Care & Confidence
- Internet Safety

D. *Attach the school calendar and identify hours of the school operation, as per Section 1715-A(9).*

Virtual Preparatory Academy of Pennsylvania will offer a traditional school calendar with the required 180 school days, which can be completed in a traditional August-June school year. Students will be provided several pacing options but all will adhere to the minimum state requirements of 180 days.

The Board will approve the school calendar annually. The school calendar may be extended to allow families more flexibility in completing the year’s work, or to provide extra learning time for students who are at risk (generally not by more than two weeks). The table below shows the student calendar for the 2021-2022 school year. School will not be kept open for students or staff on Sundays, Fourth of July, Memorial Day, Thanksgiving, the first of -January, Christmas, or Saturdays unless Monday is the weekly holiday for the entire school year.

Student Calendar 2021-2022

Event	Date
First Day of School	August 23, 2021
Labor Day (No School In Session)	September 6, 2021
Thanksgiving Break (No School in Session)	November 25-26, 2021
Winter Break (No School in Session)	December 20, 2021 – January 2, 2022
Martin Luther King Jr’s Birthday (No School in Session)	January 17, 2022
First Semester End Date	January 21, 2022
Spring Break (No School in Session)	March 30 - 31, 2022
Memorial Day (No School In Session)	May 30, 2022
Second Semester End Date	June 1, 2022
Last Day of School	June 1, 2022

Hours of Operation

The school site will operate Monday through Friday from 8:00 AM ET – 4:00 PM ET. Since this is a cyber learning environment, the school day is not limited to certain hours for start and end times. The teaching staff is available during the hours of operation.

4. School Accountability

A. What methods of self-assessment or evaluation will be used to ensure that the school is meeting its stated mission and objectives?

Summative Assessments

The Virtual Preparatory Academy of Pennsylvania will maintain high expectations for all stakeholders that impact student success including school leaders, teachers, support staff, parents, and board members. The school will utilize PDE's evidence-based practices that create the conditions for school improvement. They include:

1. Focusing on Continuous Improvement of Instruction
2. Empowering School Leadership
3. Providing Student-Centered Supports
4. Implementing Data-Driven Human Capital Strategies
5. Allocating Resources Strategically and Equitably

The school has a commitment to being data-driven with its approach to learning. Each year, the school will analyze state testing results for all student achievement and all student academic growth including sub-group analysis. The administrative staff and teaching staff will work collaboratively to understand the data trends and develop school improvement strategies and tactics to support improvement for all student groups.

Throughout the school year, the school board will also be presented monthly reports of student progress based on course progression and interim assessment results.

Accreditation

During the Virtual Preparatory Academy of Pennsylvania's first year of operation, the school will seek outside accreditation from Cognia. In future years, the school board and administration may choose to also seek Middle States Association Commissions on Elementary and Secondary Schools (MSA CESS) accreditation. Both of these self-evaluation processes will accelerate the school's improvement by voluntarily demonstrating they are meeting a defined set of research-based performance standards.

B. How will teachers and administrators be evaluated? Describe your standards for teacher and staff performance.

Teacher Evaluations

The Board will employ all staff including the Principal and teachers. Through the Services Agreement, the Board plans to work with Accel Schools to recommend an effective performance evaluation for teachers, based on the company's experience in cyber education and aligned with key aspects from Pennsylvania's

Act 82 on Educator Effectiveness, as appropriate for a cyber school. Accel Schools uses a Performance Evaluation System to create a high performing school by encouraging employees to put forth their best effort, focusing all employees on the school's main goals, rewarding and retaining employees based on outcomes/results, and providing continuous feedback for employee development. All employees will be evaluated based on competencies along with state required metrics on student performance as required by law. Competencies will be reviewed with employees at the beginning of the school year and will be available to employees for viewing and comment throughout the school year.

Employees receive a formal mid-year review in December or January, and a formal end-of-year review in May or June. Employees also receive periodic feedback both formally and informally from their manager throughout the school year.

Competencies for teachers will be evaluated in the context of the school's goals, which evaluate student growth and achievement metrics, and observations of an employee's proficiency within each competency will be evaluated using various methods, including parent and student feedback, observations of lessons and interactions, and review of relevant documentation and data.

The outcome of an individual teacher's evaluation will affect future decisions regarding staff retention, promotional opportunities, or disciplinary action and termination decisions.

The competencies will be aligned with student achievement metrics and may include any of the following:

- Parent feedback,
- Supervisor observations,
- Statewide assessment results,
- School assessment results, and/or
- Student participation/completion.

Evaluation Process for School Administrators

The Board will employ the school administrators. The school administrators will be evaluated based on competencies along with state required metrics on student performance as required by law. The professional competencies will align with the lead school administrator position (e.g. Principal). The Board will evaluate the school administrators using data and may be assisted by consultative functions provided by Accel Schools.

School administrators receive a formal mid-year review in December or January, and a formal end-of-year review in May or June.

Competencies will be evaluated in the context of the school's goals, which evaluate student growth and achievement metrics, and observations of an employee's proficiency within each competency are evaluated using various methods including parent, school and community feedback; observations of lessons and interactions; and review of relevant documentation and data.

Standards for Teacher and Administrator Performance

To ensure the highest quality teaching, the Virtual Preparatory Academy of Pennsylvania will set as its goal that the majority of the teachers earn ratings of Effective or higher. The instructional staff will be observed on a regular basis and evaluated using a comprehensive, multi-layered evaluation system. The teacher evaluation system may include the following and will be aligned to Pennsylvania teacher evaluation systems:

- Parent surveys, which may rate such things as the responsiveness, effectiveness, knowledge, and skills of their assigned teacher(s);
- School administrator evaluations from observations of Learning Coach/student interaction, including synchronous sessions, and review of correspondence;
- Peer reviews evaluating the degree of cooperation, support and sharing of knowledge;
- Aggregate performance of enrolled students based on a value-added growth model and documents by data from the LMS; and
- An annual performance plan created by each teacher incorporating strategies to achieve, measurable school goals.

The school administrator evaluation system will be geared towards evaluating the specific competencies that an effective administrator would display. This may include the following and will be aligned to Pennsylvania administrator evaluation systems:

- School Development and Leadership: school culture, creating a commonly owned vision and plan for success, high performing leadership team;
- Team Development and Leadership: school team formation, staff performance management, staff satisfaction and retention;
- Student Achievement/Data Management: instructional leader, internal/external data to effectively drive student achievement; and
- Personal Development and Professional Skills - leadership development of self, judgment and problem solving, knowledge and implementation of key policies and regulations, and an environment of trust which includes clear communication, relationship building and expectations, community relations.

C. How will your school be accountable to the parents of the children attending your school?

Frequent and purposeful communication with parents and Learning Coaches will help teachers monitor the student's progress, keep parents "in the loop" with current school happenings, and help the school grow and improve from parent feedback. Scheduled phone calls, live instruction sessions, email messages, and face-to-face meetings at locations throughout the state will all be used to help conduct parent-teacher conferences.

Communication outside of the AMP system for existing and prospective families and community members will also be important. Parents will have a list of contact information (email and phone numbers) for all their assigned teachers, administrators, and support staff. This contact information will be in the school handbook and available on the parent landing page in the AMP system.

The school will maintain a public website that contains all relevant and required information to ensure that all stakeholders are kept informed. All school board meeting agendas, minutes, and policies will be posted on the website as required by state law. We will encourage parents to follow a grievance process, which will be published in the school handbook, to address any concerns first with their teacher and administrators. If they cannot resolve the issue, board member contact information will be posted and parents will be able to contact the board members directly.

The website will include enrollment and school academic program information but will also create opportunities for parent-to-parent communication. For interested parents, the Virtual Preparatory Academy of Pennsylvania will develop a student information and community education plan to inform potential students, their parents/guardians, and other interested parties about the education program. The campaign will ensure equal access to any PA family who chooses to enroll their student.

Annually, the school will send out a parent and student satisfaction survey to get feedback from both on the programs and processes that are working well, satisfaction with the school leadership and teaching staff, and ask how the school can serve that family better. The results of this survey will be distributed to the school board and parents once complete.

Each year, the school will publish its annual report of the previous school year including academic outcomes. This report will be sent to the immediate school community- current parents, board members, etc. It will be distributed to all enrolled parents each year.

D. Discuss your plan for regular review of school budgets and financial records.

The Virtual Preparatory Academy of Pennsylvania Board has the authority and responsibility to prepare and adopt the school budget. The budget will be designed to carry out the education plan set forth in this application in a thorough and efficient manner, to maintain the school facilities, and to honor the school's obligations to Pennsylvania taxpayers. The budget draft and supporting documentation will be prepared no later than May 1st for review by the Board Treasurer. The full Board will review the draft at their May board meeting. The Business Manager, contracted through Charter Choices, Inc., will prepare the General Fund budget on the state required forms and make the budget documents and supporting information available in printed form in accordance with the timelines specified in Pennsylvania law. At least three days prior to adoption, the final budget will be presented to the Board. The Virtual Preparatory Academy of Pennsylvania board shall annually adopt the final budget by majority vote of all members prior

to June 30th.

Each month, the Virtual Preparatory Academy of Pennsylvania Treasurer and the full Board will review detailed financial reports provided by the Business Manager and in collaboration with the Accel financial services team. The monthly reports will show the board approved budget revenues and expenditures as compared to actual spending to date. The board will also receive updates to the balance sheet, a list of accounts payable invoices reviewed by the Business Manager and recommended for approval, district billing of funding for students served, and other detailed reports.

The school will contract with an independent auditor to conduct annual audits that will meet the specific compliance requirements set forth by Pennsylvania and as required by the Annual Report filed August 1 of each year. The date of the annual independent audit will be determined by its by-laws and articles of incorporation's provision for end of fiscal year. The school will be insured as required.

The Virtual Preparatory Academy of Pennsylvania intends to use an industry-standard accounting software to gain insight into the school's finances, improve decision-making process, speed up response time to financial situations, and create powerful self-service analysis with business intelligence tools. Virtual Preparatory Academy of Pennsylvania will use the chart of accounts required by the PDE.

E. Describe your system for maintaining school records and disseminating information as required under the Family Educational Rights and Privacy Act (FERPA).

The Virtual Preparatory Academy of Pennsylvania recognizes the need to protect the confidentiality of personally identifiable information in the education records of children. The Virtual Preparatory Academy of Pennsylvania will ensure the privacy rights of eligible children in the collection, maintenance, release, and destruction of records. Virtual Preparatory Academy of Pennsylvania will follow the provisions of the Regulations of the State Board of Education on Pupil Records (PA Code 22, Ch.12), the Family Educational Rights and Privacy Act of 1974 (FERPA), the Confidentiality Section of IDEA, and the Confidentiality Section of Pennsylvania Special Education Regulations and Standards and other student data privacy laws.

The Virtual Preparatory Academy of Pennsylvania will use the PowerSchool Student Information System (SIS) to collect, manage, and maintain student records. The enrollment process will be fully integrated with and supported through PowerSchool. The Virtual Preparatory Academy of Pennsylvania has contracted with Accel for enrollment and student placement support services. The Principal will have oversight of the enrollment process which will comply with state and federal law. Once the enrollment process is completed and students are placed into courses, the students will appear on the teacher student roster where he/she can begin tracking, verifying, and reporting attendance.

The Virtual Preparatory Academy of Pennsylvania will house and maintain its physical records at its

administrative office in Harrisburg. Virtual Preparatory Academy of Pennsylvania will fully comply with the requirements of FERPA, a Federal law that gives parents/legal guardians and students certain rights regarding the student's education records. Included is the right to the protection of a student's education records and "personally identifiable information" from unauthorized disclosure.

Within the PowerSchool SIS, access to student information and data will be controlled by a central team of administrators, trained in FERPA, using a complex system of roles, permissions, and locations. Only users in a particular location, who have permissions at that location, will be permitted to access student data. Data points and reports will be assigned to roles, including the Virtual Preparatory Academy of Pennsylvania approved vendors who use student data for accounting and billing purposes. Only users in a location with the correct roles will meet the requirements to access the data.

In addition to FERPA requirements, IDEA provides additional privacy protections for students who receive special education and related services. Part B of IDEA incorporates and cross-references FERPA. Virtual Preparatory Academy of Pennsylvania is aware of the cooperation between FERPA and IDEA and will adhere to the requirements of both. The school will also comply with the Protection of Pupil Rights Amendment and the Children's Online Privacy Protection Act of 1998 ("COPPA").

Under FERPA, an enrolling student will fall into one of the certain exceptions that will allow for Virtual Preparatory Academy of Pennsylvania to receive student education records from a previous school without the prior written consent of parents. However, upon enrollment, administrative personnel will ask parents to provide written consent for the release of their student's education records by signing a Release of Records form, allowing the school to receive the information from the student's previous district. Virtual Preparatory Academy of Pennsylvania will use the PDE Charter School Student Enrollment Notification Form for notification of a student attending a charter school as required. Per FERPA, there are other exceptions to the release of student education records without the prior written consent of parents. Virtual Preparatory Academy of Pennsylvania is aware of such exceptions and, outside of these, will require the written consent of parents for the release of their student's education records to a third party.

While FERPA is vast in its discussion of the review, amendment, and privacy rights related to education records, it does not speak to the retention and destruction of such records and does not include a records retention plan. Along with a strict adherence to FERPA, Virtual Preparatory Academy of Pennsylvania will address compliance with a records management program that addresses the creation, maintenance, storage, and final destruction of records in accordance with Pennsylvania laws and regulations.

F. Describe your system for maintaining accurate student enrollment and withdrawal information as required under Section 1748-A, Enrollment and Notification.

The Founding Board will contract with Accel Schools to implement and the student enrollment and withdraw processes, adopted by the Board and reviewed by Board Counsel, which are consistent with local, state, and federal law. The draft enrollment policy included in **Appendix O** will be reviewed by Board Counsel and approved by the Board as part of the overall school handbook. The approved policy will be posted on the school website.

In the initial admission process, parents will complete a simple registration form online or via phone that collects their name, email address, address, phone number, student names, and requested grade levels, although failure to complete this form will not be a condition of enrollment. They will also confirm that they meet the basic eligibility requirements for enrollment (e.g., state residency and legal school age, as noted on the school's website and through a link on the enrollment page) and that they have read and understood the program's regulatory requirements.

Based on Section 1723-A of the Charter School law, any resident grade K-12 school age student in the Commonwealth is eligible to enroll in The Virtual Preparatory Academy of Pennsylvania. The school will not discriminate in its admission policies or practices on the basis of intellectual ability or athletic ability, measures of achievement or aptitude, status as a person with a disability, proficiency in the English Language or any other basis that would be illegal if used by a school district. We will not use achievement tests, entrance examination tests or other means of testing a student's intellectual ability in order to grant or deny admission. We will not judge a student's grade point average in consideration of any student enrollment.

Virtual Preparatory Academy of Pennsylvania will require the state mandated documentation for enrollment including;

- Copy of a Birth Certificate/Proof of Age
- Immunization Record
- Proof of Residence (except for homeless students)
- Sworn Statement
- Release of Records
- Proof of Guardianship/Acknowledgement of Legal Guardianship Form, if applicable
- Home Language Survey
- In addition, the School will request that parents/students to complete a Student Enrollment Information Form, Instructional Use of Property Form, Family Income Form and PDE Notification Form. These are not conditions of enrollment.

During the enrollment process and prior to admission to the Virtual Preparatory Academy of Pennsylvania, the parent, guardian, or person having control of a student shall provide a sworn statement stating whether the student was previously or is presently suspended or expelled from any public or private school for any offense involving weapons, alcohol or drugs, or for the willful infliction of injury to another person or for any act of violence committed on school property. The school from which the student was suspended or expelled and the dates of the

suspension or expulsion must be provided. Any willful false statement shall be a misdemeanor of the third degree. Virtual Preparatory Academy of Pennsylvania will obtain this statement during the enrollment process. If the School accepts a suspended or expelled student, the student's school district of residence is not required to pay the charter school for that student's enrollment until the suspension or expulsion period has passed and the student has met all the conditions imposed during the suspension or expulsion.

District of Residence Notification

Virtual Preparatory Academy of Pennsylvania will provide each student's resident school district with the PDE Charter School Student Enrollment Notification Form within 15 days of the student's enrollment or change in residency and will notify the relevant school district within 15 days of a student's withdrawal from the charter school.

Within 15 days of receipt of notice of enrollment, resident school districts must provide a copy of a student's records to the School, including any individualized education program (IEP) for that student. A student who continues for succeeding years at the Virtual Preparatory Academy of Pennsylvania shall be included on a list of all such students and sent to the district of residence at the beginning of each school year.

Compliance and Tracking

The Virtual Preparatory Academy of Pennsylvania will abide by all applicable federal, state, and local statutes, policies, and guidelines for student enrollment and will not impose enrollment requirements that are inconsistent with these policies and guidelines. These policies and guidelines include compliance with the McKinney-Vento Act regarding homeless students. The Principal or his/her designee will serve as the liaison for homeless students. Students who meet the definition of homeless shall not be barred from enrolling due to lack of required documents.

Withdrawal Process

Students may withdraw from Virtual Preparatory Academy of Pennsylvania at any time in accordance with the state statute. Prior to withdrawing, the school will encourage the Learning Coach and/or student to discuss with the school staff the reason(s) for withdrawing as it may be possible to address issues so the student does not need to withdraw. Virtual Preparatory Academy of Pennsylvania will request that the Learning Coach provide evidence of homeschool registration consistent with state requirements or the name and location of another public or private school that the student will attend. This data will be recorded and reviewed by the Lead School Administrator, so school leadership can continually reflect on the school's ability to serve its families and students. The School will send a notification to the resident district within 10 days of student disenrollment in accordance with state law. The School will also provide a copy of student records, including any IEP, to the resident district or new school in which the student enrolls.

In **Appendix O**, the board has draft Student Attendance and Punctuality Policy that includes a parent's or guardian's responsibility to ensure that their children attend school on days the

school is in session. If a student incurs unexcused absences, the school will initiate an early intervention process to assure assistance is given to the student. The desired outcome will be to assist the student in addressing and resolving school attendance issues. This comprehensive system of supports and services provides documentation of the “good faith” effort between the school and the student’s family should future action be required (e.g. citation to the magisterial district judge and referral to the county children and youth agency, disciplinary action, expulsion, etc.).

If a student becomes ineligible or leaves the charter school, the PowerSchool SIS will be updated and Virtual Preparatory Academy of Pennsylvania will ensure all appropriate paperwork is submitted and/or forwarded to the new school. As per Section 1748-A of Charter School Law, Virtual Preparatory Academy of Pennsylvania, and the parent or guardian, will provide written notification to the school district of residence within 15 days following the withdrawal of a student.

G. Describe plans to evaluate student performance.

The Virtual Preparatory Academy of Pennsylvania will use the Pennsylvania Core Standards to define what students need to know, understand, and be able to do. Mastery is achieved when a student can demonstrate proficiency on skills and content as described in grade level state standards. To ensure that students are on track to demonstrate mastery on state mandated summative assessments, formative assessment opportunities will be utilized in an ongoing manner. These assessments will provide teachers with the information required to monitor progress and adjust instruction.

Formative assessment will include:

- Qualitative and observational data obtained by teachers through student level interactions (live web conferencing sessions, one-on-one meetings, phone conversations)
- Embedded course assignments and assessments at the lesson and unit level
- Frequent, brief standards aligned short-cycle assessments sequenced to assess mastery of content recently presented
- Local benchmark assessments administered 3 times per year
- Common mock assessments administered 3 times per year

The table below provides a summary of the assessments the school proposes to utilize to monitor student performance at the Virtual Preparatory Academy of Pennsylvania.

Assessment Type	Platform/Tool
Local Benchmark/Diagnostic (Computer Adaptive Nationally Normed)	Example: iReady
Incoming Assessment	Example: iReady

Short Cycle Assessments (Progress Monitor)	Example: iReady (K-8) and MasteryConnect (K-12)
Reading Fluency	Example: Dibels
Classroom Assessments	Examples: iReady Standards Mastery and MasteryConnect Course assessments
Pennsylvania Accountability System (PAS)	PSSA/PASA/Keystone Exams, SAT and ACT, WIDA ACCESS

H. How will student development toward the school’s overall learning goals and objectives be measured?

When student level data indicates that a student is not on track for mastery of grade level content school staff will implement tiered academic interventions within a multi-tiered support system. In Tier 1, classroom teachers will provide high quality standards aligned instruction to all students. Students needing additional intervention at the Tier 2 level will receive research-based intervention strategies of moderate intensity within a small group to address learning needs. These interventions may be implemented by the virtual classroom teacher or by an Intervention Specialist. Tier 3 intervention will include individualized intervention of increased intensity for students.

Student Promotion

While course grades are an important component of retention and promotion decisions, teachers and school leaders will be trained to utilize a multi-faceted decision making approach, to ensure that each student’s unique characteristics are considered in conjunction with all available student level data to inform retention and promotion decisions. During the Spring of each school year, teachers will create a list of students for whom retention may be necessary, based upon available data. Multiple stakeholders involved with the student will be included in the decision-making team (teachers, parents, administrators, guidance counselors, interventionists). For any student who undergoes the Retention/Promotion review, the team will create an individualized plan to note what additional supports and interventions will be provided to the student in the course of the next school year to ensure continued progress towards mastery of grade level standards, regardless of whether the decision is to retain or to promote. Considerations for the retention and promotion decision process may include course grades, assessment data, student attendance, student motivation, student learning style and pace, chronological age, developmental characteristics/maturity, prior retention, student learning exceptionalities, and student transiency.

For High School level students, progress from one grade level to another will be based on credits earned. Teachers and administrators will work to ensure that all students have access to any state allowable alternative pathways to graduation, and that any existing credit flexibility and dual enrollment options are

utilized. Students who experience course failure and become credit deficient will have access to additional opportunities to recoup credits via programs such as summer school or credit recovery course work.

Promotion Framework

Mastery Determination	Evaluative Determinate	Promotion Criteria
English Language Arts	PSSA, PAS, Teacher Evaluation, Course Completion	Scores Proficient, Teacher Recommendation
Reading Fluency	PSSA, PAS, iReady, Teacher Observation	Scores Proficient, Teacher Recommendation
Mathematics	PSSA, PAS, iReady, Teacher Evaluation, Course Completion	Scores Proficient, Teacher Recommendation
Science	PSSA, PAS, Teacher Observation, Course completion	Scores Proficient, Teacher Recommendation
Core Subject Areas (grades 9-12)	Keystone Exams, PAS, Course Completion, Teacher Observation	Scores Proficient and/or Teacher Evaluation
Classroom Assignments	Teacher Evaluation	Teacher Evaluation
Attendance	Student LMS Login, Completed Lessons	905 School Attendance and/or Teacher Evaluation

Students (and parents) are expected to regularly consult and follow course pacing guides to ensure that all assignments and assessments are completed by the established due dates. Extensions are handled at the course level teacher's discretion. Early interventions will occur by the teacher and/or school leader when students fall behind their pacing guides, not logging in to the AMP system or consistently failing. Contact with the parent and students will occur in various manners including electronic (email), verbal (phone/video) and in-person meetings.

The school's teachers maintain an electronic grade book within the AMP System that displays the student's progress. Parents and students have view only access to view grade reports itemizing each grade for students. Grades are posted and reported quarterly. Semester grades will be comprised of the average of two quarters. Final grades will be the average of the two semesters. School administration will have a final review of grades and credits earned to be sure that all credits earned are properly credited in the student's records.

Assignment Mark	Grade/Pt.	Teacher Observation/Evaluation
90-100 %	A/4	Student demonstrates superior knowledge of content
80-89 %	B/3	Student demonstrates advanced knowledge of content
70-79 %	C/2	Student demonstrates average knowledge of content
60-69 %	D/1	Student demonstrates limited knowledge of content
59 % and Below	F/0	Student fails to demonstrate even limited knowledge of content

1. Describe how student evaluation will be used to improve student achievement and attain the stated learning objectives.

Formative assessments provide educators with critical information about student progress and can be used to adjust the teacher’s approach and the pace of instruction throughout the year. Formative assessments are often used as tools for uncovering opportunities for instructional intervention because they give teachers information about where additional practice and support may be needed. Research has shown that timely and specific feedback from formative assessments can enable teachers to make a significant impact on student learning. In *Formative Assessment in Seven Good Moves* posted to the Association for Supervision and Curriculum Development (ASCD) website, Brent Duckor stated, “The research is clear: What teachers do in their classrooms matters. But which practices really make a difference? Jon Hattie (2012) conducted an extensive meta-analysis, looking at 800 meta-analyses that focused on locating a specific student achievement outcome and identifying an influence on that outcome. Formative assessment topped his list of the most influential practices that improve student outcomes.”

The Virtual Preparatory Academy of Pennsylvania will use the previously described formative assessments to support student mastery of the skills and concepts in the Pennsylvania Core Standards.

5. School Community

A. Describe the relationship of your school with the surrounding community.

The Virtual Preparatory Academy of Pennsylvania will have a focus on service learning as part of the student experience. Students will have input on the chosen service learning projects adopted each year at

the School but many will choose to focus on the individual student's personal interest in bettering their local community, state, and country. Parents will play an active role in supporting their student's participation in these projects.

Online education has the potential to bring students together from different parts of the state, different cultures, diverse social and economic backgrounds, to promote projects of service to their community. The budgeted Parent and Student Activities Coordinator will support teachers with these projects.

The school will make community leaders and local school districts aware of these service learning projects. If possible, they will invite them to participate in projects that involve a larger community to support.

When the Principal and other school leadership staff are hired, they will start to formalize partnerships with non-profit community service organizations, state higher education institutions, and museums. They will seek to identify meaningful work-based learning experiences for high school students that meet the Future PA Ready Index requirements under the state's ESSA Consolidated Plan. The School will ensure these learning opportunities integrate meaningful community service with instruction and reflection to enrich the learning experience, teach civic responsibility, and strengthen communities. The PDE requirements include:

- Supervised by both an agency representative and an assigned teacher advisor.
- Evaluated by the educator and the agency representative, with input from the student.
- Connected to the school's curriculum/course of study.
- Includes a learning plan and a contract that details learning objectives and roles of all parties.
- Required hours: minimum of a six-week experience, and/or 60 hours total.

The school has already identified the follow state and national organizations they will seek out potential partnerships tied to community service learning projects:

- Pennsylvania Service Learning Alliance
- Pennsylvania Chamber of Commerce
- The Buck Institute for Education- PBLworks.com – Combining project-based learning with service learning

B. Describe the nature and extent of parent involvement in the school's mission.

Parent involvement is significant to the cyber learning model. There are many benefits to parent involvement in education. Parent participation in a child's education can lead to improved grades and test scores, higher graduation rates, and greater enrollment in post-secondary education.

Parents are crucial to the planning process of the school, as well as its operation. Interested parents have already played an important role in encouraging the formation of the school and will remain involved leading to the school's opening. Parental feedback is also an important hallmark of the school's outreach and information sessions in the community. The school will take full advantage of this valuable

communication with families to ensure that the school reflects their unique needs and creative ideas.

Parents are key components of supporting the mission of Virtual Preparatory Academy of Pennsylvania. Through formal and informal channels from field trips to surveys, parents have an avenue to provide feedback and input. This ensures that the school will be on a cycle of continuous school improvement and that all stakeholders are valued. The school will draw upon the deep and diverse community connections represented on the Board, whose members represent business and education entities across the state and beyond, to ensure that students have multiple opportunities to benefit.

Parents can participate in the School in multiple ways:

- Parent representation on the Board: The board bylaws provide for a minimum of one parent of a current or previous cyber school parent to serve on the board. Currently, two board members are parents of cyber school students.
- Ad hoc Board committees- The Board may form ad hoc groups of parents to address particular issues such as community partnerships or parent-to-parent support.
- Public comment- Parents may make public comment at board meetings.
- School event support- Parents may volunteer with teachers to support the service learning projects, field trips, and other school community events.
- Parent satisfaction surveys- Annually, parents will provide formal feedback on how well the school is serving their student. This continuous improvement feedback is essential to the school's success.

C. Describe procedures established to review complaints of parents regarding operation of the charter school.

Virtual Preparatory Academy of Pennsylvania will be committed to ensuring parent satisfaction and will take its responsibilities for the provision of educational services to students very seriously. These school responsibilities will be set out in the School Handbook and include such things as:

- Contacting the family regularly
- Delivering educational materials and equipment
- Providing accessible support

The school will also ensure the family and student adhere to their responsibilities as stated in the school handbook, and when necessary, will discipline a student for, violation of a school policy. If a parent has concerns, he/she may institute the following proposed grievance process or one that affords appropriate levels of due process to be adopted by the Board once the charter is approved.

- A parent with the grievance must report the dissatisfaction and submit it in writing to the student's teacher (or other appropriate staff member, as necessary). All

parties involved must be appropriately defined, and the problem must be clearly outlined.

- The recipient of the grievance (generally the teacher) must review the issue with his or her supervisor (generally the Lead School Administrator) and respond to the parent within a reasonable time period.
- If the original recipient did not resolve the grievance, the parent should request a meeting with the recipient's supervisor. The supervisor should investigate the matter and schedule a meeting with the parent, the student (if necessary), and any other staff member (if necessary) within a reasonable time period.
- If either party does not resolve this grievance, the parent should then request a meeting with the school administration. School administration will investigate the matter and schedule a meeting within a reasonable time period.
- If a resolution was not reached at the three meetings, the parent may request a meeting with the Board, who will investigate the matter, and arrange a meeting within a reasonable time period. Current contact information for Board members will be listed on the school webpage.

6. Extracurricular activities (athletics, publications and organizations)

A. Describe the program of extracurricular activities planned for the charter school. Note: Charter schools shall be permitted, if otherwise qualified, to be members of the Pennsylvania Interscholastic Athletic Association.

As an integral part of the academic program, students will also be offered access to clubs and special events (e.g., virtual talent shows, virtual art galleries, cards for hospitalized children) through which they can explore interests beyond the classroom, develop leadership skills, and make friends within their program. The school's planned service learning projects will provide students the opportunity to collaborate with peers to advance their community.

If a student would like to participate in the extracurricular activities offered by his/her district of residence, the district must provide the student an opportunity to participate. This means that if the district holds tryouts for the team, it must allow cyber charter school students the same opportunity to try out for the team. If approved, the Board will create relationships in the form of Memoranda of Understanding with local school districts to ensure adherence to Section 1719-A (14), which states:

"Notwithstanding any provision to the contrary, no school district of residence shall prohibit a student of a charter school from participating in any extracurricular activity of that school district of residence: Provided, that the student is able to fulfill all of the requirements of participation in such activity and the charter school does not provide the same extracurricular activity."

B. Describe whether any agreements have been entered into or plans developed with the local school district regarding participation of the charter school students in extracurricular

activities within the school district.

The Board has budgeted to provide some financial support to students who wish to participate in activities beyond what Virtual Preparatory Academy of Pennsylvania offers to currently enrolled students including activities such as, but not limited to, sports, theater, music, or clubs not currently offered to students. The Board will set a budget for these funds each year. The students must be in good standing from a participation perspective to qualify and must apply to have their activity approved in advance. The Principal and/or designee will review each application and determine the amount to contribute to the student's activity in accordance with any Board-adopted policy or guidance. The Principal will report annually to the Board on how the money was spent (for example: how many students participated, what types of activities did they participate in, feedback from students, and actual amount spent).

Virtual Preparatory Academy of Pennsylvania will also work with local school districts to promote the district's extracurricular activities to its students. The School will pay the reasonable incremental costs incurred by these resident districts if students do participate in order to encourage expansion of the students' community.

7. Technology Support

A. Describe how your cyber charter school uses technology to provide a significant portion of its curriculum and to deliver a significant portion of instruction using the Internet or other electronic means.

Using Technology to Provide Curriculum and Instruction

The School Board believes in offering students and teachers the best online learning courses and instructional tools available today. The AMP system integrates rigorous courses with a powerful Learning Management System (LMS- Canvas) and Student Information System (SIS- PowerSchool) to create the ACCEL Management Platform (AMP) for Education providing students, parents, teachers and administrators with a single sign-on, consistent user experience. The AMP system allows teacher to truly personalize learning and allows school administrators to operate an efficient online school centered on data. The LMS integrates key functions and services that are critical to maximizing the academic experience and performance of enrolled students for both the education program and school operations.

Virtual Preparatory Academy of Pennsylvania will have personalized access to the LMS through the creation of a branded registration page, login page, and menu bar. The LMS allows teachers, students and parents to:

- View daily, weekly, and monthly schedules at a glance;
- Access all lessons and course assignments;
- Monitor progress through access to the grade book

- Receive alerts and communicate through secure messages and access to Big Blue Button communications platform;
- Communicate with teachers and other students and families via message boards; and
- Provide written feedback about specific lessons and overall learning experiences.

The LMS will allow parents, counselors, teachers, Learning Coaches, and students to work cohesively in a safe and supportive environment. The system will allow teachers and students to interact with one another synchronously in a cyber classroom using the webinar platform, Big Blue Button. The Big Blue Button webinar software is used for synchronous collaboration between teacher and students and among students. When working on a project, students can go to the teacher's virtual office and work together on a project. They have use of a whiteboard, typed chat, voice chat and webcams to do this. Documents can be file transferred while in an online session and the moderator can share his/her desktop to show, in real-time, how to accomplish a task. If the student is given moderator rights, the student will be able to share his/her desktop or application with other students. Multiple students can all edit a document at the same time and can all view the changes simultaneously, if given permission to do so. We think this functionality will be most useful for the service learning projects as well. Additionally, if a teacher is holding a whole-class meeting in his/her virtual office, he/she can create "breakout" rooms where collaborative groups can meet to discuss a project or work on content.

Teachers will use the tools regularly to convene groups of students together to focus on particular learning topics and may also use sessions for independent student work groups to collaborate on activities, via chat, electronic boards, and shared web research. In addition, teachers will collaborate synchronously with students and Learning Coaches through phone calls to discuss the learning plans. Threaded discussions on course-based message boards are also used as appropriate by grade level to provide opportunities for collaboration and interaction among students.

Along with the use of LMS sessions, Teacher tutorials will dramatically increase the effectiveness of the instructional model. Tutorials are highly interactive asynchronous which are incorporated into most lessons and provide students a dynamic, fun and engaging way to learn the concepts they need to complete the lesson. They incorporate graphics, video, and audio to show students the concepts and ideas they will need to complete the lessons. Given the balance of modes and media for learning at Virtual Preparatory Academy of Pennsylvania, actual time spent working online for students will vary according to each student's developmental level, learning needs, and learning styles.

Improving Student Achievement through Technology

In addition, at both the section and individual student levels, the assessment performance reports can be generated displaying not only the essential skills and standards for a course, but also exactly where in the curriculum each of these is assessed. The assessments and reporting will provide real-time student performance on each of the essential skills and standards based upon individual assessment items which measure standards-based objectives that students should master by the end of that grade level. Data can be sorted to identify students who have mastered or not mastered specific objectives. Teachers can run this report as frequently as they like to see exactly how students are progressing with regard to each of the skills and standards for that subject and grade. This method accomplishes the following:

- Enhances the multi-tiered instruction model;

- Identifies essential skills and standards by subject/grade level;
- Identifies how and where these essential skills and standards are assessed within the program;
- Provides a system of support/response to Intervention and Instruction;
- Provides access to and analysis of real-time data to determine mastery/proficiency;
- Incorporates data-driven decisions throughout instruction;
- Maximizes use of the instructional support programs, resources, and data;
- Identifies the need for tiered interventions for non-mastered/proficient skills and standards; and
- Identifies students' response to the implemented interventions.

Students who are working below grade level based on formative and summative assessment results will also benefit from research-based intervention programs focusing on building proficiency in reading and math skills. Parents will be notified if their students qualify for these programs, and their cooperation will be secured for a series of intensive sessions with the student and his or her teacher focusing on areas needing improvement. The student will continue in the regular curriculum while receiving intervention, but the sessions will allow for focused remediation on topics likely to be problematic on the next mandated assessment.

Teachers will also implement a systematic approach to instruction, ensuring that all students receive the necessary level of support via technology throughout the cyber learning process. Beginning with identified essential skills and standards based on the Pennsylvania Core Standards, teachers will be able to easily see what students should know and be able to do by the end of a specific grade in each of the core area subjects.

Systems of Supports/Response to Intervention and Instruction

Timely intervention is critical, and schools must implement an instructional model that is designed to address both academics and behavior through a systematic problem-solving approach. Virtual Preparatory Academy of Pennsylvania's instructional model will aim to help all students meet with continuous academic and behavioral success. Virtual Preparatory Academy of Pennsylvania will use a wide range of evidence-based instructional strategies and resources for all students with fluid movement between the support tiers and levels. Teachers will increase the frequency and intensity of the intervention, or instructional support, based on students' responsiveness and learning/behavioral needs.

Through the use of early identification and implementation of research-based strategies and tools, Virtual Preparatory Academy will reduce the number of students who are at risk for learning and behavioral challenges. Data provided via the LMS will be used by all teaching staff throughout the school year to implement a structured system of instructional supports. These supports will include curriculum that is based on state and national standards, a high quality core instructional program, use of universal screeners, data-based decisions, tiered supports and services, involvement and engagement of Learning Coaches, and ongoing professional learning for staff. Students who are struggling with the evidence-based and standards-aligned core curriculum will be identified by teachers as early as possible so that differentiated activities can be assigned and student progress can be monitored closely. For students demonstrating a more intensive needs, a tiered approach will allow for more instructional support and increased progress monitoring. All efforts will be made to meet each student's needs within the general education program.

B. Describe how you will improve student achievement through effective uses of technology.

The gap in achievement between students from different socioeconomic and racial/ethnic backgrounds is one of the most persistent challenges facing educators, a challenge that has become increasingly imperative for schools to conquer as they struggle to meet the goals stipulated by ESSA. The use of multi-tiered systems of support, as described in previous sections, will be used to meet student academic, social-emotional, and behavioral needs.

This model will be applied through the following methods:

- **Screening:** Placement tests, used in conjunction with any other assessment portfolio information we have on the student and placement according to that screening (of course we never use one data point – and it does not apply to certain populations such as students with IEPs or ELL).
- **Progress Monitoring:** Virtual Preparatory Academy of Pennsylvania will use iReady to progress monitor students against national standards quarterly. In addition, teachers will use Mastery Connect to monitor progress on specific strands via curriculum based measures (weekly is the goal). Students with IEPs have goals and objectives with skills that are directly linked to state standards and benchmarks, and weekly probes are taken to progress monitor students toward the annual goals and objectives.
 - For students who are making progress, we consider them “responding to the intervention”. These are school-wide supports.
 - For students not responding to the school-wide supports, we move to the next level.
- **Intervention:**
 - The first level of secondary support would be to use the progress monitoring and achievement data to identify students at risk (this is the same process the school will go through to identify target groups for Title 1).
 - Group interventions are usually done for a period of weeks and the students re-assessed. Student responding to this intervention are either continued or removed from the intervention, depending on progress.

C. Describe the technical support that will be provided to students and parents.

The School’s contracted full-time technical support staff (Accel) will operate a help desk from 8 AM – 5 PM EST, Monday thru Friday during the school year. They will be available to answer questions by email, phone or online chat for students and staff. The automated online ticketing system will track student and staff technical issues and ensure they are responded to promptly.

The technical staff is trained to communicate technical issues in non-technical terms working with students or their parents/guardians to get the student back on track for learning.

In addition, students and parents/guardians will have 24/7 access to an Online Help System including FAQs and alerts/notifications. Topics addressed include:

- Using the AMP learning platform
- Troubleshooting problems with the provided computer or personal computer

- Distribution or reclamation of computers
- Using computer software

D. Describe the policy for ensuring the privacy and security measures that will guarantee the confidentiality of data gathered online.

Security Measures for Confidentiality of Data

The Acceptable Use policy for Virtual Preparatory Academy of Pennsylvania is provided in **Appendix C**.

The LMS contains several unique and efficient mechanisms for families and schools to communicate with one another. Since the LMS is a closed system, no communication can be made to or from anybody outside of the system. Parents or legal guardians can control what, if any, of their student's information is posted and accessible to others in the School Directory. To set or modify these options, parents can go to the directory to adjust their student's permissions at any time.

The LMS maintains a complex system of roles, permissions, and locations to control access to data and files. For example, a user has the teacher "role" in his or her school "location" and therefore is only able to access information about students in his or her school but is not able to access information about students in other schools. Likewise, a Principal (role) of a school (location) is only able to access information about students and teachers in his or her school and cannot access information about other locations.

Access to data is controlled by "role" also. In order to perform a particular job, a user has the necessary role(s) that will facilitate doing his or her job. For example, the enrollment staff is able to view, enter, and report on data about students for facilitating the enrollment process. Teachers can view, enter, and report on data to facilitate the learning process.

Data Center

The LMS servers are hosted in an enterprise-class tier 3 data center. This facility is secured and access to the site is strictly controlled by select administrators. All Internet communications to and from the LMS servers are encrypted. Regular vulnerability scans and a rigorous patching process are in place to identify and address vulnerabilities in a timely fashion. StrongMind and Accelerate also provide industry standard equipment (e.g., firewalls, intrusion prevention systems), and services to further limit attack vectors.

Network and Systems Operations

The LMS's multi-layer network employs a modular, scalable design that provides multiple levels of security, redundancy, and fail-over. The network is built on a platform of redundant routers, firewalls, switches, and redundant content and load-balancing solutions. This design enables StrongMind and Accelerate to maintain a high availability network infrastructure while minimizing downtime.

Security Management

StrongMind and Accelerate have invested significantly in a variety of infrastructure security measures to ensure the safest network transmissions of confidential and sensitive communications and to avoid service disruptions resulting from the accidental or intentional actions of external parties.

Data Backup

To ensure that valuable data is available when needed, StrongMind and Accelerate Education have built a quality infrastructure that affordably protects school websites and content.

Site Monitoring & Site Security

Security services provide a complete end-to-end information assurance, and vulnerability detection solution. Staff members monitor the web-hosting environment 24/7/365. In the event that a Website is not meeting the appropriate operating and performance criteria, alerts are sent automatically to the staff and engineering teams to resolve the issue as soon as possible. Site Monitoring includes:

- Monitor HTTP Service & SSL for HTTP service for availability and response times
- Perform Server PINGs
- Monitor Server URLs for availability, content and response times
- Display current status of all monitored components on a user-authenticated site
- Automatically alert notification if established thresholds are exceeded
- Monitor server CPU Utilization, disk space, memory, services and bandwidth
- Execute SQL queries to ensure database are functioning properly
- Infrastructure Security Components
- Ensure high availability firewalls through a high level of network access and information availability, as well as integrity and privacy with the redundant structure that supports synchronization and automatic failover
- Operate a corporate VPN to create efficient trust relationships for both site-to-site and desktop to host operations.

Fault Tolerance and Redundancy

The LMS has fault tolerance and redundancy built into it at every level. If any one component in the LMS fails, its load is immediately picked up by other components and service is not interrupted. The power system has redundant generators and Internet connections. Multiple systems monitor all components of the LMS, including hardware and software, 24/7/365. Alerts are sent immediately whenever an issue is detected, from a bug in the software or a course to a server failure, and StrongMind and Accelerate Education's technology staff responds to every alert with immediate and appropriate action. Regular system releases occur regularly and hotfixes when necessary can be applied any time. Operating system, firmware, and service patches are applied to all systems on an ongoing, scheduled basis with patches typically being applied to production systems after a testing period in other environments. From a user perspective, such as students, Learning Coaches, and teachers, should a power outage occur due to inclement weather, The LMS data and features will remain undamaged. Grade books, schedules, course completion data, and other elements will continue to remain updated and will be available when the user regains power and logs back into the system.

E. Describe the methods to ensure authenticity of student work and the proctoring of exams.

Authenticity of Student Work

Virtual Preparatory Academy of Pennsylvania will use a program such as Turnitin, an online plagiarism prevention tool, to help teachers and students identify and correct inappropriate re-use of content. Following established guidelines, students will be required to run their essays and other authentic assessment documents through Turnitin before submitting these assignments to the teacher and attach the Turnitin report URL to their submissions. This gives students an opportunity to correct any unintentional plagiarism and allows teachers to see at a glance where academic integrity issues may exist.

Proctoring Exams and Test Security

Virtual Preparatory Academy of Pennsylvania students will participate in state proficiency tests depending upon grade level. The school will set up in-person, proctored locations for state testing. The School acknowledges that Section 1744-A (2) encourages cyber schools and school districts to work cooperatively to accommodate students' needs in mandated testing. If needed, and where applicable, Virtual Preparatory Academy of Pennsylvania will work with an intermediate unit or a school district to request reasonable access to facilities for the administration of standardized tests.

The variety of assessment forms also promotes security. A student's work will begin with a placement process, providing the teacher with a solid baseline against which to compare online assessments to follow. Short-cycle and benchmark assessments will be use throughout the school to provide the teacher feedback on student progress. If a teacher suspects a student of cheating, they have the flexibility to administer a second exam to verify student mastery. Teachers will be specially trained in telephone and email message questioning techniques to evaluate student mastery of concepts.

Students and parents suspected of inappropriate assessment behavior will be confronted immediately and subjected to standard disciplinary action. All students will be required to sign an Honor Code indicating their understanding of the expectations of academic honesty. Cheating, plagiarizing, or other acts of academic dishonesty are directly counter to the principles of academic excellence and harm most those students who engage in such activities—they cheat themselves of the opportunity to fully develop their intellectual abilities. The Honor Code will serve to reinforce students' commitment to academic excellence, and all students must sign this Honor Code.

F. Describe equipment such as hardware, software and Internet to be provided to students.

Hardware, Software, and Internet Subsidies

Below are the proposed specifications for student computer devices and other supporting technology. When Virtual Preparatory Academy of Pennsylvania opens in 2021, the makes/models may vary but each unit will have comparable performance specifications.

Families will receive the following:

- One laptop computer per student in grades K–12
 - Hardware
 - HP model laptop
 - Intel i3-series processor

- 15.6-inch LCD LED display w/ integrated webcam
- 4 GB 1600MHz DDR3 (1 DIMM)
- 1 TB Hard drive
- 24X DVD/CDRW (fixed)
- 10/100/1000 NIC
- Broadcom® 802.11 a/b/g/n Wireless
- Bluetooth 4.0®
- 3 USB 2.0
- Headphone/line out
- External USB Dial-Up Modem provided as necessary

- Software
 - Microsoft Windows 10 Professional
 - Microsoft Office
 - Ad-Aware SE Anti-spyware protection
 - Other software installed includes: Adobe Acrobat Reader, Flash Player, Shockwave Player, and Windows Media Player
 - Internet filtering software is available upon request

- Extras
 - Headset/Microphone combo
 - Unlimited Technical Support

- One printer per household: Each household will be eligible to receive or be reimbursed for one standard HP Desktop printer in the first year of enrollment.
- Subsidy for Student Technology Support Stipend: Each household receives a stipend paid three times a year to assist with the cost of Internet service and printer ink.

II. NEEDS ASSESSMENT

1. Statement of Need

a. Why is there a need for this type of school?

Cyber schools started in the U.S. in the mid-1990s with the widespread use of the Internet. In Pennsylvania, after the charter school law was passed in 1997, the first cyber charter opened its virtual doors in 2000. Enrollment in cyber charters has increased every year from 582 students in the 2000-01 school year to over 35,000 students in the 2019-20 school year. This fall, current cyber charter schools have closed enrollment as Pennsylvania parents seek these options.

In the current 2020 Fall semester, a majority of school districts in the Commonwealth are attempting to offer part-time and full-time online learning options for their students. As we saw in the Spring of 2020, the transition was difficult and often schools and teachers struggled to provide a comprehensive education to their students despite their best efforts. Unfortunately, teachers had to construct their own lessons because they had no Learning Management System (LMS) to use for content and teachers had no experience or training on using web-based teaching platforms. Most of these platforms were designed for adult communications rather than for teachers and K-12 students. Additionally, instruction has been focused on live synchronous instruction rather than a balance of synchronous and asynchronous. Schools did the best they could given the circumstances, but parents now have a better understanding of virtual instruction and will demand quality instruction, applicable technologies, and organizational management for future online delivery.

In the Fall of 2021, many parents will continue to seek a quality cyber school option. Some parents will seek this option for the scheduling or pacing flexibility that it offers their student or family. Many Pennsylvania parents now understand the value they can provide in being active participants in their child's education and will choose to continue. The demand for cyber schools will only increase as a result of this pandemic and all schools will need a full-time online learning option going forward.

With the unique offerings of flexible pacing and Service Learning enrichment, Virtual Preparatory Academy of Pennsylvania will provide Commonwealth students with an additional quality educational option that is not currently available. All schools in the state will benefit from the best practices in remote learning that will be employed at Virtual Preparatory Academy of Pennsylvania.

b. Explain why the cyber charter school model is an appropriate vehicle to address this need.

Our target student profile is not limited to any particular demographic, however, student demographics are expected to be consistent with the racial and ethnic demographics observed in the data from

throughout the state. Instead, the Virtual Preparatory Academy of Pennsylvania is designed and organized to serve students and families who have chosen an online classroom setting for any of the following reasons, or other reasons relevant to the individual:

- Individuals who are self-directed and choose a wider range of academic options.
- Students of all ability levels seeking additional academic and learning opportunities.
- Family relationships, personal beliefs and values, and families who prefer to home school.
- Scheduling (i.e. sports, drama, extracurricular activities).
- High-risk/at-risk for successfully achieving high school graduation or equivalency.
- Health reasons prohibit them from attending normal classroom programs
- Students who wish to excel in the area of sports and related sport-oriented businesses

In education, one size does not fit all, and the School is dedicated to providing students and families with an online learning environment that can meet individual students’ unique needs. The goal is to create a school that enables all of its students to becoming self-motivated, competent, lifelong learners. Virtual Preparatory Academy of Pennsylvania provides a rich, rigor-filled, technology-focused, tuition-free public education, with accelerated pacing towards completion of a high school diploma with online curriculum content and classes– all day, every day, 24-7.

2. School Demographics

A. *What are the school’s enrollment projections for each of the first five years?*

Number of Student Enrollments by Grade

Year	K—5	6—8	9—12	Total
2021-22	140	180	180 Grade 9-10	500
2022—23	230	350	420 Grade 9-11	1,0000
2023—24	360	525	615 Grade 9-12	1,500
2024—25	480	700	820 Grade 9-12	2,000
2025—26	600	875	1,025 Grade 9-12	2,500

What is the school’s ultimate enrollment goal?

Virtual Preparatory Academy is looking to grow to an ultimate size of 2,500 students by Year 5- growing by an estimated 500 students each year. In years six and beyond, the school would keep overall enrollment maximized in this same range of 2,500 students.

For the 2019-20 school year, PDE data shows the average cyber school enrollment of 2,897 students. After five years of operation, Virtual Preparatory Academy of Pennsylvania enrollment would remain below the average, assuming the current cyber charter schools’ enrollment is static. During this pandemic year, we know that current cyber charter school enrollment has grown dramatically.

What grades will be served?

The school will serve students in grades K-10 in the 2021-22 school year, serve grades K-11 in the 2022-2023 school year, and then serve all grades K-12 in the 2023-2024 school year and beyond.

What is the entry age for kindergarten students and the entry age for beginners?

Virtual Preparatory Academy of Pennsylvania will follow the enrollment date established by the student’s district of residence. By and large, the most common enrollment dates districts set for eligibility are that the student must be five years old by either August 1st, September 1st, or October 1st in order to be eligible to enroll.

Effective with the 2020-2021 school year, a child must comply with compulsory attendance requirements from age 6 to age 18. Specifically, a child who has attained the age of 6 on or before September 1 must enroll and attend school or begin a home school program that year.

How many students are expected to be in each grade or grouping?

See the Table above

B. Describe the community or region where the school, particularly the administrative office, will be located.

The school administrative office will be located in the city of Harrisburg. Harrisburg is only 100 miles from Philadelphia and 200 miles from Pittsburgh, providing a centralized location for reaching students statewide.

C. Why was this location selected? Are there other locations suitable to the needs and focus of the school?

Virtual Preparatory Academy of Pennsylvania will serve students throughout Pennsylvania but the location for the school site was chosen in part because Harrisburg/York is centrally located in the state. Virtual Preparatory Academy of Pennsylvania is interested in partnering with the numerous higher education, non-profit, government, and community organizations in and around Harrisburg. Locating the school in Harrisburg also affords the school the ability to hire from a pool of qualified teachers.

D. Describe any unique demographic characteristics of the student population to be served including primary languages spoken.

In statewide cyber schools, the demographics of the schools typically mirror the demographics of the states. Of the students who attend schools supported by Accel, over 48.3% met the federal Free and Reduced Meals (FARM) guidelines mirroring the national average of 48.1%.⁶¹ In 2014, the Pennsylvania Department of Education reported that 48.1% of its students were eligible for FARM. Enrolled families will include many of modest means as well as single-parent/dual-working-parent households.

The Kids Count Data Center reported 15.4% of students with disabilities in 2013-2014 school year. Students with disabilities generally require special education through their schools, intermediate units or approved

The primary language spoken will be English.

3. District Relations/Evidence of Support

A. Provide evidence that your cyber charter school has the sustainable support to operate.

The success of Virtual Preparatory Academy of Pennsylvania will be founded on its ability to provide its students and parents with a learning environment that meets their individual needs. In this application, the School has demonstrated support sufficient to sustain and maintain the school as an on-going entity. The Board has demonstrated long-term, sustained support for the school by generating a petition signed by 916 Pennsylvania residents, including 275 residents from various regions in the Commonwealth who are parents. These signatures are provided in **Appendix D**.

The Board will prioritize creating and sustaining partnerships with organizations that complement the school's emphasis on Service Learning. For example, the Metropolitan Area Neighborhood Nutrition Alliance (MANNA) in Philadelphia has submitted a letter of support for the school to collaborate with their organization. A pediatric cancer doctor and scientist from the Children's Hospital of Philadelphia has submitted a letter of support. A founding school board member is the brother of the late Alexandria Scott, founder of Alex's Lemonade Stand Foundation. Another founding board member is a retired distinguished military officer. Several letters came from business owners who expressed support for character education as they address workforce issues. Each of these organizations and individuals will contribute to supporting Virtual Preparatory Academy of Pennsylvania students and teachers with engaging and impactful service learning opportunities. Throughout this planning year, the School will continue to secure more partnerships.

B. What efforts have you made to notify the district(s) from which your charter school would draw students?

Virtual Preparatory Academy of Pennsylvania will be a state-wide cyber charter school open to every school age student in Pennsylvania. The Board has generated and posted a letter to superintendents off all school districts in Pennsylvania notifying them of our application. The letter will request the opportunity to partner with the school districts to ensure we best serve the needs of the students from their district who enroll in Virtual Preparatory Academy of Pennsylvania. The letter is included in **Appendix E**.

I. What efforts will be implemented to maintain a collaborative relationship with school districts?

In the letter to superintendents of all 500 school districts, the Board will share its intention to partner with school districts to ensure students from their districts are best served. For example, Virtual Preparatory Academy of Pennsylvania may establish relationships with individual school districts on matters concerning students with special needs and students intending to play sports or engage in extra-curricular activities in their resident district.

II. Convey the scope of community backing for the proposed charter school and its founding coalition. Document community support among teachers, parents, students, community members, institutional leaders and others through the use of letters of support, surveys, or other tangible means.

The success of Virtual Preparatory Academy of Pennsylvania and its students is predicated on the support of communities. Support for Virtual Preparatory Academy of Pennsylvania from individual and organizational partners is reflected in the collected support letters which can be provided upon request.

Appendix D includes letters of support from the following people and organizations:

- Mike Doyle, 18th District PA, Congress of the United States – House of Representatives.
- Dr. John Maris, Children’s Hospital of Philadelphia
- JodyAnn McIntosh, Senior Manager of Community Engagement, MANNA
- Moira Kelly, Pennsylvania Parent
- Rachel Shetterly, Woodside Station Boarding Stables
- Susan Dioguardi, Pennsylvania Parent
- Patricia, Bouvy, Pennsylvania Parent
- Ronald Bouvy, Pennsylvania Parent and Business Owner

III. GOVERNANCE

1. Profile of Founding Coalition

- A. Describe the makeup of the group or partnership that is working together to apply for a charter, including the names of the founders, their background and experiences, and references for each.***

The Pennsylvania non-profit corporation, Virtual Preparatory Academy of Pennsylvania, is the applicant submitting this charter application to open in September 2021 and will govern the school and will hold the charter. Virtual Preparatory Academy of Pennsylvania is incorporated as an independent, public, non-profit corporation and is not a subsidiary of another entity, or in any way connected with, or under the control of another entity. As public officials, members of the Virtual Preparatory Academy of Pennsylvania Board of Trustees will be subject to the provisions of the Public Official and Employee Ethics Act, 65 P.S. §1101-1113 (“Ethics Act”) and will file Statements of Financial Interest & Code of Conduct by May 1 each year. In addition, as members of the Board of Trustees they will have legal obligations under the Charter School Law and the Public School Code. The Virtual Preparatory Academy of Pennsylvania Board of Trustees will be a good and effective steward of public money and provide independent governance of the school’s administrators.

Virtual Preparatory Academy of Pennsylvania will be capable, in terms of support and planning, to provide comprehensive learning experiences to all its students as an independent public school operating as a non-profit entity with an established and effective Board of Trustees. As evidenced in this application and appendices, the Board has real and substantial authority over educational decisions, the operations of the school, and staff, including teachers.

The resumes, CVs, or bios for the founding board members are located in **Appendix F**. They include dedicated pioneer cyber school parents who have supported their children through current PA cyber school programs and watched their successful completion of undergraduate programs. They include a former legislator/college professor who is also a distinguished military veteran. Another member is a recent Harvard graduate with a degree in economics who served as the CEO of a student-run corporation with over \$5 million in revenue. This same board member is now working at his family foundation to find a cure for pediatric cancer. Another board member has extensive knowledge in financial advising and will serve as the Board Treasurer. The board chair is a former CEO, cyber school parent, and consultant to new start-up companies. Collectively, these Pennsylvania citizens care about providing the Commonwealth’s children with a high quality, college preparatory public school option.

- B. Discuss how the group came together, as well as any partnership arrangements with existing schools, educational programs, businesses, non-profits, or any other entities or groups. Provide information on the manner in which community groups are involved in the charter school planning process.***

Two of the founding Virtual Preparatory Academy of Pennsylvania board members were parents in other cyber charter schools and were familiar with the work by current Accel representatives, who previously worked at or supported their student’s cyber school. After several discussions, these parents agreed that a new high quality public cyber school focused on a college prep was needed. They agreed to serve. The board evaluated the skills needed for future members and each recommended a new member- one with a higher education and legislative background and the other with financial expertise. The fifth board member came from an outreach to a well-known Pennsylvania foundation, Alex’s Lemonade Stand Foundation. With cyber schools serving so many chronic and sometimes terminally ill children, it was a good fit to have Alex’s brother serve on the board.

In the future, we expect the school to establish partnerships with museums, state parks, higher education institutions and business leaders in all areas of the state. Parent and student groups will be an active part of school community and we expect to help initiate those groups immediately upon school launch. Finally, Virtual Preparatory Academy of Pennsylvania will take an active part in contributing to best practices in instruction, teacher professional development, and the operations of cyber charter schools at the state and national level. Teachers, administrators and board members will be encouraged to present at state and national conferences including the PA Coalition of Charter Schools, the Digital Learning Annual Conference, the National Charter School Conference, and other relevant education conferences.

C. Include any plans for further recruitment of founders or organizers of the school.

The Board will recruit additional members as necessary to form a diverse and well-balanced Board. Any member of the greater Pennsylvania community may seek appointment to the Board, with the exception of employees of the Virtual Preparatory Academy of Pennsylvania and Accel Schools or any person who has been convicted of a felony. The Board will aim to have a parent of an enrolled student on the Board once the school is open.

2. Governance

A. Describe the proposed management organization of the school, including the following requirement:

An affirmative vote of a majority of the members of the Board of Trustees of the cyber charter school, duly recorded, showing how each member voted, shall be used in order to take action on the following subjects:

- ***School calendar (must include 990 hours or 180 days of instruction for secondary students [grades 7-12] and 900 hours or 180 days for elementary students [grades 1-6]. School cannot be kept open for students or staff on Sundays, Fourth of July, Memorial Day, Thanksgiving, the first of January, Christmas, or Saturdays unless Monday is the weekly holiday for the entire school year)***
- ***Adopting textbooks***
- ***Appointing or dismissing charter school administrators***

- *Adopting the annual budget*
- *Purchasing or selling of land*
- *Locating new buildings or changing the locations of old ones*
- *Creating or increasing any indebtedness*
- *Adopting courses of study*
- *Designating depositories for school funds*
- *Entering into contracts of any kind where the amount involved exceeds 200*
- *Fixing salaries or compensation of administrators, teachers or other employees of the charter school.*

The Pennsylvania non-profit corporation, Virtual Preparatory Academy of Pennsylvania, is the applicant submitting this charter application and will govern the school and will hold the charter. Documentation confirming the filing for the school's non-profit corporation status is provided in **Appendix G**. The Board of Trustees currently consists of five members, representing parents, higher education, business, and the non-profit community. The Board will employ all staff including the Principal and teachers. In Year 1 and Year 2, the Principal will be considered the Lead School Administrator. As the school enrollment grows, the Board will hire a School Executive Director/CEO who will be considered the Lead School Administrator. The Principals will report to the School Executive Director/CEO.

The operating structure of Virtual Preparatory Academy of Pennsylvania will be similar to a traditional educational environment, with the Lead School Administrator implementing the policies and procedures of the Board while supervising the teaching staff. The Lead School Administrator will be responsible for the instructional leadership, curriculum implementation, personnel decisions, facilities management, and any special staffing needs. The Lead School Administrator will manage the teachers ensuring that each student successfully completes his/her instructional program. The Lead School Administrator will be responsible for the overall school operation working with parents, students, support staff, and highly qualified teachers who virtually facilitate the student instructional program. In addition, through a Professional Network, the Lead School Administrator will have access to the experience, expertise, and best practices of his/her colleagues leading schools supported by Accel Schools throughout the nation. Curriculum development will be contracted from Accel Schools.

Appendix H shows the anticipated organizational chart for the Virtual Preparatory Academy of Pennsylvania in Year 1 including the contracted service providers Accel and Charter Choices. The draft Services Agreement for Accel is in **Appendix L** and the draft agreement with Charter Choices is in **Appendix R**.

The proposed staffing chart for Years 1 through Year 5 is below. The Board will employ the Lead School Administrator and all employees on the organization chart. The Board will maintain proper independent governance of the school and will have appropriate control over the operations of the school.

Staffing Chart

Position	School Year				
	2021-22	2022-23	2023-24	2024-25	2025-26
Total Enrollment	500	1,000	1,500	2,000	2,500
School CEO (Lead School Administrator)				1	1
Principal (Lead School Administrator)	1	1	1	1	1
Assistant Principal	1	1	2	2	3
Business Manager (Contracted)	1	1	1	1	1
Administrative Assistant	1	2	3	3	3
Registrar	1	1	1	1	1
Testing & Assessment Coordinator		0.5	0.5	0.5	1
Attendance Officer	0.5	1	1	1	1
Director of Special Education	1	1	1	1	1
Manager of Student Support		1	1	1	1
Parent & Student Activities Coordinator	1	1	1	1	1
School Counselors	2	2	3	5	5
Advisors	1	3	3	3	5
Gifted & Talented Coordinator	1	1	1	1	1
Teachers (K-5)	3	5	12	18	30
Teachers (6-12)	10	22	36	52	69
ELL Teachers	1	3	4	6	7
Special Education Teachers	3	6	10	15	20
Student -to -Teacher Ratio	29:1	28:1	24:1	22:1	20:1

B. How will the Board of Trustees be selected?

The By-Laws of the Board of Trustees are provided for reference in **Appendix J**. Trustees will be elected at a duly organized meeting of the Board by a majority of the Trustees in office. Members will take office immediately at the annual meeting, or other meeting, at which they are elected. Vacancies on the Board will be filled by a majority vote of the remaining members of the Board, or by a sole remaining Trustee, and each person so elected will serve for the balance of the unexpired term. Trustees will be divided into three classes, each class consisting of, as nearly as possible, an equal number of members. The members of the first class will hold office for an initial term of one year; the members of the second class for an initial term of two years; and the members of the third class for an initial term of three years. At the close of each annual meeting, the successors to the class of members whose terms expire that year will commence to hold office for a term of three years or until their successors have been identified. In the event of an increase in the number of Board members, the remaining members will assign the newly created position to the appropriate class or classes so that the three classes continue to consist of, as nearly as possible, an equal number of members.

Once the new Board is seated, the Board members will choose officers as per the bylaws. The officers of the Board will be a President, a Treasurer, and a Secretary.

After the initial Board is selected, the Board will also develop a Nominating Committee which will bear the responsibility of recruiting and interviewing prospective Trustees.

C. What steps will be taken to maintain continuity between the founding coalition’s vision and the Board of Trustees?

The current Founding Board intends to transition to the Board of Trustees upon approval of the cyber charter application. Trustees will serve staggered terms ensuring the Board will not have all members terms end simultaneously.

Sustaining the continuity of the vision of the Founding Board requires careful scrutiny of prospective Trustees’ commitment to the school’s mission as well as continually educating Trustees as to the scope of their legal responsibilities such as duty of loyalty, obedience, and faithfulness to the school’s mission. To that end, Virtual Preparatory Academy of Pennsylvania will hold annual Board retreats centered on effective Board development. During the annual retreat, the Board will revisit the mission and vision of the school to assess if the school is on track or if it needs to be updated based on how the school has evolved.

As initial Trustees leave the voting Board, Virtual Preparatory Academy of Pennsylvania may establish an Advisory Board to provide non-binding strategic advice with greater flexibility in structure. The Advisory Board would not have authority to vote on official matters or bear legal fiduciary responsibilities.

In addition, the Virtual Preparatory Academy of Pennsylvania Board of Trustees will actively seek to recruit educators, community stakeholders, and professionals to become members of the Board.

D. Describe the roles and responsibilities of the board.

The roles and responsibilities of the Board include, but are not limited to, the following:

- a. Practice financial management strategies,
- b. Act as fiduciary of the school,
- c. Provide academic program approval,
- d. Establish a framework for the budget process,
- e. Authorize major expenditures, substantial program changes, etc.,
- f. Elect the officers of the corporation and determine their terms,
- g. Ensure that the charter is achieving its vision and mission,
- h. Set Board policy,
- i. Evaluate and monitor the activities and success of the Lead School Administrator and other members of the school leadership team,
- j. Govern the operations of the school but leave daily operations to the Lead School Administrator,

- k. Exercise sound legal and ethical practices and policies,
- l. Manage liabilities wisely,
- m. Advocate good external relations with the community, school districts, media, neighbors, parents, and students,
- n. Hire and evaluate the Lead School Administrator annually,
- o. Hire contractors, negotiate service agreements, and hold contractors accountable for performance under such agreements,
- p. Review and renew the contract with the cyber educational services provider,
- q. Comply with state and federal reporting requirements,
- r. Practice strategic planning,
- s. Ensure adequate resources and manage them effectively,
- t. Assess the organization's performance including monitoring achievement of accountability framework,
- u. Attend mandatory training annually that is relevant to effective leadership of the charter school,
- v. Protect the legal interests of the charter school and adhere to all applicable laws,
- w. Develop and prepare the school budget,
- x. Practice financial management strategies,
 - Act as tribunal for disciplinary hearings,
- y. Approve real estate transactions, and
- z. Negotiate and enter into a charter with PDE.

E. What steps will be taken to facilitate a productive relationship between administrators and teachers?

Virtual Preparatory Academy of Pennsylvania will take the following steps to facilitate a productive relationship between administrators and teachers

- Ongoing job embedded training
- Weekly meetings
- Regular scheduled and unscheduled check-ins
- Training
- Open Communication
- Evaluations

F. Discuss the nature of parental and student involvement in decision-making matters where appropriate.

Parents and students will provide leadership and input in school decision-making where appropriate. The Board will meet approximately eight times per year in open, public session to

ensure transparency in operation.

Parents actively participate in the school and with the Board. The Board may create ad hoc parent/Learning Coach advisory groups to provide guidance on particular subjects such as community partnerships and neighborhood outreach. Parents will also be encouraged to be involved with the Board's activities. The schedule and agenda for all Board meetings will be posted to the school website. The Virtual Preparatory Academy of Pennsylvania will make all Board minutes available to families on request and will report on Board activities in the newsletter. The Board will aim to have at least one member of the Board be the parent of an enrolled student. The Board will also have a public comment policy to support parent interaction.

G. *Submit copies of the school's Articles of Incorporation, by-laws and contracts, and other documents required by applicable law. Requirements for the bylaws are as follows:*

- ***The bylaws must contain a provision for "failure to organize or neglect of duty". Specifically, the bylaws must outline a removal procedure for the failure of a board member to perform his or her duties as outlined in the Charter School Law.***
- ***No board member shall, as a private citizen, engage in any business transaction with the charter school of which he or she is a trustee, be employed in any capacity by the charter school of which he or she is a trustee, or receive from such charter school any pay for services rendered to the charter school.***
- ***A charter school Board of Trustees shall have a designated treasurer who shall receive all funds including local, state and federal funds and privately donated funds. The treasurer shall also make payments out of the same on proper orders approved by the Board of Trustees, signed by the president or vice president of the Board. The treasurer may pay out such funds on orders that have been properly signed without the approval of the Board first having been secured for the payment of amounts owing under any contracts, which shall previously have been approved by the Board, and by which prompt payment the charter will receive a discount or other advantage.***
- ***Procedures for dismissal of an employee must be contained in the by-laws.***

The by-laws for the Board of Trustees which outline the number of members, length of terms, offices, committees, grounds for removal, and relationship with school administration are provided in **Appendix J**. Upon approval of the charter, the by-laws will be reviewed for adoption by the Board.

The school's Articles of Incorporation are included in **Appendix K**.

H. *Submit board members' names, addresses, phone numbers and resumes.*

The Board of Trustee's roster and contact information is in **Appendix F**.

I. Submit copies of the school's management contracts, if any.

The Services Agreement with Accel Online Pennsylvania, Inc. is provided in **Appendix L**.

III. FINANCE AND FACILITY

1. Financing:

- A. *Develop a preliminary startup and operating budget. Use the [Pennsylvania Department of Education budget templates](#); draft a preliminary operating budget covering all projected sources of revenue, both public and private, and planned expenditures.***

The preliminary startup and operating budget using the PDE template is provided in **Appendix M**. It is carefully aligned to the mission of the school and demonstrates a school with sound financial planning. A detailed narrative regarding the budget is also provided in **Appendix M**, along with the Accel Schools Fee Schedule.

Start-up expenses, such as facility and administrative staff, have been budgeted. The Board of Trustees will seek a start-up loan or charter school grants to cover the start-up costs.

- B. *Develop a purchasing procedure that addresses a competitive way to purchase goods and services.***

The Virtual Preparatory Academy of Pennsylvania has developed a Purchases Subject to Bid Policy and it is included in **Appendix O**.

- C. *What fund raising efforts have occurred and/or are planned to generate capital or to supplement the per pupil allocations?***

The Virtual Preparatory Academy of Pennsylvania Board of Trustees does not anticipate the need to rely on fund raising to supplement the per pupil allocations.

- D. *Describe the implementation of the following required financial procedures:***

The treasurer of the charter shall deposit the funds belonging to the charter school in a depository approved by the board and shall at the end of each month make a report to the charter Board of the amount of funds received and disbursed by him or her during the month. All deposits of charter school funds by the charter treasurer shall be made in the name of the charter school. The Board of Trustees of a charter school shall invest charter school funds consistent with sound business practice. Authorized types of investments for charter schools shall be:

- ***United States Treasury bills.***
- ***Short-term obligations of the United States Government or its agencies or instrumentalities.***
- ***Deposits in savings accounts or time deposits or share account of institutions insured by***

the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation or the National Credit Union Share Insurance Fund to the extent that such accounts are so insured, and for any amounts above the insured maximum, provided that approved collateral as provided by law therefore shall be pledged by the depository.

- *Obligations of the United States of America or any of its agencies or instrumentalities backed by the full faith and credit of the United States of America, the Commonwealth of Pennsylvania or any of its agencies or instrumentalities backed by the full faith of the Commonwealth, or of any political subdivision of the Commonwealth of Pennsylvania of any of its agencies or instrumentalities backed by the full faith and credit of the political subdivision.*
- *Shares of an investment company registered under the Investment Company of America Act of 1940 (54 Stat.789, 15 U.S.C. * 80a-1 et seq.) as defined in PA 24 PS 4-440.1 of the Pennsylvania School Code.*
- *The school treasurer shall settle his or her accounts annually with the Board of Trustees for each school year. Pursuant to 24 P.S. §4-437, the accounts of the cyber charter school treasurer shall be audited annually.*

Financial Oversight

The Board of Trustees is responsible for the oversight and approval of school financial policies and procedures and possesses the necessary experience and financial expertise to fulfill its financial oversight duties. The Board has a contract with Charter Choices, a Pennsylvania-based company with experience working with charter schools since 1997. Charter Choices will provide contracted Business Manager services, district billing services, state and federal grant reporting, tax reporting, internal controls and Accel invoice review. The Board's agreement with Charter Choices is provided in **Appendix R**.

The Board will ensure that Virtual Preparatory Academy of Pennsylvania will establish systems and controls that will result in the timely completion of financial reporting as required by law, regulation, or the charter, including a report of budgeted and actual expenses. The Board will provide any information required by the PDE.

Once the charter is approved and the Board finalizes the Services Agreement (**Appendix L**), the Board will also be responsible for managing the contractual relationship with Accel.

Depositing Funds

The Treasurer of the Board will deposit funds belonging to the school in a depository account approved by the Board. Reconciliation of this account will be performed monthly and transactions will be reviewed to ensure funds have been deposited in a manner consistent with the policies of the school. The school will maintain its accounts at a federally insured banking institution within the state in compliance with applicable state laws.

Investing Funds

Based upon the cash balances of the school, the Board may invest school funds in a savings account at a federally insured banking institution. The Board will ensure that any investment of school funds will be maintained in an authorized account.

The Board will invest charter school funds subject to the standards set forth in 24 PS 4-440.1 of the Pennsylvania School Code. Example investments include:

- United States Treasury bills.
- Short-term obligations of the United States Government or its agencies or instrumentalities.
- Deposits in savings accounts or time deposits or share account of institutions insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation or the National Credit Union Share Insurance Fund to the extent that such accounts are so insured, and for any amounts above the insured maximum, provided that approved collateral as provided by law therefore shall be pledged by the depository.
- Obligations of the United States of America or any of its agencies or instrumentalities backed by the full faith and credit of the United States of America, the Commonwealth of Pennsylvania or any of its agencies or instrumentalities backed by the full faith of the Commonwealth, or of any political subdivision of the Commonwealth of Pennsylvania or any of its agencies or instrumentalities backed by the full faith and credit of the political subdivision.
- Shares of an investment company registered under the Investment Company of America Act of 1940 (54 Stat.789, 15 U.S.C. * 80a-1 et seq.) as defined in PA 24 PS 4-440.1 of the Pennsylvania School Code.

Financial Processes

The Virtual Preparatory Academy of Pennsylvania will follow a financial and accounting plan that is compliant with generally accepted accounting principles (GAAP) and will provide an accurate accounting of all of its finances, ensure sufficient information for audit purposes, and provide data in the format needed for accurate and timely reporting.

The Board will use a sound budgeting and forecasting policy and procedures to monitor revenue and authorize expenditures according to any restrictions placed on such revenue. Developing the annual budget will be an iterative process incorporating input from key stakeholders, including the Lead School Administrator, Business Manager, and designated members of the Board. A preliminary budget based on initial assumptions will be presented to the Board and will be approved by the Board before the start of the school year. This budget will then be compared to the actual and forecasted results on a monthly basis.

The Business Manager will perform the following duties:

- Monitor and track all school-based assets
- Manage the school budget and oversee any work performed by Accel relating to the budget
- Oversee pupil accounting functions including District billing

The Virtual Preparatory Academy of Pennsylvania will develop and maintain simple check request and purchase order forms to document the authorization of non-payroll expenditures. All proposed

expenditures will be approved by a designee of the Board. The designee will review the proposed expenditure for approval and to determine whether it is consistent with the Board's adopted budget. Supporting documentation will be required for all expenditures.

The Virtual Preparatory Academy of Pennsylvania will use industry-standard accounting software to ensure proper bookkeeping. The school will maintain detailed accounting records consistent with the accounting and financial reporting manuals prescribed by PDE.

Financial Reporting

Each month, Virtual Preparatory Academy of Pennsylvania will produce a set of detailed financial statements that include a statement of activities, a balance sheet, bank reconciliations, invoice detail, payroll registers, any grant fund expenditures, cash receipts from all sources, and a transaction listing of all activity. The Treasurer of the Board will be provided with access to such financial documents for review as an increased measure of oversight and governance. The Business Manager will review monthly financial statements and support effective decision-making.

During the Board’s regularly scheduled meetings, a financial report will be presented that will include the current results of the school’s financial activities along with a comparison of projected annual costs and the annual approved budget. Budget variances and matters of financial significance will be discussed with the Board and necessary actions and Board approvals will be taken.

Annual Report

The Treasurer will settle the accounts annually with the Board for each school year. Pursuant to 24 P.S. §4-437, Virtual Preparatory Academy of Pennsylvania’s accounts will be audited annually. Charter Choices will work with the school to support the preparation of audit work papers for the fiscal year end and work with auditors to complete the audit engagement.

Once the School's charter is approved and prior to the end of the first fiscal year, the Board will enter into a contract with an independent Certified Public Accounting firm chosen by the Board to conduct an audit of its annual financial statements. The annual financial report (PDE-2057) will be completed and filed with the PDE by October 31, beginning with October 31 after the first year of operations. The audit will be conducted in accordance with Governmental Accounting Standards and will meet the specific compliance requirements set forth by Pennsylvania.

2. Facility

- A. Provide descriptions of and addresses for the physical facilities, including the administrative office, and the ownership of the facilities and any lease arrangements.***

Virtual Preparatory Academy of Pennsylvania will lease permanent space for administrative staff located at 1800 Linglestown Road, Harrisburg to serve as the main site where administrative and teaching staff will work. Student records will be maintained at this location. The site will be available

for PDE staff to visit when the school is in operation and interacting with students.

The initial physical facility will need to be flexible for growth and future needs. The site will include at least one conference room with doors for use in IEP conferences and other special education related activities. To the extent that the site will be used for student support, the site will be used only for testing, tutoring, and supplemental services related to special education.

As the school grows, the Board may explore additional satellite facilities throughout the state. The Virtual Preparatory Academy of Pennsylvania understands that facilities will be for auxiliary services and not to act as brick-and-mortar schools. Students will be at physical locations only for the time needed to participate in these services and activities. As suggested in the Basic Education Circular from 2013 and revised in 2015, VPAP will utilize satellite sites for standardized and/or other testing, tutoring, and/or supplemental services such as special education services.

The office building is owned by Louis and Gary DeSanto of DeSanto Realty Group. **Appendix N** includes the current lease proposal and a facility layout.

B. Explain how this site(s) would be a suitable facility for the proposed cyber charter school. Consider the necessity of renovation to the facility and compliance with applicable building codes and accessibility for individuals with disabilities. Describe the services of the facility including heating, ventilating, lighting, sanitary conditions and water supply.

The site for the school’s administrative offices is identified in proposed Letter of Intent to Lease in **Appendix N**. This building will include administrative offices and infrastructure for school operations. The site will be compliant with the necessary building and zoning codes as well as accessible to individuals — including staff, parents and students — with disabilities.

Heating, ventilating, lighting, and water will be supplied to the premises by the landlord as part of the lease agreement. Janitorial services may be provided by the landlord or the School will need to contract for services to maintain a clean environment within the premises (as stated herein).

The site will meet all local minimum Americans with Disabilities Act (ADA) standards. It will include at least one conference room with doors for use in IEP conferences and other special education related activities. The facilities will comply with all applicable state and local health and safety requirements. Virtual Preparatory Academy of Pennsylvania will follow applicable city planning review procedures.

Virtual Preparatory Academy of Pennsylvania wants to make clear that any school sites will be for auxiliary services and not primary locations as brick-and-mortar schools. The Board is aware and will follow the Basic Education Circular (BEC), “Cyber Charter School Operations and Proper Use of Physical Facilities” issued July 2013.⁶⁴ As is required by the BEC, Virtual Preparatory Academy of Pennsylvania will be able to function and provide all curriculum and instruction to all of its students without the need for students to attend any physical facility. Virtual Preparatory Academy of Pennsylvania will only use its physical facility as an administrative office providing no more than supplemental services to students.

Virtual Preparatory Academy of Pennsylvania will provide equitable access to services for all enrolled students.

C. Discuss the plan for maintaining the facility on a daily basis (custodial) and extended basis (facility maintenance).

The lease for the site will provide for necessary repairs and for janitorial service.

In the event the lease for the site does not provide janitorial services, the School will source and contract with a reputable janitorial service for its cleaning needs. To the extent that the landlords are not required in the lease to maintain the equipment in the premises (e.g., HVAC), the School will source and contract with reputable contractors and enter into service agreements.

The selected facility will have a full service management group under contract by the landlord to handle maintenance, repairs, and necessary improvements to the space. If the chosen facility does not have a management team then the School will contract with a reputable management company to maintain the property on an extended basis throughout the lease term.

Virtual Preparatory Academy of Pennsylvania will take the necessary steps to secure the Certificate of Occupancy (CO) for the site. Depending on local protocols, the CO may be for the entire facility inclusive of the site.

D. Discuss any progress, partnership developments or other future steps towards acquisition of a facility/land.

The school's cyber education model requires only leased office space as the school's administrative office. This significantly reduces financial risks associated with large debt obligations that are often assumed by traditional schools.

E. Describe facility financing plans.

With the anticipation of utilizing leased facilities, the Board does not intend to secure any long-term debt to finance the purchase of a school facility.

The build-out will be for an office environment suitable for optimizing site operations. The landlord will provide a turn-key solution with standard building finishes. We anticipate capital outlay to occupy the leased space to be fairly minimal and limited to furniture and equipment, not Leasehold Improvements.

3. Liability and Insurance

A. Describe the proposed cyber charter school's insurance coverage plans, including health,

general liability (including school operation, extracurricular activities and parent volunteer activities), property, and director and officer's liability coverage (see Section 1727-A of the charter school legislation).

Health Insurance Benefits

Per charter school law, the Virtual Preparatory Academy of Pennsylvania will offer a health care benefit package similar to that of an aggregate of local school districts. The comprehensive package will include a choice of major medical plans, vision coverage, dental coverage, life and disability insurance, as well as paid sick leave.

Quotes for health insurance and other benefits are included in **Appendix P**.

Insurance Coverage

The school will have a comprehensive insurance program in place as dictated by applicable laws and the approved charter. The insurance program will include, but is not limited to Commercial General Liability, Sexual Abuse and Molestation, Educator's Legal Liability, Employment Practices, Liability, Crime (Employee Dishonesty), Property, Automobile, Workers Compensation, and Directors & Officers Liability. The policies will cover the school's operations, extracurricular activities, and volunteer activities.

4. Child Accounting

A. Describe the proposed cyber charter school's enrollment and attendance procedures.

Equal Opportunity Student Recruitment Plan - Student recruitment and enrollment policies need to be balanced with the mutual goals of ensuring that families are aware of their choices with the Board's need to be fiscally conservative. Enrollment will begin in March for the school year starting in September.

Through its recruitment/marketing and application guidance activities, Virtual Preparatory Academy of Pennsylvania will regularly disclose full details about its program and encourage families to carefully consider its academic and parental involvement demands before applying. The School will also provide tools (such as contact with other parents, with permission, and contact with an enrollment advisor, if desired) to help parents decide whether Virtual Preparatory Academy of Pennsylvania is truly the right fit for their children and themselves.

As stated previously, the Virtual Preparatory Academy of Pennsylvania will contract with Accel to implement and conduct the enrollment process on behalf of School, under the oversight of the Board and in accordance with placement and withdrawal policies and procedures adopted by the Board and reviewed by Board Counsel, which are consistent with local, state, and federal law. The enrollment policies will be reviewed by Board Counsel and approved by the Board as part of the overall school handbook.

Accel provides student enrollment and placement support, as well as enrollment processing, set up, and support in compliance with local, state, and Federal law, and acts acting as School's agent throughout the enrollment process. The enrollment process is fully integrated with and supported through the AMP System.

Families may commence the enrollment process online using the AMP system or by calling a toll-free number for assistance. AMP is available to students and their families, and to other authorized users according to their permissions, 24/7/365.

A detailed description of the Enrollment Procedures was provided previously in this application.

Enrollment and Withdrawal Reports

The Virtual Preparatory Academy of Pennsylvania will follow Section 1748-A of the Charter School Law. Within 15 days of enrolling a student, the School and the parent or guardian, will notify the student's school district of residence of the enrollment through the use of the notification form developed by the PDE.

If the student's school district receiving the notification determines that the student is not a resident of the school district:

- Within seven days, the school district will notify the Virtual Preparatory Academy of Pennsylvania and PDE that the student is not a resident and provide the basis for the determination.
- Within seven days of receiving the school district notice of non-residency, Virtual Preparatory Academy of Pennsylvania will provide a response to both the school district and the PDE.
 - o If Virtual Preparatory Academy of Pennsylvania agrees that the student is not a resident of the school district, it will determine the proper district of residence and notify the correct district of residence of the enrollment through use of the notification form developed by the PDE.
 - o If Virtual Preparatory Academy reconfirms that the student is a resident of the school district, it will indicate so in the response. The school district may then appeal to the PDE for a final decision.

If a student becomes ineligible or leaves the school, the Virtual Preparatory Academy of Pennsylvania will ensure all appropriate paperwork is submitted and/or forwarded to the new school and the AMP system will be updated. As per Section 1748-A of Charter School Law, Virtual Preparatory Academy of Pennsylvania and the parent or guardian, will provide written notification to the school district of residence using the Charter School Notification form within 15 days following the withdrawal of a student. The Charter School Notification form includes the student's name, last known address, and withdrawal date.

Attendance Procedures

Students in a cyber school program must meet all regulatory requirements for attending public schools. Attendance will be tracked and reported through the AMP system. Parents or guardians will ensure that students meet their school's attendance requirements and that the student's attendance is properly documented within the AMP system.

While students will have a great deal of flexibility regarding when and where they complete their coursework, they will nevertheless be held fully accountable for meeting all state-mandated attendance requirements.

Attendance recorded by the parent or guardian and verified by teachers will ensure the School is properly calculating and adequately monitoring that students complete 30 instructional hours per week and 180 instructional days per school year. If a teacher has concerns about the validity of a student's attendance records, he or she may revise the student's recorded hours of attendance based on work completion rates and/or contact the school's Attendance Officer for further assistance. In reviewing attendance documentation, teachers must determine that each student has met or exceeded the required amount of instructional time stipulated by state regulations. The school administration will monitor and review attendance records on a weekly basis.

These expectations and procedures for attendance will be documented in the School Handbook, alongside the state requirements for weekly and annual hours of instruction. Parents must agree to the policies in the Handbook when completing enrollment. Attendance procedures will be addressed in trainings for all stakeholders (Learning Coaches, students, teachers, and administrators). If a student accrues too many unexcused absences, the School will follow state law in reporting non-attendance and truancy.

Unexcused Absences

The Virtual Preparatory Academy has created a draft policy in Appendix O to address unexcused absences and truancy. Key elements are mentioned below:

All absences shall be treated as unexcused until the Charter School receives a written excuse explaining the reason for an absence. Parents/guardians may submit excuses as follows:

1. Written note signed by a parent/guardian; or
2. Email from a parent/guardian's email account as designated by the parent/guardian.

The mere fact that a parent/guardian has written an excuse note does not mean the absence is excused.

Excused Absences

In addition to attendance via the online learning portal, which requires that a student log-on to be considered "present," a student will be considered in attendance if present at any place while school is in session, if receiving approved tutorial instruction, or health or therapeutic services; an approved and properly supervised independent study, work-study, career education; or the student is receiving approved homebound instruction.

A student absence is considered excused under the following circumstances:

- 1) When the student is prevented from attendance for mental, physical, or other urgent reasons such as:
 - Illness
 - Family Emergency
 - Death of a Family Member

- Medical or Dental Appointments
- Authorized School Activities
- Educational Travel with Prior Approval
- Pre-approved religious instruction (limit 36 hours per year)
- Bona Fide Religious Holiday
- For purposes of receiving tutorial instruction in a field not offered in the school's curricula, when the excusal does not interfere with the student's regular program of studies, the qualifications of the tutor or instructor are satisfactory to the Chief Executive Officer or designee, and permission for such excusal is sought in writing by the parent/guardian of the child in advance of the commencement of such tutoring

2. When the student is required to leave school for the purposes of attending court hearings related to their involvement with the county children and youth agency or juvenile probation office.

3. If the student is absent due to participation in a project sponsored by an organization that is eligible to apply for a grant under the Pennsylvania Agricultural Fair Act.

4. If a student is dismissed from school during school hours for health-related reasons by a certified school nurse, registered nurse, licensed practical nurse or a school administrator or designee.

5. For the purpose of obtaining professional health care or therapy service rendered by a licensed practitioner of the healing arts in any state, commonwealth or territory.

6. If a student whose parent or legal guardian has been called to duty for, is on leave from, or is immediately returned from deployment to a combat zone or combat support posting, with regard to school attendance, tests and extra-curricular or cocurricular activities, at the discretion of the Chief Executive Officer or designee, no penalties shall be imposed for absences of up to five (5) days. Teachers shall assist students in making up work caused by such absences.

Ten Consecutive Absences

Students who miss ten consecutive school days shall be dropped from the active membership roll unless the school is provided with evidence that the absences are excused or the school is pursuing compulsory attendance prosecution. The Charter School will notify the school district of residence both after three (3) days of excused absence and ten (10) days of unexcused absence.

Procedures for Unexcused Absences

Parents/guardians and students shall submit the required excuse documentation within three (3) school days of the absence. If written verification of the reason for absence is not received within three (3) school days of the absence, the absence will be counted towards the calculation of unexcused absences for purposes of reporting truancy. The absence may be reclassified if a valid excuse note is forthcoming within ten (10) school days from the date of the absence. A maximum of ten days of cumulative excused absences for illness verified by parental/guardian notification may be permitted during a school year. All absences for illness beyond ten cumulative school days shall require an excuse from a physician familiar with the student who may not be the student's parent/guardian.

Third Unexcused Absence

Within ten (10) school days of a child of compulsory school age's third unexcused absence, the Attendance Officer shall send an Official Notice of Truancy, which will include a description of the consequences if the child becomes habitually truant. This notice may include the offer of a school attendance improvement conference, and shall be in the mode and language of communication preferred by the person in parental relation to the child.

When transmitted to a person who is not the biological or adoptive parent, such notice shall also be provided to the child's biological or adoptive parent if the parent's mailing address is on file with the school and the parent is not precluded from receiving the information by court order.

Continued Absenteeism

If a child of compulsory school age continues to incur unexcused absences after the issuance of the Official Notice of Truancy, the school shall then schedule a school attendance improvement conference, unless a conference was previously held following the Official Notice of Truancy. The following shall apply with respect to a school attendance improvement conference:

- There is no legal requirement that the child or person in parental relation attend the conference, and the conference shall occur even if the person in parental relation declines to participate or fails to attend the scheduled conference after advance written notice and attempts to communicate via telephone.
- The outcome of the conference shall be documented in a written school attendance improvement plan, on the template provided by the Department of Education.
- Further legal action may not be taken to address unexcused absences by the child until after the date for the scheduled school attendance improvement conference has passed.

The Charter School shall not expel or impose out-of-school suspension or disciplinary reassignment for truant behavior.

Procedure for Addressing Habitually Truant Children

When a child is habitually truant and under fifteen (15) years of age at the time of referral, the school:

- i. Shall refer the child to either (1) a school-based or community-based attendance improvement program or (2) the County Office of Children and Youth where the student resides for services or possible disposition as a dependent child; and
- ii. May file a citation in the office of the magisterial district judge having jurisdiction in the region against the person in parental relation who resides in the same household as the child. The venue for the filing of such a citation shall be based on the location of the school district of residence of the child.

When a child is habitually truant and fifteen (15) years of age or older at the time of referral, the school shall either

- i. Refer the child to a school-based or community-based attendance improvement program or service; or

- ii. File a citation in the office of the magisterial district judge having jurisdiction in the region against the child or the person in parental relation who resides in the same household as the child. The venue for the filing of such a citation shall be based on the location of the school district of residence of the child.

If a child of compulsory school age who is fifteen (15) years of age or older continues to incur additional unexcused absences after being referred to a school-based or community-based attendance improvement program or fails to participate in the such a program as recommended through the school attendance improvement conference, the school may refer the child to the County Office of Children and Youth where the student resides for possible disposition as a dependent child.

When referring a habitually truant child to the respective County Office of Children and Youth or filing a citation with the magisterial district judge having jurisdiction over the region, the school shall provide verification that a school attendance improvement conference was held.

No citation may be filed against a child or a person in parental relation with the child who resides in the same household as the child for a subsequent violation of school attendance if any of the following circumstances apply:

- A proceeding is already pending against the child or person in parental relation with the child who resides in the same household as the child and judgment in the first proceeding has not yet been entered, unless a warrant has been issued for failure of the child or person in parental relation to appear before the court and the warrant has not yet been served.
- A referral for services has been made to the appropriate County Office of Children and Youth, the agency has not closed the case and the Charter School has not consulted with that County Office of Children and Youth prior to filing the petition.
- A petition has been filed alleging the child is dependent due to being habitually truant and the case remains under the jurisdiction of the Juvenile Court.

Exempt from Compulsory Education

Pennsylvania School Code section 1330 states that a 16-year-old student who is regularly engaged in any useful and lawful employment or service during the time the public schools are in session, and who holds an employment certificate issued according to the law is exempt from compulsory attendance. In order to be a student who is exempt from compulsory education, the student must be 16 years of age or older and must be engaged in useful and lawful employment or service for 40 hours per week or more.

Child Accounting

When billing resident school districts for local revenue, charter schools are required to calculate Average Daily Membership (ADM) for each student. The Virtual Preparatory Academy of Pennsylvania will use the policies listed herein to establish the First Day Educated and Last Day Educated for each student. The Board will contract with Charter Choices to provide district billing services. All Pennsylvania child accounting procedures will be followed. (24 PS 13-1332)

IV. ADMINISTRATION

1. Recruiting and Marketing Plan

A. Demonstrate how you will publicize the cyber charter school to attract a sufficient pool of eligible applicants.

Upon approval of the charter, the Virtual Preparatory Academy of Pennsylvania will actively recruit families that represent the full cultural, demographic, and socioeconomic range of Pennsylvania. The school will use a variety of means to inform families about its services and provide them an opportunity to enroll, including:

Campaign	Description
Website	Website content will describe the School’s requirements including student attendance, courses offered, graduation requirements, and parent expectations. Website content will include the ability for Spanish translation and will maximize search engine marketing efforts and lead capture.
Search Engine Marketing	Search engine marketing will cover a wide spectrum of lead generating activities including; paid or sponsored listings on search engines, directories (ex: Google business, greatschools.com), and deploying strategies for search engine optimization (SEO) intended to achieve higher ranking in search results.
Social & Display Marketing	Leverage social media and display ads within platforms that are popular among younger, digital-native generations, as well as targeted adult demographics to provide meaningful opportunities for the Virtual Prep brand to reach thousands of users.
TV/Radio	TV/ Radio ads representing the benefits of the Virtual Prep offering, targeting desired demographics.
Direct Mail	Direct mail pieces sent to identified geographic and demographic targets with measurable outcomes.
Events	Promotional events in large, target areas. These events would be run by a school representative and discuss the school’s mission and program offering.
Email Campaign	Series of emails to inform families of school activities, enrollment dates, events, etc. Email content will also be available in Spanish.
Collateral	Specific literature will be provided to prospective families during all school events, promotional events, sponsorships and partnerships. These materials will be multicultural, and appeal to all socioeconomic groups.
Enrollment Center Support	The school will provide enrollment services to support families through the entire enrollment process including initial

	application, compliancy documentation collection, course placement and approval.
--	--

B. What type of outreach will be made to potential students and their families?

- Information sessions: The Virtual Preparatory Academy of Pennsylvania will conduct multiple information sessions across Pennsylvania to assure that families from a variety of communities are able to participate. Information sessions may be online, and families may attend the session from home via their computers. The Virtual Preparatory Academy of Pennsylvania will educate families about the school and provide a complete array of information, including its curriculum, teaching methods, technology resources, and testing requirements.
- Telephone and e-mail outreach: The Virtual Preparatory Academy of Pennsylvania will contact families who request information by telephone, electronic mail, and postal mail in order to provide literature and other valuable program information that prepares families for a successful cyber school experience.
- Telephone/e-mail information service: The Virtual Preparatory Academy of Pennsylvania will launch and maintain a toll-free information line and an email information service to answer parents' questions.
- Community and youth services partnerships: As part of its outreach process The Virtual Preparatory Academy of Pennsylvania will provide information about the school to the community that may include: youth-serving organizations such as Boys and Girls Clubs, parent groups, health-related organizations, and organizations for young actors, dancers, and athletes.

2. Admissions Policy

A. Describe the admission methods and eligibility criteria you will use to select students.

Admission Methods

The Virtual Preparatory Academy will be open to all eligible students statewide and will not discriminate in its admission policies or practices. The Admissions Policy is included in **Appendix O** with the Board Policies.

The Virtual Preparatory Academy of Pennsylvania will actively work to ensure a statewide racial and ethnic balance in the school; however, in such a manner to ensure nondiscriminatory preference or practices.

The Virtual Preparatory Academy of Pennsylvania will abide by all applicable federal, state, and local statutes, policies, and guidelines for student enrollment and will not impose enrollment requirements that are inconsistent with these policies and guidelines. These policies and guidelines include compliance with the McKinney-Vento Act regarding homeless students. The Lead School Administrator or his/her designee will serve as the liaison for homeless students.

Students who meet the definition of homeless shall not be barred from enrolling due to lack of required documents.

At various times during the school year, to comply with state regulations and reporting, and/or testing processes and requirements, the School may temporarily “freeze” enrollment. Students can continue to register and submit documents during this defined “enrollment freeze”. Once the temporary “enrollment freeze” is over, students will again be able to complete the enrollment process. The Board will delegate to the Lead School Administrator the authority to define and implement these temporary “enrollment freeze” periods. Students and families will be notified of these dates.

As per Section 1723-A, the Virtual Preparatory Academy of Pennsylvania will be open to all students statewide on a space available basis and will not discriminate in its admission policies or practices on the basis of intellectual ability, athletic ability, measures of achievement or aptitude, status as a person with a disability, proficiency in the English language or any other basis that would be illegal if used by a school district.

Students must meet minimum/maximum age requirements and will be subject to Pennsylvania current age restrictions for public school admission and funding or qualify for an exception as noted in state regulations.

B. Explain administrative procedures to ensure compliance with laws pertaining to special education.

Open and Fair Admissions Process: Virtual Preparatory Academy of Pennsylvania admissions procedures will comply with IDEA 2004 and Civil Rights protections. Virtual Preparatory Academy of Pennsylvania will comply with Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and Part B of the Individuals with Disabilities Education Act and will comply with the same Federal and State audit requirements as do other public schools in in Pennsylvania.

C. Describe the timetable to be used for admitting students, including a plan for the admission lottery for students from both within and outside the district.

- Tentative Enrollment and Lottery Dates (Subject to Change):
- Enrollment begins: Monday, March 1, 2021
- Lottery Determination Date/Close of Open Enrollment: Thursday, April 1, 2021
- Lottery If Needed: Monday, April 12,

Lottery Policy

If applications exceed space available at the end of the enrollment period, Virtual Preparatory Academy of Pennsylvania will conduct a lottery at that time to determine which students will be enrolled in the school. The lottery is blind to disabilities, testing, grades, etc. The lottery will be held once each year.

Only applications received at the location designated on the application form and by the lottery deadline will be eligible to participate in the lottery. Completed enrollment packets for applicants selected in the lottery must be received no later than the enrollment deadline. Those not responding by the enrollment deadline will be required to resubmit an application.

After the space allotted in each grade is filled in the order determined by the lottery, the remaining applications in rank order will be placed on a waiting list. Any applications received after the application deadline and after the lottery will be added to the end of the waiting list in the order they were received. As students withdraw from or transfer out of Virtual Preparatory Academy of Pennsylvania, that space will be given to the next person on the waiting list at that grade level. During the enrollment process, preference shall be given to students whose parents have actively participated in the development of the School and to siblings of students presently enrolled in the School.

D. Explain how these policies further the mission of the school in a non-discriminatory fashion.

The mission of Virtual Preparatory Academy of Pennsylvania is to provide K-12 students with an innovative college preparatory cyber school grounded in strong academics, character education and service-learning.

Through its partnership and outreach efforts, the Virtual Preparatory Academy of Pennsylvania hopes to ensure a statewide racial and ethnic balance in the school. Through extensive community outreach and full disclosure about the school's program, the School will have broad outreach throughout the state and parents will have a clear understanding of the cyber learning experience so that they can make the best choices for their students. Virtual Preparatory Academy of Pennsylvania will therefore attract those students and families who are most committed to student success in a cyber school setting from across the state.

Through the School's enrollment process and the admissions and eligibility criteria described previously, students will be admitted in a non-discriminatory manner, yet provided with a Student Success Plan to maximize individual achievement. Accel provides dedicated teams to support the families extensively throughout the enrollment process to ensure that they are supported and understand the cyber school model.

The Virtual Preparatory Academy of Pennsylvania hopes not to have to limit its enrollment through the imposition of a cap and lottery. However, should a cap be imposed, the School's lottery selection process allows for fair and equitable selection of students in the event that more students apply than can be accommodated. Preferences in the lottery process for children of parents/guardians who have actively participated in the development of the School, students are already enrolled and their siblings will help committed families handle the logistics of successful participation in the cyber school.

3. Human Resource Information

A. Describe the standards to be used in the hiring process of teachers, administrators and other school staff.

The Board of Trustees will employ all staff of the school including the Lead School Administrator and teachers. The Board has chosen to partner with Accel via the Services Agreement to provide human resource services, including recruiting, to ensure the Virtual Preparatory Academy of Pennsylvania is staffed by well-trained and effective cyber learning professionals. Accel has extensive experience in recruiting, screening, and qualifying staff for high-quality cyber schools. Accel serves and reports to the Board.

Hiring a Lead School Administrator

In Year 1 and Year 2, the Principal will be considered the Lead School Administrator. As the school enrollment grows, the Board will hire a CEO who will be considered the Lead School Administrator. The Principals will report to the CEO. Through the Services Agreement with the Board, Accel will provide administrative support to the Board as it recruits the Lead School Administrator and then provides administrative support to the Lead School Administrator as he/she recruits the staff. However, the Lead School Administrator is responsible for the daily oversight and hiring/firing of school staff with the approval of the Board. It is anticipated that the recruiting of the Lead School Administrator will begin soon after charter approval, as the Lead School Administrator needs to be hired prior to teacher and staff recruitment.

The search process will begin with posting the job and advertising for the position through multiple avenues. The Board will review the job description to ensure it is clear about expectations and delineation of roles. Strategies to attract highly qualified staff will be implemented to include posting on education-related job boards including LinkedIn, Indeed, university sites, and PA REAP. Additionally, job fairs will be attended throughout the state. The Board will interview, select, and hire the Lead School Administrator.

The Lead School Administrator will ideally hold an advanced degree with a minimum of five years teaching experience and some management or administrative experience. A former principal who is technologically proficient with good communication skills is ideal. The Lead School Administrator will build consensus and inspire teachers to teach, students to learn, and parents to engage in their child's learning while following the mission of the school. The Lead School Administrator will be responsible for the overall school operation working with parents, students, support staff, and teachers who virtually facilitate the student instructional program.

Ideally, the Board anticipates hiring a candidate in the spring of 2021. In addition, all candidates will undergo thorough screening procedures including background checks, comprehensive reference checks, a technology skills assessment, and a social media background check, as well as others checks as required by state law.

Daily management of the school will be the Lead School Administrator’s responsibility while overall governance will be the responsibility of the Board. The Board will annually evaluate the Lead School Administrator based upon performance. Annual performance will be based upon meeting school goals, evaluation of assigned competencies, and input from other key stakeholders like Accel staff that interact with the Lead School Administrator. The Board will adopt pay scales, performance criteria, a performance appraisal system, and disciplinary policies for all employees, including the Lead School Administrator. Explanation of such policies will be integrated into the Employee Handbook adopted by the Board. A draft Employee Handbook is included in **Appendix Q**.

Hiring Teachers

Cyber learning requires an additional skill set and professional development. A focus on individualizing education for students and a high level of comfort with technology will be included in screening candidates for positions. In partnering with Accel, high quality teachers knowledgeable in their content areas will be attracted to join the team. With their solid content knowledge and passion for individualizing instruction, the Board will engage Accel’ professional development services to provide them with the necessary skills and pedagogy to teach online and maximize their skill set statewide.

The school will recruit staff through a variety of channels, including traditional methods for posting job opportunities, plus networking with educational organizations; outreach via enrolled families; and special outreach to teachers and administrators who are seeking an alternative environment. Ideally, teachers will be hired at least 30 days prior to the start of the school year. In addition, all candidates will undergo thorough screening procedures including background checks, comprehensive reference checks, a technology skills assessment, as well as any additional checks as required by state law. Details of the background check clearances, standards, and requirements are located in sections (F) and (G). The school’s background check and clearance policy, which includes the employment history review, is attached in **Appendix O** with Board Policies.

Employment history reviews will be conducted for applicants who will be employed in positions involving direct contact with children. Employees of independent contractors must participate in the employment history review prior to the start of employment with a new school entity even though they remain employed by the same independent contractor (24 PS 1-111.1.) These additional steps will be followed for all applicants who are educators even if the applicant is not being hired for a position for which certification is required.

Even though the Board has plans to retain Accel for staff recruitment, the Board will be responsible for approving all school positions.

B. What is the targeted staff size and teacher/student ratio?

The staffing plan is shown in the chart below including teacher/student ratios.

Position	School Year				
	2021-22	2022-23	2023-24	2024-25	2025-26
Total Enrollment	500	1,000	1,500	2,000	2,500
School CEO (Lead School Administrator)				1	1
Principal (Lead School Administrator)	1	1	1	1	1
Assistant Principal	1	1	2	2	3
Business Manager (Contracted)	1	1	1	1	1
Administrative Assistant	1	2	3	3	3
Registrar	1	1	1	1	1
Testing & Assessment Coordinator		0.5	0.5	0.5	1
Attendance Officer	0.5	1	1	1	1
Director of Special Education	1	1	1	1	1
Manager of Student Support		1	1	1	1
Parent & Student Activities Coordinator	1	1	1	1	1
School Counselors	2	2	3	5	5
Advisors	1	3	3	3	5
Gifted & Talented Coordinator	1	1	1	1	1
Teachers (K-5)	3	5	12	18	30
Teachers (6-12)	10	22	36	52	69
ELL Teachers	1	3	4	6	7
Special Education Teachers	3	6	10	15	20
Student -to -Teacher Ratio	29:1	28:1	24:1	22:1	20:1

C. What professional development opportunities will be available to teachers and other staff?

The Virtual Preparatory Academy of Pennsylvania has engaged Accel, through the Services Agreement (**Appendix L**), to provide training and professional development for teachers. Training is integrated into the Accel program and aligned with the student curriculum, student pedagogy, student information system, data, evaluation systems, and other services.

The Virtual Preparatory Academy of Pennsylvania will provide its teachers with a comprehensive teacher training and professional development program. School staff will receive over forty hours of professional development prior to school opening. The components of our professional development offerings are delivered in a combination of asynchronous learning (via the learning management system) and synchronous learning as determined by the Lead School Administrator.

Below is an outline of topics covered:

1. *School and Accel Overview*
 - a. *Mission and Vision*
 - b. *Accel Services and Supports*
 - c. *Initiatives Overview*

- d. *School Specific Performance and Goals*
- 2. *Accel Management Platform (AMP)*
 - a. *Overview of Ecosystem and Components for New Users*
 - b. *What's New in AMP SY20-21 for Returning Users*
- 3. *Canvas (Learning Management System- LMS)*
 - a. *Canvas Basics for New Users*
 - b. *Canvas Advanced Features*
 - c. *Student Teacher Dashboard NEW FALL 2020*
- 4. *Video Conferences*
 - a. *Big Blue Button Basics for New Users*
 - b. *Orientation for Big Blue Button*
- 5. *Core Curriculum*
 - a. *School Specific Vendor Information and Methodology*
 - b. *School Specific Core Curriculum Deliverable*
 - c. *School Specific Core Curriculum Discussion*
- 6. *Supplemental Curriculum*
 - a. *School Specific Supplemental Resources Information and Screencasts*
 - b. *What's New for Returning Users*
 - c. *Supplemental Curriculum Deliverable*
- 7. *Instruction*
 - a. *Recommended Instructional Model: Putting It All Together*
 - b. *Asynchronous Instruction Best Practices*
 - c. *Home Page Set-Up: Classroom Management*
 - d. *Synchronous Instruction Best Practices*
 - e. *Small Group Instruction*
 - f. *Using Data to Inform Instruction*
 - g. *Curriculum Mapping*
 - h. *The Learning Cycle*
- 8. *Assessments*
 - a. *MasteryConnect Information and Screencast*
 - b. *MasteryConnect Deliverable*
 - c. *NWEA Information and Screencast*
 - d. *NWEA Deliverable*
 - e. *School Specific Assessment Platforms*
- 9. *Special Education*
 - a. *Basics of Special Education Programming and Compliance*
 - b. *Best Instructional Practices for Students with Disabilities*
- 10. *PowerSchool (SIS)*
 - a. *PowerSchool for Returning Users: What's New in SY 20-21 (Admins)*
 - b. *PowerSchool Overview for New Teachers*
 - c. *PowerSchool Overview for New Admin (Leaders and Student Services)*
 - d. *PowerSchool Overview for New Student Services*

- e. *Training on Reporting in PowerSchool*
- 11. *IT Support*
 - a. *IT Support Flow*
 - b. *Ring Central*
- 12. *Student Services*
 - a. *What are Student Services?*
 - b. *Best Practices in Orientation and Onboarding*
 - c. *Using Data to Inform Engagement and Retention*
- 13. *Compliance (sample, offerings are customized for state requirements)*
 - a. *AED Use*
 - b. *Child Abuse and Mandate Reporting*
 - c. *Email Safety: Phishing, Malware, Ransomware*
 - d. *Implicit Bias and Cultural Responsiveness*
 - e. *Sexual misconduct – Staff to Student*
 - f. *Social Media: Personal and Professional Use*
 - g. *School Emergency Management Plan*
 - h. *Homeless Education: Serving Students Under McKinney Vento*
 - i. *School Policies and Procedures*
 - j. *Student Privacy Rights (FERPA)*
 - k. *Code of Professional Conduct for Educators*
 - l. *Preventing Child Abuse and Human Trafficking*
 - m. *Depression and Suicide Prevention*
 - n. *Bullying Prevention*
 - o. *Prevention of Mental, Emotional, and Behavioral Disorders in Students*
 - p. *Building Safe and Supportive School Environments*
 - q. *Ethical Use of Tests*
 - r. *CIPA Course Curriculum*

After completion of this initial training program, teachers will have the foundation to successfully deliver instruction in the school’s online environment. The Virtual Preparatory Academy of Pennsylvania will conduct training throughout the school year to reinforce these concepts and address additional topics based on teacher feedback. The school will also form professional learning communities by grade levels, content areas, and additional areas identified by staff.

Teacher Induction Program

During the 2021-22 school year, the Virtual Preparatory Academy of Pennsylvania will identify an Induction Coordinator and form a council to develop an induction program for new teachers and education specialists in accordance with the requirements established by Title 22, Chapter 49, Sections 49.16 and 49.83 of the Pennsylvania Code. The council will:

- develop the goals and competencies for the induction program,
- determine how the needs of new teachers will be assessed,
- define the role of new teacher mentors and the process for selecting mentors,

- identify monthly activities/topics to support new teachers,
- identify how teacher participation and program completion will be documented, and
- define the metrics that will be used to monitor and evaluate the induction program.

The Virtual Preparatory Academy of Pennsylvania Teacher Induction Council will submit their induction plan for state approval prior to the PDE deadline.

The scaffolded, supportive, and intensive training and professional learning sessions delivered by Accel, and described herein, along with additional training from staff and collaboration with mentor teachers, will support first year and novice teachers as they develop their skills and become high quality educators and reflective practitioners.

D. Describe your human resource policies governing salaries, contracts, hiring and dismissal, and benefits.

The Virtual Preparatory Academy of Pennsylvania will offer a competitive compensation and health benefits (medical, dental, and vision coverage) program with annual performance-based salary reviews, and annual bonus incentives based on school and individual performance. Per charter school law, the Virtual Preparatory Academy of Pennsylvania will offer a package of health care benefits similar to an aggregate of local school districts.

For teaching positions, a salary range will be determined based on research of market compensation and financial considerations at the time of posting. Initial employment offers will be based on specific criteria, including years of experience, education, and other relevant skills/qualifications. After the initial hire, compensation increases and incentives will be based on performance. Teachers may receive an annual salary increase based on performance ratings. With Board approval, teachers may apply for teacher leadership opportunities and assume additional responsibilities in order to earn additional compensation.

For non-teaching positions, a salary range will be determined based on research of market compensation and financial considerations and incorporating the state required minimums. Initial employment offers will be based on specific criteria, including years of experience, education, and other relevant skills/qualifications. After the initial hire, compensation increases and merit pay will be based on performance.

Both salary increases and bonus incentive payouts are contingent on the fiscal performance of the school and the bonus incentive is tied to teacher’s intent to return for the next school year. The Board will have the ability to adjust the percentages in the event that the school does not meet financial expectations.

At-Will Employment

Virtual Preparatory Academy of Pennsylvania is at-will, which means that you or the School may terminate an employees' employment at any time for any lawful reason unless a written employment agreement exists with the School that provides otherwise.

The School has the right to transfer, demote, or otherwise discipline an employee at any time for any lawful reason. For an employment agreement with the School to be considered valid, it must be signed by an officer of the School board or a designated representative.

Equal Employment Opportunity

Virtual Preparatory Academy of Pennsylvania provides equal employment opportunities to all employees and applicants in all School and school facilities without regard to race, color, religious creed, sex, national origin, ancestry, citizenship status, pregnancy, childbirth, physical disability, mental and/or intellectual disability, age, military status or status as a Vietnam-era or special disabled veteran, marital status, registered domestic partner or civil union status, gender (including sex stereotyping and gender identity or expression), medical condition (including, but not limited to, cancer related or HIV/AIDS related), genetic information, or sexual orientation in accordance with applicable federal, state and local laws.

This policy applies to all terms and conditions of employment, including, but not limited to, hiring, placement, promotion, termination, layoff, recall, transfers, leaves of absence, compensation and training.

Outside Employment and Conflicts of Interest

The School recognizes that some employees may need or want to hold additional jobs outside their employment with the School. Employees may be permitted to engage in outside work or hold other jobs, subject to certain restrictions based on reasonable business concerns. Employees must consult their supervisors or managers for review and approval of outside employment prior to beginning outside employment.

The following rules for outside employment apply to all employees:

1. Work-related activities and conduct away from the School must not compete with, conflict with or compromise the School's interests or adversely affect job performance and the ability to fulfill all job responsibilities.
2. Employees must carefully consider the demands that additional work activity will create before accepting outside employment. Outside employment will not be considered an excuse for poor job performance, absenteeism, tardiness, leaving early, refusal to travel, or refusal to work overtime or different hours. If outside work activity causes or contributes to job-related problems at the School, the employee will be asked to discontinue the outside employment, and the employee may be subject to the normal disciplinary procedures for dealing with the resulting job-related problem(s).
3. In evaluating the effect that outside work may have on an employee's job performance and other job-related responsibilities, the Employee's supervisor and the human resource department will consider whether the proposed employment:

- a. May reduce the employee's efficiency in working for the School.
 - b. Involves working for an organization that does a significant amount of business with the School, such as major contractors, suppliers, and schools.
 - c. Involves working for an organization that provides competing services.
4. Employees are prohibited from using School property or facilities to perform work for an outside employer unless authorized in advance by a supervisor.
5. Employees may not solicit or conduct any outside business during School work time.
6. Employees who have accepted outside employment may not use School-provided Paid Time Off (PTO) to perform work on the outside job.
7. Fraudulent use of the School's sick leave or an employee's refusal to discontinue outside employment after being requested to do so by his or her supervisor or the human resource department will result in disciplinary action up to and including termination of employment.

Accommodation of Disability

The School is committed to making every reasonable effort to accommodate an employee's disability. An accommodation may be provided as long as the employee can perform the essential duties of the job, and it does not create an undue hardship for the School. A reasonable accommodation may include changes in the work environment or in the way a job is performed, so a person with a disability may enjoy equal employment opportunities. Accommodations depend upon the employee's job qualifications and the specific facts and circumstances of each individual situation.

Separation from Employment

An employee may be separated from employment either voluntarily or involuntarily by resignation, retirement, lack of work, poor performance or other reasons.

Employment Termination

The School Board's goal is to build and maintain lasting work relationships with our employees. In the case that an employee chooses to resign, he/she should consult the terms of his/her employment agreement.

It is expected that teachers provide a minimum of 30 calendar days' notice and others provide a minimum of 14 calendar days' notice.

The School reserves the right to accept the resignation immediately upon notice, or based upon the individual circumstances, the School may elect to allow the employee to work out his/her notice. Employees must actively be at work during a notice period except with written management approval or unless approved in writing by management or Human Resources. Paid Time Off (PTO) cannot be used during this notice period.

Once notice of resignation is received by the Lead School Administrator, it cannot be withdrawn except with the written agreement of the school leader, even if such attempt to withdraw is during the notice work out period. Some employees may have additional conditions and/or limitations regarding resignation from employment.

School employees who fail to follow any additional restrictions or conditions within their employment agreement, if any, may be in violation of their employment agreement and/or state law.

End of Employment Term / End of School Year Procedure

School employee must return any equipment or supplies they received during the course of their employment prior to his/her final workday.

Teaching Personnel must follow the end of year procedures as assigned by their supervisor.

Exit Interviews

The school leader will generally schedule exit interviews at the time of employment termination. Topics of discussion may include your reasons for leaving and any other impressions that you may have about the School.

E. Identify the proposed faculty.

Faculty

The Virtual Preparatory Academy of Pennsylvania has not hired any faculty yet. The Board will interview and hire the Principal in the spring prior to the approved school opening. In Year 1 and Year 2, the Principal will be considered the Lead School Administrator. As the school enrollment grows, the Board will hire a CEO who will be considered the Lead School Administrator.

The Board will value the input of the Lead School Administrator in making hiring decisions. The Lead School Administrator will be considered an administrator requiring a Secondary or Elementary Principal Certification in Pennsylvania, which requires completion of a certification program at a college or university and five years successful teaching experience.

Ideally, the selected Lead School Administrator will also have some management or administrative experience. A former principal who is technologically proficient with good communication skills is ideal. The Lead School Administrator will build consensus and inspire teachers to teach, students to learn, and parents to engage in their child's learning while following the mission of the school. The Lead School Administrator will be responsible for the overall school operation working with parents, students, support staff, and teachers who virtually facilitate the student instructional program.

Once the Lead School Administrator is hired, he/she will work under the direction of the Board to hire the teachers and additional school staff. Teachers will be required to meet all requirements of Pennsylvania's charter school law, including the requirement that at least 90% of the charter school's professional staff hold appropriate state certification. Additionally, Pennsylvania charter schools must meet the federal law's Highly Qualified Teacher requirements. Teachers at the Virtual Preparatory Academy of Pennsylvania will hold at least a bachelor's degree and will demonstrate competence in the core content areas in which they teach. Federal law further provides that charter school teachers must meet the certification requirements

established in the state's public charter school law, which may differ from the requirements for full state certification. In Pennsylvania, in order to be Highly Qualified, all charter school teachers of core content subjects at all grade levels, whether or not they hold state certification, must (1) hold at least a bachelor's degree and (2) demonstrate subject matter competence in each core content area and grade level at which they teach. To demonstrate subject matter competency, teachers can use a passing grade in the appropriate PRAXIS content area test in the subject area of their teaching assignment. Middle school and high school teachers may also demonstrate competency by having completed a content area major or a graduate degree in the subject area of their teaching assignment. Teachers with three or more years teaching experience may demonstrate subject matter competency through having attained National Board for Professional Teaching Standards (NBPTS) Certification in the core content area of their teaching assignment. Experienced teachers (i.e., one or more years of teaching experience) may demonstrate subject matter competency through completing Pennsylvania's HOUSSSE programs. All special education teachers will be required to hold the appropriate certification.

F. Attach a report of criminal history record, pursuant to Section 111 of the Public School Code for all individuals seeking the charter who shall have direct contact with students. Direct contact includes contact through any electronic means.

The Charter School Law also requires an applicant to include a criminal history record and an official clearance statement regarding child injury or abuse. 24 P.S. §17-1719-A (15), (16). Since the Virtual Preparatory Academy of Pennsylvania has not hired staff yet, it is not possible to provide criminal history records and child abuse clearances at the time of submitting this application. These documents will be provided to PDE as soon as staff has been hired.

The Virtual Preparatory Academy of Pennsylvania will contract with Accel to provide background checks and criminal history records. Upon an offer of employment, Accel will run a background check through the third party vendor. This background check will run a social security number verification, a state and county check, and a sex offender registry check.

In compliance with Section 111 of the Public School Code, individuals required by law will, in addition to the FBI background check, submit their fingerprints to be run by the Pennsylvania State Police to make sure there are no adverse records in the State Police Central Repository.

In accordance with 24 P.S. Section 111, all applicants for employment at the Virtual Preparatory Academy of Pennsylvania, excluding employees who do not have direct contact with students, must undergo state and federal background checks. Background checks will be no more than one year old at the time of application. Administrators will make and keep a copy of the original background checks. As required by state law, applicants for employment will be required to produce three documents verifying the checks that they have completed:

- Pennsylvania State Criminal History Record (Act 34) where the applicant will submit information online to be run through the PATCH system. The system will generate a report that is sent directly to the applicant for submission to the School;

- Child Abuse Report (Act 151) which requires the applicant to complete an application to be submitted to the Department of Public Welfare to investigate whether the applicant has been the subject of, or is currently the subject of, an investigation for child abuse, sexual abuse, or the like, or has ever been disciplined by any employer, public institution, or other authority for such an offense. The Department will in turn send a report back to the applicant, which is to be submitted to the School;
- Federal (FBI) Criminal History Report (Act 114) whereas the applicant will submit their fingerprints to the State Police to be run through the FBI repository for criminal history of the applicant;

In addition, the application will submit the following:

- Arrest / Conviction and Certification Report (Act 24) or PDE-6004, this form that must be completed by the applicant affirming they have/have not been convicted of certain crimes listed on the document.
- Sexual Misconduct / Abuse Disclosure Release (Act 168) this release must be completed by the applicant for their current employer, any previous employers that were school entities, and any employer where the applicant was employed and held a position with interaction with children.

Failure to accurately report required information will subject the candidate to discipline up to, and including, denial of employment or termination if already hired, and may subject the candidate to civil and criminal penalties. The Virtual Preparatory Academy of Pennsylvania may use the information for the purpose of evaluating an applicant's fitness to be hired or for continued employment and may report the information as permitted by law.

G. Attach an official clearance statement regarding child injury or abuse from the Department of Public Welfare as required by 23 Pa. C.S. Chapter 63 subchapter C. 2 (relating to background checks for employment in schools) for all individuals who shall have direct contact with students. Direct contact includes contact through any electronic means.

Upon being offered employment, any candidate who has direct contact with students must obtain and submit to Accel a clearance statement for the preceding year from the Department of Public Welfare. The clearance letter is to state that the employee is not named as a perpetrator of an indicated/founded child abuse or neglect report, or is named as the individual responsible for injury/abuse in an indicated/founded report. This document must be submitted prior to employment.

Clearances must be obtained every 36 months. Timelines for renewed clearances will be based upon the date of each individual clearance. Clearances are transferrable within the school and a person need not obtain a new clearance letter to change positions within the school.

The Virtual Preparatory Academy of Pennsylvania will maintain copies of the required information and

require the individual to produce the original documents prior to employment or acceptance to serve in any such capacity, except provisional employees for limited periods. Individuals may be employed for a single period, not to exceed 90 days if all of the following conditions are met:

- The applicant has applied for the three required clearances and they provide a copy of the completed forms to the Virtual Preparatory Academy of Pennsylvania.
- Virtual Preparatory Academy of Pennsylvania has no knowledge of information pertaining to the applicant that would disqualify him/her from employment.
- The applicant swears or affirms in writing that he/she is not disqualified from employment pursuant to the grounds for denying employment in § 6344 (c) of the Child Protective Services Law or has not been convicted of an offense of a similar nature to those crimes under the laws or former laws of the United States, or one of its territories or possessions, another state, the District of Columbia, the Commonwealth of Puerto Rico or a foreign nation, or under a former law of the Commonwealth.
- The applicant is not permitted to work alone with children and must work in the immediate vicinity of a permanent employee.

H. What procedures have been developed, through research of NCLB guidelines, that ensure the hiring of certified, highly qualified teachers and other professional staff?

Virtual Preparatory Academy of Pennsylvania will ensure the school complies with the regulations for Properly Certified (Highly Qualified) and Certification of Charter School Teachers. “At least 75% of the professional staff of a charter school must hold appropriate Pennsylvania certification. The charter must list the general qualifications for non-certificated staff and additional criteria are established. The staff may bargain collectively, but not as part of the school district’s bargaining unit. Protections are built into the bill to allow teachers to transfer to a charter school without penalty to employee rights: seniority, right of return, retirement, health benefits and tenure.”

During the interview and onboarding process, transcripts, certifications, and test scores will be submitted to the Accel Schools’ onboarding team for initial evaluation. These documents will be kept by onboarding until the employee is hired. Upon being hired, the documents will be uploaded into the Human Resources Information System (HRIS) for instant access by teachers and the human resources department.

Virtual Preparatory Academy of Pennsylvania will review all documentation to ensure that the employee does have the necessary documentation and experience to be labeled ‘Properly Certified’ under the ESSA and Pennsylvania state regulations. This includes making sure the employee:

- Holds at least a bachelor’s degree from an accredited college or university, and
- Demonstrates subject matter competency for the core content area through completion of a PRAXIS test, major/graduate degree, obtaining a National Board for Professional Teaching Standards certificate, or through the Pennsylvania HOUSSSE program.

4. Code of Conduct

A. Discuss any rules or guidelines governing student behavior.

The Virtual Preparatory Academy of Pennsylvania is committed to providing a safe, positive, productive, and nurturing educational environment for all of its students, and conveys this commitment through its written policies—in the form of the school handbook, which all students must review as part of the enrollment process—and its collaboratively developed school culture.

Student Conduct Policies

The school will have a detailed student handbook that will include a clear and fair set of roles and responsibilities for students, Learning Coaches, and school staff that complies with the students' due process rights and aligns with the school's mission. Parents/guardians will be provided with access to the handbook at the beginning of the enrollment process.

Appropriate conduct will be expected of all students. As a personalized, high-expectation cyber school, the Virtual Preparatory Academy of Pennsylvania anticipates being able to effectively manage student discipline issues. The expectations for student conduct will be explained in the handbook and will include steps to be followed in the event of misbehavior. The school will follow formal due process procedures to manage the discipline of students. In addition, the cyber curriculum will allow the school to minimize academic interruptions caused by suspensions; students may be expected to work regardless of their disciplinary status.

The school will regard academic honesty as key to its mission, and will expect all stakeholders to understand that cheating, plagiarizing, or other acts of academic dishonesty are directly counter to the principles of academic excellence and harm most those students who engage in such activities. By engaging in academic misconduct, students cheat themselves of the opportunity to fully develop their intellectual abilities. As part of the school start-up tasks, all students will be required to sign the Honor Code indicating their understanding of the expectations of academic honesty. It will be expected that students will adhere to the Honor Code throughout the school year, and that all schoolwork submitted in order to meet course or class requirements represents the original work of the student. The Honor Code will serve to reinforce students' commitment to academic excellence and integrity. Students and parents suspected of inappropriate academic behavior will be confronted immediately and subjected to standard disciplinary action as described in the handbook.

The handbook will include practices the school will use to promote effective discipline, a list of offenses which may result in suspension or expulsion, an explanation of the rights of students with disabilities, and policies and procedure for due process. The Virtual Preparatory Academy of Pennsylvania will establish and adopt suspension and expulsion policies that will be distributed in the school handbook. The school's discipline, suspension, and expulsion policies will be in accordance with student's rights and with applicable law.

Reflected in the school handbook will be a careful protection of the rights of disabled students through the fair application of due process. A student with a disability may be removed from school for disciplinary reasons to the extent the removal is applied to non-disabled students, as long as the removals do not constitute a change of placement.

The Virtual Preparatory Academy of Pennsylvania will not discriminate in its discipline policies or practices on the basis of intellectual ability, status as a person with a disability, proficiency in the English language, or any other basis that would be illegal under applicable state and/or federal laws (24 P.S. section 17-1723-A(b)(1)).

