 Photosynthesis	This lesson provides an overview of photosynthesis. The lesson also discusses the structure of leaves and their function in photosynthesis.	45	List the reactants and products of photosynthesis Describe how chlorophyll captures light energy
 Quiz: Photosynthesis			
 The Light Reaction	In this lesson students learn about the electromagnetic spectrum and various light-absorbing pigments in plants. The light reaction process of photosynthesis is described in detail.	45	Recognize that sunlight is made up of different wavelengths Recognize that pigments in green leaves absorb light Describe how light energy is used to produce ATP and NADPH
 Quiz: The Light Reaction			
 Investigating Chlorophyll	In this lesson students will observe and respond to a laboratory investigation about plant pigments.	20	Investigate plant pigments via a laboratory simulation
 The Dark Reaction	This lesson describes the Calvin-Benson cycle. Students also learn how plants adapt to their environment to carry out photosynthesis.	45	Describe the Calvin-Benson cycle Describe plants that have adapted to their environment

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: The Dark Reaction			
★ Posttest 7			

Module 8: The Life Cycles of Cells

Lesson	Description	Time (min)	Objective(s)
📁 The Life Cycles of Cells	This lesson contains a video about DNA and a module graphic organizer.	15	
📁 The Cell Cycle and Mitosis	This lesson presents the cell cycle and describes the stages of mitosis in detail. Eukaryotic and prokaryotic forms of cellular reproduction are compared.	45	<p>Identify the phases of the cell cycle</p> <p>Discuss the activities of each phase of mitosis</p> <p>Compare reproduction in eukaryotic and prokaryotic cells</p>
🔍 Quiz: The Cell Cycle and Mitosis			
📁 Investigating the Cell Cycle	In this lesson students will observe and respond to a laboratory investigation about mitosis.	20	Investigate mitosis via a laboratory simulation
📁 Meiosis: The Life Cycle of Sex Cells	In this lesson students identify the phases of meiosis. They also compare the processes of meiosis and mitosis.	45	<p>Compare chromosome numbers between somatic cells and gametes</p> <p>Describe the stages of meiosis</p> <p>Compare meiosis and mitosis</p>
🔍 Quiz: Meiosis: The Life Cycle of Sex Cells			

Lesson	Description	Time (min)	Objective(s)
 Cancer	This lesson describes several causes of cancer and cancer treatments. It discusses the difference between benign and malignant tumors and shows how a malignant tumor metastasizes.	45	Define cancer Identify causes of cancer
 Quiz: Cancer			
 Posttest 8			

Module 9: Genetics

Lesson	Description	Time (min)	Objective(s)
 Genetics	This lesson contains a video about karyotyping and a module graphic organizer.	15	
 Mendel's Discovery	This lesson discusses early research in heredity. Students learn about the laws of segregation and independent assortment and use Punnett squares.	45	Describe Mendel's work with pea plants Draw a Punnett square State the law of segregation State the law of independent assortment
 Quiz: Mendel's Discovery			
 Alleles	This lesson demonstrates how alleles are expressed in living things.	45	Compare dominant and recessive alleles Describe how alleles work together Define linked genes Relate the influence of the environment on traits
 Quiz: Alleles			

Lesson	Description	Time (min)	Objective(s)
 The Importance of Sex Chromosomes	This lesson explains how an organism's sex is determined. It explains how sex-linked traits are inherited and shows how a pedigree is used to trace traits in a family.	45	Describe how an organism's sex is determined Explain how sex-linked traits are inherited Interpret a pedigree
 Quiz: The Importance of Sex Chromosomes			
 Posttest 9			

Module 10: DNA, RNA, and Biotechnology

Lesson	Description	Time (min)	Objective(s)
 DNA, RNA, and Biotechnology	This lesson contains a video about the human genome project and a module graphic organizer.	15	
 DNA Structure	This lesson describes the parts of DNA and RNA. It discusses the discovery of DNA and describes the base pairing of nucleic acids.	45	Describe the structure of nucleotides Describe the structure of a DNA molecule
 Quiz: DNA Structure			
 Investigating DNA	In this lesson students will observe and respond to a laboratory investigation about DNA extraction.	20	Investigate DNA extraction via a laboratory simulation
 DNA Replication	This lesson discusses the experiments of Hershey and Chase. It also describes the process of DNA replication.	45	Tell the significance of the Hershey and Chase experiment Explain semi-conservative replication Describe how enzymes are involved in DNA replication

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: DNA Replication			
📁 Transcription and Translation	In this lesson students learn about the roles of different types of RNA in the production of proteins. Students also learn about mutations that occur when DNA is translated improperly.	45	Describe transcription and RNA splicing Describe translation Give examples of mutations
🔍 Quiz: Transcription and Translation			
📁 Viruses	This lesson introduces viruses and vaccines. It discusses the lytic and lysogenic cycles of viruses.	45	Describe the structures of viruses Compare the life cycles of viruses Discuss how vaccines work
🔍 Quiz: Viruses			
📁 Biotechnology	In this lesson students discover how changes in DNA can lead to diseases. Students also learn how biotechnology products are developed.	45	Define biotechnology and describe how it works Describe new products made through biotechnology Identify medical conditions caused by changes in genetic information Identify the genetic parts of cancer
🔍 Quiz: Biotechnology			
★ Posttest 10			

Review Test

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Evolution and Natural Selection

Lesson	Description	Time (min)	Objective(s)
 Evolution and Natural Selection	This lesson contains a video about geologic time and a module graphic organizer.	15	
 Biological Evolution	In this lesson students learn about biological evolution. Theories of descent with modification, natural selection, and modern synthesis are explored.	45	<p>Define evolution</p> <p>State the two theories that came from Darwin's work</p> <p>Describe how Mendel's work supports evolution</p>
 Quiz: Biological Evolution			
 Evidence of Evolution	This lesson explains the different types of evidence found to support the theory of evolution. The fossil record, geographic distribution, continental drift, homologous structures, and molecular biology are discussed.	45	<p>Describe how fossils support the theory of evolution</p> <p>Describe how biogeography supports the theory of evolution</p> <p>Explain how continental drift and plate tectonics relate to evolutionary change</p> <p>Describe how anatomy provides evidence of evolution</p> <p>Describe how molecular biology provides evidence of evolution</p>

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Evidence of Evolution			
📁 Processes in Evolution	This lesson explains the processes that affect evolution, such as mutation, recombination, gene flow, and genetic drift. It also discusses the Hardy-Weinberg principle of equilibrium.	45	Describe how changes occur in the gene pool State the Hardy-Weinberg equilibrium principle
🔍 Quiz: Processes in Evolution			
📁 Natural Selection	This lesson explains artificial and natural selection. It also summarizes Darwin's four main ideas of natural selection.	45	Define artificial selection Explain natural selection
🔍 Quiz: Natural Selection			
📁 Investigating Natural Selection	In this lesson students will observe and respond to a laboratory investigation about natural selection.	20	Investigate natural selection through a laboratory observation
📁 Microevolution and Macroevolution	This lesson defines macroevolution and microevolution. It compares phenotype changes and evolution. Evolutionary biology is also defined.	45	Define microevolution and macroevolution Give an example of microevolution Compare phenotype changes and evolution Define evolutionary biology
🔍 Quiz: Microevolution and Macroevolution			
★ Posttest 1			

Lesson	Description	Time (min)	Objective(s)
 Speciation and Punctuated Equilibrium	This lesson contains a video about problems with animal breeding and a module graphic organizer.	15	
 Speciation	This lesson introduces the concepts of biological and ecological species. It also describes how a species is impacted by reproductive isolation.	45	Describe methods scientists use to classify living things Describe Charles Darwin's speciation theories List causes of speciation Explain the biological species concept Explain the ecological species concept Describe three types of speciation
 Quiz: Speciation			
 Conditions for Speciation to Occur	In this lesson students learn theories about different mechanisms through which speciation can occur.	45	Explain how speciation occurs Describe early theories of the rate of speciation Describe the punctuated equilibrium theory Describe the coordinated stasis theory
 Quiz: Conditions for Speciation to Occur			
 Conditions That Affect Species Survival	This lesson discusses the various conditions that affect species survival. Mass extinctions, co-adaptation, and instantaneous speciation are covered. The lesson describes how the genetic health of a species can lead to loss.	45	Explain the effect of mass extinction on surviving species Describe the process of speciation in new areas Describe the genetic health of a species <ul style="list-style-type: none"> • health of a species
 Quiz: Conditions That Affect Species Survival			

Lesson	Description	Time (min)	Objective(s)
★ Posttest 2			

Module 3: Classifying Diversity

Lesson	Description	Time (min)	Objective(s)
 Classifying Diversity	This lesson contains a video about discovering new species and a module graphic organizer.	15	
 Classification of Living Things	This lesson presents the two-word names of species. The three-domain system is also covered.	45	Explain the two-word name of species Describe the kinds of organisms that belong to each domain
 Quiz: Classification of Living Things			
 Prokaryotes	This lesson explores the traits of Archaeobacteria and Eubacteria.	45	Identify the traits of Archaeobacteria Identify the traits of Eubacteria
 Quiz: Prokaryotes			
 The Kingdom Protista	This lesson describes the features of protozoans such as the amoeba, paramecium, and euglena. Algae and slime molds are also covered.	45	Describe the features of protozoans Describe features of algae Describe features of slime molds
 Quiz: The Kingdom Protista			
 The Kingdom Fungi	This lesson describes the features of fungi and lichens.	45	Describe the kingdom Fungi Describe lichens
 Quiz: The Kingdom Fungi			

Lesson	Description	Time (min)	Objective(s)
 Investigating Fungi	In this lesson students will observe and respond to a laboratory investigation about lichens.	20	Investigate lichens through a laboratory observation
★ Posttest 3			

Module 4: Plants and Animals

Lesson	Description	Time (min)	Objective(s)
 Plants and Animals	This lesson contains a video about the link between dinosaurs and birds and a module graphic organizer.	15	
 The Kingdom Plantae	In this lesson students learn the differences between vascular plants and nonvascular plants. The features of the phyla Bryophyta and Polypodiophyta are also presented.	45	Define vascular plants and nonvascular plants Describe the features of the phylum Bryophyta Describe the features of the phylum Polypodiophyta
 Quiz: The Kingdom Plantae			
 Gymnosperms and Angiosperms	This lesson describes the features of the phyla Coniferophyta and Anthophyta.	45	Describe the features of the phylum Coniferophyta Describe the features of the phylum Anthophyta
 Quiz: Gymnosperms and Angiosperms			

Lesson	Description	Time (min)	Objective(s)
 Plant Structure and Function	In this lesson students learn about the structure and function of roots, stems, and leaves. In addition, students learn how plants respond to various stimuli.	45	Describe the structure and function of roots Describe the structure and function of stems Describe the structure and function of leaves Relate different stimuli to the tropisms they cause
 Quiz: Plant Structure and Function			
 Animals: Invertebrates I	This lesson identifies the eight common features of organisms in the animal kingdom. It also describes the characteristics of five invertebrate phyla.	45	Describe eight common features of organisms in the kingdom Animalia Describe the features of sponges and cnidarians Describe the features of flatworms, roundworms, and segmented worms
 Quiz: Animals: Invertebrates I			
 Investigating Annelids	In this lesson students will observe and respond to a laboratory investigation of an earthworm dissection.	20	Investigate earthworm dissection through a laboratory observation
 Animals: Invertebrates II	This lesson identifies and describes the features of mollusks, arthropods, and echinoderms.	45	Describe the features of mollusks Describe the features of arthropods Describe the features of echinoderms
 Quiz: Animals: Invertebrates II			
 Investigating Arthropods	In this lesson students will observe and respond to a laboratory investigation of a grasshopper dissection.	20	Investigate grasshopper dissection through a laboratory

Lesson	Description	Time (min)	Objective(s)
 Animals: Vertebrates	This lesson discusses the main features common to all vertebrates, the evolutionary history of the phylum Chordata, and the eight vertebrate classes. The features of human beings are also covered.	45	Describe the main features common to all vertebrates List the evolutionary history of the phylum Chordata Describe the features of eight vertebrate classes List features of human beings
 Quiz: Animals: Vertebrates			
 Posttest 4			

Module 5: Behavioral Biology

Lesson	Description	Time (min)	Objective(s)
 Behavioral Biology	This lesson contains a video about behavior studies of twins and a module graphic organizer.	15	
 Behavioral Biology	This lesson presents behavioral biology and the work of ethologists. Students learn to recognize differences between internal and external stimuli and between innate and learned behavior.	45	Define and give examples of internal and external stimuli Define and give examples of innate and learned behavior
 Quiz: Behavioral Biology			
 Types of Behavior	This lesson covers parental care, courtship, defensive, and territorial behaviors in animals. It gives examples of spatial learning, imprinting, and observational learning.	45	Describe parental care, courtship, defensive, and territorial behaviors Give examples of spatial learning, imprinting, and observational learning
 Quiz: Types of Behavior			

Lesson	Description	Time (min)	Objective(s)
 Forms of Communication	In this lesson students learn how animals communicate, why animals need to communicate, and the ways animals communicate by using signals.	45	Identify and give examples of social behaviors Give examples of animal communications Describe how communications can work together Give an example of an advanced communication system
 Quiz: Forms of Communication			
 Investigating Behavior	In this lesson students will observe and respond to a laboratory investigation about planarian behavior.	20	Investigate planarian behavior through a laboratory observation
★ Posttest 5			

Module 6: Populations and Communities

Lesson	Description	Time (min)	Objective(s)
 Populations and Communities	This lesson contains a video about beneficial predators and a module graphic organizer.	15	
 Understanding Populations and Communities	This lesson introduces students to different levels of ecological organization. They learn about populations and how to measure population density. Communities and the relationship between species in a community are also examined.	45	Identify the levels of organization in life Describe how populations are measured Identify properties of communities Describe different interactions among organisms in communities
 Quiz: Understanding Populations and Communities			

Lesson	Description	Time (min)	Objective(s)
 Populations and Their Activities	This lesson discusses population growth and factors that affect it. Students learn to distinguish the three population distribution patterns.	45	Identify factors affecting population growth Describe population distribution patterns
 Quiz: Populations and Their Activities			
 Succession	This lesson discusses succession. Students learn to identify the two types of succession and the kinds of disturbances that lead to each.	45	Define succession Identify two types of succession
 Quiz: Succession			
 Posttest 6			

Module 7: Ecosystems

Lesson	Description	Time (min)	Objective(s)
 Ecosystems	This lesson contains a video about water conservation and a module graphic organizer.	15	
 Energy Flow Through Ecosystems	This lesson focuses on the flow of energy from the sun through different organisms in an ecosystem. It explores the feeding relationships in ecosystems using food chains and food webs. It also describes the energy transfer using energy pyramids.	45	Name the different ways organisms get energy Identify the different roles in a food chain or web Describe an ecosystem using an energy pyramid
 Quiz: Energy Flow Through Ecosystems			

Lesson	Description	Time (min)	Objective(s)
 The Cycling of Chemicals in an Ecosystem	This lesson explains how chemical nutrients are cycled in an ecosystem. It describes the carbon cycle, nitrogen cycle, and water cycle.	45	Discuss different ways chemicals cycle through an ecosystem Relate chemical cycling to geological processes Trace the cycles of carbon, nitrogen, and water
 Quiz: The Cycling of Chemicals in an Ecosystem			
 Biomes	This lesson describes how weather influences ecosystems. The characteristics of different terrestrial and aquatic biomes are also presented.	45	Discuss how solar energy and weather influence ecosystems Give examples of different land biomes Identify different aquatic biomes
 Quiz: Biomes			
 Posttest 7			

Module 8: Human Impact and Technology

Lesson	Description	Time (min)	Objective(s)
 Human Impact and Technology	This lesson contains a video about prairie restoration and a module graphic organizer.	15	
 Human Impact on Ecosystems	This lesson describes the negative impacts that people can have on ecosystems. Topics include human population growth, air pollution, green house effect, and introduced species.	45	Explain how human activities can harm ecosystems Describe the greenhouse effect Describe introduced species and their effects
 Quiz: Human Impact on Ecosystems			

Lesson	Description	Time (min)	Objective(s)
 Conservation Biology	This lesson describes the efforts being made to preserve and restore ecosystems. Topics include recycling, emissions control, the establishment of reserves, and the protection of endangered species.	45	Define conservation biology Describe how people are reducing air and water pollution Discuss how people are protecting threatened and endangered habitats
 Quiz: Conservation Biology			
 Science and Technology	This lesson explores the relationship between science and technology.	45	Define technology Discuss how technology supports science, and vice versa Compare the goals of science and technology
 Quiz: Science and Technology			
 Posttest 8			

Module 9: Human Body Systems I

Lesson	Description	Time (min)	Objective(s)
 Human Body Systems I	This lesson contains a video about the history of medical discoveries and a module graphic organizer.	15	
 Organ Systems	This lesson introduces the student to the various systems in the human body. The skin and its features are also examined.	45	List the organ systems in the human body Describe how the integumentary system contributes to homeostasis
 Quiz: Organ Systems			

Lesson	Description	Time (min)	Objective(s)
 The Skeletal and Muscular System	In this lesson students learn the five major functions of the skeletal system and how bones, joints, and muscles work together to produce movement.	45	Identify the functions of bone Describe the different kinds of muscle
 Quiz: The Skeletal and Muscular System			
 The Digestive System	In this lesson students learn how food is digested and how glycogen is used in the body.	45	Trace the path of food through the digestive system Describe how glycogen is used in the body
 Quiz: The Digestive System			
 The Respiratory System	This lesson covers the process of breathing, describing how oxygen and carbon dioxide are exchanged in the lungs. Respiratory diseases are also presented.	45	Describe the process of gas exchange in the lungs Describe the process of breathing List some respiratory diseases
 Quiz: The Respiratory System			
 The Circulatory System	This lesson presents the parts of the circulatory system and describes how blood flows to, through, and out of the heart. It describes types of blood cells and their functions, and covers the main causes of cardiovascular disease.	45	Identify the major parts of the circulatory system and their functions Describe the parts of blood and explain their functions Identify the causes of cardiovascular disease
 Quiz: The Circulatory System			
 Posttest 9			

Lesson	Description	Time (min)	Objective(s)
 Human Body Systems II	This lesson contains a video about healthy living and a module graphic organizer.	15	
 The Nervous System	This lesson describes the structure of the nervous system and the function of each of its parts.	45	Describe the structures and functions of the nervous system Describe the function of the spinal cord List the five sensory receptors
 Quiz: The Nervous System			
 The Endocrine System and the Excretory System	This lesson explores the anatomy and functions of the endocrine and excretory systems.	45	Explain what hormones do Explain how the excretory system regulates water and removes waste Explain how a feedback loop works
 Quiz: The Endocrine System and the Excretory System			
 Natural Defenses Against Disease	In this lesson students learn about the body's defense mechanisms.	45	Describe the human immune system Identify the three parts of nonspecific defense against disease Discuss how the body has specific defenses against <ul style="list-style-type: none"> • disease
 Quiz: Natural Defenses Against Disease			

Lesson	Description	Time (min)	Objective(s)
 The Human Reproductive System	In this lesson students learn the structure of the male and female reproductive systems, how sperm and eggs travel through the reproductive system, and how humans develop.	45	Identify structures in the male reproductive systems Identify structures in the female reproductive systems Describe human fertilization and development
 Quiz: The Human Reproductive System			
 Posttest 10			

Review Test

Lesson	Description	Time (min)	Objective(s)
 Review Test			

Chemistry

Chemistry A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this first of two courses that comprise Chemistry, the student will explore the fundamental concepts of chemistry, while engaging in hands-on and virtual lab experiments, and interdisciplinary problem-solving activities.

The student will build on prior knowledge to learn how to model the structure of an atom, analyze the periodic table of elements, identify simple chemical reactions and investigate particulate electrical forces. The course provides many opportunities for the student to apply these concepts to real-world situations.

Semester A Outline

1. Course Overview

1. Course Overview

2. Introduction to Chemistry

1. Introduction to Chemistry

2. Physical vs. Chemical Change

- In this section, you will learn how to identify the physical and chemical properties of different substances. This will ultimately help you figure out if a physical or chemical change has occurred.
- In this section, you will learn how to tell if something is a pure substance or a mixture.

3. Mixtures

- In this section, you will learn how to identify physical and chemical properties of different substances. This will ultimately help you figure out if a physical or chemical change has occurred and how to separate the components.

4. Atomic Composition

- In this lesson, you will explore this law in detail using a PhET® simulation titled Build an Atom, which can be accessed by clicking the image below.

5. Atomic Composition of Molecules

- In this section, you will use a model to describe the atomic composition of simple molecules and extended structures.
- In this lesson you will explore this theory in detail using a PhET® simulation titled Molecule Shapes that can be accessed by clicking the image below.

6. Introduction to Chemistry Review
7. Introduction to Chemistry Unit Test

3. The Periodic Table

1. The Periodic Table Introduction
2. Atomic Number
 - In this section, you will use information embedded in the structure of the periodic table to help you predict the relative properties of elements.
3. Stable Ions
 - In this section, you will discover more information embedded in the structure of the periodic table regarding each atom's protons, neutrons, and electrons.
4. Valence Electrons 1
 - In this section, you will describe electrons in the outermost energy level of atoms in the periodic table that are helpful in making predictions.
5. Protons and Isotopes
 - In this section, you will identify the components of the periodic table, including the number of protons in an element, that are useful for making predictions.
 - In this lesson you will explore this tendency in detail using a PhET® simulation titled Isotopes and Atomic Mass, which can be accessed by clicking the image below.
6. Historical Understandings
 - In this section, you will examine historical experiments that led scientists to determine the structure of the atom and analyze the patterns in the periodic table.
 - In this lesson you will explore Rutherford scattering in detail using a PhET® simulation titled Rutherford Scattering, which can be accessed by clicking in the image below.
7. Element Groupings
 - In this section, you will describe how the arrangement of the main groups of the periodic table reflects the pattern of the outermost electrons.
8. Element Arrangement
 - In this section, you will describe how the number of protons in an atom of an element is related to the element's position on the periodic table.
9. Reactivity
 - In this section, you will use the periodic table to predict the reactivity of atoms based on their outermost electrons.
10. Bonds
 - In this section, you will use the periodic table to predict the number and types of chemical bonds that atoms of elements can form.
11. Ions
 - In this section, you will examine the periodic table further and use energy level diagrams to predict the number and charges of stable ions that might form from specific atoms in the table.
12. The Periodic Table Apply
13. The Periodic Table Review
14. The Periodic Table Unit Test

4. Particulate Electrical Forces

1. Particulate Electrical Forces Introduction

2. Electrical Bonding Investigation

- In this section, you will describe the relationship between electrical forces and measurable properties of a substance, such as melting point, boiling point, vapor pressure, and surface tension.

3. Electrical Bonding Investigation Plan

- In this section, you will plan an investigation to provide data to use as evidence supporting an inference about the electrical forces between particles in substances.

4. Electrical Bonding Investigation Data

- In this section, you will give reasons for choosing substances to compare and describe the composition of the substances at the atomic molecular level.

5. Electrical Bonding Investigation Evidence

- In this section, you will describe the data, number of trials, experimental setup, and equipment needed to perform an investigation of properties affected by particulate molecular forces.

6. Electrical Bonding Particle Spacing

- In this lesson you will learn that when substances undergo a phase transition, the molecules themselves remain intact but the spaces between them change.

7. Electrical Bonding and Kinetic Energy

- In this section, you will learn that when thermal energy is added to a substance, it causes an increase in the kinetic energy of the particles in that substance. This increased kinetic energy makes it more difficult for the attractive electrical forces to keep the particles close together.

8. Electrical Bonding Molecular Level

- In this section, you will learn to draw a more explicit connection between what happens at the microscopic scale during a phase change and what happens on the macroscopic scale.

9. Electrical Bonding: Multiple Scales

- In this section, you will understand how a causal relationship between microscopic phenomena and macroscopic phenomena is established.

10. Electrical Bonding Investigation: Refining

- In this lesson, you will refine the design of experiments by evaluating the results of an initial investigation.

11. Electrical Forces Portfolio 1

- In this lesson, you will learn how to ask questions to compare bulk properties of different substances to infer the strength of electrical forces between molecules in each substance.
- In this lesson, you will learn how to plan an investigation for comparing the relative strength of electrical forces between molecules in two different substances by making measurements of bulk properties.

12. Electrical Forces Portfolio 2

- In this lesson, you will conduct your investigation, record data, and identify and eliminate sources of error while gathering evidence to infer the strength of electrical forces between particles.

13. Electrical Forces Portfolio 3

- In this lesson, you will evaluate your investigation comparing the structure of substances and the strength of electrical forces between particles to learn how scientific results are interpreted within the scientific community.

14. Particulate Electrical Forces Apply

15. Particulate Electrical Forces Review

16. Particulate Electrical Forces Unit Test

5. Simple Chemical Reactions

1. Simple Chemical Reactions Introduction

2. Patterns of Properties

- In this section, you will use knowledge of the periodic table, patterns of chemical properties, and understanding of electron energy levels to better understand chemical reactions.

3. Balance of Atoms

- In this section, you will explain the fact that the total number of atoms of each element is the same in the reactants and the products of a chemical reaction.
- In this lesson you will explore reactions in detail using a PhET® simulation titled Reactants, Products and Leftovers, which can be accessed by clicking the image below.

4. Covalent and Ionic Bonding

- In this section, you will use valence electron states and electronegativity to explain a simple chemical reaction, including the numbers and types of bonds that each atom forms.

5. Valence Electrons

- In this section, you will explain how the outcome of a simple chemical reaction is based on the valence electron state of the atoms involved and their position in the periodic table.

6. Patterns of Attraction

- In this section, you will construct an explanation of how patterns of attraction between atoms can allow the prediction of the type of reaction that occurs.

7. Composition and Formulas

- In this section, you will learn how to determine percent compositions, empirical formulas, and molecular formulas.
- In this section, you will predict the chemical formulas for simple ionic and molecular compounds.

8. Chemical Equations

- In this section, you will identify and describe the valence electrons and chemical formulas of the reactants and products of chemical reactions.

9. Balanced Reactions

- In this section, you will explain a chemical reaction by identifying that both the number and types of atoms are present before and after the reaction.
- In this lesson you will practice balancing equations using a PhET® simulation titled Balancing Chemical Equations, which can be accessed by clicking the image below.

10. Bonding of Atoms in Reactions

- In this section, you will identify the number and types of bonds in reactants and products of chemical reactions.

11. Types of Reactions

- In this section, you will describe the characteristics of redox, acid-base, synthesis, and single- and double-replacement chemical reactions.
- In this section, you will use models to predict the products of chemical reactions.
- In this section, you will learn how to classify chemical reactions as combustion reactions.

12. Chemical Reaction Predictions

- In this section, you will explain, using evidence-based reasoning, how the patterns of valence electrons and electronegativity of elements are used to predict the number and types of bonds each element forms and that these patterns operate the same today as in the past and as they will in the future.

13. Macroscopic Patterns of Reactivity

- In this section, you will describe how observable patterns of reactivity of elements in the periodic table are caused by patterns of valence electrons and electronegativities.

14. Explaining Reactions

- In this section, you will construct a revised or expanded explanation about the outcome of a chemical reaction and use evidence to justify the revision.

15. Simple Chemical Reactions Apply

16. Simple Chemical Reactions Review

17. Simple Chemical Reactions Unit Test

6. Energy In Chemical Reactions I

1. Energy In Chemical Reactions I Intro

2. Total Bond Energy

- In this section, you will develop a model to illustrate that the release or absorption of energy from a chemical reaction depends upon the changes in total bond energy.

3. The Reaction System

- In this section, you will develop a model of a chemical reaction system that identifies the chemical reaction, the system, and the surroundings.

4. Broken Bonds

- Create a model of a chemical reaction system illustrating the substances present at the beginning and end of a specific reaction, as well as the events that take place during the reaction that result in the transformation.

5. Forming Bonds

- In this section, you will develop a model of a chemical reaction system that identifies the bonds that are formed during the reaction.

6. Energy Transfer 1

- In this section, you will develop a model of a chemical reaction system that identifies the energy transfer between the system and its components or the system and its surroundings.

7. Potential and Kinetic Energy

- In this section, you will analyze the transformation between potential and kinetic energies and the interface between a system and its surroundings.

8. Relative Potential Energy 1

- In this section, you will develop a model of a chemical reaction system that describes the relative potential energies of the reactants and the products.

9. Energy In Chemical Reactions I Apply

10. Energy In Chemical Reactions I Review

11. Energy in Chemical Reactions I Unit Test

7. Reaction Rates

1. Reaction Rates Portfolio Day 1

- In this section, you will use evidence to explain the effects of changing the temperature or concentration of chemical reaction rates, including the idea that as the kinetic energy of colliding particles increases and the number of collisions increases, the reaction rate increases.
- In this section, you will evaluate evidence to explain how increasing the concentration of reactants causes an increase in the rate of a chemical reaction.

2. Reaction Rates Portfolio Day 2

- In this section, you will evaluate evidence to explain how increasing the temperature of reactants causes an increase in the rate of a chemical reaction.

3. Reaction Rates Portfolio Day 3

- In this section, you will describe how changing the concentration or temperature of reactants affects the rate of a chemical reaction.

8. Chemistry A Semester Review and Exam

1. Chemistry A Semester Review

2. Chemistry A Semester Exam

Semester B Summary: In this second of two courses that comprise Chemistry, the student will explore the fundamental concepts of chemistry, while engaging in hands-on and virtual lab experiments, and interdisciplinary problem-solving activities.

The student will build on prior knowledge to learn about how energy is transformed in chemical reactions, construct explanations of how energy and matter are related, apply the conservation of mass to calculate and compare quantities of substances in reactions, and develop models of nuclear processes.

Semester B Outline

1. Course Overview

1. Chemistry B Course Overview

2. Conservation of Mass

1. Conservation of Mass Introduction

2. Balanced Chemical Equations

- In this section, you will see how a chemical reaction is represented mathematically to indicate that the mass, or number of atoms, is conserved during a chemical reaction.

3. Claiming Conservation

- In this section, you will support the claim that the number of atoms of elements in a reaction, and, therefore, the mass of those elements, does not change when reactants are converted to products.

4. Mathematical Representations

- In this section, you will examine mathematical representations of a chemical equation to support the claim that atoms, and thus mass, are conserved during chemical reactions.

5. Use the Mole

- In this section, you will convert between moles and grams.

6. Reactants vs. Products

- In this section, you will predict relative numbers of atoms in reactants versus products for chemical reactions.

7. Calculating Mass

- In this section, you will calculate the unknown masses of parts of a chemical reaction using the known mass of one part of that reaction.

8. Specific Mass Conversions

- In this section, you will describe how mathematical representations support a claim that atoms, and therefore mass, are conserved during a chemical reaction.

9. Mass and Atoms

- In this section, you will convert the mass of a substance from the macroscopic to the atomic scale using moles and Avogadro's number.

10. Conservation of Mass Apply

11. Conservation of Mass Review

12. Conservation of Mass Unit Test

3. Solutions, Acids, and Bases

1. Solutions, Acids, and Bases Introduction

2. Solutes and Solvents

- In this section, you will use models to explain how solutes dissolve in solvents.
- In this section, you will explore how temperature and pressure affect the solubility of different solutes.
- In this lesson you will explore concentration in detail using the PhET® simulation, "Concentration," which you will find by clicking the image below.

3. Ions in Polar Solvents

- In this section, you will construct a model that shows how ionic substances dissolve in polar solvents.

4. Solutions, Acids and Bases Portfolio 1

- In this section, you'll observe and ask questions about the conductivity of a solution.

5. Solutions, Acids and Bases Portfolio 2

- In this section, you will design and explain the concepts behind an experiment to predict the conductivity of different solutions.
- In this section, you will carry out the experiment that you designed to test the conductivity of

various solutions.

6. Solutions, Acids and Bases Portfolio 3

- In this section, you will evaluate and conclude your investigation by explaining the data as evidence of the conductivity of common ionic and covalent substances in solution.

7. Ph, Acids and Bases

- In this section, you will use the concept of pH as a model to predict the relative properties of strong, weak, concentrated, and dilute acids and bases.
- In this section, you will comment on the strengths of two acids or two bases with similar composition.
- In this lesson you will explore pH in detail using a PhET® simulation, “pH Scale,” which you will find here.

8. Acid Base Solutions

- In this lesson you will explore acids and bases in detail using a PhET® simulation, “Acid-Base Solutions,” which you will find here.
- In this lesson you will explore acids in detail using a PhET® simulation, “Acid-Base Solutions,” which you will find here.
- In this lesson you will explore bases in detail using a PhET® simulation, “Acid-Base Solutions,” which you will find here.

9. Solutions, Acids, and Bases Apply

10. Solutions, Acids, and Bases Review

11. Solutions, Acids, and Bases Unit Test

4. Chemical Reaction Systems

1. Chemical Reaction Systems Introduction

2. Concentrations at Equilibrium

- In this section, you will describe changes in a chemical reaction system that will affect the concentrations of a chemical species at equilibrium.

3. Changing One Component

- In this section, you will use Le Chatelier’s principle to explain how product quantities in a chemical reaction system change when any of the components change.

4. Changing Reaction Rates

- In this section, you will discover how Le Chatelier’s principle can be used to predict the impacts on a chemical reaction of changes in temperature, pressure, or concentration leading to a return to dynamic equilibrium.

5. Equilibrium and Stability

- In this section, you will explore how a reaction at equilibrium changes at the molecular level when it seems to be stable and unchanging at the macroscopic level.

6. Chemical Technology

- In this section, you will use information to explain how the use of chemistry-related technologies has had positive and negative implications.

7. Forces and Function

- In this section, you will describe the attractive and repulsive forces that determine how a material will function.

8. Designing a Chemical System

- In this section, you will describe criteria and constraints to refine a design for a chemical system.

9. Evaluating Design

- In this section, you will evaluate refinements to the design of a chemical system based on criteria and constraints.

10. Using Organic Compounds

- In this section, you will evaluate the design and function of products and processes that meet specific needs in relation to the molecular structures and functional groups of organic compounds.

11. Refining Design

- In this section, you will refine a designed system by making tradeoffs to optimize the system to increase the amount of product, and provide reasoning for the design decision.

12. Chemical Reaction Systems Apply

13. Chemical Reaction Systems Review

14. Chemical Reaction Systems Unit Test

5. Gases

1. Gases Introduction

2. Gases Under Pressure

- In this section, you will describe the relationships among pressure, temperature, and volume of an enclosed gas when only the amount of gas is constant.
- In this lesson you will explore this law in detail using a PhET® simulation titled Gases Intro, which can be accessed by clicking the image below.
- In this section, you will determine molar quantities using computational thinking based on the ideal gas law.

3. Gases Portfolio Day 1

- In this section, you will ask questions about the behavior of ideal gases.

4. Gases Portfolio Day 2

- In this section, you will design an investigation to explain the behavior of ideal gases.
- In this section, you will examine design and implementation of investigations to explain the behavior of ideal gases.

5. Gases Portfolio Day 3

- In this section, you will evaluate and conclude investigations to explain the behavior of ideal gases.

6. Gases Apply

7. Gases Review

8. Gases Unit Test

6. Nuclear Processes

1. Nuclear Processes Introduction

2. Energy Release

- In this section, you will describe parts of a model that shows the composition of the nucleus of the atom.

3. Modeling Nuclear Processes

- In this section, you will develop models that show the relationships between components that underlie several nuclear processes.

4. Modeling Fusion

- In this section, you will develop a model that shows a process called nuclear fusion in which two nuclei merge to form a single, larger nucleus.

5. Modeling Fission

- In this section, you will develop a model that shows a process called nuclear fission in which a nucleus splits into two or more parts.

6. Radioactive Decay Energy

- In this section, you will develop models of radioactive decay that show the differences in the types of energy and/or particles released.

7. Alpha Particle Emission

- In this section, you will develop a radioactive decay model that classifies alpha decay as a type of nuclear fission and beta and gamma decays as not nuclear fission.

8. Nuclear Processes Apply

9. Nuclear Processes Review

10. Nuclear Processes Unit Test

7. Chemistry B Semester Review and Exam

1. Chemistry B Semester Review

2. Chemistry B Semester Exam

Chemistry Honors

Chemistry Honors A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this first of two courses that comprise Honors Chemistry, the student will explore the fundamental concepts of chemistry, while engaging in hands-on and virtual lab experiments, and interdisciplinary problem-solving activities.

The student will build on prior knowledge to learn how to model the structure of an atom, analyze the periodic table of elements, identify simple chemical reactions and investigate particulate electrical forces. The course provides many opportunities for the student to apply these concepts to real-world situations.

Semester A Outline

1. Course Overview

1. Chemistry A Course Overview

2. Introduction to Chemistry

1. Introduction to Chemistry

2. Physical vs. Chemical Change

- In this section, you will learn how to identify the physical and chemical properties of different substances. This will ultimately help you figure out if a physical or chemical change has occurred.
- In this section, you will learn how to tell if something is a pure substance or a mixture.

3. Mixtures

- In this section, you will learn how to identify physical and chemical properties of different substances. This will ultimately help you figure out if a physical or chemical change has occurred and how to separate the components.

4. Atomic Composition

- In this lesson, you will explore this law in detail using a PhET® simulation titled Build an Atom, which can be accessed by clicking the image below.

5. Atomic Composition of Molecules

- In this section, you will use a model to describe the atomic composition of simple molecules and extended structures.
- In this lesson you will explore this theory in detail using a PhET® simulation titled Molecule Shapes that can be accessed by clicking the image below.

6. Introduction to Chemistry Review
7. Introduction to Chemistry Unit Test

3. The Periodic Table

1. The Periodic Table Introduction
2. Atomic Number
 - In this section, you will use information embedded in the structure of the periodic table to help you predict the relative properties of elements.
3. Stable Ions
 - In this section, you will discover more information embedded in the structure of the periodic table regarding each atom's protons, neutrons, and electrons.
4. Valence Electrons 1
 - In this section, you will describe electrons in the outermost energy level of atoms in the periodic table that are helpful in making predictions.
5. Protons and Isotopes
 - In this section, you will identify the components of the periodic table, including the number of protons in an element, that are useful for making predictions.
 - In this lesson you will explore this tendency in detail using a PhET® simulation titled Isotopes and Atomic Mass, which can be accessed by clicking the image below.
6. Historical Understandings
 - In this section, you will examine historical experiments that led scientists to determine the structure of the atom and analyze the patterns in the periodic table.
 - In this lesson you will explore Rutherford scattering in detail using a PhET® simulation titled Rutherford Scattering, which can be accessed by clicking in the image below.
7. Element Groupings
 - In this section, you will describe how the arrangement of the main groups of the periodic table reflects the pattern of the outermost electrons.
8. Element Arrangement
 - In this section, you will describe how the number of protons in an atom of an element is related to the element's position on the periodic table.
9. Reactivity
 - In this section, you will use the periodic table to predict the reactivity of atoms based on their outermost electrons.
10. Bonds
 - In this section, you will use the periodic table to predict the number and types of chemical bonds that atoms of elements can form.
11. Ions
 - In this section, you will examine the periodic table further and use energy level diagrams to predict the number and charges of stable ions that might form from specific atoms in the table.
12. The Periodic Table Apply
13. The Periodic Table Review
14. The Periodic Table Unit Test

4. Particulate Electrical Forces

1. Particulate Electrical Forces Introduction

2. Electrical Bonding Investigation

- In this section, you will describe the relationship between electrical forces and measurable properties of a substance, such as melting point, boiling point, vapor pressure, and surface tension.

3. Electrical Bonding Investigation Plan

- In this section, you will plan an investigation to provide data to use as evidence supporting an inference about the electrical forces between particles in substances.

4. Electrical Bonding Investigation Data

- In this section, you will give reasons for choosing substances to compare and describe the composition of the substances at the atomic molecular level.

5. Electrical Bonding Investigation Evidence

- In this section, you will describe the data, number of trials, experimental setup, and equipment needed to perform an investigation of properties affected by particulate molecular forces.

6. Electrical Bonding Particle Spacing

- In this lesson you will learn that when substances undergo a phase transition, the molecules themselves remain intact but the spaces between them change.

7. Electrical Bonding and Kinetic Energy

- In this section, you will learn that when thermal energy is added to a substance, it causes an increase in the kinetic energy of the particles in that substance. This increased kinetic energy makes it more difficult for the attractive electrical forces to keep the particles close together.

8. Electrical Bonding Molecular Level

- In this section, you will learn to draw a more explicit connection between what happens at the microscopic scale during a phase change and what happens on the macroscopic scale.

9. Electrical Bonding: Multiple Scales

- In this section, you will understand how a causal relationship between microscopic phenomena and macroscopic phenomena is established.

10. Electrical Bonding Investigation: Refining

- In this lesson, you will refine the design of experiments by evaluating the results of an initial investigation.

11. Electrical Forces Portfolio 1

- In this lesson, you will learn how to ask questions to compare bulk properties of different substances to infer the strength of electrical forces between molecules in each substance.
- In this lesson, you will learn how to plan an investigation for comparing the relative strength of electrical forces between molecules in two different substances by making measurements of bulk properties.

12. Electrical Forces Portfolio 2

- In this lesson, you will conduct your investigation, record data, and identify and eliminate sources of error while gathering evidence to infer the strength of electrical forces between particles.

13. Electrical Forces Portfolio 3

- In this lesson, you will evaluate your investigation comparing the structure of substances and the strength of electrical forces between particles to learn how scientific results are interpreted within the scientific community.

14. Particulate Electrical Forces Apply

15. Particulate Electrical Forces Review

16. Particulate Electrical Forces Unit Test

5. Simple Chemical Reactions

1. Simple Chemical Reactions Introduction

2. Patterns of Properties

- In this section, you will use knowledge of the periodic table, patterns of chemical properties, and understanding of electron energy levels to better understand chemical reactions.

3. Balance of Atoms

- In this section, you will explain the fact that the total number of atoms of each element is the same in the reactants and the products of a chemical reaction.
- In this lesson you will explore reactions in detail using a PhET® simulation titled Reactants, Products and Leftovers, which can be accessed by clicking the image below.

4. Covalent and Ionic Bonding

- In this section, you will use valence electron states and electronegativity to explain a simple chemical reaction, including the numbers and types of bonds that each atom forms.

5. Valence Electrons

- In this section, you will explain how the outcome of a simple chemical reaction is based on the valence electron state of the atoms involved and their position in the periodic table.

6. Patterns of Attraction

- In this section, you will construct an explanation of how patterns of attraction between atoms can allow the prediction of the type of reaction that occurs.

7. Composition and Formulas

- In this section, you will learn how to determine percent compositions, empirical formulas, and molecular formulas.
- In this section, you will predict the chemical formulas for simple ionic and molecular compounds.

8. Chemical Equations

- In this section, you will identify and describe the valence electrons and chemical formulas of the reactants and products of chemical reactions.

9. Balanced Reactions

- In this section, you will explain a chemical reaction by identifying that both the number and types of atoms are present before and after the reaction.
- In this lesson you will practice balancing equations using a PhET® simulation titled Balancing Chemical Equations, which can be accessed by clicking the image below.

10. Bonding of Atoms in Reactions

- In this section, you will identify the number and types of bonds in reactants and products of chemical reactions.

11. Types of Reactions

- In this section, you will describe the characteristics of redox, acid-base, synthesis, and single- and double-replacement chemical reactions.
- In this section, you will use models to predict the products of chemical reactions.
- In this section, you will learn how to classify chemical reactions as combustion reactions.

12. Chemical Reaction Predictions

- In this section, you will explain, using evidence-based reasoning, how the patterns of valence electrons and electronegativity of elements are used to predict the number and types of bonds each element forms and that these patterns operate the same today as in the past and as they will in the future.

13. Macroscopic Patterns of Reactivity

- In this section, you will describe how observable patterns of reactivity of elements in the periodic table are caused by patterns of valence electrons and electronegativities.

14. Explaining Reactions

- In this section, you will construct a revised or expanded explanation about the outcome of a chemical reaction and use evidence to justify the revision.

15. Simple Chemical Reactions Apply

16. Simple Chemical Reactions Review

17. Simple Chemical Reactions Unit Test

6. Energy In Chemical Reactions I

1. Energy In Chemical Reactions I Introduction

2. Total Bond Energy

- In this section, you will develop a model to illustrate that the release or absorption of energy from a chemical reaction depends upon the changes in total bond energy.

3. The Reaction System

- In this section, you will develop a model of a chemical reaction system that identifies the chemical reaction, the system, and the surroundings.

4. Broken Bonds

- Create a model of a chemical reaction system illustrating the substances present at the beginning and end of a specific reaction, as well as the events that take place during the reaction that result in the transformation.

5. Forming Bonds

- In this section, you will develop a model of a chemical reaction system that identifies the bonds that are formed during the reaction.

6. Energy Transfer 1

- In this section, you will develop a model of a chemical reaction system that identifies the energy transfer between the system and its components or the system and its surroundings.

7. Potential and Kinetic Energy

- In this section, you will analyze the transformation between potential and kinetic energies and the interface between a system and its surroundings.

8. Relative Potential Energy 1

- In this section, you will develop a model of a chemical reaction system that describes the relative potential energies of the reactants and the products.

9. Energy In Chemical Reactions I Apply

10. Energy In Chemical Reactions I Review

11. Energy in Chemical Reactions I Unit Test

7. Reaction Rates

1. Reaction Rates Portfolio 1

- In this section, you will explain the effects of changing the temperature or concentration on chemical reaction rates.
- In this section, you will evaluate evidence to explain how increasing the concentration of reactants causes an increase in the rate of a chemical reaction.

2. Reaction Rates Portfolio 2

- In this section, you will evaluate evidence to explain how increasing the temperature of reactants causes an increase in the rate of a chemical reaction.

3. Reaction Rates Portfolio 3

- In this section, you will describe how changing the concentration or temperature of reactants affects the rate of a chemical reaction.

8. Biochemistry

1. Biochemistry Introduction

2. Chemistry of Metabolism

- In this section, you will explain the chemistry of metabolism.

3. Mitosis and Meiosis

- In this section, you relate mitosis and meiosis at a molecular level.

4. Basis of Life Molecules

- In this section, you will illustrate the formation of carbohydrates, lipids, proteins, and nucleic acids.

5. DNA and RNA

- In this section, you will describe the structure of the DNA and RNA molecules.

6. Modeling Biomacromolecules

- In this section, you will use models to demonstrate patterns in biomacromolecules.
- In this section, you will use molecular models to demonstrate gene mutation and recombination at the molecular level.

7. Biochemistry Apply

8. Biochemistry Review

9. Biochemistry Unit Test

9. Chemistry A Semester Review and Exam

1. Chemistry B Semester Review

2. Chemistry B Semester Exam

Semester B Summary: In this second of two courses that comprise Honors Chemistry, the student will explore the fundamental concepts of chemistry, while engaging in hands-on and virtual lab experiments, and interdisciplinary problem-solving activities.

The student will build on prior knowledge to learn about how energy is transformed in chemical reactions, construct explanations of how energy and matter are related, apply the conservation of mass to calculate and compare quantities of substances in reactions, and develop models of nuclear processes.

Semester B Outline

1. Course Overview

1. Chemistry B Course Overview

2. Conservation of Mass

1. Conservation of Mass Introduction

2. Balanced Chemical Equations

- In this section, you will see how a chemical reaction is represented mathematically to indicate that the mass, or number of atoms, is conserved during a chemical reaction.

3. Claiming Conservation

- In this section, you will support the claim that the number of atoms of elements in a reaction, and, therefore, the mass of those elements, does not change when reactants are converted to products.

4. Mathematical Representations

- In this section, you will examine mathematical representations of a chemical equation to support the claim that atoms, and thus mass, are conserved during chemical reactions.

5. Use the Mole

- In this section, you will convert between moles and grams.

6. Reactants vs. Products

- In this section, you will predict relative numbers of atoms in reactants versus products for chemical reactions.

7. Calculating Mass

- In this section, you will calculate the unknown masses of parts of a chemical reaction using the known mass of one part of that reaction.

8. Specific Mass Conversions

- In this section, you will describe how mathematical representations support a claim that atoms, and therefore mass, are conserved during a chemical reaction.

9. Mass and Atoms

- In this section, you will convert the mass of a substance from the macroscopic to the atomic scale using moles and Avogadro's number.

10. Conservation of Mass Apply

11. Conservation of Mass Review

12. Conservation of Mass Unit Test

3. Solutions, Acids, and Bases

1. Solutions, Acids, and Bases Introduction

2. Solutes and Solvents

- In this section, you will use models to explain how solutes dissolve in solvents.
- In this section, you will explore how temperature and pressure affect the solubility of different solutes.
- In this lesson you will explore concentration in detail using the PhET® simulation, “Concentration,” which you will find by clicking the image below.

3. Ions in Polar Solvents

- In this section, you will construct a model that shows how ionic substances dissolve in polar solvents.

4. Solutions, Acids and Bases Portfolio 1

- In this section, you’ll observe and ask questions about the conductivity of a solution.

5. Solutions, Acids and Bases Portfolio 2

- In this section, you will design and explain the concepts behind an experiment to predict the conductivity of different solutions.
- In this section, you will carry out the experiment that you designed to test the conductivity of various solutions.

6. Solutions, Acids and Bases Portfolio 3

- In this section, you will evaluate and conclude your investigation by explaining the data as evidence of the conductivity of common ionic and covalent substances in solution.

7. Ph, Acids and Bases

- In this section, you will use the concept of pH as a model to predict the relative properties of strong, weak, concentrated, and dilute acids and bases.
- In this section, you will comment on the strengths of two acids or two bases with similar composition.
- In this lesson you will explore pH in detail using a PhET® simulation, “pH Scale,” which you will find here.

8. Acid Base Solutions

- In this lesson you will explore acids and bases in detail using a PhET® simulation, “Acid-Base Solutions,” which you will find here.
- In this lesson you will explore acids in detail using a PhET® simulation, “Acid-Base Solutions,” which you will find here.
- In this lesson you will explore bases in detail using a PhET® simulation, “Acid-Base Solutions,” which you will find here.

9. Solutions, Acids, and Bases Apply

10. Solutions, Acids, and Bases Review

11. Solutions, Acids, and Bases Unit Test

4. Chemical Reaction Systems

1. Chemical Reaction Systems Introduction

2. Concentrations at Equilibrium

- In this section, you will describe changes in a chemical reaction system that will affect the concentrations of a chemical species at equilibrium.

3. Changing One Component

- In this section, you will use Le Chatelier's principle to explain how product quantities in a chemical reaction system change when any of the components change.

4. Changing Reaction Rates

- In this section, you will discover how Le Chatelier's principle can be used to predict the impacts on a chemical reaction of changes in temperature, pressure, or concentration leading to a return to dynamic equilibrium.

5. Equilibrium and Stability

- In this section, you will explore how a reaction at equilibrium changes at the molecular level when it seems to be stable and unchanging at the macroscopic level.

6. Chemical Technology

- In this section, you will use information to explain how the use of chemistry-related technologies has had positive and negative implications.

7. Forces and Function

- In this section, you will describe the attractive and repulsive forces that determine how a material will function.

8. Designing a Chemical System

- In this section, you will describe criteria and constraints to refine a design for a chemical system.

9. Evaluating Design

- In this section, you will evaluate refinements to the design of a chemical system based on criteria and constraints.

10. Using Organic Compounds

- In this section, you will evaluate the design and function of products and processes that meet specific needs in relation to the molecular structures and functional groups of organic compounds.

11. Refining Design

- In this section, you will refine a designed system by making tradeoffs to optimize the system to increase the amount of product, and provide reasoning for the design decision.

12. Chemical Reaction Systems Apply

13. Chemical Reaction Systems Review

14. Chemical Reaction Systems Unit Test

5. Gases

1. Gases Introduction

2. Gases Under Pressure

- In this section, you will describe the relationships among pressure, temperature, and volume of an enclosed gas when only the amount of gas is constant.
- In this lesson you will explore this law in detail using a PhET® simulation titled Gases Intro, which can be accessed by clicking the image below.
- In this section, you will determine molar quantities using computational thinking based on the ideal gas law.

3. Gases Portfolio Day 1

- In this section, you will ask questions about the behavior of ideal gases.

4. Gases Portfolio Day 2

- In this section, you will design an investigation to explain the behavior of ideal gases.
- In this section, you will examine design and implementation of investigations to explain the behavior of ideal gases.

5. Gases Portfolio Day 3

- In this section, you will evaluate and conclude investigations to explain the behavior of ideal gases.

6. Gases Apply

7. Gases Review

8. Gases Unit Test

6. Oxidation

1. Oxidation Introduction

2. Oxidation Reduction Reaction Model

- In this section, you will predict the products in an oxidation-reduction reaction.

3. Oxidation Electron Transfer

- In this section, you will examine the mechanism of redox reactions and the tools used to analyze them.
- In this section, you will examine how redox processes are harnessed to generate electricity.

4. Oxidation Portfolio 1

- In this section, you will develop questions that will help identify whether a redox equation occurred.
- In this section, you will plan an investigation to determine whether rusting is a redox reaction.

5. Oxidation Portfolio 2

- In this section, you will conduct an investigation to determine whether rusting is a redox reaction.

6. Oxidation Portfolio 3

- In this section, you will evaluate the results of your investigation to determine if a redox reaction occurred.

7. Oxidation Apply

8. Oxidation Review

9. Oxidation Unit Test

7. Nuclear Processes

1. Nuclear Processes Introduction

2. Energy Release

- In this section, you will describe parts of a model that shows the composition of the nucleus of the atom.

3. Modeling Nuclear Processes

- In this section, you will develop models that show the relationships between components that underlie several nuclear processes.

4. Modeling Fusion

- In this section, you will develop a model that shows a process called nuclear fusion in which two nuclei merge to form a single, larger nucleus.

5. Modeling Fission

- In this section, you will develop a model that shows a process called nuclear fission in which a nucleus splits into two or more parts.

6. Radioactive Decay Energy

- In this section, you will develop models of radioactive decay that show the differences in the types of energy and/or particles released.

7. Alpha Particle Emission

- In this section, you will develop a radioactive decay model that classifies alpha decay as a type of nuclear fission and beta and gamma decays as not nuclear fission.

8. Nuclear Processes Apply

9. Nuclear Processes Review

10. Nuclear Processes Unit Test

8. Chemistry B Semester Review and Exam

1. Chemistry B Semester Review

2. Chemistry B Semester Exam

Chemistry (Prescriptive)

Chemistry A/B Prescriptive

Time allocations

Each lesson in the Course Outline provides an estimated time to complete.

Instructional Activities

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary

Prescriptive courses are designed as credit recovery for students. Teachers will work with students to identify the content students have not mastered. Students will only complete those lessons or units within the course. This will ensure that students have mastered all standards for graduation requirements.

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Introduction to Chemistry

Lesson	Description	Time (min)	Objective(s)
 Chemistry	This lesson introduces what chemistry is and why it is important to study. In this lesson students identify five traditional areas of study in chemistry and consider how pure chemistry relates to applied chemistry.	45	Define chemistry Identify five traditional areas of study in chemistry Relate pure chemistry to applied chemistry Identify reasons to study chemistry
 Quiz: Chemistry			

Lesson	Description	Time (min)	Objective(s)
 Chemistry Far and Wide	In this lesson students distinguish between macroscopic and microscopic views. This lesson identifies some areas of research affected by chemistry, such as agriculture, medicine, biotechnology, energy, the environment, and research.	45	<p>Distinguish between macroscopic and microscopic views</p> <p>Describe how chemistry effects energy research</p> <p>Describe how chemistry effects medicine and biotechnology research</p> <p>Describe how chemistry affects agricultural research</p> <p>Describe how chemistry affects environmental research</p> <p>Describe how chemistry affects universal research</p>
 Quiz: Chemistry Far and Wide			
 Thinking Like a Scientist	In this lesson students identify three steps in the scientific method. This lesson also describes how Lavoisier transformed chemistry and discusses why collaboration and communication are important in science.	45	<p>Describe alchemy</p> <p>Describe how Lavoisier transformed chemistry</p> <p>Identify three steps in the scientific method</p> <p>Explain why collaboration and communication are important in science</p> <p>Describe different steps for problem solving</p>
 Quiz: Thinking Like a Scientist			
 Posttest 1			

Module 2: Matter and Change

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 Properties of Matter	This lesson lists several common physical properties of substances and identifies properties of matter as extensive or intensive. Students learn to differentiate among three states of matter and to describe a physical change.	45	Identify properties of matter as extensive or intensive Define physical property and list several common physical properties of substances Differentiate among three states of matter Describe a physical change
 Quiz: Properties of Matter			
 Mixtures	In this lesson students categorize a sample of matter as a substance or a mixture, and they distinguish between homogeneous and heterogeneous samples of matter. Students also discover two ways that components of mixtures can be separated.	45	Categorize a sample of matter as a substance or a mixture Distinguish between homogeneous and heterogeneous samples of matter Describe two ways that components of mixtures can be separated
 Quiz: Mixtures			
 Elements and Compounds	This lesson explains the difference between an element and a compound and teaches students how to distinguish between a substance and a mixture. The lesson identifies the names and chemical symbols of elements.	45	Explain the difference between an element and a compound Distinguish between a substance and a mixture Identify the chemical symbols of elements, and name elements, given their symbols
 Quiz: Elements and Compounds			

Lesson	Description	Time (min)	Objective(s)
 Chemical Reactions	This lesson describes what happens during a chemical change. Students identify four possible clues that a chemical change has taken place and apply the law of conservation of mass to chemical reactions.	45	Describe what happens during a chemical change Identify four possible clues that a chemical change has taken place Apply the law of conservation of mass to chemical reactions
 Quiz: Chemical Reactions			
 Posttest 2			

Module 3: Scientific Measurement

Lesson	Description	Time (min)	Objective(s)
 Measurements and Their Uncertainty	In this lesson students convert measurements to scientific notation and distinguish between accuracy and precision of a measurement. Students also determine the number of significant figures in a measurement and in a calculated answer.	45	Convert measurements to scientific notation Distinguish among accuracy, precision, and error of a measurement Determine the number of significant figures in a measurement Determine the number of significant figures in a calculated answer
 Quiz: Measurements and Their Uncertainty			

 The International System of Units (SI)	In this lesson students learn how to use the correct SI unit to determine length, volume, and mass. Students also convert between the Celsius and Kelvin temperature scales and between joules and calories.	45	List SI units of measurement and common SI prefixes Use the correct SI unit to determine length, volume, and mass Convert between the Celsius and Kelvin temperature scales and between joules and calories
---	--	----	---

Lesson	Description	Time (min)	Objective(s)
 Quiz: The International System of Units (SI)			
 Conversion Problems	In this lesson students construct conversion factors from equivalent measurements. Students also convert complex units using dimensional analysis and apply this technique to a variety of conversion problems.	45	Construct conversion factors from equivalent measurements Apply the technique of dimensional analysis to a variety of conversion problems Convert complex units, using dimensional analysis
 Quiz: Conversion Problems			
 Density	This lesson describes how density varies with temperature. Students calculate the density of a material from experimental data.	45	Calculate the density of a material from experimental data Describe how density varies with temperature
 Quiz: Density			
★ Posttest 3			

Module 4: Atomic Structure

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

 Defining the Atom	This lesson describes Democritus's ideas about atoms and explains Dalton's atomic theory. Students also identify the instrument used to observe individual atoms.	45	Describe Democritus's ideas about atoms Explain Dalton's atomic theory Identify what instrument is used to observe individual atoms
 Quiz: Defining the Atom			
Lesson	Description	Time (min)	Objective(s)
 Structure of the Nuclear Atom	In this lesson students identify three types of subatomic particles. The lesson describes the structure of atoms according to the Rutherford atomic model.	45	Identify three types of subatomic particles Describe the structure of atoms according to the Rutherford atomic model
 Quiz: Structure of the Nuclear Atom			
 Distinguishing Among Atoms	This lesson describes how an atomic number relates to the number of protons, and how elements and isotopes differ. Students also calculate the number of neutrons in an atom and the atomic mass of an element.	45	Describe how an element's atomic number relates to the number of protons Calculate the number of neutrons in an atom Explain what makes elements and isotopes different from each other Calculate the atomic mass of an element Explain why chemists use the periodic table
 Quiz: Distinguishing Among Atoms			
 Posttest 4			

Module 5: Electrons in Atoms

Lesson	Description	Time (min)	Objective(s)
 Models of the Atom	This lesson explains the Bohr atomic model and identifies the inadequacies in the Rutherford model. It also describes the energies and positions of electrons of the quantum mechanical model and how shapes of orbitals differ at different sublevels.	45	Identify the inadequacies in the Rutherford atomic model Identify the new proposal in the Bohr model of the atom Describe the energies and positions of electrons according to the quantum mechanical model Describe how the shapes of orbitals related to different sublevels differ
 Quiz: Models of the Atom			
 Electron Arrangement in Atoms	In this lesson students learn how to write the electron configuration for an atom. The lesson also explains why the actual electron configurations for some elements differ from those predicted by the aufbau principle.	45	Describe how to write the electron configuration for an atom Explain why the actual electron configurations for some elements differ from those predicted by the aufbau principle
 Quiz: Electron Arrangement in Atoms			

<p>Physics and the Quantum Mechanical Model</p>	<p>In this lesson students distinguish between quantum and classical mechanics. They learn how wavelengths relate to frequency of light, how frequencies of emitted light relate to changes in electron energies, and how to determine the identity of an unknown cation.</p>	<p>45</p>	<p>Describe the relationship between the wavelengths and frequency of light Identify the source of atomic emission spectra Explain how the frequencies of emitted light are related to changes in electron energies Determine the identity of an unknown cation based on its characteristic color in a flame Distinguish between quantum mechanics and classical mechanics</p>
---	---	-----------	--

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Physics and the Quantum Mechanical Model			
★ Posttest 5			

Module 6: The Periodic Table

Lesson	Description	Time (min)	Objective(s)
📁 Organizing the Elements	This lesson compares how elements were arranged in Mendeleev's periodic table and how they are arranged in the modern periodic table. Students also identify three broad classes of elements.	45	<p>Explain how elements are organized in a periodic table</p> <p>Describe how elements were arranged in Mendeleev's periodic table</p> <p>Describe how elements are arranged in the modern periodic table</p> <p>Identify three broad classes of elements</p>
🔍 Quiz: Organizing the Elements			
📁 Classifying the Elements	In this lesson students learn about the information in a periodic table. Students classify elements based on electron configuration, and distinguish representative elements and transition metals.	45	<p>Describe the information in a periodic table</p> <p>Classify elements based on electron configuration</p> <p>Distinguish representative elements and transition metals</p>
🔍 Quiz: Classifying the Elements			
Lesson	Description	Time (min)	Objective(s)

 Periodic Trends	In this lesson students discover how ions form and learn about trends among the elements for atomic size. The lesson describes periodic trends in ionization energy, ionic size, and electronegativity.	45	Describe trends among the elements for atomic size Explain how ions form Describe periodic trends in ionization energy Describe periodic trends in ionic size Describe periodic trends in electronegativity
 Quiz: Periodic Trends			
 Posttest 6			

Module 7: Ionic and Metallic Bonding

Lesson	Description	Time (min)	Objective(s)
 Ions	In this lesson students learn how to determine the number of valence electrons of a representative element. The lesson also explains how cations and anions form, and how the octet rule applies to atoms of metallic and nonmetallic elements.	45	Determine the number of valence electrons in an atom of a representative element Explain how the octet rule applies to atoms of metallic and nonmetallic elements Describe how cations form Explain how anions form
 Quiz: Ions			
 Ionic Bonds and Ionic Compounds	This lesson explains the electrical charge of an ionic compound. The lesson also describes three properties of ionic compounds.	45	Explain the electrical charge of an ionic compound Describe three properties of ionic compounds
 Quiz: Ionic Bonds and Ionic Compounds			

Lesson	Description	Time (min)	Objective(s)
 Bonding in Metals	This lesson teaches students how to model the valence electrons of metal atoms. The lesson also describes the arrangements of atoms in a metal and explains the importance of alloys.	45	<p>Model the valence electrons of metal atoms</p> <p>Describe the arrangements of atoms in a metal</p> <p>Explain the importance of alloys</p>
 Quiz: Bonding in Metals			
 Posttest 7			

Module 8: Covalent Bonding

Lesson	Description	Time (min)	Objective(s)
 Molecular Compounds	In this lesson students distinguish between the melting points and boiling points of molecular and ionic compounds. The lesson also describes the information provided by a molecular formula.	45	<p>Distinguish between the melting points and boiling points of molecular compounds and ionic compounds</p> <p>Describe the information provided by a molecular formula</p>
 Quiz: Molecular Compounds			

Lesson	Description	Time (min)	Objective(s)
 The Nature of Covalent Bonding	<p>This lesson describes how covalent bonds form and how a bond's strength relates to its dissociation energy. Students also identify exceptions to the octet rule and distinguish between a covalent bond and a coordinate covalent bond.</p>	45	<p>Describe how electrons are shared to form covalent bonds</p> <p>Demonstrate how electron dot structures represent shared electrons</p> <p>Describe how atoms form double or triple covalent bonds</p> <p>Distinguish between a covalent bond and a coordinate covalent bond</p> <p>Describe how the strength of a covalent bond is related to its bond dissociation energy</p> <p>Describe how oxygen atoms are bonded in ozone</p> <p>Identify exceptions to the octet rule</p>
 Quiz: The Nature of Covalent Bonding			
 Bonding Theories	<p>In this lesson students identify ways that orbital hybridization is useful for describing molecules. The lesson describes the relationship between atomic and molecular orbitals and how VSEPR theory helps predict the shapes of molecules.</p>	45	<p>Describe the relationship between atomic and molecular orbitals</p> <p>Describe how VSEPR theory helps predict the shapes of molecules</p> <p>Identify ways in which orbital hybridization is useful in describing molecules</p>
 Quiz: Bonding Theories			

Lesson	Description	Time (min)	Objective(s)
 Polar Bonds and Molecules	This lesson describes how electronegativity values determine the distribution of charge in a polar molecule. Students evaluate the strength of intermolecular attractions compared with the strength of ionic and covalent bonds.	45	Describe how electronegativity values determine the distribution of charge in a polar molecule Describe what happens to polar molecules when they are placed between oppositely charged metal plates Evaluate the strength of intermolecular attractions compared with the strength of ionic and covalent bonds Identify the reason why network solids have high melting points Separate and identify food dyes using paper chromatography
 Quiz: Polar Bonds and Molecules			
 Posttest 8			

Module 9: Chemical Names and Formulas

Lesson	Description	Time (min)	Objective(s)
 Naming Ions	In this lesson students identify the charges on monatomic ions by using the periodic table, and they name the ions. Students learn to write the names and formulas of the most common polyatomic ions.	45	Identify the charges on monatomic ions by using the periodic table, and name the ions Define polyatomic ion and write the names and formulas of the most common polyatomic ions Identify the two most common endings for the names of polyatomic
 Quiz: Naming Ions			

Lesson	Description	Time (min)	Objective(s)
 Naming and Writing Formulas for Ionic Compounds	In this lesson student learn how to apply the rules for naming and writing formulas for binary ionic compounds. Students also learn how to apply the rules for naming and writing formulas for compounds with polyatomic ions.	45	Apply the rules for naming and writing formulas for binary ionic compounds Apply the rules for naming and writing formulas for compounds with polyatomic ions
 Quiz: Naming and Writing Formulas for Ionic Compounds			
 Naming and Writing Formulas for Molecular Compounds	This lesson teaches students how to interpret the prefixes in the names of molecular compounds in terms of their chemical formulas. Students also learn how to apply the rules for naming and writing formulas for binary molecular compounds.	45	Interpret the prefixes in the names of molecular compounds in terms of their chemical formulas Apply the rules for naming and writing formulas for binary molecular compounds
 Quiz: Naming and Writing Formulas for Molecular Compounds			
 Naming and Writing Formulas for Acids and Bases	In this lesson students apply three rules for naming acids, and they apply the rules in reverse to write formulas for acids. Students also apply rules for naming bases.	45	Apply three rules for naming acids Apply the rules in reverse to write formulas of acids Apply the rules for naming bases
 Quiz: Naming and Writing Formulas for Acids and Bases			

Lesson	Description	Time (min)	Objective(s)
 The Laws Governing Formulas and Names	This lesson defines the laws of definite proportions and multiple proportions. Students learn to apply the rules for naming chemical compounds and for writing their formulas by using a flowchart.	45	Define the laws of definite proportions and multiple proportions Apply the rules for naming chemical compounds by using a flowchart Apply the rules for writing the formulas of chemical compounds by using a flowchart
 Quiz: The Laws Governing Formulas and Names			
 Posttest 9			

Module 10: Chemical Quantities

Lesson	Description	Time (min)	Objective(s)
 The Mole: A Measurement of Matter	This lesson describes methods for measuring quantities and defines Avogadro's number as it relates to a mole of a substance. Students learn to distinguish between the atomic mass of an element and its molar mass and how the mass of a mole of a compound is calculated.	45	Describe methods of measuring the amount of something Define Avogadro's number as it relates to a mole of a substance Distinguish between the atomic mass of an element and its molar mass Describe how the mass of a mole of a compound is calculated
 Quiz: The Mole: A Measurement of Matter			
 Mole-Mass and Mole-Volume Relationships	This lesson describes how to convert the mass of a substance to the number of moles of a substance, and moles to mass. Students also identify the volume of a quantity of gas at STP.	45	Describe how to convert the mass of a substance to the number of moles of a substance, and moles to mass Identify the volume of a quantity of gas at STP

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Mole-Mass and Mole-Volume Relationships			
📁 Percent Composition and Chemical Formulas	This lesson describes how to calculate the percent by mass of an element in a compound. Students also learn to distinguish between empirical and molecular formulas.	45	Describe how to calculate the percent by mass of an element in a compound Interpret an empirical formula Distinguish between empirical and molecular formulas
🔍 Quiz: Percent Composition and Chemical Formulas			
★ Posttest 10			

Module 11: Chemical Reactions

Lesson	Description	Time (min)	Objective(s)
📁 Describing Chemical Reactions	This lesson describes how to write word and skeleton equations. The lesson also describes the steps for writing a balanced chemical equation.	45	Describe how to write word and skeleton equations Describe the steps for writing a balanced chemical equation
🔍 Quiz: Describing Chemical Reactions			
📁 Types of Chemical Reactions	This lesson describes combination, decomposition, single-replacement, double-replacement, and combustion reactions. Students investigate the different types of chemical reactions and learn to predict the products.	45	Describe combination reactions Describe decomposition reactions Describe single-replacement reactions Describe double-replacement reactions Describe combustion reactions Investigate the different types of chemical reactions and learn to predict the products

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Types of Chemical Reactions			
📁 Reactions in Aqueous Solution	This lesson describes the information found in a net ionic equation. Students also learn how to predict the formation of a precipitate in a double-replacement reaction.	45	Describe the information found in a net ionic equation Predict the formation of a precipitate in a double-replacement reaction
🔍 Quiz: Reactions in Aqueous Solution			
★ Posttest 11			

Module 12: Stoichiometry

Lesson	Description	Time (min)	Objective(s)
📁 The Arithmetic of Equations	In this lesson students learn to interpret balanced chemical equations in terms of moles, representative particles, mass, and gas volume at STP, and identify quantities that are conserved in chemical reactions.	45	Explain how balanced equations apply to everyday situations Explain how balanced equations apply to chemistry Interpret balanced chemical equations in terms of moles, representative particles, mass, and gas volume at STP Identify the quantities that are always conserved in chemical reactions
🔍 Quiz: The Arithmetic of Equations			

Lesson	Description	Time (min)	Objective(s)
 Chemical Calculations	In this lesson students construct mole ratios from balanced chemical equations and apply these ratios in stoichiometric calculations. Students also calculate stoichiometric quantities from balanced chemical equations using units of moles, mass, representative particles, and volumes of gases at STP.	45	Construct mole ratios from balanced chemical equations and apply these ratios in stoichiometric calculations Calculate stoichiometric quantities from balanced chemical equations using units of moles, mass, representative particles, and volumes of gases at STP Determine the mass of sodium hydrogen carbonate in a sample of baking soda using stoichiometry
 Quiz: Chemical Calculations			
 Limiting Reagent and Percent Yield	In this lesson students identify the limiting reagent in a reaction. Students also calculate theoretical yield, percent yield, and the amount of excess reagent that remains unreacted.	45	Identify the limiting reagent in a reaction Calculate theoretical yield, percent yield, and the amount of excess reagent that remains unreacted given appropriate information
 Quiz: Limiting Reagent and Percent Yield			
 Posttest 12			

Review Test

Lesson	Description	Time (min)	Objective(s)
 Review Test			

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: States of Matter

Lesson	Description	Time (min)	Objective(s)
 The Nature of Gases	This lesson describes the assumptions of the kinetic theory as it applies to gases and defines the relationship between Kelvin temperature and average kinetic energy. Students also interpret gas pressure in terms of kinetic energy.	45	<p>Describe the assumptions of the kinetic theory as it applies to gases</p> <p>Interpret gas pressure in terms of kinetic energy</p> <p>Define the relationship between Kelvin temperature and average kinetic energy</p>
 Quiz: The Nature of Gases			
 The Nature of Liquids	In this lesson students identify factors that determine physical properties of a liquid and the conditions at which boiling occurs. The lesson defines evaporation in terms of kinetic energy and describes the equilibrium between a liquid and its vapor.	45	<p>Identify factors that determine physical properties of a liquid</p> <p>Define evaporation in terms of kinetic energy</p> <p>Describe the equilibrium between a liquid and its vapor</p> <p>Identify the conditions at which boiling occurs</p>

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: The Nature of Liquids			
📁 The Nature of Solids	In this lesson students evaluate how particle organization explains the properties of solids. Students also identify the factors that determine the shape of a crystal.	45	Evaluate how the way particles are organized explains the properties of solids Identify the factors that determine the shape of a crystal Identify the shape of a crystal and explain how allotropes of an element are different
🔍 Quiz: The Nature of Solids			
📁 Changes of State	In this lesson students identify the conditions necessary for sublimation. The lesson also describes how equilibrium conditions are represented in a phase diagram.	45	Identify the conditions necessary for sublimation Describe how equilibrium conditions are represented in a phase diagram
🔍 Quiz: Changes of State			
★ Posttest 1			