There are special rules in Pennsylvania for excluding children with disabilities for disciplinary reasons as set forth in Chapter 711 of Title 22 of the Pennsylvania Code (which adopt by reference 20 U.S.C. § 1415(k) and 34 CFR §§ 300.530-300.536) as well as the Procedural Safeguards Notice available through PaTTAN.

The Virtual Preparatory Academy of Pennsylvania personnel may consider any unique circumstances on a case-by-case basis, when determining whether a change of placement, made in accordance with the following requirements related to discipline, is appropriate for a child with a disability who violates a school code of student conduct.

To the extent that they also take such action for children without disabilities, school personnel may, for not more than 10 consecutive school days, remove a child with a disability (other than a child with mental retardation) who violates a code of student conduct from his or her current placement to an appropriate interim alternative educational setting, another setting, or suspension. School personnel may also impose additional removals of the child of not more than 10 consecutive school days in that same school year for separate incidents of misconduct, as long as those removals do not constitute a change of placement or exceed 15 cumulative school days in a school year. Once a child with a disability has been removed from his or her current placement for a total of 10 school days in the same school year, the Virtual Preparatory Academy of Pennsylvania must, during any subsequent days of removal in that school year, provide services to the extent required.

If the behavior that violated the student code of conduct was not a manifestation of the child's disability and the disciplinary change of placement would exceed 10 consecutive school days, school personnel may apply the disciplinary procedures to that child with a disability in the same manner and for the same duration as it would to children without disabilities, except that the school must provide services to that child as described herein under Services. The child's IEP Team determines the interim alternative educational setting for such services. Under Pennsylvania special education regulations, a disciplinary exclusion of a student with a disability for more than 15 cumulative school days in a school year will be considered a pattern so as to be deemed a change in educational placement. The Virtual Preparatory Academy of Pennsylvania will be required to issue a NOREP/Prior Written Notice to parents prior to a removal that constitutes a change in placement (removal for more than 10 consecutive days or 15 cumulative days).

The services that must be provided to a child with a disability who has been removed from the child's

current placement may be provided in an interim alternative educational setting. The Virtual Preparatory Academy of Pennsylvania will only be required to provide services to a child with a disability who has been removed from his or her current placement for 10 school days or less in that school year, if it provides services to a child without disabilities who has been similarly removed. Students may have the responsibility to make up exams and work missed while being disciplined by suspension and may be permitted to complete these assignments within guidelines established by the school.

A child with a disability who is removed from the child's current placement for more than 10 consecutive school days must continue to receive educational services, so as to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP; and receive, as appropriate, a functional behavioral assessment, and behavioral intervention services and modifications that are designed to address the behavior violation so that it does not happen again.

After a child with a disability has been removed from his or her current placement for 10 school days during one school year, or if current removal is for 10 consecutive school days or less, and if the removal is not a change of placement (see definition herein), then school personnel, in consultation with at least one of the child's teachers, will determine the extent to which services will be needed to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP.

If the removal is a change of placement (see definition herein), the child's IEP Team will determine the appropriate services to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP.

Manifestation Determination

Within 10 school days of any decision to change the placement of a child with a disability because of a violation of a code of student conduct (except for a removal that does not constitute a change in educational placement i.e., is for 10 consecutive school days or less and not a change of placement), Virtual Preparatory Academy of Pennsylvania, the parent, and relevant members of the IEP Team (as determined by the parent and School) must review all relevant information in the student's file, including the child's IEP, any teacher observations, and any relevant information provided by the parents to determine:

- If the conduct in question was caused by, or had a direct and substantial relationship to, the child's disability; or
- If the conduct in question was the direct result of The Virtual Preparatory Academy of Pennsylvania's failure to implement the child's IEP.

If the Virtual Preparatory Academy of Pennsylvania, the parent, and relevant members of the child's IEP Team determine that either of those conditions were met, the conduct must be determined to be a manifestation of the child's disability.

If the Virtual Preparatory Academy of Pennsylvania, the parent, and relevant members of the child's IEP

Team determine that the conduct in question was the direct result of the School's failure to implement the IEP, the Virtual Preparatory Academy of Pennsylvania must take immediate action to remedy those deficiencies.

If the School, the parent, and relevant members of the IEP Team determine that the conduct was a manifestation of the child's disability, the IEP Team must either:

- Conduct a functional behavioral assessment, unless The Virtual Preparatory Academy of Pennsylvania had conducted a functional behavioral assessment before the behavior that resulted in the change of placement occurred, and implement a behavioral intervention plan for the child; or
- If a behavioral intervention plan already has been developed, review the behavioral intervention plan, and modify it, as necessary, to address the behavior.

Except as described herein, the Virtual Preparatory Academy of Pennsylvania must return the child to the placement from which the child was removed, unless the parent and the School agree to a change of placement as part of the modification of the behavioral intervention plan.

Whether or not the behavior was a manifestation of the child's disability, school personnel may remove a student to an interim alternative educational setting (determined by the child's IEP Team) for up to 45 school days, if the child:

- Carries a weapon (see the definitions herein) to school or has a weapon at school, on school premises, or at a school function under the jurisdiction of the Virtual Preparatory Academy of Pennsylvania;
- Knowingly has or uses illegal drugs (see the definitions herein), or sells or solicits the sale of a controlled substance, (see the definitions herein), while at school, on school premises, or at a school function under the jurisdiction of the School; or
- Has inflicted serious bodily injury (see the definitions herein) upon another person while at school, on school premises, or at a school function under the jurisdiction of the PDE or the Virtual Preparatory Academy of Pennsylvania.

Definitions

Controlled substance means a drug or other substance identified under schedules I, II, III, IV, or V in section 202 (c) of the Controlled Substances Act (21 U.S.C. 812(c)). Illegal drug means a controlled substance; but does not include a controlled substance that is legally possessed or used under the supervision of a licensed health-care professional or that is legally possessed or used under any other authority under that Act or under any other provision of Federal law.

Serious bodily injury has the meaning given the term "serious bodily injury" under paragraph (3) of subsection (h) of section 1365 of title 18, United States Code.

Weapon has the meaning given the term "dangerous weapon" under paragraph (2) of the first subsection (g) of section 930 of title 18, United States Code.

Notification

On the date it makes the decision to make a removal that is a change of placement of the child because of a violation of a code of student conduct, the Virtual Preparatory Academy of Pennsylvania must notify the parents of that decision, and provide the parents with a procedural safeguards notice.

Change of Placement Because of Disciplinary Removals

A removal of a child with a disability from the child's current educational placement is a change of placement requiring a NOREP/prior written notice if:

- The removal is for more than 10 consecutive school days; or
- The removal is for 15 cumulative school days total in any one school year;
- The child has been subjected to a series of removals that constitute a pattern because:
 - The series of removals total more than 10 school days in a school year;
 - The child's behavior is substantially similar to the child's behavior in previous incidents that resulted in a series of removals;
- Of such additional factors as the length of each removal, the total amount of time the child has been removed, and the proximity of the removals to one another; and
- Whether a pattern of removals constitutes a change of placement is determined on a case-by-case basis by the Virtual Preparatory Academy of Pennsylvania and, if challenged, is subject to review through due process and judicial proceedings.

Determination of Setting

The IEP team must determine the interim alternative educational setting for removals that are changes of placement, and removals under additional authority and special circumstances.

General

The parent of a child with a disability may file a due process complaint to request a due process hearing if he or she disagrees with any decision regarding placement made under these discipline provisions; or the manifestation determination.

The Virtual Preparatory Academy may file a due process complaint to request a due process hearing if it believes that maintaining the current placement of the child is substantially likely to result in injury to the child or to others.

The hearing officer may:

- Return the child with a disability to the placement from which the child was removed if the hearing officer determines that the removal was a violation of the requirements described under the heading Authority of School Personnel, or that the child's behavior was a manifestation of the child's disability; or
- Order a change of placement of the child with a disability to an appropriate interim alternative educational setting for not more than 45 school days if the hearing officer determines that maintaining the current placement of the child is substantially likely to result in injury to the child or to others.

These hearing procedures may be repeated, if the Virtual Preparatory Academy of Pennsylvania believes that returning the child to the original placement is substantially likely to result in injury to the child or to others.

When the parent or the Virtual Preparatory Academy of Pennsylvania has filed a due process complaint related to disciplinary matters, the child must (unless the parent and the PDE or the School agree otherwise) remain in the interim alternative educational setting pending the decision of the hearing officer, or until the expiration of the time period of removal as provided for and described under the heading Authority of School Personnel, whichever occurs first.

Special Rules for Students with Intellectual Disabilities

The disciplinary removal of a child with intellectual disability attending the Virtual Preparatory Academy of Pennsylvania for any amount of time is considered a change in placement and requires a NOREP/prior written notice (if the disciplinary event does not involve drugs, weapons and/or serious bodily injury). A removal from school is not a change in placement for a child who is identified with intellectual disability when the disciplinary event involves weapons, drugs, and/or serious bodily injury.

According to certain assurances the Commonwealth entered into related to the PARC consent decree, the Virtual Preparatory Academy of Pennsylvania may suspend on a limited basis a student with intellectual disability who presents a danger to himself or others upon application and approval by the Bureau of Special Education and only to the extent that a student with a disability other than intellectual disability could be suspended.

Protections for Children not yet Eligible for Special Education and Related Services

If a child has not been determined eligible for special education and related services and violates a code of student conduct, but the Virtual Preparatory Academy of Pennsylvania had knowledge before the behavior that brought about the disciplinary action occurred, that the child was a child with a disability, then the child may assert any of the protections described herein.

Basis of Knowledge for Disciplinary Matters

The Virtual Preparatory Academy of Pennsylvania must be deemed to have knowledge that a child is a child with a disability if, before the behavior that brought about the disciplinary action occurred:

- The parent of the child expressed concern in writing that the child is in need of special education and related services to supervisory or administrative personnel, or a teacher of the child;
- The parent requested an evaluation related to eligibility for special education and related services under Part B of the IDEA; or
- The child's teacher, or other School personnel expressed specific concerns about a pattern of behavior demonstrated by the child directly to the Virtual Preparatory Academy of Pennsylvania's Director of special education or to other supervisory personnel of the Virtual Preparatory Academy of Pennsylvania.

The Virtual Preparatory Academy of Pennsylvania would not be deemed to have such knowledge if:

- The child's parent has not allowed an evaluation of the child or refused special education services;

or

- The child has been evaluated and determined to not be a child with a disability under Part B of the IDEA.

If prior to taking disciplinary measures against the child, the Virtual Preparatory Academy of Pennsylvania does not have knowledge that a child is a child with a disability, the child may be subjected to the disciplinary measures that are applied to children without disabilities who engaged in comparable behaviors.

However, if a request is made for an evaluation of a child during the time period in which the child is subjected to disciplinary measures, the evaluation must be conducted in an expedited manner.

Until the evaluation is completed, the child will remain in the educational placement determined by school authorities, which can include suspension or expulsion without educational services. If the child is determined to be a child with a disability, taking into consideration information from the evaluation conducted by the Virtual Preparatory Academy of Pennsylvania, and information provided by the parents, the School must provide special education and related services in accordance with Part B of the IDEA, including the disciplinary requirements.

Referral to and Action by Law Enforcement and Judicial Authorities

The state and federal regulations do not:

- Prohibit an agency from reporting a crime committed by a child with a disability to appropriate authorities; or
- Prevent State law enforcement and judicial authorities from exercising their responsibilities with regard to the application of Federal and State law to crimes committed by a child with a disability.

Subsequent to a referral to law enforcement, an updated functional behavior assessment and positive behavior support plan are required.

If the Virtual Preparatory Academy of Pennsylvania reports a crime committed by a child with a disability, then the School must ensure that copies of the child's special education and disciplinary records are transmitted for consideration by the authorities to whom the agency reports the crime; and may transmit copies of the child's special education and disciplinary records only to the extent permitted by FERPA.

Cyber Learning Policies

The Virtual Preparatory Academy of Pennsylvania will encourage the use of technology to promote students' learning. Teachers will provide a safe environment for their students to ask questions without the fear of hurtful behavior from other students in the cyber class. The personal rapport that each teacher develops with his/her students ensures a safe learning environment for all.

The Board plans to select a technology provider that will have all computers equipped with heightened Internet security settings and activated Internet filtering software.

The school will strictly prohibit any form of bullying/cyber bullying, harassment, hazing, or other destructive actions that may cause emotional and/or physical harm to students. School policies regarding these prohibited behaviors will be documented in the school handbook. Staff trainings regarding student safety will be a critical part professional development plan. Virtual Preparatory Academy of Pennsylvania will educate administrators, teachers, families and students on bullying prevention strategies and techniques. Part of the training will stress the impact of bullying and why it is important for schools to develop and sustain bullying prevention strategies. As required by law, the school will post a copy of its Anti-bullying Policy on its website.

The Virtual Preparatory Academy of Pennsylvania will encourage the promotion of positive interpersonal relations between members of the school community, and defines harassment, intimidation, bullying, cyber-bullying, or hazing toward a student, whether by other students, staff, or third parties, as “prohibited behaviors” that will not be tolerated. The school handbook will explain that this prohibition includes aggressive behavior, physical, verbal, and psychological abuse, and violence within a dating relationship. These types of behavior are forms of intimidation and harassment and are strictly prohibited, regardless of whether or not the target of the prohibited behavior are members of a legally protected groups, such as sex, sexual orientation, race, color, national origin, marital status, age, or disability. The Board will not tolerate any gestures, comments, threats, or actions that cause or threaten to cause bodily harm or personal degradation.

This policy applies to all school-related activities, including but not limited to cyber school-related activities such as live learning sessions; participation in clubs, activities, email messages, discussions, and message boards; and in-person activities such as state testing, field trips, open houses, and any other in-person school-related activities on or off school property. The school handbook will make it clear that every student is encouraged, and every staff member is required, to report any situation believed to be prohibited behavior directed toward a student. All reports will be investigated with appropriate disciplinary consequences as laid out in the school handbook.

Student Safety

The Virtual Preparatory Academy of Pennsylvania will provide a safe and supportive environment by keeping students safe from online predators and solicitors. The school takes student safety and well-being seriously. The Virtual Preparatory Academy of Pennsylvania is committed to following and implementing health and safety requirements applicable to public cyber charter schools. Students should be able to learn in a safe and comfortable environment. The school will require a course focused on student safety.

All members of school staff must complete the training at the beginning of the school year, and then refer to the trainings throughout the year as needed. Learning Coaches will be asked to communicate and collaborate with teachers and other school staff as the staff members work to fulfill their professional roles in supporting student safety and well-being. They will be asked to involve additional parties as appropriate to address concerns and to always keep student safety and well-being at the center of the conversation.

All student computers will have software installed that blocks users from reaching inappropriate sites.

School Safety Plan

The Virtual Preparatory Academy of Pennsylvania recognizes its need for a school safety plan (22 Pa. Code Chapter 10 et seq.)

The school is committed to providing a safe, orderly learning environment for students. To make this a reality the Board will develop a comprehensive school safety plan that incorporates the provisions of Act 26 and includes protocols for responding to crisis situations, including an outline of the steps that will be taken to finalize the Virtual Preparatory Academy of Pennsylvania's Safety Plan. The document will be reviewed and updated once the staff has been identified and hired in order to modify and change this plan to meet the "real" needs of the school, the facility, its staff and the community. The steps that will be taken to review and modify the final safety plan include the following:

- Form a School Safety Committee that includes: Board; school administration, community representatives; representatives of the local police and fire department; and parents.
- Review Act 26, "The Safe Schools Act".
- Review the local school districts safety plans to ensure accordance.
- Review safety plans from other municipalities for content and presentation ideas.
- Develop goals and timelines.
- Draft school safety plan.
- Circulate draft safety plan to the Board, the school administration, and community partners for review.
- Finalize the School Safety Plan.

School safety will be the primary responsibility of the Lead School Administrator and his/her designee. They will oversee the security systems of the school as well as the behavior of the students and reporting Act 26 violations. In addition, all staff members will be expected to report to administration any inappropriate behavior in the school environment. It is the primary responsibility of staff to create a climate of respect and educational focus. Students will also be expected to set a tone of respect, order, and purposefulness. Particular responsibility will fall to staff to model good and safe behavior and to correct or report to the school administration inappropriate or unsafe behavior or events.

In accordance with 23 P.S. 6311 et seq, all school employees will be mandated reporters and must report suspected abuse as follows:

When child abuse is suspected, the law requires the school employee to immediately make an oral report of suspected child abuse via the statewide toll-free telephone number ChildLine at 1-800-932-0313 or an online written report.

If a school employee makes an oral report to ChildLine, the school employee must follow-up with a written report, which may be submitted electronically, within 48 hours.

A mandated reporter must personally make the report. The Virtual Preparatory Academy of Pennsylvania

administration may assist the school employee in making the report (for example, sit with school employee for support if the school employee is uncomfortable in the process) as long as they do not interfere in any way with the making of the report. Afterward, the school employee should inform administration about the report.

The school employee will not be required to investigate or be certain of the abuse, or even know the name of the person who is suspected of abusing a child. The responsibility will be to make a report when the school employee has reasonable cause to suspect child abuse. ChildLine will forward the report to the appropriate county child welfare agency, who will investigate the circumstances and may contact school employee for additional information or if there are additional questions.

The Virtual Preparatory Academy of Pennsylvania will require that all employees receive the mandated reporting training. Mandated reporters who hold a professional license or certification under the Department of State and mandated reports who work for an agency that is licensed, supervised, or registered with the Department of Human Services will be required to receive training.

Possession of Weapons

Possession of weapons in the school setting is a threat to the safety of students and staff and will be prohibited by law. A weapon will include but not be limited to any knife, cutting instrument, cutting tool, nunchaku, firearm, shotgun, rifle, replica of a weapon, and any other tool, instrument or implement capable of inflicting serious bodily injury. A student will be considered in possession of a weapon when the weapon is found on the person of the student, in the student's locker, desk, backpack, or in the student's vehicle, and the weapon is under the student's control while the student is on school property, on property being used by the school, at any school function or activity, at any school-sponsored activity held away from the school, on any conveyance providing transportation to a school or school-sponsored activity, or while the student is on his/her way to or from school.

The Virtual Preparatory Academy of Pennsylvania will prohibit students from possessing and bringing weapons and replicas of weapons into any school buildings, onto school property, to any school-sponsored activity, and onto any public vehicle providing transportation to school or a school-sponsored activity or while the student is coming to or from school.

The Board will expel for a period of not less than one year any student who violates this weapons policy. Such expulsion will be given in conformance with formal due process proceedings required by law and Board policy. The Lead School Administrator may recommend modifications of such expulsion requirement on a case-by- case basis (24 P.S. 13-1317.2).

In the case of a student with a disability, including a student for whom an evaluation is pending, the Virtual Preparatory Academy of Pennsylvania will take all steps required to comply with state and federal laws and regulations, the procedures set forth in the memorandum of understanding with local law enforcement and Board policies.

The Lead School Administrator or designee will react promptly to information and knowledge concerning

possession of a weapon. Such action will be in compliance with state law and regulations and with the procedures set forth in the memorandum of understanding with local law enforcement officials and the school's emergency preparedness plan (22 Pa Code Chapter 10 et seq).

The Lead School Administrator or designee will immediately report incidents involving weapons on school property, at any school-sponsored activity or on a conveyance providing transportation to or from a school or school-sponsored activity to the local police department that has jurisdiction over the school's property, in accordance with state law and regulations, the procedures set forth in the memorandum of understanding with local law enforcement and Board policies (22 Pa Code Chapter 10 et seq).

The Lead School Administrator or designee will notify the parent/guardian of any student directly involved in an incident involving weapons as a victim or suspect immediately, as soon as practicable. The Lead School Administrator or designee will inform the parent/guardian whether or not the local police department that has jurisdiction over the school property has been or may be notified of the incident. The Lead School Administrator or designee will document attempts made to reach the parent/guardian (22 Pa Code Chapter 10 et seq).

In accordance with state law, the Lead School Administrator will annually, by July 31, report all incidents involving possession of a weapon to the Office for Safe Schools on the required form (24 PS 13-1303-A).

The Lead School Administrator will annually inform staff, students and parents/guardians about the Board policy prohibiting weapons and about their personal responsibility for the health, safety and welfare of the school community.

B. Describe your school's policies regarding student expulsion and suspension, including students with disabilities.

Policies Regarding Expulsion and Suspension

All students enrolled in the school will be expected to conduct themselves in accordance with the rules for the school, and parents and Learning Coaches will be expected to cooperate with the school staff in helping students to maintain this conduct. The student code of conduct will be included in the student handbook.

Discipline Measures

There will be three levels of disciplinary measures utilized by the school: 1) Warning, 2) Suspension, and 3) Expulsion. Each level has associated conduct breach definitions and corresponding disciplinary actions that may occur.

Warning

Students that receive warnings from the school will have a conference (via phone or in person) with their parent(s) and the school administrator(s), and the incident will be formally documented in writing and will

become part of the student's permanent record. The student will not have a disruption in schooling and will not be removed from the class (Connexus).

Warnings will be issued when a student demonstrates a breach of expected conduct, but not as serious as those listed under the suspension and/or expulsion categories in this handbook.

Suspension

When a student is suspended, he or she will be temporarily removed from the AMP system or a school sponsored program or activity. The length of a suspension will be determined by the Lead School Administrator (up to 10 days at a time). A suspension will be documented in writing and will become part of a student's permanent record.

During a period of suspension as defined by the Lead School Administrator, a student's permission to log on to and/or use parts of the AMP system will be restricted. Student access to email, the message boards, online clubs/activities, and/or all of the AMP system may be revoked. In such cases where the student's access is completely revoked, the Learning Coach is responsible for logging on to the AMP system and obtaining the student's assignments, responding to email, and recording assessment responses for the student. The student should continue with his or her schoolwork during a suspension. Violations that may lead to suspension include, but are not limited to, the following breaches of conduct:

- Criminal or delinquent acts are acts defined as criminal under federal and state law, and any applicable municipal or county criminal ordinances.
- Sexual harassment means unwelcome or unwanted conduct of a sexual nature (verbal, non-verbal or physical) when submission to such conduct is made either explicitly or implicitly a term or condition of the advancement of a student in school programs or activities such that this conduct substantially interferes with a student's learning or creates an intimidating, hostile or offensive learning environment.
- Disruptive conduct means willful conduct which: (1) materially and in fact disrupts or interferes with the operation of the school or the orderly conduct of any public school activity, including individual classes; or (2) leads an administrative authority to reasonably forecast that such disruption or interference is likely to occur unless preventive action is taken.
- Gang related activity is disruptive conduct.
- Refusal to identify self means a person's willful refusal, upon request from school personnel known or identified as such to the person, to identify himself or herself accurately.
- Refusal to cooperate with school personnel means a student's willful refusal to obey the lawful instructions or orders of school personnel whose responsibilities include supervision of students.
- Cheating on tests or daily work: A student who knowingly participates in copying, using another's work, and representing it as his or her own (for example, students transmitting their work electronically for another student's use), or who provides other students with test answers, answer keys, or otherwise uses unauthorized materials in an assignment or assessment situation.
- Plagiarism: A student's use of another person's words, products, or ideas without proper acknowledgement of the original work with the intention of passing it off as his or her own. Plagiarism may occur deliberately (with the intention to deceive) or accidentally (due to poor

referencing). It includes copying material from a book, copying-and-pasting information from the Internet, and getting family or friends to help with coursework.

- Abusive conduct: A student who uses abusive language or engages in abusive conduct in the presence of others either in person or electronically/virtually.
- Bullying: A student that repeatedly engages in negative actions against another student in an attempt to exercise control over him or her.
- Harassment: A student who demonstrates verbal, written, graphic, or physical conduct relating to an individual's sex, race, color, national origin, age, religious beliefs, ethnic background, or disability that is sufficiently severe, pervasive, or persistent so as to interfere with or limit the ability of an individual to participate in or benefit from the school's programs that: 1) has the purpose or effect of creating an intimidating or hostile environment, 2) unreasonably interferes with an individual's educational performance, or 3) otherwise adversely affects an individual's educational opportunities.
- Vandalism: A student who intentionally damages or destroys school property or records (physical or electronic). In these instances the school reserves the right to contact the proper law enforcement agency(ies).
- Theft and robbery: A student who takes money or other property (physical or electronic) with the intent to deprive another person or the school of that property. The threat or the use of force or violence is considered a serious breach of conduct. In these instances the school reserves the right to contact the proper law enforcement agency.
- Violation of acceptable use policy: Students who violate the acceptable use policy in one form or another are open to disciplinary action including suspension. This would include signing on as parents.
- Repeated violation of any disciplinary issues.

Expulsion

When a student is expelled, he or she will be separated from the school for an extended period of time, or permanently, for disciplinary reasons. An expulsion will be documented in writing and will become part of a student's permanent record.

Violations that may lead to expulsion include, but are not limited to, any behavior that indicates that a student is a serious threat to the safety of others, possession of firearms, dangerous weapons, bombs, or explosives, criminal behavior, arson, under the influence of or possession of, or sale of controlled substances or paraphernalia. Suspensions or expulsions for children designated as exceptional follow all appropriate state and federal policies, regulations, and laws.

The school will not discipline students protected under Section 504 of the Rehabilitation Act of 1973, the Individuals with Disabilities in Education Act (IDEA), or the American with Disabilities Act (ADA) unless the school complies with the requirements of those acts.

Discipline for Students with Disabilities

Please refer to the previous description of discipline for students with disabilities. If a student with a disability violates a code of conduct, he or she will be disciplined according to the discipline measures

described herein for up to 10 days. Upon subsequent violations that result in suspensions that exceed 10 days, the school will determine if the behavior manifested from the student's disability. If the school determines that the violation is not a manifestation of the student's disability, the school will apply the discipline procedures to the student in the same manner and for the same duration as the procedures would be applied to students without disabilities. However, if it is determined that the violation manifested from the student's disability, the school will conduct a functional behavior assessment and develop a behavior plan to address the behavior violation so that it does not recur.

Due Process for Students (22 Pa. Code Section 12-.6-12.8)

Exclusion from School may take the form of suspension or expulsion.

- 1) Suspension will be exclusion from school for a period of from one to 10 consecutive school days.
 - Suspensions may be given by the Lead School Administrator or his/her designee.
 - A student may not be suspended until the student has been informed of the reasons for the suspension and given an opportunity to respond. Prior notice of the intended suspension need not be given when it is clear that the health, safety, or welfare of the school community is threatened.
 - The parents or guardians will be notified immediately in writing when the student is suspended.
 - When the suspension exceeds three school days, the student and parent will be given the opportunity for an informal hearing consistent with the requirements of the Pennsylvania Code.
 - Suspensions may not be made to run consecutively beyond the 10 school day period.
 - Students will have the responsibility to make up exams and work missed while being disciplined by suspension and shall be permitted to complete these assignments within guidelines established by the Board.

- 2) Expulsion will be exclusion from school by the Board for a period exceeding 10 school days and may be permanent expulsion from the school rolls. Expulsions require a prior formal hearing pursuant to the Pennsylvania Code.
 - During the period prior to the hearing and decision of the Board in an expulsion case, the student will be placed in his/her normal class except as set forth in subsection (ii).
 - If it is determined after an informal hearing that a student's presence in his/her normal class would constitute a threat to the health, safety or welfare of others and it is not possible to hold a formal hearing within the period of a suspension, the student may be excluded from school for more than 10 school days. A student may not be excluded from school for longer than 15 school days without a formal hearing unless mutually agreed upon by both parties. Any student so excluded will be provided with alternative education, which may include home study.
 - Students who are under 17 years of age are still subject to the compulsory school attendance law even though expelled and will be provided an education.

- 3) The initial responsibility for providing the required education rests with the student's parents or guardian, through placement in another school, tutorial, or correspondence study, or another educational program approved by the Lead School Administrator.

- 4) Within 30 days of action by the Board, the parents or guardians will submit to the Virtual Preparatory Academy of Pennsylvania written evidence that the required education is being provided or that they are unable to do so. If the parents or guardians are unable to provide the required education, the

School will, within the 10 days of receipt of the notification, make provision for the student's education. A student with a disability will be provided educational services as required by the Individuals with Disabilities Education Act 2004.

- 5) If the approved educational program is not complied with, the Virtual Preparatory Academy of Pennsylvania may take action in accordance with 42 Pa.C.S. Chapter 63 (relating to the Juvenile Act) to ensure that the child will receive a proper education. See Pennsylvania Code § 12.1(b) (relating to free education and attendance).

Exclusion from classes—in-school suspension

- 1) A student may not receive an in-school suspension unless the student has been informed of the reasons for the suspension and has been given an opportunity to respond before the suspension becomes effective.
- 2) Communication to the parents or guardian will follow the suspension action.
- 3) When the in-school suspension exceeds 10 consecutive school days, an informal hearing with the Lead School Administrator or designee will be offered to the student and the student's parent or guardian prior to the 11th school day in accordance with the procedures in the Pennsylvania Code.
- 4) The Virtual Preparatory Academy of Pennsylvania will have the responsibility to make provision for the student's education during the period of the in-school suspension.

Hearings

- (a) *General.* Education is a statutory right, and students will be afforded due process if they are to be excluded from school. In a case involving a possible expulsion, the student is entitled to a formal hearing.
- (b) *Formal hearings.* A formal hearing will be required in all expulsion actions. The hearing may be held before the Board or an authorized committee of the Board, or a qualified hearing examiner appointed by the Board. When a committee of the Board or a hearing examiner conducts the hearing, a majority vote of the entire Board will be required to expel a student. The following due process requirements will be observed with regard to the formal hearing:
 - 1) Notification of the charges will be sent to the student's parents or guardians by certified mail.
 - 2) At least three days' notice of the time and place of the hearing will be given. A copy of the expulsion policy, notice that legal counsel may represent the student and hearing procedures will be included with the hearing notice. A student may request the rescheduling of the hearing when the student demonstrates good cause for an extension.
 - 3) The hearing will be held in private unless the student or parent requests a public hearing.
 - 4) The student may be represented by counsel, at the expense of the parents or guardians, and may have a parent or guardian attend the hearing.
 - 5) The student has the right to be presented with the names of witnesses against the student, and copies of the statements and affidavits of those witnesses.
 - 6) The student has the right to request that the witnesses appear in person and answer questions or be cross-examined.
 - 7) The student has the right to testify and present witnesses on his/her own behalf.
 - 8) A written or audio record shall be kept of the hearing. The student is entitled, at the student's expense, to a copy. A copy will be provided at no cost to a student who is indigent.

- 9) The proceeding will be held within 15 school days of the notification of charges, unless mutually agreed to by both parties. A hearing may be delayed for any of the following reasons, in which case the hearing will be held as soon as reasonably possible:
- Laboratory reports are needed from law enforcement agencies.
 - Evaluations or other court or administrative proceedings are pending due to a student invoking his/her rights under the Individuals With Disabilities Education Act 2004 (20 U.S.C.A. § § 1400-1482).
 - In cases in juvenile or criminal court involving sexual assault or serious bodily injury, delay is necessary due to the condition or best interests of the victim.
- 10) Notice of a right to appeal the results of the hearing shall be provided to the student with the expulsion decision.
- c) *Informal hearings.* The purpose of the informal hearing is to enable the student to meet with the appropriate school official to explain the circumstances surrounding the event for which the student is being suspended or to show why the student should not be suspended.
- 1) The informal hearing is held to bring forth all relevant information regarding the event for which the student may be suspended and for students, their parents or guardians and school officials to discuss ways by which future offenses might be avoided.
 - 2) The following due process requirements will be observed in regard to the informal hearing:
 - Notification of the reasons for the suspension will be given in writing to the parents or guardians and to the student.
 - Sufficient notice of the time and place of the informal hearing will be given.
 - A student has the right to question any witnesses present at the hearing.
 - A student has the right to speak and produce witnesses on his/her own behalf.
 - Virtual Preparatory Academy of Pennsylvania will offer to hold the informal hearing within the first five days of the suspension.

C. Describe your school's mandatory student attendance plan and its fit with the code of conduct.

Attendance Policy

Students must meet all regulatory requirements for attending public school in the state. These requirements include attending school for 180 days and completing a required number of hours of instruction per year. In order to make the state's required hours per year of instruction manageable, families are encouraged to have students complete the hours of schooling each week listed in the chart below. All attendance requirements will be documented by both Board policy as well as in the handbook. The school's documents explaining attendance requirements will emphasize the value and importance of school attendance without over-reliance on punitive measures for non-attendance.

Grade Levels	Days	Min. Yearly Hours	Daily Hours
K-6	180	900	5

7-12	180	990	5.5
------	-----	-----	-----

What counts as Attendance at Virtual Preparatory Academy of Pennsylvania?

A student is counted as present for the day when he or she logs into the AMP system through the student account, completes work within a course through the student account, attends a session accessed through his or her daily plan, or when course attendance is logged by a Learning Coach.

Failure to attend mandated live learning sessions, state testing, or respond to emails and phone call messages from teachers may be counted against documented attendance hours.

Logging Attendance

Virtual Preparatory Academy of Pennsylvania Systems will automatically capture daily AMP system student log-in, course work, and session attendance. In addition, — Virtual Preparatory Academy of Pennsylvania requires that each Learning Coach log the time spent working on content in each course each day. Time entered here should reflect the total time spent working on the course that day (both online work in the AMP system and off-line work completed by the student).

Truancy

If a student is not adequately engaging in the program, the school will follow the Truancy Policy with the Board Policies in the Appendix O. This topic was also covered in the enrollment and withdrawal section.

5. Timetable

A. Provide a detailed timetable of projected steps and dates leading to the opening of a charter school.

Incorporate and file Articles	Completed
Create and approve By Laws	Completed
Contract with Management Provider	Completed
Resubmission of Charter Application	October 1 2020
Approval of Charter Application	December 2020
Recruitment of Board of Trustees	Completed
Approval of Board Policies	October 2020
Create Student /Parent Handbook	November 2020
Recruitment of Students	February-July 2021
Finalize Insurance Coverage	March 2021

Initial Enrollment Period	March 1, 2021—April 1, 2021
Lottery if Necessary	April 12, 2021
Open Enrollment Period	May 2021—September 2021
Finalized Office Lease	April 2021
Move into Office & Setup	May 2021
Hire Administrators	May 2021
District Notification	May (ongoing with enrollment) 2021
Course Placement	June—July 2021
Hiring of Teachers	May—July 2021
Teacher Training	August 2021
Student Computer/Materials Delivered	August 2021
Orientation Sessions	August—September 2021
School begins	August 23, 2021

6. Safety

A. Submit written documentation of intent to comply with all applicable safety requirements, including the following to demonstrate the safety and structural soundness of the school:

- *Inspection by a local building inspector.*
- *Inspection by a local fire department.*
- *Approval from the municipal licensing authority for use of any explosives and flammable compounds or liquids in connection with courses taught at the school.*
- *Compliance with all other federal, state, and local health and safety laws and regulations.*
- *Application for certificates, licenses, etc. are part of the planning process.*

Note: All necessary certificates and occupancy permits must be issued and in effect prior to the opening of the charter school. Preliminary clearances on all these requirements should be obtained prior to a lease being executed.

Safety of School Building

The facilities will comply with all applicable federal, state, and local health and safety laws, regulations, and requirements. The Virtual Preparatory Academy of Pennsylvania will follow applicable city planning review procedures. The School, working with the landlord, will ensure the property is inspected by a local building inspector and the local fire department.

Although not anticipated, if necessary, The School will request approval from the municipal licensing authority for use of any explosives and flammable compounds or liquids in connection with courses taught

at the school.

The Cyber Charter School Application released by the PDE, required that applicants “submit written documentation of intent to comply with all applicable safety requirements, including the following: Approval from the municipal licensing authority for use of any explosives and flammable compounds or liquids in connection with courses taught at the school.” Therefore, we are including this language to meet the requirement to show our written intent to comply.

The School will apply for certificates, licenses, and so forth as part of the planning process.

Compliance with Health and Safety Laws

The Virtual Preparatory Academy of Pennsylvania will be in compliance with or capable of modification to bring the school into compliance with all local building, zoning, and health and safety requirements.

Certificates of Occupancy

Since students will be present in the school headquarters only on the rare drop-in basis, and will not gather there for instructional activities, no special zoning will be required beyond standard commercial use. All necessary certificates and occupancy permits must be issued and in effect prior to the opening of the charter school. Preliminary clearances on all these requirements should be obtained prior to a lease being executed.

The School will ensure the facility has a certificate of occupancy, air-conditioning, heating, illuminated fluorescent lights, male and female bathrooms, parking, is handicapped accessible, and is fully equipped with sprinklers and other fire safety equipment. If the Virtual Preparatory Academy of Pennsylvania contemplates any regional learning center facilities to accommodate testing, related services, etc., such facilities will appropriately zoned.

7. School Health Services

A. Describe your plan for providing school health services as required under Article XIV of the Public School Code.

The Virtual Preparatory Academy of Pennsylvania will contract with local health services providers throughout the Commonwealth to accommodate enrollment as required to provide services to students and to meet the requirements of Article XIV: School Health Services of the Public School Code.

Parents and students will receive information about the school’s health services in the parent/student handbook including requirements, assistance and programs the school offers to students.

B. Describe how school nursing services, including administration of medication, will be delivered.

The Virtual Preparatory Academy of Pennsylvania will contract with local health service providers throughout the Commonwealth to facilitate student enrollment to meet the requirements of Article XIV: School Health Services of the Public School Code. The School Nursing services, provided through contracts on an hourly or a per-service fee basis with local health services providers, may include:

- A vision test
- A hearing test
- A measurement of height and weight which shall use the measurement to compute a child's weight-for-height ratio
- Tests for tuberculosis under medical supervision
- Such other tests as the Advisory Health Board may deem advisable to protect the health of the child. Vision tests will be given at least annually and other tests at intervals established by the Advisory Health Board. ((a) amended July 11, 2006, P.L.1092, No.114)

The School will maintain a comprehensive health record which will include the results of the tests, measurements, and regularly scheduled examinations and special examinations and which will be protected for confidentiality. The student's health record will also include medical questionnaires- by the student's parent or guardian.

Appendix

- A. Curriculum
- B. Special Education Procedures and Policies
- C. Acceptable Use Policy
- D. Sustainable Support
- E. Letters of Intent to Superintendents
- F. Resumes of Board of Trustees
- G. Non-Profit Corporation Status
- H. Organization Chart
- I. Board Meeting Minutes
- J. By-laws
- K. Articles of Incorporation
- L. Services Agreement with Accel
- M. Preliminary Startup and Operating Budget
- N. Facility Proposal
- O. Board Policies
- P. Employee Healthcare Insurance Proposal
- Q. Draft Employee Handbook
- R. Agreement with Charter Choices

APPENDIX A CURRICULUM

A.5 Syllabi

This appendix includes the syllabi and alignment following subject areas:

- a. English Language Arts K-12
- b. Mathematics K-12
- c. Science K-12
- d. Social Studies K-12
- e. General Electives K-5
- f. Health and Physical Education
- g. World Languages

Kindergarten Language Arts A Syllabus

Module	LO#	Sight Words	Objective(s)	Common Core State Standard(s)
Letter and Phonics of the Week: Aa; Short a	1.1	I, see, big	1) Correctly print the upper and lowercase letters Aa.2) Read high frequency words on sight.	CCSS.ELA-Literacy.RF.K.1a Follow words from left to right, top to bottom, and page by page. CCSS.ELA-Literacy.RF.K.1b Recognize that spoken words are represented in written language by specific sequences of letters. CCSS.ELA-Literacy.RL.K.1 With prompting and support, ask and answer questions about key details in a text. CCSS.ELA-Literacy.RL.K.2 With prompting and support, retell familiar stories, including key details. CCSS.ELA-Literacy.RF.K.2a Recognize and produce rhyming words. CCSS.ELA-Literacy.RF.K.3b Associate the long and short sounds with the common spellings (graphemes) for the five major vowels.
	1.2		1) Read with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RF.K.1d Recognize and name all upper- and lowercase letters of the alphabet. CCSS.ELA-Literacy.L.K.2c Write a letter or letters for most consonant and short-vowel sounds (phonemes). CCSS.ELA-Literacy.RL.K.3 With prompting and support, identify characters, settings, and major events in a story. CCSS.ELA-Literacy.RF.K.3a Demonstrate basic knowledge of one-to-one letter-sound correspondences by producing the primary sound or many of the most frequent sounds for each consonant. CCSS.ELA-Literacy.W.K.3 Use a combination of drawing, dictating, and writing to narrate a single event or several loosely linked events, tell about the events in the order in which they occurred, and provide a reaction to what happened. CCSS.ELA-Literacy.SL.K.4 Describe familiar people, places, things, and events and, with prompting and support, provide additional detail.
	1.3		1) Recognize rhyming words.	CCSS.ELA-Literacy.RF.K.3c Read common high-frequency words by sight (e.g., the, of, to, you, she, my, is, are, do, does). CCSS.ELA-Literacy.RF.K.4 Read emergent-reader texts with purpose and understanding.

Kindergarten Language Arts A Syllabus

	1.4		1) Draw a single event.	CCSS.ELA-Literacy.L.K.1a Print many upper- and lowercase letters.
	1.5			
Letter of the Week: Bb	2.1	a, blue, can	1) Correctly print the upper and lowercase letters Bb. 2) Read sight words on sight.	CCSS.ELA-Literacy.RF.K.1a Follow words from left to right, top to bottom, and page by page. CCSS.ELA-Literacy.RF.K.1b Recognize that spoken words represented in written are language by specific sequences of letters. CCSS.ELA-Literacy.RF.K.1a Follow words from left to right, top to bottom, and page by page. CCSS.ELA-Literacy.RF.K.1b Recognize that spoken words represented in written are language by specific sequences of letters. CCSS.ELA-Literacy.RF.K.2a Recognize and produce rhyming words. CCSS.ELA-Literacy.W.K.3 Use a combination of drawing, dictating, and writing to narrate a single event or several loosely linked events, tell about the events in the order in which they occurred, and provide a reaction to what happened.
	2.2		1) Read weekly stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RF.K.1d Recognize and name all upper- and lowercase letters of the alphabet. CCSS.ELA-Literacy.L.K.2c Write a letter or letters for most consonant and short-vowel sounds (phonemes). CCSS.ELA-Literacy.RI.K.3 With prompting and support, describe the connection between two individuals, events, ideas, or pieces of information in a text. CCSS.ELA-Literacy.RF.K.3a Demonstrate basic knowledge of one-to-one letter-sound correspondences by producing the primary sound or many of the most frequent sounds for each consonant. CCSS.ELA-Literacy.SL.K.4 Describe familiar people, places, things, and events and, with prompting and support, provide additional detail.
	2.3		1) Produce rhyming	CCSS.ELA-Literacy.RF.K.3c Read common high-frequency words by sight

1st Grade Language Arts A Syllabus

	11.4			1) Write the middle of the story mapped in week 9.	CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one- syllable words.
	11.5				CCSS.ELA-Literacy.RF.1.3g Recognize and read grade- appropriate irregularly spelled words.
Phonics of the Week: Long a; _a_e	12.1	Review words from weeks 7-11	bake, cake, page, rage, ate, late, plate, date, state, tape	1) Recognize, identify, read, and spell words with long a; _a_e 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RI.1.7 Use the illustrations and details in a text to describe its key ideas. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RF.1.2a Distinguish long from short vowel sounds in spoken single-syllable words.
	12.2			1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RI.1.10 With prompting and support, read informational texts appropriately complex for grade 1. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self- correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.RF.1.3c Know final -e and common vowel team conventions for representing long vowel sounds. CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters. CCSS.ELA-Literacy.W.1.3 Write narratives in which they recount

1st Grade Language Arts A Syllabus

					two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.
	12.3			1) Use commas in dates and to separate single words in a series.	CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single-syllable words. CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.L.1.2d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words. CCSS.ELA-Literacy.L.1.2e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions. CCSS.ELA-Literacy.L.1.1j Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts. CCSS.ELA-Literacy.L.1.2c Use commas in dates and to separate single words in a series.
	12.4			1) Write the end of the story mapped in week 9.	CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one- syllable words. CCSS.ELA-Literacy.RF.1.3g Recognize and read grade- appropriate irregularly spelled words.
	12.5				
Phonics of the Week: soft c, soft g, dge	13.1	from, of, walk, keep, friend	nice, cent, city, age, wage, gel, gem, edge ledge, wedge	1) Recognize, identify, read, and spell words with a soft c, g, and dge. 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RL.1.2 Retell stories, including key details,

1st Grade Language Arts A Syllabus

				and demonstrate understanding of their central message or lesson. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.W.1.5 With guidance and support from adults, focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed.
13.2			1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RL.1.3 Describe characters, settings, and major events in a story, using key details. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self- correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.L.1.1j Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts. CCSS.ELA-Literacy.RL.1.10 With prompting and support, read prose and poetry of appropriate complexity for grade 1. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters. CCSS.ELA-Literacy.L.1.4a Use sentence-level context as a clue to the meaning of a word or phrase.
13.3			1) Use the context clues in a sentence to learn the meaning of a new vocab word.	CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.2d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words. CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single-syllable words CCSS.ELA-Literacy.L.1.2e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions.
13.4			1) respond to questions and suggestions from peers, and add	CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one-

1st Grade Language Arts A Syllabus

				details to strengthen writing as needed.	syllable words.
	13.5				CCSS.ELA-Literacy.RF.1.3g Recognize and read grade- appropriate irregularly spelled words.
Phonics of the Week: ou and ow	14.1	give, old, were, small	loud, cloud, mouse, house, out, owl, down, town, now, how	1) Recognize, identify, read, and spell words with “ou” and “ow” 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RI.1.7 Use the illustrations and details in a text to describe its key ideas. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.W.1.3 Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.
	14.2			1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RI.1.10 With prompting and support, read informational texts appropriately complex for grade 1. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self- correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.L.1.1f Use frequently occurring adjectives CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters. CCSS.ELA-Literacy.L.1.4b Use frequently occurring affixes as a clue to the meaning of a word.
	14.3			Grammar: 1) Use	CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial

1st Grade Language Arts B Syllabus

Phonics of the Week: End blends- nk and ng	21.1	its, us, before, ten	wink, sink, rink, link, blink, ring, sing, sting, sling, thing	Phonics and Word Recognition: 1) Recognize, identify, read, and spell words with ending blends- nk and ng. 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RL.1.2 Retell stories, including key details, and demonstrate understanding of their central message or lesson. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RF.1.2b Orally produce single-syllable words by blending sounds (phonemes), including consonant blends.
	21.2			Fluency: 1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RL.1.3 Describe characters, settings, and major events in a story, using key details. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self-correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.RF.1.3a Know the spelling-sound correspondences for common consonant digraphs. CCSS.ELA-Literacy.RL.1.10 With prompting and support, read prose and poetry of appropriate complexity for grade 1 CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters. CCSS.ELA-Literacy.W.1.1 Write opinion pieces in which they introduce the topic or name the book they are writing about, state an opinion, supply a reason for the opinion, and provide some sense of closure

1st Grade Language Arts B Syllabus

	21. 3			Language: 1) Recognize and spell common words with consonant digraphs..	CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.2d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words. CCSS.ELA-Literacy.L.1.1j Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts. CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single-syllable words. CCSS.ELA-Literacy.L.1.2e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions.
	21. 4			Writing: 1) Write a topic sentence for opinion paragraph.	CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one-syllable words.
	21. 5				CCSS.ELA-Literacy.RF.1.3g Recognize and read grade-appropriate irregularly spelled words.

1st Grade Language Arts B Syllabus

Phonics of the Week: ey and y	22.1	many, very, made, use	any, every, very, many, tiny, only, key, honey, money, monkey	Phonics and Word Recognition: 1) Recognize, identify, read, and spell words with the endings- ey and y. 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RI.1.7 Use the illustrations and details in a text to describe its key ideas. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RF.1.3e Decode two-syllable words following basic patterns by breaking the words into syllables.
	22.2			Fluency: 1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RI.1.10 With prompting and support, read informational texts appropriately complex for grade 1. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self-correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.L.1.1c Use singular and plural nouns with matching verbs in basic sentences (e.g., He hops; We hop). CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters. CCSS.ELA-Literacy.L.1.1j Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.

1st Grade Language Arts B Syllabus

	22. 3			Language: 1) Recognize the differences in meanings between similar verbs (e.g., look, peek, glance, stare, glare, scowl)..	CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single- syllable words. CCSS.ELA-Literacy.L.1.2d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words. CCSS.ELA-Literacy.L.1.5d Distinguish shades of meaning among verbs differing in manner (e.g., look, peek, glance, stare, glare, scowl) and adjectives differing in intensity (e.g., large, gigantic) by defining or choosing them or by acting out the meanings. CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.L.1.2e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions.
	22. 4			Writing: 1) Write the supporting facts in sentence form.	CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one- syllable words. CCSS.ELA-Literacy.RF.1.3g Recognize and read grade- appropriate irregularly spelled words.
	22. 5				

1st Grade Language Arts B Syllabus

Phonics of the Week: Long o: oa, oe, ow	23.1	best, draw, both, light	boat, coat, float, toe, goes, bow, row, tow, low, slow	Phonics and Word Recognition: 1) Recognize, identify, read, and spell words with the endings- long o spelled oa, oe, ow. 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RL.1.2 Retell stories, including key details, and demonstrate understanding of their central message or lesson. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RF.1.2a Distinguish long from short vowel sounds in spoken single-syllable words.
	23.2			Fluency: 1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RL.1.3 Describe characters, settings, and major events in a story, using key details. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self-correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.L.1.1f Use frequently occurring adjectives CCSS.ELA-Literacy.RL.1.10 With prompting and support, read prose and poetry of appropriate complexity for grade 1. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters CCSS.ELA-Literacy.L.1.1j Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.

1st Grade Language Arts B Syllabus

	23. 3			Language: 1) Recognize the differences in intensity between similar adjectives (e.g., large, gigantic).	CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.2d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words. CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single-syllable words. CCSS.ELA-Literacy.L.1.2e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions.
	23. 4			Writing: 1) Write a concluding sentence.	CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one-syllable words.
	23. 5				CCSS.ELA-Literacy.RF.1.3g Recognize and read grade-appropriate irregularly spelled words.

1st Grade Language Arts B Syllabus

Phonics of the Week: Long i: igh, ie, y	24.1	Review words from Modules 19-23	light, might, night, fight, right, lie, tie, cry, dry, my	Phonics and Word Recognition: 1) Recognize, identify, read, and spell words with Long i: igh, ie, y. 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RI.1.7 Use the illustrations and details in a text to describe its key ideas. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RF.1.2a Distinguish long from short vowel sounds in spoken single-syllable words.
	24.2			Fluency: 1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RI.1.10 With prompting and support, read informational texts appropriately complex for grade 1. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self-correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.L.1.1g Use frequently occurring conjunctions (e.g., and, but, or, so, because). CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters. CCSS.ELA-Literacy.L.1.1j Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.

1st Grade Language Arts B Syllabus

	24. 3			Grammar: 1) Recognize and use conjunctions.	CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single- syllable words. CCSS.ELA-Literacy.L.1.2d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words. CCSS.ELA-Literacy.L.1.6 Use words and phrases acquired through conversations, reading and being read to, and responding to texts, including using frequently occurring conjunctions to signal simple relationships (e.g., because). CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.L.1.2e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions.
	24. 4			Writing: 1) Complete an opinion paragraph.	CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one- syllable words. CCSS.ELA-Literacy.RF.1.3g Recognize and read grade- appropriate irregularly spelled words.
	24. 5				

1st Grade Language Arts B Syllabus

Phonics of the Week: ar	25.1	off, wash, buy, today	far, car, cart, apart, star, harp, arm, farm, mark, park	Phonics and Word Recognition: 1) Recognize, identify, read, and spell words with "ar." 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RL.1.2 Retell stories, including key details, and demonstrate understanding of their central message or lesson. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RL.1.4 Identify words and phrases in stories or poems that suggest feelings or appeal to the senses.
	25.2			Fluency: 1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RL.1.3 Describe characters, settings, and major events in a story, using key details. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self-correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.RF.1.2b Orally produce single-syllable words by blending sounds (phonemes), including consonant blends. CCSS.ELA-Literacy.RL.1.10 With prompting and support, read prose and poetry of appropriate complexity for grade 1. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters.

1st Grade Language Arts B Syllabus

	25. 3			Literature- 1) Identify words and phrases in stories or poems that suggest feelings or appeal to the senses.	CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.2d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words. CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single-syllable words. CCSS.ELA-Literacy.L.1.2e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions.
	25. 4			Writing: 1) Choose a topic to research.	CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one-syllable words.
	25. 5				CCSS.ELA-Literacy.RF.1.3g Recognize and read grade-appropriate irregularly spelled words.

1st Grade Language Arts B Syllabus

Phonics of the Week: ur, er, ir	26.1	or, which, call, drink	curl, curb, hurt, her, verb, never, clever, girl, first, shirt	Phonics and Word Recognition: 1) Recognize, identify, read, and spell words with ur, er, and ir. 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RI.1.7 Use the illustrations and details in a text to describe its key ideas. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RL.1.5 Explain major differences between books that tell stories and books that give information, drawing on a wide reading of a range of text types.
	26.2			Fluency: 1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RI.1.10 With prompting and support, read informational texts appropriately complex for grade 1. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self-correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.RI.1.4 Ask and answer questions to help determine or clarify the meaning of words and phrases in a text. CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters. CCSS.ELA-Literacy.RF.1.2b Orally produce single-syllable words by blending sounds (phonemes), including consonant blends.

1st Grade Language Arts B Syllabus

	26. 3			Literature- 1) Identify the major differences between fiction and non- fiction	CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single- syllable words. CCSS.ELA-Literacy.L.1.2d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words. CCSS.ELA-Literacy.W.1.1 Write opinion pieces in which they introduce the topic or name the book they are writing about, state an opinion, supply a reason for the opinion, and provide some sense of closure CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.L.1.2e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions. CCSS.ELA-Literacy.L.1.1j Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.
	26. 4			Writing: 1) Write three questions for research paragraph.	CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one- syllable words. CCSS.ELA-Literacy.RF.1.3g Recognize and read grade- appropriate irregularly spelled words.
	26. 5				

1st Grade Language Arts B Syllabus

Phonics of the Week: ck, k	27.1	pull, why, cold, long, far	ask, elk, snack, pack, rack, block, clock, rock, truck, duck	Phonics and Word Recognition: 1) Recognize, identify, read, and spell words ending with ck and k. 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RL.1.2 Retell stories, including key details, and demonstrate understanding of their central message or lesson. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RL.1.6 Identify who is telling the story at various points in a text.
	27.2			Fluency: 1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RL.1.3 Describe characters, settings, and major events in a story, using key details. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self-correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.RI.1.5 Know and use various text features (e.g., headings, tables of contents, glossaries, electronic menus, icons) to locate key facts or information in a text. CCSS.ELA-Literacy.RL.1.10 With prompting and support, read prose and poetry of appropriate complexity for grade 1. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters CCSS.ELA-Literacy.RF.1.2b Orally produce single-syllable words by blending sounds (phonemes), including consonant blends.

CCSS.ELA-Literacy.RI.1.7 Use the illustrations and details in a text to describe its key ideas. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RF.1.3f Read words with inflectional endings.
	30.2			Fluency: 1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RI.1.10 With prompting and support, read informational texts appropriately complex for grade 1. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self-correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.W.1.2 Write informative/explanatory texts in which they name a topic, supply some facts about the topic, and provide some sense of closure. CCSS.ELA-Literacy.RI.1.2 Identify the main topic and retell key details of a text. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters. CCSS.ELA-Literacy.L.1.1j Produce and expand complete simple and compound declarative, interrogative, imperative, and exclamatory sentences in response to prompts.

1st Grade Language Arts B Syllabus

	30. 3			Literature- 1) Compare and contrast the experiences of characters in weekly stories. 2) Identify who is telling a story.	CCSS.ELA-Literacy.RF.1.2c Isolate and pronounce initial, medial vowel, and final sounds (phonemes) in spoken single- syllable words. CCSS.ELA-Literacy.L.1.2d Use conventional spelling for words with common spelling patterns and for frequently occurring irregular words. CCSS.ELA-Literacy.RF.1.2d Segment spoken single-syllable words into their complete sequence of individual sounds (phonemes). CCSS.ELA-Literacy.L.1.2e Spell untaught words phonetically, drawing on phonemic awareness and spelling conventions.
	30. 4			Writing: 1) Write a topic and a concluding sentence for the research paragraph.	CCSS.ELA-Literacy.RF.1.3b Decode regularly spelled one- syllable words. CCSS.ELA-Literacy.RF.1.3g Recognize and read grade- appropriate irregularly spelled words.
	30. 5				

1st Grade Language Arts B Syllabus

Phonics of the Week: au and aw	31.1	sing, would, fast, much, only	haul, fault, pause, cause, paw, jaw, claw, yawn, draw, hawk	Phonics and Word Recognition: 1) Recognize, identify, read, and spell words with au and aw. 2) Recognize sight words.	CCSS.ELA-Literacy.RL.1.1 Ask and answer questions about key details in a text. CCSS.ELA-Literacy.RF.1.4a Read grade-level text with purpose and understanding. CCSS.ELA-Literacy.RL.1.7 Use illustrations and details in a story to describe its characters, setting, or events. CCSS.ELA-Literacy.RL.1.2 Retell stories, including key details, and demonstrate understanding of their central message or lesson. CCSS.ELA-Literacy.RF.1.4b Read grade-level text orally with accuracy, appropriate rate, and expression on successive readings. CCSS.ELA-Literacy.RF.1.3d Use knowledge that every syllable must have a vowel sound to determine the number of syllables in a printed word.
	31.2			Fluency: 1) Read weekly and independent reading stories with purpose and understanding, accuracy and at appropriate rate.	CCSS.ELA-Literacy.RL.1.3 Describe characters, settings, and major events in a story, using key details. CCSS.ELA-Literacy.RF.1.4c Use context to confirm or self-correct word recognition and understanding, rereading as necessary. CCSS.ELA-Literacy.W.1.5 With guidance and support from adults, focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed. CCSS.ELA-Literacy.RL.1.10 With prompting and support, read prose and poetry of appropriate complexity for grade 1. CCSS.ELA-Literacy.L.1.1a Print all upper- and lowercase letters. CCSS.ELA-Literacy.W.1.2 Write informative/explanatory texts in which they name a topic, supply some facts about the topic, and provide some sense of closure.

Module	LO#	Sight Words	Spelling Words	Vocabulary Words	Objective(s)	Common Core State Standards
Your Family	1.1	a can funny is make play	little tap blue sat look three	special said their because teach quickly	1. Identify words with short -a- sound 2. Construct sentences with vocabulary words 3. Construct sentences 4. Identify complete sentences 5. Read pre-primer sight words	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams.
	1.2	the we	pad find jam funny	kindergarten school knew copied write	1. Identify words with the short -a- sound 2. Construct sentences with vocabulary words 3. Identify complete sentences 4. Compare morning routines	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams. 2.RL.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
	1.3			breakfast would doesn't	1. Write rhyming words with the short -a- sound 2. Complete the sentence with a sight word. 3. Read a story about the Ross family 4. Revise comparison paragraph	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams.
	1.4				1. Write a rhyme with short -a- words 2. Write complete sentences with sight words 3. Compare the Ross family and the Swing family 4. Edit comparison paragraph	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams.
	1.5				1. Write a rhyme with short -a- words 2. Write complete sentences with sight words 3. Compare the Ross family and the Swing family 4. Edit comparison paragraph	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams. 2RF 4a. Read on-level text with purpose and understanding. 2RF 4b. Read on-level text orally with accuracy, appropriate rate, and expression on successive readings.
Family Fun	2.1	all be did good must our ride net soon	peg must pen went met please net fed want	clothes counting answers picture brought beautiful	1. Identify words with the short -e- sound 2. Read primer sight words 3. Identify the subject of sentences 4. Determine the meaning of new vocabulary words 5. Brainstorm to write informative text	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams.
	2.2				1. Write CVC words with the short -e- sound 2. Use reading vocabulary in sentences 3. Demonstrate text comprehension 4. Write a first draft of a paragraph 5. Decode and use sight words	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams. 2.RL.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
	2.3				1. Write words with the short -e- sound 2. Decode sight words 3. Distinguish informational and narrative text 4. Compose sentences with given subjects 5. Strengthen writing by revising	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams. 2.RL.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
	2.4				1. Match short -e- rhymes 2. Identify the story setting 3. Write sentences with given subject 4. Read and use sight words in sentences 5. Edit a paragraph	2.RF.3 Know and apply grade-level phonics and word analysis skills in decoding words.
	2.5				1. Spell sight words and phonics words 2. Use vocabulary words as subjects in sentences 3. Describe how you read 4. Publish your family fun paragraph	2RF.3 Know and apply grade-level phonics and word analysis skills in decoding words. 2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams. 2RF 4a. Read on-level text with purpose and understanding. 2RF 4b. Read on-level text orally with accuracy, appropriate rate, and expression on successive readings.

Module	LO#	Sight Words	Spelling Words	Vocabulary Words	Objective(s)	Common Core State Standards
Bedtime	3.1	at now but pretty four	kit was get win fin	squeak listened each thought trouble	1.Read sight words 2.Identify the short -l sound in words 3.Identify vocabulary words in context 4.Explain your bedtime routine 5.Identify the predicate in a sentence	2.RF.3 Know and apply grade-level phonics and word analysis skills in decoding words. 2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams.
	3.2	she into they	ate came him like lip	lively	1.Write words with the short -i- medial sound 2.Use vocabulary words in sentences 3.Demonstrate comprehension of "Bedtime" 4.Identify predicates in sentences 5.Write the first draft of bedtime routine paragraph	2RF.3 Know and apply grade-level phonics and word analysis skills in decoding words. 2RL.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text. 2W.3 Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.
	3.3				1 Spell short -i- words 2. Read sight words 3. Read informational text 4. Distinguish subjects and predicates 5. Revise paragraph	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams. 2RI.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text. 2W.3 Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.
	3.4				1. Match short -i- rhymes 2. Write sentences with given predicate 3. Identify words that show order 4. Read a poem 5. Read and use sight words in sentences	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams. 2W.3 Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.
	3.5				1. Spell sight words and phonics words 2. Use vocabulary words as subjects in sentences 3. Describe how you read 4. Publish your bedtime routine paragraph	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams. 2RF 4a. Read on-level text with purpose and understanding. 2RF 4b. Read on-level text orally with accuracy, appropriate rate, and expression on successive readings.
Fall Fun	4.1	on ran so this well will	fog hut but on ran this	mountains know attention brightest department leaves	1. Identify the short -o- sound in words 2. Identify the short -u- sound in words 3. Read sight words 4. Identify vocabulary words in context 5. Visualize as a reading strategy 6. List the characteristics of a paragraph	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams.
	4.2		well will after from	snow ready children	1. Write words with the short -o- and -u- medial sound 2. Use vocabulary words in sentences 3. Demonstrate comprehension of "Fall" 4. Write the first draft of a structured paragraph 5. Distinguish declarative and interrogative sentences	2RF.3 Know and apply grade-level phonics and word analysis skills in decoding words. 2RL.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
	4.3				1. Distinguish the short -o- and short -u- sounds 2. Read sight words 3. Identify paragraph structure in informational text 4. Compose questions 5. Revise a paragraph	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams. 2RI.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text.
	4.4				1. Distinguish rhymes with short -o- and short -u- 2. Distinguish declarative and interrogative sentences 3. Identify vocabulary words in context 4. Use sight words in sentences	2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words. 2RF 3b. Know spelling-sound correspondences for additional common vowel teams.

Module	LO#	Sight Words	Spelling Words	Vocabulary Words	Objective(s)	Common Core State Standards
	4.5				<ol style="list-style-type: none"> 1. Spell sight words and phonics words 2. Format declarative sentences and questions 3. Describe how you read 4. Publish your best fall day paragraph 	<p>2RF 3a. Distinguish long and short vowels when reading regularly spelled one-syllable words.</p> <p>2RF 3b. Know spelling-sound correspondences for additional common vowel teams.</p> <p>2RF 4a. Read on-level text with purpose and understanding. 2RF 4b. 4th Grade Language Arts A+B Syllabus

Semester A

Module	Unit	Lesson	Objectives
1	Introduction	Welcome to Language Arts!	<ol style="list-style-type: none"> 1. Explain what literature means to people and society. 2. Name some reasons why people read. 3. Describe your own reading preferences and habits. 4. Explain when and why correct spelling is important.
	Processes	Reading	<ol style="list-style-type: none"> 1. Describe some strategies for reading well. 2. Define decoding and test your decoding skills.
		Writing	Identify the stages of the writing process and explain how each stage helps you write well.
		Standard English	Define standard English and explain when it's needed.
	Inferences	Making Inferences	Use the details in what you read to make an inference.
		Collaborative Discussion	<ol style="list-style-type: none"> 1. Take part in a collaborative discussion. 2. Support an opinion with reasons.
		Multiple Meanings	Explain how speakers and writers use words with multiple meanings.

Module	Unit	Lesson	Objectives
2	Plot	Parts of Plot	<ol style="list-style-type: none"> 1. Name the basic elements of a story, and the parts of a plot. 2. Explain how plots are different in short stories, compared to novels.
		Reading Plot	<ol style="list-style-type: none"> 1. Identify some goals for your own growth in reading. 2. Identify the basic elements of plot in a novel.
		Verb Tense	<ol style="list-style-type: none"> 1. Understand how a writer's choice of verb tense affects a story. 2. Define and identify examples of progressive tense.
	Conflict	Conflict	Identify the conflict in a story, and relate conflict to plot.
		Context Clues	Use context clues to figure out what a word means.
		Writing Problems	<ol style="list-style-type: none"> 1. Select good topics and plan ideas for a narrative writing assignment. 2. Use relative adverbs to describe events in your narrative.
	Setting	Setting	Identify and describe the setting in a story.
		Setting as Context	Use the context clues in a story's setting to learn new words.
		Writing Setting	<ol style="list-style-type: none"> 1. Use sensory details to develop the setting for a story. 2. Use prepositional phrases to develop setting.

Module	Unit	Lesson	Objectives
3	Characters	Character Traits	Describe a story's characters in terms of character traits.
		Developing Characters	Identify and use several methods for communicating a character's traits.
		Novel Characters	<ol style="list-style-type: none"> 1. Describe the characters in a novel. 2. Distinguish between precise and imprecise verbs. 3. Edit writing to make the verbs more precise.
	Characterization	Characterization	Recognize direct and indirect characterization.
		Dialogue	<ol style="list-style-type: none"> 1. Use indirect characterization to develop a character. 2. Punctuate dialogue correctly.
		Word Endings	Use knowledge of word endings to figure out what words mean.
	Point of View	Points of View	<ol style="list-style-type: none"> 1. Explain what point of view is. 2. Explain the effect of point of view on a story.
		Paraphrasing	<ol style="list-style-type: none"> 1. Explain the purpose and value of paraphrasing. 2. Select the best examples of paraphrasing for a specific purpose.
		Relative Pronouns	<ol style="list-style-type: none"> 1. Define and identify examples of relative pronouns. 2. Use relative pronouns to describe a character.
		Writing Point of View	<ol style="list-style-type: none"> 1. Distinguish between first-person and third-person point of view. 2. Choose a point of view for a story.

Module	Unit	Lesson	Objectives
4	Narrators	Analyzing Narrators	<ol style="list-style-type: none"> 1. Analyze the narrator in a story. 2. Define and describe omniscient narrator.
		Introducing Narrators	<ol style="list-style-type: none"> 1. Choose a narrator who will provide an interesting point of view for a story. 2. Introduce a story's narrator in a way that is interesting.
		Direct Quotes	<ol style="list-style-type: none"> 1. Define and identify examples of direct quotes. 2. Use commas and quotation marks to punctuate a direct quote
	Theme	What is Theme?	<ol style="list-style-type: none"> 1. Define theme. 2. Explain the difference between theme and plot.
		Time to Write!	<ol style="list-style-type: none"> 1. Write a story based on ideas generated for prewriting activities. 2. Apply strategies for deciding if a sentence is complete.
	Finding Themes	How to Find Themes	Identify themes in a story, based on events and details.
		Describing Themes	Describe a theme in a story and explain what elements of the story support the theme.
		Themes and Titles	Explain how a story's title and theme are sometimes related.
		Discussion Questions	Identify questions that help a discussion by clarifying what others have said.

Module	Unit	Lesson	Objectives
5	Comparing Themes	Common Themes	<ol style="list-style-type: none"> 1. Identify a theme that two stories share. 2. Give reasons supported by facts and details.
		Reviewing Discussion Ideas	Review key ideas expressed in a discussion.
		Idioms	Define and recognize examples of idioms.
	Forms of Fiction	Myths and Fables	<ol style="list-style-type: none"> 1. Compare and contrast forms of short fiction. 2. Use academic words related to the study of fiction.
		Folk Tales	<ol style="list-style-type: none"> 1. Use academic words related to the study of fiction. 2. Distinguish among different forms of short fiction
		Opinions and Claims	Write and support a claim about a piece of literature they've read.
		Writing Opinions	<ol style="list-style-type: none"> 1. Write an essay that develops support for a claim. 2. Explain what makes a good conclusion to an opinion paper.
	Forms of Media	What Is Multimedia?	List and compare media forms used to tell stories.
		Paraphrasing Multimedia	Paraphrase ideas presented in media other than written text.
		Transitions	Link opinions and reasons using transition words and phrases.
		Checking for Commas	Apply rules for using commas after transitional tags.

Module	Unit	Lesson	Objectives
6	Analyzing Multimedia	Multimedia Stories	Analyze a story delivered in a multimedia format.
		Stereotypes and Multimedia	1. Analyze the effect of a multimedia story. 2. Define and identify examples of stereotypes.
		Peer Review	Review the written work of peers.
		Revision	Revise a story to make it easier for readers to visualize.
		Editing for Commas	Identify and correct common errors in the use of commas.
	Mythology	Mythological Beings	Identify key characters from various cultures' myths.
		Allusions	Define and identify examples of an allusion.
		Allusions as Context	Use allusions as clues for determining a word's meaning.
		Using References	Use reference materials and strategies to understand allusions to mythology.
	Comparing Myths	Creation Myths	Compare and contrast myths from different cultures.
		Writing to Compare	Write an essay that compares and contrasts two myths.
		Mythological Roots	Define words with Latin roots that are related to mythology.

Semester B

Module	Unit	Lesson	Objectives
1	Elements of Poetry	What Is Poetry?	Explain the differences between poems and other forms of literature.
		How Poems Look	Describe visual characteristics of poems (line/verse/stanza).
		Sounds of Poetry	Describe music characteristics of poems (rhythm, meter, rhyme).
		Confusing Words	Correctly use frequently confused words (to, two, too; there, their, they're).
	Poetry in Practice	Similes and Metaphors	Explain the meaning of simple similes and metaphors in context.
		Figurative Language	Interpret a poet's use of figurative language.
		How Poets Choose Words	Interpret a poet's word choice based on word relationships and nuances of meaning.
		Where Adjectives Belong	Recognize standard word order for adjectives used in English sentences.
	Drama	What Is Drama?	Explain the differences between drama and other forms of literature.
		The Truth in Drama	<ol style="list-style-type: none"> 1. Define adage and proverb, and identify examples of these expressions. 2. Recognize and explain the adage or proverb expressed by a fable or folktale.
		Sentence Fragments in Drama	<ol style="list-style-type: none"> 1. Define and identify examples of sentence fragments. 2. Explain how sentence fragments are used in dramatic scripts
		Sentence Fragments in Dialogue	<ol style="list-style-type: none"> 1. Recognize sentence fragments as they are used in drama. 2. Explain the purpose of sentence fragments in dialogue.

Module	Unit	Lesson	Objectives
2	Elements of Drama	Structure of Drama	Describe the structural elements of drama.
		From Script to Performance	Make connections between drama text and drama performance.
		Correcting Fragments	Correct inappropriate use of sentence fragments.
		Spelling Words Correctly	Spell words correctly, consulting references as needed.
	Reading for Information	Informational Text	1. Distinguish between informational text and fiction. 2. Read for details in informational text.
		Informational Inferences	Make inferences based on informational text.
		Explicit and Implicit Messages	1. Distinguish between explicit and implicit messages. 2. Explain the explicit and implicit messages in informational text.
		Details That Support Messages	Identify details that convey explicit and implicit messages.
	Main Ideas	The Big Idea	Identify the main idea in a passage of informational text.
		Supporting Details	Explain how a main idea is supported by details in a text.
		Summarizing Information	1. Distinguish between summarizing and paraphrasing. 2. Write summaries that include main ideas and supporting ideas. 3. Paraphrase a section of informational text.
		Synonyms and Antonyms	Explain the meaning of words by relating them to their opposites or to words with similar meanings.

Module	Unit	Lesson	Objectives
3	Technical Reading	Types of Information	Identify characteristics of historical and technical writing.
		Reading History and Science	Apply strategies for reading historical and scientific texts.
		Word Parts	Use Greek and Latin word parts as clues to word meanings.
		Summarizing as Strategy	Summarize historical, scientific, and technical text
	Text Structures	Patterns of Meaning	Identify and describe the overall structure of a text.
		The Shape of Information	Identify the structure of a text as chronological, comparison, cause/effect, or problem solution.
		Organizing Your Own Ideas	Use knowledge of the basic structure of informational text to organize their own ideas.
		The Right Words	<ol style="list-style-type: none"> 1. Identify the importance of precise language and domain-specific vocabulary when writing about a topic. 2. Choose precise, domain-specific vocabulary to write about a topic.
	Informational Reports	Firsthand, Secondhand	Compare and contrast firsthand and secondhand accounts.
		Reasons and Evidence	Explain how an author uses reasons and evidence to support particular points in a text.
		Using a Dictionary	Use a dictionary to learn the definitions and pronunciation of a word.
		Drafting a Report	Draft an informational report containing facts, definitions, and details about a topic.

Module	Unit	Lesson	Objectives
4	Multimedia Information	Informational Images	1. Identify the role of images in supporting the ideas in an informational text. 2. Interpret information presented visually with drawings or photographs.
		Charts and Graphs	Interpret information presented quantitatively with charts, graphs, timelines, diagrams, animations, etc.
		The Sound of Information	Interpret information presented orally with voice, sound, and music.
		Using Visual Elements	Use visual elements to develop and support a topic.
	Integrating Information	Sharing Information	Integrate information from two texts on the same topic.
		Sharing Direct Quotes	Develop an idea by integrating direct quotes.
		Punctuating Direct Quotes	Apply rules for punctuating direct quotes integrated into a report.
		Stopping Run-on Sentences	Recognize and correct run-on sentences.
	Writing Information	Conclusions	Provide a concluding statement or section for information developed on a topic.
		Transitional Tags	Revise an informational report, adding words and phrases that signal transitions from one idea to another.
		Peer Reviewing Information	Apply peer review strategies to informational writing.
		Revising Informational Reports	1. Use feedback from peers to improve a written draft. 2. Revise and edit an informational report

Module	Unit	Lesson	Objectives
Module 5	Planning a Research Project	Steps to Research	Define research and describe the steps involved.
		Your Research Topic	<ol style="list-style-type: none"> 1. Identify the characteristics of a good research question. 2. Generate ideas for research questions. 3. Select the best research question from among several options.
		Your Research Plan	Plan a research project that investigates several aspects of a topic.
		Knowledge and Experience	<ol style="list-style-type: none"> 1. Describe the role of perspective and personal experience in completing a research project. 2. Recall and explain information from an experience relevant to a research topic.
	Gathering Information	Print and Digital Sources	<ol style="list-style-type: none"> 1. Gather relevant information from print and digital sources. 2. Record information about sources.
		Tracking Sources	Record source information as part of a note-taking process.
		Taking Notes	Take notes from informational texts, displays, and presentations.
		Ordering Information	Organize information gathered through research.
	Analyzing Information	Fact and Opinion	Identify and apply procedures for analyzing information as factual or opinion-based.
		Analyzing Notes	Analyze information gathered during a research project.
		Analysis Statements	Write analytical statements based on information gathered during research.
		Supporting Analysis	Support analysis statements using evidence from research.

Module	Unit	Lesson	Objectives
Module 6	Delivering Information	Preparing an Oral Report	Prepare an oral report by selecting and organizing information on a topic.
		Using Facts and Details	Select facts and details to support the main ideas in an oral report.
		Delivering an Oral Report	Deliver an oral report, speaking clearly at an understandable pace.
		Recording an Oral Report	Produce an audio recording of an oral report.
	Discussing Information	Analyzing a Speech	Identify the reasons and evidence a speaker provides to support his or her main ideas.
		Discussing Speeches	<ol style="list-style-type: none"> 1. Participate in collaborative discussions based on specific topics. 2. Respond appropriately to the spoken ideas of other students.
		Formal and Informal English	<ol style="list-style-type: none"> 1. Distinguish between formal and informal styles of English discourse. 2. Differentiate between contexts that call for formal English and situations where informal discourse is appropriate.
		Commas in Compound Sentences	Use a comma before a coordinating conjunction in a compound sentence.
	Presenting Information	Adding Visual Elements	Select visual elements to include in an oral or multimedia presentation.
		Using Terminology	<ol style="list-style-type: none"> 1. Define and identify examples of terminology. 2. Consult reference materials, both print and digital, to find the pronunciation and precise meaning of key words and phrases.
		Creating Multimedia	Create a multimedia presentation on a researched topic.
		Using Exclamation Marks	Identify sentences or writing situations that justify the use of exclamation points.

5th Grade Language Arts A+B Syllabus

Semester A

Module	Unit	Lesson	Objectives
1	Processes	Introduction	<ol style="list-style-type: none"> 1. Describe the types of conversations that people have about literature. 2. Tell how much time you can spend writing at one sitting. 3. Explain when and why correct spelling is important.
		The Reading Process	Describe the skills and strategies involved in the process of reading.
		The Writing Process	Identify the stages of the writing process and explain how each stage helps you write well.
		Standard English	<ol style="list-style-type: none"> 1. Define standard English, and explain when and where it is most appropriate. 2. Identify elements of standard English.
	A Story's Structure	Describing Stories	Name the basic elements of a story, and the parts of a plot.
		Comparing Stories	<p>Identify the plot elements in a novel.</p> <p>Use words and phrases that help you compare two things or ideas.</p>
		Purposes for Writing	List and explain purposes for writing.

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
2	Conflict	Describing Conflict	Identify the conflict in a story, and relate conflict to plot.
		Collaborative Discussion	Describe what should happen in a collaborative discussion.
		Writing a Story	<ol style="list-style-type: none"> 1. Complete prewriting and planning steps for a narrative writing assignment. 2. Select the best verb tense for a particular narrative (story).
	Characterization	Building Character	<ol style="list-style-type: none"> 1. Draw conclusions about characters, based on indirect characterization. 2. Use indirect characterization to develop characters in your narrative.
		Dialogue	<ol style="list-style-type: none"> 1. Use dialogue as a method of characterization. 2. Punctuate dialogue correctly.
	Setting	The Impact of Setting	<ol style="list-style-type: none"> 1. Identify and describe a story's setting. 2. Explain the impact of a story's setting on other parts of the
		Discussing Setting	<ol style="list-style-type: none"> 1. Apply an understanding of setting to a novel. 2. Prepare to discuss a novel's settings with other students.
		Sensory Details	<ol style="list-style-type: none"> 1. Distinguish between general abstract details and specific sensory details. 2. Use sensory details to develop the setting for a story.
		Punctuating Titles	Use correct punctuation when writing the titles of stories and books.

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
3	Narrators	Identifying Point of View	<ol style="list-style-type: none"> 1. Apply strategies for identifying a story's point or view and/or narrator. 2. Explain how point of view affects a story's narration.
		The Narrator as Context	Use point of view to clarify what a word means.
		Choosing Context	<ol style="list-style-type: none"> 1. Identify the best strategy for figuring out a word's meaning. 2. Choose the best point of view for your own narratives.
	Points of View	Comparing Points of View	Compare similar stories narrated from different points of view.
		Introductory Commas	<ol style="list-style-type: none"> 1. Use commas to set apart introductory phrases like For example. 2. Write the first draft of a narrative told from a particular point o
	Theme	Finding Themes	Identify the theme in a story, using details related to plot, setting, and character.
		Idioms	<ol style="list-style-type: none"> 1. Define idiom, and explain some common idioms. 2. Finish the first draft of a narrative by writing for longer periods of

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
4	Forms of Narrative	Literary Forms	Name the forms that narrative literature can take.
		Narrative Sections	Describe the sections in each narrative form (chapters, scenes, etc.)
		Narrative Conclusions	1. Describe the purpose of a narrative's conclusion. 2. Improve the conclusion of the narrative they wrote.
		Sentence Fragments	1. Identify examples of sentence fragments. 2. Describe or identify situations in which sentence fragments are useful and appropriate.
	Multimedia	What Is Multimedia?	Explain how multimedia can make stories come to life.
		Peer Review	Use a constructive method to provide feedback on a peer's narrative.
		Building Ideas	Collaborate with others to provide a review of a peer's writing.
		Sentence Combining	Combine sentences to make a story flow more smoothly.
	Genres	What Is Genre?	1. Distinguish between genres and types of stories. 2. Describe the most common genres of fiction.
		Revising Your Narrative	1. Apply notes from a peer review session to efforts at revision. 2. Identify run-on sentences and revise them so they're e
		A Multimedia Narrative	Use multimedia elements and techniques to present an original narrative.

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
5	Comparing and Contrasting	Reading Science Fiction	Find story elements related to a specific genre.
		Comparing Science Fiction	Compare and contrast two stories written in the same genre.
		Commas for Transition	Use commas to set transition words and phrases apart from the rest of a sentence.
	Writing Opinions	Claims and Reasons	State an opinion clearly and support it with reasons.
		Organizing Ideas	Organize ideas into well-structured paragraphs.
		Sentence Editing	1. Identify reasons for expanding and combining sentences. 2. Edit sentences to clarify or connect the ideas in an essay.
	Drama	Reader's Theater	1. Describe reader's theater as a type of drama. 2. Create a dramatic script based on an existing work of literature.
		Plays and Novels	Compare the elements of drama to the elements of a novel or short story.
		Dialect	Define and identify examples of dialect.
		Dramatic Forms	List and describe the most common forms of drama.
		Finding Themes in Drama	Identify the theme in a play, based on details in the text.

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
6	Narrative Poetry	Forms of Poetry	Distinguish between narrative poems and lyric poems.
		Poems As Stories	Analyze the theme of a narrative poem.
		How to Edit	Identify the kinds of changes appropriate to the editing stage of the writing process.
		Editing for Verb Tense	Identify and correct unneeded shifts in verb tense.
	Lyric Poetry	Themes in Lyric Poetry	Identify and express the theme or themes of a lyric poem.
		Sound Effects	Identify the ways in which poems make music.
		Uses of Imagery	Describe how poets use imagery in lyric poems.
		Antonyms and Synonyms	Use synonyms and antonyms to understand unfamiliar words in a poem.
	Classic Literature	What Are the Classics?	Define and describe classic literature.
		Reading Classic Poetry	Use common reading strategies to comprehend difficult, complex literature.
		Reading Classic Prose	Comprehend and interpret a passage in a classic novel.
		Figurative Language	Identify examples of figurative language in a text.

5th Grade Language Arts A+B Syllabus

Semester B

Module	Unit	Lesson	Objectives
1	Reading Information	Main Ideas	1. Identify two or more main ideas in a passage of informational text. 2. Explain how the main ideas in a text are supported by details.
		Supporting Details	Explain how the main ideas in a text are supported by details.
		Using Direct Quotes	Use direct quotes to support your explanation of a text’s main ideas.
		Punctuating Quotes	Punctuate direct quotes used to support an explanation.
	Finding Answers	Sources of Information	Identify sources that may provide the answer to a specific question.
		Using Information	Use information from print and digital sources to answer a question.
		Homophones	Define homophone and identify some commonly confused examples.
		Spelling Homophones	Identify and apply strategies for remembering how to spell these words.
	Analyzing Claims	Finding Claims	1. Define and identify examples of written claims. 2. Identify an author's claim.
		Finding Support for Claims	1. Explain how authors use reasons and evidence to support a claim. 2. Identify examples of reasons and evidence that support a claim.
		Analyzing a Claim	Analyze the claim in a persuasive text.
		Conjunctions	1. Define and identify examples of conjunctions. 2. Explain the role of conjunctions in a sentence.

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
2	Reading Science	Connecting Concepts	Explain the relationship between two concepts in a scientific article.
		Scientific Words	Identify and define words commonly used in scientific articles.
		Dissecting Words	Use common Greek and Latin word parts to figure out what words mean.
		Using Conjunctions	Explain how conjunctions are used to show relationships between ideas.
	Analyzing Science	Organizing Science	Identify common ways of organizing scientific articles.
		Comparing Organization	Compare the organization of two different scientific articles.
		Integrating Science Sources	Integrate information from two scientific articles on the same topic.
		Researching Words	Use reference materials to find out the exact meaning and pronunciation of key words and phrases.
	Reading History	Connecting Events	Explain the relationship between two events in an historical ac
		Historical Words	Identify words that are commonly used in historical accounts.
		Context Clues in History	Use cause and effect relationships to determine the meanings of unfamiliar words used in historical accounts
		Prepositions	Define and explain the use of prepositions and prepositional phrases.

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
3	Analyzing History	Comparing Historical Accounts	Compare and contrast two accounts of the same event.
		The Author's Perspective	Analyze the perspective of an author writing about historical eventx
		Correlative Conjunctions	Define and identify examples of correlative conjunctions.
		Using Correlative Conjunctions	Use correlative conjunctions to compare and contrast ideas.
	Researching	Research Questions	Generate a question to use as a research topic.
		Finding Sources	Find sources that may provide answers to a research question.
		Using Reference Materials	Use a dictionary to find out the exact meaning and pronunciation of key words and phrases.
	Summarizing Sources	Summarizing	Summarize articles used to answer a research question.
		Selecting Direct Quotes	1. Select direct quotes to support an explanation of an article's claims.2. Provide context for a direct quote by summarizing the source of the quote.
		Transitional Tags	Use transitional tags to integrate direct quotes into a summary.
		Punctuating Direct Quotes	1. Identify correctly punctuated direct quotes. 2. Integrate direct quotes into a research report and correctly punctuate them.

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
4	Making Your Case	Finding an Angle	Explain their perspective on a topic they researched.
		Supporting Your Ideas	Develop a perspective on a topic with reasons and information.
		Research Words	Identify and define words commonly used in research reports.
		Spelling	Recall the correct spelling of words that are frequently used in research reports.
	Building Arguments	Finding Evidence	Identify evidence that supports a claim and the reasoning behind it.
		Organizing Research Reports	<ol style="list-style-type: none"> 1. Define and identify common ways of organizing research reports. 2. Choose the best structure for supporting a particular claim or purpose for a research report.
		Outlining a Research Report	Use an outline to plan the organization of a research report.
	Writing Your Report	Drafting a Research Report	Draft a research report that develops a perspective on a topic.
		Writing Strategies	<ol style="list-style-type: none"> 1. Draft a research report that develops a perspective on a topic. 2. Use writing strategies that help them develop ideas and expand on details.

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
Module 5	Peer Review	Review and Respond	Peer review a research report written by another student.
		Combining Sentences	Identify sentences that should be combined with other sentences.
		Separating Sentences	Determine if a group of words is a complete sentence.
	Revisit and Revise	Using Feedback	Evaluate and prioritize feedback provided by peers and/or a teacher.
		Plan to Revise	Develop a plan for revising a research report.
		Revising a Report	In this lesson students will apply what they've learned about revising a research report.
		Revising for Style	Improve the style and clarity of a research report by expanding, combining, separating, or reducing sentences.
	Proof and Edit	Proofreading	1. Identify the areas to check when proofreading a research report. 2. Proofread a research report.
		Editing By Checklist	1. Describe the purpose of an editing checklist. 2. Identify items that typically appear on an editing checklist.
		The Final Touches	1. Correct common writing mistakes related to grammar, usage, and mechanics. 2. Edit a research report.
		Citing Your Sources	Cite sources of information used in a research report.

5th Grade Language Arts A+B Syllabus

Module	Unit	Lesson	Objectives
6	Speak Up	Planning an Oral Report	<ol style="list-style-type: none"> 1. Select main ideas and details for an oral report. 2. Organize ideas for an oral report.
		Choosing Details for a Speech	Choose and integrate facts and descriptive details to support the main ideas in an oral report.
		Visual Elements	Create or select visual elements to illustrate key points in an oral report.
		Speaking Techniques	Identify, describe, and apply techniques that make an oral report more clear and compelling for an audience.
	Make It Zing	Presenting Multimedia	Identify media components that will help present a set of main ideas with a particular point of view.
		Planning a Presentation	Create an outline, site map, or other plan representing ideas and media components for a multimedia presentation.
		Look and Listen	Summarize a presenter's main ideas or argument.
		Interjections	<ol style="list-style-type: none"> 1. Define and identify examples of interjections. 2. Distinguish between mild and strong interjections. 3. Punctuate interjections correctly.
	Get Heard	Power Tools for Communication	<ol style="list-style-type: none"> 1. Identify some of the ways in which technology helps people share ideas. 2. Identify some of the dangers or drawbacks of technology-enhanced communication.
		Publishing with Technology	Use technology to share your point of view with a larger audience.
		Responding to Ideas	Respond appropriately to the digital messages of others.
		The Perfect Tense	<ol style="list-style-type: none"> 1. Define and identify examples of the perfect tense. 2. Form and use the perfect verb tenses (I had walked; I have walked; I will have walked).

Sixth Grade Language Arts A

Course Syllabus

Course Description

In this course, you will read and analyze informational texts. These texts take many different forms, including biographies, personal accounts of events, instructional documents, film reviews, and persuasive letters. The course's reading selections demonstrate ways to understand explicit and implicit information, central ideas and key details, and claims and arguments, among other ideas and concepts. Over the course of ENG061, you will read the novel *The Road* by Jack London. You will also examine informational texts to better your understanding of the science behind sunsets, the lives of several important historical figures, the history of the Olympics, and the process of flotation used by archeologists, among other topics.

As you read the selections in this course, you will practice ways to use supporting evidence, identify central ideas, make inferences, analyze word choice, and identify figurative and connotative language in informational texts. In addition, you will learn about basics in grammar, usage, and punctuation, including correct spelling, analogies and word relationships, simple and compound sentences, prepositions and prepositional phrases, subordinating conjunctions, and varying sentence patterns. You will also review context clues to determine word meaning, and you will learn various vocabulary words and more about Greek and Latin prefixes, suffixes, and roots.

In addition, you will learn the elements of informational and argument writing so that you can plan, create, write, revise, and edit your own informational and argument essays.

Through the lessons provided in this course, you will master techniques that help you achieve a deeper appreciation of informational texts.

Course Objectives:

- Identify and describe central ideas and key details in texts.
- Describe and make connections between key individuals, ideas, and events in texts.
- Identify and analyze implicit and explicit evidence in texts to make inferences.
- Determine how a text's perspective and structure contribute to its meaning and style.
- Identify and analyze claims and arguments within informational texts.
- Identify and interpret figurative, connotative, and technical meanings in texts.
- Identify and define common Greek and Latin roots and affixes to determine the meaning of words.
- Use context clues to determine the meaning of unfamiliar words.
- Use phrases and clauses within different sentence structures when writing.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Identify topics and issues in informational texts across a variety of different informational mediums.
- Use knowledge of writing ideas, concepts, and strategies to write informational and argument essays.

Required Materials

- Word-processing software
- Internet browser

Sixth Grade Language Arts A**Course Syllabus****Course Overview**

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that you can increase your comprehension. These ways include Vocabulary Words; Language, Reading, and Writing Skills and Activities; Lesson Checkpoints; and Discussion Boards. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Words – Includes parts of speech, definitions, synonyms, related words, and etymology; contains practice questions; is a part of the Language Skill.

Language Skill Instruction – Includes instruction in vocabulary and language skills; contains workbook questions; is a part of the Language Skill.

Reading Selections – Includes reading selections, videos, infographics, and audio files; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains workbook questions; is part of the Reading Skill.

Writing Skill Instruction and Activity – Includes instruction in writing skills; workbook questions; contains activities including writing projects, which are assessments graded by the instructor and which require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content; includes an informative essay, completed in Units 2 and 3; and an argument essay, completed in Units 4 and 5.

Checkpoint – Uses 15 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives you a chance to share your thoughts and ideas about the topics covered in each lesson.

Exam Prep – Presents a summary of the skills covered in the unit.

Sixth Grade Language Arts A
Course Syllabus

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess mastery of unit objectives. You may take the Unit Exam only once.

Midterm Writing Exam – This exam is in the next-to-last lesson and tests how well you have learned the writing skills presented in the course. You may take the End-of-Course Writing Assessment only once.

Midterm Exam – This exam is in the last lesson and consists of 40 questions that test you on the concepts and information learned in the course. You may take the Final Exam only once.

Sixth Grade Language Arts A
Course Syllabus

Schedule of Work**Unit 1: Amazing Journey**

- A. Introduction: Lessons 1–5
 - Language Skills: Lessons 1–5
- B. Vocabulary Words: Lessons 1–4
- C. Language Skills: Lessons 1, 3
 - Language Skills Workbooks: Lessons 1, 3
 - Language Skills Exam Prep: Lesson 5
- D. Reading Skills: Lessons 1–5
 - Reading Selections: Lessons 1–5
 - Reading Skills: Lessons 1–4
 - Reading Skills Workbooks: Lessons 1-4
 - Reading Skills Exam Prep: Lesson 5
- E. Research Skills for Writing: Lessons 1–5
 - Writing Skills Workbooks: Lessons 1-5
- F. Discussion Board: Lessons 1–5
- G. Checkpoint: Lessons 1–4
- H. Unit 1 Exam: Lesson 5

Unit 1 Reading Selections

- *The Road – Confession* Parts 1-3
- *The Road – Holding Her Down* Parts 1-2
- “There’s Still Gold in Those Hills”
- “The Amazing Transistor”
- “Greatness Behind the Scenes”
- “A Highway of Water”
- “The Science of Sunsets”
- “History Beneath Our Feet”
- “Making It Real”
- “The Life of Theodore Roosevelt” excerpt
- “The Great Storyteller”
- “The Olympic Tradition”

Sixth Grade Language Arts A
Course Syllabus

Unit 2: We've Only Just Begun

- A. Introduction: Lessons 6–10
- B. Language Skills: Lessons 6–10
 - Vocabulary Words: Lessons 6–9
 - Language Skills: Lessons 6, 8
 - Language Skills Workbooks: Lessons 6, 8
 - Language Skills Exam Prep: Lesson 10
- C. Reading Skills: Lessons 6–10
 - Reading Selections: Lessons 6–10
 - Reading Skills: Lessons 6–9
 - Reading Skills Workbooks: Lessons 6-9
 - Reading Skills Exam Prep: Lesson 10
- D. Writing Skills and Activities (Writing Project): Lessons 6–10
 - Writing Skills Workbooks: Lessons 6-10
- E. Discussion Board: Lessons 6–10
- F. Checkpoint: Lessons 6–9
- G. Unit 2 Exam: Lesson 10

Unit 2 Reading Selections

- *The Road – Holding Her Down* Part 3
- *The Road – Pictures* Parts 1-3
- *The Road – “Pinched”* Part 1
- “Let’s Have a Chess Club
- “Film Review: Seven Continents”
- “The Wild, Wild 2”
- “Time Travel”
- “Allegra Addison Adds Faster”
- “One Harey Situation”
- “Tiny Workers”
- “Archeology in the Lab”
- “The Power of Color on a Computer Screen”
- “Let’s Go Fly a Kite”

Sixth Grade Language Arts A
Course Syllabus

Unit 3: Middle of the Road

- A. Introduction: Lessons 11–15

- B. Language Skills: Lessons 11–15
 - Vocabulary Words: Lessons 11–14
 - Language Skills: Lessons 11, 13
 - Language Skills Workbooks: Lessons 11, 13
 - Language Skills Exam Prep: Lesson 15

- C. Reading Skills: Lessons 11–15
 - Reading Selections: Lessons 11–15
 - Reading Skills: Lessons 11–14
 - Reading Skills Workbooks: Lessons 11-14
 - Reading Skills Exam Prep: Lesson 15

- D. Writing Skills and Activities (Writing Project): Lessons 11–15
 - Writing Skills Workbooks: Lessons 11-15

- E. Discussion Board: Lessons 11–15

- F. Checkpoint: Lessons 11–14

- G. Unit 3 Exam: Lesson 15

Unit 3 Reading Selections

- *The Road – “Pinched”* Parts 2-3
- *The Road – The Pen* Parts 1-3
- “Sir Isaac Newton”
- “The Great Thinkers”
- “The Green Team”
- “Twist a Balloon Dog”
- “Party Time”
- “The Curfew”

Sixth Grade Language Arts A
Course Syllabus

Unit 4: My Own Strange Path

- A. Introduction: Lessons 16–20

- B. Language Skills: Lessons 16–20
 - Vocabulary Words: Lessons 16–19
 - Language Skills: Lessons 16, 18
 - Language Skills Workbooks: Lessons 16, 18
 - Vocabulary and Language
 - Skills Exam Prep: Lesson 20

- C. Reading Skills: Lessons 16–20
 - Reading Selections: Lessons 16–20
 - Reading Skills: Lessons 16–19
 - Reading Skills Workbooks: Lessons 16-19
 - Reading Skills Exam Prep: Lesson 20

- D. Writing Skills and Activities (Writing Project): Lessons 16–20
 - Writing Skills Workbooks: Lessons 16-20

- E. Discussion Board: Lessons 16–20

- F. Checkpoint: Lessons 16–19

- G. Unit 4 Exam: Lesson 20

Unit 4 Reading Selections

- *The Road – Hoboes That Pass In The Night* Parts 1-3
- *The Road – Road-Kids and Gay-Cats* Parts 1-2
- “Persuasive Letters”
- “Why I Support Our School’s No-Snacking Policy”
- “Volunteer Today!”
- “Paper and the Environment”
- “Speech: Why We Want Our Water Back”
- “The Importance of a Class Newsletter”
- “Managing School Recycling”
- “The Fundraising Fair”

Sixth Grade Language Arts A
Course Syllabus

Unit 5: Long Walk Home

- A. Introduction: Lessons 21–25

- B. Language Skills: Lessons 21–25
 - Vocabulary Words: Lessons 21–24
 - Language Skills: Lessons 21, 23
 - Language Skills Workbooks: Lessons 21, 23
 - Language Skills Exam Prep: Lesson 25

- C. Reading Skills: Lessons 21–25
 - Reading Selections: Lessons 21–25
 - Reading Skills Lessons 21–24
 - Reading Skills Workbooks: Lessons 21-24
 - Reading Skills Exam Prep: Lesson 25

- D. Writing Skills and Activities (Writing Project): Lessons 21–25
 - Writing Skills Workbooks: Lessons 21-25

- E. Discussion Board: Lessons 21–25

- F. Checkpoint: Lessons 21–24

- G. Unit 5 Exam: Lesson 25

Unit 5 Reading Selections

- *The Road – Road-Kids and Gay-Cats Part 3*
- *The Road – Two Thousand Stiffs Parts 1-3*
- *The Road – Bulls Part 1*
- “White Bright Gel Pens”
- “Everybody’s Going Healthy”
- “Rome: An Empire for the Ages”
- “Journal Article: Making Smart Choices with Water”
- “Overcoming Great Obstacles”
- “From Secretary to Scientist”
- “Big Dreams for an Art Center/Support the Bridge Street Art Center”
- “Playing Sports/Teamwork”
- “Les Paul”
- “Boston Tea Party”

Sixth Grade Language Arts A
Course Syllabus

Unit 6: End of the Line

- A. Introduction: Lessons 26–30
- B. Language Skills Exam Prep: Lessons 26–28
- C. Reading Skills Exam Prep: Lessons 26–29
 - Reading Selections: Lessons 26–29
 - Reading Skills Exam Prep: Lessons 26–29
- D. Writing Skills Exam Prep: Lessons 27–28
- E. Midterm Writing Exam: Lesson 29
- F. Discussion Board: Lessons 26–30
- G. Midterm Exam: Lesson 30

Unit 6 Reading Selections

- The Road – Bulls Parts 2-4
- “What’s So Funny?”
- “A Taste of Friendship”
- “The Courageous Amelia Earhart”
- “Protect the Pollinators”
- “John Muir: Man for Nature”
- “King Valley Middle School”
- “A Lady Worth Knowing”
- “Organic Farming: The Best Solution/The Only Way to Feed the World”
- “Field Trips”

Sixth Grade Language Arts B

Course Syllabus

Course Description

In this course, you will focus on learning reading skills based on literary texts. The texts come from a number of genres and include a novel, excerpts from novels, short stories, poems, and plays. The course's reading selections demonstrate ways to understand explicit and implicit information, theme, characters, plot, poetic techniques, and figurative language, among other ideas and concepts. You will read the entire novel *The Wonderful Wizard of Oz* in almost every lesson throughout the course. You will read excerpts from the novels *Little Women* and *The Adventures of Tom Sawyer*, and stories and plays about challenging situations, getting caught doing something wrong, finding something unexpected, and why the crocodile has a wide mouth.

Additionally, you will read poems from famous poets, such as Robert Louis Stevenson, Robert Frost, and Carl Sandburg, to name a few. You will also watch several videos of famous poems being read aloud.

As you read the novels, short stories, poems, and plays in this course, you will practice ways to identify central ideas and themes; make inferences; analyze word choice; identify figurative and connotative language; and compare and contrast poems, poems to stories, poems to video versions. In addition, you will learn about basics in grammar, usage, and punctuation, including conjunctive adverbs, predicate adjectives, various types of pronouns, active and passive voice, and semicolons and colons. You will also learn 20 new vocabulary words in each of the first five units of the course.

In addition, you will learn the elements of narrative writing so that you can plan, create, write, revise, and edit your own personal narrative. You will also learn about different forms of poetry and their characteristics, and different poetic techniques in order to write several types of poems.

Through the lessons provided in this course, you will master techniques that help you achieve a deeper appreciation of literary texts and narrative and poetry writing.

Suggested Prerequisite: ENG061-6A

Sixth Grade Language Arts B**Course Syllabus****Course Objectives:**

- Describe and analyze how the elements of plot cause characters to respond or change in literary texts.
- Identify and describe themes and central ideas in literary texts.
- Identify and analyze how an author develops point of view and perspective in literary texts.
- Describe and analyze how a sentences, chapters, scenes, or stanzas affect the structure in literary text.
- Identify and analyze implicit and explicit evidence in texts to make inferences.
- Identify and interpret figurative and connotative meanings in literary texts.
- Determine the impact of word choice in literary texts.
- Identify and explain poetic forms, structure, and techniques when looking into poetry.
- Compare and contrast topics, themes, ideas, and experiences in stories, poems, and videos.
- Identify and use different types of adverbs, adjectives, pronouns, and pronoun case.
- Identify and correct vague pronoun use and shifts in pronoun number and person.
- Identify and use active and passive voice while writing.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Use knowledge of writing ideas, concepts, and strategies to write a personal narrative and various forms of poetry.

Required Materials

- Word-processing software
- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that you can increase your comprehension. These ways include Vocabulary Words; Language, Reading, and Writing Skills; Writing Activities; Lesson Checkpoints; and Discussion Boards. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Sixth Grade Language Arts B**Course Syllabus****Course Organization**

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Words– Includes parts of speech, definitions, synonyms, related words, and etymology; contains workbook questions; is a part of the Language Skill.

Language Skill Instruction – Includes instruction in vocabulary and language skills; contains workbook questions; is a part of the Language Skill.

Reading Selections – Includes annotated reading selections and videos; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains workbook questions; is part of the Reading Skill.

Writing Skill Instruction and Activity – Includes instruction in writing skills; contains workbook questions; contains activities including writing projects, which are assessments graded by the instructor and which require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content; includes a personal narrative, completed in Units 2 and 3; and the writing of four different poems, completed in Units 4 and 5.

Checkpoint – Uses 15 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives chances to share personal thoughts and ideas about the topics and ideas covered in each lesson.

Exam Prep – Presents a summary and review of the skills covered in the unit.

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess mastery of unit objectives. You may take the Unit Exam only once.

End-of-Course Writing Assessment – This exam is in the next-to-last lesson and tests how well you have learned the writing skills presented in the course. You may take the End-of-Course Writing Assessment only once.

Final Exam – This exam is in the last lesson and consists of 50 questions that test you on the concepts and information learned in the course. You may take the Final Exam only once.

- “Alley Cat” poem
- “When I Heard the Learn’d Astronomer” poem
- “The Fire Master”
- “The Barefoot Boy” poem
- “Ernie and Eleanor”

Seventh Grade Language Arts A

Course Syllabus

Course Description

In this course, you will read and analyze informational texts. These texts take many different forms, including biographies, personal accounts of events, presidential speeches, and persuasive letters. The course's reading selections demonstrate ways to understand explicit and implicit information, central ideas and key details, and claims and arguments, among other ideas and concepts. Over the course of ENG071, you will read the biography *The Story of My Life* by Helen Keller. You will also examine informational texts to better your understanding of the lives of several important historical figures, including Jane Goodall and Zora Neale Hurston; places as far away as Dubai, the Galapagos Islands, and the Hoover Dam; and the similarities between country music and hip-hop, among other topics.

As you read the selections in this course, you will practice ways to use supporting evidence, identify central ideas, make inferences, analyze word choice, and identify figurative and connotative language in informational texts. In addition, you will learn about basics in grammar, usage, and punctuation, including simple, compound, and complex sentences; different types of phrases and clauses; hyphens, colons, semicolons, and commas; and relative pronouns. You will also review context clues to determine word meaning, and you will learn various vocabulary words and more about Greek and Latin prefixes, suffixes, and roots.

In addition, you will learn the elements of informational and argument writing so that you can plan, create, write, revise, and edit your own informational and argument essays.

Through the lessons provided in this course, you will master techniques that help you achieve a deeper appreciation of informational texts.

Suggested Prerequisites: ENG061 A/B

Course Objectives:

- Identify and describe central ideas and key details in texts.
- Describe and make connections between key individuals, ideas, and events in texts.
- Identify and analyze implicit and explicit evidence in texts to make inferences.
- Determine how a text's perspective and structure contribute to its meaning and style.
- Identify and analyze claims and arguments within informational texts.
- Identify and interpret figurative, connotative, and technical meanings in texts.
- Identify and define common Greek and Latin roots and affixes to determine the meaning of words.
- Use context clues to determine the meaning of unfamiliar words.
- Use phrases and clauses within different sentence structures when writing.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Identify topics and issues in informational texts across a variety of different informational mediums.
- Use knowledge of writing ideas, concepts, and strategies to write informational and argument essays.

Seventh Grade Language Arts A Course Syllabus

Required Materials

- Word-processing software
- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that you can increase your comprehension. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you, but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Words – Includes parts of speech, definitions, synonyms, related words, and etymology; contains practice questions; is a part of the Language Skill.

Language Skill Instruction – Includes instruction in vocabulary and language skills; contains workbook questions; is a part of the Language Skill.

Reading Selections – Includes reading selections, videos, infographics, and audio files; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains workbook questions; is part of the Reading Skill.

Writing Skill Instruction and Activity – Includes instruction in writing skills; workbook questions; contains activities including writing projects, which are assessments graded by the instructor and which require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content; includes an informational essay, completed in Units 2 and 3; and an argument essay, completed in Units 4 and 5.

Checkpoint – Uses 10 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives you a chance to share your thoughts and ideas about the topics covered in each lesson.

Exam Prep – Presents a summary of the skills covered in the unit.

**Seventh Grade Language Arts A
Course Syllabus**

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess mastery of unit objectives. You may take the Unit Exam only once.

Final Writing Exam – This exam is in the next-to-last lesson and tests how well you have learned the writing skills presented in the course. You may take the Midterm Writing Exam only once.

Final Exam – This exam is in the last lesson and consists of 50 questions that test you on the concepts and information learned in the course. You may take the Midterm Exam only once.

Schedule of Work

**Seventh Grade Language Arts A
Course Syllabus**

Unit 1: Just the Facts

- A. Introduction: Lessons 1–5

- B. Language Skills: Lessons 1–5
 - Vocabulary Words: Lessons 1–4
 - Language Skills: Lessons 1, 3
 - Language Skills Workbooks: Lessons 1, 3
 - Language Skills Exam Prep: Lesson 5

- C. Reading Skills: Lessons 1–5
 - Reading Selections: Lessons 1–5
 - Reading Skills: Lessons 1–4
 - Reading Skills Workbooks: Lessons 1-4
 - Reading Skills Exam Prep: Lesson 5

- D. Research Skills for Writing: Lessons 5
 - Writing Skills Workbooks: Lessons 1-5

- E. Discussion Board: Lessons 1–5

- F. Checkpoint: Lessons 1–4

- G. Unit 1 Exam: Lesson 5

Unit 1 Reading Selections

- *The Story of My Life* – Chapters 1-5
- “Origami”
- “Bored? Get a Board on Wheels!”
- “Great Hunters of the Sea”
- “Pumpkin Lore”
- “The New Deal”
- “Man-Made Isles of Dubai”
- “The Venomous Ray”
- “Hoover Dam: A Really Big Deal!”
- “The Galapagos Islands”
- “Respectful Beachcombing”
- “Using Seashells”

Unit 2: Putting Things in Order

**Seventh Grade Language Arts A
Course Syllabus**

- A. Introduction: Lessons 6–10
- B. Language Skills: Lessons 6–10
 - Vocabulary Words: Lessons 6–9
 - Language Skills: Lessons 6, 8
 - Language Skills Workbooks: Lessons 6, 8
 - Language Skills Exam Prep: Lesson 10
- C. Reading Skills: Lessons 6–10
 - Reading Selections: Lessons 6–9
 - Reading Skills: Lessons 6–9
 - Reading Skills Workbooks: Lessons 6–9
 - Reading Skills Exam Prep: Lesson 10
- D. Writing Skills and Activities (Writing Project): Lessons 6–10
 - Writing Skills Workbooks: Lessons 6–10
- E. Discussion Board: Lessons 6–10

Course Syllabus**

Unit 6: The End

- A. Introduction: Lessons 26–30

- B. Skills Exam Prep: Lessons 26–28

- C. Reading Skills Exam Prep: Lessons 26–29
 - Reading Selections: Lessons 26–29
 - Reading Skills Exam Prep: Lessons 26–29

- D. Writing Skills Exam Prep: Lessons 27–28

- E. Final Writing Exam: Lesson 29

- F. Discussion Board: Lessons 26–30

- G. Final Exam: Lesson 30

Unit 6 Reading Selections

- *The Story of My Life* – Chapters 21-22
- “Paul Robeson”
- “One Small Step”
- “White House History”
- “*Titanic’s* First and Last Voyage”
- “Remarks by President Bill Clinton at the 25th Anniversary of Apollo”
- “Let Kids Play Safely / Protect Kids from Harm”
- “A Later Start for Health / Keep Start Times as They Are”
- “First Flight Journal of Jean-Luc Abellard”

Seventh-Grade Language Arts B Course Syllabus

Course Description

In this course, you will focus on learning reading skills based on literary texts. The texts come from various genres. They include a novel and excerpts from novels, short stories, poems, and plays. The course's reading selections demonstrate ways to understand explicit and implicit information, theme, characters, plot, poetic and dramatic techniques, and figurative language, among other ideas and concepts. You will read the entire novel *Alice's Adventures in Wonderland* in almost every lesson throughout the course. You will read excerpts from the novel *Black Beauty* and a passage from Grimm's "The Golden Bird" fairy tale. You will also read stories and plays about challenging situations, discovering alternate realities, and robot rebellions. You will witness powerful historical events and people, and you'll compare how written texts are portrayed in film or audio. Additionally, you will read poems from famous poets, such as Emily Dickinson, Robert Frost, and William Wordsworth, to name a few.

As you read the novels, short stories, poems, and plays in this course, you will identify central ideas and themes; make inferences; analyze word choice; identify figurative, connotative, and sensory language; and compare and contrast different text mediums—drama to audio, novel to video. In addition, you will learn about basics in grammar, usage, and punctuation, including correct spelling, misplaced and dangling modifiers, verb tenses and participles, and parallel structure and antecedents. You will also learn 20 new vocabulary words in each of the first five units of the course.

In addition, you will learn the elements of narrative writing so that you can plan, create, write, revise, and edit your own personal narrative. You will also learn about different forms of poetry and their characteristics. You will learn about different poetic techniques to apply these skills and write a poem of your own in the assigned poetic form and structure.

Through the lessons provided in this course, you will master techniques that will help you achieve a deeper appreciation of literary texts as well as of narrative and poetry writing.

Suggested Prerequisite: ENG071-7A

Course Objectives:

- Identify and describe the interactions of the main elements of particular story or drama.
- Identify and interpret figurative and connotative meanings in literary texts.
- Identify and describe themes and central ideas in literary texts.
- Determine and analyze how the form or structure in a drama or a poem contributes to its meaning.
- Identify how an author's sensory language creates imagery in literary text, with evidence from the text.
- Use common, grade-appropriate Greek or Latin affixes and roots as clues to the meaning of a word.
- Identify words that are spelled incorrectly in the context of text or writing.
- Use verbs (perfect and progressive tenses).
- Use a variety of complete sentences (e.g., simple, compound, complex) that include properly placed modifiers, correctly identified antecedents, parallel structures, and consistent tenses.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Use knowledge of writing ideas, concepts, and strategies to write a personal narrative and poetry.

Seventh-Grade Language Arts B Course Syllabus

Required Materials

- Word-processing software
- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that you can increase your comprehension. These ways include Vocabulary Words; Language, Reading, and Writing Skills; Writing Activities; Lesson Checkpoints; and Discussion Boards. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Words – Includes parts of speech, definitions, synonyms, related words, and etymology; contains workbook questions; is a part of the Language Skill.

Language Skill Instruction – Includes instruction in vocabulary and language skills; contains workbook questions; is a part of the Language Skill.

Reading Selections – Includes annotated reading selections, videos and audio files; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains workbook questions; is part of the Reading Skill.

Writing Skill Instruction and Activity – Includes instruction in writing skills; contains workbook questions; contains activities including writing projects, which are assessments graded by the instructor and which require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content; includes a personal narrative, completed in Units 2 and 3; and writing the sestina poem, completed in Units 4 and 5.

Checkpoint – Uses 15 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives chances to share personal thoughts and ideas about the topics and ideas covered in each lesson.

Exam Prep – Presents a summary and review of the skills covered in the unit.

**Seventh-Grade Language Arts B
Course Syllabus**

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess mastery of unit objectives. You may take the Unit Exam only once.

End-of-Course Writing Assessment – This exam is in the next-to-last lesson and tests how well you have learned the writing skills presented in the course. You may take the End-of-Course Writing Assessment only once.

Final Exam – This exam is in the last lesson and consists of 50 questions that test you on the concepts and information learned in the course. You may take the Final Exam only once.

- ☐ “The Brave William Tell” play
- ☐ “Life” poem
- ☐ “Looking for a Monk and Not Finding Him” poem
- ☐ “Sleeping Under the Stars” poem

Eighth Grade Language Arts A

Course Syllabus

Course Description

In this course, you will read and analyze literary and informational texts. These texts will come from a number of genres and from a number of sources, including short stories, novels, myths, poems, magazine articles, and autobiographies. Through the presentation of these types of reading selections, the course demonstrates ways to understand explicit and implicit information, theme, central idea, and figurative language. You will read the novel *The Call of the Wild* and short stories, such as “The Lottery,” “A Sound of Thunder,” and “The Tell-Tale Heart.” You will examine informational texts to better your understanding of the Yukon, the Klondike Gold Rush, dog sledding, and wolves. In addition, you will encounter numerous infographics and videos that build on the instruction.

As you read the selections in this course, you will practice ways to use supporting evidence, identify central ideas, make inferences, analyze word choice, and identify figurative and connotative language in both literary and informational texts. In addition, you will learn about basics in grammar, usage, and punctuation, including phrases and clauses, sentence structures, ellipses, dashes, and commas. You will also review context clues to determine word meaning and learn about Greek and Latin prefixes, suffixes, and roots.

Digital learning activities will offer you tips and techniques to be an online learner. In addition, you will learn the elements of a fictional narrative in order to plan, create, write, revise, and edit your own fictional narrative.

Through the lessons provided in this course, you will master techniques that help you achieve a deeper appreciation of literary and informational texts.

Suggested Prerequisites: ENG071A/B

Course Objectives:

- Identify and analyze implicit and explicit evidence in texts to make inferences.
- Describe and analyze narrative elements and structures in literary text.
- Describe and make connections between key individuals, ideas, and events in texts.
- Identify and describe themes and central ideas in texts.
- Compare and contrast characters, themes, and events in modern fiction to myths and traditional stories.
- Recognize irony, suspense, and humor, and determine perspective in texts.
- Determine how a text’s structure contributes to its meaning and style.
- Identify and interpret figurative, connotative, and technical meanings in texts.
- Identify and define common Greek and Latin roots and affixes to determine the meaning of words.
- Use context clues to determine the meaning of unfamiliar words.
- Show mastery of the conventions of standard English.
- Use phrases and clauses within different sentence structures when writing.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.

Required Materials

- Word processing software
- Internet browser
- Presentation software

Eighth Grade Language Arts A Course Syllabus

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that you can increase your comprehension. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you, but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Words and Roots – Includes parts of speech, definitions, synonyms, related words, and etymology; contains practice questions; is a part of the Language Skill.

Language Skill Instruction – Includes instruction in vocabulary and language skills; contains practice questions; is a part of the Language Skill.

Reading Selections – Includes annotated reading selections; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains practice questions; is part of the Reading Skill.

Digital Literacy – Includes instruction and writing activities on being safe online and being a respectful online citizen; contains practice questions; is only in Unit 1.

Writing Skill Instruction and Activity – Includes instruction in writing skills; contains practice questions; the writing project, which is an assessment graded by the instructor, require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content; includes a fictional narrative that is completed in Units 4 and 5.

Checkpoint – Uses 10 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives you a chance to share your thoughts and ideas about the topics covered in each lesson.

Skills Review – Presents a summary of the skills covered in the unit.

Eighth Grade Language Arts A Course Syllabus

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess mastery of unit objectives. You may take the Unit Exam only once.

End of Course Writing Assessment – This exam is in the next-to-last lesson and tests how well you have learned the writing skills presented in the course. You may take the End of Course Writing Assessment only once.

Final Exam – This exam is in the last lesson and consists of 50 questions that reflect key concepts and information from the course. You may take the Final Exam only once.

- “The Glass Dog”
- “Head’s Up”
- “The Southland” from *White Fang*
- *Narrative of Frederick Douglass* (excerpt)
- *Animal Farm* Chapter 2
- “It Couldn’t Be Done”

Eighth Grade Language Arts B

Course Syllabus

Course Description

In this course, you will build off what you learned in ENG081-8A. As with that course, you will read and analyze both literary and informational texts. These texts come from a number of genres and from a number of sources, including short stories, novels, poems, Internet articles, and political speeches. The course’s reading selections demonstrate ways to understand explicit and implicit information, theme, central idea, and figurative language, among other ideas and concepts. You will read parts of the novels *Fahrenheit 451*, *Hatchet*, and *Black Beauty*, as well as short stories such as “How the World Was Saved,” “Harrison Bergeron,” and “All Summer in a Day.” You will examine informational texts to better your understanding of global warming and its effect on Earth, the role the fast-food industry plays in our lives, the widespread presence of corn in the food we eat, and the ways sleep affects the ability of students to learn, among other topics. Numerous infographics and videos help build on the instruction.

As you read the selections in this course, you will practice ways to use supporting evidence, identify central ideas, make inferences, analyze word choice, and identify figurative and connotative language in both literary and informational texts. In addition, you will learn about basics in grammar, usage, and punctuation, including phrases, clauses, sentence structures, verbals, mood, and active and passive voice. You will also review context clues to determine word meaning, and you will learn various vocabulary words and more about Greek and Latin prefixes, suffixes, and roots.

In addition, you will learn the elements of informational and argument writing so that you can plan, create, write, revise, and edit your own informational and argument essays.

Through the lessons provided in this course, you will master techniques that help you achieve a deeper appreciation of literary and informational texts.

Suggested Prerequisite: ENG081-8A

Course Objectives:

- Identify and analyze implicit and explicit evidence in texts to make inferences.
- Describe and make connections between key individuals, ideas, and events in texts.
- Identify and describe themes and central ideas in texts.
- Describe the elements of plot, dialogue, and character within literary texts.
- Determine how a text’s perspective and structure contribute to its meaning and style.
- Identify and interpret figurative, connotative, and technical meanings in texts.
- Identify and define common Greek and Latin roots and affixes to determine the meaning of words.
- Use context clues to determine the meaning of unfamiliar words.
- Use phrases and clauses within different sentence structures when writing.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Identify the purposes, characteristics, advantages, and disadvantages of different informational mediums.
- Use knowledge of writing ideas, concepts, and strategies to write informational and argument essays.

- “Night Lights Have a Dark Side” Part 1
- “Harrison Bergeron” (excerpt)
- “Harrison Bergeron” Inverted Mongoose film adaptation
- “All Summer in a Day”
- “All Summer in a Day” Kody Cunningham film adaptation
- “The Lake Isle of Innisfree”
- “My Breaking In” from *Black Beauty*

**Eighth Grade Language Arts B
Course Syllabus**

Unit 3: That’s The Way

- A. Introduction: Lessons 11–15
- B. Language Skills: Lessons 11–15
 - Vocabulary Words: Lessons 11–15
 - Language Skills: Lessons 11, 13
 - Vocabulary and Language Skills Exam Prep: Lesson 15
- C. Reading Skills: Lessons 11–15
 - Reading Selections: Lessons 11–15
 - Reading Skills: Lessons 11–14
 - Reading Skills Exam Prep: Lesson 15
- D. Writing Skills and Activities (Writing Project): Lessons 11–15
- E. Discussion Board: Lessons 11–15
- F. Checkpoint: Lessons 11–14
- G. Unit 3 Exam: Lesson 15

Unit 3 Reading Selections

- “Cool Jobs: New Tools to Solve Crimes” Part 2
- *Chew On This* Part 2
- “Arctic Sends Weird Weather South”
- “Night Lights Have a Dark Side” Part 2
- *The Omnivore’s Dilemma* Part 1
- *Chew On This* Part 3
- “Eating Healthy Foods During Short Lunch Periods Is Hard for Students”
- “All About Charcoal”
- “Thomas Jefferson’s Monticello”

**Eighth Grade Language Arts B
Course Syllabus**

Unit 4: How Many More Times

- A. Introduction: Lessons 16–20
- B. Language Skills: Lessons 16–20
 - Vocabulary Words: Lessons 16–20
 - Language Skills: Lessons 16, 18
 - Vocabulary and Language Skills Exam Prep: Lesson 20
- C. Reading Skills: Lessons 16–20
 - Reading Selections: Lessons 16–20
 - Reading Skills: Lessons 16–19
 - Reading Skills Exam Prep: Lesson 20
- D. Writing Skills and Activities (Writing Project): Lessons 16–20
- E. Discussion Board: Lessons 16–20
- F. Checkpoint: Lessons 16–19
- G. Unit 4 Exam: Lesson 20

Unit 4 Reading Selections

- *The Omnivore’s Dilemma* Part 2
- “Could a Dragonfly’s Wings Be Alive—and Breathing?”
- “What Killed the Dinosaurs?”
- *Chew On This* Part 4
- “Remarks by the President on Comprehensive Immigration Reform” (excerpt)

- “The Fierce Flyer”
- “The Sniper”
- “Recycling: The Right Choice” audio
- *Chew On This* Part 5
- *Chew On This* Part 6
- “A Blanket around the Earth”

English I A Syllabus

Course Description

In this course, you will read and analyze both literary and informational texts. These texts take many different forms, including autobiographies, personal memoirs, newspaper and magazine articles, and poetry. The course's reading selections demonstrate ways to understand explicit and inferred meaning through textual evidence, central ideas and details that support them, and figurative language, and the effects word choice has on tone and mood, among other ideas and concepts. Throughout this course, you will read the novel *The Princess and the Goblin* by George MacDonald. You will also examine literary texts to better your understanding of different perspectives from outside the United States, including a story of Mexican citizens desperate to immigrate to the United States, and a story about a Chinese American girl's relationship with her demanding mother.

As you read the selections in this course, you will practice ways to recognize textual evidence, identify themes and central ideas, make inferences, analyze word choice, and identify figurative and connotative language in a variety of texts. In addition, you will learn about basics in grammar, usage, and punctuation, including context clues and word functions, domain-specific language and dialect, parts of speech and figures of speech, and reference materials. You will also learn various vocabulary words and more about Greek and Latin prefixes, suffixes, and roots.

In addition, you will learn the elements of writing so that you can plan, write, revise, and edit your own personal memoir and literary analysis.

Through the lessons provided in this course, you will master techniques that will help you achieve a deeper appreciation of literary and informational texts.

Course Objectives:

- Identify and describe themes, central ideas, and details.
- Describe different organizational structures in texts and how ideas and events are shaped by those structures.
- Identify and analyze textual evidence in texts to make inferences.
- Determine how an author's word choice contributes to a text's meaning, tone, and mood.
- Analyze characters within literary texts.
- Identify and interpret figurative, connotative, and denotative meanings in texts.
- Identify and define common roots and affixes to determine the meaning of words.
- Use context clues to determine the meaning of unfamiliar words.
- Recognize domain-specific language and dialect within texts.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Identify subjects, key scenes, and portrayals in literary and informational texts across a variety of different mediums.
- Use knowledge of writing ideas, concepts, and strategies to write a personal memoir and literary analysis.

English I A Syllabus

Required Materials

- word-processing software
- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that you can increase your comprehension. These ways include Unit Vocabulary; Language, Reading, and Writing Skills and Activities; Lesson Workbooks and Checkpoints; and Discussion Boards. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Unit Vocabulary – Includes parts of speech, definitions, synonyms, and etymology; contains practice questions

Language Skill Instruction – Includes instruction in language skills; contains practice questions

Reading Selections – Includes reading selections, audio, images, and videos; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains practice questions; is a part of the Reading Skill.

Writing Skill Instruction and Activity – Includes instruction in writing skills; contains practice questions; contains activities including writing projects, which are assessments graded by the instructor and which require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content; includes a personal memoir, completed in Units 2 and 3; and a literary analysis, completed in Units 4 and 5.

Checkpoint – Uses approximately 10 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives you a chance to share your thoughts and ideas about the topics covered.

Exam Prep – Presents a summary of the skills covered in the unit.

English I A Syllabus**Course Organization**

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exam – At the end of the unit is an exam that will assess your mastery of unit objectives. It consists of approximately 20 questions. You may take the Unit Exam only once.

Writing Exam – This exam is in Lesson 28 and tests how well you have learned the writing skills presented in the course. You may take the Writing Exam only once.

Final Exam – This exam is in the last lesson and consists of 35 questions that test you on the concepts and information learned in the course. You may take the Final Exam only once.

- “Blues Ain’t No Mockin’ Bird”
- “Trespass” chapter from *How the Garcia Girls Lost Their Accents*

English I B Syllabus

Course Description

In this course, you will read and analyze both literary and informational texts. These texts take many different forms, including biographies, short stories, newspaper and magazine articles, poetry, and influential historical documents. The course's reading selections demonstrate ways to understand explicit and inferred meaning through textual evidence; theme, central ideas, and details that support them; and structural elements and their influence on style, among other ideas and concepts.

Throughout this course, you will read the novel *Anthem* by Ayn Rand. You will also examine informational texts to better your understanding of historical moments throughout the history of the United States, including presidential speeches and a famous letter written by Martin Luther King Jr. during his imprisonment in a Birmingham jail at the height of the civil rights movement.

As you read the selections in this course, you will practice ways to recognize textual evidence, identify themes and central ideas, make inferences, and identify figurative and connotative language in a variety of texts. In addition, you will review information on context clues and word nuances, and you will learn about spelling conventions, style manuals, phrases, clauses, parallel structure, semicolons, and colons. You will also learn the definitions, parts of speech, and etymology of various vocabulary words you will see throughout the reading selections.

In addition, you will learn the elements of writing so that you can plan, write, revise, and edit your own informational essay and argument essay.

Through the lessons provided in this course, you will master techniques that will help you achieve a deeper appreciation of literary and informational texts.

Suggested Prerequisite: ENG I (1 of 2)

Course Objectives:

- Review themes, central ideas, characterization, organizational structure, and evidence and inferences
- Analyze structural elements on text and their influence on a text's style
- Look back through history to read text from different periods, and determine their influence on more modern texts
- Identify author perspective and purpose
- Recognize the rhetorical techniques authors use in their writing
- Discover the various elements of arguments and claims in persuasive writing, including their reliance on sound reasoning and relevant and sufficient textual evidence
- Understand the differences between figurative, connotative, and technical meaning and language
- Explore themes, concepts, and rhetorical techniques in seminal US documents
- Review details about context clues and word nuances

English I B Syllabus

Course Objectives:

- Identify various phrases and clauses, and understand how they relate to parallel structure
- Distinguish between semicolons and colons
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose and audience
- Use knowledge of writing ideas, concepts, and strategies to write an informational essay and an argument essay

Required Materials

- Word-processing software
- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that you can increase your comprehension. These ways include Unit Vocabulary; Language Skills, Reading Skills, Research Skills for Writing, Writing Skills and Activities, and Speaking & Listening Skills and Activities; Lesson Workbooks and Checkpoints; and Discussion Boards. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Unit Vocabulary – Includes parts of speech, definitions, synonyms, and etymology; contains practice questions.

Language Skill Instruction – Includes instruction in language skills; contains practice questions.

Reading Selections – Includes reading selections; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains practice questions.

Research Skill for Writing/Writing Skill Instruction and Activity – Includes instruction in research skills for writing and writing skills; contains practice questions; contains activities including writing projects, which are assessments graded by the instructor and which require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content; includes an informational essay, completed in Units 1, 2, and 3; and an argument essay, completed in Units 4 and 5.

English I B Syllabus

Course Organization

Speaking & Listening Instruction and Activity – Includes instruction in speaking and listening skills; contains activities similar to writing activities.

Checkpoint – Uses approximately 10 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives you a chance to share your thoughts and ideas about the topics covered.

Exam Prep – Presents a summary of the skills covered in the unit.

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess your mastery of unit objectives. It consists of approximately 20 questions. You may take the Unit Exam only once.

Writing Exam – This exam is in Lesson 28 and tests how well you have learned the writing skills presented in the course. You may take the Writing Exam only once.

Final Exam – This exam is in the last lesson and consists of 35 questions that test you on the concepts and information learned in the course. You may take the Final Exam only once.

English I B Syllabus

Schedule of Work

Unit 1: First Thoughts

- A. Introduction: Lessons 1–5
- B. Unit Vocabulary: Lesson 1
 - Vocabulary Workbook: Lesson 1
- C. Language Skills: Lessons 2, 4-5
 - Language Skills: Lessons 2, 4
 - Language Skills Workbooks: Lessons 2, 4
 - Language Skills Exam Prep: Lesson 5
- D. Reading Skills: Lessons 1–5
 - Reading Selections: Lessons 1–5
 - Reading Skills: Lessons 1–4
 - Reading Skills Workbooks: Lessons 1–4
 - Reading Skills Exam Prep: Lesson 5
- E. Research Skills for Writing and Activities: Lessons 1–2
 - Research Skills for Writing Workbooks: Lessons 1-2
- F. Writing Skills and Activities (Informational Writing Project): Lessons 3–5

 - Vocabulary Workbook: Lesson 21
- C. Language Skills: Lessons 22, 24-25
 - Language Skills: Lessons 22, 24
 - Language Skills Workbooks: Lessons 22, 24
 - Language Skills Exam Prep: Lesson 25
- D. Reading Skills: Lessons 21–25
 - Reading Selections: Lessons 21–25
 - Reading Skills: Lessons 21–24
 - Reading Skills Workbooks: Lessons 21–24
 - Reading Skills Exam Prep: Lesson 25
- E. Writing Skills and Activities (Argument Writing Project): Lessons 21–25
 - Writing Skills Workbooks: Lessons 21–24
- F. Discussion Board: Lessons 22, 24
- G. Checkpoint: Lessons 21–24
- H. Unit 5 Exam: Lesson 25

Unit 5 Reading Selections

- “Rivers and Stories”
- “Stress for Success”
- “President Kennedy’s Special Message to the Congress on Urgent National Needs” excerpt
- “Letter from a Birmingham Jail”
- “Statement on the Assassination of Martin Luther King Jr.”
- “A Letter from Eleanor Roosevelt”
- “The Gettysburg Address”
- “A Letter from Abigail Adams”
- “My Day”
- “Remarks at Gettysburg on Civil Rights”
- “Barack Obama’s First Inaugural Address”
- “Barack Obama’s Keynote Address: 2004 Democratic National Convention”
- “A Helpless Situation”

English I B Syllabus**Unit 6: Final Thought**

- A. Introduction: Lessons 26–30
- B. Language Skills Exam Prep: Lessons 26–28
- C. Reading Skills Exam Prep: Lessons 26–29
- D. Reading Selections: Lessons 26–29
Reading Skills Exam Prep: Lessons 26–29
- E. Writing Skills Exam Prep: Lessons 26–27
- F. Writing Exam: Lesson 28
- G. Discussion Board: Lessons 27, 29
- H. Final Exam: Lesson 30

Unit 6 Reading Selections

- “The Absolutely True Diary of a Part-Time Indian” Chapters 1-2
- “Cool Jobs: Decoding How Your Brain ‘Reads’”
- “Sleep Problems and Solutions”
- “Exploring the Mysteries of Cuba’s Coral Reefs”
- “Address on the 15-Year Anniversary of 9/11”
- “Letter from a Birmingham Jail” Part 1
- “Address of Carl Sandburg before Congress”
- “FDR’s 1944 State of the Union Address”

English II A Syllabus

Course Description

In this course, students read and analyze informational texts. These texts take many different forms, including personal memoirs, newspaper and magazine articles, presidential and other political speeches, and video presentations. Through the reading selections, the course demonstrates ways to understand explicit and inferred meaning through textual evidence; identify central ideas and details that support them; evaluate arguments and claims; recognize organizational structures; and assess figurative language, rhetorical devices, and the effects of word choice on tone, among other concepts and skills.

Students practice ways to recognize textual evidence, identify themes and central ideas, make inferences, analyze word choice, and identify figurative, connotative, technical, and rhetorical language. In addition, the course covers basics in grammar and spelling, use of reference materials, and correct handling of semicolons and colons. Vocabulary skills cover domain-specific words, context clues, and patterns of word change with prefixes and suffixes.

In addition, the course lays out the elements of writing so that students can plan, write, revise, and edit their informational and argument essays.

Through the lessons provided in this course, students can achieve a deeper appreciation of informational writing.

Course Objectives

- Determine central ideas and develop objective summaries in informational text.
- Identify and analyze organizational structures in informational text.
- Locate explicit and implicit meaning and evidence to make inferences in informational text.
- Recognize the use of figurative, connotative, and technical language, and its impact on tone in informational text.
- Describe author's purpose and perspective in informational text.
- Compare informational accounts in different mediums.
- Organize ideas and claims for arguments, using sound reasoning and relevant and sufficient evidence in argument text.
- Analyze US seminal documents and the rhetoric used in those documents.
- Compose informational and argument essays.
- Describe word roots, parts of speech, and patterns of word change.
- Use context clues and understand word functions.
- Interpret connotation and word nuances.
- Use reference sources and style manuals to locate meanings and other information.
- Use spelling conventions to identify spelling errors.
- Use semicolons and colons correctly when writing

Required Materials

- Word-processing software
- Internet browser

English II A Syllabus

Course Overview

The course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so students can increase their comprehension. These ways include Unit Vocabulary, Language and Reading Skills, Writing Projects, Workbook and Checkpoint assessments, and Discussion Boards. Some activities are graded by the learning management software; others are graded by the instructor. Additional activities are not graded.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Unit Vocabulary – Includes parts of speech, definitions, synonyms, and etymology; contains practice questions.

Language Skill Instruction – Includes instruction in vocabulary and language skills; contains practice questions; is a part of the Language Skill.

Reading Selection – Includes reading selections and videos; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains practice questions; is a part of the Reading Skill.

Research Skills for Writing – Includes instruction in research skills for writing informational and argument essays; contains practice questions.

Writing Project – Includes instruction in writing skills; contains practice questions; contains writing projects, which are assessments graded by the instructor and which require application of students' knowledge and writing capabilities to demonstrate mastery of the lesson content; includes an informational essay, completed in Units 2 and 3, and an argument essay, completed in Units 4 and 5.

Checkpoint – Uses 9–10 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives students a chance to share thoughts and ideas about the topics covered in each lesson.

Exam Prep – Presents a review of the skills covered in the unit; includes reviews of Language Skills and Reading Skills.

English II A Syllabus

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exam – In the last lesson of Units 1–5 is an exam that will assess mastery of unit objectives. It consists of 11–16 questions, in which some questions contain two parts. Students may take the Unit Exam only once.

Writing Exam – This exam is in Lesson 27 and assesses how well students have learned the writing skills presented in the first half of the course. Students may take the Writing Exam only once.

Final Exam – This exam is in Lesson 30 and consists of 31 questions that test students on the concepts and information learned in the course. Students may take the Final Exam only once.

English II A Syllabus**Schedule of Work****Unit 1: Starting Down the Informational Road**

- A. Introduction: Lessons 1–5
- B. Unit Vocabulary: Lesson 1
 - Unit Vocabulary Workbook: Lesson 1
- C. Language Skills: Lessons 2–5
 - Language Skills Workbooks: Lessons 2–4
 - Language Skills Exam Prep: Lesson 5

- E. Writing Project 3: Lessons 21–25
 - Writing Project 3 Workbooks: Lessons 21–24
- F. Discussion Board: Lessons 21 & 23
- G. Checkpoint: Lessons 21–24
- H. Unit 5 Exam: Lesson 25

Unit 5 Reading Selections

- Excerpt from “Tolerance”
- “Should We Terraform Mars?”
- “Mars Terraforming Not Possible Using Present-Day Technology”
- “Abolishing the Penny Makes Good Sense”
- “The Penny May Be Worthless, But Let’s Keep It Anyway”
- “The Great Society”
- Excerpt from “On the Arsenal of Democracy”
- Excerpt from “Address at Moscow University”
- “President Nixon’s Resignation Speech”
- “Enemies from Within”
- Elie Wiesel’s “Nobel Prize Acceptance Speech”

English II A Syllabus**Unit 6: Let's Review!**

- A. Introduction: Lessons 26–30
- B. Language Skills Final Exam Prep: Lessons 27 & 28
- C. Studying Tips infographic: Lesson 27
- D. Testing Tips infographic: Lesson 29
- E. Reading Skills Final Exam Prep: Lessons 26–29
 - Reading Selections: Lessons 26–29
- F. Writing Skill: Lesson 26
- G. Writing Exam: Lesson 27
- H. Discussion Board: Lessons 26–30
- I. Final Exam: Lesson 30

Unit 6 Reading Selections

- “Staying in Galveston, a Park Bench for Shelter”
- “1906 Marked the Dawn of the Scientific Revolution”
- “The Story of an Eyewitness”
- “How to Write a Letter”
- “Why is it Fun to be Frightened?”
- “What’s Lost as Handwriting Fades”
- Barack Obama’s “Nobel Peace Prize Acceptance Speech, Part 2”

English II B Syllabus

Course Description

In this course, students read and analyze literary texts from around the world and across history. Selections come from Africa, Ancient Greece, Central and East Asia, Europe, and the Americas. These reading selections demonstrate ways to understand explicit and inferred meaning through textual evidence; identify themes and details that support themes; and recognize structural elements and their influence on style, among other ideas and concepts.

As students read the selections, they practice ways to recognize textual evidence, identify themes, make inferences, analyze all aspects of characterization, and identify figurative language, figures of speech, and literary devices. Language lessons review context clues and word nuances. Students also learn about more patterns that occur with affixes, evaluate correct use of phrases and clauses, and identify parallel construction with gerunds and infinitives.

As part of the course, students read the Greek tragedy *Antigone* by Sophocles and write a character analysis based on one of the main characters. Students learn the elements of writing so that they can plan, write, revise, and edit the character analysis essay and a personal narrative.

Through the lessons provided in this course, students master techniques that will help them achieve a deeper appreciation of literature and literary writing.

Course Objectives

- Identify, interpret, and analyze themes in literary texts.
- Recognize and analyze direct and indirect characterization and character development in literary texts.
- Analyze elements of drama, pacing, flashback, and foreshadowing in literary text.
- Write objective summaries of literary text.
- Analyze the purpose and use of illustrations in literary text.
- Determine explicit and implicit key ideas in literary text.
- Recognize and analyze allegory, symbolism, allusions, and figurative language in literary text.
- Interpret word choice and tone in literary text.
- Analyze internal and external conflict in literary text.
- Examine cultural aspects and experiences in literary text.
- Analyze parody, humor, sarcasm, and irony in literary text.
- Identify and analyze point of view and perspective in literary text.
- Compose a personal narrative essay and a character analysis essay.
- Determine meaning from function and context clues.
- Interpret nuances and shades of meaning.
- Recognize patterns of word change with affixes.
- Recognize and interpret the use of figures of speech and literary devices.
- Use colons and semicolons correctly when writing sentences.
- Recognize the use of gerunds, infinitives, and clauses with parallel structure.

Required Materials

- Word-processing software
- Internet browser

English II B Syllabus

Course Overview

The course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that students can increase their comprehension. These ways include Unit Vocabulary, Language and Reading Skills, Writing Projects, Lesson Workbooks and Checkpoints, and Discussion Boards. Some activities are graded by the learning management software; others are graded by the instructor. Additional activities are not graded.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Unit Vocabulary – Includes parts of speech, definitions, synonyms, and etymology; contains practice questions.

Language Skill Instruction – Includes instruction in vocabulary and language skills; contains practice questions; is a part of the Language Skill.

Reading Selection – Includes reading selections; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains practice questions; is a part of the Reading Skill.

Research Skills for Writing – Includes instruction in research skills for writing informational and argument essays; contains practice questions.

Writing Project – Includes instruction in writing skills; contains writing projects, which are assessments graded by the instructor and which require application of knowledge and writing capabilities to demonstrate mastery of the lesson content; includes a character analysis essay, completed in Unit 2, and a personal narrative essay, completed in Unit 4.

Checkpoint – Uses 9–10 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives students a chance to share thoughts and ideas about the topics covered in each lesson.

Exam Prep – Presents a review of the skills covered in the unit; includes reviews of Language Skills and Reading Skills.

English II B Syllabus

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exam – In the last lesson of Units 1–5 is an exam that will assess mastery of unit objectives. It consists of 17–18 questions, in which some questions contain two parts. Students may take the Unit Exam only once.

Final Exam – This exam is in Lesson 30 and consists of 33 questions (some with two parts) that cover the concepts and information learned in the course. Students may take the Final Exam only once.

- G. Final Exam: Lesson 30

Unit 6 Reading Selections

- Excerpt from *The Odyssey*
- “Siren Song”
- “The Sirens”
- “The Attendant’s Confession”
- “After Twenty Years”
- “Mr. and Mrs. Dove”
- “A Wife for My Son”
- Excerpts from *The Story of an African Farm*

English III A Honors**Course Syllabus****Course Description**

In this course, you will read and analyze informational and argumentative texts across a number of genres and from a number of sources, including government publications and websites, magazine articles, legal proceedings, and video presentations. Through the presentation of topics as varied as zombie insects, Mars exploration, and the need for sleep, the course demonstrates ways to understand central ideas, organizational structures, and techniques of composition. You will examine argumentative writing in seminal US documents, such as the work of John Adams and speeches by 20th-century US presidents. You will also learn how to interpret consumer documents such as government publications and financial information.

These examples will help you to evaluate use of language, determine meanings, make inferences, grasp central ideas, evaluate bias, and draw conclusions. The course also will instruct you in speaking and writing formally, and in using rhetorical devices to persuade audiences.

As you read the selections in this course, you will practice ways to analyze evidence, recognize symbolism, examine word choice, and identify figurative language in informational writing. You will also review basics in spelling, grammar and usage, and punctuation. Writing activities will give you tips and techniques as you research and organize expository and argumentative compositions.

Through the lessons provided in this course, you will master techniques that help you achieve a deeper appreciation of informational and argumentative texts.

Suggested Prerequisites: ENG10A/B

Course Objectives:

- Explain how an author develops and presents key points, premises, main claims, reasons, and evidence.
- Explain and analyze rhetorical appeals and logical fallacies for effect, power, and interest.
- Analyze an argument by evaluating the claims and counterclaims.
- Analyze evidence for validity, relevance, and sufficiency.
- Explain and analyze the development of central ideas, details, organization, and purposes.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Respond to writing prompts by drawing evidence from literary texts to support analysis.
- Show mastery of the conventions of standard English.
- Use context and knowledge of nuance and figurative language to enhance writing.

Required Materials

- Word processing software
- Internet browser
- Presentation software

English III A Honors Course Syllabus

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways to allow for increased comprehension. Some activities are graded by the learning management software; others are graded by the instructor. Additional activities are available for the student, but not graded. Students should receive recommendations to contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with a brief description of the intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Skill Instruction– Includes instruction in vocabulary skills, followed by graded workbook questions.

Focus Skill Instruction – Includes instruction in reading comprehension skills and application, followed by graded workbook questions.

Reading Selection, Graphic Organizer, Extended Response Discussion Question(s) – Includes an annotated reading selection, a graphic organizer with an exemplary response for modeling, and an extended response discussion question at the analyze/evaluate/synthesize level.

Writing Project – An assessment graded by the instructor that requires application of knowledge and writing capabilities to demonstrate mastery of the lesson content. Writing projects for LA301 11A are in Unit 2 (research paper) and Unit 5 (argument essay).

Language and Writing Skill Instruction – Includes instruction in language and writing skills, followed by graded workbook questions.

Checkpoint – This graded activity uses 10 questions to assess mastery of lesson objectives. Students may take the Checkpoint up to three times.

Reflection– This is an activity designed for students to reflect on key ideas and their own learning.

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess mastery of unit objectives. Students may take the Unit Exam only once.

Final Exam –This exam is in the last lesson and consists of 50 questions that reflect key concepts and information from course. Students may take the Final Exam only once.

- “Take the Tortillas Out of Your Poetry” by Rudolfo A. Anaya
- *Teach Every Child About Food* by Jamie Oliver
- “Balancing Calories to Manage Weight” from the US Department of Agriculture
- *Soon We’ll Cure Diseases with a Cell, Not a Pill* by Siddhartha Mukherjee

English 3A Syllabus

Course Description

In this course, you will read and analyze informational texts. These texts take many different forms, including autobiographies, personal memoirs, and newspaper and magazine articles. This half of the course's reading selections demonstrate ways to understand explicit and implicit ideas through textual evidence, central ideas and details that support them, and the effects that figurative language and organizational structure have on meaning, among other ideas and concepts.

As you read the selections in this course, you will practice ways to recognize textual evidence, identify central ideas, make inferences, analyze word choice, and identify figurative and connotative language. In addition, you will learn about basics in grammar, usage, and punctuation, including context clues and word functions, technical language, and reference materials. You will also learn various vocabulary words found in the course's reading selections.

In addition, you will learn the elements of writing so that you can plan, write, revise, and edit your own research paper and argument essay.

Through the lessons provided in this half of the course, you will master techniques that will help you achieve a deeper appreciation of informational texts.

Course Objectives

- Analyze explicit and implicit ideas, using evidence within texts as support.
- Determine central ideas and purposes, as well as information to include in objective summaries.
- Identify and analyze text structure and organization.
- Recognize figurative language and examine the impact of word choice on texts.
- Assess the usefulness and purpose of structure and graphics in functional texts.
- Decipher an author's purpose and perspective.
- Explore rhetorical appeals, rhetorical devices, and faulty reasoning.
- Analyze the effect of various sentence structures.
- Use word position, function, and context clues to determine meaning.
- Recognize contested grammar rules.
- Use reference sources.
- Recognize academic, technical, and domain-specific vocabulary.
- Compose a research-based informational essay and an argument essay.

Required Materials

- Word-processing software
- Internet browser

English 3A Syllabus

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that you can increase your comprehension. These ways include Unit Vocabulary; Language, Reading, and Writing Skills; Lesson Workbooks and Checkpoints; and Discussion Boards. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Unit Vocabulary – Includes parts of speech, definitions, and etymology.

Language Skill Instruction – Includes instruction in language skills; contains practice questions.

Reading Selections – Includes reading selections and videos; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains practice questions.

Writing Skill Instruction and Activity – Includes instruction in writing skills; contains activities including writing projects, which are assessments graded by the instructor and which require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content; includes a research-based informational essay, completed in Units 1, 2, and 3; and an argument essay, completed in Units 3, 4 and 5.

Checkpoint – Uses several questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives you a chance to share your thoughts and ideas about the topics covered in each lesson.

Exam Prep – Presents a summary of the skills covered in the unit.

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess your mastery of unit objectives. It consists of a maximum of 20 questions. You may take the Unit Exam only once.

Final Exam – This exam is in Lesson 30 and consists of questions that test you on the concepts and information you learned in this course. You may take the Final Exam only once.

English 3A Syllabus

Schedule of Work**Unit 1: A Certain Shade of Green**

- A. Introduction: Lessons 1–5
- B. Vocabulary/Language Skills: Lessons 1–2, 5
 - Unit Vocabulary: Lesson 1
 - Language Skill: Lesson 2
 - Unit Vocabulary/Language Skill Workbooks: Lessons 1–2
 - Language Skill Exam Prep: Lesson 5
- C. Reading Skills: Lessons 1–5
 - Reading Selections: Lessons 1–5
 - Reading Skills: Lessons 1–4
 - Reading Skills Workbooks: Lessons 1–4
 - Reading Skills Exam Prep: Lesson 5
- D. Writing Skills: Lessons 4-5
- E. Discussion Board: Lessons 2, 4
- F. Checkpoints: Lessons 1–4
- G. Unit 1 Exam: Lesson 5

Unit 3: Back to Life, Back to Reality

- A. Introduction: Lessons 11–15
- B. Vocabulary/Language Skills: Lessons 11–12, 15
 - Unit Vocabulary: Lesson 11
 - Language Skill: Lesson 12
 - Unit Vocabulary/Language Skill Workbooks: Lessons 11–12
 - Language Skill Exam Prep: Lesson 15
- C. Reading Skills: Lessons 11–15
 - Reading Selections: Lessons 11–15
 - Reading Skills: Lessons 11–14
 - Reading Skills Workbooks: Lessons 11–14
 - Reading Skills Exam Prep: Lesson 15
- D. Writing Skills: Lessons 11–15
 - Writing Activity: Lesson 13
- E. Discussion Board: Lessons 12, 14
- F. Checkpoint: Lessons 11–14
- G. Unit 3 Exam: Lesson 15

Unit 3 Reading Selections

- *“How to Manage Stormwater: Rain Barrels”*
- *“Water Conservation and Efficiency”*
- *“How to Select a Checking Account”*
- *“5 Tips: Protecting Your Checking Account”*
- *“How to Make the Most of Your Debit Card”*
- *“Making a Budget”*
- *“Teens Feeling Stressed and Many Not Managing It Well”*
- *“The Science of Conquering Your Fears—And Living a More Courageous Life”*
- *Teach Every Child About Food* video
- *“Balancing Calories to Manage Weight”*
- *“All About Sleep”*
- *“Sleep Problems and Solutions”*

English 3A Syllabus

Unit 4: Fight for Your Right

- A. Introduction: Lessons 16–20
- B. Vocabulary/Language Skills: Lessons 16–17, 20
 - Unit Vocabulary: Lesson 16
 - Language Skill: Lesson 17
 - Unit Vocabulary/Language Skill Workbooks: Lessons 16–17
 - Language Skill Exam Prep: Lesson 20
- C. Reading Skills: Lessons 16–20
 - Reading Selections: Lessons 16–20
 - Reading Skills: Lessons 16–19
 - Reading Skills Workbooks: Lessons 16–19
 - Reading Skills Exam Prep: Lesson 20
- D. Writing Skills: Lessons 16–20
- E. Discussion Board: Lessons 17, 19
- F. Checkpoint: Lessons 16–19
- G. Unit 4 Exam: Lesson 20

Unit 4 Reading Selections

- **Hazelwood School District v. Kuhlmeier**
- “For the Equal Rights Amendment”
- “What Will It Take to Make Gender Equality the Norm, Not the Exception?”
- “A Defense of the Constitution”
- “Let’s Give Up on the Constitution”
- “Declaration of Conscience”
- John F. Kennedy’s “Inaugural Address”
- John F. Kennedy’s “Speech at American University”

English 3A Syllabus

Unit 5: Everybody Talks

- A. Introduction: Lessons 21–25
- B. Vocabulary/Language Skills: Lessons 21–22, 25
 - Unit Vocabulary: Lesson 21
 - Language Skill: Lesson 22
 - Unit Vocabulary/Language Skill Workbooks: Lessons 21–22
 - Language Skill Exam Prep: Lesson 25
- C. Reading Skills: Lessons 21–25
 - Reading Selections: Lessons 21–25
 - Reading Skills Lessons 21–24
 - Reading Skills Workbooks: Lessons 21–24
 - Reading Skills Exam Prep: Lesson 25
- D. Writing Skills: Lessons 21–23
 - Writing Activity: Lesson 23
- E. Discussion Board: Lessons 22, 24
- F. Checkpoint: Lessons 21–24
- G. Unit 5 Exam: Lesson 25

Unit 5 Reading Selections

- *“We Shall Overcome”*
- Barack Obama’s “Second Inaugural Address”
- *What to the Slave Is the Fourth of July?* Parts 1 and 2
- *Energy and the National Goals—A Crisis of Confidence*

English 3A Syllabus

Unit 6: The World We Live In

- A. Introduction: Lessons 26–30
- B. Language Skills Exam Prep: Lessons 26–29
- C. Reading Skills: Lessons 26–29
 - Reading Selections: Lessons 26–29
 - Reading Skills Exam Prep: Lessons 26–29
- D. Final Exam: Lesson 30

Unit 6 Reading Selections

- *“Conservation as a National Duty”*
- *“NASA’s Curiosity Rover Finds Clues to How Water Helped Shape Martian Landscape”*
- *“Sleep Problems and Solutions”*
- John F. Kennedy’s *“Inaugural Address”*
- *“Energy and the National Goals—A Crisis of Confidence”*

English 3B Honors Syllabus

Suggested prerequisites: ENG 11A, ENG10A/B

Course Description

This is a survey course in American Literature. It involves the study of styles, techniques, philosophies, biographies, and ideas of major American writers as well as the historical events that influenced their works. The course emphasizes critical and analytical thinking as well as reading and writing skills. Students will and interpret read various works of literature, including novels, short stories, and poems.

Course Objectives

- Examine the literary writings, discourse, and events that took place from the inception of the United States of America to the present day.
- Involve students in examining their own idea of culture and nationalism and what it means to be a part of a country that has such a centralized impact on the world at large.
- Answer the question “How does knowing your country’s history and literary culture help you become a more effective citizen?”

Required Materials

- Word-processing software
- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others will be graded by the instructor, and additional activities will be available for the student but are not graded. Students are encouraged to contact the course instructor for further information about course guidelines and grading policies.

English 3B Honors Syllabus

Course Organization

At the beginning of each unit is a brief description of the intended learning outcomes. The following activities come after the introduction:

- *Vocabulary Words* – This activity introduces academic vocabulary to prepare students for learning new concepts in their courses. At the end of the course is a vocabulary exam.
- *Lesson Content* – Lessons contain a variety of activities, including reading selections, videos, audio files, and practice activities. Most lesson content includes graded workbook questions.
- *Checkpoint* – This graded activity uses 10 questions to assess mastery of lesson objectives. The checkpoint may be taken up to three times.
- *Project* – This assessment is graded by the instructor. Projects require students to apply their knowledge and writing capabilities to demonstrate they have mastered the lesson and unit content.
- *Discussion Board* – This activity is graded by the instructor. The Discussion Board allows students to interact and communicate with classmates and the instructor about lesson content.
- *Unit Exam* – At the end of the unit is an exam that uses 30 questions to assess mastery of the unit objectives. It may be taken only once.

English 3B Honors Syllabus

Schedule of Work**Unit 1: Early America - 1500 to 1800**

- A. Read/View – content and selected literature from Native American myths, and colonial and independence eras
- B. Writing Portfolio
- C. Workbook Assessments

- C. Discussions
- D. Project 6 – “Writing Portfolio”
- E. Checkpoints 26-28
- F. Review
- G. Vocabulary Final Exam
- H. Course Final Exam

English 3B Syllabus

Course Description

In this course, you will read and analyze literary texts from American history. You will read different types of texts, from short stories to poetry to plays, including all of Arthur Miller's *The Crucible*. These reading selections demonstrate ways to understand explicit and implicit ideas through textual evidence; themes, central ideas, and the details that support them; and structural elements and their influence on style, among other ideas and concepts.

As you read the selections in this half of the course, you will practice ways to recognize textual evidence, identify themes and central ideas, make inferences, and identify figurative and connotative language in a variety of texts. In addition, you will learn about recognizing patterns of word change, using parallel structure, using active and passive voice for effect, using punctuation to create pauses and breaks, and explaining nuance and shades of meaning. You will also learn the definitions, parts of speech, and etymology of various vocabulary words.

In addition, you will learn the elements of writing so that you can plan, write, revise, and edit your own fictional narrative and literary analysis essays.

Through the lessons provided in this course, you will master techniques that will help you achieve a deeper appreciation of literary texts.

Suggested Prerequisite: ENG III (1 of 2)

Course Objectives

- Recognize and analyze central ideas and themes in literary texts.
- Comprehend characters and the author's use of direct and indirect characterization.
- Analyze dramatic and narrative elements, including their interaction with each other.
- Recognize explicit and implicit meaning in literary texts.
- Analyze the impact of diction and syntax.
- Recognize and analyze point of view and the influence of social, historical, and economic context.
- Recognize and analyze structural elements and their impact on literary text.
- Compose a fictional narrative and a literary analysis essay.
- Look for and identify patterns of word change.
- Recognize and use active and passive voice for effect.
- Recognize and use parallel structure in writing.
- Interpret denotation, connotation, and nuance.
- Use punctuation to create pauses and breaks.

Required Materials

- Word-processing software
- Internet browser

- “A Dream”

English IV B Honors

Course Description

In this course, you will read and analyze informational and argumentative texts across a number of genres and from a number of sources, including magazine articles, legal proceedings, and video presentations. Through the presentation of topics as varied as plastics in the ocean, depression, and computer hacking, the course demonstrates ways to understand central ideas, organizational structures, and techniques of composition. You will examine argumentative writing in seminal US documents, such as the Bill of Rights and speeches by 20th-century US presidents. In addition, you will encounter numerous infographics and videos that enhance the instruction.

As you read the selections in this course, you will practice ways to analyze evidence, grasp central ideas, examine word choice, and identify figurative language in informational writing. You will also make inferences, evaluate bias, draw conclusions, and increase your vocabulary. In addition, you will review basics in, grammar, usage, and punctuation.

The course also will instruct you in writing formally, and in using rhetorical devices to persuade audiences. Writing activities offer you tips and techniques as you research and organize expository and argumentative compositions.

Those participating in Honors Enrichment will delve deeper into informational and argumentative texts. You will use critical thinking as you analyze and write about the course's reading selections.

Through the lessons provided in this course, you will master techniques that help you achieve a deeper appreciation of informational and argumentative texts.

Suggested Prerequisites: ENG11A/B

Course Objectives:

- Explain how an author develops and presents key points, premises, main claims, reasons, and evidence.
- Explain and analyze rhetorical appeals and logical fallacies for effect, power, and interest.
- Analyze an argument by evaluating the claims and counterclaims.
- Analyze evidence for validity, relevance, and sufficiency.
- Explain and analyze the development of central ideas, details, organization, and purposes.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Respond to writing prompts by drawing evidence from literary texts to support analysis.
- Show mastery of the conventions of standard English.
- Use context and knowledge of nuance and figurative language to enhance writing.

English IV B Honors

Required Materials

- Word processing software
- Internet browser
- Presentation software

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways to allow for increased comprehension. Some activities are graded by the learning management software; others are graded by the instructor. Additional activities are available for the student, but not graded. Students should receive recommendations to contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with a brief description of the intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Words – Includes parts of speech, definitions, synonyms, related words, and etymology. Is followed by graded workbook questions.

Language Skill Instruction – Includes instruction in language skills. Is followed by graded workbook questions.

Reading Selections – Includes annotated reading selections.

Reading Skill Instruction – Includes instruction in reading skills. Is followed by graded workbook questions.

Writing Skill Instruction and Activity / Writing Projects – Includes instruction in writing skills. The writing projects, which are assessments graded by the instructor, require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content. Writing projects for LA401 ENG12A are in Units 2 and 3 (informative essay) and Units 4 and 5 (argument essay).

Honors Enrichment (if applicable) – Includes additional critical thinking and writing activities to perform more in-depth analysis.

Checkpoint – This graded activity uses 10 questions to assess mastery of lesson objectives. You may take the Checkpoint up to three times.

Discussion Board – An academic discussion board that gives you a chance to share your thoughts and ideas about the topics covered in each lesson.

Review – Presents a summary of the skills covered in the unit.

English IV B Honors

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess mastery of unit objectives. You may take the Unit Exam only once.

End of Course Writing Assessment – This exam is in the next-to-last lesson and tests how well you have learned the writing skills presented in the course. You may take the End of Course Writing Assessment only once.

Final Exam – This exam is in the last lesson and consists of 50 questions that reflect key concepts and information from the course. You may take the Final Exam only once.

- “How to Make Sure the Next Generation Is Better Off Than We Are”
- “School Cell Phone Policy”
- Supreme Court Case: “Tinker v. Des Moines”
- Excerpts from US District Court Case: “Klump v. Nazareth Area School District”
- “Literary Heroes”
- “Winston Churchill: The American Connection”

English 4A Syllabus

Course Description

In this course, students will read and analyze informational and argumentative texts across a number of genres and from a number of sources, including magazine articles, legal proceedings, and video presentations. Through the presentation of topics as varied as plastics in the ocean, depression, and computer hacking, the course demonstrates ways to understand central ideas, organizational structures, and techniques of composition. Students will examine argumentative writing in seminal US documents, such as the Bill of Rights and speeches by 20th-century US presidents. In addition, students will encounter numerous infographics and videos that enhance the instruction.

As students read the selections in this course, they will practice ways to analyze evidence, grasp central ideas, examine word choice, and identify figurative language in informational writing. They will also make inferences, evaluate bias, draw conclusions, and increase their vocabulary. In addition, they will review basics in grammar, usage, and punctuation.

The course also provides instruction in writing formally and in using rhetorical devices to persuade audiences. Writing activities offer tips and techniques as students research and organize informational and argument essays.

Through the lessons provided in this course, students will master techniques that help them achieve a deeper appreciation of informational and argumentative texts.

Suggested Prerequisites: ENG III (1 of 2) and ENG III (2 of 2)

Course Objectives:

- Explain how an author develops and presents key points, premises, main claims, reasons, and evidence.
- Explain and analyze rhetorical appeals for effect, power, and interest.
- Analyze an argument by evaluating the claims and counterclaims.
- Analyze evidence for validity, relevance, and sufficiency.
- Explain and analyze the development of central ideas, details, organization, and purposes.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Respond to writing prompts by drawing evidence from informational texts to support analysis.
- Show mastery of the conventions of standard English.
- Use context and knowledge of nuance and figurative language to enhance writing.

Required Materials

- Word processing software
- Internet browser
- Presentation software

English 4A Syllabus

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways to allow for increased comprehension. Some activities are graded by the learning management software; others are graded by the instructor. Additional activities are available for students but are not graded. Students should receive recommendations to contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with a brief description of the intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Unit Vocabulary – Includes parts of speech, definitions, synonyms, related words, and etymology. Is followed by graded workbook questions.

Language Skill Instruction – Includes instruction in language skills. Is followed by graded workbook questions.

Reading Selections – Includes annotated reading selections.

Reading Skill Instruction – Includes instruction in reading skills. Is followed by graded workbook questions.

Writing Skill Instruction and Activity / Writing Projects – Includes instruction in writing skills. The Writing Projects, which are assessments graded by the instructor, require students to apply their knowledge and writing capabilities to demonstrate mastery of the lesson content. Writing Projects for English IV (1 of 2) are in Units 2 and 3 (informational essay) and Units 4 and 5 (argument essay).

Checkpoint – This graded activity uses about 8-10 questions to assess mastery of lesson objectives. Students may take the Checkpoint up to three times.

Discussion Board – An academic discussion board that gives students a chance to share their thoughts and ideas about the topics covered in the course.

Exam Prep – Presents a summary of the skills covered in the unit.

English 4A Syllabus

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess mastery of unit objectives. The Unit Exam contains approximately 20 questions. Students may take the Unit Exam only once.

Writing Exam – This exam is in the next-to-last lesson and tests how well students have learned the writing skills presented in the course. Students may take the Writing Exam only once.

Final Exam – This exam is in the last lesson and consists of 33 questions that reflect key concepts and information from the course. Students may take the Final Exam only once.

- Excerpt from “The Federalist No. 51”
- “How to Make Sure the Next Generation Is Better Off Than We Are”
- “US Supreme Court Case: *Tinker v. Des Moines*”

English IV B Honors

Course Syllabus

Course Description

In this course, you will read and analyze a wide variety of narrative texts from British literature across different eras, from the Middle Ages through modern times. Reading selections include significant works from British writers who have made a lasting impact on the literary world—including Chaucer, Spenser, Donne, Shakespeare, Milton, Swift, Byron, Wilde, Tolkien, and Huxley. In addition, throughout the entire course, you will be reading the novel *Frankenstein* by Mary Shelley.

As you read selections from various genres, including poetry, prose, drama, satire, and science fiction, you will learn how to define, identify, and analyze narrative elements and structures. Among these elements are plot, setting, tone, character, theme, and perspective. You will also study literary devices such as imagery, symbolism, irony, understatement, and sarcasm. In addition, you will examine the impact of word choice and humor within a text as well as techniques that writers use when creating stories. You will also make inferences about literary works; increase your vocabulary; and sharpen your language skills by learning about context clues, connotation, nuance, and affixes as methods for determining word meanings.

In this course, you will complete two writing projects: a fictional narrative in the style of Gothic Romanticism and a literary analysis. Writing activities offer you tips and techniques as you research and organize narrative compositions.

If you are participating in the Honors Enrichment portion of the course, you will delve deeper into many topics, including analyzing symbolic representations; making inferences; identifying and analyzing themes; comparing characters, setting, and tone in multiple versions of a text; and analyzing storytelling and its impact on structure and meaning. You will synthesize knowledge and use critical thinking as you analyze and write about the course's reading selections.

The lessons in this course will help you master techniques so that you can enhance your appreciation for British literature.

Suggested Prerequisites: ENG12A

Course Objectives:

- Identify and analyze key narrative elements and structures.
- Identify and evaluate figurative language.
- Examine the impact of word choice and humor within a text.
- Recognize irony and sarcasm, and determine perspective within a text.
- Integrate ideas to compare and contrast the treatment of narrative elements in multiple interpretations of a literary work.
- Determine word meanings using context clues, connotation, nuance, and affixes.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Respond to writing prompts by drawing evidence from literary texts to support analysis.
- Use context and knowledge of nuance and figurative language to enhance writing.
- Show mastery of the conventions of standard English.

English IV B Honors Course Syllabus

Required Materials

- Word-processing software
- Internet browser
- Presentation software

Course Overview

This course contains six units, each with five lessons. Lessons present the material in many different ways so that you can increase your comprehension. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with a brief description of the intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Skill – Includes strategies for determining the function, use, and meaning of key vocabulary words and phrases you will encounter in the lessons and in the real world. Followed by graded workbook questions.

Lexicology – Includes a preview of words used in a lesson's reading and other grade-level vocabulary words, with their parts of speech, definitions, synonyms, related words, and etymology. Followed by graded workbook questions.

Reading Selections – Includes annotated readings.

Reading Skill – Includes instruction in reading skills. Followed by graded workbook questions.

Literature Project – A course-long project: reading Mary Shelley's novel *Frankenstein* and responding to prompts that help you reflect on what you have read.

Writing Skill and Activity – Includes instruction in writing skills. The writing projects, which are assessments graded by the instructor, require you to apply your knowledge and writing capabilities to demonstrate you have mastered the lesson content. Writing projects for LA402 ENG12B are in Units 2 and 3 (fictional narrative) and Unit 5 (literary analysis essay).

Honors Enrichment Activity (if applicable) – Includes additional critical thinking and writing activities that allow you to perform more in-depth analysis and application of acquired skills.

Checkpoint – This graded activity uses 10 questions to assess your mastery of the lesson's objectives. You may take the Checkpoint up to three times.

Discussion Board – This academic discussion board gives you a chance to share your thoughts and ideas about the topics covered in each lesson.

Final Essay Preparation – This activity in the last unit provides practice for the writing assessment, the Final Essay.

Review – Each review presents a summary of the skills covered in the unit.

**English IV B Honors
Course Syllabus**

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess your mastery of unit objectives. You may take the Unit Exam only once.

Final Essay – This exam is in the next-to-last lesson and tests how well you have learned the writing skills presented in the course. You may take the Final Essay only once.

Final Exam – This exam is in the last lesson and consists of 50 questions that test you on key concepts and information from the course. You may take the Final Exam only once.

Course Syllabus**

Unit 6: Future World (Modern Period, 1901–Present)

- A. Lexicology: Lessons 26–29
- B. Reading Skill: Lessons 26–29
- C. Reading Selections: Lessons 26–29
- D. Honors Enrichment Activity (if applicable) : Lessons 26–29
- E. Literature Project: Lessons 26–30
- F. Checkpoint: Lessons 26–29
- G. Discussion Board: Lessons 26–30
- H. Final Essay Preparation: Lesson 29
- I. Final Essay: Lesson 29
- J. Vocabulary and Reading Skill Reviews: Lesson 30
- K. Final Exam: Lesson 30

Unit 6 Reading Selections

- “The Hammer of God” by Arthur C. Clarke
- *Frankenstein* by Mary Shelley (final chapters)
- *The Hitchhiker’s Guide to the Galaxy* by Douglas Adams (excerpts)
- *High Fidelity* by Nick Hornby (excerpts)
- *Brave New World* by Aldous Huxley (excerpts)
- *Never Let Me Go* by Kazuo Ishiguro (excerpts)

English IV B

Course Syllabus

Course Description

In this course, you will read and analyze a wide variety of narrative texts from British literature across different eras, from the Middle Ages through modern times. Reading selections include significant works from British writers who have made a lasting impact on the literary world—including Chaucer, Spenser, Donne, Shakespeare, Milton, Swift, Byron, Wilde, Tolkien, and Huxley. In addition, throughout the entire course, you will be reading the novel *Frankenstein* by Mary Shelley.

As you read selections from various genres, including poetry, prose, drama, satire, and science fiction, you will learn how to define, identify, and analyze narrative elements and structures. Among these elements are plot, setting, tone, character, theme, and perspective. You will also study literary devices such as imagery, symbolism, irony, understatement, and sarcasm. In addition, you will examine the impact of word choice and humor within a text as well as techniques that writers use when creating stories. You will also make inferences about literary works; increase your vocabulary; and sharpen your language skills by learning about context clues, connotation, nuance, and affixes as methods for determining word meanings.

In this course, you will complete two writing projects: a fictional narrative in the style of Gothic Romanticism and a literary analysis. Writing activities offer you tips and techniques as you research and organize narrative compositions.

If you are participating in the Honors Enrichment portion of the course, you will delve deeper into many topics, including analyzing symbolic representations; making inferences; identifying and analyzing themes; comparing characters, setting, and tone in multiple versions of a text; and analyzing storytelling and its impact on structure and meaning. You will synthesize knowledge and use critical thinking as you analyze and write about the course's reading selections.

The lessons in this course will help you master techniques so that you can enhance your appreciation for British literature.

Suggested Prerequisites: ENG12A

English IV B Course Syllabus

Course Objectives:

- Identify and analyze key narrative elements and structures.
- Identify and evaluate figurative language.
- Examine the impact of word choice and humor within a text.
- Recognize irony and sarcasm, and determine perspective within a text.
- Integrate ideas to compare and contrast the treatment of narrative elements in multiple interpretations of a literary work.
- Determine word meanings using context clues, connotation, nuance, and affixes.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Respond to writing prompts by drawing evidence from literary texts to support analysis.
- Use context and knowledge of nuance and figurative language to enhance writing.
- Show mastery of the conventions of standard English.

Required Materials

- Word-processing software
- Internet browser
- Presentation software

Course Overview

This course contains six units, each with five lessons. Lessons present the material in many different ways so that you can increase your comprehension. Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with a brief description of the intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Skill – Includes strategies for determining the function, use, and meaning of key vocabulary words and phrases you will encounter in the lessons and in the real world. Followed by graded workbook questions.

Lexicology – Includes a preview of words used in a lesson's reading and other grade-level vocabulary words, with their parts of speech, definitions, synonyms, related words, and etymology. Followed by graded workbook questions.

Reading Selections – Includes annotated readings.

English IV B Course Syllabus

Course Organization

Reading Skill – Includes instruction in reading skills. Followed by graded workbook questions.

Literature Project – A course-long project: reading Mary Shelley’s novel *Frankenstein* and responding to prompts that help you reflect on what you have read.

Writing Skill and Activity – Includes instruction in writing skills. The writing projects, which are assessments graded by the instructor, require you to apply your knowledge and writing capabilities to demonstrate you have mastered the lesson content. Writing projects for LA402 ENG12B are in Units 2 and 3 (fictional narrative) and Unit 5 (literary analysis essay).

Honors Enrichment Activity (if applicable) – Includes additional critical thinking and writing activities that allow you to perform more in-depth analysis and application of acquired skills.

Checkpoint – This graded activity uses 10 questions to assess your mastery of the lesson’s objectives. You may take the Checkpoint up to three times.

Discussion Board – This academic discussion board gives you a chance to share your thoughts and ideas about the topics covered in each lesson.

Final Essay Preparation – This activity in the last unit provides practice for the writing assessment, the Final Essay.

Review – Each review presents a summary of the skills covered in the unit.

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess your mastery of unit objectives. You may take the Unit Exam only once.

Final Essay – This exam is in the next-to-last lesson and tests how well you have learned the writing skills presented in the course. You may take the Final Essay only once.

Final Exam – This exam is in the last lesson and consists of 50 questions that test you on key concepts and information from the course. You may take the Final Exam only once.

English IV B
Course Syllabus

Schedule of Work

Unit 1: Heroes (The Middle Ages, 400–1500)

- A. Vocabulary Skill: Lessons 1–4
- B. Reading Skill: Lessons 1–4
- C. Reading Selections: Lessons 1–5
- D. Honors Enrichment Activity (if applicable): Lessons 1–5
- E. Literature Project: Lessons 1–5
- F. Checkpoint: Lessons 1–4
- G. Discussion Board: Lessons 1–5
- H. Vocabulary and Reading Skill Reviews: Lesson 5
- I. Unit 1 Exam: Lesson 5

Unit 1 Reading Selections

- *Physiologus* (excerpts)
- *Frankenstein* by Mary Shelley (through Chapter 3)
- *Beowulf* (excerpts)
- “Sir Gawain and the Green Knight” and “Gawayne and the Green Knight: A Fairy Tale” (excerpts)
- *The Canterbury Tales*: “General Prologue,” “Wife of Bath’s Prologue,” and “Wife of Bath’s Tale” by Geoffrey Chaucer (excerpts)

English IV B
Course Syllabus

Unit 2: All the World Is a Stage (The Renaissance, 1500–1660)

- A. Lexicology: Lessons 6–9
- B. Reading Skill: Lessons 6–9
- C. Reading Selections: Lessons 6–10
- D. Honors Enrichment Activity (if applicable): Lessons 6–10
- E. Writing Skill: Lessons 6–10
- F. Writing Activity: Lessons 6–10
- G. Literature Project: Lessons 6–10
- H. Checkpoint: Lessons 6–9
- I. Discussion Board: Lessons 6–10
- J. Vocabulary and Reading Skill Reviews: Lesson 10
- K. Unit 2 Exam: Lesson 10

Unit 2 Reading Selections

- *The Faerie Queene* by Edmund Spenser (excerpts)
- *Frankenstein* by Mary Shelley (through Chapter 7)
- “The Sunne Rising” by John Donne
- “Breake of Day” by John Donne
- “Sonnet 18” by William Shakespeare
- “Sonnet 29” by William Shakespeare
- “Sonnet 55” by William Shakespeare
- “Sonnet 116” by William Shakespeare
- “Sonnet 7” by John Milton
- *Utopia* by Sir Thomas More (excerpts)
- *The Tempest* by William Shakespeare (excerpts)
- “Death Be Not Proud” by John Donne

English IV B
Course Syllabus

Unit 3: Goodbye to Romance (The Enlightenment/Neoclassic Period, 1660–1798, & Romantic Period, 1798–1837)

- A. Lexicology: Lessons 11–14
- B. Reading Skill: Lessons 11–14
- C. Reading Selections: Lessons 11–15
- D. Honors Enrichment Activity (if applicable): Lessons 11–15
- E. Writing Skill: Lessons 11–15
- F. Writing Activity: Lessons 11–15
- G. Literature Project: Lessons 11–15
- H. Checkpoint: Lessons 11–14
- I. Discussion Board: Lessons 11–15
- J. Vocabulary and Reading Skill Reviews: Lesson 15
- K. Unit 3 Exam: Lesson 15

Unit 3 Reading Selections

- *Gulliver's Travels* by Jonathan Swift (excerpts)
- *Frankenstein* by Mary Shelley (through Chapter 12)
- *Ivanhoe* by Sir Walter Scott (excerpts)
- *The Mysteries of Udolpho* by Ann Radcliffe (excerpts)
- "She Walks in Beauty" by Lord Byron
- "La Belle Dame Sans Merci" by John Keats
- "Ozymandias" by Percy Bysshe Shelley
- "The Chimney Sweeper" by William Blake (two versions)
- *The Life and Adventures of Robinson Crusoe* by Daniel Defoe (excerpts)

English IV B
Course Syllabus

Unit 4: Imitation of Life (Victorian Period, 1837–1901)

- A. Lexicology: Lessons 16–19
- B. Reading Skill: Lessons 16–19
- C. Reading Selections: Lessons 16–20
- D. Honors Enrichment Activity (if applicable): Lessons 16–20
- E. Literature Project: Lessons 16–20
- F. Checkpoint: Lessons 16–19
- G. Discussion Board: Lessons 16–20
- H. Vocabulary and Reading Skill Reviews: Lesson 20
- I. Unit 4 Exam: Lesson 20

Unit 4 Reading Selections

- *Through the Looking Glass* by Lewis Carroll (excerpts)
- *Frankenstein* by Mary Shelley (through Chapter 16)
- “The Adventure of the Speckled Band” by Sir Arthur Conan Doyle (excerpts)
- *The Importance of Being Earnest* by Oscar Wilde (excerpts)
- “The Charge of the Light Brigade” by Alfred, Lord Tennyson
- “The Darkling Thrush” by Thomas Hardy
- “In Time of ‘The Breaking of Nations’” by Thomas Hardy
- “Meeting at Night” by Robert Browning
- “Parting at Morning” by Robert Browning
- “How Do I Love Thee?” by Elizabeth Barrett Browning
- “The Best Thing in the World” by Elizabeth Barrett Browning
- “The Soldier” by Rupert Brooke
- “Dulce et Decorum Est” by Wilfred Owen
- “Up-Hill” by Christina Rossetti
- *The Woman in White* by Wilkie Collins (excerpts)

English IV B
Course Syllabus

Unit 5: Dawning of a New Era (Modern Period, 1901–Present)

- A. Lexicology: Lessons 21–24
- B. Reading Skill: Lessons 21–24
- C. Reading Selections: Lessons 21–25
- D. Honors Enrichment Activity (if applicable): Lessons 21–25
- E. Writing Skill: Lessons 21–25
- F. Writing Activity: Lessons 21–25
- G. Literature Project: Lessons 21–25
- H. Checkpoint: Lessons 21–24
- I. Discussion Board: Lessons 21–25
- J. Vocabulary and Reading Skill Reviews: Lesson 25
- K. Unit 5 Exam: Lesson 25

Unit 5 Reading Selections

- *The War of the Worlds* by H. G. Wells (excerpts)
- *Frankenstein* by Mary Shelley (through Chapter 21)
- “Strychnine in the Soup” by P. G. Wodehouse
- *Rebecca* by Daphne du Maurier (excerpts)
- “Musée des Beaux Arts” by W. H. Auden
- “Do Not Go Gentle Into That Good Night” by Dylan Thomas
- “Song of a Man Who Has Come Through” by D. H. Lawrence
- “Piano” by D. H. Lawrence
- “When You Are Old” by William Butler Yeats
- *The Fellowship of the Ring* by J. R. R. Tolkien (excerpts)

Unit 5 Painting Selection

- Landscape with *the Fall of Icarus* by Pieter Bruegel the Elder

English IV B
Course Syllabus

Unit 6: Future World (Modern Period, 1901–Present)

- A. Lexicology: Lessons 26–29
- B. Reading Skill: Lessons 26–29
- C. Reading Selections: Lessons 26–29
- D. Honors Enrichment Activity (if applicable) : Lessons 26–29
- E. Literature Project: Lessons 26–30
- F. Checkpoint: Lessons 26–29
- G. Discussion Board: Lessons 26–30
- H. Final Essay Preparation: Lesson 29
- I. Final Essay: Lesson 29
- J. Vocabulary and Reading Skill Reviews: Lesson 30
- K. Final Exam: Lesson 30

Unit 6 Reading Selections

- “The Hammer of God” by Arthur C. Clarke
- *Frankenstein* by Mary Shelley (final chapters)
- *The Hitchhiker’s Guide to the Galaxy* by Douglas Adams (excerpts)
- *High Fidelity* by Nick Hornby (excerpts)
- *Brave New World* by Aldous Huxley (excerpts)
- *Never Let Me Go* by Kazuo Ishiguro (excerpts)

Honors English 9 A Course Syllabus

Course Description

In this course, you will read and analyze both literary and informational texts. These texts take many different forms, including autobiographies, personal memoirs, newspaper and magazine articles, poetry, and even filmed stage productions. The course's reading selections demonstrate ways to understand explicit and inferred meaning through textual evidence, central ideas and details that support them, and figurative language, and the effects word choice has on tone and mood, among other ideas and concepts. Throughout this course, you will read the novel *The Princess and the Goblin* by George MacDonald. You will also examine literary texts to better your understanding of different perspectives from outside the United States, including a story of Mexican citizens desperate to immigrate to the United States, and a story about a Chinese American girl's relationship with her demanding mother.

As you read the selections in this course, you will practice ways to recognize textual evidence, identify themes and central ideas, make inferences, analyze word choice, and identify figurative and connotative language in a variety of texts. In addition, you will learn about basics in grammar, usage, and punctuation, including context clues and word functions, domain-specific language and dialect, parts of speech and figures of speech, and reference materials. You will also learn various vocabulary words and more about Greek and Latin prefixes, suffixes, and roots.

In addition, you will learn the elements of writing so that you can plan, write, revise, and edit your own personal memoir and literary analysis.

Through the lessons provided in this course, you will master techniques that will help you achieve a deeper appreciation of literary and informational texts.

Suggested Prerequisites: ENG081-8A and ENG082-8B

Course Objectives:

- Identify and describe themes, central ideas, and details.
- Describe different organizational structures in texts and how ideas and events are shaped by those structures.
- Identify and analyze textual evidence in texts to make inferences.
- Determine how an author's word choice contributes to a text's meaning, tone, and mood.
- Analyze characters within literary texts.
- Identify and interpret figurative, connotative, and denotative meanings in texts.
- Identify and define common roots and affixes to determine the meaning of words.
- Use context clues to determine the meaning of unfamiliar words.
- Recognize domain-specific language and dialect within texts.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.
- Identify subjects, key scenes, and portrayals in literary and informational texts across a variety of different mediums.
- Use knowledge of writing ideas, concepts, and strategies to write a personal memoir and literary analysis.

Required Materials

- Word-processing software
- Internet browser

Honors English 9 A

Course Syllabus

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways so that you can increase your comprehension. These ways include Vocabulary Words; Language, Reading, and Writing Skills and Activities; Lesson Workbooks and Checkpoints; and Discussion Boards.

Some activities are graded by the learning management software; others are graded by your instructor. Additional activities are available for you but are not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with an introduction, which includes a brief description of the content and intended learning outcomes. Following the introduction are these standard activities, which may or may not be present in each lesson:

Vocabulary Words – Includes parts of speech, definitions, synonyms, and etymology; contains practice questions; is a part of the Language Skill.

Language Skill Instruction – Includes instruction in vocabulary and language skills; contains practice questions; is a part of the Language Skill.

Reading Selections – Includes reading selections and videos; is part of the Reading Skill.

Reading Skill Instruction – Includes instruction in reading skills; contains practice questions; is a part of the Reading Skill.

Writing Skill Instruction and Activity – Includes instruction in writing skills; contains practice questions; contains activities including writing projects, which are assessments graded by the instructor and which require you to apply your knowledge and writing capabilities to demonstrate mastery of the lesson content; includes a personal memoir, completed in Units 2 and 3; and a literary analysis, completed in Units 4 and 5.

Checkpoint – Uses 10 questions to assess mastery of lesson objectives; is a graded activity; may be taken up to three times.

Discussion Board – Is an academic discussion board; gives you a chance to share your thoughts and ideas about the topics covered in each lesson.

Exam Prep – Presents a summary of the skills covered in the unit.

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess your mastery of unit objectives. It consists of 20 questions. You may take the Unit Exam only once.

End-of-Course Writing Assessment – This exam is in the next-to-last lesson and tests how well you have learned the writing skills presented in the course. You may take the End-of-Course Writing Assessment only once.

Final Exam – This exam is in the last lesson and consists of 50 questions that test you on the concepts and information learned in the course. You may take the Final Exam only once.

- “Fish Cheeks”
- “Trespass” chapter from *How the Garcia Girls Lost Their Accents*

Honors English 9 B**Course Syllabus****Course Description**

In this course, you will read and analyze both literary and informational texts. These texts take many different forms, including biographies, short stories, newspaper and magazine articles, poetry, and influential historical documents. The course's reading selections demonstrate ways to understand explicit and inferred meaning through textual evidence; theme, central ideas, and details that support them; and structural elements and their influence on style, among other ideas and concepts. Throughout this course, you will read the novel *Anthem* by Ayn Rand. You will also examine informational texts to better your understanding of historical moments throughout the history of the United States, including presidential speeches and a famous letter written by Martin Luther King Jr. during his imprisonment in a Birmingham jail at the height of the civil rights movement.

As you read the selections in this course, you will practice ways to recognize textual evidence, identify themes and central ideas, make inferences, and identify figurative and connotative language in a variety of texts. In addition, you will review information on context clues and word nuances, and you will learn about spelling conventions, style manuals, phrases clauses, parallel structure, semicolons, and colons. You will also learn the definitions, parts of speech, and etymology of various vocabulary words you will see throughout the reading selections.

In addition, you will learn the elements of writing so that you can plan, write, revise, and edit your own informational essay and argument essay.

Through the lessons provided in this course, you will master techniques that will help you achieve a deeper appreciation of literary and informational texts.

Suggested Prerequisite: ENG101-9A

Course Objectives:

- Review themes, central ideas, characterization, organizational structure, and evidence and inferences
- Analyze structural elements on text and their influence on a text's style
- Look back through history to read text from different periods, and determine their influence on more modern texts
- Identify author perspective and purpose
- Recognize the rhetorical techniques authors use in their writing
- Discover the various elements of arguments and claims in persuasive writing, including their reliance on sound reasoning and relevant and sufficient textual evidence
- Understand the differences between figurative, connotative, and technical meaning and language
- Explore themes, concepts, and rhetorical techniques in seminal US documents
- Review details about context clues and word nuances
- Learn about spelling conventions and different style manuals
- Identify various phrases and clauses, and understand how they relate to parallel structure
- Distinguish between semicolons and colons
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose and audience
- Use knowledge of writing ideas, concepts, and strategies to write an informational essay and an argument essay

- A. Introduction: Lessons 1–5
- B. Language Skills: Lessons 1–5
 - Vocabulary Words: Lessons 1–4
 - Language Skills: Lessons 1, 3
 - Vocabulary Words/Language Skills Workbooks: Lessons 1–4
 - Vocabulary and Language Skills Exam Prep: Lesson 5
- C. Reading Skills: Lessons 1–5
 - Reading Selections: Lessons 1–5
 - Reading Skills: Lessons 1–4
 - Reading Skills Workbooks: Lessons 1–4
 - Reading Skills Exam Prep: Lesson 5
- D. Research Skills for Writing and Activities: Lessons 1–2
 - Research Skills for Writing Workbooks: Lessons 1-2
- E. Writing Skills and Activities (Informational Writing Project): Lessons 3–5
 - Writing Skills Workbooks: Lessons 3-4
- F. Discussion Board: Lessons 1–5
- G. Checkpoint: Lessons 1–4
- H. Unit 1 Exam: Lesson 5

Unit 1 Reading Selections

- “Stopping by Woods on a Snowy Evening”
- “The Sower”
- “Icarus and Daedalus”
- “The Real ‘Hacksaw Ridge’ Soldier Saved 75 Souls Without Ever Carrying a Gun”
- “Samuel Clemens’ Literary Beginning” from *Mark Twain: A Biography*
- *Anthem* – Chapter 1
- “The Wild Dog of Caucomgomoc”
- “The Lure of Shakespeare”
- “China’s *Black Mirror* Moment”
- “Eyelashes: The ‘Sweet’ Length”
- “Father”

Honors English 9 B
Course Syllabus

Unit 1 Reading Selections

- “The Danger of Lying in Bed”
- “A Voice”
- “The Distracted Teenage Brain”

Honors English 9 B

Course Syllabus

Unit 2:

- A. Introduction: Lessons 6–10
- B. Language Skills: Lessons 6–10
 - Vocabulary Words: Lessons 6–9
 - Language Skills: Lessons 6, 8
 - Vocabulary Words/Language Skills Workbooks: Lessons 6–9
 - Vocabulary and Language Skills Exam Prep: Lesson 10
- C. Reading Skills: Lessons 6–10
 - Reading Selections: Lessons 6–10
 - Reading Skills: Lessons 6–9
 - Reading Skills Workbooks: Lessons 6–9
 - Reading Skills Exam Prep: Lesson 10
- D. Writing Skills and Activities (Informational Writing Project): Lessons 6–10
 - Writing Skills Workbooks: Lessons 6–9
- E. Discussion Board: Lessons 6–10
- F. Checkpoint: Lessons 6–9
- G. Unit 2 Exam: Lesson 10

Unit 2 Reading Selections

- *Anthem* – Chapters 2-7
- “The Monkey’s Paw”
- “Prometheus”
- “Sonnet 29”
- “Song of Myself” Song 34 & 38
- “Sonnet 2”
- “Sonnet 13”
- “The Necklace”

Honors English 9 B

Course Syllabus

Unit 3:

- A. Introduction: Lessons 11–15

- B. Language Skills: Lessons 11–15
 - Vocabulary Words: Lessons 11–14
 - Language Skills: Lessons 11, 13
 - Vocabulary Words/Language Skills Workbooks: Lessons 11–14
 - Vocabulary and Language Skills Exam Prep: Lesson 15

- C. Reading Skills: Lessons 11–15
 - Reading Selections: Lessons 11–15
 - Reading Skills: Lessons 11–14
 - Reading Skills Workbooks: Lessons 11–14
 - Reading Skills Exam Prep: Lesson 15

- D. Writing Skills and Activities (Informational Writing Project): Lessons 11–13
 - Writing Skills Workbooks: Lessons 11–13

- E. Speaking & Listening Skills and Activities: Lessons 14-15

- F. Discussion Board: Lessons 11–15

- G. Checkpoint: Lessons 11–14

- H. Unit 3 Exam: Lesson 15

Unit 3 Reading Selections

- *Anthem* – Chapters 8-12
- “Drones Put Spying Eyes in the Sky”
- “What is Earth?”
- “What Are Climate and Climate Change?”
- “Moral Dilemma Could Limit Appeal of Driverless Cars”
- “Eyelashes: The ‘Sweet’ Length”
- “All About Sleep”
- “Rivers and Stories”
- “Want to Get into College? Learn to Fail”
- “The Danger of Lying in Bed”
- “The Limits of Empathy”
- “Awaiting the Crozier Party”

Honors English 9 B
Course Syllabus

Unit 4:

- A. Introduction: Lessons 16–20

- B. Language Skills: Lessons 16–20
 - Vocabulary Words: Lessons 16–19
 - Language Skills: Lessons 16, 18
 - Vocabulary Words/Language Skills Workbooks: Lessons 16–19
 - Vocabulary and Language Skills Exam Prep: Lesson 20

- C. Reading Skills: Lessons 16–20
 - Reading Selections: Lessons 16–20
 - Reading Skills: Lessons 16–19
 - Reading Skills Workbooks: Lessons 16–19
 - Reading Skills Exam Prep: Lesson 20

- D. Writing Skills and Activities (Argument Writing Project): Lessons 16–20
 - Writing Skills Workbooks: Lessons 16–19

- E. Discussion Board: Lessons 16–20

- F. Checkpoint: Lessons 16–19

- G. Unit 4 Exam: Lesson 20

Unit 4 Reading Selections

- “Housing Secretary Ben Carson Clarifies Comment That Poverty Is a ‘State of Mind’”
- “Drones Put Spying Eyes in the Sky”
- “Moral Dilemma Could Limit Appeal of Driverless Cars”
- “Want to Get into College? Learn to Fail”
- “Putting Good Deeds in Headlines May Not Be So Good”
- “The Limits of Empathy”
- “En Route to Mars, Astronauts May Face Big Health Risks”
- “John McCain Address to the US Senate”
- “A New Way for Therapists to Get Inside Heads: Virtual Reality”
- “Space Radiation Won’t Stop NASA’s Human Exploration”
- “Malala Yousafzai Speech at the United Nations”
- “The Posters That Sold World War I to the American Public”
- “How Woodrow Wilson’s Propaganda Machine Changed American Journalism”
- “Ssshh ... Quiet, Please!”
- “Emergence of Modern Thought”

Honors English 9 B

Course Syllabus

Unit 5:

- A. Introduction: Lessons 21–25
- B. Language Skills: Lessons 21–25
 - Vocabulary Words: Lessons 21–24
 - Language Skills: Lessons 21, 23
 - Vocabulary Words/Language Skills Workbooks: Lessons 21–24
 - Vocabulary and Language Skills Exam Prep: Lesson 25
- C. Reading Skills: Lessons 21–25
 - Reading Selections: Lessons 21–25
 - Reading Skills: Lessons 21–24
 - Reading Skills Workbooks: Lessons 21–24
 - Reading Skills Exam Prep: Lesson 25
- D. Writing Skills and Activities (Argument Writing Project): Lessons 21–25
 - Writing Skills Workbooks: Lessons 21–24
- E. Discussion Board: Lessons 21–25
- F. Checkpoint: Lessons 21–24
- G. Unit 5 Exam: Lesson 25

Unit 5 Reading Selections

- “Rivers and Stories”
- “Stress for Success”
- “A Letter from Jackie Robinson”
- “NASA Twins Study Confirms Preliminary Findings”
- “President Kennedy’s Special Message to the Congress on Urgent National Needs” excerpt
- “Letter from a Birmingham Jail”
- “Statement on the Assassination of Martin Luther King Jr.”
- “A Letter from Eleanor Roosevelt”
- “The Gettysburg Address”
- “A Letter from Abigail Adams”
- “Lyndon Johnson’s Remarks at Gettysburg on Civil Rights”
- “Barack Obama’s First Inaugural Address”
- “Barack Obama’s Keynote Address: 2004 Democratic National Convention”
- “A Helpless Situation”

Honors English 9 B

Course Syllabus

Unit 6:

- A. Introduction: Lessons 26–30
- B. Language Skills Exam Prep: Lessons 26–27
 - Reading Skills Exam Prep: Lessons 26–29
 - Reading Selections: Lessons 26–29
 - Reading Skills Exam Prep: Lessons 26–29
- C. Writing Skills Exam Prep: Lessons 27–28
- D. Writing Exam: Lesson 29
- E. Discussion Board: Lessons 26–30
- F. Final Exam: Lesson 30

Unit 6 Reading Selections

- “The Absolutely True Diary of a Part-Time Indian” Chapters 1-2
- “Cool Jobs: Decoding How Your Brain ‘Reads’”
- “Sleep Problems and Solutions”
- “Exploring the Mysteries of Cuba’s Coral Reefs”
- “Malala Yousafzai’s Address to the United Nations”
- “Letter from a Birmingham Jail”
- “Address of Carl Sandburg before Congress”
- “FDR’s 1944 State of the Union Address”

Honors English 10 A Syllabus

Course Description

This course explores rhetoric and composition at the intermediate high school level. The course is for 10th grade students who are at or near grade level in language arts skills. Emphasis is placed on grammar and usage, spelling, writing skills, punctuation, and literary nonfiction. Writing activities give students practice in organizing and developing descriptive, persuasive, narrative, expository compositions, and research.

Course Objectives

- Acquire reading strategies necessary to evaluate and analyze literary nonfiction.
- Prepare for standardized testing by honing comprehension, composition, and grammatical skills.
- Develop writing techniques applicable for self-expression, questioning strategies and constructed responses, supporting an argument, and explaining and presenting information acquired during research.
- Engage in discussing and presenting personal beliefs and opinions as well as answers to critical thinking through rhetoric and composition.

Required Materials

- Word Processing Software
- Internet Browser
- Presentation Software

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons will present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others will be graded by the instructor, and additional activities will be available for the student, but not graded. It is recommended that the course instructor be contacted for further information about course guidelines and grading policies.

Honors English 10 A Syllabus

Course Organization

At the beginning of each unit is a brief description of the intended learning outcomes.

Following the introduction, a set of activities will take place:

Daily Oral Language – This activity will allow students to review and acquire new skills in key grammar concepts of spelling, punctuation, and usage.

Sustained Silent Reading – During the sustained silent reading, students will be expected to read independently for 15 minutes.

Key Terms – This activity introduces academic vocabulary to prepare students for learning new concepts in their courses, and will be followed by a vocabulary exam at the end of the course.

Lesson Content – This may include interactive activities, readings, videos, practice activities, etc. Most of these will have graded workbook questions.

Project – This is an assessment graded by the instructor that requires application of knowledge and writing capabilities to demonstrate mastery of the unit and lesson content.

Discussion Board – This activity is graded by the instructor and allows the student to interact and communicate with classmates and the instructor about lesson content.

Checkpoint – This graded activity uses 10 questions to assess mastery of lesson objectives. The checkpoint may be taken up to three times.

Unit Exam – At the end of the unit is an exam that will assess mastery of the unit objectives. It may be taken only once.

End of Lesson – This is an activity designed to review the information and content learned.

Honors English 10 A Syllabus**Schedule of Work**Unit 1: Come What May

- Daily Oral Language
- SSR – Lessons 1-5 *King Arthur's Knights* by Henry Gilbert
- Read/View – literary nonfiction content and selected autobiographies and memoirs
- Course Pretest/Writing Portfolio
- Workbook Assessments
- Discussions
- Project 1 – “Write an Autobiographical Excerpt”
- Checkpoints 1-5
- Review
- Unit 1 Exam

Unit 2: The Art of Argument

- Daily Oral Language
- SSR – Lessons 6-10 *King Arthur's Knights* by Henry Gilbert
- Read/View – selections from persuasive essays, articles, and speeches
- Workbook Assessments
- Discussions
- Project 2 – “Write a Persuasive Essay”
- Checkpoints 6-10
- Review
- Unit 2 Exam

Unit 3: Journalism

- Daily Oral Language
- SSR – Lessons 11-15 *King Arthur's Knights* by Henry Gilbert
- Read/View – selected news articles, magazine articles, photojournalism, and television newscasts
- Workbook Assessments
- Discussions
- Project 3 – “Conduct an Analysis of Literary Nonfiction”
- Checkpoints 11-15
- Review
- Unit 3 Exam

Honors English 10 A SyllabusUnit 4: Interesting Information

- Daily Oral Language
- SSR – Lessons 16-20 *King Arthur's Knights* by Henry Gilbert
- Read/View – content and selected works of expository nonfiction literature
- Workbook Assessments
- Discussions
- Project 4 – “Outline for a Research Paper”
- Checkpoints 16-20
- Review
- Unit 4 Exam

Unit 5: Interviews

- Daily Oral Language
- SSR – Lessons 21-25 *King Arthur's Knights* by Henry Gilbert
- Read/View – selections from interviews with celebrated authors and visual media segments
- Workbook Assessments
- Discussions
- Project 5 – “Submit a Research Paper”
- Checkpoints 21-25
- Review
- Unit 5 Exam

Unit 6: Applied Research

- Daily Oral Language
- SSR – Lessons 23-30 *King Arthur's Knights* by Henry Gilbert
- Read/View – content and selected excerpts from medieval legend and its historical context
- Workbook Assessments
- Discussions
- Project 6 – “Expository Essay on a Personal Legend”
- Checkpoints 26-28
- Review
- Vocabulary Final Exam
- Course Final Exam

Honors English 10 B Syllabus

Honors English 10 B Syllabus

Course Description

The course is for 10th-grade students who are at or near grade level in reading and literature skills. Emphasis is placed on the social and cultural context of world cultures and their expression of ideas through literature. World Literature broadens students' reading experience with exposure to literature from around the world. Students evaluate diverse reading selections such as epic poetry, folktales, ancient verses, Greek tragedy, drama, short stories, and novel excerpts using a wide variety of literary elements. Students have the opportunity to connect and relate to the various authors and gain a deeper understanding and appreciation of other cultures through the contexts of the texts. In addition, the course guides students through an active reading process, utilizing graphic organizers. Graphic organizers help students apply reading comprehension skills to multiple texts.

Students are expected to analyze assigned reading selections in a variety of activities. Additionally, students practice vocabulary and language skills, such as determining the meanings of unfamiliar words using context and interpreting figurative language. Writing activities challenge students' reading comprehension and composition skills with several projects involving research and writing, as well as producing character analysis and personal narrative essays.

Suggested Prerequisites: ENG9A/B

Course Objectives

- Use textual evidence to support analysis of explicit and implicit information in a text.
- Identify and analyze the development of central ideas and themes.
- Analyze plot and character development.
- Analyze word choice and tone.
- Identify and analyze text structure and pacing.
- Identify and analyze cultural elements, point of view, and perspective in a text.
- Analyze representation of key scenes in text and media versions of a text.
- Analyze how authors draw from and transform source material.
- Use context and knowledge of affixes to determine the meaning of unknown words, word nuance, and figurative meaning.
- Complete writing activities and projects in which the development, organization, and style are appropriate to task, purpose, and audience.

Required Materials

- Word processing software
- Internet browser
- Presentation software

Honors English 10 B Syllabus

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways to allow for increased comprehension. Some activities are graded by the learning management software; others are graded by the instructor. Additional activities are available for the student, but not graded. Students should receive recommendations to contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with a brief description of the intended learning outcomes. Following the introduction are these standard activities:

Pre-Assessment – Provides a preview of the concepts covered in this lesson and assesses prior knowledge about the material. The pre-assessment score is not recorded in the Gradebook and does not affect overall grade.

Key Terms – Introduces the vocabulary that will appear in context during the lesson’s readings, and will be followed by a vocabulary exam at the end of the course.

Language Skill Instruction – Includes instruction in vocabulary and language skills, followed by graded workbook questions.

Focus Skill Instruction – Includes instruction in reading comprehension skills and application, followed by graded workbook questions.

Reading Selection, Graphic Organizer, Extended Response Discussion Question(s) – Includes an annotated reading selection, a graphic organizer with an exemplary response for modeling, and an extended response discussion question at the analyze/evaluate/synthesize level.

Short Writing Activity – Provides instruction in a writing skill followed by a writing prompt requiring a two- to three-paragraph response. Activities are connected to concepts in the reading selection featured in the lesson.

Writing Project – An assessment graded by the instructor that requires application of knowledge and writing capabilities to demonstrate mastery of the lesson content. Writing projects for LA202 10B are in Unit 2 (character analysis) and Unit 4 (personal narrative).

Checkpoint – This graded activity uses 10 questions to assess mastery of lesson objectives. Students may take the Checkpoint up to three times.

Self-Reflection– This is an activity designed for students to reflect on key ideas and their own learning.

Honors English 10 B Syllabus

Course Organization

In the last lesson of each unit, the Checkpoint activity is replaced with a comprehensive assessment:

Unit Exams – At the end of the unit is an exam that will assess mastery of unit objectives. Students may take the Unit Exam only once.

Final Exam – This exam is in the last lesson and consists of 50 questions that reflect key concepts and information from course. Students may take the Final Exam only once.

CURRICULUM**

B.5 Syllabi

It includes the syllabi for the Virtual Preparatory Academy of Pennsylvania curriculum in the following subject areas:

- a. English Language Arts K-12
- b. Mathematics K-12
- c. Science K-12
- d. Social Studies K-12
- e. General Electives K-5
- f. Health and Physical Education
- g. World Languages

Mathematics

K-12

Math K - Semester A Syllabus

Course Description:

During the first semester students will learn foundational math facts. They will learn to count to 12, how to compare sizes, ordinal numbers putting items in order, what a number line is and its uses, basic measurements such as inches and feet, and how to tell time on digital and analog clocks.

Students will have many opportunities to practice these new concepts by interacting with online confirmation exercises and filling out worksheets off line.

A special emphasis this semester is for students to have fun with numbers, finding success with concepts such as bigger and smaller and being comfortable in an online environment.

Major Concepts:

- Position words
- Comparing sizes
- Shapes
- Counting to ten
- Patterns
- Basic measures
- Number line
- Telling time
- Ordinals – first through seventh

Math K - Semester A Syllabus

Module	Lesson Title	Objectives
1	Days of the Week	<ol style="list-style-type: none"> 1. Recognize time words: morning, afternoon, evening and night. 2. Name the days of the week in order.
	Position	<ol style="list-style-type: none"> 1. Recognize and use position words: above, below, beside, in front of, behind, next to, left and right.
2	Compare Sizes	<ol style="list-style-type: none"> 1. Compare two items to determine longer or shorter. 2. Compare two items to determine taller or shorter. 3. Compare two items to determine if they are light or heavy. 4. Identify which of 3 items is different from others in set.
	Sets	<ol style="list-style-type: none"> 1. Identify which of 3 items is different from others in set.
	Count and Write to 3	<ol style="list-style-type: none"> 1. Write and say the numbers 1-3 in order.
3	Shapes & Their Position	<ol style="list-style-type: none"> 1. Describe objects in the environment using names of shapes and their relative positions, using the terms above, below, beside, in front of, behind, and next to.

Math K - Semester A Syllabus

Module	Lesson Title	Objectives
3	The Shape of It	1. Create basic shapes with string (circle, square, triangle, rectangle).
	Patterns	1. Copy a pattern.
4	Find the Fake	1. Identify which of 3 items is unique.
	Use Your Fingers to Count to 5	1. Count and show numbers 0 - 5 with fingers.
	Circle and Count to 5	1. Circle 1 to 5 items in a set. (Understand that the last number name said tells the number of objects counted.)
5	Sorting and Grouping	1. Compare two objects with a measurable attribute in common. 2. Classify by color and size.

Math K - Semester A Syllabus

Module	Lesson Title	Objectives
5	Basic Measures	<ol style="list-style-type: none"> Describe measurable attributes of objects, such as length, width and height. Measure length in inches.
	Biggest Set	<ol style="list-style-type: none"> Identify a set with the most items by using matching and counting strategies.
6	Sort and Classify	<ol style="list-style-type: none"> Classify, sort and count objects up to 5. Circle an object that does not belong in a set.
	Which is Different?	<ol style="list-style-type: none"> Circle any item that is different. Compare objects with a measurable attribute in common.
7	Count from 0 to 3	<ol style="list-style-type: none"> Write the numbers 0 to 3. Recognize the numerals 0 to 3.
	Smallest or Biggest	<ol style="list-style-type: none"> Number shapes from smallest to largest.

Math K - Semester A Syllabus

Module	Lesson Title	Objectives
7	Position Words: Before and After	<ol style="list-style-type: none"> 1. Match numbers 0 - 5 with pictures of 0-5 objects. 2. Say the number names in order, pair each object with one number name. 3. Use the position words before and after, in front and behind in stories.
8	The Number Six	<ol style="list-style-type: none"> 1. Write the number 6. 2. Count to 6. 3. Finger paint numbers 1 to 6.
	Matching Sets	<ol style="list-style-type: none"> 1. Match a set of objects to a set with an equal number of objects. 2. Draw the same number of objects as members in a given set.
9	Picture Graphs	<ol style="list-style-type: none"> 1. Create picture graphs.
	Hopscotch to 6!	<ol style="list-style-type: none"> 1. Find a path counting up from 0 to 6.
	Count to 7!	<ol style="list-style-type: none"> 1. Write the number 7. 2. Count to 7. 3. Classify, sort, and count pictures.

Math K - Semester A Syllabus

Module	Lesson Title	Objectives
10	Capacity	<ol style="list-style-type: none"> 1. Fill larger containers using smaller containers of varying sizes. 2. Match numerals 0 - 7 with pictures of 0 - 7 objects.
	Ordinal Numbers 1-5	<ol style="list-style-type: none"> 1. Create and interact with a number line.
11	Count to 8!	<ol style="list-style-type: none"> 1. Write the number 8. 2. Count to 8.
	Less and More	<ol style="list-style-type: none"> 1. Compare two objects with a measurable attribute in common, to see which object has "more of"/"less of" the attribute.
	Count to 9!	<ol style="list-style-type: none"> 1. Write the number 9. 2. Count to 9.
12	More or Fewer	<ol style="list-style-type: none"> 1. Select an item that best fits with a given set. 2. Select a set with the most or fewest items. 3. Count the items in each category and sort the categories by count.

Math K - Semester A Syllabus

Module	Lesson Title	Objectives
13	The Number 10	<ol style="list-style-type: none"> 1. Write the number 10. 2. Count to 10. 3. Find the number that makes 10 when added to the given number.
	The Number Line	<ol style="list-style-type: none"> 1. Create and interact with a number line.
14	Before, After, Between	<ol style="list-style-type: none"> 1. Use a number line for before, after and between. 2. Circle a group of items that is larger than another group.
	Dare to Compare	<ol style="list-style-type: none"> 1. Identify whether the number of objects in one group is greater than; less than or equal to the number in another group.
15	The Number 11	<ol style="list-style-type: none"> 1. Write the number 11. 2. Count to 11.
	The Penny	<ol style="list-style-type: none"> 1. Recognize pennies and using the cents symbol. 2. Count pennies.

Math K - Semester A Syllabus

Module	Lesson Title	Objectives
15	Sorting in Sets	1. Circle an item that shares the characteristics of a given set.
16	The Nickel	1. Recognize and add nickels.
	Adding By One	1. Calculate the total when 1 is added to a given set.
	The Ten Frame	1. Use a ten frame.
	Picture Patterns	1. Copy a pattern of pictures.
17	Measuring Time	1. Keep track of time on a clock and a calendar.

Math K - Semester A Syllabus

Module	Lesson Title	Objectives
17	First, Next, and Last	1. Put things in order and use position words (first, next, last).
	Fewer or More	1. Identify a set with equal, some, many, few, more, and less. 2. Classify pairs as same or different.
	The Hour	1. Tell time on the hour using an analog clock.
	Fluency with Numbers	1. Use ten frames to gain fluency in numbers 0 to 10.
18	The Number 12	1. Write the number 12. 2. Count to 12.
	Add to 6	1. Combine two groups to total 6.

Math K - Semester B Syllabus

Course Description:

Students learn to count to twenty. They work with comparing objects using the terms tall, longer, and shorter as well as comparing two objects using the terms lighter and heavier. They will continue their exploration of basic geometric shapes such as cones and spheres. They will work with the concept of first, middle, and last.

Arranging and sorting receive special emphasis this semester. Students will also work on writing numbers with 3, 4, and 5 given special attention. Students will learn the concepts of left and right. Coins are also a focus as students will count pennies, nickels and dimes. Finally, the number 7 is studied using the colors of the rainbow.

Projects include making paper fingers and thumbs and creating designs with them. They will also make the numbers 1-10 out of dough.

Major Concepts:

- Counting to twenty
- Comparing weight and length
- Sorting by shape and color
- Cones, cubes, and spheres
- First middle and last
- Left and right
- Counting pennies and nickel

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
19	Thirteen	<ol style="list-style-type: none"> 1. Write the digits for 13. 2. Write the number word: thirteen. 3. Count to 13.
	The Order of It	<ol style="list-style-type: none"> 1. Put things in order using time words (today, yesterday, and tomorrow), days of the week, and months.
	Go Forward	<ol style="list-style-type: none"> 1. Count forward beginning from a given number.
	The Lesser Numbers	<ol style="list-style-type: none"> 1. Determine the lesser value in a pair of numerals.
	Shapes	<ol style="list-style-type: none"> 1. Identify shape attributes, such as side, corner, edge and curve.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
20	Sequence to 12	1. Complete a sequence to 12 when one or two are missing.
	Naming Shapes	1. Name shapes correctly no matter the size or orientation.
	How Many are Left?	1. Determine the number of objects remaining when removing up to two.
	Weight	1. Measure weight with non-standard units.
	Fourteen	1. Use the number 14.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
21	Sets with Less	1. Select a set with one less than a given set.
	Set Subtraction	1. Create story problems that subtract from 5.
	Number Words	1. Recognize and use number words: zero to ten.
	Story Problems that Add to Seven	1. Create story problems that add to 7.
	Commutative Property	1. Use the commutative property of addition.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
22	Fifteen	1. Use the number 15.
	Sequence to 12	1. Complete a sequence to 12 when one or two are missing from the beginning.
	Arrays to 16	1. Use arrays to 16 to count "how many" items.
	Story Problems to 8	1. Create story problems that add to 8.
	Sorting	1. Classify, count and sort objects by category.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
23	Sixteen	1. Use the number 16.
	Pay For It	1. Use pennies and nickels to pay for items. 2. Calculate the value of a group of pennies, nickels, and a combination of both.
	Story Problems from 6	1. Create story problems that subtract from 6.
	0 to 20	1. Write numbers from 0 to 20 and represent them with objects.
	Sum to 5	1. Add vertically to 5, while distinguishing the words horizontal and vertical.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
24	Seventeen to Eighteen	1. Use the numbers 17 and 18.
	Circle Graphs	1. Divide items into multiple groups and place them into a circle graph.
	Picture Graphs	1. Create picture graphs and circle graphs by classifying objects.
	Sequence to 18	1. Complete a sequence to 18 when one or two numbers from the beginning of the sequence are missing.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
25	Story Problems to 9	1. Create story problems that add to 9.
	Ten Frames	1. Solve addition story problems using ten frames.
	Length	1. Measure length with non-standard units.
	Number Words	1. Recognize number words eleven, twelve, and thirteen.
	Coloring Patterns in Shapes	1. Color shapes so no adjacent sides share a color.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
26	Sum to 10	1. Find the number that makes 10 when added to a given number.
	Greatest Number	1. Select the number with the greatest value in a given set.
	Equals	1. Recognize numerical equivalents.
	Distance	1. Measure distance with non-standard units.
	Nineteen and Twenty	1. Use the numbers 19 and 20.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
27	Compare Numbers	<ol style="list-style-type: none"> 1. Compare two numbers between 1 and 10 presented as written numerals. 2. Use these math signs: $<$, $>$, $=$.
	Peak 10	<ol style="list-style-type: none"> 1. Find pairs of numbers on a number line to 10.
	Story Problems from 7	<ol style="list-style-type: none"> 1. Create story problems that subtract from 7.
	Matching Sets to Numbers	<ol style="list-style-type: none"> 1. Match a number 0-9 with a set of items.
	Higher Value	<ol style="list-style-type: none"> 1. Determine the higher value in a pair of numerals from 0 to 9.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
28	Sum to 8	1. Add vertically to 8.
	Word Numbers	1. Recognize the word numbers: fourteen to twenty, thirty, forty, and fifty.
	20 to 30	1. Use the numbers 20 to 30, using rows and columns.
	Comparing Lengths	1. Compare and order objects by length.
	Sorting by Weight	1. Sort objects by non-standard units of weight.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
29	Sequence to 20	1. Complete a sequence to 20 when two numbers are missing.
	Addition Facts to 8	1. Practice addition facts to 8.
	Positions	1. Use position words inside and outside with geometric shapes.
	Temperature	1. Sort objects by temperature and measure temperature on a Celsius and Fahr- einheit scale.
	31 to 50	1. Use numbers 31 - 50 and place in columns and rows.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
30	Sum to 9	1. Add vertically to 9.
	Write Numbers 0-20	1. Represent objects with a numeral from 0 to 20 and write those numbers.
	Subtract From 6	1. Subtract vertically from 6 and practice subtraction facts.
	Patterns of Shapes	1. Complete patterns of shapes.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
31	Numbers 51-100	1. Use numbers 51 - 100.
	Count by 10's	1. Count by 10's to 100.
	Sum to 10	1. Add vertically to 10.
	Arrays	1. Write numbers 0 - 20 and identify objects in arrays representing those numbers.
	Subtract From 9	1. Subtract vertically from 9.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
32	Describe Objects	1. Describe objects in the environment by using the names of shapes.
	Using a Tally Chart	1. Chart the results of rolling a cube 20 times.
	Compare Temperatures	1. Compare different temperatures.
	Addition and Subtraction Word Problems	1. Solve addition and subtraction word problems.
	Move the Shape	1. Move a figure by flipping, sliding or turning it.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
33	Sum to 12	1. Add vertically to 12.
	Add Horizontally	1. Add horizontally to 12.
	Write Number Words	1. Recognize and write the number words fifty, sixty, seventy, eighty, ninety and one hundred.
	Subtract to 10	1. Subtract vertically to 10.
	Adding Dimes	1. Add dimes, nickels, and pennies. 2. Use the decimal, cent sign, and dollar sign.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
34	Sum to 15	1. Add to 15.
	Add or Subtract?	1. Select addition or subtraction to solve a problem. 2. Select the plus or minus sign to finish an equation.
	Odd and Even	1. Identify odd and even numbers to 15.
	Fact Families— Addition	1. Work with addition fact families.
	Fact Families— Subtraction	1. Work with subtraction fact families.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
35	Making Shapes	1. Make large shapes out of small ones.
	Sets to 20	1. Match sets from 0 - 20.
	Numbers 11-20	1. Identify numbers from 11 - 20.
	Build Numbers	1. Build numbers from 11 - 20.
	Ordering Numbers	1. Put numbers in order from 0-20.

Math K - Semester B Syllabus

Module	Lesson Title	Objectives
36	Review Ordering	1. Review ordering.
	Review Shapes	1. Review shapes.
	Review Addition Facts	1. Review addition facts.
	Review of Subtraction Facts	1. Review subtraction facts.

Math 1 A Syllabus

Course Description:

This Math 1 course will help students gain fluency in counting, recognize numbers and patterns, compare and contrast objects and shapes, and use money. All Common Core Math 1 standards are met in this course.

Module	Activity Type	Title	Objectives	Assessments
1	Lesson	From Zero to Nine	<ul style="list-style-type: none"> Use the numerals 0 to 9. 	
	IXL Online Practice	Counting Practice	<ul style="list-style-type: none"> Use the numerals 0 to 9. 	<ul style="list-style-type: none"> Fishing for Answers Worksheet
	Lesson	Grouping and Counting	<ul style="list-style-type: none"> Group and count similar items. Skip count by 2. 	<ul style="list-style-type: none"> Counting by 2's Worksheet
	Lesson	Name that Numeral	<ul style="list-style-type: none"> Write the correct numeral for a given set. Create numerals out of common materials. Write the numerals 1 to 9. 	<ul style="list-style-type: none"> Write the Numerals 0 to 9
	Lesson	Number the Bones	<ul style="list-style-type: none"> Fill in missing numbers when counting by 1. 	
	IXL Online Practice	Fill in the Missing Number	<ul style="list-style-type: none"> Count on the hundred chart. 	<ul style="list-style-type: none"> Module 1 Quiz Module 1 Synchronous Session Module 1 Online Practice Score
2	Online Game	Match 10	<ul style="list-style-type: none"> Match two numbers that add up to 10. 	
	Lesson	Stack the Blocks & Shapes	<ul style="list-style-type: none"> Learn the concept of 10. Recognize, describe and create patterns of shape. 	<ul style="list-style-type: none"> Create Patterns with Shapes Worksheet
	Lesson	The New Zoo	<ul style="list-style-type: none"> Match a set with an equal number of items. Use colors and shapes to represent pattern of shapes. 	<ul style="list-style-type: none"> Matching Sets Worksheet

Math 1 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
	IXL Online Practice	Identify 2-D Shapes	<ul style="list-style-type: none"> Identify two-dimensional shapes. 	
	IXL Online Practice	Counting Forward and Backward	<ul style="list-style-type: none"> Count forward and backward. 	
	Lesson	Higher or Lesser	<ul style="list-style-type: none"> Select the set with the most and fewest items. Determine the higher or lesser value in a pair of numerals from 0 to 9. 	<ul style="list-style-type: none"> Module 2 Quiz Module 2 Synchronous Session Module 2 Online Practice Score
3	Lesson	Eleven and Comparing Length	<ul style="list-style-type: none"> Learn the concept of 11. Compare longer and shorter. 	<ul style="list-style-type: none"> Comparing Length Worksheet
	Online Game	Long or Short	<ul style="list-style-type: none"> Identify the longer or shorter object. 	
	Lesson	Adding Pairs	<ul style="list-style-type: none"> Adding pairs of numbers. 	<ul style="list-style-type: none"> Adding Pairs Worksheet Comparing Weight Worksheet
	Lesson	Twelve and Logic Puzzles	<ul style="list-style-type: none"> Learn the concept of 12. Make a selection based on observation of clues. 	<ul style="list-style-type: none"> Who Lives Here? Logic Puzzle Worksheet
	Lesson	Count It!	<ul style="list-style-type: none"> Counting up and down. Skip count by 2. 	<ul style="list-style-type: none"> Missing Numbers Worksheet
	Lesson	Position Words	<ul style="list-style-type: none"> Identify comparison and position word pairs. 	
	IXL Online Practice	Position Words	<ul style="list-style-type: none"> Identify comparison and position word pairs. 	<ul style="list-style-type: none"> Position Words Worksheet Module 3 Quiz Module 3 Synchronous Session Module 3 Online Practice Score
4	Lesson	Ten: Addition Facts	<ul style="list-style-type: none"> Practice the addition facts of 10. 	
	Online Game	Adding Hats with Roly	<ul style="list-style-type: none"> Practice addition facts up to 10. 	

Math 1 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
	Lesson	Pattern Finder	<ul style="list-style-type: none"> Observe and recreate patterns using visual memory. 	
	IXL Online Practice	Patterns	<ul style="list-style-type: none"> Recognize and work with patterns. 	
	Lesson	Coins!	<ul style="list-style-type: none"> Recognize pennies, nickels and dimes. Adding pennies, nickels and dimes. Using the cents symbol. 	<ul style="list-style-type: none"> Pennies, Nickels and Dimes Worksheet
	Lesson	Nonstandard Measurements	<ul style="list-style-type: none"> Measure objects using non-standard units. 	<ul style="list-style-type: none"> Measure It! Worksheet Module 4 Quiz Module 4 Synchronous Session Module 4 Online Practice Score
5	Lesson	The Hour	<ul style="list-style-type: none"> Reading the hour on a clock 	<ul style="list-style-type: none"> The Hour Worksheet
	Lesson	Even or Odd	<ul style="list-style-type: none"> Compare figures and group them into sets. 	<ul style="list-style-type: none"> Even or Odd Worksheet
	Lesson	Position Words: Inside or Outside	<ul style="list-style-type: none"> Identify a point's location using the words inside and outside. 	
	IXL Online Practice	Coins	<ul style="list-style-type: none"> Recognize pennies, nickels, dimes, and quarters. 	
	Lesson	Equivalent Sums	<ul style="list-style-type: none"> Create equivalent but easier or known sums up to 10. 	<ul style="list-style-type: none"> Equivalent Sums Worksheet
	Lesson	Take Away the Veggies	<ul style="list-style-type: none"> Subtract 2 numbers with a minuend less than 6. 	<ul style="list-style-type: none"> Take Away Worksheet Module 5 Quiz Module 5 Synchronous Session Module 5 Online Practice Score
	Online Game	Guess My Button	<ul style="list-style-type: none"> Sort and classify buttons into categories. 	
	Lesson	Subtraction Facts	<ul style="list-style-type: none"> Practice subtraction facts. 	

Math 1 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
6	IXL Online Practice	Length & Height	<ul style="list-style-type: none"> Compare the length or height of two objects to determine which is taller or longer. 	
	Lesson	Regrouping	<ul style="list-style-type: none"> Add 3 numbers with a sum less than 10. Practice regrouping. 	<ul style="list-style-type: none"> Adding Three Numbers Worksheet
	Lesson	One Less	<ul style="list-style-type: none"> Identify a set that has 1 less item than a given set. Identify shared characteristics of members of a set. 	<ul style="list-style-type: none"> One Less Worksheet
	Lesson	Eleven: Addition Facts	<ul style="list-style-type: none"> Correctly do the addition facts of 11. 	<ul style="list-style-type: none"> Module 6 Quiz Module 6 Synchronous Session Module 6 Online Practice Score Benchmark
7	Lesson	Missing Numbers	<ul style="list-style-type: none"> Fill in missing numbers counting up or down. Give and follow directions using location terms. 	<ul style="list-style-type: none"> Compass Rose Worksheet Using Location Terms Worksheet
	IXL Online Practice	Count Tens and Ones Up to 20	<ul style="list-style-type: none"> Count by tens and ones up to twenty. 	
	Lesson	Minuends Less Than 8	<ul style="list-style-type: none"> Subtract 2 numbers with a minuend less than 8. Identify similarities and differences between like objects. 	<ul style="list-style-type: none"> Minuends Less than 8 Worksheet
	Lesson	Horizontal Numbers	<ul style="list-style-type: none"> Add and subtract 2 numbers horizontally. Identify vertical, diagonal and horizontal objects. 	<ul style="list-style-type: none"> Vertical, Horizontal, and Diagonal Worksheet

Math 1 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
	IXL Online Practice	Customary Units of Weight	<ul style="list-style-type: none"> Compare weights of two objects using customary units of weight. 	
	IXL Online Practice	Count Tens and Ones up to 99	<ul style="list-style-type: none"> Count by tens and ones up to ninety-nine. 	<ul style="list-style-type: none"> Module 7 Quiz Module 7 Synchronous Session Module 7 Online Practice Score
8	Lesson	Twelve: Addition Facts	<ul style="list-style-type: none"> Practice the addition facts of 12. Use tally marks to count. 	<ul style="list-style-type: none"> Count the Fruit Worksheet
	Lesson	Count to 29	<ul style="list-style-type: none"> Count up to 29. Add 2 numbers starting with the larger number. Measure and compare temperatures. 	<ul style="list-style-type: none"> Count to 29 Worksheet Hot or Cold? Worksheet
	IXL Online Practice	Read a Thermometer	<ul style="list-style-type: none"> Read a thermometer to the nearest degree using a scale of 5 and 10. 	
	Lesson	Weight	<ul style="list-style-type: none"> Compare the weights of objects. Identify similarities and differences between like objects. 	<ul style="list-style-type: none"> Estimating Weights Worksheet
	Lesson	Minuends Less than 10	<ul style="list-style-type: none"> Subtract 2 one-digit numbers with a minuend less than 10. Put events into order. 	<ul style="list-style-type: none"> Subtraction to 10 Worksheet Sequence of Events Worksheet
	IXL Online Practice	Addition Sentences	<ul style="list-style-type: none"> Write addition sentences. 	<ul style="list-style-type: none"> Module 8 Quiz Module 8 Synchronous Session Module 8 Online Practice Score
9	Lesson	Number Words: One to Ten	<ul style="list-style-type: none"> Recognize words zero, one, two, three, four, five, six, seven, eight, nine, and ten. 	<ul style="list-style-type: none"> Number Words: One to Ten Worksheet
	IXL Online Practice	Write Numbers in Words	<ul style="list-style-type: none"> Write numbers in words up to 10. 	

Math 1 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
	Lesson	Represent Numbers	<ul style="list-style-type: none"> Represent numbers in multiple ways. Represent numbers with movement. 	<ul style="list-style-type: none"> Represent Numbers Worksheets
	Lesson	Double Digit Addition	<ul style="list-style-type: none"> Add one- and two-digit numbers with a sum less than 20. 	<ul style="list-style-type: none"> Double Digit Addition Worksheet
	Lesson	Shape Shades	<ul style="list-style-type: none"> Find multiple geometric shapes in one complex figure. 	
	IXL Online Practice	Geometry of Everyday Objects	<ul style="list-style-type: none"> Identify objects that match specific geometric shapes. 	
	IXL Online Practice	Measure Length with Objects	<ul style="list-style-type: none"> Measure the length of an object using another object. 	<ul style="list-style-type: none"> Module 9 Quiz Module 9 Synchronous Session Module 9 Online Practice Score
10	Lesson	Do You Have Enough?	<ul style="list-style-type: none"> Count money and determine if there is enough to make a purchase. Observe and recreate patterns using visual memory. 	<ul style="list-style-type: none"> Do You Have Enough? Worksheet
	IXL Online Practice	Make a Purchase	<ul style="list-style-type: none"> Determine if there is enough money to make a purchase by counting coins. 	
	IXL Online Practice	Describe Patterns	<ul style="list-style-type: none"> Describe given patterns. 	
	Lesson	The Greatest Value	<ul style="list-style-type: none"> Select the number with the greatest value. 	<ul style="list-style-type: none"> Ladybug Place Value Worksheet
	Lesson	The Least	<ul style="list-style-type: none"> Select the number with the least value. Determine which of four objects weighs the least. 	<ul style="list-style-type: none"> The Least Worksheets

Math 1 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
	Lesson	Thirteen: Addition Facts	<ul style="list-style-type: none"> Select the number with the least value. Determine which of four objects weighs the least. 	
	Lesson	The Nearest Inch	<ul style="list-style-type: none"> Measure a line segment to the nearest inch. 	<ul style="list-style-type: none"> The Nearest Inch Worksheet

Math 2 A Syllabus

Course Description:

During the first semester students will build fluency with basic math facts, and add and subtract within 100 to solve word problems using strategic methods. Students will also manipulate numbers to 1000 using knowledge of hundreds, tens, and ones. Lastly, students will demonstrate arrays with repeated addition.

Materials Needed:

32 Counters (pennies, buttons, beans)

Bag of beans

Yellow Highlighter

Module	Activity Type	Title	Objectives
1	Lesson	Counting Up and Back to Add and Subtract	<ul style="list-style-type: none"> Use the "count on" and "count back" strategies to add and subtract within 20. Distinguish odd and even numbers. Add and subtract odd and even numbers. Examine math vocabulary (add, subtract, sum, difference, addend). Analyze a number.
	IXL Online Practice	Add One Digit Numbers	<ul style="list-style-type: none"> Add one digit numbers with sums up to 20.
	IXL Online Practice	Subtract One Digit Numbers	<ul style="list-style-type: none"> Subtract one digit numbers. Subtract one digit numbers from two digit numbers up to 18.
	IXL Online Practice	Even and Odd	<ul style="list-style-type: none"> Identify even and odd numbers. Count objects and identify if groups are made of an even or odd number of objects.
2	Lesson	Using Tens Facts and Doubles to Add and Subtract	<ul style="list-style-type: none"> Use the "tens facts", "doubles facts", and "turn around facts" to add and subtract within 20 Count manipulatives to group them in ones and tens Examine math vocabulary (eleven, twelve, thirteen-nineteen, equation, equal)

Math 2 A Syllabus

Module	Activity Type	Title	Objectives
	IXL Online Practice	Balanced Equations Addition and Subtraction	<ul style="list-style-type: none"> Balance one-digit addition equations. Balance addition and subtraction equations with digits up to 20.
3	Lesson	Using a Problem Solving Strategy and Hundreds Chart	<ul style="list-style-type: none"> Use addition, subtraction, and a hundreds chart to add and subtract within 100. Examine a problem solving strategy. Write number words for groups of 10.
	IXL Online Practice	Hundreds Chart	<ul style="list-style-type: none"> Use the hundreds chart to count and identify numbers.
4	Lesson	Using Bundles to Make Numbers to 1000	<ul style="list-style-type: none"> Bundle groups of tens to make hundreds up to nine hundreds. Examine math vocabulary. Write the numbers up to 1000 in 10 hundreds charts. Add doubles and doubles plus one.
	IXL Online Practice	Adding Doubles	<ul style="list-style-type: none"> Add two numbers that are the same.
	IXL Online Practice	Writing Numbers	<ul style="list-style-type: none"> Write numbers up to 1,000 in words.
5	Lesson	Skip Count to 1000 and Make Counting Estimations	<ul style="list-style-type: none"> Skip count by 10 to 1000 using the hundreds chart. Examine math vocabulary. Make a counting estimation.
	IXL Online Practice	Skip Counting	<ul style="list-style-type: none"> Skip-count by ones and sequences.
	IXL Online Practice	Estimating	<ul style="list-style-type: none"> Estimate numbers and sums to the nearest ten.

Math 2 A Syllabus

Module	Activity Type	Title	Objectives
6	Lesson	Skip Count by 5 and Add and Subtract with the Inverse	<ul style="list-style-type: none"> Skip count by 5 to 1000 using the hundreds chart Make number patterns using skip counting Examine math vocabulary Turn addition facts around to make subtraction facts
	IXL Online Practice	Skip Counting and Counting Patterns	<ul style="list-style-type: none"> Count using patterns up to 1,000. Solve skip-counting puzzles.
7	Lesson	Compare Numbers with Symbols	<ul style="list-style-type: none"> Use the signs $<$, $>$, and $=$ to compare numbers to 100. Examine math vocabulary (greater than, less than, equal to).
	IXL Online Practice	Comparing Numbers	<ul style="list-style-type: none"> Compare numbers up to 100. Put numbers up to 100 in order. Order numbers up to 100 from least to greatest.
8	Lesson	Using Place Value Strategy to Add	<ul style="list-style-type: none"> Use the place value strategy to add within 100. Write numbers in expanded notation (decompose).
	IXL Online Practice	Convert From Expanded Form	<ul style="list-style-type: none"> Convert from expanded form to numerical form (up to 100's).

Math 2 A Syllabus

Module	Activity Type	Title	Objectives
9	Lesson	Using Decompose Strategy to Add	<ul style="list-style-type: none"> Use the decomposing into tens strategy to add within 100.
	IXL Online Practice	Add Multi-Digit Numbers	<ul style="list-style-type: none"> Add a two-digit number to a one-digit number.
10	Lesson	Using Commutative Property to Add	<ul style="list-style-type: none"> Use the commutative property to add within 100.
	IXL Online Practice	Addition Equations	<ul style="list-style-type: none"> Decide whether an addition statement is true or false.
11	Lesson	Using the Place Value Strategy to Compare Three Digit Numbers	<ul style="list-style-type: none"> Use the place value strategy to compare numbers. Communicate the role of zero in numbers.
	IXL Online Practice	Comparing Numbers	<ul style="list-style-type: none"> Compare numbers up to 1,000. Put numbers up to 1,000 in order. Order numbers up to 1,000 from least to greatest.
	IXL Online Practice	Solve Inequalities	<ul style="list-style-type: none"> Solve inequalities using addition and subtraction shortcuts.
12	Lesson	Expressing Tens and Adding Two Digit Numbers	<ul style="list-style-type: none"> Express tens as a three-digit number. Use the place value strategy to add four two-digit numbers.

Math 2 A Syllabus

Module	Activity Type	Title	Objectives
	IXL Online Practice	Add Two-Digit Numbers	<ul style="list-style-type: none"> Add three or more two-digit numbers.
13	Lesson	Using the Associative Property	<ul style="list-style-type: none"> Use the associative property to make equal equations.
	IXL Online Practice	Write Addition Sentences to Describe Pictures	<ul style="list-style-type: none"> Write addition sentences with sums up to 20 to describe pictures.
14	Lesson	Using the Associative Property to Add and Using the Inverse to Subtract	<ul style="list-style-type: none"> Use the associative property to add two-digit numbers. Use the inverse to subtract.
	IXL Online Practice	Associative Property	<ul style="list-style-type: none"> Balance addition equations using the associative property. Regroup tens and ones.
15	Lesson	Using Manipulatives to Add and Completing Two-Step Word Problems	<ul style="list-style-type: none"> Use manipulatives and the hundreds chart to add and subtract within 1,000, Complete two-step word problems,
	IXL Online Practice	Two-Step Word Problems	<ul style="list-style-type: none"> Solve word problems involving adding three or more one-digit numbers. Solve word problems involving adding three or more two-digit numbers.
16	Lesson	Describing Numbers with Arrays	<ul style="list-style-type: none"> Identify numbers on a hundreds chart up to 25 that can be described with arrays,

Math 2 A Syllabus

Module	Activity Type	Title	Objectives
	IXL Online Practice	Addition in Arrays	<ul style="list-style-type: none"> Identify repeated addition in arrays of sums up to 25. Write addition sentences for arrays with sums up to 25.
17	Lesson	Using the Hundreds Chart to Add Tens and Repeating Addition	<ul style="list-style-type: none"> Use a hundreds chart to add and subtract. Repeat addition to express arrays.
	IXL Online Practice	Add and Subtract Multiples of 100	<ul style="list-style-type: none"> Add and subtract multiples of 100.
18	Lesson	Make a Video to Explain Math Strategies	<ul style="list-style-type: none"> Mentally add and subtract 10 or 100 to any number up to 1,000. Explain addition and subtraction strategies verbally by making a teaching video.
	IXL Online Practice	Counting Patterns	<ul style="list-style-type: none"> Count using patterns up to 1,000.

Math 2 B Syllabus

Course Description:

During the second semester students will use place value to add and subtract within 1000. They will use place value to estimate and solve word problems to demonstrate skills. Students will measure and compare length and represent it on a number line. They will work with money and time to compare value. Students will collect data and represented on graphs to discuss it. Lastly, they will recognize common 2-dimensional and 3-dimensional shapes by specific characteristics.

Materials Needed:

32 Counters (pennies, buttons, beans)

Bag of beans

Yellow Highlighter

Module	Activity Type	Title	Objectives
19	Lesson	Examining Tools to Measure Length	<ul style="list-style-type: none"> Examine math vocabulary. Measure the length of an object in units. Examine measurement tools.
	IXL Online Practice	Choose the Appropriate Measuring Tool	<ul style="list-style-type: none"> Determine which measuring tool is appropriate to a given situation.
20	Lesson	Measuring Length: Inches and Centimeters	<ul style="list-style-type: none"> Measure the length of an object in inches and centimeters.
	IXL Online Practice	Measure Using an Inch Ruler	<ul style="list-style-type: none"> Use an inch ruler to measure objects.
	IXL Online Practice	Measure Using a Centimeter Ruler	<ul style="list-style-type: none"> Use a centimeter ruler to measure objects.

Math 2 B Syllabus

Module	Activity Type	Title	Objectives
21	Lesson	Measuring Length: Feet and Meters	<ul style="list-style-type: none"> Measure the length of an object in feet and meters. Use measurement vocabulary when solving problems.
	IXL Online Practice	Hundreds Chart	<ul style="list-style-type: none"> Count and identify numbers using the hundreds chart.
22	Lesson	Decisions about Units of Measure	<ul style="list-style-type: none"> Make a decision about when to use specific units.
	IXL Online Practice	Which Customary Unit of Length is Appropriate?	<ul style="list-style-type: none"> Determine which customary unit of length is appropriate for a given situation.
	IXL Online Practice	Which Metric Unit of Length is Appropriate?	<ul style="list-style-type: none"> Determine which metric unit of length is appropriate for a given situation.
23	Lesson	Estimating Length	<ul style="list-style-type: none"> Estimate length in centimeters, inches, feet, and meters
	IXL Online Practice	Fact Families	<ul style="list-style-type: none"> Identify facts within a fact family.
24	Lesson	Comparing Length	<ul style="list-style-type: none"> Measure to determine how much longer one object is than another.
	IXL Online Practice	Subtract Two Two-Digit Numbers – With Regrouping	<ul style="list-style-type: none"> Use regrouping to subtract two two-digit numbers.

Math 2 B Syllabus

Module	Activity Type	Title	Objectives
25	Lesson	Solving Word Problems about Length	<ul style="list-style-type: none"> Solve word problems with addition and subtraction to 100 involving length.
	IXL Online Practice	Customary Units of Length: Word Problems	<ul style="list-style-type: none"> Solve word problems involving customary units of length.
	IXL Online Practice	Metric Units of Length: Word Problems	<ul style="list-style-type: none"> Solve word problems involving metric units of length.
26	Lesson	Expressing Length with Addition and a Number Line	<ul style="list-style-type: none"> Use a number line to demonstrate addition with length.
	IXL Online Practice	Number Lines- Up to 100	<ul style="list-style-type: none"> Use number lines up to 100.
	IXL Online Practice	Guess the Number	<ul style="list-style-type: none"> Use counting skills to identify a number.
27	Lesson	Repeating Subtraction to Divide	<ul style="list-style-type: none"> Use a number line to demonstrate subtraction with length. Use repeated subtraction to divide.
	IXL Online Practice	Add and Subtract Numbers Up to 100	<ul style="list-style-type: none"> Add and subtract using numbers up to 100.

Math 2 B Syllabus

Module	Activity Type	Title	Objectives
	IXL Online Practice	Divisors and Quotients Up to 5	<ul style="list-style-type: none"> Use repeated addition to solve division problems with divisors and quotients up to 5.
28	Lesson	Expressing Time in Minutes	<ul style="list-style-type: none"> Make a clock. Move the long hand to tell time to the nearest five minutes.
	IXL Online Practice	Reading Clocks-Hour and Half Hour	<ul style="list-style-type: none"> Read a clock to the nearest half-hour.
	IXL Online Practice	Reading Clocks	<ul style="list-style-type: none"> Read a clock to the nearest minute.
29	Lesson	Money Identification and Symbols	<ul style="list-style-type: none"> Identify pennies, dimes, nickels, quarters, and dollar bills.
	IXL Online Practice	Names of Common Coins	<ul style="list-style-type: none"> Identify common coins by name.
	IXL Online Practice	Names and Values of All Coins	<ul style="list-style-type: none"> Identify and value the common coins.
30	Lesson	Adding and Subtracting Money	<ul style="list-style-type: none"> Add and subtract pennies, dimes, nickels, quarters, and dollar bills. Examine register tape from shopping trips. Make and solve word problems using money.
	IXL Online Practice	Add Money – Up to \$1	<ul style="list-style-type: none"> Solve addition problems involving money up to \$1.

Math 2 B Syllabus

Module	Activity Type	Title	Objectives
	IXL Online Practice	Subtract Money – Up to \$1	<ul style="list-style-type: none"> Solve subtraction problems involving money up to \$1.
	IXL Online Practice	Add and subtract Money – Up to \$1	<ul style="list-style-type: none"> Solve addition and subtraction problems involving money up to \$1.
31	Lesson	Using Data to Make Line Plots	<ul style="list-style-type: none"> Make a line plot with measurement data.
	IXL Online Practice	Interpret Line Plots	<ul style="list-style-type: none"> Interpret data on a line plot.
	IXL Online Practice	Create Line Plots	<ul style="list-style-type: none"> Create a line plot using data.
32	Lesson	Using Bar Graphs to Solve Word Problems	<ul style="list-style-type: none"> Make a picture graph and bar graph with data. Solve simple problem with the graphs.
	IXL Online Practice	Interpret Bar Graphs	<ul style="list-style-type: none"> Interpret data on a bar graph.
	IXL Online Practice	Create Bar Graphs	<ul style="list-style-type: none"> Create a bar graph using data.
33	Lesson	Identifying Shape Attributes	<ul style="list-style-type: none"> Identify and draw shapes with specific attributes.

Math 2 B Syllabus

Module	Activity Type	Title	Objectives
	IXL Online Practice	Count Shapes in a Venn Diagram	<ul style="list-style-type: none"> Count shapes on a Venn diagram.
	IXL Online Practice	Sort Shapes into a Venn Diagram	<ul style="list-style-type: none"> Classify and sort shapes using a Venn diagram.
34	Lesson	Making Fractions	<ul style="list-style-type: none"> Partition a rectangle into equal parts.
	IXL Online Practice	Equal Parts	<ul style="list-style-type: none"> Identify when a shape is divided into equal parts.
35	Lesson	Folding Paper to Make Fractions	<ul style="list-style-type: none"> Fold paper to partition circles and rectangles and describe the folds using halves, thirds, and fourths. Examine math vocabulary (half, third, fourth, quarter).
	IXL Online Practice	Fraction Models Equivalent to Whole Numbers	<ul style="list-style-type: none"> Identify fractions to describe a divided shape.
	IXL Online Practice	Halves, Thirds, and Fourths	<ul style="list-style-type: none"> Identify when an object is divided into halves, thirds, and fourths.
36	Lesson	Solving Word Problems about Math Concepts	<ul style="list-style-type: none"> Solve word problems involving time, money, and folding shapes.
	IXL Online Practice	Elapsed Time II	<ul style="list-style-type: none"> Solve problems involving elapsed time.

Math 2 B Syllabus

Module	Activity Type	Title	Objectives
	IXL Online Practice	Add and Subtract Money – Up to \$1.	<ul style="list-style-type: none">Solve addition and subtraction problems involving money up to \$1.
	IXL Online Practice	Fraction Word Problems	<ul style="list-style-type: none">Solve word problems involving fractions.

Math 3 A Syllabus

Course Description:

During the first semester, students will build flexibility with numbers as they master addition and subtraction facts as well as multiplication and division facts. Students will understand relationships between addition and subtraction, multiplication and addition and multiplication and division as they learn to borrow, carry, and regroup in order to find sums and differences of two whole numbers up to 10,000. Students will also comprehend the place value of base ten numbers up to 1,000,000 in order to find patterns and make estimations. Lastly, they will implement a 4-step approach to solving problems and express numbers differently including translating them into Roman Numerals or expressing them as ordinal numbers.

Materials Needed:

50 Counters (pennies, buttons, beans)

Pennies (41)

Dimes (4)

Module	Activity Type	Title	Objectives	Assessments
1	Lesson	Math Facts 0-50	<ul style="list-style-type: none"> Define math words- sum, difference, equality. Write facts for the number 50. Solve word problems with numbers 0-50. 	<ul style="list-style-type: none"> Math Facts 0-50 Notes Assignment Math Facts 0-50 Quiz Lesson 1 Online Practice Score
	IXL Online Practice	Fact Families	<ul style="list-style-type: none"> Identify fact families in an addition or subtraction sentence. 	
2	Lesson	Hundreds Chart: Add and Subtract	<ul style="list-style-type: none"> Complete mental addition and subtraction math facts. List numbers to 100 by 2s, 3s, 5s, 10s. Use 100s chart to identify greater and less than 1 and 10. Use 100s chart to add and subtract. 	<ul style="list-style-type: none"> Hundreds Chart: Add and Subtract Notes Assignment Hundreds Chart: Add and Subtract Quiz Lesson 2 Online Practice Score
	IXL Online Practice	Hundreds Chart	<ul style="list-style-type: none"> Use 100s chart to identify greater and less than 1 and 10. Use 100s chart to add and subtract. 	

Math 3 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
3	Lesson	Expanded Notation	<ul style="list-style-type: none"> Complete mental addition and subtraction math facts. List numbers to 1000 by 100 and by 50. Use 100s chart to add and subtract. Write numbers to 999 in expanded notation and word form. 	<ul style="list-style-type: none"> Expanded Notation Notes Assignment Expanded Notation Quiz Lesson 3 Online Practice Score
	IXL Online Practice	Expanded Notation	<ul style="list-style-type: none"> Convert between expanded form and standard form of numbers. 	
4	Lesson	Place Value	<ul style="list-style-type: none"> Complete mental addition and subtraction math facts. Explain the purpose of place value. Identify a given place value. 	<ul style="list-style-type: none"> Place Value Notes Assignment Place Value 0-50 Quiz Lesson 4 Online Practice Score
	IXL Online Practice	Place Value	<ul style="list-style-type: none"> Identify the name of a place value. Identify the digit with a particular place value. 	
5	Lesson	Regroup to Add and Subtract	<ul style="list-style-type: none"> Complete mental addition and subtraction math facts. Regroup to add. Regroup to subtract. 	<ul style="list-style-type: none"> Regroup to Add and Subtract Notes Assignment Regroup to Add and Subtract 0-50 Quiz Lesson 5 Online Practice Score
	IXL Online Practice	Regroup with Addition	<ul style="list-style-type: none"> Regroup to add. 	
	IXL Online Practice	Regroup with Subtraction	<ul style="list-style-type: none"> Regroup to subtract. 	
6	Lesson	Roman and Ordinal Numbers	<ul style="list-style-type: none"> Complete mental addition and subtraction math facts. Regroup to add and subtract. Borrow (regroup) across zero digit. Translate numbers into Roman Numerals 1-20. 	<ul style="list-style-type: none"> Roman and Ordinal Numbers Notes Assignment Roman and Ordinal Numbers Quiz Lesson 6 Online Practice Score

Math 3 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
	IXL Online Practice	Roman and Ordinal Numbers	<ul style="list-style-type: none"> Identify location with ordinal numbers. Translate numbers into Roman Numerals 1-20. Identify location with ordinal numbers. 	
	Lesson	Place Value to Billions	<ul style="list-style-type: none"> Complete mental addition and subtraction math facts. Identify place value to the billions. Round whole numbers to the given place value. 	<ul style="list-style-type: none"> Place Value to Billions Notes Assignment Place Value to Billions Quiz Lesson 7 Online Practice Score
7	IXL Online Practice	Place Value and Rounding	<ul style="list-style-type: none"> Identify the name of a place value. Identify the digit with a particular place value. Round a number to a given place value. 	
8	Lesson	Estimate to Add	<ul style="list-style-type: none"> Explain why estimation is necessary. Estimate to answer addition problems. Discuss numbers using the language odd, even, dozen, half dozen, pair. 	<ul style="list-style-type: none"> Estimate to Add Notes Assignment Estimate to Add Quiz Lesson 8 Online Practice Score
	IXL Online Practice	Estimate to Add	<ul style="list-style-type: none"> Estimate to answer addition problems. 	
9	Lesson	Problem Solving Method	<ul style="list-style-type: none"> Explain how diagrams can help you solve problems. Use a four-step method to solve a problem. Solve word problems. 	<ul style="list-style-type: none"> Problem Solving Method Notes Assignment Problem Solving Method Quiz Lesson 9 Online Practice Score
	IXL Online Practice	Word Problems	<ul style="list-style-type: none"> Solve multi-step word problems involving numbers up to three digits. 	

Math 3 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
10	Lesson	Addition to Multiplication	<ul style="list-style-type: none"> Estimate to add and subtract. Define multiplication. Compare and contrast multiplication and addition. Identify multiplication words and symbols. Solve word problems. 	<ul style="list-style-type: none"> Addition to Multiplication Notes Assignment M Addition to Multiplication Quiz Lesson 10 Online Practice Score
	IXL Online Practice	Multiplication Facts 0, 1, and 2	<ul style="list-style-type: none"> Multiply numbers by 0, 1, and 2. State multiplication facts for 0, 1, and 2. 	
11	Lesson	Multiplying Times 3 and 4	<ul style="list-style-type: none"> Complete mental addition, subtraction, and multiplication facts. Make arrays to model multiplication facts (3s and 4s). Make 100s chart patterns to model multiplication facts (3s and 4s). Solve multiplication word problems. 	<ul style="list-style-type: none"> Multiplying Times 3 and 4 Notes Assignment Multiplying Times 3 and 4 Quiz Lesson 11 Online Practice Score
	IXL Online Practice	Multiplication Facts 3 and 4	<ul style="list-style-type: none"> Multiply numbers by 3 and 4. State multiplication facts for 3 and 4. 	
12	Lesson	Multiplying Times 5 and 6	<ul style="list-style-type: none"> Complete mental addition, subtraction, and multiplication facts. Make arrays to model multiplication facts (5s and 6s). Solve multiplication word problems. Make patterns on 100s chart to model multiplication facts (5s and 6s). 	<ul style="list-style-type: none"> Multiplying Times 5 and 6 Notes Assignment Multiplying Times 5 and 6 Quiz Lesson 12 Online Practice Score
	IXL Online Practice	Multiplication Facts 5 and 6	<ul style="list-style-type: none"> Multiply numbers by 5 and 6. State multiplication facts for 5 and 6. 	
13	Lesson	Multiplying Times 7 and 10	<ul style="list-style-type: none"> Complete mental addition, subtraction, and multiplication facts. 	<ul style="list-style-type: none"> Multiplying Times 7 and 10 Notes Assignment

Math 3 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
			<ul style="list-style-type: none"> • Make arrays to model multiplication facts (7s and 10s). • Solve multiplication word problems. • Make patterns on the hundreds chart to model multiplication facts (7s). • Count to 1,000 and 10,000 by 10 on the hundred's chart. 	<ul style="list-style-type: none"> • Multiplying Times 7 and 10 Quiz • Lesson 13 Online Practice Score
	IXL Online Practice	Multiplication Facts 7 and 10	<ul style="list-style-type: none"> • Multiply numbers by 7 and 10. • State multiplication facts for 7 and 10. 	
14	Lesson	Multiplying Times 8 and 9	<ul style="list-style-type: none"> • Complete mental addition, subtraction, and multiplication facts. • Find patterns with facts of 8 and facts of 4. • Model multiplication facts (9s). 	<ul style="list-style-type: none"> • Multiplying Times 8 and 9 Notes Assignment • Multiplying Times 8 and 9 Quiz • Lesson 14 Online Practice Score
	IXL Online Practice	Multiplication Facts 8 and 9	<ul style="list-style-type: none"> • Multiply numbers by 8 and 9. • State multiplication facts for 8 and 9. 	
15	Lesson	Patterns to Add and Multiply	<ul style="list-style-type: none"> • Complete mental addition, subtraction, and multiplication facts. • Create addition chart. • Create multiplication chart. 	<ul style="list-style-type: none"> • Patterns to Add and Multiply Notes Assignment • Patterns to Add and Multiply Quiz • Lesson 15 Online Practice Score
	IXL Online Practice	Multiplication Tables and Patterns	<ul style="list-style-type: none"> • Use multiplication tables and patterns to add and multiply. 	
16	Lesson	Inverse: Multiplication and Division	<ul style="list-style-type: none"> • Complete mental addition, subtraction, and multiplication facts. • Compare and contrast multiplication and division. 	<ul style="list-style-type: none"> • Inverse: Multiplication and Division Notes Assignment • Inverse: Multiplication and Division Quiz • Lesson 16 Online Practice Score
	IXL Online Practice	Multiplication and Division	<ul style="list-style-type: none"> • Relate multiplication and division as inverse operations. 	

Math 3 A Syllabus

Module	Activity Type	Title	Objectives	Assessments
			<ul style="list-style-type: none"> Complete multiplication and division problems. 	
17	Lesson	Multiplication: 2 Digit by 1 Digit	<ul style="list-style-type: none"> Complete mental addition, subtraction, and multiplication facts. Multiply a two, three, or four digit number by one number. 	<ul style="list-style-type: none"> Multiplication: 2 Digit by 1 Digit Notes Assignment Multiplication: 2 Digit by 1 Digit Quiz Lesson 17 Online Practice Score
	IXL Online Practice	Multiply 1 Digit Number by a Larger Number	<ul style="list-style-type: none"> Multiply a one digit number by a larger number. 	
18	Lesson	One-Step Division with Remainder	<ul style="list-style-type: none"> Complete mental addition, subtraction, multiplication and division facts. Use one step to divide with a remainder. 	<ul style="list-style-type: none"> One-Step Division with Remainder Notes Assignment One-Step Division with Remainder Quiz Lesson 18 Online Practice Score
	IXL Online Practice	Add, Subtract, Multiply and Divide	<ul style="list-style-type: none"> State addition, subtraction, multiplication, and division facts. 	

Math 3 B Syllabus

Course Description:

During the second semester, students will explore concepts of measurement including linear measurement, weight, volume, temperature, and time. They will also recognize, compare, and convert fractions. Students will write amounts of money and make change using as few coins as possible. Lastly, students will examine lines, polygons, and solid figures as they are introduced to basic concepts of geometry.

Materials Needed:

- 12 sheets of hundreds blocks
- Penny, nickel, dime, quarter, dollar bill
- Spoon
- Ruler
- Tape measure
- Wire hangar
- 2 Paper cups
- String
- Tape
- 10 Paper clips
- Crayon (new)
- Liquid measuring cup
- Gallon jug
- Water bottle (liter)
- Eye dropper or medicine spoon
- Thermometers (assorted)
- Brad (brass)
- Cardboard or paper plate
- Glue stick
- Scissors

Module	Activity Type	Title	Objectives	Assessments
19	Lesson	Comparing Fractions	<ul style="list-style-type: none"> • Explain numerator and denominator. • Use pictures to identify and write halves, thirds, and fourths. • Compare fractions with like denominators (halves, thirds, and fourths). • Add 1, 2, 11, and 12 to any number quickly. 	<ul style="list-style-type: none"> • Comparing Fractions Notes Assignment • Comparing Fractions Quiz • Lesson 19 Online Practice Score
	IXL Online Practice	Identify halves, thirds, and fourths	<ul style="list-style-type: none"> • Identify fractions as part of a whole. 	