Module 2: The Behavior of Gases

Lesson	Description	Time (min)	Objective(s)
📁 Properties of Gases	This lesson explains why gases are easier to compress than solids or liquids. The lesson also describes the three factors that affect gas pressure.	45	Explain why gases are easier to compress than solids or liquids are Describe the three factors that affect gas pressure
🔍 Quiz: Properties of Gases			

Lesson	Description	Time (min)	Objective(s)
 The Gas Laws	This lesson describes the relationship between pressure and volume in Boyle's Law, the relationship between temperature and volume in Charles's Law, and the relationship between pressure and temperature in Gay-Lussac's Law. Students solve problems using the combined gas law.	45	Describe in Boyle's Law the relationship between pressure and volume Describe in Charles's Law the relationship between temperature and volume Describe in Gay-Lussac's Law the relationship between pressure and temperature Use the combined gas law to solve problems
 Quiz: The Gas Laws			
 Ideal Gases	In this lesson students compute the value of an unknown using the ideal gas law. Students also compare and contrast real and ideal gases.	45	Compute the value of an unknown using the ideal gas law Compare and contrast real and ideal gases
 Quiz: Ideal Gases			
 Gases: Mixtures and Movements	This lesson teaches how to relate the total pressure of a mixture of gases to the partial pressures of the component gases. The lesson also explains how the molar mass of a gas affects the rate at which the gas diffuses and effuses.	45	Relate the total pressure of a mixture of gases to the partial pressures of the component gases Explain how the molar mass of a gas affects the rate at which the gas diffuses and effuses
 Quiz: Gases: Mixtures and Movements			
 Posttest 2			

Module 3: Water and Aqueous Systems

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 Water and Its Properties	This lesson explains the high surface tension and low vapor pressure of water in terms of the structure of the water molecule and hydrogen bonding. The lesson also describes the structure of ice.	45	<p>Explain the high surface tension and low vapor pressure of water in terms of the structure of the water molecule and hydrogen bonding</p> <p>Describe the structure of ice</p>
 Quiz: Water and Its Properties			
 Homogeneous Aqueous Systems	This lesson describes what happens in the solution process and explains why all ionic compounds are electrolytes. Students also distinguish between a solvent and a solute, and demonstrate how the formula for a hydrate is written.	45	<p>Distinguish between a solvent and a solute</p> <p>Describe what happens in the solution process</p> <p>Explain why all ionic compounds are electrolytes</p> <p>Demonstrate how the formula for a hydrate is written</p>
 Quiz: Homogeneous Aqueous Systems			
 Heterogeneous Aqueous Systems	In this lesson students distinguish between a suspension and a solution. Students also identify the distinguishing characteristic of a colloid.	45	<p>Distinguish between a suspension and a solution</p> <p>Identify the distinguishing characteristic of a colloid</p>
 Quiz: Heterogeneous Aqueous Systems			
 Posttest 3			

Module 4: Solutions

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 Properties of Solutions	In this lesson students identify the units used to express the solubility of a solute. Students also identify the factors that determine the rate at which a solute dissolves and the mass of solute that will dissolve in a given mass of solvent.	45	Identify the factors that determine the rate at which a solute dissolves Identify the units usually used to express the solubility of a solute Identify the factors that determine the mass of solute that will dissolve in a given mass of solvent
 Quiz: Properties of Solutions			
 Concentrations of Solutions	In this lesson students solve problems involving the molarity of a solution. The lesson describes the affect of dilution on the total moles of solute in solution and defines percent by volume and percent by mass solutions.	45	Solve problems involving the molarity of a solution Describe the effect of dilution on the total moles of solute in solution Define percent by volume and percent by mass solutions
 Quiz: Concentrations of Solutions			
 Colligative Properties of Solutions	This lesson explains why the vapor pressure, freezing point, and boiling point of a solution differ from those properties of the pure solvent.	45	Explain why the vapor pressure of a solution differs from that of the pure solvent Identify three colligative properties of solutions Explain why the freezing point of a solution differs from that of the pure solvent Explain why the boiling point of a solution differs from that of the pure solvent

 Quiz: Colligative Properties of Solutions			
--	--	--	--

Lesson	Description	Time (min)	Objective(s)
 Calculations Involving Colligative Properties	In this lesson students solve problems related to the molality and mole fraction of a solution. The lesson describes how freezing-point depression and boiling-point elevation are related to molality.	45	<p>Solve problems related to the molality and mole fraction of a solution</p> <p>Describe how freezing-point depression and boiling-point elevation are related to molality</p>
 Quiz: Calculations Involving Colligative Properties			
 Posttest 4			

Module 5: Thermochemistry

Lesson	Description	Time (min)	Objective(s)
 The Flow of Energy - Heat and Work	This lesson explains how energy, heat, and work are related. Students classify processes as either exothermic or endothermic, identify the units used to measure heat transfer, and distinguish between heat capacity and specific heat.	45	<p>Explain how energy, heat, and work are related</p> <p>Classify processes as either exothermic or endothermic</p> <p>Identify the units used to measure heat transfer</p> <ul style="list-style-type: none"> Distinguish between heat capacity and specific heat
 Quiz: The Flow of Energy - Heat and Work			

 Measuring and Expressing Enthalpy Changes	This lesson describes how calorimeters are used to measure heat flow. Students construct thermochemical equations and solve for enthalpy changes in chemical reactions by using heats of reaction.	45	Describe how calorimeters are used to measure heat flow Construct thermochemical equations and solve for enthalpy changes in chemical reactions by using heats of reaction
--	--	----	--

Lesson	Description	Time (min)	Objective(s)
 Quiz: Measuring and Expressing Enthalpy Changes			
 Heat in Changes of State	In this lesson students classify and solve for the enthalpy change that occurs when a substance melts and freezes, when a substance boils and condenses, and when a substance dissolves.	45	Classify and solve for the enthalpy change that occurs when a substance melts and freezes Classify and solve the enthalpy change that occurs when a substance boils and condenses Classify and solve the enthalpy change that occurs when a substance dissolves
 Quiz: Heat in Changes of State			
 Calculating Heats of Reaction	In this lesson students use Hess's law of heat summation to solve for enthalpy changes. Students also solve for enthalpy changes by using standard heats of formation.	45	Use Hess's law of heat summation to solve for enthalpy changes Solve for enthalpy changes by using standard heats of formation
 Quiz: Calculating Heats of Reaction			
★ Posttest 5			

Module 6: Reaction Rates and Equilibrium

Lesson	Description	Time (min)	Objective(s)
 Rates of Reaction	This lesson describes how to express the rate of a chemical reaction. Students also identify four factors that influence the rate of a chemical reaction.	45	Describe how to express the rate of a chemical reaction Identify four factors that influence the rate of a chemical reaction
 Quiz: Rates of Reaction			

Lesson	Description	Time (min)	Objective(s)
 Reversible Reactions and Equilibrium	This lesson describes how the amounts of reactants and products change in a chemical system at equilibrium and explains what the value of K_{eq} indicates about the equilibrium position. Students identify three stresses that can change the equilibrium position.	45	Describe how the amounts of reactants and products change in a chemical system at equilibrium Identify three stresses that can change the equilibrium position of a chemical system Explain what the value of K_{eq} indicates about the position of equilibrium
 Quiz: Reversible Reactions and Equilibrium			
 Solubility Equilibrium	This lesson describes the relationship between the solubility product constant and the solubility of a compound. Students also predict whether precipitation will occur when two salt solutions are mixed.	45	Describe the relationship between the solubility product constant and the solubility of a compound Predict whether precipitation will occur when two salt solutions are mixed
 Quiz: Solubility Equilibrium			

<p> Entropy and Free Energy</p>	<p>This lesson defines Gibbs free-energy change. Students also identify characteristics of spontaneous reactions and factors that determine spontaneity, observe and measure energy changes during the formation of a solution, and describe the changes in terms of enthalpy and entropy.</p>	<p>45</p>	<p>Identify two characteristics of spontaneous reactions Describe the role of entropy in chemical reactions</p> <p>Identify two factors that determine the spontaneity of a reaction</p> <p>Define Gibbs free-energy change</p> <p>Observe and measure energy changes during the formation of a solution and describe the changes in terms of enthalpy and entropy</p>
<p> Quiz: Entropy and Free Energy</p>			

Lesson	Description	Time (min)	Objective(s)
 The Progress of Chemical Reactions	This lesson describes the general relationship between the value of the specific rate constant k and the speed of a chemical reaction. Students also interpret the hills and valleys in a reaction progress curve.	45	Describe the general relationship between the value of the specific rate constant, k , and the speed of a chemical reaction Interpret the hills and valleys in a reaction progress curve
 Quiz: The Progress of Chemical Reactions			
 Posttest 6			

Module 7: Acids, Bases, and Salts

Lesson	Description	Time (min)	Objective(s)
 Acid-Base Theories	This lesson defines the properties of acids and bases. Students compare and contrast acids and bases as defined by Arrhenius, by the theories of Brønsted-Lowry, and by the theories of Lewis.	45	Define the properties of acids and bases Compare and contrast acids and bases as defined by Arrhenius Compare and contrast acids and bases as defined by the theories of Brønsted-Lowry Compare and contrast acids and bases as defined by the theories of Lewis
 Quiz: Acid-Base Theories			
Lesson	Description	Time (min)	Objective(s)

<p> Hydrogen Ions and Acidity</p>	<p>This lesson describes how H^+ and OH^- are related in an aqueous solution. Students classify a solution as neutral, acidic, or basic given the hydrogen-ion or hydroxide-ion concentration, and convert hydrogen-ion concentrations into pH values and hydroxide-ion concentrations into pOH values.</p>	<p>45</p>	<p>Describe how $[H^+]$ and $[OH^-]$ are related in an aqueous solution Classify a solution as neutral, acidic, or basic given the hydrogen-ion or hydroxide-ion concentration Convert hydrogen-ion concentrations into pH values and hydroxide-ion concentrations into pOH values Describe the purpose of an acid- base indicator</p>
<p> Quiz: Hydrogen Ions and Acidity</p>			
<p> Strengths of Acids and Bases</p>	<p>This lesson describes how concentration and strength of solutions are determined. Students order acids and bases by strength according to their dissociation constants (K_a and K_b) and calculate an acid dissociation constant from concentration and pH measurements.</p>	<p>45</p>	<p>Define strong acids and weak acids Order acids by strength according to their acid dissociation constants (K_a) Describe how an acid's strength is related to the value of its dissociation constant Order bases by strength according to their base dissociation constants (K_b) Describe how concentration and strength of solutions are determined Calculate an acid dissociation constant (K_a) from concentration and pH measurements</p>
<p> Quiz: Strengths of Acids and Bases</p>			
<p> Neutralization Reactions</p>	<p>This lesson defines the products of an acid-base reaction. The lesson also explains how acid-base titration is used to calculate the concentration of an acid or a base.</p>	<p>45</p>	<p>Define the products of an acid- base reaction Explain how acid-base titration is used to calculate the concentration of an acid or a base</p>

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Neutralization Reactions			
📖 Salts in Solution	In this lesson students tell when a solution of a salt is acidic or basic and demonstrate with equations how buffers resist changes in pH.	45	Describe when a solution of a salt is acidic or basic Demonstrate with equations how buffers resist changes in pH
🔍 Quiz: Salts in Solution			
★ Posttest 7			

Module 8: Oxidation-Reduction Reactions

Lesson	Description	Time (min)	Objective(s)
📖 The Meaning of Oxidation and Reduction	This lesson defines oxidation and reduction in terms of the loss or gain of oxygen and electrons and describes what happens to iron when it corrodes. Students list the characteristics of a redox reaction and identify the oxidizing and reducing agents.	45	Define oxidation and reduction in terms of the loss or gain of oxygen and electrons State the characteristics of a redox reaction and identify the oxidizing agent and reducing agent Describe what happens to iron when it corrodes
🔍 Quiz: The Meaning of Oxidation and Reduction			

Lesson	Description	Time (min)	Objective(s)
 Oxidation Numbers	This lesson defines oxidation and reduction in terms of a change in oxidation number. Students identify atoms being oxidized or reduced in redox reactions and determine the oxidation number of an atom of any element in a pure substance.	45	Determine the oxidation number of an atom of any element in a pure substance Define oxidation and reduction in terms of a change in oxidation number and identify atoms being oxidized or reduced in redox reactions
 Quiz: Oxidation Numbers			
 Balancing Redox Equations	This lesson describes how oxidation numbers are used to identify redox reactions. Students balance redox equations using the oxidation-number-change method and the half-reaction method, and identify the best method needed to balance a chemical equation.	45	Describe how oxidation numbers are used to identify redox reactions Balance a redox equation using the oxidation-number-change method Balance a redox equation by using the half-reaction method Identify the best method needed to balance a chemical equation
 Quiz: Balancing Redox Equations			
 Posttest 8			

Module 9: Electrochemistry

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 Electrochemical Cells	This lesson describes how a voltaic cell produces electrical energy and describes current technologies that use electrochemical processes to produce energy. Students interpret an activity series and identify the elements most easily oxidized and least easily oxidized.	45	Interpret an activity series and identify the elements that are most easily oxidized and those that are least easily oxidized Name the types of reactions involved in electrochemical processes Describe how a voltaic cell produces electrical energy Describe current technologies that use electrochemical processes to produce energy
 Quiz: Electrochemical Cells			
 Half-Cells and Cell Potentials	This lesson describes how the standard reduction potential of a half-cell is determined. Students identify what causes the electrical potential of an electrochemical cell and interpret the meaning of the sign of the standard cell potential.	45	Identify what causes the electrical potential of an electrochemical cell Define the standard hydrogen electrode Describe how the standard reduction potential of a half-cell is determined Interpret the meaning of the sign of the standard cell potential
 Quiz: Half-Cells and Cell Potentials			
 Electrolytic Cells	This lesson describes chemical changes that take place during the electrolysis of brine. Students also distinguish between electrolytic and voltaic cells, identify products of the electrolysis of water, and name three ways electrolysis is used in metal processing.	45	Distinguish between electrolytic and voltaic cells Identify the products of the electrolysis of water Describe the chemical changes that take place during the electrolysis of brine Name three ways that electrolysis is used in metal processing

Quiz: Electrolytic Cells			
-----------------------------	--	--	--

Lesson	Description	Time (min)	Objective(s)
★ Posttest 9			

Module 10: Hydrocarbon Compounds

Lesson	Description	Time (min)	Objective(s)
 Hydrocarbons	This lesson defines and describes alkanes and describes the relationship between the number of valence electrons and bonding in carbon. Students relate the polarity of hydrocarbons to their solubility.	45	Describe the relationship between number of valence electrons and bonding in carbon Define and describe alkanes Relate the polarity of hydrocarbons to their solubility
 Quiz: Hydrocarbons			
 Unsaturated Hydrocarbons	This lesson describes the difference between unsaturated and saturated hydrocarbons and the bonds that characterize an alkene. Students distinguish the bond structure that characterizes an alkyne.	45	Describe the difference between unsaturated and saturated hydrocarbons and the bonds that characterize an alkene Distinguish the bond structure that characterizes an alkyne
 Quiz: Unsaturated Hydrocarbons			
 Isomers	This lesson explains why structural isomers have different properties. Students distinguish between geometric and optical isomers.	45	Explain why structural isomers have different properties Distinguish the conditions necessary for geometric isomers and optical isomers
 Quiz: Isomers			

 Hydrocarbon Rings	In this lesson students identify cyclic ring structures. The lesson also describes bonding in benzene.	45	Identify cyclic ring structures Describe bonding in benzene
--	--	----	--

Lesson	Description	Time (min)	Objective(s)
 Quiz: Hydrocarbon Rings			
 Hydrocarbons from Earth's Crust	This lesson describes the origin and composition of natural gas, petroleum, and coal.	45	Identify three important fossil fuels Describe the origin and composition of natural gas Describe the origin and composition of petroleum Describe what happens when petroleum is refined Describe the origin and composition of coal
 Quiz: Hydrocarbons from Earth's Crust			
★ Posttest 10			

Module 11: Functional Groups

Lesson	Description	Time (min)	Objective(s)
 Introduction to Functional Groups	This lesson explains how organic compounds are classified and describes how halocarbons can be prepared. Students identify halocarbons and the IUPAC rules for naming halocarbons.	45	Explain how organic compounds are classified Identify halocarbons and the IUPAC rules for naming halocarbons Describe how halocarbons can be prepared
 Quiz: Introduction to Functional Groups			

Lesson	Description	Time (min)	Objective(s)
 Alcohols and Ethers	In this lesson students identify how alcohols are classified and named, and predict how the solubility of an alcohol varies with the length of its carbon chain. Students also name the reactions of alkenes that may be used to introduce functional groups, and construct the general structure of an ether.	45	<p>Identify how alcohols are classified and named</p> <p>Predict how the solubility of an alcohol varies with the length of its carbon chain</p> <p>Name the reactions of alkenes that may be used to introduce functional groups</p> <p>Construct the general structure of an ether and describe how ethers are named</p>
 Quiz: Alcohols and Ethers			
 Carbonyl Compounds	In this lesson students identify the structure of a carbonyl group as found in aldehydes and ketones, and construct the general formula for carboxylic acids. This lesson also describes an ester and describes how dehydrogenation is an oxidation reaction.	45	<p>Identify the structure of a carbonyl group as found in aldehydes and ketones</p> <p>Construct the general formula for carboxylic acids and explain how they are named</p> <p>Describe an ester</p> <p>Describe how dehydrogenation is an oxidation reaction</p>
 Quiz: Carbonyl Compounds			
 Polymerization	This lesson describes how addition and condensation polymers are formed.	45	<p>Describe how addition polymers are formed</p> <p>Describe how condensation polymers are formed</p>
 Quiz: Polymerization			
 Posttest 11			

Module 12: The Chemistry of Life

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 A Strategy for Life	In this lesson students identify two major cell types that occur in nature. The lesson also describes the chemical changes that occur during photosynthesis.	45	Identify two major cell types that occur in nature Describe the chemical changes that occur during photosynthesis
 Quiz: A Strategy for Life			
 Carbohydrates	In this lesson students identify where glucose is found in nature. The lesson also describes how two simple sugars can be linked.	45	Identify where glucose is found in nature Describe how two simple sugars can be linked
 Quiz: Carbohydrates			
 Amino Acids and Their Polymers	In this lesson students diagram the structure of an amino acid and identify the properties of peptides and proteins. The lesson also describes how peptide bonds form and how enzymes affect biochemical reactions.	45	Diagram the structure of an amino acid Describe how peptide bonds form Identify what determines the properties of peptides and proteins Describe how enzymes affect biochemical reactions
 Quiz: Amino Acids and Their Polymers			
 Lipids	In this lesson students identify the physical property that distinguishes lipids from other biological molecules. The lesson describes the structure of a lipid bilayer and different types of waxes.	45	Identify the physical property that distinguishes lipids from other biological molecules Describe the structure of a lipid bilayer and different types of waxes
 Quiz: Lipids			

Lesson	Description	Time (min)	Objective(s)
 Nucleic Acids	In this lesson students identify the functions of DNA and RNA. The lesson describes how information is sorted in genetic material, how genes can mutate, how DNA fingerprinting is used, and how recombinant DNA technology is used.	45	<p>Identify the functions of DNA and RNA</p> <p>Describe how information is sorted in genetic material</p> <p>Describe how genes can mutate</p> <p>Describe how DNA fingerprinting is used</p> <p>Describe how recombinant DNA technology is used</p>
 Quiz: Nucleic Acids			
 Metabolism	This lesson describes the function of ATP in cells and tells how cells use catabolism and anabolism. The lesson also describes the nitrogen cycle.	45	<p>Describe the function of ATP in cells</p> <p>Distinguish between catabolism and anabolism</p> <p>Describe how cells use catabolism</p> <p>Describe how cells use anabolism</p> <p>Describe the nitrogen cycle</p>
 Quiz: Metabolism			
 Posttest 12			

Module 13: Nuclear Chemistry

Lesson	Description	Time (min)	Objective(s)
 Nuclear Radiation	This lesson describes the three main types of nuclear radiation and explains how an unstable nucleus releases energy.	45	<p>Explain how an unstable nucleus releases energy</p> <p>Describe the three main types of nuclear radiation</p>
 Quiz: Nuclear Radiation			

Lesson	Description	Time (min)	Objective(s)
 Nuclear Transformations	This lesson describes the type of decay a radioisotope undergoes. Students solve problems that involve half-life and identify two ways transmutations can occur.	45	Describe the type of decay a radioisotope undergoes Solve problems that involve half- life Identify two ways transmutations can occur
 Quiz: Nuclear Transformations			
 Fission and Fusion of Atomic Nuclei	This lesson describes what happens in a nuclear chain reaction and explains the role of water in the storage of spent fuel rods. Students also distinguish fission reactions from fusion reactions.	45	Describe what happens in a nuclear chain reaction Explain the role of water in the storage of spent fuel rods Distinguish fission reactions from fusion reactions
 Quiz: Fission and Fusion of Atomic Nuclei			
 Radiation in Your Life	In this lesson students identify three devices that are used to detect radiation. The lesson also describes how radioisotopes are used in medicine.	45	Identify three devices that are used to detect radiation Describe how radioisotopes are used in medicine
 Quiz: Radiation in Your Life			
 Posttest 13			

Review Test

Lesson	Description	Time (min)	Objective(s)
 Review Test			

Earth Science

Earth Science A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

Earth Science A is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum, which meets Next Generation Science Standards (NGSS), engages students in problem solving and scientific investigation, and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will learn about natural resources and explore issues surrounding human management of resources. Topics of study include water resources, energy resources, and rock, mineral, and land resources. The student will investigate the impact of resource consumption on humans and the environment. The student will also explore Earth's processes of rock and mineral formation and plate tectonics.

Semester A Outline

1. **Course Overview**

1. Launch into Earth and Space Science

- In this section, you will identify and describe the features of lessons, useful study skills, and how assessments are handled throughout the course.

2. **Astronomy: The Stars**

1. Stars and Constellations

- In this section, you will identify composition and characteristics of stars and explain how astronomers identify and describe constellations.

2. Spectroscopy

- In this section, you will define and differentiate between visible and non-visible light on the electromagnetic spectrum.
- In this section, you will identify how spectroscopy provides information about the composition and properties of objects.

3. Star Types

- In this section, you will classify stars by their physical and chemical properties.
- In this section, you will analyze data from light spectra to classify stars.

4. Star Elements

- In this section, you will define light and heavy elements and explain how they are created within stars.
5. Star Evolution
 - In this section, you will identify, describe, and illustrate the life cycle of a star.
 - In this section, you will investigate the process by which a supernova can lead to the formation of successive generation stars and planets.
 - In this section, you will interpret diagrams of stellar evolution.
 6. Star Comparisons
 - In this section, you will compare the composition, stage of life, size, energy generated, and luminosity of our sun to other stars.
 7. The Stars Unit Review
 - In this section, you will review what you have learned about the stars.
 8. Star Composition Lab
 - In this lab, you will use spectroscopy information to identify elements by their emissions spectra and analyze light spectra of stars to determine star composition.
- 3. Astronomy: The Sun**
1. Sun's Layers
 - In this section, you will identify and describe the layers of the sun.
 - In this section, you will trace the release of energy from the nuclear fusion at the sun's core to space and to Earth.
 2. Sun's Magnetism
 - In this section, you will identify and describe the magnetic properties of the sun, including causes of sunspots, solar flares, and coronal mass ejections.
 3. Solar Weather
 - In this section, you will identify, describe, and evaluate the effect of solar weather on Earth's magnetosphere.
 4. Solar Weather Impact
 - In this lesson, you will learn to predict the potential impact of severe solar weather on Earth's communication systems.
 5. Solar Weather and Climate
 - In this section, you will identify and evaluate the effect of solar weather on climate change.
 6. The Sun Unit Review
 - In this section, you will review what you have learned about the sun.
 7. Solar Weather Preparation
 - In this section, you will learn analyze methods for mitigating potential impacts of severe solar weather.
 8. Solar Weather Preparation Discussion
- 4. Astronomy: Orbital Motion**
1. Aristotle and Ptolemy

- In this section, you will identify and describe Aristotle’s and Ptolemy’s models of the solar system.
2. Copernicus
 - In this section, you will identify and describe Copernicus’s heliocentric model of the solar system and how it was developed.
 - In this section, you will compare the geocentric and heliocentric models of the solar system.
 3. Kepler's Second Law
 - In this section, you will define and describe Kepler’s second law of motion and how it was developed.
 4. Kepler's First and Third Laws
 - In this section, you will identify and explain the development of Kepler’s first law of orbital motion.
 - In this section, you will identify and explain Kepler’s third law of orbital motion.
 5. Universal Gravitation
 - In this section, you will define and explain Newtonian theory of universal gravitation and its development.
 6. Eccentric Orbits
 - In this section, you will identify the eccentricity of orbits of various orbiting bodies.
 7. Orbits of Planetary Bodies
 - In this section, you will learn to apply Kepler’s laws to the solar system.
 - In this section, you will apply the Newtonian theory of universal gravitation to mathematically describe the motion of planets and moons.
 - In this section, you will compare extra-solar planets with planets in our solar system and describe how such planets are detected.
 8. Orbits of Satellites
 - In this section, you will use mathematical computations to show how objects are placed in orbits.
 9. Orbital Motion Unit Review
 - In this section, you will review what you have learned about orbital motion.
 10. Orbital Motion Unit Test

5. Astronomy: Galaxies

1. Nebulae
 - In this section, you will define and describe nebulae and how they form.
 - In this section you will identify types of nebulae based on their characteristics.
2. Galaxy Types
 - In this lesson, you will identify how galaxies are organized and distributed within the universe.
 - In this section, you will differentiate and describe the types of galaxies within the universe.
3. Black Holes

- In this section, you will define black holes and categorize them by size.
 - In this section, you will explain how black holes form.
4. Galaxy Evolution
 - In this section, you will describe the evolution of galaxies.
 5. What's in a Universe?
 - In this section, you will identify and describe composition and characteristics of a universe.
 6. Colliding Galaxies
 - In this section, you will identify and explain the effects of collisions between galaxies
 7. Galaxy Formation
 - In this section, you will identify and compare theories of galaxy formation.
 - In this section, you will investigate the process by which a supernova can lead to the formation of successive generation stars and planets.
 8. Galaxies Unit Review
 - In this section you will review what you have learned about galaxies.
 9. Coloring the Universe Lab
 - In this lab, you will analyze data by color coding images based on light spectra emissions.
- 6. Astronomy: The Universe**
1. Redshift and Blueshift
 - In this section, you will define and explain redshift and blueshift, and how they are applied in astronomy.
 2. Investigating Redshift and Blueshift Lab
 - In this lab, you will analyze light spectra for redshift or blueshift.
 3. Origins of the Universe
 - In this section, you will identify and compare nuclear fission and nuclear fusion.
 - In this section, you will learn about the big bang theory and explore different types of evidence that support it.
 4. Expanding Universe
 - In this section, you will cite evidence of universe expansion to support the big bang theory.
 5. In the Dark
 - In this section, you will define dark matter and describe the observations which led to theories of its existence.
 6. Big Bang Theory
 - In this section, you will relate theories about dark matter and energy to the big bang theory.
 7. The Universe Unit Review
 - In this section you will review what you have learned about the universe and its origins.
 8. The Universe Unit Test

1. The Composition of Earth's Layers

- In this section, you will learn how to identify the layers of Earth.
- In this section, you will learn how to describe the traits and composition of Earth's layers.

2. Determining Earth's Interior Structure

- In this section, you will learn to explain how scientists determine the structure and composition of Earth.

3. Rock Types and Cycle

- In this section, you will classify rock as one of three major types (metamorphic, sedimentary, and igneous) and identify characteristics of each type.
- In this section, you will investigate the causes and history of sea-level changes that have resulted in transgressive and regressive sedimentary rock sequences.
- In this section, you will examine how to interpret and complete diagrams of the rock cycle.

4. Minerals

- In this section, you will learn how to identify properties of minerals used in mineral identification.

5. Age of Rock

- In this section, you will identify methods scientists use to determine the age of crustal rock.

6. Rocks Unit Review

- In this section, you will review what you have learned about rocks.

7. Geologic Age Lab

- In this section, you will explain how scientists use understanding of half-life of isotopes to determine the geologic age of rocks.
- In this section, you will communicate valid conclusions supported by data using several formats, including data tables, a line graph, data analysis, and your conclusion.

8. Earth's Processes: Tectonic Plates

1. Plate Tectonic Theory

- In this section, you will identify and describe how the theory of plate tectonics developed.
- In this section, you will analyze changes in continental plate configurations, such as Pangaea, for their impact on the biosphere, atmosphere, and hydrosphere through time.
- In this section, you will evaluate the role of plate tectonics with respect to long-term global changes in Earth's subsystems such as continental buildup, glaciation, sea level fluctuations, mass extinctions, and climate change.

2. Fossils and Plate Tectonics

- In this section you will identify and describe fossil evidence supporting continental drift and the later theory of plate tectonics.
- In this section, you will analyze changes in continental plate configurations, such as Pangaea, for their impact on the biosphere, atmosphere and hydrosphere through time.
- In this section, you will evaluate the role of plate tectonics with respect to long-term global changes in Earth's subsystems such as continental buildup, glaciation, sea level fluctuations, mass extinctions, and climate change.

3. Magnetism and Plate Tectonics

- In this section, you will identify and describe paleomagnetic evidence to support the theory of plate tectonics.
- In this section, you will analyze changes in continental plate configurations, such as Pangaea, for their impact on the biosphere, atmosphere and hydrosphere through time.
- In this section, you will evaluate the role of plate tectonics with respect to long-term global changes in Earth's subsystems such as continental buildup, glaciation, sea level fluctuations, mass extinctions, and climate change.

4. Age of Rock and Plate Tectonics

- In this section, you will analyze data about the age of crustal rock to further support the theory of plate tectonics.
- In this section, you will analyze changes in continental plate configurations, such as Pangaea, for their impact on the biosphere, atmosphere, and hydrosphere through time.
- In this section, you will evaluate the role of plate tectonics with respect to long-term global changes in Earth's subsystems such as continental buildup, glaciation, sea level fluctuations, mass extinctions, and climate change.

5. Investigating Thermal Convection Lab

- In this section, you will develop a model to describe the cycling of matter through thermal convection.

6. Volcanoes

- In this section, you will identify and describe the different types of volcanoes.

7. Plates and Volcanoes

- In this section, you will identify and describe the relationship between the movement of Earth's plates and the locations and types of volcanoes.
- In this section, you will analyze changes in continental plate configurations, such as Pangaea, for their impact on the biosphere, atmosphere and hydrosphere through time.
- In this section, you will evaluate the role of plate tectonics with respect to long-term global changes in Earth's subsystems such as continental buildup, glaciation, sea level fluctuations, mass extinctions, and climate change.

8. Plates and Earthquakes

- In this section, you identify and describe the relationship between the movement of Earth's plates and the location and severity of earthquakes.
- In this section, you will analyze changes in continental plate configurations, such as Pangaea, for their impact on the biosphere, atmosphere and hydrosphere through time.
- In this section, you will evaluate the role of plate tectonics with respect to long-term global changes in Earth's subsystems such as continental buildup, glaciation, sea level fluctuations, mass extinctions, and climate change.

9. Tectonic Plates Unit Review

- In this section, you will review what you have learned about tectonic plates.

10. Tectonic Plates Unit Test

9. Earth's Processes: Weathering and Erosion

1. Weathering

- In this section you will categorize examples of weathering as either chemical or physical.
 - In this section, you will identify and explain the role of water in physical weathering of rock.
2. Physical Weathering, Erosion, and Water Lab
 - In this section, you will conduct an investigation in order to describe how volume and speed of water flow affect the size, shape, and flow of streams and rivers. You will draw conclusions about how Earth's materials and its surface interact with the flow of water.
 - In this section, you will use empirical evidence, logical reasoning, and experimental and observational testing to analyze, evaluate, and critique the scientific explanation of weathering, erosion, and water.
 3. Chemical Weathering and Water
 - In this section, you will identify and explain the role of water in the chemical weathering of rock.
 4. Weathering and Erosion Impact
 - In this section, you will identify and describe how weathering and erosion act to redistribute earth materials over geologic time.
 5. Geologic Time
 - In this section, you will identify geologic time periods and the characteristics that define each one.
 - In this section, you will trace the relationship between the development of photosynthetic life, changes in the composition of Earth's atmosphere, and subsequent development of animal life.
 6. Life on Land
 - In this section, you will trace the relationship between the development of microbial life, soil formation, and the subsequent development of land plants.
 7. Evolution of New Life
 - In this section, you will trace the relationship between the evolution of corals creating reef, alterations of patterns of erosion and deposition along coastlines, and the evolution of new life forms.
 8. Weathering and Erosion Unit Review
 - In this section, you will review what you have learned about history, weathering, and erosion.
 9. Weathering and Erosion Unit Test
10. Semester Review
 1. Semester A Review
 - In this section, you will review what you have learned about Earth's processes of weathering and erosion, and of climate and weather, as well as astronomy topics.
 2. Semester A Test

Semester B Summary:

Earth Science B is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum, which meets Next Generation Science Standards (NGSS), engages students in

problem solving and scientific investigation, and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will learn about space sciences, including topics like the sun and stars, orbital motion, galaxies, and the universe. The student will also explore Earth's processes involving the atmosphere, hydrosphere, and geosphere. Topics of study include meteorology and geologic history.

Semester B Outline

1. Course Overview

1. Launch into Earth and Space Science

- In this section, you will identify and describe the features of lessons, useful study skills, and how assessments are handled throughout the course.

2. Earth's Processes: Climate and Weather

1. The Atmosphere

- In this section, you will identify the layers and composition of the atmosphere.
- In this section, you will identify and describe the role of the atmosphere in reflection, absorption, storage, and redistribution of the electromagnetic energy from the sun, impacting weather and climate.

2. Continents and Climate

- In this section, you will identify and describe the role of continental land masses in reflection, absorption, storage, and redistribution of the electromagnetic energy from the sun, impacting weather and climate.

3. Oceans and Climate

- In this section, you will identify and describe the role of the ocean in reflection, absorption, storage, and redistribution of the electromagnetic energy from the sun, impacting weather and climate.

4. Ocean Currents

- In this section, you will identify and analyze ways that the ocean moves heat and water through currents, affecting climate and weather.

5. Air Pressure and Weather

- In this section, you will infer how variations in air pressure create weather.

6. Climate Systems

- In this section, you will use a model to describe how variations in the flow of energy into and out of Earth's systems result in changes in climate.

7. Weather Modeling

- In this section, you will compare European and American weather modeling in order to correlate multiple interpretations of weather data.

8. Climate and Weather Unit Review

- In this section, you will review what you have learned about climate and weather.

9. Virtual Meteorologist Lab

- In this section, you will play the role of a meteorologist. You will collect and analyze data to make predictions about weather.

3. Earth's Processes: Climate Change

1. Carbon Cycle and the Ocean

- In this section, you will explain and model the carbon cycle.
- In this section, you will identify and describe, using evidence, the ocean's influence on climate change.

2. Climate Change Over Time

- In this section, you will categorize natural causes of climate change by the timescale over which they occurred.

3. Climate Change Tests

- In this section, you will identify scientific tests and tools used to measure climate changes throughout Earth's history.

4. Atmosphere and Climate Change

- In this section, you will identify and use examples to explain that the composition of the atmosphere has a significant influence on climate change.

5. Greenhouse Gases and Ozone

- In this section, you will define greenhouse gases and identify sources.
- In this section, you will define ozone and describe the distribution of ozone in the atmosphere.

6. Carbon Cycle Changes Lab

- In this section, you will compare and contrast carbon loads within the carbon cycle from pre-Industrial Revolution to today.

7. Fossil Fuels and Climate Change

- In this section, you will identify and analyze how burning fossil fuels affects atmosphere composition and influences climate change.

8. Industry and Climate Change

- In this section, you will identify and analyze how farming and industry affect atmosphere composition and influence climate change.

9. Impacts of Climate Change

- In this section, you will identify and analyze impacts of climate change in the current century.

10. Climate Change Unit Review

- In this section you will review what you have learned about causes and impacts of climate change.

11. Climate Change Unit Test

4. Natural Resources: Rocks and Minerals

1. Rocks and Mineral Properties

- In this section, you will identify properties of rocks and minerals.
- In this section, you will examine how rock and mineral types and properties influence human activity.

2. Rock and Mineral Properties Lab

- In this section, you will evaluate the use of mineral resources based on their properties.

3. Mining Methods

- In this section, you will compare and contrast the environmental impacts of deep mining methods and surface mining methods.

4. Land Reclamation

- In this section, you will analyze land reclamation as mitigation of the environmental impact of surface mining.

5. Health and Safety of Mining Methods

- In this section, you will compare and contrast the health and safety of different mining methodologies.
- In this section, you will analyze, evaluate, and make inferences from data.

6. Metal Resources

- In this section, you will compare and contrast the location and accessibility of various metal ores.
- In this section, you will identify current availability and use rates of a metal resource and analyze its future availability, sustainability, and management.
- In this section, you will discriminate between renewable and nonrenewable resources based upon their rate of formation and use.

7. Impacts of Metal Resources

- In this section, you will compare and contrast environmental impact and cost-benefit considerations of various methods for extracting metal resources.
- In this section, you will demonstrate an understanding of the proper disposal or recycling of materials.

8. Metals and Minerals in Smart Devices I

- In this section, you will identify mineral and metal resources, the availability of those resources, and the impact those resources have on human activity today.
- In this section, you will evaluate the environmental costs of resource extraction for key resources used in technological devices

9. Metals and Minerals in Smart Devices II

- In this section, you will evaluate the human costs of resource extraction for key resources used in technological devices.

10. Rocks and Minerals Unit Review

- In this section, you will review what you have learned about rocks and minerals as natural resources.

11. Supply Chain Responsibility

- In this section, you will evaluate a large company's responsibility for supply line conditions, both human and environmental, involving rock and mineral resources.
- In this section, you will draw inferences based on data related to promotional materials for products and services.

12. Supply Chain Responsibility Discussion

5. Natural Resources: Land Resources

1. Changing Shorelines

- In this section, you will identify several causes and effects of beach erosion and shifting shorelines.

2. Shoreline Management Strategies

- In this section, you will compare and contrast different strategies employed to manage beach erosion and shifting shorelines.

3. Analyzing Shoreline Management Effectiveness

- In this section, you will analyze the long-term effectiveness of beach nourishment as a means of managing beach erosion and project future needs for shoreline management.

4. Farming Land Use

- In this section, you will identify and categorize various sustainable farming practices by climate region.
- In this section, you will demonstrate an understanding of the use and conservation of resources.

5. Sustainable Farming Practices

- In this section, you will analyze the costs and benefits of sustainable farming practices for a particular climate region.

6. Soil Testing Lab

- In this section, you will collect, organize, and analyze data about soil to make decisions about soil additives to produce the highest yield and lowest environmental impact for agricultural crops.

7. Urban Greeting

- In this section, you will identify some benefits and challenges of green spaces in an urban environment.
- In this section, you will evaluate a land management practice intended to address urban greening.

8. Flooding Impacts

- In this section, you will identify and describe the socioeconomic and environmental impacts of floods.

9. Flood Mitigation Options

- In this section, you will identify and describe some of the flood mitigation techniques used in different areas.

10. Flood Mitigation Management

- In this section, you will analyze the costs and benefits of flood mitigation options for specific sites.

11. Land Resources Unit Review

- In this section, you will review what you have learned about land resources.

12. Land Resources Unit Test

6. Natural Resources: Energy Resources

1. Fossil Fuels

- In this section, you will define fossil fuels and identify the steps in their formation.

- In this section, you will identify the steps in processing coal, crude oil, and natural gas into usable fuel.
2. Extraction and Processing of Fossil Fuels
 - In this section, you will compare and contrast the environmental impacts of acquiring and processing natural gas, oil, and coal.
 3. Virtual Fracking Lab
 - In this section, you will analyze the best of three sites for fracking based on potential output and environmental impacts.
 - In this section, you will communicate and apply scientific information from various sources.
 - In this section, you will communicate valid conclusions supported by data.
 4. Impacts of Fossil Fuels
 - In this section, you will identify how the use of fossil fuels impacts the atmosphere.
 - In this section, you will infer how the impact of fossil fuels on the atmosphere also impacts the hydrosphere (including the cryosphere) and the biosphere.
 5. Fossil Fuels and Humans
 - In this section, you will identify and explain, citing evidence, how the availability of fossil fuels has influenced human activity.
 6. Alternative Energy Resources
 - In this section, you will identify and describe benefits and challenges of major alternative energy resources.
 7. Alternative Energy Solutions
 - In this section, you will use cost-benefit ratios to evaluate competing design solutions for the development and use of alternative energy resources.
 8. Energy Resources Unit Review
 - In this section, you will review what you have learned about energy resources.
 9. Wind Turbine Development Lab
 - In this section, you will develop and investigate wind turbine rotor designs to determine which produces the most energy at given wind speeds.
 - In this section, you will communicate valid conclusions supported by data.

7. Natural Resources: Water as a Resource

1. Water as a Resource
 - In this section, you will identify and explain the relationship between water, food, and energy.
2. Availability of Water
 - In this section, you will identify how geography and weather affect the availability of water.
 - In this section, you will examine the relationship and the impact of population growth on water supplies.
3. Water and Climate Change
 - In this section, you will investigate the impact of climate change on water resources.
4. Human Activity and Water

- In this section, you will examine how the availability of water influences human activity.
5. Water Resources Controversies
 - In this section, you will identify and describe controversies over water usage in the United States.
 6. Global Water Rights
 - In this section, you will identify and describe water rights issues around the globe.
 7. Agriculture, Industry, and Water Resources
 - In this section, you will relate the effects of industrial water usage to the availability and quality of water.
 - In this section, you will relate the effects of agricultural use of water on the availability and quality of water.
 8. Water as a Resource Unit Review
 - In this section, you will review what you have learned about water as a resource.
 9. Water as a Resource Unit Test

8. Water Quality and Conservation

1. Water Pollution
 - In this section, you will describe the causes and effects of water pollution.
2. Clean Water Regulations
 - In this section, you will identify and evaluate the environmental and economic impacts of clean water regulations.
3. Investigating Water Quality Lab
 - In this section, you will organize and analyze data to draw conclusions and make predictions about the water quality impact on biodiversity in three major bodies of water: the Gulf of Mexico, the Chesapeake Bay, and the Great Lakes.
 - In this section, you will evaluate the impact of research on scientific thought, society, and public policy.
4. Water Filtration
 - In this section, you will identify, describe, and evaluate different methods of water filtration used locally and globally.
5. Flint's Water Crisis
 - In this section, you will identify and describe the failure of the Flint, Michigan water filtration system and its impact.
6. Household Water Use
 - In this section, you will identify and evaluate household water conservation technologies.
7. Aquaponics
 - In this section, you will evaluate long term and short term impacts of aquaponics on natural resources and humans.
8. Career Profile: Hydrology
 - In this section, you will explain the work and impact of scientists in the field of hydrology.
9. Water Quality and Conservation Unit Review

- In this section, you will review what you have learned about water quality and conservation.

10. Water Quality and Conservation Unit Test

9. **Semester Review**

1. Semester Review

- In this section, you will review what you have learned about Earth's processes in the geosphere and about natural resources.

2. Semester B Test

Earth Science Honors

Earth Science Honors A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

Honors Earth Science A is designed to give the student a strong basis for understanding the world. This course is also designed to prepare the student to confidently enter and complete college-level Earth Science courses. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum, which meets Next Generation Science Standards (NGSS), engages students in problem solving and scientific investigation, and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will learn about natural resources and explore issues surrounding human management of resources. Topics of study include water resources, energy resources, and rock, mineral, and land resources. The student will investigate the impact of resource consumption on humans and the environment. The student will also explore Earth's processes of rock and mineral formation and plate tectonics.

In the honors-level course, the student will have opportunities to delve further into some topics and engage with enhanced assessments.

Semester A Outline

1. Course Overview

1. Launch into Earth and Space Science

- In this section, you will identify and describe the features of lessons, useful study skills, and how assessments are handled throughout the course

2. Astronomy: The Stars

1. Stars and Constellations

- In this section, you will identify composition and characteristics of stars and explain how astronomers identify and describe constellations.

2. Spectroscopy

- In this section, you will define and differentiate between visible and non-visible light on the electromagnetic spectrum.
- In this section, you will identify how spectroscopy provides information about the composition and properties of objects.

3. Star Types

- In this section, you will classify stars by their physical and chemical properties.

- In this section, you will analyze data from light spectra to classify stars.

4. Star Elements

- In this section, you will define light and heavy elements and explain how they are created within stars.

5. Star Evolution

- In this section, you will identify, describe, and illustrate the life cycle of a star.
- In this section, you will investigate the process by which a supernova can lead to the formation of successive generation stars and planets.
- In this section, you will interpret diagrams of stellar evolution.

6. Star Comparisons

- In this section, you will compare the composition, stage of life, size, energy generated, and luminosity of our sun to other stars.

7. The Stars Unit Review

- In this section, you will review what you have learned about the stars.

8. Star Composition Lab

- In this lab, you will use spectroscopy information to identify elements by their emissions spectra and analyze light spectra of stars to determine star composition.

3. **Astronomy: The Sun**

1. Sun's Layers

- In this section, you will identify and describe the layers of the sun.
- In this section, you will trace the release of energy from the nuclear fusion at the sun's core to space and to Earth.

2. Sun's Magnetism

- In this section, you will identify and describe the magnetic properties of the sun, including causes of sunspots, solar flares, and coronal mass ejections.

3. Solar Weather

- In this section, you will identify, describe, and evaluate the effect of solar weather on Earth's magnetosphere.

4. Solar Weather Impact

- In this lesson, you will learn to predict the potential impact of severe solar weather on Earth's communication systems.

5. Solar Weather and Climate

- In this section, you will identify and evaluate the effect of solar weather on climate change.

6. The Sun Unit Review

- In this section, you will review what you have learned about the sun.

7. Solar Weather Preparation

- In this section, you will learn analyze methods for mitigating potential impacts of severe solar weather.

8. Solar Weather Preparation Discussion

4. **Astronomy: Orbital Motion**

1. Aristotle and Ptolemy
 - In this section, you will identify and describe Aristotle's and Ptolemy's models of the solar system.
2. Copernicus
 - In this section, you will identify and describe Copernicus's heliocentric model of the solar system and how it was developed.
 - In this section, you will compare the geocentric and heliocentric models of the solar system.
3. Kepler's Second Law
 - In this section, you will define and describe Kepler's second law of motion and how it was developed.
4. Kepler's First and Third Laws
 - In this section, you will identify and explain the development of Kepler's first law of orbital motion.
 - In this section, you will identify and explain Kepler's third law of orbital motion.
5. Universal Gravitation
 - In this section, you will define and explain Newtonian theory of universal gravitation and its development.
6. Eccentric Orbits
 - In this section, you will identify the eccentricity of orbits of various orbiting bodies.
7. Orbits of Planetary Bodies
 - In this section, you will learn to apply Kepler's laws to the solar system.
 - In this section, you will apply the Newtonian theory of universal gravitation to mathematically describe the motion of planets and moons.
 - In this section, you will compare extra-solar planets with planets in our solar system and describe how such planets are detected.
8. Orbits of Satellites
9. Orbital Motion Unit Review
 - In this section, you will review what you have learned about orbital motion.
10. Orbital Motion Unit Test.

5. Astronomy: Galaxies

1. Nebulae
 - In this section, you will define and describe nebulae and how they form.
 - In this section you will identify types of nebulae based on their characteristics.
2. Galaxy Types
 - In this lesson, you will identify how galaxies are organized and distributed within the universe.
 - In this section, you will differentiate and describe the types of galaxies within the universe
3. Black Holes
 - In this section, you will define black holes and categorize them by size.
 - In this section, you will explain how black holes form.

4. Galaxy Evolution
 - In this section, you will describe the evolution of galaxies.
5. What's in a Universe?
 - In this section, you will identify and describe composition and characteristics of a universe.
6. Colliding Galaxies
 - In this section, you will identify and explain the effects of collisions between galaxies.
7. Galaxy Formation
 - In this section, you will identify and compare theories of galaxy formation.
8. Galaxies Unit Review
 - In this section you will review what you have learned about galaxies.
9. Coloring the Universe Lab
 - In this lab, you will analyze data by color coding images based on light spectra emissions.

6. Astronomy: The Universe

1. Redshift and Blueshift
 - In this section, you will define and explain redshift and blueshift, and how they are applied in astronomy.
2. Investigating Redshift and Blueshift Lab
 - In this lab, you will analyze light spectra for redshift or blueshift.
3. Origins of the Universe
 - In this section, you will identify and compare nuclear fission and nuclear fusion.
 - In this section, you will learn about the big bang theory and explore different types of evidence that support it.
4. Expanding Universe
 - In this section, you will cite evidence of universe expansion to support the big bang theory.
5. In the Dark
 - In this section, you will define dark matter and describe the observations which led to theories of its existence.
6. Big Bang Theory
 - In this section, you will relate theories about dark matter and energy to the big bang theory.
7. The Universe Unit Review
 - In this section you will review what you have learned about the universe and its origins.
8. The Universe Unit Test.

7. Earth's Processes: Rocks

1. The Composition of Earth's Layers
 - In this section, you will learn how to identify the layers of Earth.
 - In this section, you will learn how to describe the traits and composition of Earth's layers.
2. Determining Earth's Interior Structure
 - In this section, you will learn to explain how scientists determine the structure and

composition of Earth.

3. Rock Types and Cycle

- In this section, you will classify rock as one of three major types (metamorphic, sedimentary, and igneous) and identify characteristics of each type.
- In this section, you will investigate the causes and history of sea-level changes that have resulted in transgressive and regressive sedimentary rock sequences.
- In this section, you will examine how to interpret and complete diagrams of the rock cycle.

4. Minerals

- In this section, you will learn how to identify properties of minerals used in mineral identification.

5. Age of Rock

- In this section, you will identify methods scientists use to determine the age of crustal rock.

6. Rocks Unit Review

- In this section, you will review what you have learned about rocks.

7. Geologic Age Lab

- In this section, you will explain how scientists use understanding of half-life of isotopes to determine the geologic age of rocks.
- In this section, you will communicate valid conclusions supported by data using several formats, including data tables, a line graph, data analysis, and your conclusion.

8. Earth's Processes: Tectonic Plates

1. Plate Tectonic Theory

- In this section, you will identify and describe how the theory of plate tectonics developed.
- In this section, you will analyze changes in continental plate configurations, such as Pangaea, for their impact on the biosphere, atmosphere, and hydrosphere through time
- In this section, you will evaluate the role of plate tectonics with respect to long-term global changes in Earth's subsystems such as continental buildup, glaciation, sea level fluctuations, mass extinctions, and climate change.

2. Fossils and Plate Tectonics

- In this section, you will identify and describe fossil evidence supporting continental drift and the later theory of plate tectonics.

3. Magnetism and Plate Tectonics

- In this section, you will identify and describe paleomagnetic evidence to support the theory of plate tectonics.

4. Age of Rock and Plate Tectonics

- In this section, you will analyze data about the age of crustal rock to further support the theory of plate tectonics.
- In this section, you will analyze changes in continental plate configurations, such as Pangaea, for their impact on the biosphere, atmosphere, and hydrosphere through time.
- In this section, you will evaluate the role of plate tectonics with respect to long-term global changes in Earth's subsystems such as continental buildup, glaciation, sea level fluctuations, mass extinctions, and climate change.

5. Investigating Thermal Convection Lab

- In this section, you will develop a model to describe the cycling of matter through thermal convection.
6. Volcanoes
 - In this section, you will identify and describe the different types of volcanoes.
 7. Plates and Volcanoes
 - In this section, you will identify and describe the relationship between the movement of Earth's plates and the locations and types of volcanoes.
 8. Plates and Earthquakes
 - In this section, you identify and describe the relationship between the movement of Earth's plates and the location and severity of earthquakes.
 9. Tectonic Plates Unit Review
 - In this section, you will review what you have learned about tectonic plates.
 10. Tectonic Plates Unit Test.

9. Earth's Processes: Weathering and Erosion

1. Weathering
 - In this section you will categorize examples of weathering as either chemical or physical.
 - In this section, you will identify and explain the role of water in physical weathering of rock.
2. Physical Weathering, Erosion, and Water Lab
 - In this section, you will conduct an investigation in order to describe how volume and speed of water flow affect the size, shape, and flow of streams and rivers. You will draw conclusions about how Earth's materials and its surface interact with the flow of water.
 - In this section, you will use empirical evidence, logical reasoning, and experimental and observational testing to analyze, evaluate, and critique the scientific explanation of weathering, erosion, and water.
3. Chemical Weathering and Water
 - In this section, you will identify and explain the role of water in the chemical weathering of rock.
4. Weathering and Erosion Impact
 - In this section, you will identify and describe how weathering and erosion act to redistribute earth materials over geologic time.
5. Geologic Time
 - In this section, you will identify geologic time periods and the characteristics that define each one.
 - In this section, you will trace the relationship between the development of photosynthetic life, changes in the composition of Earth's atmosphere, and subsequent development of animal life.
6. Life on Land
 - In this section, you will trace the relationship between the development of microbial life, soil formation, and the subsequent development of land plants.
7. Evolution of New Life
 - In this section, you will trace the relationship between the evolution of corals creating reef, alterations of patterns of erosion and deposition along coastlines, and the evolution of new life

forms.

8. Weathering and Erosion Unit Review

- In this section, you will review what you have learned about history, weathering, and erosion.

9. Weathering and Erosion Unit Test.

10. Semester Review

1. Semester A Review

- In this section, you will review what you have learned about Earth's processes of weathering and erosion, and of climate and weather, as well as astronomy topics.

2. Semester A Test

Semester B Summary:

Honors Earth Science B is designed to give the student a strong basis for understanding the world. This course is also designed to prepare the student to confidently enter and complete college-level Earth Science courses. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum, which meets Next Generation Science Standards (NGSS), engages students in problem solving and scientific investigation, and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will learn about space sciences, including topics like the sun and stars, orbital motion, galaxies, and the universe. The student will also explore Earth's processes involving the atmosphere, hydrosphere, and geosphere. Topics of study include meteorology and geologic history.

In the honors-level course, the student will have opportunities to delve further into some topics and engage with enhanced assessments.

Semester B Outline

1. Course Overview

1. Launch Into Earth and Space Science

- In this section, you will identify and describe the features of lessons, useful study skills, and how assessments are handled throughout the course.

2. Earth's Processes: Climate and Weather

1. The Atmosphere

- In this section, you will identify the layers and composition of the atmosphere.
- In this section, you will identify and describe the role of the atmosphere in reflection, absorption, storage, and redistribution of the electromagnetic energy from the sun, impacting weather and climate.

2. Continents and Climate

- In this section, you will identify and describe the role of continental land masses in reflection, absorption, storage, and redistribution of the electromagnetic energy from the sun, impacting weather and climate.

3. Oceans and Climate

- In this section, you will identify and describe the role of the ocean in reflection, absorption, storage, and redistribution of the electromagnetic energy from the sun, impacting weather and climate.

4. Ocean Currents

- In this section, you will identify and analyze ways that the ocean moves heat and water through currents, affecting climate and weather.
5. Air Pressure and Weather
 - In this section, you will infer how variations in air pressure create weather.
 6. Climate Systems
 - In this section, you will use a model to describe how variations in the flow of energy into and out of Earth's systems result in changes in climate.
 7. Weather Modeling
 - In this section, you will compare European and American weather modeling in order to correlate multiple interpretations of weather data.
 8. Climate and Weather Unit Review
 - In this section, you will review what you have learned about climate and weather.
 9. Virtual Meteorologist Lab
 - In this section, you will play the role of a meteorologist. You will collect and analyze data to make predictions about weather.
- 3. Earth's Processes: Climate Change**
1. Carbon Cycle and the Ocean
 - In this section, you will explain and model the carbon cycle.
 - In this section, you will identify and describe, using evidence, the ocean's influence on climate change.
 2. Climate Change Over Time
 - In this section, you will categorize natural causes of climate change by the timescale over which they occurred.
 3. Climate Change Tests
 - In this section, you will identify scientific tests and tools used to measure climate changes throughout Earth's history.
 4. Atmosphere and Climate Change
 - In this section, you will identify and use examples to explain that the composition of the atmosphere has a significant influence on climate change.
 5. Greenhouse Gases and Ozone
 - In this section, you will define greenhouse gases and identify sources.
 - In this section, you will define ozone and describe the distribution of ozone in the atmosphere
 6. Carbon Cycle Changes Lab
 - In this section, you will compare and contrast carbon loads within the carbon cycle from pre-Industrial Revolution to today.
 7. Fossil Fuels and Climate Change
 - In this section, you will identify and analyze how burning fossil fuels affects atmosphere composition and influences climate change.
 8. Industry and Climate Change
 - In this section, you will identify and analyze how farming and industry affect atmosphere composition and influence climate change.

9. Impacts of Climate Change

- In this section, you will identify and analyze impacts of climate change in the current century.

10. Climate Change Unit Review

- In this section you will review what you have learned about causes and impacts of climate change.

11. Climate Change Unit Test.

4. **Natural Resources: Rocks and Minerals**

1. Rock and Mineral Properties

- In this section, you will identify properties of rocks and minerals.
- In this section, you will examine how rock and mineral types and properties influence human activity.

2. Rock and Mineral Properties Lab

- In this section, you will evaluate the use of mineral resources based on their properties.

3. Mining Methods

- In this section, you will compare and contrast the environmental impacts of deep mining methods and surface mining methods.

4. Land Reclamation

- In this section, you will analyze land reclamation as mitigation of the environmental impact of surface mining.

5. Health and Safety of Mining Methods

- In this section, you will compare and contrast the health and safety of different mining methodologies.
- In this section, you will analyze, evaluate, and make inferences from data.

6. Metal Resources

- In this section, you will compare and contrast the location and accessibility of various metal ores.
- In this section, you will identify current availability and use rates of a metal resource and analyze its future availability, sustainability, and management.
- In this section, you will discriminate between renewable and nonrenewable resources based upon their rate of formation and use

7. Impacts of Metal Resources

- In this section, you will compare and contrast the environmental impact and cost-benefit considerations of various methods for extracting metal resources.

8. Metals and Minerals in Smart Devices I

- In this section, you will identify mineral and metal resources, the availability of those resources, and the impact those resources have on human activity today.
- In this section, you will evaluate the environmental costs of resource extraction for key resources used in technological devices.

9. Metals and Minerals in Smart Devices II

- In this section, you will evaluate the human costs of resource extraction for key resources used in technological devices.

10. Rocks and Minerals Unit Review

- In this section, you will review what you have learned about rocks and minerals as natural resources.

11. Supply Chain Responsibility

- In this section, you will evaluate a large company's responsibility for supply line conditions, both human and environmental, involving rock and mineral resources.
- In this section, you will draw inferences based on data related to promotional materials for products and services.

12. Supply Chain Responsibility Discussion

5. Natural Resources: Land Resources

1. Changing Shorelines

- In this section, you will identify several causes and effects of beach erosion and shifting shorelines.

2. Shoreline Management Strategies

- In this section, you will compare and contrast different strategies employed to manage beach erosion and shifting shorelines.

3. Analyzing Shoreline Management Effectiveness

- In this section, you will analyze the long term effectiveness of beach nourishment as a means of managing beach erosion.

4. Farming Land Use

- In this section, you will identify and categorize various sustainable farming practices by climate region.
- In this section, you will demonstrate an understanding of the use and conservation of resources.

5. Sustainable Farming Practices

- In this section, you will analyze the costs and benefits of sustainable farming practices for a particular climate region.

6. Soil Testing Lab

- In this section, you will collect, organize, and analyze data about soil to make decisions about soil additives to produce the highest yield and lowest environmental impact for agricultural crops.

7. Urban Greening

- In this section, you will identify some benefits and challenges of green spaces in an urban environment.
- In this section, you will evaluate a land management practice intended to address urban greening.

8. Flooding Impacts

- In this section, you will identify and describe the socioeconomic and environmental impacts of floods.

9. Flood Mitigation Options

- In this section, you will identify and describe some of the flood mitigation techniques used in different areas.

10. Flood Mitigation Management

- In this section, you will analyze the costs and benefits of flood mitigation options for specific sites.

11. Land Resource Unit Review

- In this section, you will review what you have learned about land resources.

12. Land Resources Unit Test.

6. **Natural Resources: Energy Resources**

1. Fossil Fuels

- In this section, you will define fossil fuels and identify the steps in their formation.
- In this section, you will identify the steps in processing coal, crude oil, and natural gas into usable fuel.

2. Extraction and Processing of Fossil Fuels

- In this section, you will compare and contrast the environmental impacts of acquiring and processing natural gas, oil, and coal.

3. Virtual Fracking Lab

- In this section, you will analyze the best of three sites for fracking based on potential output and environmental impacts.
- In this section, you will communicate and apply scientific information from various sources.
- In this section, you will communicate valid conclusions supported by data.

4. Impacts of Fossil Fuels

- In this section, you will identify how the use of fossil fuels impacts the atmosphere.
- In this section, you will infer how the impact of fossil fuels on the atmosphere also impacts the hydrosphere (including the cryosphere) and the biosphere.

5. Fossil Fuels and Humans

- In this section, you will identify and explain, citing evidence, how the availability of fossil fuels has influenced human activity.

6. Alternative Energy Resources

- In this section, you will identify and describe benefits and challenges of major alternative energy resources.

7. Alternative Energy Solutions

- In this section, you will use cost-benefit ratios to evaluate competing design solutions for the development and use of alternative energy resources.

8. Energy Resource Unit Review

- In this section, you will review what you have learned about energy resources.

9. Wind Turbine Development Lab

- In this section, you will develop and investigate wind turbine rotor designs to determine which produces the most energy at given wind speeds.
- In this section, you will communicate valid conclusions supported by data

7. **Natural Resources: Water as a Resource**

1. Water as a Resource

- In this section, you will identify and explain the relationship between water, food, and energy.

2. Availability of Water

- In this section, you will identify how geography and weather affect the availability of water.
- In this section, you will examine the relationship and the impact of population growth on water supplies.

3. Water and Climate Change

- In this section, you will investigate the impact of climate change on water resources.

4. Human Activity and Water

- In this section, you will examine how the availability of water influences human activity.

5. Water Resource Controversies

- In this section, you will identify and describe controversies over water usage in the United States.

6. Global Water Rights

- In this section, you will identify and describe water rights issues around the globe.

7. Agriculture, Industry, and Water Resources

In this section, you will relate the effects of industrial water usage to the availability and quality of water.

8. Water as a Resource Unit Review

- In this section, you will review what you have learned about water as a resource.

9. Water as a Resource Unit Test.

8. Natural Resources: Water Quality and Conservation

1. Water Pollution

- In this section, you will describe the causes and effects of water pollution.

2. Clean Water Regulations

- In this section, you will identify and evaluate the environmental and economic impacts of clean water regulations.

3. Investigating Water Quality Lab

- In this section, you will organize and analyze data to draw conclusions and make predictions about the water quality impact on biodiversity in three major bodies of water: the Gulf of Mexico, the Chesapeake Bay, and the Great Lakes.
- In this section, you will evaluate the impact of research on scientific thought, society, and public policy.

4. Water Filtration

- In this section, you will identify, describe, and evaluate different methods of water filtration used locally and globally.

5. Flint's Water Crisis

- In this section, you will identify and describe the failure of the Flint, Michigan water filtration system and its impact.

6. Household Water Use

- In this section, you will identify and evaluate household water conservation technologies.

7. Aquaponics

- In this section, you will evaluate long term and short term impacts of aquaponics on natural resources and humans.

8. Career Profile: Hydrology

- In this section, you will explain the work and impact of scientists in the field of hydrology

9. Water Quality and Conservation Unit Review

- In this section, you will review what you have learned about water quality and conservation.

10. Water Quality and Conservation Unit Test.

9. Semester Review

1. Semester B Review

- In this section, you will review what you have learned about Earth's processes in the geosphere and about natural resources.

2. Semester B Test

Earth Science (Prescriptive)

Earth Science A/B Prescriptive

Time Allocations

Each lesson in the Course Outline provides an estimated time to complete.

Instructional Activities

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary

Prescriptive courses are designed as credit recovery for students. Teachers will work with students to identify the content students have not mastered. Students will only complete those lessons or units within the course. This will ensure that students have mastered all standards for graduation requirements.