Math 3 B Syllabus

Module	Activity Type	Title	Objectives	Assessments
	IXL Online Practice	Understand fractions: area models	<ul style="list-style-type: none"> Recognize the model that matches the fraction and vice versa. 	
20	Lesson	Analyzing Fractions	<ul style="list-style-type: none"> Use pictures to identify fractions (fifths - twelfths). Explain equivalent fractions with the denominator 2-12. Explain fractions with the denominator 100. Compute facts with the four operations. 	<ul style="list-style-type: none"> Analyzing Fractions Notes Assignment Analyzing Fractions Quiz Lesson 20 Online Practice Score
	IXL Online Practice	Match unit fractions to models	<ul style="list-style-type: none"> Recognize the model that matches the fraction and vice versa. 	
	IXL Online Practice	Match fractions to models	<ul style="list-style-type: none"> Recognize the model that matches the fraction and vice versa. 	
21	Lesson	Decimals and Fractions	<ul style="list-style-type: none"> Write mixed numbers. Read decimals to the hundredths. Convert fractions to decimals. Compute facts with the four operations. 	<ul style="list-style-type: none"> Decimals and Fractions Notes Assignment Decimals and Fractions Quiz Lesson 21 Online Practice Score
	IXL Online Practice	Match mixed numbers to models	<ul style="list-style-type: none"> Identify a model that matches a mixed number and vice versa. 	
	IXL Online Practice	Word names for mixed numbers	<ul style="list-style-type: none"> Write out the number that matches a model of a mixed number. 	
22	Lesson	Adding and Subtracting Money	<ul style="list-style-type: none"> Compare, add and subtract amounts of money. 	<ul style="list-style-type: none"> Adding and Subtracting Money Notes Assignment

Math 3 B Syllabus

Module	Activity Type	Title	Objectives	Assessments
	IXL Online Practice	Add and subtract money amounts	<ul style="list-style-type: none"> Add and subtract amounts of money. 	<ul style="list-style-type: none"> Adding and Subtracting Money Quiz Lesson 22 Online Practice Score
	IXL Online Practice	Add money amounts - word problems	<ul style="list-style-type: none"> Solve word problems involving adding money. 	
23	Lesson	Making Change	<ul style="list-style-type: none"> Compare, add and subtract amounts of money. 	<ul style="list-style-type: none"> Making Change Notes Assignment Making Change Quiz Lesson 24 Online Practice Score
	IXL Online Practice	Making change	<ul style="list-style-type: none"> Find the amount of change return for a purchase. 	
	IXL Online Practice	Purchases – do you have enough money – up to \$10	<ul style="list-style-type: none"> Find the amount of change return for a purchase. 	
24	Lesson	Word Problems with Parentheses	<ul style="list-style-type: none"> Interpret word problems with two steps. Solve equations with two or more operations. Indicate order of operations with parentheses. Add and subtract quarters, dimes, and nickels mentally. 	<ul style="list-style-type: none"> Word Problems with Parentheses Notes Assignment Word Problems with Parentheses Quiz Lesson 24 Online Practice Score
	IXL Online Practice	Understanding parentheses	<ul style="list-style-type: none"> Solve problems involving parentheses. 	
	IXL Online Practice	Missing operators	<ul style="list-style-type: none"> Determine the missing operator to make a problem true. 	
25	Lesson	Linear Measurement: Inches, Feet, and Yards	<ul style="list-style-type: none"> Compare yards, feet, and inches Measure items using non-standard units. Measure items in yards, feet, and inches. 	<ul style="list-style-type: none"> Linear Measurement: Inches, Feet, and Yards Notes Assignment Linear Measurement: Inches, Feet, and Yards Quiz Lesson 25 Online Practice Score

Math 3 B Syllabus

Module	Activity Type	Title	Objectives	Assessments
			<ul style="list-style-type: none"> Mentally compute with regrouping. Use basic fact knowledge to convert feet and yards to inches. 	
	IXL Online Practice	Which customary unit of length is appropriate?	<ul style="list-style-type: none"> Determine which customary unit of length is appropriate to a given situation. 	
	IXL Online Practice	Compare and Convert customary units of length	<ul style="list-style-type: none"> Compare and convert between the customary units of length. 	
26	Lesson	Linear Measurement: Centimeters and Meters	<ul style="list-style-type: none"> Compare centimeters and meters. Measure items in centimeters and meters. Mentally compute with regrouping. Convert between centimeters and meters. 	<ul style="list-style-type: none"> Linear Measurement: Centimeters and Meters Notes Assignment Linear Measurement: Centimeters and Meters Quiz Lesson 26 Online Practice Score
	IXL Online Practice	Which metric unit of length is appropriate?	<ul style="list-style-type: none"> Determine which metric unit of length is appropriate to a given situation. 	
	IXL Online Practice	Compare and convert metric units of length	<ul style="list-style-type: none"> Compare and convert between the metric units of length. 	
27	Lesson	Weight: Ounces and Pounds	<ul style="list-style-type: none"> Compare the weight of objects using a non-standard unit of measure. Identify abbreviations for pounds and ounces. Estimate and measure weight in pounds and ounces. Mentally compute with regrouping. 	<ul style="list-style-type: none"> Weight: Ounces and Pounds Notes Assignment Weight: Ounces and Pounds Quiz Lesson 27 Online Practice Score

Math 3 B Syllabus

Module	Activity Type	Title	Objectives	Assessments
	IXL Online Practice	Which customary unit of weight is appropriate?	<ul style="list-style-type: none"> Compare and convert between the customary units of weight. 	
	IXL Online Practice	Compare and convert customary units of weight	<ul style="list-style-type: none"> Compare and convert between the customary units of weight. 	
28	Lesson	Weight: Grams and Kilograms	<ul style="list-style-type: none"> Explain the difference between mass and weight. Convert grams and kilograms Estimate mass in grams and kilograms. Compute mentally with regrouping. 	<ul style="list-style-type: none"> Weight: Grams and Kilograms Notes Assignment Weight: Grams and Kilograms Quiz Lesson 28 Online Practice Score
	IXL Online Practice	Which metric unit of weight is appropriate?	<ul style="list-style-type: none"> Compare and convert between the metric units of weight. 	
	IXL Online Practice	Compare and convert metric units of weight	<ul style="list-style-type: none"> Compare and convert between the metric units of weight. 	
29	Lesson	Volume: Cups, Pints, Quarts, and Gallons	<ul style="list-style-type: none"> Choose the most appropriate unit to measure volume. Estimate and measure liquid in cups, pints, quarts, and gallons. Identify equivalent capacity in cups, pints, quarts, and gallons. Mentally compute with regrouping. 	<ul style="list-style-type: none"> Volume: Cups, Pints, Quarts, and Gallons Notes Assignment Volume: Cups, Pints, Quarts, and Gallons Quiz Lesson 29 Online Practice Score
	IXL Online Practice	Which customary unit of volume is appropriate?	<ul style="list-style-type: none"> Determine the best customary unit of volume for a given situation. 	

Math 3 B Syllabus

Module	Activity Type	Title	Objectives	Assessments
	IXL Online Practice	Compare and convert customary units of volume.	<ul style="list-style-type: none"> Compare and convert between the customary units of volume. 	
30	Lesson	Volume: Liters to Quarts	<ul style="list-style-type: none"> Compare liters to quarts. Measure fractional amounts. Solve capacity word problems Compute mentally with regrouping. 	<ul style="list-style-type: none"> Volume: Liters to Quarts Notes Assignment Volume: Liters to Quarts Quiz Lesson 30 Online Practice Score
	IXL Online Practice	Which metric unit of volume is appropriate?	<ul style="list-style-type: none"> Determine the best metric unit of volume for a given situation. 	
	IXL Online Practice	Compare and convert metric units of volume.	<ul style="list-style-type: none"> Compare and convert between the metric units of volume. 	
31	Lesson	Temperature: Fahrenheit and Celsius	<ul style="list-style-type: none"> Measure temperature in degrees Fahrenheit and Celsius. Record temperature with degree sign. Know the freezing point of water in degrees Fahrenheit and Celsius. Mentally compute with decimals. 	<ul style="list-style-type: none"> Temperature: Fahrenheit and Celsius Notes Assignment Temperature: Fahrenheit and Celsius Quiz Lesson 31 Online Practice Score
	IXL Online Practice	Reasonable temperature	<ul style="list-style-type: none"> Determine a reasonable temperature measure given a specific situation. 	
	IXL Online Practice	What decimal number is illustrated?	<ul style="list-style-type: none"> Determine the numeric decimal for a given model. 	
32	Lesson	Movement of Time on Clock	<ul style="list-style-type: none"> Record date and time in words and numbers. Convert days, hours, minutes, and seconds. Read the minute hand on a clock. 	<ul style="list-style-type: none"> Movement of Time on Clock Notes Assignment Movement of Time on Clock Quiz Lesson 32 Online Practice Score

Math 3 B Syllabus

Module	Activity Type	Title	Objectives	Assessments
			<ul style="list-style-type: none"> Add and subtract numbers 0-60 mentally. 	
	IXL Online Practice	Read clocks and write times	<ul style="list-style-type: none"> Tell and write time to the nearest minute. 	
	IXL Online Practice	Read a calendar	<ul style="list-style-type: none"> Read the date from a calendar. 	
33	Lesson	Time: Hour, Half Hour and Quarter Hour	<ul style="list-style-type: none"> Read time on the hour, half, and quarter hour. Express time in "minutes before" and "minutes after". Discuss elapsed time on the half and quarter hour. Add and subtract number 0-60 mentally. 	<ul style="list-style-type: none"> Time: Hour, Half Hour and Quarter Hour Notes Assignment Time: Hour, Half Hour and Quarter Hour Quiz Lesson 33 Online Practice Score
	IXL Online Practice	Elapsed time I	<ul style="list-style-type: none"> Solve problems related to elapsed time. 	
	IXL Online Practice	Elapsed time II	<ul style="list-style-type: none"> Solve problems related to elapsed time. 	
34	Lesson	Attributes of Two-Dimensional Shapes	<ul style="list-style-type: none"> Identify and describe points, lines, line segments, rays, and angles. Distinguish two dimensional and three dimensional shapes. Draw and describe the properties of polygons with two - six sides. Distinguish quadrilaterals. Mentally compute with regrouping. 	<ul style="list-style-type: none"> Attributes of Two-Dimensional Shapes Notes Assignment Attributes of Two-Dimensional Shapes Quiz Lesson 34 Online Practice Score
	IXL Online Practice	Which 2-dimensional shape is being described?	<ul style="list-style-type: none"> Identify the two-dimensional shape described. 	

Math 3 B Syllabus

Module	Activity Type	Title	Objectives	Assessments
	IXL Online Practice	Classify quadrilaterals	<ul style="list-style-type: none"> Classify quadrilaterals based on attributes. 	
35	Lesson	Quadrilaterals and Three-Dimensional Shapes	<ul style="list-style-type: none"> Identify quadrilaterals by name Define polyhedron, faces, sides, and vertices Describe congruent figures Identify quadrilaterals by name 	<ul style="list-style-type: none"> Quadrilaterals and Three-Dimensional Shapes Notes Assignment Quadrilaterals and Three-Dimensional Shapes Quiz Lesson 35 Online Practice Score
	IXL Online Practice	Identify 2-dimensional and 3-dimensional shapes	<ul style="list-style-type: none"> Identify two- and three-dimensional shapes. 	
	IXL Online Practice	Count and compare sides and angles	<ul style="list-style-type: none"> Count and compare the number of sides and angles in given shapes. 	
36	Lesson 36	Slides, Flips, and Turns	<ul style="list-style-type: none"> Analyze quadrilaterals. Identify and describe the results of a slide, flip, and turn. Describe symmetry. Tessellate a shape. 	<ul style="list-style-type: none"> Slides, Flips, and Turns Notes Assignment Slides, Flips, and Turns Quiz Lesson 36 Online Practice Score
	IXL Online Practice	Reflection, rotation, and translation	<ul style="list-style-type: none"> Identify slides (translation), flips (turns), and turns (rotation). 	
	IXL Online Practice	Symmetry	<ul style="list-style-type: none"> Identify pictures which reflect symmetry. 	

Math 4 A Syllabus

Course Description:

Grade 4 math uses a varied amount of instructional material to reinforce and teach new math skills to the 4th grade learners. Instruction includes creative videos, mathematical storytelling, practical math applications and repetition to reinforce skills throughout the course. Three areas are focused on and students will finish the course with a strong knowledge in these content areas. The first is developing an understanding and fluency with multi-digit multiplication, and developing the understanding of dividing to find quotients involving multi-digit dividends. The second is developing an understanding of fraction equivalence, addition and subtraction of fractions with like denominators, and multiplication of fractions with whole numbers. The third will be addressed in semester B.

Materials Needed: Scissors, Graph paper, Markers, Ruler

Module	Lesson Title	Objectives
1	Writing Multiplication	<ul style="list-style-type: none"> Identify and write multiplicative equations.
	Multiplication Comparison	<ul style="list-style-type: none"> Make multiplicative comparisons.
	Solving Basic Equations	<ul style="list-style-type: none"> Solve basic multiplication equations for an unknown.
	Parts of a Word Problem	<ul style="list-style-type: none"> Identify the known and unknown parts of a word problem.
	Translation into Equations	<ul style="list-style-type: none"> Translate comparative situations into equations with an unknown and solve.
	Interpretation	<ul style="list-style-type: none"> Interpret word problems.
	Estimation Strategies	<ul style="list-style-type: none"> Use acceptable estimation strategies and justify the solution.
	Remainders	<ul style="list-style-type: none"> Add two multi-digit whole numbers with accuracy, efficiency and flexibility.
Module 1 Exam		

Math 4 A Syllabus

Module	Lesson Title	Objectives
2	Factoring	<ul style="list-style-type: none"> Find factors of whole numbers.
	Prime Numbers	<ul style="list-style-type: none"> Use factoring rules to classify numbers as prime and justify answer.
	Common Multiples	<ul style="list-style-type: none"> Find multiples of whole numbers.
	Composite Numbers	<ul style="list-style-type: none"> Use factoring rules to classify numbers as composite, and justify answers.
	Basic Patterns	<ul style="list-style-type: none"> Identify attributes that determine a pattern.
	Arithmetic Number Patterns	<ul style="list-style-type: none"> Identify number patterns.
	T-Charts	<ul style="list-style-type: none"> Use a t-chart to identify number patterns.
	Rounding	<ul style="list-style-type: none"> Round numbers to the nearest tens and hundreds place.
	Estimating	<ul style="list-style-type: none"> Use rounding to make estimates.
	Place Value	<ul style="list-style-type: none"> Identify place value in multi-digit whole numbers.
	Multiplying by 10 and 100	<ul style="list-style-type: none"> Multiply by 10 and 100.
	Module 2 Exam	
3	Expanded Form	<ul style="list-style-type: none"> Read and write numbers using expanded form.
	Rounding to Hundreds and Thousands	<ul style="list-style-type: none"> Using a number line, round answers to the nearest 100 and 1000 place.
	Hundreds Chart	<ul style="list-style-type: none"> Using a hundreds chart, round answers to the nearest 100 and 1000 place.

Math 4 A Syllabus

Module	Lesson Title	Objectives
	Comparison	<ul style="list-style-type: none"> Compare two multi-digit whole numbers.
	Adding Two Whole Numbers	<ul style="list-style-type: none"> Add two multi-digit whole numbers with accuracy, efficiency and flexibility.
	Adding Several Whole Numbers	<ul style="list-style-type: none"> Add several multi-digit whole numbers with accuracy, efficiency and flexibility.
	Re-grouping	<ul style="list-style-type: none"> Add multi-digit whole numbers using a re-grouping strategy.
	Subtraction Skills	<ul style="list-style-type: none"> Subtract multi-digit whole numbers with accuracy, efficiency and flexibility.
	Subtraction with Zeros	<ul style="list-style-type: none"> Subtract multi-digit whole numbers with accuracy, efficiency and flexibility. Apply knowledge of subtraction to solve word problems.
	Module 3 Exam	
4	Clustering	<ul style="list-style-type: none"> Multiply numbers using clustering.
	Regrouping Multiplication	<ul style="list-style-type: none"> Multiply numbers using re-grouping.
	Multiplying with Arrays	<ul style="list-style-type: none"> Multiply numbers using the arrays model.
	Applications of Multiplication	<ul style="list-style-type: none"> Apply any of the multiplication strategies to solve real-life problems.
	Long Division	<ul style="list-style-type: none"> Divide numbers using a traditional algorithm.
	Dividing Using Grouping	<ul style="list-style-type: none"> Divide numbers using groups for the divisor.
	Area Model	<ul style="list-style-type: none"> Divide numbers using area models.
	Application of Division Strategies	<ul style="list-style-type: none"> Apply any of the division strategies to solve real-life problems.

Math 4 A Syllabus

Module	Lesson Title	Objectives
	Fraction Parts	<ul style="list-style-type: none"> Define fraction, numerator, denominator, fraction bar.
	Fraction Shape	<ul style="list-style-type: none"> Identify the number of shaded parts and the number of equal parts in a shape (circle, rectangle).
	Writing Fractions	<ul style="list-style-type: none"> Write a fraction using mathematical notation and using words.
5	Dividing Number Lines	<ul style="list-style-type: none"> Divide a number line into parts (fractions).
	Identifying Fractions on a Number Line	<ul style="list-style-type: none"> Locate fractions on a number line.
	Equivalent Fractions	<ul style="list-style-type: none"> Find equivalent fractions using models. Find equivalent fractions using multiplication. Find equivalent fractions using division.
	Common Denominators	<ul style="list-style-type: none"> Create common denominators by multiplication to form equivalent fractions.
	Greatest Common Factor	<ul style="list-style-type: none"> Determine the greatest common factors of whole numbers.
	Least Common Multiple	<ul style="list-style-type: none"> Determine the least common multiple of whole numbers.
	Module 5 Exam	
6	Adding Like Fractions	<ul style="list-style-type: none"> Add like fractions.
	Adding Mixed Numbers	<ul style="list-style-type: none"> Add mixed numbers.
	Improper Fractions in Mixed Numbers	<ul style="list-style-type: none"> Add improper fractions in mixed numbers.
	Adding Unlike Fractions	<ul style="list-style-type: none"> Add unlike fractions.

Math 4 A Syllabus

Module	Lesson Title	Objectives
	Subtracting Like Fractions	<ul style="list-style-type: none"> Subtract like fractions.
	Subtracting Unlike Fractions	<ul style="list-style-type: none"> Subtract unlike fractions.
	Subtracting Mixed Numbers	<ul style="list-style-type: none"> Subtract mixed numbers.
	Subtracting Improper Fractions	<ul style="list-style-type: none"> Subtract improper fractions.
	Dividing Fractions Using Reciprocals	<ul style="list-style-type: none"> Divide fractions using reciprocals.
	Dividing Fractions Using Modeling	<ul style="list-style-type: none"> Divide fractions using models.
	Dividing Whole Numbers into Fractions	<ul style="list-style-type: none"> Divide whole numbers and fractions.
	Dividing Mixed Numbers	<ul style="list-style-type: none"> Divide whole numbers and mixed numbers.
Module 6 Exam		

Math 4 B Syllabus

Course Description:

Semester B of grade 4 math has learners continuing to work with fractions. They will learn to multiply fractions and convert them to decimals. Students will also begin to learn to equivalent measurements of length, weight, mass, and capacity. They will also learn helpful skills in understanding time, distance, and money. Students will develop an understanding that geometric figures can be analyzed and classified based on their properties, such as having parallel sides, perpendicular sides, particular angle measures, and symmetry. Lessons on rectangles, line plots, angles, figure drawing, polygons, and symmetry will be taught. Semester B continues to use varied forms of instruction that allow students to learn these skills in a practical manner.

Materials needed: Colored pencils, crayons or thin markers, Calculator (handheld or online), Ruler, and Scissors, protractor, scale (optional)

Module	Lesson Title	Objectives
1	Fraction Multiplication	<ul style="list-style-type: none"> Identify solutions on a number line.
	Fraction Multiplication Using Visual Models	<ul style="list-style-type: none"> Use visual models to represent word problems with fractions.
	Multiplying a Whole Number by a Fraction	<ul style="list-style-type: none"> Multiply a fraction by a whole number.
	Using Multiplication to Solve Word Problems With Fractions	<ul style="list-style-type: none"> Solve word problems involving multiplication of whole numbers and fractions.
	Fractions With Denominators of 10 and 100	<ul style="list-style-type: none"> Identify fractions with denominators of 10. Identify fractions with denominators of 100.
	Comparing Tenths and Hundredths	<ul style="list-style-type: none"> Use grids to compare fractions with denominators 10 and 100.

Math 4 B Syllabus

Module	Lesson Title	Objectives
		<ul style="list-style-type: none"> Write equivalent fractions with denominators 10 and 100.
	Add Tenths and Hundredths	<ul style="list-style-type: none"> Add fractions with denominators 10 and 100.
	Identifying Fractions as Division	<ul style="list-style-type: none"> Relate division to fractions.
	Fractions as Decimals	<ul style="list-style-type: none"> Write decimals to the hundredths place.
	Decimals on Number Lines	<ul style="list-style-type: none"> Locate decimals on a number line.
	Comparing Fractions to Decimals	<ul style="list-style-type: none"> Compare fractions to decimals.
2	Compare Decimals Using Area Models	<ul style="list-style-type: none"> Compare decimals using area models.
	Compare Decimals Using Decimal Circles	<ul style="list-style-type: none"> Compare decimals using decimal circles.
	Compare Decimals Using Number Lines	<ul style="list-style-type: none"> Compare decimals using number lines and meter sticks.
	Explaining Decimal Comparisons	<ul style="list-style-type: none"> Demonstrate and explain the reasonableness of comparisons.
	Represent Equivalent Measures of Customary Units of Length	<ul style="list-style-type: none"> Use tables to represent equivalent measurements.

Math 4 B Syllabus

Module	Lesson Title	Objectives
	Measuring With Inches	<ul style="list-style-type: none"> Measure, compare, and estimate length in inches, feet, yards, miles.
	Measuring and Converting Length Measurements	<ul style="list-style-type: none"> Measure, compare, and estimate length in inches, feet, yards, miles. Compare lengths by converting measurements from smaller to larger units and from larger units to smaller units.
	Estimating Measurements of Length	<ul style="list-style-type: none"> Measure, compare, and estimate length in kilometers, meters, and centimeters. Measure, compare, and estimate length in inches, feet, yards, miles.
	Measuring Weight and Mass	<ul style="list-style-type: none"> Measure, compare, and estimate weight and mass in, pounds, ounces, tons, kilograms, or grams.
	Equivalent Measurements of Weight	<ul style="list-style-type: none"> Use tables to represent equivalent measurements.
	Weight Conversions	<ul style="list-style-type: none"> Compare weights and masses by converting measurements from smaller to larger units and from larger units to smaller units.
	Problem Solving and Estimating Weight	<ul style="list-style-type: none"> Solve word problems involving masses of objects. Use diagrams to represent measurement quantities with a scale. Measure, compare, and estimate weight and mass in, pounds, ounces, tons, kilograms, or grams.
3	Liters and Milliliters	<ul style="list-style-type: none"> Measure and compare capacity in liters, milliliters, ounces, cups, pints, quarts and gallons.
	Volume Conversions	<ul style="list-style-type: none"> Measure and compare capacity in liters, milliliters, ounces, cups, pints, quarts and gallons. Compare capacities by converting measurements from smaller to larger units and from larger units to smaller units.
	Solving Problems About Volume	<ul style="list-style-type: none"> Solve word problems involving liquid volume.
	What is Time?	<ul style="list-style-type: none"> Measure and compare time in hours, minutes and seconds.
	Solving Elapsed Time Problems	<ul style="list-style-type: none"> Solve word problems involving intervals of time.

Math 4 B Syllabus

Module	Lesson Title	Objectives
	Solving Problems With Time Conversions	<ul style="list-style-type: none"> Solve word problems that apply time conversions.
	Solving Problems With Time and Distance	<ul style="list-style-type: none"> Solve word problems involving time and distance.
	Money Conversions	<ul style="list-style-type: none"> Express monetary amounts from a larger unit in terms of a smaller unit.
	Solving Problems With Money	<ul style="list-style-type: none"> Solve word problems involving money.
	Estimating With Money	<ul style="list-style-type: none"> Estimate money to solve word problems.
	Money as Fractions	<ul style="list-style-type: none"> Using equivalent measurements, solve problems with fractions and decimals.
4	The Rectangle	<ul style="list-style-type: none"> Identify length and width of rectangles. Construct rectangles and label the parts.
	Perimeter of a Rectangle	<ul style="list-style-type: none"> Find the perimeter of a rectangle.
	Area of Rectangles	<ul style="list-style-type: none"> Find the area of rectangles by covering them with unit squares or by counting squares in models. Find the area of a rectangle, given its length and width.
	Area and Perimeter	<ul style="list-style-type: none"> Given the area or perimeter, find either the length or the width of a rectangle.
	Measuring Inches	<ul style="list-style-type: none"> Measure objects up to an eighth of an inch.
	Line Plots	<ul style="list-style-type: none"> Read line plots and represent measurements on a line plot.
	Problem Solving with Line Plots	<ul style="list-style-type: none"> Add and subtract fractions based on data from a line plot.

Math 4 B Syllabus

Module	Lesson Title	Objectives
	Rays	<ul style="list-style-type: none"> Define and name rays.
	Angles	<ul style="list-style-type: none"> Define and name angles.
	Angles and Circles	<ul style="list-style-type: none"> Identify angles by using circles. Use word problems to explore one-degree turns.
5	Types of Angles	<ul style="list-style-type: none"> Identify types of angles (acute, obtuse, right).
	Measuring Angles	<ul style="list-style-type: none"> Use a protractor to measure angles to the nearest degree.
	Constructing Angles	<ul style="list-style-type: none"> Construct angles using a protractor and straight edge.
	Adding Angles	<ul style="list-style-type: none"> Find the sum of two angles.
	Subtracting Angles	<ul style="list-style-type: none"> Decompose angles into smaller parts.
	Writing Equations	<ul style="list-style-type: none"> Use equations to express the sum and difference of angles.
	Drawing Geometric Basics	<ul style="list-style-type: none"> Identify and draw points, lines, segments, rays, angles.
	Parallel and Perpendicular Lines	<ul style="list-style-type: none"> Identify the characteristics of perpendicular and parallel lines. Draw perpendicular and parallel lines.
	Two-Dimensional Shapes	<ul style="list-style-type: none"> Identify, describe, and categorize common 2-dimensional shapes.
6	Triangles	<ul style="list-style-type: none"> Identify types of angles (acute, obtuse, right).
	Quadrilaterals	<ul style="list-style-type: none"> Identify the attributes of quadrilaterals.
	Polygons	<ul style="list-style-type: none"> Identify and describe polygons.

Math 4 B Syllabus

Module	Lesson Title	Objectives
	Symmetry in Shapes	<ul style="list-style-type: none">• Define symmetry.• Identify the line of symmetry in figures.
	Lines of Symmetry	<ul style="list-style-type: none">• Draw lines of symmetry in figures.
	Tessellation	<ul style="list-style-type: none">• Create tessellations.

Math 5 A Syllabus

Course Description:

Students will learn math topics outlined in this course drawing from a variety of sources, including hands-on activities, interactive lessons, and practical math applications. Students will focus on several critical areas including but not limited to developing fluency with addition, subtraction, multiplication, and division of fractions. They will also learn to extend division to 2-digit divisors, integrate decimal fractions into the place value system, and increase an understanding of operations with decimals to hundredths. They will develop fluency with whole numbers and decimal operations. The semester begins with operations and expressions, moves into decimals and money, and ends with more work on fractions. Learners will gain valuable skills as they carry out activities that model real life situations like grocery shopping throughout the semester.

Materials needed: Calculator, handheld or online, Dice, and Scissors

Module	Lesson Title	Objectives
1	Order of Operations	<ul style="list-style-type: none"> Evaluate expressions using the basic order of operations.
	Parentheses, Brackets and Braces	<ul style="list-style-type: none"> Use symbols such as parentheses, brackets or braces in numerical expressions. Evaluate expressions that use these
	Translating Words to Math	<ul style="list-style-type: none"> Translate words into math.
	Translating Math to Words	<ul style="list-style-type: none"> Translate math into words.
	Meaning of Math Expressions	<ul style="list-style-type: none"> Recognize the meanings of numerical expressions.

Math 5 A Syllabus

Module	Lesson Title	Objectives
	Translation Application	<ul style="list-style-type: none"> • Translate between words and math. • Write simple expressions that include all operations. • Recognize the meanings of numerical expressions.
	Patterns and Sequences	<ul style="list-style-type: none"> • Create numerical patterns using different rules.
	Relationships Between Sequences	<ul style="list-style-type: none"> • Identify and explain the relationships between corresponding terms of patterns.
	Ordered Pairs	<ul style="list-style-type: none"> • Using two patterns, generate and graph ordered pairs from the corresponding terms.
2	Place Value in Whole Numbers	<ul style="list-style-type: none"> • Identify place value in multi-digit whole numbers.
	Place Value in Decimals	<ul style="list-style-type: none"> • Identify place value in decimal numbers.
	Place Value Relationships	<ul style="list-style-type: none"> • Identify and describe relationships between numbers in adjacent place values.
	Exponents	<ul style="list-style-type: none"> • Write numbers in exponential, expanded, and standard forms.
	Multiplying with Powers of 10	<ul style="list-style-type: none"> • Identify and explain patterns of zeros when a number is multiplied by powers of 10. • Use whole-number exponents to denote powers of 10.

Math 5 A Syllabus

Module	Lesson Title	Objectives
	Multiplying Decimals by Powers of 10	<ul style="list-style-type: none"> Identify and explain patterns of decimal point placement when multiplying decimals by powers of 10.
	Dividing Decimals by Powers of 10	<ul style="list-style-type: none"> Identify and explain patterns of decimal point placement when dividing decimals by powers of 10.
3	Decimals	<ul style="list-style-type: none"> Read and write decimal numbers in written forms to the thousandths place.
	Expanded Form	<ul style="list-style-type: none"> Read decimal numbers in expanded and written forms, to the thousandths place. Write decimal numbers using expanded and written forms, to the thousandths place.
	Comparing Decimals	<ul style="list-style-type: none"> Compare two decimal numbers, to the thousandths place.
	Rounding Whole Numbers	<ul style="list-style-type: none"> Round whole numbers to various place value places.
	Rounding Decimals	<ul style="list-style-type: none"> Round decimals to the 10th, 100th, 1000th places.
	Estimating Addition and Subtraction	<ul style="list-style-type: none"> Estimate operations by rounding decimal numbers.

Math 5 A Syllabus

Module	Lesson Title	Objectives
	Estimating Using Compatible Numbers	<ul style="list-style-type: none"> Estimate operations by using compatible numbers.
4	Multiplying with One-digit Numbers	<ul style="list-style-type: none"> Multiply multi-digit whole numbers by one-digit whole numbers with efficiency and flexibility.
	Multiplying with Multi-digit Numbers	<ul style="list-style-type: none"> Multiply two-digit whole numbers by two-digit whole numbers with efficiency and flexibility. Multiply multi-digit whole numbers with efficiency and flexibility.
	Solving Problems with Multiplication	<ul style="list-style-type: none"> Solve problems using multiplication.
	Dividing by One-digit Divisors	<ul style="list-style-type: none"> Divide dividends with up to four digits by a single-digit divisor.
	Dividing by Two-digit Divisors	<ul style="list-style-type: none"> Divide dividends with up to four digits by two-digit divisors.
	Partial Quotients with Powers of 10	<ul style="list-style-type: none"> Use partial quotients to solve long division problems. Divide dividends with up to four digits by two-digit divisors.
	Other Partial Quotients	<ul style="list-style-type: none"> Use partial quotients to solve long division problems. Divide dividends with up to four digits by two-digit divisors.
	Traditional Division	<ul style="list-style-type: none"> Divide dividends with up to four digits by two-digit divisors. Apply division strategies to problem solving.

Math 5 A Syllabus

Module	Lesson Title	Objectives
5	Adding Decimals	<ul style="list-style-type: none"> Add decimals to the hundredths.
	Subtracting Decimals	<ul style="list-style-type: none"> Subtracting decimals to the hundredths.
	Subtracting Thousandths	<ul style="list-style-type: none"> Subtracting decimals to the thousandths.
	Writing Money	<ul style="list-style-type: none"> Write dollars and cents as decimals.
	Adding and Subtracting Money	<ul style="list-style-type: none"> Add and subtract money.
	Money to Fractions	<ul style="list-style-type: none"> Convert decimals to fractions using money.
	Money Applications	<ul style="list-style-type: none"> Apply decimal operations to real-world situations.
	Multiplying Hundredths	<ul style="list-style-type: none"> Multiply decimals to the hundredths.
	Multiplying Thousandths	<ul style="list-style-type: none"> Multiply decimals to the thousandths.

Math 5 A Syllabus

Module	Lesson Title	Objectives
	Dividing Hundredths	<ul style="list-style-type: none"> Divide decimals to the hundredths.
	Dividing Thousandths	<ul style="list-style-type: none"> Divide decimals to the thousandths.
6	Dividing Small Dividends	<ul style="list-style-type: none"> Divide a whole number into a dividend less than one.
	Dividing Decimals with Remainders	<ul style="list-style-type: none"> Divide a whole number into a dividend less than one with a remainder.
	Dividing by 10s	<ul style="list-style-type: none"> Divide by 10, 100, and 1000.
	Write Equivalent Fractions	<ul style="list-style-type: none"> Write equivalent fractions.
	Common Denominators	<ul style="list-style-type: none"> Learn how to find the common denominator when solving problems with fractions.
	Greatest Common Factors	<ul style="list-style-type: none"> Find the GCF.
	Lowest Common Denominator	<ul style="list-style-type: none"> Use the LCM to write equivalent fractions.

Math 5 A Syllabus

Module	Lesson Title	Objectives
	Adding and Subtracting with Like Denominators	<ul style="list-style-type: none"> Add and subtract fractions with like denominators.
	Adding Mixed Numbers with Like Denominators	<ul style="list-style-type: none"> Add and subtract mixed numbers with like denominators.
	Adding and Subtracting with Unlike Denominators	<ul style="list-style-type: none"> Add and subtract fractions with unlike denominators. Reduce fractions to simplest terms.
	Adding Mixed Numbers with Unlike Denominators	<ul style="list-style-type: none"> Add and subtract mixed numbers with unlike denominators. Reduce fractions to simplest terms.
	Subtracting Mixed Numbers	<ul style="list-style-type: none"> Subtract mixed numbers

Math 5 B Syllabus

Course Description:

Semester B begins with students continuing to work with fractions. The first lesson focuses on ratios and challenges students to solve word problems using fractions and ratios in practical life situations. Learners continue to strengthen their math skills by studying mixed and fraction products, and fraction application, models, and division. The third critical area that students will focus on in Grade 5 Math is volume. Students will receive lessons in measurement of length, weight, and volume. They will end the course with a focus on geometry. Varied types of instruction are used to enhance their learning, including video and real life applications, activities, and creative projects.

Materials needed: Ruler, 8 pennies, graph paper, 3 plastic containers with similar volume and different shapes, and scissors.

Module	Lesson Title	Objectives
1	Writing Ratios	<ul style="list-style-type: none"> Express comparisons in ratio form.
	Writing Fractions as Division	<ul style="list-style-type: none"> Interpret a fraction as division of the numerator by the denominator.
	Using Fraction Models	<ul style="list-style-type: none"> Use visual fraction models to solve word problems involving division with fractions in the answer.
	Writing Equations	<ul style="list-style-type: none"> Use equations to solve word problems involving division to represent the problems with fractions in the answer.
	Locating Fractions on a Number Line	<ul style="list-style-type: none"> Locate fractions on a number line.
	Comparing Fractions on a Number Line	<ul style="list-style-type: none"> Compare fractions using a number line.
	Estimating Fraction Sums and Differences	<ul style="list-style-type: none"> Use a benchmark fraction to estimate and examine the reasonableness of answers.
	Estimating Fractions in Problem Solving	<ul style="list-style-type: none"> Use a benchmark fraction to estimate and examine the reasonableness of answers. Use fraction estimation to solve problems.

Math 5 B Syllabus

Module	Lesson Title	Objectives
	Using Visual Models to Represent Fractions	<ul style="list-style-type: none"> Use visual fraction models to represent fractions. Multiply a whole number by a fraction.
	Creating Story Problems	<ul style="list-style-type: none"> Use visual fraction models to solve word problems involving mixed number products.
	The Commutative Property	<ul style="list-style-type: none"> Apply the commutative property to mixed products.
	Multiplying a Whole Number by a Fraction	<ul style="list-style-type: none"> Multiply a whole number by a fraction.
2	Finding a Fraction of a Fraction	<ul style="list-style-type: none"> Use visual fraction models to represent the multiplication of a fraction by a fraction.
	Multiplying Fractions by Fractions	<ul style="list-style-type: none"> Multiply a fraction by a fraction.
	Using Fraction Models to Solve Word Problems	<ul style="list-style-type: none"> Use visual fraction models to solve word problems involving fraction products.
	Area with Fractional Sides	<ul style="list-style-type: none"> Use tiles to find the area and perimeter of a rectangle with fractional side lengths.
	Finding Area by Multiplying	<ul style="list-style-type: none"> Use formulas to solve word problems involving mixed number and fraction products.
	Finding Perimeter	<ul style="list-style-type: none"> Use tiles to find the perimeter of a rectangle with fractional side lengths.
	Multiplying by Less Than One	<ul style="list-style-type: none"> Show that multiplying the numerator and denominator of a fraction by the same number has the same effect as multiplying that fraction by 1. Recognize that multiplying a given whole number by a fraction less than 1 results in a product smaller than the given number.
	Multiplying by More Than One	<ul style="list-style-type: none"> Recognize that multiplying a given whole number by a fraction greater than 1 results in a product greater than the given number.

Math 5 B Syllabus

Module	Lesson Title	Objectives
	Less Than, Greater Than, or Equal To	<ul style="list-style-type: none"> Compare the size of a product to the size of one factor on the basis of the size of the other factor, without performing the indicated multiplication.
	Comparing Products	<ul style="list-style-type: none"> Compare the size of a product to the size of one factor on the basis of the size of the other factor, without performing the indicated multiplication.
3	Using Fraction Models to Solve Problems	<ul style="list-style-type: none"> Use visual fraction models to solve real world problems involving multiplication of fractions and mixed numbers.
	Using Equations to Solve Problems	<ul style="list-style-type: none"> Use equations to solve real world problems involving multiplication of fractions and mixed numbers.
	Explaining Your Products	<ul style="list-style-type: none"> Explain in writing the process of how to solve real world problems involving multiplication of fractions and mixed numbers.
	Identifying Unit Fractions	<ul style="list-style-type: none"> Define and identify a unit fraction.
	Using Models to Divide with Unit Fractions	<ul style="list-style-type: none"> Use a visual fraction model to represent the quotient of a unit fraction divided by a non-zero whole number.
	Multiplication and Division with Unit Fractions	<ul style="list-style-type: none"> Use the relationship between multiplication and division to interpret division of a whole number by a unit fraction and the division of a unit fraction by a non-zero whole number.
	Dividing Whole Numbers by Unit Fractions	<ul style="list-style-type: none"> Use a visual fraction model to represent the quotient of a whole number by a unit fraction.
	Reciprocals	<ul style="list-style-type: none"> Identify reciprocals.
	Unit Fractions Divided by Whole Numbers	<ul style="list-style-type: none"> Divide a unit fraction by a whole number. Use a word problem to represent the division of a unit fraction by a non-zero whole number.
	Whole Numbers Divided By Unit Fractions	<ul style="list-style-type: none"> Divide a whole number by a unit fraction. Use a word problem to represent the division of a whole number by a unit fraction.

Math 5 B Syllabus

Module	Lesson Title	Objectives
4	Customary Length Conversions	<ul style="list-style-type: none"> Convert length measurements within the customary system of measurement.
	Customary Weight Conversions	<ul style="list-style-type: none"> Convert weight measurements within the customary measurement system.
	Customary Volume Conversions	<ul style="list-style-type: none"> Convert volume measurements within the customary measurement system.
	Metric Conversions	<ul style="list-style-type: none"> Convert measurements within the metric system of measurement. Solve multi-step measurement conversions in real-world problems. Explore how the base-ten system supports conversions within the metric system.
	Measuring Length	<ul style="list-style-type: none"> Measure objects to one-eighth of a unit of length.
	Reading and Creating Line Plots	<ul style="list-style-type: none"> Display a data set of measurements in fractions of a unit of length on a line plot.
	Problem Solving with Line Plots	<ul style="list-style-type: none"> Add and multiply fractions based on length data in line plots. Solve length word problems involving information presented in line plots by using operations on fractions.
	Reading a Scale	<ul style="list-style-type: none"> Measure objects to one-eighth of a unit of weight.
	Reviewing Line Plots with Weight	<ul style="list-style-type: none"> Display a data set of measurements in fractions of a unit of weight on a line plot.
	Solving Line Plot Problems	<ul style="list-style-type: none"> Add and multiply fractions based on weight data in line plots. Solve weight word problems involving information presented in line plots by using operations on fractions.
	What Is Volume?	<ul style="list-style-type: none"> Define volume.
Area and Volume	<ul style="list-style-type: none"> Use models to demonstrate the relationship between area and volume. Define the standard units for measuring volume. Identify the dimensions that are used to find solid volume (length, width, height). 	

Math 5 B Syllabus

Module	Lesson Title	Objectives
5	Unit Cubes	<ul style="list-style-type: none"> Use models to demonstrate volume.
	Volume Using Models	<ul style="list-style-type: none"> Calculate volume using models.
	Volume Formula	<ul style="list-style-type: none"> Explain why the volume formulas $V = b \times h$ and $V = l \times w \times h$ for the cube is true.
	Area vs. Volume	
	Volume of Rectangular Prism	<ul style="list-style-type: none"> Identifying length, width and height of a rectangular prism. Calculating volume of a rectangular prism.
	Composite Figures	<ul style="list-style-type: none"> Decompose 2-D and 3-D composite shapes into separate smaller shapes. Find the area of 2-D composite figures. Find the volume of 3-D composite figures.
	Finding Missing Dimensions	<ul style="list-style-type: none"> Identify missing dimensions of a rectangular prism. Calculate the missing dimensions of a rectangular prism given volume and two of the dimensions.
	Applications of Volume	<ul style="list-style-type: none"> Apply the volume of rectangular prisms in real world applications.
	The Coordinate Plane	<ul style="list-style-type: none"> Define and draw the first quadrant of the coordinate plane using a pair of perpendicular lines, or axes, that intersect at the zero point of each line.
	Identifying Coordinate Points	<ul style="list-style-type: none"> Identify ordered pairs on the coordinate plane.
	Plotting Coordinate Points	<ul style="list-style-type: none"> Explain how to plot an ordered pair on the coordinate plane.
6	Graphing Figures on the Coordinate Plane	<ul style="list-style-type: none"> Graph ordered pairs to create geometric figures in the first quadrant of the coordinate plane.
	Identify Missing Points	<ul style="list-style-type: none"> Identify missing ordered pairs in geometric figures.
	Problem Solving with the Coordinate Plane	<ul style="list-style-type: none"> Represent real world problems by graphing points in the first quadrant.

Math 5 B Syllabus

Module	Lesson Title	Objectives
	Special Quadrilaterals	<ul style="list-style-type: none"> Define and describe attributes of quadrilaterals.
	Common Attributes	<ul style="list-style-type: none"> Use reasoning to classify quadrilaterals according to shared attributes.
	Lines of Symmetry	<ul style="list-style-type: none"> Identify lines of symmetry in quadrilaterals.
	Polygons and Prefixes	<ul style="list-style-type: none"> Define prefixes and their meaning as related to polygons: tri-, quad-, pent-, hex-, hept -, oct-.
	Hierarchy of Quadrilaterals	<ul style="list-style-type: none"> Create a hierarchy diagram of quadrilaterals.
	Regular and Irregular Polygons	<ul style="list-style-type: none"> Compare and contrast the attributes of regular and irregular polygons.
	Lines of Symmetry of Polygons	<ul style="list-style-type: none"> Identify lines of symmetry in polygons.

Math 6A

Course Syllabus

Suggested Prerequisites

A passing grade in 5th grade math.

Course Description

In this course, students will build on previously learned concepts like adding, subtracting, multiplying, and dividing. They will deepen their knowledge of arithmetic with fractions and work with decimals and negative numbers. They will apply these new skills to help solve real-world problems using statistics, ratios, unit conversions, and geometry, as well as expand their ability to write and evaluate expressions, including ones involving new concepts like variables and exponents. Students will also begin working with equations and learn what it means to solve them.

Course Objectives

- Calculate sums of whole numbers by adding them.
- Calculate differences of whole numbers by subtracting them.
- Calculate products of whole numbers by multiplying them.
- Find quotients of whole numbers by dividing them.
- Calculate quotients and remainders by applying the partial quotients method.
- Calculate quotients and remainders by applying the standard algorithm.
- Rewrite a number by finding its prime factorization.
- Find the greatest common factor of two numbers by comparing their prime factorizations.
- Find the least common multiple of two numbers by comparing their factors and multiples.
- Find sums of fractions and mixed numbers by adding them.
- Find differences of fractions and mixed numbers by subtracting them.
- Rewrite fractions and mixed numbers by reducing them or finding a common denominator.
- Find products of fractions and mixed numbers by multiplying them.
- Find quotients of fractions and mixed numbers by dividing them.
- Find sums of decimal numbers by adding them.
- Find differences of decimal numbers by subtracting them.
- Find products of decimal numbers by multiplying them.
- Find quotients of decimal numbers by dividing them.
- Describe situations by applying the basics of ratios.
- Find equivalent ratios by comparing numbers.
- Identify statistical questions by applying definitions.
- Compare parts to wholes by applying the basics of percents.

Math 6A Syllabus

- Solve problems with percents by finding the part or the whole.
- Create statistical questions by analyzing situations.
- Compare fractions to decimals and percents by plotting them on the number line.
- Order lists of fractions, decimals, and percents by comparing their locations on the number line.
- Solve word problems with fractions, decimals, and percents by applying the appropriate operation.
- Describe integers by applying definitions.
- Describe real-world situations by applying the basics of integers.
- Visualize integers by plotting them on number lines.
- Order integers by comparing their locations on number lines.
- Describe integers on a vertical number line by applying the balloons and weights model.
- Find sums of integers by drawing diagrams on a number line.
- Find sums of integers by applying algorithms.
- Create frequency tables by examining sets of data.
- Create histograms by examining sets of data.
- Subtract integers by applying the balloons and weights model.
- Subtract integers by applying algorithms.
- Solve mixed addition and subtraction problems with integers by applying the Associative Property.
- Interpret the meaning of multiplication and division of integers by applying real-world models.
- Find products of integers by multiplying them.
- Find quotients of integers by dividing them.
- Create circle graphs (pie charts) by examining sets of data.
- Express repeated multiplication by rewriting it with exponents.
- Evaluate expressions by applying the basics of exponents.
- Evaluate expressions by applying the order of operations.
- Describe variables by naming them with symbols or letters.
- Write expressions with variables by translating words into mathematical notation.
- Create stem-and-leaf plots by examining sets of data.

- Evaluate expressions by substituting for variables and simplifying.
- Analyze data by calculating medians.
- Rewrite expressions with variables by applying properties of numbers.
- Summarize data sets by creating box-and-whisker plots.
- Model real-life situations by translating descriptions into mathematical notation.
- Determine if an equation with variables is true by substituting and evaluating expressions.
- Solve for missing values in equations by completing input-output tables.
- Solve equations by applying the Subtraction Property of Equality.
- Solve equations by applying the Division Property of Equality.
- Solve word problems by applying properties of equality.

Math 6A Syllabus

- Analyze data by creating and interpreting dot plots.
- Convert units within the US Customary System by applying ratio concepts.
- Convert units within the metric system by applying ratio concepts.
- Convert between units in the US Customary System and the metric system by applying ratio concepts.
- Analyze data by calculating and interpreting means.
- Describe points with ordered pairs by examining graphs in the coordinate plane.
- Create a visual representation of an ordered pair by plotting points in the coordinate plane.
- Transform ordered pairs by reflecting points over axes in the coordinate plane.
- Describe data sets by identifying symmetries and peaks.
- Calculate the area of a rectangle by applying a formula.
- Calculate the area of a triangle by comparing it to other shapes.
- Calculate the area of a triangle by applying a formula.
- Calculate the area of a special quadrilateral by dividing it into simpler shapes.
- Calculate the area of a polygon by dividing it into simpler shapes.
- Understand volume of three-dimensional shapes by using unit cubes.
- Calculate volumes by counting unit cubes.
- Calculate volumes by applying formulas.
- Represent three-dimensional shapes by creating two-dimensional nets.
- Calculate surface areas by using formulas.
- Calculate surface areas by studying nets.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Math 6A Syllabus

Course Organization

Learn

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos

Students are introduced to the main concepts of each lesson. The text consists of interactive readings, including visual elements such as diagrams, graphs, and animations to aid learning.

Enrichment (one per lesson)

Check Your Understanding

These interactive exercises use 15 questions to assess students' mastery of the lesson's concepts, as well as previously learned concepts that they will see again on the final exam. The questions provide generic correct/incorrect feedback, and provide the complete and correct solution if students answer incorrectly a maximum of two to three times.

Assessment

Workbook

These computer-graded activities use targeted questions to assess students' mastery of an activity's objectives. They appear after each activity of all lessons in Units 1-5, as well as the first four lessons of Unit 6.

Checkpoint

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives. They appear in the first four lessons of Units 1-5, and the first four lessons of Unit 6.

Unit Exam

These computer-graded activities, which occur at the end of each unit, include 30 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity assesses mastery of course objectives.

Math 6A Syllabus**Discussions**

These activities provide students with the opportunity to discuss mathematical concepts prior to the lesson's Learn activities in order to activate prior knowledge. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates, as well as to hear, analyze, and discuss the mathematical ideas of their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice.

Projects

These activities are assessments that address statistics standards in context and generally include a simple essay that is graded by the teacher. Projects require students to apply their knowledge and writing capabilities to demonstrate mastery of statistics content. There are Projects in Units 2, 3, 4, and 5.

Math 6A Syllabus**Schedule of Work****Unit 1: Whole Numbers and Fractions**

- A. Discussion (Lessons 1-5)
- B. Learn (Lessons 1-5)
 - a. Key Terms
 - b. Text: Operations with Whole Numbers; Division and Factors of Whole Numbers; Greatest Common Factor and Least Common Multiple; Adding and Subtracting Fractions; Multiplying and Dividing Fractions
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 1-5)
- D. Checkpoint (Lessons 1-4)
- E. Unit 1 Exam (Lesson 5)

Unit 2: Decimals, Ratios, and Percents

- A. Discussion (Lessons 6-10)
- B. Learn (Lessons 6-10)
 - a. Key Terms
 - b. Text and Videos: Operations with Decimals; Ratios; Percents; Comparing Fractions, Decimals, and Percents; Word Problems with Fractions, Decimals, and Percents
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 6-10)
- D. Checkpoint (Lessons 6-9)
- E. Unit 2 Exam (Lesson 10)
- F. Project (Lessons 7 and 9)

Math 6A Syllabus**Unit 3: Integers and Exponents**

- A. Discussion (Lessons 11-15)
- B. Learn (Lessons 11-15)
 - a. Key Terms
 - b. Text and Videos: Introduction to Integers; Adding Integers; Subtracting Integers; Multiplying and Dividing Integers; Exponents
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 11-15)
- D. Checkpoint (Lessons 11-14)
- E. Unit 3 Exam (Lesson 15)
- F. Project (Lessons 12, 13, and 14)

Unit 4: Variables and Expressions

- A. Discussion (Lessons 16-20)
- B. Learn (Lessons 16-20)
 - a. Key Terms
 - b. Text and Videos: Order of Operations; Working with Variables; Evaluating Expressions; Equivalent Expressions; Modeling with Expressions
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 16-20)
- D. Checkpoint (Lessons 16-19)
- E. Unit 4 Exam (Lesson 20)
- F. Project (Lessons 17, 18, and 19)

Math 6A Syllabus**Unit 5: Equations and Figures in Two Dimensions**

- A. Discussion (Lessons 21-25)
- B. Learn (Lessons 21-25)
 - a. Key Terms
 - b. Text and Videos: Equations; Solving Equations; Converting Units; The Coordinate Plane; Areas of Rectangles and Triangles
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 21-25)
- D. Checkpoint (Lessons 21-24)
- E. Unit 5 Exam (Lesson 25)
- F. Project (Lessons 22, 23, and 24)

Unit 6: Polygons and Three-Dimensional Shapes

- A. Discussion (Lessons 26-29)
- B. Learn (Lessons 26-29)
 - a. Key Terms
 - b. Text and Videos: Areas of Polygons; Volumes of Rectangular Prisms; Representing Shapes with Nets; Finding Surface Areas; Review and Final Exam
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 26-30)

Math 6A Syllabus

- D. Checkpoint (Lessons 26-29)
- E. Unit 6 Exam (Lesson 29)
- F. Course Final Exam (Lesson 30)
- G. Course Summary (Lesson 30)
- H. Course Bibliography (Lesson 30)

Math 6B

Course Syllabus

Suggested Prerequisites

A passing grade in 5th grade math and Math 6A.

Course Description

In this course, students will build on previously learned concepts, like positive and negative integers and fractions, to learn about rational numbers and how to compare them. They will find the distance between points, both on the number line and in the coordinate plane, and then solve geometry problems involving these concepts. They will study the relationships between variables and how to represent them in different ways. They will learn about ratios and unit rates, and then use them to solve real-world problems. Students will also work with data and discover different ways to display data and how to describe data mathematically.

Course Objectives

- Review the meaning of integers by examining opposites.
- Order integers by plotting them on the number line.
- Calculate sums of integers by applying number line concepts.
- Calculate differences of integers by rewriting subtraction as addition.
- Calculate products and quotients of integers by multiplying and dividing them.
- Describe situations by applying the basics of rational numbers.
- Order rational numbers by plotting them on a number line.
- Interpret inequalities by translating them into words.
- Describe situations by writing inequalities.

- Identify solutions to inequalities by using substitution.
- Describe solution sets for inequalities by graphing them.
- Identify solution sets of inequalities by using substitution.
- Calculate absolute value by applying the definition.
- Interpret absolute value by recognizing distance from 0 on the number line.
- Order absolute values of numbers by comparing their magnitudes.
- Interpret a real-life situation by relating it to the magnitude and sign of a number.
- Solve word problems involving banking by applying absolute value concepts.
- Solve word problems involving sea level by applying absolute value concepts.

Math 6B Syllabus

- Locate points in a coordinate plane by examining a graph or plotting ordered pairs.
 - Find the distance between a point and an axis by applying absolute value concepts.
 - Find the distance between two points by applying absolute value concepts.
 - Identify vertices of polygons in the coordinate plane by examining a graph.
 - Graph polygons in the coordinate plane by plotting points and drawing line segments.
 - Calculate side lengths of polygons in the coordinate plane by applying absolute value concepts.
 - Solve word problems involving maps by calculating distances in the coordinate plane.
 - Calculate areas of shapes in the coordinate plane by analyzing vertices and distances.
 - Find the missing vertex of a polygon in the coordinate plane by comparing ordered pairs.
-
- Represent mathematical operations by writing expressions.
 - Describe real-world situations by writing expressions.
 - Simplify expressions by rewriting repeated operations.
 - Rewrite expressions by applying the Distributive Property.
 - Simplify expressions by combining like terms.
 - Describe relationships between independent and dependent variables by using words.
 - Describe relationships between independent and dependent variables by using tables of values.
 - Describe relationships between independent and dependent variables by writing equations.
 - Represent relationships between independent and dependent variables by plotting points in a coordinate plane.
 - Write equations that represent relationships between independent and dependent variables by interpreting a graph.
 - Evaluate expressions by substituting for a variable.
 - Solve equations by applying properties of equality.
 - Describe real-life situations by modeling them with ratios.
 - Represent ratios by creating visual models.
 - Analyze situations by applying ratio reasoning to visual models.
 - Analyze situations involving ratios by examining tables of values.
 - Create graphs by plotting points that satisfy a ratio relationship.
 - Compare ratios by examining graphs and tables.
 - Identify unit rates by analyzing situations.
-
- Connect unit rates to ratios by rewriting them.
 - Solve problems by calculating unit rates.
 - Solve problems that represent real-life situations by calculating unit rates.
 - Determine whether a question is statistical by analyzing it.
 - Determine whether conclusions are valid by analyzing statistical studies.
 - Display data by creating dot plots.

Math 6B Syllabus

- Calculate the mode and number of observations by examining a dot plot.
- Calculate the range of a data set by examining a dot plot.
- Display data by creating histograms.
- Calculate the number of observations by examining a histogram.
- Calculate the mode and range by examining a data set.
- Find a measure of center in a data set by calculating the mean.
- Find a measure of spread in a data set by calculating the mean absolute deviation.
- Create stem-and-leaf plots by examining sets of data.
- Identify a measure of center in a data set by finding the median.
- Analyze data sets by comparing their means and medians.
- Describe the spread of data by calculating quartiles and interquartile range.
- Display and interpret data by creating a box-and-whisker plot.
- Analyze changes to data sets by identifying effects on the mean, median, mode, or range.
- Analyze the effects of outliers by calculating measures of center and spread.
- Describe the distribution of a data set by examining its chart, plot, or graph.
- Choose the best measures of center and spread for a data set by analyzing its distribution.

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos

Students are introduced to the main concepts of each lesson. The text consists of interactive readings, including visual elements such as diagrams, graphs, and animations to aid learning. Instructional videos may be embedded within the three text pieces for each lesson. These instructional videos provide additional examples or alternate methods of solving problems similar to those presented in the text.

Enrichment (one per lesson)

Check Your Understanding

These interactive exercises use 15 questions to assess students' mastery of the lesson's concepts, as well as previously learned concepts that they will see again on the final exam. The questions provide generic correct/incorrect feedback and provide the complete and correct solution if students answer incorrectly a maximum of two to three times.

Assessment

Workbook

These computer-graded activities use targeted questions to assess students' mastery of an activity's objectives. They appear after each activity of all lessons in Units 1–5, as well as the first three lessons of Unit 6.

Checkpoint

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives. They appear in the first four lessons of Units 1–5, and the first three lessons of Unit 6.

Unit Exam

These computer-graded activities, which occur at the end of each unit, include 30 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity assesses mastery of course objectives.

Math 6B Syllabus**Discussions**

These activities provide students with the opportunity to discuss mathematical concepts prior to the lesson's Learn activities in order to activate prior knowledge. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates, as well as to hear, analyze, and discuss the mathematical ideas of their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice.

Projects

These activities are assessments that address writing standards in context and generally include a simple essay that is graded by the teacher. Projects require students to apply their knowledge and writing capabilities to demonstrate mastery of statistics content. There are projects in the middle lesson of Units 2, 3, 4, and 5.

Math 6B Syllabus**Schedule of Work****Unit 1: Numbers and Inequalities**

- A. Discussion (Lessons 1-5)
- B. Learn (Lessons 1-5)
 - a. Key Terms
 - b. Text and Videos: Integers; Operations with Integers; Rational Numbers; Inequalities; Solution Sets for Inequalities
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 1-5)
- D. Checkpoint (Lessons 1-4)
- E. Unit 1 Exam (Lesson 5)

Unit 2: Absolute Value and Distance

- A. Discussion (Lessons 6-10)
- B. Learn (Lessons 6-10)
 - a. Key Terms
 - b. Text and Videos: Absolute Value; Absolute Value in the Real World; Distance in the Coordinate Plane; Shapes in the Coordinate Plane; Problem Solving in the Coordinate Plane
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 6-10)
- D. Checkpoint (Lessons 6-9)
- E. Project (Lesson 8)
- F. Unit 2 Exam (Lesson 10)

Math 6B Syllabus**Unit 3: Variables and Relationships**

- A. Discussion (Lessons 11-15)
- B. Learn (Lessons 11-15)
 - a. Key Terms
 - b. Text and Videos: Using Variables; Equivalent Expressions; Independent and Dependent Variables; Equations and Graphs for Relationships; Problem Solving with Relationships
 - c. Workbooks

 - a. Key Terms
 - b. Text: Ratios; Ratios in Tables and Graphs; Comparing Ratios; Unit Rates; Problem Solving with Unit Rates
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 16-20)
- D. Checkpoint (Lessons 16-19)
- E. Project (Lesson 18)
- F. Unit 4 Exam (Lesson 20)

Math 6B Syllabus**Unit 5: Data, Means, and Variability**

- A. Discussion (Lessons 21-25)
- B. Learn (Lessons 21-25)
 - a. Key Terms
 - b. Text and Videos: Data, Measurement, and Conclusions; Dot Plots and the Spread of Data; Histograms and the Spread of Data; Means and the Mean Absolute Deviation; Medians and Stem-and-Leaf Plots
 - c. Workbooks
- C. Enrichment (Check Your Understanding: Lessons 21-25)
- D. Checkpoint (Lessons 21-24)
- E. Project (Lesson 23)
- F. Unit 5 Exam (Lesson 25)

Unit 6: Medians and Statistical Summaries

- Discussion (Lessons 26-29)
- Learn (Lessons 26-29)
 - Key Terms
 - Text and Videos: Quartiles and Box-and-Whisker plots; The Effect of Changing a Data Set; Determining the Best Statistical Summary; Review of Units 1–4; Review of Units 5–6 and Final Exam
 - Workbooks
- Enrichment (Check Your Understanding: Lessons 26-30)
- Checkpoint (Lessons 26-28)
- Unit 6 Exam (Lesson 28)
- Course Final Exam (Lesson 30)
- Course Summary (Lesson 30)
- Course Bibliography (Lesson 30)

Math 7A

Course Syllabus

Suggested Prerequisites

Sixth Grade Math

Course Description

In this course, students begin with adding and multiplying rational numbers by using number lines, rules, and properties. Then, they move their focus to proportional relationships given in tables, diagrams, graphs, equations, and verbal descriptions. They also learn how to solve problems by finding and comparing unit rates. Next, they rewrite expressions using properties, as well as write and solve simple linear equations by using different methods. The next area of study is probability and statistics, where they will interpret and calculate simple probabilities, as well as learn about populations and samples. Finally, they move on to geometry and learn how to solve problems about scale drawing, circles, and angle relationships and draw some geometric shapes.

Course Objectives

- Explain opposite values by describing situations or representing them on a number line.
- Add rational numbers by using number lines and rules.
- Multiply rational numbers by using rules and properties of multiplication.
- Interpret sums and products of rational numbers from situations.
- Identify proportional relationships by analyzing graphs, tables, diagrams, equations, and verbal descriptions.
- Solve problems by finding unit rates.
- Rewrite expressions by using properties.
- Solve problems by using a variety of methods, such as tables, graphs, and diagrams.
- Write and solve equations that represent situations.
- Compare methods of solving problems by analyzing the solutions.
- Find the estimated and expected probability of an event by using frequencies, a formula, or a probability model.
- Identify and design probability models by using given information.
- Estimate frequencies of events by using probabilities.
- Compare and contrast expected and estimated probabilities by examining given information.
- Determine whether samples represent a population by analyzing the sample and how it was chosen.
- Estimate data values for a population by using values from a sample.

Math 7A Syllabus

- Make predictions or decisions for a problem by interpreting data.
- Solve problems by using scale drawings of geometric figures.
- Draw geometric figures by using given information.
- Solve problems involving circles by using the circumference and area formulas.
- Describe the relationship between the area and circumference of a circle.
- Solve problems involving angle relationships by writing and solving expressions and equations.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Learn

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Texts and Videos

Students are introduced to the main concepts of each lesson. The texts consist of interactive readings, including visual elements such as diagrams, graphs, and infographics to aid learning. Instructional videos may be embedded within the three text pieces for each lesson. These instructional videos provide additional examples or alternate methods of solving problems similar to those presented in the text.

Step-by-Step Example Problem

Students are provided with interactive problems designed to help them practice the skills they learn in the text and video activities. These problems provide unique feedback based on student responses. Students are taken through problems in small steps to help guide them to the correct answers.

Math 7A Syllabus

Workbook

Students are provided with one or more problems after each text piece in the lesson to allow them the opportunity to practice the skills and concepts they just learned in the text.

Assessment

Checkpoint

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives. They appear in the first four lessons of Units 1-5, and the first three lessons of Unit 6.

Unit Exam

These computer-graded activities, which occur at the end of each unit, include between 20 and 30 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity assesses mastery of course objectives.

Discussions

There are three discussion boards in each unit. These activities provide students with the opportunity to discuss mathematical concepts after the lesson's Learn activities. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates, as well as to hear, analyze, and discuss the mathematical ideas of their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice.

Projects

These activities are assessments that address standards in context. Each project consists of three parts. Students complete their work for all three parts and then upload their answers for the teacher to grade. Projects require students to apply their knowledge and writing capabilities to demonstrate mastery of the lesson/unit content. There are Projects in Units 1, 2, and 3.

Math 7A Syllabus**Schedule of Work****Unit 1: The Number System**

- A. Learn (Lessons 1-5)
 - Key Terms
 - Text and Videos: Opposite Values; Add on the Number Line; Sums of Rational Numbers; Products of Rational Numbers; The Distributive Property
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 1, 3, and 4)
- C. Checkpoint (Lessons 1-4)
- D. Unit 1 Exam (Lesson 5)
- E. Project (Lessons 3, 4, and 5)

Unit 2: Ratios and Proportions

- A. Learn (Lessons 6-10)
 - Key Terms
 - Text and Videos: Unit Rates; Unit Rates in Graphs; Unit Rates in Diagrams and Tables; Unit Rates in Equations; Unit Rates in Verbal Descriptions
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 6, 8, and 10)
- C. Checkpoint (Lessons 6-9)
- D. Unit 2 Exam (Lesson 10)
- E. Project (Lessons 7, 9, and 10)

Math 7A Syllabus**Unit 3: Expressions and Equations**

- A. Learn (Lessons 11-15)
 - Key Terms
 - Text and Videos: Expressions with Addition and Subtraction; Expressions with the Distributive Property; Interpret Situations; Solve Equations; Compare Methods of Problem Solving
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 11, 13, and 14)
- C. Checkpoint (Lessons 11-14)
- D. Unit 3 Exam (Lesson 15)
- E. Project (Lessons 13, 14, and 15)

Unit 4: Probability

- A. Learn (Lessons 16-20)
 - Key Terms
 - Text and Videos: Probability Basics; Probability Models; Events with Equal Chances; Events with Unequal Chances; Compare Probabilities
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 16, 19, and 20)
- C. Checkpoint (Lessons 16-19)
- D. Unit 4 Exam (Lesson 20)

Math 7A Syllabus**Unit 5: Samples and Inferences**

- A. Learn (Lessons 21-25)
 - Key Terms
 - Text and Videos: Populations and Samples; Collect Random Samples; Use Random Samples; Interpret Sample Results; Make Predictions
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 21, 22, and 25)
- C. Checkpoint (Lessons 21-24)
- D. Unit 5 Exam (Lesson 25)

Unit 6: Geometry

- A. Learn (Lessons 26-29)
 - Key Terms
 - Text and Videos: Scale Drawings; Geometric Figures; Area and Circumference; Angle Relationships
 - Step-by-Step Example Problem
 - Workbook
- B. Unit 1-Unit 6 Reviews (Lesson 30)
- C. Discussion (Lessons 26, 27, 29, and 30)
- D. Checkpoint (Lessons 26-28)
- E. Unit 6 Exam (Lesson 29)
- F. Course Final Exam (Lesson 30)
- G. Course Summary (Lesson 30)

Math 7B

Course Syllabus

Suggested Prerequisites:

Math 6A, Math 6B, Math 7A

Course Description

In this course, students begin learning different methods such as number lines, rules, and properties to simplify arithmetic operations, focusing on subtraction and division. Then, they move their focus to proportional relationships to solve real-world problems. Next, they rewrite expressions using properties, as well as write and solve linear equations and inequalities. The next area of study is probability and statistics, where they will interpret and calculate compound probabilities, as well as learn about comparing two data sets of random samples to make conclusions about the populations the data sets represent. Finally, they move on to geometry and learn how to solve problems about areas, surface areas, and volumes, and identify the cross sections of some geometric shapes.

Course Objectives

- Subtract rational numbers by using number lines and rules.
- Solve distance problems by using number lines and differences.
- Add and subtract rational numbers by applying strategies.
- Multiply and divide rational numbers by using rules, properties of multiplication, and applying strategies.
- Write fractions as decimals.

- Interpret points related to proportional real-world situations by analyzing their graphs, tables, diagrams, and verbal descriptions.
- Write equations by finding unit rates from graphs, tables, diagrams, and verbal descriptions.
- Solve ratio and percent problems by using proportional relationships.
- Write equivalent expressions and explain their relationships.
- Write and solve linear equations that represent situations involving rational numbers.
- Check the reasonableness of solutions of linear equations.

- Write and solve linear inequalities involving rational numbers.
- Graph and interpret the solutions of linear inequalities that represent situations.
- Find simple probabilities by using frequencies, formulas, or simulations.
- Find compound probabilities by using organized lists, tables, tree diagrams, or simulations.

Math 7B Syllabus

- Determine the likelihood of simple and compound events by finding their probabilities.
- Design probability simulations by using devices.
- Find measures of center and measures of variability for random samples by using graphs or numerical data
- Describe the difference between two medians or means by using measures of variability.
- Compare the variability in data sets by using graphs and statistical calculations.
- Make conclusions for populations by comparing the variability in data sets.
- Solve problems involving area, surface area, and volume of two- and three-dimensional figures by using the formulas.
- Identify and describe two-dimensional cross sections of three-dimensional figures by analyzing results from slicing three-dimensional figures.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons that present material in multiple ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

* Please note: In computer-graded assessments, a negative sign or subtraction symbol must be entered as a hyphen to be recognized by the system. Students have attempted to use other symbols, which the system marks incorrect. To avoid the need to manually change assessment scores, it would be helpful to communicate with students regarding how to best handle this issue on their devices.

Course Organization

Learn

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Texts and Videos

Students are introduced to the main concepts of each lesson. The texts consist of interactive readings, including visual elements such as diagrams, graphs, and infographics to aid learning. Instructional videos

Math 7B Syllabus

may be embedded within the three text pieces for each lesson. These instructional videos provide additional examples or alternate methods of solving problems similar to those presented in the text.

Step-by-Step Example Problem

Students are provided with problems designed to help them practice the skills they learn in the text and video activities. Students are taken through problems in small steps to help guide them to the correct answers.

Workbook

Students are provided with one or more problems after each text piece in the lesson to allow them the opportunity to practice the skills and concepts they just learned in the text.

Assessment

Checkpoint

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives. They appear in the first four lessons of units 1-5, and the first three lessons of Unit 6.

Unit Exam

These computer-graded activities, which occur at the end of each unit, include between 20 and 30 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity assesses mastery of course objectives.

Discussions

There are three discussion boards in each unit. These activities provide students with the opportunity to discuss mathematical concepts after the lesson's Learn activities. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates, as well as to hear, analyze, and discuss the mathematical ideas of their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice.

Math 7B Syllabus**Schedule of Work****Unit 1: The Number System**

- A. Learn (Lessons 1-5)
 - Key Terms
 - Text and Videos: Difference of Rational Numbers; Strategies for Addition and Subtraction; Distance on the Number Line; Quotients of Rational Numbers; Strategies for Multiplication and Division
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 1, 4, and 5)
- C. Checkpoint (Lessons 1-4)
- D. Unit 1 Exam (Lesson 5)

Unit 2: Ratios and Proportions

- A. Learn (Lessons 6-10)
 - Key Terms
 - Text and Videos: Proportional Relationships in Graphs; Proportional Relationships in Tables and Diagrams; Proportional Relationships in Verbal Descriptions; Percent Calculations; Percent Applications
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 7, 8, and 10)
- C. Checkpoint (Lessons 6-9)
- D. Unit 2 Exam (Lesson 10)

Math 7B Syllabus**Unit 3: Expressions and Equations**

- A. Learn (Lessons 11-15)
 - Key Terms
 - Text and Videos: Equivalent Expressions; Solve Percent Problems Using Equations; Solve Problems Involving Rational Numbers; Write and Solve Inequalities; Graph and Interpret Inequalities
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 11, 13, and 14)
- C. Checkpoint (Lessons 11-14)
- D. Unit 3 Exam (Lesson 15)

Unit 4: Probability

- A. Learn (Lessons 16-20)
 - Key Terms
 - Text and Videos: Probabilities of Simple Events; Probabilities of Compound Events; Use Lists and Tables for Compound Probabilities; Use Tree Diagrams for Compound Probabilities; Use Simulations for Compound Events
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 18, 19, and 20)
- C. Checkpoint (Lessons 16-19)
- D. Unit 4 Exam (Lesson 20)

Math 7B Syllabus**Unit 5: Statistics**

- A. Learn (Lessons 21-25)
 - Key Terms
 - Text and Videos: Compare Data Using Tables; Compare Data Using Dot Plots; Compare Means Using Dot Plots; Compare Data Using Box Plots; Compare Medians Using Box Plots
 - Step-by-Step Example Problem
 - Workbook
- B. Discussion (Lessons 21, 23, and 25)
- C. Checkpoint (Lessons 21-24)
- D. Unit 5 Exam (Lesson 25)

Unit 6: Geometry

- A. Learn (Lessons 26-29)
 - Key Terms
 - Text and Videos: Area of Polygons; Surface Area of Three-Dimensional Figures; Volume of Three-Dimensional Figures; Cross Sections
 - Step-by-Step Example Problem
 - Workbook
- B. Unit 1-Unit 6 Reviews (Lesson 30)
- C. Discussion (Lessons 27, 28, 29, and 30)
- D. Checkpoint (Lessons 26-28)
- E. Unit 6 Exam (Lesson 29)
- F. Course Final Exam (Lesson 30)
- G. Course Summary (Lesson 30)

Math 8A

Course Syllabus

Suggested Prerequisites

Sixth Grade and Seventh Grade (Math 7A and Math 7B) Math.

Course Description

In this course, students begin with the fundamentals of algebra, where they compare, order, and perform operations on rational and irrational numbers, use inverse operations to solve for a variable in one- and two-step equations, write and solve two-step equations from contextual situations, and analyze properties of functions, focusing on linear functions. The next area of study is very large and very small numbers, where they will solve expressions involving powers of a common base, convert numbers to and from scientific notation, and perform operations on numbers in scientific notation. They will then move on to geometry, where they will perform rigid transformations on figures and prove congruence of figures through a series of rigid transformations.

Course Objectives

- Write rational numbers in equivalent forms.
- Add, subtract, multiply, and divide rational numbers.
- Simplify expressions using the order of operations.
- Solve simple equations using inverse operations.
- Write and solve equations that represent situations.
- Analyze relationships in two variables from graphs and tables.
- Define special relationships as functions and represent them in different ways.
- Evaluate linear functions using graphs and equations.
- Identify and compare properties of linear functions.
- Graph linear functions.
- Evaluate and rewrite expressions that have integer exponents.
- Rewrite and compare very large and very small numbers.
- Interpret different representations of very large and very small numbers.
- Add, subtract, multiply, and divide very large and very small numbers.
- Classify numbers as counting numbers, whole numbers, integers, rational numbers, and irrational numbers.
- Evaluate square roots of perfect squares.
- Solve equations using square roots.

Math 8A Syllabus

- Estimate and compare the values of irrational numbers.
- Locate numbers on a number line.
- Solve problems using the Pythagorean Theorem.
- Verify the properties of rigid transformations on figures by using technology.
- Identify mapping statements for transformations.
- Find the coordinates of a transformation's image.
- Identify congruent figures using transformations.
- Explain relationships between angles formed with parallel lines.
- Explain relationships between angles in a triangle.
- Explain why the Pythagorean Theorem works.
- Use geometric relationships to solve problems.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

A brief description of the intended learning outcomes appears at the beginning of each unit. Following these unit introductions are the lessons, which include the activities outlined below.

Prepare to Learn

These activities provide a review of the prior lesson(s) to keep students' skills sharp and prepare them for applying those skills in the new lesson they are starting.

Learn

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Math 8A Syllabus

Text and Videos

Students are introduced to the main concepts of each lesson. The text is comprised of interactive readings, including step-by-step examples in which students are asked questions and provided with feedback based on their responses. One or more instructional videos may be embedded within each of the three concepts that appear in each lesson's text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Step-by-Step Example Problem(s)

Students are provided with one or more problems designed to help them practice the skills they learn in the text and video activities. These problems provide unique feedback based on student responses. Students are taken through problems in smaller steps to help guide them to the correct answers.

Try It! Problem(s)

Students are provided with one or more problems to give them necessary practice, using the skills they just learned in the text and videos. These are single-step problems that provide unique feedback on correct and incorrect answers.

Enrichment (Four Types, One per Lesson)

Practice

These interactive exercises utilize up to 10 questions to assess students' mastery of the lesson's concepts. The questions provide generic correct/incorrect feedback, but they do provide/explain the correct answer if students answer incorrectly a maximum of two to three times.

Interactive

These activities engage students with an interactive tool that helps deepen their understanding of the concepts. The interactive tools involve input from students and display information and feedback based on the students' manipulation of the tool.

Exploration

These activities are just like the Interactive activities, but they also entail a small number of questions for students to answer based on their experiences with the interactive tool. These are "math lab" style activities that have students answer questions regarding their observations.

Word Problem Investigation

These activities are interactive, and they provide students with an opportunity to analyze word problems based on the lesson's concepts. Students explore and learn new ways to approach a problem while also testing their mathematical knowledge.

Assessment

Math 8A Syllabus

Checkpoint

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives.

Unit Exam

These computer-graded activities include 30 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity assesses mastery of course objectives.

Discussions

These activities provide students with the opportunity to discuss mathematical concepts after the lesson's Learn activities. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates, as well as to hear, analyze, and discuss the mathematical ideas of their classmates. The discussion is a non-graded activity. However, at their discretion, teachers may use these activities to evaluate students' mathematical thinking and strategies.

Check Your Understanding

These activities provide students with two to five problems that assess their comprehension of concepts taught in the lesson. Students are encouraged to save their answers to these questions until Lesson 30, where they are given the answers and explanations for the problems in order to prepare for the Final Exam.

Project

These activities are assessments that generally include a simple essay that is graded by the teacher. Projects require students to apply their knowledge and writing capabilities to demonstrate mastery of the lesson/unit content. Included as part of the Project in Unit 2 and Unit 4 is the Close Reading exercise, which assesses students' literacy and writing abilities. See the Projects document of the Teacher Resource Guide for more information on the Close Reading exercise, including grading rubrics. Unit 6 of the course does not include a Project.

Math 8A Syllabus**Schedule of Work****Unit 1: Rational Numbers**

- A. Prepare to Learn (Lessons 1-5)
- B. Learn (Lessons 1-5)
 - Key Terms
 - Text and Videos: Equivalent Forms of Rational Numbers; Multiplying and Dividing Rational Numbers; Adding and Subtracting Rational Numbers; Working Backward; Solving One- and Two-Step Equations
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Practice: Lessons 1, 2, 3, and 5; Word Problem Investigation: Lesson 4)
- D. Discussion (Lessons 1-5)
- E. Check Your Understanding (Lessons 1-5)
- F. Checkpoint (Lessons 1-4)
- G. Unit 1 Exam (Lesson 5)
- H. Project 1 (Lessons 1-5)

Unit 2: Algebra Fundamentals

- A. Prepare to Learn (Lessons 6-10)
- B. Learn (Lessons 6-10)
 - Key Terms
 - Text and Videos: Equations for Situations; Two-Dimensional Solutions; Two-Dimensional Relationships; Analyzing Graphs of Situations; The Concept of a Function
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Word Problem Investigation: Lessons 6 and 9; Interactive: Lesson 7; Exploration: Lesson 8; Practice: Lesson 10)
- D. Discussion (Lessons 6-10)
- E. Check Your Understanding (Lessons 6-10)
- F. Checkpoint (Lessons 6-9)
- G. Unit 2 Exam (Lesson 10)
- H. Project—Close Reading (Lessons 7 and 8)

Math 8A Syllabus**Unit 3: Algebraic Strategies**

- A. Prepare to Learn (Lessons 11-15)
- B. Learn (Lessons 11-15)
 - Key Terms
 - Text and Videos: Properties of Linear Functions; Integer Exponents; Properties of Integer Exponents; Very Large and Very Small Numbers; Operations with Large and Small Numbers
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Interactive: Lessons 11 and 14; Practice: Lessons 12, 13, and 15)
- D. Discussion (Lessons 11-15)
- E. Check Your Understanding (Lessons 11-15)
- F. Checkpoint (Lessons 11-14)
- G. Unit 3 Exam (Lesson 15)
- H. Project 3 (Lessons 12-15)

Unit 4: Real Numbers

- A. Prepare to Learn (Lessons 16-20)
- B. Learn (Lessons 16-20)
 - Key Terms
 - Text and Videos: Classifying Numbers; Squares and Square Roots; Rational and Irrational Numbers; Approximations; Applying the Pythagorean Theorem
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Interactive: Lessons 16, 18 and 19; Practice: Lesson 17; Word Problem Investigation: Lesson 20)
- D. Discussion (Lessons 16-20)
- E. Check Your Understanding (Lessons 16-20)
- F. Checkpoint (Lessons 16-19)
- G. Unit 4 Exam (Lesson 20)
- H. Project—Close Reading (Lessons 16, 18, and 20)

Math 8A Syllabus**Unit 5: Rigid Transformations**

- A. Prepare to Learn (Lessons 21-25)
- B. Learn (Lessons 21-25)
 - Key Terms
 - Text and Videos: Translations; Reflections; Rotations; Transformations and Angles; Transformations and Parallel Lines
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Exploration: Lessons 21-25)
- D. Discussion (Lessons 21-25)
- E. Check Your Understanding (Lessons 21-25)
- F. Checkpoint (Lessons 21-24)
- G. Unit 5 Exam (Lesson 25)
- H. Project 5 (Lessons 21-25)

Unit 6: Geometric Relationships

- A. Prepare to Learn (Lessons 26-29)
- B. Learn (Lessons 26-29)
 - Key Terms
 - Text and Videos: Congruence; Angle Pair Relationships; Angle Relationships in Triangles; Dissecting the Pythagorean Theorem; Final Exam
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Interactive: Lessons 26 and 27; Practice: Lessons 28 and 29)
- D. Unit 1-Unit 6 Reviews (Lesson 30)
- E. Discussion (Lessons 26-30)
- F. Check Your Understanding (Lessons 26-29)
- G. Checkpoint (Lessons 26-28)
- H. Unit 6 Exam (Lesson 29)
- I. Course Final Exam (Lesson 30)
- J. Course Summary (Lesson 30)
- K. Course Bibliography (Lesson 30)

Math 8B**Syllabus**

Suggested Prerequisites: Sixth Grade Math, Seventh Grade Math, and Math 8A

Course Description

In this course, students build on and extend the knowledge they gained in Math 8A. After reviewing how to solve one- and two-step equations, they are introduced to multi-step equations and proportions. They apply their knowledge of proportional relationships to geometry, where they perform transformations on figures and prove similarity of figures through a series of rigid transformations and dilations. Next, students extend their knowledge of linear relationships by identifying and comparing properties of lines and their equations. Then, students learn how to solve systems of linear equations using graphs, substitution, and elimination. After that, they build upon their algebraic skills by applying them to statistics, where they analyze and interpret patterns in bivariate data. Finally, students explore and analyze three-dimensional shapes including cylinders, cones, and spheres.

Course Objectives

- Solve equations using the order of operations and inverse operations.
- Determine the number of solutions to equations.
- Solve proportions using properties of equality and cross multiplication.
- Find coordinates of a transformation's image.
- Identify properties of similar figures.
- Identify congruent and similar figures using transformations.
- Explain the relationship between similar triangles and the slope of a line.
- Write equations for proportional relationships.
- Compare proportional relationships presented in different forms.
- Identify properties of linear functions from equations, graphs, tables, and verbal descriptions.
- Determine whether functions are linear by analyzing their equations.
- Compare properties of linear functions that are given in different forms.
- Solve systems of equations using graphs.
- Solve systems of equations using algebra.
- Solve and interpret real-world situations using systems of equations.
- Solve systems of equations by analyzing graphs and equations.
- Represent bivariate data by creating scatter plots and frequency tables.

Math 8B Syllabus

- Analyze patterns in data represented in a scatter plot by identifying and classifying associations, clustering, and outliers.
- Identify and analyze lines of fit for data by analyzing patterns in scatter plots.
- Interpret and predict values for a situation by analyzing the line of fit for a scatter plot.
- Interpret data represented in a frequency table by identifying patterns and calculating relative frequencies.
- Evaluate cube roots of perfect cubes.
- Solve equations using cube roots.
- Calculate measures related to the volumes of cylinders, cones, and spheres.
- Solve problems using the volumes of cylinders, cones, and spheres.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Prepare to Learn

These activities provide a review of the prior lesson(s) to keep students' skills sharp and prepare them for applying those skills in the new lesson they are starting.

Learn

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos

Math 8B Syllabus

Students are introduced to the main concepts of each lesson. The text consists of interactive readings, including visual elements such as diagrams, graphs, and infographics to aid learning. One or more instructional videos may be embedded within each of the three activities that comprise each lesson's text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Step-by-Step Example Problem(s)

Students are provided with one or more multi-step problems designed to help them practice the skills they learn in the text and video activities. These problems provide unique feedback based on student responses. Students are taken through problems in small steps to help guide them to the correct answers.

Try It! Problem(s)

Students are provided with one or more problems to give them necessary practice, using the skills they just learned in the text and videos. These are single-step problems that provide unique feedback on correct and incorrect answers.

Enrichment (four types, one per lesson)

Practice

These interactive exercises use up to 10 questions to assess students' mastery of the lesson's concepts. The questions provide generic correct/incorrect feedback, and provide the complete and correct solution if students answer incorrectly a maximum of two to three times.

Interactive

These activities engage students with an interactive tool that helps deepen their understanding of the concepts. The interactive tools involve input from students and display information and feedback based on the students' manipulation of the tool.

Exploration

These activities are similar to the Interactive activities, but they also entail a small number of questions for students to answer based on their experiences with the interactive tool. These are "math lab" style activities that have students answer questions regarding their observations.

Word Problem Investigation

These activities are interactive, and they provide students with an opportunity to analyze word problems based on the lesson's concepts. Students explore and learn new ways to approach a problem while also testing their mathematical knowledge.

Assessment

Math 8B Syllabus

Checkpoint

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives. They appear in the first four lessons of Units 1-5, and the first three lessons of Unit 6.

Unit Exam

These computer-graded activities, which occur at the end of each unit, include 30 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity assesses mastery of course objectives.

Discussions

These activities provide students with the opportunity to discuss mathematical concepts after the lesson's Learn activities. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates, as well as to hear, analyze, and discuss the mathematical ideas of their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice.

Check Your Understanding

These activities provide students with two to five open-ended problems that assess their comprehension of concepts taught in the lesson. Students are encouraged to write down and save their answers to these questions until Lesson 30, where they are given the complete solutions to the problems in order to prepare for the Final Exam.

Project

These activities are assessments that address standards in context and generally include a simple essay that is graded by the teacher. Projects require students to apply their knowledge and writing capabilities to demonstrate mastery of the lesson/unit content. There are Projects in Units 1, 3, and 5.

Math 8B Syllabus**Schedule of Work****Unit 1: Single-Variable Equations**

- A. Prepare to Learn (Lessons 1-5)
- B. Learn (Lessons 1-5)
 - Key Terms
 - Text and Videos: Review Solving Equations; Review Equations for Situations; Solving Multi-Step Equations; Number of Solutions; Solving Proportions
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Practice: Lessons 1, 3, and 4; Word Problem Investigation: Lessons 2, 5)
- D. Discussion (Lessons 1-5)
- E. Check Your Understanding (Lessons 1-5)
- F. Checkpoint (Lessons 1-4)
- G. Unit 1 Exam (Lesson 5)
- H. Project (Lessons 1-5)

Unit 2: Proportional Relationships

- A. Prepare to Learn (Lessons 6-10)
- B. Learn (Lessons 6-10)
 - Key Terms
 - Text and Videos: Rigid Transformations and Congruence; Dilations; Similarity; Similar Triangles and Slope; Comparing Proportional Relationships
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Interactive: Lessons 6 and 8; Practice: Lesson 9; Exploration: Lessons 7 and 10)
- D. Discussion (Lessons 6-10)
- E. Check Your Understanding (Lessons 6-10)
- F. Checkpoint (Lessons 6-9)
- G. Unit 2 Exam (Lesson 10)

Math 8B Syllabus**Unit 3: Linear Equations and Functions**

- A. Prepare to Learn (Lessons 11-15)
- B. Learn (Lessons 11-15)
 - Key Terms
 - Text and Videos: Slopes of Lines; Slope-Intercept Form; Writing Equations of Lines; Linear Functions; Comparing Properties of Linear Functions
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Practice: Lessons 11, 12, and 13; Interactive: Lesson 14; Exploration: Lesson 15)
- D. Discussion (Lessons 11-15)
- E. Check Your Understanding (Lessons 11-15)
- F. Checkpoint (Lessons 11-14)
- G. Unit 3 Exam (Lesson 15)
- H. Project (Lessons 11-15)

Unit 4: Systems of Linear Equations

- A. Prepare to Learn (Lessons 16-20)
- B. Learn (Lessons 16-20)
 - Key Terms
 - Text and Videos: Solving Systems by Graphing; Solving Systems by Substitution; Solving Systems by Elimination; Systems of Equations for Situations; Analyzing Systems of Equations
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Practice: Lessons 16, 17, 18, and 20; Word Problem Investigation: Lesson 19)
- D. Discussion (Lessons 16-20)
- E. Check Your Understanding (Lessons 16-20)
- F. Checkpoint (Lessons 16-19)
- G. Unit 4 Exam (Lesson 20)

Math 8B Syllabus**Unit 5: Bivariate Data**

- A. Prepare to Learn (Lessons 21-25)
- B. Learn (Lessons 21-25)
 - Key Terms
 - Text and Videos: Bivariate Data and Scatter Plots; Associations; Lines of Fit; Frequency Tables; Interpreting Frequency Tables
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Practice: Lesson 21, 22, 24, and 25; Word Problem Investigation: Lesson 23)
- D. Discussion (Lessons 21-25)
- E. Check Your Understanding (Lessons 21-25)
- F. Checkpoint (Lessons 21-24)
- G. Unit 5 Exam (Lesson 25)
- H. Project (Lessons 21, 22, 23, and 25)

Unit 6: Volumes

- A. Prepare to Learn (Lessons 26-29)
- B. Learn (Lessons 26-29)
 - Key Terms
 - Text and Videos: Cubes and Cube Roots; Cylinders and Cones; Spheres; Solving Problems with Volume
 - Step-by-Step Example Problem(s)
 - Try It! Problem(s)
- C. Enrichment (Practice: Lessons 26, 27, and 28; Word Problem Investigation: Lesson 29)
- D. Unit 1-Unit 6 Reviews (Lesson 30)
- E. Discussion (Lessons 26-30)
- F. Check Your Understanding (Lessons 26-29)
- G. Checkpoint (Lessons 26-28)
- H. Unit 6 Exam (Lesson 29)
- I. Course Final Exam (Lesson 30)
- J. Course Summary (Lesson 30)
- K. Course Bibliography (Lesson 30)

Pre-Algebra

Course Syllabus

Course Description

Pre-Algebra is designed to give students the opportunity to build the conceptual understanding and skills necessary to be successful in MAT101 Algebra 1A and MAT102 Algebra 1B.

Students begin this course by reviewing operations with rational numbers. They find factors and multiples of numbers, along with common factors and multiples of sets of numbers. They also add, subtract, multiply, and divide integers, fractions, and mixed numbers. Students apply properties, such as the Distributive, Associative, and Commutative Properties, and use the order of operations to simplify numerical expressions and then algebraic expressions. Next, they work with algebraic equations and use them to solve problems. This is followed by identifying, graphing, and comparing linear relationships. The course concludes with an introduction to functions.

Course Objectives

- Rewrite a number by finding its prime factorization.
- Find the greatest common factor and least common multiple of a set of numbers.
- Add, subtract, multiply, and divide integers.
- Add, subtract, multiply, and divide fractions and mixed numbers.
- Solve word problems.
- Apply properties, such as the Distributive, Associative, and Commutative Properties, to simplify expressions.
- Simplify expressions using the properties of exponents.
- Identify and estimate the value of irrational numbers.
- Simplify expressions using the order of operations.
- Simplify expressions by combining like terms.
- Model a situation with an expression.
- Solve one-step, two-step, and multi-step equations in one variable.
- Find ordered pairs that are solutions to two-variable equations.
- Graph a linear equation and write a linear equation from a graph of a line.
- Determine if a set of ordered pairs is a function.

Required Materials

- Internet browser

Pre-Algebra Syllabus

Course Overview

This course has a different format from other StrongMind courses that students may be familiar with. It has six units. However, the number of lessons in each unit vary. This change was made so concepts could be broken down into smaller chunks and related topics would be grouped together. Each lesson consists of one or two short reading activities that contain reading comprehension questions, a few worked-out examples followed by Workbook problems, and a Checkpoint question to assess learning. Some lessons include videos, interactive activities, and discussion prompts. Each unit begins with a downloadable Reading Review worksheet where students can fill in answers as they complete the reading activities. These worksheets are meant to help students think about the material and take organized notes about the topics. Teachers are encouraged to collect the completed worksheets from students at the end of each unit through the Notes Upload activity. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher be contacted for further information about course guidelines and grading policies.

Course Organization

Reading

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text

Students are introduced to the main concepts of each lesson. After they read the information, they will be asked to complete a matching activity where they fill in the blanks of a close reading assignment. This helps to enhance comprehension and students will know if their answers are correct. Once they have selected the correct answers, they can fill in the Reading Review worksheets that are available at the beginning of each unit. The worksheets also help students keep organized notes of the lessons.

Examples

Worked-Out Example

Some examples are given in a worked-out format where students are shown a problem that is completed a step at a time. These examples show them how to do the types of problems that they will see as Workbook problems and in other assessments.

Step-By-Step Example

Some examples are given in a step-by-step format where students are guided through a problem one step at a time and given feedback on their progress.

Workbook Problems

Pre-Algebra Syllabus

After each example, students will answer a few similar questions on their own. These questions are graded. However, students can complete the assignment multiple times, as needed, to review the problems or increase their score.

Videos

Some lessons will include videos that show students how to complete problems. A comprehension question is asked after each video.

Interactives

Some lessons will include interactives that help students practice a skill or understand a concept through a hands-on activity.

Checkpoint

These computer-graded activities have five to seven questions that assess the skills and concepts that were introduced in the lesson.

Reading Review

Each unit begins with a Reading Review activity. These are downloadable worksheets that contain all the questions from the reading activities that students will encounter in the unit. On the worksheets, students fill in the correct responses from the reading activities. When completed, the worksheets are a set of organized notes that can be reviewed before taking the Unit Exam.

Unit Exam

Practice Exam

Directly before each Unit Exam, students will find a practice exam. The practice exam has practice questions that are very similar to the ones in the Unit Exam. As students answer the questions, they are given feedback and explanations of how to complete each problem.

Unit Exam

These computer-graded activities, which occur at the end of each unit, include 20 questions that assess mastery of unit objectives.

Discussions

There are two of these activities per unit that provide students with the opportunity to discuss mathematical concepts. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice.

Notes Upload

Pre-Algebra Syllabus

The Notes Upload activity can be used to check notes and view scratch work. Teachers can request as much or as little as they need to monitor student work and study habits. One suggested use for this activity is to request students to upload their completed Reading Review worksheets.

Schedule of Work

Pre-Algebra Syllabus**Unit 1: Rational Numbers**

Lesson 1: Divisibility Rules and Factors

- Unit 1 Reading Review
- Reading: What Are Factors?
- Interactive: Finding Factors
- Reading: Divisibility Rules
- Example: Using Divisibility Rules to Find Factors
- Checkpoint 1

Lesson 2: Prime Factorization

- Reading: Prime or Composite?
- Reading: Factor Trees
- Example: Making Factor Trees
- Example: Writing the Prime Factorization
- Checkpoint 2

Lesson 3: The Greatest Common Factor

- Reading: The Greatest Common Factor
- Example: The GCF of 28 and 42
- Example: The GCF of 45 and 135
- Checkpoint 3

Lesson 4: The Least Common Multiple

- Reading: The Least Common Multiple
- Example: Finding the LCM by Listing Multiples
- Reading: Another Method for Finding the LCM
- Example: Finding the LCM Using the GCF
- Discussion
- Checkpoint 4

Lesson 5: Understanding Integer

- Reading: Properties of Integers
- Reading: Integers on the Number Line
- Example: Integers on the Number Line
- Reading: Ordering Integers
- Examples: Using the Number Line to Order Integers
- Checkpoint 5

Lesson 6: Adding Integer

Pre-Algebra Syllabus

- Reading: The Balloons-and-Weights Model
- Video: Balloons and Weights
- Infographic: Adding Integers
- Video: Adding Integers
- Example: Adding Integers in Real-World Situations
- Checkpoint 6

Lesson 7: Subtracting Integers

- Reading: Subtracting Integers on the Number Line
- Examples: Subtracting Integers on the Number Line
- Video: Subtracting Integers on the Number Line
- Examples: Mixed Addition and Subtraction
- Interactive: Balloons and Weights
- Example: Subtracting Integers in Real-World Situations
- Checkpoint 7

Lesson 8: Multiplying and Dividing Integers

- Reading: Rules for Multiplying and Dividing Integers
- Example: Multiplying Integers in Real-World Situations
- Examples: Dividing Integers in Real-World Situations
- Video: Multiplying Integers
- Example: Multiplying Integers Using the Associative Property
- Checkpoint 8

Lesson 9: Adding Rational Numbers

- Reading: What Are Rational Numbers?
- Examples: Equivalent Rational Numbers
- Reading: Common Denominators
- Examples: Adding Positive Fractions
- Examples: Adding Negative Fractions
- Example: Adding Rational Numbers in Context
- Checkpoint 9

Lesson 10: Subtracting Rational Numbers

- Reading: Subtracting Fractions and Mixed Numbers
- Example: Subtract Fractions Using the Number Line
- Example: Subtracting Rational Numbers in Context
- Checkpoint 10

Lesson 11: Multiplying Rational Numbers

Pre-Algebra Syllabus

- Reading: Multiplying Fractions and Mixed Numbers
- Examples: Multiplying Fractions
- Example: Multiplying Mixed Numbers
- Example: Multiplying Mixed Numbers in Context
- Example: Multiplying Positive and Negative Numbers
- Example: Multiplying Rational Numbers Using the Associative Property
- Checkpoint 11

Lesson 12: Dividing Rational Numbers

- Reading: Dividing Fractions and Mixed Numbers
- Examples: Dividing Fractions and Mixed Numbers
- Video: Dividing Rational Numbers
- Example: Dividing Signed Fractions in Context
- Discussion
- Checkpoint 12

Lesson 13: Strategies for Solving Word Problems

- Reading: Interpreting Situations
- Example: Interpreting Situations
- Reading: Signal Words
- Example: Signal Words
- Example: Organizing Information and Solving
- Checkpoint 13

Lesson 14: Review and Unit Exam

- Notes Upload
- Unit 1 Practice Exam
- Unit 1 Exam

Unit 2: Properties and Operations

Lesson 15: The Distributive Property

- Unit 2 Reading Review
- Reading: Applying the Distributive Property

Pre-Algebra Syllabus

- Example: Distributing Positive Numbers
- Examples: Distributing Negative Numbers
- Example: Distributing -1
- Example: Working Backwards
- Checkpoint 15

Lesson 16: Understanding Exponents

- Reading: What Is an Exponent?
- Example: Rewriting Exponents
- Reading: Evaluating Exponents, Part 1
- Reading: Evaluating Exponents, Part 2
- Examples: Evaluating Exponents Using Technology
- Example: Equivalent Expressions with Exponents
- Discussion
- Checkpoint 16

Lesson 17: Negative Exponents

- Reading: Negative Exponents
- Video: Integer Exponents
- Example: When a Fraction Has a Negative Exponent
- Examples: A Negative Exponent in the Denominator
- Example: Negative Exponents in the Numerator and Denominator
- Checkpoint 17

Lesson 18: Properties of Exponents, Part 1

- Reading: Product of Powers
- Example: Product of Powers
- Reading: Quotient of Powers
- Example: Quotient of Powers
- Reading: Zero Powers
- Checkpoint 18

Lesson 19: Properties of Exponents, Part 2

- Reading: Power of Powers
- Example: Power of Powers
- Video: Power Rules
- Reading: Power of Products
- Example: Power of Products
- Reading: Power of Quotients

Pre-Algebra Syllabus

- Example: Power of Quotients
- Checkpoint 19

Lesson 20: Square Roots

- Reading: Squares and Square Roots
- Example: Squares and Square Roots
- Example: Squares and Square Roots of Fractions
- Checkpoint 20

Lesson 21: Cube Roots

- Reading: Cubes and Cube Roots
- Interactive: Identifying Perfect Squares and Perfect Cubes
- Example: Evaluating Cube Roots
- Checkpoint 21

Lesson 22: Rational vs. Irrational Numbers

- Reading: What Are Irrational Numbers?
- Example: Identifying Irrational Numbers
- Reading: Estimating Irrational Numbers
- Video: Estimating Irrational Roots
- Example: Estimating Irrational Roots
- Discussion
- Checkpoint 22

Lesson 23: Order of Operations, Part 1

- Example: Multiplication, Division, Addition, and Subtraction
- Example: The Four Operations with Rational Numbers
- Checkpoint 23

Lesson 24: Order of Operations, Part 2

- Reading: Grouping Symbols
- Example: Grouping Symbols
- Example: Order of Operations with Exponents
- Checkpoint 24

Lesson 25: Review and Unit Exam

- Notes Upload
- Unit 2 Practice Exam
- Unit 2 Exam

Pre-Algebra Syllabus**Unit 3: Variables and Expressions**

Lesson 26: Understanding Variables and Expressions

- Reading: What Is a Variable?
- Example: Identify the Variable
- Reading: Identifying Parts of Expressions
- Example: Identifying Parts of Expressions
- Checkpoint 26

Lesson 27: Translating Words into Math

- Reading: Translating Words into Math
- Examples: Translating Words into Math
- Discussion
- Checkpoint 27

Lesson 28: Modeling with Expressions

- Reading: Modeling with Expressions
- Examples: Words into Expressions
- Examples: Expressions into Words
- Checkpoint 28

Lesson 29: The Distributive Property, Revisited

- Reading: The Distributive Property with Variables
- Example: The Distributive Property with Variables
- Reading: Using the Distributive Property to Factor
- Video: Using the Distributive Property to Factor
- Example: Using the Distributive Property to Factor
- Checkpoint 29

Lesson 30: Combining Like Terms

- Reading: Combining Like Terms
- Examples: Combining Like Terms
- Discussion
- Checkpoint 30

Lesson 31: Properties of Exponents, Revisited

- Reading: Properties of Exponents with Variable Bases
- Example: Product of Powers with Variables

Pre-Algebra Syllabus

- Examples: Quotient of Powers with Variables
- Example: Power of Powers with Variables
- Example: Power of Products with Variables
- Example: Power of Quotients with Variables
- Checkpoint 31

Lesson 32: Simplifying Expressions

- Example: Simplifying Expressions with Addition and Subtraction
- Video: Apply Properties to Simplify Expressions
- Example: Simplifying Expressions with the Distributive Property
- Example: Simplifying a More Complex Expression
- Checkpoint 32

Lesson 33: Equivalent Expressions

- Examples: Writing Equivalent Expressions
- Example: Identifying Equivalent Expressions
- Examples: Equivalent Expressions from Modeling Situations
- Discussion
- Checkpoint 33

Lesson 34: Review and Unit Exam

- Notes Upload
- Unit 3 Practice Exam
- Unit 3 Exam

Unit 4: Solving Equations

Lesson 35: Evaluating Expressions

- Unit 4 Reading Review
- Reading: What Is Substitution?
- Example: Substituting for a Variable
- Video: Evaluating One-Variable Expressions

Pre-Algebra Syllabus

- Examples: Evaluating One-Variable Expressions
- Examples: Evaluating Multi-Variable Expressions
- Checkpoint 35

Lesson 36: Equations and Their Solutions

- Reading: The Meaning of a Solution to an Equation
- Examples: Checking for Solutions
- Reading: No Solutions or Many Solutions
- Checkpoint 36

Lesson 37: One-Step Equations

- Reading: Inverse Operations
- Video: Inverse Operations
- Reading: One-Step Equations
- Examples: Solving One-Step Equations
- Examples: Solving Real-World One-Step Equations
- Checkpoint 37

Lesson 38: Two-Step Equations

- Reading: Two-Step Equations
- Example: Solving the First Type of Two-Step Equations
- Video: Solving Two-Step Equations
- Example: Solving the Second Type of Two-Step Equations
- Example: Solving Real-World Two-Step Equations
- Discussion
- Checkpoint 38

Lesson 39: Multi-Step Equations

- Reading: Combining Like Terms
- Example: Combining Like Terms
- Reading: Collecting Like Terms
- Example: Collecting Like Terms
- Example: The Distributive Property and Like Terms
- Video: The Distributive Property and Like Terms
- Examples: Clearing the Denominator
- Checkpoint 39

Lesson 40: Using Roots to Solve Equations

- Reading: Simplifying Square Roots

Pre-Algebra Syllabus

- Example: Simplifying a Square Root
- Reading: Solving Equations Using Square Roots
- Video: Solving an Equation with a Square Root
- Video: Solving with Cube Roots
- Examples: Solving Equations with Cube Roots
- Discussion
- Checkpoint 40

Lesson 41: Solutions to Word Problems

- Example: Solutions to One-Step Equations
- Video: Solutions to Two-Step Equations
- Example: Solutions to Equations with Cubes
- Video: Is the Solution Reasonable?
- Checkpoint 41

Lesson 42: Review and Unit Exam

- Notes Upload
- Unit 4 Practice Exam
- Unit 4 Exam

Unit 5: Linear Relationships

Lesson 43: Creating Tables of Ordered Pairs

- Unit 5 Reading Review
- Reading: Ordered Pairs as Solutions
- Example: Ordered Pairs as Solutions
- Interactive: Ordered Pairs as Solutions

Pre-Algebra Syllabus

- Reading: Input-Output Tables
- Examples: Completing Input-Output Tables
- Example: Input-Output Tables in Context
- Discussion
- Checkpoint 43

Lesson 44: Recognizing Patterns in Tables

- Reading: Sequences, Ordered Pairs, and Input-Output Tables
- Reading: Finding Patterns
- Example: Finding Patterns
- Reading: Equal Distances over Equal Intervals
- Examples: Linear or Nonlinear?
- Checkpoint 44

Lesson 45: Plotting Points in the Coordinate Plane

- Reading: Points and Coordinates
- Example: Reading Coordinates from a Graph
- Examples: Plotting Points
- Reading: Graphing Relationships
- Examples: Graphing Relationships
- Video: Using Appropriate Scales When Graphing Relationships
- Discussion
- Checkpoint 45

Lesson 46: Graphing Lines from Points

- Reading: Graphing Lines from Tables of Ordered Pairs
- Example: Graphing Lines from Tables of Ordered Pairs
- Reading: Graphing from Tables in Context
- Example: Graphing from Tables in Context
- Checkpoint 46

Lesson 47: Key Features of Graphs

- Reading: Increasing vs. Decreasing
- Example: Increasing vs. Decreasing
- Reading: Linear vs. Nonlinear
- Example: Linear vs. Nonlinear
- Video: Analyzing Graphs
- Checkpoint 47

Lesson 48: Review and Unit Exam

Pre-Algebra Syllabus

- Notes Upload
- Unit 5 Practice Exam
- Unit 5 Exam

Unit 6: Using the Slope-Intercept Form of a Line

Lesson 49: Rates of Change and Slopes

- Unit 6 Reading Review
- Reading: Finding Slope from a Graph
- Example: Finding Slope from a Graph
- Reading: Calculating Slope with the Slope Formula
- Example: Calculating Slope from a Graph
- Example: Finding Slope from Ordered Pairs
- Examples: Rate of Change from Context
- Checkpoint 49

Lesson 50: Initial Values and y-intercepts

- Reading: Initial Value
- Video: Properties of Linear Relationships
- Example: Determining Initial Values
- Discussion
- Checkpoint 50

Lesson 51: Slope-Intercept Form of a Line

- Reading: Slope-Intercept Form of a Linear Equation
- Example: Slope-Intercept Form of a Linear Equation
- Reading: Graphing an Equation from Slope-Intercept Form
- Interactive: Graphing a Linear Relationship
- Example: Writing an Equation from a Situation
- Checkpoint 51

Lesson 52: Comparing Rates of Change

- Video: Comparing Slopes
- Example: Comparing Slopes from Graphs
- Example: Comparing Equations and Graphs
- Example: Comparing Tables and Equations

Pre-Algebra Syllabus

- Discussion
- Checkpoint 52

Lesson 53: Introduction to Functions

- Reading: What Is a Function?
- Example: Are the Ordered Pairs a Function?
- Reading: The Vertical Line Test
- Example: Does the Graph Represent a Function?
- Checkpoint 53

Lesson 54: Review and Unit Exam

- Notes Upload
- Unit 6 Practice Exam
- Unit 6 Exam

Algebra I A Syllabus

Course Description

In Algebra I (1 of 2), students will build upon their knowledge of the real number system and linear equations, and then extend this knowledge to a study of quadratic expressions and equations. They will begin by reviewing properties of integer exponents and apply those properties to rational exponents. Then, they will move on to explore equations and graphs of lines, systems of linear equations, and linear inequalities. Finally, they will go through a thorough introduction to quadratic expressions and equations, including factoring, solving, and graphing quadratics. As a common thread throughout the entire course, students use their knowledge of linear and quadratic equations to model and describe real-life situations.

Course Objectives

- Evaluate and simplify expressions involving rational exponents and radicals.
- Explore the relationships between rational and irrational numbers.
- Evaluate expressions using the order of operations.
- Create and solve linear equations.
- Work with linear equations in different forms and graph them.
- Find the solution to a system of linear equations by examining a graph.
- Isolate a variable in a literal equation.
- Solve systems of linear equations using different methods.
- Create, solve, and graph one-variable linear inequalities.
- Find solution sets to two-variable linear inequalities and systems of two-variable linear inequalities by graphing them.
- Define polynomials, focusing on one-variable quadratic polynomials.
- Add, subtract, and multiply polynomials.
- Factor quadratic expressions.
- Factor quadratic equations.
- Write quadratic equations in vertex form.
- Graph quadratic equations that have been factored.
- Complete the square for a quadratic expression or equation.
- Solve quadratic equations by factoring, by taking square roots, and by completing the square.
- Graph quadratic equations from the vertex form.

Algebra I A Syllabus

- Solve quadratic equations with the quadratic formula.
- Solve quadratic equations using technology.
- Solve systems involving quadratic equations.

Required Materials

- Internet browser

Course Overview

This course is made up of six units, and each unit contains five lessons. Throughout the course, material is presented in different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Learn

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos

Students are introduced to the main concepts of each lesson. The text consists of interactive readings, including visual elements such as diagrams, graphs, and infographics to aid learning. One or more instructional videos may be embedded within each of the three activities that comprise each lesson's text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Step-by-Step Example Problem(s)

Students are provided with one or more multi-step problems designed to help them practice the skills they learn in the text and video activities. Students are taken through problems in small steps to help guide them to the correct answers.

Workbook

Students are provided with 2–7 questions after each text piece in the lesson to allow them the opportunity to practice the skills and concepts they just learned in the text.

Assessments

Algebra I A Syllabus

Checkpoint

These computer-graded activities use 5–7 questions to assess students' mastery of lesson objectives. They appear in the first four lessons of Units 1–5, and the first three lessons of Unit 6.

Unit Exam

These computer-graded activities, which occur at the end of each unit, include 15 to 20 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity uses 30 questions to assess mastery of course objectives.

Discussions

These activities provide students with the opportunity to discuss mathematical concepts after the lesson's Learn activities. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates, as well as review, analyze, and discuss the mathematical ideas of their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice.

Project

There is one project split into four activities, with each part focusing on a different aspect of solving literal equations while addressing the standards. Within each activity, there are computer-graded problems and extended-response questions that are graded by the teacher. The project requires students to apply their knowledge and writing capabilities to demonstrate mastery of the content. The four project activities are located in Units 2, 3, 4, and 5.

Notes Upload

Note Upload can be used to check notes and view scratch work. Teachers can request as much or as little as they need to monitor student work and study habits.

Algebra I A Syllabus**Schedule of Work****Unit 1: The Real Numbers****Learn:** Lessons 1–5

- A. Lesson Titles:
 - a. Properties of Integer Exponents
 - b. Radicals and Rational Exponents
 - c. Properties of Rational Exponents
 - d. Performing Operations with Irrational Numbers
 - e. Order of Operations
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook
- F. **Discussion:** Lesson 3
- G. **Checkpoint:** Lessons 1–4
- H. **Notes Upload:** Lesson 5
- I. **Unit 1 Exam:** Lesson 5

Algebra I A Syllabus**Unit 2: Lines and Their Graphs****Learn: Lessons 6–10**

- A. Lesson Titles:
 - a. Solving Linear Equations
 - b. Forms of Equations of Lines
 - c. Graphing Lines
 - d. Creating Linear Equations from Graphs
 - e. Solving Linear Systems by Graphing
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook
- F. **Project, Part 1:** Lesson 7
- G. **Discussion:** Lesson 9
- H. **Checkpoint:** Lessons 6–9
- I. **Notes Upload:** Lesson 10
- J. **Unit 2 Exam:** Lesson 10

Algebra I A Syllabus**Unit 3: Linear Systems and Inequalities****Learn:** Lessons 11–15

- A. Lesson Titles:
 - a. Solving Linear Systems by Substitution
 - b. Solving Linear Systems by Elimination
 - c. Linear Inequalities in One Variable
 - d. Linear Inequalities in Two Variables
 - e. Systems of Linear Inequalities
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook
- F. **Project, Part 2:** Lesson 12
- G. **Discussion:** Lesson 14
- H. **Checkpoint:** Lessons 11–14
- I. **Notes Upload:** Lesson 15
- J. **Unit 3 Exam:** Lesson 15

Algebra I A Syllabus**Unit 4:** Polynomials and Factoring Quadratic Expressions**Learn:** Lessons 16–20

- A. Lesson Titles:
- Adding and Subtracting Polynomials
 - Multiplying Polynomials
 - Introduction to Quadratic Expressions
 - Factoring Quadratic Expressions by Grouping
 - Other Methods for Factoring Quadratics
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook
- F. **Project, Part 3:** Lesson 17
- G. **Discussion:** Lesson 18
- H. **Checkpoint:** Lessons 16–19
- I. **Notes Upload:** Lesson 20
- J. **Unit 4 Exam:** Lesson 20

Algebra I A Syllabus**Unit 5: Quadratic Equations, Part 1****Learn: Lessons 21–25**

- A. Lesson Titles:
 - a. Solving Quadratic Equations by Factoring
 - b. Graphing a Factored Quadratic
 - c. Completing the Square
 - d. Solving Quadratic Equations by Taking Square Roots
 - e. The Vertex Form of a Quadratic Equation
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook
- F. **Project, Part 4:** Lesson 22
- G. **Discussion:** Lesson 23
- H. **Checkpoint:** Lessons 21–24
- I. **Notes Upload:** Lesson 25
- J. **Unit 5 Exam:** Lesson 25

Algebra I A Syllabus**Unit 6:** Quadratic Equations, Part 2**Learn:** Lessons 26–29

- A. Lesson Titles:
 - a. Graphing Quadratics in Vertex Form
 - b. The Quadratic Formula
 - c. Solving Quadratics with Technology
 - d. Systems Involving Quadratic Equations
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook
- F. **Checkpoint:** Lessons 26–28
- G. **Discussion:** Lesson 28
- H. **Unit 6 Exam:** Lesson 29
- I. **Unit 1–Unit 6 Reviews:** Lesson 30
- J. **Notes Upload:** Lessons 30
- K. **Course Final Exam:** Lesson 30
- L. **Course Summary:** Lesson 30

Algebra I B Syllabus

Suggested Prerequisites

Algebra I (1 of 2)

Course Description

Algebra I (2 of 2) extends students' algebraic skills as it takes them through the concept of functions.

In this course, students learn what functions are and how they can be used to model real-world situations. Students will identify key features and interpret functions presented as equations, graphs, tables, and verbal descriptions. Emphasis is placed on how different families of functions compare to one another, and transformations of functions will be performed for all function types presented. After functions, students learn about collecting data, how to present data in different data displays, and how to analyze data that is presented in different ways.

Course Objectives

- Identify functions and determine the domain and range of various functions.
- Identify and write recursive and explicit formulas for arithmetic and geometric sequences.
- Model real-life situations with exponential growth or decay functions by recognizing percent rate of change.
- Model real-life situations with quadratic functions by graphing and using key features on a graph, such as zeros and vertices.
- Calculate the average rate of change for nonlinear functions on an interval by applying the formula.
- Compare linear, quadratic, and exponential functions by examining their graphs and interpreting their key features.
- Perform transformations of functions by applying mapping statements for translations, dilations, and reflections.
- Evaluate and graph absolute-value, piecewise, and step functions by analyzing functions and identifying key features.
- Analyze and compare data sets from histograms, dot plots, and box plots.
- Model a data set with a function on a scatter plot.

Algebra I B Syllabus

Required Materials

These activities provide students with the opportunity to discuss mathematical concepts after the lesson's Learn activities. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice.

Project

There is one project split into four activities, with each part focusing on a different aspect of measurement. Within each activity, there are computer-graded problems and extended-response questions that are graded by the teacher. The project requires students to apply their knowledge and writing capabilities to demonstrate mastery of the content. The four project activities are located in Units 2, 3, 4, and 5.

Notes Upload

Note uploads can be used to check notes, and view scratch work. Teachers can request as much or as little as they need to monitor student work and study habits.

Algebra I B Syllabus**Schedule of Work****Unit 1: Exploring Functions****Learn: Lessons 1–5**

- A. Lesson Titles
 - Introduction to Functions
 - Properties of Functions
 - Working with Functions
 - Sequences
 - Formulas of Sequences
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook: Lessons 1–5
- F. Checkpoint: Lessons 1–4
- G. Discussion: Lesson 3
- H. Notes Upload: Lesson 5
- I. Unit 1 Exam: Lesson 5

Algebra I B Syllabus**Unit 2: More About Functions****Learn:** Lessons 6–10

- A. Lesson Titles
 - Geometric Sequences
 - Exponential Functions
 - Growth vs. Decay
 - Variables in Exponents
 - Rate of Change
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook: Lessons 6–10
- F. Checkpoint: Lessons 6–9
- G. Project, Part 1: Lesson 8
- H. Discussion: Lesson 9
- I. Notes Upload: Lesson 10
- J. Unit 2 Exam: Lesson 10

Algebra I B Syllabus**Unit 3: Using Functions****Learn: Lessons 11–15**

- A. Lesson Titles
 - Applying Functions
 - Quadratic Functions
 - Problem Solving with Functions
 - More Than One Function (or Relation)
 - Other Types of Functions
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook: Lessons 11–15
- F. Checkpoint: Lessons 11–14
- G. Discussion: Lesson 12
- H. Project, Part 2: Lesson 13

- I. Notes Upload: Lesson 25
- J. Unit 5 Exam: Lesson 25

Algebra I B Syllabus**Unit 6: Data and Statistics, Part 2****Learn:** Lessons 26–29

- A. Lesson Titles
 - Types of Correlations
 - Fitting Functions to Data
 - Choosing a Good Model
 - Making Predictions
- B. Key Terms
- C. Text and Videos
- D. Step-by-Step Example Problem(s)
- E. Workbook: Lessons 26–29
- F. Checkpoint: Lessons 26–28
- G. Discussion: Lesson 29
- H. Unit 1–Unit 6 Reviews: Lesson 30
- I. Notes Upload: Lesson 29
- J. Unit 6 Exam: Lesson 29
- K. Course Final Exam: Lesson 30
- L. Course Summary: Lesson 30

Algebra II A Syllabus

Course Syllabus

Suggested Prerequisites: Algebra 1A, Algebra 1B, Geometry A, Geometry B

Course Description

In this course, you will review and expand on your knowledge of linear, quadratic, and exponential functions, as well as broaden your understanding of polynomial and rational functions. You will work with interactive text, delve into example problems, and watch engaging, instructional videos to enhance your learning.

Course Objectives

Perform arithmetic operations with complex numbers.

Use complex numbers in polynomial identities and equations.

- Interpret the structure of expressions.
- Perform arithmetic operations on polynomials.
- Use polynomial identities to solve problems.
- Understand the relationship between zeros and factors of polynomials.
- Analyze polynomial functions using different representations.
- Represent and solve polynomial equations graphically.
- Rewrite rational expressions.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has four to six lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher be contacted for further information about course guidelines and grading policies.

Algebra II A Syllabus

Course Organization

A brief description of the intended learning outcomes appears at the beginning of each unit. Following this introduction are the lessons, which include the activities outlined below.

Math Muscle Exercise – These activities provide a review of the prior lesson to keep students' skills sharp and to prepare them for applying those skills in the new lesson they are starting.

Direct Instruction

Key Terms – These activities provide students with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos – These activities introduce students to the main concepts of each lesson. The text is comprised of interactive readings, including step-by-step examples in which students are asked questions and provided with feedback based on their responses. Three instructional videos are embedded within each of the concepts that appear in the text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Workbook – These activities provide questions designed to help students practice the skills they learn in the text and video activities.

Discussion – These activities provide students with the ability to communicate, interact, and collaborate with fellow classmates by posting to a discussion board. They compel students to think and write critically about math concepts, as well as assertions made by their peers. These activities are graded by the teacher.

Additional Assessment

Checkpoint – These computer-graded activities use 15 questions to assess students' mastery of lesson objectives.

Unit Exam – These computer-graded activities assess mastery of unit objectives.

Final Exam – This computer-graded activity assesses mastery of course objectives. Note that not all concepts tested on the exam are covered in the first part of Algebra 2. The Final Exam graded will be curved appropriately. A final exam asking the same types of questions will be given again in the second part of Algebra 2.

Algebra II A Syllabus**Schedule of Work****Unit 1:** Complex Numbers and Polynomials, Part 1

- A. Math Muscle Exercise (Lessons 3 and 5)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Complex Numbers, Part 1; Complex Numbers, Part 2; Complexity & Quadratics, Part 1; Complexity & Quadratics, Part 2; Parts of Polynomials, Part 1; Parts of Polynomials, Part 2
 - Workbook assessments
- C. Discussion (Lessons 2, 4, and 6)
- D. Checkpoint assessments (Lessons 2 and 4)
- E. Unit 1 Exam (Lesson 6)

Unit 2: Complex Numbers and Polynomials, Part 2

- A. Math Muscle Exercise (Lessons 7 and 9)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Operations on Polynomials, Part 1; Operations on Polynomials, Part 2; Polynomial Operations & Identities, Part 1; Polynomial Operations & Identities, Part 2
 - Workbook assessments
- C. Discussion (Lessons 8 and 10)
- D. Checkpoint assessments (Lesson 8)
- E. Unit 2 Exam (Lesson 10)

Algebra II A Syllabus**Unit 3: Polynomial Functions, Part 1**

- A. Math Muscle Exercise (Lessons 11, 13, and 15)
- B. Direct Instruction
 - a. Key Terms
 - b. Text and Videos: The Remainder Theorem, Part 1; The Remainder Theorem, Part 2; Factoring, Part 1; Factoring, Part 2; Zeros, Part 1; Zeros, Part 2
 - c. Workbook assessments
- C. Discussion (Lessons 12, 14, and 16)
- D. Checkpoint assessments (Lessons 12 and 14)
- E. Unit 3 Exam (Lesson 16)

Unit 4: Polynomial Functions, Part 2

- A. Math Muscle Exercise (Lessons 17 and 19)
- B. Direct Instruction
 - a. Key Terms
 - b. Text and Videos: End Behavior, Part 1; End Behavior, Part 2; Graphing Polynomials, Part 1; Graphing Polynomials, Part 2
 - c. Workbook assessments
- C. Discussion (Lessons 18 and 20)
- D. Checkpoint assessments (Lesson 18)
- E. Unit 4 Exam (Lesson 20)

Algebra II A Syllabus**Unit 5: Rational Functions, Part 1**

- A. Math Muscle Exercises (Lessons 21, 23, and 25)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Dividing Polynomials, Part 1; Dividing Polynomials, Part 2; Dividing Polynomials, Part 3; Dividing Polynomials, Part 4; Adding & Subtracting Rational Expressions, Part 1; Adding & Subtracting Rational Expressions, Part 2
 - Workbook assessments
- C. Discussion (Lessons 22, 24, and 26)
- D. Checkpoint assessments (Lessons 22 and 24)
- E. Unit 5 Exam (Lesson 26)

Unit 6: Rational Functions, Part 2

- F. Math Muscle Exercises (Lessons 27 and 29)
- G. Direct Instruction
 - Key Terms
 - Text and Videos: Multiplying & Dividing Rational Expressions, Part 1; Multiplying & Dividing Rational Expressions, Part 2; Graph Rational Functions, Part 1; Graph Rational Functions, Part 2
 - Workbook assessments
- I. Units 1–6 Review (Lesson 31)
- J. Discussion (Lessons 28 and 30)
- K. Checkpoint assessments (Lesson 28)
- L. Unit 6 Exam (Lesson 29)
- M. Course Final Exam (Lesson 31)

Algebra II B Syllabus

Course Syllabus

Suggested Prerequisites: Algebra 1A, Algebra 1B, Geometry A, Geometry B, Algebra 2 (1 of 2)

Course Description

In this course, you will review and expand on your knowledge of rational and radical equations, graph radical functions, and extend your knowledge of trigonometric functions. You will work with interactive text, delve into example problems, and watch engaging, instructional videos to enhance your learning.

Course Objectives

- Understand solving equations as a process of reasoning and explain the reasoning.
- Interpret the structure of expressions.
- Analyze functions using different representations.
- Represent and solve equations and inequalities graphically.
- Review trigonometric ratios and learn how to calculate reciprocal trig ratios.
- Use the unit circle to analyze angles and trig ratios.
- Graph the sine, cosine, and tangent functions and identify their key features.
- Rewrite trigonometric ratios in terms of other trigonometric ratios by using the reciprocal, tangent, and cotangent identities.
- Prove the Pythagorean Identity by applying definitions and other trigonometric identities.
- Rewrite trigonometric ratios in terms of other trigonometric ratios by using the negative angle identities.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has four to six lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the

Algebra II B Syllabus

program software, and others are graded by the teacher. It is recommended that the course teacher be contacted for further information about course guidelines and grading policies.

Course Organization

A brief description of the intended learning outcomes appears at the beginning of each unit. Following this introduction are the lessons, which include the activities outlined below.

Math Muscle Exercise – These activities provide a review of the prior lesson to keep students’ skills sharp and to prepare them for applying those skills in the new lesson they are starting.

Direct Instruction

Key Terms – These activities provide students with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos – These activities introduce students to the main concepts of each lesson. The text is comprised of interactive readings, including step-by-step examples in which students are asked questions and provided with feedback based on their responses. Three instructional videos are embedded within each of the concepts that appear in the text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Workbook – These activities provide questions designed to help students practice the skills they learn in the text and video activities.

Discussion – These activities provide students with the ability to communicate, interact, and collaborate with fellow classmates by posting to a discussion board. They compel students to think and write critically about math concepts, as well as assertions made by their peers. These activities are graded by the teacher.

Additional Assessment

Checkpoint – These computer-graded activities use 15 questions to assess students’ mastery of lesson objectives.

Unit Exam – These computer-graded activities assess mastery of unit objectives.

Final Exam – This computer-graded activity assesses mastery of course objectives.

Algebra II B Syllabus**Schedule of Work****Unit 1: Radical Functions, Part 1**

- A. Math Muscle Exercise (Lessons 1, 3, and 5)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Solve Rational Equations, Part 1; Solve Rational Equations, Part 2; Radical Expressions & Equations, Part 1; Radical Expressions & Equations, Part 2; Extraneous Solutions, Part 1; Extraneous Solutions, Part 2
 - Workbook assessments
- C. Discussion (Lessons 2, 4, and 6)
- D. Checkpoint assessments (Lessons 2 and 4)
- E. Unit 1 Exam (Lesson 6)

Unit 2: Radical Functions, Part 2

- A. Math Muscle Exercise (Lessons 7 and 9)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Graph Radical Functions, Part 1; Graph Radical Functions, Part 2; Intersections of Functions, Part 1; Intersections of Functions, Part 2
 - Workbook assessments
- C. Discussion (Lessons 8 and 10)
- D. Checkpoint assessments (Lesson 8)
- E. Unit 2 Exam (Lesson 10)

Algebra II B Syllabus**Unit 3: Trigonometric Functions, Part 1**

- A. Math Muscle Exercise (Lessons 11, 13, and 15)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Trigonometric Ratios, Part 1; Trigonometric Ratios, Part 2; Unit Circle, Part 1; Unit Circle, Part 2; Angles & Radians, Part 1; Angles & Radians, Part 2
 - Workbook assessments
- C. Discussion (Lessons 12, 14, and 16)
- D. Checkpoint assessments (Lessons 12 and 14)
- E. Unit 3 Exam (Lesson 16)

Unit 4: Trigonometric Functions, Part 2

- A. Math Muscle Exercise (Lessons 17 and 19)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Graphing Sine, Cosine, and Tangent Functions, Part 1; Graphing Sine, Cosine, and Tangent Functions, Part 2; Identifying Key Features, Part 1; Identifying Key Features, Part 2
 - Workbook assessments
- C. Discussion (Lessons 18 and 20)
- D. Checkpoint assessments (Lesson 18)
- E. Unit 4 Exam (Lesson 20)

Algebra II B Syllabus**Unit 5: Trigonometric Identities, Part 1**

- A. Math Muscle Exercises (Lessons 21 and 23)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Fundamental Trigonometric Identities, Part 1; Fundamental Trigonometric Identities, Part 2; Finding Sine, Part 1; Finding Sine, Part 2
 - Workbook assessments
- C. Discussion (Lessons 22 and 24)
- D. Checkpoint assessments (Lesson 22)
- E. Unit 5 Exam (Lesson 24)

Unit 6: Trigonometric Identities, Part 2

- A. Math Muscle Exercises (Lessons 25 and 27)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Finding Cosine, Part 1; Finding Cosine, Part 2; Finding Tangent, Part 1; Finding Tangent, Part 2
 - Workbook assessments
- C. Units 1–6 Review (Lesson 29)
- D. Discussion (Lessons 26 and 28)
- E. Checkpoint assessments (Lesson 26)
- F. Unit 6 Exam (Lesson 28)
- G. Course Final Exam (Lesson 29)

College Mathematics Preparation A Syllabus

Course Syllabus

Suggested Prerequisites: Algebra 1 Geometry, Algebra 2

Course Description

From construction to physics, the concepts in this course are used in a variety of real-world situations. In this course, students use their knowledge about equations and inequalities to model real-life situations. They will expand their skills with regard to solving equations, including how to solve exponential equations with logarithms. They will also synthesize and generalize a variety of function families.