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Introduction to Earth Science

Lesson	Description	Time (min)	Objective(s)
 What Is Earth Science?	This lesson provides an overview of Earth science and describes how Earth and the solar system were formed.	45	Define the terms hypothesis and theory Describe Earth science Describe the formation of Earth and the solar system Understand the limitations of science
 Quiz: What Is Earth Science?			
 A View of Earth	In this lesson, students identify the four major spheres on Earth and what differentiates them.	45	Describe Earth's four major spheres State the value of the theory of plate tectonics to Earth science Describe groundwater movements
 Quiz: A View of Earth			

Lesson	Description	Time (min)	Objective(s)
 Representing Earth's Surface	In this lesson, students learn about the importance of maps, the different types of maps, and what each type of map is used for.	45	<p>Locate points on Earth's surface by their latitude and longitude</p> <p>Describe the advantages and disadvantages of different types of maps</p> <p>Explain what makes topographic maps different from other maps</p> <p>Describe how technology provides the ability to more precisely analyze Earth's physical properties</p>
 Quiz: Representing Earth's Surface			
 Earth System Science	This lesson shows how Earth is comprised of many interactive systems and presents some ways that people have an impact on the Earth system.	45	<p>Describe the primary goal of Earth system science and define the term system</p> <p>Describe Earth's two major sources of energy</p> <p>Explain how humans affect Earth's system</p> <p>Describe how the impact of natural hazards varies depending on population</p> <p>Describe how changes in Earth's subsystem impacts humans</p>
 Quiz: Earth System Science			
 Posttest 1			

Module 2: Minerals

Lesson	Description	Time (min)	Objective(s)
---------------	--------------------	-------------------	---------------------

Lesson	Description	Time (min)	Objective(s)
 Matter	This lesson provides an overview of the elements and periodic table, including atoms, isotopes, and the different chemical bonds.	45	<p>Explain how elements are related to minerals</p> <p>Identify the kinds of particles that make up atoms</p> <p>Explain the differences between ions and isotopes</p> <p>Explain what compounds are and describe why they form Compare and contrast the three major types of chemical bonds</p>
 Quiz: Matter			
 More About Minerals	In this lesson, students learn about minerals and their formation and structure.	45	<p>List five characteristics of minerals</p> <p>Describe the processes that result in mineral formation Explain how minerals can be classified</p>
 Quiz: More About Minerals			
 Properties of Minerals	This lesson teaches students how to identify minerals based on their physical properties.	45	<p>Explain the usefulness of color, streak, luster, crystal form, and hardness in identifying minerals</p> <p>Distinguish between cleavage and fracture</p> <p>Explain density and how it can be used to identify substances Describe some other properties that can be used to identify minerals</p> <p>Identify different minerals using simple tests</p>
 Quiz: Properties of Minerals			
 Posttest 2			

Lesson	Description	Time (min)	Objective(s)
 The Rock Cycle	This lesson describes how rocks are created through the rock cycle and identifies the three major types of rocks.	45	Define the term rock Describe the rock cycle and the three major types of rocks List the forces that power Earth's rock cycle
 Quiz: The Rock Cycle			
 Igneous Rocks	In this lesson, students learn how to classify igneous rocks and how they are created.	45	Compare and contrast intrusive and extrusive igneous rocks Classify igneous rocks by texture and describe how the rate of cooling affects texture Classify igneous rocks by composition
 Quiz: Igneous Rocks			
 Sedimentary Rocks	This lesson discusses sedimentary rock formation as well as its classification and physical properties.	45	Describe the major processes involved in the formation of sedimentary rocks Distinguish between clastic sedimentary rocks and chemical sedimentary rocks Identify the features that are unique to some sedimentary rocks
 Quiz: Sedimentary Rocks			
 Metamorphic Rocks	In this lesson, students learn how to classify metamorphic rocks based on physical properties and explore how they are created.	45	Predict where most metamorphism takes place and distinguish contact from regional metamorphism Identify the three agents of metamorphism and explain what changes they cause Classify metamorphic rocks as foliated or nonfoliated

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Metamorphic Rocks			
📁 Rock Identification	In this lesson, students use properties such as streak and hardness to differentiate common rocks.	15	
★ Posttest 3			

Module 4: Earth's Resources

Lesson	Description	Time (min)	Objective(s)
📁 Energy and Mineral Resources	In this lesson, students explore the variety of available energy and mineral resources.	45	<p>Distinguish between renewable and nonrenewable resources Identify which energy resources are fossil fuels</p> <p>Predict which energy resources might replace dwindling petroleum supplies in the future Describe the processes that concentrate minerals into large deposits as they form</p> <p>Recognize how nonmetallic mineral resources are used</p>
🔍 Quiz: Energy and Mineral Resources			

Lesson	Description	Time (min)	Objective(s)
 Alternate Energy Sources	This lesson discusses energy sources that can be used as an alternative to fossil fuels. Other nonrenewable resources also are discussed.	45	Evaluate the advantages of solar energy Explain how nuclear power plants use nuclear fission to produce energy Evaluate wind power's potential for providing energy in the future Relate how geothermal energy contributes to our energy resources Relate how hydroelectric power contributes to our energy resources Relate how tidal power contributes to our energy resources
 Quiz: Alternate Energy Sources			
 Water, Air, and Land Resources	This lesson provides an overview of the natural resources required for life and explains why they are essential.	45	Explain why fresh water is a vital resource Recognize why the chemical composition of the atmosphere is important Identify Earth's important land resources
 Quiz: Water, Air, and Land Resources			
 Protecting Resources	In this lesson, students explore ways to help protect Earth's vital resources from pollution and overuse.	45	Identify the first laws passed to deal with water pollution Name the most important law passed to deal with air pollution Explain what is involved in protecting land resources
 Quiz: Protecting Resources			
 Posttest 4			

Lesson	Description	Time (min)	Objective(s)
 Weathering	This lesson focuses on the different forces of weathering, their effects, and their role in the rock cycle.	45	Describe mechanical weathering Explain chemical weathering Identify the factors that affect the rate of weathering
 Quiz: Weathering			
 Soil	In this lesson, students explore soil and learn about its composition, its importance, and what happens when soil loss occurs.	45	Recognize the major components of soil List the most important factors in soil formation Explain how soil varies with depth Compare and contrast the three common types of soil Demonstrate how human activities affect the rate of soil erosion
 Quiz: Soil			
 Mass Movements	This lesson addresses what happens when gravity takes over and large amounts of soil and rock move down a slope.	45	Describe mass movement and identify the factors that trigger mass movements Classify mass movements
 Quiz: Mass Movements			
★ Posttest 5			

Module 6: Running Water and Groundwater

Lesson	Description	Time (min)	Objective(s)
---------------	--------------------	-------------------	---------------------

Lesson	Description	Time (min)	Objective(s)
 Running Water	In this lesson, students explore the water cycle and how water flows across Earth.	45	Explain how the water cycle circulates Earth's water supply in an unending cycle Describe the ability of a stream to erode and transport material Compare and contrast the changes in gradient and discharge between a stream's headwaters and mouth Describe base level
 Quiz: Running Water			
 The Work of Streams	This lesson focuses on the effects streams can have on the landscape and on areas where we live.	45	Explain how streams erode their channels and transport sediments Explain how stream deposition occurs Identify the two general types of stream valleys Predict the causes of floods and describe major flood control measures Explain the relationship between streams and drainage basins
 Quiz: The Work of Streams			
 Water Beneath the Surface	In this lesson, students learn about the varied uses and features created by groundwater and its movement.	45	Describe the location and movement of groundwater Describe the formation of springs and wells Explain environmental threats to water supplies Describe the formation of caverns Describe landforms in karst areas Explain how the permeability of soil affects its ability to move water

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Water Beneath the Surface			
★ Posttest 6			

Stream Table Lab Activity

Lesson	Description	Time (min)	Objective(s)
✍ Stream Table Lab Activity	In this lesson, students prepare a stream table and analyze the results of variations in sediment and slope of the stream table.		Investigate the effects of water on earth

Module 7: Glaciers, Deserts, and Wind

Lesson	Description	Time (min)	Objective(s)
📁 Glaciers	This lesson teaches students about the unique characteristics of glaciers and their movement.	45	Describe the different types of glaciers and where each type is found Explain how glaciers move Explain the effects of the most recent ice age
🔍 Quiz: Glaciers			
📁 Glacial Landscapes	In this lesson, students explore the role glaciers have in shaping landscapes.	45	Explain how glaciers erode the land Identify the landscape features created by glacial erosion Identify the landscape features created by glacial deposits Identify the depositional features caused by glaciers
🔍 Quiz: Glacial Landscapes			

Lesson	Description	Time (min)	Objective(s)
 Deserts	This lesson discusses some of the processes and landscape features that contribute to the formation of deserts.	45	Describe how running water affects deserts Describe different landscape features of the desert
 Quiz: Deserts			
 Landscapes Shaped by Wind	This lesson shows how wind is able help shape different landscape features.	45	Describe two ways that wind can cause erosion Identify types of landforms that are deposited by the wind Describe how sand dunes differ
 Quiz: Landscapes Shaped by Wind			
 Posttest 7			

Module 8: Earthquakes and Earth's Interior

Lesson	Description	Time (min)	Objective(s)
 What Is an Earthquake?	This lesson introduces the causes and effects of earthquakes and provides an overview of aftershocks and foreshocks.	45	Compare and contrast the epicenter and focus of an earthquake Identify the cause of earthquakes
 Quiz: What Is an Earthquake?			
 Measuring Earthquakes	In this lesson, students learn about seismic waves created by earthquakes and how they are measured.	45	Identify the three types of seismic waves Describe how seismic waves are recorded Describe the different ways earthquakes are measured Explain how to locate the epicenter of an earthquake
 Quiz: Measuring Earthquakes			

Lesson	Description	Time (min)	Objective(s)
 Earthquake Hazards	This lesson presents information on the potential damage that can be caused by earthquakes and how that damage can be reduced.	45	Identify the major hazards associated with earthquakes Describe how earthquake damage can be reduced
 Quiz: Earthquake Hazards			
 Earth's Layered Structure	This lesson describes the composition and physical properties of Earth's layers and explains how they affect seismic waves.	45	List the layers of Earth based on composition List the layers of Earth based on physical properties Explain how scientists determined Earth's structure and composition List the layers of Earth based on thermal properties Describe gravity mapping as a tool to study Earth Describe the formation and structure of Earth's magnetic field Explain how Earth's magnetic field interacts with charged solar particles
 Quiz: Earth's Layered Structure			
 Posttest 8			

Module 9: Plate Tectonics

Lesson	Description	Time (min)	Objective(s)
 Continental Drift	In this lesson, students learn about continental drift and the theories behind this idea.	45	Describe the hypothesis of continental drift Evaluate the evidence in support of continental drift Identify the main objections to Wegener's hypothesis of continental drift

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Continental Drift			
📁 Sea-Floor Spreading	In this lesson, students learn about the process of sea-floor spreading and explore evidence to support this idea.	45	Identify mid-ocean ridges and deep-ocean trenches Explain the processes of sea-floor spreading and subduction Explain the evidence for sea-floor spreading, including paleomagnetism and magnetic reversals, earthquake patterns, and the age of the ocean floor
🔍 Quiz: Sea-Floor Spreading			
📁 Theory of Plate Tectonics	This lesson describes how the theory of plate tectonics accounts for the many land and oceanic features on Earth such as mountains and trenches.	45	Explain the theory of plate tectonics and describe lithospheric plates Identify divergent boundaries Identify convergent boundaries Identify transform fault boundaries Relate the unequal distribution of heat in Earth and the mechanism of mantle convection to the movement of tectonic plates Compare the mechanisms of slab-pull and ridge-push as contributing to plate motion
🔍 Quiz: Theory of Plate Tectonics			
★ Posttest 9			

Module 10: Volcanoes and Other Igneous Activity

Lesson	Description	Time (min)	Objective(s)
---------------	--------------------	-------------------	---------------------

Lesson	Description	Time (min)	Objective(s)
 Volcanoes and Plate Tectonics	In this lesson, students explore the relationship between plate tectonics and volcanoes.	45	<ul style="list-style-type: none"> Describe the origin of magma Explain the relationship between plate tectonics and volcanism, including intraplate volcanism
 Quiz: Volcanoes and Plate Tectonics			
 The Nature of Volcanic Eruptions	This lesson describes various types of volcanoes and the events leading up to eruptions.	45	<p>Explain the factors that determine the type of volcanic eruptions that occur</p> <p>Describe the various types of volcanic materials that are ejected from volcanoes</p> <p>List the three main types of volcanoes</p> <p>Distinguish how the different types of volcanic landforms form</p>
 Quiz: The Nature of Volcanic Eruptions			
 Intrusive Igneous Activity	In this lesson, students learn about the classification of major intrusive igneous features and discover how they are formed.	45	<p>Describe the major intrusive igneous features, such as dikes, sills, and laccoliths, and how they form</p> <p>Describe batholiths and how they form</p>
 Quiz: Intrusive Igneous Activity			
 Posttest 10			

Module 11: Mountain Building

Lesson	Description	Time (min)	Objective(s)
---------------	--------------------	-------------------	---------------------

Lesson	Description	Time (min)	Objective(s)
 Forces in Earth's Crust	This lesson discusses the forces that affect rocks and deform them.	45	Identify the factors that determine the strength of a rock and explain how rocks permanently deform Distinguish among the types of stresses that affect rocks Explain how isostatic adjustment is involved in mountain formation
 Quiz: Forces in Earth's Crust			
 Folds, Faults, and Mountains	In this lesson, students learn how forces within Earth's crust are used to create mountains.	45	List the three main types of folds Identify the main types of faults Describe folded mountains and fault-block mountains and explain how they form Describe plateaus, domes, and basins and explain how they form
 Quiz: Folds, Faults, and Mountains			
 Mountains and Plates	In this lesson, students identify the different types of mountains created in relation to the location of plate boundaries.	45	Identify the types of mountains associated with the various types of convergent and divergent plate boundaries Describe the role of accretion in the formation of continents and mountain building
 Quiz: Mountains and Plates			
 Posttest 11			

Module 12: Geologic Time

Lesson	Description	Time (min)	Objective(s)
---------------	--------------------	-------------------	---------------------

Lesson	Description	Time (min)	Objective(s)
 Discovering Earth's History	In this lesson, students explore the various methods scientists use to determine the age of rocks and Earth itself.	45	List three main ideas that geologists use in studying Earth's history List the key principles of relative dating and describe how geologists use relative dating in their work Describe how geologists use inclusions, unconformities, and correlation of rock layers to interpret the rock record
 Quiz: Discovering Earth's History			
 Fossils	This lesson describes methods used by scientists to gather and study fossils so they can better understand the history of life on Earth.	45	Describe the different types of fossils and how they form Explain how the principle of fossil succession and the theory of evolution help scientists interpret the fossil record Describe how geologists use fossils to correlate rock layers and reconstruct past environments Explain the factors that affect the completeness of the fossil record
 Quiz: Fossils			
 Dating With Radioactivity	In this lesson, students learn how scientists use specific types of radiation to determine the relative age of rocks.	45	Describe radioactivity and half- life Explain radiometric dating Describe how carbon-14 is used in radiometric dating Explain how radiometric dating of igneous rock layers can help date sedimentary rock layers indirectly Calculate the age of rocks using radiometric dating methods

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Dating With Radioactivity			
📅 Geologic Time Scale	In this lesson, students learn how scientists use the geologic time scale to separate Earth's history into specific intervals of time.	45	Describe the geologic time scale Identify the eons of the geologic time scale Identify the eras of the geologic time scale Identify the periods and epochs of the geologic time scale Explain why multiple dating methods are used to construct the geologic time scale
🔍 Quiz: Geologic Time Scale			
★ Posttest 12			

Module 13: Earth's History

Lesson	Description	Time (min)	Objective(s)
📅 Precambrian Time	This lesson introduces students to the major events of Precambrian Earth.	45	Describe the major geologic developments of Precambrian time Describe the major developments in the evolution of living things during Precambrian time Describe the evidence that Earth's cooling led to tectonic activity Discuss scientific hypotheses for the origin of life
🔍 Quiz: Precambrian Time			

Lesson	Description	Time (min)	Objective(s)
 Paleozoic Era: Life Explodes	<p>This lesson provides an overview of the different periods of the Paleozoic era and the development of life during this time.</p>	45	<p>List the kinds of environmental changes that have affected the evolution of life over geologic time</p> <p>Describe the major developments in Earth's geology and life forms during the Cambrian period</p> <p>Describe the major developments in Earth's geology and life forms during the Ordovician period</p> <p>Describe the major developments in Earth's geology and life forms during the Silurian period</p> <p>Describe the major developments in Earth's geology and life forms during the Devonian period</p> <p>Describe the major developments in Earth's geology and life forms during the Carboniferous period</p> <p>Describe the major developments in Earth's geology and life forms during the Permian period</p>
 Quiz: Paleozoic Era: Life Explodes			

Lesson	Description	Time (min)	Objective(s)
 Mesozoic Era: Age of Reptiles	In this lesson, students explore the expansion and mass extinctions of life on Earth through the Mesozoic era.	45	Describe the major developments in Earth's geology and life forms during the Triassic period Describe the major developments in Earth's geology and life forms during the Jurassic period Describe the major developments in Earth's geology and life forms during the Cretaceous period State the cause of the mass extinction at the end of the Mesozoic era
 Quiz: Mesozoic Era: Age of Reptiles			
 Cenozoic Era: Age of Mammals	This lesson teaches students about the rise and proliferation of mammals and introduces the idea of natural heating and cooling cycles on Earth.	45	Explain why mammals became widespread and successful in the Cenozoic era Describe the major developments in Earth's geology and life forms during the Tertiary period Describe the major developments in Earth's geology and life forms during the Quaternary period
 Quiz: Cenozoic Era: Age of Mammals			
 Posttest 13

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: The Ocean Floor

Lesson	Description	Time (min)	Objective(s)
 The Vast World Ocean	In this lesson, students learn about the oceans and the technology used to map the ocean floor.	45	<p>Recognize that most of Earth's surface is covered by water</p> <p>List Earth's four main ocean basins and identify their locations</p> <p>Describe how technology has been used to examine the topography of the ocean floor and how ocean topography compares to land topography</p>
 Quiz: The Vast World Ocean			
 Ocean Floor Features	This lesson explains the many features of the ocean floor and discusses their characteristics and how they are formed.	45	<p>List the three main regions of the ocean floor</p> <p>Differentiate between the continental margins of the Atlantic and Pacific Oceans</p> <p>Explain the formation of new ocean floor at deep-ocean trenches and abyssal plains</p> <p>Explain the formation of new ocean floor at mid-ocean ridges</p>

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Ocean Floor Features			
📁 Seafloor Sediments	This lesson provides an overview of the various types of sediment found on the ocean floor.	45	List the three types of ocean floor sediments Describe the formation of terrigenous sediment Describe the formation of biogenous sediment Describe the formation of hydrogenous sediment
🔍 Quiz: Seafloor Sediments			
📁 Resources From the Seafloor	In this lesson, students learn about the different resources that are obtained from the ocean floor and discover how gas hydrates are formed.	45	Identify ocean resources used for energy production List other types of ocean resources
🔍 Quiz: Resources From the Seafloor			
★ Posttest 1			

Module 2: Ocean Water and Ocean Life

Lesson	Description	Time (min)	Objective(s)
📁 The Composition of Seawater	In this lesson, students learn about salinity and the factors that affect the density of ocean water.	45	List the sources of salt in ocean water and identify the units used to express salinity Recognize the factors that affect the density of ocean water Compare and contrast the three main zones of the open ocean
🔍 Quiz: The Composition of Seawater			

Lesson	Description	Time (min)	Objective(s)
 The Diversity of Ocean Life	This lesson discusses marine life, the differences between plankton and nekton organisms, and the areas in the oceans where life flourishes.	45	<ul style="list-style-type: none"> Recognize how marine organisms can be classified List the factors used to divide the ocean into marine zones and describe where most benthic organisms live Describe hydrothermal vents
 Quiz: The Diversity of Ocean Life			
 Oceanic Productivity	This lesson explains the productivity of different oceans as ecosystems and discusses trophic levels, food webs, and food chains.	45	<ul style="list-style-type: none"> List the factors that influence a region's photosynthetic productivity Describe oceanic feeding relationships
 Quiz: Oceanic Productivity			
 Posttest 2			

Module 3: The Dynamic Ocean

Lesson	Description	Time (min)	Objective(s)
 Ocean Circulation	In this lesson, students learn that the ocean is in constant motion and affects not only ocean temperatures but also the climates on Earth.	45	<ul style="list-style-type: none"> Explain how surface currents develop Describe how ocean currents affect climate State the importance of upwelling Describe the formation of density currents
 Quiz: Ocean Circulation			

Lesson	Description	Time (min)	Objective(s)
 Waves and Tides	This lesson explains the characteristics of ocean waves and how waves and tides are produced.	45	Describe how ocean waves get their energy State three factors that determine the characteristics of a wave Describe how energy moves through a wave Explain the forces that produce tides
 Quiz: Waves and Tides			
 Shoreline Processes and Features	In this lesson, students learn about the impact of wave processes on the shoreline and how shorelines can be protected.	45	Explain the forces that act along the shoreline Describe how erosion contributes to the formation of a shoreline Describe how deposition contributes to the formation of a shoreline List the structures that can be built to protect a shoreline
 Quiz: Shoreline Processes and Features			
 Posttest 3			

Module 4: The Atmosphere

Lesson	Description	Time (min)	Objective(s)
 Atmosphere Characteristics	This lesson teaches students about the characteristics of our atmosphere and how Earth's position relative to the sun affects the seasons.	45	Compare and contrast weather and climate Identify properties of the atmosphere Explain why seasonal changes occur
 Quiz: Atmosphere Characteristics			

Lesson	Description	Time (min)	Objective(s)
 Heating the Atmosphere	In this lesson, students explore heat and how the atmosphere affects, and is affected by, the different methods of heat transfer.	45	Describe heat and list the three major mechanisms of heat transfer Describe how the atmosphere is affected by heat transfer mechanisms
 Quiz: Heating the Atmosphere			
 Temperature Controls	This lesson describes the differences and factors in heating land and water and addresses how clouds can have an influence on temperature.	45	Analyze how the heating of land and water, geographic position, altitude, and cloud cover influence temperature Define isotherms Compare the heating of land and water
 Quiz: Temperature Controls			
★ Posttest 4			

Module 5: Moisture, Clouds, and Precipitation

Lesson	Description	Time (min)	Objective(s)
 Water in the Atmosphere	In this lesson, students explore humidity and the ability of air to hold water vapor at different temperatures.	45	Identify the gas that is most important for understanding atmospheric processes Describe what happens during a change of state Describe the factors that affect saturation of water and the relative humidity of air
 Quiz: Water in the Atmosphere			

Lesson	Description	Time (min)	Objective(s)
 Cloud Formation	In this lesson, students learn about the processes involved in air lift and how this relates to cloud formation.	45	<p>Describe what happens to air when it is compressed or allowed to expand</p> <p>List four mechanisms that cause air to rise</p> <p>Compare and contrast movements of stable and unstable air</p> <p>Describe the conditions in air that favor condensation of water</p>
 Quiz: Cloud Formation			
 Cloud Types and Precipitation	In this lesson, students explore the different types of clouds and their tendency to form precipitation.	45	<p>Describe how clouds are classified</p> <p>Compare and contrast clouds and fogs</p> <p>Explain what must happen for precipitation to form</p> <p>Identify what controls the type of precipitation that reaches Earth's surface</p>
 Quiz: Cloud Types and Precipitation			
 Posttest 5			

Module 6: Air Pressure and Wind

Lesson	Description	Time (min)	Objective(s)
 Understanding Air Pressure	In this lesson, students identify the ultimate energy source for wind and how the Coriolis effect influences freely moving objects.	45	<p>Describe how air pressure is exerted on objects</p> <p>Explain how changes in air pressure affect the mercury column of a barometer</p> <p>Identify factors that affect wind</p>

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Understanding Air Pressure			
📁 Pressure Centers and Winds	In this lesson, students learn about the factors that influence low and high pressure areas and how the heating of Earth's surface influences the atmosphere.	45	Describe the air pressure patterns within cyclones and anticyclones Explain how the unequal heating of Earth's surface affects the atmosphere
🔍 Quiz: Pressure Centers and Winds			
📁 Regional Wind Systems	In this lesson, students learn about wind patterns, including El Niño and La Niña events in the United States and around the world.	45	Identify the causes of local winds Describe the general movement of weather in the United States Compare and contrast weather patterns characteristic of El Niño and La Niña events Describe how global winds and pressure systems affect precipitation
🔍 Quiz: Regional Wind Systems			
★ Posttest 6			

Module 7: Weather Patterns and Severe Storms

Lesson	Description	Time (min)	Objective(s)
📁 Air Masses	This lesson teaches students about the various types of air masses and their unique characteristics.	45	Describe air mass Explain the characteristic features of each air mass class Explain the influence of continental polar and maritime tropical air masses on the majority of North America

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Air Masses			
📁 Fronts	This lesson describes the various fronts that can form and how they interact with each other to produce weather patterns.	45	Describe the formation of a front Differentiate among the formation of a warm front, cold front, stationary front, and occluded front Describe the formation of a middle-latitude cyclone Describe how airflow in the atmosphere fuels cyclonic and anticyclonic circulation
🔍 Quiz: Fronts			
📁 Severe Storms	In this lesson, students learn how weather patterns are able to form events like tornadoes, hurricanes, and thunderstorms.	45	Explain the formation of a thunderstorm Describe the conditions needed for a tornado to form <ul style="list-style-type: none"> Identify the conditions that must exist for a hurricane to form
🔍 Quiz: Severe Storms			
★ Posttest 7			

Module 8: Climate

Lesson	Description	Time (min)	Objective(s)
📁 Factors That Affect Climate	In this lesson, students learn about the factors that contribute to the climate of a region.	45	Describe how latitude, elevation, and mountain ranges affect climate Describe how large bodies of water, global winds, and vegetation affect climate
🔍 Quiz: Factors That Affect Climate			

Lesson	Description	Time (min)	Objective(s)
 World Climates	This lesson provides an overview of how climates around the world are classified as well as some characteristics of different climates.	45	<p>Explain the Köppen climate classification system</p> <p>Describe humid tropical climates</p> <p>Compare and contrast humid mid-latitude climates</p> <p>List the characteristics of dry, polar, and highland climates</p>
 Quiz: World Climates			
 Climate Changes	In this lesson, students explore the idea of the greenhouse effect and how it contributes to global warming, and students learn about other consequences associated with the greenhouse effect.	45	<p>Describe natural processes that can cause changes in climate</p> <p>Describe human processes that can impact the climate</p>
 Quiz: Climate Changes			
 Posttest 8			

Module 9: Origin of Modern Astronomy

Lesson	Description	Time (min)	Objective(s)
 Early Astronomy	This lesson discusses the development of astronomy as a modern science and introduces the geocentric and heliocentric models of the solar system.	45	<p>Describe the contributions of ancient Greeks to astronomy</p> <p>Explain the contributions to astronomy of Copernicus, Brahe, and Kepler</p> <p>Explain the contributions to astronomy of Galileo and Newton</p>
 Quiz: Early Astronomy			

Lesson	Description	Time (min)	Objective(s)
 The Earth-Moon- Sun System	In this lesson, students learn how the sun and moon interact with Earth and affect how we are able to view, or see, those bodies.	45	Describe the movements of Earth known as rotation, revolution, and precession Explain how the moon goes through phases Explain how eclipses occur
 Quiz: The Earth-Moon-Sun System			
 Earth's Moon	This lesson teaches students how the moon was formed and how many of its surface features were formed.	45	Describe how the physical features of the lunar surface were created Explain the history of the moon
 Quiz: Earth's Moon			
 Posttest 9			

Module 10: Touring Our Solar System

Lesson	Description	Time (min)	Objective(s)
 The Solar System	In this lesson, students discover how the solar system was formed and learn about the different planet types.	45	List the major differences between the terrestrial and Jovian planets Explain how the solar system formed
 Quiz: The Solar System			
 The Terrestrial Planets	This lesson provides an overview of the the three other planets that share the inner solar system with Earth.	45	Describe the distinguishing characteristics of Mercury Describe the distinguishing characteristics of Venus Describe the distinguishing characteristics of Mars
 Quiz: The Terrestrial Planets			

Lesson	Description	Time (min)	Objective(s)
 The Outer Planets and Pluto	This lesson teaches students about the larger planets of our outer solar system.	45	Describe the distinguishing characteristics of Jupiter Describe the distinguishing characteristics of Saturn Describe the distinguishing characteristics of Uranus Describe the distinguishing characteristics of Neptune
 Quiz: The Outer Planets and Pluto			
 Minor Members of the Solar System	In this lesson, students learn about some of the other objects found in our solar system, both inner and outer.	45	Identify the location within our solar system where most asteroids are found Describe the structure of a comet Explain the possible origins for a meteoroid
 Quiz: Minor Members of the Solar System			
 Posttest 10			

Module 11: Studying the Sun

Lesson	Description	Time (min)	Objective(s)
 The Study of Light	This lesson describes the waves that compose the electromagnetic spectrum and how this information is used to learn about other stars.	45	Describe the waves that compose the electromagnetic spectrum Describe what the different types of spectra reveal about stars Explain how the Doppler effect is applied to the motion of stars in relation to Earth
 Quiz: The Study of Light			

Lesson	Description	Time (min)	Objective(s)
 Tools for Studying Space	This lesson introduces some of the tools that are used to study objects in space and some of their respective advantages and disadvantages.	45	<p>Explain how refracting telescopes work</p> <p>Explain how reflecting telescopes work</p> <p>Explain how radio telescopes work</p> <p>Explain the advantages that a space telescope has over an Earth-based telescope</p>
 Quiz: Tools for Studying Space			
 The Sun	This lesson provides an overview of the sun and the ability of its inner workings to provide the solar system with light and heat.	45	<p>Explain the structure of the sun</p> <p>Describe the physical features on the surface of the sun</p> <p>Explain how the sun produces energy</p>
 Quiz: The Sun			
 Posttest 11			

Module 12: Beyond Our Solar System

Lesson	Description	Time (min)	Objective(s)
 Properties of Stars	In this lesson, students learn about the different properties scientists use to classify stars.	45	<p>Describe what astronomers can learn by studying star properties</p> <p>Explain how distance affects parallax</p> <p>List the factors that determine a star's apparent magnitude</p> <p>Describe the relationship shown on a Hertzsprung-Russell diagram</p>
 Quiz: Properties of Stars			

Lesson	Description	Time (min)	Objective(s)
 Stellar Evolution	This lesson discusses the life cycle of stars and describes the various ways stars can die.	45	Identify which stage marks the birth of a star Explain why all stars eventually die List the possible stages of a star's life cycle
 Quiz: Stellar Evolution			
 The Universe	In this lesson, students explore different galaxy structures and learn about evidence that supports the big bang theory.	45	Describe the size and structure of the Milky Way Galaxy List the ways in which galaxies differ from one another Cite the evidence that indicates that the universe is expanding Describe how the universe began according to the big bang theory
 Quiz: The Universe			
 Posttest 12

Environmental Science

Environmental Science A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary: This course offers the student an opportunity to gain an understanding of the concepts fundamental to environmental science. These concepts are keys that will help unlock our abilities to safeguard resources, manage waste, reduce pollution, protect the food chain, adapt to changing fuel needs, and champion our planet on all levels — from the conscientious management of the smallest household to the protection of the largest biospheres.

Semester A

1. The Methods and Nature of Environmental Science

1. Identifying Main Environmental Factors
 - Consider what makes up the environment
 - Learn the main "factors" that are needed to understand the environment in a logical manner
 - Realize the importance of the human factor on the environment
2. The Scientific Method
 - Learn one method of scientific problem-solving
 - Discover the steps of the scientific method
 - Experiment with the scientific method
3. Environmental Specialists
 - Compare the many types of specific specialists
 - Identify which scientists work in various environments
4. Observation and Record Keeping - Past and Present
 - Explore how different civilizations have recorded the environments around them through the centuries

- Learn how environmental scientists record their observations
 - Discover ways that you can record information about your own environment
5. Environmental Accidents and Scientific Methods
 - Discover the challenges scientists face when emergencies occur
 - Realize the effects of accidental contamination on the environment
 6. Biotic versus Abiotic
 - Define and differentiate abiotic and biotic
 - Learn the basic differences between biotic and abiotic objects
 7. Earth Divisions
 - Study the divisions of the Earth and their locations
 - See how each division contributes to the environment
 8. Hierarchy of Biology
 - Identify the way life is organized from the tiniest parts of an organism to the largest forms of life
 - Explore the importance of listing and classifying organisms
 9. Population versus Community
 - Demonstrate the differences between population and community
 - Identify the names of various groups of animals
 10. Biodiversity
 - Explore how life forms adapt to their surroundings
 - Investigate how diverse organisms can be
 - Describe the accomplishments of Charles Darwin and his theory of natural selection

2. Earth's Processes

1. Domestic vs. Wild
 - Explore the differences between domestic and wild plants and animals
 - Describe how domestication has improved the way humans live
 - Recognize the concept of selective breeding
2. Environmental Invaders
 - Learn about the delicate balance between organisms and their surroundings
 - Consider the introduction of new life forms in America and how they affect the already existing populations
 - Explore the ways of controlling the effects of new organisms in a community
3. The Water Cycle
 - Investigate the stages of the water cycle
 - Explore how water and the various stages of the water cycle impact everyday life
4. Acid Rain
 - Identify where acid rain comes from

- Discover how acid rain affects the environment
 - Explain ways to prevent acid rain in the future
5. Ground Water Pollution
 - Examine sources of ground pollution
 - Explore the importance of ground water and fresh water
 - Recognize how the water we drink is affected by pollution
 6. The Carbon Cycle
 - Learn about the carbon cycle - how carbon is circulated through the environment
 - Discover how carbon relates to people, plants, and animals
 - Explore the processes in plants and animals that use carbon
 7. The "Greenhouse Effect" And Global Warming
 - Demonstrate how the carbon cycle is affected by pollution
 - Examine the role carbon plays in both good and harmful processes on Earth
 - Review the concepts of global warming and the "greenhouse effect"
 8. Air Pollution
 - Recall how air pollution is affecting every part of the globe
 - Investigate the main air pollution issues
 - Describe ways to improve air quality
 9. The Food Chain
 - Investigate about the food chain
 - Recognize how nature dictates food choices
 - Recognize the importance of the food chain
 10. Food Chain Pollution
 - Investigate how the food chain is affected by pollution
 - Examine the difficulties of repairing damage to the food chain
 - Identify how invader species can affect the food chain

3. Final Review and Exam

1. Environmental Science A Final Review
2. Environmental Science A Final Exam

Semester B

1. Environmental Science Programs and Policies

1. Policies and Agencies
 - Investigate the departments and agencies that the United States has established to monitor specific issues in the environment
 - Identify how the different agencies overlap focus on issues and work together to find solutions to problems in the environment
2. Recent Policy Changes and Energy Issues

- Recognize the government's new energy legislation and what it means for individuals and companies
- Recognize the supply and demand of energy
- Investigate the advantages and disadvantages of the new laws

3. Local Environmental Agencies

- Explore the Environmental Protection Agency and how it works to make the environment clean and safe
- Explain the laws that the EPA has developed to prevent further harm to the environment
- Review how local government works with the EPA to regulate pollution in cities and towns

4. International Environmental Concerns

- Identify environmental problems which affect the planet and its species
- Identify how deforestation creates even greater problems with global warming
- Identify the efforts some make to clean up the environment and the lack of effort by others

5. Environmental Groups and Regulatory Violations

- Investigate various environmental groups that work to improve the environment
- Recall how environmental groups take different approaches to pollution and its control

6. Planning Conservation

- Discover the ways people are saving energy in their homes
- Consider how older homes can be more energy efficient

7. Waste Management

- Investigate the entire process of waste management
- Name the different classes of waste processing

8. Composting

- Explore the process of composting biodegradable materials
- Investigate the benefits of composting and how it can help reduce waste in landfills

9. Space Waste

- Explain the growing problems faced by waste in space
- Identify the damage space waste can cause
- Explore methods of cleaning up space waste

10. Transportation Challenges

- Recognize the importance of the trucking industry
- Identify ways to make trucking transportation safer
- Learn about the laws that govern the trucking industry

2. The Effects of Environmental Science Technology

1. Standard Electric Energy Production Methods

- Recognize the basic theory of generating electricity
- Distinguish between different ways to generate electricity
- Identify ways power plants can harm the environment

- Describe the role natural resources play in providing raw materials for an industrial society
2. New Energy Production Methods
 - Identify new designs for safely producing power
 - Recognize how energy sources are harnessed to produce power
 3. Fuel Production and Transport Problems
 - Discover the basic steps of oil production
 - Recognize how the environment can be effected by oil drilling
 4. United States Agriculture
 - Explore the world's need for farmers
 - Discover the many diverse crops grown in the United States
 - Understand why farmland is being sold and developed into new homes and businesses
 - Consider the need to preserve our nation's farmlands
 5. Modern Agriculture and New Technology
 - Name new technologies in agriculture
 - Identify technologies that are helping and hurting today's farmers
 - Explain what can be done to help American farmers keep their land
 6. Less Pesticides and More IPM
 - Identify integrated pest management techniques
 - Recognize how using IPM can help save crops in an environmentally-friendly way
 7. Genetically Modified Organisms (GMOs)
 - Compare and consider the pros and cons of genetically altering foods
 - Discover how GMOs are helping to improve the products we buy
 - Explore ways GMOs are helping doctors cure diseases
 8. Grazing and Public Land Management
 - Learn about how the Bureau of Land Management regulates land under its control
 - Explore the reintroduction of wild species into national parks and the impact it has on the existing species
 - Identify the Acts of Congress that protect federal land and the animals living there
 9. New Environmental Uses of Corn
 - Learn about how the Bureau of Land Management regulates land under its control
 - Explore the reintroduction of wild species into national parks and the impact it has on the existing species
 - Identify the Acts of Congress that protect federal land and the animals living there
 10. It's All Up to You!
 - Learn about how the Bureau of Land Management regulates land under its control
 - Explore the reintroduction of wild species into national parks and the impact it has on the existing species
 - Identify the Acts of Congress that protect federal land and the animals living there

3. **Final Review and Exam**

1. Environmental Science B Final Exam Review
2. Environmental Science B Final Exam

Physical Science – Chemistry/Physics (Prescriptive)

Physical Science - Chemistry A/B Prescriptive

Time allocations:

Each lesson in the Course Outline provides an estimated time to complete.

Instructional Activities

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary

Prescriptive courses are designed as credit recovery for students. Teachers will work with students to identify the content students have not mastered. Students will only complete those lessons or units within the course. This will ensure that students have mastered all standards for graduation requirements.

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Science Skills

Lesson	Description	Time (min)	Objective(s)
 Science Skills	This lesson contains a video about forensic science.	15	
 Physical Science	This lesson presents an overview of physical science.	45	<p>Explain how science and technology are related</p> <p>List the major branches of natural science and describe how they overlap</p> <p>Describe the main ideas of physical science</p>
 Quiz: Physical Science			
 Using a Scientific Approach	In this lesson students learn about the scientific method. It also describes the importance of scientific models and laboratory safety.	45	<p>Describe the steps in the scientific method</p> <p>Compare and contrast facts, scientific theories, and scientific laws</p> <p>Explain the importance of models in science</p> <p>Explain the importance of safety in science</p>

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Using a Scientific Approach			
📏 Measurement	This lesson explains how to perform calculations involving scientific notation. It also introduces students to SI units and the concepts of accuracy and precision.	45	<p>Perform calculations involving scientific notation and conversion factors</p> <p>Identify the metric and SI units used in science and convert between common metric prefixes</p> <p>Compare and contrast accuracy and precision</p> <p>Relate the Celsius, Kelvin, and Fahrenheit temperature scales</p>
🔍 Quiz: Measurement			
📊 Presenting Scientific Data	This lesson addresses how to organize and present data using tables and graphs. Students learn the relationship between a manipulated and a responding variable. The importance of communicating data and conducting peer reviews is also covered.	45	<p>Organize and analyze data using tables and graphs</p> <p>Explain the importance of communicating data</p>
🔍 Quiz: Presenting Scientific Data			
★ Posttest 1			

Module 2: Properties of Matter

Lesson	Description	Time (min)	Objective(s)
📏 Properties of Matter	This lesson contains a video about water purification.	15	

Lesson	Description	Time (min)	Objective(s)
 Classifying Matter	In this lesson students learn the differences between elements, compounds and mixtures. Additionally, students learn the symbols for elements and how to classify mixtures.	45	Describe the characteristics of an element and the symbols used to identify elements Describe the characteristics of a compound Distinguish pure substances from mixtures Classify mixtures as solutions, suspensions, or colloids
 Quiz: Classifying Matter			
 Physical Properties	This lesson defines physical properties, explains how they are used to classify substances, and teaches students how to recognize a physical change.	45	Describe physical properties of matter Describe how properties are used to choose materials Describe methods used to separate mixtures Describe evidence that indicates a physical change is taking place
 Quiz: Physical Properties			
 Chemical Properties	This lesson defines chemical properties and teaches students to recognize the difference between a chemical change and a physical change.	45	Describe chemical properties of matter Describe clues that indicate that a chemical change is taking place Distinguish chemical changes from physical changes
 Quiz: Chemical Properties			
★ Posttest 2			

Module 3: States of Matter

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 States of Matter	This lesson contains a video about hot air balloons.	15	
 Solids, Liquids, and Gases	This lesson classifies the states of matter and teaches students how to explain the behavior of solids, liquids, and gases by using the kinetic theory.	45	Describe the five states of matter Explain the behavior of gases, liquids, and solids using the kinetic theory
 Quiz: Solids, Liquids, and Gases			
 The Gas Laws	This lesson addresses pressure and factors affecting the pressure of gases, such as temperature and volume.	45	Define pressure and gas pressure Identify factors that affect gas pressure Explain Charles's law and Boyle's law Explain the combined gas law
 Quiz: The Gas Laws			
 Phase Changes	In this lesson students learn to describe various phase changes and to recognize the relationship between temperature and kinetic energy in these changes.	45	Describe phase changes Describe melting and freezing Describe vaporization and condensation Describe sublimation and deposition Explain the constant temperature of a substance that is undergoing a phase change
 Quiz: Phase Changes			
 Posttest 3			

Module 4: Atomic Structure

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 Atomic Structure	This lesson contains a video about nanotechnology.	15	
 Studying Atoms	This lesson presents the various atomic models and describes how they developed from scientific experimentation.	45	<p>Describe ancient Greek models of matter</p> <p>List the main points of Dalton's atomic theory and describe his evidence for the existence of atoms</p> <p>Explain how Thomson used data from experiments to produce his atomic model</p> <p>Explain how Rutherford used data from experiments to produce his atomic model</p>
 Quiz: Studying Atoms			
 The Structure of an Atom	In this lesson students define and compare the three major subatomic particles. They also describe atomic structure in terms of atomic number and atomic mass number.	45	<p>Identify three subatomic particles and compare their properties Distinguish the atomic number of an element from the mass number of an isotope, and use these numbers to describe the structure of the atoms</p>
 Quiz: The Structure of an Atom			
 Modern Atomic Theory	This lesson describes the modern model of the atom and focusing specifically on electron levels and behavior.	45	<p>Describe Bohr's model of the atom and the evidence for energy levels</p> <p>Explain how the electron cloud model represents the behavior and locations of electrons in atoms</p> <p>Distinguish the ground state from excited states of an atom based on electron configurations Review the development of models of the atom over time</p>

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Modern Atomic Theory			
★ Posttest 4			

Module 5: The Periodic Table

Lesson	Description	Time (min)	Objective(s)
📁 The Periodic Table	This lesson contains a video about the elements.	15	
📁 Organizing the Elements	This lesson describes Mendeleev's research and the organization of the modern periodic table.	45	Describe how Mendeleev arranged the elements in his table Explain how the predictions Mendeleev made and the discovery of new elements demonstrated the usefulness of his periodic table
🔍 Quiz: Organizing the Elements			
📁 The Modern Periodic Table	This lesson explains the row and column organization of the periodic table and relates it to the properties of elements.	45	Describe the arrangement of elements in the modern periodic table Explain how the atomic mass of an element is determined and how atomic mass units are defined Identify general properties of metals, nonmetals, and metalloids Describe how properties of elements change across a period in the periodic table
🔍 Quiz: The Modern Periodic Table			

Lesson	Description	Time (min)	Objective(s)
 Representative Groups	In this lesson students learn the properties of elements in each group of the periodic table and how the groups relate to valence.	45	<p>Relate the number of valence electrons to groups in the periodic table and to properties of elements in those groups</p> <p>Identify some properties of the alkali and alkaline earth metals</p> <p>Identify some properties of the boron, carbon, nitrogen, and oxygen families</p> <p>Identify some properties of the halogens</p> <p>Identify some properties of the noble gases</p>
 Quiz: Representative Groups			
 Posttest 5			

Module 6: Chemical Bonds

Lesson	Description	Time (min)	Objective(s)
 Chemical Bonds	This lesson contains a video about silicon, its valence electrons, and its ability to be a semiconductor.	15	
 Ionic Bonding	In this lesson students learn to define and describe an ionic bond, recognize which elements form ionic bonds based upon valence electrons, and relate ionic compounds to crystal structure.	45	<p>Recognize stable electron configurations</p> <p>Describe how an ionic bond forms and how ionization energy affects the process</p> <p>Predict the composition of an ionic compound from its chemical formula</p> <p>Relate the properties of ionic compounds to the structure of crystal lattices</p>
 Quiz: Ionic Bonding			

Lesson	Description	Time (min)	Objective(s)
 Covalent Bonding	This lesson defines and describes covalent bonds. It also compares polar and nonpolar bonds and demonstrates how polar bonds affect the polarity of a molecule.	45	Describe the formation of covalent bonds and the attractions that keep atoms together in molecules Compare polar and nonpolar bonds, and demonstrate how polar bonds affect the polarity of a molecule
 Quiz: Covalent Bonding			
 Compounds and Formulas	In this lesson, students identify and describe binary ionic compounds, metals with multiple ions, and polyatomic ions. Additionally, students identify and determine chemical formulas for ionic and molecular compounds.	45	Recognize and describe binary ionic compounds, metals with multiple ions, and polyatomic ions Name and determine chemical formulas for ionic compounds Name and determine chemical formulas for molecular compounds
 Quiz: Compounds and Formulas			
 The Structure of Metals	This lesson introduces students to the properties of metals and the structure and strength of bonds in metals. Students also learn about alloys and how the composition of an alloy affects its properties.	45	Describe the structure and strength of bonds in metals Relate the properties of metals to their structures Define alloy and determine how the composition of an alloy affects its properties Review the development of metallurgy over time
 Quiz: The Structure of Metals			
 Posttest 6			

Module 7: Chemical Reactions

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 Chemical Reactions	This lesson contains a video about combustion reactions and their relationship to firefighting.	15	
 Describing Reactions	In this lesson students learn how to balance chemical equations. Additionally, students learn how to convert back and forth between moles and mass.	45	<p>Interpret chemical equations in terms of reactants, products, and conservation of mass</p> <p>Balance chemical equations by manipulating coefficients</p> <p>Convert between moles and mass of a substance using molar mass</p> <p>Calculate amounts of reactants or products by using molar mass, mole ratios, and balanced chemical equations</p>
 Quiz: Describing Reactions			
 Types of Reactions	This lesson introduces students to categories of reactions such as synthesis and decomposition. Additionally, students learn about the transfer of electrons in oxidation- reduction reactions.	45	<p>Classify chemical reactions as synthesis and decomposition reactions</p> <p>Classify chemical reactions as single-replacement and double-replacement reactions</p> <p>Classify chemical reactions as combustion reactions</p> <p>Describe oxidation-reduction reactions and relate them to other classifications of chemical reactions</p>
 Quiz: Types of Reactions			
 Energy Changes in Reactions	This lesson describes the transfer of energy during chemical reactions. Students learn that energy is conserved in chemical reactions, which are classified as endothermic or exothermic.	45	<p>Describe the energy changes that take place during chemical reactions</p> <p>Classify chemical reactions as exothermic or endothermic</p>

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Energy Changes in Reactions			
📁 Reaction Rates	This lesson discusses reaction rates and factors that affect reaction rates.	45	Explain what a reaction rate is Describe the factors affecting chemical reaction rates
🔍 Quiz: Reaction Rates			
📁 Equilibrium	This lesson describes different types of chemical equilibria and explores the factors that affect chemical equilibrium.	45	Identify and describe physical and chemical equilibria Describe the factors affecting chemical equilibrium Predict the effects of changes in the concentrations of reactants or products on chemical equilibrium
🔍 Quiz: Equilibrium			
★ Posttest 7			

Module 8: Solutions, Acids, and Bases

Lesson	Description	Time (min)	Objective(s)
📁 Solutions, Acids, and Bases	This lesson contains a video about blood, its components, and pH.	15	

Lesson	Description	Time (min)	Objective(s)
 Formation of Solutions	<p>In this lesson students discover that properties of solutions differ from their components. The lesson describes how substances dissolve in water and how rates of dissolving are affected by various factors.</p>	45	<p>Describe how a substance can dissolve in water by dissociation, dispersion, or ionization Describe how the physical properties of a solution can differ from those of its solute and solvent</p> <p>Identify energy changes that occur during the formation of a solution</p> <p>Describe factors affecting the rate at which a solute dissolves in a solvent</p>
 Quiz: Formation of Solutions			
 Solubility and Concentration	<p>This lesson introduces three types of solutions and teaches students how to compare solution concentration by volume, mass, and molarity.</p>	45	<p>Define solubility and classify solutions as unsaturated, saturated, or supersaturated Describe factors affecting solubility</p> <p>Calculate and compare and contrast solution concentrations expressed as percent by volume, percent by mass, and molarity Describe how surface area and temperature affect the rate of dissolving and solubility</p>
 Quiz: Solubility and Concentration			

Lesson	Description	Time (min)	Objective(s)
 Properties of Acids and Bases	In this lesson students learn how to categorize substances as acids or bases and relate this to pH. Additionally, students learn about neutralization reactions.	45	<p>Define acid and describe some of the general properties of an acid</p> <p>Define base and describe some of the general properties of a base</p> <p>Identify a neutralization reaction, and describe the reactants and products of neutralization</p> <p>Explain how acids and bases can be defined as proton donors and proton acceptors</p> <p>Define pH and relate pH to hydronium ion concentration in a solution</p>
 Quiz: Properties of Acids and Bases			
 Posttest 8			

Module 9: Carbon Chemistry

Lesson	Description	Time (min)	Objective(s)
 Carbon Chemistry	This lesson contains a video about coal-burning power stations and the quest for clean coal technology.	15	
 Carbon Compounds	This lesson explains how a variety of carbon bonding patterns produces a diversity of organic molecules. It covers saturated and unsaturated hydrocarbons as well as hydrocarbons bonded to various functional groups.	45	<p>Relate the structure of three forms of carbon to their properties</p> <p>Distinguish unsaturated from saturated hydrocarbons</p> <p>Classify substituted hydrocarbons based on their functional groups</p>
 Quiz: Carbon Compounds			

Lesson	Description	Time (min)	Objective(s)
 Polymers	In this lesson students learn the difference between monomers and polymers. They also see examples of natural and synthetic polymers.	45	Compare three examples of synthetic polymers Describe the structures and functions of four types of natural polymers Recognize how to test for sugars, starches, lipids, and proteins
 Quiz: Polymers			
 Fossil Fuels	In this lesson students learn about the combustion of fossil fuels.	45	Describe the formation, composition, and uses of three types of fossil fuels Distinguish complete combustion from incomplete combustion of fossil fuels Consider varying viewpoints on the topic of fossil fuels
 Quiz: Fossil Fuels			
 Reactions in Cells	This lesson compares and contrasts photosynthesis and cellular respiration. It also teaches students how enzymes and vitamins facilitate reactions.	45	Compare photosynthesis and cellular respiration Explain how enzymes and vitamins help reactions take place in cells
 Quiz: Reactions in Cells			
 Posttest 9			

Module 10: Nuclear Chemistry

Lesson	Description	Time (min)	Objective(s)
 Nuclear Chemistry	This lesson contains a video about nuclear medicine.	15	

Lesson	Description	Time (min)	Objective(s)
 Radioactivity	In this lesson students classify nuclear radiation as alpha particle, beta particles, or gamma rays. Students also learn about the sources of nuclear radiation.	45	Describe the process of nuclear decay Classify nuclear radiation as alpha particles, beta particles, or gamma rays Balance nuclear equations Identify sources of nuclear radiation, and describe how nuclear radiation affects matter
 Quiz: Radioactivity			
 Rates of Nuclear Decay	This lesson describes nuclear decay and half-life. It shows how radioisotopes can be used to estimate the age of matter.	45	Define half-life and relate half-life to the age of a radioactive sample Describe how radioisotopes are used to estimate the age of materials Consider varying viewpoints on the topic of radon testing in schools
 Quiz: Rates of Nuclear Decay			
 Artificial Transmutation	This lesson provides an overview of how nuclear reactions occur in a laboratory.	45	Describe and identify examples of transmutation Describe how transuranium elements are synthesized Explain how particle accelerators have been used in scientific research
 Quiz: Artificial Transmutation			

Lesson	Description	Time (min)	Objective(s)
 Fission and Fusion	This lesson describes how nuclear forces can vary. Students also learn about nuclear fission and nuclear fusion.	45	Compare and contrast nuclear forces Describe the process of nuclear fission Describe the process of nuclear fusion Review the development of nuclear chemistry over time
 Quiz: Fission and Fusion			
 Posttest 10			

Review Test

Lesson	Description	Time (min)	Objective(s)
 Review Test			

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Motion

Lesson	Description	Time (min)	Objective(s)
 Motion	This lesson contains a video about navigation devices.	15	
 Distance and Displacement	This lesson describes how frames of reference are used to measure motion. Students learn how to measure distance in SI units and calculate displacement using vector addition.	45	<p>Identify the frames of reference and describe how they are used to measure motion</p> <p>Distinguish between distance and displacement</p> <p>Calculate displacement using vector addition</p>
 Quiz: Distance and Displacement			
 Speed and Velocity	In this lesson students identify the SI units for measuring speed. Students learn how to combine velocities, interpret distance- time graphs, and calculate the speed of objects using slope.	45	<p>Compare and contrast average speed and instantaneous speed</p> <p>Interpret distance-time graphs</p> <p>Describe how velocities combine Use a distance-time graph to determine speed</p>
 Quiz: Speed and Velocity			

Lesson	Description	Time (min)	Objective(s)
 Acceleration	This lesson describes the changes in motion that produce positive and negative acceleration, and explains the difference between constant and instantaneous acceleration. Students calculate and graph acceleration using speed, time, and distance.	45	<ul style="list-style-type: none"> Identify changes in motion that produce acceleration Calculate the acceleration of an object Interpret speed-time and distance-time graphs Describe instantaneous acceleration
 Quiz: Acceleration			
 Posttest 1			

Module 2: Forces and Motion

Lesson	Description	Time (min)	Objective(s)
 Forces and Motion	This lesson contains a video about terminal speed and sky diving.	15	
 Forces	This lesson presents examples of forces, including gravitation and four different types of friction. Students identify the SI units that are used to measure force, and discover how these forces affect the motion of objects.	45	<ul style="list-style-type: none"> Describe examples of force and identify appropriate SI units used to measure force Explain how the motion of an object is affected when balanced and unbalanced forces act on it Compare and contrast the four kinds of friction Describe how Earth's gravity and air resistance affect falling objects Describe the path of a projectile and identify the forces that produce projectile motion
 Quiz: Forces			

Lesson	Description	Time (min)	Objective(s)
 Newton's First and Second Laws	This lesson presents Newton's first and second laws of motion. Students identify and distinguish between the concepts of mass, weight, and inertia, and use the second law to calculate acceleration, force, and mass values.	45	Describe Newton's first law of motion and its relation to inertia Describe Newton's second law of motion and use it to calculate acceleration, force, and mass values Relate the mass of an object to its weight Determine how length and steepness of a ramp affect the rate of acceleration on an object
 Quiz: Newton's First and Second Laws			
 Newton's Third Law	This lesson discusses Newton's third law of motion, including the relationship between action and reaction forces. In the lesson, students also learn how to calculate momentum.	45	Explain how action and reaction forces are related according to Newton's third law of motion Calculate the momentum of an object and describe what happens when momentum is conserved during a collision Review the development of amusement park rides over time
 Quiz: Newton's Third Law			
 Universal Forces	This lesson addresses electromagnetic, nuclear, gravitational, and centripetal forces. It discusses Newton's law of universal gravitation and explains how gravitational and centripetal forces affect the orbits of the moon and artificial satellites.	45	Identify the forms of electromagnetic force that can both attract and repel Identify and describe the universal forces acting within the nucleus Define Newton's law of universal gravitation and describe the factors affecting gravitational force Describe centripetal force and the type of motion it produces
 Quiz: Universal Forces			

Lesson	Description	Time (min)	Objective(s)
★ Posttest 2			

Module 3: Forces in Fluids

Lesson	Description	Time (min)	Objective(s)
 Forces in Fluids	This lesson contains a video about airplane motion.	15	
 Fluid Pressure	This lesson teaches students how to calculate pressure. It explains how altitude affects air pressure and how depth affects pressure exerted by water.	45	Describe and calculate pressure Describe the relationship between water depth and the pressure it exerts Explain how altitude affects air pressure
 Quiz: Fluid Pressure			
 Forces and Pressure in Fluids	This lesson discusses how pressure is transmitted in a fluid and how speed and pressure of a fluid are related. Pascal's and Bernoulli's principles are covered.	45	Describe how pressure is transmitted in a fluid according to Pascal's principle Explain how the speed and pressure of a fluid are related according to Bernoulli's principle
 Quiz: Forces and Pressure in Fluids			
 Buoyancy	In this lesson students learn about the effects of buoyancy on objects. The lesson discusses the relationships between buoyancy and the weight, displacement, and density of objects, and includes an explanation of Archimedes' principle.	45	Explain the effect of buoyancy on the apparent weight of an object Use Archimedes' principle to explain the relationship between displacement and buoyant force Describe the relationship between density and buoyancy
 Quiz: Buoyancy			
★ Posttest 3			

Lesson	Description	Time (min)	Objective(s)
 Work, Power, and Machines	This lesson contains a video about bikes and gears.	15	
 Work and Power	This lesson describes the relationships between force, work, and power. Students learn how to calculate work and power in SI units.	45	Describe the conditions that must exist for a force to do work on an object Calculate the work done on an object Describe and calculate power
 Quiz: Work and Power			
 Work and Machines	This lesson defines a machine and describes how it makes work easier. Students learn the relationship between the work input and the work output of a machine.	45	Describe what a machine is and how it makes work easier to do Relate the work input to a machine to the work output of the machine Review the development of machines from the 1700s to the early 1900s
 Quiz: Work and Machines			
 Mechanical Advantage	In this lesson students learn how to calculate mechanical advantage and compare actual to ideal mechanical advantage. Students also calculate efficiency and discover why the efficiency of a machine is less than 100%.	45	Compare a machine's actual mechanical advantage to its ideal mechanical advantage Explain why the efficiency of a machine is always less than 100% Determine the mechanical advantage of a pair of bicycle gears
 Quiz: Mechanical Advantage			

Lesson	Description	Time (min)	Objective(s)
 Simple Machines	This lesson presents the simple machines: lever, wheel and axle, inclined plane, wedge and screw, and pulleys. Compound machines are also covered.	45	<p>Name, describe, and give an example of a lever</p> <p>Name, describe, and give an example of a wheel and axle</p> <p>Name, describe, and give an example of an inclined plane</p> <p>Name, describe, and give examples of a wedge and a screw</p> <p>Name, describe, and give examples of pulleys and pulley systems</p> <p>Define and identify compound machines</p>
 Quiz: Simple Machines			
 Posttest 4			

Module 5: Energy

Lesson	Description	Time (min)	Objective(s)
 Energy	This lesson contains a video about roller coasters and the conversion of energy.	15	

Lesson	Description	Time (min)	Objective(s)
 Energy and Its Forms	<p>This lesson describes the relationship between work and energy. It discusses the two general energy types, kinetic and potential, and introduces the various forms of energy, including mechanical, chemical, electrical, electromagnetic, and nuclear.</p>	45	<p>Describe the relationship between work and energy</p> <p>Relate kinetic energy to mass and speed and calculate these quantities</p> <p>Analyze how potential energy is related to an object's position and give examples of gravitational and elastic potential energy</p> <p>Give examples of the major forms of energy and explain how each is produced</p> <p>Describe how the energy of a moving object is influenced by its mass</p>
 Quiz: Energy and Its Forms			
 Conversion and Conservation	<p>This lesson describes the relationship between energy and mass. It shows, according to the law of conservation of energy, how energy can be converted from one form to another.</p> <p>Students solve equations that show the conservation of mechanical energy.</p>	45	<p>Describe conversions of energy from one form to another</p> <p>State and apply the law of conservation of energy</p> <p>Analyze how energy is conserved in conversions between kinetic energy and potential energy and solve equations that equate initial energy to final energy</p> <p>Describe the relationship between energy and mass and calculate how much energy is equivalent to a given mass</p>
 Quiz: Conversion and Conservation			
 Energy Resources	<p>This lesson discusses renewable and nonrenewable energy resources and suggests ways that resources can be conserved.</p>	45	<p>Classify energy resources as renewable or nonrenewable</p> <p>Describe ways to conserve energy resources</p>
 Quiz: Energy Resources			

Lesson	Description	Time (min)	Objective(s)
★ Posttest 5			

Module 6: Thermal Energy and Heat

Lesson	Description	Time (min)	Objective(s)
 Thermal Energy and Heat	This lesson contains a video about radiant energy and solar heating.	15	
 Thermal Energy and Matter	In this lesson students discover how thermal energy is transferred through the movement of particles in objects. Thermal energy is related to temperature, mass, and specific heat.	45	<p>Explain how heat and work transfer energy</p> <p>Calculate thermal energy, temperature change, or mass using the specific heat equation</p> <p>Describe how a calorimeter operates and calculate thermal energy changes or specific heat using calorimetry measurements</p>
 Quiz: Thermal Energy and Matter			
 Heat	This lesson presents the three major types of heat transfer: conduction, convection, and radiation.	45	<p>Describe conduction</p> <p>Describe convection</p> <p>Describe radiation</p>
 Quiz: Heat			
 The Laws of Thermodynamics	This lesson introduces the three laws of thermodynamics. Concepts of work and heat are related to the conservation of energy within a closed system. Heat engines are also discussed.	45	<p>Apply the law of conservation energy to conversions between thermal energy and other forms of energy</p> <p>Apply the second law of thermodynamics in situations where thermal energy moves from cooler to warmer objects</p> <p>State the third law of thermodynamics</p>

🔍 Quiz: The Laws of Thermodynamics			
------------------------------------	--	--	--

Lesson	Description	Time (min)	Objective(s)
📁 Using Heat	In this lesson students discover how various types of heating and cooling systems operate.	45	Describe how the different types of heating systems operate Describe how cooling systems, such as refrigerators and air conditioners, operate
🔍 Quiz: Using Heat			
★ Posttest 6			

Module 7: Mechanical Waves and Sounds

Lesson	Description	Time (min)	Objective(s)
📁 Mechanical Waves and Sounds	This lesson contains a video about noise-cancellation technology.	15	
📁 Mechanical Waves	In this lesson students classify types of mechanical waves and learn how they are produced. Transverse, longitudinal, and surface waves are covered.	45	Define mechanical waves and relate waves to energy Describe transverse waves and discuss how they are produced Describe longitudinal waves and discuss how they are produced Describe surface waves and discuss how they are produced
🔍 Quiz: Mechanical Waves			

 Properties of Mechanical Waves	This lesson describes the frequency, period, and wavelength of different types of mechanical waves. Students solve equations relating these properties to wave speed and learn how to measure the amplitude of a wave.	45	Define frequency, period, and wavelength and describe these properties for different kinds of waves Solve equations relating wave speed to wavelength and frequency or period Describe how to measure amplitude and relate amplitude to the energy of a wave
 Quiz: Properties of Mechanical Waves			

Lesson	Description	Time (min)	Objective(s)
 Behavior of Waves	This lesson shows how waves are affected by reflection, refraction, and diffraction. In the lesson, students also learn about standing waves and wave interference.	45	Describe how reflection, refraction, and diffraction affect waves Distinguish between constructive and destructive interference and explain how standing waves form
 Quiz: Behavior of Waves			
 Sound	This lesson explains the properties of sound waves. It describes how relative motion determines the frequency of sound heard by an observer.	45	Describe the properties of sound waves and explain how sound is produced and reproduced Explain how relative motion determines the frequency of sound an observer hears Read varying viewpoints on the topic of noise pollution in the ocean
 Quiz: Sound			

 Hearing	In this lesson students explore the principle regions of the human ear and their functions. Such applications as ultrasound and music are also presented.	45	Analyze the functions of the main regions of the human ear Describe how sound waves behave in applications such as ultrasound and music Review the development of sound recording over time
 Quiz: Hearing			
 Posttest 7			

Module 8: The Electromagnetic Spectrum and Light

Lesson	Description	Time (min)	Objective(s)
 The Electromagnetic Spectrum and Light	This lesson contains a video about the use of electromagnetic radiation to detect forgery in art.	15	

Lesson	Description	Time (min)	Objective(s)
 Electromagnetic Waves	This lesson introduces students to the characteristics of electromagnetic waves and some of the properties of light. Students make calculations to determine wavelength and frequency.	45	Describe the characteristics of electromagnetic waves in a vacuum and how Michelson measured the speed of light Calculate the wavelength and frequency of an electromagnetic wave given its speed Describe the evidence for the dual nature of electromagnetic radiation Describe how the intensity of light changes with distance from a light source
 Quiz: Electromagnetic Waves			
 Electromagnetic Spectrum	In this lesson students classify different wavelengths and frequencies of radiation in the electromagnetic spectrum, including radio and infrared waves, visible light, ultraviolet rays, and gamma and x-rays.	45	Rank and classify electromagnetic waves based on their frequencies and wavelengths Describe the uses for radio waves and infrared rays Describe the uses for visible light, ultraviolet rays, X-rays, and gamma rays
 Quiz: Electromagnetic Spectrum			
 Behavior of Light	In this lesson students classify transparent, translucent, and opaque materials and discover what happens when light is reflected, refracted, polarized, or scattered.	45	Classify materials as transparent, translucent, or opaque to visible light Describe what happens when light is reflected, refracted, polarized, or scattered
 Quiz: Behavior of Light			

Lesson	Description	Time (min)	Objective(s)
 Color	This lesson describes the factors that determine the colors of objects. In the lesson students distinguish between colors of light and colors of pigments, and classify these colors as primary or secondary.	45	Explain how a prism disperses white light into different colors Analyze factors that determine the color of an object Distinguish among primary, secondary, and complementary colors of light and of pigments
 Quiz: Color			
 Posttest 8			

Module 9: Optics

Lesson	Description	Time (min)	Objective(s)
 Optics	This lesson contains a video about fiber optics.	15	
 Mirrors	This lesson describes the physical characteristics of plane, concave, and convex mirrors. Students distinguish between the types of images formed by these mirrors.	45	Describe the law of reflection Describe how a plane mirror produces an image Describe the physical characteristics of plane, concave, and convex mirrors and distinguish between the types of images they form
 Quiz: Mirrors			
 Lenses	This lesson describes the physical characteristics of convex and concave lenses and discusses the principles of refraction and internal reflection. Students distinguish between the types of images formed by convex and concave lenses.	45	Explain what causes light to refract Describe the physical characteristics of concave and convex lenses and distinguish between the types of images they form Describe total internal reflection and explain its relationship to the critical angle Read varying viewpoints on the topic of video surveillance

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Lenses			
📁 Optical Instruments	In this lesson students learn about the optical properties of reflecting and refracting telescopes, cameras, and microscopes.	45	Distinguish between how reflecting and refracting telescopes form images Explain how cameras regulate and focus light to form images Describe how light travels in a compound microscope to produce an enlarged image Review the development of photography over time
🔍 Quiz: Optical Instruments			
📁 The Eye and Vision	This lesson discusses structures of the human eye and their functions. In the lesson students also learn about various ways that vision can be corrected.	45	Name the main parts of the eye and describe their functions Name common vision problems, identify their causes, and explain how they can be corrected
🔍 Quiz: The Eye and Vision			
★ Posttest 9			

Module 10: Electricity

Lesson	Description	Time (min)	Objective(s)
📁 Electricity	This lesson contains a video about the personal computer.	15	
📁 Electric Charge	This lesson examines electric force. It describes how electric forces and fields affect electric charge.	45	Analyze factors that affect the strength and direction of electric forces and fields Describe how electric forces and fields affect electric charges Describe how electric charges are transferred and explain why electric discharges occur

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Electric Charge			
📁 Electric Current	This lesson introduces the two types of current electricity: direct and alternating. Students learn how a potential difference causes a current to flow across a resistance, and they calculate voltage, current, and resistance using Ohm's law.	45	Describe electric current and identify the two types of current Describe the factors that affect resistance Explain how voltage produces electric current Calculate voltage, current, and resistance using Ohm's law
🔍 Quiz: Electric Current			
📁 Electric Circuits	In this lesson students learn how to analyze circuit diagrams for series and parallel circuits and to make calculations for electrical power and energy. The lesson also discusses electrical safety.	45	Analyze circuit diagrams for series circuits and parallel circuits Demonstrate how current moves in parallel and series circuits Solve equations that relate electric power to current, voltage, and electrical energy Describe devices and procedures for maintaining electrical safety
🔍 Quiz: Electric Circuits			
📁 Electronic Devices	This lesson describes analog and digital electronic devices. It explains how electron flow can be controlled in a circuit and shows how semiconductors are used in electrical components and microchips.	45	Explain how electronics conveys information with analog or digital signals Describe electronic devices used to control electron flow Describe how solid-state components are used in electronic devices Read varying viewpoints on the topic of electric cars
🔍 Quiz: Electronic Devices			

Lesson	Description	Time (min)	Objective(s)
★ Posttest 10			

Module 11: Magnetism

Lesson	Description	Time (min)	Objective(s)
 Magnetism	This lesson contains a video about magnetic resonance imaging(MRI).	15	
 Magnets and Magnetic Fields	This lesson describes magnetic fields and magnetic forces and their orientation to magnetic poles. In the lesson students discover the relationship between magnetic fields and the domains within ferromagnetic materials.	45	Describe the effects of magnetic forces and magnetic fields and explain how magnetic poles determine the direction of magnetic forces Explain the behavior of ferromagnetic materials in terms of magnetic domains
 Quiz: Magnets and Magnetic Fields			
 Electromagnetism	This lesson explores the relationships between electrical currents and magnetic fields. Students learn how to determine the direction of a magnetic field and how to identify the factors that affect field strength in solenoids and electromagnets.	45	Describe how a moving electric charge creates a magnetic field and determine the direction of the magnetic field based on the type of charge and the direction of its motion Explain how solenoids and electromagnets are constructed and describe factors that affect the field strength of both Describe how electromagnetic devices use the interaction between electric currents and magnetic fields
 Quiz: Electromagnetism			

Lesson	Description	Time (min)	Objective(s)
📖 Electrical Energy	This lesson examines methods of generating electrical currents and shows how electrical energy is produced, transmitted, and used in the home. In the lesson, students analyze factors that affect the voltage and current outputs of transformers.	45	Describe how electric current is generated by electromagnetic induction Compare AC and DC generators and explain how they work Analyze factors that determine the output voltage and current produced by a transformer Summarize how electrical energy is produced, transmitted, and converted for use in the home
📝 Quiz: Electrical Energy			
★ Posttest 11			

Review Test

Lesson	Description	Time (min)	Objective(s)
★ Review Test			

Physical Science

Physical Science A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: This is the first of two courses that comprise Physical Science. Throughout the semester, the student will be introduced to a variety of basic concepts in the field of chemistry. The student will also be introduced to the forces and motion, including topics of Newton's laws and the conservation of momentum.

This course consists of varied curriculum that provides the student the opportunity to use a scientific approach to problem-solving and making real-world connections. The student will investigate how matter is classified, explore the structure of an atom, identify groups within the periodic table, compare and contrast chemical reactions, study the properties of acids and bases and identify how to apply forces and motion to objects.

Semester A Outline

1. Course Overview

1. Course Overview

2. Atomic Structure

1. Atomic Structure Introduction

2. Composition of Atoms

- In this section, you will develop models to describe the composition of atoms.
- In this lesson, you will explore this law in detail using a PhET® simulation titled Build an Atom.

3. Molecules and Structures

- In this section, you will analyze models to describe the atomic composition of molecules and structures formed by covalent, ionic, and metallic bonds.

4. Periodic Table Introduction

- In this section, you will describe patterns in the properties of similarly grouped elements by asking questions about locations of common elements on the periodic table.
- In this section, you will examine historical experiments that led scientists to determine the structure of the atom and analyze the patterns in the periodic table.
- In this lesson you will explore Rutherford scattering in detail using a PhET® simulation titled Rutherford Scattering.

5. Atomic Number

- In this section, you will use information embedded in the structure of the periodic table to help you predict the relative properties of elements.

6. Stable Ions

- In this section, you will discover more information embedded in the structure of the periodic table regarding each atom's protons, neutrons, and electrons.

7. Valence Electrons

- In this section, you will describe electrons in the outermost energy level of atoms in the periodic table that are helpful in making predictions.

8. Bonds

- In this section, you will use the periodic table to predict the number and types of chemical bonds that atoms of elements can form.

9. Ions

- In this section, you will examine the periodic table further and use energy level diagrams to predict the number and charges of stable ions that might form from specific atoms in the table.

10. Atomic Structure Apply

11. Atomic Structure Review

12. Atomic Structure Unit Test

3. Properties

1. Properties Introduction

2. Thermal Energy and Kinetic Molecular Theory

- In this section, you will develop a model that predicts and describes changes in particle motion, temperature, and state of a pure substance when thermal energy is added or removed.
- In this section, you will describe phase transitions in terms of the kinetic molecular theory.

3. Gases Under Pressure

- In this section, you will describe the relationships among pressure, temperature, and volume of an enclosed gas when only the amount of gas is constant.
- In this section, you will determine molar quantities using computational thinking based on the ideal gas law.
- In this lesson you will explore this law in detail using a PhET® simulation titled Gases Intro.

4. Solutes and Solvents

- In this section, you will use models to explain how solutes dissolve in solvents.
- In this section, you will explore how temperature and pressure affect the solubility of different solutes.
- In this lesson you will explore concentration in detail using the PhET® simulation, "Concentration."

5. Ph, Acids and Bases

- In this section, you will use the concept of pH as a model to predict the relative properties of strong, weak, concentrated, and dilute acids and bases.
- In this section, you will comment on the strengths of two acids or two bases with similar composition.
- In this lesson you will explore pH in detail using a PhET® simulation, "pH Scale."

6. Acid Base Solutions

- In this lesson you will explore acids and bases in detail using a PhET® simulation, “Acid-Base Solutions.”
7. Properties Apply
 8. Properties Review
 9. Properties Unit Test

4. Chemical Reactions

1. Chemical Reactions Introduction
2. Physical and Chemical Change
 - In this section, you will distinguish between chemical and physical change.
3. Chemical Reactions
 - In this section, you will describe the law of conservation of mass in chemical reactions.
 - In this section, you will describe what takes place during chemical reactions at the atom level.
4. Patterns of Properties
 - In this section, you will use knowledge of the periodic table, patterns of chemical properties, and understanding of electron energy levels to better understand chemical reactions.
5. Balance of Atoms
 - In this section, you will explain the fact that the total number of atoms of each element is the same in the reactants and the products of a chemical reaction.
 - In this lesson you will explore reactions in detail using a PhET® simulation titled Reactants, Products and Leftovers
6. Law of Conservation of Matter
 - In this section, you will explain the law of conservation of matter.
7. Conservation in Chemical Reactions
 - In this section, you will describe how the total number of atoms does not change in a chemical reaction.
 - In this section, you will develop a model to describe how the total number of atoms does not change in a chemical reaction.
8. Covalent and Ionic Bonding
 - In this section, you will use valence electron states and electronegativity to explain a simple chemical reaction, including the numbers and types of bonds that each atom forms.
 - In this section, you will explain the experimental basis for compounds being composed of atoms.
9. Types of Reactions
 - In this section, you will describe the characteristics of redox, acid-base, synthesis, and single- and double-replacement chemical reactions.
 - In this section, you will use models to predict the products of chemical reactions.
10. Reaction Rates Portfolio 1
 - In this section, you will explain the effects of changing the temperature or concentration on chemical reaction rates.
11. Reaction Rates Portfolio 2

- In this section, you will evaluate evidence to explain how increasing the concentration of reactants causes an increase in the rate of a chemical reaction.
- In this section, you will evaluate evidence to explain how increasing the temperature of reactants causes an increase in the rate of a chemical reaction.

12. Reaction Rates Portfolio 3

- In this section, you will describe how changing the concentration or temperature of reactants affects the rate of a chemical reaction.

13. Total Bond Energy

- In this section, you will develop a model to illustrate that the release or absorption of energy from a chemical reaction depends upon the changes in total bond energy.

14. Changes in Bond Energy

- In this section, you will describe the changes in bond energies during reactions.

15. Chemical Reactions Apply

16. Chemical Reactions Review

17. Chemical Reactions Unit Test

5. Nuclear Processes

1. Nuclear Processes Introduction

2. Energy Release

- In this section, you will describe parts of a model that shows the composition of the nucleus of the atom.

3. Modeling Nuclear Processes

- In this section, you will develop models that show the relationships between components that underlie several nuclear processes.

4. Modeling Fusion

- In this section, you will develop a model that shows a process called nuclear fusion in which two nuclei merge to form a single, larger nucleus.

5. Modeling Fission

- In this section, you will develop a model that shows a process called nuclear fission in which a nucleus splits into two or more parts.

6. Radioactive Decay Energy

- In this section, you will develop models of radioactive decay that show the differences in the types of energy and/or particles released.

7. Alpha Particle Emission

- In this section, you will develop a radioactive decay model that classifies alpha decay as a type of nuclear fission and beta and gamma decays as not nuclear fission.

8. Nuclear Processes Apply

9. Nuclear Processes Review

10. Nuclear Processes Unit Test

6. Newton's Laws

1. Newton's Laws Introduction

2. Newton's First Law of Motion

- In this section, you will explain Newton's first law of motion supported by real-life examples as evidence.

3. Newton's Second Law of Motion

- In this section, you will explain Newton's second law of motion supported by real-life examples as evidence.

4. Force, Mass and Acceleration

- In this section, you will analyze data related to Newton's second law of motion by using tools, technologies, and/or models.
- In this lesson, you will explore the relationship between net force, mass, and acceleration in detail using a PhET® simulation titled Force and Motion Basics: Acceleration.

5. Newton's Third Law of Motion

- In this section, you will explain how Newton's third law applies to problems involving the motion of two colliding objects.

6. Collision Forces

- In this section, you will design a solution to a real-life collision problem that considers equal and opposite forces in order to calculate how much force is exerted by the first object on the second, and by the second object on the first, during the collision.
- In this section, you will design a solution to a real-life collision problem that considers equal and opposite forces in order to calculate how much force is exerted by the first object on the second, and by the second object on the first, during the collision.

7. Newton's Laws Apply

8. Newton's Laws Review

9. Newton's Laws Unit Test

7. Force and Motion

1. Force and Motion Introduction

2. Position, Distance, and Displacement

- In this section, you will distinguish between various terms that describe how an object's position changes and how fast its position and direction change.

3. Vectors

- In this section, you will learn about the difference between vector and scalar quantities and how to use them.
- In this section, you will plan and carry out an investigation that uses mathematical and graphical models to analyze the motion of an object.

4. Magnitude and Direction of Force

- In this section, you will explain that forces have an extent and direction; they affect the motion of objects.

5. Forces that Change Motion

- In this section, you will describe forces that change an object's motion.

6. Velocity and Acceleration

- In this section, you will examine how net force affects an object's motion by examining velocity

vs. time graphs.

- In this section, you will learn to analyze motion by understanding the relationship between position, velocity, and acceleration.

7. Correlation and Causation

- In this section, you will differentiate between causal and correlational relationships linking force, mass, and acceleration.

8. Net Force and Acceleration

- In this section, you will explain the relationship $F_{\text{net}}=ma$ in terms of a net force on an object causing the object to accelerate.

9. Force and Motion Concepts

- In this section, you will learn about dynamic equilibrium in terms of reversible chemical reactions.

10. Force and Motion Apply

11. Force and Motion Review

12. Force and Motion Unit Test

8. Conservation of Momentum

1. Conservation of Momentum Introduction

2. Momentum

- In this section, you will calculate the momentum of each object in a system as the product of its mass and its velocity, $p = mv$.

3. The Moment of Impact

- In this section, you will describe the physical interaction of the two objects in terms of the change in the momentum of each object as a result of the interaction.

4. Using Vectors to Describe Momentum

- In this section, you will describe the total momentum of the system by calculating the vector sum of momenta of the two objects in the system.

5. Zero Net Force

- In this section, you will analyze the motion of the objects before the interaction to identify a system with essentially no net force on it.

6. Proving Conservation of Momentum

- In this section, you will defend the claim that the momentum of a system is the same before and after the interaction between the objects in the system so that momentum of the system is constant.

7. Momentum Portfolio Day 1

- In this section, you will design a device that minimizes the force on a macroscopic object during a collision.

8. Momentum Portfolio Day 2

- In this section, you will describe the criteria and constraints, along with the tradeoffs in design solutions that minimize a force on an object during a collision, such as in seatbelts or football helmets.

9. Momentum Portfolio Day 3

- In this section, you will improve the performance of a device that minimizes the force on a macroscopic object during a collision.

10. Conservation of Momentum Apply

- In this section, you will explain why a baseball that is rolling eventually stops and what happens to its kinetic energy.

11. Conservation of Momentum Review

12. Conservation of Momentum Unit Test

9. Physical Science A Semester Review and Exam

1. Physical Science A Semester Review

2. Physical Science A Semester Exam

Semester B Summary: This is the second of two courses that comprise Physical Science. Throughout the semester, the student will study a variety of essential physics concepts including energy of motion, energy and forces, thermal energy, non-contact forces, waves, and electromagnetic radiation. This course includes a variety of instructional strategies and provides the student the opportunity to use a scientific approach to problem-solving and making real-world connections. Physical Science B includes hands-on explorations and virtual simulations to enhance the student's comprehension of key concepts.

Semester B Outline

1. Course Overview

1. Course Overview

2. Force and Work

1. Force and Work Introduction

2. Force and Work Relationships

- In this section, you will scientifically describe the relationship between force and work.

3. Pulleys and Incline Planes

- In this section, you will describe pulleys and inclined planes, including specialized inclined planes like the screw.

4. Levers

- In this section, you will identify and describe the different classes of levers.

5. Efficiency of Machines

- In this section, you will explain how the efficiency of a machine can be improved by reducing the effort or the amount of energy transferred to the surrounding environment as it moves an object.