As students work through this course, they will complete 30 lessons that have a similar structure. Each lesson pair starts with a refresher of previous concepts, where they work through a few problems. After that, they move on to activities in which the lesson is taught by watching videos and working through an interactive text activity. They will then answer the Workbook questions. After that, students interact with peers in the discussion board to talk about what they are learning in the lesson. Then they complete a Checkpoint quiz or Unit Exam. This course also includes a Close Reading exercise, where students will read an article about global warming, perform some research, and then write an essay on the topic. Lesson 31 is a review of the concepts from each unit and students take the Final Exam.

Course Objectives

- Create equations and inequalities in one variable and use them to solve problems.
- Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.
- Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or non-viable options in a modeling context.
- Rearrange formulas to highlight a quantity of interest.
- Write functions defined by expressions in different but equivalent forms.
- Find inverse functions.
- Express logarithms as solutions to exponential models.
- Use key features to identify and graph logarithmic functions.
- Analyze mapping statements in order to identify and graph translations of functions.
- Calculate and compare the average rate of change of different functions.
- Identify the differences and similarities between average rate of change and instantaneous rate of change.
- Examine key features in graphs and tables in order to identify the family function.
- Determine the best family function to model different situations.

Three instructional videos are embedded within each of the concepts that appear in the text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Workbook – These activities provide questions designed to help students practice the skills they learn in the text and video activities.

College Mathematics Preparation A Syllabus

Discussion – These activities provide students with the ability to communicate, interact, and collaborate with fellow classmates by posting to a discussion board. They compel students to think and write critically about math concepts, as well as assertions made by their peers. These activities are graded by the teacher.

Close Reading Project – This assessment is graded by the teacher and requires the students' application of knowledge and writing capabilities to demonstrate mastery of the content.

Additional Assessment

Checkpoint – These computer-graded activities use 15 questions to assess students' mastery of lesson objectives.

Unit Exam – These computer-graded activities assess mastery of unit objectives.

Final Exam – This computer-graded activity assesses mastery of course objectives.

College Mathematics Preparation A Syllabus**Schedule of Work****Unit 1: Equations and Inequalities, Part 1**

- A. Math Muscle Exercise (Lessons 3 and 5)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Single-Variable Equations and Inequalities, Part 1; Single-Variable Equations and Inequalities, Part 2; Multivariable Equations and Inequalities, Part 1; Multivariable Equations and Inequalities, Part 2; Multivariable Systems of Equations, Part 1; Multivariable Systems of Equations, Part 2
 - Workbook assessments
- C. Discussion (Lessons 2, 4, and 6)
- D. Checkpoint assessments (Lessons 2 and 4)
- E. Unit 1 Exam (Lesson 6)

Unit 2: Equations and Inequalities, Part 2

- A. Math Muscle Exercise (Lessons 7 and 9)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Multivariable Systems of Inequalities, Part 1; Multivariable Systems of Inequalities, Part 2; Optimization and Linear Programming, Part 1; Optimization and Linear Programming, Part 2
 - Workbook assessments
- C. Discussion (Lessons 8 and 10)
- D. Checkpoint assessments (Lesson 8)
- E. Unit 2 Exam (Lesson 10)
- F. Close Reading (Lesson 10)

College Mathematics Preparation A Syllabus**Unit 3: Inversion, Part 1**

- A. Math Muscle Exercise (Lessons 11, 13, and 15)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Rearranging Formulas and Isolating Variables, Part 1; Rearranging Formulas and Isolating Variables, Part 2; Rewriting Exponentials, Part 1; Rewriting Exponentials, Part 2; Inverse Functions, Part 1; Inverse Functions, Part 2
 - Workbook assessments
- C. Discussion (Lessons 12, 14, and 16)
- D. Checkpoint assessments (Lessons 12 and 14)
- E. Unit 3 Exam (Lesson 16)

Unit 4: Inversion, Part 2

- A. Math Muscle Exercise (Lessons 17 and 19)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Logarithms, Part 1; Logarithms, Part 2; Logarithms, Part 3; Logarithms, Part 4
 - Workbook assessments
- C. Discussion (Lessons 18 and 20)
- D. Checkpoint assessments (Lesson 18)
- E. Unit 4 Exam (Lesson 20)

College Mathematics Preparation A Syllabus**Unit 5: Function Models, Part 1**

- A. Math Muscle Exercises (Lessons 21, 23, and 25)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Graphing Logarithms, Part 1; Graphing Logarithms, Part 2; Transformations of Graphs, Part 1; Transformations of Graphs, Part 2; Average Rates of Change, Part 1; Average Rates of Change, Part 2
 - Workbook assessments
- C. Discussion (Lessons 22, 24, and 26)
- D. Checkpoint assessments (Lessons 22 and 24)
- E. Unit 5 Exam (Lesson 26)

Unit 6: Function Models, Part 2

- A. Math Muscle Exercises (Lessons 27 and 29)
- B. Direct Instruction
 - Key Terms
 - Text and Videos: Exploring Function Families, Part 1; Exploring Function Families, Part 2; Building Models, Part 1; Building Models, Part 2; Review
 - Workbook assessments
- C. Units 1–6 Review (Lesson 31)
- D. Discussion (Lessons 28 and 30)
- E. Checkpoint assessments (Lesson 28)
- F. Unit 6 Exam (Lesson 29)
- G. Course Final Exam (Lesson 31)

College Mathematics Preparation B Syllabus

Suggested Prerequisites

Algebra 1 Geometry, Algebra 2, College Mathematics Preparation (1 of 2)

Course Description

From construction to physics, the concepts in this course are used in a variety of real-world situations. In this course, students will learn how to make probability decisions, and how to use basic statistics and sampling processes to understand data sets and answer questions about samples and populations.

As students work through this course, they will complete 28 lessons that have a similar structure. Each lesson pair starts with a refresher of previous concepts, where they work through a few problems. After that, they move on to activities in which the lesson is taught by watching videos and working through an interactive text activity. They will then answer the Workbook questions. After that, students interact with peers in the discussion board to talk about what they are learning in the lesson. Then they complete a Checkpoint quiz or Unit Exam. Lesson 29 is a review of the concepts from each unit and students take the Final Exam.

Course Objectives

- Understand and evaluate random processes underlying statistical experiments.
- Use probability to evaluate outcomes of decisions.
- Apply probability concepts in new contexts.
- Define the basic vocabulary of statistics.
- Differentiate between types of statistical studies.
- Identify and analyze methods of random sampling and determine appropriate sample sizes.
- Identify sources of bias in statistical studies.
- Analyze the results of statistical studies using the margin of error.
- Understand and evaluate random processes underlying statistical experiments.
- Make inferences and justify conclusions from sample surveys, experiments, and observational studies.
- Summarize, represent, and interpret data on a single count or measurement variable.
- Use probability to evaluate outcomes of decisions.

- A. Math Muscle Exercises (Lessons 25 and 27)
- B. Direct Instruction
 - a. Key Terms
 - b. Text and Videos: Normal Distributions, Part 1; Normal Distributions, Part 2; What Are z-Scores?, Part 1; What Are z-Scores?, Part 2; Review
 - c. Workbook assessments
- C. Units 1–6 Review (Lesson 29)
- D. Discussion (Lessons 26 and 28)
- E. Checkpoint assessments (Lesson 26)
- F. Unit 6 Exam (Lesson 28)
- G. Course Final Exam (Lesson 29)

Consumer Math A&B**Course Description**

This course focuses on the mathematics involved in making wise consumer decisions. Students explore the many ways in which mathematics affects their daily lives. The first semester will cover paychecks and wages, taxes, insurance, budgets, bank accounts, credit cards, interest calculations, and comparison shopping. Second semester topics include vehicle and home purchasing, investing, and business and employee management.

Course Requirements**Semester A****Major Concepts**

1. Basic Mathematics Skills
2. Rounding and Estimating
3. Ratios, Proportions, and Percents
4. Earned Income
5. Banking and Checking Accounts
6. Budgeting and Recordkeeping
7. Living Expenses
8. Consumer Credit
9. Saving and Investing Money

Semester B**Major Concepts**

1. Measurement
2. Graphs and Maps
3. Remodeling a Home
4. Taxes
5. Insurance
6. Owning and Operating Automobiles
7. Traveling Expenses
8. Planning and Budgeting for Meals
9. Wholesaling and Retailing
10. Operating a Business

Geometry A Syllabus

Suggested Prerequisites

Algebra 1

Course Description

In Geometry (1 of 2), students will build upon their understanding of geometric concepts by working through a variety of geometric problems, writing formal proofs, and constructing geometric figures. Transformations are used to explain the concepts of congruent and similar figures with a focus on the properties of congruent and similar triangles. These properties are proven as students become familiar with postulates, theorems, and formal proofs. The course wraps up with trigonometric ratios and their applications to real-world situations.

Course Objectives

- Use formal definitions for basic terms in geometry.
- Find distances on number lines, lengths of segments, and measures of angles.
- Construct copies of line segments and angles.
- Write introductory two-column proofs related to segment lengths and angle relationships.
- Identify transformations and rotational symmetry applied to a figure.
- Use rigid transformations to show that two figures are congruent.
- Identify congruent parts of congruent triangles.
- Prove triangles are congruent using side lengths and angle measures.
- Find missing measures in congruent triangles.
- Prove theorems related to angle pair relationships and perpendicular bisectors.
- Identify and use angle pair relationships created by parallel lines cut by a transversal in proofs and problems.
- Use perpendicular bisectors in proofs and problems.
- Use medians or midsegments of triangles in proofs and problems.
- Construct parallel lines and perpendicular bisectors.
- Prove properties of parallelograms.
- Use properties of parallelograms in proofs and problems.
- Use properties of rectangles, rhombuses, and squares in proofs.
- Construct perpendicular lines.

Geometry A Syllabus

- Identify dilations, their scale factor, and their center of dilation.
- Use dilations to determine similarity.
- Use postulates and theorems to prove that triangles are similar.
- Use properties of similar triangles to find side lengths and angle measures.
- Use the special properties of medians and midsegments in proofs about triangles.
- Prove the Pythagorean Theorem using similar triangles.
- Define and identify sine, cosine, and tangent ratios.
- Find side lengths using sine, cosine, tangent, and the Pythagorean theorem.
- Use inverse relationships to find the measures of acute angles.

Required Materials

- Internet browser

Course Overview

This course is made up of six units, and each unit contains four to six lessons. Throughout the course, material is presented in different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Learn

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos

Geometry A Syllabus

Students are introduced to the main concepts of each lesson. Text consists of interactive readings, including visual elements such as diagrams, graphs, and infographics to aid learning. One or more instructional videos may be embedded within each of the 2 to 3 activities that comprise each lesson's text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Example Problem(s)

Students are provided with one or more problems designed to help them practice the skills they learn in the text and video activities. Students are given feedback on both correct and incorrect answers, so they can feel more confident completing similar problems in their workbooks and assessments.

Workbook

Students are provided with 1 to 5 questions after each text piece in the lesson to allow them the opportunity to practice the skills and concepts they just learned in the text.

Assessment

Checkpoints

These computer-graded activities use 3 to 7 questions to assess students' mastery of lesson objectives. They appear at the end of each lesson that does not contain a unit exam.

Unit Exams

These computer-graded activities, which occur at the end of each unit, include 15 to 20 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity uses 32 questions to assess mastery of course objectives.

Discussions

These activities provide students with the opportunity to discuss mathematical concepts. There are 6 discussion boards spread throughout the course. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates. They also review, analyze, and discuss the mathematical ideas of their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice. Locations of the discussions, the discussion prompts, and sample answers are provided in the Course Overview document.

Projects

There are 6 projects that focus on constructions of geometric figures using geometric tools. Each project allows students to choose whether they would like to complete their work using a pencil-and-paper method or using the provided technology. Students will upload a picture of their work, or a screenshot, for their teacher to grade. Locations for the projects and suggested grading rubrics are included in the Projects document.

Geometry A Syllabus**Schedule of Work****Unit 1:** Foundations of Geometry**Learn:** Lessons 1–5

- A. Lesson Titles:
 - Lines
 - Definitions from Undefined Terms
 - Introduction to Constructions
 - Conditional Statements
 - Introduction to Proofs
- B. Key Terms
- C. Text and Videos
- D. Example Problem(s)
- E. Workbook
- F. Discussion: Lesson 4
- G. Checkpoint: Lessons 1, 2, and 4
- H. Construction Project 1: Copy an Angle, Lesson 3
- I. Unit 1 Exam: Lesson 5

Geometry A Syllabus**Unit 2: Transformations and Congruent Triangles****Learn:** Lessons 6–11

- A. Lesson Titles:
 - Define Transformations
 - Transformations and Symmetry
 - Transformations and Congruence
 - Prove Triangles Congruent Using Side Lengths
 - Side-Angle-Side Triangle Congruence
 - Angle-Side-Angle Triangle Congruence
- B. Key Terms
- C. Text and Videos
- D. Example Problem(s)
- E. Workbook
- F. Discussion: Lesson 8
- G. Checkpoint: Lessons 6–10
- H. Construction Project 2: Angle Bisector, Lesson 7
- I. Unit 2 Exam: Lesson 11

Geometry A Syllabus**Unit 3: Segments, Lines, and Angles****Learn:** Lessons 12–15

A. Lesson Titles:

- Angles and Parallel Lines
- Angles in Triangles
- Perpendicular Bisectors
- Segments in Triangles

B. Key Terms

C. Text and Videos

D. Example Problem(s)

E. Workbook

F. Discussion: Lesson 13

G. Checkpoint: Lessons 12–14

H. Construction Project 3: Parallel Lines, Lesson 12

I. Construction Project 4: Perpendicular Bisector, Lesson 14

J. Unit 3 Exam: Lesson 15

Geometry A Syllabus**Unit 4: Triangles and Parallelograms****Learn:** Lessons 16–19

A. Lesson Titles:

- More Triangle Congruence
- Properties of Parallelograms
- Prove a Figure Is a Parallelogram
- Special Parallelograms

B. Key Terms

C. Text and Videos

D. Example Problem(s)

E. Workbook

F. Checkpoint: Lessons 16–18

G. Construction Project 5: Perpendicular Lines – Case 1 Lesson 16

H. Construction Project 6: Perpendicular Lines – Case 2, Lesson 17

I. Unit 4 Exam: Lesson 19

Geometry A Syllabus**Unit 5: Dilations and Similarity****Learn** Lessons 20–25

- A. Lesson Titles:
 - Dilations
 - Similarity
 - Prove Similarity in Triangles Using Angles
 - Prove Similarity in Triangles Using Sides
 - Proportions in Triangles
 - Similarity and Proportions
- B. Key Terms
- C. Text and Videos
- D. Example Problem(s)
- E. Workbook
- F. Discussion: Lessons 21 and 24
- G. Checkpoint: Lessons 20–24
- H. Unit 5 Exam: Lesson 25

Geometry A Syllabus**Unit 6: Right Triangles and Ratios****Learn:** Lessons 26–28

- A. Lesson Titles:
 - a. Pythagorean Theorem and Similarity
 - b. Relationship between Ratios
 - c. Problem Solving with Trigonometry
- B. Key Terms
- C. Text and Videos
- D. Example Problem(s)
- E. Workbook
- F. Checkpoint: Lessons 26 and 27
- G. Discussion: Lesson 27
- H. Unit 6 Exam: Lesson 28
- I. Unit 1–Unit 6 Reviews: Lesson 29
- J. Course Final Exam: Lesson 30

Geometry B Syllabus

Suggested Prerequisites

Geometry (1 of 2)

Course Description

In Geometry (2 of 2), students will build upon their understanding of geometric concepts by working through a variety of geometric problems, writing formal proofs in a coordinate plane, and constructing geometric figures. They apply the formulas for slope, midpoint, and distance in coordinate proofs. They also learn theorems about circles, find arc lengths and areas of sectors of circles, and write equations of circles in the coordinate system. For three-dimensional figures, students determine their volumes and cross sections. They also identify solids of revolution. Finally, students study probability.

Course Objectives

- Prove properties of parallel and perpendicular lines related to their slopes.
- Write equations of parallel and perpendicular lines.
- Use slope in coordinate proofs.
- Use the midpoint formula to find coordinates of midpoints and endpoints of segments.
- Use midpoints in coordinate proofs.
- Find the location of a point on a directed line segment that partitions the segment by using part-to-whole and part-to-part ratios.
- Find the distance between two points in a coordinate plane using the Pythagorean Theorem and the distance formula.
- Use the distance formula to find the perimeters and areas of polygons in the coordinate plane.
- Write the standard form of the equation of a circle using the Pythagorean Theorem and mathematical patterns.
- Use the standard form of the equation of a circle to identify the center and radius of the circle.
- Rewrite the equation of a circle in standard form by completing the square.
- Write coordinate proofs related to parallelograms and circles using the distance formula.
- Derive the equation of a parabola from given information about the parabola.
- Identify tangent lines and segments, secant lines and segments, and chords.
- Use theorems about radii and chords to find unknown measures within a circle.
- Use theorems about secant and tangent lines and segment to find unknown measures.

Geometry B Syllabus

- Construct a circumscribed circle of a triangle.
- Construct an inscribed circle of a triangle.
- Prove that all circles are similar.
- Use arc and central angle relationships to find unknown measures.
- Use arc and inscribed angle relationships to find unknown measures within circles and quadrilaterals.
- Find the length of an arc by using its relationship to the circumference of the circle.
- Use the relationship between the radius of a circle and its circumference to find the measure of an angle in units called radians.
- Find the area of circle sectors by using their relationship to the area of the circle.
- Inscribe an equilateral triangle in a circle.
- Inscribe a square in a circle.
- Explain (informally) the formula for the volume of pyramids and cones.
- Calculate the volume of three-dimensional figures.
- Identify two-dimensional cross sections of three-dimensional objects.
- Identify three-dimensional objects created by rotations of two-dimensional objects.
- Solve design problems that involves volume.
- Solve problems involving the density of a two-dimensional region or a three-dimensional object.
- Identify events as sets containing desired outcomes in probability experiments and calculate the probabilities of those events.
- Solve problems that involve the probability of independent and dependent events.
- Construct two-way frequency tables and use them to calculate conditional probabilities.
- Calculate probabilities of mutually exclusive events and overlapping events using the Addition Rule.

Required Materials

- Internet browser

Geometry B Syllabus

Course Overview

This course is made up of six units, and each unit contains four to five lessons. Throughout the course, material is presented in different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Learn

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos

Students are introduced to the main concepts of each lesson. Text consists of interactive readings, including visual elements such as diagrams and graphs to aid learning. One instructional video may be embedded within each of the two to three activities that comprise each lesson's text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Example Problem(s)

Students are provided with one or more problems designed to help them practice the skills they learn in the text and video activities. Students are given feedback on both correct and incorrect answers, so they can feel more confident about completing similar problems in their workbooks and assessments.

Workbook

Students are provided with one to four questions after each text piece in the lesson to allow them the opportunity to practice the skills and concepts they just learned in the text.

Assessments

Checkpoints

These computer-graded activities use three to seven questions to assess students' mastery of lesson objectives. They appear at the end of each lesson that does not contain a unit exam.

Unit Exams

These computer-graded activities, which occur at the end of each unit, include 18 to 20 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity uses 34 questions to assess mastery of course objectives.

Discussions

Geometry B Syllabus

These activities provide students with the opportunity to discuss mathematical concepts. There are five discussion boards spread throughout the course. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates. They also review, analyze, and discuss the mathematical ideas of their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice. Locations of the discussions, the discussion prompts, and sample answers are provided in the Course Overview document.

Projects

There are six projects in the course. The first project has three parts and focuses on the process of deriving an equation for a parabola. The remaining five projects focus on constructing geometric figures using geometric tools. For each construction project, students can choose to complete their work using a compass and straightedge on paper or the interactive tool provided in the activity. Then, students upload a picture of their work or a screenshot for their teacher to grade. Locations for the projects and suggested grading rubrics are included in the Projects document.

Schedule of Work

Unit 1: Coordinate Geometry: Slope and Midpoints

Geometry B Syllabus**Learn:** Lessons 1–5

- A. Lesson Titles:
 - a. Slope and Parallel Lines
 - b. Slope and Perpendicular Lines
 - c. Coordinate Proofs with Slope
 - d. The Midpoint Formula
 - e. Splitting Segments
- B. Key Terms
- C. Text and Videos
- D. Example Problem(s)
- E. Workbook
- F. Checkpoint: Lessons 1–4
- G. Discussion: Lesson 3
- H. Unit 1 Exam: Lesson 5

Unit 2: Coordinate Geometry: Distance Formula

- A. **Learn:** Lessons 6–10
- B. Lesson Titles:
 - a. Distance in the Coordinate Plane

Geometry B Syllabus

- b. Perimeter and Area
 - c. Equations of Circles
 - d. Rewrite Equations of Circles
 - e. Coordinate Proofs with Distance Formula
- C. Key Terms
 - D. Text and Videos
 - E. Example Problem(s)
 - F. Workbook
 - G. Checkpoint: Lessons 6–9
 - H. Project 1: Parabolas – Part 1 (Definitions); Lesson 7
 - I. Project 1: Parabolas – Part 2 (Finding Distance); Lesson 8
 - J. Project 1: Parabolas – Part 3 (Writing an Equation); Lesson 9
 - K. Unit 2 Exam: Lesson 10

Unit 3: Circles: Line and Segment Relationships**Learn:** Lessons 11–14

- A. Lesson Titles:
 - a. Chords, Radii, and Diameters
 - b. Lines That Intersect Circles
 - c. Theorems about Tangents

Geometry B Syllabus

- d. Intersecting Segments
- B. Key Terms
- C. Text and Videos
- D. Example Problem(s)
- E. Workbook
- F. Checkpoint: Lessons 11–13
- G. Discussion: Lesson 11
- H. Construction Project 2: Circumscribed Circle of a Triangle; Lesson 12
- I. Construction Project 3: Inscribed Circle of a Triangle; Lesson 13
- J. Unit 3 Exam: Lesson 14

Unit 4: Circles: Arc and Angle Relationships**Learn:** Lessons 15–19

- A. Lesson Titles:
 - a. Similarity and Arc Measure in Circles
 - b. Angles, Arcs, and Chords
 - c. Inscribed Angles and Quadrilaterals
 - d. Circumference and Arc Length
 - e. Areas in Circles

Geometry B Syllabus

- B. Key Terms
- C. Text and Videos
- D. Example Problem(s)
- E. Workbook
- F. Checkpoint: Lessons 15–18
- G. Discussion: Lesson 16
- H. Construction Project 4: Inscribe an Equilateral Triangle in a Circle; Lesson 15
- I. Construction Project 5: Inscribe a Square in a Circle; Lesson 17
- J. Unit 4 Exam: Lesson 19

Unit 5: Three-Dimensional Figures**Learn: Lessons 20–23**

- A. Lesson Titles:
 - Volumes
 - Solids of Revolution and Cross Sections
 - Model with Three Dimensions
 - Density
- B. Key Terms
- C. Text and Videos
- D. Example Problem(s)

Geometry B Syllabus

- E. Workbook
- F. Checkpoint: Lessons 20–22
- G. Discussion: Lessons 20
- H. Construction Project 6: Inscribe a Regular Hexagon in a Circle; Lesson 21
- I. Unit 5 Exam: Lesson 23

Unit 6: Probability**Learn:** Lessons 24–28

- A. Lesson Titles:
 - Sets in Probability
 - Independent Events
 - Conditional Probability
 - Two-Way Frequency Tables
 - Probability of Unions of Events
- B. Key Terms
- C. Text and Videos
- D. Example Problem(s)
- E. Workbook

Geometry B Syllabus

- F. Checkpoint: Lessons 24–27
- G. Discussion: Lesson 25
- H. Unit 6 Exam: Lesson 28
- I. Unit 1–Unit 6 Reviews: Lesson 29
- J. Course Final Exam: Lesson 30

Honors Algebra I A Syllabus

Course Syllabus

Suggested Prerequisites

Sixth Grade Math, Seventh Grade Math, Math 8A and Math 8B

Course Description

In Algebra 1A, students will build upon their knowledge of the real number system and linear equations, and then extend this knowledge to a study of quadratic expressions and equations. They will begin by reviewing computations with rational numbers and learning about rational exponents. Then, they will move on to explore equations and graphs of lines, systems of linear equations, and linear inequalities. Finally, they will go through a thorough introduction to quadratic expressions and equations, including factoring, solving, and graphing quadratics. As a common thread throughout the entire course, students use their knowledge of linear and quadratic equations to model and describe real-life situations.

Course Objectives

- Perform calculations with rational numbers.
- Evaluate expressions using the order of operations.
- Evaluate and simplify expressions involving rational exponents and radicals.
- Explore the relationships between rational and irrational numbers.
- Create and solve linear equations.
- Work with linear equations in different forms and graph them.
- Find the solution to a system of linear equations by examining a graph.
- Isolate a variable in a literal equation.
- Solve systems of linear equations using different methods.
- Create, solve, and graph one-variable linear inequalities.
- Find solution sets to two-variable linear inequalities and systems of two-variable linear inequalities by graphing them.
- Isolate a variable in a literal equation.
- Define polynomials, focusing on one-variable quadratic polynomials.
- Add and subtract polynomials.
- Factor quadratic expressions.
- Explore measurement in a scientific context.
- Write quadratic equations in factored form or vertex form.

Honors Algebra I A Syllabus

- Graph quadratic equations that are written in factored form.
- Complete the square for a quadratic expression or equation.
- Solve quadratic equations by factoring, by taking square roots, and by completing the square.
- Graph quadratic equations from the vertex form.
- Solve quadratic equations with the quadratic formula.
- Solve quadratic equations using technology.
- Solve systems involving quadratic equations.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Prepare to Learn

These activities provide a review of the prior lesson(s) to keep students' skills sharp and prepare them for applying those skills in the new lesson they are starting.

Learn

Key Terms

Students are provided with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos

Students are introduced to the main concepts of each lesson. The text consists of interactive readings, including visual elements such as diagrams, graphs, and infographics to aid learning. One or more instructional videos may be embedded within each of the three activities that comprise each lesson's text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Honors Algebra I A Syllabus

Step-by-Step Example Problem(s)

Students are provided with one or more multi-step problems designed to help them practice the skills they learn in the text and video activities. Students are taken through problems in small steps to help guide them to the correct answers.

Practice

These interactive exercises use up to 10 questions to assess students' mastery of the lesson's concepts. The questions provide generic correct/incorrect feedback, and provide the complete and correct solution if students answer incorrectly a maximum of two to three times.

Assessment

Checkpoint

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives. They appear in the first four lessons of Units 1-5, and the first three lessons of Unit 6.

Unit Exam

These computer-graded activities, which occur at the end of each unit, include 30 questions that assess mastery of unit objectives.

Final Exam

This computer-graded activity assesses mastery of course objectives.

Discussions

These activities provide students with the opportunity to discuss mathematical concepts after the lesson's Learn activities. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates, as well as to hear, analyze, and discuss the mathematical ideas of their classmates. The discussions are intended to address the Common Core Standards for Mathematical Practice.

Notes Upload

Note uploads can be used to check notes, and view scratch work. Teachers can request as much or as little as they need to monitor student work and study habits.

Project

These activities are assessments that address standards in context and generally include a simple essay that is graded by the teacher. Projects require students to apply their knowledge and writing capabilities to demonstrate mastery of the lesson/unit content. There are Projects in Units 1, 2, 3, 4, and 5.

Honors Algebra I A Syllabus**Schedule of Work****Unit 1: The Real Numbers**

- A. Prepare to Learn (Lessons 1–5)
- B. Learn (Lessons 1–5)
 - Key Terms
 - Text: Integers; Rational Numbers; Exponents, Roots, and Irrational Numbers; Rational Exponents; Order of Operations
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice: (Lessons 1–5)
- D. Discussion (Lessons 1–5)
- E. Project (Lessons 1–4)
- F. Checkpoint (Lessons 1–4)
- G. Notes Upload (Lesson 5)
- H. Unit 1 Exam (Lesson 5)

Unit 2: Lines and Their Graphs

- A. Prepare to Learn (Lessons 6–10)
- B. Learn (Lessons 6–10)
 - Key Terms
 - Text: Solving Linear Equations; Forms of Equations of Lines; Graphing Lines; Creating Linear Equations from Graphs; Linear Systems by Graphing
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice: (Lessons 6–10)
- D. Discussion (Lessons 6–10)
- E. Project (Lessons 6, 8, and 10)
- F. Notes Upload (Lessons 7 and 9)
- G. Checkpoint (Lessons 6–9)
- H. Unit 2 Exam (Lesson 10)

Honors Algebra I A Syllabus

Unit 3: Linear Systems and Inequalities

- A. Prepare to Learn (Lessons 11–15)
- B. Learn (Lessons 11–15)
 - Key Terms
 - Text: Solving Linear Systems by Substitution; Solving Systems by Elimination; Linear Inequalities in One Variable; Linear Inequalities in Two Variables; Systems of Linear Inequalities
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice (Lessons 11–15)
- D. Discussion (Lessons 11–15)
- E. Notes Upload (Lessons 11, 13, 15)
- F. Project (Lessons 12, 14)
- G. Checkpoint (Lessons 11–14)
- H. Unit 3 Exam (Lesson 15)

Unit 4: Polynomials and Factoring Quadratic Expressions

- A. Prepare to Learn (Lessons 16–20)
- B. Learn (Lessons 16–20)
 - Key Terms
 - Text: Adding and Subtracting Polynomials; Multiplying Polynomials; Introduction to Quadratic Expressions; Factoring Quadratic Expressions by Decomposition; Other Methods for Factoring Quadratics
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice (Lessons 16–20)
- D. Discussion (Lessons 16–20)
- E. Notes Upload (Lessons 17 and 19)
- F. Project (Lessons 16, 18, and 20)
- G. Checkpoint (Lessons 16–19)
- H. Unit 4 Exam (Lesson 20)

Unit 5: Quadratic Equations, Part I

- A. Prepare to Learn (Lessons 21–25)

Honors Algebra I A Syllabus

- B. Learn (Lessons 21–25)
 - Key Terms
 - Text: Solving Quadratic Equations by Factoring; Graphing Quadratics in Factored Form; Completing the Square; Solving Quadratic Equations by Taking Square Roots; The Vertex Form of a Quadratic Equation
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice (Lesson 21–25)
- D. Discussion (Lessons 21–25)
- E. Notes Upload (Lessons 21, 23, 25)
- F. Project (Lessons 22, 24)
- G. Checkpoint (Lessons 21–24)
- H. Unit 5 Exam (Lesson 25)

Unit 6: Quadratic Equations, Part II

- A. Prepare to Learn (Lessons 26–29)
- B. Learn (Lessons 26–29)
 - Key Terms
 - Text: Graphing Quadratics in Vertex Form; The Quadratic Formula; Solving Quadratics with Technology; Systems Involving Quadratic Equations
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice: Lessons 26–29
- D. Unit 1–Unit 6 Reviews (Lesson 30)
- E. Discussion (Lessons 26–30)
- F. Notes Upload (Lessons 26–29)
- G. Checkpoint (Lessons 26–28)
- H. Unit 6 Exam (Lesson 29)
- I. Course Final Exam (Lesson 30)
- J. Course Summary (Lesson 30)

Honors Algebra I B Syllabus

Course Syllabus

Suggested Prerequisites

MA101 – Algebra 1A

Course Description

Algebra 1B extends students' algebraic skills as it takes them through the concept of functions.

In this course, students learn what functions are and how they can be used to model real-world situations. Students will identify key features and interpret functions presented as equations, graphs, tables, and verbal descriptions. Emphasis is placed on how different families of functions compare to one another, and transformations of functions will be performed for all function types presented. After functions, students learn about collecting data, how to present data in different data displays, and how to analyze data that is presented in different ways. The course concludes with an introduction to probability, where students will find compound probabilities based on whether events are dependent, independent, or mutually exclusive.

Course Objectives

- Identify functions and determine the domain and range of various functions.
- Identify and write recursive and explicit formulas for arithmetic and geometric sequences
- Model real-life situations with exponential growth or decay functions by recognizing percent rate of change.
- Model real-life situations with quadratic functions by graphing and using key features on a graph, such as zeros and vertices.
- Calculate the average rate of change for nonlinear functions on an interval by applying the formula.
- Compare linear, quadratic, and exponential functions by examining their graphs and interpreting their key features.
- Perform transformations of functions by applying mapping statements for translations, dilations, and reflections.
- Evaluate and graph absolute-value, piecewise, and step functions by analyzing functions and identifying key features.
- Analyze and compare data sets from histograms, dot plots, and box plots.
- Model a data set with a function on a scatter plot.
- Find the compound probability of independent events.

Note uploads can be used to check notes, and view scratch work. Teachers can request as much or as little as they need to monitor student work and study habits.

Honors Algebra I B Syllabus**Schedule of Work****Unit 1: Exploring Functions**

- A. Prepare to Learn (Lessons 1–5)
- B. Learn (Lessons 1–5)
 - Key Terms
 - Text: Introduction to Functions; Properties of Functions; Working with Functions; Sequences; Formulas of Sequences
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice: (Lessons 1–5)
- D. Discussion (Lessons 2 & 4)
- E. Checkpoint (Lessons 1–4)
- F. Notes Upload (Lessons 1-5)
- G. Unit 1 Exam (Lesson 5)

Unit 2: More About Functions

- A. Prepare to Learn (Lessons 6–10)
- B. Learn (Lessons 6–10)
 - Key Terms
 - Text: Geometric Sequences; Exponential Functions; Growth vs. Decay; Variables in Exponents; Rate of Change
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice: (Lessons 6–10)
- D. Discussion (Lessons 7 & 9)
- E. Notes Upload (Lessons 6-10)
- F. Checkpoint (Lessons 6–9)
- G. Unit 2 Exam (Lesson 10)

Honors Algebra I B Syllabus**Unit 3: Using Functions**

- A. Prepare to Learn (Lessons 11–15)
- B. Learn (Lessons 11–15)
 - Key Terms
 - Text: Applying Functions; Quadratic Functions; Problem Solving with Functions; More Than One Function (or Relation); Other Types of Functions
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice (Lessons 11–15)
- D. Discussion (Lessons 12 & 14)
- E. Notes Upload (Lessons 11-15)
- F. Checkpoint (Lessons 11–14)
- G. Unit 3 Exam (Lesson 15)

Unit 4: Transformations of Functions

- A. Prepare to Learn (Lessons 16–20)
- B. Learn (Lessons 16–20)
 - Key Terms
 - Text: A Few More Functions; Performing Operations on Functions; Translating Functions; Dilating and Reflecting Functions; Inverse Functions
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice (Lessons 16–20)
- D. Discussion (Lessons 17 & 19)
- E. Notes Upload (Lessons 16-20)
- F. Checkpoint (Lessons 16–19)
- G. Unit 4 Exam (Lesson 20)

Honors Algebra I B Syllabus**Unit 5: Data and Statistics**

- A. Prepare to Learn (Lessons 21–25)
- B. Learn (Lessons 21–25)
 - Key Terms
 - Text: Obtaining Data; The Center of Data and Symmetry; The Spread of Data; Comparing Data; Two-Way Frequency Tables
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice (Lesson 21–25)
- D. Discussion (Lessons 22 & 24)
- E. Notes Upload (Lessons 21-25)
- F. Checkpoint (Lessons 21–24)
- G. Unit 5 Exam (Lesson 25)

Unit 6: Statistics and Probability

- A. Prepare to Learn (Lessons 26–29)
- B. Learn (Lessons 26–29)
 - Key Terms
 - Text: Fitting Functions to Data; Choosing a Good Model; Introduction to Probability; More About Probability
 - Videos
 - Step-by-Step Example Problem(s)
- C. Practice: Lessons 26–29
- D. Unit 1–Unit 6 Reviews (Lesson 30)
- E. Discussion (Lessons 27 & 29)
- F. Notes Upload (Lessons 26–29)
- G. Checkpoint (Lessons 26–28)
- H. Unit 6 Exam (Lesson 29)
- I. Course Final Exam (Lesson 30)
- J. Course Summary (Lesson 30)

Honors Algebra II A Syllabus

Course Syllabus

Suggested Prerequisites

Algebra 1A, Algebra 1B, Geometry A, Geometry B

Course Description

Storyline: Queen Parallela, the King, Prince Digit, and Princess Poly live in a world full of problems. Every day there are new problems to tackle and issues to sort out. Believe it or not, mathematics can be the basis for helping to figure out real-world problems. At the very least, the process you go through when solving math problems can be very similar to the process you go through when you solve any problem that confronts you: try to understand the issue, make a plan, attempt a solution, then look back. Discussion often is helpful in determining how well you understand an idea as well. In this algebraic kingdom, the prince and princess meet every morning to discuss the issues they think will come up. At night they meet once more to discuss their findings and solutions to problems.

As you work through Algebra 2, you'll get to see some of the challenges that Prince Digit and Princess Poly meet and solve through their use of algebra and general problem solving skills. It's not always the first solution that works; sometimes you have to revisit a solution (look back) to find out if it works.

Description: From construction to physics, the concepts in this Algebra 2 course are used in a variety of real-world situations. In Algebra 2A, you'll extend the knowledge of trigonometry that you gleaned from Geometry as well as build upon the Algebra you learned in Algebra 1 to start modeling tons of real-world scenarios. You may not realize it right now, but the polynomials and other expressions and equations that make up Algebra 2 are the basis for things you love: from video games, to roller coasters, to the home you live in, it's all got a little Algebra in it.

Course Objectives

- Perform arithmetic operations with complex numbers.
- Use complex numbers in polynomial identities and equations.
- Interpret the structure of expressions.
- Perform arithmetic operations on polynomials.
- Use polynomial identities to solve problems.
- Understand the relationship between zeros and factors of polynomials.
- Analyze polynomial functions using different representations.
- Represent and solve polynomial equations graphically.
- Rewrite rational expressions.

Honors Algebra II A Syllabus

- Understand solving equations as a process of reasoning and explain the reasoning.
- Interpret the structure of expressions.
- Analyze functions using different representations.
- Represent and solve equations and inequalities graphically.
- Review trigonometric ratios and learn how to calculate reciprocal trig ratios.
- Use the unit circle to analyze angles and trig ratios.
- Graph the sine, cosine, and tangent functions and identify their key features.
- Rewrite trigonometric ratios in terms of other trigonometric ratios by using the reciprocal, tangent, and cotangent identities.
- Prove the Pythagorean Identity by applying definitions and other trigonometric identities.
- Rewrite trigonometric ratios in terms of other trigonometric ratios by using the negative angle identities.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher be contacted for further information about course guidelines and grading policies.

Note that Lessons 19 and 20 are long, due to the number of examples they contain. Teachers can choose which examples they would like to use if they would like to reduce the length of the lessons.

Course Organization

A brief description of the intended learning outcomes appears at the beginning of each unit. Following this introduction are the lessons, which include the activities outlined below.

Math Muscle Exercise

These activities provide a review of the prior lesson to keep students' skills sharp and to prepare them for applying those skills in the new lesson they are starting.

Honors Algebra II A Syllabus

Morning Introduction

These activities provide students with the opportunity to discuss mathematical concepts before the Research activity in the lesson. Students are challenged to think and reason about mathematics, to share their ideas and strategies with their classmates, and to hear, analyze, and discuss the mathematical ideas of their classmates. These activities encourage students to think about previous learning and discuss their current knowledge. They are non-graded activities; however, it is up to teachers whether they use them to evaluate students' mathematical thinking and strategies.

Research

Key Terms

These activities provide students with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos

These activities introduce students to the main concepts of each lesson. The text is comprised of interactive readings, including step-by-step examples in which students are asked questions and provided with feedback based on their responses. Three instructional videos are embedded within each of the concepts that appear in the text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Workbook

These activities provide questions designed to help students practice the skills they learn in the text and video activities.

Night Discussion

These activities provide students with the ability to communicate, interact, and collaborate with fellow classmates by posting to a discussion board. They compel students to think and write critically about math concepts, as well as assertions made by their peers. These activities are graded by the teacher.

Project

These assessments are graded by the teacher and require the students' application of knowledge and writing capabilities to demonstrate mastery of the lesson/unit content.

Honors Algebra II A Syllabus

Denouement

These activities provide questions designed to help students analyze their level of understanding of lesson content. Students are encouraged to review concepts as needed. Question responses are not submitted to the teacher for grading.

Additional Assessment

Checkpoint

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives.

Unit Exam

These computer-graded activities assess mastery of unit objectives.

Final Exam

This computer-graded activity assesses mastery of course objectives.

Honors Algebra II A Syllabus**Schedule of Work****Unit 1: A Kingdom Divided**

- A. Math Muscle Exercise (Lessons 1-5)
- B. Morning Introduction (Lessons 1-5)
- C. Research
 - Key Terms
 - Text and Videos: Complex Numbers; Complexity & Quadratics; Parts of Polynomials; Operations on Polynomials; Polynomial Operations & Identities
 - Workbook assessments
- D. Night Discussion (Lessons 1-5)
- E. Checkpoint assessments (Lessons 1-4)
- F. Unit 1 Exam (Lesson 5)
- G. Project 1: The Kingdom Divides (Lessons 1-5)
- H. Denouement

Unit 2: Planting the Seeds for Success

- A. Math Muscle Exercise (Lessons 6-10)
- B. Morning Introduction (Lessons 6-10)
- C. Research
 - Key Terms
 - Text and Videos: The Remainder Theorem; Factoring; Zeros; End Behavior; Graphing Polynomials
 - Workbook assessments
- D. Night Discussion (Lessons 6-10)
- E. Checkpoint assessments (Lessons 6-9)
- F. Unit 1 Exam (Lesson 10)
- G. Project 2: Polynomial Gardens (Lessons 6-10)
- H. Denouement

Honors Algebra II A Syllabus**Unit 3: Peril Rears its Head**

- A. Math Muscle Exercise (Lessons 11-15)
- B. Morning Introduction (Lessons 11-15)
- C. Research
 - Key Terms
 - Text and Videos: Dividing Polynomials; Dividing Polynomials, Continued; Adding & Subtracting Rational Expressions; Multiplying & Dividing Rational Expressions; Graph Rational Functions
 - Workbook assessments
- D. Night Discussion (Lessons 11-15)
- E. Checkpoint assessments (Lessons 11-14)
- F. Unit 3 Exam (Lesson 15)
- G. Project 3: Rational Discourse (Lessons 11-15)
- H. Denouement

Unit 4: Rationally Radical

- A. Math Muscle Exercise (Lessons 16-20)
- B. Morning Introduction (Lessons 16-20)
- C. Research
 - Key Terms
 - Text and Videos: Solve Rational Equations; Radical Expressions & Equations; Extraneous Solutions; Graph Radical Functions; Intersections of Functions
 - Workbook assessments
- D. Night Discussion (Lessons 16-20)
- E. Checkpoint assessments (Lessons 16-19)
- F. Unit 4 Exam (Lesson 20)
- G. Project 4: Dragon Studies (Lessons 16-20)
- H. Denouement

Honors Algebra II A Syllabus**Unit 5: Triggy Tails**

- A. Math Muscle Exercises (Lessons 21-25)
- B. Morning Introduction (Lessons 21-25)
- C. Research
 - Key Terms
 - Text and Videos: Trigonometric Ratios; Unit Circle; Angles & Radians; Graphing Sine, Cosine, & Tangent Functions; Identifying Key Features
 - Workbook assessments
- D. Night Discussion (Lessons 21-25)
- E. Checkpoint assessments (Lessons 21-24)
- F. Unit 5 Exam (Lesson 25)
- G. Project 5: Dragon Flight Project (Lessons 21-25)
- H. Denouement

Unit 6: Identities

- A. Math Muscle Exercises (Lessons 26-29)
- B. Morning Introduction (Lessons 26-29)
- C. Research
 - Key Terms
 - Text and Videos: Fundamental Trigonometric Identities; Finding Sine; Finding Cosine; Finding Tangent
 - Workbook assessments
- D. Unit Review (Lesson 30)
- E. Night Discussion (Lessons 26-30)
- F. Checkpoint assessments (Lessons 26-28)
- G. Unit Exam (Lesson 29)
- H. Course Final Exam (Lesson 30)
- I. Project 6: Cyclops and Drawbridges (Lessons 26-29)
- J. Denouement (Lessons 26-29)

Honors Algebra II B Syllabus

Course Syllabus

Suggested Prerequisites

Algebra 1A, Algebra 1B, Geometry A, Geometry B, Algebra 2A

Storyline

No matter what happens, it seems like the Royal Family highlighted in this course is destined to encounter new challenges every day within its Kingdom. Prince Digit and Princess Poly try to overcome these challenges together with some other characters in the Kingdom, and they also require algebra and general problem-solving skills from time to time. Whether in the real world, or in the fantasy world described in this course, mathematics can be the basis for helping to figure out important problems or issues. The process students go through when solving math problems can be very similar to the process they follow when solving any problem that confronts them: try to understand the issue, make a plan, attempt a solution, then look back. Discussion with others is also helpful in formulating a solution and determining how well they understand an idea.

Course Description

From construction to physics, the concepts in this Algebra 2B course are used in a variety of real-world situations. In this course, students use their knowledge about equations and inequalities to model real-life situations. They will expand their skills with regard to solving equations, including how to solve exponential equations with logarithms. They will also synthesize and generalize a variety of function families. Finally, students will learn how to make probability decisions, and how to use basic statistics and sampling processes to understand data sets and answer questions about samples and populations.

As students work through this course, they will complete 29 lessons that have a similar structure. Each lesson starts with a refresher of previous concepts, where they work through a few problems. Then, in the "Morning Discussion," students chat with their peers about what they already know about a topic, or what they think a topic might be about. After that, they move on to a Research activity in which the lesson is taught by watching videos and working through an interactive text activity. They will then answer the Workbook questions. After that, students again interact with peers in the "Night Discussion," to talk about what they are learning in the lesson. Then they complete a Checkpoint quiz or Unit Exam. Near the end of each lesson, in a Project exercise, students work with problems related to a challenge the Royal Family is dealing with. For the Project exercises, each "Chapter," or unit, involves its own unique storyline. This course also includes a Close Reading exercise, where students will read an article about global warming, perform some research, and then write an essay on the topic. Every lesson ends with a Denouement activity, where they complete a few problems and check their understanding of the concepts in their personal journal or notebook. Lesson 30 is a review of the concepts from each unit and students take the Final Exam. At the end, students will provide their thoughts about the course.

Honors Algebra II B Syllabus

Course Objectives

- Create equations and inequalities in one variable and use them to solve problems.
- Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales.
- Represent constraints by equations or inequalities, and by systems of equations and/or inequalities, and interpret solutions as viable or non-viable options in a modeling context.
- Rearrange formulas to highlight a quantity of interest.
- Write functions defined by expressions in different but equivalent forms.
- Find inverse functions.
- Express logarithms as solutions to exponential models.
- Use key features to identify and graph logarithmic functions.
- Analyze mapping statements in order to identify and graph translations of functions.
- Calculate and compare the average rate of change of different functions.
- Identify the differences and similarities between average rate of change and instantaneous rate of change.
- Examine key features in graphs and tables in order to identify the family function.
- Determine the best family function to model different situations.
- Understand and evaluate random processes underlying statistical experiments.
- Use probability to evaluate outcomes of decisions.
- Apply probability concepts in new contexts.
- Define the basic vocabulary of statistics.
- Differentiate between types of statistical studies.
- Identify and analyze methods of random sampling and determine appropriate sample sizes.
- Identify sources of bias in statistical studies.
- Analyze the results of statistical studies using the margin of error.
- Understand and evaluate random processes underlying statistical experiments.
- Make inferences and justify conclusions from sample surveys, experiments, and observational studies.
- Summarize, represent, and interpret data on a single count or measurement variable.
- Use probability to evaluate outcomes of decisions.

Honors Algebra II B Syllabus

Course Overview

This course is made up of six units. Each unit has five lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher be contacted for further information about course guidelines and grading policies.

*Please note that Lesson 1 is very long because it addresses all types of functions. You may want to encourage students to persevere through this first lesson and assure them that the course will get easier after they have worked through Lesson 1.

Course Organization

A brief description of the intended learning outcomes appears at the beginning of each unit. Following this introduction are the lessons, which include the activities outlined below.

Math Muscle Exercise

These activities provide a review of the prior lesson to keep students' skills sharp and to prepare them for applying those skills in the new lesson they are starting.

Morning Introduction

These activities provide students with the opportunity to discuss mathematical concepts before the Research activity in the lesson. Students are challenged to think and reason about mathematics, to share their ideas and strategies with their classmates, and to receive, analyze, and discuss the mathematical ideas of their classmates. These activities encourage students to think about previous learning and discuss their current knowledge. They are non-graded activities; however, it is up to teachers whether they use them to evaluate students' mathematical thinking and strategies.

Research

Key Terms

These activities provide students with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos

These activities introduce students to the main concepts of each lesson. The text is comprised of interactive readings, including step-by-step examples in which students are asked questions and provided with feedback based on their responses. Three instructional videos are embedded

Honors Algebra II B Syllabus

within each of the concepts that appear in the text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Workbook

These activities provide questions designed to help students practice the skills they learn in the text and video activities.

Night Discussion

These activities provide students with the ability to communicate, interact, and collaborate with fellow classmates by posting to a discussion board. They compel students to think and write critically about math concepts, as well as assertions made by their peers. These activities are graded by the teacher.

Project

These assessments are graded by the teacher and require the students' application of knowledge and writing capabilities to demonstrate mastery of the lesson/unit content.

Denouement

This functions as a lesson summary and the activities provide questions designed to help students analyze their level of understanding of lesson content. Students are encouraged to review concepts as needed. Question responses are not submitted to the teacher for grading.

Additional Assessment

Checkpoint

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives.

Unit Exam

These computer-graded activities assess mastery of unit objectives.

Final Exam

This computer-graded activity assesses mastery of course objectives.

Schedule of Work

Unit 1: Lost in Translation

- A. Math Muscle Exercise (Lessons 1-5)
- B. Morning Introduction (Lessons 1-5)

Honors Algebra II B Syllabus**C. Research**

- Key Terms
- Text and Videos: Single Variable Equations and Inequalities; Multivariable Equations and Inequalities; Multivariable Systems of Equations; Multivariable Systems of Inequalities; Optimization and Linear Programming
- Workbook assessments

D. Night Discussion (Lessons 1-5)**E. Checkpoint assessments (Lessons 1-4)****F. Unit 1 Exam (Lesson 5)****G. Project 1: Treat Thief (Lessons 1-4); Close Reading (Lesson 5)****H. Denouement****Unit 2: Out of the Woods****A. Math Muscle Exercise (Lessons 6-10)****B. Morning Introduction (Lessons 6-10)****C. Research**

- Key Terms
- Text and Videos: Rearranging formulas and Isolating Variables; Rewriting Exponentials; Inverse Functions; Logarithms, Part 1; Logarithms, Part 2
- Workbook assessments

D. Night Discussion (Lessons 6-10)**E. Checkpoint assessments (Lessons 6-9)****F. Unit 1 Exam (Lesson 10)****G. Project 2: Pigs and Paint and Potions (Lessons 6-8, 10); Close Reading (Lesson 9)****H. Denouement****Unit 3: A Model Family****A. Math Muscle Exercise (Lessons 11-15)****B. Morning Introduction (Lessons 11-15)****C. Research**

- Key Terms
- Text and Videos: Graphing Logarithms; Transformation of Graphs; Average Rates of Change; Exploring Function Families; Building Models

Honors Algebra II B Syllabus

- Workbook assessments
- D. Night Discussion (Lessons 11-15)
- E. Checkpoint assessments (Lessons 11-14)
- F. Unit 3 Exam (Lesson 15)
- G. Project 3: Wedding Bells (Lessons 11-15)
- H. Denouement

Unit 4: Theoretically Speaking

- A. Math Muscle Exercise (Lessons 16-20)
- B. Morning Introduction (Lessons 16-20)
- C. Research
 - Key Terms
 - Text and Videos: Modeling Data from Simulations; Basic Probability Review; Complementary Events; Compound Events; Expected Value
 - Workbook assessments
- D. Night Discussion (Lessons 16-20)
- E. Checkpoint assessments (Lessons 16-19)
- F. Unit 4 Exam (Lesson 20)
- G. Project 4: Feast for a Beast (Lessons 17-20); Close Reading (Lesson 16)
- H. Denouement

Unit 5: Trial and Error

- A. Math Muscle Exercises (Lessons 21-25)
- B. Morning Introduction (Lessons 21-25)
- C. Research
 - Key Terms
 - Text and Videos: Decisions Based on Probability; Introductory Statistics; Sampling a Population; Designing and Analyzing Surveys; Margins of Error
 - Workbook assessments

Honors Algebra II B Syllabus

- A. Night Discussion (Lessons 21-25)
- B. Checkpoint assessments (Lessons 21-24)
- C. Unit 5 Exam (Lesson 25)
- D. Project 5: Spoiled Rotten (Lessons 22-25); Close Reading (Lesson 21)
- E. Denouement

Unit 6: Bells and Whistles

- A. Math Muscle Exercises (Lessons 26-29)
- B. Morning Introduction (Lessons 26-29)
- C. Research
 - Key Terms
 - Text and Videos: Review of Basic Statistics; Data Displays; Normal Distributions; What Are z-Scores?
 - Workbook assessments
- D. Unit Review (Lesson 30)
- E. Night Discussion (Lessons 26-30)
- F. Checkpoint assessments (Lessons 26-28)
- G. Unit Exam (Lesson 29)
- H. Course Final Exam (Lesson 30)
- I. Project 6: The Final Spell (Lessons 26-29)
- J. Denouement (Lessons 26-29)

Honors Geometry A Syllabus

Suggested Prerequisites: Algebra 1A and Algebra 1B

Course Description

Geometry A helps students build a strong foundation of traditional geometry concepts. Students will delve deep into geometric problems, develop formal proofs, and apply their knowledge to real-life situations.

In this course, students develop their knowledge of geometry, starting with a basic understanding of how transformations in the plane affect geometric figures. Students also learn how to determine congruent and similar triangles and their relationships with transformations. Students learn properties of triangles and quadrilaterals and use them in writing formal geometric proofs. Students define *sine*, *cosine*, and *tangent* as ratios in a right triangle, as well as *sine* and *cosine* as coordinates on the unit circle, and apply trigonometry to general triangles. The course concludes with three-dimensional figures, in which students determine areas, volumes, cross sections, and solids of revolution. Students use these concepts to model situations and problem solve.

Course Objectives

- Experiment with transformations in the plane.
- Understand congruence in terms of rigid motions.
- Make geometric constructions.
- Prove geometric theorems.
- Understand similarity in terms of similarity transformations.
- Prove theorems involving similarity.
- Apply geometric concepts in modeling situations.
- Define trigonometric ratios.
- Solve problems involving right triangles.
- Apply trigonometry to general triangles.
- Explain volume formulas and use them to solve problems.
- Visualize the relation between two-dimensional and three-dimensional objects.
- Apply geometric concepts in modeling situations.

Required Materials

- Internet browser

Honors Geometry A Syllabus

Course Overview

This course is made up of six units. Each unit has five lessons. Lessons present the material in many different ways to allow for increased comprehension. Some activities are graded by the course software; others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Below is information for teachers related to the content taught in the six units that comprise Geometry A. It is recommended that teachers become familiar with this information before working with the students, in order to avoid confusion and to enhance their teaching of the material.

In this course, students learn many definitions, postulates, theorems, and properties. They use this knowledge while developing and analyzing formal geometric proofs in Units 1-4. The geometric proofs in Units 1, 2, 3, and 4 demonstrate one method (and occasionally two different methods) for writing proofs. Teachers may want to provide their students with some other methods if they think it is necessary and/or beneficial. Note that some postulates in this course may be called *theorems* in other resources. For example, in Unit 2, the triangle congruence postulates, the Side-Side-Side Postulate (SSS) and Side-Angle-Side Postulate (SAS), are given without proofs. Furthermore, since the Common Core standards do not highlight Angle-Angle-Side (AAS) and Hypotenuse-Leg (HL) Congruence, they are not addressed in this course. Therefore, assessment questions in this course do not require students to be familiar with those theorems.

In Unit 4, where the basic trigonometric concepts are introduced, students are not given negative values of sine if solving a triangle requires the use of a calculator. Students are asked to work with negative values of sine only when they use coordinates on a unit circle in Lesson 22.

Students may complete the geometric constructions in the projects either with paper and pencil or by using the interactive tool provided. Students who use paper and pencil will need a way to submit their work to the teacher. Options include having the students scan or take a photo of their construction and then submit it via email to the teacher. Also, although the length of a segment is represented with an italicized segment name, like this AB , in the lessons, it is represented with a bar over the segment name, like this \overline{AB} , when using the interactive tool because of the tool's formatting. It may be helpful to share this information with students ahead of time to avoid confusion.

Although instructions for the course's assessment items are very clear for students, several possible alternate correct answers may also be accepted by the software. For example, if students begin rounding before the final step when solving, some answers may still be accepted as correct by the software. Or, depending on the context, answers may be reversed and still accepted. However, not every possibility will be accepted as correct by the software. At their discretion, teachers may accept any answer that they deem to be correct, and adjust a student's grade accordingly.

Honors Geometry A Syllabus

Course Organization

A brief description of the intended learning outcomes appears at the beginning of each unit. Following this introduction are the lessons, which include the activities outlined below.

Math Muscle Exercise – This activity reviews the prior lesson to keep students' skills sharp and to prepare them to apply those skills in the lesson they are just beginning.

Prologue and Plot Thickens! – These activities provide students with the opportunity to discuss mathematical concepts before and after the Level Up activity in the lesson. Students are challenged to think and reason about mathematics and share their ideas and strategies with their classmates, as well as to hear, analyze, and discuss the mathematical ideas of their classmates. The Prologue leads students to think about previous learning and discuss their current knowledge. The Plot Thickens! allows students to reflect on the instruction and clarify any misunderstandings. Both activities are nongraded activities; however, it is up to teachers whether they use these activities to evaluate students' mathematical thinking and strategies.

Level Up

Key Terms – This activity provides students with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos – These activities introduce students to the main concepts of each lesson. The text is comprised of interactive readings that include step-by-step examples, in which students are asked questions and provided with feedback based on their responses. Three instructional videos are embedded within each of the concepts that appear in the text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Workbook – Workbook questions provide students an opportunity to practice the skills they learn in the text and video activities.

Training! – All Training! activities include one of five types of Enrichment exercises, as well as a game.

Enrichment (Five Types, One per Lesson)

Self Check – These interactive activities check students' understanding of the lesson's concepts. These activities are unique in that students know they have successfully completed the activities when, based on their ability to perform math exercises, a special message or code appears. Often, students uncover a message piece by piece as they work through the problems in the activity.

Practice Quiz – These interactive practice exercises assess students' mastery of the lesson's concepts. The exercises provide specific feedback that depends on the students' answers to particular questions. Once students complete an activity of this type, they receive a special code to submit for a Workbook grade.

Word Problem Investigation – These activities are also interactive, and they provide students with an opportunity to explore word problems based on the lesson's concepts. Students explore and learn new ways to deal with the problem while at the same time testing their mathematical knowledge. Upon completing an activity of this type, students receive a special code to submit for a Workbook grade.

Interactive Exploration – The questions in these activities often ask students to step beyond the scope of the lesson. Students are encouraged to make assumptions and test hypotheses about the way the mathematics work in informal settings or in guided explorations of the work. In other words, these

Honors Geometry A Syllabus

activities are designed to engage students to think more deeply about the mathematics without having to formalize their conjectures.

Proof Building – The proof building exercises assess students' ability to construct and write, or analyze mathematical proofs that involve the lesson's concepts using standard methods (two-column, paragraph, and flowchart). These activities are designed to engage students to develop logical thinking skills and improve their quality of communication in mathematics. Upon completing an activity of this type, students receive a special code to submit for a Workbook grade.

Game – These interactive exercises provide practice with the skills that the students are learning. The students can play each game as many times as they want, submitting only their best scores for grading. The games provide hints, as well as feedback, to assist students as they strengthen their understanding of key concepts.

Epilogue – These activities provide students with the ability to communicate, interact, and collaborate with fellow classmates by posting to a discussion board. The activities compel students to think and write critically about math concepts, as well as the assertions made by their peers. These activities are graded by the teacher.

Tools of the Trade – These assessments are graded by the teacher and require the students' application of knowledge and writing capabilities to demonstrate mastery of the lesson/unit content.

To Be Continued...! – These activities provide questions designed to help students analyze their level of understanding of lesson content. Students are encouraged to review concepts as needed. Question responses are not submitted to the teacher for grading.

Additional Assessment

Checkpoint – These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives.

Unit Exam – These computer-graded activities assess mastery of unit objectives.

Final Exam – This computer-graded activity assesses mastery of course objectives.

Honors Geometry A Syllabus**Schedule of Work****Unit 1:** Origin Story (Congruence, Proof, and Constructions)

- A. Course Pretest (Lesson 1)
- B. Math Muscle Exercises (Lessons 2-5)
- C. Prologue
- D. Level Up

 - Text and Videos: The Undefined; Defining (from the Undefined); Comparing Transformations; Polygons; Transform It!
 - Workbook assessments
- E. Plot Thickens!
- F. Training!
 - Self Check – Lesson 01: The Undefined; Lesson 04: Polygons
 - Proof Building – Lesson 02: Defining (from the Undefined)
 - Interactive Exploration – Lesson 03: Comparing Transformations
 - Practice Quiz – Lesson 05: Transform It!
 - Game – Lesson 1: Training: Level 1
 - Game – Lesson 2: Training: Level 2
 - Game – Lesson 3: Training: Level 3
 - Game – Lesson 4: Shape Surfer
 - Game – Lesson 5: Training: Level 5
- G. Checkpoint assessments (Lessons 1-4)
- H. Epilogue
- I. Project 1: Geometric Constructions I (Lessons 1-4)
- J. Close Reading Project, part 1 (Lesson 5)
- K. To Be Continued...!
- L. Unit 1 Exam (Lesson 5)

Honors Geometry A Syllabus**Unit 2:** The Power of 3 (Congruence, Proof, and Constructions continues)

- A. Math Muscle Exercises (Lessons 6-10)
- B. Prologue
- C. Level Up
 - Key Terms
 - Text and Videos: Congruence and Transformations; Congruent Triangles; 3 Sides Are Better; Include an Angle; Include a Side
 - Workbook assessments
- D. Plot Thickens!
- E. Training!
 - Practice Quiz – Lesson 06: Congruence and Transformations
 - Proof Building – Lesson 07: Congruent Triangles; Lesson 08: 3 Sides Are Better; Lesson 10: Include a Side
 - Word Problem Investigation – Lesson 09: Include An Angle
 - Game – Lesson 06: Twist and Shout
 - Game – Lesson 07: Matchmaker
 - Game – Lesson 08: SSS Hunter
 - Game – Lesson 09: SAS Hunter
 - Game – Lesson 10: ASA Hunter
- F. Checkpoint assessments (Lessons 6-9)
- G. Epilogue
- H. Project 2: Geometric Construction II
- I. To Be Continued...!
- J. Unit 2 Exam (Lesson 10)

Honors Geometry A Syllabus**Unit 3: Where the Power Lies (Congruence, Proof, and Constructions completed)**

- A. Math Muscle Exercises (Lessons 11-15)
- B. Prologue
- C. Level Up
 - Key Terms
 - Text and Videos: Lines and Angles; Perpendicular Bisectors; Triangle Basics; Segments in Triangles; Parallelograms
 - Workbook assessments
- D. Plot Thickens!
- E. Training!
 - Self Check – Lesson 11: Lines and Angles
 - Practice Quiz – Lesson 12: Perpendicular Bisectors
 - Interactive Exploration – Lesson 13: Triangle Basics; Lesson 14: Segments in Triangles
 - Proof Building – Lesson 15: Parallelograms
 - Game – Lesson 11: The Quest for Angles
 - Game – Lesson 12: The Perils of Perpendicular Bisectors
 - Game – Lesson 13: Eye of Isosceles
 - Game – Lesson 14: The Mysteries of Midsegments
 - Game – Lesson 15: Eye of Parallelograms
- F. Checkpoint assessments (Lessons 11-14)
- G. Epilogue
- H. Project 3: Geometric Construction III (Lessons 11-14)
- I. Close Reading Project, part 2 (Lesson 15)
- J. To Be Continued...!
- K. Unit 3 Exam (Lesson 15)

Honors Geometry A Syllabus**Unit 4:** Never Too Soon To Dilate! (Similarity, Proof, and Trigonometry)

- A. Math Muscle Exercises (Lessons 16-20)
- B. Prologue
- C. Level Up
 - Key Terms
 - Text and Videos: Dilations; Similarity; Similarity Postulates & Theorems; Similarity, Proportionality, and Triangles; Problem Solving and Modeling
 - Workbook assessments
- D. Plot Thickens!
- E. Training!
 - Self Check – Lesson 16: Dilations
 - Proof Building – Lesson 17: Similarity
 - Practice Quiz – Lesson 19: Similarity, Proportionality, and Triangles
 - Interactive Exploration – Lesson 18: Similarity Postulates & Theorems
 - Word Problem Investigation – Lesson 20: Problem Solving and Modeling
 - Game – Lesson 16: The Search for Scale Factors
 - Game – Lesson 17: Triangular Caverns
 - Game – Lesson 18: Return to Triangular Caverns
 - Game – Lesson 19: The Power of Proportions
 - Game – Lesson 20: The Plights of Problem Solving
- F. Checkpoint assessments (Lessons 16-19)
- G. Epilogue
- H. Project 4: Modeling with Similar Triangles (Lessons 16, 18-20)
- I. Close Reading, Part 3 (Lesson 17)
- J. To Be Continued...!
- K. Unit 4 Exam (Lesson 20)

Honors Geometry A Syllabus**Unit 5:** Give Me a Sine (Similarity, Proof, and Trigonometry completed)

- A. Math Muscle Exercises (Lessons 21-25)
- B. Prologue
- C. Level Up
 - Key Terms
 - Text and Videos: Right Triangles and Similarity; Sine and Cosine; Right Triangles in the Real World; Area and Sine; Laws of Sines and Cosines
 - Workbook assessments
- D. Plot Thickens!
- E. Training!
 - Practice Quiz – Lesson 21: Right Triangles and Similarity; Lesson 22: Sine and Cosine; Lesson 23: Right Triangles in the Real World; Lesson 24: Area and Sine
 - Word Problem Investigation – Lesson 25: Laws of Sines and Cosines
 - Game – Lesson 21: Right Triangle Revenge
 - Game – Lesson 22: Secrets of Sine and Cosine
 - Game – Lesson 23: Island of Angles
 - Game – Lesson 24: Beyond the Right Triangle Veil
 - Game – Lesson 25: The Lost Laws of Sine and Cosine
- F. Checkpoint assessments (Lessons 21-24)
- G. Epilogue
- H. Project 5: Modeling with Right and Non-Right Triangles (Lessons 21, 22, 24, 25)
- I. Close Reading, Part 4 (Lesson 23)
- J. To Be Continued...!
- K. Unit 5 Exam (Lesson 25)

Honors Geometry A Syllabus**Unit 6: The Biggest Adventure (Extending to Three Dimensions)**

- A. Math Muscle Exercises (Lessons 26-28)
- B. Prologue
- C. Level Up
 - Key Terms
 - Text and Videos: Areas; Volumes; Cross Sections and Solids of Revolution; Modeling; Final Exam
 - Workbook assessments
- D. Plot Thickens!
- E. Training!
 - Interactive Exploration – Lesson 26: Areas; Lesson 28: Cross Sections and Solids of Revolution
 - Practice Quiz – Lesson 27: Volumes
 - Word Problem Investigation – Lesson 29: Modeling
 - Game – Lesson 26: Travails of the 2nd Dimension
 - Game – Lesson 27: Seeker of the Hidden Volume
 - Game – Lesson 28: Shadow Beast
 - Game – Lesson 29: Seeker of the Hidden Volume
- F. Checkpoint assessments (Lessons 26-29)
- G. Epilogue
- H. Project 6: Geometric Construction IV
- I. To Be Continued...!
- J. Course Final Exam (Lesson 30)

Honors Geometry B Syllabus

Suggested Prerequisites: Algebra 1A, Algebra 1B, and Geometry A

Course Description

Geometry B helps students build a strong foundation of traditional geometry concepts. Students will delve deep into geometric problems, develop formal proofs, specifically coordinate proofs, and apply their knowledge to real-life situations.

In this course, students will use the Pythagorean Theorem, distance formula, midpoint formula and slope formula to solve geometric problems and develop coordinate proofs. They will connect the algebraic and geometric meaning of a parabola by using the distance formula. Students will learn theorems about circles, find arc lengths and areas of sectors of circles, and use the distance formula to write equations of circles in the coordinate system. Students will also learn about counting methods to find the number of possible combinations of a group of objects. They will interpret theoretical and experimental probabilities, and use probability to analyze fairness of decisions. The course concludes with independent and dependent events, conditional probability, and mutually exclusive and inclusive events.

Course Objectives

- Use coordinates to prove simple geometric theorems algebraically.
- Translate between the geometric description and the equation for a conic section.
- Understand and apply theorems about circles.
- Find arc lengths and areas of sectors of circles.
- Apply geometric concepts in modeling situations.
- Understand independence and conditional probability, and use them to interpret data.
- Use the rules of probability to compute probabilities of compound events in a uniform probability model.
- Use probability to evaluate outcomes of decisions.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons, which present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher be contacted for further information about course guidelines and grading policies.

Honors Geometry B Syllabus

Course Organization

A brief description of the intended learning outcomes appears at the beginning of each unit. Following this introduction are the lessons, which include the activities outlined below.

Math Muscle Exercise – These activities provide a review of the prior lesson to keep students' skills sharp and to prepare them for applying those skills in the new lesson they are starting.

Prologue – These activities provide students with the opportunity to discuss mathematical concepts before the Level Up activity in the lesson. Students are challenged to think and reason about mathematics, to share their ideas and strategies with their classmates, and to hear, analyze, and discuss the mathematical ideas of their classmates. These activities encourage students to think about previous learning and discuss their current knowledge. They are non-graded activities; however, it is up to teachers whether they use them to evaluate students' mathematical thinking and strategies.

Level Up

Key Terms – These activities provides students with the vocabulary terms and associated definitions that are emphasized in each lesson. Terms may include those that need to be retained from previous lessons.

Text and Videos – These activities introduce students to the main concepts of each lesson. The text is comprised of interactive readings, including step-by-step examples in which students are asked questions and provided with feedback based on their responses. Three instructional videos are embedded within each of the concepts that appear in the text. These instructional videos provide opportunities for deeper understanding of lesson concepts.

Workbook – These activities provide questions designed to help students practice the skills they learn in the text and video activities.

Epilogue – These activities provide students with the ability to communicate, interact, and collaborate with fellow classmates by posting to a discussion board. They compel students to think and write critically about math concepts, as well as assertions made by their peers. These activities are graded by the teacher.

Tools of the Trade – These assessments are graded by the teacher and require the students' application of knowledge and writing capabilities to demonstrate mastery of the lesson/unit content.

To Be Continued...! – These activities provide questions designed to help students analyze their level of understanding of lesson content. Students are encouraged to review concepts as needed. Question responses are not submitted to the teacher for grading.

Additional Assessment

Checkpoint – These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives.

Unit Exam – These computer-graded activities assess mastery of unit objectives.

Final Exam – This computer-graded activity assesses mastery of course objectives.

Honors Geometry B Syllabus**Schedule of Work**

Unit 1: Pointing to the Problem (Coordinate Proofs with Distance Formula, Slope, and Midpoint Formula)

- A. Course Pretest (Lesson 1)
- B. Math Muscle Exercise (Lessons 2-5)
- C. Prologue
- D. Level Up
 - Key Terms
 - Text and Videos: Finding Distances in the Coordinate Plane; Polygons and Coordinate Geometry; Perimeter and Area of Polygons in the Coordinate Plane; The Concept of Slope; Midpoint Formula
 - Workbook assessments
- E. Epilogue
- F. Checkpoint assessments (Lessons 1-4)
- G. Unit 1 Exam (Lesson 5)
- H. Project 1: Hypatia and Elibri (Lessons 1-5)
- I. To Be Continued...!

Honors Geometry B Syllabus**Unit 2:** Slippery Slopes (Coordinate Proofs with Distance Formula, Midpoint Formula, and Slope)

- A. Math Muscle Exercise (Lessons 6-10)
- B. Prologue
- C. Level Up
 - Key Terms
 - Text and Videos: Partitioning Segments; Slope-Intercept Form; Point-Slope Form; Parallel Lines and Their Equations; Perpendicular Lines and Their Equations
 - Workbook assessments
- D. Epilogue
- E. Checkpoint assessments (Lessons 6-9)
- F. Unit 2 Exam (Lesson 10)
- G. Project 2: Geometric Construction I (Lesson 6)
- H. Project 2: Robot's Path (Lessons 7-10)
- I. To Be Continued...!

Unit 3: Circular Logic (Theorems about Circles, Arc Length, Area of Sectors)

- A. Math Muscle Exercise (Lessons 11-15)
- B. Prologue
- C. Level Up
 - Key Terms
 - Text and Videos: Chords, Diameters, and Their Relationships; Tangent Lines of a Circle; Arcs, Chords, and Similar Circles; Arc Length and Radian Measure; Sectors
 - Workbook assessments
- D. Epilogue
- E. Checkpoint assessments (Lessons 11-14)
- F. Unit 3 Exam (Lesson 15)
- G. Project 3: Geometric Construction II (Lessons 11-13)
- H. Project 3: Making a Pie Chart (Lessons 14-15)
- I. To Be Continued...!

Honors Geometry B Syllabus**Unit 4:** Circumventing (Theorems about Angles and Segments of Circles, Equations of Circles)

- A. Math Muscle Exercise (Lessons 16-20)
- B. Prologue
- C. Level Up
 - Key Terms
 - Text and Videos: Central, Inscribed, and Circumscribed Angles; Other Angle Relationships in Circles; Segment Relationships in Circles; Writing Equations of Circles; Recognizing Equations of Circles
 - Workbook assessments
- D. Epilogue
- E. Checkpoint assessments (Lessons 16-19)
- F. Unit 4 Exam (Lesson 20)
- G. Project 4: Geometric Constructions III (Lesson 16)
- H. Project 4: Circles in Real Life (17-20)
- I. To Be Continued...!

Unit 5: One Problem, Many Faces (Permutations, Combinations, Theoretical and Experimental Probabilities)

- A. Math Muscle Exercises (Lessons 21-25)
- B. Prologue
- C. Level Up
 - Key Terms
 - Text and Videos: Permutations; More About Permutations; Combinations; The Concept of Probability; Theoretical and Experimental Probability
 - Workbook assessments
- D. Epilogue
- E. Checkpoint assessments (Lessons 21-24)
- F. Unit 5 Exam (Lesson 25)
- G. Project 5: Probability in Theater
- H. To Be Continued...!

Honors Geometry B Syllabus**Unit 6: Probability and Certainty (Independent Events, Conditional Probability, Compound Events)**

- A. Math Muscle Exercises (Lessons 26-29)
- B. Prologue (Lessons 26-29)
- C. Level Up
 - Key Terms
 - Text and Videos: Independent Events; Conditional Probability; Probabilities with Frequency Tables; Compound Events
 - Workbook assessments
- D. Unit Review (Lesson 30)
- E. Epilogue
- F. Checkpoint assessments (Lessons 26-28)
- G. Unit Exam (Lesson 29)
- H. Course Final Exam (Lesson 30)
- I. Project 6: Casino Games
- J. To Be Continued...! (Lessons 26-29)
- K. Aftermath (Lesson 30)

**APPENDIX A
CURRICULUM**

C.5 Syllabi

It includes the syllabi for the Virtual Preparatory Academy of Pennsylvania curriculum in the following subject areas:

- a. English Language Arts K-12
- b. Mathematics K-12
- c. Science K-12
- d. Social Studies K-12
- e. General Electives K-5
- f. Health and Physical Education
- g. World Languages

Science

K-12

Kindergarten Science A Syllabus

Course Description:

In Kindergarten Science, students in this course will use their senses to explore their world. Students experience nature walks, gardening, and imitative games by exploring The Fall Season, Leaves and Butterflies, Deer, Autumn Leaves and Weather Conditions, Falling leaves, Squirrels, Ducks, Natural Fall Objects, Nature Observations, Animals & Camouflage, Planting a Garden, Terrariums, Growing a Seed, Goldfish, Freezing Water, and Magnets.

Materials needed:

- Colored pencils or crayons
- Magnifying glass
- Sweet potato or avocado seed
- 3 or 4 Nails
- Drinking Glass
- Jar (with a large opening)
- Rubber band
- Plastic wrap
- Mixture of soil, sand and charcoal
- Glass tumbler
- Cotton balls
- Blotter
- Bean seeds
- Magnet
- Iron filings
- Paper plate

Module	Lesson Title	Objectives
1	The Fall Season	<ul style="list-style-type: none"> • Recall summer • Record sounds, smells and the beauty of summer.
	Leaves and Butterflies	<ul style="list-style-type: none"> • Learn about fall leaves and hide objects in them. • Read “The Butterfly Story” to your child.
	Deer in Fall	<ul style="list-style-type: none"> • Read “The Prince of the Forest” to your child. • Draw a picture of Daddy Buck and glue into your science scrapbook.

Kindergarten Science A Syllabus

Module	Lesson Title	Objectives
2	Autumn Leaves and Weather Conditions	<ul style="list-style-type: none"> • Discuss different kinds of trees and leaves. • Gather autumn leaves and talk about their various colors. • Begin discussing weather
	Autumn and Falling Leaves	<ul style="list-style-type: none"> • Read the story, “The Crying Tree” to your child. • Observe Fall leaves and draw a picture of a tree with leaves falling.
	Squirrel Behavior	<ul style="list-style-type: none"> • Read the story, “The Tale of Three Squirrels” to your child. • Observe the squirrels in your neighborhood.
3	Duck Observation	<ul style="list-style-type: none"> • Read the story, “Quark” to your child. • Observe and study ducks.
	Natural Fall Objects	<ul style="list-style-type: none"> • Study natural fall objects • Discuss the changing weather.
	Observing Nature	<ul style="list-style-type: none"> • Study nature close up • Use a magnifying glass to look at different objects.
4	Animal Camouflage	<ul style="list-style-type: none"> • Learn different way animals camouflage (hide) themselves. • Recognize different weather conditions.
	Listening to Nature	<ul style="list-style-type: none"> • Identify outdoor sounds in nature. • Collect items to add to nature table.
	Nature Review	<ul style="list-style-type: none"> • Review of your many experiences in nature.
5	Plant a Garden	<ul style="list-style-type: none"> • Plant an indoor garden. • Illustrate the growth of a seed into a plant.
	Assemble and Plant a Terrarium	<ul style="list-style-type: none"> • Assemble a terrarium. • Plant small, shade-loving plants.

Kindergarten Science A Syllabus

Module	Lesson Title	Objectives
	Grow a Bean Seed	<ul style="list-style-type: none"> • Make a classroom garden. • Plant bean seeds in the classroom garden.
6	Make a Goldfish Bowl	<ul style="list-style-type: none"> • Draw a picture of one or more of the experiments you are doing. • Make a goldfish bowl.
	Freezing Water and Magnets	<ul style="list-style-type: none"> • Observe the change in form of water to ice. • Study daily weather conditions. • Observe the behavior of magnets.
	Compare Environments	<ul style="list-style-type: none"> • Compare and contrast various environments.

Kindergarten Science B Syllabus

Course Description:

Students in this course will continue using their senses to explore their world. Students experience nature walks, gardening, and imitative games by exploring Animal Tracks, Astronomy in the Winter, Animals and their Offspring, Shapes in Nature, Winter and the Five Senses, Properties of Matter, Spring Clouds, Rainbows and Evaporation, Making Maple Syrup, Spring Flowers, Spring Plant Growth, Earthworms, Evening Stars & Constellations, Birds, Pet Care, Bees and Pollination, The Sounds of Spring, Frogs and Ponds

Materials needed:

- Magnifying glass
- colored pencils or crayons
- Maple Syrup
- Seeds
- Pots
- Soil
- Garden fork
- Potato
- Piece of cotton
- Toothpicks
- Apples
- Piece of cloth
- Flashlight
- Sunflower seeds
- Bean seeds
- Garden stakes

Module	Lesson Title	Objectives
1	Animal Tracks	<ul style="list-style-type: none"> • Explore snow with your child. • Look for animal tracks in the snow.
	Astronomy in Winter	<ul style="list-style-type: none"> • Observe the growth of the child's indoor garden. • Read animal and nature stories and learn poems about animals and nature.
	Animals and Offspring	<ul style="list-style-type: none"> • Match common animals with their offspring.

Kindergarten Science B Syllabus

2	Shapes in Nature	<ul style="list-style-type: none"> • Ask your child to point out letter shapes you see in nature. • Discuss winter weather conditions. • Make a wreath to feed the birds in your yard.
	Winter and the Five Sense	<ul style="list-style-type: none"> • Use the five senses to discuss winter. • Explore the concepts of ice.
	Properties of Matter	<ul style="list-style-type: none"> • Teach your child the feel of small items and to identify these object. • Play the shaker game with your child.
3	Spring Clouds	<ul style="list-style-type: none"> • Read Little Cloud to your child. • Go out each day to look for images in the clouds.
	Rainbows and Evaporation	<ul style="list-style-type: none"> • Read Rainbow Raindrop to your child. • Start talking about evaporation and what puddles do after it
	Making Maple Syrup	<ul style="list-style-type: none"> • Read the story, The Maple Tree to your child. • Learn about maple syrup and put on homemade pancakes or waffles. • Draw a picture of a maple tree. • Make leaf rubbings.
4	Spring Flower Growth	<ul style="list-style-type: none"> • Go outside and observe squirrels and chipmunks. • Teach your child about parts of a tree. • Plant your own flower seeds and have your child water them daily. • Discuss weather conditions with your child.
	Spring Plant Growth	<ul style="list-style-type: none"> • Read the story, Daniel Grows Up to your child. • Find different kinds of new shoots in your area. • Start walking directions for left, right and straight. • Describe the weather.
	Earthworms in Soil	<ul style="list-style-type: none"> • Read Eartha the Earthworm to your child this week. • Go outside and dig for earthworms. • Grow potato hair.

Kindergarten Science B Syllabus

5	Evening Stars and Constellations	<ul style="list-style-type: none"> • Study the evening stars and talk about the constellations. • Show your child how some tools work.
	Birds and Birds' Nests	<ul style="list-style-type: none"> • Look at and study birds and bird nests.
	Pet Care	<ul style="list-style-type: none"> • Teach your child the importance of taking care of pets • Take a walk and look for spider webs.
6	Bees and Pollination	<ul style="list-style-type: none"> • Make a God's Eye out of yarn. • Read the story <i>Stand up to your child.</i> • Find the star in the middle of an apple and draw a picture of it. • Observe the bees.
	The Sound of Spring	<ul style="list-style-type: none"> • Listen to the sounds of spring this • Make up a story about the magic of the firefly. • Care for a plant. • Smell the sweet Spring air.
	Frogs and Ponds	<ul style="list-style-type: none"> • Your child should continue caring for a plant. • Plant a summer house with sunflowers. • Read The Pond Ritual.

Course Description:

In First Grade Science, students in this course will complete projects that are designed to allow for exploration and discovery. Students observe their surroundings and through observations of the natural world conduct inquiries into topics related to their healthy development.

Materials needed:

- Glue
- Colored pencils or crayons
- Flowers or plants for pressing
- Blotting paper
- Scissors
- Old sheet or towel
- Small dish or container
- Watercolor paints
- Tweezers
- Wax paper
- Iron
- Pre-made calendar or available calendar
- Empty milk carton
- 1 Dowel (5" x 8")
- Straw
- Tape
- 1 small pin or nail
- Pencil with eraser
- Outdoor thermometer
- Compass
- Blue construction paper
- Cotton
- 8 ½" x 11 papers
- String

Module	Lesson Title	Objectives
1	Moon and Seasons	<ul style="list-style-type: none"> • Identify the various moon phases. • Identify the patterns of summer.
	Season and Daylight Exploration	<ul style="list-style-type: none"> • Set up a Nature corner depicting the four seasons. • Complete a leaf printing. • Draw pictures representing the different seasons. • Continue observing the phases of the moon.
	Classifying Leaves	<ul style="list-style-type: none"> • Use simple tools to observe nature. • Classify and arrange objects of nature.

Module	Lesson Title	Objectives
2	Role of Seeds	<ul style="list-style-type: none"> Learn about seeds and the role they play in the life of a plant. Draw a picture of a plant with its root system.
	Observing Animal Tracks	<ul style="list-style-type: none"> Look at animal tracks in nature or in books. Compare track to footprints. Draw and label tracks.
	Birds in Nature	<ul style="list-style-type: none"> Discover which birds live in the area. Draw pictorial representation of birds. Learn bird behavior during the seasons.
3	Basic Needs of Animals	<ul style="list-style-type: none"> Consider animals' basic needs of food, water, air and Observe animals in nature. Draw animals. Build a bird house.
	Making a Weather Chart	<ul style="list-style-type: none"> Understand the unpredictable nature of weather. Explore the concepts of north, south, east, and west. Make a wind vane and chart weather.
	Light	<ul style="list-style-type: none"> Describe how light travels. Make observations that objects in darkness can be seen only when illuminated. Conduct investigations to determine the effect of placing objects made with different materials in the path of a beam of light.
	Cloud Formation	<ul style="list-style-type: none"> Observe cloud formations. Identify different cloud formations.
4	Animals and Weather Change	<ul style="list-style-type: none"> Observe the sensory experience of animals as they react to changes in the weather. Illustrate how animals prepare for winter months.

Module	Lesson Title	Objectives
	Living with Nature	<ul style="list-style-type: none"> Observe the ways humans and nature support each other. Illustrate your observations.
	Animal Adaptation and Offspring	<ul style="list-style-type: none"> Identify how local animals adapt to seasonal changes. Illustrate animal adaptations.
5	Winter and Snow Formation	<ul style="list-style-type: none"> Identify various winter activities around the world. Illustrate winter activities.
	Comparing Tree Types	<ul style="list-style-type: none"> Recognize deciduous and evergreen trees. Compare deciduous and evergreen trees.
	Wild Animal Responses	<ul style="list-style-type: none"> Explore wild animals and how they respond to the seasons. Observe and draw pictures that represent your observations.
6	Concept of Hibernation	<ul style="list-style-type: none"> Describe the idea of hibernation. Draw a picture representing hibernation. Compare human needs in winter to needs of hibernating animals.
	Concept of Erosion	<ul style="list-style-type: none"> Explore the concept of erosion. Illustrate the concept of erosion.
	Constellations in the Night Sky	<ul style="list-style-type: none"> Observe the night sky. Locate and identify various constellations. Illustrate constellations in Main Lesson Book.

Course Description:

Students in this course will complete projects that are designed to allow for exploration and discovery. Students observe their surroundings and through observations of the natural world conduct inquiries into topics related to their healthy development.

Materials needed:

- 2 Ziploc bags
- 1 cup of Crisco or shortening
- Bowl
- Drinking glass
- Watercolor paints
- Tomato seeds
- Small pot
- Water
- Soil
- Colored pencils or crayons Plate
- Large pot
- Thermometer (°C and °F)
- Vegetable seeds

Module	Lesson Title	Objectives
1	Animals in the Arctic	<ul style="list-style-type: none"> • This week we explore what life is like in the coldest parts of the world, namely the Arctic and Antarctic regions of the North and South Pole. • Your child will be encouraged to study animals indigenous to these regions, and perform an experiment to discover the insulating effect of blubber.
	Nocturnal and Diurnal Animals	<ul style="list-style-type: none"> • Learn the difference between diurnal and nocturnal animals. • Examine characteristics of an owl.
	States of Matter	<ul style="list-style-type: none"> • This week your child will explore various kinds of matter, specifically liquids, solids and gases. • Your child will identify objects in nature and determine if they are liquid or solid. Matter can be categorized by observable properties, such as color, size, shape, and weight. • We will observe ice (or snow if it's available) melt as heat is applied and work with clay in order to reinforce the concepts that matter can change shape. • Your child will draw an example of a gas.

Science 1 B Syllabus

Module	Lesson Title	Objectives
2	Dolphins and Sea Life	<ul style="list-style-type: none"> Recognize dolphins and other sea life. Complete a wet painting that illustrates sea life.
	Planting a Tomato	<ul style="list-style-type: none"> Learn how to plant a tomato. Nourish your plant and grow the tomato.
	Scientific Inquiry	<ul style="list-style-type: none"> This week your child will engage in scientific inquiry! Your child will set up an experiment and make a hypothesis about why different objects responded — did they sink or float? Your child will complete a chart that reflects their experience.
3	Reading a Thermometer	<ul style="list-style-type: none"> This week your child will learn to read a thermometer and see the difference between degrees Celsius and Fahrenheit. Your child will begin to chart the daily temperature on a calendar.
	Life in a Pond	<ul style="list-style-type: none"> Explore pond life.
	Life in the Forest	<ul style="list-style-type: none"> Explore life in the forest. Record observations.
4	Characteristics of the Maple Leaf	<ul style="list-style-type: none"> Follow the travels of a maple leaf. Observe and record bird activity.
	Thunder and Lightning	<ul style="list-style-type: none"> Observe thunder and lightening. Calculate lightning distance.
	Sounds in Nature	<ul style="list-style-type: none"> Record sensory observations of nature. Illustrate an animal heard this week.

Science 1 B Syllabus

Module	Lesson Title	Objectives
		<ul style="list-style-type: none"> Understand that vibrating materials can make sound and that sound can make materials vibrate.
	Sound	<ul style="list-style-type: none"> Describe how vibrating objects produce sound.
5	Birdhouses and Nesting Behavior	<ul style="list-style-type: none"> This week we will continue our focus on birds with a look at the kinds of homes birds build for their families. If possible, your child will go on a nature walk to observe nesting behavior in local birds Your child will explore other kinds of homes as well and enter a picture into their Main Lesson Book.
	Deciduous Trees	<ul style="list-style-type: none"> This week your child will learn about budding deciduous trees. Your child will hear a story about Johnny Appleseed, and make a weather chart record wind direction and temperature twice daily. Your child will compare these charts to earlier ones that they have made and discuss possible reasons for the many differences they see.
	Cycle of the Sunflower	<ul style="list-style-type: none"> Explore the life of a sunflower.
6	Bees and Pollination II	<ul style="list-style-type: none"> Observe bee behavior. Explore the process of pollination.
	Comparing Butterflies	<ul style="list-style-type: none"> Compare characteristics of swallowtail and monarch butterflies. Explore caterpillar cocoons.
	Planting a Garden	<ul style="list-style-type: none"> This final week your child will hear a story of a boy and his vegetable garden. Your child will be encouraged to plant a "garden" of your own, no matter how small, in order to help your child connect with the earth and to build a stronger sense of our interdependent relationship with nature.

Course Description:

Second Grade Science introduces students to the process of observation and how important it is to the study of science. Learners will identify their five senses and why they are critical to observation. Students will use these observation skills throughout the course as they examine many different types of animals and their environments. Students begin by observing ants in their own environments and continue onto learning the different types of birds. Students will come to understand plant and animal rhythms and will perform small experiments with plants. Stories will be used to teach the students about nature and interactions that humans have with nature. They will continue to learn about animals and their characteristics habitats, and needs. Students will learn through video, audio stories, hands-on participation and observation with nature. The teachers will conduct live assessments for the topics that had been covered throughout the week's lessons. Grade 2 Science provides students with the opportunity to expand their minds and see for themselves the way that animals and nature are a part of their everyday lives.

Materials needed:

- Colored pencils or crayons
- Large grapefruit or orange
- Birdseed
- Pencil
- Twine
- Leaves (evergreen and/or deciduous)
- Wax paper
- Iron
- Old sheet or towel
- Three small pots
- Potting soil
- Seeds of your choosing
- Plain 3x5 index cards
- Yarn, Scissors
- 2 Popsicle Sticks

Module	Lesson Title	Objectives
1	The Five Senses	<ul style="list-style-type: none"> Learn about the senses. Identify the 5 senses.
	Behavior of Ants	<ul style="list-style-type: none"> Observe the behavior of ants. Identify the different "jobs" of ants in their colonies.
	Types of Birds	<ul style="list-style-type: none"> Explore the life of a bird. Study nature observations.
2	Animal Habitats	<ul style="list-style-type: none"> Observe the eating habits of animals. Identify what animals in the wild eat.
	Animal Cooperation	<ul style="list-style-type: none"> Learn about animals gathering together to save and help one another. Observe and learn how nature cooperates (or doesn't).
	Properties of Matter	<ul style="list-style-type: none"> Describe observable properties of matter.
	Heat and Temperature	<ul style="list-style-type: none"> Describe how heat can be produced. Understand the difference between heat and temperature. Explain how heat can move from one object to another. Observe the change in form of water to ice.
	States of Matter	<ul style="list-style-type: none"> This week your child will explore various kinds of matter, specifically liquids, solids and gases. Your child will identify objects in nature and determine if they are liquid or solid. Matter can be categorized by observable properties, such as color, size, shape, and weight. We will observe ice (or snow if it's available) melt as heat is applied and work with clay in order to reinforce the concepts that matter can change shape. Your child will draw an example of a gas, a liquid, and a solid in their Science Main Lesson (Scrap) Book.

Module	Lesson Title	Objectives
3	Animal Rhythms	<ul style="list-style-type: none"> Explore the idea of natural rhythms of human beings.
	Plant and Animal Rhythm	<ul style="list-style-type: none"> Observe the rhythms of plants and animals. Chart observations of rhythms of plants and animals.
	Trees and Leaves	<ul style="list-style-type: none"> Identify local trees. Collect leaves of local trees.
	Experiments with Plants	<ul style="list-style-type: none"> Recognize the primary things plants need to grow. Prepare a first science experiment.
4	Stories about Nature	<ul style="list-style-type: none"> Relate various nature stories.
	Stories about Nature and Interactions	<ul style="list-style-type: none"> Recount more stories about nature's interactions.
	Squirrel Habitats	<ul style="list-style-type: none"> Observe the life of a squirrel. Illustrate the natural habitat of a squirrel.
5	Animal Characteristics	<ul style="list-style-type: none"> Describe characteristics of several animals. Distinguish between various character traits of animals such as stamina, strength and gentleness.
	Animal Needs	<ul style="list-style-type: none"> Continue to play the game developed last week. Create an animal booklet.

Module	Lesson Title	Objectives
	Behavior of Bees	<ul style="list-style-type: none">• Explore the life of bees and how they develop the honeycomb.• Read the story, "The Flight of the Worker Bee".• Use beeswax to design a honeycomb.
6	Animal Habitats and Weather	<ul style="list-style-type: none">• Explore the homes that various animals form.• Make a termite castle.
	Spider Webs	<ul style="list-style-type: none">• Observe a spider's home.• Identify characteristics of a spider web.
	Different Nests for Different Birds	<ul style="list-style-type: none">• Learn about the nests birds make.

Course Description:

Semester B of Second Grade Science begins with the students learning the characteristics of the Weaverbird and Swiftlet bird. Learners will come to understand the different groupings of animals including those with vertebrates, invertebrates and warm and cold blooded animals, carnivores, herbivores and omnivores. Learners will be asked to recall the five senses that they discussed at the beginning of the course and compare them to the senses of animals. They will also learn how animals communicate and the relationship between animals and humans. The course ends with the students taking a closer look at the characteristics of reptiles, insects, birds of prey, and fish. At the close of the course students will have a deeper understanding and appreciation of animals and their habitats.

Materials needed:

- Colored pencils or crayons
- Gum
- Globe
- Multi-colored construction paper
- Scissors

Module	Lesson Title	Objectives
1	Events on Earth	<ul style="list-style-type: none"> • Examine characteristics and causes of earthquakes. • Examine characteristics and causes of volcanoes.
	Characteristics of the Weaverbird	<ul style="list-style-type: none"> • Explore the concept of erosion. • Go bird watching. • Learn about the weaverbird that is found primarily in Africa.
	Characteristics of the Swiftlet Bird	<ul style="list-style-type: none"> • Learn about the Swiftlet bird of Southeastern Asia.

	Large Habitats	<ul style="list-style-type: none"> Explore the concept of habitat.
2	Animals: Vertebrates and Invertebrates	<ul style="list-style-type: none"> Study the two major animal groups: the vertebrates and invertebrates.
	Warm- and Cold-Blooded Animals	<ul style="list-style-type: none"> Study warm versus cold blooded animals.
	Tracks Animals Make	<ul style="list-style-type: none"> Study animal tracks.
3	Animal Food Chains	<ul style="list-style-type: none"> Learn about the food chain. Explore the interdependent relationships in nature.
	Relationships Between Humans and Animals	<ul style="list-style-type: none"> Explore ways in which animals and human beings help each other.
	Carnivores, Herbivores and Omnivores	<ul style="list-style-type: none"> Learn about carnivores, herbivores, and omnivores.
4	The Five Senses and Animal Communication	<ul style="list-style-type: none"> Learn about the various ways animals communicate. Be introduced to the five animal senses.

	Animal Communication and Signals	<ul style="list-style-type: none"> Explore ways animals communicate.
	Biomes	<ul style="list-style-type: none"> Identify the desert, forests, aquatic, tundra and grasslands biomes. Indicate the different animals that live in these biomes. Examine the adaptations the animals made to their environments.
5	The Dolphin and the Field Mouse	<ul style="list-style-type: none"> Identify characteristics of the dolphin. Identify characteristics of the field mouse.
	Characteristics of Reptiles	<ul style="list-style-type: none"> Identify different reptiles. Match the reptile to its natural habitat.
	Tadpoles to Frogs	<ul style="list-style-type: none"> Learn about the frog's transformation from the egg into a full-grown frog.
6	Characteristics of Insects	<ul style="list-style-type: none"> You will learn about insects.
	Characteristics of Birds of Prey	<ul style="list-style-type: none"> Identify large birds of prey.
	Characteristics of Fish	<ul style="list-style-type: none"> Learn about fish.

3rd Grade Science Semester A Syllabus**Course Description:**

Third grade science introduces students to experimentation as they journey through the earth and its many miracles. They will begin by learning about the earth, the sun and the moon. By participating in simple experiments students will explore the water cycle, gravity, the weather and its patterns, various types of terrain, and the role of plants in the production of oxygen and their importance to human survival. Learners will expand their knowledge through video, pictures, short readings, projects, and hands on experiments. Learners will understand that experiments require the use of instruments, observation, recording, and drawing evidence based conclusions. Grade 3 science provides students with the opportunity to expand their minds and see for themselves the way that science is a part of their everyday lives.

Materials needed: Colored pencils or crayons, Inflatable Globe, Lamp from your home or school, Large pan, Plastic plate, Gong – or some object to sound on to denote the passing of an hour, pan (or any flat, open dish), Small jar without a lid, small jar with a lid, tablespoon, tape, ice cubes, blue construction paper, three hole punch, yarn, bag of cotton balls, glue, balloons, clay, and scissors.

Module	Lesson Title	Objectives
1	Earth and Sun Concepts	1. Learn about the earth's revolution around the sun.
	Phases of the Moon	1. Identify the phases of the moon. 2. Observe the effects of the moon's phases on nature. 3. Record observations.
	Devices to Tell Time	1. Identify various means of telling time. 2. Illustrate and describe clock devices.
2	The Role of Gravity	1. Explore the concept of gravity. 2. Write creatively in your Science Lesson Book.
	Plant Respiration and Relationships	1. Describe plant forms 2. Identify plant respiration 3. Discuss various ways plants and humans help each other
	Water Cycle: Evaporation	1. Identify steps in the water cycle. 2. Recognize how water evaporates. 3. Observe and record the rate at which water evaporates.

3rd Grade Science Semester A Syllabus

Module	Lesson Title	Objectives
3	Water Cycle: Condensation	<ol style="list-style-type: none"> 1. Identify the steps in the water cycle. 2. Recognize the process of condensation. 3. Observe and record findings of condensation.
	Water Cycle: Precipitation	<ol style="list-style-type: none"> 1. Identify the steps of the water cycle. 2. Recognize the process of precipitation. 3. Diagram the complete water cycle.
	Basics of Weather and Weather Patterns	<ol style="list-style-type: none"> 1. Observe daily weather and weather patterns. 2. Construct a wind vane. 3. Chart daily weather observations.
4	Cloud Formation II	<ol style="list-style-type: none"> 1. Identify cloud formations.
	Lightning and Electricity	<ol style="list-style-type: none"> 1. Explore the phenomenon of lightning. 2. Simulate aspects of the static electricity in lightning.
	Weather Extremes	<ol style="list-style-type: none"> 1. Identify extreme weather conditions. 2. Illustrate hurricanes, tornadoes and blizzards.
5	The Earth and Sun Relationship	<ol style="list-style-type: none"> 1. Trace the earth's revolution around the sun. 2. Recognize how the earth's revolution around the sun applies to seasonal changes. 3. Evaluate an experiment that illustrates the process of the earth's revolution.
	Global Climate Zones	<ol style="list-style-type: none"> 1. Identify the five global climate zones. 2. Illustrate the different climate zones.
	Characteristics of Terrain on Earth	<ol style="list-style-type: none"> 1. Identify various types of terrain. 2. Construct a clay diorama of local terrain. 3. Label drawings of various types of terrain.
6	Characteristics of Mountainous Regions	<ol style="list-style-type: none"> 1. Further discriminate mountainous regions. 2. Locate the highest mountain ranges in various regions. 3. Identify facts about local mountains.

3rd Grade Science Semester A Syllabus

Module	Lesson Title	Objectives
	Trees and Human Needs	<ol style="list-style-type: none">1. Relate trees and their relationship and usefulness to humankind.2. List objects that come from trees.3. Create a collage of items that originated from trees.
	Types of Trees	<ol style="list-style-type: none">1. Identify various types of trees.2. Categorize different species of trees and leaves.

3rd Grade Science Semester B Syllabus**Course Description:**

Semester B of third grade science begins with the students writing a poem about the seasonal cycles. The learners continue with root formation, the interdependence of plants and humans, biomes of land and sea, extreme weather, rocks, vertebrates and invertebrates, as well as extinction. All of these lessons are taught using video, projects, and experimentation. Semester B asks learners to look a bit deeper into things they encounter such as the ocean and weather.

Materials needed: Colored pencils or crayons, Avocado or sweet potato, 3 - 5 Nails or toothpicks, Clear glass or plastic cup, two glass tumblers, celery stalk, food coloring (red and green), microscope, magnifying glass or loupe, flower, leaf, globe or world map, scissors, and glue.

Module	Lesson Title	Objectives
1	Cycle of Seasons	1. Identify the seasonal cycles around the world.
	Investigation into Root Formation	1. Closely observe root formation in plants. 2. Experiment with root growth. 3. Record and explain results of the experiment.
	Plants and Water Absorption	1. Observe how a plant absorbs water from the soil. 2. Experiment with water absorption. 3. Record and explain the results of the experiment.
2	Basics of Photosynthesis	1. Define the word photosynthesis. 2. Examine a leaf and a flower. 3. Illustrate a leaf and its structure.
	Interdependence of Man and Nature	1. Explore the ways man, plants and animals interact. 2. Explain how man, nature and animals must help one another. 3. Predict what will happen if man, nature and animals do not help one another.
	The Water Cycle	1. Hear a simple explanation of how the cycle works, and then design an experiment to watch the water cycle in action! 2. Journal observations over time.
3	Classifying Ecosystems: Biomes	1. Identify the three biomes: desert, rainforest, tundra. 2. Indicate the different animals that live in the three biomes. 3. Examine the adaptations the animals made to their environments.

3rd Grade Science Semester B Syllabus

Module	Lesson Title	Objectives
	Classifying Ecosystems: Biomes II	<ol style="list-style-type: none"> 1. Explore characteristics of other biomes. 2. Identify the biome in which you are presently living. 3. Illustrate characteristics of your particular biome.
	Characteristics of Earthquakes and Volcanoes	<ol style="list-style-type: none"> 1. Examine characteristics and causes of earthquakes. 2. Examine characteristics and causes of volcanoes. 3. Illustrate earthquakes and volcanoes in the Science Main Lesson Book.
4	Natural Resources in Your Community	<ol style="list-style-type: none"> 1. Discover the natural resources in your area. 2. List in your Science Main Lesson Book the resources in your area.
	Characteristics of Caves and Cave Animals	<ol style="list-style-type: none"> 1. Explore caves. 2. Define stalactites and stalagmites you might discover in caves. 3. Identify the animals that live in caves.
	Characteristics of Rocks	<ol style="list-style-type: none"> 1. Examine rocks in your area. 2. Collect rocks, observe them under magnification and perform simple research to identify their possible type.
5	Cycle of Rocks	<ol style="list-style-type: none"> 1. Discover the elements that have an effect on rocks over time. 2. Describe the changes that can occur on solid rock.
	Biomes: Ocean Water	<ol style="list-style-type: none"> 1. Identify characteristics of the salt water biome of the ocean. 2. Examine and report on the salt water biome of the ocean.
	Biomes: Freshwater	<ol style="list-style-type: none"> 1. Identify characteristics of the freshwater biomes. 2. Observe plant and animal life that lives within some of the freshwater environments.
6	Characteristics of Vertebrates and Invertebrates	<ol style="list-style-type: none"> 1. Distinguish vertebrates from invertebrates. 2. Illustrate both types of animals.
	Concepts of Plants: Stems	<ol style="list-style-type: none"> 1. Distinguish between plants with stems and those without. 2. Classify plants in nature according to these two

3rd Grade Science Semester B Syllabus

Module	Lesson Title	Objectives
		groups. 3. Research in depth one plant of each type. 4. Report on these plants in the Science Main Lesson Book.
	Plants and Animals: Extinction	1. Explore certain plants and animals that have become extinct. 2. Describe ways plants and animals become extinct and identify examples. 3. Research in depth one extinct plant or animal.

4TH GRADE SCIENCE

Course Description

Semester A

Grade 4 Science includes the three main domains of science which are physical, life, and earth and space science. Learners will use various kinds of experimenting, including field studies, systematic observations, models, and controlled experiences. The course begins with the explanation of the scientific method which the students continue to use and build upon throughout the course. The big picture of the earth is examined as students review the life on planet earth, salt and fresh water, and fast and slow changes that occur on the planet. Students go beyond planet earth, though, as they study galaxies, the solar system and other planets. Students examine the ways that forces and motion can be measured and the concept that a single kind of matter can exist as a solid, liquid or gas. Grade 4 science uses many modes of instruction including video presentations, enrichment activities, and hands-on experimentation.

Semester B

Semester B of Grade 4 Science focuses on the relationship between heat, light, sound, and electrical energy and the way they can be transferred between each other. Learners distinguish between natural objects and objects made by humans as they examine technology and the role it plays in science. Students also look at life cycles of animals, plants, and humans and how they interact with each other. The course ends by looking at the ways that humans interact with the environment. Students will use research skills, watch videos, and get their hands dirty as they complete projects that require them to dig through dirt and trash in order to learn broader lessons that have to do with helping the environment.

Course Requirements

Grade Level

4th Grade

**** Materials***

Basic School Supplies

Fourth Grade Materials Kit

**Materials listed should be acquired by the student prior to beginning work in the course.*

4TH GRADE SCIENCE***Duration***

2 Semesters

Prerequisites

none

Technology Skills

- Internet Navigation
- Word Processing Skills
- Email Communication (with assistance of parent or teacher)

Semester A***Major Concepts:***

- The Scientific Method
- Planet Earth
- The Atmosphere and Air
- The Weather
- Galaxies and Stars
- The Solar System and Planets
- Measurements and Instruments
- Matter
- Forces of Motion

Semester B***Major Concepts:***

- Sound and Light
- Heat and Temperature
- Electricity and Magnetism
- Science and Technology
- Characteristics of Life
- Animals and Plants
- The Human Body
- Biodiversity and Extinction
- Humans Interaction with the Environment

5th Grade Science A Syllabus**Course Description:**

Grade 5 Science continues to build on the science skills that have been obtained in years previous. There will be an emphasis on earth and space science, life science, and physical science. Students will begin the course by focusing on earth and space science by looking at the solar system and planets. Students will come to an understanding of the concept of the earth as a sphere and the earth's place in the solar system. The course continues with a focus on physical science and the different tools that can measure force, time, and distance. They will also grow in their understanding of how light and sound travel and interact with each other as well as the different types of energy. The semester concludes with a look into life science and the ways that organisms are interconnected. Instruction will include real life application, hands-on projects and assessments, and video and short research projects.

Materials Needed:

Three types of seeds: corn (maize), bean (lima or other large bean), and radish 8.5"x
11" piece of cardstock or light cardboard
Ziploc or plastic lunch bag
Paper towel
Masking Tape
Water
2 to 4 weeks of experiment time
Optional Magnifying glass Balloons
Pencil
Tape measure
Clothespin
Graph Paper
Flashlight
Colored pencils
Wine Glass (with rim is best)

Module	Lesson Title	Objectives
1	Intro to Solar	<ol style="list-style-type: none"> 1. Define solar system, sun, planet, orbit, gravity, moon, asteroid, comet, and meteorite. 2. Describe that the solar system includes the sun and all celestial bodies that orbit the sun, and be able to describe the different types of objects briefly. 3. Understand that the sun is one of many stars that exist in the universe, and that it is part of the Milky Way. 4. Understand that each planet in the solar system has unique characteristics, and be able to describe those characteristics and differences.

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
	Milky Way	<ol style="list-style-type: none"> 1. Define solar system, sun, planet, orbit, gravity, moon, asteroid, comet, and meteorite. 2. Describe that the solar system includes the sun and all celestial bodies that orbit the sun, and be able to describe the different types of objects briefly. 3. Understand that the sun is one of many stars that exist in the universe, and that it is part of the Milky Way. 4. Understand that each planet in the solar system has unique characteristics, and be able to describe those characteristics and differences.
	Dwarf Planets	<ol style="list-style-type: none"> 1. Define solar system, sun, planet, orbit, gravity, moon, asteroid, comet, and meteorite. 2. Describe that the solar system includes the sun and all celestial bodies that orbit the sun, and be able to describe the different types of objects briefly. 3. Understand that the sun is one of many stars that exist in the universe, and that it is part of the Milky Way. 4. Understand that each planet in the solar system has unique characteristics, and be able to describe those characteristics and differences.
	Asteroids, Meteoroids, and Comets	<ol style="list-style-type: none"> 1. Define solar system, sun, planet, orbit, gravity, moon, asteroid, comet, and meteorite. 2. Describe that the solar system includes the sun and all celestial bodies that orbit the sun, and be able to describe the different types of objects briefly. 3. Understand that the sun is one of many stars that exist in the universe, and that it is part of the Milky Way. 4. Understand that each planet in the solar system has unique characteristics, and be able to describe those characteristics and differences.
	Planet Orbits and Gravity	<ol style="list-style-type: none"> 1. Describe the effects of gravity, how it helps create the orbits of the planets in the solar system. 2. Describe the formation of the solar system, including the sun and the planets that orbit the sun. 3. Describe the unique characteristics of each planet in the solar system, including each planet's distance from the sun, size, composition, and orbit. 4. Identify those planets that have moons and/or debris that orbit them.

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
	Mercury, Venus, and the Formation of the Solar System	<ol style="list-style-type: none"> 1. Describe the effects of gravity, how it helps create the orbits of the planets in the solar system. 2. Describe the formation of the solar system, including the sun and the planets that orbit the sun. 3. Describe the unique characteristics of each planet in the solar system, including each planet's distance from the sun, size, composition, and orbit. 4. Identify those planets that have moons and/or debris that orbit them.
	Earth, Mars, Jupiter and Saturn	<ol style="list-style-type: none"> 1. Describe the effects of gravity, how it helps create the orbits of the planets in the solar system. 2. Describe the formation of the solar system, including the sun and the planets that orbit the sun. 3. Describe the unique characteristics of each planet in the solar system, including each planet's distance from the sun, size, composition, and orbit. 4. Identify those planets that have moons and/or debris that orbit them.
	Uranus, Neptune and Dwarf Planets	<ol style="list-style-type: none"> 1. Describe the effects of gravity, how it helps create the orbits of the planets in the solar system. 2. Describe the formation of the solar system, including the sun and the planets that orbit the sun. 3. Describe the unique characteristics of each planet in the solar system, including each planet's distance from the sun, size, composition, and orbit. 4. Identify those planets that have moons and/or debris that orbit them.
	Gravity and Orbits	<ol style="list-style-type: none"> 1. Identify and describe the differences between comets, asteroids, and meteoroids. 2. Identify and describe the similarities between comets, asteroids, and meteoroids. 3. Describe why comets, asteroids, and meteoroids orbit the sun. 4. Know the difference between meteoroids, meteors, and meteorites.
	Comets	<ol style="list-style-type: none"> 1. Identify and describe the differences between comets, asteroids, and meteoroids. 2. Identify and describe the similarities between comets, asteroids, and meteoroids. 3. Describe why comets, asteroids, and meteoroids orbit the sun. 4. Know the difference between meteoroids, meteors, and meteorites.

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
2	Asteroids	<ol style="list-style-type: none"> 1. Identify and describe the differences between comets, asteroids, and meteoroids. 2. Identify and describe the similarities between comets, asteroids, and meteoroids. 3. Describe why comets, asteroids, and meteoroids orbit the sun. 4. Know the difference between meteoroids, meteors, and meteorites.
	Meteoroids	<ol style="list-style-type: none"> 1. Identify and describe the differences between comets, asteroids, and meteoroids. 2. Identify and describe the similarities between comets, asteroids, and meteoroids. 3. Describe why comets, asteroids, and meteoroids orbit the sun. 4. Know the difference between meteoroids, meteors, and meteorites.
	The Big Bang	<ol style="list-style-type: none"> 1. Identify events in and following the Big Bang. 2. Explain how stars are born. 3. Describe how stars are classified. 4. Explain the life cycle and death of different types of stars.
	Birth of Stars	<ol style="list-style-type: none"> 1. Identify events in and following the Big Bang. 2. Explain how stars are born. 3. Describe how stars are classified. 4. Explain the life cycle and death of different types of stars.
	Life Cycle of Stars	<ol style="list-style-type: none"> 1. Identify events in and following the Big Bang. 2. Explain how stars are born. 3. Describe how stars are classified. 4. Explain the life cycle and death of different types of stars.
	Life & Death of Stars	<ol style="list-style-type: none"> 1. Identify events in and following the Big Bang. 2. Explain how stars are born. 3. Describe how stars are classified. 4. Explain the life cycle and death of different types of stars.
	Intro to the Sun	<ol style="list-style-type: none"> 1. Describe the basic structure of the sun.
	Structure of the Sun	<ol style="list-style-type: none"> 1. Describe the basic structure of the sun.

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
	Rotation and Revolution	<ol style="list-style-type: none"> 1. Describe the cycles and patterns of motion between the Earth and the sun are predictable. 2. Recognize that planets revolve around the sun in elliptical orbits. 3. Recognize that Earth's revolution around the sun takes approximately 365 days. 4. Recognize that Earth's tilt on its axis causes the seasons.
	Seasons	<ol style="list-style-type: none"> 1. Describe the cycles and patterns of motion between the Earth and the sun are predictable. 2. Recognize that planets revolve around the sun in elliptical orbits. 3. Recognize that Earth's revolution around the sun takes approximately 365 days. 4. Recognize that Earth's tilt on its axis causes the seasons.
3	Earth's Tilt and the Seasons	<ol style="list-style-type: none"> 1. Know that Earth's revolution around the sun takes approximately 365 days. 2. Describe how Earth's axis is tilted at an angle of 23.5°. 3. Explain how Earth's tilt is the cause of Earth's seasons.
	Spring	<ol style="list-style-type: none"> 1. Know that Earth's revolution around the sun takes approximately 365 days. 2. Describe how Earth's axis is tilted at an angle of 23.5°. 3. Explain how Earth's tilt is the cause of Earth's seasons.
	Summer	<ol style="list-style-type: none"> 1. Know that Earth's revolution around the sun takes approximately 365 days. 2. Describe how Earth's axis is tilted at an angle of 23.5°. 3. Explain how Earth's tilt is the cause of Earth's seasons.
	Autumn	<ol style="list-style-type: none"> 1. Know that Earth's revolution around the sun takes approximately 365 days. 2. Describe how Earth's axis is tilted at an angle of 23.5°. 3. Explain how Earth's tilt is the cause of Earth's seasons.
	Intro to the Moon	<ol style="list-style-type: none"> 1. Identify Earth as having a single moon that revolves around, or orbits, the Earth. 2. Explain how the relationship between Earth and the Moon creates day and night and the phases of the moon. 3. Describe how Earth's rotation on its axis in a 24-hour period produces day and night. 4. Understand how the moon helps create the tides in Earth's oceans.

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
	Night and Day	<ol style="list-style-type: none"> 1. Identify Earth as having a single moon that revolves around, or orbits, the Earth. 2. Explain how the relationship between Earth and the Moon creates day and night and the phases of the moon. 3. Describe how Earth's rotation on its axis in a 24-hour period produces day and night. 4. Understand how the moon helps create the tides in Earth's oceans.
	Phases of the Moon	<ol style="list-style-type: none"> 1. Identify Earth as having a single moon that revolves around, or orbits, the Earth. 2. Explain how the relationship between Earth and the Moon creates day and night and the phases of the moon. 3. Describe how Earth's rotation on its axis in a 24-hour period produces day and night. 4. Understand how the moon helps create the tides in Earth's oceans.
	Tides	<ol style="list-style-type: none"> 1. Identify Earth as having a single moon that revolves around, or orbits, the Earth. 2. Explain how the relationship between Earth and the Moon creates day and night and the phases of the moon. 3. Describe how Earth's rotation on its axis in a 24-hour period produces day and night. 4. Understand how the moon helps create the tides in Earth's oceans.
	Living on Planet Earth	<ol style="list-style-type: none"> 1. Describe the shape of the Earth. 2. List and define common terms used to describe Earth. 3. Describe at least five reasons that life can exist on Earth. 4. List and describe at least five landforms that exist on Earth's surface.
	Freshwater on Earth	<ol style="list-style-type: none"> 1. Describe lakes, rivers, and other water sources. 2. Explain the water cycle and how it connects fresh and saltwater sources. 3. Define groundwater and key terms related to it.
	Position, Motion and Force	<ol style="list-style-type: none"> 1. Understand that movement can be measured by speed. 2. Explain how the speed of an object is calculated by determining the distance (d) traveled in a period of time (t).

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
	Measuring Speed	<ol style="list-style-type: none"> 1. Understand that movement can be measured by speed. 2. Explain how the speed of an object is calculated by determining the distance (d) traveled in a period of time (t).
4	Gravity, Mass and Weight	<ol style="list-style-type: none"> 1. read for understanding. 2. perform experiments and activities and draw conclusions. 3. define key terms. 4. analyze and record data in an organizer. 5. understand that a force is a push or a pull. 6. understand that gravitational force is a pull. 7. recognize the relationship between pushes and pulls (forces) and a change in an object's motion, including that greater force on an object leads to greater change in motion.
	Earth and Weight	<ol style="list-style-type: none"> 8.
	Forces, Motion, and Speed	<ol style="list-style-type: none"> 9.
	Force	<ol style="list-style-type: none"> 1. Understand that a force is a push or a pull on an object. 2. Recognize that applying a force to an object can change the object's movement. 3. Understand that the weight of the object and amount of force applied affect the speed of the object. 4. Understand that the amount of change in movement of an object is based on the weight of the object and the amount of force exerted.
	Motion and Forces	<p>Understand that a force is a push or a pull on an object. Recognize that applying a force to an object can change the object's movement.</p> <p>Understand that the weight of the object and amount of force applied affect the speed of the object.</p> <p>Understand that the amount of change in movement of an object is based on the weight of the object and the amount of force exerted.</p>

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
	Laws of Motion	<ol style="list-style-type: none"> 1. Understand that a force is a push or a pull on an object. 2. Recognize that applying a force to an object can change the object's movement. 3. Understand that the weight of the object and amount of force applied affect the speed of the object. 4. Understand that the amount of change in movement of an object is based on the weight of the object and the amount of force exerted.
	Acceleration	<ol style="list-style-type: none"> 1. Understand that a force is a push or a pull on an object. 2. Recognize that applying a force to an object can change the object's movement. 3. Understand that the weight of the object and amount of force applied affect the speed of the object. 4. Understand that the amount of change in movement of an object is based on the weight of the object and the amount of force exerted.
	Building Blocks	<ol style="list-style-type: none"> 1. Describe the building blocks of matter: elements, atoms, and molecules.
	Properties of Matter	<ol style="list-style-type: none"> 1. Describe observable properties of matter.
	Conservation of Mass	<ol style="list-style-type: none"> 1. Explain the law of conservation of mass.
	Mixtures and Compounds	<ol style="list-style-type: none"> 1. Explain the difference between a mixture and a compound.

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
5	Light and Color	<ol style="list-style-type: none"> 1. Describe how light travels as waves. 2. Explain that as light travels from one place to another, it in a straight line until it interacts with another object or material. 3. Describe the difference between light being absorbed, bent (refracted), bounced back (reflected), or continuing to travel through the new material. 4. Describe how shadows are formed. 5. Explain how colors are produced when white light is separated into different wavelengths.
	Refraction of	<ol style="list-style-type: none"> 1. Describe how light travels as waves. 2. Explain that as light travels from one place to another, it in a straight line until it interacts with another object or material. 3. Describe the difference between light being absorbed, bent (refracted), bounced back (reflected), or continuing to travel through the new material. 4. Describe how shadows are formed. 5. Explain how colors are produced when white light is separated into different wavelengths.
	Reflection of	<ol style="list-style-type: none"> 1. Describe how light travels as waves. 2. Explain that as light travels from one place to another, it in a straight line until it interacts with another object or material. 3. Describe the difference between light being absorbed, bent (refracted), bounced back (reflected), or continuing to travel through the new material. 4. Describe how shadows are formed. 5. Explain how colors are produced when white light is separated into different wavelengths.
	Intro to Sound	<ol style="list-style-type: none"> 1. Describe how sound is produced by vibrating objects. 2. Explain how the rate of vibration is related to the pitch of sound. 3. Describe how the loudness of sound is measured. 4. Explain what it means that sound requires a medium which to travel. 5. Describe how sound travels at different speeds in different mediums.

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
	Pitch and Loudness	<ol style="list-style-type: none"> 1. Describe how sound is produced by vibrating objects. 2. Explain how the rate of vibration is related to the pitch of the sound. 3. Describe how the loudness of sound is measured. 4. Explain what it means that sound requires a medium through which to travel. 5. Describe how sound travels at different speeds in different mediums.
	Traveling Sound	<ol style="list-style-type: none"> 1. Describe how sound is produced by vibrating objects. 2. Explain how the rate of vibration is related to the pitch of the sound. 3. Describe how the loudness of sound is measured. 4. Explain what it means that sound requires a medium through which to travel. 5. Describe how sound travels at different speeds in different mediums.
	Sound Part 1&2	<ol style="list-style-type: none"> 1. Explain how sound and light are forms of energy. 2. Recognize that sound and light travel as waves. 3. Recognize that sound and light waves can be measured. 4. Describe how sound waves and light waves behave in predictable ways, such as being reflected or refracted.
	Light Part 1&2	<ol style="list-style-type: none"> 1. Explain how sound and light are forms of energy. 2. Recognize that sound and light travel as waves. 3. Recognize that sound and light waves can be measured. 4. Describe how sound waves and light waves behave in predictable ways, such as being reflected or refracted.
6 Resources	Nonrenewable	<ol style="list-style-type: none"> 1. Describe the difference between renewable and non-renewable energy sources. 2. Explain why nonrenewable energy sources are important to humans. 3. Discuss the role that energy sources play in food chains. 4. Explain why it is important to protect energy relationships in food chains.
	Renewable Resources	<ol style="list-style-type: none"> 1. Describe the difference between renewable and non-renewable energy sources. 2. Explain why nonrenewable energy sources are important to humans. 3. Discuss the role that energy sources play in food chains. 4. Explain why it is important to protect energy relationships in food chains.

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
	Flow of Energy	<ol style="list-style-type: none"> 1. Recognize that energy from the sun provides the energy to sustain almost all life on Earth. 2. Describe why photosynthesis is so important to living things. 3. Explain how energy flows through a food chain.
	Phytoplankton	<ol style="list-style-type: none"> 1. Recognize that energy from the sun provides the energy to sustain almost all life on Earth. 2. Describe why photosynthesis is so important to living things. 3. Explain how energy flows through a food chain.
	Energy Consumers	<ol style="list-style-type: none"> 1. Describe how populations of organisms can be categorized by how they acquire energy. 2. Explain the difference between a producer and a consumer in a food chain. 3. Identify organisms as energy consumers, including identifying the organism as a primary or other level consumer. 4. Describe the variety of ways in which consumers are able to get food.
	Ecosyste	<ol style="list-style-type: none"> 1. Explain how all of the processes that take place within organisms require energy. 2. Identify how populations of organisms can be categorized by how they acquire energy. 3. Describe how, for ecosystems, the major source of energy is sunlight. 4. Explain how food chains and food webs can be used to identify the relationships among producers, consumers, and decomposers in an ecosystem. 5. Describe how organisms perform a variety of roles in an
	Food Chains and Food Webs	<ol style="list-style-type: none"> 1. Explain how all of the processes that take place within organisms require energy. 2. Explain how food chains and food webs can be used to identify the relationships among producers, consumers, and decomposers in an ecosystem. 5. Describe how organisms perform a variety of roles in an ecosystem.

5th Grade Science A Syllabus

Module	Lesson Title	Objectives
	Deer Cave	<ol style="list-style-type: none">1. Explain how all of the processes that take place within organisms require energy.2. Identify how populations of organisms can be categorized by how they acquire energy.3. Describe how, for ecosystems, the major source of energy is sunlight.4. Explain how food chains and food webs can be used to identify the relationships among producers, consumers, and decomposers in an ecosystem.5. Describe how organisms perform a variety of roles in an ecosystem.

5th Grade Science B Syllabus**Course Description:**

Semester B puts great emphasis on life science and begins by focusing on the many ecosystems of the earth and the way that all parts of ecosystems depend on each other. Students will learn the different types of ecosystems that exist. They will learn that ecosystems change and how the changes affect their ability to support their populations. Learners will examine plants; that they have different structures and how those structures allow them to respond to different needs. Students will also grow in their understanding of the importance of good nutrition to all living organisms. The course concludes with a look into the scientific process and the importance of investigations and conclusions in the study of science. Instruction will include real life application, hands-on projects and assessments, and video and short research projects.

Materials Needed:

- Three types of seeds: corn (maize), bean (lima or other large bean), and radish
- 8.5"x 11" piece of cardstock or light cardboard
- Ziploc or plastic lunch bag
- Paper towel
- Masking Tape
- Water
- 2 to 4 weeks of experiment time
- Optional Magnifying glass

Module	Lesson Title	Objectives
1	Ecosystems	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is 2. Identify and describe the major characteristics of different types of ecosystems.
	Ethiopian Highlands	<ol style="list-style-type: none"> 1. Describe the how the mountains in Ethiopia were formed. 2. Identify the primary consumers in the Ethiopian Highlands.
	Andes and Rockies Ecosystems	<ol style="list-style-type: none"> 1. Describe how organisms perform a variety of roles in an ecosystem. 2. Illustrate how energy entering ecosystems as sunlight is transferred and transformed by producers into energy that organisms use through the process of photosynthesis. 3. Identify producers and consumers in mountain ecosystems.
	The Himalayas Ecosystem	<ol style="list-style-type: none"> 1. Describe how organisms perform a variety of roles in the Himalayas. 2. Identify and compare the wild goats found in mountain ecosystems.

5th Grade Science B Syllabus

Module	Lesson Title	Objectives
	Ecosystem Review	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is. 2. Describe how organisms perform a variety of roles in an ecosystem.
	Tundra Plants	<ol style="list-style-type: none"> 1. Identify and describe the different types of tundra ecosystems. 2. Identify and describe the plants and animals of the tundra.
	Tundra Animals	<ol style="list-style-type: none"> 1. Describe how organisms perform a variety of roles in an ecosystem. 2. Identify producers and consumers in the tundra ecosystem.
	Arctic Tundra Ecosystem	<ol style="list-style-type: none"> 1. Describe how organisms perform a variety of roles in an ecosystem. 2. Identify producers and consumers in the tundra ecosystem.
	Forest Ecosystem	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is. 2. Describe or illustrate how energy entering ecosystems as sunlight is transferred and transformed by producers, through the process of photosynthesis, into energy that organisms use. 3. Identify producers and consumers in a forest ecosystem. 4. Describe how organisms perform a variety of roles in an ecosystem.
	Taiga	<ol style="list-style-type: none"> 1. Describe how organisms perform a variety of roles in an ecosystem. 2. Identify the primary producers and consumers in the Taiga forest.
	Temperate Coniferous Forest	<ol style="list-style-type: none"> 1. Identify producers and consumers in a forest ecosystem.
	Temperate Broadleaf Forest	<ol style="list-style-type: none"> 1. Identify producers and consumers in a forest ecosystem.
	Forest Ecosystem	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is. 2. Describe or illustrate how energy entering ecosystems as sunlight is transferred and transformed by producers, through the process of photosynthesis, into energy that organisms use. 3. Identify producers and consumers in a forest ecosystem. 4. Describe how organisms perform a variety of roles in an ecosystem.

5th Grade Science B Syllabus

Module	Lesson Title	Objectives
2	Ecosystem: Energy Flow	1. Describe or illustrate what an ecosystem is.
	The Rainforest Ecosystem process	<ol style="list-style-type: none"> 1. Describe how organisms perform a variety of roles in an ecosystem. 2. Describe or illustrate how energy entering ecosystems as sunlight is transferred and transformed by producers, through the process of photosynthesis, into energy that organisms use. 3. Identify producers and consumers in a tropical rainforest ecosystem.
	Ecosystems: Tropical Rainforest	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is. 2. Describe how organisms perform a variety of roles in an ecosystem. 3. Identify producers and consumers in a tropical rainforest ecosystem
	Energy flow in Marine Life	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is. 2. Describe the flow of energy through a marine ecosystem.
	Marine Ecosystem	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is. 2. Describe how organisms perform a variety of roles in an ecosystem. 3. Describe how energy entering ecosystems as sunlight is transferred and transformed by producers, through the process of photosynthesis, into energy that organisms use. 4. Identify producers and consumers in a marine ecosystem.
	North Atlantic and Coral Reef	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is. 2. Describe how organisms perform a variety of roles in an ecosystem. 3. Describe how energy entering ecosystems as sunlight is transferred and transformed by producers, through the process of photosynthesis, into energy that organisms use. 4. Identify producers and consumers in a marine ecosystem.

5th Grade Science B Syllabus

Module	Lesson Title	Objectives
	Grassland and Savanna	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is. 2. Describe how organisms perform a variety of roles in an ecosystem. 3. Describe how energy entering ecosystems as sunlight is transferred and transformed by producers, through the process of photosynthesis, into energy that organisms use. 4. Identify producers and consumers in a grassland ecosystem.
	Tallgrass Prairie	<ol style="list-style-type: none"> 1. Describe or illustrate what an ecosystem is. 2. Describe how organisms perform a variety of roles in an ecosystem. 3. Describe how energy entering ecosystems as sunlight is transferred and transformed by producers, through the process of photosynthesis, into energy that organisms use. 4. Identify producers and consumers in a prairiegrassland ecosystem.
3	Plants: Stems and Transportation	<ol style="list-style-type: none"> 1. Describe the difference between herbaceous and woody plants, and the function of stems and wood. 2. Describe the transportation of water and nutrients through specialized plant tissues. 3. Identify the function of roots and leaves.
	Photosynthesis	<ol style="list-style-type: none"> 1. Describe in appropriate detail the process of photosynthesis and write a scientific equation that represents the process. 2. Identify and describe the parts of a leaf involved in photosynthesis. 3. Explain what transpiration is, and how it works.
	Green Algae and Bryophytes	<ol style="list-style-type: none"> 1. Distinguish between four different plant groups green algae bryophytes (mosses) ferns and fern allies seed plants (including gymnosperms and angiosperms)
	Ferns, Conifers and Flowering Plants	<ol style="list-style-type: none"> 1. Distinguish between four different plant groups green algae bryophytes (mosses) ferns and fern allies seed plants (including gymnosperms and angiosperms) 2. Describe and define the main parts of a flower. 3. Describe how flowers reproduce through pollination.
4	Nutrition	<ol style="list-style-type: none"> 1. Define the basic terms used in learning about nutrition. 2. Explain how our bodies use food for energy and nutrition. 3. Understand how vitamins and minerals are used in our bodies. 4. List a variety of foods that provide specific vitamins and minerals. 5. Identify specific vitamins and minerals, their food sources, and their health benefits.

5th Grade Science B Syllabus

Module	Lesson Title	Objectives
	Proteins and Amino Acids	1. Explain how proteins, amino acids, and fiber are used in our bodies for growth and nutrition.
	Proteins, Amino Acids and Fiber Review	1. List a variety of foods that provide proteins, amino acids, or fiber. 2. Identify types of proteins, amino acids, and fibers, their food sources, and their health benefits.
	Seeds	1. List the basic requirements for seed germination and growth. 2. Describe several methods of seed dispersal common in nature.
5	Roots	1. Identify the parts of a seedling. 2. Identify the function and purpose of the plant's roots.
	Stems	1. Identify the function and purpose of the plant's stem.
	Leaves	1. Identify the function and purpose of the plant's leaves.
	Nutrients	1. Describe the nutrients that make up rich soil.
	Soil Life	1. Identify the organisms that comprise rich soil.
	Fertilizer	1. Distinguish between humus and compost and describe the purpose of a fertilizer.
	Soil System	1. Describe a healthy soil system and its layers.

5th Grade Science B Syllabus

Module	Lesson Title	Objectives
	Plants Sense and Respond	<ol style="list-style-type: none"> 1. Explain why plants turn their stems or leaves towards the light (phototropism). 2. Explain why roots grow down into the soil and stems grow up even when there is no light (gravitropism). 3. Explain why some vines and other climbing plants respond to touch (thigmotropism). 4. Consider whether hydrotropism is separate from gravitropism.
6	Cell Division	<ol style="list-style-type: none"> 1. Explain and describe the basics of cell division. 2. Describe and define the basics of asexual reproduction in plants and simple organisms. 3. Define and describe the basics of sexual reproduction in some plants and in most animals.
	The Scientific Process	<ol style="list-style-type: none"> 1. Define science, and describe why it is important. 2. List the steps in the scientific method. 3. Design and carry out a simple experiment.
	Investigations and Conclusions	<ol style="list-style-type: none"> 1. Understand the steps in the scientific method. 2. Identify questions that can be answered through scientific investigations. 3. Practice the scientific method. 4. Design and conduct a scientific investigation. 5. Communicate scientific conclusions and explanations.

6th Grade Science A Syllabus

Course Description

This course focuses mainly on plants and animals. The course begins with an introduction to cells. You will then continue with the hierarchy of organization through a discussion of tissues, organs, and organ systems. Once you have learned what makes up organisms, you will take a look at interactions between them. The course will also cover the growth of plants and animals and what factors affect their growth. You will then track the life cycles of plants and animals and find out how they reproduce.

Romanova Natali/Shutterstock

In the brain, interneurons make many connections with each other.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Evaluate topics in biology and ecology, including cells, organisms, plants, animal and plant interactions, growth, and reproduction.

This course is made up of six units, with four to six lessons each. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit will include a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted if necessary.

A typical lesson will have the following activities. Note that the Checkpoint occurs in the first few lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

- **Direct Instruction** — This can include readings with reading checks, as well as visual concepts and videos. Some activities have graded workbook questions, and some do not. Further explanation of a few of these activities is provided below.
- **Visual Concepts/Videos/Practice Assignments** — These are activities that cover complex topics from your content readings in more depth. They can range from short animations to longer videos, or virtual practice.
- **Project** — This is a graded activity that allows you to practice investigating, experimenting, and researching.
- **Discussion Board** — This is a graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore the lesson's topics in more depth and may require research.

6th Grade Science A Syllabus

- **Checkpoint** — This graded activity contains 10 or less questions that assess what you learned over the lesson. Note that not all lessons will contain a checkpoint exam.
- **Multi-Unit Exam** — This graded activity contains 20 to 25 questions that assess what you learned over the course of three units.

6th Grade Science A Syllabus**Schedule of Work****Unit 1:**

- Direct Instruction
 - Cell History
 - Cell Theory
 - Cell Parts: Outside
 - Cell Parts: Inside
 - Eukaryotes
 - Prokaryotes
- Checkpoints 1-4
- Discussion Board
- Vocabulary Review
- Practice: Build-a-Cell
- Project: Living vs. Nonliving

Unit 2:

- Direct Instruction
 - Structure of Organisms
 - Hierarchy of Organization
 - Organ Systems

6th Grade Science A Syllabus

- The Senses
- Types of Neurons
- Responding to Senses
- Memory Formation
- Checkpoints 6-8
- Discussion Board
- Vocabulary Review
- Practice: Nervous System

Unit 3:

- Direct Instruction
 - Types of Organs in Plants
 - Photosynthesis
 - Types of Plant Tissues
 - Parts of a Flower
 - Flowers, Fruits, and Seeds
- Checkpoints 11-14
- Discussion Board
- Vocabulary Review
- Units 1-3 Review
- Units 1-3 Exam

Unit 4:

- Direct Instruction
 - Survival and Reproduction
 - Characteristics and Behaviors
 - Predator vs. Prey

6th Grade Science A Syllabus

- Working Together
- Plant Survival
- How Animals Benefit from Plants
- Checkpoints 16-18
- Discussion Board
- Vocabulary Review
- Practice: Plant and Animal Relationships

Unit 5:

- Direct Instruction
 - Growth and Development
 - What is Needed for Growth?
 - What Affects Growth?
- Checkpoint 23
- Discussion Board
- Vocabulary Review
- Project: Plant Growth Lab

Unit 6:

- Direct Instruction
 - Life Cycles
 - Asexual Reproduction
 - Sexual Reproduction

6th Grade Science A Syllabus

- Diversity
- Checkpoints 25 and 28
- Discussion Board
- Project: Prickly Pear
- Vocabulary Review
- Units 4-6 Review
- Units 4-6 Exam

Practices/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

Unit 1:

Lessons 1, 2, and 4: No Project

Lesson 3: Practice: Build-a-Cell

- notebook

Lesson 5: Project: Living vs. Nonliving

- notebook

6th Grade Science A Syllabus

- virtual game

Unit 2:

Lessons 6-9: No Project

Lesson 10: Practice: Nervous System

- notebook
- virtual activity

Unit 3:

Lessons 11-15: No Project

Unit 4:

Lessons 16-18: No Project

Lesson 19: Practice: Plant and Animal Relationships

- notebook
 - virtual activity
- Lesson 20: Practice: Plant and Animal Relationships Assignment
- notebook

Unit 5:

Lessons 21-23: No Project

Lesson 24: Project: Plant Growth Lab

- notebook
- virtual activity

Unit 6:

Lessons 29-30: No Project

Lesson 25: Project: Prickly Pear Background

- diorama (possibly a shoe box)

6th Grade Science A Syllabus

- printer paper or images printed from the computer
- markers/crayons/colored pencils/pens

Lesson 25: Project: Prickly Pear Cacti Creation

- clay/molding dough/paper/etc.

Lesson 26: Project: Prickly Pear Asexual Reproduction Investigation

- diorama with desert background
- 28 prickly pear cacti with varied flower colors and numbers of petals
- 3 note cards or pieces of paper
- a camera or something to take pictures with (such as a cell phone or the camera on your computer)

Lesson 27: Project: Prickly Pear Sexual Reproduction Investigation

- diorama with desert background
- 28 prickly pear cacti with varied flower colors and numbers of petals
- 3 note cards or pieces of paper
- a camera or something to take pictures with (such as a cell phone or the camera on your computer)

Lesson 28: Project: Prickly Pear Image Upload

- image of Asexual Reproduction: First Generation
- image of Asexual Reproduction: Second Generation
- image of Asexual Reproduction: Third Generation
- image of Sexual Reproduction: First Generation
- image of Sexual Reproduction: Second Generation
- image of Sexual Reproduction: Third Generation

Lesson 28: Project: Prickly Pear Write-Up

- images of all the generations for both investigations

6th Grade Science B Syllabus

Course Description

This course focuses on several scientific topics. The course begins with an introduction to matter and energy. Then it continues with the concept of thermal energy and its influence on matter. Once these topics are understood, next on the agenda is the water cycle, climate, and weather. The course will also cover pollution, global rises in temperature, the impact humans have, and what we can do about it.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify issues, gather data, and draw conclusions.
- Evaluate topics in science including matter and energy, energy transformations, the water cycle, the greenhouse effect, the Earth's relationship with the Sun, weather, climate, and climate change.

This course is made up of six units, with four to five lessons each. Lessons present the material in a variety of ways to allow for increased comprehension of information. While some activities are graded by the program software, others are teacher graded. Additional activities are available for review or practice, but not graded.

Course Organization

Each unit will include a set of activities organized in a particular pattern. Lessons within the unit will also follow a certain format, unless a variation or omission is more conducive to a particular activity.

A typical lesson will have the following activities.

- **Direct Instruction** — This can include readings with reading checks, as well as visual concepts and videos. Some activities have graded workbook questions, and some do not. Further explanation of a few of these activities is provided below.
- **Visual Concepts/Videos/Practice Assignments** — These are activities that cover complex topics from your content readings in more depth. They can range from short animations to longer videos to virtual practice.
- **Project** — This is a graded activity that allows further practice investigating, experimenting, and researching.
- **Discussion Board** — This is a graded activity that gives students a chance to interact and communicate with classmates and their teacher. It allows students to explore the lesson's topics in more depth and may require research.
- **Checkpoint** — This graded activity contains questions that assess what students learned over the lesson.
- **Units Exam** — This graded activity contains questions that assess what students learned over the span of three units.

6th Grade Science B Syllabus**Schedule of Work****Unit 1: Matter and Energy**

- Direct Instruction
 - What is Matter?
 - What is Energy?
 - Types of Energy
 - The Nature and Phases of Matter
 - Explaining Temperature
- Checkpoints 1, 3, 4, and 5
- Discussion Board
- Vocabulary Review

Unit 2: Energy Transformations

- Direct Instruction
 - Transformations of Energy
 - Thermal Energy Movement
 - Heat
 - Controlling Thermal Energy Flow

- Checkpoints 6, 7, and 9
- Discussion Board
- Project: Plan an Experiment
- Project: Keeping It Cool
- Vocabulary Review

Unit 3: The Cycling of Water

- Direct Instruction
 - The Water Cycle

6th Grade Science B Syllabus

- Powering the Water Cycle
- Pollution
- Saving Our Environment
- The Greenhouse Effect
- Checkpoints 11-15
- Discussion Board
- Practice: Events in the Water Cycle
- Project: Solving an Environmental Issue, Research Write Up
- Project: Solving an Environmental Issue, Plan Write Up
- Vocabulary Review
- Units 1-3 Review
- Units 1-3 Exam

Unit 4: The Earth and Sun's Relationship

- Direct Instruction
 - Earth
 - The Effects of the Sun
 - What Makes Fluids Move

- Air Currents
- Checkpoints 18-20
- Discussion Board
- Project: Solving an Environmental Issue, Gather Data
- Project: Solving an Environmental Issue, Conclusion Write Up
- Vocabulary Review

Unit 5: All About Weather

- Direct Instruction
 - What is Weather?
 - The Coriolis Effect and Hurricanes

6th Grade Science B Syllabus

- Land-Water Relationships
- Human Impact on Habitats
- Checkpoints 21, 23, and 24
- Discussion Board
- Project: Solving an Environmental Issue, Create Presentation
- Project: Solving an Environmental Issue, Submit Presentation
- Vocabulary Review

Unit 6: Climate Change and Human Impact

- Direct Instruction
 - Our Naturally Changing Climate
 - Human Impact on Earth's Climate
 - Understanding Data
 - Rise in Global Temperatures
 - Global Warming
- Checkpoints 25, 26, 27, and 29

- Discussion Board
- Units 4-6 Review
- Units 4-6 Exam

Practices/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

6th Grade Science B Syllabus

Unit 1: Matter and Energy

Lessons 1-5 No Project or Practice

Unit 2: Energy Transformations

Lessons 6, 8, and 9: No Project or Practice

Lesson 7: Project: Plan an Experiment

- Notebook
- Virtual activity

Lesson 10: Project: Keeping it Cool

- notebook
- two ice cubes that are the same size
- materials to construct a device to keep an ice cube cold
- something to measure the size of your ice cubes with (scale, ruler, camera, etc.)

Unit 3: The Cycling of Water

Lesson 11: Practice: Events in the Water Cycle

- Notebook
- Virtual activity

Lessons 12, 13, and 16: No Project or Practice

Lesson 14: Project: Solving an Environmental Issue, Research Write Up

- Notebook

- Internet access

Lesson 15: Project: Solving an Environmental Issue, Plan Write Up

- Notebook
- Internet access

Unit 4: The Earth and Sun's Relationship

Lessons 17: Project: Solving an Environmental Issue, Gather Data

- Notebook

6th Grade Science B Syllabus

- Internet access

Lessons 18-19: No Project or Practice

Lesson 20: Project: Solving an Environmental Issue, Conclusion Write Up

- Notebook
- Internet access

Unit 5: All About Weather

Lessons 21 and 23: No Project or Practice

Lesson 22: Project: Solving an Environmental Issue, Create Presentation

- Poster board
- Craft materials
- Camera
- Internet access

Lesson 24: Project: Solving an Environmental Issue, Submit Presentation

- Internet access

Unit 6: Climate Change and Human Impact

Lessons 25-30: No Project or Practice

7th Grade Science A Syllabus

Course Description

Science 7A focuses on science concepts from the fields of chemistry, biology, and ecology. Science 7A begins by exploring the relationship between matter and energy. Next, the course examines chemical reactions. Students can then use their knowledge of matter, energy, and chemical reactions to build on their understanding of cellular respiration and photosynthesis. Finally, students will uncover the world of synthetic materials to see how they are made and how they impact society.

Course Overview

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations and research in the chemistry and life sciences are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in chemistry, biology, and ecology to better understand matter, energy, chemical reactions, cellular respiration, photosynthesis, and synthetic materials.

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

Unit 1: Matter

Lessons 1–3: No Project

Lesson 4: Project: 3-D Models Pre-Lab

- 6 different colors of a similar item (for example, if the item you choose is marshmallows, you could have a pink marshmallow, a blue marshmallow, a green marshmallow, a yellow marshmallow, an orange marshmallow, and a white marshmallow)
 - You will need approximately 18 objects in one color for chlorine, 18 objects in another color for sodium, and 7 objects each in the 7 remaining colors.
- 6 separate containers to hold your items (for example, 6 plastic bags)
- connectors (for example, pretzel sticks or toothpicks)
- notecards or sheets of paper

7th Grade Science A Syllabus*Lesson 5: Project: 3-D Models*

- 6 different colors of a similar item (for example, if the item you choose is marshmallows, you could have a pink marshmallow, a blue marshmallow, a green marshmallow, a yellow marshmallow, an orange marshmallow, and a white marshmallow)
 - You will need approximately 18 objects in one color for chlorine, 18 objects in another color for sodium, and 7 objects each in the 7 remaining colors.
- 6 separate containers to hold your items (for example, 6 plastic bags)
- connectors (for example, pretzel sticks or toothpicks)
- notecards or sheets of paper

Lesson 5: Project: 3-D Models File Upload

- pictures of the 3-D models

Unit 2: States and Phases of Matter*Lessons 6–9: No Project**Lesson 10: Project: Understanding Phase Changes Background and Procedures*

- notebook (paper or computer document)
- virtual lab

Lesson 10: Project: Understanding Phase Changes Virtual Lab

- notebook (paper or computer document)
- virtual lab

Lesson 10: Project: Understanding Phase Changes Graph Upload

- screenshot of the completed phase change graph from the virtual lab

Unit 3: Chemical Reactions

7th Grade Science A Syllabus

Lessons 11–13: No Project

Lesson 14: Project: Designing a Cold Pack Background and Procedures

- notebook (paper or computer document)
- virtual lab

Lesson 14: Project: Designing a Cold Pack Virtual Lab

- notebook (paper or computer document)
- virtual lab

Lesson 14: Project: Designing a Cold Pack Data Table Upload

- photograph of the data table from the virtual lab

Lesson 15: Project: Improving a Cold Pack Background and Procedures

- notebook (paper or computer document)
- virtual lab

Lesson 15: Project: Improving a Cold Pack Virtual Lab

- notebook (paper or computer document)
- virtual lab

Lesson 15: Project: Improving a Cold Pack Data Table Upload

- photograph of the data table from the virtual lab

7th Grade Science A Syllabus**Unit 4: Chemistry of the Human Body***Lesson 16: Project: Matter and Energy Model—Animals Part 1*

- research materials (internet, books)

Lesson 17: Project: Matter and Energy Model—Animals Part 2

- research materials (internet, books)

Lesson 18: Project: Matter and Energy Model—Animals Part 3

- diorama, such as a shoebox or a shadow box picture frame
- representation of your animal, which could be a drawing, printed image, toy, or anything else you might think of
- representation of your plant, which could be a drawing, printed image, toy, or anything else you might think of
- representation of any nonliving items in the habitat, such as water or rocks
- representation of any other plants or animals that live in the habitat, which could be a drawing, printed image, toy, or anything else you might think of
- glue and/or tape
- pens and/or markers

Lesson 19: Project: Matter and Energy Model—Animals Part 4

- platform that will hold your diorama (for example, a shoebox)
- representation of your animal, which could be a drawing, printed image, toy, or anything else you might think of
- representation of your plant, which could be a drawing, printed image, toy, or anything else you might think of
- representation of any nonliving items in the habitat, such as water or rocks
- representation of any other plants or animals that live in the habitat, which could be a drawing, printed image, toy, or anything else you might think of
- glue and/or tape
- pens and/or markers

7th Grade Science A Syllabus*Lesson 20: Project: Matter and Energy Model—Animals Part 5*

- diorama

Unit 5: Photosynthesis*Lesson 21: Project: Matter and Energy Model—Plants Part 1*

- research materials (internet, books)

Lesson 22: Project: Matter and Energy Model—Plants Part 2

- research materials (internet, books)

Lesson 23: Project: Matter and Energy Model—Plants Part 3

- the diorama from Unit 4
- representation of the matter cycling through the system, which might include cotton balls, drawings, or anything else you might think of
- representation of the energy flowing through the system, which might include images, drawings, or anything else you might think of
- arrows to demonstrate the movement of matter and energy

Lesson 24: Project: Matter and Energy Model—Plants Part 4

- diorama

Lesson 25: Project: Matter and Energy Model—Plants Part 5

- video camera—either a cell phone video camera or a stand-alone video camera
- diorama

Lesson 25: Project: Matter and Energy Model Diorama Upload

- video of diorama explanation

7th Grade Science A Syllabus**Unit 6: Chemical Reactions in Industry**

Lesson 26–27: No Project

Lesson 28: Project: Impact of Aluminum

- research materials (internet, books)

Lesson 28: Project: Impact of Aluminum Research Table Upload

- copy of the Research Table

Lesson 29: Project: Impact of Aluminum Recycling

- research materials (internet, books)

Lesson 29: Project: Impact of Aluminum Recycling Research Table Upload

- copy of the Research Table

Course Overview

This course is made up of six units of five lessons each. Lessons present the material in many different ways to allow for increased comprehension. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit and each lesson begin by broadly introducing the topics that will be covered. Following the introduction is a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted, if necessary.

A typical lesson will have the activities listed below. Note that the Checkpoint occurs in the first four lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

Warm-Ups—Graded activity with questions that prompt prior knowledge.

7th Grade Science A Syllabus

Big Questions—Introductory activity that presents questions about the main topics in the lesson.

Direct Instruction (Text)—Learning activity that can include readings, interactive and enrichment activities, images, and videos.

Discussion Board—Graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore a lesson’s topic in more depth and may require research.

Lesson Review—Activity where important details from the lesson are summarized and then followed by graded Workbook questions.

Project—Graded activity to practice researching, investigating, and experimenting.

Checkpoint—Graded activity with 10 questions to assess what you learned in the lesson.

Unit Exam—Graded activity with 15 questions to assess what you learned in the unit.

Note: Some activities in this course recommend that you write your answers in your notes. Your notes can be written in a personal notebook or a document that you save on the computer. Taking notes will help keep you on track during the course and will help you process what you are learning.

Schedule of Work

Unit 1: Matter

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Matter vs. Not Matter
 - Types of Energy
 - Elements and Atoms
 - Notable Atoms in the Human Body
 - Behavior of Atoms
 - Small Molecules
 - Extended Structures
 - Modeling Giant Molecules
 - Polymers
- Lesson Reviews and Discussion Board
- Project: 3-D Models
- Checkpoints 1–4
- Unit 1 Exam

7th Grade Science A Syllabus**Unit 2: States and Phases of Matter**

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Heat, Thermal Energy, and Temperature
 - Measuring Heat, Thermal Energy, and Temperature
 - States of Matter: Gas
 - States of Matter: Liquid
 - States of Matter: Solid
 - Phase Changes: Increasing Thermal Energy
 - Phases Changes: Decreasing Thermal Energy
 - Phase Change Diagram
 - Modeling Physical Change
- Lesson Reviews and Discussion Board
- Project: Understanding Phase Changes
- Checkpoints 6–9
- Unit 2 Exam

Unit 3: Chemical Reactions

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Chemical Reactions
 - Conservation of Mass
 - Physical and Chemical Properties
 - Properties in Reactions
 - Evidence of Chemical Reactions
 - Detecting Chemical Change
 - Energy in Reactants and Products
 - Dissolution
- Lesson Reviews and Discussion Board
- Project: Designing a Cold Pack
- Project: Improving a Cold Pack
- Checkpoints 11–14
- Unit 3 Exam

7th Grade Science A Syllabus**Unit 4: Chemistry of the Human Body**

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Molecules in Food
 - Why We Eat
 - Molecules as Fuel
 - Burning and Oxygen
 - Molecules as Building Blocks
 - Cellular Respiration
 - Animals and Food
 - Reactions in Animals
- Lesson Reviews and Discussion Board
- Project: Matter and Energy Model—Animals
- Checkpoints 16–19
- Unit 4 Exam

7th Grade Science A Syllabus**Unit 5: Photosynthesis**

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Plants and Energy
 - Plant Growth
 - Gases and Growth
 - Plants and Gases
 - Reactions in Plants
 - Plant Nutrient Sources
 - Photosynthetic Organisms
 - Matter and Energy in Ecosystems
- Lesson Reviews and Discussion Board
- Project: Matter and Energy Model—Plants
- Checkpoints 21–24
- Final Exam Unit 1 Review
- Unit 5 Exam

7th Grade Science A Syllabus**Unit 6: Chemical Reactions in Industry**

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Synthetic Building Materials
 - Impacts of Synthetic Building Materials
 - Plastic as a Synthetic Material
 - Impacts of Plastic
- Lesson Reviews and Discussion Board
- Project: Impact of Aluminum
- Project: Impact of Aluminum Recycling
- Checkpoints 26–27
- Unit 6 Exam
- Final Exam Units 2–6 Reviews
- Final Exam

7th Grade Science B Syllabus

Course Description

Science 7B focuses on science concepts from the fields of ecology and geology. Science 7B begins by exploring the interactions between and among organisms in an ecosystem. Next, the course examines different types of rocks, the rock cycle, and Earth's resources. Students can then use their knowledge of Earth's processes to better understand how natural hazard events and severe weather events occur. Students will then learn how technology can assist in natural hazard events and discover other benefits of technology. Finally, students will track some of Earth's changes through time.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations and research in ecology and geology are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in ecology and geology to better understand interactions between and among organisms, changes to ecosystems, impacts on populations, Earth's features, Earth's resources, natural hazard events, and geologic timescale.

Course Overview

This course is made up of six units of five lessons each. Lessons present the material in many different ways to allow for increased comprehension. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit and each lesson begin by broadly introducing the topics that will be covered. Following the introduction is a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted, if necessary.

A typical lesson will have the activities listed below. Note that the Checkpoint occurs in the first four lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

Warm-Ups—Graded activity with questions that prompt prior knowledge.

Big Questions—Introductory activity that presents questions about the main topics in the lesson.

Direct Instruction (Text)—Learning activity that can include readings, interactive and enrichment activities, images, and videos.

Discussion Board—Graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore a lesson's topic in more depth and may require research.

7th Grade Science B Syllabus

Lesson Review—Activity where important details from the lesson are summarized and then followed by graded Workbook questions.

Project—Graded activity to practice researching, investigating, and experimenting.

Checkpoint—Graded activity with 10 questions to assess what you learned in the lesson.

Unit Reviews—Activity where the Big Questions are reexamined to help you prepare for the Unit Exam.

Unit Exam—Graded activity with 15 questions to assess what you learned in the unit.

Note: Some activities in this course recommend that you write your answers in your notes. Your notes can be written in a personal notebook or a document that you save on the computer. Taking notes will help keep you on track during the course and will help you process what you are learning.

Schedule of Work

Unit 1: Interactions in an Ecosystem

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Ecological Levels Vocabulary
 - Ecological Levels Examples
 - Resources
 - Population Dynamics
 - Predator-Prey Relationships
 - Food Web and Food Chain
 - Changes to Biological Parts of an Ecosystem
 - Changes to Physical Parts of an Ecosystem
- Lesson Reviews and Discussion Board
- Project: Effects on Populations
- Checkpoints 1–4
- Unit 1 Review
- Unit 1 Exam

Unit 2: Dynamic Populations

- Warm-Ups

7th Grade Science B Syllabus

- Big Questions
- Direct Instruction:
 - Competition
 - Factors That Affect Populations
 - Population Data
 - Mutually Beneficial Interactions
 - What Is Biodiversity?
 - Impacts to Biodiversity
- Lesson Reviews and Discussion Board
- Project: Resource Availability
- Project: Predicting Interactions
- Project: Preserving Biodiversity
- Checkpoints 6–9
- Unit 2 Review
- Unit 2 Exam

Unit 3: Resources on Earth

- Warm-Ups
- Big Questions
- Direct Instruction:
 - The Structure of Earth
 - Types of Rocks
 - Rock Cycle
 - Powering the Rock Cycle
 - Resource Needs
- Uneven Distribution of Resources
- Limited and Nonrenewable Resources
- Resource Challenges
- Lesson Reviews and Discussion Board
- Project: Modeling the Rock Cycle
- Project: Reasons for the Uneven Distribution of Resources
- Checkpoints 11–14
- Unit 3 Review
- Unit 3 Exam

7th Grade Science B Syllabus

Unit 4: Hazards on Earth

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Processes inside Earth
 - Structure of Earth’s Surface
 - Introduction to Natural Hazards
 - Natural Hazards: Severe Weather Events
 - Earthquakes
 - Reducing Earthquake Damage
 - Volcanoes
 - Studying Volcanoes
- Lesson Reviews and Discussion Board
- Project: Forecasting Disaster
- Checkpoints 16–19
- Unit 4 Review
- Unit 4 Exam

Unit 5: Earth’s Changing Surface

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Changing Earth
 - Sudden Changes on Earth
 - Erosion
 - Erosional Features
 - Wegener's Continental Drift Hypothesis
 - Wegener and the 21st Century
 - Modern Evidence for Plate Motion
 - Building New Crust
 - Results of Plate Motion
- Lesson Reviews and Discussion Board
- Project: Evidence of Plate Motion
- Checkpoints 21–24
- Unit 5 Review
- Unit 5 Exam

7th Grade Science B Syllabus

Unit 6: Geology in the 21st Century

- Warm-Ups
- Big Questions
- Direct Instruction:
 - Geologic Timescale
 - Technology Uncovers Past Events
 - Technology and Natural Hazards
 - Responsible Use of Technology
 - Technology: Learning from Nature
- Lesson Reviews
- Project: Changing Earth
- Checkpoints 26–28
- Unit 6 Review
- Unit 6 Exam
- Final Exam Units 1–6 Reviews
- Units 1–6 Vocabulary Reviews
- Final Exam

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

Unit 1: Interactions in an Ecosystem

Lessons 1–4: No Project

Lesson 5: Project: Effects on Populations

- research materials (Internet, books)
- images and details of proposed wildlife bridges
- notebook

Unit 2: Dynamic Populations

Lesson 6: No Project

Lesson 7: Project: Resource Availability

7th Grade Science B Syllabus

- notebook to record your conclusions and take note of figures and values
- interactive graphs

Lesson 8: Project: Predicting Interactions

- research materials (Internet, books)
- notebook
- ecosystem scenes

Lesson 9: Project: Preserving Biodiversity

- notebook to record your data and details
- videos about student plans to fix the lake

Lesson 10: Project: Preserving Biodiversity—Results

- results tables

Unit 3: Resources on Earth

Lesson 11: Project: Modeling the Rock Cycle, Part 1

- research materials (Internet, books)
- notebook (paper or computer document)

Lesson 12: Project: Modeling the Rock Cycle, Part 2

- research materials (Internet, books)
- notebook (paper or computer document)

Lesson 13: Project: Modeling the Rock Cycle, Part 3

- a shoe box or shadow box picture frame to use as the frame for your diorama
- glue and/or tape
- pens and/or markers
- a way to show how matter cycles through the system, which could include clay, drawings, or anything else you might think of

7th Grade Science B Syllabus

- a representation of the energy entering the system, which could include images, drawings, or anything else you might think of
- arrows to demonstrate the movement of matter and energy

Lesson 14: Project: Modeling the Rock Cycle, Part 4

- notebook (paper or computer document)
- diorama

Lesson 14: Project: Reasons for the Uneven Distribution of Resources

- research materials (Internet, books)
- field notes

Lesson 15: Project: Modeling the Rock Cycle, Part 5

- video camera—either a cell phone video camera or a stand-alone video camera
 - Talk with your teacher if you have any issues getting or using a video camera.

Lesson 15: Project: Modeling the Rock Cycle Diorama Upload

- video of the rock cycle diorama and explanation

Unit 4: Hazards on Earth

*Lessons 16–18: No Project**Lesson 19: Project: Forecasting Disaster—Background*

- research materials (Internet, books)
- notebook to record your research and data
- interactive graphs

Lesson 20: Project: Forecasting Disaster

- research materials (Internet, books)
- notebook to record your research and data
- interactive graphs

Unit 5: Earth's Changing Surface

*Lessons 21–22 and 24–25: No Project**Lesson 23: Project: Evidence of Plate Motion—Fact or Opinion*

- research materials (Internet, books)
- notebook to record your research and data

7th Grade Science B Syllabus

- interactive research

Lesson 23: Project: Evidence of Plate Motion—Pangaea Breakup

- interactive map

Lesson 23: Project: Evidence of Plate Motion—Virtual Map

- interactive map

Unit 6: Geology in the 21st Century

Lesson 26–28: No Project

Lessons 29 and 30: Project: Changing Earth

- research materials (Internet, books)
- notebook to record your research and data
- interactive map

Course Syllabus

vitalez/Shutterstock

Course Description

Science 8A focuses on life science concepts from biology, ecology, and environmental science. Science 8A also explores the nature of science and has engineering and technology practices threaded throughout the course. This course begins with an introduction to scientific processes. Then, the course explores cells, heredity, evolution, ecology, and genetic technology.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations and research in the life sciences are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in the life sciences to better understand scientific processes, cells, heredity, evolution, ecology, and genetic technology.

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

<p style="text-align: center;">Unit 1: Scientific Processes</p>	<p style="text-align: center;">Unit 2: Cells</p>	<p style="text-align: center;">Unit 3: Heredity</p>	<p style="text-align: center;">Unit 4: Evolution</p>	<p style="text-align: center;">Unit 5: Ecology</p>	<p style="text-align: center;">Unit 6: Connections and Review</p>
<p><i>Lesson 1:</i> <i>No Project</i></p> <p><i>Lessons 2 and 3:</i> <i>Photosynthesis Experiment 1</i></p> <ul style="list-style-type: none"> • 1 tsp cornstarch • 2 glass parfait cups (or small, transparent plastic cups) • 20 mL or 1 fl oz of iodine* • a source of water • a plastic disposable spoon • disposable gloves • a pair of safety glasses** <p>*Make sure the label says, "2%." **Check a local hardware store.</p> <p><i>Lessons 4 and 5:</i> <i>Photosynthesis Experiment 2</i></p> <ul style="list-style-type: none"> • materials from Experiment 1 • a geranium plant, or another plant that has mostly flat leaves* • a heat-safe glass measuring bowl • an electric kettle, or other source of boiling water • a small dish • a small bottle of 70% rubbing alcohol • the plastic lid from a disposable plastic container • tweezers (optional) <p>*Plants with thick, plastic-like leaves should not be used.</p>	<p><i>Lessons 6 and 7:</i> <i>Photosynthesis Experiment 3</i></p> <ul style="list-style-type: none"> • materials from Photosynthesis Experiments 1 and 2 • aluminum foil • a paper clip <p><i>Lessons 8 and 9:</i> <i>Photosynthesis Experiment 4</i></p> <ul style="list-style-type: none"> • materials from Photosynthesis Experiments 1, 2, and 3 • scissors • cardboard • a photographic negative OR electrical tape and a sheet of clear plastic 	<p><i>Lesson 11: No Project</i></p> <p><i>Lessons 12 and 13: Heredity and Evolution Experiment 1</i></p> <ul style="list-style-type: none"> • a coin • a marker <p><i>Lesson 14: Heredity and Evolution Experiment 2</i></p> <ul style="list-style-type: none"> • 2 coins • a marker 	<p><i>Lesson 16: Heredity and Evolution Experiment 3</i></p> <ul style="list-style-type: none"> • scissors • large sheets of white paper • large sheets of black paper • a timer (may be found on a cell phone or online) <p><i>Lesson 17: Heredity and Evolution Experiment 4</i></p> <ul style="list-style-type: none"> • a box of toothpicks • a larger box • two cups • a timer 	<p><i>Lesson 21: No Project</i></p> <p><i>Lesson 22–25: Species Discovery</i> no materials</p> <p><i>Lesson 28: Units 1-3 Review</i> no materials</p> <p><i>Lesson 29: Units 4 and 5 Review</i> no materials</p> <p><i>Lesson 30: No Project</i></p>	<p><i>Lesson 26 and 27: Species Discovery</i> no materials</p> <p><i>Lesson 28: Units 1-3 Review</i> no materials</p> <p><i>Lesson 29: Units 4 and 5 Review</i> no materials</p> <p><i>Lesson 30: No Project</i></p>

Course Overview

This course is made up of six units of five lessons each. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit and lesson begin by broadly introducing the topics that will be covered. Following the introduction is a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted, if necessary.

A typical lesson will have the following activities. Note that the Checkpoint occurs in the first four lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

Discover — This can include readings, interactive and enrichment activities, images, and videos. Further explanation of a few of these activities is provided below.

Video — This is an activity that covers complex topics from your Discover readings in more depth.

Discussion Board — This is a graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore the unit's topics in more depth and may require research.

Project — This is a graded activity that allows you to practice researching, investigating, and experimenting.

Career Connection – This is a video or text information about people who work in the science field or use science in their careers.

Vocab Matchup — This activity helps you prepare for the Checkpoint and Unit Exam by reviewing vocabulary from the lesson.

Checkpoint — This graded activity contains 10 questions that assess what you learned in the lesson.

Unit Exam — This graded activity contains 30 questions that assess what you learned in the unit.

What Did I Learn? — This activity reviews the information you learned in the lesson through a comic summary and review questions.

Note: Some activities in this course recommend that you write your answers in your notes. Your notes can be a personal notebook that you write in, or a document on the computer that you save. Taking notes will help keep you on track during the course and will help you process what you are learning.

Schedule of Work

Unit 1: Scientific Processes	Unit 2: Cells	Unit 3: Heredity	Unit 4: Evolution	Unit 5: Ecology	Unit 6: Connections and Review

Course Syllabus

Promotive/Shutterstock

Course Description

Science 8B focuses on physical science concepts from physics to chemistry. This course begins with an introduction to the history of physics. Then, the course explores the fundamentals of physics, including graphing and Newton's laws of motion. The second half of the course begins with an introduction to the history of the study of chemistry. The course then explores the different properties of matter, elements, compounds, and mixtures. Science 8B ends with a brief look at the current research that is taking place in these two areas of science.

Course Objectives

- Apply scientific processes to conduct investigations.
 - Use logical thinking to identify relationships and draw conclusions.
 - Examine how investigations and research in the physical sciences are important to gaining historical perspective and understanding the societal value of scientific advances.
 - Evaluate topics in the physical sciences and chemistry to better understand motion, graphing, electricity, magnetism, energy, matter, elements, compounds, and mixtures.
-

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

Unit 1: Physics: Intro to Physics	Unit 2: Physics: Forces and Newton's Laws	Unit 3: Physics: Electricity, Magnetism, and Energy	Unit 4: Chemistry: Matter and Properties	Unit 5: Chemistry: Elements, Compounds, and Mixtures	Unit 6: Chemistry: Wrap Up

Biology A Syllabus

Course Description

This biology course covers the basics of biochemistry and how it relates to life. You will discover how cells divide and reproduce. You will also explore how living things produce and use energy through metabolism and photosynthesis.

Course Objectives

- Apply scientific processes to conduct an investigation.
- Use logical thinking to identify relationships and draw conclusions.
- Evaluate topics in biology to better understand the basics of biochemistry, cells, membranes, cell division and reproduction, energy and metabolism, and photosynthesis.

Course Overview

This course is made up of six units, with three to seven lessons each. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit will include a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted if necessary.

A typical lesson will have the following activities. Note that the Checkpoint occurs in the first few lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

- **Direct Instruction**—this can include readings with reading checks, as well as visual concepts and videos. Some activities have graded workbook questions, and some do not. Further explanation of a few of these activities is provided below.
- **Visual Concepts/Videos/Interactives**—These are activities that cover complex topics from your content readings in more depth. They can range from short animations to longer videos or interactive practice.
- **Project**—This is a graded activity that allows you to practice investigating, experimenting, and researching.
- **Discussion Board**—This is a graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore the lesson's topics in more depth and may require research.
- **Checkpoint**—This graded activity contains 10 or fewer questions that assess what you learned over the lesson.
- **Unit Exam**—This graded activity contains 15 questions that assess what you learned over the unit.
- **Final Exam**—This graded activity contains 26 questions that assess what you learned throughout the course.

Biology A Syllabus

Schedule of Work

Unit 1: Biochemistry

- Direct Instruction
 - Atoms and All About Them
 - Atoms in Living Organisms
 - Molecules
 - Ions
 - Water and its Unique Properties
 - Acids, Bases, and pH
 - Introduction to Biological Molecules
 - Carbohydrates and Fats
 - Proteins and Nucleic Acids
- Interactive: Name That Element
- Interactive: Chemical Formulas
- Checkpoints 1-5
- Unit 1 Exam

Biology A Syllabus

Unit 2: Cells

- Direct Instruction
 - Cell Size
 - Hierarchy of Organization
 - Feedback and Homeostasis
 - Homeostasis in the Human Body
 - Prokaryotes and Eukaryotes
 - Unicellular and Multicellular Organisms
 - Prokaryotic Cell Structure
 - Eukaryotic Cell Structure
 - Theory of Endosymbiosis
- Checkpoints 6-9
- Unit 2 Exam

Unit 3: Membranes

- Direct Instruction
 - Fluid Mosaic Model
 - Types of Membrane Proteins
 - Diffusion
 - Passive Transport
 - Active Transport
 - Sodium-Potassium Pump
 - Endocytosis and Exocytosis
- Discussion Board
- Checkpoints 11-13
- Unit 3 Exam

Biology A Syllabus

Unit 4: Cell Division and Reproduction

- Direct Instruction
 - The Cell Cycle
 - Regulating the Cell Cycle
 - Basic Chromosome Structure
 - Chromosome Number
 - Prokaryotic Cell Division
 - Mitosis
 - Sexual vs. Asexual Reproduction
 - Reduction Division
 - Stages of Meiosis
 - Crossing-Over
 - Nondisjunction and Chromosomal Abnormalities
 - Human Reproduction
- Checkpoints 16-20
- Unit 4 Exam

Unit 5: Energy and Metabolism

Biology A Syllabus

- Direct Instruction
 - ATP Structure and Function
 - Enzymes
 - Eating, Breathing, and Cellular Energy
 - Overview of Respiration
 - Glycolysis
 - Citric Acid Cycle
 - Electron Transport Chain
 - Fermentation
- Checkpoints 22-25
- Unit 5 Exam

Unit 6: Photosynthesis

- Direct Instruction
 - Photosynthetic Organisms
 - Leaf and Chloroplast Structure
 - Photosystems I and II
 - Calvin Cycle
 - Comparing Photosynthesis with Respiration
- Checkpoints 27-28
- Unit 6 Review
- Unit 6 Exam
- Units 1-5 Review
- Final Exam

Biology B Syllabus

Course Description

This biology course covers the basics of genetics and the technology used to better understand it. Students will discover how organisms have evolved due to natural selection. Students will also explore ecology, including how matter and energy flow through organisms and their ecosystems.

Course Objectives

- Apply ethical guidelines to biological research.
- Engage in argument about the ethical implications of current biotechnology.
- Model the flow of matter and energy in ecosystems and how changes to the flow affect organisms in their environment.
- Evaluate topics in biology to better understand the basics of genetics, DNA and the genetic code, genomics, evolution, and ecology.

Course Overview

This course is made up of five units, with four to six lessons each. Lessons present the material in many different ways to allow for increased comprehension. Some activities are graded by the program software; others are graded by the teacher. Additional activities are available but not graded.

Course Organization

Each unit will include a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted if necessary.

A typical lesson will have the following activities. Note that the Checkpoint occurs in the first few lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

- **Direct Instruction**—this can include readings with reading checks, as well as visual concepts and videos. Some activities have graded workbook questions, and some do not. Further explanation of a few of these activities is provided below.
- **Visual Concepts/Videos/Interactives**—These are activities that cover in more depth complex topics from the content readings. They can range from short animations to longer videos or interactive practice.
- **Project**—This is a graded activity that allows students to practice investigating, experimenting, and researching.
- **Discussion Board**—This is a graded activity that gives students a chance to interact and communicate with their classmates and teacher. It allows students to explore the lesson's topics in more depth and may require research.

Biology B Syllabus

- **Checkpoint**—This graded activity contains 11 or fewer questions that assess what students learned over the lesson.
- **Unit Exam**—This graded activity contains 15–16 questions that assess what students learned over the unit.
- **Final Exam**—This graded activity contains 30 questions that assess what students learned throughout the course.

Schedule of Work

Unit 1: Genetics

- Direct Instruction
 - The Science of Heredity
 - Patterns
 - Punnett Squares (monohybrid cross)
 - Punnett Squares (dihybrid cross)
 - What Mendel Got Right and Wrong
 - Traits with Multiple Alleles
 - Polygenes
 - Human Blood Type
 - Sex-Linked Traits
 - Human Genetic Disorders
- Interactive: Punnett Squares
- Interactive: Blood Type
- Interactive: Operation: Blood Typing
- Checkpoints 1–5
- Unit 1 Exam

Unit 2: DNA and the Genetic Code

- Direct Instruction
 - DNA and RNA
 - How DNA Is Copied
 - The Genetic Code
 - The Ribosome

Biology B Syllabus

- Translation and Transcription
- Mutations
- Mutagens
- Controlling Genes
- Cancer
- Checkpoints 7–10
- Project: Bioethics, Part 1
- Unit 2 Exam

Unit 3: Genomics

- Direct Instruction
 - Linkage
 - Making a Genetic Map
 - Enzymes as Molecular Machines
 - Common Tools of the Trade
 - DNA Sequencing
 - Sequencing Genomes
 - Features of Genomes
 - Cloning
 - Gene Editing
- Project: Bioethics, Part 2
- Checkpoints 12–15
- Unit 3 Exam

Unit 4: Evolution

- Direct Instruction
 - Origin of Life on Earth
 - RNA World
 - Darwin and Natural Selection
 - Evidence for Evolution
 - Molecular Evidence and Discoveries

Biology B Syllabus

- Population Genetics
- Causes of Evolutionary Change
- Formation of Species
- Types of Behavior
- Checkpoints 17–20
- Unit 4 Exam

Unit 5: Ecology

- Direct Instruction
 - Introduction to Ecology
 - Producers and Consumers
 - Energy Flow
 - Cycling Matter
 - Climate
 - Biomes
 - Aquatic Ecosystems
 - Population Growth
 - Limits to Population Growth
 - Humans and the Environment
 - Biodiversity and Threats to Biodiversity
 - Conservation Biology
 - Ozone Layer and Climate Change

- Interactive: A Food Web and its Food Chains
- Interactive: Carrying Capacity
- Discussion
- Checkpoints 22–27
- Unit 5 Exam

Unit 6: Review and Final Exam

Biology B Syllabus

- Units 1–5 Review
- Final Exam

Chemistry Semester A

Course Description

This chemistry course covers the basic principles and properties of matter. You will discover how the atomic model has evolved as you learn about atomic structure. You will also explore periodic laws, types of bonding, chemical reactions, and stoichiometry.

Course Objectives

- Apply scientific processes to conduct an investigation.
- Use logical thinking to identify relationships and draw conclusions.
- Evaluate topics in chemistry to better understand the basics of matter and atoms, how the elements are organized, how and why chemicals react to form new substances, the calculations and purposes of stoichiometry, and how chemistry impacts individuals and society.

Chemistry Semester A

Course Overview

This course is made up of six units, with four to six lessons each. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit will include a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted if necessary.

A typical lesson will have the following activities. Note that the Checkpoint occurs in the first few lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

- **Direct Instruction** — This can include readings with reading checks, as well as visual concepts and videos. Some activities have graded workbook questions, and some do not. Further explanation of a few of these activities is provided below.
- **Visual Concepts/Videos/Interactives** — These are activities that cover complex topics from your content readings in more depth. They can range from short animations to longer videos, or interactive practice.
- **Project** — This is a graded activity that allows you to practice investigating, experimenting, and researching.
- **Discussion Board** — This is a graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore the lesson's topics in more depth and may require research.
- **Checkpoint** — This graded activity contains 12 or fewer questions that assess what you learned over the lesson.
- **Unit Exam** — This graded activity contains 15 to 20 questions that assess what you learned over the unit.
- **Final Exam** — This graded activity contains 30 questions that assess what you learned throughout the course.

Schedule of Work

Unit 1: Atoms

- Direct Instruction
 - The Atom
 - Components of an Atom

Chemistry Semester A

- Isotopes and Ions
- Classification of Matter
- Properties of Matter
- Discussion Board
- Interactives
 - Name That Element
 - Atomic Structure
- Checkpoints 1-3
- Unit 1 Exam

Unit 2: The Periodic Table

- Direct Instruction
 - Orbitals and Sublevels
 - Electron Configuration
 - Periodic Table Organization
 - Periodic Table Families
 - Periodic Trends
 - Predicting from Property Trends
- Checkpoints 5-7
- Unit 2 Exam

Unit 3: Bonding

- Direct Instruction
 - Chemical Bonds
 - Structure of Metals
 - Properties of Metals
 - Ionic Compounds
 - Ionic Compound Properties
 - Covalent Bonds and Compounds

Chemistry Semester A

- Understanding Molecular Models
- Checkpoints 9-11
- Unit 3 Exam

Unit 4: Molecules

- Direct Instruction
 - Covalent Bonds and Models
 - Covalent Compound Properties
 - Lewis and VSEPR Bonding Theories
 - Valence Bond and Molecular Orbital Theories
 - Molecular Geometry
 - Determining Molecular Geometry
 - Bond Length and Angles
 - Bond Polarity and Molecular Polarity
- Interactive
 - Chemical Formula Practice
- Project: Identifying Bond Type
- Checkpoints 13-16
- Unit 4 Exam

Unit 5: Chemical Nomenclature and Reactions

- Direct Instruction
 - Naming Ionic Compounds
 - Naming Molecular Compounds
 - Interpreting Reaction Equations
 - Balancing Reaction Equations
 - Analyzing Evidence of Reactions
 - Displacement Reactions
 - Combustion Reactions

Chemistry Semester A

- Synthesis Reactions
- Decomposition Reactions
- Interactive
 - Balancing Chemical Equations
- Checkpoints 18-21
- Unit 5 Exam

Unit 6: Stoichiometry

- Direct Instruction
 - The Mole Concept
 - Particle Conversions
 - Multistep Conversions
 - Determining Mole Ratios
 - Solving Stoichiometry Problems
 - Comparing Reactants
 - Limiting Reactants
 - Theoretical, Actual, and Percent Yields
 - Law of Definite Proportions
 - Law of Multiple Proportions
 - Naming Polyatomic Ions
- Checkpoints 23-28
- Unit 6 Exam
- Final Exam

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

Unit 1: Atoms

Lessons 1-4: No Project

Unit 2: The Periodic Table

Chemistry Semester A

Lessons 5-8: No Project

Unit 3: Bonding

Lessons 9-12: No Project

Unit 4: Molecules

Lessons 13 and 15: No Project

Lessons 14, 16, and 17: Project: Identifying Bond Type

- 5 mL (or 1 tsp) butter
- 5 mL (or 1 tsp) table salt
- 5 mL (or 1 tsp) sugar
- 5 mL (or 1 tsp) baking soda
- 6 cm² (or 4 in²) aluminum foil, divided
- 5 clear glasses
- 600 mL (or about 2 1/2 cups) distilled water
- measuring spoons
- measuring cup
- 5 spoons for stirring
- scissors
- timer***
- flashlight***
- plastic wrap
- kitchen towel or paper towels
- notebook or computer document
- hammer (or another heavy object)

***Cell phones often have timer and flashlight functionalities that can be used for this investigation.

Unit 5: Chemical Nomenclature and Reactions

Lessons 18-22: No Project

Unit 6: Stoichiometry

Lessons 23-28: No Project

Chemistry B Syllabus

Course Description

This Chemistry course expands upon your basic understanding of chemistry. You'll start by examining the properties of matter, including the types of bonds and forces that hold atoms and molecules together. After that, you'll explore the states of matter, phase changes, gas laws, and properties of solutions. Then you'll learn about the thermodynamics and kinetics of chemical reactions, including why some reactions give off heat, while others consume it. You'll also look at chemical equilibrium and electrochemistry. Finally, you'll explore types of radiation and radioactive decay as well as the difference between nuclear fission and fusion. At the end of this course, you'll be able to evaluate the ethical, social, and economic implications of chemistry-related technologies.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations in chemistry are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in chemistry to better understand matter, phase changes, gas laws, solutions, thermodynamics, reaction kinetics, equilibrium, radioactivity, and radiation.

Course Overview

This course is made up of six units, with four to six lessons each. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit will include a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted if necessary.

Chemistry B Syllabus

A typical lesson will have the following activities. Note that the Checkpoint occurs at the end of most lessons, while last lesson of a unit will have the Unit Exam instead.

- **Direct Instruction** — This can include readings with reading checks, as well as visual concepts and videos. Some activities have graded workbook questions, and some do not. Further explanation of a few of these activities is provided below.
- **Project** — This is a graded activity that allows you to practice investigating, experimenting, and researching.
- **Discussion Board** — This is a graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore the lesson's topics in more depth and may require research.
- **Checkpoint** — This graded activity contains 10 or less questions that assess what you learned over the lesson.
- **Unit Exam** — This graded activity contains 15 to 20 questions that assess what you learned over the unit.
- **Final Exam** — This graded activity contains 30 questions that assess what you learned throughout the course.

Chemistry B Syllabus

Schedule of Work

Unit 1:

- Direct Instruction
 - Kinetic Molecular Theory
 - Bonds and Electronegativity
 - Intermolecular Forces
 - Dipole-Dipole Interactions
 - Gases and Liquids
 - Solids
 - Heat and Temperature
- Discussion Board
- Checkpoints 1–4
- Unit 1 Exam

Unit 2:

- Direct Instruction
 - Vaporization and Vapor Pressure
 - Melting, Freezing, and Latent Heat
 - Phase Diagrams and Specific Heat
 - Kinetic Molecular Theory of Gases
 - Boyle's and Gay-Lussac's Laws
 - Charles's and Avogadro's Laws
 - Combined Gas Law
 - Ideal Gas Law
- Discussion Board
- Checkpoints 6–8
- Unit 2 Exam

Chemistry B Syllabus**Unit 3:**

- Direct Instruction
 - Solvation
 - Solubility
 - Special Properties of Water
 - Concentration and Molarity
 - Percent Solutions
 - Colligative Properties of Solutions
- Discussion Board
- Checkpoints 10–12
- Unit 3 Exam

Unit 4:

- Direct Instruction
 - Thermodynamic Systems
 - Enthalpy and Internal Energy
 - Enthalpy of Formation and Enthalpy of Combustion
 - Hess's Law
 - Free Energy and Reaction Spontaneity
 - Reaction Kinetics
 - Reaction Rate
 - Reaction Rate Calculations
 - Rate Calculations
- Discussion Board
- Checkpoints 14–17
- Reaction Rate Project
- Unit 4 Exam

Chemistry B Syllabus**Unit 5:**

- Direct Instruction
 - Concept of Equilibrium
 - Equilibrium Expression
 - Effects of Changes to Equilibrium
 - Solubility Equilibrium
 - Self-Ionization of Water
 - Defining Oxidation and Reduction
 - Oxidation Numbers
 - Electrochemical Cells
- Discussion Board
- Checkpoints 19–23
- Unit 5 Exam

Unit 6:

- Direct Instruction
 - Voltaic Cells
 - Standard Cell Potential
 - Electrolytic Cells
 - Radioactivity
 - Radioactivity: Past and Present
 - Types of Radiation
 - Nuclear Stability
 - Electromagnetic Radiation
 - Half-Life
 - Nuclear Fission
 - Nuclear Fusion
- Discussion Board

Chemistry B Syllabus

- Checkpoints 25–28
- Unit 6 Exam
- Final Exam

Projects and Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the materials you are responsible for having for the Reaction Rate Project in Lessons 16–18.

Materials

You will need to collect the following materials for this project:

Ingredients

- a sink and a source of hot and cold tap water
- 1,000 mg vitamin C tablets (5 tablets) OR 500 mg vitamin C tablets (10 tablets) *
- tincture of iodine (2%) (20 mL bottle) *
- hydrogen peroxide (3%) *
- liquid laundry starch (an inexpensive kind with no additives is best) *
- ice

*These products can be found in your local grocery store, pharmacy, or supermarket.

**Look for the iodine in the first aid aisle. It is usually found near the hydrogen peroxide. You might see the 2% bottle labeled as 'tincture of iodine' or 'iodine tincture.' They are both the same. However, the white or discolored iodine is not the same as the 2% tincture of iodine.

Measuring Equipment

- a thermometer
- a stopwatch (available online or on a cell phone)
- a measuring cup to measure $\frac{1}{4}$ cup (60 mL) of water volume
- disposable plastic spoons

(NOTE: Disposable spoons are less accurate than actual measuring spoons, but the chemicals used may pose a food safety risk. One spoon can be used if it is thoroughly washed and dried before each measurement.)

Containers and Other Tools

- 3 disposable plastic cups or other containers and a means of labeling them

Chemistry B Syllabus

- 1 transparent cup or container, preferably disposable (this will be your reaction container)
- a sealable plastic sandwich bag to contain the vitamin C tablets as they are crushed
- a hammer or other suitable object for crushing the tablets
- a bucket or a tub to hold the ice

Safety Equipment

- disposable gloves (1 pair)
- safety glasses

Course Syllabus

2nix/Photos.com

Course Description

Biology A is one of two courses that explore life on Earth. This first course focuses on life at the cellular level. Students begin by reviewing the scientific method so they understand how science works to investigate questions and present findings. Then, it's full speed ahead into cells! After a study of cells' chemical makeup and size, students examine cell structures and how they function together. From there, students progress to how materials move through cells as well as how cells obtain and use energy to carry out their functions. One such function is cell division, which students examine in depth and use to segue into a study of genetics. As students learn about DNA and RNA, they come to understand how traits are inherited and how the study of inheritance is applied today.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations in biology are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in biology to better understand the scientific process, the characteristics of life, the relationship between structure and function within living organisms, the manner in which living organisms obtain energy and reproduce, genetics and heredity, and concepts in biotechnology.

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of course's labs/projects (by unit) and the materials you are responsible for having.

Unit 1: How Science Works	Unit 2: A Look at Cells	Unit 3: Cell Transport and Energy	Unit 4: Cell Division	Unit 5: Heredity	Unit 6: Genetic Engineering and Review
<p><i>Lessons 1-5: Yogurt Lab</i></p> <ul style="list-style-type: none"> • 2 cups or glasses • 2 clean liquid measuring cups OR 2 clean teaspoons • 2 clean stirrers (spoons, coffee stirrers, etc.) • 80 mL of whole milk • 10 mL of buttermilk • masking tape or other labels for the different cups • a labeling pen 	<p><i>Lesson 6: No Lab</i></p> <p><i>Lesson 7: Cell Size</i></p> <ul style="list-style-type: none"> • 1 potato (avoid sweet potatoes) • 3 cups • food coloring (any color) • knife • cutting board • ruler with centimeters <p><i>Lessons 8-10: WANTED! Cells</i> no materials</p>	<p><i>Lessons 11-13: Osmosis</i></p> <ul style="list-style-type: none"> • 1 potato • 1 knife or other instrument with which to cut or slice the potato • 1 potato peeler • 2 bowls or cups • 1 C water • 1 Tbsp salt • masking tape or other labels for each bowl • 1 pen • 1 small piece of plastic wrap • ruler <p><i>Lessons 14 and 15: Photosynthesis</i> no materials</p>	<p><i>Lessons 16 and 17: Onion Root Tip Lab</i> no materials</p> <p><i>Lessons 18-20: CER</i> no materials</p>	<p><i>Lessons 21-24: Genetic Disorders</i> no materials</p> <p><i>Lesson 25: Sickle Cell Anemia</i> no materials</p>	<p><i>Lessons 26 and 27: Biotechnology Arguments</i> no materials</p> <p><i>Lessons 28–30: No Lab</i></p>

Course Overview

This course is made up of six units of five lessons each. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit begins by broadly discussing the particular unit's topic as well as briefly presenting the project (or lab) for that unit. Lessons begin with a list of learning objectives that describe the concepts you should understand by the end of that lesson. **These concepts are tested.** Following the introduction is a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted if necessary.

A typical lesson will have the following activities. Note that the Checkpoint occurs in the first four lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

- **What Should I Know?** — This acts as a study guide that hones in on the lesson's key concepts.
 - **Science Journal** — This is a graded activity that allows you to interact and communicate with your classmates and teacher. It either reviews key concepts you've already learned or requires you to apply what you know.
 - **Lesson Activities** — This can include readings, interactive activities, practice and enrichment activities, visual concepts and videos, and so on. Some activities have graded workbook questions, and some do not. Further explanation of a few of these activities is provided below.
 - **Visual Concepts/Videos** — These are graded activities that cover complex topics from your content readings in more depth. They can range from short animations to longer videos. After you view the animation/video, you answer a series of workbook questions that help you determine how well you understand the concepts that were covered.
 - **Practice** — This activity checks your understanding of the concepts from your content readings. It is not graded, but you have the opportunity to check your work.
 - **Enrichment** — This activity covers concepts from your content readings in more depth. It is not graded, but you have the opportunity to check your work.
 - **Project** — This is a graded activity that allows you to practice investigating, experimenting, and researching.
 - **Discussion Board** — This is a graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore the lesson's topics in more depth and may require research.
 - **Vocabulary Review** — This activity helps you prepare for the Checkpoint and Unit Exam by reviewing vocabulary from the lesson.
-

- **Checkpoint** — This graded activity contains 10 questions that assess what you learned over the lesson. It can be taken up to three times.
- **Unit Exam** — This graded activity contains 25 to 30 questions that assess what you learned over the unit. It can be taken only once.
- **What Did I Learn?** — This activity reviews the information you learned in each lesson.

Schedule of Work

Course Syllabus

Kasza, Dawid/Photos.com

Course Description

Biology B focuses on examining the bigger picture of life. The course begins by exploring early Earth, the basics of biochemistry, the origin of cells, and the evolution of species. The course then moves into a presentation of how different organisms are grouped and identified. In this presentation, the major groups of organisms are identified and described, and you examine one organism group in more detail as you explore the human body systems. Finally, you learn about ecology and human interaction with the environment. Throughout the course, you explore the historical perspectives and modern social implications of the course topics.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations and research in biology are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in biology to better understand the evolution of life, how organisms are classified, the similarities and differences between different groups of living organisms, how and why the human body systems work together, and the manner in which living organisms interact with each other and their environment.

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

Unit 1: Evolution	Unit 2: Classification and Microbiology	Unit 3: Plants and Animals	Unit 4: The Human Body	Unit 5: Ecology	Unit 6: Ecology and Review

Course Overview

This course is made up of six units of five lessons each. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit begins by broadly discussing the particular unit's topic as well as briefly presenting the project (or lab) for that unit. Lessons begin with a list of learning objectives that describe the concepts you should understand by the end of that lesson. **These concepts are tested.** Following the introduction is a set of activities organized in a particular pattern. Most lessons follow the same organization, but some lessons deviate from the pattern as necessary. For example, some lessons do not have projects, and other lessons are designed for review rather than presentation of new concepts. This structuring ensures that you are provided with only the information you need to know.

A typical lesson has the following organization:

- **What Should I Know?** — This acts as a study guide that hones in on the lesson's key concepts.
- **Science Journal** — This either reviews key concepts already learned or requires application of knowledge. It is a graded activity that is submitted with the project at the end of the unit.
- **Lesson Activities** — This could include readings, practice activities, interactive activities, etc. Some of these have graded workbook questions, and some do not.
- **Project** — This is a graded activity that allows you to practice investigating, experimenting, and researching. This may or may not be directly related to a lesson, and it may or may not span the entire unit.
- **Discussion Board** — This is a graded activity that allows you to interact and communicate with your classmates and teacher about lesson topics.
- **Vocabulary Review** — This activity helps you prepare for the Checkpoint and Unit Exam by reviewing vocabulary from the lesson.
- **Checkpoint** — This graded activity contains 10 questions that assess what you have learned over the lesson. It can be taken up to three times.
- **Unit Exam** — This graded activity contains 30 questions that assess what you have learned over the unit. It can be taken only once.
- **What Did I Learn?** — This activity reviews the information you learned and introduces the next lesson.

Schedule of Work

Course Syllabus

Gino Santa Maria/Shutterstock

Course Description

Chemistry A covers the basic principles and properties of matter. Students discover how chemistry has evolved, learn about chemical lab equipment, techniques, and safety, and explore the proper way to make measurements to reduce error and uncertainty. Students also explore atomic structure, periodic laws, types of bonding, chemical reactions, and stoichiometry.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations and research in chemistry are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in chemistry to better understand the history and branches of chemistry, the basics of matter and atoms, how the elements are organized, how and why chemicals react to form new substances, the calculations and purposes of stoichiometry, and how chemistry impacts individuals and society.

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

Unit 1: Methods and Matter	Unit 2: Atoms, Electrons, and the Periodic Table	Unit 3: Bonding	Unit 4: Chemical Nomenclature and Reactions	Unit 5: Stoichiometry	Unit 6: Chemistry Connections and Review
<p><i>Lesson 1: No Project</i></p> <p><i>Lessons 2-5: Separating Salt Water</i></p> <ul style="list-style-type: none"> • salt • bowl or pitcher • tablespoon • water • ceramic or glass container* <i>*should be able to tolerate boiling temperatures (like a canning jar or coffee mug)</i> <i>*height should be less than the pot's height</i> <i>*diameter should be slightly smaller than the pot</i> • pot with its lid** <i>**should be tall enough for the container to fit inside of it with the pot's lid forming a secure seal</i> • stovetop 	<p><i>Lesson 6-8: Rare Earth Metals</i></p> <ul style="list-style-type: none"> • presentation software <p><i>Lesson 8-10: CER</i> no materials</p>	<p><i>Lesson 11: No Project</i></p> <p><i>Lesson 12-15: Identifying Bond Type</i></p> <ul style="list-style-type: none"> • 5 mL (or 1 tsp) butter • 5 mL (or 1 tsp) table salt • 5 mL (or 1 tsp) sugar • 5 mL (or 1 tsp) baking soda • 6 cm² (or 4 in²) aluminum foil • frying pan* <i>*pan with a large nonstick surface (such as one that is hard anodized or has ceramic coating) will be easier to clean and is preferred over other types of pans</i> • stove or heating surface 	<p><i>Lesson 16: No Project</i></p> <p><i>Lesson 17-20: Reaction Types</i> no materials</p>	<p><i>Lesson 21: No Project</i></p> <p><i>Lesson 22-25: Limiting Reactants</i></p> <ul style="list-style-type: none"> • 6 empty short plastic water bottles • 6 small round balloons that can fit over the openings of the water bottles • 300 mL of household vinegar • a small container of baking soda • a ruler • a piece of string that is 30 cm long • a marker • measuring spoons and a measuring cup • funnel* 	<p><i>Lessons 26-29: Chemistry Applications and Review</i> no materials</p> <p><i>Lesson 30: No Project</i></p>

Unit 1: Methods and Matter	Unit 2: Atoms, Electrons, and the Periodic Table	Unit 3: Bonding	Unit 4: Chemical Nomenclature and Reactions	Unit 5: Stoichiometry	Unit 6: Chemistry Connections and Review
<ul style="list-style-type: none"> • oven mitts (or potholders) • tongs lined with rubber*** <i>***should have a wide enough grip to fit around the container</i> • fork • spoon • plate • dish soap • 2 clear bottles with lids 		<ul style="list-style-type: none"> • 5 clear glasses • 600 mL (or about 2 1/2 cups) distilled water • measuring spoons • measuring cup • 5 stirring spoons • scissors • timer** <i>**cell phones with a timer can be used</i> • flashlight*** <i>***cell phones with a flashlight can be used</i> • plastic wrap • kitchen towel or paper towels • note paper • hammer (or another heavy object) 		<p><i>*if you do not have a funnel, a simple one can be made by cutting the top conical portion off of a water bottle (with an adult's help), inverting it, and taking the cap off</i></p>	

Course Overview

This course is made up of six units of five lessons each. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit begins by broadly discussing the particular unit's topic as well as briefly presenting the project (or lab) for that unit. Lessons begin with a list of learning objectives that describe the concepts you should understand by the end of that lesson. **These concepts are tested.** Following the introduction is a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted if necessary.

A typical lesson will have the following activities. Note that the Checkpoint occurs in the first four lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

- **What Should I Know?** — This acts as a study guide that hones in on the lesson's key concepts.
- **Science Journal** — This is a graded activity that allows you to communicate with your teacher. It either reviews key concepts you've already learned or requires you to apply what you know.
- **Lesson Activities** — This can include readings with practice questions, interactive and enrichment activities, visual concepts and videos, and so on. Some activities have graded workbook questions, and some do not. Further explanation of a few of these activities is provided below.
- **Visual Concepts/Videos** — These are activities that cover complex topics from your content readings in more depth. They can range from short animations to longer videos.
- **Enrichment** — This activity covers concepts from your content readings in more depth. It provides an opportunity for you to enhance your understanding of these concepts.
- **Project** — This is a graded activity that allows you to practice investigating, experimenting, and researching.
- **Discussion Board** — This is a graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore the lesson's topics in more depth and may require research.
- **Vocabulary Review** — This activity helps you prepare for the Checkpoint and Unit Exam by reviewing vocabulary from the lesson.
- **Checkpoint** — This graded activity contains 10 questions that assess what you learned over the lesson.
- **Unit Exam** — This graded activity contains 25 to 30 questions that assess what you learned over the unit.
- **What Did I Learn?** — This activity reviews the information you learned in each lesson.

Course Syllabus

Alexandre Dotta / Photo Researchers / Science Source

Course Description

Chemistry B focuses on the energy involved in chemistry and the uses for several types of chemical reactions. Students begin by refreshing and deepening their understanding of the basics of matter and their relation to energy. Next, students explore the properties of solutions, including acids, bases, and their reactions. Then, students dive into thermodynamics, electrochemistry, organic chemistry, and finally nuclear chemistry. In this course, students develop a solid understanding of several universal scientific principles and learn to manipulate the applications of chemistry in real-world settings.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations in chemistry are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in chemistry to better understand the nature of chemical bonds, intermolecular forces, solutions, concentration, redox reactions, electrochemistry, organic chemicals, and nuclear reactions.

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of the course's labs/projects (by unit) and the materials you are responsible for having.

Course Syllabus

Jag_cz/iStock

Course Description

Physical Science A provides an introduction to the world of chemistry. The course begins by providing an introduction to science as a whole and the basic methods and tools that scientists use to produce meaningful results. Students then explore the structure and properties of matter and how it changes in response to energy. Next, students practice reading and interpreting the information on the periodic table as well as chemical names, formulas, equations, and models. Students also discover the types and the properties of reactions, mixtures, solutions, acids, and bases. Finally, students examine both the scientific principles and the human applications of nuclear reactions. Throughout the course, students explore the historical perspectives and modern social implications of the course topics.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations and research in chemistry are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in chemistry to better understand the nature of science, the basics of matter, how the elements are organized, how and why chemicals react to form new substances, the properties of mixtures, solutions, acids, and bases, and how nuclear technology has impacted society.

Course Description

Physical Science B provides an introduction to the world of physics. The course starts out by building a foundation of what it means to be scientific by describing the ways scientists think, communicate, and do their jobs. Next, students cover important aspects of motion and force, including the motion of fluids and how motion relates to Newton's laws. Building up from these fundamentals, students then explore the topics of thermodynamics, energy, work, and machines. The nature and properties of waves are covered next, and then the course ends by examining electricity and magnetism. Throughout the course, students parallel their investigation into the scientific method with a course project that introduces them to the field and processes of engineering.

Course Objectives

- Apply scientific processes to conduct investigations.
- Use logical thinking to identify relationships and draw conclusions.
- Examine how investigations in physics are important to gaining historical perspective and understanding the societal value of scientific advances.
- Evaluate topics in physics to better understand motion, force, work, energy, the structure and behavior of waves, and electromagnetism.

Labs/Projects & Required Materials

Certain labs/projects require the use of outside materials. The following is a list of course's labs/projects (by unit) and the materials students will be responsible for having.

Unit 1: Scientific Thinking and Motion	Unit 2: Force	Unit 3: Energy	Unit 4: Waves	Unit 5: Electricity	Unit 6: Connections and Review
<p><i>Lessons 2–5:</i> <i>Speed Lab</i></p> <ul style="list-style-type: none"> • 3 balls of different size and weight, or 3 toy cars of different size and weight • a ramp at least 2 m long • a stopwatch or other digital timer* <i>*an online stopwatch may be used</i> • a ruler • a pencil or marker <p><i>Lesson 5:</i> <i>Course Project:</i> no materials</p>	<p><i>Lessons 6–8:</i> <i>Parachutes and Force</i></p> <ul style="list-style-type: none"> • 5 or 6 hard-boiled eggs • 1 large plastic garbage bag • 7 m of regular string • tape or hole punch • scissors • something to hold the eggs* <i>*e.g., a small plastic sandwich bag</i> <p><i>Lessons 9–10:</i> <i>Cartesian Diver</i></p> <ul style="list-style-type: none"> • 3 plastic soda straws* <i>*bendable types are best</i> • 3 paperclips • a 2 L soda bottle with a lid • modeling clay* <i>*small amount, about the size of an egg</i> • scissors <p><i>Lesson 10:</i> <i>Course Project:</i> no materials</p>	<p><i>Lessons 11–15:</i> <i>Energy and the Trebuchet</i></p> <ul style="list-style-type: none"> • 36 chopsticks • 3 large marshmallows • 3 counterweights with different masses* <i>*can be made of US coins</i> • 2 paper clips • 1 small (32 oz), round container with a lid • 1 short, hollow tube wide enough to accommodate a chopstick* <i>*The plastic cap off a pen or marker can be modified to work by cutting off the end.</i> • a few feet of thread • duct tape • scissors • a ruler or a tape measure <p><i>Lesson 15:</i> <i>Course Project:</i> no materials</p>	<p><i>Lesson 17–20:</i> <i>Understanding the Light Spectrum</i></p> <ul style="list-style-type: none"> • 1 empty cereal box • 1 CD* <i>*preferably an old one that is no longer in use</i> • 2 small pieces of aluminum foil* <i>*2 in x 2 in</i> • scissors • tape <p><i>Lesson 20:</i> <i>Course Project:</i> materials will vary</p>	<p><i>Lesson 22–25:</i> <i>Model Electromagnet</i></p> <ul style="list-style-type: none"> • 2 batteries • 1 large iron nail or bolt • 6 small paper clips • insulated copper wire • tape • means of removing wire insulation* <i>* may include a knife, a razor, sandpaper, or other instrument</i> <p><i>Lesson 25:</i> <i>Course Project:</i> materials will vary</p>	<p><i>Lesson 26-27:</i> <i>Course Project:</i> <i>Redesigning the Spectroscope</i> materials will vary</p> <p><i>Lesson 28:</i> <i>Units 1-3 Review</i> no materials</p> <p><i>Lesson 29:</i> <i>Units 4 and 5 Review</i> no materials</p> <p><i>Lesson 30:</i> <i>no lab/project</i></p>

Course Overview

This course is made up of six units of five lessons each. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, others are graded by the teacher, and additional activities are available but not graded. Contact your teacher for further information about course guidelines and grading policies.

Course Organization

Each unit begins by broadly discussing the particular unit's topic as well as briefly presenting the project (or lab) for that unit. Lessons begin with a list of learning objectives that describe the concepts you should understand by the end of that lesson. **These concepts are tested.** Following the introduction is a set of activities organized in a particular pattern. Most of the lessons will have the same format, but some activities will vary or be omitted if necessary.

A typical lesson will have the following activities. Note that the Checkpoint occurs in the first four lessons of a unit, while the Unit Exam occurs in the last lesson of a unit.

- **What Should I Know?** — This acts as a study guide that hones in on the lesson's key concepts.
- **Science Journal** — This is a graded activity that allows you to communicate with your teacher. It either reviews key concepts you've already learned or requires you to apply what you know.
- **Lesson Activities** — This can include readings with practice questions, interactive and enrichment activities, visual concepts and videos, and so on. Some activities have graded workbook questions, and some do not. Further explanation of a few of these activities is provided below.
- **Visual Concepts/Videos** — These are activities that cover complex topics from your content readings in more depth. They can range from short animations to longer videos.
- **Enrichment** — This activity covers concepts from your content readings in more depth. It is not graded, but you have the opportunity to check your work.
- **Project** — This is a graded activity that allows you to practice investigating, experimenting, and researching.
- **Discussion Board** — This is a graded activity that gives you a chance to interact and communicate with your classmates and teacher. It allows you to explore the lesson's topics in more depth and may require research.
- **Vocabulary Review** — This activity helps you prepare for the Checkpoint and Unit Exam by reviewing vocabulary from the lesson.
- **Checkpoint** — This graded activity contains 10 questions that assess what you learned over the lesson. It can be taken up to three times.
- **Unit Exam** — This graded activity contains 25 to 30 questions that assess what you learned over the unit. It can be taken only once.
- **What Did I Learn?** — This activity reviews the information you learned in each lesson.

Schedule of Work

Unit 1: Scientific Thinking and Motion	Unit 2: Force	Unit 3: Energy	Unit 4: Waves	Unit 5: Electricity	Unit 6: Connections and Review
<ul style="list-style-type: none"> • Scientific Thinking • Models in Science • Communication in Science • Ethics of Science • How to Write a Lab Report • Motion • Speed and Velocity • Graphing Motion • Acceleration • Graphing Acceleration • Review: Scientific Thinking and Communication • Review: Motion and Graphing Motion • Review: Acceleration and Graphing Acceleration 	<ul style="list-style-type: none"> • Forces • Modeling Forces • Newton’s First Law of Motion • Newton’s Second Law of Motion • Newton’s Third Law of Motion • Pressure • Dynamics of Pressure • Buoyancy • Review: Forces and Newton’s Laws • Review: Forces in Fluids 	<ul style="list-style-type: none"> • Types of Energy • Energy on the Microscopic Level • Energy Systems and Conservation of Energy • Temperature and Heat • Thermal Energy and Thermal Equilibrium • Heat Transfer • Energy Transformations • Work and Power • Simple Machines and Mechanical Advantage • Review: Energy • Review: Energy Transformation • Review: Work, Power, and Machines 	<ul style="list-style-type: none"> • Characteristics of Waves • Behavior of Waves • Properties of Sound • Behavior of Sound • Light • Behavior of Light • Reflection and Mirrors • Refraction and Lenses • Enrichment: Doppler Effect • Review: Waves • Review: Sound and Light • Review: Optics 	<ul style="list-style-type: none"> • Electric Charges • Electric Forces • Currents and Circuits • Types of Circuits • Magnetism • Earth’s Magnetic Field • Electromagnetism • Generating Electricity • Review: Currents and Circuits • Review: Magnetism 	<ul style="list-style-type: none"> • Review: Motion and Graphing Motion • Review: Acceleration and Graphing Acceleration • Review: Forces and Newton’s Laws • Review: Forces in Fluids • Review: Energy • Review: Energy Transformation • Review: Work, Power, and Machines • Review: Waves • Review: Sound and Light • Review: Optics • Review: Currents and Circuits • Review: Magnetism

**APPENDIX A
CURRICULUM**

D.5 Syllabi

It includes the syllabi for the Virtual Preparatory Academy of Pennsylvania curriculum in the following subject areas:

- a. English Language Arts K-12
- b. Mathematics K-12
- c. Science K-12
- d. Social Studies K-12
- e. General Electives K-12
- f. Health and Physical Education
- f. World Languages

Social Studies

K-12

Kindergarten Social Studies A Syllabus

Course Description:

The Kindergarten Social Studies curriculum is meant to get students thinking about themselves and how they relate to those around them. They will learn to identify their own characteristics as well as relating their emotions. They will also learn about some key figures in history, learn about maps, the globe, and the calendar.

Materials:

- Yarn up to 5 feet long
- 1 letter-sized envelope
- Sky blue and green construction paper
- Crayons
- Markers
- Scissors
- Some yarn
- A hole punch
- Styrofoam or paper cup
- A lump of play dough or other clay
- Glue stick
- A shoebox or other box for a chest
- Decorations for the box
- Paper to write stories
- Photos of keepsakes and memories
- "The Relatives Came" by Cynthia Rylant
- 12 large pieces of paper (legal size is best)
- Ruler
- Hole puncher
- 3 pieces of yarn or ribbon
- Your Calendar
- Piece of fruit to eat tomorrow
- "Unlovable", by Dan Yaccarino
- "Crazy Hair Day", by Barney Saltzberg
- "The Zax", By Dr. Seuss (optional)

Module	Lesson Title	Objectives
1	About Me	<ul style="list-style-type: none"> • Identify physical traits. • Depict a self image.
	Rules, Rules, Rules!	<ul style="list-style-type: none"> • Identify responsibilities at school. • Identify and explain behaviors for responsible classroom citizens. • Explain the purpose and need for rules.
	My Family	<ul style="list-style-type: none"> • Design a simple family tree. • Identify different roles in your family.
	Calendar Time	<ul style="list-style-type: none"> • Develop a calendar to begin work with concepts of past, present, and future

Kindergarten Social Studies A Syllabus

Module	Lesson Title	Objectives
2	Past, Present and Future	<ul style="list-style-type: none"> Distinguish between past, present, and future as you continue to work with your calendar. Use the following terms: "yesterday", "today", "tomorrow".
	Let's Fix It	<ul style="list-style-type: none"> Identify a problem. Discuss possible solution.
3	Pocahontas: An American Heroine	<ul style="list-style-type: none"> Read along and listen to a folktale of Pocahontas; an American heroine. Explore aspects of her life, her personality, and her contributions to our world. Develop a timeline to connect you with history.
	Clara Barton	<ul style="list-style-type: none"> Explore the life of Clara Barton. Work with the daily calendar and historical time line.
	Christopher Columbus	<ul style="list-style-type: none"> Read along as you listen to a story about Christopher Columbus in a folk tale format. Work with your historical time line and learn about events that occur the story. Deepen your sense of yourself as part of an historical continuum.
4	Abraham Lincoln	<ul style="list-style-type: none"> Explore another historic American figure through the folklore format. Continue work with historical time line.
	George Washington	<ul style="list-style-type: none"> Explore American history with a tale from the early life of George Washington. Work with the daily calendar and the historical time line.
	Johnny Appleseed	<ul style="list-style-type: none"> Explore historic American figure Johnny Appleseed through the folklore format.
5	Make a Difference	<ul style="list-style-type: none"> Define and give examples of volunteers. Relate the concepts of responsibility for the common good and volunteering. Choose and carry out 4 things to do to help at home.
	Everyday Heroes	<ul style="list-style-type: none"> Define everyday hero. Identify the role of fire fighter, police officer, and emergency workers.
	The Perfect Pet	<ul style="list-style-type: none"> Identify and illustrate the economic wants of pets and their owners.
6	What Makes Me Mad?	<ul style="list-style-type: none"> Identify what makes you mad. Express anger in a healthy way.

Kindergarten Social Studies A Syllabus

Module	Lesson Title	Objectives
	That's Not Fair	<ul style="list-style-type: none">• Describe scarcity as it relates to limited numbers of goods used in classroom activities.• Identify choices and the costs of choosing one item over another.• Describe the difficulty in distributing goods or services to satisfy all wants.
	How Do You Resolve Conflict?	<ul style="list-style-type: none">• Identify conflict in the classroom.• Demonstrate an understanding of conflict and cooperation.• Identify how students can work together.
	What Is the Boss?	<ul style="list-style-type: none">• Identify and describe who the leaders of your home and school are.• Identify and describe who the leaders of your home and school are.• Identify the forms of government and rules that go with that government.• Identify the current leader in each form of government.

Kindergarten Social Studies B Syllabus

Course Description:

The Kindergarten Social Studies curriculum is meant to get students thinking about themselves and how they relate to those around them. They will learn to identify their own characteristics as well as relating their emotions. They will also learn about some key figures in history, learn about maps, the globe, and the calendar.

Materials:

- Yarn up to 5 feet long
- 1 letter-sized envelope
- Sky blue and green construction paper
- Crayons
- Markers
- Scissors
- Some yarn
- A hole punch
- Styrofoam or paper cup
- A lump of play dough or other clay
- Glue stick
- A shoebox or other box for a chest
- Decorations for the box
- Paper to write stories
- Photos of keepsakes and memories
- "The Relatives Came" by Cynthia Rylant

- 3 pieces of yarn or ribbon
- Your Calendar
- Piece of fruit to eat tomorrow
- "Unlovable", by Dan Yaccarino
- "Crazy Hair Day", by Barney Saltzberg
- "The Zax", By Dr. Seuss (optional)

Module	Lesson Title	Objectives
7	Relative Location	<ul style="list-style-type: none"> • Draw a directional map symbol. • Determine the four directions: North, South, East and West. • Determine relative location such as near, close, far, next to, away from, above, below, top and bottom.
	Make a Room Map	<ul style="list-style-type: none"> • Create a map of a bedroom. • Accurately depict the placement of furniture and objects in the room. • Create a 3D diorama of the bedroom.
	Map of Home and School	<ul style="list-style-type: none"> • Read a map key. • Create a map of home.

Kindergarten Social Studies B Syllabus

Module	Lesson Title	Objectives
		<ul style="list-style-type: none"> Become familiar with a map of school.
	My Neighborhood	<ul style="list-style-type: none"> Create a map of the neighborhood. Provide accurate directions from home to a neighbor's home
8	My States	<ul style="list-style-type: none"> Draw a simple outline of their home state. Indicate their home town within the state
	The U.S. Map	<ul style="list-style-type: none"> Draw a simple map of the United States. Locate their home state on the US map.
	A World Globe	<ul style="list-style-type: none"> Discuss the differences in climate in various parts of the world compared to their own. Compare the amount of land and water on different parts of the globe. Compare hot and cold climates on different parts of the globe. Locate on a globe where they live.
	Impact of Location	<ul style="list-style-type: none"> Describe how location, climate and physical surroundings affect the way people live, including clothing and shelter.
9	U.S. Symbols	<ul style="list-style-type: none"> Identify National symbols such as the bald eagle and the Statue of Liberty. Identify the United States flag and describe its history.
	Family Traditions	<ul style="list-style-type: none"> Recognize traditions within the family. Create and read a family schedule.
	School Rituals and Symbols	<ul style="list-style-type: none"> Create and read a daily schedule. Recite the pledge of allegiance.
10	American Holidays	<ul style="list-style-type: none"> Describe U.S. holidays and where they came from.
	American Traditions	<ul style="list-style-type: none"> Describe the American flag and its history and tradition. Sing along with the National Anthem.

Kindergarten Social Studies B Syllabus

Module	Lesson Title	Objectives
	World Celebrations	<ul style="list-style-type: none"> Describe the traditions behind the US National holidays. Identify various holidays around the world. Explain how these holidays are celebrated.
11	Currency	Identify currency and name their values. <ul style="list-style-type: none"> Explain how currency is used.
	Wants and Needs	<ul style="list-style-type: none"> Identify goods and services. Identify consumers and producers.
	Buying Locally	<ul style="list-style-type: none"> Identify local goods. Identify local businesses.
12	Advertising	<ul style="list-style-type: none"> Identify advertisements. Create an advertisement to encourage purchasing a local good or service.
	Fact or Fiction	<ul style="list-style-type: none"> Define fact and opinion. Distinguish between fact and opinion in newspaper and magazine articles.
	Close to Home	<ul style="list-style-type: none"> Examine local documents, artifacts and places. Examine state documents, artifacts and places.

1st Grade Social Studies A Syllabus

M.L.	Lesson Topic	Standards
1.1	Introduction	
1.2	Cardinal Directions	The learner will: • Describe the purpose of a compass rose. • Identify cardinal directions. • Locate Pennsylvania on a map of the United States in relation to its surrounding states . • Know there are seven continents and four oceans . • Know their continent, country, state, town, and address . • Identify and interpret the features of a map
2.1	Make a Room Map	
2.2	Make a Map of Your House	
3.1	Make a Neighborhood Map	
3.2	Examine State Map	
4.1	Examine U.S. Map	The learner will: • Identify a map and globe and describe purpose . • Identify and interpret the key for map/ globe . • Compare and contrast a map and a globe. • Know that landforms and bodies of water are represented differently on geographic tools . • Use geographic terms to describe and find places . The learner will: • Describe the purpose of a compass rose. • Identify cardinal directions. • Locate Pennsylvania on a map of the United States in relation to its surrounding states . • Know there are seven continents and four oceans . • Know their continent, country, state, town, and address . • Identify and interpret the features of a map .
4.2	Examine a World Globe	The learner will: • Identify a map and globe and describe purpose . • Identify and interpret the key for map/ globe . • Compare and contrast a map and a globe. • Know that landforms and bodies of water are represented differently on geographic tools . • Use geographic terms to describe and find places .
5.1	Impact of Location	The learner will: • Explain why various areas of the community are located where they are . • Describe how weather effects the local community .
5.2	Manmade Vs. Natural	The learner will: • Differentiate between natural and manmade physical characteristics . (e .g ., natural—forests, mountains, rivers, oceans; man-made—buildings, roads, bridges) • Sort pictures by man-made and natural origin .
6.1	Climate and Weather	7.3 1.A Identify the local climate and how it determines the way people live. The learner will: • Identify activities that occur during each season . Identify what is given up/gained during a season . (e .g ., no swimming in winter but sledding) Compare and contrast types of activities occurring in different seasons . • Explain why certain activities can only take place during a certain season . • Explain how the climate/weather in the community impacts their interactions with others .
6.2	Lakes, Rivers, and Streams	The learner will: • Identify ways that people use lakes, rivers, and streams . • Identify ways that lakes, rivers, and streams affect how people live . • Identify various areas in the community as places where people live, work, and play because of the physical features . • Draw a picture of a positive and negative effect of rivers, lakes, and streams
7.1	Personal Responsibility	• Refer to written, posted rules as part of community interactions . • Contribute to making the classroom rules . The learner will: • Contribute to a positive learning environment through action . • Demonstrate ability to keep own belongings in order . • Complete jobs and responsibilities in the classroom with independence . • Respect others' personal belongings. • Identify classroom and community responsibilities .
7.2	Consequences and Responsibility	The learner will: • Contribute to creating classroom rules and consequences . • Demonstrate respect for the rules. (e.g., positive behavior)
8.1	Characteristics of Truthfulness	The learner will: • Consistently demonstrate actions within the rules of the classroom and school community in creating a positive learning environment . • Identify behaviors that are considered to demonstrate responsibility . (e .g ., respect peers, contribute to the good of the whole, sets goals and achieves them)
8.2	Helping and Respecting Others	The learner will: • Demonstrate knowledge of the rules in all areas of the classroom and school community . • Accept consequences for non-adherence to the posted rules .
9.1	Compassion for Others	The learner will: • Identify similarities between self and others . • Engage in positive interactions with peers . • Brainstorm ways to treat everyone equally .
9.2	My Family	5.2 1.A Identify and explain the importance of responsibilities at school and at home. The learner will: • Demonstrate appropriate actions that support classroom responsibility . • Demonstrate appropriate actions for learning .

1st Grade Social Studies A Syllabus

M.L.	Lesson Topic	Standards
10.1	Understanding Diversity	The learner will: • Identify similarities between self and others . • Engage in positive interactions with peers . • Brainstorm ways to treat everyone equally .
10.2	Community Review	
11.1	Conflict and Problems	The learner will: • Identify appropriate behavior. (e.g., in and outside of classroom) • Identify consequences for inappropriate behavior . • Demonstrate the knowledge of how classroom rules and expectations contribute to a positive learning environment . • Describe the acceptable behavior of a member of the classroom in structured and unstructured situations . The learner will: • Identify potential problems or conflicts in everyday events . • Explain how different reactions can affect conflict outcomes . • Practice avoiding conflict throughout the day . The learner will: • Identify what conflict in the classroom looks like . (e .g ., not working with peers) • Brainstorm potential classroom conflicts. The learner will: • Practice identifying a problem or dilemma within the school day . (e .g ., not enough chocolate milk at lunch) • Discuss the problem or dilemma. • Identify how we know there is a dilemma or problem during an event .
11.2	Cooperation and Compromise	The learner will: • Engage with other classrooms to complete a project . • Work cooperatively with other children to achieve a common goal . • Understand individual role in classroom collaboration . (e .g ., part of a team) • Brainstorm ways that classrooms can collaborate . The learner will: • Practice making compromises with adult support . • Participate in classroom experiences that involve compromise . • Role-play reaching compromise with peers . • Participate in group decision-making and consensus building . • Work cooperatively with other children to achieve an outcome . • Demonstrate acceptance of final consensus. Identify what cooperation in the classroom looks like . (e .g ., talking with each other, working together, accomplishing a task)
12.1	Leadership and Authority	The learner will: • Demonstrate actions which assist others when needed . • Interact positively with peers. • Demonstrate acceptance of others' leadership roles . • Brainstorm activities that involve leadership and service . (e .g ., classroom, school, community) The learner will: • Participate in classroom responsibilities. • Demonstrate leadership skills in the classroom . (e .g ., help a peer)
12.2	Community Helpers	The learner will: • Identify and discuss the role of a firefighter . • Identify and discuss the role of a police officer . • Identify and discuss the role of other government workers . (e .g ., librarian, EMT) The learner will: • Identify safety services in local community . (e .g ., police, fire station, garbage collection) • Identify health services in local community . (e .g ., hospitals, doctor's office) The learner will: • Identify work performed by community helpers . (e .g ., police officers fight crime, firefighters put out fires) • Role-play work performed by community helpers . The learner will: • Identify groups of people who contribute to the interactions of daily life in the community . (e .g ., Rotary, Kiwanis) • Participate in discussions on how these groups affect the community . (e .g ., service, volunteer) • Identify groups or individuals that support a community over time .
13.1	Voting and Democracy	The learner will: • Participate in discussions on elected officials . (e .g ., how they get elected, roles, responsibilities to the people) • Participate in a voting activity. • Participate in compiling voting results. The learner will: • Understand a vote as a choice that is counted . • Understand voting as a right. • Participate in classroom voting experiences . • Participate in compiling voting results.
13.2	Government and Taxes	The learner will: • Participate in discussions on taxation. • Identify services provided by local government and if the services are paid or volunteer services . • Explain taxes pay for the services provided .
14.1	US Symbols, Landmarks, and More	The learner will: • Identify monuments/artifacts/ landmarks associated with the group, individual, or event being celebrated/ honored in the classroom and the school community . • Understand the United States has patriotic symbols and traditions . • Brainstorm why landmarks are important . • Participate in discussions on American landmarks and their significance
14.2	State Symbols, Landmarks, and More	The learner will: • Research and identify the state motto. • Research and identify symbols and slogans that are common in Pennsylvania . (e .g ., local, regional) The learner will: • Identify what it means to be a landmark. • Brainstorm why landmarks around the world are important . • Research and identify world landmarks.
15.1	Holidays, Traditions, and Celebrations	The learner will: • Discuss how the local community celebrates . (e .g ., fairs, fireworks) • Compare family customs and traditions. • Depict and present own family culture. (e .g ., drawing, photographs, writing) • Celebrate events or successes in a variety of ways . The learner will: • Identify reasons to celebrate. (e.g., birthday, good grades) • Share how own family celebrates certain events . • Compare and contrast own celebrations to those of peers . • Celebrate events or successes in a variety of ways .

1st Grade Social Studies A Syllabus

M.L.	Lesson Topic	Standards
15.2	World Cultures	The learner will: • Research and identify holidays and ceremonies for a particular culture . • Compare and contrast holidays and ceremonies for two cultures .
16.1	News	The learner will: • Describe what constitutes news. (e.g., current information) • Identify different types of news. (e.g., weather, sports) • Identify how news is heard. (e.g., television, radio, computer) The learner will: • Receive information through a variety of means . (e .g ., spoken, electronic, paper) • State how news is shared. (e.g., television, radio, spoken)
16.2	Technology	
17.1	Looking up History	The learner will: • Identify where to find information about the past . (e .g ., book, computer) • Use books, computers, and other sources to get information about a topic .
17.2	Distinguish Past, Present and Future	The learner will: • Use correct phrases related to time. (e.g.,now, yesterday, tomorrow) Sequence a series of events either from personal experience or from literature . • Participate in daily calendar activities and discuss past, present, and future events . • Develop a timeline of own life (e.g., photographs, drawings, brief descriptions)• Compare children today to those in the past . (e .g . Pilgrim)
18.1	Change over Time	The learner will: • Identify things that change. (e.g., seasons, time) • Research and identify change. (e.g., local, state) • Examine families of the past and compare to families today . • Give examples of change over time.
18.2	Historical America	The learner will: • Participate in discussions on the historical past of the community . (e .g ., industry no longer present) • Brainstorm how the historical past affects the community now . (e .g ., community is smaller)

1st Grade Social Studies B Syllabus

M.L.	Lesson Topic	Standards
19.1	Calendar Time	
19.2	Historical Americans	The learner will: • Participate in discussions on historical Americans . • Research and identify historical Americans.
20.1	Christopher Columbus	The learner will: • Identify images, pictures, songs, poems, or items that are symbols of America . (e .g ., George Washington, Abraham Lincoln, the flag, Liberty Bell, Thanksgiving
20.2	Sea Travels of Christopher Columbus	
21.1	Young Abraham Lincoln	The learner will: • Identify images, pictures, songs, poems, or items that are symbols of America . (e .g ., George Washington, Abraham Lincoln, the flag, Liberty Bell, Thanksgiving
21.2	Abraham Lincoln	The learner will: • Identify images, pictures, songs, poems, or items that are symbols of America . (e .g ., George Washington, Abraham Lincoln, the flag, Liberty Bell, Thanksgiving
22.1	Pocahontas: an American Heroine	The learner will: • Identify images, pictures, songs, poems, or items that are symbols of America . (e .g ., George Washington, Abraham Lincoln, the flag, Liberty Bell, Thanksgiving
22.2	George Washington	The learner will: • Identify images, pictures, songs, poems, or items that are symbols of America . (e .g ., George Washington, Abraham Lincoln, the flag, Liberty Bell, Thanksgiving
23.1	Clara Barton	The learner will: • Identify images, pictures, songs, poems, or items that are symbols of America . (e .g ., George Washington, Abraham Lincoln, the flag, Liberty Bell, Thanksgiving
23.2	Johnny Appleseed	The learner will: • Identify images, pictures, songs, poems, or items that are symbols of America . (e .g ., George Washington, Abraham Lincoln, the flag, Liberty Bell, Thanksgiving
24.1	Community	
24.2	Folklore	
25.1	Native Americans	
25.2	Economics: Native American Systems	
26.1	Economics: Bartering	The learner will: • Participate in discussions on economic systems . • Participate in discussions on the benefits of an economic system . • Identify quantities of goods vary depending on demand and consumption .
26.2	Goods and Services	The learner will: • Identify and define goods. (e.g., classroom or at home) • Identify and define consumers. (e.g., person who purchases goods and services for personal use) • Describe self as a consumer, and identify what goods they consume . The learner will: • Describe goods and services consumed. (e .g ., self or family) • Identify a local business and the good or service they provide .
27.1	Goods and Services Review	The learner will: • Identify and define goods. (e.g., classroom or at home) • Identify and define consumers. (e.g., person who purchases goods and services for personal use) • Describe self as a consumer, and identify what goods they consume . The learner will: • Describe goods and services consumed. (e .g ., self or family) • Identify a local business and the good or service they provide .
27.2	Community Service Providers	The learner will: • Identify different jobs found locally (e.g. grocery store, gas station, hospital) • Identify the goods or services produced in the jobs found locally • Participate in discussions on the roles each of these jobs play in contributing to the community • Identify interest in a local job.
28.1	Role of Work in a Community	
28.2	Goods in the Home	

1st Grade Social Studies B Syllabus

M.L.	Lesson Topic	Standards
29.1	How the Marketplace Works	The learner will: • Identify how money is saved at home. • Provide ideas for ways they can earn a wage by producing a good or service . • Practice saving. (e.g., token system within the classroom) • Describe factors that influence whether or not people save money and how much The learner will: • Participate in buying and selling. (e.g., token system, trade) • Identify characteristics of buying. • Identify characteristics of selling
29.2	Making Choices	
30.1	Wants Vs. Needs	The learner will: • Distinguish between wants and needs in a classroom setting . • Discuss classroom wants and needs. • List classroom wants and needs for a specific learning activity . • Identify how classroom wants might differ . (e .g ., grade, teacher, time of year) The learner will: • Make a choice to meet a need. (e.g., sharpen pencil, use restroom) • Identify choices people make based on need . • Describe how people make choices with the money they earn . (e .g ., save, spend, or share) • Identify what is given up when making a choice . The learner will: • Participate in discussions on how student and teacher preferences influence classroom choice . (e .g ., type of food students like influences snack, teacher liking a certain author influences what books are read) • Make a choice or cast a vote based on preferences .
30.2	Scarcity	The learner will: • Understand that wants cannot be met all the time . • Identify resources that are scarce within the family . (e .g ., time, money, supplies) • Participate in discussions on how limited resources influence a family choice . (e .g ., not having enough money to buy something)
31.1	Advertising	The learner will: • Define an advertisement. • State that advertisements encourage us to purchase goods or services . • Recognize advertisements. (e.g., magazines, TV, in the environment)
31.2	Supply and Demand	The learner will: • Research and discuss new businesses within the local community . • Brainstorm effects of the new business on the community . (e .g ., job creation, availability of goods or services)
32.1	Products	The learner will: • Participate in discussions about products that are made in the United States . • Participate in discussions of products that are made in other countries . • Brainstorm why products made in other countries are found in the United States . The learner will: • Make connections between the needs and wants of buyers and the choices producers make in meeting those needs . • Identify a want or need people have and brainstorm a new invention or service to help meet the need .
32.2	Work and Pay	The learner will: • Describe how people in the community perform specialized services . (e .g ., work done by postal workers is different from bankers) • Compare stores that specialize in selling certain goods . (e .g ., video game store versus department store) The learner will: Make connections between earning and spending money. List reasons people work. Understand that money cannot be spent until it is earned. Describe ways individuals use money that is earned (e.g., buy wants, needs). Brainstorm who earns money. Identify people who are paid wages over time for producing goods and services.
33.1	Money	The learner will: • Identify some coins and paper currency as forms of money . • Discuss how money is exchanged to pay for goods . • Use pretend money or tokens to purchase items . The learner will: • Explain the connection between earning, saving, and spending money . • Identify something purchased through saving money . (e .g ., game, toy)
33.2	Tools to Create	The learner will: • Identify items/tools/materials needed to complete a given task . • Identify strengths when completing a task . • Identify items needed to complete a given task . • Identify character traits that make people likely to be able to complete certain tasks .
34.1	Technology	(A) describe how technology changes the ways families live; (B) describe how technology changes communication, transportation, and recreation; and (C) describe how technology changes the way people work.

1st Grade Social Studies B Syllabus

M.L.	Lesson Topic	Standards
34.2	Critical Thinking with Sources	(A) obtain information about a topic using a variety of valid oral sources such as conversations, interviews, and music; (B) obtain information about a topic using a variety of valid visual sources such as pictures, symbols, electronic media, maps, literature, and artifacts; and (C) sequence and categorize information.
35.1	Problem Solving and Decision Making	(A) use a problem-solving process to identify a problem, gather information, list and consider options, consider advantages and disadvantages, choose and implement a solution, and evaluate the effectiveness of the solution; and (B) use a decision-making process to identify a situation that requires a decision, gather information, generate options, predict outcomes, take action to implement a decision, and reflect on the effectiveness of that decision.
35.2	Oral Presentation of SS Learning	(A) express ideas orally based on knowledge and experiences; and
36.1	Written Presentation of SS Learning	(B) create and interpret visual and written material.
36.2	Visual Presentation of SS Learning	

Social Studies 2 A Syllabus

Course Description:

In second grade, students in this course will begin to explore the basic fundamentals of social studies including culture, geography, and economics. Students will explore the Ancient Cultures of China, Africa, and the Celts. Students will explore these cultures through ancient folk tales and fables. Learners will create a photo book that describes the significant events in their own life. They will also examine the importance of geography and direction. Students will learn how to locate boundaries while using a world map. Students will identify the places that were discussed in the previous lessons including Africa, China, and the British Isles. They will develop a rudimentary understanding of map symbols as they locate continents, the equator, and oceans. Students will also learn to identify on a road map where they live, rivers, mountain ranges and lakes nearby their homes. Learners will follow a step-by-step approach for successfully completing each lesson, which includes storytelling, repetition, projects, arts and crafts, and videos.

Materials needed:

- Colored pencils or crayons
- Globe (which can be viewed in a library)
- 1-2 rolls of plaster of Paris
- Vaseline
- Kleenex
- Old clothes
- Plastic cup or bowl
- Craft scissors
- Hot glue gun
- Paint
- Feathers
- Flowers
- Jewels

Module	Lesson Title	Objectives
1	Ancient Chinese Folklore	<ul style="list-style-type: none"> • Explore historical China. • Read about Chinese festivals.
	Ancient Chinese Culture	<ul style="list-style-type: none"> • Explore ancient Chinese cultures • Read Chinese folk tales • Draw a pictorial representation from a Chinese folk tale • Explain in writing a theme expressed in a Chinese folk tale.

Social Studies 2 A Syllabus

Module	Lesson Title	Objectives
	Ancient Mali Culture in Africa	<ul style="list-style-type: none"> • Study and hear tales of the Ancient Mali Empire in Africa. • Draw a pictorial representation of the African stories.
2	African Culture Through Fables	<ul style="list-style-type: none"> • Discover more about the African civilization through fables. • Draw a pictorial representation of themes in the tale of Anansi and The Firefly. • Develop a personal historical family story.
	Your Family History	<ul style="list-style-type: none"> • Review African culture • Interpret fables • Complete family history story.
	Ancient Celtic Culture	<ul style="list-style-type: none"> • Explore the ancient Celts through stories and legends.
3	Ancient Celtic Traditions	<ul style="list-style-type: none"> • Continue the exploration of Celtic traditions. • Learn the story of Saint Bridget.
	Celtic Folktales	<ul style="list-style-type: none"> • Interpret the Celtic folk tale "Fair Exchange." • Make paper in the Celtic tradition.
	Family Traditions	<ul style="list-style-type: none"> • Categorize family customs, traditions and way of life. • Assemble examples of customs, traditions and way of life in Family History Book.
4	What is Geography?	<ul style="list-style-type: none"> • Identify the four directions on a compass rose. • Model the use of the compass rose. • Interpret the symbols on a map.
	Using Maps to Find Direction	<ul style="list-style-type: none"> • Locate countries on a world map. • Find boundaries between countries.

Social Studies 2 A Syllabus

Module	Lesson Title	Objectives
	The Geography of Africa	<ul style="list-style-type: none"> • Locate Africa on the world map. • Construct a map of Africa. • Explain how people are affected by the regions that they live
5	Environmental Regions	<ul style="list-style-type: none"> • Develop a more rudimentary understanding of map symbols. • Describe how people in different regions adapt to their environments.
	Locating Oceans and Continents	<ul style="list-style-type: none"> • Locate the equator, the seven continents and the five oceans on maps and globes. • Further develop and refine map skills.
	The Geography of the British Isles	<ul style="list-style-type: none"> • Locate the British Isles on a world map.
6	The Movement of the Celtic People	<ul style="list-style-type: none"> • Trace the travels of St. Columcille on a map. • Describe the experiences of St. Columcille on the travels.
	Community Geography	<ul style="list-style-type: none"> • Locate where you live on the world map or globe. • Locate rivers, mountain ranges, and lakes nearby.
	Geography and Your Family Tree	<ul style="list-style-type: none"> • Explore the different ways various ancestors lived. • Describe family origins.

Course Description:

The second semester begins by introducing learners to economics and the role that money plays in every civilization. They will take a closer look at the economy of the Celtic people. Students learn the difference between natural, human, and capital resources. Learners will begin to understand the exchange of money for goods and services. They will gain a basic understanding of what scarcity is and why it is good that we do not always get everything that we want. Students will understand these concepts by drawing upon their understanding of the desires/wishes in their own lives. Students will also learn about desirable human qualities through the use of fables such as “The Boy Who Cried Wolf.” Learners will look at individuals who have made a difference in the greater community. Students will learn about Rosa Parks and Susan B. Anthony through short stories. The end of the course asks learners to examine the diversity of the community they live in. They will be asked to recognize the different types of people around them. Students should gain an appreciation for the differences around them and how having respect for others and being honest will contribute to society as a whole. Learners will follow a step-by-step approach for successfully completing each lesson, which includes storytelling, repetition, projects, arts and crafts, and videos.

Materials needed: Colored pencils or crayons, Globe

Module	Lesson Title	Objectives
1	Economics: Celtic Resources	<ul style="list-style-type: none"> Lesson to study the economy of the Celts.
	Economics: Human Resources	<ul style="list-style-type: none"> Identify and define human resources. Distinguish "human" resources from "natural" resources.
	Economics: Capital Resources	<ul style="list-style-type: none"> Learn about capital resources. Differentiate between natural, human and capital resources.
2	Economics: Human, Capital and Natural Resources	<ul style="list-style-type: none"> Combine the terms of capital, human, and natural resources.

Social Studies 2 B Syllabus

Module	Lesson Title	Objectives
	Economics: Bartering to Exchange	<ul style="list-style-type: none"> • Explain the art of bartering as a means of economic exchange. • Apply the art of bartering as a means of economic exchange.
	Economics: The Role of Money	<ul style="list-style-type: none"> • Compare money exchange and bartering. • Engage in money exchange.
3	Economics: Money for Goods and Services	<ul style="list-style-type: none"> • Exchange of money for goods and services.
	Economics: Limited Resources	<ul style="list-style-type: none"> • Explore the idea of scarcity or limited resources.
	Economics: How the Economy Works	<ul style="list-style-type: none"> • Apply the concept of scarcity to the child's own life.
4	Fables and Culture	<ul style="list-style-type: none"> • Introduce desirable human qualities through the use of fables.
	Aesop's Fables	<ul style="list-style-type: none"> • Read an adaptation from the Aesop's fable "The Fox and the Stork." • Illustrate the moral lesson of the fable read.
	Aesop's Fables II	<ul style="list-style-type: none"> • Read "Mercury and the Woodsman". • Illustrate the lesson learned from the fable read.
5	Folklore and Telling the Truth	<ul style="list-style-type: none"> • Explore the importance of truth-telling over "tall tall tales". • Read an adaptation of Aesop's fable, "The Boy Who Cried Wolf".

Social Studies 2 B Syllabus

Module	Lesson Title	Objectives
	Folklore and Making Choices	<ul style="list-style-type: none"> • Read an adaptation from Aesop's fables, entitled "The Frogs Asking for a King". • Discuss how we choose our leaders.
	Laws and Community Activism	<ul style="list-style-type: none"> • Recognize instances of social injustice. • Identify individuals who have made a difference in the greater community.
6	Laws and Voting Rights	<ul style="list-style-type: none"> • Study the history of women's rights in the United States. • Recognize instances of social injustice. • Identify Susan B. Anthony and her contribution to human rights.
	Contributing to Community	<ul style="list-style-type: none"> • Study various ways people in your community are contributing.
	Communities Around the World	<ul style="list-style-type: none"> • Learn about the diverse nature of the community.

Social Studies 3 A Syllabus

Course Description:

In third grade, social studies students will begin to explore the basic fundamentals of social studies including geography, civics, and economics. Learners will begin by looking at the beginning of civilization and examining the ancient Hebrew civilization, the Phoenicians, and the Kush tribe of ancient Africa. They will then move on to examining the Native American tribes of the Cherokee, Sioux, and Hopi. Students will also look at the first explorers of the Americas and learn about the beginning of the United States. In the first semester students will learn important geographical factors in the ancient civilizations, Native American tribes and in the developing United States. Students will increase their skills by creating maps and looking at the landscapes. They will take a close look at their own personal heritage by mapping their ancestry. Learners will follow a step-by-step approach for successfully completing each lesson, which includes storytelling, repetition, projects, arts and crafts, and videos.

Materials needed:

- Colored pencils or crayons
- Large paper bag
- Scissors
- Tempura paint in various colors
- Clay
- Small paper plate(s)
- Yarn
- Hole puncher
- Watercolor paper
- Watercolor paints (Red, Blue, and Yellow)
- Watercolor brush
- Small clean sponge
- Globe

Module	Lesson Title	Objectives
1	Ancient Hebrew Culture 1	<ul style="list-style-type: none"> • Draw a pictorial representation of an ancient Hebrew story. • Rewrite a summarized version of an ancient Hebrew story. • Recognize the Hebrew alphabet.
	Ancient Hebrew Culture 2	<ul style="list-style-type: none"> • Learn about Ancient Hebrew Culture. • Read the story of Joseph and the Many Colored Coat. • Draw a pictorial representation of the story. • Write a short piece that relates the theme of the story. • Create art projects in the development of a Hebrew Sukkah.

Social Studies 3 A Syllabus

Module	Lesson Title	Objectives
	Ancient Hebrew Culture 3	<ul style="list-style-type: none"> • Read a story about the daily life of a child from an Ancient Hebrew culture. • Draw a thematic pictorial representation of the story. • Practice using the Hebrew alphabet. • Complete building a Sukkah if opted to do this.
2	Ancient Phoenician Culture	<ul style="list-style-type: none"> • Read a story about the daily life of a child from an Ancient Hebrew culture. • Draw a thematic pictorial representation of the story. • Practice using the Hebrew alphabet. • Complete building a Sukkah if opted to do this.
	Kush: Ancient African Culture	<ul style="list-style-type: none"> • Read about a child living in the second capital city of Napata. • Draw a pictorial representation of the story and write a short summary. • Practice writing in the Ancient Kush meriotic script.
	Native Americans: The Cherokee	<ul style="list-style-type: none"> • Read a story from the Cherokee Tribe and learn of its origin. • Make a corn husk doll similar to those that early native American children would play with. • Draw a pictorial representation of the Cherokee story they read. • Write a short summary of the story they read.
3	Native Americans: The Sioux	<ul style="list-style-type: none"> • Read and compare a Sioux legend to previous stories. • Draw a pictorial representation of the theme of the story. • Write a simple summary of the story. • Create a dreamcatcher.
	Native Americans: The Hopi	<ul style="list-style-type: none"> • Explore the Hopi culture through story. • Read and compare a Hopi creation story to other creation stories read. • Interpret the theme of the story in a drawing. • Summarize the story in a short writing piece. • Produce a watercolor painting of "creation."

Social Studies 3 A Syllabus

Module	Lesson Title	Objectives
	North American Exploration and Settlement	<ul style="list-style-type: none"> • Read about the daily life of a child on the American frontier. • Draw a picture representing the theme of the story. • Summarize in writing the story. • Design a scrapbook about their own "folk" ancestry.
4	Finding Locations on Maps	<ul style="list-style-type: none"> • Review the map skills covered in previous years. • Identify various directional cues and legends on world maps and globes. • Draw a compass rose and define in writing the terms associated with geography.
	The Land of the Ancient Hebrews	<ul style="list-style-type: none"> • This week your child will create a map of the land of the Ancient Hebrews from the story they heard in the previous block. • Your child will create a line that indicates the path Joseph took from Canaan to Egypt.
	Mapping Ancient Phoenicia	<ul style="list-style-type: none"> • Trace on a map the travels of Elissa, Queen of Carthage. • Develop a legend for a map.
5	Mapping Ancient Africa	<ul style="list-style-type: none"> • Create a map of the Ancient African Kush civilization. • Indicate the travels of a child from the capitol city of Napata to Pharaoh's Egypt on the Nile River.
	The United States Landscape	<ul style="list-style-type: none"> • Explore the landscape of the United States. • Compare Native American tribes; Cherokee, Sioux and Hopi. • Create an outline map of the United States to identify tribal areas.
	Native Americans: Mapping Their Land	<ul style="list-style-type: none"> • Identify the locations of the Cherokee, Sioux and Hopi Native American tribes on their map of the United States. • Build an artistic representation of a means of housing of one of the three tribes. • Describe in writing how the tribe adapted to and/or changed their environment to meet their needs.
6	Life on the U.S. Frontier	<ul style="list-style-type: none"> • Illustrate the trail of a frontier family moving from Northern Wisconsin to Kansas. • Map out a route for the family and plan a list of items they would need for their journey.

Social Studies 3 A Syllabus

Module	Lesson Title	Objectives
	Creating a World Map	<ul style="list-style-type: none">• Identify the seven continents and five oceans on a world map and globe.• Create your own world map correctly indicating the seven continents and five oceans.
	Heritage Mapping	<ul style="list-style-type: none">• Map your family heritage.• Draw outlines of your ancestors' countries.

Social Studies 3 B Syllabus

Course Description:

The second semester begins with introducing learners to economics and the role that money plays in every civilization. Students learn the difference between natural, human, and capital resources. They also examine the production of goods, trade, specialization, and interdependence, and come to understand the importance that each individual plays in a society's economy. Learners are introduced to Civics by discussing the governmental structure of the Ancient Hebrews and Phoenicians. The purpose and importance of laws and how they are enacted as well as the establishment of government are shown through stories of the Ancient Phoenicians and Native Americans. The course ends by discussing the purpose and nature of government as it relates to the United States.

Materials needed:

- Colored pencils or crayons
- Sculpey clay (Yellow, Tan, Orange, Brown and White)
- Cardboard
- Scissors
- Paints
- Paintbrush
- String
- Foam craft material sheets in various colors
- Glue

Module	Lesson Title	Objectives
1	Economics: Natural, Human and Capital Resources	<ul style="list-style-type: none"> • This week begins our economics block in the third grade social studies. In the next nine weeks your child will explore how natural, human, and capital resources combine to create the goods and services that allow a community to thrive. • Your child will be introduced to ideas of specialization and interdependence and their role in the production of goods and services, and finally we will consider examples of making economic choice and the sacrifices involved. • All these concepts will be explored through the use of story involving the cultures your child has visited in earlier lessons. • We will begin this week with a return to Ancient Israel. Your child will hear a story that takes place in an ancient Israeli marketplace. • Your child will identify and differentiate between natural, capital, and human resources within the story.

Social Studies 3 B Syllabus

Module	Lesson Title	Objectives
		<ul style="list-style-type: none"> Your child will complete illustrations and writings in their Main Lesson Book that reflect their learning.
	Economics: Natural, Human and Capital Resources II	<ul style="list-style-type: none"> This week we will return to Phoenicia and the Canaanites to further explore the idea of natural, human, and capital resources. We will extend our study this week to include the goods and services that are produced by these different forms of resources, and hear a story that reflects the interdependent nature of them. Your child will enter various writings and illustrations in their Main Lesson Book that demonstrates their understanding of these concepts. In addition, they will complete an art project of a Canaanite cult mask!
	Economics: The Resources of Ancient Africa	<ul style="list-style-type: none"> This week we will return to the African Kush nation and examine some of the goods they produced and traded. Your child will hear a story and enter writings and illustrations in their Main Lesson Book that describes what they have learned.
2	Economics: Specialization	<ul style="list-style-type: none"> Explain the idea of economic specialization and how it aids a community. Categorize job specialization in a community as the roles serve the common good.
	Economics: Interdependence	<ul style="list-style-type: none"> Explain the nature of interdependence. Describe the concept of interdependence through writings and drawings in the Main Lesson Book.
	Economics Review: Specialization and Interdependence	<ul style="list-style-type: none"> Explore specialization and interdependence within the Hopi Tribes. Illustrate specialization and interdependence within the Hopi Tribes. Make a spool doll similar to the Hopi Kachina dolls.
3	Economics: The Role of Choice	<ul style="list-style-type: none"> Review the frontier and relate what happens when people have to make economic choices. Build a model of a frontier cabin.

Social Studies 3 B Syllabus

Module	Lesson Title	Objectives
	Creating a Frontier Town	<ul style="list-style-type: none"> Identify specialized jobs within developing frontier towns. Design your own frontier town.
	Economics: In the Community	<ul style="list-style-type: none"> This is the final week for our economics block of third grade social studies. Next week we will begin to look at Civics. We complete our studies this week by bringing the concepts we have explored, specialization, interdependence and economic choice, home. Your child will explore their own community this week and see these concepts at work. Your child will enter various writings and illustrations in their Main Lesson Book to reflect their learning.
4	The Need for Laws and Government	<ul style="list-style-type: none"> This week begins our final nine-week social studies block. In this block we will turn our focus to civics. Your child will study the development of laws and government as a means to protect the rights and property of the people. We return this week to Ancient Israel. Your child will hear a story of two children, one living the nomadic life and the other living within a settled city. Your child will learn about the development of laws in these two systems in Ancient Israel and the importance of governing for protection. Your child will enter an illustration along with a simple paragraph into their Main Lesson Book that reflects their learning.
	The Purpose of Laws and Government	<ul style="list-style-type: none"> This week we continue our look at the purpose of developing and carrying out laws. Your child will hear a story from Ancient Phoenicia. Your child will develop their own imaginary city, with themselves as ruler. Your child will establish a set of rules and decide who enforces them and how this will happen. Your child will write their ideas in their Main Lesson Book.

Social Studies 3 B Syllabus

Module	Lesson Title	Objectives
	Government Structure: The Kush of Ancient Africa	<ul style="list-style-type: none"> This week your child will hear about the government of the ancient Kush people of Africa. Your child will hear a story and consider how laws protect the people they serve.
5	Government Structure: The Cherokee	<ul style="list-style-type: none"> Compare Cherokee way of "law" to other forms of government. Explore other ways laws are upheld.
	Government Structure: The Hopi	<ul style="list-style-type: none"> Examine the Hopi form of law and government. Compare Hopi and Cherokee forms of law and government.
	The Purpose and Nature of Government	<ul style="list-style-type: none"> This week your child will look at the purpose and nature of government and how the United States decides who leads. Your child will discuss some of the reasons governments are formed, and enter a simple writing in their Main Lesson Book. In addition, your child will form a collage of characteristics a leader should have.
6	The Origin of the American Government	<ul style="list-style-type: none"> This week your child will hear a short story about the signing of the Declaration of Independence and the birth of the United States Government. Your child will enter an illustration and a paragraph into their Main Lesson Book reflecting what they have learned.
	Republican Principles of Government	<ul style="list-style-type: none"> This week your child will learn about the importance of the principles that form the republican form of government, that of the United States. Your child will describe the meaning of the individual's rights to life, liberty, and the pursuit of happiness as well as equality under the law. Your child will enter a paragraph in their Main Lesson Book along with pictures of the basic symbols of America: the American flag, the Great Seal, and the Liberty Bell.
	Your Local Government	<ul style="list-style-type: none"> In this final week, your child will explore their local government. Your child will travel to town hall or a comparable office and observe who leads their local government. Your child will do some research on a local representative and find the names of the people in office who represent them and their families.

Social Studies 3 B Syllabus

Module	Lesson Title	Objectives
		<ul style="list-style-type: none"><li data-bbox="835 331 1680 358">• Your child will complete a simple writing in their Main Lesson Book.

4TH GRADE SOCIAL STUDIES

Course Description

Semester A

In grade 4 Social Studies learners will use their understanding of social studies skills to explore their local states and communities. They will begin the course by learning the topography of their particular area. Students will do this by creating a detailed landscape model. This project will be hands-on and require students to do research of their communities. Learners will also research local animals and gain an understanding of local Native American ground in their part of the country. This course walks students through the research and report writing steps that will be vital to their continuation of social studies. They will continue to focus on their individual states as they do projects based on local geography, state capitols, as well as nearby natural wonders and landforms. The semester concludes with an introduction to Colonial history. The course uses video, enrichment activities, and project-based learning to enhance the student's social studies skills.

Semester B

Semester B of grade 4 Social Studies picks up where semester A left off by looking further into frontier life of the early American settlers. Students examine the difficulties that early settlers faced when reaching America. They apply knowledge of historical thinking, chronology, turning points, individuals, and themes of local and United States history in order to understand how history has shaped the present and will shape the future. They will continue the focus of local history by doing research projects on settlers from their particular states and on how their state became a part of the Union. The transition from the pony express to the transcontinental railroad is a major theme that shows how quickly the United States developed. Students end by creating a time capsule that demonstrates what was important to early settlers from their particular states.

Course Requirements

Grade Level

4th Grade

***Materials**

Basic School Supplies

Fourth Grade Materials Kit

**Materials listed should be acquired by the student prior to beginning work in the course.*

4TH GRADE SOCIAL STUDIES***Duration***

2 Semesters

Prerequisites

None

Technology Skills

- Internet Navigation
- Word Processing Skills
- Email Communication (with assistance of parent or teacher)

Semester A**Major Concepts:**

- Topography
- Geography
- Native Americans
- Research Skills
- State history/geography
- Colonial History

Semester B**Major Concepts**

- Frontier life
- Early settlers from particular areas
- Research skills
- Culture of Colonial settlers
- Native Americans and Colonial settlers
- The California Gold Rush
- The evolution of transportation
- The road to statehood

Social Studies 5 A Syllabus

Course Description:

Grade 5 Social Studies combines the study of United States History through the Civil War with a geographical exploration of the United States and what it has to offer. Students will use their understanding of social studies skills and concepts as they study the development of the United States. The first semester begins with early settlements of North America and allows learners to take an in-depth look into what life was like for colonists and Native Americans. Students will come to understand the causes of the Revolutionary War and the people that played a significant role in it. The semester ends with students examining the new nation and what life was like for European immigrants and those on the frontier. Students will learn through the use of video, journaling, and varied types of creative instruction.

Material Needed:

- Cheesecloth
- 1/4 yard of soft fabric, such as lightweight flannel
- Rose petals
- Dried mint leaves
- Dried sweet basil
- Ground cloves
- Needle and thread
- Optional other fragrant herbs, such as lavender or sage
- Optional large juice or soup can
- Optional hammer
- Optional big nail and small nail
- Optional wire coat hanger

Module	Lesson Title	Objectives
1	Early Peoples and Northwest Indians	<ul style="list-style-type: none"> • Learn about the early settlers of the North American continent. • Identify the Bering Strait to know how these settlers got here.
	Woodland Indians	<ul style="list-style-type: none"> • Talk about the early populations of these nations.
	Southwest Indians	<ul style="list-style-type: none"> • Talk about the early populations of these nations.
	Plains Indians	<ul style="list-style-type: none"> • Talk about the early populations of these nations.

Social Studies 5 A Syllabus

	New Inhabitants and The Age of Exploration	<ul style="list-style-type: none"> Learn about later explorations that took place.
	Opening the World	<ul style="list-style-type: none"> Learn about the early peoples.
	Prince Henry	<ul style="list-style-type: none"> Learn about the early peoples.
	Later Explorations	<ul style="list-style-type: none"> Learn about superstitions that these people had. Learn about the first voyage of Christopher Columbus to the Americas.
	Colonizing the New World	<ul style="list-style-type: none"> Learn about the colonization of the New World.
	The Iroquois Confederacy	<ul style="list-style-type: none"> Learn about the colonization of the New World.
	Iroquois Life	<ul style="list-style-type: none"> Learn about the colonization of the New World.
2	The New World and Hard Times	<ul style="list-style-type: none"> Learn about the settlement at Jamestown.
	New Adventurers and The First Settlers at Jamestown	<ul style="list-style-type: none"> Learn how the Indians affected the early settlements. Identify Jamestown on a map.
	Captain John Smith, Keeping Peace, and Pocahontas	<ul style="list-style-type: none"> Learn how the Indians affected the early settlements. Identify Jamestown on a map.
	The Pilgrims and the Mayflower and More About Jamestown	<ul style="list-style-type: none"> Learn how the Indians affected the early settlements. Identify Jamestown on a map.
	Money in Jamestown and	<ul style="list-style-type: none"> Learn how the Indians affected the early settlements. Identify Jamestown on a map.