6. Force and Work Apply

7. Force and Work Review

8. Force and Work Unit Test

3. Gravity

1. Gravity Unit Introduction

2. Gravitational Force, Attraction, and Mass

- In this section, you will define and describe gravitational force and explain the gravitational relationship between Earth and objects on Earth.

3. Investigating Gravity

- In this section, you will plan an investigation to provide evidence that the effect of gravity on earthly objects is the same regardless of the mass of those objects.

4. Analyzing Gravitational Data

- In this section, you will analyze data from an investigation to provide evidence that the effect of gravity on earthly objects is the same regardless of the mass of those objects.

5. Gravity and Air Resistance

- In this section, you will explain the relationship between air resistance and gravity on a falling object.

6. Gravity Apply

7. Gravity Review

8. Gravity Unit Test

4. Energy of Motion

1. Energy of Motion Unit Introduction

2. Kinetic and Potential Energy

- In this section, you will describe the relationship between the energy an object possesses when it is in motion and its stored energy because of its position relative to Earth.

3. Factors that Affect Kinetic Energy

- In this section, you will record how changing the mass and the speed of an object affect the energy it possesses because it is in motion.

4. Predicting Changes in Kinetic Energy

- In this section, you will predict how changing the mass or speed of an object will change the energy the object possesses because it is in motion.

5. Potential Energy of a System

- In this section, you will design a visual or 3-D model to represent how the positioning of multiple objects in a system can influence the system's stored energy.

6. Energy Transfer and Kinetic Energy

- In this section, you will construct an explanation, by using a real-life example, of how energy transfer can be shown through changes in energy that an object possesses because of its motion.

7. Renewable and Non-renewable Energy

- In this section, you will learn the differences between renewable and non-renewable energy resources.

8. Energy of Motion Apply

- In this section, you will describe what forms of energy are involved in the process of popping popcorn as well as what factors affect your popping session and how.

9. Energy of Motion Review

10. Energy of Motion Unit Test

5. Energy and Forces

1. Energy and Forces Introduction

2. Two Object Interaction

- In this section, you will explain the nature of the interaction and the relative magnitude and direction of the net force on when two objects interact.
- In this section, you will describe the relationships between parts of a model of two objects interacting through electric or magnetic fields to show the forces and changes in energy involved when two objects interact.

3. Stored Energy Changes I

- In this section, you will determine whether the energy stored in the field increased, decreased, or remained the same when the objects interacted.

4. Stored Energy Changes II

- In this section, you will defend a claim that the change in the energy stored in the field is consistent with the change in energy of the objects

5. Cause and Effect

- In this section, you will describe the cause and effect relationships on a qualitative level between forces produced by electric or magnetic fields and the change of energy of the objects in the system.

6. Energy and Forces Motion Portfolio 1

- In this section, you will design a device that converts one form of energy into another form of energy.

7. Energy and Forces Motion Portfolio 2

- In this section, you will design an experiment to test how the strength of an electromagnet can be increased or decreased.

8. Energy and Forces Motion Portfolio 3

- In this section, you will systematically and quantitatively evaluate the performance of your electromagnet, pulling together what you have learned about electricity and magnetism in order to understand their intertwined relationship.

9. Energy of Four Forces

- In this section, you will compare the magnitude and range of the four fundamental forces.

10. Energy and Forces Apply

- In this section, you will determine how a practical application of electric and magnetic fields depends on charged or magnetic objects or particles and which role is played by electric or magnetic fields.

11. Energy and Forces Review

12. Energy and Forces Unit Test

6. Thermal Energy

1. Thermal Energy Unit Introduction

2. Kinetic and Thermal Energy

- By the end of this lesson, you will be able to explain the relationship between kinetic (movement) energy and thermal energy.

3. Matter and Temperature

- In this section, you will identify and describe properties of matter in relation to energy resulting from motion and heat energy as measured by temperature.

4. Energy Transfer and Temperature

- In this section, you will analyze data collected about how the transfer of energy resulting from motion affects the matter in relation to the temperature of a sample of the matter.

5. Kinetic Energy Transfer

- In this section, you will analyze data from an investigation about how thermal energy affects the molecules of a substance.

6. Thermal Energy Transfer Device Portfolio 1

- In this section, you will analyze how to maximize or minimize heat energy transfer.
- In this section, you will develop questions and discuss in groups about how to maximize or minimize heat energy transfer.
- In this section, you will design a device to minimize or maximize heat energy transfer.

7. Thermal Energy Transfer Device Portfolio 2

- In this section, you will test a device to minimize or maximize heat energy transfer.
- In this section, you will evaluate the effectiveness of a device to minimize or maximize heat energy transfer by using test data.

8. Thermal Energy Transfer Device Portfolio 3

- In this section, you will improve the design of the device to minimize or maximize heat energy transfer.

9. Thermal Energy Transfer

- In this section, you will explain with the aid of a model how heat energy is transferred from hotter regions or objects and into colder ones, by objects directly touching each other or across a gap.

10. Thermal Energy Apply

- In this section, you will develop a small-scale investigation that shows how the transfer of thermal energy affects the temperature of matter.

11. Thermal Energy Review

12. Thermal Energy Unit Test

7. **Non-Contact Forces**

1. Non-Contact Forces Introduction

2. Strength of Electrical Forces

- In this section, you will ask questions about data to determine the factors that affect the strength of electric forces.

3. Conductors and Insulators

- In this section, you will describe the similarities and differences of conductors and insulation material at the atomic level.

4. Electrical Energy Properties

- In this section, you will analyze data to describe the properties of electrical energy.

5. Electrical Circuits

- In this section, you will explain how energy is conserved as it is transferred and transformed in electrical circuits.
6. Strength of Magnetic Forces
 - In this section, you will analyze data to determine the factors that affect the strength of magnetic forces.
 7. Non-Contact Forces Portfolio 1
 - In this section, you will collect observations and generate questions about the strength of electric fields from a demonstration.
 8. Non-Contact Forces Portfolio 2
 - In this section, you will identify fields that exist between two objects that are not in contact.
 9. Non-Contact Forces Portfolio 3
 - In this section, you will evaluate an experimental design to provide evidence that fields exist between objects exerting forces on each other even though the objects are not in contact.
 - In this section, you will use the electric charges of the materials of two objects and the distance between the objects to identify the relative amount of force that each electric field will have.
 10. Electromagnetism in Use
 - In this section, you will explain how electric currents and magnetic fields are related to each other in generators, simple electrical motors, and magnets created by the flow of the electric current.
 11. Non-Contact Forces Apply
 - In this section, you will use the electric charges of the materials of two objects and the distance between the objects to identify the relative amount of force that each electric field will have.
 12. Non-Contact Forces Review
 13. Non-Contact Forces Unit Test

8. Waves

1. Waves Introduction
2. Lens and Mirrors
 - In this section, you will learn to use specific equations to locate the images formed by lenses and mirrors.
 - In this section, you will identify and describe refraction, reflection, diffraction, absorption, and superposition of light waves.
3. Wave Characteristics
 - In this section, you will compare mechanical and electromagnetic waves in terms of wave characteristics and behavior.
4. Sound Wave Phenomena
 - In this section, you will explain what happens to the observed frequency of a sound wave when the relative positions of an observer and wave source changes, such as in the Doppler effect.
 - In this section, you will communicate scientific and technical information about how the principle of superposition explains the resonance and harmonic phenomena in air columns and on strings and common sound devices.
5. Beat Frequency

- In this section, you will describe the phenomena of resonance frequencies and beat frequencies that arise from the interference of sound waves of slightly different frequencies.

6. Characteristics of Waves

- In this section, you will describe relevant components in mathematical representations.

7. Frequency and Wavelength

- In this section, you will identify and/or describe relevant components in the mathematical representations of waves. Your description will include the relationships between frequency, wavelength, and speed of waves traveling in various specified media.

8. The Speed of Sound

- In this section, you will demonstrate how the wave speed for a wave changes as the medium through which the wave travels changes.

9. Waves in Different Media

- In this section, you will predict the relative change in the wavelength of a wave when it moves from one medium to another. You will explain the different wave speeds using the mathematical relationship $v = f\lambda$.

10. Wavelength in Different Media

- In this section, you will express the relative change in wavelength in terms of cause (different media) and effect (different wavelengths but same frequency)

11. Wave Application

- In this section, you will assess claims about any of the three quantities when the other two quantities are known for waves traveling in various specified media.

12. Digital and Analog Systems

- In this lesson, you will evaluate questions and determine if they can be answered with examples of features associated with digital transmission and storage of information.

13. Life Without Digital Systems

- In this lesson, you will discuss how answers to questions about digital systems relate to real-life examples, such as emailing your homework to a teacher, copying music, using the internet for research, and social media.

14. Life Without Digital Systems Discussion

15. Pros and Cons of Digital Systems

- In this lesson, you will evaluate questions about digital systems and determine whether given features are advantages or disadvantages.

16. Waves Apply

- In this section, you will apply what you know about how wavelength, frequency, and wave speed are connected to study how animals use sound to communicate.

17. Waves Review

18. Waves Unit Test

9. Physical Science B Semester Review and Exam

1. Physical Science B Semester Review
2. Physical Science B Semester Exam

Physics

Physics A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

Physics A Standard is designed to describe the physical world using a small number of basic assumptions, concepts, and equations. The course emphasizes relating physics to the everyday world. Physics A focuses on understanding motion. The student will explore the concepts involved with motion in one- and two-dimensions, forces, work and energy, momentum and collisions, circular motion and gravitation. The students will recognize the importance of the laws of thermodynamics.

Approximately 40 percent of the course involves virtual laboratory investigations. Some activities will require ordinary household items such as rulers, meter sticks, balls or marbles, string, paper, and pencils.

Semester A Outline

1. Course Overview

1. Physics A Course Overview

2. Science Processes

1. Science Processes Introduction
 - In this section, you will practice empathic listening
2. Defining Science
 - In this section, you will define science and explain the limitations of science. You will also learn about lab safety and proper handling of chemical substances.
3. Accuracy and Precision
 - In this section, you will apply accuracy and precision along with significant figures in the context of the limitations of measurement.
4. Making a Scientific Hypothesis
 - In this section, you will identify a hypothesis as a tentative and testable statement.
5. Scientific Theories
 - In this section, you will define scientific theory and distinguish between theories and hypotheses.
6. Hypothesis vs. Theory

- In this section, you will distinguish the difference between a scientific hypothesis and a scientific theory.

7. Science Processes Review
8. Science Processes Unit Test

3. Kinematics

1. Kinematics Introduction
2. Distance and Displacement
 - In this section, you will distinguish between distance and displacement.
3. Speed and Velocity
 - In this section, you will distinguish between speed and velocity.
4. Acceleration
 - In this section, you will calculate the acceleration of an object in motion.
5. Projectile Motion
 - In this section, you will describe the path of a projectile in two dimensions.
6. Kinematics Portfolio 1
 - In this portfolio project, you will investigate the motion of a horizontally-launched marble. The learning experience will develop a framework for the process of experimentation and the analysis of data.
7. Kinematics Portfolio 2
 - In this section, you will complete a portfolio assessment analyzing the motion of a projectile launched on the horizontal.
8. Kinematics Apply
9. Kinematics Review
10. Kinematics Unit Test

4. Newton's Laws and Dynamics

1. Newton's Laws and Dynamics Introduction
2. Force and Newton's First Law
 - In this section, you will apply Newton's First Law and the concept of force in real-world scenarios.
3. Hooke's Law
 - In this section, you will calculate the spring constant of an elastic material by using data on force and displacement.
4. Net Force and Free-Body Diagrams
 - In this section, you will determine the net force on an object by analyzing a free-body diagram.
5. Second Law of Motion
 - In this section, you will analyze data that represent the net force on a macroscopic object, its mass (which is held constant), and its acceleration.
6. Correlation and Causation

- In this section, you will differentiate between causal and correlational relationships linking force, mass, and acceleration.

7. Newton's Third Law

- In this section, you will explain everyday phenomena, such as a hammer hitting a nail, using Newton's third law of motion. You will also compare the force pairs in given situations.

8. Friction

- In this section, you will compare kinetic and static friction.

9. Newton's Laws and Dynamics Apply

10. Newton's Laws and Dynamics Review

11. Newton's Laws and Dynamics Unit Test

5. Energy and Work

1. Energy and Work Introduction

2. Forms of Energy

- In this section, you will define energy and analyze the different forms it can take.

3. Energy Transfer

- In this section, you will describe relationships between components in classical models that account for energy.

4. Model Limitations

- In this section, you will identify and/or describe the limitations of the computational model, based on the assumptions that were made in creating the algebraic descriptions of energy changes and flows in the system.

5. Conservation of Mechanical Energy

- In this section, you will use mathematical thinking to calculate whether mechanical energy is being conserved in a given system

6. Energy and Work Apply

7. Energy and Work Review

8. Energy and Work Unit Test

6. Momentum

1. Momentum Introduction

2. What is Momentum

- In this section, you will calculate the momentum of each object in a system as the product of its mass and its velocity, $p=mv$.

3. Conservation of Momentum

- In this section, you will evaluate how the total momentum of a system of two interacting objects is constant if there is no net force on the system.

4. Proving Conservation of Momentum

- In this section, you will defend the claim that the momentum of a system is the same before and after the interaction between the objects in the system so that momentum of the system is constant.

5. Inelastic and Elastic Collisions

- In this section, you will analyze elastic and inelastic collisions considering conservation considerations.

6. Simple Machines and Efficiency

- In this section, you will obtain and communicate information to describe the efficiency of everyday machines, such as automobiles, hairdryers, refrigerators, and washing machines.

7. Momentum Portfolio 1

- In this portfolio, you will investigate the forces acting on a moving vehicle to analyze how seat belts and airbags save lives in a car crash.

8. Momentum Portfolio 2

- In this section, you will complete a portfolio assignment analyzing how seat belts and airbags save lives in a car crash.

9. Momentum Portfolio 3

- In this section, you will complete a portfolio assignment analyzing how seat belts and airbags save lives in a car crash.

10. Momentum Apply

11. Momentum Review

12. Momentum Unit Test

7. Circular Motion and Gravitation

1. Circular Motion and Gravitation Introduction

2. Centripetal Force

- In this section, you will describe the acceleration involved in circular motion.

3. Gravitational Attraction

- In this section, you will describe the gravitational attraction between two objects as the product of their masses divided by the separation distance squared, where a negative force is understood to be attractive.

4. Satellites

- In this section, you will analyze the motion of satellites in stable orbit.

5. Kepler's Laws of Planetary Motion

- In this section, you will apply Kepler's first law of planetary motion to understand the orbits of planets.

6. Rotation

- In this section, you will explain rotational motion using torque and rotational inertia.
- In this section, you will describe the rotational motion of objects using the conservation of energy and conservation of angular momentum
- In this section, we will learn how gravitational, electrical, and magnetic forces and torques give rise to rotational motion.

7. Circular Motion and Gravitation Apply

8. Circular Motion and Gravitation Review

9. Circular Motion and Gravitation Unit Test

8. Semester Review and Test

1. Physics A Semester Review
2. Physics A Semester Exam

Semester B: Summary:

Physics B Standard is designed to describe the physical world using a small number of basic assumptions, concepts, and equations. The course emphasizes relating physics to the everyday world. Physics B focuses on the characteristics of waves and describes the behavior of waves with emphasis on light and sound. The student will understand the relationship between electricity and magnetism. Finally, the student will gain a simple understanding of atomic physics.

Approximately 40 percent of the course involves virtual laboratory investigations. Some activities will require ordinary household items such as rulers, meter sticks, balls or marbles, string, paper, and pencils.

Semester B Outline

1. Course Overview

1. Physics Course Overview

2. Thermodynamics

1. Thermodynamics Introduction
2. First Law of Thermodynamics
 - In this section, you will define heat as a form of energy, which can not be created nor destroyed, but it can be converted to another form.
3. States of Matter
 - In this section, you will analyze the amount of heat energy needed to change a substance from one state to another using both a conceptual and a mathematical approach.
4. Thermal Energy Transfer Portfolio 1
 - In this portfolio, you will develop, conduct, and evaluate investigations of the second law of thermodynamics.
5. Thermal Energy Transfer Portfolio 2
 - In this section, you will develop an investigation plan for the second law of thermodynamics.
6. Thermal Energy Transfer Portfolio 3
 - In this section, you will collect and record data in an investigation of the second law of thermodynamics that can be used to calculate the change in thermal energy of each of the two components of a system.
7. Thermal Energy Transfer Portfolio 4
 - In this section, you will evaluate an investigation of the second law of thermodynamics.
8. Heat Engines and Efficiency
 - In this section, you will analyze thermal efficiency limitations according to the second law of thermodynamics.
9. Thermodynamics Apply

10. Thermodynamics Review
11. Thermodynamics Unit Test

3. Electricity and Circuits

1. Electricity and Circuits Introduction
2. Conductors and Insulators
 - In this section, you will analyze thermal efficiency limitations according to the second law of thermodynamics.
3. Coulomb's Law
 - In this section, you will describe the electrostatic force between two objects as the product of their individual charges divided by the separation distance squared, where a negative force is understood to be attractive.
4. Electric Fields
 - In this section, you will explore the qualitative and quantitative properties of electric fields.
5. Ohmic Device Resistance
 - In this section, you will apply conservation of energy concepts to the design of an experiment that will demonstrate the validity of Kirchhoff's Voltage Law, $\sum \Delta V = 0$, in a circuit with only a battery and resistors either in series or parallel.
6. Series and Parallel Circuits
 - In this section, you will analyze relationships in resistance, voltage, and current in parallel and series circuits.
7. Kirchhoff's Laws and Circuits
 - In this section, you will apply conservation of energy concepts to the design of an experiment that will demonstrate the validity of Kirchhoff's loop rule ($\sum V = 0$) in a circuit with only a battery and resistors in, at most, one pair of parallel branches.
8. Electricity and Circuits Apply
9. Electricity and Circuits Review
10. Electricity and Circuits Unit Test

4. Electricity and Magnetism

1. Electricity and Magnetism Introduction
2. Electric Current and Magnetic Field
 - In this section, you will describe a phenomenon under investigation, including how an electric current produces a magnetic field and that a changing magnetic field produces an electric current.
3. Investigating Currents and Fields
 - In this section, you will describe a phenomenon under investigation, including how an electric current produces a magnetic field and that a changing magnetic field produces an electric current.
4. Measurable Effects of Electromagnetism
 - In this section, you will investigate the relationship between an electric current and a magnetic field. This will include describing the data to be collected, conducting the investigation, and describing the evidence that will come from the data

5. Causal Relationships

- In this section, you will describe why the relationships between electric currents and magnetic fields must be causal and not correlational. You will cite specific cause-and-effect relationships.

6. Electricity and Magnetism Apply

7. Electricity and Magnetism Review

8. Electricity and Magnetism Unit Test

5. Waves

1. Waves Introduction

2. Comparing Waves

- In this section, you will describe why the relationships between electric currents and magnetic fields must be causal and not correlational. You will cite specific cause-and-effect relationships.

3. Characteristics of Waves

- In this section, you will describe relevant components in mathematical representations.

4. Frequency and Wavelength

- In this section, you will identify and/or describe relevant components in the mathematical representations of waves. Your description will include the relationships between frequency, wavelength, and speed of waves traveling in various specified media.

5. Wave Application

- In this section, you will assess claims about any of the three quantities when the other two quantities are known for waves traveling in various specified media.

6. Interference of Waves

- In this section, you will study the interference of traveling waves.

7. Sound Wave Phenomena

- In this section, you will explain what happens to the observed frequency of a sound wave when the relative positions of an observer and wave source changes, such as in the Doppler effect.

8. The Speed of Sound

- In this section, you will demonstrate how the wave speed for a wave changes as the medium through which the wave travels changes.

9. Nature of Light

- In this section, you will investigate how light travels.

10. Reflection and Refraction

- In this section, you will describe image formation by reflection from a flat mirror and by refraction through a convex lens.

11. Wavelength in Different Media

- In this section, you will express the relative change in wavelength in terms of cause (different media) and effect (different wavelengths but same frequency)

12. Waves Portfolio 1

- In this portfolio, you will investigate seismic waves.

13. Waves Portfolio 2

- In this section, you will complete a portfolio assignment analyzing how an understanding of seismic waves can be used to understand the interior of the Earth, design solutions for buildings, and save lives.

14. Waves Portfolio 3

- In this section, you will complete a portfolio assignment analyzing how an understanding of seismic waves can be used to understand the interior of the Earth, design solutions for buildings, and save lives.

15. Waves Apply

16. Waves Review

17. Waves Unit Test

6. Quantum Theory and Particle Physics

1. Quantum Theory and Particle Physics Introduction

2. Particle-Wave Duality

- In this section, you will evaluate how electromagnetic radiation can be described either by a wave model or a particle model by evaluating evidence for and against each position.

3. The Photoelectric Effect

- In this section, you will evaluate the photoelectric effect to determine how it supports the argument that electromagnetic radiation can be described by a particle model.

4. EM Radiation Energy Transfer Models

- In this section, you will evaluate the claims and reasoning for modeling electromagnetic radiation as both a wave and particle. You will consider the transfer of energy and information within and between systems and evaluate why for some aspects the wave model is more useful and for other aspects the particle model is more useful to describe the transfer of energy and information.

5. Mass-Energy Equivalence

- In this section, you will calculate mass-energy equivalence and describe its applications.

6. Atomic Structure

- In this section, you will compare the different parts of atoms.

7. Emission Spectra

- In this section, you will explain the emission spectra produced by various atoms.

8. Radioactivity and Radioactive Decay

- In this section, you will describe the probability of a decay event within a sample of unstable nuclei.

9. Absorbed Radiation Effects

- In this section, you will identify the characteristics, common sources, potential to cause harm, and applications of different types of electromagnetic radiation.

10. Half Lives and Radiocarbon Dating

- In this section, you will define the half-life ($t_{1/2}$) and decay constant λ .

11. Quantum Theory and Particle Physics Apply

12. Quantum Theory and Particle Physics Review

13. Quantum Theory and Particle Physics Unit Test

7. Semester Review and Test

1. Physics B Semester Review
2. Physics B Semester Exam

Cyber Charter School Application for Pennwood Cyber Charter School

Binder #3: Appendix A.2.d – A.2.f (Social Studies, World Languages, and Fine Arts Course Guides)

APPENDIX A CURRICULUM

A.2 COURSE GUIDES

d. SOCIAL STUDIES K - 12

This document is part of Appendix A: Curriculum.

It includes course guides for each Social Studies core class for students in Kindergarten through Grade 12.

- Social Studies K
- Social Studies 1
- Social Studies 2
- Social Studies 3
- Social Studies 4
- Social Studies 5
- Social Studies 6
- Social Studies 7
- Social Studies 8
- American Government
- American Government (Prescriptive)
- American Government (Honors)
- Economics
- Geography (World Geography)
- Geography and Society
- Pennsylvania State History 4
- Personal Finance
- Psychology
- US History
- US History Honors
- US History (Prescriptive)
- US History Honors
- World History
- World History Honors
- World History (Prescriptive)

Social Studies K

Social Studies K

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

Students learn the concepts of community, nation, and world in this course. They answer essential questions including: "How do people get what they need?"; "How is culture shared?"; and "How does life change throughout history?" A combination of interactive and hands-on exercises teaches students about personal responsibility, good citizenship, and basic geography. While learning about America's past and important historical figures, students research their personal history and heroes.

SEMESTER B

Students learn the concepts of community, nation, and world in this course. They answer essential questions including: "How do people get what they need?"; "How is culture shared?"; and "How does life change throughout history?" A combination of interactive and hands-on exercises teaches students about personal responsibility, good citizenship, and basic geography. While learning about America's past and important historical figures, students research their personal history and heroes.

Course Outline:

SEMESTER A

1. My Family, My School

1. How Do People Best Cooperate?
 - Define and describe cooperation
 - Identify how you have cooperated in the past
 - Identify examples of cooperation
2. What Makes a Good Citizen?
 - Explain that a good citizen takes turns, tells the truth, cooperates, takes part in patriotic activities, and respects others
3. What Are Rights? What Are Responsibilities?
 - Describe roles and responsibilities we have with our family at home and in the community
 - Identify personal rights, such as the right to food, clothing, and shelter, and the right to go to school
4. How Do We Get Along with Others?

- Explain how cooperating with others and being respectful is part of being a good citizen
 - Distinguish between problems and solutions
 - Identify solutions for problems
5. How Do We Find Main Ideas and Supporting Details?
- Identify the main idea and retell key details
6. What Rules Do We Follow?
- Explain why good citizens follow rules and laws
 - Describe rules at home and in the community
 - Identify the sequence of events, characters, and setting in a story about rules
7. Who Are Our Leaders?
- Identify leaders at home and in the community
 - Explain how leaders help people
8. How Do We Make Decisions?
- Describe how a person makes decisions and weighs consequences
 - Explain that groups make decisions by discussing and voting on choices
 - Make decisions about example problems
9. How Do We Solve Problems as Good Citizens?
- Propose solutions to problems that are fair and consistent with good citizenship
10. What Are Our Country's Symbols?
- Identify important symbols that stand for our country
 - Describe why we have symbols
11. What Are Our Country's Monuments?
- Identify why U.S. monuments and buildings are important
 - Identify where the President of the United States lives and works
12. My Family, My School Unit Test
- Describe how people cooperate when they make decisions and work together to get a job done
 - Explain that people are good citizens when they follow rules and laws
 - Show how people cooperate, share ideas, listen to others, and interact positively with many different people, such as family, friends, and classmates
 - Explain that U.S. symbols and monuments stand for and remind us of our country

2. **Everybody Works**

1. How Do People Get What They Need?
- Explain that people have jobs to get the things that they need
2. What Do We Need? What Do We Want?
- Distinguish between needs and wants
3. How Do We Get What We Need or Want?
- Recognize that people work to earn money to buy things they need or want
 - Explain that people buy, sell, and trade to get what they want or need

4. How Do We Use Money?

- Recognize that United States currency comes in different forms
- Recognize that people work to earn money to buy things they need or want

5. How Do Good Citizens Speak and Listen to Others?

- Speak to others using a clear voice and eye contact
- Listen politely and attentively as a good citizen when others speak

6. What Are Jobs That People Do?

- Describe jobs that people do and the tools that they need to work
- Explain that people work to earn money to pay for things that they want and need

7. How Do We Compare and Contrast Two Things?

- Compare and contrast different jobs and their tools

8. Why Do We Make Choices?

- Recognize that there is a limit to money and goods
- Explain that people must make choices because they cannot have everything they want

9. What Are Goods and Services?

- Distinguish between goods and services

10. How Do We Buy, Sell, and Trade?

- Act out buying, selling, and trading
- Discuss choices made when buying, selling, and trading

11. Everybody Works Unit Test

- Explain why people make choices about needs and wants.
- Describe how people do many kinds of work making goods or providing services.
- Infer that people buy things because they cannot make everything themselves.
- Explain that people sell things because others want to buy them.

3. Where We Live

1. What Is the World Like?

- Explain that the place where a person or animal lives affects how he/it lives

2. Where Do We Live?

- Identify your address
- Describe places in your neighborhood and community

3. Where Are Places Located?

- Describe the relative location of people, places, and things by using positional words
- Use directions and positional words to describe the locations of one place relative to another
- Locate and describe places in the school and in the community

4. What Do Maps Show?

- Explain that maps are simple, pictorial representations of large and small places on Earth
- Explain that maps help to locate different places
- Locate and distinguish between land and water on maps

- Identify physical and human characteristics of a place on a map
- Identify map symbols
- 5. What Are Cardinal Directions?
 - Identify cardinal directions
 - Locate cardinal directions on a map
- 6. What Are Landforms?
 - Identify basic landforms on a map and in images
- 7. What Are Bodies of Water?
 - Identify basic bodies of water (oceans, rivers, lakes)
 - Differentiate between land and water on a map
- 8. What Do Globes Show?
 - Explain that a globe helps to locate different places and is a model of the Earth
 - Differentiate land and water features on globes
- 9. Where We Live Unit Test
 - Explain how maps and globes are simple representations of places on Earth
 - Identify that the world is made up of landforms and bodies of water

SEMESTER B

1. More Where We Live

1. What Is Weather Like?
 - Identify weather as a physical characteristic of a place
 - Describe daily weather and its effects on people and places
2. What Are the Seasons?
 - Identify the four seasons
 - Describe patterns of weather and the effects on people and places
 - Describe how seasonal changes affect people
3. How Do We Identify Cause and Effect?
 - Identify how weather and landforms/bodies of water affect the way that people live in their communities
4. How Do We Use Earth's Resources?
 - Describe how human and physical characteristics of a place affect how and where people live
 - Identify ways people use natural resources to satisfy basic needs
 - Identify human-made and natural resources
5. How Does Our Environment Affect Us?
 - Explain how the weather and Earth's natural resources affect our behavior
6. More Where We Live Unit Test
 - Describe how the weather and seasons affect what people wear and do
 - Describe how physical features are located in specific places and how words can be used to describe the locations of human and physical features
 - Identify that people use the world's natural resources to satisfy basic needs

2. **Our Traditions**

1. What Are Your Family Traditions?
 - Explain that you learn about your family, neighborhood, and country through stories and holidays
 - Contrast ways that people celebrate
2. How Are People Alike and Different?
 - Explain that people have both similarities and differences
 - Identify ways in which people are alike and different
3. How Do We Classify Objects into Categories?
 - Classify types of communities where different people live
4. How Are Families Alike and Different?
 - Describe how individuals and families grow and change
 - Recognize nontraditional families
5. What Is Culture?
 - Recognize that there are many different cultures
 - Describe how culture is shared through art, music, customs, traditions, family celebrations, and language
6. How Do We Celebrate?
 - Identify celebrations as ways to show how we feel about special people and events
 - Explain that people celebrate in different ways
7. What Are National Holidays?
 - Explain that we celebrate special days to remember and honor people and events from our nation's past
 - Compare our nation's holidays with holidays of other cultures
8. Who Are American Folk Heroes?
 - Recognize that stories about folk heroes and legends convey traditions and values about America's past
 - Distinguish fact from fiction in American folk tales
9. What Are Other Cultures Like?
 - Identify similarities and differences among cultures
 - Recognize that various cultures enjoy different styles of music, art, dress, food, and languages
 - Identify contributions of different cultures
10. How Do I Celebrate?
 - Identify elements and characteristics of a celebration
11. Our Traditions Unit Test
 - Recognize that people are alike and different
 - Explain that people celebrate in many ways
 - Recognize that we learn about our country through stories and holidays
 - Explain that we are all part of culture

- Describe that there are many different cultures around the world

3. Life Then and Now

1. How Does Life Change Throughout History?
 - Recognize that history describes the past
 - Explain that we can learn about history from books, computers, museums, and people
2. What Is My Personal History?
 - Explain that every person has a history
3. How Do We Order Events In History?
 - Describe events of their day using sequence words
 - Arrange pictures and events in sequence
 - Use sequence words such as first, next, and last
4. How Do We Talk About Time?
 - Describe daily events in time order
 - Use words related to time and chronology, such as before, after, and now, to describe events of the school day in time order
5. How Do We Measure Time?
 - Recognize that time can be measured
 - Identify that time can be measured in days, weeks, months, and years
 - Explain that calendars represent days of the week and months of the year
 - Use terms related to time
6. What Is A Timeline?
 - Recognize that change occurs over time
 - Explain what a timeline shows
 - Describe how to place key events on a timeline
 - Explain how to read timelines
7. How Can We Learn About History?
 - Describe ways people learn about the past
 - Identify ways we can learn about history
 - Compare information from different types of sources
 - Develop an awareness of a primary source
8. How Do We Use Illustrations?
 - Use photographs to make predictions
 - Match photographs to text content
9. Who Are American Heroes from the Past?
 - Identify important people in U.S. history and their contributions
 - Describe actions of important individuals and how their actions affected the nation
10. How Have Families Changed?
 - Compare family life in the past and family life today

- Compare objects from the past and objects of today
 - Compare photographs of families in the past and families today
11. How Has School Changed?
- Describe how school today is the same as and different from school in the past
 - Compare photographs of schools today and schools in the past
12. How Have Communities Changed?
- Describe people and places in the school and in the community
 - Examine photographs of communities today and in the past and summarize changes
13. How Has Technology Changed?
- Explain how technology meets people's needs
 - Identify ways we use tools and technology today
 - Identify ways everyday life has both changed and remained the same
14. How Do I Create My Personal Timeline?
- Create a timeline to represent important events from the student's personal history
15. Life Then and Now Unit Test
- Explain that things change over time
 - Recognize that time can be measured
 - Explain that history is the story of our past
 - Identify that we learn about history from primary and secondary sources

Social Studies 1

Social Studies 1

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In Social Studies I A, the student will focus on how people in communities work together for the benefit of all. In this course, the student will learn about the various ways individuals contribute to their communities. This course emphasizes good citizenship, economics, and geography skills. The course text is Pearson's *myWorld Social Studies: Making Our Way* workbook. The student will build reading, listening, critical thinking, and problem-solving skills through the course activities. To learn more about communities, the student will explore maps, photographs, illustrations, music, and other resources. Multimedia resources, including videos and interactive websites, enhance and support the content.

Semester A Outline

1. My School, My Community

1. My School, My Community Unit Introduction
 - Describe how people can cooperate to help their community
2. I Am a Good Citizen Day 1
 - Identify and describe the characteristics of good citizenship, such as helping others, following rules, and working well with others
 - Identify ways to contribute to the common good of a variety of groups in school and in the community
3. I Am a Good Citizen Day 2
 - Identify ways to contribute to the common good of a variety of groups in school and in the community
4. Reading Skills: Fact and Opinion
 - Distinguish between fact and opinion
5. My Rights and Responsibilities Day 1
 - Define what a right is
 - Identify and describe the rights of citizens at home and in the community
6. My Rights and Responsibilities Day 2
 - Identify and describe the responsibilities of citizens at home and in the community

- Define cooperate
7. I Follow Rules Day 1
 - Identify and describe why rules are important
 - Identify rules at home and how people can vote to make rules
 8. I Follow Rules Day 2
 - Identify and describe why laws are important
 - Identify laws in the community
 9. 21st Century Skills: Conflict and Cooperation
 - Define and identify conflict
 - Identify how people can cooperate to resolve conflict
 10. My Leaders Day 1
 - Identify how leaders help people
 - Identify leaders at home
 11. My Leaders Day 2
 - Identify why leaders are important
 - Identify community leaders and how they help people
 12. My Government Day 1
 - Identify and describe how the government provides services to citizens and the community
 - Identify how the mayor leads the community government
 13. My Government Day 2
 - Identify how the government helps citizens and provides services
 - Identify state and national government leaders
 14. Symbols of My Country Day 1
 - Identify symbols that represent America
 15. Symbols of My Country Day 2
 - Identify symbols and songs that represent American values
 - Identify important national documents
 16. My School, My Community Unit Review
 - Identify and describe the characteristics and actions of good citizens, including how citizens can cooperate to solve problems in a community
 - Differentiate rights from responsibilities and rules from laws
 - Identify why leaders are important and how America's government works
 - Identify American symbols and describe the values they represent
 - Identify fact and opinion
 17. My School, My Community Unit Test
 - Identify and describe the characteristics and actions of good citizens, including how citizens can cooperate to solve problems in a community
 - Identify facts and opinions
 - Differentiate rights from responsibilities and rules from laws

- Identify why leaders are important and how America's government works
- Identify American symbols and describe the values they represent

2. Work in the Community

1. Work in the Community Unit Introduction
 - Identify and describe how people get what they need
2. What We Need, What We Want Day 1
 - Distinguish needs from wants
3. What We Need, What We Want Day 2
 - Distinguish needs from wants
 - Identify how people get what they need and want
4. Reading Skills: Cause and Effect
 - Identify cause and effect relationships
5. Why We Make Choices Day 1
 - Define and describe what a choice is
 - Identify examples of scarce resources
 - Identify how people have to make choices because of scarce resources
6. Why We Make Choices Day 2
 - Identify the trade-offs people make when they make choices about resources
7. Goods and Services Day 1
 - Identify goods at home and in the community
8. Goods and Services Day 2
 - Define services
 - Identify and describe services at home and in the community
9. Buying and Selling Day 1
 - Differentiate producers from consumers
 - Identify how people trade or use money to get goods and services
 - Define and describe what international trade is
10. Buying and Selling Day 2
 - Identify and describe what a market is
 - Identify how markets work
11. Spending and Saving Day 1
 - Identify how people in the past traded goods and services to get what they want
 - Identify and describe the purpose of money
12. Spending and Saving Day 2
 - Identify the purpose of saving money
 - Define banks as places where people save and borrow money
13. 21st Century Skills: Charts and Graphs
 - Identify how to read a chart to obtain information

14. Jobs People Do Day 1

- Identify and describe jobs people do at home and in the community
- Identify and describe why people have jobs

15. Jobs People Do Day 2

- Identify and describe jobs in the community
- Identify and describe tools that people use to do their jobs

16. Work in the Community Portfolio

- Identify and describe jobs in the community
- Identify and describe goods and services in the community
- Create a puppet that represents a person who works in the community

17. Work in the Community Unit Review

- Differentiate needs from wants and identify the choices and trade-offs people make because of scarcity
- Distinguish producers from consumers and identify how people spend and save money to get the things they want
- Differentiate between goods and services and identify how people trade and work to get them
- Identify cause and effect relationships
- Identify the purpose of international trade

18. Work in the Community Unit Test

- Differentiate needs from wants and identify the choices and trade-offs people make because of scarcity
- Distinguish producers from consumers and identify how people spend and save money to get the things they want
- Differentiate between goods services and identify how people trade and work to get them
- Identify cause and effect relationships
- Identify the purpose of international trade

3. Finding Places

1. Finding Places Unit Introduction

- Identify how people use maps and globes to find places

2. 21 Century Skills: Parts of a Map

- Identify key elements of a map including cardinal directions, map symbols, and map key

3. Where Things Are Located Day 1

- Identify and use direction words to describe relative locations

4. Where Things Are Located Day 2

- Define and identify the purpose of a map
- Identify the four cardinal directions included on a map
- Use a map to locate places

5. Where People Live Day 1

- Identify and describe where people live

- Identify and describe urban areas
6. Where People Live Day 2
 - Identify and describe suburban and rural areas
 - Compare and contrast areas where people live
 7. Maps and Globes Day 1
 - Define and differentiate globes and maps
 - Identify the purpose of a map key
 - Use a map key to identify places on a map
 8. Maps and Globes Day 2
 - Use a map key to identify places on a map
 9. Lewis and Clark Day 1
 - Identify the purpose of the Lewis and Clark expedition
 - Identify how Lewis and Clark used maps on their expedition
 10. Lewis and Clark Day 2
 - Identify what happened during the Lewis and Clark expedition
 - Identify what people learned from the Lewis and Clark expedition
 11. Finding Places Portfolio
 - Apply map skills to create a neighborhood map
 12. Finding Places Unit Review
 - Identify and describe the importance of maps and globes
 - Identify the different parts of a map
 - Use a map key and direction words to locate specific places on a map
 - Compare and contrast rural, suburban, and urban areas
 - Identify why Lewis and Clark's expedition was important
 13. Finding Places Unit Test
 - Identify and describe the importance of maps and globes
 - Identify the different parts of a map
 - Use a map key and direction words to locate specific places on a map
 - Compare and contrast rural, suburban, and urban areas
 - Identify why Lewis and Clark's expedition was important

Semester B Summary:

In Social Studies 1 B, the student will focus on how people in communities work together for the benefit of all. In this course, the student will learn about the various ways individuals contribute to their communities. The concept of good citizenship is woven throughout the course as the student learns about caring for the earth's environment. The student will continue working on geography skills and explore different cultures and traditions. The course ends with a study of time and the changes in life throughout history. The student will build reading, listening, critical thinking, and problem-solving skills through the course activities. The course text is Pearson's *myWorld Social Studies: Making Our Way* workbook. To learn more about communities, the student will explore maps, photographs, illustrations, music, and other resources. Multimedia resources, including videos and interactive websites, enhance and support the content.

Semester B Outline**Social Studies 1 B****1. Looking at Our World**

1. Looking at Our World Unit Introduction
 - Identify and describe what the world is like
2. Land and Water Day 1
 - Identify and use words that describe geographic features
 - Identify landforms and bodies of water
3. Land and Water Day 2
 - Identify physical and human features of a place
 - Identify ways that people change their environment
4. Reading Skills: Main Idea and Details
 - Identify main idea and details
5. Continents and Oceans Day 1
 - Identify continents and oceans
 - Locate oceans on a map
6. Continents and Oceans Day 2
 - Identify countries in North America
 - Locate countries of North America on a map
7. Our Environment Day 1
 - Identify examples of natural resources
 - Identify and describe different types of weather
8. Our Environment Day 2
 - Identify examples of how weather affects the choices people make
 - Identify ways people take care of natural resources
9. Getting From Here to There Day 1
 - Define and describe what transportation is
 - Identify different types of transportation
 - Identify how sellers and buyers use transportation
10. Getting From Here to There Day 2
 - Identify and describe different methods of communication
11. Looking at Our World Unit Review
 - Identify and describe different landforms and bodies of water, including continents and oceans, on maps and globes
 - Identify and describe how weather and natural resources affect the way people live and the ways people modify their environment
 - Identify and describe different types of communication and transportation and how they connect people around the world
 - Identify main ideas and details

12. Looking at Our World Unit Test

- Identify and describe different landforms and bodies of water, including continents and oceans, on maps and globes
- Identify and describe how weather and natural resources affect the way people live and the ways people modify their environment
- Identify and describe different types of communication and transportation and how they connect people around the world
- Identify main ideas and details

2. Traditions We Share

1. Traditions We Share Unit Introduction

- Define and describe culture
- Identify and describe how culture is shared

2. What Is Culture? Day 1

- Define what culture is
- Identify and describe the elements of culture, especially food and clothing
- Identify and describe how geographic location affects the clothing of a culture

3. What Is Culture? Day 2

- Identify and describe the elements of culture, especially different types of homes

4. Reading Skills: Compare and Contrast

- Compare and contrast information

5. Families Are Alike and Different Day 1

- Define and describe what a family is
- Identify and describe family customs

6. Families Are Alike and Different Day 2

- Identify and describe how families share their culture with the community

7. What Are Our Celebrations? Day 1

- Identify and describe family traditions
- Identify different family celebrations and holidays
- Describe how families celebrate holidays

8. What Are Our Celebrations? Day 2

- Identify and describe how communities celebrate their cultures

9. We Celebrate Our Nation Day 1

- Identify and describe important heroes of our nation
- Identify and describe how our nation remembers heroes

10. We Celebrate Our Nation Day 2

- Identify and describe important national holidays
- Define what a colony is

11. Stories from the Past Day 1

- Distinguish between fact and fiction

- Identify and describe true stories that tell about America's past

12. Stories from the Past Day 2

- Identify and describe fiction stories that tell about America's past

13. Sharing Our Cultures Day 1

- Identify that different countries have different cultures
- Identify and describe elements of different cultures around the world
- Identify important cultural landmarks around the world

14. Sharing Our Cultures Day 2

- Identify and describe elements of different cultures around the world

15. Traditions We Share Portfolio

- Identify family traditions
- Create a book that identifies and describes a family tradition

16. Traditions We Share Unit Review

- Identify and describe how families around the world are different and share their cultures with others
- Identify and describe the parts of culture and how location and weather affect the way people live
- Identify and describe how the United States honors people and events
- Distinguish between historical fact and fiction
- Compare and contrast information from a text

17. Traditions We Share: Unit Test

- Identify and describe the parts of culture and how location and weather affect the way people live
- Identify and describe how families around the world are different and share their cultures with others
- Identify and describe how the United States honors people and events
- Distinguish between historical fact and fiction
- Compare and contrast information from a text

3. Our Past, Our Present

1. Our Past, Our Present Unit Introduction

- Identify and describe how life changes throughout history

2. Measuring Time Day 1

- Identify and describe ways to measure time
- Identify and describe how people use a clock to measure time

3. Measuring Time Day 2

- Identify and describe how a calendar is used to measure time

4. Reading Skills: Sequence

- Identify time order words
- Identify a sequence of events

5. Talking About Time Day 1

- Differentiate between the past, present, and future
- Identify and describe how people change over time

6. Talking About Time Day 2

- Differentiate between the past, present, and future
- Define history
- Identify and describe how communities have changed over time
- Identify ways people celebrate history

7. 21st Century Skills: Timelines

- Identify the purpose of a timeline
- Use a timeline to identify the sequence of events

8. How We Learn About History Day 1

- Identify and describe ways to learn about history
- Define and identify an example of a primary source

9. How We Learn About History Day 2

- Define and identify a secondary source
- Identify and describe ways to determine if a source is true

10. American Heroes Day 1

- Identify explorer heroes from the past
- Identify why the Nez Perce people left their homeland
- Identify Chief Joseph and how he helped make peace between the Nez Perce people and the American government

11. American Heroes Day 2

- Identify key historical heroes and describe how they helped people and made America a better country

12. Life Then and Now Day 1

- Compare and contrast daily life long ago with daily life today
- Identify important inventors and describe their contributions to society
- Define and describe what an invention is
- Identify inventions that require electricity

13. Life Then and Now Day 2

- Identify and describe daily life in the past
- Identify ways people can learn about their family history

14. Technology Then and Now Day 1

- Define and describe what communication is
- Identify how communication has changed over time
- Identify the purpose of social media

15. Technology Then and Now Day 2

- Define and describe what transportation is

- Identify and describe how transportation has changed over time

16. Our Past, Our Present Portfolio

- Create a mobile to show how communication and transportation have changed over time

17. Our Past, Our Present Unit Review

- Identify and describe ways to measure time
- Identify the qualities of a hero and identify and describe specific heroes of America's past
- Identify examples of primary and secondary sources and describe how to determine if the sources are true
- Identify and describe how daily life as changed over time, including changes in communication and transportation
- Use a timeline to identify a sequence of events

18. Our Past, Our Present Unit Test

- Identify and describe ways to measure time
- Identify the qualities of a hero and identify and describe specific heroes of America's past
- Identify examples of primary and secondary sources and describe how to determine if the sources are true
- Identify and describe how daily life as changed over time, including changes in communication and transportation
- Use a timeline to identify a sequence of events

Social Studies 2

Social Studies 2

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In Social Studies 2 A, the student continues to be introduced to basic concepts of citizenship, economics, and geography. In this course, the practice of geography, reading, critical thinking, and problem-solving skills accompanies structured instruction and activities. The student will learn about ordinary individuals who showed good citizenship. Through Learning Coach-led discussions, textbook readings, interactive activities, and hands-on projects, the student will continue to explore the world through the lens of social studies. The course text is Pearson's *myWorld Social Studies: We Do Our Part* workbook. The student will explore maps, photographs, illustrations, music, and other resources. Multimedia resources, including videos and interactive websites, enhance and support the content.

Semester A Outline

1. **My Community, My Country**

1. My Community, My Country Unit Introduction
 - Identify and describe how people can cooperate to help their community
2. We Are Good Citizens Day 1
 - Identify and describe characteristics of good citizenship
 - Describe ways in which citizens make positive contributions to their school and community
3. We Are Good Citizens Day 2
 - Identify and describe characteristics of good citizenship
 - Describe ways in which citizens make positive contributions to their school and community
4. Reading Skills: Draw Conclusions
 - Identify and analyze details to draw conclusions about a text
5. Our Rights as Citizens Day 1
 - Identify and describe the rights that American citizens have
 - Identify the U.S. documents that guarantee American citizens their rights
6. Our Rights as Citizens Day 2
 - Identify and describe the rights that American citizens have
 - Identify the U.S. documents that guarantee American citizens their rights

7. 21st Century Skills: Taking Action

- Identify and describe ways people can work together to solve problems in the community

8. We Follow Rules and Laws Day 1

- Identify rules and laws in the community
- Identify and describe the purpose of rules and laws

9. We Follow Rules and Laws Day 2

- Identify and describe the consequences if rules and laws are broken
- Identify and describe the purpose of rules and laws

10. Our Government Day 1

- Identify and describe the purpose of community and state governments
- Identify and describe services provided by the community and state governments

11. Our Government Day 2

- Identify and describe the three branches of the United States government

12. Our Leaders Day 1

- Identify government leaders in the community and state
- Identify how government leaders help citizens

13. Our Leaders Day 2

- Identify and describe the role of the president of the United States

14. Symbols of My Country Day 1

- Identify symbols and songs that represent America

15. Symbols of My Country Day 2

- Identify symbols and songs that represent America

16. My Community, My Country Unit Review

- Identify and describe the qualities and responsibilities of good citizens, including following rules and laws
- Identify and analyze details to draw conclusions about a text
- Identify and describe rights that are protected in the United States and the documents that contain them
- Identify the purpose of community, state, and national governments and describe how government leaders meet the needs of their citizens
- Identify and describe the United States' symbols, songs, and mottoes that reflect the country's democratic values

17. My Community, My Country Unit Test

- Identify and describe the qualities and responsibilities of good citizens, including following rules and laws
- Identify and analyze details to draw conclusions about a text
- Identify and describe rights that are protected in the United States and the documents that contain them
- Identify the purpose of community, state, and national governments and describe how government leaders meet the needs of their citizens

- Identify and describe the United States' symbols, songs, and mottoes that reflect the country's democratic values

2. Working to Meet Our Needs

1. Working to Meet Our Needs Unit Introduction
 - Identify and describe how people get what they need and want
 - Distinguish needs from wants
2. Needs and Wants Day 1
 - Distinguish between needs and wants
3. Needs and Wants Day 2
 - Distinguish between needs and wants
 - Identify and describe the choices people make due to scarce resources
4. Reading Skills: Main Idea and Details
 - Identify the main idea and supporting details in a paragraph
5. Making Good Choices Day 1
 - Identify and describe how to make good choices about resources
6. Making Good Choices Day 2
 - Identify how people can use charts to help them make good choices about resources
 - Identify and describe the opportunity cost of making a choice about resources
7. Producing and Consuming Goods Day 1
 - Differentiate producers from consumers
 - Identify and describe how goods are produced
8. Producing and Consuming Goods Day 2
 - Identify examples of natural resources
 - Identify and describe the resources needed to produce goods
9. 21st Century Skills: Reading a Flow Chart
 - Identify the purpose of a flow chart
 - Identify the sequence of events by reading a flow chart
10. Service Workers and Their Jobs Day 1
 - Define what services are
 - Identify and describe service workers in the community
11. Service Workers and Their Jobs Day 2
 - Identify and describe people who provide services
12. Trading for Goods and Services Day 1
 - Identify that people use money or trade to get goods and services
 - Identify and describe the impact supply and demand has on the price of goods and services
13. Trading Goods and Services Day 2
 - Identify the purpose of trade in the United States and with other countries
14. Making Choices About Money Day 1

- Identify and describe why people save money
 - Analyze and read a savings chart
15. Making Choices About Money Day 2
- Identify and describe the ways that people can save and borrow money through a bank
16. Working to Meet Our Needs Portfolio
- Identify and describe businesses in the community that provide goods or services
 - Create a booklet that illustrates and describes businesses in the community
17. Working to Meet Our Needs Unit Review
- Distinguish needs from wants and describe the choices people make because of limited resources, including the costs and benefits of spending and saving money
 - Differentiate between consumers and producers and describe how goods are produced
 - Identify services and service workers and describe how they help the community
 - Describe how communities and countries barter and trade to get the things they need
 - Identify the main idea and supporting details in a paragraph
18. Working to Meet Our Needs Unit Test
- Distinguish needs from wants and describe the choices people make because of limited resources, including the costs and benefits of spending and saving money
 - Differentiate between consumers and producers and describe how goods are produced
 - Identify services and service workers and describe how they help the community
 - Describe how communities and countries barter and trade to get the things they need

3. Finding Places

1. Finding Places Unit Introduction
 - Identify tools people use to find places
2. Talking About Location Day 1
 - Identify and describe relative and absolute locations
3. Talking About Location Day 2
 - Identify a location using a grid map
4. All About Maps Day 1
 - Identify the purpose of a map
 - Identify and use parts of a map to locate specific places
5. All About Maps Day 2
 - Identify places on a map using direction words
6. 21st Century Skills: Using a Map Scale
 - Identify the purpose of a map scale
 - Identify distances between locations using a map scale
7. Our Earth Day 1
 - Identify continents and oceans on a map
 - Identify and describe how a globe models Earth
 - Define and identify the equator

8. Our Earth Day 2

- Define and identify the prime meridian
- Identify the purpose of latitude and longitude lines

9. Landforms and Bodies of Water Day 1

- Identify and describe different types of landforms and bodies of water

10. Landforms and Bodies of Water Day 2

- Identify landforms and bodies of water on physical maps
- Identify how political maps show boundaries to separate cities, states, and countries

11. Finding Places Portfolio

- Apply map skills to create a neighborhood map

12. Finding Places Unit Review

- Identify and describe physical features and their absolute and relative locations
- Distinguish between maps and globes and identify how each can be used to locate physical features and places
- Compare and contrast different landforms and bodies of water
- Identify and describe the purpose of a map scale

13. Finding Places Unit Test

- Identify and describe physical features and their absolute and relative locations
- Distinguish between maps and globes and identify how each can be used to locate physical features and places
- Compare and contrast different landforms and bodies of water
- Identify and describe the purpose of a map scale

Semester B Summary:

In Social Studies 2 B, the student continues to be introduced to basic concepts in world cultures, American history, and government. In this course, the practice of geography, reading, critical thinking, and problem-solving skills accompanies structured instruction and activities. The student will learn about famous people who have influenced the United States and the world. Through Learning Coach-led discussions, textbook readings, interactive activities, and hands-on projects, the student will continue to explore the world through the lens of social studies. The course text is Pearson's *myWorld Social Studies: We Do Our Part* workbook. The student will explore maps, photographs, illustrations, music, and other resources. Multimedia resources, including videos and interactive websites, enhance and support the content.

Semester B Outline

1. The World Around Us

1. The World Around Us Unit Introduction

- Identify and describe what the world is like

2. Reading Skills: Cause and Effect

- Identify cause and effect relationships

3. Weather and Climate Day 1

- Define and describe temperature
- Identify weather conditions and describe how they affect the way people and animals live

4. Weather and Climate Day 2

- Define climate and identify how it affects the way people live
- Identify how areas of the world are separated into regions that have common characteristics
- Identify types of dangerous storms

5. Our Environment Day 1

- Define environment
- Identify and describe how people change the environment to get what they need and want
- Compare and contrast urban, suburban, and rural areas

6. Our Environment Day 2

- Identify and describe how people change the water in their environment to meet their needs
- Identify how people change the environment to make life easier
- Define and describe what it means to irrigate land

7. Earth's Resources Day 1

- Identify natural resources
- Differentiate renewable and nonrenewable resources

8. Earth's Resources Day 2

- Identify how the natural resources in an area affect the way people live
- Define conserve
- Identify and describe how people can conserve natural resources

9. Moving Ideas, People, and Things Day 1

- Define communication
- Identify how technology has made communication easier and quicker
- Identify forms of transportation

10. Moving Ideas, People, and Things Day 2

- Identify how people change the earth to make transportation easier
- Identify and describe why the United States trades goods and services with other countries
- Identify how the United States uses different forms of transportation to exchange goods and services
- Identify and describe how changes in transportation and communication have helped people

11. The World Around Us Unit Review

- Identify cause and effect and predict the effect of an event
- Identify how environments change over time and compare and contrast urban, suburban, and rural areas
- Identify how the weather and climate of different regions affect the lives of people and animals
- Identify how changes in communication and transportation have changed the way people live
- Identify natural resources and why it is important to conserve them

12. The World Around Us Unit Test

- Identify how the weather and climate of different regions affect the lives of people and animals
- Identify how environments change over time and compare and contrast urban, suburban, and rural areas
- Identify natural resources and why it is important to conserve them
- Identify how changes in communication and transportation have changed the way people live
- Identify cause and effect and predict the effect of an event

2. Celebrating Our Traditions

1. Celebrating Our Traditions Unit Introduction
 - Define culture
 - Identify and describe how culture is shared
2. Culture Is Our Way of Life Day 1
 - Identify and describe different elements of culture such as food, language, and music
 - Define tradition
3. Culture Is Our Way of Life Day 2
 - Define what an artifact is
 - Identify traditions of different cultures
 - Identify and describe how culture is shared through traditions
4. Reading Skills: Compare and Contrast
 - Compare and contrast information
5. Cultures in Our Country Day 1
 - Identify how American culture is made up of many cultures
 - Define and identify what a festival is
 - Identify and describe cultures in the United States
6. Cultures in Our Country Day 2
 - Define what a custom is
 - Identify and describe cultures in the United States
7. What We Celebrate Day 1
 - Identify and describe the importance of Independence Day
 - Identify holidays that honor national heroes
 - Identify who a veteran is
8. What We Celebrate Day 2
 - Identify holidays that honor national heroes
 - Identify why Dr. Martin Luther King, Jr. is honored with a holiday
9. American Stories Day 1
 - Differentiate between fact and fiction
 - Identify and describe what a folktale is
 - Identify famous American folktales and the characters they commemorate
10. American Stories Day 2

- Define what tall tales are
- Identify famous American tall tales and their characters

11. Two Cultures Day 1

- Identify and describe what ruins are
- Compare American culture with different cultures around the world
- Identify and describe elements of different cultures around the world

12. Two Cultures Day 2

- Identify and describe what a landmark is
- Compare different cultures around the world
- Identify and describe elements of different cultures around the world

13. 21st Century Skills: Using Graphic Sources

- Identify the function of a chart
- Use a chart to identify information

14. Celebrating Our Traditions Portfolio

- Create a song that explains and celebrates an American tradition

15. Celebrating Our Traditions Unit Review

- Define culture, and compare and contrast elements of different cultures
- Identify how the culture of the United States is made up of many cultures
- Identify national holidays, songs, and stories and describe how they reflect American culture
- Compare and contrast details in a text
- Use a chart to identify information

16. Celebrating Our Traditions Unit Test

- Identify how the culture of the United States is made up of many cultures
- Define culture, and compare and contrast elements of different cultures
- Identify national holidays, songs, and stories and describe how they reflect American culture
- Compare and contrast details in a text
- Use a chart to identify information

3. Our Nation Past and Present

1. Our Nation Past and Present Unit Introduction

- Identify and describe how life has changed over time

2. Life Then and Now Day 1

- Define history
- Identify words used to describe chronological order
- Compare and contrast families today with families long ago

3. Life Then and Now Day 2

- Identify and describe how communities have changed over time
- Define a century
- Compare and contrast communities today with communities in the past

4. 21st Century Skills: Reading a Timeline
 - Identify the purpose of a timeline
 - Identify and describe a sequence of events by reading a timeline
5. Learning About the Past Day 1
 - Identify sources that can be used to learn about the past
 - Differentiate primary and secondary sources
6. Learning About the Past Day 2
 - Identify sources that can be used to learn about the past
 - Define artifact
7. The First Americans Day 1
 - Identify Native Americans as the first Americans
 - Compare and contrast Native American groups from different regions
8. The First Americans Day 2
 - Identify and describe the culture and history of the Cherokee people
 - Identify Wilma Mankiller and how she helped the Cherokee people
9. Reading Skills: Fact and Opinion
 - Distinguish between a fact and an opinion
10. America's Early Settlers
 - Identify and describe the founding of America
 - Identify how Native Americans were affected by colonization
 - Define Pilgrims
 - Identify the historical figures and events that helped America become a country
11. A Growing Nation Day 1
 - Identify how early America continued to grow in population and size
 - Define immigrant
 - Identify why American pioneers began moving to the West
12. A Growing Nation Day 2
 - Identify what slavery is and the people who helped end it in America
 - Identify why immigrants move to America
 - Identify the Statue of Liberty as a symbol of freedom
13. Technology Then and Now
 - Compare life in the past to life today
 - Identify the contributions of innovators
 - Identify technological innovation that helped shape our nation
14. American Heroes Day 1
 - Define and identify a hero
 - Identify historical heroes who have made America a better place
 - Define civil rights

15. American Heroes Day 2

- Define and identify innovators
- Identify historical heroes and innovators who have made America a better place

16. Our Nation Past and Present Portfolio

- Interview someone who grew up in the past
- Compare and contrast life in the past with life today

17. Our Nation Past and Present Unit Review

- Compare and contrast life today with life long ago and identify the chronological order of events by reading a timeline
- Differentiate between primary and secondary sources and identify how they can be used to learn about history
- Identify Native Americans, European settlers, and immigrants and describe their role in founding America
- Identify American heroes and how they changed history
- Distinguish between fact and opinion

18. Our Nation Past and Present Unit Test

- Compare and contrast life today with life long ago and identify the chronological order of events by reading a timeline
- Differentiate between primary and secondary sources and identify how they can be used to learn about history
- Identify Native Americans, European settlers, and immigrants and describe their role in founding America
- Identify American heroes and how they changed history
- Distinguish between fact and opinion

Social Studies 3

Social Studies 3

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In this course, the student will explore maps and geography, the characteristics of a community, and early American communities and settlers. The student will examine the government of the United States with a focus on each branch. The student will also delve into topics specific to Pennsylvania.

Semester A Outline

1. **Course Overview**

1. SS 3 A Course Overview

2. **Our Communities**

1. Constitution Day
 - In this section, you will name some writings that are important to Pennsylvania.
2. Our Communities Intro
3. Establishing Communities
 - In this section, you will identify how and why people set up communities in which to live.
4. Types of Communities
 - In this section, you will compare communities where people live.
 - In this section, you will use words that describe geography in maps and globes.
5. Environments in Communities
 - In this section, you will identify characteristics of the five regions in the United States including what the communities and land are like in these places.
 - In this section, you will explain how work has changed over time in Ohio.
6. Interacting with the Environment
 - In this section, you will explain different ways people live in and change the places where they make their homes.
 - In this section, you will describe how groups of people have changed in Pennsylvania.
7. Conflict in Communities
 - In this section, you will discuss how people in Pennsylvania have fought and helped each other over time.
 - In this section, you will describe conflicts in the world.

8. World Communities

- In this section, you will describe how the things people in your community do make your community the way it is.

9. Locating Communities

- In this section, you will use different kinds of maps to describe where different places are.

10. Our Communities Portfolio Day 1

- In this section, you will identify the parts of a community.

11. Our Communities Portfolio Day 2

- In this section, you will design and build a community.

12. Our Communities Unit Review

13. Our Communities Unit Test

3. Our Environment

1. Our Environment Intro

2. Land and Water

- In this section, you will describe physical features found in a place, such as landforms and bodies of water.
- In this section, you will use a map to identify and describe as many landforms and bodies of water as you can.

3. World Geography

- In this section, you will locate continents, oceans, and the equator on a world map.
- In this section, you will describe different places where people live.
- In this section, you will describe how the natural world has changed in Pennsylvania.

4. Weather and Climate

- In this section, you will describe the weather and the climate in different places.
- In this section, you will describe how weather and climate affect how and where people live.

5. Reading a Map

- In this section, you will identify different symbols used on a map. You will also use a map to think up questions about places.
- In this section, you will identify different symbols used on a map.

6. Different Types of Maps

- In this section, you will describe what political and physical maps are and why people use them.

7. Interpreting Maps

- In this section, you will describe the purpose and use of latitude and longitude.
- In this section, you will use longitude and latitude to describe the location of communities.
- In this section, you will name some important places in Pennsylvania.

8. Using Earth's Resources

- In this section, you will classify renewable and nonrenewable resources.
- In this section, you will describe the use of renewable and nonrenewable resources.

- In this section, you will explain the effect that the location of resources has on population and industrial centers.

9. Natural Hazards

- In this section, you will describe how people impact the environment.
- In this section, you will describe how people impact the environment.
- In this section, you will describe how nature changes the land.

10. Apply: Our Environment Portfolio Day 1

- In this section, you will identify reasons why the resources in an area might lead people to live in or visit this place.

11. Apply: Our Environment Portfolio Day 2

- In this section, you will explain why the resources in an area might lead people to live in or visit this place.

12. Our Environment Unit Review

13. Our Environment Unit Test

4. Communities Build a Nation

1. Communities Build a Nation Intro

2. America's First People

- In this section, you will describe some of the Native American tribes that early explorers met in North America.

3. Early Explorers

- In this section, you will identify the causes and effects of European exploration.
- In this section, you will identify how to use primary sources.

4. Early Spanish Communities

- In this section, you will describe important events that took place when Spanish people explored North America.
- In this section, you will identify how to use secondary sources regarding key events in Spanish exploration.

5. Early French Communities

- In this section, you will describe important events that happened when French people explored North America.
- In this section, you will evaluate primary and secondary sources to describe events in French exploration of the North America.

6. Early English Communities

- In this section, you will describe important events that happened when English people explored North America.

7. Native American Cultures

- In this section, you will contrast Native American cultures from the past and today.
- In this section, you will describe what life can be like for new people coming to the state.
- In this section, you will describe how immigrants have been treated in the United States.

 - In this section, you will identify actions performed by citizens by themselves and as part of groups that show important civic virtues.
 - In this section, you will list the ways people in your state help people.
 7. Apply: Citizenship Portfolio Day 1

- In this section, you will identify facts and opinions about a community problem or issue that people have fought over.

8. Apply: Citizenship Portfolio Day 2

- In this section, you will describe possible solutions for a community problem.

9. Citizenship Unit Review and Reflect

10. Citizenship Unit Test

3. Economics

1. Economics Introduction

2. Meeting Wants and Needs

- In this section, you will describe opportunity cost.
- In this section, you will describe the ways people work in your state.

3. Producers and Consumers

- In this section, you will describe what happens when a place of work opens or closes.
- In this section, you will explain why helping others makes life better.

4. Goods and Services

- In this section, you will explain how workers have changed the way they work.

5. Supply and Demand

- In this section, you will summarize some reasons that explain why people must make choices about which goods and services to produce and use.
- In this section, you will explain the impact of supply, demand, and scarcity.
- In this section, you will describe valuable things that can and cannot be touched.

6. Exchange

- In this section, you will describe how the economy has changed over time in Pennsylvania.

7. Spending and Saving

- In this section, you will identify ways people spend and save the money they make.

8. Jobs

- In this section, you will explain how and why businesses and people might choose to focus on producing one type of good or service.
- In this section, you will describe the ways people in Pennsylvania have made life better.
- In this section, you will describe how groups have made work better in Pennsylvania.

9. Local Economy

- In this section, you will discuss the goods and services of Pennsylvania.
- In this section, you will describe how people have worked and brought money into Pennsylvania.

10. The Global Economy

- In this section, you will explain how trading with one another makes nations depend on one another.
- In this section, you will describe how laws change the economy.

11. Apply: Economics Portfolio Day 1

- In this section, you will describe factors that lead people to make choices about what to do with their money.

12. Apply: Economics Portfolio Day 2

- In this section, you will design a budget that describes how to help make responsible choices for how to take care of your money.

13. Economics Unit Review and Reflect

14. Economics Unit Test

4. A Growing Nation

1. A Growing Nation Introduction

2. Growing Communities

- In this section, you will describe how communities have changed over time.
- In this section, you will name some objects that tell a story.

3. New Lands

- In this section, you will explain why people immigrate to new lands.

4. New Ways to Travel

- In this section, you will identify and describe new ways people traveled during Westward Expansion.
- In this section, you will make a plan to save and spend money.

5. New Ways to Communicate

- In this section, you will identify how telegraphs and telephones made it easier for people to communicate with one another.
- In this section, you will make a plan to save and spend money.

6. New Technologies

- In this section, you will identify how new discoveries in technology and medicine changed people's everyday lives.
- In this section, you will discuss how ads affect what you buy.

7. A Growing Nation Discussion: Day 1

- In this section, you will describe what an important inventor did to help the United States develop.

8. A Growing Nation Discussion: Day 2

- In this section, you will explain actions of important inventors.

9. Discussion: A Growing Nation Discussion

10. A Growing Nation Portfolio Day 1

- In this section, you will explain the effect that new kinds of technology have had on the way that people live.

11. A Growing Nation Portfolio Day 2

- In this section, you will create a timeline of important discoveries in technology that have changed the way people live.

12. A Growing Nation Unit Review

13. A Growing Nation Unit Test

5. Celebrating Communities

1. Celebrating Communities Introduction
2. Apply: US and State Symbols Activity
 - In this section, you will describe state and national symbols, patriotic songs, and mottos.
3. North American Cultures
 - In this section, you will identify values the early settlers had.
 - In this section, you will name some ways cultures are the same and different.
4. People and Cultures
 - In this section, you will describe what makes up an ethnic group.
 - In this section, you will describe holiday traditions.
 - In this section, you will make a plan to save and spend money.
5. Culture Through the Arts
 - In this section, you will describe how people communicate important ideas about their culture through stories, folktales, music, and artistic creations.
 - In this section, you will explain why some places and tools are special for a culture.
6. Cultural Celebrations
 - In this section, you will identify how the celebrations people hold communicate information about the things and ideas that the people value.
7. Our Nation's Diversity
 - In this section, you will describe the characteristics of different cultures in regions and communities in the United States.
 - In this section, you will describe how groups of people have fought and helped each other over time.
8. Celebrating Communities Portfolio 1
 - In this section, you will research and record details about the culture and history of the U.S. region you live in.
9. Celebrating Communities Portfolio 2
 - In this section, you will compare the past and present culture and history of a U.S. region.
10. Celebrating Communities Portfolio 3
 - In this section, you will critique explanations.
11. Celebrating Communities Unit Review
12. Celebrating Communities Unit Test

Social Studies 4

Social Studies 4

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In this course, the student will explore several historical and geographical themes focused on the United States. Topics include American government, geography, history, and citizenship. The student will also build upon their understanding of the first inhabitants and explorers of the United States, as well as its beginnings as a new nation. Students in Pennsylvania also analyze and discuss the impact of different population groups and movements on American government, history, and diversity.

Semester A Outline

1. Course Overview

1. Social Studies 4 A Course Overview

2. United States Geography

1. Constitution Day
 - In this section, you will identify the purpose of the United States Declaration of Independence, the U.S. Constitution and symbols that are important to our nation.
2. United States Geography Introduction
3. Land and Regions in the United States
 - In this section, you will describe landforms, regions, and bodies of water in the United States.
 - In this section, you will describe GPS.
4. Weather and Climate
 - In this section, you will explain the difference between climate and weather. You will also describe different climates across the five U.S. regions.
5. Regions and Resources
 - In this section, you will identify and describe different kinds of resources
6. U.S. Geography Portfolio Day 1
 - In this section, you will describe the region where you live.
7. U.S. Geography Portfolio Day 2
 - In this section, you will create maps that represent your region.
8. People and the Land

- In this section, you will identify and describe the relationship between people and the environment.

9. United States Geography Unit Review

10. United States Geography Unit Test

3. Our Government

1. Our Government Introduction

2. Principles of Our Government

- In this section, you will identify the beliefs that shape the U.S. government.
- In this section, you will compare how citizens stayed informed about the government in the 1700s and today.

3. Origin of Rules and Laws

- In this section, you will examine where rules and laws come from and why we have them.
- In this section, you will identify causes and effects of having or not having rules and laws.
- In this section, you will explain the importance of effective reasoning by leaders when making a new law.

4. Constitution(s)

- In this section, you will identify goals of the Preamble of the U.S. Constitution and why Article Five is essential.
- In this section, you will compare your state's Constitution to the Constitution of the United States.
- In this section, you will examine where important parts of the U.S. Constitution came from and why people added these parts to the Constitution.

5. Branches of Government

- In this section, you will identify and describe the legislative, executive, and judicial branches of the federal government.
- In this section, you will describe the interactive skills needed to pass a new law through the government.

6. Levels of Government

- In this section, you will compare what people who work to govern cities, states, and the nation are allowed to do.

7. Analyze Sources Portfolio Day 1

- In this section, you will explain what compelling questions are, why you should ask them, and how evidence can be used to answer these questions.

8. Analyze Sources Portfolio Day 2

- In this section, you will use evidence from many sources to answer compelling questions.

9. Our Government Unit Review and Reflect

10. Our Government Unit Test

4. United States History

1. United States History Introduction

2. America's First Inhabitants

- In this section, you will explain how geography has affected Native American culture.
- In this section, you will identify the human characteristics of Native Americans and explain how geography has affected their culture

3. America's First Explorers

- In this section, you will describe characteristics of European explorers and colonies in the Americas.
- In this section, you will create a timeline of European exploration in the Americas.
- In this section, you will create a timeline of European exploration in the Americas.
- In this section, you will identify concepts of health in situations from the 1500s and 1600s.

4. A New Nation

- In this section, you will identify reasons, ideas, and events that led to American independence from Great Britain.

 - In this section, you will identify how and why personal beliefs and experiences lead citizens to participate in community issues.
 9. Community Issues Discussion Day 2
 - In this section, you will explain how people work to change rules and laws to help society.
 10. Citizenship Unit Review and Reflect
 11. Citizenship Unit Test
 12. Apply: Community Issues Discussion Day 2

Semester B Summary: In this course, the student will learn more about economics and examine several aspects of all five geographic regions of the United States. These include the northeast, southeast, midwest, southwest, and west. The student will also delve into topics specific to Pennsylvania.

Semester B Outline

1. Course Overview

1. SS 4 B Course Overview

2. Economics Basics

1. Economics Basics Introduction
2. Individual Choices and Incentives
 - In this section, you will define the term incentives. You will also describe examples of incentives.
3. Factors of Production
 - In this section, you will identify what land labor and capital are. You will also explain how they are used to produce goods and services.
4. Business Strategies

- In this section, you will list factors companies use to decide on specialization and division of labor.
- In this section, you will explain how different factors encourage specialization and division of labor.
- In this section, you will explain why local businesses open and close.

5. Stock Market

- In this section, you will explain the role the stock market plays in our lives. You will also identify how investing in the stock market can be helpful to people.

6. Exchange

- In this section, you will explain what exchange is and how it affects our lives.

7. Financial Institutions

- In this section, you will compare and contrast how banks and other items affect the national and global economy.

8. Economics and the Government

- In this section, you will explain how the government pays for the goods and services it gives to people.
- In this section, you will examine how tax revenues are used in communities.

9. Apply: Create a Business Portfolio

- In this section, you will create a business and identify how your business works within a community.

10. Economics Basics Unit Review

11. Economics Basics Unit Test

3. Regions: The Northeast

1. Regions: The Northeast Introduction

2. Land of the Northeast

- In this section, you will identify and describe landforms, bodies of water, and physical characteristics in the Northeast.

3. Resources in the Northeast

- In this section, you will describe landforms, bodies of water, and physical characteristics in the Northeast.
- In this section, you will identify scarce resources in a community.

4. Birthplace of a Nation

- In this section, you will identify and describe problems faced by Native Americans, African Americans, and women over time. You will also explain the effects these struggles had on the United States.

5. Growth and Change in the Northeast

- In this section, you will describe the effects of immigration and industrialization in the Northeast.

6. Regions: The Northeast Portfolio Day 1

- In this section, you will gather information from different sources to describe the life of a famous immigrant, woman, or Black or Indigenous person of color who contributed to the founding of this nation.

7. Regions: The Northeast Portfolio Day 2

- In this section, you will describe the effects that a famous immigrant had on the world.

8. The Northeast Today

- In this section, you will identify what life is like in different parts of the Northeast.

9. Regions: The Northeast Review

10. Regions: The Northeast Unit Test

4. Regions: The Southeast

1. Regions: The Southeast Introduction

2. Land, Water, and Climate

- In this section, you will identify and describe landforms, bodies of water, and physical characteristics in the Southeast.
- In this section, you will describe wildlife refuges in the Southeast.
- In this section, you describe features of the weather and climate of the Southeast region.

3. A Land of Many Resources

- In this section, you will identify resources that people in the Southeast can find and use.
- In this section, you will identify problems solved by the Tennessee Valley Authority.

4. Settling the Southeast

- In this section, you will describe different groups of people who settled in the Southeast.

5. Southern Life

- In this section, you will identify important parts of Southeastern culture, including traditions, social and economic conditions, and characteristics of major cities.

6. Regions: The Southeast Portfolio Day 1

- In this section, you will identify characteristics of the climate, places, people, and resources of the Southeast region of the United States.

7. Regions: The Southeast Portfolio Day 2

- In this section, you will create a presentation celebrating the climate, places, peoples, and resources of the Southeast region of the United States.

8. Regions: The Southeast Review

9. Regions: The Southeast Unit Test

5. Regions: The Midwest

1. Regions: The Midwest Introduction

2. In the Heart of the Nation

- In this section, you will describe important landforms, bodies of water, weather, climate, and plant and animal life in the Midwest.
- In this section, you will describe important landforms, bodies of water, weather, climate, and plant and animal life in the Midwest.

3. Resources and Farming

- In this section, you will describe resources that people in the Midwest can find and use.

- In this section, you will provide suggestions for solving problems caused by climate and land use.

4. Settling in the Midwest

- In this section, you will identify the history of how different groups of people settled in the Midwest, including characteristics of the groups of people native to the Midwest, and forced and unforced migration.
- In this section, you will learn about the Midwest settlement.
In this section, you will learn about settling the Midwest.

5. Developing the Midwest

- In this section, you will identify and describe how people began to make a living and build cities in the Midwest.
- In this section, you will identify and describe the growth of industry in the Midwest.
- In this section, you will learn how to identify and describe this growth in the Midwest.

6. Regions: The Midwest Portfolio Day 1

- In this section, you will identify the things a particular group of people in the Midwest do each day.

7. Regions: The Midwest Portfolio Day 2

- In this section, you will explain how the environment affects the things a particular group of people in the Midwest do.

8. The Midwest on the Move

- In this section, you will describe how the economy works in the Midwest, including the connections between trade, transportation, and tourism.

9. Regions: The Midwest Review

10. Regions: The Midwest Unit Test

6. **Regions: The Southwest**

1. Regions: The Southwest Introduction

2. Southwestern Land, Water, and Climate

- In this section, you will describe the climate of the Southwest, including effects on plant and animal life and effects of elevation.

3. The Southwest's Past

- In this section, you will identify things that happened while people were colonizing the Southwest, including effects of Spanish exploration, and cultural impacts.
- In this section, you will summarize what you learned about storytelling and the Southwest culture.

4. Growth of the Southwest

- In this section, you will identify and describe reasons why the Southwest has grown over time.

5. Life in a Dry Land

- In this section, you will explain reasons that the Southwest needs water and the effects the water supply has on life in the Southwest.

6. Regions: The Southwest Discussion Day 1

- In this section, you will discuss the characteristics that make the Southwest region different from any other place with your peer.
7. Regions: The Southwest Discussion Day 2
 - In this section, you will discuss the characteristics that make the Southwest region different from any other place with your peer.
 8. Apply: Regions: The Southwest Discussion Day 2
 9. Regions: The Southwest Online Practice
 10. Regions: The Southwest Unit Review
 11. Regions: The Southwest Unit Test

7. **Regions: The West**

1. Regions: The West Introduction
2. A Varied Land
 - In this section, you will describe landforms, bodies of water, and ways the land changes over time in the West.
 - In this section, you will describe the different climates in the West and effects of these climates on plant and animal life in these places.
3. Locating the West
 - In this section, you will identify latitude and longitude to find locations on maps and globes, including the Western region of the United States.
4. Western Resources
 - In this section, you will describe the important natural resources in the West and how these resources affect life.
5. Growth of the West
 - In this section, you will identify of how different groups of people settled in the West, including characteristics of native peoples, effects of Spanish exploration, and growth of cities.
6. Statehood
 - In this section, you will describe Alaska and Hawaii's road to statehood.
 - In this section, you will identify state symbols, national symbols, and national holidays.
7. The West Today
 - In this section, you will identify important parts of the economy in the West today, including the importance of trade, main ports, and current and future challenges.
8. Comparison of Regions Apply
 - In this section, you will compare the characteristics of two regions in the United States.
9. Regions: The West Review and Reflect
10. Regions: The West Unit Test

Social Studies 5

Social Studies 5

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Topics include Spanish, English, and French settlement and the American Revolution, and the transition from the Articles of Confederation to the Constitution. The student will also delve into topics specific to Pennsylvania, including geography.

Semester A Outline

1. Course Overview

1. Social Studies 5 A Course Overview

2. Early Exploration

1. Constitution Day

- In this section, you will identify the purpose of the United States Declaration of Independence, the U.S. Constitution and symbols that are important to our nation.
- In this section, you will identify symbols that are important to our nation.

2. Early Exploration Introduction

3. Geography Day 1

- In this section, you will describe how tools like maps, globes, and photographs are used to organize and interpret information about people, places, and environments.
- In this section, you will describe places and regions.
- In this section, you will describe places that are located in different regions.
- In this section, you will identify the physical processes that change physical characteristics of places and regions.

4. Geography Day 2

- In this section, you will identify the human characteristics of places and regions.
- In this section, you will describe the effects of the physical systems on people within regions.
- In this section, you will explain the effects of the physical systems on people within regions.
- In this section, you will identify the effect of people on the physical systems within a community.

5. Ancient American Civilization

6. Adapting to Different Places

- In this section, you will describe how different Native American groups living throughout North America changed their environment to meet their needs.

7. Native American Culture

8. Technology Shapes Exploration

- In this section, you will describe the role people and technology had on exploration.

9. Explorers for Spain

- In this section, you will identify the motivations and outcomes of different Spanish explorers.
- In this section, you will identify the goals and successes of Spanish exploration in the Americas.

10. The Columbian Exchange

- In this section, you will describe the influence of the Columbian Exchange on Europeans, Native Americans, and African peoples.
- In this section, you will differentiate between the positive effects and negative effects of the Columbian Exchange.

11. Early Exploration Day 1 Apply

- In this section, you will describe the effect of the printing press and computer on communication.

12. Early Exploration Day 2 Apply

- In this section, you will compare the importance of the printing press and the computer over time.

13. Early Exploration Review and Reflect

14. Early Exploration Unit Test

3. Early Settlements

1. Early Settlements Introduction

2. The Spanish Colony in the Americas

- In this section, you will describe effective and ineffective interactions among people.

3. The English Colonies in Virginia

4. Establishing a Colonial Government

5. Pilgrims and Puritans in New England

- In this section, you will analyze the differences between the Pilgrims and Puritans and the conflicts between the English colonists and Native Americans.

6. The French and Dutch in North America

7. Building a New Society

8. Locating the 13 Colonies

- In this section, you will describe characteristics of the New England, Middle, and Southern colonies.

9. Comparing the 13 Colonies

- In this section, you will compare how the New England, Middle, and Southern colonies were organized politically, socially, and economically.

10. Daily Life in the Colonies

- In this section, you will compare and contrast the different colonies in North America.

- In this section, you will compare and contrast how the economies of the different colonial regions were alike and different.

11. Slavery in the Colonies Day 1

- In this section, you will summarize early culture of enslaved Africans to get a better understanding of how this culture impacts our lives today.

12. Slavery in the Colonies Day 2

13. The French and Indian War

- In this section, you will analyze how Native, European, and African cultures were affected by conflict and compromise in our nation's early history.
- In this section, you will create a timeline of key events in the French and Indian War.

14. Early Settlements Day 1 Apply

- In this section, you will identify important individuals and events involved in setting up colonies in North America.

15. Early Settlements Day 2 Apply

- In this section, you will create an illustrated timeline showing when European colonies were set up in North America.

16. Early Settlements Review and Reflect

17. Early Settlements Unit Test

4. The American Revolution

1. The American Revolution Introduction

2. Tensions with Britain

3. Colonial Figures

- In this section, you will explain the difference between Patriots and Loyalists.
- In this section, you will identify how Sons of Liberty and Daughters of Liberty exercised their rights in the fight for independence and how you can become involved in civic issues you care about.

4. Colonists Rebel

- In this section, you will compare acts of rebellion, including the Boston Tea Party, individuals involved, and the results of these acts.
- In this section you will propose solutions for working creatively and effectively with others during a conflict.

5. Unity Among the Colonies

- In this section, you will define actions and events that united the colonies before the American Revolution.

6. Declaring Independence Day 1

- In this section, you will describe how and why the colonists declared independence.
- In this section, you will describe how and why the colonists declared independence. You will also identify leaders who helped and supported independence.

7. Declaring Independence Day 2

- In this section, you will explain how the Declaration of Independence reflected the views of the time.

8. On the Battlefield

- In this section, you will identify the major battles and contributions of key individuals during the American Revolution.

9. Diverse Perspectives

- In this section, you will identify the different viewpoints of women, free and enslaved African Americans, and Native Americans during the American Revolutionary period.

10. Winning Independence

- In this section, you will explain how help from other countries affected the United States during the American Revolution and how the Treaty of Paris of 1783 aided the growth of the country after the war.

11. The American Revolution Day 1 Apply

- In this section, you will identify social, political, and economic reasons colonists had for choosing to be a Loyalist or Patriot.

12. The American Revolution Day 2 Apply

- In this section, you will discuss the social, political, and economic reasons colonists had for deciding to be a Loyalist or Patriot.

13. The American Revolution Day 2 Apply Discussion

14. The American Revolution Online Practice

15. The American Revolution Review and Reflect

16. The American Revolution Unit Test

5. Building Our Nation

1. Building Our Nation Introduction

2. Articles of Confederation

- In this lesson, you will classify the strengths and weaknesses of the Articles of Confederation.
- In this section, you will describe the government's weaknesses under the Articles of Confederation.
- In this section, you will compose an argument to persuade others to change the Articles of Confederation.

3. Creating the Constitution

- In this section, you will identify the individual rights protected by the Pennsylvania Constitution.
- In this section, you will describe the basic purposes of government in the classroom, school, community, state, and nation.

4. Principles of Government

- In this lesson, you will describe how liberty helped to shape local, state, and national governments.
- In this lesson, you will describe how justice helped to shape local, state, and national governments.
- In this lesson, you will describe how equality helped to shape local, state, and national governments.
- In this lesson, you will describe how democracy helped to shape local, state, and national governments.

5. The Division of Power

- In this section, you will describe the difference between nation and country.

6. Federalist vs. Anti-Federalists

- In this section, you will compare the Federalists and the Anti-Federalists.
- In this section, you will explain why the struggle over the addition of the Bill of Rights was important.

7. The Bill of Rights

- In this section, you will explain the purpose of the Bill of Rights and how it protects individual freedoms.
- In this section, you will identify the individual rights protected by the United States Constitution.

8. Key Concepts of the Constitution

- In this section, you will explain what a representative democracy is and how it works.

9. Constitutional Protections

- In this section, you will interpret key ideas about government found in the Pennsylvania Constitution.
- In this section, you will identify rights and needs people have. You will also differentiate rights from needs.

10. Cooperation in the Community

- In this section, you will identify behaviors that encourage people to cooperate with each other.
- In this section, you will explain why people become leaders.
- In this section, you will define public service. You will also explain why people get involved with public service.
- In this section, you will identify ways people get involved in school and community activities.

11. National and State Symbols

- In this section, you will explain the meaning and importance of state symbols.
- In this section, you will explain the meaning and importance of national holidays.
- In this section, you will analyze historical documents and artifacts from the history of Pennsylvania. You will then illustrate what you learned by describing which is most important and supporting your answer.

12. The Young Nation Grows

- In this section, you will explain the reasons for and the importance of the Lewis and Clark Expedition and contributions made by individuals to the expedition.

13. Washington Takes Office

- In this section, you will analyze the role political parties had in presidential elections and how early presidents affected the development of the United States.

14. Jefferson and the Louisiana Purchase

- In this section, you will explain how the Louisiana Purchase affected the United States and the role key individuals had in contributing to westward expansion.

15. War of 1812

- In this section, you will describe why the War of 1812 began, how events led people to feel proud of the country, and the effect winning the war had on the United States.

16. Trouble for Native Americans

- In this section, you describe the impact of the Trail of Tears on Native Americans by completing a timeline of key dates and events.

17. African Americans Fight for Freedom

- In this section, you will analyze how the cotton gin and settling the West led to an increase in slavery.
- In this section, you will identify individuals and events that had to do with ending slavery.
- In this section, you will assess the extent to which individuals and groups used ideas from the nation's founding documents to create communities of respect and equality throughout American history.

18. Women Fight for Freedom

- In this section, you will discuss the contributions of different groups of Americans.

19. Building our Nation Day 1 Apply

- In this section, you will identify a person from the early United States and describe the person's accomplishments.

20. Building our Nation Day 2 Apply

- In this section, you will create an interview for a person from the early United States using questions that require detailed answers.

21. Building our Nation Review and Reflect

22. Building Our Nation Unit Test

Semester B Summary: In this course, the student will trace United States history from the era of westward expansion to the twenty-first century. Topics include the Civil War, the Depression, World Wars I and II, and the American civil rights era. The student will also examine a chosen topic and complete an American Research Report.

Semester B Outline

1. Course Overview

1. SS 5 B Course Overview

2. Westward Expansion and Civil War

1. Expansion and Civil War Introduction

2. Inventions, Roads, and Railroads

- In this section, you will describe changes that took place during the Industrial Revolution due to advances in technology and inventions.

3. The Lone Star State

- In this section, you will summarize the role of slavery in Texas, how Texas became a state, and important events of the Mexican-American War.

4. Trails to the West

- In this section, you will use maps to identify routes settlers took to travel to the West. You will also describe how individuals and geographic, economic, and social reasons influenced the location of trails and settlements.
- In this section, you will identify reasons that American settlers moved to the West.
- In this section, you will identify geographic, economic, and social factors that influenced the location of trails and settlements.

5. California Gold Rush

- In this section, you will identify the effects of the California Gold Rush, including the costs and benefits to individuals and groups.

6. Struggles Over Slavery

- In this section, you will describe the effect of slavery on the U.S. economy and explain how enslaved African Americans were treated.

7. The War Begins

- In this section, you will identify events and reasons that led to the Civil War.

8. Worth Fighting For

- In this section, you will describe the outcomes of major battles in the civil war and the effect of technology on the war.
- In this section, you will analyze media statements.

9. Life During the Civil War

- In this section, you will describe the effects of the Emancipation Proclamation and Civil War on American life as well as the role of women, African Americans, and Native Americans in the war.
- In this section you will describe the importance of Juneteenth and the freeing of slaves in Texas.
- In this section, you will describe the effects of the Emancipation Proclamation.

10. The War Ends

- In this section, you will document characteristics of military leaders of the Civil War.

11. Reconstruction Apply

- In this section, you will create a graphic organizer to summarize the goals, policies, successes, and failures of Reconstruction.

12. Expansion and Civil War Review

13. Westward Expansion and Civil War Unit Test

3. Good Times and Hardships

1. Good Times and Hardships Introduction

2. The Progressive Era

- In this section, you will describe reform efforts during the Progressive Era in the workplace, in cities, in prisons, for the mentally ill, and to protect nature.
- In this section, you will explain how unions and other diverse groups can work effectively.

3. Inequality for African Americans

- In this section, you will identify the effects of laws that kept African Americans from having the same rights and opportunities as white people as well as how influential African Americans worked for equal opportunities.

- In this section, you will analyze media.

4. Fight for Women's Rights

- In this section, you will describe how the United States has changed in the way it protects individual rights over time.
- In this section, you will prepare a speech regarding women's suffrage.
- In this section, you will describe the Harlem Renaissance and individual contributions to different areas of African American culture.

5. A Voice from the Harlem Renaissance

6. World War I

- In this section, you will summarize the rivalries and feelings that led to World War I and how the war affected Americans at home, especially women and African Americans.

7. World War I Comes to an End

- In this section, you will explain how the Treaty of Versailles ended World War I, formed the League of Nations, and made Germany pay fines.

8. The Roaring Twenties

- In this section, you will compare life and culture during the 1920s to life today, including the use of consumer products and technology.

9. The Great Depression

- In this section, you will analyze the problems caused by the dust storms in the Great Plains.
- In this section, you will describe how the stock market crash of 1929 and the Great Depression affected Americans.
- In this section, you will describe how the stock market crash of 1929 and the Great Depression affected Americans.

10. The New Deal

- In this section, you will examine what it meant to be an American for different groups of people in early American history.
- In this section, you will describe some of the reforms that were part of Franklin Delano Roosevelt's plans for economic recovery.
- In this section, you will identify how Franklin Delano Roosevelt's plans for economic recovery were creative solutions to problems.

11. Challenges and Opportunities Apply

- In this section, you will use the internet to research and create a presentation about an individual from the late 1800s and early 1900s who faced challenges and had a plan to overcome those challenges.

12. Good Times and Hardships Review and Reflect

13. Good Time and Hardships Unit Test

4. American Research Report Portfolio

1. American Research Portfolio Introduction

2. Using Questions to Guide Research

- In this section, you will identify a compelling question and supporting questions to research a topic.

3. Choosing Sources Day 1

- In this section, you will identify different types of sources.

4. Choosing Sources Day 2

- In this section, you will determine different types of historical sources and how they are used.

5. Making Sure Sources are Reliable

- In this section, you will use information about a historical source to determine whether the source is reliable and useful for a topic.

6. Gathering Sources

- In this section, you will use many sources to gather information connected to a topic.

7. Evaluating Sources

- In this section, you will determine whether a source can be believed and trusted by evaluating it for facts and opinions.

8. Answering the Compelling Question

- In this section, you will use the evidence to develop claims about the compelling question and supporting questions.

9. Putting it Together

- In this section, you will generate explanations using details with related information and facts.

10. Finalizing

- In this section, you will use the MLA style guide to name the sources used for research.

11. American Research Report Portfolio Reflect

5. Modern American History

1. Modern American History Introduction

2. World War II

- In this section, you will analyze why World War II began, what countries were at war with each other, and how the United States was involved.
- In this section you will evaluate information about World War II.

3. Theaters of War

- In this section, you will draw conclusions about the effects of World War II, including the mass killing of Jews and other people during the Holocaust, and the decision by the U.S. to use the atomic bomb against Japan.

4. A Dangerous World

- In this section, you will explain what the United States did to stop the spread of communism after World War II and what the "Iron Curtain" is and why it came to be.

5. Post War America

- In this section, you will identify some of the causes and effects that took place in post- World War II America.
- In this section, you will sequence events that took place in post WWII America.
- In this section, you will summarize changes that took place in the United States during the Cold War including changes to where people lived, how they spent money, and the jobs they performed.

6. The Cold War Continues

- In this section, you will analyze the effects of Cold War events in the United States, how American citizens reacted to these events and to the Vietnam War, and how citizens' reactions affected decisions the government made.

7. Civil Rights

- In this section, you will identify some decisions that affected the civil rights of African Americans and explain why individuals took risks to participate in civil rights protests.

8. Civil Rights Leaders

- In this section, you will identify the leaders of the civil rights movement and list events related to ending segregation of schools, athletics, the military, public transportation, and public places.

9. From the Great Society to Reagan

- In this section, you will use the central claim in a secondary source to explain President Lyndon Johnson's belief in the power of government to support social programs.
- In this section, you will describe President Johnson's solutions for supporting social programs and addressing the problems of minority groups.

10. Political Party

- In this section, you will determine the role Americans play in political parties and voting and explain how political parties affect elections.
- In this section, you will explain the role Americans play in political parties and how political parties affect elections.
- In this section, you will determine the role Americans play in political parties and voting and explain how political parties affect elections.

11. Characteristics of Groups Day 1

- In this section, you will compare and contrast characteristics of different groups of people from Pennsylvania.
- In this section, you will compare and contrast how different things in Pennsylvania history have stayed the same or changed over time. You will discuss belief systems, religions, social organizations, government, and business.

12. Characteristics of Groups Day 2

- In this section, you will compare and contrast characteristics of the social, political, cultural, and economic groups in United States history.
- In this section, you will discuss how voting rights in U.S. history have stayed the same or changed over time.

13. Elections and Voting

- In this section, you will describe how the elected government officials make laws at the local, state, and national levels.
- In this section, you will describe how the elected government officials make laws at the local, state, and national levels.
- In this section, you will describe how groups of people try to influence other people.
- In this section, you will define mass media. You will also identify different sources of mass media.

14. Looking Toward the Future Day 1 Portfolio Apply

- In this section, you will propose a plan people could follow to help solve a political, social, economic, or environmental challenge facing the United States.

15. Looking Toward the Future Day 2 Portfolio Apply

- In this section, you will explain a plan people could follow to manage a challenge faced by the United States.

16. Modern American History Review and Reflect

17. Modern American History Unit Test

6. Economics

1. Economics Introduction

2. Meeting Needs and Wants

- In this section, you will define scarcity. You will also explain how limited resources and unlimited wants cause scarcity.
- In this section, you will explain ways in which people meet their basic needs and wants.
- In this section, you will demonstrate how the amount of resources and how hard it is to get resources affect peoples' choices.
- In this section, you will identify ways the economy causes things to stay the same or changes things over time.

3. Sellers and Consumers

- In this section, you will identify how the price of something influences people or companies that sell products.
- In this section, you will identify the price of something influences people who buy products.
- In this section, you will explain how advertising causes people to change their behavior in predictable ways.
- In this section, you will explain how the economy causes things to stay the same or changes things over time.

4. Economic Institutions

- In this section, you will identify things that cause changes in the price of goods.
- In this section, you will describe how businesses opening and closing affects Pennsylvania's economy.
- In this section, you will explain what private economic institutions are. You will also compare and contrast types of private economic institutions.

5. Economic Systems

- In this section, you will describe economic systems that have been important to people throughout history.
- In this section, you will describe market economic systems.
- In this section, you will describe command economic systems.

6. Economic Decision Making

- In this section, you will describe the cost and benefits of government economic programs.
- In this section, you will describe things that affect the decisions the government makes about the economy.
- In this section, you will describe ways in which taxes are collected.

7. International Economics

- In this section, you will explain the growth in international trade.

- In this section, you will explain how and where companies located in many different countries operate.
- In this section, you will identify different groups that help different people and nations work together.

8. Goods, Services, and Assets

- In this section, you will describe how goods and services are available because of workers.
- In this section, you will explain different things that are required in different careers and jobs.
- In this section, you will explain the definition of tangible assets. You will also identify different tangible assets.
- In this section, you will explain the definition of intangible assets. You will also identify different intangible assets.

9. Entrepreneurship and Budgeting

- In this section, you will define entrepreneurship.
- In this section, you will describe entrepreneurship's role in local communities.
- In this section, you will identify the costs and benefits of saving.
- In this section, you will identify the costs and benefits of borrowing.

10. Economics Apply

11. Economics Review and Reflect

12. Economics Unit Test

Social Studies 6

Social Studies 6

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This course offers a broad survey of world history from the beginnings of civilization to the earliest river valley civilizations in Africa and Asia. It also includes a study of early cultures in the Americas. The course examines world political, economic, geographic, and social history from a hybrid regional and chronological point of view. Throughout the course, the student will make connections between geography, politics, and economics, and their impact on world events and the human progress. The student will enhance his social studies skills by completing activities that teach analysis of primary and secondary sources, reading graphs and maps, organizing information, and more. Lessons are designed to develop the student's ability to read, question, analyze, interpret, and evaluate different forms of information. Pearson's MyWorld Interactive World History provides the basis for instruction.

Semester A Outline

- **Constitution Day (L)**
 - Understand the importance and meaning of the Declaration of Independence
 - Understand and recite the beginning of the Declaration of Independence
 - Understand the importance and meaning of the U.S. Constitution and the Bill of Rights
- 1. **Course Overview**
 - 1. Middle School World History and Geography
- 2. **Origins of Civilization**
 - 1. The Distant Past
 - Identify ways that scientists study early humans
 - Locate the region where the earliest humans lived
 - Describe what life was like for the earliest humans
 - 2. Humans Spread Out
 - Identify the first modern humans
 - Identify the likely route of early human migration
 - Describe how early humans adapted to their environments
 - 3. Developing Complex Cultures
 - Identify the culture of Stone Age humans

- Identify what changed with the Neolithic Agricultural Revolution
- Identify the changes that resulted from domestication

4. New Ways of Life

- Identify the costs and benefits of farming for early humans
- Define how farming changed human culture
- Trace and analyze the development of early cities

5. The Rise of Civilizations

- Identify and describe the social classes of early civilizations
- Identify the importance of job specialization and resource management in the development of early civilizations
- Locate early river valley civilizations and identify how availability of resources shaped their development
- Identify and describe the role of agriculture in the development of early civilizations
- Identify the features of the earliest civilizations

6. Origins of Civilization Unit Review

- Identify and describe prehistoric social structures
- Identify the resources and skills early humans depended upon for survival
- Identify and describe the relationship of early humans to their environment
- Identify and analyze archaeological artifacts associated with prehistoric peoples

7. Origins of Civilization Unit Test

- Identify and describe prehistoric social structures
- Identify the resources and skills early humans depended upon for survival
- Identify and describe the relationship of early humans to their environment
- Identify and analyze archaeological artifacts associated with prehistoric peoples

3. **Origins of Civilization Discussion**

1. Origins of Civilization Discussion

- Evaluate the factors that contributed to the rise of civilization

4. **Mesopotamia**

1. Civilization Emerges in Mesopotamia

- Identify and describe the relationship between government and religion in ancient Sumeria
- Identify and describe the characteristics of Sumerian society
- Identify the climate and geography of Mesopotamia
- Identify the causes and effects of technological advancements

2. The First Empires

- Identify the conditions that allowed the first Mesopotamian empire to form
- Identify how the Akkadians and Babylonians ruled large empires
- Describe the significance of Hammurabi's Code
- Describe life in the Babylonian Empire

3. The Assyrian and Persian Empires

- Describe how the Assyrians controlled a large empire
- Identify important characteristics of Persia's government and religion
- Identify what ancient Mesopotamian art reveals about daily life

4. The Phoenicians

- Describe how the geography of Phoenicia influenced their development and economy
- Identify the importance of the sea to Phoenicia
- Identify reasons for the collapse of the Phoenician Empire
- Identify the cultural legacy of Phoenicia

5. Origins of Judaism

- Compare the early Israelites to other peoples in the Fertile Crescent
- Identify the importance of the Torah to Judaism
- Identify critical events in Jewish history
- Identify the role of the ten commandments in Judaism

6. Beliefs of Judaism

- Identify the three parts of the Hebrew Bible
- Identify how the Talmud shows the Jewish religion values learning
- Identify important teachings of Judaism

7. Early History of the Jewish People

- Identify important events during the time of the judges and the kingdom of Israel
- Identify the extent of the Jewish Diaspora
- Identify and analyze the effect of the Diaspora
- Identify how Judaism influences modern society

8. Mesopotamia Unit Review

- Identify the characteristics of ancient Mesopotamian civilizations
- Identify and describe how trade spread Phoenician culture throughout the Mediterranean Sea
- Identify the climate and geography of Mesopotamia
- Identify the origins of the Abrahamic religions

9. Mesopotamia Unit Test

- Identify the characteristics of ancient Mesopotamian civilizations
- Identify and describe how trade spread Phoenician culture throughout the Mediterranean Sea
- Identify the climate and geography of Mesopotamia
- Identify the origins of the Abrahamic religions

5. **Ancient Egypt and Kush**

1. Egypt Under the Pharaohs

- Identify how the Nile River supported civilization
- Differentiate between the social classes of ancient Egyptian society
- Identify and describe what role religion played in the lives of ancient Egyptians
- Identify accomplishments of the great ancient Egyptian rulers

2. Achievements of Egyptian Civilization

- Identify the writing inventions and cultural developments of the ancient Egyptians
- Describe why and how the ancient Egyptians built the pyramids
- Identify the scientific and technical achievements of the ancient Egyptians

3. Egypt and Kush

- Identify materials traded between Egypt and Kush
- Explain the impact that geography had on Kush
- Describe how the relationship between Egypt and Kush changed over time
- Identify the achievements of the Kushites

4. Ancient Egypt and Kush Unit Review

- Identify and describe the role of the pharaoh in the government of ancient Egypt
- Identify major Egyptian cultural and scientific achievements
- Identify and describe the importance of the Nile River to ancient Egyptian culture
- Identify ancient Egypt's cultural and political power
- Compare and contrast the civilizations of ancient Egypt and Kush

5. Ancient Egypt and Kush Unit Test

- Identify and describe the role of the pharaoh in the government of ancient Egypt
- Identify major ancient Egyptian cultural and scientific achievements
- Identify and describe the importance of the Nile River to ancient Egyptian culture
- Identify ancient Egypt's cultural and political power
- Compare and contrast the civilizations of ancient Egypt and Kush

6. Early Civilizations of India

1. The Indus Valley Civilization

- Describe the geography and climate of the Indian subcontinent
- Identify the achievements of early Indus Valley civilizations
- Identify which aspects of Indus Valley civilizations remain a mystery

2. India's Vedic Age

- Identify the history of the Indo-Aryans
- Identify the significance of the Vedas
- Describe the Indian caste system

3. Origins and Beliefs of Hinduism

- Identify the texts that are important to Hinduism
- Explain Hindu core and basic beliefs
- Identify the factors that helped Hinduism's growth

4. Origins and Beliefs of Buddhism

- Identify key events in the life of the Buddha
- Summarize the basic teachings of Buddhism and Jainism
- Identify how Buddhism spread and developed

5. The Maurya Empire Begins

- Identify how Chandragupta Maurya united India
- Identify how Chandragupta Maurya faced the problems of ruling a large empire

6. Asoka's Rule

- Identify how Asoka changed after the Battle of Kalinga
- Identify Asoka's achievements and their effects on India

7. The Gupta Empire

- Identify how the Gupta empire grew and ruled
- Describe Gupta culture
- Identify advancements made in math and science during the Gupta empire

8. Early Civilizations of India Unit Review

- Identify and describe the social castes and associated social roles in ancient India
- Identify the economic factors that spurred ancient Indian mathematical advancements
- Identify how geography influenced the development of civilizations on the Indian subcontinent
- Identify and describe the core beliefs of Hinduism and Buddhism
- Compare and contrast the teachings of Hinduism and Buddhism

9. Early Civilizations of India Unit Test

- Identify and describe the social castes and associated social roles in ancient India
- Identify the economic factors that spurred ancient Indian mathematical advancements
- Identify how geography influenced the development of civilizations on the Indian subcontinent
- Identify and describe the core beliefs of Hinduism and Buddhism
- Compare and contrast the teachings of Hinduism and Buddhism

7. River Valley Civilizations Portfolio

1. River Valley Civilizations Portfolio

- Compare and contrast two ancient river civilizations

8. Early Civilizations of China

1. The Huang River Valley

- Identify how the geography of China impacted settlement
- Identify the achievements of the Shang dynasty

2. The Zhou Dynasty

- Identify how the Zhou rose to power and ruled
- Identify the structure and achievements of Zhou society
- Identify how the Mandate of Heaven functioned in Chinese government

3. Chinese Belief Systems

- Identify and describe the spiritual traditions followed by the ancient Chinese
- Identify the main idea of Confucianism and the five Confucian relationships
- Identify the beliefs of Daoism

4. The Unification of China

- Identify how Shi Huangdi defended the empire
- Identify how Shi Huangdi standardized aspects of Chinese daily life
- Identify and describe how Legalism both helped and hurt the empire

5. The Han Dynasty Expands

- Describe how the Han government was organized
- Identify how the civil service benefitted the Han dynasty
- Identify the significance of the growth and establishment of the Silk Road

6. Han Society and Achievements

- Describe Han society
- Identify the reasons China prospered economically under the Han dynasty
- Identify Han cultural and technological achievements

7. Early Civilizations of China Unit Review

- Analyze the dynastic monarchic cycle of China
- Identify Chinese innovations that spread to other civilizations
- Identify how the geography of China affected its development
- Identify and describe the core beliefs of Chinese religious philosophies
- Compare and contrast ancient Chinese religious philosophies

8. Early Civilizations of China Unit Test

- Analyze the dynastic monarchic cycle of China
- Identify Chinese innovations that spread to other civilizations
- Identify how the geography of China affected its development
- Identify and describe the core beliefs of Chinese religious philosophies
- Compare and contrast ancient Chinese religious philosophies

9. **Civilizations of the Americas**

1. The Maya

- Identify the ways in which the diverse environments of the Americas affected Mayan culture
- Identify key characteristics of Olmec and Mayan cultures
- Identify and describe the major achievements of the Maya

2. The Aztecs

- Identify and describe the roles that the environment played in the development of the Aztec empire
- Identify the Aztec class structure
- Identify key characteristics of Aztec culture
- Identify the relationship between religion and warfare in Aztec society
- Identify and describe the major achievements of the Aztecs

3. The Incas

- Identify the ways in which the environment of the Andes affected Incan culture and development

- Identify and describe the methods used by the Incan empire to expand its rule over land and people
 - Identify key characteristics of Incan culture
 - Identify the achievements of the Incans in architecture, arts and crafts, and science
 - Identify the Incan class structure
4. North American Cultures
- Identify ways in which the environment and climate affected the culture of various Native American civilizations
 - Identify the earliest known North American inhabitants and characteristics of their cultures
 - Compare and contrast arctic and subarctic cultures
 - Compare and contrast the types of housing in which various North American people lived
5. Civilizations of the Americas Unit Review
- Identify and describe the major civilizations that developed in North, Central, and South America
 - Identify scientific and technological advancements that developed in the Americas and compare them to similar advancements that developed elsewhere
 - Identify and describe how American cultures modified or adapted to their environment
 - Identify and describe the rise and fall of various Native American civilizations
6. Civilizations of the Americas Unit Test
- Identify and describe the major civilizations that developed in North, Central, and South America
 - Identify scientific and technological advancements that developed in the Americas and compare them to similar advancements that developed elsewhere
 - Identify and describe how American cultures modified or adapted to their environment
 - Identify and describe the rise and fall of various Native American civilizations

Semester B Summary:

This course offers a broad survey of world history from classical Greece and Rome to Feudalism in Europe and the Enlightenment. The course examines world political, economic, geographic, and social history from a hybrid regional and chronological point of view. Throughout the course, the student will make connections between geography, politics, and economics, and their impact on world events and the human progress. The student will enhance his social studies skills by completing activities that teach analysis of primary and secondary sources, reading graphs and maps, organizing information, and more. Lessons are designed to develop the student's ability to read, question, analyze, interpret, and evaluate different forms of information. Pearson's MyWorld Interactive World History provides the basis for instruction.

Semester B Outline

- **Constitution Day (L)**
 - Understand the importance and meaning of the Declaration of Independence
 - Understand and recite the beginning of the Declaration of Independence
 - Understand the importance and meaning of the U.S. Constitution and the Bill of Rights
1. **Course Overview**
1. Middle School World History and Geography

2. **Ancient Greece**

1. The Early Years of Greek Civilization

- Identify the influence of geography on the development of ancient Greek city-states
- Identify the influence of the Minoans and Mycenaeans on the early Greeks

2. Democracy in Athens

- Identify the key components of democracy and its evolution in ancient Athens
- Compare and contrast American democracy to Athenian democracy

3. Oligarchy in Sparta

- Identify the components of Spartan life
- Contrast life in Sparta and Athens
- Identify the components of Spartan government

4. Ancient Greek Society and Economic Expansion

- Identify the ways the ancient Greeks obtained needed resources
- Identify the different social divisions in ancient Greek society
- Identify goods that were traded throughout the ancient Greek world

5. Warfare in Ancient Greece

- Identify the major events of the Persian Wars
- Identify the causes and effects of the Peloponnesian War

6. Ancient Greek Beliefs and Arts

- Identify the characteristics of ancient Greek religious beliefs
- Identify the ways that ancient Greek beliefs and arts influence life today
- Identify characteristics of ancient Greek arts and architecture

7. Ancient Greek Learning

- Identify the contributions of Greek philosophers, historians, mathematicians, and scientists
- Identify the promise made by doctors in the Hippocratic oath

8. Alexander and the Hellenistic World

- Identify the impact Alexander the Great had on the world
- Identify events of Alexander the Great's life

9. Ancient Greece Unit Review

- Identify and describe ancient Greek forms of government, including Athenian democracy
- Identify how Greek architecture was both functional and artistic
- Describe the influence of Greek culture on the Eurasian region at the time
- Identify the contributions of notable Greeks to thought, science, art, and culture

10. Ancient Greece Unit Test

- Identify and describe ancient Greek forms of government, including Athenian democracy
- Identify how Greek architecture was both functional and artistic
- Describe the influence of Greek culture on the Eurasian region at the time
- Identify the contributions of notable Greeks to thought, science, art, and culture

3. **The Roman Republic**

1. The Roman Republic Rises

- Identify the geographic factors that helped the Roman republic to flourish
- Describe the influence other cultures had on the development of the Roman republic
- Identify the reasons why Rome became a republic
- Identify the ways the Roman republic was able to expand

2. Government of the Republic

- Identify the reasons why power was divided among different groups in the Roman republic
- Identify the rights and responsibilities of Roman citizens
- Identify the roles of each branch of the Roman republic's government
- Compare and contrast government in the Roman republic with government in the United States

3. Society in the Roman Republic

- Identify the roles of men and women in Roman society
- Identify the reasons why Romans tried to please their gods
- Contrast the lives of the wealthy, the free poor, and the slaves in Roman society

4. The Republic Struggles

- Identify the factors that led the Roman republic to crumble
- Identify the characteristics of Julius Caesar's rule
- Identify the characteristics of Augustus Caesar's rule

5. The Roman Republic Unit Review

- Identify and describe the traits of Roman democracy
- Compare and contrast Greek and Roman democracy
- Identify and describe the role of trade in advancing Rome from local republic to empire
- Identify the influence of geography on Roman history and culture
- Identify and distinguish between fact and fiction in describing the beginnings of Rome

6. The Roman Republic Unit Test

- Identify and describe the traits of Roman democracy
- Compare and contrast Greek and Roman democracy
- Identify and describe the role of trade in advancing Rome from local republic to empire
- Identify the influence of geography on Roman history and culture
- Identify and distinguish between fact and fiction in describing the beginnings of Rome

4. **The Roman Republic Discussion**

1. The Roman Republic Discussion

- Evaluate the lasting influence of the Roman republic

5. **The Roman and Byzantine Empires**

1. The Roman Empire Begins

- Identify Rome's greatest engineering achievements

- Identify important Roman emperors and their accomplishments
 - Identify and describe causes and effects of expanded trade throughout the Roman empire
2. Origins of Christianity
- Identify and describe the teachings of Jesus
 - Identify the reasons why Christianity developed as a religion
 - Identify the reasons for the rapid growth of Christianity
 - Identify and describe the Roman government's stance on Christianity
3. Beliefs of Christianity
- Identify and describe the holy writings of the Christian religion
 - Identify and summarize the core Christian beliefs
 - Identify and describe the practice of Christianity today
 - Compare and contrast Judaism and Christianity
4. Roman Culture and Its Legacy
- Explain how Rome was a site of encounter and how that affected the culture and economy of the region
 - Identify and describe Roman achievements in science, medicine, technology, art, and philosophy
 - Identify and explain how Roman government influenced the governments of many modern countries
 - Identify popular means of entertainment in the Roman empire
5. The Decline of the Roman Empire
- Identify and describe the various challenges to protecting the Roman empire from invasion
 - Identify the origins of foreign invaders that attacked the Roman empire
 - Identify and describe the effects of the Imperial Crisis on the Roman empire
 - Identify the factors that led to the fall of Rome
6. The Byzantine Empire Rises
- Compare and contrast the Roman and Byzantine empires
 - Identify the factors that led to the decline of the Byzantine empire
 - Identify areas that at one point were part of the Byzantine empire
 - Identify the influences the Byzantine empire had on early Russia
7. Byzantine Religion and Culture
- Identify and describe the factors that led to the division of the Christian church
 - Compare and contrast the Roman Catholic Church to Eastern Orthodox Church
 - Identify ways Byzantine culture was unique
8. The Roman and Byzantine Empires Unit Review
- Identify and describe the relationship of the Roman empire to civilizations it conquered
 - Identify and describe how Rome benefitted from trade and the exchange of ideas within its empire
 - Identify and describe the origins, beliefs, and spread of Christianity

- Identify and describe the contributions of Romans and other ancient civilizations to thought, science, art, religion, and culture
- Identify and describe the development of the Byzantine empire and its legacy

9. The Roman and Byzantine Empires Unit Test

- Identify and describe the relationship of the Roman empire to civilizations it conquered
- Identify and describe how Rome benefitted from trade and the exchange of ideas within its empire
- Identify and describe the origins, beliefs, and spread of Christianity
- Identify and describe the contributions of Romans and other ancient civilizations to thought, science, art, religion, and culture
- Identify and describe the development of the Byzantine empire and its legacy

6. **Ancient Civilizations Portfolio**

1. Ancient Civilizations Portfolio

- Compare and contrast the ancient Greek and Roman civilizations

7. **Feudal Europe**

1. The Early and Middle Ages in Europe

- Predict how the geography of Europe affected settlement patterns
- Identify the new kingdoms that formed in Europe from the 300s to the 700s
- Identify the results of Charlemagne's rule

2. Christianity Spreads

- Identify the factors that caused Christianity to spread in Europe
- Identify the purposes of monasteries and convents
- Identify and describe the power of the medieval Catholic Church

3. Feudalism and the Manor Economy

- Contrast the invasions of Europe between 800 and 1000
- Identify the elements of feudal society and how it provided protection
- Classify individual roles on medieval manors

4. Revival of Towns and Trade

- Identify and describe how improvements in agriculture affected medieval Christendom
- Identify why trade revived during the Middle Ages
- Predict what led to the growth of towns during the Middle Ages

5. The Church and Medieval Culture

- Identify how the Christian community had changed by the 1200s
- Identify how the Church shaped medieval culture
- Identify why education expanded during the High Middle Ages

6. Conflicts Between Popes and Monarchs

- Compare the empire of Otto the Great with the state of the region before his rule
- Identify why Pope Gregory and Henry IV came into conflict
- Identify why power shifted to the monarch in France in the Middle Ages

7. England Takes Shape

- Identify how the land known as England became unified
- Predict how the conflict between church and state affected England in the 1100s
- Identify why the power of English kings was limited in the 1200s

8. The Crusades

- Identify why Europeans led the First Crusade
- Categorize later crusades
- Identify why Crusaders targeted people who held beliefs other than their own
- Predict the effects of the Crusades

9. The Reconquista

- Identify and describe the Muslim dynasty that controlled Spain from the 700s to the early 1000s
- Identify and describe the Reconquista

10. The Decline of Medieval Society

- Identify the causes of famine in Europe during the 1300s
- Identify and analyze the Hundred Years' War and new weaponry used
- Identify and explain the Black Death and its effects

11. Feudal Europe Unit Review

- Identify the characteristics of feudalism and manorialism
- Identify and analyze the impact of the Crusades on European culture and trade
- Identify and describe the expanding influence of Christianity and Islam over time on a world map
- Identify and evaluate the impact of the bubonic plague on Europe and the world

12. Feudal Europe Unit Test

- Identify the characteristics of feudalism and manorialism
- Identify and analyze the impact of the Crusades on European culture and trade
- Identify and describe the expanding influence of Christianity and Islam over time on a world map
- Identify and evaluate the impact of the bubonic plague on Europe and the world

8. Absolutism and Enlightenment

1. Absolute Monarchy in Spain and France

- Identify how Spanish power increased under Charles V and Philip II
- Identify why 1550 to 1650 is called Spain's golden age
- Contrast the rule of France by Henry IV with that of Cardinal Richelieu
- Identify how a belief in the divine right of kings affected French rule
- Identify and describe the support that Louis XIV gave to the arts

2. Absolutism in Russia and Central Europe

- Identify how Peter the Great reformed Russia
- Compare expansion of Russia under Peter the Great and Catherine the Great

- Compare the leadership of Austria and Prussia in the 1700s
3. Rise of Parliament in England
 - Contrast the rule of the Tudors with that of James I and Charles I
 - Identify the causes and effects of the English Civil War
 - Identify how English government changed during the Glorious Revolution
 4. The Enlightenment
 - Identify the reasons for the development of the Enlightenment
 - Identify and describe how political ideas changed as a result of the Enlightenment
 - Identify and describe Enlightenment thinkers' ideas about social and economic systems
 - Identify and describe how Enlightenment ideas influenced American leaders
 5. Absolutism and Enlightenment Unit Review
 - Identify and describe how Enlightenment thought changed European culture and government
 - Identify the differences between mercantilism and free market economies
 - Identify and describe the impact of absolute monarchs on their nation's cultures and governments
 - Identify nations in Europe that rose to prominence and declined during the 1600s and 1700s
 6. Absolutism and Enlightenment Unit Test
 - Identify and describe how Enlightenment thought changed European culture and government
 - Identify the differences between mercantilism and free market economies
 - Identify and describe the impact of absolute monarchs on their nation's cultures and governments
 - Identify nations in Europe that rose to prominence and declined during the 1600s and 1700s

Social Studies 7

Social Studies 7

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This course offers a broad survey of Western Hemisphere world geography, including North and South America and an overview of social studies as an academic discipline. It also includes a study of modern world history. The course examines world political, economic, geographic, and social history from a hybrid regional and chronological point of view. Throughout the course, the student will make connections between geography, politics, and economics, and their impact on world events and the human progress. The student will enhance her social studies skills by completing activities that teach analysis of primary and secondary sources, reading graphs and maps, organizing information, and more. Lessons are designed to develop the student's ability to read, question, analyze, interpret, and evaluate different forms of information. Pearson's MyWorld Interactive World History and Interactive World Geography provide the basis for instruction.

Semester A Outline

- **Constitution Day (L)**
 - Understand the importance and meaning of the Declaration of Independence
 - Understand and recite the beginning of the Declaration of Independence
 - Understand the importance and meaning of the U.S. Constitution and the Bill of Rights
- 1. **Course Overview**
 - 1. Middle School World History and Geography
- 2. **Introduction to Geography**
 - 1. Geography Basics
 - Identify the five themes of geography
 - Locate places on the global grid using latitude and longitude
 - Identify and compare different methods of showing Earth's surface
 - 2. Our Planet, Earth
 - Identify and explain how the cycle of day and night and the seasons are related to Earth's rotation and position in space
 - Identify the elements of Earth's structure
 - Identify how internal and external forces shape and reshape Earth

3. Climate and Ecosystems

- Identify the forces that create differing weather conditions on Earth
- Identify the role of water in Earth's climate
- Predict the influence of geography on weather and climate
- Identify and compare types of climates, biomes, and ecosystems

4. People and the Environment

- Identify the ways in which people impact the environment, both positively and negatively
- Identify the causes and effects of population growth, migration, and urbanization
- Compare and contrast renewable and nonrenewable resources

5. Culture and Society

- Identify ways in which geography can affect the culture of a region
- Identify different kinds of families and societies based on how they are structured
- Identify the ways different language groups develop
- Identify characteristics of cultural diffusion
- Identify how religion, science, technology, and the arts affect culture

6. Economics Basics

- Identify how wants and needs are a factor in opportunity cost
- Identify the relationship between supply and demand
- Identify and describe the effects of economic activity
- Identify characteristics of economic systems
- Identify recommended ways to manage personal finances

7. Trade and Development

- Identify how and why trade takes place
- Identify how the geography of a region affects trade
- Identify different types of trade
- Identify and compare characteristics of free trade and trade with barriers
- Identify ways in which countries increase economic development and productivity

8. Government

- Identify the purpose of government
- Compare and contrast forms of government
- Compare and contrast systems of government
- Identify the powers of the three branches of the U.S. government
- Identify ways in which conflict and cooperation occur between countries

9. Citizenship

- Identify the rights and responsibilities of a citizen
- Identify the requirements for becoming a U.S. citizen
- Identify ways in which ideas about citizenship have changed over time
- Identify ways in which citizenship differs between democratic and nondemocratic countries

10. History Basics

- Identify ways in which historians measure time
- Classify the types of sources historians use
- Identify ways to evaluate historical sources
- Infer the importance of learning about history
- Identify how archaeology and anthropology are related to the study of history

11. Introduction to Geography Unit Review

- Locate specific pieces of information using various types of maps, charts, and timelines
- Identify ways in which the geography of Earth affects weather, climate, and seasons
- Identify the causes and effects of population growth, migration, trade, and urbanization
- Identify different types of governments and systems of economics based on their characteristics
- Identify how historians use historical artifacts, archaeology, and primary and secondary sources to measure time and discover the characteristics of a particular society or era

12. Introduction to Geography Unit Test

- Locate specific pieces of information using various types of maps, charts, and timelines
- Identify ways in which the geography of Earth affects weather, climate, and seasons
- Identify the causes and effects of population growth, migration, trade, and urbanization
- Identify different types of governments and systems of economics based on their characteristics
- Identify how historians use historical artifacts, archeology, and primary and secondary sources to measure time and discover the characteristics of a particular society or era

3. The Modern World

1. World War I and the Russian Revolution

- Identify the causes of World War
- Identify and describe the major events of and locations involved in World War I
- Predict the outcomes of the Treaty of Versailles
- Identify the events of the Russian Revolution

2. Depression and the Rise of Totalitarianism

- Identify causes of unrest around the world during the early
- Identify and describe the causes and effects of the Great
- Contrast extremists who took power in the Soviet Union, Italy, Germany, and Japan during the Great Depression

3. World War II

- Identify the aggressive nations whose actions caused World War II
- Identify and describe the entry of the United States into the war
- Identify and explain the Holocaust
- Identify the steps toward Allied victory in Europe and the Pacific

4. The Cold War

- Identify the reasons for conflict between the superpowers

- Identify how the Cold War spread to Asia
- Identify and describe the various conflicts of the Cold War
- Identify how the Cold War ended

5. New Nations Emerge

- Identify and explain reasons that colonial empires dissolved after World War II
- Contrast and describe independence movements in Africa and Asia

6. The Middle East

- Identify the nations of the Middle East
- Identify and describe the sources of conflict in the Middle East
- Classify events in the War on Terror

7. Continuing Conflicts

- Identify ethnic and national conflicts in Eastern Europe, the former Soviet Union, Africa, and India
- Identify the leaders and groups around the world who have fought for human rights

8. Living in Our Interdependent World

- Identify the differences between developed and developing countries
- Identify and describe how globalization has changed the world economy
- Classify advances in information technology and modern medicine
- Identify how competition for resources affects the world's people and nations
- Identify and analyze threats to the global environment

9. The Modern World Unit Review

- Identify the characteristics of governments in the modern era and evaluate their impact on global society
- Identify and describe the characteristics of command and market economies
- Compare and contrast command and market economies
- Identify the role of religion in modern global conflicts
- Identify and describe the impact of the Cold War and evaluate its consequences

10. The Modern World Unit Test

- Identify the characteristics of governments in the modern era and evaluate their impact on global society
- Identify and describe the characteristics of command and market economies
- Compare and contrast command and market economies
- Identify the role of religion in modern global conflicts
- Identify and describe the impact of the Cold War and evaluate its consequences

4. The United States and Canada

1. North American Indian Culture Regions

- Identify theories of how the first people reached North America
- Describe how culture is connected to environment
- Identify and describe the early cultures of North America

2. Three American Indian Cultures

- Identify the achievements of the Ancestral Puebloans
- Compare and contrast the cultures of the Ancestral Puebloans and the Mississippians
- Describe the cultures of the Ancestral Puebloans and the Mississippians
- Describe the government of the Iroquois League

3. European Colonization

- Identify the locations of European colonies in North America
- Identify ways in which European colonization affected American Indians
- Identify the relationship between the triangular trade and slavery

4. Building Nations

- Sequence events leading up to the American Revolution
- Identify methods of expansion and their effects the United States
- Identify and describe historical events and movements in Canada and the US
- Compare and contrast the paths to independence of Canada and the United States

5. Living in the United States and Canada

- Identify where people live in the United States and Canada
- Differentiate between interior migration and immigration

6. The United States and Canada at Work

- Compare and contrast the workforce of the United States with that of Canada
- Identify the economic role of government in the United States and Canada
- Compare and contrast the systems of government in the United States and Canada

7. Challenges Facing the United States and Canada

- Identify the economic challenges faced by the United States and Canada
- Identify how immigration impacts the United States and Canada
- Identify the environmental challenges faced by the United States and Canada

8. The United States and Canada Unit Review

- Identify and compare the governments of the United States and Canada
- Identify the effect that trade agreements have had on the economies of the United States and Canada
- Identify and compare ways that Native Americans used and adapted to their environments
- Identify the effects of European colonization in North America

9. The United States and Canada Unit Test

- Identify and compare the governments of the United States and Canada
- Identify the effect that trade agreements have had on the economies of the United States and Canada
- Identify and compare ways that Native Americans used and adapted to their environments
- Identify the effects of European colonization in North America

5. The United States and Canada Portfolio

1. Moving to Canada Portfolio

- Identify how geographic features affect human settlement
- Summarize research on the provinces and territories of Canada
- Classify aspects of Canadian provinces and territories

6. Middle America

1. The Olmec and Maya Civilizations
 - Identify the causes and effects of the Agricultural Revolution in Mesoamerica
 - Identify the accomplishments of the Olmec, Zapotec, and Maya
2. Aztec Civilization
 - Identify ways in which the Aztec built a large empire
 - Identify the social classes within the class structure of the Aztec empire
 - Identify the Aztec accomplishments found in Tenochtitlán
3. Spanish Colonization
 - Identify how the Spanish conquered Middle America
 - Identify the ways in which the Spanish colonization of Middle America affected the people already in that region
 - Identify aspects of life for settlers living in New Spain
4. Independence for Mexico and Central America
 - Identify reasons why the people of Mesoamerica sought independence from Spanish rule
 - List the challenges faced by the people of Mesoamerica following independence from Spanish rule
 - List the ways in which democracy has impacted Central America
5. History of the Caribbean
 - Identify the relationships between colonization, the slave trade, and the diversity of the Caribbean
 - Identify the causes and effects of the Cuban Revolution
6. Living in Mexico and Central America
 - Identify where people live in Mexico and Central America
 - Identify reasons why some people leave Mexico and Central America
 - Identify ways in which the diverse heritage of Mexico and Central America has affected the culture of the region
7. Mexico and Central America at Work
 - Compare and contrast the governments of nations in Central America
 - Compare and contrast the economies of nations in Central America
 - Identify how trade is important for Central America
8. The Caribbean Today
 - Identify the environmental issues faced by the Caribbean region
 - Name the various cultures existing in the Caribbean region
 - List the ways in which Cuba's government and economy differs from others in the Caribbean region
9. Challenges Facing Middle America

- Identify the environmental challenges of nations in Middle America
- Identify the social challenges of nations in Middle America
- Identify the economic challenges of nations in Middle America

10. Middle America Unit Review

- Identify and compare the types of governments found in Middle America
- Identify products and industries that are essential to economies in Middle America
- Identify geographic challenges that affect Middle America
- Identify and compare the rights of different social classes in the Spanish colonies

11. Middle America Unit Test

- Identify and compare the types of governments found in Middle America
- Identify products and industries that are essential to economies in Middle America
- Identify geographic challenges that affect Middle America
- Identify and compare the rights of different social classes in the Spanish colonies

7. Middle America Discussion

1. Middle America Discussion

- Develop a solution to a problem in Middle America

8. South America

1. Early South American Culture

- Identify ways that early people in each region of South America adapted to survive
- List the ways in which agriculture changed the lives of early South American people
- Identify the civilizations that originated in South America

2. Incan Civilization

- Identify methods the Inca used to govern their empire
- Identify the major achievements of the Inca

3. European Colonization of South America

- Identify the way that European colonization divided South America
- Identify the effects of Spanish colonization of South America
- Compare and contrast Spanish and Portuguese colonization areas

4. Independence for South America

- List the ways in which South American nations gained independence from European nations
- Identify the ways in which independence from European nations affected South Americans
- Identify the economic changes brought about by democracy in South America

5. Living in South America

- Compare and contrast the cultures found in South America
- Identify the unique features of Brazilian culture

6. South America at Work

- Identify the different economies in South America
- Compare and contrast the governments of Brazil and the United States

- Compare and contrast the economies in South America
7. Challenges Facing South America
 - Identify the political, economic, and environmental challenges faced by South America
 - Identify the effects of income inequality and poverty on nations of South America
 8. South America Unit Review
 - Identify how governments in South America have changed since gaining independence from European nations
 - Identify factors that have helped and hindered economic growth in South America
 - Identify civilizations and cultural expressions that originated in South America
 9. South America Unit Test
 - Identify how governments in South America have changed since gaining independence from European nations
 - Identify factors that have helped and hindered economic growth in South America
 - Identify civilizations and cultural expressions that originated in South America

Semester B Summary:

This course offers a broad survey of Eastern Hemisphere world geography, including Europe, Asia, Africa, and the island nations of the Pacific. The course examines world political, economic, geographic, and social history from a hybrid regional and chronological point of view. Throughout the course, the student will make connections between geography, politics, and economics, and their impact on world events and the human progress. The student will enhance her social studies skills by completing activities that teach analysis of primary and secondary sources, reading graphs and maps, organizing information, and more. Lessons are designed to develop the student’s ability to read, question, analyze, interpret, and evaluate different forms of information. Pearson’s MyWorld Interactive World Geography provides the basis for instruction.

Semester B Outline

- **Constitution Day (L)**
 - Understand the importance and meaning of the Declaration of Independence
 - Understand and recite the beginning of the Declaration of Independence
 - Understand the importance and meaning of the U.S. Constitution and the Bill of Rights
1. **Course Overview**
 1. Middle School World History and Geography
 2. **Europe Today**
 1. Europe's Cultural Diversity
 - Explain why there are so many languages spoken in Europe
 - Identify the languages and religions of Europe
 - Explain how history has affected the religions practiced in Europe
 - Identify migration patterns in Europe and issues associated with them
 2. Living and Working in Europe
 - List the factors that impact where people decide to live in Europe
 - Identify how Europe's mixed economies function

- Identify the effects of the establishment of the European Union
 - Analyze the German and British economies
3. Government in Europe
 - Identify the forms of government that exist in European nations
 - Identify how the European Union government functions
 - Analyze the governments of Germany and Great Britain
 - Identify challenges to the European Union
 4. Challenges Facing Europe
 - Identify the three main environmental challenges faced by Europe
 - Identify the demographic challenge that Europe is currently experiencing
 - List the various issues facing the European Union
 5. Europe Today Unit Review
 - Identify, compare, and contrast presidential and parliamentary styles of government
 - Identify the goals of and challenges to the European Union
 - Explain why Europe is so culturally diverse
 - Identify and analyze the causes and effects of environmental and demographic challenges facing Europe
 6. Europe Today Unit Test

3. Northern Eurasia

1. Russia Emerges
 - Identify and describe the Silk Road
 - Identify the ways in which Russia emerged and rose to power
 - Identify how Russia lost power in the early 1900s
2. The Soviet Union and its Breakup
 - Identify the causes and effects of the rise of communism in Russia
 - Identify the reasons why the Soviet Union collapsed
 - Identify the various types of government Russia has had over time
3. Living in Northern Eurasia
 - Identify the populous parts of Northern Eurasia and explain why people live in those areas and not others
 - Identify the different races and religions of Northern Eurasian people
4. Northern Eurasia at Work
 - Define an authoritarian government and where it can be found in Northern Eurasia
 - Identify the economic structures of the Northern Eurasian nations
 - Identify the natural resources of Northern Eurasia
5. Challenges Facing Northern Eurasia
 - Identify the environmental challenges existing in Northern Eurasia
 - Identify the political challenges existing in Northern Eurasia
6. Northern Eurasia Unit Review

- Identify, compare, and contrast communism and democracy
- Identify and describe factors that promote or hinder economic development in Northern Eurasia
- Identify factors that promote or inhibit human settlement in regions of Northern Eurasia
- Identify causes and effects of the breakup of the Soviet Union

7. Northern Eurasia Unit Test

- Identify, compare, and contrast communism and democracy
- Identify and describe factors that promote or hinder economic development in Northern Eurasia
- Identify factors that promote or inhibit human settlement in regions of Northern Eurasia
- Identify causes and effects of the breakup of the Soviet Union

4. Africa

1. Human Origins

- Identify how scientists study prehistory
- Identify characteristics of the hunter-gatherers

2. Later African Civilizations

- Identify why empires rise and fall
- Identify how culture spread in East and Southern Africa

3. Colonization and Independence in Africa

- Identify reasons why European powers colonized Africa
- Identify African independence movements
- Identify the issues African nations faced after colonialism

4. Living in Africa

- Identify the settlement patterns of modern Africa
- Identify and describe the relationship between the land and the population
- Identify and describe the Africa's ethnic and religious diversity

5. Africa at Work

- Identify the different economies in Africa
- Identify the different types of government in Africa
- Compare the different economies in Africa

6. Challenges Facing Africa

- Identify the environmental challenges Africa experiences today
- identify the economic challenges Africa experiences today
- Identify the political challenges Africa experiences today
- Identify the health challenges Africa experiences today

7. Africa Unit Review

- Categorize Africa's political and economic problems
- Illustrate the connections between Africa's geography and its economic history
- Analyze the effect colonialism had on Africa

- Describe how early humans overcame challenges to their survival

8. Africa Unit Test

- Categorize Africa's political and economic problems
- Illustrate the connections between Africa's geography and its economic history
- Analyze the effect colonialism had on Africa
- Describe how early humans overcame challenges to their survival

5. Africa Discussion

1. Africa Discussion

- Evaluate the benefit of reforms in Africa

6. Southwest and South Asia Today

1. Cultural Diversity in Southwest Asia

- Identify and compare the major religions practiced in Southwest Asia
- Identify the major ethnic groups that reside in Southwest Asia
- Identify and describe the tensions among ethnic and religious groups in Southwest Asia
- Identify and describe the effect of cultural diffusion in Southwest Asia
- Identify how modern life has affected Southwest Asia

2. Where People Live and Work in Southwest Asia

- Classify the geography regions of Southwest Asia
- Identify the ways in which the geography of the region affects the way people live
- Identify and describe the economies of Southwest Asia

3. Governments in Southwest Asia

- Compare and contrast the governments of Southwest Asian countries
- Identify the democracies that exist in Southwest Asian countries
- Identify the monarchies that exist in Southwest Asian countries
- Identify the events that resulted in the development of democracies, monarchies, theocracies, and failed states in Southwest Asia
- Identify and describe how various forms of government affect the lives of citizens

4. Conflicts in Southwest Asia

- Identify the causes of the Palestinian-Israeli conflict
- Compare and contrast the various conflicts in Southwest Asia
- Identify and describe the conflict in Iraq
- Identify and describe the conflicts in Syria and Yemen

5. Later History of South Asia

- Identify and describe how the spread of Islam affected the religious landscape in South Asia
- Identify and describe the movement for independence in India
- Identify and describe the effect of independence on the countries of South Asia
- Identify the factors that have prevented stable governments in South Asia

6. Living in South Asia

- Identify and describe the factors that have affected settlement patterns in South Asia
- Identify and compare the major religions practiced in South Asia
- Identify the major ethnic groups that reside in South Asia

7. South Asia at Work

- Differentiate the types of democracies and other forms of government in South Asia
- Identify the challenges in India's economy
- Identify main factors that have shaped South Asia's economy
- Infer why South Asia still has high poverty and illiteracy

8. Challenges Facing South Asia

- Identify and describe the causes and effects of the economic challenges faced by South Asia
- Identify the social, political, and religious conflicts in South Asia
- Identify the causes and effects of environmental challenges faced by South Asia

9. Southwest and South Asia Today Unit Review

- Analyze the role that religion plays in government in Southwest and South Asia
- Identify major resources in Southwest and South Asia and economies that rely on them
- Compare and contrast cultures found in Southwest and South Asia
- Analyze the role that conflict has played in the history of Southwest and South Asia

10. Southwest and South Asia Today Unit Test

- Analyze the role that religion plays in government in Southwest and South Asia
- Identify major resources in Southwest and South Asia and economies that rely on them
- Compare and contrast cultures found in Southwest and South Asia
- Analyze the role that conflict has played in the history of Southwest and South Asia

7. Southwest and South Asia Today Portfolio

1. Southwest and South Asia Today Portfolio

- Create a business proposal to solve a problem or challenge in Southwest Asia and South Asia

8. East and Southeast Asia Today

1. Later History of East Asia

- Identify ways in which China, Korea, and Japan established civilizations prior to Western contact
- Identify and explain how European exploration and expansion affected East Asian countries
- Identify and describe development and change that occurred in East Asia in the post-World War II era
- Compare and contrast command and market economies, and identify examples of each
- Identify and describe the roles of communism and nationalism in East Asia

2. Living in East Asia

- Classify the geographic regions of East Asia
- Compare and contrast Buddhism, Daoism, and Shinto
- Identify and describe various ethnic groups in East Asia

3. East Asia at Work

- Compare and contrast the economies of East Asian countries
 - Compare and contrast the governments of East Asian countries
 - Identify and describe the political and social challenges faced by East Asia
4. Challenges Facing East Asia
- Identify the causes and effects of major environmental, political, and economic challenges in East Asia
 - Identify ways in which trade barriers have affected the economy in East Asia
 - Identify and describe ways in which North Korea contributes to the political challenges East Asia faces
 - Identify ways in which East Asian geography poses environmental threats to the region
 - Identify possible solutions to environmental, political, and economic challenges in East Asia
5. Early History of Southeast Asia
- Identify various contributions made by the earliest civilizations in Southeast Asia
 - Identify the impact of geography on the cultural development of Southeast Asia
 - Identify the major religions in Southeast Asia
 - Identify and describe the effect Western colonization in Southeast Asia
6. Independent Southeast Asia
- Identify the events that led to the independence of Southeast Asian countries
 - Identify the causes and effects of the Vietnam War
 - Describe the types of governments in Southeast Asian countries
7. Living in Southeast Asia
- Identify and describe how various geographic characteristics of the region help determine the population density across Southeast Asia
 - Distinguish the major religions practiced in Southeast Asia
 - Identify various ethnicities found throughout Southeast Asia
8. Southeast Asia at Work
- Contrast the differing degrees of democracy in Southeast Asia
 - Identify the critical components of Southeast Asian economies
 - Identify how and why some economies in Southeast Asia are so successful
9. Challenges Facing Southeast Asia
- Identify the causes and effects of major environmental, political, and economic challenges in Southeast Asia
 - Identify the effects of climate change and deforestation in Southeast Asia
 - Explain the effect of population growth in Southeast Asia
10. East and Southeast Asia Today Unit Review
- Identify and compare types of governments and economies found in East and Southeast Asia
 - Identify East and Southeast Asia's role in the world economy
 - Identify and describe the ethnic diversity of East and Southeast Asian nations
 - Identify and describe the role of religion in East and Southeast Asia

11. East and Southeast Asia Today Unit Test

- Identify and compare types of governments and economies found in East and Southeast Asia
- Identify East and Southeast Asia's role in the world economy
- Identify and describe the ethnic diversity of East and Southeast Asian nations
- Identify and describe the role of religion in East and Southeast Asia

9. Australia and the Pacific

1. Early Cultures of Australia and the Pacific

- Identify the characteristics of Aboriginal culture and lifestyle
- Identify and describe the ways in which geography affected how cultures developed in the Pacific island nations
- Identify the effects of long-distance navigation skills on the settlement patterns of Pacific island nations

2. Modern History of Australia and the Pacific

- Identify the factors that led to British settlement in the Pacific
- Identify and describe how the Aborigines reacted to British settlement in the Pacific
- Identify the factors that led to independence in the Pacific Island nations

3. Living in Australia and the Pacific

- Identify the difference in population density throughout Australia and the Pacific
- Compare and contrast the cultures of the Pacific islands
- Infer the effects of British rule on Pacific cultures

4. Australia and the Pacific at Work

- Compare and contrast the types of government in Australia and the Pacific
- Compare and contrast the types of economies in Australia and the Pacific
- Compare and contrast the roles of the monarchy and the prime minister in Australia and New Zealand

5. Challenges Facing Australia and the Pacific

- Predict the possible effects climate change will have on the Pacific region
- Identify and describe the environmental challenges faced by Australia and the Pacific
- Identify the effect rising sea levels has on Australia and New Zealand

6. Antarctica

- Identify Antarctica's geographic characteristics
- Identify and describe the goals of Antarctic research and exploration

7. Australia and the Pacific Unit Review

- Identify and compare the rights of Aboriginal Australians over time
- Identify and analyze the extent to which small Pacific island nations rely on foreign economies
- Identify longstanding and new geographical challenges that Pacific island nations face
- Describe early cultures of Pacific island nations

8. Australia and the Pacific Unit Test

- Identify and compare the rights of Aboriginal Australians over time

- Identify and analyze the extent to which small Pacific island nations rely on foreign economies
- Identify longstanding and new geographical challenges that Pacific island nations face
- Describe early cultures of Pacific island nations

Social Studies 8

Social Studies 8

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

This course offers a broad survey of United States history from the Revolutionary Era through the years before the Civil War. The course examines U.S. political, economic, and social history from a chronological point of view. Throughout the course, the student will make connections between historical events and their impact on the American people and landscape. The student will enhance social studies skills by completing activities that teach understanding primary sources, reading time lines and graphs, comparing and contrasting, recognizing bias, and more. Lessons are designed to develop the student's abilities to question, read, analyze, interpret, and evaluate different forms of information. The student will also practice geography skills by exploring the evolution of America's geography and its historical impact. Pearson's *American History* provides the basis for instruction. The course also includes a civics unit where students will learn the basics of the United States' governmental structure and the way that the federal, state, and local governments interact together.

SEMESTER B

This course offers a broad survey of United States history from the Civil War through the Progressive Era. The course examines U.S. political, economic, and social history from a chronological point of view. Throughout the course, the student will make connections between historical events and their impact on the American people and landscape. The student will enhance social studies skills by completing activities that teach understanding primary sources, reading time lines and graphs, comparing and contrasting, recognizing bias, and more. Lessons are designed to develop the student's abilities to question, read, analyze, interpret, and evaluate different forms of information. The student will also practice geography skills by exploring the evolution of America's geography and its historical impact. Pearson's *American History* provides the basis for instruction. The course also includes two units on economics. In these units, students will learn concepts such as scarcity, supply and demand, government involvement, and personal financial literacy.

Course Outline:

SEMESTER A

- **Constitution Day (L)**
 - Understand the importance and meaning of the Declaration of Independence
 - Understand and recite the beginning of the Declaration of Independence
 - Understand the importance and meaning of the U.S. Constitution and the Bill of Rights

1. Course Overview

1. Getting Started in Middle School American History

There are no objectives for this lesson.