Social Studies 5 A Syllabus

	Indentured Servants	
	Coming to the New World	<ul style="list-style-type: none"> • Learn about the Puritans. • Learn about important figures from the Colonial period. • Learn about the role of the church in the period.
	Important Colonial Figures Part 1	<ul style="list-style-type: none"> • Learn about the Puritans. • Learn about important figures from the Colonial period. • Learn about the role of the church in the period.
	Important Colonists Part 2	<ul style="list-style-type: none"> • Learn about the Puritans. • Learn about important figures from the Colonial period. • Learn about the role of the church in the period.
	Important Colonists Part 3	<ul style="list-style-type: none"> • Learn about the Puritans. • Learn about important figures from the Colonial period. • Learn about the role of the church in the period.
	Early Colonial Life	<ul style="list-style-type: none"> • Learn about early colonial life. • Study a map to know where these early settlers made their homes. • Learn the 13 colonies.
	Children and More Colonies	<ul style="list-style-type: none"> • Learn about early colonial life. • Study a map to know where these early settlers made their homes. • Learn the 13 colonies.
	Rules for Children and Puritan Life	<ul style="list-style-type: none"> • Learn about early colonial life. • Study a map to know where these early settlers made their homes. • Learn the 13 colonies.
3	Indian Relationships	<ul style="list-style-type: none"> • Learn about the Susquehannock. • Learn how fur trade influenced early life. • Learn about other interactions with Native American groups.
	Devastation and Surrender	<ul style="list-style-type: none"> • Learn about the Susquehannock. • Learn how fur trade influenced early life. • Learn about other interactions with Native American groups.
	The Iroquois, False Face	<ul style="list-style-type: none"> • Learn about the Susquehannock. • Learn how fur trade influenced early life.

Social Studies 5 A Syllabus

	Society and Powhatan	<ul style="list-style-type: none"> Learn about other interactions with Native American groups.
	War and King Philip	<ul style="list-style-type: none"> Learn about the Susquehannock. Learn how fur trade influenced early life. Learn about other interactions with Native American groups.
	Witches and The Trials	<ul style="list-style-type: none"> Examine the Salem Witch Trials. Explain what the Salem Witch Trials are. Demonstrate understanding of this time period.
	Puritans and Colonial Trades	<ul style="list-style-type: none"> Examine the Salem Witch Trials. Explain what the Salem Witch Trials are. Demonstrate understanding of this time period.
	Trades, Plants and Disease	<ul style="list-style-type: none"> Demonstrate understanding of this time period.
	Spanish Explorers Part 1	<ul style="list-style-type: none"> Learn about the importance of the Spanish Explorers in our history. Learn about the areas these explorers found and named.
	Spanish Explorers Part 2	<ul style="list-style-type: none"> Learn about the importance of the Spanish Explorers in our history. Learn about the areas these explorers found and named.
	French Explorers	<ul style="list-style-type: none"> Learn about the impact of the French explorers. Identify the Colonization of the Americas in a map.
	The French and Indian War	<ul style="list-style-type: none"> Learn about the impact of the French explorers. Identify the Colonization of the Americas in a map.
4	Age of Enlightenment	<ul style="list-style-type: none"> Learn about the religious revival that happened in the 1730s to the 1770s. Learn about the important figures in this age of religious revival. Learn about different philosophies about this time.

	The Sugar Act and The Townshend Acts	<ul style="list-style-type: none"> Learn about different philosophies about this time.

Social Studies 5 A Syllabus

	Reactions to Taxes	<ul style="list-style-type: none"> Learn about different philosophies about this time.
	The British Reaction and Patrick Henry	<ul style="list-style-type: none"> Learn about different philosophies about this time.
	Continental Congress	<ul style="list-style-type: none"> Learn about the First and Second Continental Congress meetings.
	Road to Revolution	<ul style="list-style-type: none"> Learn about the Declaration of Independence. Learn the causes of the Revolutionary War.
	The British Are Coming	<ul style="list-style-type: none"> Learn about the life of Paul Revere. Learn about the responsibilities of Paul Revere. Learn about the Boston Massacre.
	The Revolutionary War	<ul style="list-style-type: none"> Learn about the Declaration of Independence. Learn about the Revolutionary War
5	Peace	<ul style="list-style-type: none"> Learn about key figures who were instrumental in getting our nation started after the Revolutionary War. Learn about our early government. Learn about our Constitution.
	The Branches of Government	<ul style="list-style-type: none"> Learn about key figures who were instrumental in getting our nation started after the Revolutionary War. Learn about our early government. Learn about our Constitution.
	George Washington	<ul style="list-style-type: none"> Learn about key figures who were instrumental in getting our nation started after the Revolutionary War. Learn about our early government. Learn about our Constitution.
	Early Years	<ul style="list-style-type: none"> Learn about the contributions of Ben Franklin to our nation.
	Early Accomplishments	<ul style="list-style-type: none"> Learn about Ben Franklin's part in discovering electricity.

Social Studies 5 A Syllabus

	Ben Franklin	<ul style="list-style-type: none"> Learn about the contributions of Ben Franklin to our nation.
	Moving West	<ul style="list-style-type: none"> Learn about Thomas Jefferson Learn about the Louisiana territory and the Louisiana Purchase. Study the route that Lewis and Clark took and the role Sacagawea played in their expedition.
	Native American Involvement	<ul style="list-style-type: none"> Learn about Tecumseh and his brother, Tenskwatawa.
	The Fight for Land	<ul style="list-style-type: none"> Learn about The War of 1812.
	A New Nation	<ul style="list-style-type: none"> Learn about Andrew Jackson. Learn about Westward Expansion. Learn about The War of 1812.
6	Daniel Boone and Moving West	<ul style="list-style-type: none"> Learn about the westward movement in the United States. Learn about Daniel Boone, one of the early explorers of the Frontier. Understand the Northwest Ordinance of 1787.
	The Land	<ul style="list-style-type: none"> Learn about the westward movement in the United States.
	Immigrants	<ul style="list-style-type: none"> Learn about the early immigrants to this country. Learn about cultures and customs. Learn about the early movement of these early immigrants.
	Gold	<ul style="list-style-type: none"> Learn about the early immigrants to this country. Learn about cultures and customs. Learn about the early movement of these early immigrants.
	Land and Native Americans	<ul style="list-style-type: none"> Learn about the sale of Indian lands and the formation of reservations.
Semester Review	Semester Review	<ul style="list-style-type: none"> Recall material presented in each lesson of this past semester. Examine colonial life. Write about the lesson material presented.

Social Studies 5 B Syllabus

Course Description:

Semester B begins with an exploration of the west and what life was like for those looking to find gold. Learners will then look at slavery and what led to the Civil War. The course then takes a departure from American history and takes a more in-depth look into cultures, people, and the geography of the United States from past to present. Learners will have the opportunity to explore the country region by region and come to appreciate all that it has to offer. Students will conclude the course by planning and describing a trip they would like to take to a particular place within the 50 United States. Students will take a hands-on approach as they get to know the geography, climate and culture of their country. Video, creative projects involving technology, journaling, and varied assessments will be used throughout the course.

Material Needed: Colored pencils, Optional crafting supplies

Module	Lesson Title	Objectives
1	Texas	<ul style="list-style-type: none"> Discuss the role of Sam Houston in our history.
	Frontier Life	<ul style="list-style-type: none"> Explain what Frontier life was like.
	The Underground Railroad	<ul style="list-style-type: none"> Describe what the Underground Railroad was and why it was needed. Discuss the life of Harriet Tubman. Evaluate what it would have been like to be a slave in those days.
	A Country With Problems	<ul style="list-style-type: none"> Write about the Civil War and the reasons it was fought.
	Reasons for Secession	<ul style="list-style-type: none"> Explain "equality".
	The War	<ul style="list-style-type: none"> Describe the friction between the North and the South.
	The End of the War	<ul style="list-style-type: none"> Understand what helped lead to the end of the Civil War Understand the effects that the war had on Black Americans.
2	People of America	<ul style="list-style-type: none"> Understand how the people of America came to the United States.

Social Studies 5 B Syllabus

Module	Lesson Title	Objectives
	Diverse Cultures of America	<ul style="list-style-type: none"> Explain the different cultural groups mentioned in this lesson. Describe the life of Anna Cooper. Discuss the "Amish.
	Women of the 18th and 19th century	<ul style="list-style-type: none"> Describe the contributions of several of the women you learned about in this lesson. Explain and write about five of the women. Evaluate the contributions they made to our nation.
	Women of the 20th century	<ul style="list-style-type: none"> Describe the contributions of several of the women you learned about in this lesson. Explain and write about five of the women. Evaluate the contributions they made to our nation.
	Weather	<ul style="list-style-type: none"> Explain the difference between weather and climate.
	Maps	<ul style="list-style-type: none"> Discuss what geography has to do with climate. Describe what different maps tell us.
	Biomes and Zones	<ul style="list-style-type: none"> Describe what different maps tell us. Understand what the different zones in the US are. Understand and describe the different biomes in the US.
3	Exploring Your Own State	<ul style="list-style-type: none"> Describe the geography of your state. Locate and illustrate the geographical features of your own state. Discuss the information you gathered about your own state.
	Hawaii and Alaska	<ul style="list-style-type: none"> List the states in this region. Sketch the states in this region. Discuss the material you learned about the states in this region. Locate this region on a map.
	Washington, Oregon, and California	<ul style="list-style-type: none"> List the states in this region. Sketch the states in this region. Discuss the material you learned about the states in this region. Locate this region on a map.
	Idaho and Montana	<ul style="list-style-type: none"> List the states in this region. Sketch the states in this region.

Social Studies 5 B Syllabus

Module	Lesson Title	Objectives
		<ul style="list-style-type: none"> Discuss the material you learned about the states in this region. Locate this region on a map.
	Colorado and Wyoming	<ul style="list-style-type: none"> List the states in this region. Sketch the states in this region. Discuss the material you learned about the states in this region. Locate this region on a map.
	Utah, Arizona, and New Mexico	<ul style="list-style-type: none"> List the states in this region. Sketch the states in this region. Discuss the material you learned about the states in this region. Locate this region on a map.
4	North Dakota, Minnesota, and South Dakota	<ul style="list-style-type: none"> Locate the West North Central Region states. Compare how this area is different than the other areas we have already studied. Evaluate what interesting things these states have to offer.
	Nebraska, Iowa, Kansas, and Missouri	<ul style="list-style-type: none"> Locate the West North Central Region states. Compare how this area is different than the other areas we have already studied. Evaluate what interesting things these states have to offer.
	West South Central Region	<ul style="list-style-type: none"> Locate these states on a map. Write about these states and characteristics of the states. Describe what these states have to offer.
	The Great Lakes	<ul style="list-style-type: none"> Locate these states on a map. Write about these states and characteristics of the states. Describe what these states have to offer.
	Illinois, Indiana and Ohio	<ul style="list-style-type: none"> Identify where these states are located on a map. Explain what these states have in common. Compare and contrast the different states according to climate and geographical make-up.
5	Kentucky and Tennessee	<ul style="list-style-type: none"> Evaluate states in this region. Discuss these areas. Examine the differences in these states from other areas we have learned about.

Social Studies 5 B Syllabus

Module	Lesson Title	Objectives
	Alabama and Mississippi	<ul style="list-style-type: none"> Evaluate states in this region. Discuss these areas. Examine the differences in these states from other areas we have learned about.
	New England	<ul style="list-style-type: none"> Identify the Northeastern Region states. Explain what makes these states unique. Write about these states.
	Northeast	<ul style="list-style-type: none"> Identify the Northeastern Region states. Explain what makes these states unique. Write about these states.
	States in the South Atlantic	<ul style="list-style-type: none"> Locate the states in the South Atlantic region. Compare these states to other states we have talked about. Explain what makes these states unique.
6	Planning Your Trip	<ul style="list-style-type: none"> Examine sample trips that others have taken. Choose a trip they would like to take. Create a plan for a trip.
	Describing Your Trip	<ul style="list-style-type: none"> Describe their own trip. Write details about their trip. List places visited on their trip.
	Final Project	<ul style="list-style-type: none"> Demonstrate understanding of key concepts such as the Spanish explorers, the European immigrants, the settling of this nation and the beginnings of our early government. Compare and contrast colonial living to living nowadays. Discuss the important historical personalities we learned in this year.

6th Grade Social Studies A Syllabus

Course Introduction

Welcome to the first half of Ancient Civilizations! This sixth-grade course explores the beginning of early civilizations through the Gupta dynasty in ancient India. Students will analyze the shift from nomadic societies to agricultural societies. Students will study the development of civilizations, including the areas of Mesopotamia, Egypt, Ancient Israel, and India. The study of these civilizations will include the impact of geography, early history, cultural development, and economic change. This class will conclude with the Gupta dynasty.

In the first segment of the course, students will begin with the ways historians use the terms BC and AD as well as BCE and CE to track events throughout history. Next, students will analyze ways to review primary and secondary sources for bias and credibility. After reviewing the ways in which archaeologists and historians uncover the past, students study geographic aspects of the world including the study of physical and political features, economic development and resources, and migration patterns. Unit one will conclude with the progression of hominids through the Paleolithic period.

Next, the agricultural revolution and Mesopotamia is discussed. Students will trace the development of civilizations in and around the Tigris and Euphrates Rivers, including the Sumerians, Babylonians, Akkadians, and Assyrians. Technology, economics, politics, and social issues are discussed, including the invention of the wheel, and the significance of Hammurabi's Code. Unit two ends with a comparison of the various Mesopotamian cultures and their ability to adapt in a variety of environments.

Unit three focuses on Egypt and the Nile River. Students will begin with the importance of the Nile River to Egypt and the region. They will then learn about the Old Kingdom, including the pyramids and how the Palermo Stone helped historians to learn about ancient Egypt.

Students then move to the land of Canaan and the Hebrews. Starting with Abraham, students will examine the beginnings of the Jewish religion, including the covenant between God and Abraham, the Exodus, and other conflict between the Jewish people and others in the area in and around Jerusalem. The Babylonian Captivity is discussed, as well as the diaspora, and current conflicts in the region today. Unit four completes with an explanation of Iran and the Persian Empire, including Cyrus the Great and Zoroastrianism.

Finally, ancient India is explored, beginning with subcontinent geography. The focus then turns to the Harappan society in the Indus River Valley, including their political, social, and technological advancements. The Aryan migration and the beginnings of the caste system is next, including Hinduism. Jainism and Buddhism are also examined. Students then move to the Maurya and Gupta Empires, analyzing the achievements of Chandragupta Maurya, Asoka the Great as well as the roles and contributions of Chandragupta I and Chandragupta II in the Gupta Empire. Finally, the class concludes with the Gupta culture and their advancements in mathematics including Hindu-Arabic numerals and the concept of zero.

This course is designed to build on students' prior knowledge and skill sets in the application of geographic information and tools to understand complex relations between the physical environment and human existence. While focusing on each part of the world, students are able to recognize characteristics distinguishing regions in the Middle East, South Asia and Africa. Each regional study

6th Grade Social Studies A Syllabus

encompasses an in-depth study of the physical geography, culture, economy, government, and social dynamics defining the land and people. A historical element is intertwined into the regional studies, as an investigation of the earliest civilizations demonstrates how and why people migrated to different locations, and how the people in these places survived and advanced with available resources.

Throughout the course, students examine and analyze readings, biographies, videos, and other materials that paint a picture of historical topics. Discussions with peers will help students to think creatively and critically about topics. The project that spans the course is designed to develop and sharpen the students' writing skills.

Major Concepts

- Prehistory
- Paleolithic Era
- Mesopotamia
- Egypt
- Phoenicia
- Hebrews
- Persians
- India

Course Objectives

- Describe the early hunter-gatherer societies by tracing the progression of hominids from australopithecine to *Homo habilis* to *Homo erectus* to Neanderthal and *Homo sapiens sapiens*.
- Describe the impact of water in the development of ancient civilizations by examining the importance of the Tigris and Euphrates Rivers to Mesopotamia.
- Describe the lifestyle of humans in the Neolithic Age by analyzing farming techniques and the development of advanced tools.
- Explain how humans transformed into civilizations by describing the characteristics such as: social structure, system of government, population centers, monumental structures, advanced technology, and a system of record keeping.
- Analyze the characteristics of different social classes by examining the roles of merchants, artisans, and soldiers in ancient Egypt.
- Examine the relationship between religion and the social order in Egypt by analyzing afterlife beliefs.
- Trace the evolution of language and its written forms by examining Egyptian hieroglyphics.

6th Grade Social Studies A Syllabus

- Explain the origins of Judaism as the first monotheistic religion by examining the covenant between God and Abraham.
- Identify sources of ethical teachings and central beliefs of Judaism by analyzing Mosaic Law and the Torah.
- Explain how Judaism survived and developed despite the continuing diaspora by examining the ways Jews adapted to different regions, cultures, and environments.
- Describe the impact of physical geography in the development of ancient civilizations by examining the importance of the various rivers, seas, mountains, and deserts to India.
- Examine the growth of the Indus society by analyzing architecture, sanitation, and city planning in Harappa culture.
- Outline the social structure of the caste system by describing the roles of Vaisya, Brahman, Kshatriya, Untouchable, and Sudra.
- Describe the historical origins, central beliefs, and spread of Buddhism by analyzing the life and moral teachings of Buddha.
- Explain important aesthetic and intellectual traditions by examining Gupta advancements in astronomy and mathematics, including Hindu-Arabic numerals and the zero.

Course Organization

- This World History course is made up of six units, and each unit has five lessons. Each lesson presents many ways to learn the information. You are encouraged to check with your teacher for further information about course guidelines and grading policies.
- At the beginning of each unit is a brief description of that unit. Each lesson begins with a list of learning objectives that describes what you should know by the end of that lesson and the topics on which you will be tested. Most of the lessons have the same format, but some activities vary or may be omitted if necessary. A typical lesson has the following activities:
 - **Reading Activities** – These required reading assignments explore the lesson topics. Reading Activities include important vocabulary terms and other interactive elements, such as annotated images or biographies of important people in history. Each activity contains questions to test knowledge gained from the reading.
 - **Visual Concepts** – Visual Concepts may be lectures or animated videos. These activities review a visual concept that helps you determine how well you understand the topics that were covered.
 - **Discussion Board** – This is a graded activity that allows you to interact and communicate with classmates and the teacher. During this course, you will encounter multiple discussion boards and will be asked to explore content for a deeper understanding of the material.
 - **Workbook** – This graded activity uses a variety of questions to assess what you have learned in each activity.
 - **Checkpoint** – This graded activity uses 10 questions to assess what you have learned in the lesson.

6th Grade Social Studies A Syllabus

- **Project** – This is a graded activity that allows you to practice investigating, experimenting, and researching. This may or may not be directly related to a lesson, and it may or may not span the entire unit.
- **Unit Exam** – At the end of each unit, this graded activity uses 20 questions to assess mastery of unit objectives.
- **Vocabulary Exam** – (Lesson 29) – This graded activity uses 30 questions to assess mastery of key terms found throughout the course.
- **Final Exam** – (Lesson 30) – This graded activity uses 30 questions to assess mastery of course curriculum.

Writing Projects

- Create an eight to ten-slide research presentation about a wonder of the world.
- Objectives:
 - Identify a wonder to research.
 - Research the chosen subject by analyzing primary sources and answering a series of questions.
 - Create an outline with three sections: cover slide, middle slides, final slide.
 - Create a cover slide with a main title and one main picture with adjectives to describe the picture.
 - Create at least four middle slides with reasons to visit the wonder.
 - Create at least two slides with reasons to visit one of the Seven Natural Wonders of the World.
 - Create a final slide with frequently asked questions (FAQ's) about the wonder.
 - Create a works cited page and submit with rough draft.
 - Create a final draft by analyzing comments from an instructor and adjusting as needed. Submit for a grade.

6th Grade Social Studies A Syllabus**Schedule of Work**

Unit 1 Dawn of Civilization

- Lesson 1: Thinking Like a Historian
- Lesson 2: The Study of Prehistory
- Lesson 3: Physical Geography
- Lesson 4: Human Geography
- Lesson 5: Paleolithic Era

Unit 2 Mesopotamia

- Lesson 6: Agricultural Revolution
- Lesson 7: Sumerians
- Lesson 8: Ancient Babylonians and Akkadians
- Lesson 9: Assyrians
- Lesson 10: Chaldeans and the Neo-Babylonians

Unit 3 Egypt

- Lesson 11: Nile River Geography
- Lesson 12: Early Egyptian Civilization
- Lesson 13: Middle and New Kingdoms
- Lesson 14: Life in and around Egypt
- Lesson 15: Nubia and Phoenicia

6th Grade Social Studies A Syllabus

Unit 4 The Hebrews and Ancient Persians

Unit 5 Ancient India

- Lesson 21: Subcontinent Geography
- Lesson 22: Harappans
- Lesson 23: Migration and Religions
- Lesson 24: Mauryan Empire
- Lesson 25: Gupta Empire

Unit 6 Review and Final Exam

- Lesson 26: Unit 1 Review
- Lesson 27: Unit 2 Review
- Lesson 28: Unit 3 Review, Vocabulary Review
- Lesson 29: Unit 4 Review, Vocabulary Exam
- Lesson 30: Unit 5 Review, Final Exam

6th Grade Social Studies B Syllabus

Course Description

This sixth-grade course explores early civilizations, from ancient Greek society to the beginning of the Silk Road.

Students will study the geographical, political, social, and economic foundations of early civilizations. They'll examine the geography, early history, cultural development, and economic changes of civilizations like Rome, Persia, and China. The geographic focus will include the study of physical and political maps, economic development and resources, and migration patterns. Students will also study the development of philosophies and religions like Judaism, Christianity, Confucianism, and Taoism. Students' final grades will be based on their performance in a variety of assessment types: Workbooks, Discussion Boards, Checkpoints, a Final Exam, and a multistep project.

Major Concepts

- Greece
- Democracy
- Persians
- Rome
- China
- Christianity
- Buddhism
- Confucianism

Course Objectives

- Explain the importance of geography on ancient Greece, Rome, and China by studying maps.
- Analyze the development of democracy by tracing its growth from oligarchy and tyranny in Athens.
- Explain the expansion of democracy in Athens by identifying the role of Pericles.
- Analyze the effect of Greek mythology and literature by identifying its influence on modern Western culture.
- Explain the rise and organization of the Persian Empire by examining the achievements of Cyrus, Cambyses, and Darius.
- Compare and contrast life in Athens and Sparta by examining cultural similarities and differences.
- Examine the influence of Alexander the Great by tracing his rise to power and cultural legacy.
- Describe the philosophy of ancient Greece by identifying the influence of Socrates, Plato, and Aristotle.

6th Grade Social Studies B Syllabus

- Examine the scientific, mathematical, and medical advancements of ancient Greece by studying the work of famous scientists and mathematicians.
- Explore characteristics of Greek architecture by identifying differences between Doric, Ionic, and Corinthian columns.
- Understand characteristics of early Chinese civilizations by studying historical artifacts.
- Analyze how the Zhou dynasty strengthened its power by examining the influence of the Mandate of Heaven.
- Examine the cultural, economic, and political influence of Chinese philosophies by studying Confucianism, Taoism, and Legalism.
- Analyze the effectiveness of Qin Shi Huangdi by examining his reforms.
- Explain the rise of the Han dynasty by studying the roles of Liu Bang and Han Wudi and the Chinese civil service.
- Explain the scientific and engineering advancements in Han China by identifying specific inventions and discoveries. Explain the influence of the Silk Road on China by describing its economic effects and use in spreading Buddhism.

Course Organization

This social studies course is made up of six units, and each unit has five lessons. Each lesson presents many different ways to learn the information. Students are encouraged to check with their teachers for further information about course guidelines and grading policies.

At the beginning of each unit is a brief description of that particular unit. Each lesson begins with a list of learning objectives that describes what students should know by the end of that lesson and the topics on which they will be tested. Most of the lessons have the same format, but some activities vary or may be omitted if necessary. A typical lesson has the following activities:

- **Reading Activities:** These required reading assignments explore the lesson topics. Reading Activities include important vocabulary terms and other interactive elements, such as annotated images or biographies of important people in history. Each activity contains questions to test knowledge gained from the reading.
- **Visual Concepts:** Visual Concepts may be lectures or animated videos. These activities review a visual concept that helps students determine how well they understand the topics that were covered.
- **Discussion Board:** This is a graded activity that allows students to interact and communicate with classmates and the teacher. During this course, students will encounter multiple discussion boards and will be asked to explore content for a deeper understanding of the material.
- **Workbook:** This graded activity uses a variety of questions to assess what students have learned in each activity.

6th Grade Social Studies B Syllabus

- **Checkpoint:** This graded activity uses multiple questions to assess what students have learned in the lesson.
- **Project:** This is a graded activity that allows students to practice investigating, experimenting, and researching. This may or may not be directly related to a lesson, and it may or may not span the entire unit.
- **Unit Exam** (Lessons 5, 10, 15, 20, 25): This graded activity uses 20 questions to assess mastery of unit objectives.
- **Vocabulary Exam** (Lesson 29): This graded activity uses 30 questions to assess mastery of key terms found throughout the course.
- **Final Exam** (Lesson 30): This graded activity uses 30 questions to assess mastery of course curriculum.

Writing Project

- **Project:** Create a nine-slide comparison slide presentation.
- **Objectives**
 - Research the assigned subject by consulting sources on the internet and within the course.
 - Create a cover slide with a main title and pictures.
 - Create six middle slides describing the political, economic, and cultural aspects of Athens and Sparta.
 - Create a slide with a well-developed compare-and-contrast thesis statement.
 - Create a works cited page and submit with rough draft.
 - Create a final draft by analyzing feedback from an instructor and adjusting as needed. (Submit for grade.)

6th Grade Social Studies B Syllabus**Schedule of Work**

Unit 1: Ancient Greece: Geography, Government, and Culture

- Lesson 1: Geography of Ancient Greece
- Lesson 2: Early Government in Athens
- Lesson 3: Athens under Pericles
- Lesson 4: Greek Mythology
- Lesson 5: Greek Literature

Unit 2: Rise and Fall of a Greek Empire

- Lesson 6: The Persian Wars
- Lesson 7: Athens vs. Sparta
- Lesson 8: Alexander the Great's Empire
- Lesson 9: Philosophy and Science in Greece
- Lesson 10: Math, Engineering and Architecture in Greece

Unit 3: Ancient Rome

- Lesson 11: Roman Beginnings
- Lesson 12: Roman Government and Economy
- Lesson 13: Fall of the Republic
- Lesson 14: Roman Cultural Achievements
- Lesson 15: Judaism and Christianity

Unit 4: The First Chinese Civilizations

- Lesson 16: Chinese River Valley Civilizations
- Lesson 17: Shang Dynasty
- Lesson 18: The Zhou Dynasty
- Lesson 19: Confucianism
- Lesson 20: Taoism and Legalism

6th Grade Social Studies B Syllabus

Unit 5: Qin and Han Dynasties

- Lesson 21: The Qin Dynasty
- Lesson 22: The Han Build an Empire
- Lesson 23: Han Achievements
- Lesson 24: Life in Han China
- Lesson 25: Buddhism and the Silk Roads

Unit 6: Review and Final Exam

- Lesson 26: Unit 1 Review
- Lesson 27: Unit 2 Review
- Lesson 28: Unit 3 Review, Vocabulary Review
- Lesson 29: Unit 4 Review, Vocabulary Exam
- Lesson 30: Unit 5 Review, Final Exam

7th Grade Social Studies A Syllabus

Course Introduction

Welcome to Medieval and Early Modern Times! This seventh-grade course explores the social, cultural, and technological changes that occurred in Europe, Africa, and Asia in the years AD 500–1789. After reviewing the ancient world and the ways in which archaeologists and historians uncover the past, students study the history and geography of great civilizations that were developing concurrently throughout the world during medieval and early modern times.

In the first segment of the course, students study the influence of ancient Rome as well as explore the rise of Christianity and Islam. In addition, students explore the history and geography of great civilizations in Asia, Africa, and South America.

Students begin by exploring the geography and people who helped Rome grow from a group of villages to a mighty republic. A video explains the structure of the Roman Republic and an early form of checks and balances in government. Students also learn about internal reforms that contributed to the rise of Julius Caesar.

Next, they learn about the artists, historians, and philosophers that influenced Roman culture. They visit places that were central to public life in the empire. Students explore the polytheistic (many gods) Roman religious beliefs. They also see the role Judaism and Christianity played in ancient Rome. They then analyze the factors that led to the division of Rome, the fall of the Western Empire, and the rise of the Byzantine Empire.

The course moves on to explore the spread of Islam throughout Arabia. It reveals how the faith divided after the death of Muhammad. Students discover the golden age of Islam that began during the Abbasid caliphate. They investigate the contributions of the Fatimid caliphate and the Muslim explorer Ibn Battuta. They learn about the Crusades begun by Western Christians and the Muslim recapture of parts of the Holy Land under the leadership of Saladin.

Then, students learn how new kingdoms emerged throughout Europe. Later, they study the spread of Christianity after the fall of the Roman Empire. Next, they investigate the importance of Charlemagne in building the Holy Roman Empire. Students then read about the causes and effects of the Crusades. They also explore the conflicts that shaped medieval Christianity. These include the Schism of 1054, the Investiture Controversy, new Catholic orders, and the Great Schism. Students analyze factors that promoted the growth of towns and learn about medieval art and architecture. They also read about the growth of universities. This section concludes with the bubonic plague and its impact on the global population.

Next, students learn about the development of the empire of Ghana in West Africa. They investigate how the empire of Mali grew after the fall of Ghana. They also learn about the importance of the ruler Mansa Musa.

The discussion next moves to the Olmec and Maya civilizations of Mesoamerica. Students then explore the achievements of the Chavin and Inca people in South America. Finally, they analyze the factors that contributed to the growth and fall of the mysterious city of Teotihuacán. They also explore the Toltec and Aztec societies.

7th Grade Social Studies A Syllabus

Lastly, students read about the geography and climate of China. Next, they explore the rise of the Han dynasty. The unit also describes the rise of Confucianism and Buddhism. The class continues by discussing the Tang and Sung dynasties and their various reforms. Students explore the changes and achievements of the Yuan and Ming dynasties. Finally, students study cultural developments that occurred in Japan. This includes the Nara and Heian periods as well as the rise of shogunates.

Throughout the course, students examine and analyze readings, videos, primary sources, timelines, and other materials that paint a picture of historical topics. Discussions with peers help students to think creatively and critically about topics. The projects that span the course are designed to develop and sharpen the students' writing skills.

Major Concepts

- Ancient Rome
- Medieval Africa
- Medieval China
- Medieval Europe
- Medieval Japan
- Medieval Mesoamerica
- Medieval South America
- Rise of Christianity
- Rise of Islam

Course Objectives

- Examine what life was like in the Roman Republic by describing the role of citizenship and citizens' rights, agriculture and trade, territorial expansion, and the rise of Julius Caesar.
- Discuss Roman philosophy and religion by describing the main beliefs and contributions of Roman philosophers and Roman religion, Judaism, and Christianity.
- Trace the rise of Islam and the development of its complex belief system by describing the influences of geography and individuals.
- Discuss the golden age of Islam by describing the achievements of the Abbasid caliphate and the contributions of the Fatimid caliphate and Ibn Battuta.
- Examine the emergence of feudal society by describing the contributions of Charlemagne, the invasion of outside groups, and the development of manorialism.
- Discuss the conflicts and individuals that shaped the Catholic Church by describing the Schism of 1054, the Investiture Controversy, new Catholic orders, and the Great Schism.
- Understand and distinguish cause, effect, sequence, and correlation in historical events, including the long- and short-term causal relations.
- Explain the interconnectedness of Teotihuacán, the Toltec, and the Aztec by examining their main cultural features and achievements.

7th Grade Social Studies A Syllabus

- Examine Mongol and Ming rule by describing the changes in China that occurred during each dynasty.
- Explain the development of Japanese culture by describing the impact of its climate and geography, life during the Nara and Heian periods, *The Tale of Genji*, and the rise of the Kamakura Shogunate.

Course Organization

This World History course is made up of six units, and each unit has five lessons. Each lesson presents many ways to learn the information. Students are encouraged to check with their teachers for further information about course guidelines and grading policies.

At the beginning of each unit is a brief description of that unit. Each lesson begins with a list of learning objectives that describes what students should know by the end of that lesson and the topics on which they will be tested. Most of the lessons have the same format, but some activities vary or may be omitted. A typical lesson has the following activities:

- **Learning Activities** — These required assignments include readings and visual concepts that explore the lesson topics. Reading activities include important vocabulary terms and interactive elements. Visual concepts include videos, annotated images, or biographies of important people in history. Some activities include interactives that help students determine how well they understand the topics that were covered. Each activity contains questions to test knowledge gained from the reading.
- **Discussion Board** — This graded activity allows students to interact and communicate with classmates and the teacher. During this course, students encounter multiple discussion boards and are asked to explore content for a deeper understanding of the material.
- **Workbook** — This graded activity uses a variety of questions to assess what students have learned in each activity.
- **Checkpoint** — This graded activity uses 10 questions to assess what students have learned in the lesson.
- **Project** — Projects are graded activities that allow students to practice investigating, experimenting, researching, and writing. A Project may or may not be directly related to a lesson, and it may or may not span the entire unit.
- **Unit Exam** (Lessons 5, 10, 15, 20, 25) — This graded activity uses 30 questions to assess mastery of unit objectives.
- **Vocabulary Exam** (Lesson 29) — This graded activity uses 30 questions to assess mastery of key terms found throughout the course.
- **Final Exam** (Lesson 30) — This graded activity uses 50 questions to assess mastery of course curriculum.

7th Grade Social Studies A Syllabus

Writing Projects

Project 1: Create a biography of a world historical figure.

Objectives

- Identify a historical figure from world history who lived between the first and 16th centuries (early Roman times through the medieval period).
- Research the historical figure from world history who lived between the first and 16th centuries (early Roman times through the medieval period), documenting all sources used.
- Create an outline with three sections (introduction, two body paragraphs, and conclusion).
- Formulate a 200- to 300-word biography about the figure students chose, including an introduction, three facts about their historical figure's early life (such as home life, education, and birthplace) in the first body paragraph, three accomplishments of their historical figure in the second body paragraph, and a conclusion. (Submit for review.)
- Create a final draft by analyzing comments from an instructor and adjusting as needed. (Submit for grade.)

Project 2: Create an imagined social media page for the figure.

Objectives

- Explain how major events are related to one another in time.
- Construct various timelines of key events, people, and periods of the historical era students are studying.
- Gather relevant information from multiple sources.
- Integrate visual information (e.g., charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
- Explain the central issues and problems from the past, placing people and events in a matrix of time and place.
- Understand and distinguish cause, effect, sequence, and correlation in historical events, including the long- and short-term causal relations.
- Recognize that interpretations of history are subject to change as new information is uncovered.
- Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.
- Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

7th Grade Social Studies A Syllabus

Schedule of Work

Unit 1 Ancient Rome

- Lesson 1: Roman Beginnings
- Lesson 2: Roman Government and Economy
- Lesson 3: Roman Culture
- Lesson 4: Faith and Beliefs in Ancient Rome
- Lesson 5: Fall of the Roman Empire

Unit 2 The Muslim World

- Lesson 6: Islamic Beginnings
- Lesson 7: Islamic Life
- Lesson 8: Spread of Islam
- Lesson 9: Islamic Golden Age
- Lesson 10: Seljuq Turks and the Crusades

Unit 3 Feudal Europe

- Lesson 11: Early Middle Ages Europe
- Lesson 12: Early European Kingdoms and Feudalism
- Lesson 13: New Kingdoms and Crusades
- Lesson 14: Medieval Christianity
- Lesson 15: Life in the Middle Ages

Unit 4 Africa and the Americas

- Lesson 16: Empire of Ghana
- Lesson 17: Empire of Mali
- Lesson 18: Olmec and Maya
- Lesson 19: Chavin and Inca
- Lesson 20: Toltec and Aztec

Unit 5 Asian Civilizations

- Lesson 21: China
- Lesson 22: Tang Dynasty
- Lesson 23: Sung Dynasty
- Lesson 24: Ming Dynasty
- Lesson 25: Japan

7th Grade Social Studies A Syllabus

Unit 6 Review and Final Exam

Lesson 26: Unit 1 Review

Lesson 27: Unit 2 Review

Lesson 28: Unit 3 Review, Vocabulary Review

Lesson 29: Unit 4 Review, Vocabulary Exam

Lesson 30: Unit 5 Review, Final Exam

7th Grade Social Studies B Syllabus

Course Introduction

Welcome to the second half of Medieval and Early Modern Times! This seventh-grade course explores the social, cultural, and technological changes that occurred in Europe, Africa, and Asia in the years AD 500–1789. After reviewing the ancient world and the ways in which archaeologists and historians uncover the past, students study the history and geography of great civilizations that were developing concurrently throughout the world during medieval and early modern times.

In this second segment of the course, students study the Renaissance, Reformation, and the Age of Exploration, examining the growing economic interaction among civilizations. Students learn about the exchange of ideas, beliefs, technologies, and commodities. They learn about the resulting growth of Enlightenment philosophy and the new examination of the concepts of reason and authority, the natural rights of human beings and the divine right of kings, experimentalism in science, and the dogma of belief. Finally, students assess the political forces let loose by the Enlightenment, particularly the rise of democratic ideas, and they learn about the continuing influence of these ideas in the world today.

Students begin by exploring Early Modern Asia. This includes the Korean dynasties, the Qing Empire, Tokugawa Japan, and Southeast Asia. Moving west, they will learn about empires in Persia, India, the Middle East, and Russia. Each lesson will examine the culture, history, and changes in the region.

Next, they learn about the Renaissance from its beginnings on the Italian peninsula to the overall change in Europe. Students explore Renaissance origins from the Greeks and Romans to the concepts of hand Machiavellianism. Renaissance literature, architecture, and music are also covered. A video will explain the impact of artists such as Raphael, Donatello, Michelangelo, and Leonardo da Vinci.

Students explore Renaissance math and science through Pascal, Copernicus, and Sir Isaac Newton. Their inventions and discoveries changed the world at the time and through today. The ideas of Francis Bacon and Descartes are reviewed, to provide students with the origins of the scientific method and reasoning.

The course then explores the Reformation from early challenges to the church to the Counter-Reformation. Students examine the changes in Europe brought about by Martin Luther, John Calvin, and William Tyndale. They explore the rise of Protestantism and how King Henry VIII changed England and the world. This section concludes with Medieval Spain, including the golden age of cooperation between several religions, to the Spanish Inquisition and Reconquista by Christians on the Iberian Peninsula.

The Age of Exploration takes students off the continent of Europe and set sail with the Vikings, Portuguese, Spanish, French, Dutch, and English. They will explore up and down the Americas, including Quebec, New Amsterdam, Jamestown, Tenochtitlán, and Cusco. From these explorations, students examine the Columbian Exchange of crops, animals, and diseases and how it altered multiple continents. This led to a change in the world economy, including the triangular trade of goods, services, and slaves from Africa. Students review the expansion of Europeans to the New World, the roles of Spanish missionaries, and the beliefs and treatment of American Indians. In addition, they analyze the beliefs of the Pilgrims and Puritans, which brought them to America.

The course continues with revolutions in Europe. First, students examine the Enlightenment and famous thinkers John Locke, Charles Montesquieu, and Adam Smith. Their ideas led to political, cultural, and

7th Grade Social Studies B Syllabus

economic change through multiple wars and exciting leaders Joan of Arc and Catherine the Great. Finally, students explore 17th and 18th century European society through changes in art, music, and literature.

The class concludes with a look at the US Revolutionary War and the reasons leading to it. Taxes, the French and Indian War, and changing colonial alliances all led up to a Declaration of Independence and a new constitution.

Throughout the course, students examine and analyze readings, biographies, videos and other materials that paint a picture of historical topics. Discussions with peers will help students to think creatively and critically about topics. The projects that span the course are designed to develop and sharpen the students' writing skills.

Major Concepts

- Early Modern Asia
- Renaissance
- Scientific Revolution
- Reformation
- Counter-Reformation
- Age of Exploration
- Enlightenment
- Revolution

Course Objectives

- Examine the isolationist policies in Japan during the Tokugawa Shogunate by analyzing the changes in government, economics, and culture during the Edo period.
- Examine the growth of the Ottoman Empire by analyzing the acceptance of gunpowder and European culture and ideas.
- Describe the cultural diffusion in Europe, the Middle East, and Asia by examining the reopening of the ancient Silk Road.
- Explain the change in classical learning style by comparing Machiavellianism, humanism, and Socratic thinking.
Describe the theological, political, and economic ideas during the Reformation by examining the reasons why Martin Luther wrote the 95 Theses.
- Analyze how the Counter-Reformation revitalized the Catholic Church by examining the actions of St. Ignatius of Loyola and the Jesuits.

7th Grade Social Studies B Syllabus

- Understand the influence of cartography by explaining the development of a new European worldview after increased progress in mapmaking.
- Discuss the exchanges of plants, animals, technology, culture, and ideas among Europe, Africa, Asia, and the Americas in the 15th and 16th centuries by examining how the Columbian Exchange impacted both the New World and the Old World.
- Discuss how the principles in the Magna Carta were influential to the development of government in Europe by analyzing the English Bill of Rights.
- Analyze the Declaration of Independence by examining the influence of Enlightenment ideas and previous documents.

Course Organization

This World History course is made up of six units, and each unit has five lessons. Each lesson presents many different ways to learn the information. Students are encouraged to check with their teachers for further information about course guidelines and grading policies.

At the beginning of each unit is a brief description of that particular unit. Each lesson begins with a list of learning objectives that describes what students should know by the end of that lesson and the topics on which they will be tested. Most of the lessons have the same format, but some activities vary or may be omitted if necessary. A typical lesson has the following activities:

- **Reading Activities** – These required reading assignments explore the lesson topics. Reading Activities include important vocabulary terms and other interactive elements, such as annotated images or biographies of important people in history. Each activity contains questions to test knowledge gained from the reading.
- **Visual Concepts** – Visual Concepts may be lectures or animated videos. These activities review a visual concept that helps students determine how well they understand the topics that were covered.
- **Discussion Board** – This is a graded activity that allows students to interact and communicate with classmates and the teacher. During this course, students will encounter multiple discussion boards and will be asked to explore content for a deeper understanding of the material.
- **Workbook** – This graded activity uses a variety of questions to assess what students have learned in each activity.
- **Checkpoint** – This graded activity uses 10 questions to assess what students have learned in the lesson.
- **Project** – This is a graded activity that allows students to practice investigating, experimenting, and researching. This may or may not be directly related to a lesson, and it may or may not span the entire unit.
- **Unit Exam** – (Lessons 5, 10, 15, 20, 25) – This graded activity uses 30 questions to assess mastery of unit objectives.

7th Grade Social Studies B Syllabus

- **Vocabulary Exam** – (Lesson 29) – This graded activity uses 30 questions to assess mastery of key terms found throughout the course.
- **Final Exam** – (Lesson 30) – This graded activity uses 50 questions to assess mastery of course curriculum.

Writing Projects

- Project 1: Create a four-paragraph research narrative explaining your job as an apprentice during the Renaissance.
- Objectives
 - Identify an apprentice position during the Renaissance to research.
 - Research the chosen subject by analyzing primary sources and answering a series of questions.
 - Create an outline with four sections (introduction, two body paragraphs, and conclusion).
 - Create a 50–100-word introductory paragraph for a research narrative on an apprenticeship during the Renaissance.
 - Create a 100–150-word first body paragraph for a research narrative on an apprenticeship during the Renaissance.
 - Create a 100–150-word second body paragraph for a research narrative on an apprenticeship during the Renaissance.
 - Duplicate a quote from a guild master in the second body paragraph of a research narrative on an apprenticeship during the Renaissance.
 - Create a 50–100-word conclusion for a research narrative on an apprenticeship during the Renaissance.
 - Create a works cited page and submit with rough draft.
 - Create a final draft by analyzing comments from an instructor and adjusting as needed. (Submit for grade.)
- Project 2: Analyze the causes and effects of the European colonization of the Americas by writing a five-paragraph essay.
- Objectives
 - Explain how major events are related to one another in time.
 - Construct various timelines of key events, people, and periods of the historical era they are studying.
 - Frame questions that can be answered by historical study and research.
 - Assess the credibility of primary and secondary sources and draw sound conclusions from them.
 - Explain the central issues and problems from the past, placing people and events in a matrix of time and place.

7th Grade Social Studies B Syllabus

- Understand and distinguish cause, effect, sequence, and correlation in historical events, including the long- and short-term causal relations.
- Explain the sources of historical continuity and how the combination of ideas and events explains the emergence of new patterns.
- Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.
- Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Schedule of Work

Unit 1 Early Modern Asia

- Lesson 1: Korea
- Lesson 2: East and Southeast Asia
- Lesson 3: Persia and India
- Lesson 4: Ottoman Empire
- Lesson 5: Russia

Unit 2 Renaissance

- Lesson 6: Trade and Travel
- Lesson 7: Humanism
- Lesson 8: Renaissance Art
- Lesson 9: Renaissance Achievements
- Lesson 10: Scientific Revolution

Unit 3 Reformation

- Lesson 11: Problems within the Catholic Church
- Lesson 12: Major Figures in the Reformation
- Lesson 13: Protestantism

7th Grade Social Studies B Syllabus

- Lesson 14: Counter-Reformation
- Lesson 15: Medieval Spain

Unit 4 Age of Exploration

- Lesson 16: Early European Explorers
- Lesson 17: New Lands
- Lesson 18: Colonies in the Americas
- Lesson 19: European Trade
- Lesson 20: Old Religions and the New World

Unit 5 Revolution and Enlightenment

- Lesson 21: Enlightenment Thinkers
- Lesson 22: Revolution in Europe
- Lesson 23: Enlightened Absolutism
- Lesson 24: 17th and 18th Century European Society
- Lesson 25: US Revolutionary War

Unit 6 Review and Final Exam

- Lesson 26: Unit 1 Review
- Lesson 27: Unit 2 Review
- Lesson 28: Unit 3 Review, Vocabulary Review
- Lesson 29: Unit 4 Review, Vocabulary Exam
- Lesson 30: Unit 5 Review, Final Exam

8th Grade Social Studies A Syllabus

Welcome to Early American History A! This course will take students on a journey through the origins of the United States of America.

Students will begin by exploring how American Indian societies lived in their environments. Next, they will examine reasons for European exploration and settlement in North America. From there, students will explore the development of the British colonies and the causes behind the American Revolution. They will learn how the Patriots were able to defeat Great Britain and achieve independence. They will be able to name the documents that define the democratic nature of our American republic. They will learn why the Declaration of Independence and the Constitution are so revolutionary.

The course will then take students through the presidencies of four Founding Fathers: George Washington, John Adams, Thomas Jefferson, and James Madison. During this time, the country faced internal troubles. These included rebellions, conflicts with American Indians, and the birth of political parties. Early in its existence, America had to prove itself again through the War of 1812.

Americans started celebrating the Fourth of July and were feeling patriotic during the Era of Good Feelings. But divisions over slavery and states' rights added to another trend – sectionalism. Students will learn how the Missouri Crisis and the Nullification Crisis showed major sectional differences. They will also explore how Andrew Jackson redefined the role of the president.

Lastly, students will explore the major economic and social changes of the mid-19th century. The Market Revolution, the Second Great Awakening, and the transcendental movement spurred great changes. These periods saw major social reform movements that transformed America. But women, African Americans, and other groups were still kept from power. Throughout this course, students will create a biography project that will let them make a History book profile for a key historical figure.

Throughout the course, students will examine and analyze readings, biographies, videos and other materials that paint a picture of historical topics. Discussions with peers will help students think creatively and critically about topics. The projects that span the course are designed to develop and sharpen the students' writing skills.

Major Concepts

- Colonization
- American Revolution
- Forming a New Nation (1776–1800)
- Early 19th Century (1800–1824)
- Antebellum Era

8th Grade Social Studies A Syllabus

Course Objectives

- Analyze the different American Indian cultures by studying how they interacted with their environments.
- Analyze the causes and effects of European colonization by examining economic and religious reasons for settlement.
- Evaluate the causes and effects of the American Revolution by analyzing the aspects of the Declaration of Independence and the Constitution.
- Examine the causes and effects of the War of 1812 by analyzing relations with Great Britain.
- Analyze the relationship between the United States and American Indian tribes by studying key wars, treaties, and the Trail of Tears.
- Explore early American art and literature by studying major artists and writers.
- Analyze the role of cotton and slavery to the American economy by identifying their economic and political importance.
- Examine the growth of sectionalism by analyzing the compromises made by Henry Clay.
- Evaluate the effects of the Market Revolution by analyzing the increase in immigration, role of women, and social reforms.
- Examine the importance of individual reformers by studying their contributions and leadership.

Course Organization

This Early American History course is made up of six units, and each unit has five lessons. Each lesson presents many different ways to learn the information. Students are encouraged to check with their teachers for further information about course guidelines and grading policies.

At the beginning of each unit is a brief description of that particular unit. Each lesson begins with a list of learning objectives that describes what students should know by the end of that lesson and the topics on which they will be tested. Most of the lessons have the same format, but some activities vary or may be omitted if necessary. A typical lesson has the following activities:

- **Reading Activities** – These are required reading assignments exploring the lesson topics. Reading activities include important vocabulary terms and other interactive elements, such as annotated maps or biographies of important people in history. Following each reading assignment are workbook questions to test knowledge.
- **Visual Concepts** – Visual concepts may be lectures or animated videos. These activities review a visual concept that helps students determine how well they understand the topics that were covered.
-

8th Grade Social Studies A Syllabus

- **Discussion Board** – This is a graded activity that allows students to interact and communicate with classmates and the teacher. During this course, students will encounter multiple discussion boards and will be asked to explore content for a deeper understanding of the material.
- **Checkpoint** – This graded activity uses 10 questions to assess what students have learned in the lesson.
- **Project** – This is a graded activity that allows students to practice investigating, experimenting, and researching. This may or may not be directly related to a lesson, and it may or may not span the entire unit.
- **Unit Exam** – (Lessons 5, 10, 15, 20, 25) – This graded activity uses 30 questions to assess mastery of unit objectives.
- **Vocabulary Exam** – (Lesson 29) – This graded activity uses 30 questions to assess mastery of key terms found throughout the course.
- **Final Exam** – (Lesson 30) – This graded activity uses 50 questions to assess mastery of course curriculum.

Writing Projects

- **Project 1:** Create a biography of an early American historical figure.

Objectives

- Identify the person being researched.
- Research the person, documenting all sources used.
- Create an outline with four sections (introduction, two body paragraphs, and conclusion).
- Formulate a four-paragraph biography draft complete with a thesis statement, two supporting paragraphs, and a summary. (Submit for review.)
- Write a four-paragraph essay complete with a thesis statement, two supporting paragraphs, and a summary. (Submit for grade.)

- **Project 2:** Create a fictional social media page for the figure.

Objectives

- Explain how major events are related to one another in time.
- Construct various timelines of key events, people, and periods of the historical era they are studying.
- Gather relevant information from multiple sources.

8th Grade Social Studies A Syllabus

- Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
- Explain the central issues and problems from the past, placing people and events in a matrix of time and place.
- Understand and distinguish cause, effect, sequence, and correlation in historical events, including the long- and short-term causal relations.
- Recognize that interpretations of history are subject to change as new information is uncovered.
- Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Schedule of Work

Unit 1 Colonization

- Lesson 1: American Indian Civilizations
- Lesson 2: European Contact
- Lesson 3: Early Colonies
- Lesson 4: Colonial Economies
- Lesson 5: Politics and Culture in the Colonies

Unit 2 American Revolution

- Lesson 6: French and Indian War
- Lesson 7: British Change Colonial Policy
- Lesson 8: Independence Declared
- Lesson 9: War in the North
- Lesson 10: War in the South

Unit 3 Forming a New Nation (1776–1800)

- Lesson 11: In Search of a Constitution
- Lesson 12: A More Perfect Union
- Lesson 13: The First President
- Lesson 14: Washington’s Foreign Policy
- Lesson 15: John Adams

8th Grade Social Studies A Syllabus

Unit 4 Early 19th Century (1800-1824)

- Lesson 16: Thomas Jefferson's Presidency
- Lesson 17: War of 1812
- Lesson 18: Early American Culture
- Lesson 19: Era of Good Feelings
- Lesson 20: The South and Slavery

Unit 5 Antebellum Era

- Lesson 21: Rise of Jacksonian Democracy
- Lesson 22: Jackson's Mixed Legacy
- Lesson 23: Market Revolution
- Lesson 24: Cultural and Social Changes
- Lesson 25: Antebellum Reforms

Unit 6 Review and Final Exam

- Lesson 26: Unit 1 Review
- Lesson 27: Unit 2 Review
- Lesson 28: Unit 3 Review, Vocabulary Review
- Lesson 29: Unit 4 Review, Vocabulary Exam
- Lesson 30: Unit 5 Review, Final Exam

8th Grade Social Studies B Syllabus

Course Introduction

Welcome to Early American History B! This course will take students on a journey from early Spanish missions in western North America up to the end of the 19th century in the United States.

Students begin by exploring Spanish mission societies and their interactions with American Indians. Next, they will examine reasons for western exploration and settlement in North America. From there, students explore the development of the Mexican colonies and the causes behind the Mexican-American War and the Texas Revolution. They will also analyze the California gold rush and immigration to the West Coast.

The course then explores the continuing conflict over slavery. Students examine the Northern and Southern economies and their need for each other. Next, the abolition movement and the Compromise of 1850 further illustrate the division between North and South. A primary source review of the Calhoun/Webster debate assists students in understanding how complex the slavery issue was at the time. Later, they will read about the Fugitive Slave Act, the Underground Railroad, and Uncle Tom's Cabin.

The Civil War and Reconstruction period in the United States was a time of change. The technology, battle strategies, amendments, and state actions altered the country for decades to come. The course explores these subjects. Emancipation Proclamation and Gettysburg Address primary sources help students to understand the choices that were made at the time as well as the bigger picture of segregation after the war.

Next, students return to the expanding western United States and the rapid changes that happened because of mining, cattle, and female pioneers. The impact on American Indians is discussed as students learn how the government battles the Plains Indians through both treaties and rifles.

Lastly, students explore the major economic and social changes of the late-19th century. The Second Industrial Revolution, the labor movement, and women's suffrage spurred great changes. The Gilded Age inspired major social reform movements that transformed America. Throughout this course, students will complete research that lets them make a presentation examining the important people, events, and locations that contributed to the Civil War.

Throughout the course, students will examine and analyze readings, biographies, videos and other materials that paint a picture of historical topics. Discussions with peers will help students to think creatively and critically about topics. The projects that span the course are designed to develop and sharpen the students' writing skills.

8th Grade Social Studies B Syllabus**Major Concepts**

- **Westward Expansion**
- **Sectionalism: America Divided**
- **The Civil War**
- **Reconstruction**
- **The Gilded Age**

Course Objectives

- Explain the causes of conflict between the Mexicans and American settlers by examining the Texas Revolution.
- Trace the expansion of the United States through the Mexican-American War and explain the idea of Manifest Destiny by describing the causes, events, and impact of the war.
- Identify the economic and cultural differences between the North and South by evaluating how goods were produced in each region.
- Discuss the impact of slavery by analyzing pivotal events, including the Dred Scott decision, Lincoln's A House Divided speech, and the Lincoln/Douglas debates.
- Analyze the beginnings of the Civil War by evaluating the resources and people of the North and South.
- Analyze connections among events causing the Civil War by conducting a research project.
- Understand and distinguish cause, effect, sequence, and correlation in historical events by examining the sections of a five-paragraph essay.
- Discuss the impact of Reconstruction on the South by identifying Andrew Johnson's belief system.
- Analyze the treatment of American Indians in America by examining a timeline of events.
- Analyze the transformation of the American economy and the changing social and political conditions in the United States by examining the causes and effects of the Second Industrial Revolution.

8th Grade Social Studies B Syllabus

Course Organization

Writing Projects

- **Project 1:** Create a presentation explaining the important people, events, and locations that contributed to the Civil War.
- Objectives
 - Identify two people, two events, and one location that are being researched.
 - Research the two people, two events, and one location, documenting all sources used.
 - Create an outline with three sections (people, events, and location).
 - Formulate a six-slide draft complete with a title slide, background information, and details on how the people, events, and location contributed to the Civil War. (Submit for review.)
 - Create a final draft by analyzing comments from an instructor and adjusting as needed. (Submit for grade.)
- **Project 2:** Write a five-paragraph essay analyzing the changes and continuities in the lives of African Americans in the 19th century.
- Objectives
 - Explain how major events are related to one another in time.
 - Construct various timelines of key events, people, and periods of the historical era they are studying.
 - Gather relevant information from multiple sources.
 - Explain the central issues and problems from the past, placing people and events in a matrix of time and place.
 - Understand and distinguish cause, effect, sequence, and correlation in historical events, including the long- and short-term causal relations.
 - Recognize that interpretations of history are subject to change as new information is uncovered.
 - Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.
 - Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
 - Create an outline with five sections (introduction/thesis, three body paragraphs {change, change, continuity}, and conclusion).
 - Formulate a rough draft complete with an introduction, three body paragraphs, and a conclusion. (Submit for review.)
 - Create a final draft by analyzing comments from an instructor and adjusting as needed. (Submit for grade.)

8th Grade Social Studies B Syllabus**Schedule of Work**

Unit 1: Westward Expansion

- Lesson 1: The Mexican West
- Lesson 2: Western Trails
- Lesson 3: Texas Revolution
- Lesson 4: Mexican-American War
- Lesson 5: California and Sectionalism

Unit 2: Sectionalism: America Divided

- Lesson 6: Northern and Southern Economies
- Lesson 7: Abolition Movement
- Lesson 8: Bleeding Kansas
- Lesson 9: Slavery Debates
- Lesson 10: Lincoln's Inauguration

Unit 3: The Civil War

- Lesson 11: The War Begins
- Lesson 12: First Battles of the War
- Lesson 13: Life During the War
- Lesson 14: Turning Points of the War
- Lesson 15: Ending the War

Unit 4 Reconstruction

- Lesson 16: Reconstruction Begins
- Lesson 17: Johnson's Reconstruction Plan
- Lesson 18: Andrew Johnson's Presidency
- Lesson 19: Ulysses S. Grant
- Lesson 20: Southern Segregation

Unit 5: The Gilded Age

- Lesson 21: Moving West
- Lesson 22: Wars for Western Lands
- Lesson 23: The Second Industrial Revolution
- Lesson 24: The Labor Movement

AP EUROPEAN HISTORY**Course Description**

This AP study of European history since 1300 introduces students to economic, cultural, social and political developments. These developments played a fundamental role in shaping the world in which they live.

Second Semester will introduce students to the birth of modern political thought, Great Depression and World War II. They will study the Cold War and the collapse of communism and wrap up with the dawn of the 21st Century. Students will complete a project at the end of each unit with the final project being a critical analysis.

AP WORLD HISTORY**Course Description**

The first semester of AP World History delves into the history of mankind. Looking back to the prehistoric times, students will develop the connections between the early river valleys, the beginnings of civilizations, and governments. Through this semester, students will be introduced to concepts that will be placed on the AP examination, and will also be given multiple opportunities to practice skills necessary for the AP exam. This specific time will start from the First Agricultural Revolution to the Age of Exploration.

The second semester of AP World History is a continuation of semester one, starting with how Europe evolved from the colonies being brought into the New World. This course will continue to make connections between nations and look at the big picture concepts of the world until present day. This semester will also spend one time preparing specifically for the AP exam. Through review materials and practicing skills needed for the AP exam, students will work on being prepared for the exam.

AP WORLD HISTORY***Prerequisites***

None

Semester A***Major Concepts of this course:***

- Prehistory
-
- River Valley Civilizations
- World Religions
- Trade Routes
- Classical Empires
- Rise of Europe
- Islamic Empires
- Age of Exploration
- Modern Intellectual Revolutions

Semester B***Major Concepts of this course:***

- Industrial Revolution
- Imperialism
- Age of Revolutions
- World Wars
- Cold War
- Communism
- Modern World
- AP Review
- Women in History
- Rise of Terrorism

Civics Syllabus

Course Description

This course guides students in preparing to take the Naturalization Test designed by the United States federal government. The course is for high school students in order to fulfill the requirement for graduation. Civics: Citizenship provides students the ability to engage with the government in which they will soon participate. This course provides real-world connections between democratic ideals and practical activities.

Course Objectives

- Examine the structure and function of government in the United States.
- Explain the process of evolution and adaptation of representative democracy in the United States.
- Analyze the relationship between citizens and the government in the United States.

Required Materials

- Word Processing Software
- Internet Browser
- Media Viewer Software

Course Overview

This course is made up of six units. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the program software, while others are included for self-check purposes but not graded. It is recommended that the course instructor be contacted for further information about course guidelines and grading policies.

Civics Syllabus

Course Organization

At the beginning of each unit is a brief description of the intended learning outcomes. Following the introduction is a set of activities:

“What Should I Know?” – An introduction and brief set of questions helps prepare students for the lesson ahead, showing what they already may know and what they should pay attention to gaining knowledge about.

Lesson Content – This typically includes interactive activities, readings, videos, and practice activities. Some of these have graded Workbook questions. Key terms are embedded within the readings.

Vocabulary Review – An interactive presentation helps students to review the key terms they encountered in the lesson.

Checkpoint – This graded activity uses 10 questions to assess mastery of lesson objectives. The Checkpoint may be taken up to three times.

“What Did I Learn?” – This end-of-lesson activity is designed to review the information and content learned.

Civics Syllabus

Schedule of Work

Unit 1: Principles of American Democracy

- The Constitution
- The Amendments
- Declaration of Independence
- United States Economic System
- “Rule of Law”

Unit 2: System of Government

- The Legislative Branch
- More about Congress
- The Executive Branch
- The Courts

Unit 3: Rights and Responsibilities

- Rights and Responsibilities
- Citizenship
- Taxes
- Selective Service

Civics Syllabus

Unit 4: American History

- Colonial Period and Independence
- 1800s
- Recent American History
- Native Americans
- Immigration

Unit 5: America as a Nation

- Geography
- Symbols
- Holidays
- Languages

Unit 6: Review and Exam

- Review of Units 1-3
- Review of Units 4-5
- Final Exam

Economics Syllabus

Economics explores principles that allow students to make informed decisions about personal finance. In this course, students develop a broader understanding of national and international economic decisions and policies. These principles will help students understand why economics impacts history, the distribution of wealth, and the quality of life for all members of society.

Unit 1 begins with an overview of personal finance topics. Students begin with an analysis of basic everyday activities such as creating a budget and using debit and credit cards. They will also tackle more complex choices such as discussing taxes and saving and investing for the future.

Next, students learn a general overview of economics, including information on scarcity, economic systems around the world, and how simple choices interact with and alter the economy locally, nationally, and globally.

The next unit examines microeconomics. Microeconomics examines the choices and decisions made by businesses and consumers and how these choices affect the economy. This unit also explores important economic principles such as the laws of supply and demand, the way prices are determined in a marketplace, and the role of unions.

Finally, macroeconomics (the study of the big picture, such as governments) will be the focus of the last two units. These units explore how the government determines tax policies, overall spending, and the handling of debt. Additionally, the role of the Federal Reserve and international trade in the global economy will be explored.

Throughout the course, students examine and analyze readings, biographies, videos and other materials that paint a picture of economic topics. Discussions with peers will help students to think creatively and critically about topics. The projects that span the course are designed to develop and sharpen the students' writing skills.

Course Objectives

- Explain how education, career choices, and family obligations affect future income by analyzing potential lifestyle decisions.
- Compare the advantages and disadvantages of using various forms of credit and the determinants of credit history by assessing the pros and cons of each.
- Analyze the implications of scarcity by examining the causal relationship between scarcity and the need for choices.
- Explain the roles of property rights, competition, and profit in a market economy by analyzing the characteristics of the mixed market economy in the United States.
- Evaluate how markets function by examining the laws of supply and demand.
- Assess the interdependence of households and firms and how they are both affected by trade, exchange, money, and banking by examining the role of entrepreneurs in a market economy and how profit is an incentive that leads entrepreneurs to accept risks of business failure.

Economics Syllabus

- Explain the effects of monetary policy on unemployment, inflation, and economic growth by examining inflation, unemployment, and gross domestic product statistics.
- Explain characteristics of market, command, and mixed economic systems, including the roles of production, distribution, and consumption of goods and services, by examining the similarities and differences among economic systems.
- Examine the effects of international trade on the United States and other nations by analyzing trade agreements (e.g., North American Free Trade Agreement).

Course Organization

This economics course is made up of six units, and each unit has five lessons. Each lesson presents many different ways to learn the information. Students are encouraged to check with their teacher for further information about course guidelines and grading policies.

At the beginning of each unit is a brief description of that particular unit. Each lesson begins with a list of learning objectives that describes what students should know by the end of that lesson and the topics on which they will be tested. Most of the lessons have the same format, but some activities vary or may be omitted if necessary. A typical lesson has the following activities:

- **Reading Activities** — These are required reading assignments exploring the lesson topics. Reading Activities include important vocabulary terms and other interactive elements, such as annotated maps or biographies of important people in history. Following each reading assignment are workbook questions to test knowledge.
- **Visual Concepts** — Visual Concepts may be lectures or animated videos. These activities review a visual concept that helps students determine how well they understand the topics that were covered.
- **Discussion Board** — This is a graded activity that allows students to interact and communicate with classmates and the teacher. During this course, students will encounter multiple discussion boards and will be asked to explore content for a deeper understanding of the material.
- **Checkpoint** — This graded activity uses 10 questions to assess what students have learned in the lesson.
- **Project** — This is a graded activity that allows students to practice investigating, experimenting, and researching. This may or may not be directly related to a lesson, and it may or may not span the entire unit.
- **Unit Exam** — (Lessons 5, 10, 15, 20, 25) – This graded activity uses 30 questions to assess mastery of unit objectives.
- **Vocabulary Exam** — (Lesson 29) – This graded activity uses 30 questions to assess mastery of key terms found throughout the course.
- **Final Exam** — (Lesson 30) – This graded activity uses 50 questions to assess mastery of course curriculum.

Economics Syllabus

Schedule of Work

Unit 1 Personal Finance

- Lesson 1: Personal Finance and Advertising
- Lesson 2: Budgets and Goal Setting
- Lesson 3: Banking
- Lesson 4: Credit
- Lesson 5: Building and Protecting

Unit 2 Foundations of Economics

- Lesson 6: Economics
- Lesson 7: Economic Systems
- Lesson 8: American Economy: A Mixed Market
- Lesson 9: Economic Functions of Government
- Lesson 10: Business Organizations

Unit 3 Microeconomics

- Lesson 11: Demand
- Lesson 12: Supply
- Lesson 13: The Price System
- Lesson 14: Competition and Market Structures
- Lesson 15: Labor

Economics Syllabus

Unit 4 Macroeconomics Institutions

- Lesson 16: Taxation
- Lesson 17: Government Spending
- Lesson 18: Deficit
- Lesson 19: Evolution of Money
- Lesson 20: Financial System

Unit 5 Macroeconomics Policies

- Lesson 21: Measuring the Nation's Output
- Lesson 22: Business Cycles, Inflation, and Unemployment
- Lesson 23: Federal Reserve
- Lesson 24: Trade
- Lesson 25: Foreign Economic Development

Unit 6 Review and Final Exam

- Lesson 26: Unit 1 Review
- Lesson 27: Unit 2 Review
- Lesson 28: Unit 3 Review, Vocabulary Review
- Lesson 29: Unit 4 Review, Vocabulary Exam
- Lesson 30: Unit 5 Review, Final Exam

US Government Syllabus

This course guides students in preparing to become engaged citizens within the United States government at all levels. The course is for high school students in order to fulfill the requirement for graduation. US Government provides students the ability to engage the government they will soon participate in. This course provides real-world connections between democratic ideals and practical activities.

Course Objectives

What are learning objectives? They are the skills, knowledge, and attitudes students will gain from their schoolwork. Upon completing this course, students will be able to

- Explain the ancient roots of government (including Greek and Roman) by tracing the influence they have had on modern government.
- Identify the major contributions of Locke, Montesquieu, Machiavelli, and Blackstone to western government by describing how each one influenced political thought.
- Describe the influence of the English Bill of Rights on American government by identifying the political changes this document signified.
- Compare and contrast different forms of government by constructing expository paragraphs using historical data to support your ideas.
- Use historical research and study to evaluate the different forms of government in human history.
- Analyze the text of the Declaration of Independence by summarizing its main points.
- Compare and contrast the Articles of Confederation and the US Constitution by indicating the advantages of each one.
- Analyze the significance of the Bill of Rights by describing its creation and purpose.
- Analyze the complex influence that slavery, states' rights, and the civil rights movement have had on the US Constitution.
- Identify the duties and responsibilities of the various levels of government (municipal, county, state, tribal, and national).
- Determine the causes and effects of the checks and balances system in the federal government of the United States by outlining the interactions among the three branches.
- Examine the collapse of the Soviet Union by analyzing the failure of economic and social attempts at reform in the 1980s.
- Determine the legal route to gaining official citizenship in the United States of America by exploring the process of naturalization, including the citizenship test.

US Government Syllabus

Course Organization

This US Government course is made up of six units, and each unit has five lessons. Each lesson presents many different ways to learn the information. Students are encouraged to check with their teachers for further information about course guidelines and grading policies.

At the beginning of each unit is a brief description of that particular unit. Each lesson begins with a list of learning objectives that describes what students should know by the end of that lesson and the topics on which they will be tested. Most of the lessons have the same format, but some activities vary or may be omitted if necessary. A typical lesson has the following activities:

- **Reading Activities**—Required reading assignments explore the lesson topics. Reading assignments include important vocabulary terms and other interactive elements, such as annotated maps. Following each reading assignment are workbook questions to test knowledge.
- **Primary Sources**—Primary sources are historical documents that provide a firsthand account of material that is directly connected to the content.
- **Visual Concepts**—Visual Concepts may be videos or infographics. These activities review a visual concept that helps students determine how well they understand the concepts that were covered.
- **Discussion Board**—This is a graded activity that allows students to interact and communicate with classmates and the teacher. During this course, students encounter multiple discussion boards and are asked to explore content for a deeper understanding of the material.
- **Checkpoint**—This graded activity uses questions to assess what students have learned in the lesson.
- **Project**—This is a graded activity that allows students to practice investigating, experimenting, and researching. This is directly related to multiple lessons and spans multiple units.
- **Unit Exam** (Lessons 5, 10, 15, 20, 25)—This graded activity uses 20 questions to assess mastery of unit objectives.
- **Final Exam** (Lesson 30)—This graded activity uses 30 questions to assess mastery of course curriculum.

US Government Syllabus

Schedule of Work

Unit 1: The History of Civics and Government

- Lesson 01: The History of Government
- Lesson 02: Feudalism and Change
- Lesson 03: Enlightenment
- Lesson 04: Colonial Governments
- Lesson 05: Creating a New Government

Unit 2: Constitution and Federation

- Lesson 06: The Political Party Process
- Lesson 07: Federal Government and the States
- Lesson 08: Slavery, States' Rights, and Segregation
- Lesson 09: Civil Liberties and Citizenship
- Lesson 10: Political Action

Unit 3: Citizens and Their Government

- Lesson 11: Local Government
- Lesson 12: County Government
- Lesson 13: State Government
- Lesson 14: Tribal Government
- Lesson 15: National Government

World History A Syllabus

World History (1 of 2) explores key events and global historical developments, from hunter-gatherer societies to the Industrial Revolution. It begins with an analysis of early prehistoric people from the Paleolithic era and the ancient cultures of Mesopotamia. Students will follow the rise and fall of early empires, then consider the fall of the Roman Empire and its aftermath. Continuing through the Middle Ages, students will analyze the Crusades, feudalism, the plague, and Asian empires.

Then, they will explore the effects of the Renaissance and Protestant Reformation on human culture and analyze conflicts between the Roman Catholic Church and its reformers (both Protestant and Catholic). Students will then move on to the Age of Discovery, studying

- European explorers seeking new trade routes to Asia
- the discovery of the Americas
- the rise of joint-stock companies
- the slave trade
- the emergence of the American colonies

Then, students will analyze important revolutions in history, including Latin American revolutions, the Scientific Revolution and the Enlightenment, the American and French Revolutions, and the Industrial Revolution.

Throughout the course, students will examine and analyze materials that describe historical periods. They will interact with primary and secondary sources: readings, biographies, and other materials that paint a picture of world history and encourage students to explore historical topics. Discussions with peers will help students think creatively and critically about history. The project that spans the course is designed to develop and sharpen the students' writing skills.

World History A Syllabus

Course Objectives

- Analyze the Agricultural Revolution by examining how it influenced the development of human settlements, society, religion, and culture.
- Analyze ancient empires and their impact on later civilizations by examining their contributions to government, citizenship, religion, and culture.
- Assess the impact of the Roman Catholic Church by examining patterns of change in European society in the 12th to 16th centuries.
- Evaluate the effects of the Renaissance by analyzing how it led to scientific and artistic innovations.
- Identify conflicts between the Roman Catholic Church and Protestant and Catholic reformers by examining key religious issues of the Reformation era.
- Analyze the Age of Discovery by examining how trade and religion motivated European nations to expand and colonize.
- Examine the historical developments of the Scientific Revolution and Enlightenment by evaluating its lasting effect on religious, political, and cultural institutions.
- Explain the American, French, and Latin American revolutions by analyzing their impact on democracy.
- Identify how the Industrial Revolution impacted society by examining significant inventors, inventions, and working and living conditions of workers.

World History A Syllabus

Course Organization

This world history course is made up of six units, with each unit having five lessons. Each lesson presents many different ways to learn the information. Students are encouraged to check with their teachers for further information about course guidelines and grading policies.

At the beginning of each unit is a brief description of that particular unit. Each lesson begins with a list of learning objectives that describes what students should know by the end of that lesson and the topics on which they will be tested. Most lessons feature the same kinds of activities, but some lessons will vary. A typical lesson has the following activities:

- **Reading Activities:** These required reading assignments explore the lesson topics. Reading assignments include important vocabulary terms and other interactive elements, such as annotated maps or biographies of important people in history. Following each reading assignment are workbook questions to test knowledge.
- **Primary Sources:** Primary sources are historical documents that provide a firsthand account of material that is directly connected to the content.
- **Visual Concepts:** Visual Concepts may be videos or infographics. These activities review a visual concept that helps students determine how well they understand the concepts that were covered.
- **Discussion Board:** These graded activities allow students to interact and communicate with classmates and the teacher. During this course, students will encounter multiple discussion boards and are asked to explore content for a deeper understanding of the material.
- **Checkpoint:** These graded activities use questions to assess what students have learned in the lesson.
- **Project:** This is a graded activity that allows you to practice investigating, experimenting, and researching. This is directly related to multiple lessons and spans multiple units.
- **Unit Exam:** These graded activities appear in Lessons 5, 10, 15, 20, and 25. They use 20 questions to assess mastery of unit objectives.
- **Final Exam:** This graded activity in Lesson 30 uses 30 questions to assess mastery of course curriculum.

World History A Syllabus

Schedule of Work

Unit 1: Early Civilizations

- Lesson 1: Early Migration and Settlement
- Lesson 2: Mesopotamia
- Lesson 3: Ancient Greece, Rome, and Egypt
- Lesson 4: Ancient Asia
- Lesson 5: Europe, the Americas, and Africa

Unit 2: World in Transition

- Lesson 6: Byzantine Empire
- Lesson 7: Islamic Empire
- Lesson 8: Middle Ages and Feudalism
- Lesson 9: Crusades
- Lesson 10: China

Unit 3: Renaissance and Reformation

- Lesson 11: Southern Renaissance
- Lesson 12: Northern Renaissance
- Lesson 13: Protestant Reformation
- Lesson 14: The Counter-Reformation
- Lesson 15: A Brave New World

Unit 4: Exploration, Encounters, and Exchanges

- Lesson 16: Age of Discovery
- Lesson 17: Asian and African Exploration
- Lesson 18: Europe Claims the Americas
- Lesson 19: Joint-Stock Companies and Slave Trade
- Lesson 20: American Colonies

World History A Syllabus

Unit 5: Revolution

- Lesson 21: Scientific Revolution
- Lesson 22: Enlightenment
- Lesson 23: American and French Revolutions
- Lesson 24: Latin American Revolutions
- Lesson 25: Industrial Revolution

Unit 6: Review and Final Exam

- Lesson 26: Unit 1 Review
- Lesson 27: Unit 2 Review
- Lesson 28: Unit 3 Review
- Lesson 29: Unit 4 Review
- Lesson 30: Unit 5 Review, Final Exam

World History B Syllabus

World History (2 of 2) traces the developments of the last 250 years that have shaped the modern world. It begins by examining the origins of modern Western imperialism—or the building of empires. This includes the influence of the Industrial Revolution and reactions to groups based on culture and ethnicity. Students will analyze the deep cultural, economic, and political impacts that imperialism had on Africa and Asia, including the rise of Japan.

From there, they examine how imperialism and nationalism contributed to the outbreak of World War I, and how the Treaty of Versailles contributed to the rise of fascism in Europe and the start of World War II. They will also analyze the changing, destructive nature of 20th century warfare and atrocities such as the Armenian Genocide and the Holocaust.

Next, students will analyze the global struggle between different ideas supported by the United States and the Soviet Union. Students will see how the forces of capitalism and democracy fought against Communism in what became known as the Cold War. This includes conflicts in places such as Korea, Vietnam, newly independent African countries, and many Latin American nations.

Finally, the course will evaluate the challenges in our modern world, including pressing environmental issues, recent acts of terrorism and genocide, and cybercrimes. The course will also explore the increasing interconnectedness of the world economy and cultures by examining the Internet's influence on trade and cultural exchange.

Throughout the course, students examine and analyze materials that describe historical periods and interact with primary and secondary sources, readings, and other materials that paint a picture of world history. They engage in class discussions with peers that require them to think creatively and critically about topics. Lastly, the course includes a project that involves research and writing.

World History B Syllabus

Course Objectives

What are learning objectives? They are the skills, knowledge, and attitudes students will gain from their schoolwork. Upon completing this course, students will be able to

- Analyze the development of New Imperialism by considering the influence of previous colonization in the Americas, the Industrial Revolution, and ethnocentrism.
- Evaluate the positive and negative effects of New Imperialism by identifying how it has helped shape the development of large parts of Africa and Asia.
- Evaluate the causes of World War I by analyzing how imperialism and nationalism contributed to a climate of competition and tension.
- Analyze the causes of World War II by examining the Treaty of Versailles and the economic crisis of the Great Depression on the rise of fascism.
- Identify the changing nature of warfare by examining new, more destructive weapons and methods in the 20th century.
- Identify major atrocities committed in the 20th century by examining the causes and effects of the Armenian Genocide, the Holocaust, and other modern genocides.
- Examine how the Cold War contributed to developments in Africa, Asia, and Latin America by considering the impacts of proxy conflicts, economic and military aid, and alliances.
- Identify important modern global challenges by examining environmental issues, terrorism, and cybercrimes.
- Analyze how the invention of the Internet has changed society by examining its influence on the increase in trade and cultural exchange.
- Analyze the emergence of globalization throughout the world and the policies implemented by various nations to address political, economic, environmental, and social issues that have arisen as a result.
- Analyze historical data from a variety of media representing both primary and secondary sources in order to generate understanding and compare that data with current events through the interpretation of historical information and artifacts.

World History B Syllabus

Course Organization

This World History course is made up of six units, and each unit has five lessons. Each lesson presents many different ways to learn the information. Students are encouraged to check with their teachers for further information about course guidelines and grading policies.

At the beginning of each unit is a brief description of that particular unit. Each lesson begins with a list of learning objectives that describes what students should know by the end of that lesson and the topics on which they will be tested. Most of the lessons have the same format, but some activities vary or may be omitted if necessary. A typical lesson has the following activities:

- **Reading Activities** — Required reading assignments explore the lesson topics. Reading assignments include important vocabulary terms and other interactive elements, such as annotated maps. Following each reading assignment are workbook questions to test knowledge.
- **Primary Sources** — Primary sources are historical documents that provide a firsthand account of material that is directly connected to the content.
- **Visual Concepts** — Visual Concepts may be videos or infographics. These activities review a visual concept that helps students determine how well they understand the concepts that were covered.
- **Discussion Board** — This is a graded activity that allows students to interact and communicate with classmates and the teacher. During this course, students encounter multiple discussion boards and are asked to explore content for a deeper understanding of the material.
- **Checkpoint** — This graded activity uses questions to assess what students have learned in the lesson.
- **Project** — This is a graded activity that allows you to practice investigating, experimenting, and researching. This is directly related to multiple lessons and spans multiple units.
- **Unit Exam** — (Lessons 5, 10, 15, 20, 25) – This graded activity uses 20 questions to assess mastery of unit objectives.
- **Vocabulary Exam** — (Lesson 29) – This graded activity uses 30 questions to assess mastery of key terms found throughout the course.
- **Final Exam** — (Lesson 30) – This graded activity uses 30 questions to assess mastery of course curriculum.

World History B Syllabus**Schedule of Work**Unit 1 Imperialism

- Lesson 1: Colonization to Imperialism
- Lesson 2: The Little Tyrant
- Lesson 3: Age of Imperialism
- Lesson 4: Impacting the Colonies
- Lesson 5: Colonial Reaction

Unit 2 Nationalism

- Lesson 6: Nationalism
- Lesson 7: The Great War
- Lesson 8: The Eastern Front
- Lesson 9: The Armenian Genocide
- Lesson 10: The Great War Ends

Unit 3 Global Conflicts

- Lesson 11: Between the Wars
- Lesson 12: Beginning of World War II
- Lesson 13: European Theater
- Lesson 14: Holocaust
- Lesson 15: Pacific Theater

Unit 4 The Cold War

- Lesson 16: The Cold War Begins
- Lesson 17: Korean War
- Lesson 18: Cold War Competition
- Lesson 19: Vietnam War
- Lesson 20: Collapse of the Soviet Union

World History B SyllabusUnit 5 The World Today

- Lesson 21: Power Shifts
- Lesson 22: Terrorism
- Lesson 23: Interdependence
- Lesson 24: Global Issues
- Lesson 25: Technological Terrors

Unit 6 Review and Final Exam

- Lesson 26: Unit 1 Review
- Lesson 27: Unit 2 Review
- Lesson 28: Unit 3 Review
- Lesson 29: Unit 4 Review, Vocabulary Exam
- Lesson 30: Unit 5 Review, Final Exam

**APPENDIX A
CURRICULUM**

E.5 Syllabi

It includes the syllabi for the Virtual Preparatory Academy of Pennsylvania curriculum in the following subject areas:

- a. English Language Arts K-12
- b. Mathematics K-12
- c. Science K-12
- d. Social Studies K-12
- e. General Electives K-12
- f. Health and Physical Education
- f. World Languages

General Electives

K-12

KINDERGARTEN ARTS AND CRAFTS**Course Description****Semester A**

This course provides a foundation for children’s inherent artistic imagination and creativity by sharing the basics of art and making art. Students are introduced to lines, circles, recognizing and using shapes, creating a collage and concepts such as symmetry.

Young artists will also explore a variety of media such as pastels, watercolors, crayons, tempera, and pencil drawing.

A particular emphasis on this course is on creating works of art. In this semester students will work with clay, draw with pastels, make fingerprint flowers, draw barns and animals using shapes and recognizing lines using the student’s name.

Semester B

Emphasis in the second semester students will be placed on applying what the students have learned to make more detailed works of art.

Among the projects this semester students will be creating a bird feeder, make pig puppets, craft paper flowers, make potpourri, craft a heart collage, construct a wind chime, and press flowers.

Course Requirements**Grade Level**

Kindergarten

*** Materials**

- Crayons
- Yellow, blue, red, and black markers
- Multimedia paper
- Watercolor paper
- Pastels
- 11×14 or large 90lb watercolor paper
- Tempera paint in primary colors of red, yellow and blue
- Brush – 3/4” round
- Water color brush

KINDERGARTEN ARTS AND CRAFTS

- Craft stick
- Pine cone, bird seed
- Peanut butter, rice, beans
- Household items such as glue, scissors, tape, ruler, paper towels, cardboard, masking tape, straws

Duration

2 Semesters

Prerequisites

none

Technology Skills

- Internet Navigation
- Word Processing Skills
- Email Communication (with assistance of parent or teacher)

Semester A***Major Concepts:***

- Lines
- Drawing circles
- Identifying shapes
- Primary colors

Semester B***Major Concepts:***

- Collage
- Crafts
- Weaving Bubble painting

1ST GRADE ARTS AND CRAFTS SYLLABUS**Course Description****Semester A**

This course provides a foundation for children's inherent artistic imagination and creativity by sharing the basics of art and making art. Students are introduced to primary colors, the color wheel, shapes such as lines and circles, and concepts such as symmetry.

Young artists will also explore a variety of media such as pastels, watercolors, crayons, tempera, and pencil drawing.

A particular emphasis on this course is on creating works of art. In this semester students will work create a watercolor tree, use a printing block, produce weather painting, and produce a watercolor painting.

Semester B

Emphasis in the second semester students will be placed on applying what the students have learned to make more detailed works of art.

In this semester students will be creating colorful calendars, stenciling, fashioning intricate flower drawings, revisiting symmetrical objects, and mixing colors.

This course will provide students with opportunities to experience many different forms of arts and to express their imagination while learning valuable skills. Each student is an individual with unique ideas and talents. Our goal is to provide each student an opportunity for personal growth for themselves and the world in which we live.

1ST GRADE ARTS AND CRAFTS SYLLABUS**Course Requirments*****Grade Level***

1

****Materials***

- Poster paper
- Watercolor paper
- Pastel/charcoal paper
- Tempera paint in primary colors of red, yellow and blue
- Brush – 3/4" round
- Water color brush
- Pastels
- Crayons
- Yellow, blue, red, and black markers
- Household items such as glue, scissors, tape, ruler, cardboard

Basic School Supplies**First Grade Materials Kit**

**Materials listed should be acquired by the student prior to beginning work in the course.*

Duration

2 Semesters

Prerequisites

None

Technology Skills

- Internet Navigation
- Word Processing Skills
- Email Communication (with assistance of parent or teacher)

1ST GRADE ARTS AND CRAFTS SYLLABUS

Semester A

Major Concepts:

- Primary Colors
- Color Wheel
- Symmetry
- Lines and Shapes
- Nature and Art

Semester B

Major Concepts

- Form drawing
- Mixing colors
- Calendar
- Stenciling
- Wet crayons and wet paper

Course Syllabus

Course Code: EDL084

Animation

Course Description

Do you wonder what it would be like to create the next blockbuster animated movie or do you want to make the next big video game? Do you have an eye for drawing, technology, and timing? If so, Animation is the course for you! You will learn how to use animation tools to conceptualize and bring your creations to life. You'll learn the ins and outs of creating 2D and 3D animation, from start to finish. You'll even begin working on our own design portfolio and get hands on experience with creating your own animation projects. Learning about Animation could lead to a thriving career in the growing world of technology and animation.

Required Materials

The following free, cross-platform programs will need to be downloaded for use during the course (programs will run on Windows XP and higher, Linux and Mac computers):

- Tupi 2D Magic
- DaVinci Resolve
- Blender

Required Computer System

- 2 GB of RAM
- An OpenGL 2.1 compatible graphics card or chip.
- 32-bit dual core
- 2Ghz CPU

Additional Materials:

- Paper/pencil

Recommended Items & Computer System Requirements:

- Computer monitor
- Keyboard that includes a number pad
- 64-bit quad core CPU
- 8 GB of RAM
- HD display
- Three-button mouse
- OpenGL 3.2 compatible graphics card with 2 GB of RAM

Materials Required for Unit 1:

- Modeling clay (optional)
- Camera (can be an actual camera or a camera on a tablet or device)
- Scissors
- Stiff paper or cardboard
- Glue or tape
- Thumbtack or pushpin
- Mirror

Table of Contents

Unit 1: Basic of Animation	3
Unit 2: Hand Drawn Animation	4
Unit 3: Computer Animation and CGI	5
Unit 4: Digital 2D Animation and Rotoscopy	6
Unit 5: Human Anatomy and Form.	7
Unit 6: Animated Motion	8
Midterm Exam	9
Unit 7: Intro to Blender	10
Unit 8: Character Modeling.	11
Unit 9: Character Animation	12
Unit 10: Storytelling	13
Unit 11: Video, Music & Sound.	14
Unit 12: Careers in Animation	15
Final Exam	16

Unit 1: Basic of Animation

Unit Summary

Drawing pictures and making them move is nothing short of magic. Since at least the 1600s, people have been experimenting and inventing ways to make images move. In fact, it is these cool experiments, which you can replicate yourself, that have led us to the modern era of fantastic 3D computer generated animated movies! Get ready to take a peek behind the scenes as we track the history of animation magic.

Learning Objectives

- Trace the origins and early history of the art of animation.
- Explore how the eye and brain process moving images.
- Compare the differences between past animation techniques and current animation technologies.
- Understand the differences between various types of animation.

Assignments

Unit 1 Text Questions	Homework	10 points
Unit 1 Activity	Homework	15 points
Unit 1 Discussion Assignment 1	Discussion	5 points
Unit 1 Discussion Assignment 2	Discussion	5 points
Unit 1 Quiz	Quiz	15 points

Unit 2: Hand Drawn Animation

Unit Summary

Humans talk with their hands, and one way this happens is by communication through drawings. Traditional animation is hand-drawn animation, which evolved from the exciting invention of photography and motion pictures. We will trace these developments all the way through the classic principles of animation developed by the animators at Disney Studios.

Learning Objectives

- Explain how drawn animation evolved from early picture viewing devices.
- Understand and apply Disney's 12 Principles of Animation.
- Use key terms of hand-drawn animation.
- Appreciate the world of animation beyond the United States.
- Include design elements in your drawings.

Assignments

Unit 2 Text Questions Unit 2	Homework	10 points
Online Lab Questions	Homework	10 points
Unit 2 Activity 1	Homework	15 points
Unit 2 Activity 2	Homework	15 points
Unit 2 Activity 3	Homework	15 points
Unit 2 Discussion Assignment 1	Discussion	5 points
Unit 2 Discussion Assignment 2	Discussion	5 points
Unit 2 Quiz	Quiz	15 points

Unit 3: Computer Animation and CGI

Unit Summary

How do they do that? Modern animated films are a complete wonder to look at and incredibly complex to make. With so many artists performing intricate jobs to create realistic characters, backgrounds, and movement, it takes organization and leadership to bring it all together into a finished film. From the tiniest pixels to the huge computing power needed for post-production, we'll explore how CGI films are made.

Learning Objectives

- Understand the difference between a bitmap image and a vector image.
- Trace the process of CGI production from idea to theater.
- Discuss the pros and cons of different production processes.
- Define and explain kinematics and animatics.
- Identify the key departments in an animation studio.

Assignments

Unit 3 Text Questions	Homework	10 points
Unit 3 Activity 1	Homework	15 points
Unit 3 Activity 2	Homework	15 points
Unit 3 Discussion Assignment 1	Discussion	5 points
Unit 3 Discussion Assignment 2	Discussion	5 points
Unit 3 Quiz	Quiz	15 points

Unit 4: Digital 2D Animation and Rotoscopy

Unit Summary

Now's your chance to join the ranks of talented animators! Everyone can try their hand at this fun art form and increase their communication skills and artistic expression while learning a simple 2D animation program. Pull out your photos and videos---you can use these along with your drawings to make cool mini-animation while you explore Tupi 2D Magic, a 2D animation program that will allow you to put everything you've learned into action!

Learning Objectives

- Create animation sequences with layered drawings and backgrounds.
- Trace videos to make rotoscoped sequences.
- Use the important functions of 2D animation software.
- Export your animated videos to share with the world.
- Apply graphical tools to improve your digital drawings.

Assignments

Unit 4 Text Questions	Homework	10 points
Unit 4 Activity	Homework	15 points
Unit 4 Discussion Assignment 1	Discussion	5 points
Unit 4 Discussion Assignment 2	Discussion	5 points
Unit 4 Quiz	Quiz	15 points

Unit 5: Human Anatomy and Form

Unit Summary

Animated characters aren't real, so animators don't really need to understand the human body, right? WRONG! You actually DO need to know how to draw the human form, with bone structure and muscles, and appreciate real world body mechanics in order to draw believable, but also stylized, animated characters. Together, we'll tackle the basics and then you can let your imagination fly, while taking your audience along with you for the ride.

Learning Objectives

- Draw the human body in proportion.
- Identify and create the walk cycle for animation.
- Discuss how poses communicate emotion.
- Develop your own animated characters based on real anatomy.

Assignments

Unit 5 Text Questions	Homework	10 points
Unit 5 Online Lab Questions	Homework	10 points
Unit 5 Activity	Homework	15 points
Unit 5 Discussion Assignment 1	Discussion	5 points
Unit 5 Discussion Assignment 2	Discussion	5 points
Unit 5 Quiz	Quiz	15 points

Unit 6: Animated Motion

Unit Summary

Jump around. Walk. Run. Smile. Shake your head. Tap your foot. We move all the time, but how does it look in a sequence of images? Movement in animation must conform roughly to the laws of gravity and motion of the real world but can be used to express emotions, plot points, and character development. Studying natural movement will teach you to translate movement into animation, but you can still get creative and give that movement personality.

Learning Objectives

- Understand the Laws of Motion and Gravity.
- Apply physics principles to the movement of your characters.
- Create facial expressions that convey emotions.
- Turn your characters into first-rate actors.

Assignments

Unit 6 Text Questions	Homework	10 points
Unit 6 Activity 1	Homework	15 points
Unit 6 Activity 2	Homework	15 points
Unit 6 Discussion Assignment 1	Discussion	5 points
Unit 6 Discussion Assignment 2	Discussion	5 points
Unit 6 Quiz	Quiz	15 points

Midterm Exam

Learning Objectives

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first six units in this course (Note: You will be able to open this exam only one time.)

Assignments

Midterm Exam	Exam	50 points
Midterm Discussion Assignment	Discussion	5 points

Unit 7: Intro to Blender

Unit Summary

Have you ever watched a modern animated movie and wondered how they created those incredibly detailed and compelling characters and worlds? With extremely realistic lighting, physics, and even hair, fur, and skin, the world of 3D animation has become truly rich and visually compelling. In this unit, we will learn about the popular, open source, yet powerful, 3D modeling and animation software called Blender.

Learning Objectives

- Explain the difference between motion capture and keyframe animation.
- Grasp the power of modern animation techniques, including bones, muscles, and rigging.
- Understand the process of simulating water, hair, and other dynamics.
- Navigate the Blender interface.
- Create simple animations using parenting, movement, rotation and scaling along with keyframes.

Assignments

Unit 7 Text Questions	Homework	10 points
Unit 7 Activity	Homework	15 points
Unit 7 Discussion Assignment 1	Discussion	5 points
Unit 7 Discussion Assignment 2	Discussion	5 points
Unit 7 Quiz	Quiz	15 points

Unit 8: Character Modeling

Unit Summary

Have you ever watched an extremely vivid, polished animated movie or 3D video game and wondered to yourself: How do they create those 3D characters? We're going to begin by exploring the basic tools and techniques involved in creating the 3D models for characters, and then you'll even get to create a 3D character model of your own!

Learning Objectives

- Use various modeling techniques to create a character model.
- Hide background geometry.
- Navigate the 3D view using shortcuts.
- Switch between perspective and orthographic mode.
- Understand and apply the principles of topology.

Assignments

Unit 8 Text Questions	Homework	10 points
Unit 8 Activity	Homework	15 points

Unit 9: Character Animation

Unit Summary

At some point, you have probably watched a modern animated movie like Ice Age or Shrek, or played a modern, high-end computer game and asked yourself: How did they make those characters move so realistically, and believably? Well...you're about to find out! Get ready to take a look at the basic process involved in rigging, skinning, and animating a 3D character.

Learning Objectives

- Create an armature rig to fit a bipedal character model.
- Skin, or attach, a character model to a rig so that it deforms like skin with the movements of the various bones.
- Develop a seamless walk cycle for a rigged character model.

Assignments

Unit 9 Text Questions	Homework	10 points
Unit 9 Online Lab Questions	Homework	10 points
Unit 9 Activity	Homework	15 points
Unit 9 Discussion Assignment 1	Discussion	5 points
Unit 9 Discussion Assignment 2	Discussion	5 points
Unit 9 Quiz	Quiz	15 points

Unit 10: Storytelling

Unit Summary

Want to go to the movies? Well, why do people go? Because of the story! It draws them in, makes them care about the characters, and it lets them immerse themselves in another world. Storytelling is as old as the cavemen, and it is the best way to entertain modern humans as well. How do you make sure your story will captivate the audience? We have the secrets and the tricks right here—come along and we will tell you a story about telling a story!

Learning Objectives

- Write dialogue and action in proper film script format.
- Understand three-act script structure.
- Identify camera shots, angles, and movement.
- Create storyboards for animation.

Unit 10 Discussion Assignment 1	Discussion	5 points
Unit 10 Discussion Assignment 2	Discussion	5 points
Unit 10 Quiz	Quiz	15 points

Unit 11: Video, Music & Sound

Unit Summary

Silent films were great when they first came out, but now that we can have music, sound, and talking in our films... let's do it! From recording voice acting to making your own sound effects, putting sound to animation is an exercise in imagination and precision. After all, you don't want that "pop!" to be heard before the popcorn actually starts to pop or the "crash" to occur before the block tower comes toppling over. Funny, quirky, spooky, or serious—the sounds included in your animation and how you make them are really all up to you!

Learning Objectives

- Appreciate how sound affects emotions.
- Record good voice acting for animation.
- Match animated mouth shapes to the sounds of speech.
- Design and edit a simple soundtrack for video.
- Add titles and export an animation with sound.

Assignments

Unit 11 Text Questions	Homework	10 points
Unit 11 Online Lab Questions	Homework	10 points
Unit 11 Activity	Homework	15 points
Unit 11 Discussion Assignment 1	Discussion	5 points
Unit 11 Discussion Assignment 2	Discussion	5 points
Unit 11 Quiz	Quiz	15 points

Unit 12: Careers in Animation

Unit Summary

Animation is fun stuff! Who wouldn't want to spend their days making amusing characters do silly things to entertain the masses? Well, perhaps you have a more serious side and would like to apply your talents to medicine or engineering. That is possible for animators too! Whatever your dream, today is the first day on the path to a lifetime of fulfilling work as an animator. Seize the day!

Learning Objectives

- Put together a portfolio of your work.
- Recognize plagiarism and know how to avoid it in animation.
- Pitch your animation project.
- Understand the difference between jobs in animation vs. game design.
- Describe how to protect your digital animation work.

Art History Modern Syllabus

Course Description

In this course, your journey into art history begins in the late 1700s. At this time in Europe, political upheavals and scientific and technological advances had led to exploration, innovation, and great wealth for many. As you travel forward from this time to the present, you study important Western art movements, artworks, artists, and architecture. You then look at art of the past and present from a global perspective, with travels to China, Japan, Africa, Oceania, Southeast Asia, India, and back to the Americas.

Along the way, you have many opportunities to respond personally to all things art, and you share your insights with your peers through discussion boards. Three projects provide various important interactions with the art, the artists, and the movements.

Please be aware that this course includes depictions of nudity, as many art movements celebrated the human form. A number of important and influential works of art include nudity, and it would be nearly impossible to teach art history without including them. Given the subject matter, the course is extensively visual.

Required Materials

- Internet browser
- audio capability for virtual tours
- word processing software
- presentation software

Course Overview

This course is made up of six units, which are paired by time span and subject area.

- Units 1 and 2 cover Western Art from 1784 to 1950.
- Units 3 and 4 cover Western Art from 1950 to the present.
- Units 5 and 6 cover Global Art.

The course presents material in a variety of ways to allow for increased comprehension of information. This includes readings, videos, interactive content, discussions, and projects. There are opportunities for self-check as well as assessments that allow you to show what you have learned.

Some activities are graded by the learning management software; others are graded by the instructor. Additional activities are available, but not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Arts History Modern Syllabus

Course Organization

The units and lessons within them include brief introductions and lists of objectives for intended learning outcomes. Following each introduction, a set of activities takes place over a two-lesson continuum. Each unit pair contains 10 lessons. Each lesson pair contains activities that follow this basic pattern:

- *Art Talk* – Each lesson pair opens with an *Art Talk*. This is a Discussion Board where you are provided an opportunity to respond to an art-related prompt.
- *Travel through Time* – This is the main content presentation for the lesson pair for a given period of art history. Typically, it contains a brief overview video, the historical context for the art movement(s) of the time, characteristics of the art and architecture, and important artists associated with it.
- *That’s a Wrap!* – This brief activity appears at the end of the initial lesson of each lesson pair. It recaps the main takeaway points from the content.
- *Art Show* – Kicking off the second lesson of each lesson pair, this activity presents a virtual art gallery of selected important artworks from the movement(s) being discussed.
- *Art Forum* – This is a Discussion Board through which you explore various pieces of art in depth and respond thoughtfully to the comments of your peers.
- *Checkpoint* – This graded activity uses 10 questions to assess mastery of lesson objectives of each lesson pair. The Checkpoint may be taken multiple times.

Note: The last lesson of the course contains a 25-question Final Exam. There are no Workbook questions or Unit Exams in this elective course.

Each unit pair includes a required project.

- Units 1 and 2: *Closer Look* project
 - The *Closer Look* project is designed to help you “read” art. The steps of this process to help you gain the skills to decipher any work of art. It includes what you see in an artwork, what you think about the work, and why the work matters. Guiding questions help you complete each step. The final product is a presentation about an artwork you choose.
- Units 3 and 4: *Be the Artist!* project
 - The *Be the Artist!* project is designed to help you get to know an artist or architect by “becoming” that person! First, you research and analyze the historical events, personal life experiences, and beliefs that impact an artist/architect and his or her work. Then, you use your findings to create a Q&A interview document in which you answer the questions as the artist. Interview questions are provided for you.
- Units 5 and 6: *Each One Teach One* project
 - The *Each One Teach One* project helps you “teach” an audience of your peers about a movement or style that was not covered in the course. You can choose the movements from a provided. You learn about it yourself as you gather pertinent information about the art movement and an artist and artwork within it. You then design a presentation that is an

Arts History Modern Syllabus

abbreviated version of the “Travel through Time” and “Art Show” elements of the course. Guiding questions are provided for you.

Schedule of Work**Units 1 and 2: Western Art 1784–1950**

- Lessons 1 and 2: Introduction, Neoclassicism, Romanticism, and Realism
- Lessons 3 and 4: Impressionism and Post-Impressionism
- Lessons 5 and 6: Fauvism, German Expressionism, and Early Modern Architecture
- Lessons 7 and 8: Cubism, Constructivism, and Dada
- Lessons 9 and 10: Surrealism, American Realism, and Organic Architecture

Units 3 and 4: Western Art 1950–Present

- Lessons 11 and 12: Abstract Expressionism, Neo-Dada, and International Style
- Lessons 13 and 14: Pop Art, Minimalism, Conceptual Art, and Earth Art
- Lessons 15 and 16: Performance Art, Identity Art, and Activist Art
- Lessons 17 and 18: Street Art, Public Art, and Postmodern Architecture
- Lessons 19 and 20: Spectacle Art, Installation Art, and Interactive Art

Units 5 and 6: Global Art

- Lessons 21 and 22: China and Japan after 1279
- Lessons 23 and 24: Africa
- Lessons 25 and 26: Oceania, Southeast Asia, and India
- Lessons 27 and 28: Art of the Americas
- Lessons 29 and 30: Review and Final Exam

Art History Origins Syllabus

Course Description

In this course, you will journey through time, learning about prehistoric and ancient art, ancient Mediterranean and medieval art, and early European art from the Renaissance through Rococo. You will also learn how to read art and interpret it on a basic level. Since art is best learned through experience and expression, you will have opportunities to experience the art and react to it through discussion boards and projects. The goal of this course is to show how art relates to your life.

Please be aware that this course includes depictions of nudity, as many art movements celebrated the human form. Many important and influential works of art include nudity, and it would be nearly impossible to teach art history without including them. Given the subject matter, the course is extensively visual.

Required Materials

- Internet browser
- audio capability for virtual tours
- word processing
- presentation software

Course Overview

This course is made up of six units, with a pair of units covering a major art period. Each unit has five lessons, and a pair of lessons covers each art movement or sub-period. Lessons present the material in many different ways to allow for increased comprehension of information. Some activities are graded by the learning management software; others are graded by the instructor. Additional activities are available for you, but not graded. Please contact the course instructor for further information about course guidelines and grading policies.

Course Organization

Each unit begins with a brief introduction and list of objectives for intended learning outcomes. Following the introduction, a set of activities take place over a two-lesson continuum:

Art History Origins Syllabus

Art Talk and Forum – These are Discussion Boards where you will begin exploring various pieces of art and discussing your perceptions of it, or simply your opinion.

Travel through Time – This is the main content presentation for the two lessons for a given period of art history. Typically, it contains an overview video, the historical context for the art movement(s) of the time, and characteristics of the art and architecture as well as important artists associated with it.

That's a Wrap! – Presented at the end of the first lesson in a two-lesson grouping, this brief activity recaps the main takeaway points from the content.

Art Show – kicking off the second lesson of each two-lesson grouping, the Art Show presents a virtual art gallery of selected important artworks from the time period being discussed. You have the opportunity to explore different facts and anecdotes included in an annotated image of each artwork.

Projects – There are three projects in the course.

- Project 1: Choose artworks from various periods and create a slide presentation to present your observations.
- Project 2: Analyze specific artworks that are presented based on specific observation questions. Then, conduct some research and return to write a second paragraph about how you would change your analysis based on that research.
- Project 3: Follow the inventive example of Leonardo da Vinci and think about an invention that could solve a problem you perceive. Write briefly about the problem, what solution you propose, and how your invention would function. Like Leonardo, you can also create a sketch (hand-drawn or computer-generated) of what your invention would look like.

Checkpoint – This graded activity uses 10 questions to assess mastery of lesson objectives. The Checkpoint may be taken multiple times.

Final Exam – The last lesson of the course contains a 25-question final exam.

Note: There are no Workbook questions or Unit Exams in this elective course.

Art History Origins Syllabus

Schedule of Work

Units 1 and 2: **Introduction to Art, Prehistoric and Ancient Art**

- Lessons 1 and 2: Introduction to Art
- Lessons 3 and 4: Prehistoric Art
- Lessons 5 and 6: Ancient Near Eastern Art
- Lessons 7 and 8: Ancient Egyptian Art
- Lessons 9 and 10: Ancient Far Eastern Art

Units 3 and 4: **Ancient Mediterranean and Medieval Art**

- Lessons 11 and 12: Greek Art
- Lessons 13 and 14: Roman Art
- Lessons 15 and 16: Celtic and Viking Art
- Lessons 17 and 18: Byzantine and Islamic Art
- Lessons 19 and 20: Romanesque and Gothic Art

Units 5 and 6: **Early European Art**

- Lessons 21 and 22: Early Renaissance
- Lessons 23 and 24: High Renaissance
- Lessons 25 and 26: Northern Renaissance, Venetian Renaissance, and Mannerism
- Lessons 27 and 28: Baroque and Rococo
- Lessons 29 and 30: Final Exam Review
- Lesson 30: Final Exam Review and Final Exam

ART DEVELOPMENT LEVEL 1**Course Description**

The importance of fine arts is a benefit, not just to the older student and population, but is a necessary area of development for the young student who will benefit with it in all areas of education. Art provides an opportunity for children to develop the use of their senses directly and encourages the student to further develop what they already know as a source of knowledge and creativity. It is important for the student to make a connection between the verbal and visual; logic and emotions; imagination and reality. Art offers the student an opportunity to express feelings and emotions in their drawings and with color. The fine art program promotes self-esteem and self-awareness as it enhances personal fulfillment. Children have a wonderful imagination that, if encouraged, will be needed throughout their life. This program provides an opportunity for self-discipline through instruction and cooperation while providing the student with an opportunity for self-expression by using imaginative thinking for creative solutions. Again, this is a necessity in lifetime experiences. The student will see the artistic expressions and inventions from cultures around the world that are part of the history of mankind and development. Modern media provides many opportunities to the student. However, the student has the benefit to experience it more closely in art classes. Repetition, important for young children, is evident in these lessons. Repetition is provided at different age levels while using various tools and mediums. Home, family and friends, pets, and toys are the young student's world. The student will begin with their personal world as they think they know it, and discover so much more about it. These lessons provide a deeper awareness of the world immediately around them, and eventually their journey will grow from there. Each student is an individual with unique ideas and talents. Our goal is to provide each student an opportunity for personal growth for themselves and the world in which we live.

- Increases self-confidence

Character Education Syllabus

Course Description

In this course, students learn about the main character traits, which are truthfulness, trustworthiness, responsibility, diligence, integrity, respect, caring, and fairness. They analyze and interpret specific situations that demonstrate these traits. Then, in the next part of the course, students discover how to define and recognize bullying and cyberbullying, and they learn how they negatively impact everyone involved. Students develop a bullying prevention mindset by learning safe and appropriate strategies to respond to bullying situations. Finally, as a member of their neighborhood, their city, and their country, students learn about good citizenship by describing the rights, duties, and privileges included in it.

Course Objectives

- Describe truthfulness and trustworthiness by identifying their characteristics.
- Identify truthfulness and trustworthiness by analyzing situations.
- Develop truthfulness and trustworthiness by demonstrating them in personal, social, and academic interactions.
- Describe responsibility and diligence by identifying their characteristics.
- Identify responsibility and diligence by analyzing situations.
- Develop responsibility and diligence by demonstrating them in personal, social, and academic interactions.
- Describe integrity and respect by identifying their characteristics.
- Identify integrity and respect by analyzing situations.
- Develop integrity and respect by demonstrating them in personal, social, and academic interactions.
- Describe caring and fairness by identifying their characteristics.
- Identify caring and fairness by analyzing situations.
- Develop caring and fairness by demonstrating them in personal, social, and academic interactions.
- Describe bullying and cyberbullying by identifying their characteristics and methods.
- Identify bullying and cyberbullying by analyzing situations.
- Describe the effects of being bullied and bullying others by analyzing their impact.
- Establish a bullying prevention mindset by developing positive character traits.
- Respond to bullying situations by using appropriate and safe strategies.
- Describe good citizenship by explaining the rights, duties, and privileges that are included in it and how they relate to one another.
- Identify good citizenship by analyzing situations.
- Demonstrate good citizenship by accepting the rights, performing the duties, and earning the privileges included in it.

Character Education Syllabus

Required Materials

Course Overview

This course is made up of six units, each of which has five lessons. Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Prepare to Learn

Students are briefly introduced to the different character traits. They are asked questions to reflect on what they may already know about the trait in order to prepare them for what they are going to learn.

Texts

Each lesson, except for the last lesson in each unit and Lesson 29, has two text pieces. For most of the lessons, while the first text piece focuses on describing the main character traits, the second piece analyzes and interprets specific situations to identify the related character traits. The text pieces include images that support the content.

Assessment

Workbook

Students are provided with 1 to 4 computer-graded questions after each text piece in the lesson to allow them to apply the concepts they just learned in the text.

Checkpoint

These computer-graded activities include 2 to 6 questions to assess students' mastery of lesson objectives. They appear in the first four lessons of Units 1-5, and the first three lessons of Unit 6.

Self-Assessment

These computer-graded activities include 2 to 4 questions at the end of each unit. They provide an opportunity for students to assess their development of the character traits presented in the unit. Because this is a self-assessment, students earn full credit if they correctly follow the directions.

Final Exam

This computer-graded activity assesses mastery of course objectives related to defining and identifying the character traits presented throughout the course.

Character Education Syllabus

Discussions

There are two teacher-graded discussion boards in each unit. These activities provide students with the opportunity to discuss ideas related to the character traits presented in the corresponding lessons. Students are encouraged to share their ideas and opinions regarding the content. Although each discussion prompt can be used to encourage

conversations between students, students are not required to reply to the responses of others in order to complete the discussion board assignment.

Project

There is only one project, in Unit 5, that addresses standards in context. The project consists of five parts. Students research and create a public service announcement over the course of five lessons, and then they upload their completed project for the teacher to grade in Lesson 25. The project requires students to apply their knowledge and writing capabilities to demonstrate mastery of the lesson/unit content, which involves bullying.

Character Education Syllabus

Schedule of Work

Unit 1: Truthful and Trustworthy

- Prepare to Learn (Lessons 1 and 3)
- Lesson Content (Lessons 1 to 4)
 - Texts
 - Workbooks
- Discussion (Lessons 2 and 4)
- Checkpoint (Lessons 1 to 4)
- Unit Review (Lesson 5)
- Self-Assessment (Lesson 5)

Unit 2: Responsible and Diligent

- Prepare to Learn (Lessons 6 and 8)
- Lesson Content (Lessons 6 to 9)
 - Texts
 - Workbooks
- Discussion (Lessons 7 and 9)
- Checkpoint (Lessons 6 to 9)
- Unit Review (Lesson 10)
- Self-Assessment (Lesson 10)

Unit 3: Integrity and Respect

- Prepare to Learn (Lessons 11 and 13)
- Lesson Content (Lessons 11 to 14)
 - Texts
 - Workbooks
- Discussion (Lessons 12 and 14)
- Checkpoint (Lessons 11 to 14)
- Unit Review (Lesson 15)
- Self-Assessment (Lesson 15)

Unit 4: Caring and Fair

- Prepare to Learn (Lessons 16 and 18)
- Lesson Content (Lessons 16 to 19)
 - Texts

Character Education Syllabus

- Workbooks
- Discussion (Lessons 17 and 19)
- Checkpoint (Lessons 16 to 19)
- Unit Review (Lesson 20)
- Self-Assessment (Lesson 20)

Unit 5: Bullying Prevention

- Prepare to Learn (Lessons 21 and 23)
- Lesson Content (Lessons 21 to 24)
 - Texts
 - Workbooks
- Discussion (Lessons 22 and 24)
- Checkpoint (Lessons 21 to 24)
- Unit Review (Lesson 25)
- Self-Assessment (Lesson 25)
- Project (Lessons 21 to 25)

Unit 6: Good Citizenship

- Prepare to Learn (Lessons 26 and 28)
- Lesson Content (Lessons 26 to 28)
 - Texts
 - Workbooks
- Discussion (Lessons 27 and 29)
- Checkpoint (Lessons 26 to 28)
- Unit Review (Lesson 29)
- Self-Assessment (Lesson 29)
- Practice Tests (Lesson 30)
- Final Exam (Lesson 30)

Criminology and Forensics Syllabus

Course Description

Criminology and Forensics is a beginner level course on the topics of crime and forensic procedures. This course covers topics on crime and criminology, witnesses and perpetrators, and the crime lab. The course follows a story line of two college interns who discover a series of connected crimes in a suburban setting.

Suggested Course Objectives

Prerequisites: None

- Explain the basics of criminal law.
- Summarize the roles and methods of professionals working in criminology.
- Summarize the roles and methods of different forensics occupations.
- Demonstrate a basic understanding of modern crime theories, crime statistics, and efforts to control crime.
- Understand the roles of people who work to prevent crime.
- Explain the victim and witness roles.
- Describe eyewitness interviews and common complications.
- Compare criminology's individual and social approaches to the criminal mind.
- Understand the role of mental illness in crime and the criminal justice system.
- Describe how courts and law enforcement define and test for insanity.
- Describe basic forensic methods and processes.
- Summarize the process for the forensic investigation of a crime scene.
- Understand how forensic evidence is collected and tested.
- Describe the process, techniques, and goals of an autopsy.
- Contrast real forensic practice and results with popular misconceptions of the practice.

Required Materials

- Word processing software
- Internet browser
- pen and paper (for notes)

Criminology and Forensics Syllabus

Course Organization

Each pair of units begins with a video showing the story of Jordan, a college intern at the local newspaper, and Cristina, a college intern at the Crime Lab. Students will then proceed through a series of activities presented in the following order:

Odd Lessons (1, 3, 5, etc.)

Warm Up Discussion - a short discussion board prompt asking students to use their prior knowledge about a topic to engage in a discussion about topics that will be related to the content in the lesson.

Key Terms - a list of the new vocabulary present in the lesson along with their definitions.

Instruction - there will be between 3 and 8 different direct instruction activities in each lesson which will be composed of text, interactive questions, interactive activities, images, and videos.

Main Discussion - a discussion board prompt for students to engage in an informed discussion. This activity should be graded based on students' abilities to use proper logic and reasoning to support their arguments, with evidence drawn from the text of the lesson.

Even Lessons (2, 4, 6, etc.)

Enrichment - The enrichment pieces are provided for students to go one-step-further in their exploration of a topic. Teachers are given the freedom to include an alternative activity for students if they wish, rather than having them work on these enrichment pieces. If teachers do wish for students to submit these pieces, the teachers will need to use the teacher's notes to give students directions on how to submit these pieces. Otherwise, students should complete these activities on their own in a notebook or on a local copy on their computer. These activities are ideal opportunities for teachers to award extra credit or make-up credit for students who need additional points toward their grades.

Project - There are 3 projects in this course, each titled "The Crime Connection;" the second project has "part 2" and the third project has "part 3" added to the title. The projects ask students to take part in the investigations that Cristina and Jordan are conducting. Students are expected to give longer answers (3-5 sentences in most cases) to questions designed to get them to think about the study of crime as well as the forensic procedures put into place. Projects are submitted in lessons 8, 18, and 28.

Lesson Recap - a set of questions for students to answer in their notes regarding the items presented in the previous lesson. Students who struggle to answer these questions should seek help from their instructor.

Checkpoint - A set of 10 questions which test students on the main objectives from the lesson. These activities are defaulted to 3 attempts.

Criminology and Forensics Syllabus

Exceptions

Lessons 9, 19, 29

Contains the same 4 activity types as odd lessons, but will also contain the Enrichment piece from even lessons in order to leave more time in the following lesson for the Exam.

Lessons 10 and 20

Lesson Recap - same type of activity as seen in other even lessons.

Units Review - A set of questions designed to help students review for their unit exam which will cover both units. If students struggle to answer the questions, they should contact their instructor for additional help before taking the unit exam.

Unit Exam - A set of 30 questions testing the information present in either Units 1 and 2 or Units 3 and 4. Questions are present from the following types: multiple choice, multiple answer, and true/false questions. All questions are automatically graded by the system. The default setting is only 1 attempt on these activities, as questions are not drawn from a pool. Multiple attempts would deliver the same questions to the students each time.

Lesson 30

Lesson Recap - same as the lesson recap activities in other even lessons.

Units Review - Same as the unit reviews in lessons 10 and 20.

Final Exam - A set of 30 questions testing the information present in the entire course. Questions are present from the following types: multiple choice, multiple answer, and true/false questions. All questions are automatically graded by the system. The default setting is only 1 attempt on these activities, as questions are not drawn from a pool. Multiple attempts would deliver the same questions to the students each time.

Optional: Finish the Story - A single page with the videos which complete Jordan and Cristina's adventures. These videos are also present in the follow up course: Criminology and Justice. However, the courses are independent, so a student may not want to take the second course or may have taken them out of order. In either case, the videos are available for students to watch if they want to conclude the story. No assessments are tied to these videos.

Criminology and Forensics Syllabus

Schedule of Work

Every pair of units has a similar schedule of work for students. This schedule includes the following estimations for time students should spend on each activity. Students who spend less than the recommended time on any activity should be encouraged to use that time on the Enrichment, Discussion, or Project pieces instead.

- Warm Up Discussion
- Key Terms
- Direct Instruction reading and videos
- Main Discussion
- Enrichment
- Project or Unit Review
- Lesson Recap
- Checkpoint or Exam

Topics

- Crime and Criminology
 - The Study of Crime
 - Criminal Justice Professionals
 - How Science Solves Crime
 - Crime Theory
 - Who Prevents Crime?
- Witnesses and Perpetrators
 - The Challenges of Victims and Witnesses
 - The Eyewitness
 - The Criminal Mind
 - Mental Health and the Criminal Justice System
 - The Insanity Defense
- Inside the Crime Lab
 - Forensic Evidence
 - Crime Scene Procedure
 - Processing Evidence
 - The Autopsy
 - The CSI Effect

Entrepreneurship Syllabus

Course Description

In this course, students learn about entrepreneurship from a number of different angles: the characteristics that many entrepreneurs share; the function of innovation and competition in small business success; the important role that entrepreneurship plays in the economy; and how to start, grow, and exit from a small business. Much of the course content is also referenced in the two projects which are based on real-world tasks that business owners complete. Generating ideas for unique products or services is the focus of the first project; writing a business plan is the focus of the second. Final grades are based on ability to demonstrate what has been learned through a variety of assessment types: workbook questions, discussion boards, checkpoints, a final exam, and two multi-step projects.

Required Materials

- internet browser
- word processing software
- pen and paper for notes
-

Course Organization

The course consists of six units. Each unit ranges from four to six lessons with a total of 30 lessons. The course also features media such as

- a course introduction video
- infographics
- an interactive Venn diagram
- a career connections video interview

Here is a brief description of the types of activities included in the course:

- **Direct Instruction** is the new content of the lessons. Annotations are included in this category.

Practice Questions are ungraded, in-text questions designed to check for understanding. Students are provided three attempts to answer these and are given feedback for incorrect answers.

Design for Purpose boxes are included in the direct instruction pieces and fulfill various functions. For example, they can offer study tips, fun facts, or key ideas, to name a few.

Entrepreneurship Syllabus

- **Workbook Questions** are found at the end of many of the lessons and are graded.
- **Discussion Boards** are often compared to class discussion or class participation in brick and mortar classrooms because they are designed to get students to think deeply and respond thoughtfully to their peers on course topics. In this course, discussion boards are considered summative assessments and are graded. There are six in the course.
- **Checkpoints** test students on the content of the lesson. In this course, the number of questions ranges from 1-10 per lesson.
- **The Projects** are real-world tasks that entrepreneurs and small business owners perform. The first project spans Unit 2. The second project spans Units 3 and 4.
- **The Final Exam** assesses how well the student has learned the course content. It consists of 25 questions.

Topics

Unit 1: What Is Entrepreneurship?

- How to Use This Course
- Lesson 1: Do You Have What It Takes?
- Lesson 2: Artists and Techies as ... Entrepreneurs?
- Lesson 3: Risky Business Is Business as Usual (to an Entrepreneur)
- Lesson 4: Mind Your Business!
- Lesson 5: To Regulate or Not to Regulate

Unit 2: What Is the Creative Process?

- Lesson 6: Preparation
- Lesson 7: Incubation and Illumination
- Lesson 8: Evaluation
- Lesson 9: Implementation

Unit 3: How Do I Start a Business?

- Lesson 10: The Nuts and Bolt of Starting a Business
- Lesson 11: It's Time to Expand
- Lesson 12: Creating a Business Plan Is Easy!
- Lesson 13: What's the Problem?
- Lesson 14: It Takes a Bit of Detective Work

Entrepreneurship Syllabus

Unit 4: How Do I Market a Business?

- Lesson 15: Competition Is Essential in Business
- Lesson 16: The Customer Is in the Details
- Lesson 17: A Marketing Plan and Business Plan Go Together
- Lesson 18: The What, How, and Why of Promotional Plans
- Lesson 19: Revenue Streams Are the Entrepreneur's Dream
- Lesson 20: The Costs of Doing Business

Unit 5: What Goes into Developing a Business?

- Lesson 21: Risks in Business
- Lesson 22: Business Departments and Cars Have Lots in Common
- Lesson 23: Hats, Shoulders, and Recipes ... in Business? Yep!
- Lesson 24: There's More to Business Than the Bottom Line
- Lesson 25: A Leader's Day: Making Changes, Building Relationships

Unit 6: Planning Exit Strategies and Course Review

- Lesson 26: When to Say Goodbye
- Lesson 27: Review Units 1-2
- Lesson 28: Review Units 3-4
- Lesson 29: Review Unit 5
- Lesson 30: Final Exam

Fashion Design A&B Syllabus

Course Description

In Fashion Design 1 of 2, students learn the basics of what it takes to have a career in fashion design. They explore the foundations of fashion design in detail, including colors, fabrics, and fashion design tools. The course is graded based on the students' ability to demonstrate knowledge through two multistep projects, a series of checkpoints, and a final exam.

Course topics include

- investigating color and the elements of design
- identifying and comparing fabrics
- using machines and technology

Course Objectives

- Interpret a color wheel and recognize basic color schemes.
- Define and illustrate the principles of design and elements of design.
- Identify and recognize a variety of fabrics and how they are constructed.
- Compare natural and synthetic fabrics.
- Identify fabrics appropriate for various purposes.
- Identify and explain the purpose of sewing machine parts.
- Interpret written instructions and math skills as they relate to a basic sewing project.
- Identify technology utilized in the design field.
- Identify the appropriate tools and equipment for fashion design.
- Demonstrate the proper and safe use of tools and equipment.

Required Materials

- word processing software
- Internet browser
- pen and paper (for notes)

Fashion Design A&B Syllabus

Course Organization

Units and lessons are presented as unit and lesson pairs. Each lesson pair includes

Warm Up Discussion - Short discussion board prompts ask students to use their prior knowledge about a topic covered in the upcoming lesson.

Key Terms - Key term lists provide students with definitions of new vocabulary words.

Instruction - Direct instruction activities engage students through text, interactive questions, interactive activities, images, and videos.

Lesson Recap – A series of questions shepherd students through a review of the direct instruction content. Students who struggle to answer these questions should seek help from their teacher.

Projects- Two projects guide students in transferring their newly acquired content knowledge to real life scenarios. Units 1 and 2 contain the project “Fashion Fix.” Units 3 and 4 include the project “Making a Comeback.” For the grade book, they are labeled as Project 1 and Project 2.

Highlights/Optional Enrichment – In Units 5 and 6, optional enrichment pieces allow students to further explore a topic in Lessons 24 and 28. Students either complete the activities on their own or submit them to their teacher. (If the latter is preferred, teachers need to give students directions on how to submit these pieces.) These activities are ideal opportunities for teachers to award extra credit or make-up credit for students who need additional points toward their grades. Alternatively, teachers may include their own enrichment activities in lieu of the ones provided.

Checkpoint - A set of 10 questions tests students on the main objectives from the lesson. These activities are defaulted to three attempts.

Topics

- **Units 1 and 2: Color and Elements**
 - Introduction to Fashion
 - The Color Wheel
 - Color Perception
 - Elements of Design
 - Color, Design, and Style

Fashion Design A&B Syllabus

- **Units 3 and 4: Fabric**
 - Types of Fabric
 - Natural and Synthetic Fibers
 - Fabric Construction
 - Fabric Application and Finishes
 - Fabric Today
- **Units 5 and 6: Machines and Technology**
 - Hand Sewing Techniques
 - Interpret Patternmaking Instructions
 - Introduction to Machine Sewing
 - Zippers and Buttons
 - Tools, Equipment, and Safety

In Fashion Design 2 of 2, students will learn what it takes to succeed in a career in the fashion industry. Students will start this course by exploring the educational requirements and skills necessary for the world of fashion and how to prepare now for their dream job. Then they will research the vast variety of jobs available within the industry and some of the key knowledge topics for success. This course is graded based on students demonstrating their knowledge through checkpoints, projects, and a final exam.

Course topics include:

- Identifying the knowledge and skills needed to enter a career in fashion
- Exploring the different career options in fashion
- Identifying the different ways to gain the required skills for fashion careers
- Describing ways to effectively communicate with others in the workplace
- Identifying important tools and trends for success in fashion

Course Objectives

- Identify ways to be better prepared for careers by recalling skills necessary to succeed.

Fashion Design A&B Syllabus

- Explain the importance of a portfolio by recognizing key components.
- Describe how to make a good first impression by recognizing appropriate behavior in the workplace.
- Describe ethical behavior by identifying key attributes a person demonstrates.
- Describe different styles of communication by identifying them in workplace scenarios.
- Describe how to solve problems in the workplace by identifying effective conflict resolution skills.
- Describe the interrelationship of careers in the fashion industry by identifying how they work together to support the industry.
- Identify different career options in the fashion industry by researching the requirements for careers that interest you.
- Describe the benefits of advertising by recognizing the importance of brand awareness.
- Describe some of the trends that affect the fashion industry by categorizing the trends as legislative, economic, or social.

Required Materials

- Internet browser
- word processing software
- pen and paper (for notes)
- method for delivering a presentation (for a course project), such as:
 - slide show presentation software
 - video recording software
 - poster creation software
 - voice recording software

Course Organization

This course is made up of six units. Each unit has five lessons, for a total of 30 lessons. For units 1 through 5, the last lesson in each is a review of the content that was just addressed. Unit 6 reviews all content covered in the course. Some activities are graded by the program software, while others are graded by the instructor. It is recommended that the course instructor be contacted for further information about course guidelines and grading policies.

The following is a brief description of each type of activity you will find in the course.

Direct Instruction – There are one to two direct instruction activities per lesson.

Fashion Design A&B Syllabus

Discussion Board – This activity is graded by the instructor and allows the student to interact and communicate with classmates and the instructor about the subject of the discussion. Not all lessons contain a discussion board.

Lesson Recap – This activity highlights some of the main concepts in the form of questions. Understanding and knowing the answers to these questions will help students be prepared for future exams.