2. **The Revolutionary Era**

1. The French and Indian War

- Describe causes and outcomes of the French and Indian War
- Identify significant events and historical figures of the French and Indian War and analyze their impact on the colonists
- Analyze the reasons for Native American involvement in the French and Indian War

2. Tensions with Britain

- Identify and research key figures who played a role in the decline of the relationship between English rulers and colonists, including colonial leaders who emerged as conflicts escalated
- Analyze reasons for colonists' unrest
- Describe conflicts that followed the French and Indian War that contributed to the decline of the relationship between English rulers and colonists and were ultimately causes of the American Revolution

3. Taking Up Arms

- Analyze events that led to tension between colonists and the British government
- Compare and contrast advantages and disadvantages of the British Army and the Continental Army during the early days of the Revolution
- Identify and describe key battles and events from the Revolutionary War
- Identify and describe notable figures and their role in the Revolutionary War

4. Declaring Independence

- Summarize the purpose and main ideas of the Declaration of Independence
- Describe the impact of Thomas Paine's pamphlet, Common Sense
- Explain the steps Congress took to declare independence

5. Winning Independence

- Analyze how the Continental Army overcame their disadvantages over the course of the Revolutionary War
- Explain factors that contributed to the patriots' winning the war
- Identify and describe key battles and events of the war, including battles that marked turning points and ultimate victory
- Describe the contributions of women and African Americans to the war

6. Unit Review

- Explain the events surrounding the American Revolution from the point of view of both the English Parliament and the American patriots
- Identify key people, events, and battles in the events leading up to and during the Revolutionary War
- Analyze the Declaration of Independence, and identify ideas and documents that influenced it

7. Unit Test

- Explain the events surrounding the American Revolution from the point of view of both the English Parliament and the American patriots

- Identify key people, events, and battles in the events leading up to and during the Revolutionary War
- Analyze the Declaration of Independence, and identify ideas and documents that influenced it

3. A Constitution for the United States

1. A Weak Confederation

- Analyze how and why the government was set up under the Articles of Confederation
- Identify strengths and weaknesses of the Articles of Confederation
- Analyze problems with the Articles of Confederation and the effect of those problems
- Describe how the Northwest Ordinance established a method for settlement

2. Drafting a Constitution

- Describe the organizational structure of the government under the Constitution
- Align weaknesses of the Articles of Confederation with their solutions in the Constitution
- Summarize the conflicts and compromises of the Great Compromise and the Three-Fifths Compromise
- Identify key people and describe their roles during the Constitutional Convention

3. Ideas that Influenced the Constitution

- Identify and analyze what American leaders learned from other forms of government and how the principles shaped the Constitution

4. Federalists, Antifederalists, the Bill of Rights

- Identify key issues in the constitutional debate
- Explain how the Constitution was ratified
- Describe how the Bill of Rights was added to the Constitution

5. Understanding the Constitution

- Identify the framework of government that the Constitution established
- Summarize the seven basic principles of American government
- Identify the powers and duties of the legislative branch, executive branch, and judicial branch of the American government

6. Amending the Constitution

- Explain how the Constitution can be amended
- Identify the rights that the Bill of Rights protects
- Summarize how later amendments expanded democratic rights

7. Citizens' Rights and Responsibilities

- Describe the responsibilities of citizenship
- Summarize what makes a person a citizen of the United States
- Identify how Americans can develop democratic values

8. Unit Review

- Explain the major weaknesses of the Articles of Confederation and how those issues were fixed in the Constitution
- Analyze the Constitution, including the issues that arose during its writing, the arguments and events surrounding its ratification, and the Bill of Rights

- Identify key people, locations, and events involved in the writing and ratification of the Constitution
- Describe the characteristics of a good citizen

9. Unit Test

- Explain the major weaknesses of the Articles of Confederation and how those issues were fixed in the Constitution
- Analyze the Constitution, including the issues that arose during its writing, the arguments and events surrounding its ratification, and the Bill of Rights
- Identify key people, locations, and events involved in the writing and ratification of the Constitution
- Describe the characteristics of a good citizen

4. Civics

1. The United States and the World

- Describe the political organization of the world into countries
- Identify ways in which countries, including the United States, interact with one another
- Explain the role of international organizations in world affairs
- Analyze ways that the United States has both influenced and been influenced by the rest of the world

2. Civics, Politics, and Government

- Explain the separation of and the interaction between civic and private life
- Describe the purpose of government and politics
- Identify political figures from the local, state, and national levels
- Describe how political parties have changed over time
- Contrast limited and unlimited government

3. Constitutions and Government

- Identify the characteristics of a country
- Explain why states and nations have constitutions
- Compare and contrast forms of constitutional government
- Summarize features of U.S. constitutional government

4. American Political Identity

- List factors that have shaped the distinctive American identity and political culture
- Analyze conflicts between U.S. political ideals and reality

5. Influential Ideas and Events

- Evaluate the basic principles and democratic ideals in historical documents and legislation at the federal and state level
- Explain the role of law in limiting U.S. government, protecting citizens, and promoting the common good
- Explain the significance of specific events at the federal and state level

6. Structure of the Government

- Explain how the U.S. Constitution distributes power throughout the federal government

- Compare and contrast the responsibilities and powers of the three branches of government
 - Compare the judicial processes at the national, state, and local level
7. National, State, and Local Government
- Contrast the functions of national, state, and local government
 - Identify local, state, and national leaders
8. The Electoral Process
- Describe the elements of the electoral process
 - Explain the difference between plurality and majority
 - Describe the line of presidential succession as stated in the 25th Amendment
9. Rights and Responsibilities of Citizenship
- Define citizenship
 - Explain the purpose of citizens' rights and responsibilities
 - Explain the importance of the protection of individual rights
 - Compare and contrast the rights and responsibilities of citizenship
10. Participating in a Democracy
- Identify character traits needed for people to effectively participate in a democracy
 - Describe ways that citizens can participate in democracy
 - Evaluate the effectiveness of citizens' efforts used to effect change at the federal, state, and local level
11. Public Opinion in a Democratic Society
- Identify the influence of mass media on the understanding of national and international events
 - Describe the functions and responsibilities of a free press
 - Identify examples of how the media influences the political process
 - Analyze how political symbols, propaganda, and persuasion are used by the media to influence public opinion
12. Civics Unit Review
- Explain how nations, including the United States, interact and form governments
 - Describe ideas relating to civic life, politics, and government
 - Identify the core ideas underlying the U.S. political system
 - Analyze ways that the U.S. government shows democratic ideals
 - Summarize ways that citizens can participate in a democracy
13. Civics Unit Test
- Explain how nations, including the United States, interact and form governments
 - Describe ideas relating to civic life, politics, and government
 - Identify the core ideas underlying the U.S. political system
 - Analyze ways that the U.S. government shows democratic ideals
 - Summarize ways that citizens can participate in a democracy

5. The Early Republic

1. Washington's Presidency

- Identify the political challenges that Washington faced as the first president, and the precedents he set to respond to those challenges
- Describe arguments around Hamilton's tax plan and the causes and effects of the Whiskey Rebellion
- Analyze Washington's major foreign policy decisions
- Explain Hamilton's plan to create a stable economic system
- Analyze a key passage from Washington's farewell address

2. The Origin of Political Parties

- Compare and contrast the views of Federalist and Democratic Republican parties
- Explain the origin of the first political parties
- Describe the cause of the political tension that began after the election of 1796
- Analyze a key passage from Washington's farewell address

3. John Adams's Presidency

- Explain Adams's foreign policy
- Describe the controversy over the Alien and Sedition Acts
- Explain why Congress decided the election of 1800 and how that election set a precedent

4. Jefferson's Presidency

- Explain ways that Jefferson limited the size of the federal government
- Identify the issues surrounding the Louisiana Purchase, and the immediate benefits it brought
- Identify contributions of the Lewis and Clark expeditions
- Describe Jefferson's foreign policy

5. Madison and the War of 1812

- Explain the reasons for conflict between white settlers and Native Americans during the early 1800s
- Identify the causes of the War of 1812
- Explain the challenges that the United States faced in preparing for war
- Describe the important events and effects of the War of 1812

6. Monroe's Presidency

- Explain the significance of regional differences during the Era of Good Feelings
- Explain U.S. foreign policy under Monroe, including the Monroe Doctrine and policies toward Florida
- Explain how the Supreme Court under John Marshall expanded federal power

7. Unit Review

- Evaluate Washington's legacy as the first president
- Compare and contrast the platforms of the first political parties
- Summarize and analyze the administrations of the first five presidents of the United States in terms of foreign issues, domestic issues, and political challenges

8. Unit Test

- Evaluate Washington's legacy as the first president

- Compare and contrast the platforms of the first political parties
- Summarize and analyze the administrations of the first five presidents of the United States in terms of foreign issues, domestic issues, and political challenges

6. The Age of Jackson and Westward Expansion

1. Jackson Wins the Presidency
 - Compare and contrast the political and personal differences of Adams and Jackson
 - Analyze Jackson's early style of government and its lasting impact
2. Political Conflict and Economic Crisis
 - Explain the issues of nullification and states' rights
 - Summarize arguments regarding the banking system
3. Native Americans on the Frontier
 - Explain the conflict over land occupied by Native Americans between the Appalachians and Mississippi
 - Describe the forced removal of Native Americans
 - Describe the cultures of Native Americans between the Appalachians and Mississippi
4. Westward Movement
 - Describe how settlers traveled west
 - Explain how transportation such as roads, steamboats, and canals improved
5. Settling Oregon Country
 - Summarize what life was like for pioneers
 - Identify the hardships faced on wagon trains to the West
 - Explain the appeal of Oregon Country and the significance of the Oregon Trail
6. Independence for Texas
 - Summarize the cooperation and conflict between American settlers in Texas and the Mexican government
 - Describe how the events at the Alamo affected Texans
 - Explain how Texas gained independence
7. Manifest Destiny in California and the Southwest
 - Analyze the relationship between the concept of Manifest Destiny and the westward growth of the nation
 - List the causes and effects of the Mexican-American War
 - Describe life for the Spanish and Native Americans on the missions and ranches of California and New Mexico
8. Unit Review
 - Describe the presidency of Andrew Jackson and analyze his impact on that office
 - Examine the changing relationship between the white Americans and the Native Americans
 - Describe the idea of Manifest Destiny and explain the impact it had on politics and the expanding borders of the United States

9. Unit Test

There are no objectives for this lesson.

7. **Society and Culture Before the Civil War**

1. The Industrial Revolution and Life in the North

- Explain the impact of technology and the Industrial Revolution on the economy
- Analyze the impact that the Industrial Revolution had on daily life
- Describe the impact of immigration and attitudes toward immigrants and African Americans in the North

2. King Cotton and Life in the South

- Analyze the economic, social, and political conditions of free and enslaved African Americans
- Explain the impact of slavery and how it shaped Southern life
- Describe the agricultural economy of the South and how the cotton gin affected both the Northern and Southern economy

3. Reform Movements

- Analyze how political issues and religious influences, including the Second Great Awakening, inspired reform movements
- Describe the impact of social reform movements on American society in the 1800s

4. Abolitionism

- Analyze the effectiveness of the abolitionist movement including the Underground Railroad and its impact on African Americans
- Identify key people who fought for the abolitionist movement

5. Women's Rights

- Describe the origins and effectiveness of the women's rights movement
- Describe the impact of the women's rights movement on opportunities for women
- Explain the impact of the Seneca Falls Convention, including the roles of Elizabeth Cady Stanton and Susan B. Anthony

6. Arts and Literature

- Describe and analyze the emergence of art, literature, and music in the early to mid-1800s and its impact on American culture and society
- Explain how transcendentalism reflected American society

7. Unit Review

- Analyze the impact that new technology had on the culture and economy of the United States
- Identify the various social movements that began in the early 1800s and describe their impact on the culture of the United States
- Compare and contrast the economies of the Northern and Southern states

8. Unit Test

There are no objectives for this lesson.

SEMESTER B

1. **Course Overview**

1. Getting Started in Middle School American History

There are no objectives for this lesson.

2. The Civil War

1. Conflicts and Compromises

- Analyze conflicts over the issue of slavery
- Explain the impact of the Fugitive Slave Act
- Describe how Uncle Tom’s Cabin shifted attitudes about slavery
- Analyze the impact the Compromise of 1850 and the Missouri Compromise on the issue of slavery

2. Growing Tensions

- Analyze the impact of the Kansas-Nebraska Act
- Explain how the issue of slavery continued to lead the nation toward civil war
- Summarize the impact of the Dred Scott case
- Analyze the influence of third parties on the emergence and growth of the Republican Party

3. Division and the Outbreak of War

- Describe the issue of states’ rights relative to the cause of the Civil War
- Explain the impact of the election of 1860
- Analyze the advantages and disadvantages of the North and South leading up to and during the outbreak of the war
- Compare and contrast Davis’s and Lincoln’s ideals and leadership qualities
- Describe the significance of the attack on Fort Sumter

4. The Course of War

- Identify the roles of key military people during the Civil War
- Analyze the strategies used by both the North and South
- Identify battles and the victories of both Confederates and the Union in the early years of the war

5. Emancipation and Life in Wartime

- Explain the contributions of African Americans and women to the Civil War effort
- Describe the conditions endured by soldiers during the Civil War
- Analyze how the war impacted both Northern and Southern economies
- Explain the purpose and effects of the Emancipation Proclamation, and describe Lincoln’s timing for its release

6. The War’s End

- Identify ways in which Union victories at Gettysburg and Vicksburg became turning points in the war
- Analyze Lincoln’s ideas as stated in the Gettysburg Address
- Describe Grant’s plan for ending the war
- Describe the terms of surrender of the Confederacy

7. Unit Review

- Analyze the impact that slavery played on American politics between 1820–1861
- Identify the major political parties that existed in the years prior to the Civil War and describe their stance on various issues

- Describe political events leading up to and during the Civil War, and identify key battles, people, and turning points
- Describe the impact that the expansion of slavery and the Civil War itself had on the culture of the United States before, during, and just after the war

8. Unit Test

There are no objectives for this lesson.

3. Reconstruction and Economic Growth

1. Early Reconstruction

- Compare and contrast the political, economic, and social problems in the North and South following the Civil War
- Analyze the causes and effects of Reconstruction after the Civil War
- Explain the events surrounding and effects of the assassination of Abraham Lincoln
- Describe how President Johnson’s Reconstruction Plan was received by the nation

2. Radical Reconstruction

- Compare and contrast the plans for reconstruction of Lincoln and the Radical Republicans
- Analyze the reasons for and reactions to the Fourteenth and Fifteenth Amendments
- Describe the reasons for and outcome of the impeachment of President Johnson
- Evaluate the effects of legislation on the life of African Americans after the Civil War
- Analyze the portrayal of President Johnson in a political cartoon

3. Reconstruction and Southern Society

- Identify new forces in Southern politics
- Describe how southern conservatives resisted Reconstruction
- Analyze the economic, political, and social challenges facing Reconstruction governments
- Explain why sharecropping led to a cycle of poverty

4. The Aftermath of Reconstruction

- Describe the political and social effects of the Civil War
- Describe the events surrounding the end of Reconstruction
- Analyze how new legislation at the end of Reconstruction affected the lives of African Americans
- Compare and contrast the decision in Plessy v. Ferguson with the real state of life for African Americans

5. Mining, Railroads, and the Economy

- Describe how the boom in gold and silver changed the West
- Identify problems that arose on the mining frontier
- Explain how railroads helped the West develop
- Analyze how railroad services became more efficient over time
- Describe how railroads encouraged economic growth

6. Western Agriculture

- Describe settlement patterns and life on the plains for various groups in America, including Anglos, Mexicanos, and women
- Explain the development of the Populist Party
- Analyze the development and effects of the Cattle Kingdom and the rise of ranching
- Analyze the effects of the Homestead and Morrill Acts

7. Hardship for Native Americans

- Describe the life of the Plains Indians and their uses of buffalo
- Summarize promises made to Native Americans
- Explain why the Plains Indian way of life ended
- Identify why reforms in favor of Native Americans failed

8. Industry and Corporations

- Describe how the steel and oil industries grew
- Analyze arguments surrounding trusts and monopolies
- Analyze the rise of corporations and banks
- Explain Rockefeller's and Carnegie's achievements as titans of industry

9. The Labor Movement

- Describe the problems associated with the use of child labor in industry
- Analyze the rise of labor unions and support for workers' rights
- Evaluate the efforts of labor organizations

10. New Technologies

- Describe new technologies of the late 1800s
- Describe the role of patents in innovation
- Analyze the effects of technology on American lives

11. Unit Review

- Compare and contrast the various plans for reconstruction
- Evaluate the ways people or groups tried to help or hinder the integration of former slaves into society as a whole
- Describe life for various groups of people in different regions of the U.S., including midwestern farmers, industrial titans and their workers, and Native Americans
- Evaluate the impact of new technologies and industrial innovations on the American landscape, culture, and economy

12. Unit Test

- Compare and contrast the various plans for reconstruction
- Evaluate the ways that people or groups tried to help or hinder the integration of former slaves into society as a whole
- Describe life for various groups of people in different regions of the U.S., including Midwestern farmers, industrial titans and their workers, and Native Americans
- Evaluate the impact of new technologies and industrial innovations on the American landscape, culture, and economy

4. The Progressive Era

1. A New Wave of Immigration

- Analyze reasons for immigration to the United States between 1865 and 1915
- Describe the immigrant experience in America
- Explain causes and effects of nativist opposition to immigration

2. Urbanization

- Explain how immigration and domestic migration contributed to changes in cities
- Compare and contrast the lives of the poor, the middle class, and the wealthy
- Analyze the effects of rapid urbanization and interventions
- Describe the settlement house movement

3. The Rise of Progressivism

- Describe politics during the Gilded Age and efforts at political reform
- Identify efforts to regulate big business
- Explain how the muckrakers inspired reform
- Identify the Progressives and explain their reforms

4. The Progressive Presidents

- Analyze the efforts of the Progressive presidents
- Describe the role of the Bull Moose party
- Analyze the impact of the Square Deal

5. Progress and Setbacks for Social Justice

- Analyze efforts to gain women's suffrage and other rights
- Describe the temperance movement and prohibition
- Explain discrimination against various groups during the Progressive Era
- Synthesize information from primary sources into a portfolio project that explains how immigration affected immigrants and Americans in the early 20th century

6. A Changing American Culture

- Describe how city life changed during the Progressive Era
- Identify forms of entertainment that Americans enjoyed during this period
- Describe how public education grew during the Progressive Era
- Identify changes in reading habits
- Explain the interest of Progressive Era writers and painters in subjects from everyday life

7. Unit Review

- Explain the causes and effects of urbanization and mass immigration on society and government around the turn of the century
- Describe the goals of the Progressive movement in the United States, and identify some of the ways in which key people worked toward those goals
- Identify specific victories for the Progressive movement and describe how those victories improved the lives of Americans

8. Unit Test

- Explain the causes and effects of urbanization and mass immigration on society and government around the turn of the century

- Describe the goals of the Progressive movement in the United States, and identify some of the ways in which key people worked toward those goals
- Identify specific victories for the Progressive movement and describe how those victories improved the lives of Americans

5. Economics Basics

1. Scarcity and Choice

- Define the three types of productive resources and give examples of each type
- Differentiate between economic wants and needs
- Explain how choices involve trade-offs
- Describe how scarcity causes people to make choices

2. Economic Decision Making

- Define cost and benefit
- Explain that individuals, governments, and businesses deal with scarcity and opportunity costs
- Describe how choices lead to consequences
- Explain that evaluation and choice may vary from person to person

3. Distributing Goods and Services

- Describe different ways that people distribute scarce goods and services
- Contrast market and command economies
- List the three basic economic questions
- Explain how resources can be used to make different goods and services

4. Incentives

- Describe the difference between positive and negative incentives
- Explain that changes in incentives cause people to change their behavior
- Contrast monetary and non-monetary incentives

5. Trade

- Define exchange, barter, imports, and exports
- Explain why people choose to trade and how trade benefits people who engage in it
- Describe free trade and trade barriers

6. Specialization

- Contrast producers and consumers
- Explain how specialization and division of labor benefit producers and consumers
- Describe how trade infrastructure contributes to interdependence
- Describe how the availability and distribution of resources affects the economy

7. Market and Prices

- Explain the interaction of markets and prices
- Describe market prices, relative prices, and equilibrium prices

8. Role of Prices

- Describe the relationship between price and quantity purchased
- Explain the law of demand and the law of supply

- Give examples of how one price change can cause the price changes of other goods and services to change

9. Competition in Markets

- Explain how sellers compete for buyers
- State results of competition among sellers
- State results of competition among buyers
- Demonstrate how a market economy applies to different situations
- Identify positive and negative effects of competition

10. Economic Institutions

- Describe the functions of banks in the economy
- Explain how personal savings contribute to the overall economy
- Describe the roles of labor unions in the economy
- Describe the roles of non-profit organizations in the economy
- Identify the rewards and risks associated with the use of financial institutions

11. Economics Basics Unit Review

- Explain how the existence of unlimited wants and scarce resources influence actions by consumers, producers, and governments
- Describe the interactions of markets and prices on a local and global level
- Identify the influence of incentives on prices and consumer actions
- Describe how competition functions in the market
- Compare and contrast the roles of individuals, businesses, organizations, government, and other institutions in the economy

12. Economics Basics Unit Test

- Explain how the existence of unlimited wants and scarce resources influence actions by consumers, producers, and governments
- Describe the interactions of markets and prices on a local and global level
- Identify the influence of incentives on prices and consumer actions
- Describe how competition functions in the market
- Compare and contrast the roles of individuals, businesses, organizations, government, and other institutions in the economy

6. Building on Economics Basics

1. Money and Inflation

- Identify characteristics of money
- List the functions of money
- Contrast inflation and deflation

2. Interest Rates

- Define interest rate
- Analyze how supply and demand determine interest rates
- Analyze how risk determines interest rates

3. Income

- Describe how people earn income
 - Explain different factors that determine peoples' income
4. Entrepreneurship
- Explain characteristics of entrepreneurs
 - Describe how entrepreneurs earn profits and take losses
 - Differentiate the pros and cons of entrepreneurship
5. Productivity and Growth
- Explain how workers can improve their productivity
 - Analyze the relationship between productivity and economic growth
6. Government's Role in the Economy
- Explain how government provides certain goods and services in a market economy
 - Describe how government brings in money to pay for public goods and services
 - Describe the function of the Federal Reserve System
 - Identify the role of the government in a market economy
 - Compare and contrast the effects of different taxation policies
7. Economic Changes
- Define and explain the components of gross domestic product
 - Explain the circular flow diagram
 - Explain how changes in spending affect others
 - Identify U.S. recessions
 - Calculate and use per capita GDP
8. Unemployment and Inflation
- Explain the terms unemployed and unemployment rate
 - Identify factors that are often associated with unemployment
 - Identify effects of unemployment on the economy as a whole
 - Determine how inflation affects what people can afford to buy
 - Compare standards of living across different times and places
9. Business and Investing
- Identify different types of investments
 - Describe how the stock market works
 - Differentiate between different types of businesses based on how they are organized
 - Explain how large corporations influence the economy
10. Personal Finance
- Identify and distinguish among different forms of credit
 - Analyze the advantages and disadvantages to using credit for purchases
 - Create a personal budget
 - Identify the costs and benefits associated with using financial tools
11. Building on Economics Basics Unit Review

- Explain how people make and use money in a market economy
- Discuss the factors that contribute to economic growth at the individual and national levels
- Describe the role of government in the economy
- Identify and analyze economic indicators, including gross domestic product and unemployment rates
- Predict consequences of economic choices and changes over time

12. Building on Economics Basics Unit Test

- Explain how people make and use money in a market economy
- Discuss the factors that contribute to economic growth at the individual and national levels
- Describe the role of government in the economy
- Identify and analyze economic indicators, including gross domestic product and unemployment rates
- Predict consequences of economic choices and changes over time

American Government

American Government

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This is the first of two courses that comprise American Government. *Magruder’s American Government* provides the basis for instruction. In this course, the student will explore the foundations of American government and its fundamental principles and organization. The student will examine government concepts such as the growth of democracy, federalism, separation of powers, and checks and balances. The branches of government—legislative, executive, and judicial—are studied in depth. This course promotes understanding and participation in government by presenting information in a context that is relevant to the student. Activities in this course are designed to develop the student’s abilities to question, read, analyze, interpret, and evaluate different forms of information, as well as to communicate ideas to others.

This is the second of two courses that comprise American Government. *Magruder’s American Government* provides the basis for instruction. In this course, the student will examine the basic rights and responsibilities of U.S. citizens and the foundations of American government. In addition, the student will explore constitutional freedoms, citizen requirements, and aspects of American law. Other topics covered include political parties, interest groups, ways to affect the government, and the influence of the media. Finally, the student will learn about local and state government structures, and compare political systems and economies from around the world.

Course Outline

SEMESTER A

1. Course Overview

1. Course Overview

2. Foundations of American Government

1. Foundations of American Government Overview

- Define the powers every government holds
- Differentiate between primary and secondary sources

2. Natural Law, Government, and the State

- Apply the characteristics of a state to the United States
- Compare and contrast different theories and governments that influenced the structure of American government

3. President or King? Different Forms of Government

- Differentiate between forms of government based on the distribution of power between the executive and legislative branch
- Classify governments into one of three systems

- Differentiate between a dictatorship and democracy
 - Compare and contrast presidential and parliamentary styles of government
4. Concepts of Democracy
- Identify the foundations and principles of democracy
 - Apply the concepts of democracy to current society
 - Analyze European philosophical influences on American government
5. A Special Relationship – Colonies and the Crown
- Organize the progression of colonial resistance to the British monarchy
 - Explain the concepts of power, legitimacy, authority, and sovereignty
 - Evaluate the democratic concepts of popular sovereignty, division of power, and natural rights
 - Differentiate between three types of colonies
6. The Road to Revolution
- Evaluate the democratic concepts of popular sovereignty, division of power, and natural rights
 - Analyze the historical events leading to American founding documents
 - Explain major political ideas in history, including the laws of nature and nature's God, unalienable rights, divine right of kings, social contract theory, and the rights of resistance to illegitimate government
7. The Declaration of Independence
- Analyze the relationship between the Declaration of Independence and European political theories
 - Describe the main ideas of the Declaration of Independence
 - Interpret the meaning of the Pledge of Allegiance to the flag of the United States
 - Summarize the debates and compromises leading to the Declaration of Independence
8. The Articles of Confederation
- Analyze why the weak central government and limited powers of the Articles of Confederation demonstrated the need for the Constitution
 - Evaluate the democratic concepts of popular sovereignty, division of power, and natural rights
 - Organize the sequence of events leading to the creation of the Articles of Confederation
9. Debate and Compromise – Framing the Constitution
- Summarize the debates and compromises leading to the creation of the U.S. Constitution
 - Compare the political ideologies of the Federalists and the Anti-Federalists
 - Describe the events leading to the creation of the U.S. Constitution
 - Identify four Framers of the Constitution
10. Principles of the Constitution
- Define the six main principles in the U.S. Constitution
 - Analyze the purpose and functions of government as outlined by the U.S. Constitution
 - Evaluate constitutional provisions for limiting the role of government, checks and balances, and separation of powers
11. Constitutional Change and the Formal Amendment
- Explain the formal amendment process for the Constitution

- Analyze the political principles of popular sovereignty, separation of powers, and federalism
- Evaluate constitutional provisions for limiting government

12. States' Rights and the Division of Powers

- Classify the division of powers as outlined by the U.S. Constitution
- Evaluate the role of limited government and the rule of law in American government
- Describe the role and powers of state and local governments
- Define the Supremacy Clause

13. More Than a Label – American Citizenship

- Explain the process of becoming an American citizen
- Outline the role of citizens in a democracy
- Evaluate citizen rights versus responsibilities

14. Citizenship and the Constitution

- Locate, analyze, and use various forms of evidence, information, and sources about a significant public policy issue, including primary and secondary sources, legal documents, non-text-based information, and other forms of political communication
- Make a persuasive, reasoned argument on a public issue and support it using evidence, constitutional principles, and fundamental values of American constitutional democracy; explain the stance or position

15. Foundations of American Government Unit Review

- Read, analyze, and interpret historical documents and events that led to the establishment of a central American government
- Define the basic responsibilities held by every government
- Outline the distribution of power within an organized state
- Compare and contrast different theories and governments that influenced the structure of American government
- Examine and explain how checks and balances impact American government

16. Foundations of American Government Unit Test

- Read, analyze, and interpret historical documents and events that led to the establishment of a central American government
- Define the basic responsibilities held by every government
- Outline the distribution of power within an organized state
- Compare and contrast different theories and governments that influenced the structure of American government
- Examine and explain how checks and balances impact American government

3. The Legislative Branch

1. The Legislative Branch Overview

- Analyze the structure and functions of the legislative branch as outlined by the Constitution
- Explain the roles and duties of the legislative branch
- Evaluate the powers of the legislative branch in relation to the other branches of government

2. Congress – A Separation of Powers

- Analyze the structure and functions of the legislative branch as outlined by the Constitution

- Describe congressional sessions and terms
3. The House of Representatives – The Lower Chamber
 - Analyze the structure and functions of the legislative branch as outlined by the Constitution
 - Explain the roles and duties of the House of Representatives
 4. The Senate – The Upper Chamber
 - Explain the roles and duties of the Senate
 - Evaluate the powers of the House of Representatives in relation to the Senate
 - Analyze the structure and functions of the legislative branch as outlined by the Constitution
 5. Congressional Committees at Work
 - Explain the roles and duties of the legislative branch
 - Analyze the structure and functions of the legislative branch as outlined by the Constitution
 6. Powers of Congress – An Overview
 - Determine the extent of congressional power
 - Compare and contrast the ideas of strict constructionists and liberal constructionists
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 7. Expressed Powers – Money and Commerce
 - Define the expressed powers of the legislative branch as outlined by the Constitution
 - Explain the scope of legislative powers as it relates to lawmaking and economic regulations
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 8. Expressed Powers – Foreign and Domestic Affairs
 - Define the expressed powers of the legislative branch as outlined by the Constitution
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 9. The Implied Powers of Congress
 - Define the implied powers of the legislative branch as outlined by the Constitution
 - Explain the importance of the Elastic Clause
 - Differentiate between expressed and implied powers
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 10. Nonlegislative Powers of Congress
 - Define the nonlegislative powers of the legislative branch as outlined by the Constitution
 - Explain the scope of legislative powers as it relates to amending the constitution, appointments, investigations, and impeachments
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 11. How a Bill Becomes Law
 - Explain the formal process of how a bill becomes a law
 - Compare the processes of lawmaking in the two houses of Congress
 - Analyze the structure and functions of the legislative branch as outlined by the Constitution
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 - Analyze how the executive branch interacts with the legislative branch in the lawmaking process

12. Taking Civic Action

- Evaluate how Congress represents the will and interests of the people
- Make a persuasive, reasoned argument on a public issue and support it using evidence, constitutional principles, and fundamental values of American constitutional democracy; explain the stance or position
- Analyze the committee system in Congress and its role in government

13. Unit Review

- Define the powers provided to Congress by the Constitution
- Evaluate how Congress represents the will and interests of the people
- Identify the qualifications for election to the House of Representatives and Senate
- Analyze the committee system in Congress and its role in government
- Describe the legislative development process

14. Unit Test

- Define the powers provided to Congress by the Constitution
- Evaluate how Congress represents the will and interests of the people
- Identify the qualifications for election to the House of Representatives and Senate
- Analyze the committee system in Congress and its role in government
- Describe the legislative development process

4. The Executive Branch

1. The Executive Branch – An Overview

- Analyze the structure and functions of the executive branch as outlined by the Constitution
- Explain the roles and duties of the executive branch

2. The American Presidency

- Explain the written qualifications for president of the United States
- Analyze the structure and functions of the executive branch as outlined by the Constitution
- Differentiate the role of the president from the vice president
- Explain the rules and process of presidential succession

3. Choosing a Side – The Political Machine

- Describe the nomination and electoral process as outlined by the Constitution
- Discuss the history of the nomination process for presidential candidates and the increasing importance of primaries in general elections

4. Choosing a Leader – The Electoral College

- Describe the nomination and electoral process as outlined by the Constitution
- Evaluate the fairness and effectiveness of the United States electoral processes, including the Electoral College

5. Executive Powers

- Analyze the structure and functions of the executive branch as outlined by the Constitution
- Explain the scope of executive powers as it relates to revenue, regulatory functions, domestic and foreign policy
- Evaluate the powers of the executive branch in relation to the other branches of government

6. The Federal Bureaucracy

- Analyze the structure and functions of the executive branch as outlined by the Constitution
- Explain the scope of executive powers as it relates to revenue, regulatory functions, domestic and foreign policy

7. The Executive Office of the President

- Explain the purpose and role of the many parts in the Executive Office of the President
- Analyze the structure and functions of the executive branch as outlined by the Constitution
- Explain the scope of executive powers as it relates to revenue, regulatory functions, domestic and foreign policy

8. Executive Departments

- Describe and explain the roles of the main executive departments
- Analyze the structure and functions of the executive branch as outlined by the Constitution
- Evaluate the powers of the executive branch in relation to the other branches of government

9. Independent Agencies

- Evaluate how government agencies create, amend, and enforce regulations
- Identify the role of independent regulatory agencies in the federal bureaucracy
- Define the role of independent agencies in the federal bureaucracy

10. American Foreign Policy

- Explain the scope of executive powers as it relates to revenue, regulatory functions, domestic and foreign policy
- Describe the characteristics of United States foreign policy and how it has been created and implemented over time

11. National Security and Defense

- Explain the scope of executive powers as it relates to revenue, regulatory functions, domestic and foreign policy
- Evaluate the powers of the executive branch in relation to the other branches of government

12. Diplomacy and the State Department

- Identify and analyze U.S. foreign policy in dealing with international issues with diplomacy and humanitarian aid
- Evaluate the means used to implement U.S. foreign policy with respect to current or past international issues

13. Memo to the President

- Write a five-paragraph essay that includes a persuasive, reasoned argument on the assigned public issue and support your argument evidence, constitutional principles, and fundamental values of American constitutional democracy
- Evaluate the roles of the president in international affairs
- Examine the issues of social justice and human rights as expressed in the United Nations Declaration of Human Rights

14. Unit Review

- Classify the responsibilities of the executive branch and its parts
- Identify, explain, and evaluate the constitutional powers of the president

- Explain the bureaucratic structure of federal government
- Describe various roles of the president in international affairs
- Analyze historic elections and candidacies

15. The Executive Branch Unit Test

- Classify the responsibilities of the executive branch and its parts.
- Identify, explain, and evaluate the constitutional powers of the President.
- Explain the bureaucratic structure of federal government.
- Describe various roles of the President in international affairs.
- Analyze historic elections (and candidacies).

5. The Judicial Branch

1. The Judicial Branch Overview

- Explain the purposes and function of law and the judicial branch as outlined by the Constitution
- Analyze the role of the judicial branch in maintaining the Constitution
- Evaluate the powers of the judicial branch in relation to the other branches of government

2. The Federal Court System

- Explain the purposes and function of law and the judicial branch as outlined by the Constitution
- Analyze the role of the judicial branch in maintaining the Constitution
- Evaluate the powers of the judicial branch in relation to the other branches of government
- Analyze how the courts interpret laws

3. The Supreme Court

- Explain the purposes and function of law and the judicial branch as outlined by the Constitution
- Analyze the role of the judicial branch in maintaining the Constitution
- Analyze how the courts interpret laws by using landmark Supreme Court cases

4. Inferior and Special Courts – The Lower Courts

- Differentiate the roles and jurisdictions of the inferior and special courts from the Supreme Court
- Explain the powers of the inferior and special courts as outlined by the Constitution
- Analyze how the courts interpret laws

5. Supreme Court's Protections

- Differentiate between civil rights and civil liberties
- Explain why rights are relative
- Explain how the Constitution protects life, liberty, and property

6. Supreme Court on Religious Freedom

- Explain the concept of separation of church and state
- Explain the rights afforded to citizens by the First Amendment
- Evaluate the effectiveness of the U.S. justice system in protecting life, liberty, and property

- Analyze how the courts interpret laws by using landmark Supreme Court cases

7. Supreme Court on Speech and Press

- Differentiate between protected and unprotected speech
- Explain the rights afforded to citizens by the First Amendment
- Evaluate the effectiveness of the U.S. justice system in protecting life, liberty, and property
- Analyze how the courts interpret laws by using landmark Supreme Court cases

8. Supreme Court on Petition and Assembly

- Evaluate the effectiveness of the U.S. justice system in protecting life, liberty, and property
- Analyze how the courts interpret laws by using landmark Supreme Court cases
- Explain the rights afforded to citizens by the First Amendment

9. A Judicial Opinion

- Evaluate the process for appointing federal judges and Supreme Court justices
- Locate, analyze, and use various forms of evidence, information, and sources about a significant public policy issue, including primary and secondary sources, legal documents, non-text-based information, and other forms of political communication
- Make a persuasive, reasoned argument on a public issue and support it using evidence, constitutional principles, and fundamental values of American constitutional democracy; explain the stance or position

10. Unit Review

- Identify the roles and responsibilities of the judicial branch given by the Constitution
- Discuss and critique judicial review and how it impacts public policy by examining historical court cases
- Evaluate the process for appointing federal judges and Supreme Court justices
- Describe the jurisdiction of federal and Supreme Court and how a case is moved to these courts

11. Unit Test

- Identify the roles and responsibilities of the judicial branch given by the Constitution
- Discuss and critique judicial review and how it impacts public policy by examining historical court cases.
- Evaluate the process for appointing federal judges and Supreme Court justices
- Describe the jurisdiction of federal and Supreme Court and how a case is moved to these courts.

6. Semester Review and Exam

1. Semester Review

- Examine government concepts such as the growth of democracy, federalism, separation of powers, and checks and balances
- Analyze the roles, responsibilities, and structures of the legislative, executive, and judicial branches of government
- Analyze and interpret historical documents and events that led to the establishment of a central American government

2. Semester Exam

- Examine government concepts such as the growth of democracy, federalism, separation of powers, and checks and balances
- Analyze the roles, responsibilities, and structures of the legislative, executive, and judicial branches of government
- Analyze and interpret historical documents and events that led to the establishment of a central American government

SEMESTER B

1. Course Overview

1. Course Overview

2. Comparative Government and Economic Systems

1. Introduction to Capitalism

- Explain the economic system of capitalism and examine the relationship between supply and demand
- Recognize the influence of U.S. government policies in regulating production and competition for scarce resources
- Describe the four fundamental factors in a free enterprise system, and assess how the federal government fosters competition and entrepreneurship

2. Fiscal and Monetary Policy

- Explain the major responsibilities, goals, and actions of the federal government for domestic economic policy
- Analyze how government fiscal and monetary policy influence the economy at the national level
- Describe the regulatory functions of the government and their impact on the economy

3. Spending and Borrowing

- Identify the sources of U.S. expenditures, and define controllable and uncontrollable spending
- Analyze the executive branch's function of proposing the federal budget, working in conjunction with the U.S. Congress in executing policy goals
- Describe the federal government's sources of revenue, and evaluate the impact of its expenditures and debt on the U.S. economy

4. U.S. Global Economy and Trade

- Explain the causes of globalization, including recent scientific discoveries and technological innovations, and its effects on the American economy
- Examine the roles of the executive and legislative branches in setting international trade and fiscal policies
- Recognize the benefits and drawbacks of the global economy, including the significance to the United States of the location and key natural resources of selected global places or regions

5. Socialism and Communism

- Summarize Karl Marx's theories and identify important characteristics of socialist and communist economies
- Evaluate the strengths and weaknesses of free enterprise versus socialism and communism

6. Governmental Systems

- Explain the differences in the governmental systems of autocracy, democracy, aristocracy, and theocracy

- Compare the advantages and disadvantages of federal, confederal, and unitary systems of government
 - Evaluate the outcomes of democratization in the world today
7. United Kingdom – History and Government
- Outline the United Kingdom’s structure of government
 - Describe the United Kingdom’s electoral and public policy-making processes
8. United Kingdom – Comparison to the United States
- Compare and contrast the governmental systems of the United States and the United Kingdom
 - Evaluate the nature of the relationship between the United States and the United Kingdom
9. Russia – History and Government
- Examine Russia’s political history after the Bolshevik Revolution
 - Understand the Russian Federation’s structure of government
 - Describe the Russian Federation’s election and public policy-making processes
10. Russia – Comparison to the United States
- Compare and contrast the governmental systems of the United States and the Russian Federation
 - Examine the nature of the U.S. relationship with Russia since the fall of the Soviet Union
11. China – History and Government
- Examine China’s political background and the emergence of communist rule
 - Outline China’s structure of government
 - Describe China’s election and public policy-making processes
 - Compare and contrast the structure and reforms of China and Russia
12. China – Comparison to the United States
- Compare and contrast the governmental systems of the United States and China
 - Examine the conflict between capitalism and democracy as it relates to China’s modern economy
13. U.S. Foreign Policy Goals
- Identify U.S. foreign policy goals and explain how they are rooted in American political culture, values, and traditions
 - Review the powers of the presidency in shaping foreign policy
 - Differentiate between soft and hard power
 - Discuss the benefits and drawbacks of U.S. efforts to promote democracy in other parts of the world
14. Unit Review
- Identify and explain the role of the government in the U.S. economy
 - Evaluate and critique the strengths and weaknesses of capitalism in comparison to other economic systems
 - Analyze and define public debt and its impact on the system and citizens
 - Identify choices nations and individuals make in managing economic resources
 - Understand costs and benefits of personal saving, investment, credit, and insurance strategies

15. Unit Test

- Identify and explain the role of the government in the U.S. economy
- Evaluate and critique the strengths and weaknesses of capitalism in comparison to other economic systems
- Analyze and define public debt and its impact on the system and citizens
- Apply the principles of government to other country's political structures
- Identify U.S. foreign policy goals and approaches, and analyze the nature of contemporary global issues

3. The Constitution and Civil Liberties

1. The Constitution and Civil Liberties Overview

- Evaluate how the rule of law, as embodied in a constitution, limits government and protects individual rights
- Define "constitutionalism" and explain how the rule of law protects individual rights and promotes the common good
- Interpret the claim that a constitutional democracy requires the participation of an attentive, knowledgeable, and informed citizenry
- State a claim and develop a logical argument using reasons, examples, and/or evidence

2. The Need for a Constitution

- Examine how the philosophical ideas of Thomas Hobbes and John Locke influenced the Founding Fathers in the creation of a government with limited power and that protected individual rights
- Analyze the concept of a social contract
- Compare historical and contemporary examples of constitutional governments that succeeded in limiting power
- Use a variety of literacy strategies to determine the meanings of words and phrases as they are used in a text

3. Rationale of the Constitutional Structure

- Describe the origins, purposes, and limitations of government through the viewpoints of key philosophers and the authors of the Federalist Papers
- Deconstruct the Preamble and the seven articles of the U.S. Constitution
- Identify how the principles of republicanism, separation of powers, bicameralism, enumerated powers, and federalism serve to limit the power of government
- Evaluate the key issues of conflict during the Constitutional Convention: the question of congressional representation and the extent of executive authority
- Analyze the structure of the Constitution

4. The Six Organizing Principles of the Constitution

- Analyze how the principles of separation of power, checks and balances, and federalism serve to limit governmental power and promote popular sovereignty
- Examine how the power of judicial review allows the judiciary to protect constitutional principles
- Summarize the key benefits the Founding Fathers saw in a federal structure of government
- Use precise language and domain-specific vocabulary to manage the complexity of the six organizing principles of the Constitution in short written pieces

5. The Amendment Process (27 Amendments)

- Summarize how the U.S. Constitution is often referred to as a “living” document
- Outline the constitutionally prescribed procedures by which the U.S. Constitution can be formally changed
- Identify the 27 amendments that have been added to the Constitution and those that have been proposed but not ratified
- Examine how basic legislation has clarified the Constitution over time
- Analyze how interpretation of the Constitution has changed over the years through the actions of the executive and judicial branches, and by party practices and customs

6. The Unalienable Rights

- Interpret the meaning of an unalienable right
- Explain the importance of unalienable rights in limiting the powers of government
- Evaluate the relationship between rights and responsibilities, and how exercise of your right may infringe on another’s right
- Classify personal rights, political rights, and economic rights

7. The Supreme Court and Competing Rights

- Evaluate the U.S. Supreme Court’s role in defining constitutional principles
- Recognize the common reasons why judicial interpretations of the U.S. Constitution may change over time
- Define the meaning of “competing rights”
- Conduct a short research task by finding a current event example of a civil liberty issue that is a competing right

8. Freedom of Speech

- Describe the right to free speech by using historical and contemporary examples
- Explain why the Founding Fathers felt that protection of free speech was crucial in the functioning of a democracy
- Evaluate the scope and appropriate limits to the right of free speech

9. Freedom of Religion

- Consider the historical role of religion and religious diversity
- Explain why the Founding Fathers felt religion was an important issue to single out for protection in the Bill of Rights
- Distinguish between the concepts of the free exercise of religion and the Establishment Clause
- Determine the scope and limitations of the free exercise of religion

10. Freedom of the Press

- Judge the meaning and importance of a free and responsible press to the healthy functioning of a democracy
- Evaluate the scope and appropriate limits of the rights of a free press
- Cite evidence in support of a position regarding freedom of the press

11. Freedom of Petition and Assembly

- Summarize how people, individually or in association with others, can bring their influence to bear on government in ways other than voting and elections

- Explain why the Founding Fathers felt that protection of the right to petition and assemble was crucial to the functioning of democracy
- Determine the scope and appropriate limits of the right to petition and freely assemble
- Evaluate the difference between state constitutions and the U.S. Constitution in terms of government structure and rights protected

12. Due Process of Law

- Explain the meaning of due process of law as set out in the Fifth and Fourteenth Amendments
- Differentiate between procedural and substantive due process
- Evaluate police power through examining appropriate use of search and seizure tactics
- Discuss the implied right to privacy

13. Rights of the Accused

- Define the writ of habeas corpus, bills of attainder, and ex post facto laws
- Summarize how the right to a grand jury and the guarantee against double jeopardy help to protect the rights of the accused
- Judge what constitutes a fair trial by jury according to the rights given by the Constitution and Bill of Rights

14. Comparing State and U.S. Constitutions

- Compare and contrast the functions and protections of state constitutions versus the U.S. Constitution
- Analyze the privacy protections provided under the U.S. Constitution versus those provided by your state of residence
- Assess the merits of general versus explicit language in constitutional civil liberties protections

15. The Constitution and Civil Liberties Unit Review

- Analyze and explain why rights are not absolute
- Analyze and interpret the Bill of Rights
- Interpret and defend Supreme Court interpretations of rights guaranteed by the Constitution
- Compare and contrast your state's constitution to the U.S. Constitution

16. The Constitution and Civil Liberties Unit Test

- Analyze and explain why rights are not absolute
- Analyze and interpret the Bill of Rights
- Interpret and defend Supreme Court interpretations of rights guaranteed by the Constitution
- Compare and contrast your state's constitution to the U.S. Constitution

4. **Civil Rights and Citizenship**

1. American Diversity

- Recognize how the United States is a nation of immigrants
- Evaluate what it means to live in a heterogeneous society
- Judge the arguments for and against assimilation

2. Racial Discrimination

- Describe the struggles for equality, past and present, faced by African Americans
- Analyze the challenges of assimilation for Native Americans

- Identify the varying countries of origin among Hispanic Americans
 - Summarize the history of discrimination against Asian Americans
3. Discrimination Against Women
- Describe the political and economic achievements of women in America over time and identify some barriers to equality that still remain
 - Analyze the disparity between the promises and protections of the U.S. Constitution and the reality of women’s experience
4. Equal Protection Under the Law
- Deconstruct the language of the Fourteenth Amendment and interpret how it safeguards all groups’ civil liberties
 - Define the meaning of “reasonable classification,” and explain how the rational basis and strict scrutiny tests clarify its meaning
5. Segregation and Jim Crow Laws
- Analyze the U.S. Supreme Court’s changing interpretations of the Equal Protection Clause over time
 - Identify the objective of Jim Crow laws, and evaluate how they deprived minorities of equal protection under the law
 - Describe the difficulty in ordering integration, identify the difference between de jure and de facto segregation, and identify de facto segregation that still exists today
 - Analyze charts and graphs for information
6. Federal Civil Rights Laws
- Outline the history of civil rights legislation from the post-Civil War Reconstruction to today
 - Define the meaning of “affirmative action” and evaluate why it has been controversial in the United States
7. American Citizenship
- Explain how people become American citizens by birth and by naturalization
 - Describe how an American can lose his citizenship
 - Assess the meaning and responsibilities of citizenship in the United States
8. A Nation of Immigrants
- Describe how the United States is a nation of immigrants
 - Evaluate past and present legislative efforts to regulate immigration
 - Recognize the complexities of the current debate regarding undocumented aliens
9. Good Citizenship
- Interpret the fundamental value and principles of citizenship and the American identity
 - Recognize that with the benefits of citizenship come important responsibilities that help promote the stability and health of American democracy
 - Identify the characteristics of a good citizen
10. Civil Discourse and Argument Literacy
- Identify the purpose of discussion and debate, and recognize their importance in promoting the civic values of truth, compromise, respect, and fairness
 - Research a current public issue and apply the necessary steps to effectively construct and deliver an argument

- Participate in a discussion to defend a position on a current public issue

11. Can One Person Make a Difference?

- Identify the constitutional restrictions on states' powers to set voting qualifications
- Evaluate the reasoning behind voter registration requirements
- Describe controversial historical and current barriers to voting rights
- Judge the impact and importance of an individual's efforts to influence government and political decision-making

12. Collective Action and Interest Groups

- Identify how collective action holds influence in America's system of majoritarian politics
- Analyze the role and strategies of interest groups in influencing public policy
- Describe how interest groups are both good and bad for American politics

13. Political Party Influence

- Differentiate between the collective goals of interest groups versus those of political parties
- Describe the major functions of political parties and evaluate their effectiveness in meeting the country's needs
- Recognize how individuals can participate in political parties to help determine the public agenda

14. The Power of the Media

- Interpret the role of the mass media within a democracy in terms of providing citizens with accurate and complete information
- Evaluate the ways the American media is effective and ineffective in influencing politics
- Discriminate among information sources for logical validity, and identify whether appeals are based on complete factual evidence versus emotions, prejudice, or bias

15. Civil Rights and Citizenship Unit Review

- Use primary sources to identify and define common causes for civil movements
- Evaluate and discuss the impact of assimilation and diversity on American society
- Define good citizenship and examine the ways citizens can influence governmental decision making
- Summarize what makes the United States a nation of immigrants and how the government handles immigration

16. Civil Rights and Citizenship Unit Test

- Use primary sources to identify and define common causes for civil movements
- Evaluate and discuss the impact of assimilation and diversity on American society
- Define good citizenship and examine the ways citizens can influence governmental decision making
- Summarize what makes the United States a nation of immigrants and how the government handles immigration

5. State and Local Governments

1. The 50 States – Sovereignty and Culture

- Recognize that each of the 50 U.S. states has its own rich heritage and culture, which is reflected in its government structures and laws

- Evaluate the constitutional structure of federalism
 - Identify the reserved powers of the states as outlined in the Tenth Amendment
2. States' Rights
- Deconstruct the ambiguous language of federalism in the U.S. Constitution
 - Judge differing viewpoints on the appropriate balance of power between the states and the federal government
 - Analyze the ongoing struggle between the states and the federal government, using relevant judicial decisions and pieces of legislation
3. State Constitutions
- Identify the history, content, and importance of the first state constitutions
 - Describe the role and common features of state constitutions in defining the relationship between state and local governments
 - Evaluate the procedures used to change state constitutions
4. State Legislatures
- Outline the size and general structure of most state legislatures
 - Describe the election process, terms of office, and compensation of state legislators
 - Identify the powers and organization that drive how state legislatures operate
 - Summarize the state-level legislative process, and identify ways that state voters can influence decision making
5. The Governor and State Administration
- Identify the qualifications and term, as well as the selection, succession, and removal processes, for state governors
 - Analyze the executive, legislative, and judicial roles and powers of state governors
 - Describe other key executive officers who play a role in state government
6. The State Judiciary
- Identify the organization of the state court systems, and define the kinds of law applied
 - Compare and contrast criminal law and civil law
 - Evaluate the purposes and types of juries used in state courts, and describe the process of juror selection
7. State Courts and Judges
- Describe the organization and function of each kind of court in the state judicial system
 - Identify the methods used to select judges, and evaluate the arguments for and against judicial elections
8. Counties, Towns, and Townships
- Describe the governmental structure and key functions of a typical state county, and explain how it is an extension of state government
 - Identify the organization of tribal governments and the nature of their relationship to state and federal government
 - Evaluate the governments of towns and townships, and identify common special districts
9. Cities and Metropolitan Areas
- Examine the reasons for America's shift from a rural to an urban society

- Explain the process of incorporation and the function of city charters
- Differentiate among the forms of city government
- Assess the need for city planning and outline the common functions of municipal and suburban governments

10. Education and Public Welfare

- Recognize that the education of the state's residents is one of the most important responsibilities of state and local government
- Identify challenges for the state in funding schools and public welfare programs
- Analyze why public services can vary greatly from one state to another

11. Public Safety, Highways, and Other Services

- Evaluate the state responsibility of providing public law enforcement and corrections systems
- Describe the state responsibility of roadway safety and maintenance
- Analyze why public services can vary greatly from one state to another

12. Sound Taxation

- Identify the need for taxes, and the main federal and state limits on taxing powers
- Summarize the key concepts of sound taxation

13. Financing State and Local Government

- Identify the main sources of revenue for state and local governments
- Evaluate the state budget process

14. Create an Action Plan

- Identify a local problem and use knowledge of local government structure to create a proposed action plan to address the issue
- Demonstrate how to responsibly participate in government and use government to resolve issues or concerns

15. State and Local Governments Unit Review

- Organize and summarize the structure and power of state legislation
- Compare and contrast the state court system to the federal court system
- Examine and define the roles and responsibilities of a governor
- Assess and rate the services your state and local governments provide to their citizens
- Identify the primary tax and nontax sources of state and local revenue

16. State and Local Governments Unit Test

- Organize and summarize the structure and power of state legislation
- Compare and contrast the state court system and the federal court system
- Examine and define the roles and responsibilities of a governor
- Assess and rate the services your state and local governments provide to their citizens
- Identify the primary tax and nontax sources of state and local revenue

6. Semester Review and Exam

1. Semester Review

- Analyze and interpret Supreme Court decisions and the U.S. Constitution

- Define good citizenship, and examine the ways citizens can influence governmental decision making
- Analyze the roles, responsibilities, and structures of state and local government
- Identify and explain the role of the government in the U.S. economy
- Apply the principles of government to other countries' political structures

2. Semester Exam

- Analyze and interpret Supreme Court decisions and the U.S. Constitution
- Define good citizenship, and examine the ways citizens can influence governmental decision making
- Analyze the roles, responsibilities, and structures of state and local government
- Identify and explain the role of the government in the U.S. economy
- Apply the principles of government to other countries' political structures

American Government (Honors)

Honors American Government

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This is the first of two courses that comprise Honors American Government. *Magruder's American Government* provides the basis for instruction. In this rigorous course, the student will explore the foundations of American government and its fundamental principles and organization. The student will examine government concepts such as the growth of democracy, federalism, separation of powers, and checks and balances. The branches of government—legislative, executive, and judicial—are studied in depth. This course promotes understanding and participation in government by presenting information in a context that is relevant to the student. The challenging activities in this course are designed to develop the student's abilities to question, read, analyze, interpret, and evaluate different forms of information, as well as to communicate ideas to others.

1. Course Overview

1. Course Overview

2. Foundations of American Government

1. Foundations of American Government Overview
 - Define the powers every government holds
 - Differentiate between primary and secondary sources
 - Analyze an article by identifying facts and opinions and recognizing bias
2. Natural Law, Government, and the State
 - Apply the characteristics of a state to the United States
 - Compare and contrast different theories and governments that influenced the structure of American government
3. President or King? Different Forms of Government
 - Differentiate between forms of government based on the distribution of power between the executive and legislative branch
 - Classify governments into one of three systems
 - Differentiate between a dictatorship and democracy
 - Evaluate the presidential and parliamentary styles of government
4. Concepts of Democracy
 - Identify the foundations and principles of democracy

- Apply the concepts of democracy to current society
 - Analyze European philosophical influences on American government
5. A Special Relationship – Colonies and the Crown
- Organize the progression of colonial resistance to the British monarchy
 - Explain the concepts of power, legitimacy, authority, and sovereignty
 - Evaluate the democratic concepts of popular sovereignty, division of power, and natural rights
 - Differentiate between three types of colonies
6. The Road to Revolution
- Evaluate the democratic concepts of popular sovereignty, division of power, and natural rights
 - Analyze the historical events leading to American founding documents
 - Explain major political ideas in history, including the laws of nature and nature's God, unalienable rights, divine right of kings, social contract theory, and the rights of resistance to illegitimate government
 - Deconstruct the motivations leading to the colonial revolution
7. The Declaration of Independence
- Analyze the relationship between the Declaration of Independence and European political theories
 - Describe the main ideas of the Declaration of Independence
 - Interpret the meaning of the Pledge of Allegiance to the flag of the United States
 - Summarize the debates and compromises leading to the Declaration of Independence
 - Determine whether historical documents are primary or secondary sources and evaluate them
8. The Articles of Confederation
- Analyze why the weak central government and limited powers of the Articles of Confederation demonstrated the need for the Constitution
 - Evaluate the democratic concepts of popular sovereignty, division of power, and natural rights
 - Organize the sequence of events leading to the creation of the Articles of Confederation
 - Assess the strengths and weaknesses of the Articles of Confederation
9. Debate and Compromise – Framing the Constitution
- Summarize the debates and compromises leading to the creation of the U.S. Constitution
 - Compare the political ideologies and arguments of the Federalists and the Anti-Federalists
 - Describe the events leading to the creation of the U.S. Constitution
 - Identify four Framers of the Constitution
10. Principles of the Constitution
- Define the six main principles in the U.S. Constitution
 - Analyze the purpose and functions of government as outlined by the U.S. Constitution
 - Evaluate constitutional provisions for limiting the role of government, checks and balances, and separation of powers
11. Constitutional Change and the Formal Amendment
- Explain the formal and informal amendment process for the Constitution
 - Analyze the political principles of popular sovereignty, separation of powers, and federalism

- Evaluate constitutional provisions for limiting government

12. States' Rights and the Division of Powers

- Classify the division of powers as outlined by the U.S. Constitution
- Evaluate the role of limited government and the rule of law in American government
- Describe the role and powers of state and local governments
- Explain the significance of the Supremacy Clause

13. More Than a Label – American Citizenship

- Explain the process of becoming an American citizen
- Outline the role of citizens in a democracy
- Evaluate citizen rights versus responsibilities

14. Historical Influences on the Constitution

- Locate, analyze, and use various forms of evidence, information, and sources about a significant public policy issue, including primary and secondary sources, legal documents, non-text-based information, and other forms of political communication
- Write an essay which includes a persuasive, reasoned argument on issues surrounding the writing of the Constitution and support it using evidence, constitutional principles, and fundamental values of American constitutional democracy; explain the stance

15. Foundations of American Government Unit Review

- Read, analyze, and interpret historical documents and events that led to the establishment of a central American government
- Define the basic responsibilities held by every government
- Outline the distribution of power within an organized state
- Compare and contrast different theories and governments that influenced the structure of American government
- Examine and explain how checks and balances impact American government

16. Foundations of American Government Unit Test

- Read, analyze, and interpret historical documents and events that led to the establishment of a central American government
- Define the basic responsibilities held by every government
- Outline the distribution of power within an organized state
- Compare and contrast different theories and governments that influenced the structure of American government
- Examine and explain how checks and balances impact American government

3. The Legislative Branch

1. The Legislative Branch Overview

- Analyze the structure and functions of the legislative branch as outlined by the Constitution
- Explain the roles and duties of the legislative branch
- Evaluate the powers of the legislative branch in relation to the other branches of government
- Critique the compensation received by members of Congress

2. Congress – A Separation of Powers

- Analyze the structure and functions of the legislative branch as outlined by the Constitution

- Describe congressional sessions and terms
 - Identify the factors that impact the voting decisions of members of Congress
3. The House of Representatives – The Lower Chamber
 - Analyze the structure and functions of the legislative branch as outlined by the Constitution
 - Explain the roles and duties of the House of Representatives
 - Analyze the effect of gerrymandering on Congress
 4. The Senate – The Upper Chamber
 - Explain the roles and duties of the Senate
 - Evaluate the powers of the House of Representatives in relation to the Senate
 - Analyze the structure and functions of the legislative branch as outlined by the Constitution
 - Use available resources to write an organized argumentative paragraph
 5. Congressional Committees at Work
 - Explain the roles and duties of the legislative branch
 - Analyze the structure and functions of the legislative branch as outlined by the Constitution
 - Analyze the powers of the leadership of Congress
 6. Powers of Congress – An Overview
 - Determine the extent of congressional power
 - Compare and contrast the ideas of strict constructionists and liberal constructionists
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 7. Expressed Powers – Money and Commerce
 - Define the expressed powers of the legislative branch as outlined by the Constitution
 - Explain the scope of legislative powers as it relates to lawmaking and economic regulations
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 8. Expressed Powers – Foreign and Domestic Affairs
 - Define the expressed powers of the legislative branch as outlined by the Constitution
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 - Examine the reasoning behind establishing patents
 9. The Implied Powers of Congress
 - Define the implied powers of the legislative branch as outlined by the Constitution
 - Explain the importance of the Elastic Clause
 - Differentiate between expressed and implied powers
 - Evaluate the powers of the legislative branch in relation to the other branches of government
 - Assess the effect of a liberal interpretation of the Constitution as established by *McCulloch v. Maryland*
 10. Nonlegislative Powers of Congress
 - Define the nonlegislative powers of the legislative branch as outlined by the Constitution
 - Explain the scope of legislative powers as it relates to amending the constitution, appointments, investigations, and impeachments
 - Evaluate the powers of the legislative branch in relation to the other branches of government

11. How a Bill Becomes Law

- Explain the formal and unorthodox processes by which a bill becomes a law
- Compare the processes of lawmaking in the two houses of Congress
- Analyze the structure and functions of the legislative branch as outlined by the Constitution
- Evaluate the powers of the legislative branch in relation to the other branches of government
- Analyze how the executive branch interacts with the legislative branch in the lawmaking process

12. Taking Civic Action

- Evaluate how Congress represents the will and interests of the people
- Make a persuasive, reasoned argument on a public issue and support it using evidence, constitutional principles, and fundamental values of American constitutional democracy; explain the stance or position
- Analyze arguments businesses can make for laws that benefit them

13. The Legislative Branch Unit Review

- Define the powers provided to Congress by the Constitution
- Evaluate how Congress represents the will and interests of the people
- Identify the qualifications for election to the House of Representatives and Senate
- Analyze the committee system in Congress and its role in government
- Describe the legislative development process

14. The Legislative Branch Unit Test

- Define the powers provided to Congress by the Constitution
- Evaluate how Congress represents the will and interests of the people
- Identify the qualifications for election to the House of Representatives and Senate
- Analyze the committee system in Congress and its role in government
- Describe the legislative development process

4. The Executive Branch

1. The Executive Branch Overview

- Analyze the structure and functions of the executive branch as outlined by the Constitution
- Explain the roles and duties of the executive branch

2. The American Presidency

- Explain the written qualifications for president of the United States
- Analyze the structure and functions of the executive branch as outlined by the Constitution
- Differentiate the role of the president from the vice president
- Explain the rules and process of presidential succession
- Determine the reasoning behind setting term limits for the president
- Evaluate qualities that make a historically notable president

3. Choosing a Side – The Political Machine

- Describe the nomination and electoral process as outlined by the Constitution

- Discuss the history of the nomination process for presidential candidates and the increasing importance of primaries in general elections
 - Analyze why current political parties try to avoid contested conventions
4. Choosing a Leader – The Electoral College
- Describe the nomination and electoral process as outlined by the Constitution
 - Evaluate the fairness and effectiveness of the United States electoral processes, including the Electoral College
5. Executive Powers
- Analyze the structure and functions of the executive branch as outlined by the Constitution
 - Explain the scope of executive powers as it relates to revenue, regulatory functions, domestic and foreign policy
 - Evaluate the powers of the executive branch in relation to the other branches of government
 - Determine whether it is justifiable for the president to violate checks and balances in severe cases
6. The Federal Bureaucracy
- Analyze the structure and functions of the executive branch as outlined by the Constitution
 - Explain the scope of executive powers as it relates to revenue, regulatory functions, domestic and foreign policy
 - Evaluate how effective your local bureaucracy is
7. The Executive Office of the President
- Explain the purpose and role of the many parts in the Executive Office of the President
 - Analyze the structure and functions of the executive branch as outlined by the Constitution
 - Categorize the Executive Offices of the President to understand the focus of the EOP
8. Executive Departments
- Describe and explain the roles of the main executive departments
 - Analyze the structure and functions of the executive branch as outlined by the Constitution
 - Evaluate the powers of the executive branch in relation to the other branches of government
 - Determine how the cabinet has evolved over time
9. Independent Agencies
- Evaluate how government agencies create, amend, and enforce regulations
 - Identify the role of independent regulatory agencies in the federal bureaucracy
 - Define the role of independent agencies in the federal bureaucracy
10. American Foreign Policy
- Explain the scope of executive powers as it relates to revenue, regulatory functions, domestic and foreign policy
 - Describe the characteristics of United States foreign policy and how it has been created and implemented over time
 - Analyze recent foreign policies regarding nuclear nonproliferation
11. National Security and Defense
- Explain the scope of executive powers as it relates to revenue, regulatory functions, domestic and foreign policy

- Evaluate the powers of the executive branch in relation to the other branches of government
- Analyze the locations of the armed forces around the world

12. Diplomacy and the State Department

- Identify and analyze U.S. foreign policy in dealing with international issues with diplomacy and humanitarian aid
- Evaluate the means used to implement U.S. foreign policy with respect to current or past international issues

13. Memo to the President

- Write a five-paragraph essay which includes a persuasive, reasoned argument on the assigned public issue and support using evidence, constitutional principles, and fundamental values of American constitutional democracy; explain the stance or position
- Evaluate the roles of the president in international affairs
- Examine the issues of social justice and human rights as expressed in the United Nations Declaration of Human Rights

14. The Executive Branch Unit Review

- Classify the responsibilities of the executive branch and its parts
- Identify, explain, and evaluate the constitutional powers of the president
- Explain the bureaucratic structure of federal government
- Describe various roles of the president in international affairs
- Analyze historic elections and candidacies

15. The Executive Branch Unit Test

- Classify the responsibilities of the executive branch and its parts.
- Identify, explain, and evaluate the constitutional powers of the President.
- Explain the bureaucratic structure of federal government.
- Describe various roles of the President in international affairs.
- Analyze historic elections (and candidacies).

5. The Judicial Branch

1. The Judicial Branch Overview

- Explain the purposes and function of law and the judicial branch as outlined by the Constitution
- Analyze the role of the judicial branch in maintaining the Constitution
- Evaluate the powers of the judicial branch in relation to the other branches of government
- Identify the limits of judicial power

2. The Federal Court System

- Explain the purposes and function of law and the judicial branch as outlined by the Constitution
- Analyze the role of the judicial branch in maintaining the Constitution
- Evaluate the powers of the judicial branch in relation to the other branches of government
- Analyze how the courts interpret laws
- Evaluate the merits of judicial restraint and judicial activism using case studies

3. The Supreme Court

- Explain the purposes and function of law and the judicial branch as outlined by the Constitution
- Analyze the role of the judicial branch in maintaining the Constitution
- Analyze how the courts interpret laws by using landmark Supreme Court cases

4. Inferior and Special Courts – The Lower Courts

- Differentiate the roles and jurisdictions of the inferior and special courts from the Supreme Court
- Explain the powers of the inferior and special courts as outlined by the Constitution
- Analyze how the courts interpret laws
- Analyze the purpose of the military court system

5. Supreme Court's Protections

- Differentiate between civil rights and civil liberties
- Explain why rights are relative
- Explain how the Constitution protects life, liberty, and property
- Analyze how the Supreme Court has interpreted the Second Amendment through history

6. Supreme Court on Religious Freedom

- Explain the concept of separation of church and state
- Explain the rights afforded to citizens by the First Amendment
- Evaluate the effectiveness of the U.S. justice system in protecting life, liberty, and property
- Analyze how the courts interpret laws by using landmark Supreme Court cases
- Analyze the difference between separation of church and state and a ban on religion in the public sphere

7. Supreme Court on Speech and Press

- Differentiate between protected and unprotected speech
- Explain the rights afforded to citizens by the First Amendment
- Evaluate the effectiveness of the U.S. justice system in protecting life, liberty, and property
- Analyze how the courts interpret laws by using landmark Supreme Court cases

8. Supreme Court on Petition and Assembly

- Evaluate the effectiveness of the U.S. justice system in protecting life, liberty, and property
- Analyze how the courts interpret laws by using landmark Supreme Court cases
- Explain the rights afforded to citizens by the First Amendment

9. A Judicial Opinion

- Evaluate the process for appointing federal judges and Supreme Court justices
- Locate, analyze, and use various forms of evidence, information, and sources about a significant public policy issue, including primary and secondary sources, legal documents, non-text based information, and other forms of political communication
- Make a persuasive, reasoned argument on a public issue and support it using evidence, constitutional principles, and fundamental values of American constitutional democracy; explain the stance or position

10. The Judicial Branch Unit Review

- Identify the roles and responsibilities of the judicial branch given by the Constitution
- Discuss and critique judicial review and how it impacts public policy by examining historical court cases
- Evaluate the process for appointing federal judges and Supreme Court justices
- Describe the jurisdiction of federal and Supreme Court and how a case is moved to these courts

11. The Judicial Branch Unit Test

- Identify the roles and responsibilities of the judicial branch given by the Constitution
- Discuss and critique judicial review and how it impacts public policy by examining historical court cases.
- Evaluate the process for appointing federal judges and Supreme Court justices
- Describe the jurisdiction of federal and Supreme Court and how a case is moved to these courts.

6. Semester Review and Exam

1. Semester Review

- Examine government concepts such as the growth of democracy, federalism, separation of powers, and checks and balances
- Analyze the roles, responsibilities, and structures of the legislative, executive, and judicial branches of government
- Analyze and interpret historical documents and events that led to the establishment of a central American government

2. Semester Exam

- Examine government concepts such as the growth of democracy, federalism, separation of powers, and checks and balances
- Analyze the roles, responsibilities, and structures of the legislative, executive, and judicial branches of government
- Analyze and interpret historical documents and events that led to the establishment of a central American government

This is the second of two courses that comprise Honors American Government. *Magruder's American Government* provides the basis for instruction. In this rigorous course, the student will examine the basic rights and responsibilities of U.S. citizens and the foundations of American government. In addition, the student will explore constitutional freedoms, citizen requirements, and aspects of American law. Other topics covered include political parties, interest groups, ways to affect the government, and the influence of the media. Finally, the student will learn about local and state government structures, and compare political systems and economies from around the world.

1. Course Overview

1. Course Overview

2. The Constitution and Civil Liberties

1. The Constitution and Civil Liberties Overview

- Evaluate how the rule of law, as embodied in a constitution, limits government and protects individual rights
- Define “constitutionalism” and explain how the rule of law protects individual rights and promotes the common good

- Interpret the claim that a constitutional democracy requires the participation of an attentive, knowledgeable, and informed citizenry
 - State a claim and develop a logical argument using reasons, examples, and/or evidence
2. The Need for a Constitution
- Examine how the philosophical ideas of Thomas Hobbes and John Locke influenced the Founding Fathers in the creation of a government with limited power and that protected individual rights
 - Analyze the concept of a social contract
 - Compare historical and contemporary examples of constitutional governments that succeeded in limiting power
 - Use a variety of literacy strategies to determine the meanings of words and phrases as they are used in a text
 - Deconstruct the rationale for martial law
3. Rationale of the Constitutional Structure
- Describe the origins, purposes, and limitations of government through the viewpoints of key philosophers and the authors of the Federalist Papers
 - Deconstruct the Preamble and the seven articles of the U.S. Constitution
 - Identify how the principles of republicanism, separation of powers, bicameralism, enumerated powers, and federalism serve to limit the power of government
 - Evaluate the key issues of conflict during the Constitutional Convention: the question of congressional representation and the extent of executive authority
 - Analyze the structure of the Constitution
4. The Six Organizing Principles of the Constitution
- Analyze how the principles of separation of power, checks and balances, and federalism serve to limit governmental power and promote popular sovereignty
 - Examine how the power of judicial review allows the judiciary to protect constitutional principles
 - Summarize the key benefits the Founding Fathers saw in a federal structure of government
 - Use precise language and domain-specific vocabulary to manage the complexity of the six organizing principles of the Constitution in short written pieces
5. The Amendment Process (27 Amendments)
- Summarize how the U.S. Constitution is often referred to as a “living” document
 - Outline the constitutionally prescribed procedures by which the U.S. Constitution can be formally changed
 - Identify the 27 amendments that have been added to the Constitution and those that have been proposed but not ratified
 - Examine how basic legislation has clarified the Constitution over time
 - Analyze how interpretation of the Constitution has changed over the years through the actions of the executive and judicial branches, and by party practices and customs
6. The Unalienable Rights
- Interpret the meaning of an unalienable right
 - Explain the importance of unalienable rights in limiting the powers of government

- Evaluate the relationship between rights and responsibilities, and how exercise of your right may infringe on another's right
 - Explore and classify personal rights, political rights, and economic rights
7. The Supreme Court and Competing Rights
- Evaluate the U.S. Supreme Court's role in defining constitutional principles
 - Recognize the common reasons why judicial interpretations of the U.S. Constitution may change over time
 - Define the meaning of "competing rights"
 - Conduct a short research task by finding a current event example of a civil liberty issue that is a competing right
 - Use primary sources to understand logical legal arguments in a Supreme Court case
8. Freedom of Speech
- Describe the right to free speech by using historical and contemporary examples
 - Explain why the Founding Fathers felt that protection of free speech was crucial in the functioning of a democracy
 - Evaluate the scope and appropriate limits to the right of free speech
 - Integrate evidence to present a case for or against extending Supreme Court rulings on free speech
9. Freedom of Religion
- Consider the historical role of religion and religious diversity
 - Explain why the Founding Fathers felt religion was an important issue to single out for protection in the Bill of Rights
 - Distinguish between the concepts of the free exercise of religion and the Establishment Clause
 - Determine the scope and limitations of the free exercise of religion
 - Integrate evidence to present a concise piece of writing supporting or opposing a current event issue
10. Freedom of the Press
- Judge the meaning and importance of a free and responsible press to the healthy functioning of a democracy
 - Evaluate the scope and appropriate limits of the rights of a free press
 - Cite evidence in support of a position regarding freedom of the press
 - Write an argumentative thesis on a controversial topic
11. Freedom of Petition and Assembly
- Summarize how people, individually or in association with others, can bring their influence to bear on government in ways other than voting and elections
 - Explain why the Founding Fathers felt that protection of the right to petition and assemble was crucial to the functioning of democracy
 - Determine the scope and appropriate limits of the right to petition and freely assemble
 - Evaluate the difference between state constitutions and the U.S. Constitution in terms of government structure and rights protected
12. Due Process of Law
- Explain the meaning of due process of law as set out in the Fifth and Fourteenth Amendments

- Differentiate between procedural and substantive due process
- Evaluate police power through examining appropriate use of search and seizure tactics
- Discuss the implied right to privacy

13. Rights of the Accused

- Define the writ of habeas corpus, bills of attainder, and ex post facto laws
- Summarize how the right to a grand jury and the guarantee against double jeopardy help to protect the rights of the accused
- Judge what constitutes a fair trial by jury according to the rights given by the Constitution and Bill of Rights

14. Comparing State and U.S. Constitutions

- Compare and contrast the functions and protections of state constitutions versus the U.S. Constitution
- Analyze the privacy protections provided under the U.S. Constitution versus those provided by your state of residence
- Assess the merits of general versus explicit language in constitutional civil liberties protections

15. The Constitution and Civil Liberties Unit Review

- Analyze and explain why rights are not absolute
- Analyze and interpret the Bill of Rights
- Interpret and defend Supreme Court interpretations of rights guaranteed by the Constitution
- Compare and contrast your state's constitution to the U.S. Constitution

16. The Constitution and Civil Liberties Unit Test

- Analyze and explain why rights are not absolute
- Analyze and interpret the Bill of Rights
- Interpret and defend Supreme Court interpretations of rights guaranteed by the Constitution
- Compare and contrast your state's constitution to the U.S. Constitution

3. **Civil Rights and Citizenship**

1. American Diversity

- Recognize how the United States is a nation of immigrants
- Evaluate what it means to live in a heterogeneous society.
- Judge the arguments for and against assimilation

2. Racial Discrimination

- Describe the struggles for equality, past and present, faced by African Americans
- Analyze the challenges of assimilation for Native Americans
- Identify the varying countries of origin among Hispanic Americans
- Summarize the history of discrimination against Asian Americans
- Differentiate the essential nature of the discrimination faced by African Americans, Native Americans, Hispanic Americans, and Asian Americans

3. Discrimination Against Women

- Describe the political and economic achievements of women in America over time and identify some barriers to equality that still remain

- Analyze the disparity between the promises and protections of the U.S. Constitution and the reality of women’s experience
 - Deconstruct the difference between women’s equality and women’s equity
4. Equal Protection Under the Law
- Deconstruct the language of the Fourteenth Amendment and interpret how it safeguards all groups’ civil liberties
 - Define the meaning of “reasonable classification,” and explain how the rational basis and strict scrutiny tests clarify its meaning
 - Analyze how the Fourteenth Amendment protections are evolving in today’s world
5. Segregation and Jim Crow Laws
- Analyze the U.S. Supreme Court’s changing interpretations of the Equal Protection Clause over time
 - Identify the objective of Jim Crow laws, and evaluate how they deprived minorities of equal protection under the law
 - Describe the difficulty in ordering integration, identify the difference between de jure and de facto segregation, and identify de facto segregation that still exists today
 - Analyze charts and graphs for information
 - Deconstruct the persistent problem of de facto school segregation
6. Federal Civil Rights Laws
- Outline the history of civil rights legislation from the post-Civil War Reconstruction to today
 - Define the meaning of “affirmative action” and evaluate why it has been controversial in the United States
 - Assess current public opinions on affirmative action
7. American Citizenship
- Explain how people become American citizens by birth and by naturalization
 - Describe how an American can lose his citizenship
 - Assess the meaning and responsibilities of citizenship in the United States
8. A Nation of Immigrants
- Describe how the United States is a nation of immigrants
 - Evaluate past and present legislative efforts to regulate immigration
 - Examine the complexities of the current debate regarding undocumented aliens
9. Good Citizenship
- Interpret the fundamental value and principles of citizenship and the American identity
 - Recognize that with the benefits of citizenship come important responsibilities that help promote the stability and health of American democracy
 - Identify the characteristics of a good citizen
10. Civil Discourse and Argument Literacy
- Identify the purpose of discussion and debate, and recognize their importance in promoting the civic values of truth, compromise, respect, and fairness
 - Research a current public issue and apply the necessary steps to effectively construct and deliver an argument

- Participate in a discussion to defend a position on a current public issue

11. Can One Person Make a Difference?

- Identify the constitutional restrictions on states' powers to set voting qualifications
- Evaluate the reasoning behind voter registration requirements
- Describe controversial historical and current barriers to voting rights
- Judge the impact and importance of an individual's efforts to influence government and political decision-making

12. Collective Action and Interest Groups

- Identify how collective action holds influence in America's system of majoritarian politics
- Analyze the role and strategies of interest groups in influencing public policy
- Describe how interest groups are both good and bad for American politics

13. Political Party Influence

- Differentiate between the collective goals of interest groups versus those of political parties
- Describe the major functions of political parties and evaluate their effectiveness in meeting the country's needs
- Recognize how individuals can participate in political parties to help determine the public agenda
- Analyze the power and effect of third parties in the American political system

14. The Power of the Media

- Interpret the role of the mass media within a democracy in terms of providing citizens with accurate and complete information
- Evaluate the ways the American media is effective and ineffective in influencing politics
- Discriminate among information sources for logical validity, and identify whether appeals are based on complete factual evidence versus emotions, prejudice, or bias

15. Civil Rights and Citizenship Unit Review

- Use primary sources to identify and define common causes for civil movements
- Evaluate and discuss the impact of assimilation and diversity on American society
- Define good citizenship and examine the ways citizens can influence governmental decision making
- Summarize what makes the United States a nation of immigrants and how the government handles immigration

16. Civil Rights and Citizenship Unit Test

- Use primary sources to identify and define common causes for civil movements
- Evaluate and discuss the impact of assimilation and diversity on American society
- Define good citizenship and examine the ways citizens can influence governmental decision making
- Summarize what makes the United States a nation of immigrants and how the government handles immigration

4. State and Local Governments

1. The 50 States – Sovereignty and Culture

- Recognize that each of the 50 U.S. states has its own rich heritage and culture, which is reflected in its government structures and laws
 - Evaluate the constitutional structure of federalism
 - Identify the reserved powers of the states as outlined in the Tenth Amendment
2. States' Rights
- Deconstruct the ambiguous language of federalism in the U.S. Constitution
 - Judge differing viewpoints on the appropriate balance of power between the states and the federal government
 - Analyze the ongoing struggle between the states and the federal government, using relevant judicial decisions and pieces of legislation
 - Analyze the debate in the nullification crisis
3. State Constitutions
- Identify the history, content, and importance of the first state constitutions
 - Describe the role and common features of state constitutions in defining the relationship between state and local governments
 - Evaluate the procedures used to change state constitutions
 - Assess your state constitution and propose appropriate changes
4. State Legislatures
- Outline the size and general structure of most state legislatures
 - Describe the election process, terms of office, and compensation of state legislators
 - Identify the powers and organization that drive how state legislatures operate
 - Summarize the state-level legislative process, and identify ways that state voters can influence decision making
5. The Governor and State Administration
- Identify the qualifications and term, as well as the selection, succession, and removal processes, for state governors
 - Analyze the executive, legislative, and judicial roles and powers of state governors
 - Describe other key executive officers who play a role in state government
6. The State Judiciary
- Identify the organization of the state court systems, and define the kinds of law applied
 - Compare and contrast criminal law and civil law
 - Evaluate the purposes and types of juries used in state courts, and describe the process of juror selection
 - Construct arguments supporting the jury system
7. State Courts and Judges
- Describe the organization and function of each kind of court in the state judicial system
 - Identify the methods used to select judges, and evaluate the arguments for and against judicial elections
 - Write a balanced discussion of the arguments for and against judicial elections
8. Counties, Towns, and Townships

- Describe the governmental structure and key functions of a typical state county, and explain how it is an extension of state government
 - Identify the organization of tribal governments and the nature of their relationship to state and federal government
 - Evaluate the governments of towns and townships, and identify common special districts
 - Compare and contrast state and local governments
9. Cities and Metropolitan Areas
- Examine the reasons for America’s shift from a rural to an urban society
 - Explain the process of incorporation and the function of city charters
 - Differentiate among the forms of city government
 - Assess the need for city planning and outline the common functions of municipal and suburban governments
10. Education and Public Welfare
- Recognize that the education of the state’s residents is one of the most important responsibilities of state and local government
 - Identify challenges for the state in funding schools and public welfare programs
 - Analyze why public services can vary greatly from one state to another
 - Participate in a formal debate online
11. Public Safety, Highways, and Other Services
- Evaluate the state responsibility of providing public law enforcement and corrections systems
 - Describe the state responsibility of roadway safety and maintenance
 - Analyze why public services can vary greatly from one state to another
 - Deconstruct the issues facing police and communities in maintaining good relationships and public safety
12. Sound Taxation
- Identify the need for taxes, and the main federal and state limits on taxing powers
 - Summarize the key concepts of sound taxation
 - Apply Adam Smith’s key ideas to current taxation policies
13. Financing State and Local Government
- Identify the main sources of revenue for state and local governments
 - Evaluate the state budget process
14. Create an Action Plan
- Identify a local problem that is connected to a civil rights violation and use knowledge of local government structure to create a proposed action plan to address the issue
 - Demonstrate how to responsibly participate in government and use government to resolve issues or concerns
15. State and Local Governments Unit Review
- Organize and summarize the structure and power of state legislation
 - Compare and contrast the state court system to the federal court system
 - Examine and define the roles and responsibilities of a governor

- Assess and rate the services your state and local governments provide to their citizens
- Identify the primary tax and nontax sources of state and local revenue

16. State and Local Governments Unit Test

- Organize and summarize the structure and power of state legislation
- Compare and contrast the state court system and the federal court system
- Examine and define the roles and responsibilities of a governor
- Assess and rate the services your state and local governments provide to their citizens
- Identify the primary tax and nontax sources of state and local revenue

5. **Comparative Government and Economic Systems**

1. Introduction to Capitalism

- Explain the economic system of capitalism and examine the relationship between supply and demand
- Recognize the influence of U.S. government policies in regulating production and competition for scarce resources
- Describe the four fundamental factors in a free enterprise system, and assess how the federal government fosters competition and entrepreneurship

2. Fiscal and Monetary Policy

- Explain the major responsibilities, goals, and actions of the federal government for domestic economic policy
- Analyze how government fiscal and monetary policy influence the economy at the national level
- Describe the regulatory functions of the government and their impact on the economy
- Summarize the Republican and Democratic Parties' economic policies

3. Spending and Borrowing

- Identify the sources of U.S. expenditures, and define controllable and uncontrollable spending
- Analyze the executive branch's function of proposing the federal budget, working in conjunction with the U.S. Congress in executing policy goals
- Describe the federal government's sources of revenue, and evaluate the impact of its expenditures and debt on the U.S. economy

4. U.S. Global Economy and Trade

- Explain the causes of globalization, including recent scientific discoveries and technological innovations, and its effects on the American economy
- Examine the roles of the executive and legislative branches in setting international trade and fiscal policies
- Recognize the benefits and drawbacks of the global economy, including the significance to the United States of the location and key natural resources of selected global places or regions
- Write a letter in formal business format that takes a position on the pros and cons of free trade and the global economy

5. Socialism and Communism

- Summarize Karl Marx's theories and identify important characteristics of socialist and communist economies
- Evaluate the strengths and weaknesses of free enterprise versus socialism and communism

- Analyze a selection from *The Communist Manifesto*
6. Governmental Systems
 - Explain the differences in the governmental systems of autocracy, democracy, aristocracy, and theocracy
 - Compare the advantages and disadvantages of federal, confederal, and unitary systems of government
 - Evaluate the outcomes of democratization in the world today
 - Identify the factors that contribute to a successful transition to democracy
 7. United Kingdom – History and Government
 - Outline the United Kingdom’s structure of government
 - Describe the United Kingdom’s electoral and public policy-making processes
 - Assess the benefits and drawbacks of the British political system
 8. United Kingdom – Comparison to the United States
 - Compare and contrast the governmental systems of the United States and the United Kingdom
 - Evaluate the nature of the relationship between the United States and the United Kingdom
 9. Russia – History and Government
 - Examine Russia’s political history after the Bolshevik Revolution
 - Understand the Russian Federation’s structure of government
 - Describe the Russian Federation’s election and public policy-making processes
 - Trace the rights and freedoms available to the Russian people from 1917 to the present
 10. Russia – Comparison to the United States
 - Compare and contrast the governmental systems of the United States and the Russian Federation
 - Examine the nature of the U.S. relationship with Russia since the fall of the Soviet Union
 - Analyze how the government systems of Russia, the United Kingdom, and the United States influence their reaction to a global crisis
 11. China – History and Government
 - Examine China’s political background and the emergence of communist rule
 - Outline China’s structure of government
 - Describe China’s election and public policy-making processes
 - Compare and contrast the structure and reforms of China and Russia
 - Compare the demonstration in Tiananmen Square in 1989 with a demonstration in the United States
 12. China – Comparison to the United States
 - Compare and contrast the governmental systems of the United States and China
 - Examine the conflict between capitalism and democracy as it relates to China’s modern economy
 13. U.S. Foreign Policy Goals
 - Identify U.S. foreign policy goals and explain how they are rooted in American political culture, values, and traditions

- Review the powers of the presidency in shaping foreign policy
- Differentiate between soft and hard power and analyze the effectiveness of each
- Discuss the benefits and drawbacks of U.S. efforts to promote democracy in other parts of the world

14. Unit Review

- Identify and explain the role of the government in the U.S. economy
- Evaluate and critique the strengths and weaknesses of capitalism in comparison to other economic systems
- Analyze and define public debt and its impact on the system and citizens
- Apply the principles of government to other countries' political structures
- Identify U.S. foreign policy goals and approaches, and analyze the nature of contemporary global issues

15. Unit Test

- Identify and explain the role of the government in the U.S. economy
- Evaluate and critique the strengths and weaknesses of capitalism in comparison to other economic systems
- Analyze and define public debt and its impact on the system and citizens
- Apply the principles of government to other country's political structures
- Identify U.S. foreign policy goals and approaches, and analyze the nature of contemporary global issues

6. Semester Review and Exam

1. Semester Review

- Analyze and interpret Supreme Court decisions and the U.S. Constitution
- Define good citizenship, and examine the ways citizens can influence governmental decision making
- Analyze the roles, responsibilities, and structures of state and local government
- Identify and explain the role of the government in the U.S. economy
- Apply the principles of government to other countries' political structures

2. Semester Exam

- Analyze and interpret Supreme Court decisions and the U.S. Constitution
- Define good citizenship, and examine the ways citizens can influence governmental decision making
- Analyze the roles, responsibilities, and structures of state and local government
- Identify and explain the role of the government in the U.S. economy
- Apply the principles of government to other countries' political structures

Economics

Economics

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Economics provides an introduction to the concepts of both macro- and microeconomics. Students explore topics such as scarcity, opportunity cost, and supply and demand. The course provides an overview of the free market and centrally planned economies, as well as how government influences economics. Students will also explore business and labor, money, banking, and finance. Economics introduces students to economic growth, development, and challenges in both the U.S. and the global economies.

Course Outline

1. **Course Overview**

1. Economics Course Overview

2. **Introduction to Economics**

1. Economics Introduction
2. Scarce Resources and Opportunity Cost
 - In this section, you will explain why limited productive resources and unlimited wants result in scarcity, opportunity costs, and tradeoffs for individuals, businesses and government. Additionally, you will explain how consumers and producers confront the condition of scarcity, by making choices that involve opportunity costs and tradeoffs.
3. Applying Scarcity and Opportunity Cost
 - In this section, you will apply the concept of scarcity and opportunity cost when making economic decisions.
4. Applying Scarcity and Opportunity Cost Discussion
5. Production Possibilities Curve
 - In this section, you will explain the concept of scarcity, opportunity cost, tradeoffs, unemployment, and growth using a production possibilities curve.
6. The Three Economic Questions
 - In this section, you will identify the three economic questions and compare and contrast how the various economic systems (traditional, market, command, and mixed) try to answer these questions.
7. U.S. Free Enterprise System

- In this section, you will explain the benefits of the U.S. free enterprise system, including individual freedom of consumers and producers, variety of goods, responsive prices, investment opportunities and the creation of wealth.

8. The Role of Government in the Economy

- In this section, you will explain why the government provides public goods and services, resolves market failures, and their role in addressing externalities.

9. Introduction to Economics Apply

10. Introduction to Economics Review

11. Introduction to Economics Unit Test

3. How Markets Work

1. How Markets Work Introduction

2. Circular Flow Diagrams

- In this section you will illustrate and interpret a circular flow diagram that includes the product market, resource (factor) market, households and firms.

3. Law of Demand

- In this section you will identify the determinants of demand (e.g., changes in related goods, income, consumer expectations, preferences/tastes, and number of consumers) and analyze the impact they have on the demand curve.

4. Law of Supply

- In this section you will explain the law of supply and elasticity of supply.

5. Production Costs of a Firm

- In this section you will analyze the production cost of a firm and how it impacts the business and consumer.

6. Determinants of Supply

- In this section you will identify the determinants (shifters) of supply (e.g., changes in cost of productive resources, government regulations, number of sellers, producer expectations, technology, and education) and analyze the effect they have on supply.

7. Market Equilibrium

- In this section you will demonstrate how supply and demand determine equilibrium price and quantity and how changes in supply and demand influence equilibrium price and quantity.

8. Price Ceilings and Floors

- In this section you will analyze the impact of price ceilings and price floors on the quantity of a good or service supplied and demanded in a market.

9. The Role of Price in a Free Market

- In this section, you will predict and evaluate how media affects markets.
- In this section, you will analyze the role of profits and losses in the allocation of resources in a market economy.

10. Market Structures

- In this section you will compare and contrast the characteristics of the four market structures (e.g., monopoly, oligopoly, monopolistic competition, and perfect competition)

11. U.S. Laws that Promote Competition

- In this section you will identify laws and regulations adopted in the U.S. to promote competition among firms and explain the costs and benefits of government regulations on competition.

12. How Markets Work Apply

13. How Markets Work Review

14. How Markets Work Unit Test

4. **Business and Labor**

1. Business and Labor Introduction

2. Sole Proprietorships

- In this section, you will explain the characteristics of sole proprietorship and analyze the advantages and disadvantages of organizing a business as a sole proprietorship.
- In this section, you will assess the impact of entrepreneurs on the economy.

3. Partnerships

- In this section you will explain the characteristics of partnerships and analyze the advantages and disadvantages of partnerships.

4. Corporations

- In this section, you will explain the characteristics of corporations and analyze the advantages and disadvantages of incorporation.

5. Three Forms of Business Organization

- In this section you will compare and contrast three forms of business organization - sole proprietorship, partnership, and corporation with regard to number of owners, liability, lifespan, decision-making, and taxation.

6. Franchises and Nonprofit Organizations

- In this section you will describe the role of franchises and nonprofit organizations in market economies.

7. The Labor Market

- In this section you will explain labor markets, how they work, and their impact on the United States' economy.

8. Supply and Demand of Labor

- In this section you will explain how supply of and demand for labor affect wages and understand the connection between wages and skill levels.

9. Role of Labor Unions

- In this section you will describe the role of labor unions in market economies and summarize the history of labor unions and methods of contract negotiation by labor and management.

10. Investments in Human Capital

- In this section you will critique how investments in human capital (e.g., education, job training, and healthcare) increase economic growth and standards of living.

11. Business and Labor Apply
12. Business and Labor Review
13. Business and Labor Unit Test

5. **Banking and Finance**

1. Banking and Finance Introduction
2. Properties of Money
 - In this section you will identify the characteristics and uses of money and analyze sources of money's value.
3. Banking in the U.S. Before 1900
 - In this section you will identify the shifts between centralized and decentralized banking before the Civil War and describe how the banking system was stabilized in the late 1800s.
4. U.S. Banking in the 20th Century
 - In this section you will identify developments in banking during the twentieth century and explain functions of different types of financial institutions.
 - In this section, you will evaluate benefits and costs of changes in interest rates for individuals and society.
5. Private Economic Institutions
 - In this section, you will evaluate the impact of private economic institutions on the individual.
 - In this section, you will evaluate the impact of private economic institutions on the national economy.
 - In this section, you will evaluate the impact of private economic institutions on the international economy.
6. The Free Enterprise System
 - In this section you will identify trade-offs among risk, liquidity, and return and analyze how investing contributes to the free enterprise system.
7. Bonds and Financial Assets
 - In this section you will identify and describe characteristics of different types of bonds and financial assets.
8. Financial Markets Channeling Funds
 - In this section you will identify the connections between capital, stock markets, banks, and the economy to explain how financial markets channel funds from savers to investors.
9. Banking and Finance Apply
10. Banking and Finance Review
11. Banking and Finance Unit Test

6. **Economic Performance**

1. Economic Performance Introduction
2. Gross Domestic Product
 - In this section you will define Gross Domestic Product and factors that influence it and explain how gross domestic product is calculated.

3. Stages of the Business Cycle

- In this section you will describe stages of the business cycle and analyze the impact of events, such as wars, industrialization, and technological developments on the business cycle.

4. Change in Gross Domestic Product

- In this section you will measure and analyze economic growth in terms of percentage changes in Real Gross Domestic Product over time.

5. Impact of Unemployment

- In this section you will explain the different types of unemployment and determine how unemployment impacts economic conditions in the United States.

6. Causes and Impact of Inflation

- In this section you will define and calculate inflation and explain the causes and impacts of inflation.

7. Poverty and Resource Distribution

- In this section you will identify measures of poverty and analyze how resource distribution affects poverty.

8. Technology and Economic Growth

- In this section you will explain the effects of advancements in technology and training on economic growth on the standards of living.

9. Economic Performance Apply

10. Economic Performance Review

11. Economic Performance Unit Test

7. **Government and the Economy**

1. Government and the Economy Introduction

2. Types of Taxes

- In this section, you will identify different types of taxes and compare and contrast different types of taxes including who pays them.

3. Spending of Taxes

- In this section you will examine how money collected from taxes is spent by federal, state, and local government.

4. Effects of Changes in Taxation Policy

- In this section, you will evaluate the social costs and benefits of potential changes to taxation policies.
- In this section, you will evaluate the political costs and benefits of potential changes to taxation policies.
- Evaluate the economic costs and benefits of potential changes to taxation policies.

5. Fiscal Policy

- In this section you will define fiscal policy and describe the categories of revenues and expenditures in the U.S. federal budget and their respective proportions of federal budget.
- In this section, you will assess the government's role in regulating and stabilizing the state economy.

6. National Debt and the Federal Budget

- In this section you will identify the relationship between the national debt and the federal budget (e.g, balanced, surplus, deficit) and examine the federal budget and its implications on the economy.

7. Basics of the Federal Reserve

- In this section you will explain the structure, function, and role of the Federal Reserve.

8. Fed System Tools and Monetary Policy

- In this section you will explain and analyze the tools used by the Federal Reserve System to implement U.S. monetary policy including reserve requirements, the discount rate and the federal funds rate target, and open-market operations.
- In this section you will analyze how the Federal Reserve uses monetary policy to promote price stability, full employment, and economic growth.

9. Government and the Economy Apply 1

10. Government and the Economy Apply 2

11. Government and the Economy Review

12. Government and the Economy Unit Test

8. The Global Economy

1. The Global Economy Introduction

2. Comparative and Absolute Advantage

- In this section you will distinguish between absolute advantage and comparative advantage and analyze the role of comparative advantage to explain why goods and services are produced in one nation or locale versus another.
- In this section you will distinguish between absolute advantage and comparative advantage and analyze the role of comparative advantage to explain why goods and services are produced in one nation or locale versus another.

3. Trade Barriers

- In this section you will define trade barriers such as tariffs, quotas, embargoes, standards, and subsidies and explain the causes, benefits, and consequences of trade barriers on consumers and producers.

4. Multinational Organizations

- In this section you will analyze multinational entities (e.g., NAFTA, European Union, APEC) in economic and social terms.

5. Multinational Organizations Discussion

6. Exchange Rate and Purchasing Power

- In this section you will explain how changes in exchange rates can have an impact on the purchasing power of groups in the United States and in other countries.

7. Developed and Less Developed Nations

- In this section you will identify tools used to measure levels of development and describe the characteristic of developed nations and less developed countries.
- In this section, you will compare distribution of wealth across nations.

8. Role of Investments

- In this section you will explain the role investment plays in development and identify the purpose of foreign aid.

9. Globalization Trends

- In this section you will explain how current globalization trends and policies affect labor markets, resource, and income distribution in different nations.

10. Economic Interdependence

- In this section, you will analyze how changes in transportation affect economic interdependence around the world in the 21st century.
- In this section, you will analyze how changes in communication networks affect economic interdependence around the world in the 21st century.

11. Arguments on Free Trade Portfolio 1

12. The Global Economy Apply

13. The Global Economy Review

14. The Global Economy Unit Test

9. **Economics Semester Exam**

1. Economics Semester Online Practice
2. Economics Semester Exam

Geography (World Geography)

World Geography

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Geography develops students' comprehension of the geographical concepts and skills needed to acquire information and systematically apply decision-making processes to real-life situations. Students will acquire an understanding of multiculturalism and the relationships between people and their environment. Geography explores the world's cultural regions by examining location, physical characteristics, demographics, historical changes, economic activity, and land use.

1. People and Places

1. The Origins of Geography

- Learn the definition of geography and discover who is responsible for initiating the science
- Explore the history of geography and read excerpts from the travel writings of historians, navigators, and other travelers of the past
- Study a timeline of maps, noting how human perception of the planet's geographical layout has morphed from a vast unknown expanse to a world whose every square foot can be pinpointed

2. The Lay of the Land

- Gain a basic understanding of what the science of physical geography entails
- Familiarize yourself with the interior of the Earth, the science of plate tectonics, continents, and oceans
- Examine the concepts of the lines of latitude and longitude, hemisphere, and prime meridian
- Explain one theory of how Earth was formed
- Define climate and explain how it affects human populations
- Identify the composition of the earth's atmosphere

3. Defining Human Geography

- Distinguish the differences between physical geography and human geography
- Define culture and cultural traits
- Distinguish differences between ethnicity and race
- Explore cultural effects of major world religions
- Discuss pop culture, folk culture, and language

- Explore the numerous areas of study in human geography, focusing on the more intrinsic, people-centered topics

4. The World at Large

- Analyze population and its place in human geography
- Describe how economics define human culture
- Define political geography
- List some of the world's governing bodies
- Enumerate the countries of the world

2. Europe

1. Europe's Physical Landscape

- Review how to read a globe and maps
- Describe the terrain of Europe
- Examine the climate features of the continent
- Identify the native plants and animals
- Identify endangered species
- Explore the European landscape, flora, and fauna by taking a virtual hike through a selected country

2. Europe's Cultural Landscape

- Identify different elements of European culture
- Compare the main religions found on the continent of Europe
- Explore the various languages spoken in Europe
- Investigate the ethnic groups, languages, religions, and customs of a European country

3. Europe's Political Landscape

- Identify causes for the creation of the European Union
- Explore the beginnings of the European Union
- Examine the structure, membership, and goals of the European Union

4. Europe's Economic Landscape

- Identify the conditions that led to the creation of the European Union
- Describe the goals of the European Union

3. Africa

1. Africa's Physical Landscape

- Explore the terrain of Africa
- Study the various climatic zones of the continent
- Examine the native plants and animals, including some of those in danger of extinction
- Take a virtual nature trip to one particular region of Africa and learn more about its natural landscape

2. Africa's Cultural Landscape

- Describe the diverse characteristics of African culture
- Identify major African religions

- Identify the main languages of the African continent
- Describe village life on the African continent

3. Africa's Political Landscape

- Trace the political history of Africa
- Identify the causes and effects of European imperialism
- Identify examples of civil unrest in Africa since the independence movements

4. Africa's Economic Landscape

- Identify factors that create poverty in Africa
- Discuss the goals and efforts of the African Union to promote political and economic stability in the region

4. Asia

1. An Introduction to Asia

- Identify the various regions and countries of Asia
- Examine the national cultures and economies of the various regions and countries of Asia
- Describe the physical geography of Asia

2. The Cultural Landscape of India

- Describe the culture and people of India
- Distinguish between the major religions of India
- Examine the languages of India
- Distinguish between the five social classes in India's caste system
- Describe the importance of family and marriage in Indian society

3. The Political Landscape of China

- Explore the recent history of the People's Republic of China

4. China's Growing Economy

- Explain the cause and effects of China's rapid economic expansion.

5. North America

1. The Physical Landscape of North America

- Examine the terrain of North America
- Identify the climatic features of the continent of North America
- Describe the diverse variety of plants and animals in North America due to the variety of bioregions on the continent
- Identify the flora and fauna native to Mexico

2. The Cultural Landscape of North America

- Explore the cultural character of North America
- Investigate the major religions of the North American culture
- Examine the languages spoken in North America
- Discover the language and culture of Quebec

3. The Political Landscape of North America

- Compare the political systems of the continent

- Identify the issues regarding illegal immigration into the U.S.

4. The Economic Landscape of North America

- Examine North America's economic situation
- Describe the function of blocs in international trade

6. South America

1. The Physical Landscape of South America

- Explore the diverse physical features of South America
- Examine the climate of the continent of South America
- Identify the different types of flora and fauna on the continent of South America
- Analyze the biodiversity of the Galápagos Islands

2. The Cultural Landscape of South America

- Identify the cultures of South America
- Identify the predominant religions of the continent of South America
- Examine the native tongues of South America
- Predict the impact of ecotourism on an indigenous Ecuadoran village

3. South America's Political Landscape

- Explore the recent political history of South America
- Analyze South America's current political climate

4. South America's Economic Landscape

- Identify crucial commodities in the South American market
- Examine the continent's economic situation

7. Australia, New Zealand, and the Pacific Islands

1. An Introduction to Oceania

- Identify the physical features of Oceania
- Identify the region of Oceania on a map
- Explain the significance of the Ring of Fire

2. The Cultural Landscape of Oceania

- Identify the main ethnic groups that contribute to the diverse societies of Oceania
- Describe the cultural traits and accomplishments of the different cultures of Oceania
- Explain how the geography of the land has shaped cultural values and practices

3. The Other Land Down Under

- Analyze the unique geological features and landscape of New Zealand, a nation of Oceania
- Examine the various microclimates of New Zealand
- Give examples of New Zealand's exotic flora and fauna
- Complete activities to identify unique characteristics of New Zealand's Milford Trek

4. The Economic Landscape of Oceania

- Explain how geography shapes economic activities in different regions of Oceania
- Identify the natural and human resources found in the region of Oceania

- Compare three economies of Oceania

8. Current Issues

1. Strength in Numbers?

- Analyze human population
- Compare the distribution of human populations around the planet
- Ascertain what spurs population growth
- Recognize the model of demographic transition

2. The Clock Is Ticking

- Examine overpopulation and its effects on the natural world, cultures, and economies
- Discuss overpopulation in the context of the world population clock
- List measures that can be taken to control population growth

3. Climate Change and Pollution

- Examine the natural greenhouse effect and how it has been altered
- Analyze how human activity has caused this global climate change
- Examine the effects of global warming on the planet
- Propose measures to reverse the phenomenon of global warming

4. A Second Chance

- Define human geography
- Review environmental issues of the 21st century
- Explore the concept of sustainability as an umbrella approach to remedying global predicaments

9. Final Review and Exam

1. Geography Final Review
2. Geography Final Exam

Geography and Society

Geography and Society

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In Geography and Society, students will study the physical processes of the Earth, human systems such as culture, government, and economics, and develop skills to investigate regional conflicts around the world. Students will also begin to develop practical skills utilizing geographic concepts such as map reading and creation, as well as weather forecasting.

Course Outline

1. Geography Workshop

1. Introduction to Geography

- Define geography and explain the purpose of studying geography
- Identify and be able to give examples of the elements of geography
- Explain how geographers organize information

2. Introduction to Maps

- Define cartography
- Be able to use map scale to determine distances between objects

3. Mental Maps

- Generate and be able to utilize mental maps

4. Patrol Maps

- Create and be able to use a patrol map

5. Representing the Earth: History

- Understand what longitude and latitude are
- Be able to explain how they are used in navigation

6. Absolute Location

- Use longitude and latitude
- Identify absolute location of longitude and latitude

7. Regions

- Identify and be able to compare the differences among formal, functional, and perceptual regions

8. Shape of the World

- Identify the different types of map projections
- Be able to compare and contrast features of each projection

9. Map Maker

- Prepare maps that illustrate a variety of political entities, such as precincts, states, or countries

10. Careers in Geography

- Identify examples of careers that utilize geographic knowledge and skills
- Demonstrate the role that geographers play in society

11. Unit Review

- Review key terms from the unit

12. Geography Workshop Unit Test

2. Physical Systems

1. An Introduction to Physical Systems

- Identify the four main components of Earth's physical systems: the atmosphere, lithosphere, hydrosphere, and biosphere
- Explain how Earth's physical systems interact

2. Forces of Change: The Lithosphere

- Describe Earth's internal structure
- Explain how plate tectonics affects Earth's structure
- Explain what causes earthquakes and volcanic eruptions

3. Water Cycle: The Hydrosphere

- Identify the stages of the water cycle
- Explain the differences between Earth's salt water and freshwater resources

4. The Skies Above: The Atmosphere

- Identify the different layers of the atmosphere
- Describe the main functions of the atmosphere

5. Life on Earth: The Biosphere

- Identify the different elements of the biosphere
- Recognize the interactions between the elements of the biosphere

6. Climate and Weather

- Identify five climatic factors that affect the weather in a given location
- List the five climatic regions that exist on Earth

7. The Earth-Sun Relationship

- Describe how weather and climate are affected by Earth's relationship to the sun
- Explain the greenhouse effect

8. Predicting the Weather

- Explain and be able to demonstrate how to predict the changes in weather
- Identify the different types of clouds
- Explain how to use various weather instruments

9. Natural Disasters

- Identify the different types of natural disasters
- Discuss how each type of natural disaster occurs

10. The Christmas Day Tsunami (2004)

- Identify reasons why the 2004 tsunami was so destructive
- Research steps that have been taken in the wake of the 2004 tsunami to prevent a similar disaster from occurring

11. Unit Review

- Identify and explain the main terms and concepts of the unit

12. Physical Systems Unit Test

3. Environmental Issues

1. Introduction to Environmental Issues

- Identify the broad economic, political, and cultural context of environmental issues
- Provide an example of each of these environmental issues
- Identify environmental issues that affect land, air, and water
- Identify different forms of pollution and be able to relate environmental threats to the loss of biodiversity
- Explain why preserving biodiversity is important and identify the first laws passed to address pollution

2. Population Growth

- Identify factors that contribute to population growth
- Understand how birthrates, death rates, and migration affect the rate at which populations change
- Identify how population growth can influence changes within the natural environment

3. Land Use

- Explain why land is considered a natural resource
- Identify different ways in which humans use land
- Explain how the overuse of land can lead to habitat destruction
- Identify methods of protecting land resources

4. Conservation

- Define land use and be able to differentiate between different types of land use
- Define conservation and preservation

5. Climate Change

- Describe the nature of conservation efforts and contrast them with the issues caused by land use
- Identify factors that affect climate and distinguish different types of climactic changes
- Recognize why climate change occurs and explain the greenhouse effect
- Define global warming and explain its consequences
- Identify ways in which human activities have influenced climate change

6. Energy

- Identify types of energy sources and be able to describe how each is transformed into electricity
- Distinguish between renewable and non-renewable energy resources
- Explain how fossil fuels form
- Identify alternative energy sources
- Evaluate the advantages of alternative energy sources

7. Investigating Energy Alternatives

- Investigate the Marcellus Shale
- Conduct research
- Create a multimedia presentation

8. Unit Review

- Identify the main ideas of the unit
- Define and provide examples of the main vocabulary terms from the unit

9. Environmental Issues Unit Test

4. Human Systems

1. Introduction to Culture

- Define culture
- Identify the components of culture
- Explain the history of anthropology
- Examine how definitions of culture have changed over time
- Explain how culture has been viewed by diverse civilizations and differing ideologies

2. How Geography Influences Culture

- Describe how geography can impact aspects of culture
- Identify how factors such as climate and naturally occurring resources can affect daily activities and values
- Discuss specific examples of cultures in which these geographical impacts are evident

3. Culture and Society

- Describe and be able to distinguish how culture and society mutually affect one another
- Describe various definitions of sociology
- Recognize key historical figures that shaped modern sociological thought
- Interpret the challenges of developing nations as opposed to wealthier and established nations

4. Introduction to Western Religions

- Identify the main beliefs of three main western religions
- Describe the unique practices of each religion
- Compare and contrast the similarities and differences between the religions

5. Introduction to Eastern Religions

- List and be able to categorize three eastern religions by their unique characteristics
- Describe the unique practices of each religion

- Compare and contrast the similarities and differences between them

6. Introduction to Government

- Identify the characteristics of government
- Be able to describe how the concept of government has changed over time

7. Modern Government

- Identify the development, features, and implementation of several types of modern governments
- Be able to discuss the differences between democracies, republics, and totalitarian governments
- Be able to draw conclusions about the quality of life for citizens under these governmental systems

8. Portfolio - Political Maps

- Compare maps of voting patterns or political boundaries
- Draw conclusions about the distribution of political power
- Understand the U.S. electoral process
- Identify current elected officials using maps

9. Economic Systems

- Describe and be able to analyze the evolution of economics from the Mercantile Age to the present day
- Describe the history of mercantilism and capitalism
- Identify relevant economic ideologies, theories, and founding economists
- Analyze the evolution of economics from the Mercantile Age, the Industrial Revolution, and present day

10. Cultural Change

- Recall foundational elements of culture and society
- Be able to hypothesize why cultures change over time
- Analyze how the manifestations of cultural change create lasting shifts either ideologically or materially

11. Unit Review

- Identify the main ideas of the unit
- Define and provide examples of main vocabulary terms from the unit

12. Human Systems Unit Test

5. **Migration and Cultural Exchange**

1. Population

- Identify uses for population pyramids and basic features of the three types of pyramids
- Construct and analyze population pyramids and be able to describe population characteristics of different societies

2. Future Trends

- Interpret past population growth
- Understand and examine population graphs

- Predict future population patterns
- Assess solutions for managing population carrying capacity based on a variety of factors

3. Migration

- Define migration
- Examples of push/pull factors
- Identify geographic regions with high percentages of immigrants and high percentages of emigration
- Analyze push/pull factors in the context of urban migration

4. Immigrants and Refugees

- Recognize and be able to discuss reasons why people willingly or unwillingly move from one country to another
- Describe the causes and effects of refugee migration
- Analyze the pros, cons, and controversy surrounding the topic of international migration

5. Stories from a Small World

- Investigate the stories of a Mexican migrant and a refugee in a Kabul women's shelter
- Evaluate the issues surrounding immigration and refugees
- Relate to the refugee experience in a simulation

6. Cultural Exchange

- Define cultural diffusion
- Understand what occurs during cultural exchanges
- Identify examples of cultural diffusion
- Assess how cultural diffusion has affected the concept of globalization

7. Multiculturalism

- Define multiculturalism
- Understand the historical role of ethnic minorities in society
- Assess and evaluate the complexities of life as experienced by mixed-race people

8. The Most Recognized Symbols on Earth

- Define and explain key terms relating to cultural diffusion
- Identify global brands that exemplify cultural diffusion
- Make conclusions about the reasons for global spread
- Hypothesize what global brands communicate about world values

9. Unit Review

- Identify the main ideas of the unit
- Define and provide examples of main vocabulary terms from the unit

10. Migration and Cultural Exchange Unit Test

6. Resources and Conflict

1. Introduction to Regional Conflict

- List and be able to describe the underlying causes to regional conflicts

2. Xinjiang

- Evaluate regional conflicts based on static criteria
 - Compare and contrast conflicts based on static criteria
3. Chechnya
 - Identify the role economic infrastructure plays in the Chechen conflict
 - Identify key players in the conflict
 4. Burma (Myanmar)
 - Describe the political environment in Burma
 - Compare it to the political environment in the United States
 5. Kashmir
 - Evaluate the role religion plays in the conflict in Kashmir
 - Evaluate how the creation of Pakistan and India affects the conflict in Kashmir
 6. Quebec
 - Describe the evolution of Quebec's separatist movement
 - Compare the conflict in Quebec with similar separatist movements
 7. Mexico
 - Evaluate the role that the drug trade and crime play in Mexican society
 - Describe how those issues affect the United States
 8. Somalia
 - Identify and evaluate the factors that contribute to the dire level of poverty in Somalia
 9. Sudan
 - Identify the factors underlying the conflict in Sudan
 10. Compare and Contrast Regional Conflicts
 - Choose and evaluate three regional conflicts from this unit
 - Compare and contrast each one against the other two
 11. Unit Review
 - Review key terms from the unit
 12. Resources and Conflict Unit Test
- 7. Geography and Society Final Exam**
1. Geography and Society Final Review
 - Review unit objectives and key words
 - Identify areas of strengths and weakness in preparation for the final exam
 2. Geography and Society Final Exam

Pennsylvania State History 4

Pennsylvania State History 4

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This course offers an introduction to Pennsylvania state history. The student will trace the history of the state from its earliest inhabitants up through the present time. The course focuses on the state's geography, history, economy, culture, and government. Students will be introduced to skills such as recognizing change and continuity over time, comparing and contrasting, synthesizing information from multiple sources, and identifying cause and effect.

Course Outline

1. Geography

1. Introduction to the State of Pennsylvania

- Review prior knowledge of Pennsylvania history
- Identify state symbols
- Learn the basis for the founding of Pennsylvania

2. Geographic Tools

- Explore five themes of geography
- Describe how maps are used to learn about geography
- Identify different types of maps and explore how they are used in different contexts

3. Pennsylvania's Geography: Location, Regions, Places

- Identify the physical characteristics of Pennsylvania's regions and explain how these features affect the state
- Draw conclusions on state geography based on interpretation of various maps and regions (physical, resources, etc.)

4. Pennsylvania's Environment and Natural Resources

- Identify issues that show human interaction with the environment
- Explain how humans impact the environment in Pennsylvania
- Understand the importance of major water resources and other natural resources

5. Pennsylvania's Early People

- Compare and contrast the culture of two or more indigenous groups (prior to the arrival of Europeans).

- Synthesize information about the culture of the native inhabitants of the state through the use of multiple resources
- Explain how the Native Americans used natural resources
- Describe the relationship between Native Americans and the land

6. Unit Review and Quiz

- Review important facts about Pennsylvania's geography and early history
- Consider how geography affects daily life
- Take a unit quiz

2. History

1. Explorers and Settlers in Pennsylvania

- Identify the economic, geographic, and religious motives of migration to the Americas and settlement in the state
- Trace the course of events in the exploration and settlement of the state
- Describe the living conditions and daily life in the early settlements and cities of the state

2. Native Americans and European Settlers

- Explain how European settlements impacted Native American societies
- Describe the relationship between Native Americans and the colonists
- Identify different perspectives of the different cultural groups within the colonies

3. Pennsylvania in the Revolutionary War Era

- Trace the course of events that led to the establishment of Pennsylvania
- Identify key figures who contributed to the establishment and growth of Pennsylvania
- Learn more about how Pennsylvania shaped our nation and the role of the federal government
- Understand the role of Pennsylvania in helping United States gain independence from Great Britain

4. Pennsylvania and the Civil War

- Understand events that led up to the Civil War
- Describe the impact of the Civil War on the people of Pennsylvania
- Explain Pennsylvania's role before, during, and after the Civil War

5. Pennsylvania and World War II

- Describe the causes of World War II
- Explain how World War II affected Pennsylvanians

6. Unit Review and Quiz

- Review important facts about Pennsylvania's history
- Consider how many events in history affected the lives of people in Pennsylvania
- Take the unit quiz

3. Economy

1. An Introduction to Pennsylvania's Economy

- Identify the key economic industries in the state

- Describe the roles of producers and consumers
 - Describe the difference between goods and services
 - Evaluate the difference between basic needs and wants
2. Pennsylvania's Economic Changes
 - Discuss basic ways the economic system works
 - Describe factors that have changed the economy within Pennsylvania
 - Evaluate how Pennsylvania's economy has changed
 3. Railroads and Canals
 - Trace the course of technological change in the state during the second Industrial Revolution
 - Examine how canals and railroads changed the way of life for Pennsylvanians
 - Identify how canals and railroads affected Pennsylvania's economy
 4. Technological Change in Pennsylvania
 - Compare and contrast technology of the past and technology today
 - Explain how technological innovations changed life within Pennsylvania
 5. Unit Review and Quiz
 - Identify what factors affect the economy in Pennsylvania
 - Describe factors that bring about economic changes
 - Explain different industries in Pennsylvania and how have they changed over the years

4. Culture

1. Performing and Visual Arts in Pennsylvania
 - Describe the different arts found in Pennsylvania
 - Explain some of the key differences found in different forms of art
2. Cultural Diversity in Pennsylvania
 - Describe what it means to be culturally aware
 - Explain why having cultural awareness can help you be a better citizen
 - Identify practices that demonstrate cultural awareness
3. Pennsylvania's Traditions and Celebrations
 - Identify different Pennsylvania traditions and celebrations
4. Pennsylvania Landmarks
 - Explore some of the most famous landmarks in Pennsylvania
 - Describe what makes landmarks special or unique
 - Explain historical significance of Pennsylvania's landmarks
5. Unit Review and Quiz
 - Describe performing and visual arts in Pennsylvania
 - Explain some of the key differences found in different kinds of art
 - Identify different Pennsylvania traditions and celebrations
 - Identify and describe historical landmarks in Pennsylvania

- Explain the importance of cultural awareness

5. **Government**

1. Introduction to Pennsylvania Government

- Explain the structure of Pennsylvania's government
- Describe the different responsibilities of the three branches of government
- Explain how the three branches of government work together

2. State and Local Government in Pennsylvania

- Recognize how local government differs from the state government
- Explain the difference between rules and laws
- Describe how local government meets community needs

3. Influential People in State Government

- Identify positions of authority in state government
- Describe some of the services performed by different positions
- Explain the voting process

4. Becoming a Responsible Citizen

- Explain what it means to be a responsible citizen
- Describe the rights of citizens as they relate to freedom, democracy, justice, and equality

5. Unit Review and Quiz

- Identify the roles of the three branches of government
- Explain how the branches of government work together to serve the needs of citizens
- Describe some key positions of authority within the state government
- Explain why we need rules and laws

Personal Finance

Personal Finance

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Personal Finance prepares students for making sound financial decisions through real-world applications. Topics include financial and career planning, banking, credit, and debt. Students will also learn about savings and investments programs and will begin to evaluate stocks, bonds, mutual funds, and real estate. Personal Finance provides students with the basics to protecting finances, exploring concepts such as tax strategies, insurance, retirement, and estate planning. Finally, students receive an overview of financial option for continuing education.

Course Outline

1. Course Overview

1. Personal Finance Course Overview

2. Earning and Spending

1. Earning and Spending Introduction
2. Personal Finance
 - In this section, you will define personal financial literacy and explain why personal financial literacy is important
3. Spending Decisions and Behaviors
 - In this section, you will discover how money is spent, the difference between spending needs vs. spending wants, how much to spend vs. to save, and how to develop SMART financial goals that are Specific, Measurable, Attainable, Realistic and Time based.
4. Bank and Income Statements
 - In this section, you will review the information on a bank statement and then consider how this information can be corroborated with receipts and personal records of deposits, withdrawals, and transfers to ensure accuracy.
5. Earning and Spending Apply
6. Earning and Spending Review
7. Earning and Spending Unit Test

3. Consumption and Benefits

1. Consumption and Benefits Introduction
2. Gross and Net Income
 - In this section, you will differentiate between gross and net income and identify mandatory vs. voluntary deductions on a paycheck.

3. Employment Benefits and Deductions

- In this section, you will identify benefits such as health insurance contributions, retirement accounts, sick leave, vacation pay, flexible spending accounts, health savings accounts, workers' compensation, life insurance, and disability insurance.

4. Benefits of Owning v. Renting

- In this section, you will analyze costs and benefits of owning versus renting housing and owning versus leasing a vehicle.

5. Consumption and Benefits Apply

6. Consumption and Benefits Review

7. Consumption and Benefits Unit Test

4. Savings and Investing

1. Savings and Investing Introduction

2. Types of Savings Strategies

- In this section, you will describe the role of savings in promoting financial security.

3. Role of Financial Institutions

- In this section, you will explain the tax benefits of charitable contributions.

4. Savings Options and Investment Risks

- In this section, you will evaluate the costs and benefits of various savings options such as bank savings accounts, certificates of deposit, and money market mutual funds.

5. Costs of Retirement

- Identify costs of retirement such as living expenses, health care expenses, and long-term care expenses, including sources of income during retirement such as Social Security, individual savings, and employer-sponsored plans.

6. Savings and Investing Apply

7. Savings and Investing Review

8. Savings and Investing Unit Test

5. Credit and Borrowing

1. Credit and Borrowing Introduction

2. Types of Creditors and Credits

- In this section, you will compare sources of credit such as banks, merchants, peer-to-peer, payday loans, and title loans.

3. Credit Decisions

- In this section, you will evaluate the impact of credit decisions on monthly budget, income statement, and net worth statement.

4. Credit Scores and Monitoring

- In this section, you will describe how to access and interpret a sample credit report and score.

5. Factors and Impacts of Bankruptcy

- In this section, you will identify factors that could lead to bankruptcy such as medical expenses, job loss, divorce, or a failed business.

6. Costs of Borrowing Money

- In this section, you will examine the components of the cost of borrowing, including annual percentage rate (APR), fixed versus variable interest, length of term, grace period, and additional fees, such as late payment, cash advance, and prepayment penalties.

7. Strategies to Reduce Borrowing

- In this section, you will examine the components of the cost of borrowing, including annual percentage rate (APR), fixed versus variable interest, length of term, grace period, and additional fees, such as late payment, cash advance, and prepayment penalties.

8. Credit and Borrowing Apply

9. Credit and Borrowing Review

10. Credit and Borrowing Unit Test

6. Financial Risks

1. Financial Risks Introduction

2. Financial Risks

- In this section, you will identify risk as potential loss of assets or earning potential.
- In this section, you will apply risk management strategies, including avoiding, reducing, retaining and transferring risk.

3. Insurance Costs

- In this section, you will define insurance terminology, including premiums, deductibles, co-pays, and policy limits.
- In this section, you will explain the costs and benefits of different types and sources of health insurance such as individual health plans, employer-provided health plans, and government-provided health plans.

4. Disability, Life, and Property Insurance

- In this section, you will explain the costs and benefits of disability and long-term care insurance.
- In this section, you will explain the costs and benefits of life insurance, including term insurance and whole life insurance.
- In this section, you will explain the costs and benefits of property insurance, including homeowner's and renter's insurance.

5. Automobile and Supplemental Insurance

- In this section, you will explain the costs and benefits of automobile insurance and factors that impact the price of insurance, including the type of vehicle, age and sex of the driver, driving record, deductible, and geographic location.
- In this section, you will learn about the costs and benefits of supplemental types of insurance such as extended warranties, mortgage protection life insurance, accidental death and dismemberment life insurance, car loan payoff coverage, debt cancellation coverage, and credit life coverage.

6. Identity Theft

- In this section, you will identify ways to protect personal information and reduce risk of identity theft.
- In this section, you will learn about some of the more common scams and how to avoid them. Scams can come in many forms, including e-mails, phone calls, or even a stranger knocking on your door. It is important to not only protect yourself but to be able to help your friends and family know when they are being scammed.

- In this lesson, you will come to understand how to use consumer protection agencies such as the Better Business Bureau or the Consumer Financial Protection Board to research and report fraud.

7. Financial Risks Apply
8. Financial Risks Review
9. Financial Risks Unit Test

7. Continuing Education

1. Continuing Education Introduction
2. Education and Training Costs
 - In this section, you will identify risk as potential loss of assets or earning potential.
3. Educational Investment
 - In this section, you will define insurance terminology, including premiums, deductibles, co-pays, and policy limits.
4. Financial Aid Process
 - In this section, you will explain the costs and benefits of disability and long-term care insurance.
5. Pros & Cons of Funding Sources
 - In this section, you will explain the costs and benefits of automobile insurance and factors that impact the price of insurance, including the type of vehicle, age and sex of the driver, driving record, deductible, and geographic location.
6. Continuing Education Apply
7. Continuing Education Review
8. Continuing Education Unit Test

8. Semester Exam

1. Personal Finance Semester Review
2. Personal Finance Semester Exam

Psychology

Psychology

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise Psychology. This course begins with a historical review of how man has sought to explain human behavior from ancient times to today. The student will learn about the research methods that are applied to the field and how the scientific method of inquiry moved psychology from quaint parlor tricks like hypnosis and mesmerism to serious inquiry that utilizes hard science to prove theories. The student will also learn about the amazing brain and will explore the workings of the normal brain. The student will then build upon this biological foundation to learn how the information that we take in through our senses is perceived and interpreted by the brain to form the mental images of our daily experiences in the world. The course also provides a survey of a human's life span from birth to death. The student will learn about all of the major physical and psychological changes that mark the development of a human's existence and a variety of theories that outline these processes.

Semester A Outline

1. Introducing Psychology

1. Why Study Psychology?
 - Define psychology
 - Provide a rationale for the study of psychology
 - Consider that both cognitive and physiological factors influence behavior
2. Psychology as a Science
 - Discuss the four goals of psychology
 - Consider the scientific basis of psychology
 - Define hypothesis
 - List and explain the 5 steps of the scientific method
 - Compare and contrast the concepts of basic science and applied science and apply to psychology today
3. The Roots of Psychology
 - Name the three historical roots of psychology
 - Describe the significance of dualism in the development of psychology

- Explain why the scientific basis of psychology is considered a major advance from early psychology thinking

4. Early Perspectives

- Distinguish among the early schools of thought in psychology. These include: structuralism, functionalism, psychoanalysis, clinical, and Gestalt psychology
- Distinguish among the different research strategies used by psychologists to explore behavior

5. Schools of Thought

- Recognize the main differences among the following movements in modern psychology: behavioral, humanistic, cognitive, and psychobiology
- Distinguish among the different research strategies used by psychologists to explore behavior

6. Careers in Psychology

- Recognize and distinguish between the various careers in the field of psychology
- Gain an understanding of the levels of education required for different careers within the field of psychology

2. Research Methods Statistics

1. Goals of Research

- Gain an overview of psychological research and its methods
- Consider what drives psychology research
- Describe the five steps in the process of scientific research

2. Research Methods

- Compare and contrast the three main methods of research
- Describe the important features of experimental research

3. Data Collection Methods

- Describe the main data collection methods
- Compare and contrast the reasons for data collection
- Explain the major ethical issues associated with undertaking scientific research

4. Understanding Data

- Consider how data is interpreted and presented
- Consider how research findings are formulated from the analysis of data

3. Basics of the Nervous System

1. The Neuron

- Describe the structure of a neuron and describe the functions of each major part
- Distinguish between sensory neurons (receptor), motor neurons, and interneurons
- Recognize the process by which nerve impulses are propagated
- Explain the activities that take place at the synapse

2. The Nervous System

- Discuss the role of the nervous system in influencing behavior
- Identify the two main organs of the central nervous system
- Name the two divisions of the peripheral nervous system and describe their functions

- Distinguish between the somatic nervous system and the autonomic nervous system
- Distinguish between the sympathetic division and the parasympathetic division

3. The Brain

- Identify the major structures and functions of the human brain

4. Modern Brain Research Techniques

- Consider modern brain imaging techniques and their use to psychology researchers

5. Hormones, Heredity, and Environment

- Describe the functions of the endocrine system and the influence of hormones on behavior
- Discuss some social implications of behavior genetics
- Identify several approaches to studying heritability of a trait

4. Altered States

1. Sleep

- Explain the theories related to the functions of sleep
- List and briefly describe the different stages of sleep
- Explain what happens during REM sleep and explain why it is called paradoxical sleep
- List and briefly explain the major sleep disorders

2. Dreams

- List and explain the major dream theories

3. Your Brain on Drugs

- Understand how various drugs of abuse are injected and get to the brain
- Discuss the effects of the various drugs of abuse on the brain
- Explain how drug use can lead to addiction

5. Sensation and Perception

1. Sensation

- Define sense and sensation
- Explain the difference between sensation and perception
- Differentiate between absolute and difference potential
- Define signal detection

2. The Senses

- List the major structures and function of the eye and compare the two major theories of color vision
- Outline the function of the senses
- Define visual illusion and list six examples

3. Perception

- Define form perception and identify four Gestalt principles that describe the process
- Describe Gestalt principles of perceptual organization
- Define perceptual constancy and give examples of size, shape, and brightness constancy

6. Development Theories

1. Introduction to Developmental Psychology

- Describe the main historical approaches to child development and name their proponents
- Describe the three domains of developmental psychology
- List three reasons for studying child development

2. Freud's Theories

- Discuss the basic ideas in Sigmund Freud's psychosexual theory of personality development, including the id, ego, and superego
- Describe each stage of Freud's theory

3. Erikson's Theory

- Discuss the basic ideas in Erik Erikson's psychosocial theory of development and compare it to Freud's psychosexual theory
- Be able to describe each stage of Erikson's theory

4. Piaget's Theories

- Define the key aspects of attachment theory as it relates to social development and all relationships throughout a person's life
- Describe specific implications of attachment theory with regard to adoption and child rearing practices

5. Social Development Theory

- Define the key aspects of attachment theory as it relates to social development and all relationships throughout a person's life
- Describe specific implications of attachment theory with regard to adoption and child rearing practices

7. Final Review and Exam

1. Psychology A Final Review
2. Psychology A Final Exam

Semester B Summary:

This is the second of two courses that comprise Psychology. The course begins with an exploration of what makes individuals different from one another and the notion of personality. The student will dissect the widely divergent and often contradictory personality theories.

In the section on Learning, Memory, and Motivation, the student will tie together his knowledge of the biological basics of behavior with the major personality theories in order to understand the complex mental processes of learning, memory, thought, and language.

Finally, the student will shift his focus from normal to abnormal behavior, and in doing so, study the theories related to life adjustment, stress, psychological breakdown and methods of therapy.

Semester B Outline

1. Psychological Testing

1. Intelligence

- Define the concept of intelligence
- Outline the major theories of intelligence
- Outline the environmental influences on intelligence
- Outline the genetic influences on intelligence
- Describe the development of the Stanford-Binet Intelligence Scale
- Understand the concept of intelligence quotient (IQ)

2. Intelligence Tests

- List the characteristics of good intelligence tests
- Recognize the importance of intelligence scores in modern society
- Understand the criticisms of intelligence tests

3. Aptitude Tests

- Define and compare aptitude tests, achievement tests, and interest inventories
- Discuss the qualities of aptitude tests, achievement tests, and interest inventories
- Explain the value and application of aptitude tests, achievement tests, and interest inventories

4. Personality Tests

- Discuss the differences between objective and projective personality tests and why this distinction is important
- Compare and contrast projective and objective personality tests

2. Theories of Personality

1. What is Personality

- Define personality and theory
- Recognize the interests and goals of personality theorists

2. Psychoanalytic Theories

- Explain the major psychoanalytic theories of personality
- Discuss Freud's theory of personality and define its main components
- Identify and define the major defense mechanisms
- Compare and contrast Jung's theory to Freud's personality theory
- Explain Adler's theory of personality

3. Learning Theories

- Compare and contrast the theories of behaviorism and social cognition
- Discuss the criticisms for and against behaviorism and social cognition as theories of personality

4. Humanistic Theories

- Compare and contrast humanistic theory of personality to psychoanalytic and behavioral theories
- Discuss and define the main themes of Maslow's and Rogers' theories
- Fully explain the stages of Maslow's hierarchy of needs model

- Understand why these theories are so appealing

5. Cognitive Theories

- Discuss the cognitive theory of personality
- Compare and contrast the cognitive to the other major personality theories
- Explain the limitations and criticisms of the cognitive theory

6. Trait Theories

- Describe trait theory and the methods used to discover personality traits
- Discuss Allport's trait theory
- Explain Raymond Cattell's trait theory of personality
- Understand Eysenck's theory of personality
- Recognize and list the Big Five Factors of personality and be able to describe them

3. Learning, Memory, and Motivation

1. Classical Conditioning

- Define learning
- Identify the types of stimuli and responses in classical conditioning
- Outline the basic principles of classical conditioning
- Describe how taste aversion might be acquired through classical conditioning
- Demonstrate a knowledge of the applications of classical conditioning

2. Operant Conditioning

- Define and outline the basic principles of operant conditioning
- Explain the four types of operant conditioning
- Differentiate between examples of classical and operant conditioning

3. Memory – Part 1

- Differentiate between learning and memory
- Describe the three processes of memory and provide examples that illustrate each

4. Memory – Part 2

- Describe the three systems of memory
- Provide examples of sensory memory
- List and compare the various effects on short-term memory
- Compare the types of long-term memory
- Discuss the long-term memory process and its components

5. Your Brain's Database

- Explain the processes involved in forming memories
- Understand the value of mnemonic devices in memory
- Discuss methods of improving memory

6. Forgetting

- Compare the five theories of forgetting

- Explain two mechanisms of memory interference
- Identify two types of amnesia

7. Thinking and Problem Solving

- Define thinking and the three main types
- Discuss divergent and convergent thought
- Distinguish between reasoning and problem solving
- Define the types of reasoning
- Describe Gestalt theory

8. Language

- Define language and describe its structure
- Outline how language develops in infants and children
- Compare the two major theories of language development
- Distinguish among phonemes, morphemes, and syntax
- Discuss support for Chomsky's theory of language acquisition

4. Stress, Coping, and Mental Health

1. Stress and Health

- Define stress and list its causes
- Differentiate between distress and eustress
- Explain the connection between stress and health
- Define the three types of stress
- Define posttraumatic stress disorder (PTSD)

2. Effects of Stress

- Define the fight or flight mechanism
- Differentiate between the psychological and physiological components of the fight or flight mechanism
- Differentiate between acute and chronic stress
- Explain the connection between chronic stress and disease

3. Coping with Stress

- Identify techniques for coping with stress
- Differentiate between problem-focused coping and emotion-focused coping
- Define self-esteem
- Explain connection between low self-esteem and stress

5. Disorders

1. What is Normal?

- Define normalcy
- Differentiate between historical and contemporary visions of normalcy and treatment of abnormal behavior
- Define maladaptive behavior

2. Anxiety Disorders

- Define anxiety
- Define the term anxiety disorder
- Differentiate between the different types of anxiety disorders

3. Somatoform and Dissociative Disorders

- Define somatoform disorder
- Define dissociative disorder
- Differentiate the different types of somatoform and dissociative disorders

4. Schizophrenia

- Define schizophrenia
- Learn the symptoms of schizophrenia
- Differentiate the various types of schizophrenia
- Investigate the causes of schizophrenia

5. Personality Disorders

- Define personality disorder
- Explain the symptoms of personality disorders
- Differentiate the various types of personality disorders

6. Drug Addiction

- Define addiction
- Explain the psychological and physiological aspects of addiction
- Explain the risk factors for addiction
- Explain the signs and symptoms of addiction

6. Therapy and Change

1. What is Psychotherapy?

- Define psychotherapy
- Explain the emergence of modern psychotherapy
- Differentiate the various schools of psychotherapy

2. Psychoanalysis

- Define psychoanalysis
- Explain the origins of psychoanalysis
- Explain the role of the therapist in psychoanalysis

3. Humanistic Therapy

- Define humanistic therapy
- Explain the emergence of humanistic therapy
- Identify the major figures associated with humanistic therapy
- Explain the connection between humanistic therapy and existentialism

4. Cognitive Therapy

- Define cognitive therapy
- Explain the emergence of cognitive therapy
- Identify the major figures associated with cognitive therapy
- Explain the two major types of cognitive therapy

5. Behavioral Therapies

- Define behavioral therapy
- Explain the emergence of behavioral therapy
- Identify the major figure associated with behavioral therapy
- Explain the major types of behavioral therapies

6. Biological Approaches

- Define a biological approach to therapy
- Explore homeopathic alternatives to the biological approach
- Explain the major types of biological therapies

7. Final Review and Exam

1. Psychology B Final Exam Review
2. Psychology B Final Exam

US History

United States History

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

This course examines social, economic, historical, and political change in the United States from the birth of the country to recent events. Through interactive activities, discussions, charts, timelines, primary sources, and maps, students will explore key events, patterns, and figures that shaped American history and culture. Students will evaluate important foundational documents such as the Declaration of Independence and the Constitution. The course will also investigate the changing relationship of the United States to the rest of the world. In-depth study of the cause and effect of important events will help students better understand the historical context of key developments. Students will receive instruction in analyzing essential historical documents through portfolio items and lesson activities. Readings and activities will assist students in comparing time periods and in developing historical reasoning and critical thinking skills. Through this course, students will gain a broader understanding of the relevance of American history to their lives as well as develop a better understanding of the impact of key events on American culture and society.

SEMESTER B

This course examines social, economic, historical, and political change in the United States from the birth of the country to recent events. Through interactive activities, discussions, charts, timelines, primary sources, and maps, students will explore key events, patterns, and figures that shaped American history and culture. Students will evaluate important foundational documents such as the Declaration of Independence and the Constitution.

The course will also investigate the changing relationship of the United States to the rest of the world. In-depth study of the cause and effect of important events will help students better understand the historical context of key developments. Students will receive instruction in analyzing essential historical documents through portfolio items and lesson activities. Readings and activities will assist students in comparing time periods and in developing historical reasoning and critical thinking skills. Through this course, students will gain a broader understanding of the relevance of American history to their lives as well as develop a better understanding of the impact of key events on American culture and society.