Checkpoint – Checkpoints are found in the second and fourth lessons of units 1 through 5. Each checkpoint addresses content from the current lesson and the one previous. Checkpoint questions have anywhere from three to eight assessments and may be taken up to three times.

Project – There are two projects in the course, and each has five steps. The first project, titled Planning for a Career, is found in units 2 and 3. It prompts students to create SMART goals or a resume in preparation for a fashion career. The second project, titled Careers in Design, is found in units 4 and 5. It prompts students to research three different careers in fashion and present their findings.

Topics

Unit 1: Knowledge Is Power

- Knowledge
- Organizations
- Skills
- Time
- Unit 1 Review

Unit 2: Preparing for a Fashion Career

- Setting the Target
- Career Ready
- Interviewing
- Ethics
- Unit 2 Review

Fashion Design A&B Syllabus

Unit 3: Communication

- Workplace Courtesy
- Communication Styles
- Teamwork
- Lasting Impact
- Unit 3 Review

Unit 4: Career Exploration

- Fashion Industry
- Fashion Careers
- Career Levels
- Career Levels Continued
- Unit 4 Review

Unit 5: Tools and Trends

- Brands
- Advertising
- Advertising Continued
- Industry Outlook
- Unit 5 Review

Fashion Design A&B Syllabus

Unit 6: Course Review

- Unit 1 Review
- Unit 2 Review
- Unit 3 Review
- Unit 4 Review
- Unit 5 Review / Final Exam

Gaming Unlocked Syllabus

Course Description

Games have been played for thousands of years. People love to find ways to entertain themselves. In this course, the student becomes the gamemaster! Students will learn the basics of gaming, from what makes games fun to what makes them work. Students will explore all types of games in this course, including mental games, board games, and video games. The course focuses on developing a student's ability to recognize good gameplay mechanics and the steps necessary to produce a game. This course does NOT require students to know or learn a programming language. The emphasis is on the history and design of games and the different careers available in the game industry.

Suggested Prerequisites: none

Course Objectives

- Demonstrate understanding of current trends and the historical significance of both electronic and nonelectronic games. Students will analyze different game systems and identify how these systems have influenced consumer technology.
- Analyze the core tasks and challenges of video game design and explore the methods used to create and sustain player immersion.
- Demonstrate mastery of game art and multimedia, including music, sound, art, and animation.
- Understand the impact of games and the role of play in human culture. Analyze the ethics and global impact of the game industry.

Required Materials

- word processing software
- Internet browser
- pen and paper (for notes)

Course Organization

The first four lessons of each unit follow this general outline. The first lesson of the course has an additional activity at the start to introduce students to the course and explain important features and functionalities.

1. Warm-Up Project
Questions to get students talking about the topics and activate prior knowledge. Grading rubrics are provided. Students should not be considered experts at this time in their work.
2. Direct Instruction
3. Direct Instruction (continued)

Gaming Unlocked Syllabus

4. Enrichment Activity or Project Check-in
Enrichment Activity: These are interactive elements, such as games or mini-projects designed to get students digging into the content in fun and interesting ways.
Project Check-In: If there are project-related Development Objectives taught in the lesson, then there will be a project check-in provided for students to work on their projects for the course.
5. Graded Discussion
 Two to three open-ended prompts to meet the objective. Follow up questions for instructors to use to help continue the conversation are available in the Resource Guide.
6. Lesson Review
 Infographic summarizing the major points for the lesson
7. Checkpoint

The **fifth lesson** of each unit follows this outline.

1. Warm-Up Project
2. Direct Instruction
3. Direct Instruction (continued)
4. Graded Discussion
5. Lesson Review
6. Unit Exam
7. Project Check-In or Submission

Lesson 30 follows this outline:

- Activity 1: Unit 1 Review
- Activity 2: Unit 2 Review
- Activity 3: Unit 3 Review
- Activity 4: Unit 4 Review
- Activity 5: Unit 5 Review
- Activity 6: Unit 6 Review
- Activity 7: Final Exam

Gaming Unlocked Syllabus

Schedule of Work

The times noted above were designed to give students plenty of time for exams and projects. If students spend less time on an activity than what is recommended, they should be encouraged to apply their extra time towards their projects.

Topics

- Intro to Gaming
 - Learn to Play
 - Benefits of Play
 - Basics of Gameplay, Part 1
 - Basics of Gameplay, Part 2
 - Genres
- The Game Experience
 - Levels
 - Perspective
 - World
 - Characters
 - A Distinct Experience
- Art in Gaming
 - Fundamentals of Art in Gaming
 - 3-D Effects
 - Story
 - Cutscenes
 - Other Roles in Game Art
- Game Design
 - Programming and User Experience
 - Game Design & Level Editing
 - Positive Impacts
 - Player Immersion
 - Prototyping I

Gaming Unlocked Syllabus

- Platforms and Hardware
 - Consoles and PCs
 - Internet, Mobile, and Tablet Games
 - Hardware
 - Other Members of the Design Team
 - Prototyping II
- Games in the World
 - Video Games' Contribution to the Market
 - Video Games' Impact in Industry
 - Copyrights & Trademarks
 - Piracy

Graphic and Web Design Syllabus

Graphic and Web Design Syllabus

Course Description

Welcome to Graphic & Web Design! This course is an introduction to how, through design, we are able to communicate visually with one another. Each unit will cover topics such as the principles and elements of design or printing and publishing projects. By understanding the foundation of visual communication through design, this course will be a great introduction to a career path that could potentially do for you!

Required Materials

- internet browser
 - sketchbook or loose-leaf paper with no lines
 - writing utensil
-

Course Objectives

Unit 1

Welcome to Unit 1. This unit will cover the origins and basic tools of design and help prepare you for your introduction to the field. By the end of the unit, you will be able to:

- Identify the role of the media in graphic and web design by exploring the history and evolution of media and media technology.
- Explain the functionality of the internet, intranet, and extranet by describing how each are used in a media environment.
- Distinguish between the elements and principles of design by identifying them in an image or layout.
- Determine the difference between art and design by identifying the purpose of the work.
- Describe colors in greater depth by identifying hue, tint, value, shade, color schemes, and color models.
- Start building a portfolio by designing graphics in a personal journal.
- Interpret various typefaces by identifying their basic typography characteristics.

Lesson 1

- Connect the role of media to graphic and web design by identifying the history and evolution of media and emerging technology.

Graphic and Web Design Syllabus

- Build a portfolio by designing graphics in their personal journal.

Lesson 2

- Determine the difference between art and design by recalling the definitions of art and design.
- Identify the uses of the internet, intranet, and extranet by determining how each is used in a media environment.
- Describe types of typography by identifying their basic structure.
- Interpret various typefaces by identifying their basic characteristics.
- Explain the functionality of the internet, intranet, and extranet by describing how each is used in a media environment.

Lesson 3

- Name the basic principles of graphic design by identifying them in an image or layout.
- Distinguish between the elements and principles of design by identifying them in an image or layout.

Lesson 4

- Name the basic elements of graphic design by identifying them in an image or layout.
- Identify web layouts and navigation menus by exploring popular web building websites.
- Distinguish between the elements and principles of design by identifying them in an image or layout.

Lesson 5

- Identify color patterns by defining additive and subtractive colors.
- Describe colors in depth by identifying hue, tint, value, and shade.
- Recognize a color scheme by determining the importance of the colors selected.

Unit 2

- Describe how to manage files by applying naming conventions, file organization, and file transfer methods.
- Explain the pros and cons of keyboard shortcuts by identifying essential keyboard commands and describing their functions.
- Distinguish between various software programs by describing when to use them in a given design project.
- Identify the difference between digital and printed color by comparing and contrasting color models.
- Differentiate between raster and vector images by identifying their attributes and uses.

Graphic and Web Design Syllabus

- Plan a photoshoot and describe how to capture, import, and transfer images by identifying the proper photography equipment.
- Describe how to protect design equipment by identifying physical and digital risks and ways to prevent them.
- Describe the ethics of design by identifying accessibility requirements and the importance of diversity.

Lesson 6

- Describe how to manage files by applying naming conventions, file organization, and file transfer methods.
- Explain the pros and cons of keyboard shortcuts by identifying essential keyboard commands through a description of their functions.

Lesson 7

- Identify the difference between digital and printed color by comparing and contrasting color models.

Lesson 8

- Distinguish between various software programs by describing when to use them in a given design project.
Differentiate between raster and vector images by identifying their attributes and uses.

Lesson 9

- Plan a photoshoot and describe how to capture, import, and transfer images by identifying the proper photography equipment.

Lesson 10

- Describe how to protect design equipment by identifying physical and digital risks and ways to prevent them.
- Describe the ethics of design by identifying accessibility requirements and the importance of diversity.

Unit 3

- Describe how design teams complete their projects by identifying the roles in a design team and the steps in the creative process.
- Identify the appropriate medium for a design project by identifying the purpose, content, and audience.

Graphic and Web Design Syllabus

- Create legal and well-founded design projects by identifying the importance of research, trustworthy sources, respecting intellectual property laws, and proofreading.
- Describe how to present and archive a finished project by identifying the proper file formats.

Lesson 11

- Describe how design teams complete their projects by identifying the roles in a design team and the steps in the creative process.

Lesson 12

- Create well-founded design projects by identifying the importance of research and trustworthy sources.

Lesson 13

- Create legal design projects by recognizing choices that would break intellectual property laws or be considered plagiarism.
- Distinguish between plagiarism and copyright infringement by describing the consequences of each and identifying examples.

Lesson 14

- Describe how design teams communicate with their clients by identifying the function of job proposals, estimates, and timelines.
- Identify the appropriate medium for a design project by identifying the purpose, content, and audience.

Lesson 15

- Describe how to present and archive a finished project by identifying the proper file formats.

Unit 4

- Prepare a project for print by describing how to pick between printing methods, paper options, finishing techniques.
- Describe how to prepare a file for printing by identifying the purpose of preflighting, bleed lines, and crop lines.

Graphic and Web Design Syllabus

- Describe how to design for the web by identifying the available publishing programs, comparing different output devices, and recognizing the importance of responsive design.
- Create design content to post on an active website by applying the principles and elements of design to layout programs.

Lesson 16

- Describe how to pick between paper options by identifying their pros and cons.
- Describe how to prepare a file for printing by identifying the purpose of preflighting, bleed lines, and crop lines.

Lesson 17

- Describe how to pick between printing methods by identifying their pros and cons.

Lesson 18

- Format a page for print by considering page size, orientation, margin, and bleed.
- Put together a complex project by describing binding, finishing, and folding options.

Lesson 19

- Prepare a project for print by describing how to pick between printing methods, paper options, and finishing techniques.

Lesson 20

- Describe how to design for the web by identifying the available publishing programs, comparing different output devices, and recognizing the importance of responsive design.
- Create design content to post on an active website by applying the principles and elements of design to layout programs.

Unit 5

- Describe how to create a professional impression by identifying professional language, dress, etiquette, and portfolio presentation, as well as the importance of editing.
Describe the field of graphic design by identifying the job opportunities, key skills, common roles, and average salary.
- Compare work in graphic design to web design by describing the similarities and differences in opportunities, key skills, common roles, and average salary.
Identify careers related to graphic design by identifying similar job requirements, growing industries, and opportunities for further education.

Lesson 21

Graphic and Web Design Syllabus

- Describe how to create a professional impression by identifying professional language, dress, etiquette, and portfolio presentation.
- Present a client with professional designs and communications by identifying the steps and importance of proofreading.

Lesson 22

- Describe the field of graphic design by identifying its job opportunities, key skills, common roles, and average salary.

Lesson 23

- Describe the field of web design by identifying its job opportunities, key skills, common roles, and average salary.

Lesson 24

- Compare freelance and salary work in design by identifying the pros, cons, and requirements of launching your own media business.

Lesson 25

- Identify careers related to graphic design by identifying similar job requirements, growing industries, and opportunities for further education.
- Compare work in graphic design, web design, and related fields by describing the similarities and differences in opportunities, key skills, common roles, and average salary.

Unit 6

Lessons 26 - 30 will review content from Units 1-5. This is to prepare students for the Final Exam.

Course Organization

Text and Videos

Students are introduced to the main concepts of each lesson through text activities that consist of readings. The readings are supplemented with visual learning aids like infographics, tables, and diagrams. Some activities feature embedded videos. These videos provide direct instruction and a deeper understanding of lesson concepts.

Key Terms

Graphic and Web Design Syllabus

Content pieces feature highlighted, clickable key terms. Clicking a key term will reveal its definition.

Assessments:

Workbooks

Each text activity is followed immediately by computer-graded Workbook questions related to the concepts that were just taught.

Recommended Gradebook percentage: 10%

Checkpoints

These computer-graded activities contain 10 question automatically selected from a pool of up to 15 questions, to assess students' mastery of lesson objectives. They appear in the first four lessons of each unit.

Recommended Gradebook percentage: 15%

Unit Exams

These computer-graded activities occur at the end of Units 1–5. (Unit 6 has the Final Exam; see below.) Unit exams include 20 questions that assess mastery of unit objectives.

Recommended Gradebook percentage: 20%

Final Exam

This computer-graded activity appears in Lesson 30. It has 30 questions designed to assess mastery of course objectives.

Recommended Gradebook percentage: 15%

Projects

There are two projects in this course. The first project is introduced to students in lesson 8 and submitted in lesson 20. The student will have project check-ins throughout Units 2, 3, and 4, in Lessons 8, 10, 12, 14, 16, 18, and 20. The second project is introduced to students in Lesson 21 and submitted in lesson 25. The student will have project check-ins in Lessons 21, 22, 23, 24, and 25.

Recommended Gradebook percentage: 25%

Graphic and Web Design Syllabus

Discussion Boards

These teacher-graded activities, which appear in all 30 lessons, provide students with the opportunity to discuss concepts related to each lesson. Students are challenged to respond thoughtfully and encouraged to observe other classmates' posts and reply to them if they disagree or have additional information to share. Students should be reminded to be both polite and understanding of perspectives they do not share.

Seat time per Discussion Board: 20 mins

Recommended Gradebook percentage: 15%

Schedule of Work

Lessons 26-30

Interior Design A&B Syllabus

Course Description

Interior Design 1 of 2 is an introduction to the field of interior design and the roles and responsibilities of the interior designer. Fundamentals like the elements and principles of design are presented in the course. A brief history of design from ancient times to the present is also presented. Commercial and residential design are defined and discussed as are the phases of typical design projects and business structures. Positive communication, professionalism in the workplace, and important skills and attributes of the interior designer are included, as well. Explanations of the materials that all designers use and features of lighting, furniture, and furnishings are provided along with discussions of the technical systems like HVAC, electricity, and plumbing. Problems in design projects and ways to solve them are discussed, as well. Information about the Americans with Disabilities Act (ADA), universal design, and green design in the context of interior design is also included.

Course Objectives

- Recognize the importance of design principles by identifying how they are applied to an interior design project.
- Recognize the difference between interior designers and decorators by identifying their different roles.
- Categorize career fields in the interior design industry by distinguishing between specific projects designers work on.
- Recognize the difference between commercial and residential design fields by identifying their scope, schedule, and budget.
- Describe personal attributes of employees by explaining how teams interact effectively at work.
- Identify empathy by recognizing its value within the interior design field.
- Define the elements of design by describing their purpose.
- Recognize the principles of color by examining the relationships of colors on the color wheel.
- Describe color value and saturation level by extending the color wheel to include tints, tones, and shades.
- Recognize the importance of professional organizations in interior design by examining real-world scenarios and identifying the benefits of membership.
- Recognize the psychological impact of color in interior design by analyzing which colors are and are not appropriate for bedrooms and kitchens.
- Recognize the characteristics of furnishings and interiors by identifying their place in historical periods ranging from antiquity through the Empire period.
- Recognize the characteristics of furnishings and interiors by identifying their place in the various design styles and movements in the 19th and 20th centuries.

Interior Design A&B Syllabus

- Identify global influences on interior design styles and trends by recognizing the design elements associated with each location.
- Recognize the use of trend forecasting in interior design by identifying the differences between trends and fads.
- Explain the design, use, or availability of a furnishing in a specific historical period by identifying the economic and political climate and social conditions of the time.
- Recognize the characteristics of furnishings and interiors by identifying their place in historical periods ranging from antiquity through the Empire period.
- Recognize the importance of planning skills by describing the purpose behind developing a project plan.
- Describe the planning process by listing the steps an interior designer uses to set a goal.
- Recognize the benefits of technology in interior design by explaining how using technology contributes to developing innovative designs.
- Describe how to solve problems with interior design projects by identifying effective resolutions.
- Identify basic behavior expectations for the workplace and client interactions by recognizing professional behavior.
- Identify various business structures for interior design such as sole proprietorships, partnerships, and corporations by describing the differences among them.
- Identify the criteria for analyzing a design by describing function, structure and materials, and aesthetics.
- Recognize the relationship between structure and materials by identifying how they are used in a building and interior space.
- Identify how a space's function creates the need for a specific type of lighting source or fixture and quantity of light.
- Identify technical systems that must be incorporated into the design by describing how they constrain a design project.
- Identify technical systems that must be incorporated into the design by describing how they improve a design project.
- Identify the importance of building codes by describing their purpose.
- Identify different interior design project types by distinguishing between residential and nonresidential projects.
- Recognize how interior design is impacted by social and cultural considerations.
- Identify the impact of political climates on interior design by explaining how they affect the design industry.
- Define green design as a type of design that reduces harmful effects to the environment and human health.

Interior Design A&B Syllabus

- Identify the purpose of the Americans with Disabilities Act by explaining how it applies to interior design projects.
- Identify and describe the principles of universal design.

Required Materials

- word processing software
- Internet browser
- slide show presentation software (for project)
- pen and paper for review questions (optional)

Course Overview

This course is made up of six units. Each unit has five lessons. Media includes the following:

- interactive vocabulary games
- videos
- 360 (degrees) videos
- infographics
- annotated images

Course Organization

Direct Instruction – There are two to four direct instruction activities per lesson.

Discussion Board – This activity is graded by the instructor and allows the student to interact and communicate with classmates and the instructor about the subject of the discussion. All lessons do not contain a discussion board.

Lesson Summary – This activity includes the learning objectives from the lesson and review questions the student can answer either in a notebook or on a computer.

Checkpoint – The majority of lessons contains checkpoints. Checkpoint questions have anywhere from five to ten assessments and may be taken up to three times.

Project – There is one project for the course: an investigation into the design, use, or availability of a furnishing of the student's choice from one of six historical periods provided. It is designed to be presented on slides and is graded by the instructor.

Interior Design A&B Syllabus

Topics

Unit 1: What is Interior Design?

- Lesson 1: Interior Design: An Overview
- Lesson 2: Domains, Specializations, Related Fields
- Lesson 3: The Requisite Skills
- Lesson 4: Empathy and Other Skills
- Lesson 5: Creativity

Unit 2: The Basics: Elements, Principles, and Color

- Lesson 6: Interior Design Elements
- Lesson 7: Interior Design Principles
- Lesson 8: Color
- Lesson 9: Professional Organizations and Member Benefits
- Lesson 10: Applying What You've Learned

Unit 3: The Impact of the Past on Interior Design *The project is completed in this unit.

- Lesson 11: From Antiquity to the 19th Century
- Lesson 12: Inside the 19th and the first half of the 20th Centuries
- Lesson 13: From the 1960s to the Present
- Lesson 14: What's Old Is New Again
- Lesson 15: Revising, Editing, and Publishing the Project

Unit 4: Plans, Phases, Problems, and Organizational Structures

- Lesson 16: Planning Tools and Methods
- Lesson 17: The Seven (or so) Phases
- Lesson 18: Problems and Solutions
- Lesson 19: Professional Behavior and Effective Communication
- Lesson 20: Business is Business

Interior Design A&B Syllabus

Unit 5: What *Interior* Means in Interior Design

- Lesson 21: Design Quality
- Lesson 22: More on Materials and Structure
- Lesson 23: Lighting, Fixtures, and Furnishings
- Lesson 24: Technical Systems and Constraints
- Lesson 25: Types of Spaces

Unit 6: The Bigger Picture

- Lesson 26: Issues that Impact interior Design
- Lesson 27: Green Design
- Lesson 28: Universal Design
- Lesson 29: Human Factors in Design
- Lesson 30: Course Review

Interior Design 2 of 2 provides the student with a multi-faceted look at the business of interior design—from planning a career to working in the industry. Students learn about their own interests, aptitudes, and skills and how these can connect to certain occupations and not to others. They learn about the job market, what to include in a résumé, and what to say (and not say) in an interview. Students learn about the workplace with lessons on leadership, organizational culture, teamwork, and career success. They also learn about customer service, accurate recordkeeping, and marketing an interior design business. They discover the various careers in residential and commercial design and the importance of membership in professional interior design organizations. Students also explore these topics in depth:

- selecting flooring, lighting, window treatments, and wall coverings
- the importance of industry codes
- the importance of technical drawings and what they communicate
- selecting furniture, upholstery, and accessories
- characteristics and maintenance of textiles

Course Objectives

- Explain the value of the NCIDQ exam by examining its requirements.
- Identify career opportunities in interior design by examining the job market.
- Identify a specific postsecondary option by describing the variety of postsecondary options available.

Interior Design A&B Syllabus

- Define your choice of interior design career or specialization by researching the different types.
- Recognize the careers in residential, commercial, and mobile design by identifying the specialties of each domain.
- Describe how CAD is used in the textile industry by explaining how it is used to create various characteristics in textiles.
- Describe how CAM is used in the textile industry by explaining how it is used in manufacturing of textiles.
- Identify solutions to design problems by explaining best practices known in the industry.
- Identify a timeline in an interior design project by reviewing the typical phases of an interior design project.
- Define customer service by identifying factors that contribute to professional relationships.
- Describe the value of contracts by identifying conflicts that can arise without a contract.
- Identify conflict resolution strategies by examining real world scenarios.
- Identify resources that are available to industry professionals and the public by examining the internet and periodicals and trade journals.
- Describe how interior designers can get new clients by examining digital marketing strategies.

Required Materials

- Internet browser
- Word processing software
- Presentation platform for course project

Course Organization

This course consists of six units. Each unit has five lessons. Media include

- two instructional videos
- one course introduction video

Direct Instruction – There are two to three direct instruction activities per lesson.

Discussion Board – This activity is graded by the instructor and allows the student to interact with classmates and the instructor about the subject of the discussion board. Most lessons contain a discussion board.

Lesson Summary – This activity includes the learning objectives from the lesson and review questions the student can answer either in a notebook or on a computer.

Checkpoint – Most lessons contain checkpoints. The number of checkpoint questions ranges from four to ten and may be taken up to three times.

Interior Design A&B Syllabus

Final Exam – The final exam consists of 36 questions.

Project – There are two projects for the course.

(1) “What If” Scenario: the student is provided with three sets of focus questions to research and respond to. The student has a choice of presentation format, and it is graded by the instructor.

(2) Apartment Living Room Renovation Project: the student is required to choose a ceiling fixture, two window treatments, flooring, furniture, and accessories, and research cost, materials, and other details. It is designed to be presented in a journal and is graded by the instructor.

Explore Further Activity – This consists of three activities. Students can select furniture and upholstery for a sitting area, slipcovers and accessories for a powder room, and textiles for a dining room. This activity is not graded, and the instructor can require that students submit one, two, or all three of the activities to demonstrate what they have learned.

Topics

Unit 1 Career Planning *One project is in this unit.

- Lesson 1: Informed Career Decisions
- Lesson 2: Interior Design: Education Options and Specializations
- Lesson 3: From the Job Market to the Résumé to the Interview
- Lesson 4: What If –
- Lesson 5: What’s Next?

Unit 2 Working in the Industry

- Lesson 6: Interior Design and Its Contributions
- Lesson 7: Practices and Issues in the Industry
- Lesson 8: Leaders and Organizational Culture
- Lesson 9: Work Relationships, Teams, and Work Performance
- Lesson 10: Professional Organizations in the Industry

Interior Design A&B Syllabus

Unit 3 Tools of the Trade

- Lesson 11: Residential, Commercial, and Mobile Interior Design
- Lesson 12: Lights and Lighting
- Lesson 13: Windows and Their Treatments
- Lesson 14: Walls and Their Coverings
- Lesson 15: Floors and Their Coverings

Unit 4 Tricks of the Trade *Ungraded activity is in this unit.

- Lesson 16: Furniture and Upholstery
- Lesson 17: Slipcovers and Accessories
- Lesson 18: Characteristics and Maintenance of Textiles
- Lesson 19: Textiles and Technology
- Lesson 20: Explore Further

Unit 5 Putting Knowledge to the Test *One project is in this unit.

- Lesson 21: Measuring the Spaces and Interpreting Best Practices
- Lesson 22: Communicating Ideas
- Lesson 23: Providing Universal Access
- Lesson 24: The Strong Foundation
- Lesson 25: Completing and Submitting Your Project

Unit 6 Your Time and Effort

- Lesson 26: Show Me the Money
- Lesson 27: Accurate Recordkeeping
- Lesson 28: Stay on Track
- Lesson 29: Customer Service
- Lesson 30: Marketing Your Business

Keyboarding Syllabus

Course Description

The keyboarding course is appropriate for elementary and middle school students. The curriculum introduces new keys by rows where students first learn the middle row, then the top row and the bottom row of the keyboard. The content is designed with a strong focus on sight and high frequency words. This course assumes no keyboarding experience and will guide them through the keyboard.

Course Requirements

Grade Level

3 – 8

Materials

None

Tech Requirements

Students will need a computer or laptop for this course; tablets are not sufficient.

Duration

1 Semester

Prerequisites

None

Technology Skills

- Internet Navigation
- Email Communication

Major Concepts

Upon completion of this course, you will be able to:

The curriculum introduces new keys by rows where students first learn the middle row, then the top row and the bottom row of the keyboard. The content is designed with a strong focus on sight and high frequency words. This course assumes no keyboarding experience and will guide them through the keyboard.

Course Syllabus

Course Code: EDL078

Middle School 2D Studio Art

Course Description

Close your eyes and imagine you're standing in an art studio—the smell of paint, the heat of the kiln, and the infinite creative possibilities that linger in the air. This is where art is born, and in 2D Studio Art, you'll learn how to bring your art visions to life. Whatever medium you prefer—painting, drawing, photography—this course will teach you the design elements and principles needed to create a work of art, explore your artistic inspirations, travel back in time to look at art in different cultures, and gain insight about the art of critiquing. If you've ever dreamed about making a living as an artist, this course will give you the tools and background that you need to turn those dreams into a reality!

Required Materials

- Various sizes of white drawing paper
- Various sizes of colored paper
- Paintbrushes in varying sizes
- Empty cans or jars to wash paintbrushes
- Ruler and/or protractor
- Erasers
- Scissors
- Miscellaneous household objects to use for still life art
- Digital camera, camera phone, or other type of camera
- Paint: (at least two or more of the following)
 - Tempera Paint
 - Acrylic Paint
 - Watercolor
 - Ink Wash
 - Oil Paint
- Drawing Tools: (at least two or more of the following)
 - Pastels
 - Charcoal
 - Markers
 - Colored Pencil

Table of Contents

Unit 1: Breaking into 2D Studio Art	3
Unit 2: Detailing the Design	4
Unit 3: The Creative Process of Art	5
Unit 4: Art and its Early Importance	6
Midterm Exam	7
Unit 5: Everyone's a Critic	8
Unit 6: Discovering Culture Through Common Themes	9
Unit 7: Where Art Lives Lives.	.10
Unit 8: Finding A Career Path Through Art	.11
Final Exam12

Unit 1: Breaking into 2D Studio Art

Unit Summary

Let's close our eyes and picture that we are in an art studio. What do you see? Do you see a clean pile of paintbrushes; a rainbow of paint colors lined up together in a row; a canvas on a table, with the beginning drawings of a meadow blooming with flowers? An art studio is where art is born. It is where we can use our creativity and expression to design an image that is currently only inside of our heads. We can share our ideas, feelings, and visions with the world through our own works of art. In order to reach our full artistic potential, we need to start with the basics. After all, you need to walk before you can run.

Learning Objectives

- Understand colors, and how to create colors using the technique of mixing.
- Classify colors into different categories.
- Discover assorted tools used to create artwork.
- Explore various art mediums to get unique looks for your artwork.

Unit 1 Discussion Assignment 1	Discussion	5 points
Unit 1 Discussion Assignment 2	Discussion	5 points
Unit 1 Quiz	Quiz	15 points

Unit 2: Detailing the Design

Unit Summary

Let's face it, creating art doesn't typically come with a book of instructions. In fact, the exact opposite is likely the case! As an artist, you're often left to your own creative devices, having to decide what to create and how to create it. But, if there was an instruction manual on "how to be an artist" or "how to create a work of art", the elements of design, principles of design, and elements of content would be the main parts of the first chapter. These are the tools each artist uses during the process of creating a work of art. They put all the little pieces together, and create a completed drawing or painting. This is vital information you will need as you journey to become an artist, so get out your pad and pencil to take some notes (consider this your own personal chapter of your "how to be an artist" instruction manual).

Learning Objectives

- Identify the elements of design.
- Distinguish between the different principles of design.
- Understand the elements of content and how to use them in your own artwork.
- Use art vocabulary to correctly describe different elements of your artwork.

Unit 2 Quiz	Quiz	15 points

Unit 3: The Creative Process of Art

Unit Summary

Just because we aren't physically in an art studio at this very moment doesn't mean we can't learn all about art as if we were! In this unit, we will gather all of the information we can about creating art as if we were in an actual studio. We will explore different types of genres and styles that many artists use and learn about the differences between representational and abstract art. We'll learn and practice different tricks and techniques to make our own art shine. And, we will discover ways to connect art with other subjects to bring fun, creativity, and exploration to all learning areas. We may not be stepping into an art studio to do this work, but we sure will step into a digital one! Let's get started!

Learning Objectives

- Identify different genres in the art world.
- Distinguish between representational and abstract art.
- Relate art genres with other academic subjects.
- Learn about famous artists and their exploration of particular genres and ideas.

Unit 3 Discussion Assignment 2	Discussion	5 points
Unit 3 Quiz	Quiz	15 points

Unit 4: Art and its Early Importance

Unit Summary

Think about your life from when you first started school until now. You have grown and learned so much in the past years! What you knew and the way you acted in kindergarten is so different from what you know and how you act now, but the information you learned in those early years shaped you into the person you are today. This act of growing, changing, and maturing is also something that has happened in the world of art! This unit is going to look at art in some of its oldest forms. We'll take you through the Stone Age into ancient Egypt, China, and Central America to see where and how practices commonly used today originated. We'll also discover how these early influences shaped art into the subject we know and love today.

Learning Objectives

- Examine ancient art from all over the world.
- Learn how our early ancestors/artists created works of art.
- See into the lives of people from years ago by their art they left behind.
- Discover ways in which ancient art influenced how we create art today.

Learning Objectives

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first four units in this course (Note: You will be able to open this exam only one time.)

Assignments

Midterm Exam	Exam	50 points
Midterm Discussion Assignment	Discussion	5 points

Unit 5: Everyone's a Critic

Unit Summary

EVERYONE'S a critic. Hearing the word "critique" can be quite scary, especially when someone else is critiquing your work. Knowing that someone is going to look at (and judge) the beloved piece of art you spent so much time and effort on, brings forth many feelings. Nervousness (what if they don't like my work?!), judgment (they are going to think my art is terrible!), or embarrassment (I don't want anyone to look at my art!), might all come to the surface. However, critiques shouldn't be scary! In the art world, critiquing is an important part of the artistic process. Critiques are not meant to actually criticize but rather to provide new ideas, help artists improve their art, and let us better understand and describe pieces we are studying. We critique not only our own work but also the work of others. So get rid of your former fears of critiquing and jump into this unit knowing we are going to master the process of critiquing to improve our own artwork and help others improve theirs as well.

Learning Objectives

- Understand what critiquing is.
- Discover why it is important to critique.
- Learn the critiquing process.
- Use art vocabulary during the critiquing process.

Assignments

Unit 5 Text Questions	Homework	10 points
Unit 5 Online Lab Questions	Homework	10 points
Unit 5 Activity	Homework	15 points
Unit 5 Discussion Assignment 1	Discussion	5 points
Unit 5 Discussion Assignment 2	Discussion	5 points
Unit 5 Quiz	Quiz	15 points

Unit 6: Discovering Culture Through Common Themes

Unit Summary

Just as people around the world are different in the best ways, so is their art! Different cultures bring different views and practices to their artwork, which makes viewing art around the world special and interesting. By looking at some of the common themes seen in different art forms throughout the world, we will develop a better appreciation for different cultures without even having to renew our passport! While on our journey, we'll also have the opportunity to look at different people and places around the world, learn a little bit about their cultures, and see a few examples of how they bring their own creativity to art. Climb aboard! This train is leaving the station!

Learning Objectives

- Talk about common themes that are used in art throughout the world.
- See how the theme of daily life in art can show us differences in the cultures and lifestyles of people around the world.
- Understand how art can freeze a moment in time and give us the opportunity to look back on historical moments.
- Learn about celebrations and rituals that incorporate 2D art.
- See how the beauty of nature inspires artists throughout the world.

Unit 6 Text Questions	Homework	10 points
Unit 6 Online Lab Questions	Homework	10 points
Unit 6 Activity	Homework	15 points
Unit 6 Discussion Assignment 1	Discussion	5 points
Unit 6 Discussion Assignment 2	Discussion	5 points
Unit 6 Quiz	Quiz	15 points

Unit 7: Where Art Lives

Unit Summary

Once a masterpiece is created, what happens to that piece of art? Where does it go? Art museums are a great place for us to visit famous pieces of art and see them for ourselves. There are also several other places you can go to see art—we're going to learn more about these options and the proper etiquette to follow while viewing artwork. We'll also discuss what you should do with pieces of art you personally create and love. Should you just throw them in the back of your closet to collect dust? No! You need to exhibit your art for yourself and so others can enjoy it as well! Remember, art can be found in many places, whether that be in an art museum or hanging on your own living room wall!

Learning Objectives

- Discover best practices for visiting an art museum.
- Understand proper etiquette for visiting an art museum.
- Learn about other places art may live.
- Explore reasons why we create, collect, and exhibit art.

Assignments

Unit 8: Finding A Career Path Through Art

Unit Summary

Did you know that one day you'll be able to use your creative talents to make money? We have fully submerged ourselves in the world of 2D art, not only learning how to create art, but also how to look at, critique, and appreciate artwork created by others. If creating art, or even enjoying art, is your passion, you can turn that love into a career! Get ready to take a closer look at some of the career paths you may choose from in the field of 2D art—the opportunities are endless! **Learning Objectives**

- Explore the possibilities of future careers in the field of 2D art.
- Learn details about particular jobs and what they might look like as a career choice.
- Understand the different educational paths required to break into these careers.

Middle School Coding 1a: Introduction

Course Description

Do you find yourself wondering how your favorite apps, websites, and games were made? Maybe you want to try building your own. Well, now you can! In Middle School Coding 1a, you will learn all about the technology you use in your day-to-day life as well as explore how the internet functions. Get an introduction to the basics of computer science and discover how to create and build your very own website using HTML and CSS. You'll also become familiar with programming languages like JavaScript and Python Programming. You will leave the course with your very own portfolio of work that will showcase your skills and all that you've created.

Required Materials

- Laptop
- Internet

Websites Used

Unit 1

- Logo Interpreter (Login Optional; Free) – <http://www.logointerpreter.com/turtle-editor.php>.

Unit 2

- Typing Practice for Programmers (Sign in with Google or Demo; Free) – <https://typing.io>
- Obvibase (Sign in with Google, Facebook, or email; Free) – <https://www.obvibase.com/>.
- Newsela (Required for a lab question; Free) – <https://newsela.com>

Unit 3

- Tynker (Free) – <https://www.tynker.com>

Unit 4

- Lucidchart (Sign in with Google or email; Free) – <https://www.lucidchart.com>

Unit 5

- Replit (Free) – <https://repl.it/> Must have an email address to create a free account

Unit 1: Crack the Code!	5
Unit 2: There's Nothing "Soft" about Software!.	6
Unit 3: Let's Play!.	7
Midterm Exam	8
Unit 4: It's All Greek to Me!.	9
Unit 5: Snake Charmer.	10
Unit 6: Flexing Our Python Muscles!.	11
Final Exam	12

Unit 1: Crack the Code!

Unit Summary

Got problems? No problem! Computers can be used in many ways to help us solve them, but they're not the answer to everything. Sometimes good old human ingenuity is the key. We'll begin by solving some puzzles and exploring a secret computer that might be hiding in your home! Then, we'll start cracking some code with the help of a little green friend. When we harness the power of algorithms, code, and turtles—yes, turtles! —we can accomplish some really incredible things. Let's go code!

Learning Objectives

- Create algorithms to solve word games and puzzles
- Identify the components of a computer system
- Define the term algorithm and explain how it applies to computers
- Distinguish between problems that are better suited for humans to solve than computers and vice versa

Assignments

Unit 1 Text Questions	Homework	10 points
Unit 1 Online Lab Questions	Homework	10 points
Unit 1 Activity 1	Homework	15 points
Unit 1 Activity 2	Homework	15 points
Unit 1 Discussion Assignment 1	Discussion	5 points
Unit 1 Discussion Assignment 2	Discussion	5 points
Unit 1 Quiz	Quiz	15 points

Unit 2: There's Nothing "Soft" about Software!

Unit Summary

Video Are you ready for some more coding fun? Well, get your fingers warmed up because we are going to be practicing our typing skills! Programmers like you need to use keys on the keyboard that some people will never use. We don't want to go on a scavenger hunt every time we need to type a curly bracket or backslash, so let's learn them now! But typing is not the only thing you'll need to be a successful computer scientist. We're going to see how software can improve your life and the lives of others. You'll also get some hands-on experience with creating a database for a local deli. Sandwich, anyone?

Learning Objectives

- Define the term "software" and explain how software helps businesses perform tasks
- Understand why file types are necessary and describe the content contained in different file types
- Compare and contrast types of software and recommend the software that's best suited for a task
- Improve keyboarding skills by typing frequently using symbols in code
- Explain the purpose of a database and perform common database operations

Assignments

Unit 2 Text Questions	Homework	10 points
Unit 2 Online Lab Questions	Homework	10 points
Unit 2 Activity	Homework	15 points
Unit 2 Discussion Assignment 1	Discussion	5 points
Unit 2 Discussion Assignment 2	Discussion	5 points
Unit 2 Quiz	Quiz	15 points

Unit 3: Let's Play!

Unit Summary

From turtles to software to databases to typing, we've covered a lot of ground so far. You've prepared well, and now you're ready to start learning how to code. But it won't feel like work—the opposite, in fact! You'll be having so much fun creating characters and stories that you might wonder whether you're just playing around. You will use a block-based programming website to help you control a program and learn some of the foundations of coding. You'll also find and fix problems in a program. And, who knows? There might just be a flying dragon (yes, another reptile!) or a speeding car in your future. Let's get ready to play!

Learning Objectives

- Understand how block-based programming can be used to code
- Create simple programs in Tynker
- Define and apply the three main programming constructs—sequence, selection, and iteration
- Learn how to debug a program

Assignments

Unit 3 Text Questions	Homework	10 points

Midterm Discussion Assignment	Discussion	5 points

Unit 4: It's All Greek to Me!

Unit Summary

Did you know that there are other ways of counting numbers besides the way we normally count? Did you also know that a computer is only able to understand two numbers—0 and 1? Get ready to think like a computer and dive into the details of how words, pictures, and music are actually stored as numbers. We'll then explore how programming languages can interact with a computer and what each language has in common. Finally? A lesson on how to clean your house. Now grab your broom, and let's get swept away with coding languages!

Learning Objectives

- Describe how and why computers use binary
- Convert between binary and decimal number systems
- List and discuss the four components of programming languages
- Identify and use two common approaches for program design

Assignments

Unit 4 Text Questions	Homework	10 points
Unit 4 Online Lab Questions	Homework	10 points
Unit 4 Activity	Homework	15 points
Unit 4 Discussion Assignment 1	Discussion	5 points
Unit 4 Discussion Assignment 2	Discussion	5 points
Unit 4 Quiz	Quiz	15 points

Unit 5: Snake Charmer

Unit Summary

It's finally the moment we've all been waiting for! We have laid a solid foundation and are now ready to embark on our first adventure of writing code. We are going to face the snake and begin learning the ins and outs of the Python programming language. We'll combine some of the components of programming languages with our lightning-fast code-typing skills. We will also write some basic (but fun!) text games. Be prepared to face the snake!

Learning Objectives

- Comfortably use an online IDE to write code
- Understand the difference between the Editor and the Interpreter screens
- Use variables containing different data types and correctly type cast
- Receive and process user input
- Write a program that takes user input and applies a mathematical formula to it

Assignments

Unit 5 Text Questions	Homework	10 points
Unit 5 Online Lab Questions	Homework	10 points
Unit 5 Activity	Homework	15 points
Unit 5 Discussion Assignment 1	Discussion	5 points
Unit 5 Discussion Assignment 2	Discussion	5 points
Unit 5 Quiz	Quiz	15 points

Unit 6: Flexing Our Python Muscles!

Unit Summary

Now that you've whet your appetite for more coding challenges, get ready to take your Python skills to the next level! We are going to learn how to control our code by using if statements. We'll get a bit dizzy with loops, using them to make a game and a program to generate secure passwords. You will surely be inspired to go even further with your Python coding skills, creating new and exciting programs to share with family and friends!

Learning Objectives

- Regulate the flow of a program by using if statements
- Understand and use for loops to repeat a block of code a specific number of times
- Understand and use while loops to repeat a block of code until a condition is satisfied
- Increment a variable to keep count

Course Syllabus

Course Code: EDL109

Middle School Coding 1b: Learning Python and Javascript

Course Description

We don't always think about the role technology plays in our world but the truth is technology influences our everyday lives and affects how we relate to our friends, family, and even complete strangers. For those wanting to develop a greater understanding of this technology comes Middle School Coding 1b. Building on what you learned in Middle School Coding 1a, you'll expand your knowledge of programming languages and web development and further explore Advanced Python, HTML, and JavaScript. You will also learn the difference between web development and web application development and continue to grow your portfolio, which will serve to highlight everything you have learned and created in the course.

Required Materials

Browser-based software that may need a login

- Repl.it: <https://repl.it/>

Table of Contents

Unit 1: How to Train Your Python.	3
Unit 2: Plan the Code, Code the Plan	4
Unit 3: Build a Webpage	5
Midterm Exam	6
Unit 4: Give Your Webpage Some Style	7
Unit 5: Buttons and Gadgets	8
Unit 6: Become a Master Exterminator!	9
Final Exam	10

Unit 1: How to Train Your Python

Unit Summary

Python is a great language for beginners to learn the ins and outs of programming. Now that you've written a few programs and learned the basics, you're no longer a newbie! It's time to start learning some more intermediate Python skills. We will investigate how lists help keep us organized in real life as well as in our programs. And we'll keep our skills functioning smoothly by learning how to use Python functions. Get ready to train your Python!

Learning Objectives

- Define and use the list data structure in Python
- Iterate over a list in Python using for and while loops
- Write user-defined functions in Python
- Re-structure programs to use functions for greater efficiency

Assignments

Unit 1 Text Questions	Homework	10 points
Unit 1 Online Lab Questions	Homework	10 points
Unit 1 Activity	Homework	15 points
Unit 1 Discussion Assignment 1	Discussion	5 points
Unit 1 Discussion Assignment 2	Discussion	5 points
Unit 1 Quiz	Quiz	15 points

Unit 2: Plan the Code, Code the Plan

Unit Summary

When it comes to weekends, life goals, and code, planning is quite important! In fact, planning is so essential in programming that it may just save lives. One of the most common ways to plan code is to use a tool called pseudocode. You'll get to see some examples and then start writing your own pseudocode for a text-based adventure game. We're going to plan the code and then code the plan!

Learning Objectives

- Write a basic, high-level, structured plan for a program
- Convert a high-level plan to pseudocode
- Define and apply the iterative process to pseudocode and coding
- Write Python code for a basic text-based adventure game

Assignments

Unit 2 Text Questions	Homework	10 points
Unit 2 Online Lab Questions	Homework	10 points
Unit 2 Activity	Homework	15 points
Unit 2 Discussion Assignment 1	Discussion	5 points
Unit 2 Discussion Assignment 2	Discussion	5 points
Unit 2 Quiz	Quiz	15 points

Unit 3: Build a Webpage

Unit Summary

We all use the internet, but what is it, exactly? How do all of your favorite webpages work behind the scenes? And what does it take to be a web programmer? All of these questions (and more) will be answered! You'll learn two new languages, HTML and CSS, and use them to make your very own webpage. Get ready to take your coding skills in a new direction!

Learning Objectives

- Explain the difference between the internet and the World Wide Web
- Understand how websites are transferred from servers to computers
- Identify and use common HTML tags to build a basic webpage
- Use CSS to apply style to an HTML document

Assignments

Unit 3 Text Questions	Homework	10 points
Unit 3 Online Lab Questions	Homework	10 points
Unit 3 Activity	Homework	15 points
Unit 3 Discussion Assignment 1	Discussion	5 points
Unit 3 Discussion Assignment 2	Discussion	5 points
Unit 3 Quiz	Quiz	15 points

Midterm Exam

Learning Objectives

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first three units in this course (Note: You will be able to open this exam only one time.)

Assignments

Midterm Exam	Exam	50 points
Midterm Discussion Assignment	Discussion	5 points

Unit 4: Give Your Webpage Some Style

Unit Summary

HTML and CSS are markup languages that help us format webpages. It's time to take our skills to the next level by dividing a webpage into sections and applying some interesting styles to them. And then, we'll play a fun hide-and-seek game...with red pandas! Bet you didn't see that coming! Finally, we'll interact with our webpage by using a bit of JavaScript. Bring on the fun!

Learning Objectives

- Understand and apply the div tag to section-off webpages
- Apply new CSS properties to div elements by using an id
- Use a variety of HTML and CSS to create a webpage with pictures that appear when clicked on or hovered over
- Write a basic JavaScript function
- Use JavaScript event listeners to trigger an alert box

Assignments

Unit 4 Text Questions	Homework	10 points
Unit 4 Online Lab Questions	Homework	10 points
Unit 4 Activity	Homework	15 points
Unit 4 Discussion Assignment 1	Discussion	5 points
Unit 4 Discussion Assignment 2	Discussion	5 points
Unit 4 Quiz	Quiz	15 points

Unit 5: Buttons and Gadgets

Unit Summary

HTML and CSS are great for making static webpages, but by adding JavaScript into the mix, we open up a whole new range of possibilities! Did you ever think you'd be making your very own calculator? We will use JavaScript to create buttons that display the date, calculate the product or quotient of two numbers, and submit passwords. We'll also explore how to use if/else statements and while/for loops in this language. And what do shoulders and surfing have to do with any of this? Let's find out!

Learning Objectives

- Implement buttons in HTML that trigger a JavaScript function when clicked
- Write user-defined JavaScript functions
- Implement HTML web forms with text fields and buttons
- Understand and use if/else statements in JavaScript
- Understand and use while/for loops in JavaScript

Assignments

Unit 5 Text Questions	Homework	10 points
Unit 5 Online Lab Questions	Homework	10 points
Unit 5 Activity	Homework	15 points
Unit 5 Discussion Assignment 1	Discussion	5 points
Unit 5 Discussion Assignment 2	Discussion	5 points
Unit 5 Quiz	Quiz	15 points

Unit 6: Become a Master Exterminator!

Unit Summary

Bugs are all around us! No, we're not talking about insects outside—we're talking about bugs (errors) in our code! No matter how much of an expert programmer you are, you will always have to deal with mistakes in your code. Some may be the equivalent of ladybugs—totally harmless and maybe even a tad adorable—while others may be catastrophically huge actaeon beetles. (Have you ever seen one? You'll never forget it if you have!) Once you've learned the tips and tricks in this unit, you will be better equipped to find and fix those annoying bugs in your programs, regardless of the language you're coding in. Don't worry—no repellent will be needed. These bugs won't bite or sting! But maybe you'd better bring your swatter, just in case...

Learning Objectives

- Define and complete a trace table to find errors
- Use the debugger tool in REPL.it
- Identify common mistakes in Python and JavaScript
- Use a try except statement to anticipate errors in Python
- Use a try catch statement to anticipate errors in JavaScript

Assignments

Middle School Exploring Music

Course Description

What comes to mind when you hear the word ‘music’? Do you think about your favorite band or artist? Do you think about instruments and scales and chords? The word ‘music’ means something different to everyone. This is why in Exploring Music there is a little bit of something for everyone! You will learn about how we hear music and how music affects our lives. You will explore important elements of music like rhythm, pitch, and harmony, as well as different musical genres. You will discover more about your singing voice and musical instruments and composition while taking in the history and culture of music over the years. Tune up your understanding and appreciation for all things music by signing up for this course!

Table of Contents

Unit 1: Good Vibrations (Intro to Music)	3
Unit 2: Elements of Music	4
Unit 3: Start With Your Ears	5
Unit 4: Exploring Your Voice	6
Midterm Exam	7
Unit 5: Instrumental Skills	8
Unit 6: Musical Cultures	9
Unit 7: Dynamic Performing	10
Unit 8: Composing and Arranging	11
Final Exam	12

Unit 1: Good Vibrations (Intro to Music)

Unit Summary

Imagine a baseball game that began without singing the National Anthem. What about a birthday party where, before cutting the cake, no one sang “Happy Birthday,” or a wedding where the bride walked down the aisle to silence? Music has been an important part of human life for thousands of years, and we are just now discovering the impact that music can have on the human brain, emotions, and even the forces that shape history. In this Unit, we will explore the origins of music and the role that music plays in our lives.

Learning Objectives

- Reflect on the different places and times that music is heard.
- Discuss the origin of music in human culture.
- Summarize the roles that music plays in human society.
- Understand the way our brain processes music.
- Examine careers in the music industry.

Assignments

Unit 1 Text Questions	Homework	10 points
Unit 1 Activity	Homework	15 points
Unit 1 Discussion Assignment 1	Discussion	5 points
Unit 1 Discussion Assignment 2	Discussion	5 points
Unit 1 Quiz	Quiz	15 points

Unit 2: Elements of Music

Unit Summary

Have you ever been to a concert and wondered where the musicians learned how to perform so powerfully? They all started by learning the basics: the elements of music! You might be familiar with rhythm, pitch, melody, and harmony. We will explore these elements a little deeper so that you have the tools you need to create beautiful music!

Learning Objectives

- Tap the steady beat to any song.
- Recognize note values and rhythms when written.
- Understand how rhythm and melody work together.
- Describe how a piano keyboard can help us understand steps, scales, and chords.

Assignments

Unit 2 Text Questions	Homework	10 points
Unit 2 Activity	Homework	15 points
Unit 2 Discussion Assignment 1	Discussion	5 points
Unit 2 Discussion Assignment 2	Discussion	5 points
Unit 2 Quiz	Quiz	15 points

Unit 3: Start With Your Ears

Unit Summary

In our busy world, how do we learn to really focus on the music all around us? Should we listen for the beat, the melody, or the harmony? What is most important? Well, the answer of course is—all of them! In this unit, we will learn how to sharpen our listening skills in order to hear the details of music. Doing so will help us to begin thinking about music in a new way.

Learning Objectives

- Use active listening when enjoying a piece of music.
- Apply the listening checklist to any piece of music.
- Discuss the grand staff and how it relates to the musical elements.
- Describe the importance of transcribing for musicians.

Assignments

Unit 3 Text Questions	Homework	10 points
Unit 3 Activity	Homework	15 points
Unit 3 Discussion Assignment 1	Discussion	5 points
Unit 3 Discussion Assignment 2	Discussion	5 points
Unit 3 Quiz	Quiz	15 points

Unit 4: Exploring Your Voice

Unit Summary

Even if you just sing in the shower, it's important to understand how our voices help us connect to ourselves and others, and also how our voices help us to express ourselves musically. In this unit we will build on our knowledge of musical elements to start reading real music!

Learning Objectives

- Follow the five steps to reading a new piece of music.
- Find the key signature, time signature, and your vocal part.
- Use solfege syllables to begin singing new music.
- Practice guidelines for vocal health to make sure your voice stays healthy and flexible.

Assignments

Unit 4 Text Questions	Homework	10 points
Unit 4 Discussion Assignment 1	Discussion	5 points
Unit 4 Discussion Assignment 2	Discussion	5 points
Unit 4 Quiz	Quiz	15 points

Midterm Exam

Learning Objectives

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first four units in this course (Note: You will be able to open this exam only one time.)

Assignments

Midterm Exam	Exam	50 points
Midterm Discussion Assignment	Discussion	5 points

Unit 5: Instrumental Skills

Unit Summary

Picture yourself listening to your favorite song. What instruments can you detect? Even modern music, which is heavily dependent on electronic “instruments,” is based on instruments you may know well: guitar, trumpets, drums, piano (synthesizers). Maybe you’re familiar with video games where you competitively play virtual instruments—Guitar Hero, anyone?

Learning Objectives

- Identify the different instrument families.
- Define the difference between classical music and world music.
- Become familiar with world instruments.
- Discuss musicianship and musical repertoire.

Assignments

Unit 5 Text Questions	Homework	10 points
Unit 5 Activity	Homework	15 points
Unit 5 Discussion Assignment 1	Discussion	5 points
Unit 5 Discussion Assignment 2	Discussion	5 points
Unit 5 Quiz	Quiz	15 points

Unit 6: Musical Cultures

Unit Summary

Human beings have been creating and enjoying music for thousands of years. Because we're such a creative species, we use music to communicate, solidify social bonds, and entertain ourselves, so this music has evolved into different categories. As you can see from our study of world instruments, the sky's the limit when it comes to creating new music and new instruments. Now, let's become familiar with the ways music has evolved over time and in different places!

Learning Objectives

- Understand why music developed differently in different times and places.
- Summarize the history of music from the ancient period through the 20th century.
- Distinguish the music of various genres.
- Discuss the role of technology in the evolution of music.

Assignments

Unit 6 Text Questions	Homework	10 points
Unit 6 Activity	Homework	15 points
Unit 6 Discussion Assignment 1	Discussion	5 points
Unit 6 Discussion Assignment 2	Discussion	5 points
Unit 6 Quiz	Quiz	15 points

Unit 7: Dynamic Performing

Unit Summary

Let's rock! It's time to finally put all of our musical skills to work as we learn to play the guitar together. But first, we'll talk about good performances. Have you ever felt chills down your spine as you listened to a piece of music? How does that happen, and how can we make sure we are performing well for the audience? Let's find out!

Learning Objectives

- Discuss why preparation and musicianship are essential for an effective musical performance.
- Identify signs of performance anxiety and develop tools to combat it.
- Understand how to hold, tune, and use proper finger positioning on the guitar.
- Practice a simple guitar progression.

Assignments

Unit 7 Text Questions	Homework	10 points
Unit 7 Activity	Homework	15 points
Unit 7 Discussion Assignment 1	Discussion	5 points
Unit 7 Discussion Assignment 2	Discussion	5 points
Unit 7 Quiz	Quiz	15 points

Unit 8: Composing and Arranging

Unit Summary

By sticking with a few guidelines, we all have the power to follow in the footsteps of Beethoven or Bernstein! When we compose new music, we will draw upon our musical elements and put them together to create a new piece of music.

Learning Objectives

- Discuss why the definition of a “good” composition will vary.
- Craft melody and harmony.
- Explain how a melodic motive and chord progression work together.
- Utilize various compositional techniques such as repetition, contrast, and variation.

Assignments

Music Appreciation: The Enjoyment of Listening

Course Description

Have you ever heard a piece of music that made you want to get up and dance? Cry your heart out? Sing at the top of your lungs? Whether pop, classical, or anything in between, music provides a powerful way for people to celebrate their humanity and connect with something larger than themselves. Music Appreciation: The Enjoyment of Listening not only will provide a historical perspective on music from the Middle Ages to the 21st century, but it will also teach you the essentials of how to listen and really hear (with a knowledgeable ear) the different music that's all around you. Learning how to truly appreciate sound and melody is the best way to ensure a continued love of this delightful art form.

Table of Contents

Unit 1: The Elements of Music	3
Unit 2: Pop Music	4
Unit 3: Ancient Music.	5
Unit 4: Renaissance Music.	6
Midterm Exam	7
Unit 5: The Baroque Period	8
Unit 6: The Classical Era.	9
Unit 7: The Romantic Period	10
Unit 8: Jazz.	11
Final Exam	12

Unit 1: The Elements of Music

Unit Summary

The world is full of music. We hear it as we shop and while driving in our cars. We attend concerts and buy albums and digital downloads to listen to by ourselves. Yet, despite having music surround us, we may not always stop to consider the elements and pieces that combine to make music. In this unit, we will consider some of the basic elements of music and how these elements are used in different genres of music. We will discuss pitch, rhythm, dynamics, melody, and form. Each of these elements is present in the music that we hear and play. It is the combination of them that produces a unique and interesting piece of music.

Learning Objectives

- Describe the basic elements of music.
- Understand and discuss pitch and melody and their roles in a piece of music.
- Discuss some of the notations and language used to distinguish rhythm in a piece of music.
- Understand dynamics and its effect on music.
- Analyze and discuss form in music and how this involves the other elements of music.

Assignments

Unit 1 Text Questions	Homework	10 points
Unit 1 Online Lab Questions	Homework	10 points
Unit 1 Discussion Assignment 1	Discussion	5 points
Unit 1 Discussion Assignment 2	Discussion	5 points
Unit 1 Quiz	Quiz	15 points

Unit 2: Pop Music

Unit Summary

Since the mid-twentieth century, pop music has been associated with youth culture. With the advent of rock and roll in the 1950s and the gradual separation of rock and pop music, young people have flocked to popular artists, spending billions of dollars on music, concerts and performances, and merchandise. In this unit, we will discuss the development of pop music, with its catchy tunes and lyrics. In doing so, we'll learn how pop music built on the musical genres that came before it and how technology influenced pop.

Learning Objectives

- Describe the relationship between popular music and pop music.
- Discuss the characteristics that help define pop music.
- Show how technological advances helped shape pop music.
- Discuss the history and development of pop music.
- Discuss the current status of pop music.

Assignments

Unit 2 Text Questions	Homework	10 points
Unit 2 Online Lab Questions	Homework	10 points
Unit 2 Discussion Assignment 1	Discussion	5 points
Unit 2 Discussion Assignment 2	Discussion	5 points
Unit 2 Quiz	Quiz	15 points

Unit 3: Ancient Music

Unit Summary

While we may never know what the first music sounded like, we do know that music has played a role in human history for thousands of years. This unit will focus on what is known about the history of music through the Middle Ages. It will include a discussion on the types of instruments that were used as well as the role of music in early societies. We will examine what is known about music in ancient Greece and the development of classical music in the Western world.

Learning Objectives

- Discuss the history of music before the Middle Ages.
- Describe the role of music in ancient societies.
- Discuss the styles of music that were present before the Middle Ages.
- Describe what musical instruments were used in ancient times.
- Trace the development of music through the Middle Ages.

Assignments

Unit 3 Text Questions	Homework	10 points
Unit 3 Online Lab Questions	Homework	10 points
Unit 3 Discussion Assignment 1	Discussion	5 points
Unit 3 Discussion Assignment 2	Discussion	5 points
Unit 3 Quiz	Quiz	15 points

Unit 4: Renaissance Music

Unit Summary

In this unit, we will learn more about the music of the Renaissance. The Renaissance in Europe was a time of great discovery and creation, and this was reflected in the music of the time. Music and society influenced each other in a number of complex ways, from the invention of the printing press to the increasing popularity of dancing and instrumental music. A number of instruments were created during this time that would eventually be adapted into the forms that we are familiar with today.

Learning Objectives

- Understand the Renaissance and its relationship to the music of this time period.
- Discuss the effects of music on society.
- Describe some of the instruments that were developed during this period.
- Discuss some of the characteristics of Renaissance music and the forms of music composed.
- Talk about a few of the influential composers of Renaissance music.

Unit 5: The Baroque Period

Unit Summary

The Baroque period of music left a lasting impression on Western music. From about 1600 to 1750, composers changed some of the musical notation, established opera, and expanded instrumental performance. This unit will focus on the development of music styles such as opera and classical music. Composers such as Bach and Handel will be considered.

Learning Objectives

- Discuss the transition from earlier forms of music to music of the Baroque period.
- Analyze the changes that this period made to Western music.
- Discuss opera and how it developed.
- List some of the composers and musicians during this time period.
- Trace the development of music through the Baroque period.

Assignments

Unit 5 Text Questions	Homework	10 points
Unit 5 Online Lab Questions	Homework	10 points
Unit 5 Discussion Assignment 1	Discussion	5 points

Unit 6: The Classical Era

Unit Summary

From about 1750 to 1830, the Classical period of music occurred. Often lighter and less complex than music from the Baroque period, music from the Classical period features frequent changes in mood and an emphasis on instrumental music. This unit will focus on the classical period of music. It will discuss composers such as Mozart and Beethoven.

Learning Objectives

- Analyze the changes in music during the Classical period.
- Discuss the musical forms, such as sonatas, that were popular.
- Describe the common features of music from the Classical period.
- Discuss some of the composers from this period.
- Trace the development of music during the Classical period.

Assignments

Unit 7: The Romantic Period

Unit Summary

During the 1800s, the Romantic period in music developed, creating many of the modern forms of music. This unit will focus on the Romantic period in music. It will discuss composers such as Chopin, Liszt, and Tchaikovsky. We will explore the effect of the increase in orchestra size on the music composed, as well as the increased importance of music performance and concerts.

Learning Objectives

- Describe the music of the Romantic period and how it differs from earlier music.
- Discuss the features and characteristics of music from this period.
- List some of the composers and musicians from this time period.
- Understand the role of music in society during this time period.
- Trace the development of music during the Romantic period.

Unit 8: Jazz

Unit Summary

During the early twentieth century, jazz evolved as a musical style that brought together music traditions from both the West and Africa. One of the key features of this musical style is improvisation. In this unit, we will discuss the development and influence of jazz. We will learn about some of the jazz musicians who helped to develop this form of music.

Learning Objectives

- Discuss the musical traditions that combined in jazz.
- Describe the characteristics and features of jazz music.
- Understand improvisation and its role in jazz music.
- Discuss some of the musicians who helped to develop jazz.
- Trace the development of jazz during the twentieth century.

Photography Basics Syllabus

Course Description

In Photography Basics, you will learn how to correctly explain the setup and proper use of basic photography equipment. Through projects and research activities embedded in the course, you will create and present a portfolio of work. In addition, you will learn to describe professional habits, etiquette, and technology essential to creating a photograph. No access to photography equipment is needed in order to take the course; opportunities to practice with digital simulations and theory will be present throughout the course. This course is designed for any beginner interested in learning about photography and what it could take to make a career out of an interest in this exciting, dynamic field of study. Photography Basics is designed for ninth grade or higher. A background in photography is not necessary to take this course.

Suggested Prerequisites: none

Course Objectives

- Correctly explain the setup and proper use of basic photography equipment.
- Create and present a portfolio of work.
- Describe professional habits, etiquette, and technology essential to creating a photograph.

Required Materials

- word processing software
- the ability to take screen shots OR access to digital photography equipment (recommended)
- Internet browser
- pen and paper (for notes)

Course Organization

Lessons 1-29 follows this general outline. The first lesson of the course has an additional activity at the start to introduce you to the course and explain important features and functionalities.

Warm Up (10-15 mins) - All of these pieces contain one open-ended question for you to explain any previous knowledge on a topic. Grades are based on the ability to explain your ideas, not on criteria of how well you understand a topic at this point. Use these questions as opportunities to bring up issues or concerns with understanding.

When appropriate, these activities also include 1-2 review questions for to test your understanding of previous lessons' material.

Direct Instruction (30-35 mins)

Application Activity or Project (35-45 mins)

Application Activity: These interactive pages allow for a chance to practice, explore, and dive into the material.

Photography Basics Syllabus

Project Check-In: There are two projects in this course. Directions are provided to be able to explore a 360-video environment to simulate setting up and taking photos. Alternative directions describe how to go out and take specific photos on your own.

Direct Instruction (30-35 mins)

Discussion Board (15-20 mins)

Questions in the discussion board are meant to be more open-ended. Often, more than one prompt is given to allow continued conversation.

Review (10-20 mins)

These short pieces summarize the major points from the direct instruction learning activities.

Checkpoint or Unit Exam (30-40 mins)

In Lesson 30, you will complete a Unit Review Activity for each unit, then take the Final Exam.

Lesson 30 follows this outline:

Activity 1: Unit 1 Review

Activity 2: Unit 2 Review

Activity 3: Unit 3 Review

Activity 4: Unit 4 Review

Activity 5: Unit 5 Review

Activity 6: Unit 6 Review

Activity 7: Final Exam

Schedule of Work

The times noted above were designed to give you plenty of time for exams and projects, however, there is no time limit for activities, projects, or exams. If you finish an activity sooner than expected, please feel free to spend time working on your projects.

Topics

- Introduction to Class
 - Basic History of Photography
 - Choosing the Right Camera
 - Equipment Used in Digital Photography
 - Megapixels and Lenses
 - Digital SLR Camera
- Capturing Digital Photographs
 - Lenses
 - Understanding Aperture and Shutter Speed
 - Appropriate Resolutions

Photography Basics Syllabus

- Focusing and Filters
- Creating Moods
- Setting the Scene
 - Lighting Equipment
 - Lighting Setups: Part One
 - Lighting Setups: Part Two
 - Identifying Lighting Setups in Photographs
 - Lights, Camera, Action: Your Subject
- Post-Production
 - File Formats and Types
 - Editing Files: Part One
 - Editing Files: Part Two
 - Post-Production and Publishing: Basic Terminology
 - Post-Production Software
- The Finished Image: Display, Storage, and Dissemination
 - Backing Up Your Work
 - Image Storage Techniques
 - Color
 - Converting and Sending Digital Files
 - Image Delivery
- Protecting Your Equipment and Work
 - Equipment Maintenance and Care
 - Plagiarism
 - Commercial and Fair Use
 - Copyright
 - Review & Final Exam

ELEMENTARY MUSIC - RECORDERS LEVEL 1

Course Description

This course combines music and performing arts. Students will experience and learn new songs and perform them using their bodies. In addition, the student will begin learning how to play the recorder.

Course Requirements***Grade Level***

K-3

**** Materials***

Recorder

Duration

1 Semesters

Prerequisites

none

Technology Skills

- Internet Navigation
- Word Processing Skills
- Email Communication (with assistance of parent or teacher)

Major Concepts

- Sing songs from the songbook
- Act out small dramas using Fingerplays
- Play the following notes B, A, and G
- Progress through the Beginning Recorder Book practicing songs until able to play fluidly

Scratch Coding Syllabus

Course Description

Scratch is a program developed by MIT teaching students the basics on how computers think! This program will introduce students to real coding programs and allow them to drag and drop coding blocks creating a fully functional program. The simple user interface and tutorials allow students to quickly create and run their code to see its results! This course assumes no prior computer coding knowledge and includes self-graded multiple-choice tests and quizzes.

Course Requirements

Grade Level

3 – 8

Materials

None

Tech Requirements

Students will need a computer or laptop for this course; tablets are not sufficient.

Sports and Entertainment Marketing

Course Description

Whether you are watching a famous athlete make an unbelievable play or witnessing a sensational singing performance, the world of sports and entertainment is never boring. Although it may seem impossible for you to be a part of this glittery world, it's not! The Sports and Entertainment Marketing field offers careers that combine entertainment with traditional marketing, but with a whole lot more glamour. Explore basic marketing principles while delving deeper into the multibillion dollar sports and entertainment industry. Learn how professional athletes, sports teams, and famous entertainers are marketed as commodities and how the savvy people who handle these deals can become very successful. This course will show you exactly how things work behind the scenes of a major entertainment event and how you can be part of the act.

Table of Contents

Unit 1: Basic Principles of Marketing	3
Unit 2: Introduction to Sports and Entertainment Marketing	4
Unit 3: Principles of Effective Sports and Entertainment Marketing in the 21st Century	5
Unit 4: Diversity & Demographics	6
Unit 5: Event Marketing	7
Midterm Exam	8
Unit 6: Product Marketing	9
Unit 7: Sponsorships and Endorsements	10
Unit 8: Finances	11
Unit 9: Careers in Sports and Entertainment Marketing	12
Unit 10: Societal & Cultural Influences	14
Final Exam	15

Unit 1: Basic Principles of Marketing

Unit Summary

In order to understand sports and entertainment marketing, you need to have a good grasp of the basic principles of marketing in general. Therefore, before we dive into the course, we're going to review the fundamentals of marketing. Pay close attention during this unit so that you can reference the material as you proceed through the rest of the course.

Learning Objectives

- Explain the exchange process.
- Define marketing.
- Discuss the importance of determining target market.
- Compare and contrast real vs. perceived value.
- Identify and describe different types of utility.
- Define market research.
- Identify types of market research.
- Discuss the effects of the Internet on marketing.
- Compare and contrast Internet marketing and traditional marketing.
- Identify the basic components of Internet marketing.

Unit 1 Discussion Assignment 1	Discussion	5 points
Unit 1 Discussion Assignment 2	Discussion	5 points
Unit 1 Quiz	Quiz	15 points

Unit 2: Introduction to Sports and Entertainment Marketing

Unit Summary

Do you want to know how Lady Gaga remains so popular or why athletes make so much money? Sure, talent plays its part, but in order to fully answer this question, you need to understand the sports and entertainment marketing industry. In the last unit, we discussed the basic principles of marketing. You learned about how a company brands itself, identifies its target market, and creates a perceived value for its product and/or services. Now, we're going to apply this knowledge to the field of sports and entertainment marketing. The key here is to think of the sports team or entertainer as a commodity—that is, a marketable item that satisfies a want or need.

Learning Objectives

- Demonstrate knowledge of the history of sports and entertainment as an industry and how it relates to today's marketplace.
- Distinguish among sports and entertainment marketing terms.
- List major environmental influences on the demand for sports and entertainment.
- Research sports and entertainment marketing information.
- Explain legislation that impacts sports and entertainment marketing.
- Describe activities to market a sports property.
- Define and simulate sports properties and marketing.
- Discuss why teams use marketing.
- Discuss the various roles in sports and entertainment marketing.

Unit 2 Online Lab Questions	Homework	15 points
Unit 2 Discussion Assignment 1	Discussion	5 points
Unit 2 Discussion Assignment 2	Discussion	5 points
Unit 2 Quiz	Quiz	15 points

Unit 3: Principles of Effective Sports and Entertainment Marketing in the 21st Century

Unit Summary

In the last unit, you learned the basics of sports and entertainment marketing. We discussed how this particular industry markets its commodities and makes money by selling both core and ancillary products. These are strategies that event marketers have been using for decades and decades, and they still make up the backbone of this type of marketing. However, new technologies such as the Internet and social media have made their mark on the industry. In this unit, we'll explore these and other new advancements and discuss the current, most effective strategies for marketing sports and entertainment commodities in the 21st century. We'll also delve more deeply into the tried-and-true marketing strategies that may be enhanced by technology, but have not changed fundamentally since the very beginning of sports and entertainment marketing. You'll be invited to think critically about these strategies, both as a consumer of these commodities as well as a marketer working within the industry.

Learning Objectives

- List and describe the marketing fundamentals that drive sports and entertainment marketing.
- Discuss how technology has changed the sports and entertainment marketing industry, for better and for worse.
- List and describe trends and emerging technologies affecting sports and entertainment marketing.
- Describe the challenges the sports and entertainment marketing industry currently faces and how they can navigate these challenges.
- Define key terms related to the principles of effective sports and entertainment marketing.

Unit 3 Online Lab Questions	Homework	15 points
Unit 3 Discussion Assignment 1	Discussion	5 points
Unit 3 Discussion Assignment 2	Discussion	5 points
Unit 3 Quiz	Quiz	15 points

Unit 4: Diversity & Demographics

Unit Summary

In the last unit, we discussed how one of the main strategies for building a successful sports and entertainment marketing campaign is to hit the target market—that is the types of people most likely to purchase a particular sports or entertainment commodity. However, identifying a single target market for such a commodity is neither possible nor desirable. After all, there are likely many different types of consumers interested in attending a certain event or purchasing sports apparel. That’s where diversity and demographics play their role in the game of sports and entertainment marketing. In this unit, we’ll take a look at the statistics regarding sports fans and their behavior as well as how the sports and entertainment marketing industry is adapting in order to meet the demands of a broader and more diverse market.

Learning Objectives

- Discuss how the use of demographics has influenced the industry.
- Explain elements of culture and the need for understanding cultural diversity.
- Identify how diversity affects sports and entertainment markets.
- Describe how the broader female fan base has impacted marketing efforts.
- Explain the impact of multiculturalism on sports and entertainment marketing activities.

Assignments

Unit 4 Online Lab Questions	Homework	15 points
Unit 4 Discussion Assignment 1	Discussion	5 points
Unit 4 Discussion Assignment 2	Discussion	5 points
Unit 4 Quiz	Quiz	15 points

Unit 5: Event Marketing

Unit Summary

In the last unit, we talked about how diversity and demographics affected the sports and entertainment marketing industry. You learned how athletes, entertainers, teams, companies, and organizations determine key characteristics of different segments of their target markets and then modify their marketing strategies accordingly in order to effectively reach a diverse market. In this unit, we're going to discuss one of the key components of the sports and entertainment marketing field—event marketing.

Learning Objectives

- Discuss the components of the event triangle.
- Describe the exchanges developed in the event triangle.
- Explain the effects of media broadcasting on the event triangle.
- Identify best practices in event marketing.
- Distinguish between push and pull marketing techniques.
- Distinguish between buzz and hype.
- Evaluate event marketing campaigns.
- Discuss how technology has impacted event marketing.
- Identify effective social media marketing strategies for event marketers.

Midterm Exam

Learning Objectives

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first five units in this course (Note: You will be able to open this exam only one time.)

Assignments

Midterm Exam	Exam	50 points
Midterm Discussion Assignment	Discussion	5 points

Unit 6: Product Marketing

Unit Summary

In the last unit, we discussed the heart of the sports and entertainment marketing industry—event marketing. In this unit, we’ll explore another key component of the business—product marketing. Recall that at the beginning of the course, we determined that there are two key commodities that sports and entertainment marketers must promote to their prospects: core products and ancillary products. We identified the core product as the entertainer, athlete, or team. This core product must exist in order for any other related product to be sold. These related products, called ancillary products, depend on the draw of the core product in order to be appealing to the target market. There are many other factors that determine the success of these products, however. This unit will focus on how sports and entertainment marketers effectively promote, market, distribute, and sell their ancillary products.

Learning Objectives

- Explain channels of distribution for sports and entertainment marketing products and describe activities of each channel member.
- Identify components of the promotional mix such as advertising, visual merchandising, and personal selling.
- Demonstrate visual merchandising techniques for sports and entertainment marketing.
- Analyze a promotional plan for effectiveness.
- Describe stages of new-product planning.
- Define product mix.
- Identify stages of the product life cycle for new or existing sports or entertainment marketing products
- What has the geography of gender shown about society?

Unit 6 Online Lab Questions	Homework	15 points
Unit 6 Discussion Assignment 1	Discussion	5 points
Unit 6 Discussion Assignment 2	Discussion	5 points
Unit 6 Quiz	Quiz	15 points

Unit 7: Sponsorships and Endorsements

Unit Summary

It's no surprise that the sports and entertainment marketing industry is big business. We all know that famous athletes and celebrities can become overnight millionaires or even billionaires, but you may find yourself wondering just how they make this enormous amount of money. Moreover, you might be curious as to how event organizers pay for the huge stadiums and elaborate film productions we've become so accustomed to. Where does all of this money come from? More often than not, the answer lies in sponsorships and endorsements. In this unit, we'll take a look at how these agreements work to fund the sports and entertainment industry that we've come to know today.

Learning Objectives

- Identify components and content for a sponsorship proposal.
- Define and explain sponsorship issues.
- Categorize costs associated with a sponsorship.
- Identify types of sponsorship sales and relationship development.
- Examine benefits of sponsorship opportunities.
- Explain laws that may affect an endorsement agreement.
- Identify components of endorsement contracts.
- Discuss issues related to celebrity behavior and endorsements.
- Research the rationale for a business to engage in endorsement contracts.

Unit 7 Online Lab Questions	Homework	15 points
Unit 7 Discussion Assignment 1	Discussion	5 points
Unit 7 Discussion Assignment 2	Discussion	5 points
Unit 7 Quiz	Quiz	15 points

Unit 8: Finances

Unit Summary

Over the duration of this course, we've cited many examples of how athletes and entertainers hit the jackpot in the sports and entertainment marketing industry. It's a multi-billion-dollar industry! With those big bucks, though, come lots of risks and a potential accounting nightmare. In this unit, we'll be exploring the related field of finances and the impact it has on the sports and entertainment marketing industry.

Learning Objectives

- Distinguish between buying for resale and buying for organization use.
- Explain the importance of identifying needs as the first step of the purchasing process.
- Demonstrate knowledge of the buying process by preparing a buying plan.
- Complete purchase orders and process invoices.
- Categorize business risks.
- Explain methods a business uses to control risks such as surveillance and safety training.
- Explain the use of inventory control information to prepare financial reports and make buying decisions.

Unit 9: Careers in Sports and Entertainment Marketing

Unit Summary

Throughout this course, we have discussed the many ways that professionals have successfully navigated the field of sports and entertainment marketing, in some instances, making big bucks for both themselves and the athletes, entertainers, or organizations that they represent. This degree of success cannot be achieved by one individual alone, however. In most instances, it requires a great team effort, and not just from athletes or celebrities! In this unit, we will discuss the various roles professionals play in the sports and entertainment marketing industry, exploring how these positions interact in order to execute successful sports and entertainment marketing campaigns. As you progress through the course, pay particular attention to the job descriptions for each of these positions. Who knows? One of them just might be your future career!

Learning Objectives

- Research careers in the sports and entertainment marketing industry.
- List and describe businesses related to sports and entertainment.
- Describe team function.
- Use teamwork to solve problems.
- Distinguish between the roles of team leaders and team members.
- Examine characteristics of good leaders.
- Identify employers' expectations and appropriate work habits.
- Define discrimination, harassment, and equality.
- Use time-management techniques to develop and maintain schedules and meet deadlines.
- Evaluate how teams measure their results.
- Develop two methods to recognize and reward team performance.
- Justify the role of professional organizations, trade associations, and labor unions in the sports and entertainment industry.

Unit 10: Societal & Cultural Influences

Unit Summary

Throughout this course, we've discussed the business and marketing side of the sports and entertainment industry. You've learned how the key players in this industry market themselves, make a living, and even account for their finances. In this unit, we'll explore how this industry affects all of us by influencing individuals specifically and our culture and society as a whole.

Learning Objectives

- Explain the psychology of marketing.
- Identify ways in which the sports and entertainment marketing industry impacts our society and culture.
- Discuss how celebrities influence young people.
- Evaluate the role celebrities play in politics.
- Define “referent power” and how it affects the influence of celebrities.
- Explain the merging of politics and celebrity and the implications of this merging.
- Demonstrate how to be savvy consumers of sports and entertainment commodities.

Theater, Cinema, and Film Production

Course Description

Lights! Camera! Action! Let's explore the enchanting world of live theater and its fascinating relationship to the silver screen. In Theater, Cinema, and Film Production, you'll learn the basics of lighting, sound, wardrobe, and camerawork while examining the magic that happens behind all the drama. Delve into the glamorous history of film and theater, and examine the tremendous influence these industries have had on society and culture over the years. During this unit, you'll discuss and analyze three classic American films—Casablanca, Singin' in the Rain, and The Wizard of Oz—to help you learn how to critique and appreciate some of the most famous dramas of all time.

Required Materials

You will be required to have access to the standard editions of the three films used in this course:

- Singin' in the Rain (1952)
- Wizard of Oz (1932)
- Casablanca (1942)

If you do not already have access to these movies, you may consider other sources such as your local library.

Note: Timestamps referenced throughout the course apply to standard editions of the applicable film and may not align with any extended/modified versions.

Table of Contents

Unit 1: Introduction to Film Theory	3
Unit 2: The World of Theater	4
Unit 3: Lighting the Scene	5
Unit 4: The Basic Elements of Camerawork	6
Unit 5: Managing Sound in Film and Theater	7
Unit 6: Wardrobe!	8
Midterm Exam	9
Unit 7: Plotting the Script.	10
Unit 8: Acting and Directing	11
Unit 9: The Film Production Process.	12
Unit 10: Audiences and Economics	13
Unit 11: Film Genres	14
Unit 12: Theater Genres	15
Final Exam	16

Unit 1: Introduction to Film Theory

Unit Summary

In this unit, you will learn several things about film history and film theory: what a film is, what a film's purpose may be, and why that purpose is important when learning about and using film theory. You'll be introduced to one particular type of film theory. And you'll look at your own experiences with films as well as the experiences scholars, critics, and historians have had as you begin your journey into the world of film theory.

Learning Objectives

- Identify what type(s) of films are used in film theory.
- Explain the differences and similarities between film criticism and film theory.
- Learn about different purposes for the creation of films.
- Name one example film for each film purpose.
- Explain auteur theory.

Assignments

Unit 1 Text Questions	Homework	10 points
Unit 1 Online Lab Questions	Homework	10 points
Unit 1 Discussion Assignment 1	Discussion	5 points
Unit 1 Discussion Assignment 2	Discussion	5 points
Unit 1 Quiz	Quiz	15 points

Unit 2: The World of Theater

Unit Summary

Before motion pictures were invented, theater provided entertainment for cultures around the world. Theater has provided structure and inspiration for modern films, and the interplay between film and theater helps us better understand the creation and impact of films. In this unit on theater, you will learn several things: what theater is, what its purposes can be, and a bit of theater's history. You'll learn what's necessary for theater to exist. And you'll draw on your experiences with performance and theater to make connections with what you learn in this unit as well as with what you learned in the previous unit on film theory.

Learning Objectives

- List and explain theater's main requirements.
- List and explain some of theater's main purposes.
- Explain the roles of religion, myth, and philosophy in the development of theater.
- Discuss Aristotle's view of catharsis.
- Describe why theater is a form of art.

Assignments

Unit 2 Text Questions	Homework	10 points
Unit 2 Online Lab Questions	Homework	10 points
Unit 2 Discussion Assignment 1	Discussion	5 points
Unit 2 Discussion Assignment 2	Discussion	5 points
Unit 2 Quiz	Quiz	15 points

Unit 3: Lighting the Scene

Unit Summary

In this unit on theater and film, you'll learn about one of the important technical aspects of creating a world on both film and stage—lighting. You'll learn the purposes of lighting for both film and theater. You'll discover the different ways that light can be manipulated for these different purposes.

Learning Objectives

- Identify and describe the two main purposes of lighting in film and theater.
- Identify and describe the three specific elements of lighting that can be changed.
- Identify and describe various tools and tricks used to manipulate lighting in both film and theater.

Assignments

Unit 3 Text Questions	Homework	10 points
Unit 3 Online Lab Questions	Homework	10 points
Unit 3 Discussion Assignment 1	Discussion	5 points
Unit 3 Discussion Assignment 2	Discussion	5 points
Unit 3 Quiz	Quiz	15 points

Unit 4: The Basic Elements of Camerawork

Unit Summary

In this unit, you will learn about camera technology and equipment that is used when making a film. You'll learn how lenses and filters are used to create the types of shots that directors seek. And you'll learn how the camera's position and movement can be manipulated to make a movie more engaging and aesthetically enjoyable.

Learning Objectives

- Identify and describe the two camera types used in making films.
- Discuss the purpose of camera equipment.
- Describe the types of lenses and filters as well as the types of shots they produce.
- Discuss how a camera can be moved and positioned to create different types of shots.

Assignments

Unit 4 Text Questions	Homework	10 points
Unit 4 Online Lab Questions	Homework	10 points
Unit 4 Discussion Assignment 1	Discussion	5 points
Unit 4 Discussion Assignment 2	Discussion	5 points
Unit 4 Quiz	Quiz	15 points

Unit 5: Managing Sound in Film and Theater

Unit Summary

In this unit, you will learn about sound in both film and theater. You'll learn how sound is created and recorded for films as well as how it is created and managed in theatrical productions. And you'll learn about some of the equipment that sound professionals use in their jobs.

Learning Objectives

- Compare and contrast the use of sound in film and theater productions.
- Describe the sound equipment used for film and theater productions.
- Name the people involved with sound in film and theater productions and describe their responsibilities.

Assignments

Unit 5 Text Questions	Homework	10 points
Unit 5 Online Lab Questions	Homework	10 points
Unit 5 Discussion Assignment 1	Discussion	5 points
Unit 5 Discussion Assignment 2	Discussion	5 points

Unit 6: Wardrobe!

Unit Summary

In this unit, you will learn about wardrobe and makeup in both film and theater. You'll learn how characters' appearances are designed and brought to life and about the professionals who do this. And you'll learn about the unique concerns that must be taken into consideration during the wardrobe and makeup processes.

Learning Objectives

- Describe the processes of wardrobe and makeup design and creation.
- Compare and contrast wardrobe and makeup in stage performances and on film screens.
- Name the people involved with wardrobe and makeup in film and theater productions and describe their responsibilities.

Assignments

Unit 6 Text Questions	Homework	10 points

Unit 7: Plotting the Script

Unit Summary

In this unit, you will learn about scripts in both film and theater as well as dramatic structures that are used in performances. Finally, you'll learn about what makes some script performances controversial.

Learning Objectives

- Define plot and dramatic structure.
- Discuss how playwrights and screenwriters may be influenced by societal questions and issues.
- Describe the elements that can raise controversy for some performances.
- Name and describe two types of dramatic structures and apply them to plays you've read and movies you've seen.

Assignments

Unit 7 Online Lab Questions	Homework	10 points
Unit 7 Discussion Assignment 1	Discussion	5 points
Unit 7 Discussion Assignment 2	Discussion	5 points
Unit 7 Quiz	Quiz	15 points

Unit 8: Acting and Directing

Unit Summary

In this lesson, you will learn about the areas of directing and acting in both film and theater contexts. You'll learn about the characteristics and skills that good actors and directors possess and cultivate.

Learning Objectives

- Identify and describe the responsibilities that actors and directors have in film and theater.
- Describe how directors and actors work together.

Assignments

Unit 9: The Film Production Process

Unit Summary

In this lesson, you will learn how all the different elements of theater and film—lighting, sound, costume and makeup, directing, and acting—all come together to become a production. You'll learn the sequence of events in the production process of both film and theater. And you'll apply your technical knowledge from previous units to the production process.

Learning Objectives

- Describe how different elements are put together to create a production.
- Discuss the benefits and drawbacks of several different types of theatrical performance spaces.
- Name and describe the different types of rehearsals in theater.

Assignments

Unit 9 Text Questions	Homework	10 points
Unit 9 Online Lab Questions	Homework	10 points
Unit 9 Discussion Assignment 1	Discussion	5 points
Unit 9 Discussion Assignment 2	Discussion	5 points
Unit 9 Quiz	Quiz	15 points

Unit 10: Audiences and Economics

Unit Summary

In this lesson, you will learn how an audience can affect film and theatrical productions in North America. You'll look at the role and characteristics of theater audiences at a few specific moments in history. And you'll consider the impact that film and theatrical productions can have on their local communities and economies.

Learning Objectives

- Discuss the types of audiences present for ancient Greek and Elizabethan England performances.
- Analyze how an audience affects the type and content of film productions and dramatic performances.
- Determine the local economic impact of film and theatrical productions.

Assignments

Unit 11: Film Genres

Unit Summary

In this unit, you will learn about a variety of film genres as well as their hallmark characteristics. You'll see how films can cross genres, and you'll research a specific genre to learn how filmmakers work within it to tell stories.

Learning Objectives

- Discuss the concept of genre as it relates to film.
- Name and describe different film genres.
- Use research to discuss how filmmakers balance historical accuracy and storytelling.

Assignments

Unit 12: Theater Genres

Unit Summary

Like film, theater also has genres of plays and performances. In this unit, you will learn about several theater genres and their defining characteristics. You'll also see how the formation of these genres has been affected by social, cultural, and historical contexts.

Learning Objectives

- Apply the concept of genre to theater performances.
- Name and describe different theater genres.
- Discuss how different genres have been influenced by historical, social, and cultural factors.

**APPENDIX A
CURRICULUM**

F.5 Syllabi

It includes the syllabi for the Virtual Preparatory Academy of Pennsylvania curriculum in the following subject areas:

- a. English Language Arts K-12
- b. Mathematics K-12
- c. Science K-12
- d. Social Studies K-12
- e. General Electives K-12
- f. Health and Physical Education
- f. World Languages

Health and Physical Education

K-12

K-1 PHYSICAL EDUCATION A&B**Course Description**

Elementary PE K-1 helps young learners establish a basic understanding of health and fitness. Students focus on health-related fitness and learn how to become more fit and healthy. Topics of study include exercise safety, making healthy choices, nutrition, the benefits, components, and principles of fitness, basic anatomy and physiology, and values of cooperation and teamwork. In addition, students learn age-appropriate motor, non-locomotor, and manipulative skills. Students are required to participate in regular physical activity

****Materials***

- Heart Rate Monitor
- SPRI Resistance Tubing Kit

Duration

2 Semesters

Prerequisites

None

Technology Skills

Learning Coach may assist with:

- Internet Navigation
- Word Processing Skills
- Email Communication (with assistance of parent or teacher)

K-1 PHYSICAL EDUCATION A&B

Semester A

Major Concepts:

- Your Fitness
- Safety
- Healthy Choices
- Components of Fitness

Semester B

Major Concepts

- Principles of Fitness
- Game Play
- Nutrition
- Your Body

2-3 PHYSICAL EDUCATION A&B**Course Description**

Elementary PE 2-3 helps young learners establish a basic understanding of health and fitness. Students focus on health-related fitness and learn how to become more fit and healthy. Topics of study include warm-up and cool down, water safety, goal setting, nutrition, muscle strength and flexibility. In addition, students learn age-appropriate motor, non-locomotor, and manipulative skills. Students are required to participate in regular physical activity.

Middle School Health Syllabus

Course Description

This course provides an overview of how behavior affects health. The broad range of topics include nutrition and physical activity; growth, development, and sexual health; injury and safety prevention; alcohol, tobacco, and other drugs; mental, emotional, and social health; and personal and community health. Students will explore how the choices they make about their bodies affect both their present and future. They will also be given the tools to make informed decisions to better their health.

Course Objectives

- Evaluate the advantages of having positive relationships with family, friends, and peers by examining the characteristics of positive relationships.
- Analyze the importance of boundaries in relationships by comparing different types of boundaries and how they affect a person's life.
- Describe how stress can be managed by examining the causes of stress and discovering methods to reduce its effect.
- Describe how to help a person who is coping with grief by examining the stages of grief and matching them with appropriate actions.
- Analyze how body image affects everyday life by understanding body image and explaining how it impacts others' behavior.
- Determine when to seek professional help for emotional or mental problems by examining characteristics of anxiety and depression, and by highlighting the characteristics of people who can provide professional help.
- Evaluate the importance of medical screenings and exams by identifying ways in which early detection protects health.
- Describe environmental health risks by identifying the link between pollution and specific disease risks.
- Explain how personal decisions impact health by describing how one person's consumer behavior and personal health can increase risk to the community.
- Analyze the role of the government in public health by identifying government organizations that are involved in public health and examining the role and function of each.
- Identify common causes of disease by describing the impact of pathogens and risky health behaviors on personal health.
- Evaluate disease prevention strategies by explaining how diet, exercise, and other health behaviors can reduce disease risk.
- Describe the male and the female reproductive systems by highlighting their characteristics.
- Describe conception by relating it to the male and female reproductive systems.
- Evaluate the ability of various contraceptive methods by examining characteristics of each type.

Middle School Health Syllabus

- Analyze the risks associated with sexually transmitted infections (STIs) by highlighting characteristics of STIs and methods to prevent them.
 - Evaluate the characteristics of healthy relationships by examining the success of open communication and mutual respect for relationships.
 - Evaluate the negative effects of alcohol use by examining the physical, social, and legal risks associated with alcohol use.
 - Evaluate the negative effects of tobacco use by examining the physical, social, and financial costs of tobacco use.
 - Evaluate the negative effects of drug use by examining the physical, social, financial, and legal risks associated with illegal drug use.
 - Analyze the laws that regulate the sale and use of alcohol, tobacco, and drugs by identifying the goals of state and federal regulations.
 - Identify ways in which people can avoid substance use by describing drug-refusal strategies and alternatives to substance use.
-
- Describe basic first aid procedures by relating each procedure to specific injuries.
 - Analyze how being prepared for a natural disaster can save lives by examining characteristics of natural disasters and methods of preparation.
 - Explain the importance of using standard (universal) safety precautions by describing how standard safety precautions are used to prevent the spread of infectious diseases.
 - Evaluate which activities pose a risk to the eyes and mouth by examining various athletic, social, and motor vehicle-related activities.
 - Evaluate the risks posed to a person by gangs by examining how gangs operate.
 - Evaluate the risks posed to a person by abusive individuals by highlighting characteristics of abusive people and abusive relationships.
 - Differentiate macronutrients and micronutrients by describing the characteristics of each type of macronutrient and micronutrient.
 - Evaluate portion sizes commonly served in the United States by comparing them with healthful portion sizes.
 - Evaluate the health effects of poor eating habits by highlighting the impact of diet on the risk of developing serious diseases.
 - Identify factors that promote unhealthy eating by analyzing the impact of income, time pressure, and cravings on eating habits.
 - Evaluate the health effects of regular exercise by examining the short- and long-term benefits of exercise.
-

Middle School Health Syllabus

Required Materials

- Internet browser
-

Course Overview

- This course is made up of six units. Each unit has five lessons, for a total of 30 lessons.
- All lessons in the course contain three to four content pieces, a Discussion Board, and a cross-unit Project that relates to the topic being taught in those units.
- A total of seven videos that contain direct instruction are also provided.
- For assessment, students are given
 - up to three Workbook questions per content piece
 - one engaging Discussion Board activity per lesson
 - a Checkpoint at the end of each lesson (excluding lessons 29 and 30)
 - an Unit Exam (with no more than 20 questions) in the last lesson of each unit (excluding the final unit)
 - two cross-course Project activities, to be submitted in lessons 15 and 26
 - a 32-question Final Exam in Lesson 30.
- The last lesson of the course will review the previous units and present the final exam.

Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Text and Videos

Students are introduced to the main concepts of each lesson through text activities that consist of readings. The readings are supplemented with visual learning aids like infographics, tables, and diagrams. Some activities feature embedded videos. These videos provide direct instruction and a deeper understanding of lesson concepts.

Key Terms

Content pieces feature highlighted, clickable key terms. Clicking a key term will reveal its definition.

Assessments

Middle School Health Syllabus

Workbooks

Each text activity is followed immediately by computer-graded Workbook questions related to the concepts that were just taught.

Recommended Gradebook percentage: 10%

Checkpoints

These computer-graded activities contain 10 questions to assess students' mastery of lesson objectives. They appear in the first four lessons of each unit.

Recommended Gradebook percentage: 15%

Unit Exams

These computer-graded activities occur at the end of Units 1–5. (Unit 6 has the Final Exam; see below.) Unit exams include up to 20 questions that assess mastery of unit objectives.

Recommended Gradebook percentage: 20%

Final Exam

This computer-graded activity appears in Lesson 30. It has 32 questions designed to assess mastery of course objectives.

Recommended Gradebook percentage: 15%

Discussion Boards

These teacher-graded activities, which appear in all 30 lessons, provide students with the opportunity to discuss concepts related to each lesson. Students are challenged to respond thoughtfully and encouraged to observe other classmates' posts and reply to them if they disagree or have additional information to share. Students should be reminded to be both polite and understanding of perspectives they do not share.

Seat time per Discussion Board: 20 mins

Recommended Gradebook percentage: 15%

Projects

There are two cross-unit projects. The first project is introduced to students in Lesson 1 and submitted in Lesson 15. The student will have project check-ins throughout the first three units in Lessons 1, 3, 5, 7, 9, 11, and 13. The second project is introduced to students in Lesson 17 and submitted in Lesson 26. The student will have project check-ins in Lessons 17, 19, 21, 23, 25, and 26.

Recommended Gradebook percentage: 25%

Middle School Health Syllabus

Schedule of Work

Unit 1: Mental, Emotional, and Social Health

Unit 2: Personal and Community Health

Unit 3: Growth, Development, and Sexual Health

Unit 4: Alcohol, Tobacco, and Other Drugs

Unit 5: Injury Prevention and Safety

Unit 6: Nutrition and Physical Activity

Middle School Physical Education Syllabus

Course Description

In this course, students explore the importance of physical activity. They begin by learning about the five key areas of physical fitness and how to assess themselves in each area. After assessing themselves, students will create physical fitness goals and develop a plan to reach those goals.

Students will also learn aspects of sports and recreation, including sportsmanship and leadership. They also explore information that will help them stay safe while being active and develop lifelong healthy habits.

Because this is a physical education course, students will exercise throughout the entire course. They are given the freedom to participate in physical activities that they enjoy. To track their progress, they will maintain a daily activity log.

Course Objectives

- Describe the five components of fitness by highlighting the importance of each.
- Understand how to achieve desired fitness goals by practicing specific physical activities.
- Improve performance in physical activities by evaluating and refining personal goals.
- Use and analyze science-based data and protocols to assess oneself on the five components of health-related physical fitness.
- Demonstrate the ability to develop an individualized exercise program by examining SMART goals and creating and participating in a program.
- Demonstrate an understanding of moderate to vigorous physical activity by planning and tracking participation in an exercise program for at least five days each week.
- Explain how movement patterns, from simple to complex, apply to athletic activities by breaking down athletic movements into their simplest parts.
- Demonstrate proficiency in movement skills by performing athletic movements with appropriate technique.
- Evaluate the improvement of athletic performance of various athletes by implementing feedback mechanisms to guide performance outcomes.
- Explain the rules of popular sports in terms of how to score and win.
- Evaluate the injury risks associated with each popular sport by describing common injuries and ways to minimize injury risk.
- Explain strategies for measuring health by describing specific tests for measuring heart rate, blood pressure, and body composition.
- Explain strategies for measuring fitness by describing specific tests for measuring strength, flexibility, and cardiorespiratory endurance.

Middle School Physical Education Syllabus

- Identify strategies for exercising safely in all environmental conditions by describing the effect of temperature and altitude on the human body.
- Analyze the traits of a good leader by relating various actions taken by leaders to the specific outcomes of the actions.
- Evaluate the importance of warm-up and cooldown in physical exercise by examining their effects on the body.

Required Materials

- Internet browser

Course Overview

This course is made up of six units. Each unit has five lessons, for a total of 30 lessons.

The first four lessons of each unit contain between two and four content pieces. Each unit contains one Discussion Board activity. Students will submit their activity logs and projects in the fifth lesson of each unit.

For assessment, students are given

- 1–3 workbook questions per content piece
- 1 Discussion Board activity per unit for Units 1–6
- 7–10 Checkpoint questions in the second and fourth lessons of Units 1–6
- 1 log to track physical activity
- 1 project, including self-assessment, goal planning, plan development, plan evaluation, and self-reassessment

Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the teacher communicate with students regarding information related to course guidelines and grading policies.

Middle School Physical Education Syllabus

Course Organization

Text and Videos

Students are introduced to the main concepts of each lesson through text activities that consist of readings. These readings include visual elements such as infographics and tables and diagrams that aid in learning.

Key Terms

Important vocabulary terms (and their respective definitions) are given in each lesson. These terms are highlighted orange and can display a definition box when a student clicks on the term. The student clicks again on the term to remove the definition box.

Assessment

Workbooks

Each text activity is followed immediately by one to three computer-graded Workbook questions related to the activity's concepts.

Recommended gradebook percentage: 10%

Checkpoints

These computer-graded activities use 7 to 10 questions to assess students' mastery of lesson objectives. They appear in the second and fourth lesson of each unit.

Recommended gradebook percentage: 15%

Materials

There are several different ways to build a simple, yet effective, trebuchet. The following video shows one way to do so:

[in-house video]

To view the transcript for this video, click the link.

Building a Trebuchet – Transcript

The materials presented below are based on the trebuchet seen in the video. If you follow a different method to construct your trebuchet, modify the materials list accordingly.

- 36 wooden chopsticks
- 3 large marshmallows (for use as projectiles)

Middle School Physical Education Syllabus

- 3 counterweights with different masses
(**Note:** Masses can be built out of combinations of US coins. See table at right for average weights of common coins.)
- 2 paper clips
- 1 small (32 oz), round disposable plastic container with a lid
- 1 short, hollow tube wide enough to accommodate a chopstick
(**Note:** The plastic cap off a pen or marker can be modified to work by cutting off the end.)
- a few feet of thread
- duct tape
- scissors
- a ruler or a tape measure

Coin	Average Weight Per Coin (g)
penny	2.60
nickel	4.97
dime	2.26
quarter	5.64

Discussions

These teacher-graded activities provide students with the opportunity to discuss concepts taught in the course. Students are challenged to provide thoughtful responses. Students are encouraged to observe the posts of their classmates and reply to the posts if they have additional information or an alternative viewpoint to share. Students should be reminded to be both polite and understanding of perspectives they do not share.

Recommended gradebook percentage: 15%

Course-Long Project: Physical Activity Log

The course-long project is introduced to students in Lesson 1. The project has students documenting the time they spend exercising each day. The requirement for sixth-grade students is 200 minutes per every 10 school days. The requirement for seventh- and eighth-grade students is 400 minutes for every 10 school days. Students keep track of their physical activities in a log each day and submit the log at the end of every unit (6 total submissions).

Middle School Physical Education Syllabus

Teachers may provide students with their own log at their discretion—see the Resources page for an example. Teachers assign a grade for the project. See the Projects document of this Teacher Resource Guide for more information, including a recommended grading rubric, when applicable.

Recommended gradebook percentage: 30%

Course-Long Project: Personal Fitness Assessment

Students will complete this project throughout the first five units of the course. In Unit 1, they will assess their physical fitness and determine which FitnessGram zone they fall into. In Unit 2, they use their assessment results to create SMART goals in each of the five areas of physical fitness. In Unit 3, students will create a plan to achieve their SMART goals. In Unit 4, students evaluate their progress and refine their goals or their plans. In Unit 5, they will reassess their fitness levels to determine if they reached their goals. Teachers may provide students with their own template at their discretion. Teachers may provide students with their own template to record progress at their discretion, see the Resources page for an example. Teachers assign a grade for the project. See the Projects document of this Teacher Resource Guide for more information, including a recommended grading rubric, when applicable.

Recommended gradebook percentage: 30%

Middle School Physical Education Syllabus

Schedule of Work

Unit 1: Physical Fitness

Texts

Lesson 1: Cardiorespiratory	Cardiorespiratory Endurance, Blood Pressure and Heart Rate
Lesson 2: Muscular Strength and Endurance	Muscular Strength and Endurance, Resistance Training
Lesson 3: Flexibility	Flexibility, Stretching
Lesson 4: Body Composition	Body Composition, BMI

- Videos
 - Lesson 1—FitnessGram: Cardiovascular Endurance
 - Lesson 2—FitnessGram: Push-Up Test; FitnessGram: Curl-Up Test
 - Lesson 3—FitnessGram: Flexibility, Dynamic Stretching
- Key Terms
- workbook problems (Lessons 1–4, one to three questions each)
- Discussion Board (Lesson 3)
- Checkpoint questions (Lessons 2 and 4)
- Physical Activity Log (Lessons 1–5)
- Project: Personal Fitness Assessment (Lessons 2 and 5)

Middle School Physical Education Syllabus

Unit 2: Conditioning and Training

Texts

Lesson 6: Safety	Safety during Physical Activity, Common Injuries
Lesson 7: Preparation for Exercise	Physical Activity Guidelines, Warm-Up and Cooldown
Lesson 8: Cardio Training	Cardiorespiratory Exercise Guidelines, Anaerobic vs Aerobic
Lesson 9: Weight Training	Resistance Training Exercises, Resistance Training Guidelines

- Videos
 - Lesson 6: Safety during Physical Education
 - Lesson 9: Chest Exercises; Back Exercises; Leg Exercises; Shoulder Exercises; Arm Exercises
- Key Terms
- workbook problems (Lessons 6–9, one to three questions each)
- Discussion Board (Lesson 6)
- Checkpoint questions (Lessons 7 and 9)
- Physical Activity Log (Lessons 6–10)
- Project: SMART Goals (Lesson 10)

Middle School Physical Education Syllabus

Unit 3: Sports

Texts

Lesson 11: Individual Sports	Dance and Gymnastics, Tennis, Track and Field, Combat Sports
Lesson 12: Group Sports	Football, Basketball, and Baseball; Hockey and Soccer; Volleyball
Lesson 13: Strategies and Sportsmanship	Offensive and Defensive Strategies, Sportsmanship
Lesson 14: Leadership	Defining Leadership, Identifying Leadership Skills

- Key Terms
- workbook problems (Lessons 11–14, one to three questions each)
- Discussion Board (Lesson 13)
- Checkpoint questions (Lessons 12 and 14)
- Physical Activity Log (Lessons 11–15)
- Project: Create a Plan (Lesson 15)

Middle School Physical Education Syllabus

Unit 4: Move It!

Texts

Lesson 16: Activity Levels	Moderate Physical Activity, Vigorous Physical Activity
Lesson 17: Simple vs Complex Movements	Simple Movement Patterns, Complex Movement Patterns, Breaking Down Movement Patterns
Lesson 18: Applying Movement Patterns	Movement Patterns in Combative Sports, Movement Patterns in Gymnastics, Movement Patterns in Team Sports
Lesson 19: Skill Development	Skills for Athletic Performance, Developing Athletic Skills

- Key Terms
- workbook problems (Lessons 16–19, one to three questions each)
- Discussion Board (Lesson 16)
- Checkpoint questions (Lessons 17 and 19)
- Physical Activity Log (Lessons 16–20)
- Project: Refine Your Plan (Lesson 20)

Middle School Physical Education Syllabus

Unit 5: Improvement

Texts

Lesson 21: Feedback	Providing Feedback, Coaching and Cueing
Lesson 22: Health Benefits	Physical Health Benefits, Mental Health Benefits
Lesson 23: Motivation and Visualization	Motivation and Focus, Staying Motivated
Lesson 24: Principles of Training	Exercise Principles, Achieving Fitness Goals, Characteristics of Excellence

- Key Terms
- workbook problems (Lessons 21–24, one to three questions each)
- Discussion Board (Lesson 21)
- Checkpoint questions (Lessons 22 and 24)
- Physical Activity Log (Lessons 21–25)
- Project: Reassess Your Personal Fitness (Lesson 25)

Middle School Physical Education Syllabus

Unit 6: Physical Fitness Big Picture

Texts

Lesson 26: Physical Fitness for All	Defying Age and Gender Stereotypes, Defying Physical Challenges
Lesson 27: Influences of Physical Fitness	Physical Guidelines by Age, Accommodations for Puberty
Lesson 28: Nutrition	Getting Energy, Portion Distortion
Lesson 29: Self-Responsibility	Behavior Changes

- Videos
 - Lesson 26: Defying Age and Gender
 - Lesson 29: Common Barriers to Exercise; NEAT; Stages of Change
- Key Terms
- workbook problems (Lessons 26–29, one to three questions each)
- Discussion Board (Lesson 30)
- Checkpoint questions (Lessons 27 and 29)
- Physical Activity Log (Lessons 26–30)

High School Health Syllabus

Course Description

This course provides an overview of how behavior affects health. The broad range of topics include nutrition and physical activity; growth, development, and sexual health; injury and safety prevention; alcohol, tobacco, and other drugs; mental, emotional, and social health; and personal and community health. Students will explore how the choices they make about their bodies affect both their present and future. They will also be given the tools to make informed decisions to better their health.

Course Objectives

- Evaluate the advantages of having positive relationships with family, friends, and peers by examining the characteristics of positive relationships.
- Analyze the importance of boundaries in relationships by comparing different types of boundaries and how they affect a person's life.
- Describe how stress can be managed by examining the root causes of stress and discovering methods to reduce its effect.
- Describe how to help a person who is coping with grief by examining the stages of grief and matching them with appropriate actions.
- Analyze how body image affects everyday life by understanding body image and explaining how it impacts others' behavior.
- Assess when to seek professional help for emotional or mental problems by examining characteristics of anxiety and depression, and by highlighting the characteristics of people who can provide professional help.
- Evaluate the importance of medical screenings and exams by identifying ways in which early detection protects health.
- Describe environmental health risks by identifying the link between pollution and specific disease risks.
- Explain how personal decisions impact health by describing how one person's consumer behavior and personal health can increase risk to the community.
- Analyze the role of the government in public health by identifying government organizations that are involved in public health and examining the role and function of each.
- Identify common causes of disease by describing the impact of pathogens and risky health behaviors on personal health.
- Evaluate disease prevention strategies by explaining how diet, exercise, and other health behaviors can reduce disease risk.
- Describe the male and the female reproductive systems by highlighting their characteristics.

High School Health Syllabus

- Describe conception by relating it to the male and female reproductive systems.
- Evaluate the changes that happen during pregnancy by examining the development of the offspring over time.
- Evaluate the efficiency of various contraceptive methods by examining characteristics of each type.
- Analyze the risks associated with sexually transmitted infections (STIs) by highlighting characteristics of STIs and methods to prevent them.
- Evaluate the characteristics of healthy relationships by examining the effectiveness of open communication and mutual respect for relationships.
- Evaluate the negative effects of alcohol use by examining the physical, social, and legal risks associated with alcohol use.
- Evaluate the negative effects of tobacco use by examining the physical, social, and financial costs of tobacco use.
- Evaluate the negative effects of drug use by examining the physical, social, financial, and legal risks associated with illegal drug use.
- Analyze the laws that regulate the sale and use of alcohol, tobacco, and drugs by identifying the goals of state and federal regulations.
- Identify ways in which people can avoid substance use by describing drug-refusal strategies and alternatives to substance use.
- Describe basic first aid procedures by relating each procedure to specific injuries.
- Evaluate the efficiency of CPR and AED by examining the procedures and relating them to specific injuries.
- Analyze how being prepared for a natural disaster can save lives by examining characteristics of natural disasters and methods of preparation.
- Evaluate which activities pose a risk to the eyes and mouth by examining various athletic, social, and motor vehicle-related activities.
- Analyze the risks associated with driving by examining safety laws and relating them to specific risks.
- Evaluate the risks posed to a person by gangs by examining how gangs operate.
- Evaluate the risks posed to a person by abusive individuals by highlighting characteristics of abusive people and abusive relationships.
- Differentiate macronutrients and micronutrients by describing the characteristics of each type of macronutrient and micronutrient.
- Evaluate portion sizes commonly served in the United States by comparing them with healthful portion sizes.

High School Health Syllabus

- Evaluate the health effects of poor eating habits by highlighting the impact of diet on the risk of developing serious diseases.
 - Identify factors that promote unhealthy eating by analyzing the impact of income, time pressure, and cravings on eating habits.
 - Evaluate the health effects of regular exercise by examining the short- and long-term benefits of exercise.

Course Overview

- This course is made up of six units. Each unit has five lessons, for a total of 30 lessons.
- All lessons in the course contain three to four content pieces, a Discussion Board, and a cross-unit Project that relates to the topic being taught in those units.
- A total of seven videos that contain direct instruction are also provided.
- For assessment, students are given
 - one to four WB questions per content piece
 - one engaging Discussion Board activity per lesson
 - a 10-question Checkpoint at the end of each lesson (excluding the final unit)
 - a 20-question Unit Exam in the last lesson of each unit (excluding the final unit)
 - two cross-course Project activities, to be submitted at the end of each unit
 - a 38-question Final Exam in Lesson 30
- The final unit of the course will have four lessons of new content, and serves as a course review. The last lesson will review the previous units.

Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Text and Videos

Students are introduced to the main concepts of each lesson through text activities that consist of readings. The readings are supplemented with visual learning aids like infographics, tables, and

Assessments

Workbooks

Each text activity is followed immediately by computer-graded Workbook questions related to the concepts that were just taught.

Recommended Gradebook percentage: 10%

Checkpoints

These computer-graded activities contain 10 questions to assess students' mastery of lesson objectives. They appear in the first four lessons of each unit.

Recommended Gradebook percentage: 15%

Unit Exams

These computer-graded activities occur at the end of Units 1–5. (Unit 6 has the Final Exam; see below.) Unit exams include 20 questions that assess mastery of unit objectives.

Recommended Gradebook percentage: 20%

Final Exam

This computer-graded activity appears in Lesson 30. It has 38 questions designed to assess mastery of course objectives.

Recommended Gradebook percentage: 15%

Discussion Boards

These teacher-graded activities, which appear in all 30 lessons, provide students with the opportunity to discuss concepts related to each lesson. Students are challenged to respond thoughtfully and encouraged to observe other classmates' posts and reply to them if they disagree or have additional information to share. Students should be reminded to be both polite and understanding of perspectives they do not share.

Seat time per Discussion Board: 20 mins

Recommended Gradebook percentage: 15%

High School Health Syllabus

Projects

There are two cross-unit projects. The first project is introduced to students in Lesson 1 and submitted in Lesson 15. The student will have project check-ins throughout the first three units in Lessons 1, 3, 5, 7, 9, 11, and 13. The second project is introduced to students in Lesson 17 and submitted in Lesson 26. The student will have project check-ins in Lessons 17, 19, 21, 23, 25, and 26.

Recommended Gradebook percentage: 25%

High School Health Syllabus

Schedule of Work

Unit 1: Mental, Emotional, and Social Health

- Video: Stress Management and Assistance (Lesson 2)
- Infographics: Stages of Grief (Lesson 3) and Professional Help for Mental Health (Lesson 5)
- Text Activities
 - Lesson 1: Positive Relationships
 - Lesson 2: Stress and Stress Management
 - Lesson 3: Grief and Loss
 - Lesson 4: Personal Body Image
 - Lesson 5: Mental Health Professionals
- Workbook Questions (Lessons 1–5, two to three questions each)
- Discussion Board (Lessons 1–5)
- Checkpoint (Lessons 1–4, 10 questions each)
- Unit 1 Exam (Lesson 5, 20 questions)
- Project: Healthy Relationships and Lifestyles Project Check-in: Part 1 (Lessons 1, 3, 5)

Unit 2: Sport and Recreation

- Videos: Promote Community Health and Wellness (Lesson 8)
- Infographics: Recognizing Pathogens and Symptoms of Illness and Disease (Lesson 6) and External Health Risks (Lesson 7)

Unit 5: Nutrition and Weight Management

- Videos: Importance of CPR (Lesson 21), Gangs and Violence (Lesson 25)
- Infographics: Natural Disasters and Emergency Situations (Lesson 22), Oral Injuries and Mouth Protection (Lesson 23)
- Text Activities
 - Lesson 21: First Aid, CPR, and AEDs
 - Lesson 22: Emergency Response
 - Lesson 23: Injuries and Prevention
 - Lesson 24: Safety Laws
 - Lesson 25: Violence
- Workbook Questions (Lessons 21–25, two to three questions each)
- Discussion Board (Lessons 21–25)
- Checkpoint (Lessons 21–24, 10 questions each)
- Unit 5 Exam (Lesson 25, 20 questions)
- Project: PSA Project Part 1, 2, and 3 (Lessons 21, 23, and 25)

Unit 6: Review and Final Exam

- Video: Types of Physical Activity (Lesson 29)
- Text Activities
 - Lesson 26: Basic Nutrition
 - Lesson 27: Food Portions and Meals
 - Lesson 28: Diet and Effective Eating Habits
 - Lesson 29: Physical Activity and Safety
 - Lesson 30: Course Overview
 - Unit 1 and 2 Review
 - Unit 3 and 4 Review
 - Unit 5 and 6 Review
 - Discussion Board
 - Final Exam
 - Course Bibliography
 - End of Course
- Workbook Questions (Lessons 26–29, two to three questions each)
- Discussion Board (Lessons 26–30)
- Checkpoint (Lessons 26–29, 10 questions each)

High School Physical Education A Syllabus

Suggested Prerequisites

None

Course Description

This course teaches students about the importance of physical activity and personal fitness, aspects of sport and recreation, and healthy eating habits. Throughout the course, students are expected to evaluate their own fitness, design an exercise plan, and track their results.

Course Objectives

- Distinguish between fitness and wellness by explaining the unique benefits of each.
- Evaluate the risks of inactivity by explaining the connection between exercise and disease.
- Evaluate different fitness and exercise options by comparing their advantages and disadvantages.
- Compare different fitness and exercise equipment by discussing the benefits and limits of each.
- Describe the five components of fitness by highlighting the importance of each.
- Evaluate the qualities of a good sportsperson by examining the social and cultural role of sports in everyday life.
- Explain the rules of popular sports with regard to scoring and how to win in each sport.
- Analyze offensive and defensive strategies of popular sports by detailing similarities and differences across sports.
- Evaluate the injury risks associated with each popular sport by describing common injuries and ways to minimize injury risk.
- Describe the unique physical abilities required for popular sports by detailing the physical demands of each sport.
- Describe how exercise protects health by examining the short-term and long-term physical changes caused by exercise.
- Explain strategies for measuring health by describing specific tests for measuring heart rate, blood pressure, and body composition.
- Explain strategies for measuring fitness by describing specific tests for measuring strength, flexibility, and cardiorespiratory endurance.
- Describe the key elements of an exercise program by evaluating the benefits of warm-ups, cardio endurance training, resistance training, and cooldowns.
- Identify strategies for protecting against exercise-related injuries by describing causes of sprains and strains.

High School Physical Education A Syllabus

- Identify strategies for exercising safely in all environmental conditions by describing the impact of temperature and altitude on the human body.
 - Analyze why some people do not exercise, and examine the daily schedules of sample people.
 - Evaluate the effectiveness of influences that can get people to exercise by highlighting the characteristics of each influence.
 - Examine the transtheoretical model of change to analyze how people can make long-term changes in their behavior.
 - Evaluate the effectiveness of methods that can get people to continue exercise programs by relating each method to human behavior.
 - Discuss how setting proper goals can enhance exercise adherence by comparing the characteristics of different types of goals.
 - Analyze the traits of a good leader by relating various actions taken by leaders to the specific outcomes of the actions.
 - Evaluate how the human body functions by examining human metabolism and relating it to energy requirements.
 - Discuss basic food groups by relating each food group to specific functions in the human body.
 - Evaluate the need for vitamins and minerals by examining the effects of each vitamin or mineral on the body.
 - Analyze why people use performance enhancing drugs by examining the effects of drugs on the human body.
 - Analyze how meals should be planned while doing regular exercise by matching the requirements of exercise with the major food groups.
 - Discuss the importance of weight management by identifying the effects of obesity on the human body.
 - Evaluate the effectiveness of various weight management programs by highlighting their characteristics.
-

Required Materials

- Internet browser
-

Course Overview

- This course is made up of six units. Each unit has five lessons, for a total of 30 lessons.
- All lessons in the first five units of the course contain two to four content pieces, a discussion board, and a course-long Project in which students use a log to track their physical activity.
- A total of 18 videos that contain direct instruction are also provided.

High School Physical Education A Syllabus

- For assessment, students are given:
 - two WB questions per content piece
 - one engaging Discussion Board activity per lesson
 - a 10-question Checkpoint at the end of each lesson (excluding the final unit)
 - a 15-question Unit Exam in the last lesson of each unit (excluding the final unit)
 - a full-course Project activity, to be submitted at the end of each unit
 - a Final Exam in Lesson 30
- The final unit of the course serves as a course review. One unit is reviewed per lesson in lessons 26-30.

Some activities are graded by the program software, and others are graded by the teacher. It is recommended that the course teacher communicate with students regarding information related to course guidelines and grading policies.

Course Organization

Text and Videos

Students are introduced to the main concepts of each lesson through text activities that consist of readings, including visual elements such as infographics and other tables and diagrams that aid in learning. An instructional video may be embedded in an activity at the start of each lesson (13 lessons begin this way). These videos provide direct instruction and also a deeper understanding of lesson concepts. Five videos on various strength-training exercises also appear within Lesson 14.

Seat time per content piece/video: 25 mins

Key Terms

Students are provided with important vocabulary terms and associated definitions that are emphasized in each lesson. These terms are highlighted orange and have the capability to display a definition box when a student clicks on the term. The student clicks again on the term to remove the definition box.

Assessment

Workbooks

Each text activity is followed immediately by two computer-graded Workbook questions related to the concepts that were just taught.

Seat time for Workbook questions is included in “Text and Videos” above.

Recommended gradebook percentage: 10%

Checkpoints

High School Physical Education A Syllabus

These computer-graded activities use 10 randomly selected questions from a larger pool of questions to assess students' mastery of lesson objectives. They appear in the first four lessons of Units 1-5. The only assessment in Unit 6, a review unit, is the Final Exam.

Seat time per Checkpoint: 20 mins

Recommended gradebook percentage: 15%

Unit Exams

These computer-graded activities, which occur at the end of each unit, except for Unit 6, include 15 questions that assess mastery of unit objectives.

Seat time per Unit Exam: 30 mins

Recommended gradebook percentage: 20%

Final Exam

This computer-graded activity, which appears in Lesson 30, assesses mastery of course objectives.

Seat time for Final Exam: 60 mins

Recommended gradebook percentage: 15%

Discussions

These teacher-graded activities, which appear in all 30 lessons, provide students with the opportunity to discuss concepts related to each lesson. Students are challenged to provide thoughtful responses. Students are encouraged to observe the posts of their classmates and reply to the posts if they have additional information to share, or if they have a viewpoint that differs from what they see on the discussion board. Students should be reminded to be both polite and understanding of perspectives they do not share.

Seat time per Discussion: 25 mins

Recommended gradebook percentage: 15%

Project

The course-long Project is introduced to students in Lesson 1. Students are required to document the minutes they spend performing physical activities each day. The requirement is 200 minutes for every 5 school days, or 40 minutes per day on average. Students keep track of their physical activities in a log, on a daily basis, and submit the log at the end of every unit (6 total submissions). Teachers may provide students with their own log at their discretion. Teachers assign a grade for the Project. See the Projects document of this Teacher Resource Guide for more information, including a recommended grading rubric.

Seat/activity time per each lesson's Project: 60 mins

High School Physical Education A Syllabus

Recommended gradebook percentage: 25%

Schedule of Work

Unit 1: Introduction to Fitness

- Videos: Health Status of the United States (Lesson 1), Wearable Technology (Lesson 3), NEAT (non-exercise activity thermogenesis) (Lesson 4), Five Components of Fitness (Lesson 5)
- Texts:
 - Lesson 1: Defining Wellness and Fitness; Physical Activity and Chronic Disease; Physical Activity and Injury Rates
 - Lesson 2: Health Clubs and Non-profit Centers; In-home and Outdoor Opportunities; Online Fitness Resources
 - Lesson 3: Cardio Equipment; Strength-training Machines, Cable Machines, and Elastic Resistance; Barbells, Dumbbells, Kettlebells, and Medicine Balls
 - Lesson 4: Endurance Activities; Yoga, Pilates, and Group Exercise; Strength Training
 - Lesson 5: Body Composition; Flexibility; Cardiorespiratory Endurance; Muscular Endurance and Muscular Strength
- Key Terms
- Workbook Problems (lessons 1-5, two questions each)
- Discussion Board (lessons 1-5)
- Checkpoint (lessons 1-4, 10 questions each)
- Unit 1 Exam (lesson 5, 15 questions)
- Project: Physical Activity Log (lessons 1-5)

Unit 2: Sport and Recreation

- Videos: History of Games, Sports, and Dance (Lesson 6)
- Texts:
 - Lesson 6: Rules, Fair Play, and Cheating; Etiquette and Bullying; Diversity and Multiculturalism
 - Lesson 7: Football, Basketball, and Baseball; Hockey and Soccer; Combat Sports
 - Lesson 8: Golf; Tennis and Volleyball; Badminton and Table Tennis
 - Lesson 9: Dance; Gymnastics; Cheerleading
 - Lesson 10: Hiking and Obstacle Races; Endurance Races; Swimming and Water Polo
- Key Terms
- Workbook Problems (lessons 6-10, two questions each)
- Discussion Board (lessons 6-10)
- Checkpoint (lessons 6-9, 10 questions each)
- Unit 2 Exam (lesson 10, 15 questions)
- Project: Physical Activity Log (lessons 6-10)

High School Physical Education A Syllabus

Unit 3: Exercise Testing and Program Design

- Videos: Health Benefits of Physical Activity (Lesson 11), Chest Exercises (Lesson 14), Back Exercises, (Lesson 14), Leg Exercises (Lesson 14), Shoulder Exercises (Lesson 14), Arm Exercises (Lesson 14), Safety During Physical Activity (Lesson 15)
- Texts:
 - Lesson 11: Cardiorespiratory Health; Musculoskeletal Health; Psychological Benefits of Exercise
 - Lesson 12: Pre-participation Health Screening; Heart Rate and Blood Pressure; BMI and Waste to Hip Ratio; Body Composition Assessment
 - Lesson 13: Flexibility Assessments; Cardiorespiratory Assessments; Muscular Endurance Assessments
 - Lesson 14: Warm-up and Cool-down; Physical Activity Guidelines for Americans; Cardiorespiratory Exercise Guidelines; Resistance Training Guidelines
 - Lesson 15: Sprains, Strains, and Common Injuries; Active and Passive Recovery Methods; Exercise in Heat, Humidity, and Cold; Exercise at Altitude and in Pollution
- Key Terms
- Workbook Problems (lessons 11-15, two questions each)
- Discussion Board (lessons 11-15)
- Checkpoint (lessons 11-14, 10 questions each)
- Unit 3 Exam (lesson 15, 15 questions)
- Project: Physical Activity Log (lessons 11-15)

Unit 4: Behavior Modification

- Videos: Common Barriers to Exercise (Lesson 16), Intro to Stages of Change (Lesson 17), Defining Goals (Lesson 19)
- Texts:
 - Lesson 16: Kinds of Support; Group Influences on Exercise; Exercise Impact on College and Career Productivity
 - Lesson 17: Stages of Change Model; Applying the Transtheoretical Model
 - Lesson 18: Exercise Adherence and Self-efficacy; Cognitive Strategies; Behavioral Strategies; Stress Management
 - Lesson 19: SMART Goals; Skills Activity: Critiquing Goals
 - Lesson 20: Defining Leadership; Leadership Styles; Intrapersonal and Interpersonal Skills; Resolving Conflict
- Key Terms
- Workbook Problems (lessons 16-20, two questions each)
- Discussion Board (lessons 16-20)
- Checkpoint (lessons 16-19, 10 questions each)
- Unit 4 Exam (lesson 20, 15 questions)
- Project: Physical Activity Log (lessons 16-20)

Unit 5: Nutrition and Weight Management

High School Physical Education A Syllabus

- Videos: Calorie Guessing Game (Lesson 21), MyPlate/Dietary Guidelines for Americans (Lesson 24)
- Texts:
 - Lesson 21: Energy Balance; Daily Energy Needs; Estimating Energy Needs
 - Lesson 22: Carbohydrates; Protein; Lipids; Water
 - Lesson 23: Vitamins/Minerals; Supplements; Performance Enhancing Drugs
 - Lesson 24: Portion Distortion; Frequently Asked Questions; Pre/Post Meal Planning (Snack Plan)
 - Lesson 25: Fitness, Nutrition, and Body Composition; Fad Diets and Gimmicks; Judging Media and Marketing Claims; Eating Disorders
- Key Terms
- Workbook Problems (lessons 21-25, two questions each)
- Discussion Board (lessons 21-25)
- Checkpoint (lessons 21-24, 10 questions each)
- Unit 5 Exam (lesson 25, 15 questions)
- Project: Physical Activity Log (lessons 21-25)

Unit 6: Review and Final Exam

Lesson 26 – Unit 1 Review

- Lesson 1 Review; Lesson 2 Review; Lesson 3 Review; Lesson 4 Review; Lesson 5 Review
- Discussion Board
- Project: Physical Activity Log

Lesson 27 – Unit 2 Review

- Lesson 6 Review; Lesson 7 Review; Lesson 8 Review; Lesson 9 Review; Lesson 10 Review
- Discussion Board
- Project: Physical Activity Log

Lesson 28 – Unit 3 Review

- Lesson 11 Review; Lesson 12 Review; Lesson 13 Review; Lesson 14 Review; Lesson 15 Review
- Discussion Board
- Project: Physical Activity Log

Lesson 29 – Unit 4 Review

- Lesson 16 Review; Lesson 17 Review; Lesson 18 Review; Lesson 19 Review; Lesson 20 Review
- Discussion Board
- Project: Physical Activity Log

Lesson 30 – Unit 5 Review & Final Exam

High School Physical Education A Syllabus

- Lesson 21 Review; Lesson 22 Review; Lesson 23 Review; Lesson 24 Review; Lesson 25 Review
- Discussion Board
- Project: Physical Activity Log (final submission)
- Final Exam
- End of Course

High School Physical Education B Syllabus

Course Syllabus

Suggested Prerequisites

PED102: Introduction to Exercise Science

Course Description

This course teaches students about the fundamentals of exercise science, including principles of the relevant body systems, fitness testing, training, and program design. Throughout the course, students are expected to evaluate their own fitness, design an exercise plan, and track their results.

Course Objectives

- Describe the properties of open and closed chain exercises by highlighting their characteristics and studying how they relate to physical activity.
- Evaluate the function of the nervous, skeletal, and muscular systems in exercise by examining each system and relating its activity to physical exercise.