Course Outline:

SEMESTER A

1. Course Overview

1. United States History

2. A Country is Born

1. Colonial Discontent

- Compare and contrast the arguments regarding British colonial policies following the Seven Years' War
- Identify the acts Britain imposed on the American colonies
- Classify the American colonists' responses to British acts in the mid-1700s

2. Declaring Independence

- Classify arguments for and against the American colonies declaring independence from England
- Identify the theories supporting the ideals outlined in the Declaration of Independence
- Sequence the important events leading up to the signing of the Declaration of Independence

3. Give Me Liberty!

- Identify the important events and people of the American Revolution
- Identify causes and effects of issues that arose in the American colonies during the American Revolution
- Cite how the involvement of different countries impacted the outcome of the American Revolution
- Sequence the events at the end of the Revolutionary War and identify the impact of the Treaty of Paris

4. Social Awakenings

- Compare and contrast the ideals and experiences of colonists and groups such as women, Native Americans, and African Americans during the American Revolution
- Identify and analyze how the ideals of the American Revolution affected social structures in the United States
- Identify the views and roles of loyalists and patriots during the American Revolution

5. Articles of Confederation

- List the strengths and weaknesses of the Articles of Confederation
- Identify the impact of the Northwest Ordinance

- Identify the causes and effects of Shays's Rebellion
- Categorize the economic issues facing the United States after the American Revolution

6. Constitutional Convention and the Constitution

- Identify the reason for the Constitutional Convention
- Identify and analyze the major compromises reached during the Constitutional Convention
- Compare and contrast the Federalist and Anti-Federalist arguments
- Identify the key principles outlined in the Constitution and the Bill of Rights
- Identify the impact the Declaration of Independence on the development of the Constitution and American democracy

3. A Nation Grows

1. A New Nation

- List the factors contributing to the development of political parties between 1790–1820
- Identify and describe the major policies and political developments of the presidencies of George Washington, John Adams, and Thomas Jefferson
- Trace the expansion of the U.S. and federal government between 1790–1820

2. Early Growth

- Identify and describe the major policies and political developments of the presidencies of James Monroe and James Madison
- Identify how the rise of manufacturing in the early 1800s led to new inventions, technologies, and changes in transportation
- Identify and compare the effect industrialization had on the different groups of people in society in the early 1800s
- Identify the causes and effects of immigration from Northern Europe to the United States in the early to mid-1800s
- Distinguish how economic expansion in the early 1800s affected the American North, South, and West

3. Jacksonian Democracy

- Trace the changes in the United States political system, including the expansion of democracy and development of new political parties, during the early nineteenth century
- Identify and evaluate the economic and social policies of Andrew Jackson's presidency
- Identify the impact of American expansion during the early 1800s on American Indians
- Identify the impact of expansion during James Polk's presidency including the Texas annexation, Mexican-American War, and acquisition of Oregon
- Compare the American response to the acquisition of new territory by the North, South, and West

4. The Effects of Slavery

- Identify and compare the economies of the American North and South during the first half of the nineteenth century
- Compare the role of slavery in the economies of the American North and South during the first half of the nineteenth century
- Trace the growing economic differences between the American North and South during the first half of the nineteenth century

- Identify and describe the lives of enslaved and free African Americans during the first half of the nineteenth century

5. Tumult and Transformations

- Identify the causes and effects of the Second Great Awakening in the United States
- Identify the goals, methods, and achievements of antebellum reform movements
- Identify the beliefs of transcendentalists and examples of their work and influence
- Compare and contrast the methods of abolitionist groups
- Identify the causes and effects of American slave resistance and rebellions prior to the Civil War

6. Compromises and Conflict

- Compare and contrast responses to slavery, tariffs, and states' rights in the American North and South
- Identify and describe compromises on slavery during American expansion
- Identify the impact of the Supreme Court's Scott v. Sandford decision
- Trace the development of the Republican Party in the U.S.
- Identify the causes and effects of John Brown's raid at Harpers Ferry

4. **A New Nation and Its Growing Pains Test**

1. A New Nation and Its Growing Pains Review

- Describe the people, events, ideals and causes of the American Revolution and the social economic and political effects of the American Revolution
- Describe the ideals outlined in the Declaration of Independence, American Constitution and Bill of Rights
- Describe the economic, domestic, and foreign policies of presidents during the late 18th and early 19th century
- Describe the political, social and economic characteristics and differences of the North, South and West including the growing sectional tension over the issue of slavery
- Summarize the lives of free and enslaved African Americans and the impact of the Second Great Awakening on the development of the abolition movement

2. A New Nation and Its Growing Pains Test

5. **Civil War and Reconstruction**

1. The Civil War

- Identify key events that led to the Civil War
- Cite and analyze reasons for the Confederate secession from the United States
- Compare the strategies and capabilities of the North and South during the Civil War
- Identify the purpose and effect of the Emancipation Proclamation

2. The Effect of the Civil War

- Identify the efforts of women at home and on the battlefield during the Civil War
- Compare and contrast the conditions of African American soldiers in the Civil War
- Compare the manner in which the North and South organized armies for the Civil War
- Identify the effect expanded government power had on the economy and population during the Civil War

3. The Civil War Ends

- Identify the importance of the Battle of Gettysburg, the Battle of Vicksburg and other key Civil War battles
- Cite significant parts of the Gettysburg Address
- Identify the causes and effects of Sherman's March to the Sea
- Identify the effect of Lincoln's Second Inaugural Address
- Identify significant factors that contributed to the end of the Civil War

4. Plans for Reconstruction

- Compare and contrast the Reconstruction plans of Abraham Lincoln, Andrew Johnson, and Congress
- Identify the causes and effects of Reconstruction
- Identify the causes and effects of Andrew Johnson's impeachment
- Identify and analyze the purposes and effects of the Thirteenth, Fourteenth, and Fifteenth Amendments

5. The Effects of Reconstruction

- Identify and analyze the purpose and impact of the Freedmen's Bureau
- Identify the effects of the Reconstruction on the South and African Americans
- Identify the causes and effects of Jim Crow laws
- Identify the causes and impact of the Compromise of 1877

6. Industrialization and Westward Expansion

1. Industrial Growth

- Identify and describe the economic, social, and political factors that led to industrialization in the late 1800s
- Identify technological innovations and inventions that contributed to industrial growth in the late 1800s
- Trace the emergence of consumer culture in the late 1800s

2. Big Business

- Identify and compare the leaders of the steel, finance, and railroad industries
- Trace the development of corporations, monopolies, and trusts in the late 1800s
- Identify and compare government responses to the rise of big business in the late 1800s
- Identify the impact of industrialization on the economy in the late 1800s

3. Workers and the Labor Movement

- Identify the impact of the Industrial Revolution on society and cite challenges workers experienced in the late 1800s
- Identify and describe the working conditions in factories
- Identify and compare the goals, leaders, and motivations of the Knights of Labor and the American Federation of Labor
- Identify the causes and effects of strikes including the Homestead Strike, Pullman Strike, and Haymarket Affair

4. Westward Expansion

- Identify and explain how the concept of Manifest Destiny and the romanticization of the West impacted westward expansion
- Identify how technological advancements, such as the Transcontinental Railroad, and the mining, agriculture, and railroad industries impacted westward expansion
- Compare the motivations of the different groups of settlers including farmers, cowboys, ranchers, and miners
- Identify the conflicts and challenges the different groups of settlers experienced
- Identify the environmental impacts of westward expansion

5. Westward Expansion and the American Indian

- Identify the impact the Homestead Act and Transcontinental Railroad had on American Indians
- Trace the development of federal Indian policies in the 1800s
- Categorize and identify the ways American Indians responded to westward expansion
- Identify and describe the causes and effects of the conflicts between American Indians and Americans during the 1800s

6. Immigrants and Minorities in the West

- Identify the factors leading to migration and immigration to the West in the late 1800s through the early 1900s
- Identify challenges Chinese and Hispanic immigrants faced in the West in the late 1800s through the early 1900s
- Compare the experience of African Americans and other settlers in the West

7. Labor Unions Portfolio

1. Effectiveness of Labor Unions

- Describe the effectiveness of labor unions in bringing about change

2. Cause and Effect

- Analyze primary and secondary sources
- Determine the causes and effects of events

3. Labor Unions Portfolio Directions

- Analyze primary and secondary sources about the Haymarket Affair and the Homestead and Pullman strikes
- Create a cause-and-effect chart
- Write a letter explaining participation in the Haymarket Affair, the Homestead Strike, or the Pullman Strike

8. Urbanization and the Gilded Age

1. Urbanization

- Identify the push and pull factors that led people to migrate from farms to cities in the late 1800s
- Identify how technological advancements contributed to the growth of cities in the late 1800s
- Contrast the living conditions of the poor and wealthy in the late 1800s
- List the challenges and benefits associated with urban living in the late 1800s
- Identify economic, social, and political responses to urbanization in the late 1800s

2. Cultural Changes in the Late 1800s

- Contrast the educational and social opportunities for different groups in American society in the late 1800s
- Identify the ways artists, journalists, and novelists depicted changes to American life in the late 1800s
- Identify important poets, novelists, and artists of the late 1800s

3. European Immigration

- Compare different immigrant experiences by region and time period in the late 1800s
- Identify the ways immigrants acclimated to life in the United States in the late 1800s
- Identify and evaluate the challenges immigrants faced in the United States in the late 1800s
- Identify ways Americans responded to the growing number of immigrants in the late 1800s

4. The New South

- Trace the development of Jim Crow laws in the South
- Identify the impact of the Plessy v. Ferguson case
- Identify the experiences of African Americans in the years following the Civil War and Reconstruction

5. The Gilded Age

- Identify the causes and effects of political and economic corruption during the Gilded Age
- Identify the causes and impact of economic recessions in the late 1800s
- Identify political and economic reforms in the late 1800s
- Interpret political cartoons from the Gilded Age

6. The Rise of Populism

- Identify the impact of mechanized farming on farmers and the environment in the late 1800s
- Identify the economic, social, and political challenges American farmers faced in the late 1800s
- Trace the development of and impact of farmers' movements in the late 1800s
- Identify the factors that contributed to the rise and decline of the Populist movement
- Categorize and describe the successes and failures of populism in the late 1800s

9. The Civil War–The Gilded Age Test

1. The Civil War–The Gilded Age Review

- Evaluate the political, economic, and social causes and effects of the Civil War
- Summarize Reconstruction including the Reconstruction plans, policies, responses, successes, and failures
- Describe the social, economic, and political characteristics of the late 1800s including the causes and effects of Industrialization, conditions of workers, farmers, immigrants, and minorities
- Trace the rise of labor and farm organizations and unrest in the late 1800s
- Summarize the factors that contributed to westward expansion during the 1800s and the impact of expansion on Native Americans, immigrants, and minorities

2. The Civil War–The Gilded Age Test

10. Progressive Era

1. The Progressive Movement

- Identify the origins, goals, and key ideas of the Progressive movement
 - Compare groups involved in the Progressive movement including muckrakers, intellectuals, and religious leaders
 - Identify and describe the social problems Progressives addressed
 - Identify and evaluate the efforts of Progressives to accomplish change
 - Interpret and analyze primary sources related to the Progressive Age
2. Progressive Reforms
- Identify and describe state-level direct democracy reforms
 - Identify the methods Progressives used to combat inefficiency and corruption in politics
 - Trace the development of radical Progressives and compare their goals to those of moderate Progressives
 - Identify the causes, course, and consequences of the labor movement during the Progressive Age
3. Progressive Women
- Trace the origins of the women's movement
 - Identify and describe progressive efforts to reform society and morality
 - Identify the methods progressive women used to gain passage of the Nineteenth Amendment
 - Differentiate the goals of African American, Latin American, and immigrant women to those of white progressive women
4. Fighting Discrimination
- Identify the effect discriminatory laws had on the development of the National Association for the Advancement of Colored People (NAACP)
 - Identify and compare the goals and strategies of African American leaders during the Progressive Age
 - Identify the impact of African American leaders and evaluate the extent to which they met their goals during the Progressive Age
5. Progressive Presidents
- Identify and evaluate the political, social, and economic reforms during Theodore Roosevelt's presidency
 - Identify how Theodore Roosevelt expanded the role of presidential power
 - Identify and evaluate the political, social, and economic reforms during William Howard Taft's presidency
 - Compare and contrast the progressive reforms of Theodore Roosevelt and William Howard Taft
 - Identify the Supreme Court's role during the Progressive Movement
6. The Legacy of the Progressive Era
- Identify the impact of the 1912 presidential election on the Progressive movement
 - Compare different political ideas within the Progressive movement
 - Identify and evaluate the political, social, and economic reforms during Woodrow Wilson's presidency
 - Identify and evaluate the positive and negative effects of the Progressive Era

1. Listening to Multiple Perspectives

- Identify the purpose of studying multiple points of view in history
- Analyze primary and secondary sources

2. Comparing and Contrasting

- Use a Venn diagram to compare and contrast Booker T. Washington and W. E. B. Du Bois
- Identify compare-and-contrast essay styles
- Understand the purpose of transition words and phrases

3. Progressive Era Portfolio Directions

- Analyze primary and secondary sources
- Write an essay comparing and contrasting the perspectives and goals of Booker T. Washington and W. E. B. Du Bois

12. American Empire

1. American Imperialism

- Identify and categorize key factors that influenced American imperialism
- Identify the causes and effects of American imperialism at home and abroad
- Identify the contributions of Frederick Jackson Turner and Alfred Thayer Mahan in the creation of an American empire

2. The Spanish-American War

- Identify the causes, events, and outcomes of the Spanish-American War
- Compare Americans' differing opinions on empire following the Spanish-American War
- Using primary sources, cite the impact of yellow journalism on the Spanish-American War
- Identify and explain the influence of the Spanish-American War on the emergence of the United States as a world power
- Trace the acquisition of new territories after the Spanish-American War

3. The United States and East Asia

- Identify how economic power helped to expand American influence in China
- Identify and describe how American foreign policy was impacted by the spheres of influence in China
- Identify and classify causes and effects of the Philippine-American War
- Identify the reasons for the Open Door policy

4. President Theodore Roosevelt

- Identify the impact of the Roosevelt Corollary on foreign relations
- Identify the impact of Theodore Roosevelt's big stick foreign policy
- Identify the United States' role in the Panama Revolution and the building of the Panama Canal
- Using primary and secondary sources, distinguish between American opinions regarding Theodore Roosevelt's foreign policies
- Identify and describe the United States' role in ending the war between Russia and Japan

5. Moral Diplomacy and Dollar Diplomacy

- Identify the economic tactics William Howard Taft used to protect American interests

- Identify the impact of Woodrow Wilson's moral diplomacy
- Compare and contrast the foreign policies of Theodore Roosevelt, William Howard Taft, and Woodrow Wilson

6. The Legacy of American Imperialism

- Identify and analyze the consequences of imperialism
- Compare and evaluate the arguments of interventionists and noninterventionists of the period
- Interpret the differing points of views concerning imperialism using political cartoons

13. Progressive Era and American Empire Test

1. Progressive Era and American Empire Review

- Analyze the effectiveness of progressive reformers in enacting change and the role of women and minorities during the Progressive Age
- Analyze the changing role of the U.S. president during the Progressive Age
- Explain the causes and effects of American expansion during the late 1800s and early 1900s including how U.S foreign policy affected foreign relations during the early 1900s
- Analyze the pros and cons of American imperialism
- Describe the U.S involvement in other countries including the causes and effects of the Spanish-American war and the expansion in East Asia

2. Progressive Era and American Empire Test

14. World War I

1. From Neutrality to War

- Identify factors leading to World War I
- Identify the reason for the initial declaration of neutrality by the United States
- Trace and cite the shift from the United States' neutrality to engagement in World War I using primary and secondary sources

2. Americans in the Trenches

- Identify the impact of new military technology on World War I
- Interpret primary sources, such as letters and memoirs, to infer the perspectives of American soldiers during World War I
- Identify and compare the experiences of Americans who served abroad during World War I

3. The Home Front

- Interpret primary sources to assess the role of U.S. and foreign propaganda in World War I
- Identify and evaluate social changes women and African Americans experienced as a result of World War I
- Identify the effects of World War I on working conditions and organized labor in the United States
- Identify the different war measures the United States government instituted during World War I

4. Wilson and Peace

- Identify U.S. military contributions to the Allied victory in World War I
- Identify the causes and effects of Woodrow Wilson's Fourteen Points
- Identify and explain the U.S. response to the Treaty of Versailles and League of Nations

5. Aftermath of World War

- Categorize social, economic, and political changes in the United States following World War I
- Compare responses to challenges faced by the United States after World War I
- Identify and analyze how the outcome of World War I shaped the international role of the United States
- Trace the impact of World War I on Prohibition and women's suffrage

15. Age of Empire Portfolio

1. Age of Empire Portfolio

- Identify arguments for and against U.S. imperialism

2. Point of View and Bias

- Analyze excerpts from primary sources
- Identify point of view and bias in sources
- Prepare for a debate

3. Age of Empire Portfolio Directions

- Analyze primary sources for point of view and bias
- Identify pro-imperialist and anti-imperialist arguments
- Write notes for a point-counterpoint debate on American imperialism

16. The Roaring Twenties

1. Return to Normalcy

- Compare and contrast the policies and actions of Warren Harding and Calvin Coolidge
- Identify the impact of economic and foreign policies on the U.S. during the 1920s
- Identify and sequence significant events in American politics during the 1920s

2. A Booming Economy

- Identify the impact of Charles Lindbergh on the aviation industry in the United States during the 1920s
- Interpret and analyze primary and secondary sources related to radio in the 1920s
- Identify and interpret the impact of new consumer products and advertising on the United States during the 1920s
- Identify the impact of Henry Ford on the automobile industry
- Compare and contrast car manufacturing before and after the introduction of the moving assembly line

3. Backlash Against Change

- Identify nativism and similar responses to immigration and social changes during the 1920s
- Identify the significance of the resurgence of the Ku Klux Klan during the 1920s
- Identify the factors that influenced the Scopes Trial and its outcome

4. Flappers and the New Woman

- Identify the changing role of women in the 1920s
- Identify the causes and effects of the Nineteenth Amendment
- Interpret and analyze primary sources related to the American suffrage movement

5. The Jazz Age

- List the causes and effects of the Great Migration on culture and regions in the United States
- Identify important figures from the Harlem Renaissance and their contributions
- Identify the origins of jazz as a uniquely American art form
- Identify and evaluate the relationship between the arts and social and political changes

6. The Lost Generation

- Identify the effects of Prohibition on American society during the 1920s
- Identify key American authors active during the 1920s
- Distinguish and analyze how writing associated with the Lost Generation reflected the 1920s

17. World War I and The Roaring Twenties Test

1. World War I and the Roaring Twenties Review

- Summarize the involvement of the U.S in World War I including how the U.S mobilized to enter the war and how the war affected Americans at home
- Explain the role of the U.S in the end of World War I and the political, cultural, and social challenges and changes the U.S. experienced as a result of World War I
- Summarize the key political and economic developments that shaped the 1920s
- Describe the causes and effects of the women’s suffrage movement in the 1910s and 1920s
- Analyze responses to immigration and social change during the 1920s

2. World War I and the Roaring Twenties Test

18. Semester A Exam

1. Semester A Exam Review

- Describe the political, economic and social events of the United States from American Revolution through Reconstruction
- Describe the causes and effects of the political, economic, technological and social changes that took place in the United States from the Second Industrial Revolution through the Roaring Twenties
- Analyze the foreign and domestic policies from the Second Industrial Revolution through the Roaring Twenties including but not limited to American Indian policies, immigration laws, Spanish-American War, World War I
- Explain the impact changes in the United States from the Second Industrial Revolution through the Roaring Twenties had on American Indians, women, minorities and immigrants
- Summarize the impact of executive and legislative policies on the American people from the Second Industrial Revolution through the early 1900s

2. Semester A Exam

SEMESTER B

1. Course Overview

1. United States History

2. Great Depression

1. Causes of the Great Depression

- Identify Herbert Hoover’s accomplishments in the first year of his presidency
- Identify and explain the causes and effects of the stock market crash of 1929

- Trace the causes that led to financial collapse in industries and high unemployment
 - Identify the factors that made the Great Depression a worldwide crisis
2. Responses to the Great Depression
 - Cite the aspects of Hoover's political philosophy that affected his response to the economic crisis
 - Identify and describe the Hoover administration's initial responses to the Great Depression
 - Compare the responses of private relief agencies and state and federal governments to the Great Depression
 - Identify the impact of Hoover's response to bonus march protests
 3. Effects of the Great Depression
 - Identify and describe the protests of unemployed workers and farmers
 - Identify relief efforts for impoverished Americans
 - Identify the impact of the Great Depression on African Americans
 - Cite examples of escapism in popular entertainment as a response to the Great Depression
 4. The Dust Bowl
 - Identify the farming practices that led to the economic downturn
 - Identify human and geographical factors that created the Dust Bowl
 - Identify the effects of the Great Depression and the Dust Bowl on American farm owners, tenants, and sharecroppers
 5. Legacy of the Great Depression
 - Identify public opinion of President Hoover
 - Identify the outcomes of the Smoot-Hawley Tariff
 - Identify the political impact of unemployment on the election of 1932
 - Identify and evaluate Hoover's role in the Great Depression

3. **New Deal**

1. Roosevelt's New Deal
 - Identify the leadership and communication skills of Franklin Roosevelt
 - Identify the key events associated with the 1932 election and inauguration
 - Cite evidence from Roosevelt's inaugural address that outlines his recovery plan
 - Identify similarities between Progressivist and New Deal policies
 - Identify the legislation enacted during Franklin Roosevelt's first 100 days as president
2. Impact of the New Deal
 - Identify the benefits and drawbacks of the Agricultural Adjustment Administration (AAA) to the farming industry
 - Identify and describe the impact of New Deal programs on organized labor
 - Identify the New Deal policies enacted to protect the environment
3. The Second New Deal
 - Contrast the first and second New Deals
 - Identify and discuss the effectiveness of New Deal policies

- Identify and analyze primary sources to identify the arguments of New Deal critics
- Identify political challenges to Roosevelt's leadership and New Deal programs

4. Work and Culture

- Identify the impact of the Works Progress Administration (WPA) on the American workforce
- Identify and evaluate the U.S. government's role in promoting artistic expression during the Great Depression
- Cite examples from the Farm Security Administration (FSA) photography project and other sources of the effects of the Great Depression on Americans
- Identify the ways in which the Great Depression influenced art and literature of the 1930s

5. The New Deal's Legacy

- Identify and evaluate the changing role of the federal government during the New Deal
- Identify the consequences of New Deal policies
- Identify the impact of New Deal policies on women and minorities
- Identify the impact and legacy of Eleanor Roosevelt as First Lady

4. The Great Depression and New Deal Test

1. The Great Depression and New Deal Review

- Evaluate the causes and effects of the Great Depression and Dust Bowl
- Analyze President Hoover and President Franklin Roosevelt's effectiveness during the Great Depression
- Describe the effects of the Great Depression and the New Deal policies on Americans
- Explain the purposes of New Deal policies and the effectiveness of the first and second New Deals
- Assess the long-term impact of New Deal programs

2. The Great Depression and New Deal Test

5. World War II

1. Aggression and Appeasement

- Identify factors leading to the rise of fascism, national socialism, and communism after World War I
- Cite and describe the aggressive actions by regimes in Europe and Asia in the 1930s
- Identify the impact of the failures of the British policy of appeasement

2. Neutrality and Engagement

- Sequence the events of the early years of World War II in Europe
- Classify the causes and effects of American isolationism during the 1930s and the effect this policy had on America's war preparation
- Identify President Roosevelt's efforts to support nations fighting Nazi Germany
- Identify and describe the attack on Pearl Harbor and the United States' response

3. Fighting on the Home Front

- Identify how the U.S. economy mobilized in response to World War II
- Identify the impact that WWII had on women and minorities in the U.S.
- Identify the effects of WWII on civil liberties for Japanese Americans and others

- Cite primary sources that demonstrate the impact of WWII on Americans
- Interpret the U.S. government's use of propaganda in gaining support and cooperation for war efforts
- Determine the impact of accelerated African American migration in preparation for World War Two.
- Analyze the social and economic consequences of the war on Native Americans.

4. Invasion of Europe

- Locate the major battles of World War II on a map and identify territorial expansion of the Allies and Axis
- Cite and identify the contributions of the Allies' military leaders
- Trace the planning and impact of the Allies' D-Day invasion in France
- Identify and analyze Hitler's "final solution" and the Allies' responses to the Holocaust and war crimes
- Identify the outcomes of the Yalta Conference

5. War in the Pacific

- Identify significant battles and strategies in the Pacific theater during WWII
- Categorize the impact of WWII on science, medicine, nuclear physics, and technology, including weaponry, synthetic fibers, and television
- Identify the reasons President Truman decided to drop the atomic bomb on Japan
- Cite and describe the effects of the atomic bombs on Hiroshima and Nagasaki

6. World War II Portfolio

1. World War II Portfolio

- Identify the purpose of sources in studying history

2. Paraphrasing, Summarizing, and Quoting

- Paraphrase and summarize information from sources
- Quote from written sources

3. World War II Portfolio Directions

- Analyze primary and secondary sources
- Paraphrase, summarize, and quote from primary and secondary sources

7. The Cold War

1. The U.S. After World War

- Identify the efforts used to reintegrate veterans into society following World War II
- Identify the social, economic, and educational changes and policies following World War II
- Compare and evaluate the economic prosperity and inequality between ethnic groups and social classes
- Cite the causes and effects of demographic changes throughout the United States

2. The Cold War Begins

- Identify the reasons for the collapse of the alliance between the United States and the Soviet Union following World War II
- Trace the development of the United States as a superpower

- Discuss the origins, motives, and effects of Truman’s and Eisenhower’s foreign policies during the Cold War
 - Locate on a map areas of conflict during the Cold War
 - Identify the causes and effects of the conflicts in Africa, Latin America, Middle East, and Europe
3. China and the Korean War
- Sequence the events that led to communism in China
 - Trace the development of containment policies in Asia after World War II
 - Identify and describe the causes and effects of the Korean War
 - Identify the successes and long-term impact of the Korean War
4. The Cold War Intensifies
- Identify the causes and effects of the space and arms race between the United States and the Soviet Union
 - Identify and compare the ways the federal government opposed communism in the United States
 - Interpret primary and secondary sources to identify the fear of communism and nuclear warfare during the Second Red Scare
5. Cultural Transformation in the 1950s
- Identify and cite the economic, political, and social impact of the changing status and roles of American women after World War II through the 1950s
 - Identify the causes and effects of the changes to the nuclear family in the United States after World War II through the 1950s
 - Identify the different forms of and trends in American popular culture and their effects on individuals and society after World War II through the 1950s
6. The Civil Rights Movement Begins
- Identify and analyze political movements to obtain greater civil rights for African Americans, Latin Americans, and Asian Americans during the 1950s
 - Identify the impact of court cases and legislation during the early civil rights movement in the 1950s
 - Identify the changes in and impact of federal American Indian policy, including sovereignty, land ownership, citizenship, education, and religious freedom after World War II through the 1960s

8. World War II and The Cold War Test

1. World War II and the Cold War Review
- Evaluate the rise and impact of totalitarianism in Europe and Asia after World War I
 - Describe the causes, events and impact of the United States' full involvement in World War II
 - Describe the economic, social and political changes in the United States after World War II
 - Evaluate the origins and consequences of the Cold War
 - Trace the origins of the civil rights movement
2. World War II and the Cold War Test

9. Civil Rights

1. The Fight for Equality

- Identify forms of segregation minorities faced during the 1960s
 - Identify the goals, approaches, and successes of the civil rights movement
 - Interpret and compare Martin Luther King Jr.'s "Letter from Birmingham Jail" and "I Have a Dream" speech
 - Identify Americans who collaborated in the civil rights movement
2. The End of Segregation
- Identify and differentiate methods used by the federal government to end segregation
 - Identify and describe the impact of federal laws to end segregation
 - Identify a range of responses to desegregation from Americans
3. Civil Rights Tactics
- Trace the development of the Black Power movement
 - Identify the leaders, goals, and impacts of the Black Power movement
 - Compare approaches to achieve civil rights including peaceful marches and calls for the use of force
 - Identify the impact of Dr. Martin Luther King Jr.'s and Malcolm X's assassinations on the civil rights movement
4. The Presidencies of Kennedy and Johnson
- Identify and describe the goals, successes, and impact of domestic policies during John F. Kennedy's administration
 - Identify the impact of major foreign events, issues, and policies of John F. Kennedy's administration
 - Identify and describe the goals, limitations, and impact of domestic policies during Lyndon B. Johnson's administration
 - Identify the impact of major foreign events, issues, and policies of the Lyndon B. Johnson administration
 - Identify the causes and effects of scientific and technological advancements and transformations during the 1960s
5. Social Change in the 1960s
- Trace and identify the changing roles of women in society
 - Identify and analyze the significance of key decisions of the Warren Court in establishing civil rights and civil liberties
 - Identify the reasons for and impact of the rise of an American counterculture in the 1960s
 - Trace the development of the environmental movement in the 1960s

10. Civil Rights Timeline Portfolio

1. Creating Timelines
 - Identify purpose of timelines in studying history
2. APA Citations and Documentation
 - Cite and document sources using APA style
 - Identify examples of plagiarism in text
3. Civil Rights Timeline Portfolio Directions
 - Create a timeline of significant developments of the U.S. Civil Rights movement

- Apply correct APA citations to supporting sources

11. The Vietnam War

1. The Presidency of Richard Nixon

- Identify President Richard Nixon's foreign policies
- Identify and evaluate domestic policies and challenges during Richard Nixon's administration
- Compare Richard Nixon's and Lyndon Johnson's social and economic policies
- Cite the impact of President Nixon's domestic policies on different groups of Americans
- Identify and sequence events leading up to Richard Nixon's resignation

2. The Vietnam War

- Trace and compare U.S. involvement in Vietnam during the presidencies of Eisenhower, Kennedy, Johnson, and Nixon
- Identify the significance and effect of key events during the Vietnam War
- Cite and identify the impact of the U.S. media during the Vietnam War
- Identify the causes and effects of the development of the U.S. anti-war movement
- Sequence and describe the events that led to the end of the Vietnam War

3. The Presidencies of Gerald Ford and Jimmy Carter

- Identify factors that contributed to President Gerald Ford's pardon of Richard Nixon
- Identify the impact of President Gerald Ford's foreign policies
- Identify and describe the domestic policies and challenges during Ford's administration
- Identify the impact of President Jimmy Carter's foreign policies
- Identify domestic policies and challenges during Jimmy Carter's administration

4. More Social Changes

- Identify the successes and limitations of the U.S. environmental movement in the 1970s
- Identify the characteristics and social impact of American counterculture movements in the late 1960s through the 1970s
- Interpret and analyze primary and secondary sources related to counterculture movements in the United States

5. The Civil Rights Movement Continues

- Identify and cite the goals, methods, and successes of the women's movement during the late 1960s through the 1970s
- Identify and cite the goals and successes of Latino rights movements of the late 1960s through the 1970s
- Identify the goals and significant events related to Native American civil rights in the late 1960s through the 1970s

12. Civil Rights and The Vietnam War Test

1. Civil Rights and the Vietnam War Review

- Analyze the goals, successes and impact of the civil rights movement
- Describe the foreign and domestic policies during John F. Kennedy, Lyndon B. Johnson, Richard Nixon, Gerald Ford and Jimmy Carter's presidencies
- Evaluate the causes and effects of cultural changes during the 1960s and 1970s

- Describe the goals and success of the civil rights movement in the 1960s and 1970s
- Evaluate the causes and effects of the Vietnam War

2. Civil Rights and the Vietnam War Test

13. Reagan, Bush, and Clinton: 1980–2000

1. Ronald Reagan and Cultural Shifts

- List the reasons for and the significance of the growth of the conservative movement
- Identify the goals and motives of key organizations and individuals of the conservative movement
- Identify the humanitarian social goals, successes, and limitations of citizens in addressing social issues during the 1980s
- Identify the goals, successes, and limitations of the government in addressing social issues during the 1980s

2. Reagan’s Domestic Policies

- Identify Ronald Reagan’s economic policies and how they differed from previous administrations
- Trace and evaluate the changing role of government during Ronald Reagan’s administration
- Identify the effects of domestic policies on Americans

3. Reagan’s Foreign Policies

- Compare Ronald Reagan’s Cold War policies to those of previous administrations
- Identify and describe the reasons for, consequences of, and controversies surrounding the United States’ involvement in foreign conflicts
- Identify and cite the policies during Reagan’s administration that contributed to the end of the Cold War
- Identify the role of the United States in international organizations during Reagan’s administration

4. The Presidency of George H. W. Bush

- Identify goals, successes, and limitations of domestic and foreign policies during George H. W. Bush’s administration
- Identify the reasons for the collapse of the Soviet Union and the resulting challenges
- Trace and evaluate the developments in the Middle East that affected United States foreign policy during George H. W. Bush’s administration
- Identify and compare the roles of the government and citizens in addressing social issues during George H. W. Bush’s administration

5. The Presidency of Bill Clinton

- List the reasons why Bill Clinton won the presidency in 1992
- Identify and describe the goals, achievements, and limitations of Bill Clinton’s domestic and economic policies
- Identify the impact of new technologies on society
- Identify the effects of globalization on the United States during Bill Clinton’s presidency

6. Clinton’s Legacy

- Identify the effects of the domestic and foreign terrorist attacks on the United States in the 1990s

- Identify and evaluate the role of the United States in global conflicts during Bill Clinton’s administration
- Sequence the events of Bill Clinton’s impeachment
- Identify the results of the 2000 presidential election and the controversy surrounding it

14. Change Over Time Portfolio

1. Change Over Time Portfolio
 - Analyze change over time
2. Writing a Research Paper
 - Recognize how to organize and write a research paper
3. Change Over Time Portfolio Directions
 - Write a research paper

15. A New Century

1. The War on Terror
 - Identify and sequence the events of the September 11, 2001, terrorist attacks
 - Identify and evaluate the goals and challenges of the wars in Afghanistan and Iraq
 - Identify the provisions, impact, and effectiveness of federal policies on foreign and domestic terrorism
 - Trace how the September 11, 2001, terrorist attacks changed American domestic and international policies
2. The Presidencies of Bush and Obama
 - Identify and categorize the political and economic goals, challenges, and successes during George W. Bush’s administration
 - Identify the historical significance of the 2008 presidential election
 - Identify and categorize the political and economic goals, challenges, and successes during Barack Obama’s administration
 - Identify the influence of special-interest groups, political parties, and third parties on the changing political landscape and culture during the twenty-first century
3. Global Economy
 - Identify and evaluate the role of the United States in the global economy
 - Trace how economics and technological innovations have contributed to the rise of globalization
 - Identify and evaluate the influence of the mass media on national and international politics and culture
 - Identify the impact of globalization on U.S. culture, economics, politics, and foreign policy
4. Global Relations
 - Identify and categorize the causes and effects of the major foreign policy positions of the United States during the twenty-first century
 - Identify the United States’ response to foreign conflicts during the twenty-first century
 - Identify how dependence on energy and foreign oil has shaped United States foreign policy
 - critique how cyberwarfare has influenced American foreign policy, elections, and commerce.
5. Culture, Technology, and Society

- List the scientific and technological advances of the twenty-first century
- Identify the impact of technological changes on society
- Identify and describe the increasing role of women and minorities in American society
- Identify changes in immigration policies and attitudes

16. The 1980s–Early Twenty-First Century Test

1. The 1980s–Early Twenty-First Century Review

- Evaluate the social, political, and economic issues during the late twentieth and early twenty-first century
- Describe the foreign and domestic policies during Ronald Reagan, George H.W. Bush, William Clinton, George W. Bush, and Barack Obama's presidencies
- Evaluate the causes and effects of cultural changes during the late twentieth and early twenty-first century
- Describe how Americans have responded to technological and societal changes in the twentieth and early twenty-first century

2. The 1980s–Early Twenty-First Century Test

17. Semester B Exam

1. Semester B Exam Review

- Describe the political, economic and social events of the United States from The Great Depression through the early 2000s
- Analyze the executive and legislative policies from the Great Depression through the early 2000s
- Explain the impact changes in the United States from the Great Depression through the early 2000s had on American Indians, women, minorities and immigrants
- Describe the causes and effects of foreign conflicts including but not limited to World War II, The Cold War, Vietnam War, Gulf War
- Analyze the impact of and responses to economic growth and decline from the Great Depression through the early 2000s
- Evaluate the goals, successes and challenges of major social movements in the twentieth century

2. Semester B Exam

US History Honors

Honors U.S. History

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This course examines social, economic, historical, and political change in the United States from the birth of the country to recent events. Through interactive activities, discussions, charts, timelines, primary sources, and maps, students will explore key events, patterns, and figures that shaped American history and culture. Students will evaluate important foundational documents such as the Declaration of Independence and the Constitution. The course will also investigate the changing relationship of the United States to the rest of the world. In-depth study of the cause and effect of important events will help students better understand the historical context of key developments. Students will receive instruction in analyzing essential historical documents through portfolio items and lesson activities. Readings and activities will assist students in comparing time periods and in developing historical reasoning and critical thinking skills. Through this course, students will gain a broader understanding of the relevance of American history to their lives as well as develop a better understanding of the impact of key events on American culture and society.

1. Course Overview

1. United States History

2. A Country is Born

1. Colonial Discontent

- Compare and contrast the arguments regarding British colonial policies following the Seven Years' War
- Identify the acts Britain imposed on the American colonies
- Classify the American colonists' responses to British acts in the mid-1700s
- Interpret different perspectives about the Boston Massacre

2. Declaring Independence

- Classify arguments for and against the American colonies declaring independence from England
- Identify the theories supporting the ideals outlined in the Declaration of Independence
- Sequence the important events leading up to the signing of the Declaration of Independence

3. Give Me Liberty!

- Identify the important events and people of the American Revolution
- Identify causes and effects of issues that arose in the American colonies during the American Revolution
- Cite how the involvement of different countries impacted the outcome of the American Revolution

- Sequence the events at the end of the Revolutionary War and identify the impact of the Treaty of Paris

4. Social Awakenings

- Compare and contrast the ideals and experiences of colonists and groups such as women, Native Americans, and African Americans during the American Revolution
- Identify and analyze how the ideals of the American Revolution affected social structures in the United States
- Identify the views and roles of loyalists and patriots during the American Revolution

5. Articles of Confederation

- List the strengths and weaknesses of the Articles of Confederation
- Identify the impact of the Northwest Ordinance
- Identify the causes and effects of Shays's Rebellion
- Categorize the economic issues facing the United States after the American Revolution

6. Constitutional Convention and the Constitution

- Identify the reason for the Constitutional Convention
- Identify and analyze the major compromises reached during the Constitutional Convention
- Compare and contrast the Federalist and Anti-Federalist arguments
- Identify the key principles outlined in the Constitution and the Bill of Rights
- Identify the impact the Declaration of Independence on the development of the Constitution and American democracy

3. A Nation Grows

1. A New Nation

- List the factors contributing to the development of political parties between 1790–1820
- Identify and describe the major policies and political developments of the presidencies of George Washington, John Adams, and Thomas Jefferson
- Trace the expansion of the U.S. and federal government between 1790–1820
- Identify and interpret the relationship between the Corps of Discovery and Native American tribes

2. Early Growth

- Identify and describe the major policies and political developments of the presidencies of James Monroe and James Madison
- Identify how the rise of manufacturing in the early 1800s led to new inventions, technologies, and changes in transportation
- Identify and compare the effect industrialization had on the different groups of people in society in the early 1800s
- Identify the causes and effects of immigration from Northern Europe to the United States in the early to mid-1800s
- Distinguish how economic expansion in the early 1800s affected the American North, South, and West

3. Jacksonian Democracy

- Trace the changes in the United States political system, including the expansion of democracy and development of new political parties, during the early nineteenth century

- Identify and evaluate the economic and social policies of Andrew Jackson’s presidency
- Identify the impact of American expansion during the early 1800s on American Indians
- Identify the impact of expansion during James Polk’s presidency including the Texas annexation, Mexican-American War, and acquisition of Oregon
- Compare the American response to the acquisition of new territory by the North, South, and West

4. The Effects of Slavery

- Identify and compare the economies of the American North and South during the first half of the nineteenth century
- Compare the role of slavery in the economies of the American North and South during the first half of the nineteenth century
- Trace the growing economic differences between the American North and South during the first half of the nineteenth century
- Identify and describe the lives of enslaved and free African Americans during the first half of the nineteenth century
- Identify and describe primary sources related to the conditions of slavery

5. Tumult and Transformations

- Identify the causes and effects of the Second Great Awakening in the United States
- Identify the goals, methods, and achievements of antebellum reform movements
- Identify the beliefs of transcendentalists and examples of their work and influence
- Compare and contrast the methods of abolitionist groups
- Identify the causes and effects of American slave resistance and rebellions prior to the Civil War

6. Compromises and Conflict

- Compare and contrast responses to slavery, tariffs, and states’ rights in the American North and South
- Identify and describe compromises on slavery during American expansion
- Identify the impact of the Supreme Court’s Scott v. Sandford decision
- Trace the development of the Republican Party in the U.S.
- Identify the causes and effects of John Brown’s raid at Harpers Ferry

4. A New Nation and Its Growing Pains Test

1. A New Nation and Its Growing Pains Review

- Describe the people, events, ideals and causes of the American Revolution and the social economic and political effects of the American Revolution
- Describe the ideals outlined in the Declaration of Independence, American Constitution and Bill of Rights
- Describe the economic, domestic, and foreign policies of presidents during the late 18th and early 19th century
- Describe the political, social and economic characteristics and differences of the North, South and West including the growing sectional tension over the issue of slavery
- Summarize the lives of free and enslaved African Americans and the impact of the Second Great Awakening on the development of the abolition movement

2. A New Nation and Its Growing Pains Test

5. **Civil War and Reconstruction**

1. The Civil War

- Identify key events that led to the Civil War
- Cite and analyze reasons for the Confederate secession from the United States
- Compare the strategies and capabilities of the North and South during the Civil War
- Identify the purpose and effect of the Emancipation Proclamation
- Interpret the meaning and intent of Abraham Lincoln's first inaugural address

2. The Effect of the Civil War

- Identify the efforts of women at home and on the battlefield during the Civil War
- Compare and contrast the conditions of African American soldiers in the Civil War
- Compare the manner in which the North and South organized armies for the Civil War
- Identify the effect expanded government power had on the economy and population during the Civil War

3. The Civil War Ends

- Identify the importance of the Battle of Gettysburg, the Battle of Vicksburg and other key Civil War battles
- Cite significant parts of the Gettysburg Address
- Identify the causes and effects of Sherman's March to the Sea
- Identify the effect of Lincoln's Second Inaugural Address
- Identify significant factors that contributed to the end of the Civil War
- Compare and contrast Lincoln's first and second inaugural addresses

4. Plans for Reconstruction

- Compare and contrast the Reconstruction plans of Abraham Lincoln, Andrew Johnson, and Congress
- Identify the causes and effects of Reconstruction
- Identify the causes and effects of Andrew Johnson's impeachment
- Identify and analyze the purposes and effects of the Thirteenth, Fourteenth, and Fifteenth Amendments

5. The Effects of Reconstruction

- Identify and analyze the purpose and impact of the Freedmen's Bureau
- Identify the effects of the Reconstruction on the South and African Americans
- Identify the causes and effects of Jim Crow laws
- Identify the causes and impact of the Compromise of 1877

6. **Industrialization and Westward Expansion**

1. Industrial Growth

- Identify and describe the economic, social, and political factors that led to industrialization in the late 1800s
- Identify technological innovations and inventions that contributed to industrial growth in the late 1800s

- Trace the emergence of consumer culture in the late 1800s
- Identify the purpose of a thesis and how to write one effectively

2. Big Business

- Identify and compare the leaders of the steel, finance, and railroad industries
- Trace the development of corporations, monopolies, and trusts in the late 1800s
- Identify and compare government responses to the rise of big business in the late 1800s
- Identify the impact of industrialization on the economy in the late 1800s

3. Workers and the Labor Movement

- Identify the impact of the Industrial Revolution on society and cite challenges workers experienced in the late 1800s
- Identify and describe the working conditions in factories
- Identify and compare the goals, leaders, and motivations of the Knights of Labor and the American Federation of Labor
- Identify the causes and effects of strikes including the Homestead Strike, Pullman Strike, and Haymarket Affair

4. Westward Expansion

- Identify and explain how the concept of Manifest Destiny and the romanticization of the West impacted westward expansion
- Identify how technological advancements, such as the Transcontinental Railroad, and the mining, agriculture, and railroad industries impacted westward expansion
- Compare the motivations of the different groups of settlers including farmers, cowboys, ranchers, and miners
- Identify the conflicts and challenges the different groups of settlers experienced
- Identify the environmental impacts of westward expansion

5. Westward Expansion and the American Indian

- Identify the impact the Homestead Act and Transcontinental Railroad had on American Indians
- Trace the development of federal Indian policies in the 1800s
- Categorize and identify the ways American Indians responded to westward expansion
- Identify and describe the causes and effects of the conflicts between American Indians and Americans during the 1800s
- Identify and evaluate the thesis of a given text

6. Immigrants and Minorities in the West

- Identify the factors leading to migration and immigration to the West in the late 1800s through the early 1900s
- Identify challenges Chinese and Hispanic immigrants faced in the West in the late 1800s through the early 1900s
- Compare the experience of African Americans and other settlers in the West

7. Labor Unions Portfolio

1. Effectiveness of Labor Unions

- Describe the effectiveness of labor unions in bringing about change

2. Cause and Effect

- Analyze primary and secondary sources
- Determine the causes and effects of events

3. Labor Unions Portfolio Directions

- Analyze primary and secondary sources about the Haymarket Affair and the Homestead and Pullman strikes
- Create a cause-and-effect chart
- Write an essay evaluating the effectiveness of the methods used in the Haymarket Affair, the Homestead Strike, and the Pullman Strike

8. Urbanization and the Gilded Age

1. Urbanization

- Identify the push and pull factors that led people to migrate from farms to cities in the late 1800s
- Identify how technological advancements contributed to the growth of cities in the late 1800s
- Contrast the living conditions of the poor and wealthy in the late 1800s
- List the challenges and benefits associated with urban living in the late 1800s
- Identify economic, social, and political responses to urbanization in the late 1800s

2. Cultural Changes in the Late 1800s

- Contrast the educational and social opportunities for different groups in American society in the late 1800s
- Identify the ways artists, journalists, and novelists depicted changes to American life in the late 1800s
- Identify important poets, novelists, and artists of the late 1800s
- Analyze a text or primary source and cite evidence to support a claim

3. European Immigration

- Compare different immigrant experiences by region and time period in the late 1800s
- Identify the ways immigrants acclimated to life in the United States in the late 1800s
- Identify and evaluate the challenges immigrants faced in the United States in the late 1800s
- Identify ways Americans responded to the growing number of immigrants in the late 1800s

4. The New South

- Trace the development of Jim Crow laws in the South
- Identify the impact of the Plessy v. Ferguson case
- Identify the experiences of African Americans in the years following the Civil War and Reconstruction
- Identify and cite evidence to support a claim

5. The Gilded Age

- Identify the causes and effects of political and economic corruption during the Gilded Age
- Identify the causes and impact of economic recessions in the late 1800s
- Identify political and economic reforms in the late 1800s
- Interpret political cartoons from the Gilded Age

6. The Rise of Populism

- Identify the impact of mechanized farming on farmers and the environment in the late 1800s
- Identify the economic, social, and political challenges American farmers faced in the late 1800s
- Trace the development of and impact of farmers' movements in the late 1800s
- Identify the factors that contributed to the rise and decline of the Populist movement
- Categorize and describe the successes and failures of populism in the late 1800s
- Analyze a text or primary source and cite evidence in support of a claim

9. The Civil War-The Gilded Age Test

1. The Civil War - The Gilded Age Review

- Evaluate the political, economic and social causes and effects of the Civil War
- Summarize Reconstruction including the Reconstruction plans, policies, responses, successes and failures
- Describe the social, economic and political characteristics of the late 1800s including the causes and effects of Industrialization, conditions of workers, farmers, immigrants and minorities
- Trace the rise of labor and farm organizations and unrest in the late 1800s
- Summarize the factors that contributed to westward expansion during the 1800s and the impact of expansion on Native Americans, immigrants and minorities

2. The Civil War - The Gilded Age Test

10. Progressive Era

1. The Progressive Movement

- Identify the origins, goals, and key ideas of the Progressive movement
- Compare groups involved in the Progressive movement including muckrakers, intellectuals, and religious leaders
- Identify and describe the social problems Progressives addressed
- Identify and evaluate the efforts of Progressives to accomplish change
- Interpret and analyze primary sources related to the Progressive Age
- Identify the author's purpose for writing

2. Progressive Reforms

- Identify and describe state-level direct democracy reforms
- Identify the methods Progressives used to combat inefficiency and corruption in politics
- Trace the development of radical Progressives and compare their goals to those of moderate Progressives
- Identify the causes, course, and consequences of the labor movement during the Progressive Age

3. Progressive Women

- Trace the origins of the women's movement
- Identify and describe progressive efforts to reform society and morality
- Identify the methods progressive women used to gain passage of the Nineteenth Amendment
- Differentiate the goals of African American, Latin American, and immigrant women to those of white progressive women

4. Fighting Discrimination

- Identify the effect discriminatory laws had on the development of the National Association for the Advancement of Colored People (NAACP)
 - Identify and compare the goals and strategies of African American leaders during the Progressive Age
 - Identify the impact of African American leaders and evaluate the extent to which they met their goals during the Progressive Age
5. Progressive Presidents
- Identify and evaluate the political, social, and economic reforms during Theodore Roosevelt's presidency
 - Identify how Theodore Roosevelt expanded the role of presidential power
 - Identify and evaluate the political, social, and economic reforms during William Howard Taft's presidency
 - Compare and contrast the progressive reforms of Theodore Roosevelt and William Howard Taft
 - Identify the Supreme Court's role during the Progressive Movement
 - Analyze a primary source to identify the author's purpose
6. The Legacy of the Progressive Era
- Identify the impact of the 1912 presidential election on the Progressive movement
 - Compare different political ideas within the Progressive movement
 - Identify and evaluate the political, social, and economic reforms during Woodrow Wilson's presidency
 - Identify and evaluate the positive and negative effects of the Progressive Era

11. Progressive Era Portfolio

1. Listening to Multiple Perspectives
 - Identify the purpose of studying multiple points of view in history
 - Analyze primary and secondary sources
2. Comparing and Contrasting
 - Use a Venn diagram to compare and contrast Booker T. Washington and W. E. B. Du Bois
 - Identify compare-and-contrast essay styles
 - Understand the purpose of transition words and phrases
3. Progressive Era Portfolio Directions
 - Analyze primary and secondary sources
 - Write an essay evaluating to what extent the models of achieving racial equality proposed by Booker T. Washington and W. E. B. Du Bois were successful

12. American Empire

1. American Imperialism
 - Identify and categorize key factors that influenced American imperialism
 - Identify the causes and effects of American imperialism at home and abroad
 - Identify the contributions of Frederick Jackson Turner and Alfred Thayer Mahan in the creation of an American empire
2. The Spanish-American War

- Identify the causes, events, and outcomes of the Spanish-American War
 - Compare Americans' differing opinions on empire following the Spanish-American War
 - Using primary sources, cite the impact of yellow journalism on the Spanish-American War
 - Identify and explain the influence of the Spanish-American War on the emergence of the United States as a world power
 - Trace the acquisition of new territories after the Spanish-American War
 - Analyze a primary source to identify the author's point of view
3. The United States and East Asia
- Identify how economic power helped to expand American influence in China
 - Identify and describe how American foreign policy was impacted by the spheres of influence in China
 - Identify and classify causes and effects of the Philippine-American War
 - Identify the reasons for the Open Door policy
4. President Theodore Roosevelt
- Identify the impact of the Roosevelt Corollary on foreign relations
 - Identify the impact of Theodore Roosevelt's big stick foreign policy
 - Identify the United States' role in the Panama Revolution and the building of the Panama Canal
 - Using primary and secondary sources, distinguish between American opinions regarding Theodore Roosevelt's foreign policies
 - Identify and describe the United States' role in ending the war between Russia and Japan
5. Moral Diplomacy and Dollar Diplomacy
- Identify the economic tactics William Howard Taft used to protect American interests
 - Identify the impact of Woodrow Wilson's moral diplomacy
 - Compare and contrast the foreign policies of Theodore Roosevelt, William Howard Taft, and Woodrow Wilson
 - Analyze a primary source to identify the author's point of view
6. The Legacy of American Imperialism
- Identify and analyze the consequences of imperialism
 - Compare and evaluate the arguments of interventionists and noninterventionists of the period
 - Interpret the differing points of views concerning imperialism using political cartoons

13. Progressive Era and American Empire Test

1. Progressive Era and American Empire Review
- Analyze the effectiveness of progressive reformers in enacting change and the role of women and minorities during the Progressive Age
 - Analyze the changing role of the U.S. president during the Progressive Age
 - Explain the causes and effects of American expansion during the late 1800s and early 1900s including how U.S foreign policy affected foreign relations during the early 1900s
 - Analyze the pros and cons of American imperialism
 - Describe the U.S involvement in other countries including the causes and effects of the Spanish-American war and the expansion in East Asia

2. Progressive Era and American Empire Test

14. World War I

1. From Neutrality to War

- Identify factors leading to World War I
- Identify the reason for the initial declaration of neutrality by the United States
- Trace and cite the shift from the United States' neutrality to engagement in World War I using primary and secondary sources

2. Americans in the Trenches

- Identify the impact of new military technology on World War I
- Interpret primary sources, such as letters and memoirs, to infer the perspectives of American soldiers during World War I
- Identify and compare the experiences of Americans who served abroad during World War I
- Identify the factors historians consider to determine the audience of a source

3. The Home Front

- Interpret primary sources to assess the role of U.S. and foreign propaganda in World War I
- Identify and evaluate social changes women and African Americans experienced as a result of World War I
- Identify the effects of World War I on working conditions and organized labor in the United States
- Identify the different war measures the United States government instituted during World War I
- Analyze primary sources to describe the relationship between a source and its audience

4. Wilson and Peace

- Identify U.S. military contributions to the Allied victory in World War I
- Identify the causes and effects of Woodrow Wilson's Fourteen Points
- Identify and explain the U.S. response to the Treaty of Versailles and League of Nations

5. Aftermath of World War

- Categorize social, economic, and political changes in the United States following World War I
- Compare responses to challenges faced by the United States after World War I
- Identify and analyze how the outcome of World War I shaped the international role of the United States
- Trace the impact of World War I on Prohibition and women's suffrage

15. Age of Empire Portfolio

1. Age of Empire Portfolio

- Identify arguments for and against U.S. imperialism

2. Point of View and Bias

- Analyze excerpts from primary sources
- Identify point of view and bias in sources
- Prepare for a debate

3. Age of Empire Portfolio Directions

- Analyze primary sources for point of view and bias
- Write notes for a point-counterpoint debate on American imperialism
- Write a debate between an imperialist and a member of the Anti-Imperialist League

16. The Roaring Twenties

1. Return to Normalcy

- Compare and contrast the policies and actions of Warren Harding and Calvin Coolidge
- Identify the impact of economic and foreign policies on the U.S. during the 1920s
- Identify and sequence significant events in American politics during the 1920s

2. A Booming Economy

- Identify the impact of Charles Lindbergh on the aviation industry in the United States during the 1920s
- Interpret and analyze primary and secondary sources related to radio in the 1920s
- Identify and interpret the impact of new consumer products and advertising on the United States during the 1920s
- Identify the impact of Henry Ford on the automobile industry
- Compare and contrast car manufacturing before and after the introduction of the moving assembly line

3. Backlash Against Change

- Identify nativism and similar responses to immigration and social changes during the 1920s
- Identify the significance of the resurgence of the Ku Klux Klan during the 1920s
- Identify the factors that influenced the Scopes Trial and its outcome
- Define historical context and identify the questions historians ask to place a source in its historical context

4. Flappers and the New Woman

- Identify the changing role of women in the 1920s
- Identify the causes and effects of the Nineteenth Amendment
- Interpret and analyze primary sources related to the American suffrage movement
- Analyze primary and secondary sources to describe historical context

5. The Jazz Age

- List the causes and effects of the Great Migration on culture and regions in the United States
- Identify important figures from the Harlem Renaissance and their contributions
- Identify the origins of jazz as a uniquely American art form
- Identify and evaluate the relationship between the arts and social and political changes

6. The Lost Generation

- Identify the effects of Prohibition on American society during the 1920s
- Identify key American authors active during the 1920s
- Distinguish and analyze how writing associated with the Lost Generation reflected the 1920s

17. World War I and the Roaring Twenties Test

1. World War I and the Roaring Twenties Review

- Summarize the involvement of the U.S in World War I including how the U.S mobilized to enter the war and how the war affected Americans at home
- Explain the role of the U.S in the end of World War I and the political, cultural, and social challenges and changes the U.S. experienced as a result of World War I
- Summarize the key political and economic developments that shaped the 1920s
- Describe the causes and effects of the women’s suffrage movement in the 1910s and 1920s
- Analyze responses to immigration and social change during the 1920s

2. World War I and the Roaring Twenties Test

18. Semester A Exam

1. Semester A Exam Review

- Describe the political, economic and social events of the United States from American Revolution through Reconstruction
- Describe the causes and effects of the political, economic, technological and social changes that took place in the United States from the Second Industrial Revolution through the Roaring Twenties
- Analyze the foreign and domestic policies from the Second Industrial Revolution through the Roaring Twenties including but not limited to American Indian policies, immigration laws, Spanish-American War, World War I
- Explain the impact changes in the United States from the Second Industrial Revolution through the Roaring Twenties had on American Indians, women, minorities and immigrants
- Summarize the impact of executive and legislative policies on the American people from the Second Industrial Revolution through the early 1900s

2. Semester A Exam

Semester B Summary

This course examines social, economic, historical, and political change in the United States from the birth of the country to recent events. Through interactive activities, discussions, charts, timelines, primary sources, and maps, students will explore key events, patterns, and figures that shaped American history and culture. Students will evaluate important foundational documents such as the Declaration of Independence and the Constitution. The course will also investigate the changing relationship of the United States to the rest of the world. In-depth study of the cause and effect of important events will help students better understand the historical context of key developments. Students will receive instruction in analyzing essential historical documents through portfolio items and lesson activities. Readings and activities will assist students in comparing time periods and in developing historical reasoning and critical thinking skills. Through this course, students will gain a broader understanding of the relevance of American history to their lives as well as develop a better understanding of the impact of key events on American culture and society.

1. Course Overview

1. United States History

2. Great Depression

1. Causes of the Great Depression

- Identify Herbert Hoover’s accomplishments in the first year of his presidency
- Identify and explain the causes and effects of the stock market crash of 1929
- Trace the causes that led to financial collapse in industries and high unemployment
- Identify the factors that made the Great Depression a worldwide crisis

2. Responses to the Great Depression

- Cite the aspects of Hoover's political philosophy that affected his response to the economic crisis
- Identify and describe the Hoover administration's initial responses to the Great Depression
- Compare the responses of private relief agencies and state and federal governments to the Great Depression
- Identify the impact of Hoover's response to bonus march protests
- Identify the purpose of a thesis and how to write one effectively

3. Effects of the Great Depression

- Identify and describe the protests of unemployed workers and farmers
- Identify relief efforts for impoverished Americans
- Identify the impact of the Great Depression on African Americans
- Cite examples of escapism in popular entertainment as a response to the Great Depression

4. The Dust Bowl

- Identify the farming practices that led to the economic downturn
- Identify human and geographical factors that created the Dust Bowl
- Identify the effects of the Great Depression and the Dust Bowl on American farm owners, tenants, and sharecroppers

5. Legacy of the Great Depression

- Identify public opinion of President Hoover
- Identify the outcomes of the Smoot-Hawley Tariff
- Identify the political impact of unemployment on the election of 1932
- Identify and evaluate Hoover's role in the Great Depression
- Identify and evaluate the thesis of a given text

3. New Deal

1. Roosevelt's New Deal

- Identify the leadership and communication skills of Franklin Roosevelt
- Identify the key events associated with the 1932 election and inauguration
- Cite evidence from Roosevelt's inaugural address that outlines his recovery plan
- Identify similarities between Progressivist and New Deal policies
- Identify the legislation enacted during Franklin Roosevelt's first 100 days as president

2. Impact of the New Deal

- Identify the benefits and drawbacks of the Agricultural Adjustment Administration (AAA) to the farming industry
- Identify and describe the impact of New Deal programs on organized labor
- Identify the New Deal policies enacted to protect the environment

3. The Second New Deal

- Contrast the first and second New Deals
- Identify and discuss the effectiveness of New Deal policies

- Identify and analyze primary sources to identify the arguments of New Deal critics
- Identify political challenges to Roosevelt’s leadership and New Deal programs

4. Work and Culture

- Identify the impact of the Works Progress Administration (WPA) on the American workforce
- Identify and evaluate the U.S. government's role in promoting artistic expression during the Great Depression
- Cite examples from the Farm Security Administration (FSA) photography project and other sources of the effects of the Great Depression on Americans
- Identify the ways in which the Great Depression influenced art and literature of the 1930s
- Analyze a text or primary source and cite evidence to support a claim

5. The New Deal’s Legacy

- Identify and evaluate the changing role of the federal government during the New Deal
- Identify the consequences of New Deal policies
- Identify the impact of New Deal policies on women and minorities
- Identify the impact and legacy of Eleanor Roosevelt as First Lady
- Analyze a text or primary source and cite evidence to support a claim

4. **The Great Depression and New Deal Test**

1. The Great Depression and New Deal Review

- Evaluate the causes and effects of the Great Depression and Dust Bowl
- Analyze President Hoover and President Franklin Roosevelt’s effectiveness during the Great Depression
- Describe the effects of the Great Depression and the New Deal policies on Americans
- Explain the purposes of New Deal policies and the effectiveness of the first and second New Deals
- Assess the long-term impact of New Deal programs

2. The Great Depression and New Deal Test

5. **World War II**

1. Aggression and Appeasement

- Identify factors leading to the rise of fascism, national socialism, and communism after World War I
- Cite and describe the aggressive actions by regimes in Europe and Asia in the 1930s
- Identify the impact of the failures of the British policy of appeasement

2. Neutrality and Engagement

- Sequence the events of the early years of World War II in Europe
- Classify the causes and effects of American isolationism during the 1930s and the effect this policy had on America’s war preparation
- Identify President Roosevelt’s efforts to support nations fighting Nazi Germany
- Identify and describe the attack on Pearl Harbor and the United States’ response
- Identify and analyze the perspectives of those in favor of neutrality and engagement

3. Fighting on the Home Front

- Identify how the U.S. economy mobilized in response to World War II
- Identify the impact that WWII had on women and minorities in the U.S.
- Identify the effects of WWII on civil liberties for Japanese Americans and others
- Cite primary sources that demonstrate the impact of WWII on Americans
- Interpret the U.S. government's use of propaganda in gaining support and cooperation for war efforts
- Determine the impact of accelerated African American migration in preparation for World War Two.
- Analyze the social and economic consequences of the war on Native Americans.

4. Invasion of Europe

- Locate the major battles of World War II on a map and identify territorial expansion of the Allies and Axis
- Cite and identify the contributions of the Allies' military leaders
- Trace the planning and impact of the Allies' D-Day invasion in France
- Identify and analyze Hitler's "final solution" and the Allies' responses to the Holocaust and war crimes
- Identify the outcomes of the Yalta Conference

5. War in the Pacific

- Identify significant battles and strategies in the Pacific theater during WWII
- Categorize the impact of WWII on science, medicine, nuclear physics, and technology, including weaponry, synthetic fibers, and television
- Identify the reasons President Truman decided to drop the atomic bomb on Japan
- Cite and describe the effects of the atomic bombs on Hiroshima and Nagasaki
- Identify and analyze the perspectives of those for and against using atomic weapons

6. World War II Portfolio

1. World War II Portfolio

- Identify the purpose of sources in studying history

2. Paraphrasing, Summarizing, and Quoting

- Paraphrase and summarize information from sources
- Quote from written sources

3. World War II Portfolio Directions

- Analyze primary and secondary sources
- Paraphrase, summarize, and quote from sources
- Research and write about a topic

7. The Cold War

1. The U.S. After World War

- Identify the efforts used to reintegrate veterans into society following World War II
- Identify the social, economic, and educational changes and policies following World War II
- Compare and evaluate the economic prosperity and inequality between ethnic groups and social classes

- Cite the causes and effects of demographic changes throughout the United States

2. The Cold War Begins

- Identify the reasons for the collapse of the alliance between the United States and the Soviet Union following World War II
- Trace the development of the United States as a superpower
- Discuss the origins, motives, and effects of Truman's and Eisenhower's foreign policies during the Cold War
- Locate on a map areas of conflict during the Cold War
- Identify the causes and effects of the conflicts in Africa, Latin America, Middle East, and Europe

3. China and the Korean War

- Sequence the events that led to communism in China
- Trace the development of containment policies in Asia after World War II
- Identify and describe the causes and effects of the Korean War
- Identify the successes and long-term impact of the Korean War

4. The Cold War Intensifies

- Identify the causes and effects of the space and arms race between the United States and the Soviet Union
- Identify and compare the ways the federal government opposed communism in the United States
- Interpret primary and secondary sources to identify the fear of communism and nuclear warfare during the Second Red Scare
- Identify and analyze a primary source for the author's purpose

5. Cultural Transformation in the 1950s

- Identify and cite the economic, political, and social impact of the changing status and roles of American women after World War II through the 1950s
- Identify the causes and effects of the changes to the nuclear family in the United States after World War II through the 1950s
- Identify the different forms of and trends in American popular culture and their effects on individuals and society after World War II through the 1950s
- Identify and analyze a primary source for the author's purpose

6. The Civil Rights Movement Begins

- Identify and analyze political movements to obtain greater civil rights for African Americans, Latin Americans, and Asian Americans during the 1950s
- Identify the impact of court cases and legislation during the early civil rights movement in the 1950s
- Identify the changes in and impact of federal American Indian policy, including sovereignty, land ownership, citizenship, education, and religious freedom after World War II through the 1960s

8. World War II and The Cold War Test

1. World War II and the Cold War Review

- Evaluate the rise and impact of totalitarianism in Europe and Asia after World War I

- Describe the causes, events and impact of the United States' full involvement in World War II
- Describe the economic, social and political changes in the United States after World War II
- Evaluate the origins and consequences of the Cold War
- Trace the origins of the civil rights Movement

2. World War II and the Cold War Test

9. **Civil Rights**

1. The Fight for Equality

- Identify forms of segregation minorities faced during the 1960s
- Identify the goals, approaches, and successes of the civil rights movement
- Interpret and compare Martin Luther King Jr.'s "Letter from Birmingham Jail" and "I Have a Dream" speech
- Identify Americans who collaborated in the civil rights movement
- Analyze primary sources to identify and describe the relationship between a source and its audience

2. The End of Segregation

- Identify and differentiate methods used by the federal government to end segregation
- Identify and describe the impact of federal laws to end segregation
- Identify a range of responses to desegregation from Americans
- Analyze primary sources to identify and describe the relationship between a source and its audience

3. Civil Rights Tactics

- Trace the development of the Black Power movement
- Identify the leaders, goals, and impacts of the Black Power movement
- Compare approaches to achieve civil rights including peaceful marches and calls for the use of force
- Identify the impact of Dr. Martin Luther King, Jr.'s and Malcolm X's assassinations on the civil rights movement

4. The Presidencies of Kennedy and Johnson

- Identify and describe the goals, successes, and impact of domestic policies during John F. Kennedy's administration
- Identify the impact of major foreign events, issues, and policies of John F. Kennedy's administration
- Identify and describe the goals, limitations, and impact of domestic policies during Lyndon B. Johnson's administration
- Identify the impact of major foreign events, issues, and policies of the Lyndon B. Johnson administration
- Identify the causes and effects of scientific and technological advancements and transformations during the 1960s

5. Social Change in the 1960s

- Trace and identify the changing roles of women in society
- Identify and analyze the significance of key decisions of the Warren Court in establishing civil rights and civil liberties

- Identify the reasons for and impact of the rise of an American counterculture in the 1960s
- Trace the development of the environmental movement in the 1960s

10. Civil Rights Timeline Portfolio

1. Creating Timelines
 - Identify purpose of timelines in studying history
2. APA Citations and Documentation
 - Cite and document sources using APA style
 - Identify examples of plagiarism in text
3. Civil Rights Timeline Portfolio Directions
 - Create a timeline of significant developments of the civil rights movement in the United States
 - Write a letter explaining the causes that led up to an event in the civil rights movement
 - Apply correct APA citations to supporting sources

11. The Vietnam War

1. The Presidency of Richard Nixon
 - Identify President Richard Nixon's foreign policies
 - Identify and evaluate domestic policies and challenges during Richard Nixon's administration
 - Compare Richard Nixon's and Lyndon Johnson's social and economic policies
 - Cite the impact of President Nixon's domestic policies on different groups of Americans
 - Identify and sequence events leading up to Richard Nixon's resignation
2. The Vietnam War
 - Trace and compare U.S. involvement in Vietnam during the presidencies of Eisenhower, Kennedy, Johnson, and Nixon
 - Identify the significance and effect of key events during the Vietnam War
 - Cite and identify the impact of the U.S. media during the Vietnam War
 - Identify the causes and effects of the development of the U.S. anti-war movement
 - Sequence and describe the events that led to the end of the Vietnam War
3. The Presidencies of Gerald Ford and Jimmy Carter
 - Identify factors that contributed to President Gerald Ford's pardon of Richard Nixon
 - Identify the impact of President Gerald Ford's foreign policies
 - Identify and describe the domestic policies and challenges during Ford's administration
 - Identify the impact of President Jimmy Carter's foreign policies
 - Identify domestic policies and challenges during Jimmy Carter's administration
4. More Social Changes
 - Identify the successes and limitations of the U.S. environmental movement in the 1970s
 - Identify the characteristics and social impact of American counterculture movements in the late 1960s through the 1970s
 - Interpret and analyze primary and secondary sources related to counterculture movements in the United States
 - Analyze primary and secondary sources to identify and describe the historical context

5. The Civil Rights Movement Continues

- Identify and cite the goals, methods, and successes of the women’s movement during the late 1960s through the 1970s
- Identify and cite the goals and successes of Latino rights movements of the late 1960s through the 1970s
- Identify the goals and significant events related to Native American civil rights in the late 1960s through the 1970s
- Analyze primary and secondary sources to identify and describe the historical context

12. Civil Rights and The Vietnam War Test

1. Civil Rights and the Vietnam War Review

- Analyze the goals, successes and impact of the Civil Rights Movement
- Describe the foreign and domestic policies during John F. Kennedy, Lyndon B. Johnson, Richard Nixon, Gerald Ford and Jimmy Carter's presidencies
- Evaluate the causes and effects of cultural changes during the 1960s and 1970s
- Describe the goals and success of the civil rights movement in the 1960s and 1970s
- Evaluate the causes and effects of the Vietnam War

2. Civil Rights and the Vietnam War Test

13. Reagan, Bush, and Clinton: 1980–2000

1. Ronald Reagan and Cultural Shifts

- List the reasons for and the significance of the growth of the conservative movement
- Identify the goals and motives of key organizations and individuals of the conservative movement
- Identify the humanitarian social goals, successes, and limitations of citizens in addressing social issues during the 1980s
- Identify the goals, successes, and limitations of the government in addressing social issues during the 1980s
- Identify how historians determine the reliability of a source

2. Reagan’s Domestic Policies

- Identify Ronald Reagan’s economic policies and how they differed from previous administrations
- Trace and evaluate the changing role of government during Ronald Reagan’s administration
- Identify the effects of domestic policies on Americans
- Evaluate a source to determine its reliability

3. Reagan’s Foreign Policies

- Compare Ronald Reagan’s Cold War policies to those of previous administrations
- Identify and describe the reasons for, consequences of, and controversies surrounding the United States’ involvement in foreign conflicts
- Identify and cite the policies during Reagan’s administration that contributed to the end of the Cold War
- Identify the role of the United States in international organizations during Reagan’s administration

4. The Presidency of George H. W. Bush

- Identify goals, successes, and limitations of domestic and foreign policies during George H. W. Bush's administration
 - Identify the reasons for the collapse of the Soviet Union and the resulting challenges
 - Trace and evaluate the developments in the Middle East that affected United States foreign policy during George H. W. Bush's administration
 - Identify and compare the roles of the government and citizens in addressing social issues during George H. W. Bush's administration
5. The Presidency of Bill Clinton
- List the reasons why Bill Clinton won the presidency in 1992
 - Identify and describe the goals, achievements, and limitations of Bill Clinton's domestic and economic policies
 - Identify the impact of new technologies on society
 - Identify the effects of globalization on the United States during Bill Clinton's presidency
6. Clinton's Legacy
- Identify the effects of the domestic and foreign terrorist attacks on the United States in the 1990s
 - Identify and evaluate the role of the United States in global conflicts during Bill Clinton's administration
 - Sequence the events of Bill Clinton's impeachment
 - Identify the results of the 2000 presidential election and the controversy surrounding it

14. Change Over Time Portfolio

1. Change Over Time Portfolio
 - Analyze change over time
2. Writing a Research Paper
 - Recognize how to organize and write a research paper
3. Change Over Time Portfolio Directions
 - Write a research paper

15. A New Century

1. The War on Terror
 - Identify and sequence the events of the September 11, 2001, terrorist attacks
 - Identify and evaluate the goals and challenges of the wars in Afghanistan and Iraq
 - Identify the provisions, impact, and effectiveness of federal policies on foreign and domestic terrorism
 - Trace how the September 11, 2001, terrorist attacks changed American domestic and international policies
2. The Presidencies of Bush and Obama
 - Identify and categorize the political and economic goals, challenges, and successes during George W. Bush's administration
 - Identify the historical significance of the 2008 presidential election
 - Identify and categorize the political and economic goals, challenges, and successes during Barack Obama's administration

- Identify the influence of special-interest groups, political parties, and third parties on the changing political landscape and culture during the twenty-first century
3. Global Economy
 - Identify and evaluate the role of the United States in the global economy
 - Trace how economics and technological innovations have contributed to the rise of globalization
 - Identify and evaluate the influence of the mass media on national and international politics and culture
 - Identify the impact of globalization on U.S. culture, economics, politics, and foreign policy
 4. Global Relations
 - Identify and categorize the causes and effects of the major foreign policy positions of the United States during the twenty-first century
 - Identify the United States' response to foreign conflicts during the twenty-first century
 - Identify how dependence on energy and foreign oil has shaped United States foreign policy
 - critique how cyberwarfare has influenced American foreign policy, elections, and commerce.
 5. Culture, Technology, and Society
 - List the scientific and technological advances of the twenty-first century
 - Identify the impact of technological changes on society
 - Identify and describe the increasing role of women and minorities in American society
 - Identify changes in immigration policies and attitudes
 - Evaluate historical events for change over time

16. The 1980s-Early 21st Century Test

1. The 1980s-Early 21st Century Review
 - Evaluate the social, political and economic issues during the late twentieth and early twenty-first century
 - Describe the foreign and domestic policies during Ronald Reagan, George H.W Bush, William Clinton, George W. Bush and Barack Obama's presidencies
 - Evaluate the causes and effects of cultural changes during the late twentieth and early twenty-first century
 - Describe how Americans have responded to technological and societal changes in the twentieth and early twenty-first century
2. The 1980s-Early 21st Century Test

17. Semester B Exam

1. Semester B Exam Review
 - Describe the political, economic and social events of the United States from The Great Depression through the early 2000s
 - Analyze the executive and legislative policies from the Great Depression through the early 2000s
 - Explain the impact changes in the United States from the Great Depression through the early 2000s had on American Indians, women, minorities and immigrants
 - Describe the causes and effects of foreign conflicts including but not limited to World War II, The Cold War, Vietnam War, Gulf War

- Analyze the impact of and responses to economic growth and decline from the Great Depression through the early 2000s
- Evaluate the goals, successes and challenges of major social movements in the twentieth century

2. Semester B Exam

World History

World History

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

This is the first of two courses that comprise World History. Pearson's *World History* provides the basis for instruction. This course provides the student with a comprehensive examination of world history from ancient times through the Global Age. The student will begin by exploring prehistory and early civilizations, focusing on the ancient civilizations of the Americas, Egypt, India, China, Greece, and Rome. The student will then study Medieval Christian Europe from the early to the late Middle Ages, followed by regional civilizations with a focus on the Muslim world, Africa, and Asia. Finally, the student will explore early modern times with a focus on the Renaissance, Reformation, and the Global Age.

SEMESTER B

This is the second of two courses that comprise World History. Pearson's *World History* provides the basis for instruction. This course provides the student with a comprehensive examination of world history from the Age of Absolutism through the present day. The student will explore social, political, and economic changes of the nineteenth and twentieth centuries, focusing on the Industrial Age and independence movements around the globe, including the impact of nationalism, imperialism, and the world wars. The later part of the course covers such topics as the Cold War, new nations, and the effects of globalization.

Course Outline:

SEMESTER A

1. Course Overview

1. Getting Started in World History

There are no objectives for this lesson.

2. Origins of Civilization

1. Learning About Our Past

- Identify how scientists and scholars use evidence to learn about the past
- Explain the methods anthropologists use to study prehistory
- Describe how archaeological discoveries influence views about early humans

2. The Neolithic Revolution

- Identify characteristics of early humans during the Old Stone Age
- Analyze how the Neolithic Revolution changed the way early humans lived

- Explain how economic factors such as surplus caused political changes during the Neolithic Revolution

3. A Civilization Begins

- Explain the impact of farming on life among Neolithic peoples
- Describe the cultural, political, and economic characteristics of early river civilizations
- Describe the emergence of social hierarchies in early river civilizations
- Explain how job specialization and other economic changes gave rise to organized government in early river civilizations
- Infer how cooperation within and conflict among early civilizations may have impacted the use of resources
- Use a map to explain the impact of geographic factors on early human settlement

4. Unit Review and Test

- Explain how scientists use evidence to interpret history
- Explain the features of early civilizations
- Identify the effects of Neolithic Revolution on humanity

3. Ancient Middle East and Egypt

1. Sumer and Mesopotamia

- Evaluate the lasting impact of ancient civilizations in Mesopotamia
- Identify causes and effects of the rise of the Persian empire
- Describe the impact of Hammurabi's Code on later political and legal ideas
- Describe political, economic, and social characteristics of ancient civilizations and empires in Mesopotamia
- Explain the influence of geographic factors on ancient Mesopotamian civilizations and empires

2. The Hebrews and the Origins of Judaism

- Describe the development of monotheism
- Explain the origins, key teachings, and influence of Judaism
- Evaluate the impact of the Jewish Ten Commandments on later political and legal ideas
- Describe the social, economic, political, and religious characteristics of ancient Israel
- Explain the impact of geographic factors on the development of Hebrew civilization and the spread of Judaism

3. Egyptian Civilization

- Explain events and conditions that led to the rise of Egyptian civilization
- Explain the lasting legacy of ancient Egypt
- Explain the impact of geographic factors on ancient Egyptian civilization
- Describe the government, society, and religious beliefs of ancient Egypt
- Describe the technological, artistic, and other cultural achievements of ancient Egypt
- Compare the social status of women in Egypt to that of other women in the ancient world

4. Unit Review and Test

- Analyze the development of the ancient civilizations of the Middle East and Egypt
- Explain the influences of ancient Egypt and Middle Eastern civilizations on modern civilization

- Analyze the origins and key teachings of Judaism

4. **The Americas**

1. Civilizations in Middle America

- Explain how the Neolithic Revolution gave rise to civilizations in Middle America
- Explain the influence of the Olmec civilization on the development of the Maya and the Aztec civilizations
- Compare political, economic and social characteristics of the Maya and Aztec civilizations
- Summarize the scientific and cultural achievements of the Maya and the Aztec
- Infer how cooperation within and conflict among early Middle American civilizations affected use of resources in the region

2. The World of the Incas

- Describe political, economic, and social characteristics of the Inca civilization
- Summarize the scientific and cultural achievements of early Andean cultures and the Incas
- Evaluate how unity and cooperation within the Inca empire enabled the Inca to better control resources
- Explain how early Andean civilizations gave rise to the Incas
- Describe the roles of women and family in the Inca empire
- Use maps to evaluate the impact of geographic features on the settlement and expansion of the Incas

3. The People of North America

- Describe the political, economic, and social characteristics of early peoples in North America
- Explain how the competition for resources led to cooperation within and conflict among Native American groups
- Describe the impact of farming on the rise of civilization in North America
- Compare the roles of women and men among early peoples in North America
- Evaluate the impact of geographic factors on the development of distinct culture groups in North America

4. Unit Review and Test

- Describe the development and decline of the Mayan, Incan, and Aztec civilizations
- Evaluate the origin of major scientific, mathematical, and technological advances in the Maya, Inca, and Aztec civilizations

5. **Ancient India and China**

1. Early Civilization and Religion in South Asia

- Explain the origins and key teachings of Hinduism and Buddhism
- Describe the religious, political, and cultural legacy of early civilizations in South Asia
- Evaluate the impact of geographic factors on the rise and decline of early civilizations in South Asia
- Analyze the political, economic, social, and religious features of early civilizations in South Asia

2. Powerful Empires Emerge in India

- Explain the origins and influence of the Maurya and Gupta empires
- Describe the political, social, economic, and religious characteristics of the Maurya empire

- Describe the political, social, economic, and religious characteristics of the Gupta empire
- Evaluate the impact of geographic factors on the rise and decline of the Maurya and Gupta empires
- Describe the roles of women, children and family in the Maurya and Gupta empires
- Write and cite evidence to defend a thesis statement

3. Ancient Civilization in China

- Describe the origins and impact of the development of the Zhou empire in China
- Explain how early river valley civilizations in China gave rise to later civilizations
- Explain geographic influences on the development of early civilizations in China
- Analyze the political, social, economic, and religious characteristics of the Zhou empire in China
- Summarize the key teachings of Confucianism and Daoism

4. Strong Rulers Unite China

- Summarize the scientific, technological, and cultural achievements of Han China
- Describe the spread of Buddhism in ancient China
- Explain the causes behind the decline of Han China
- Evaluate the legacy of the Qin and Han dynasties in China
- Describe social, political, and economic characteristics of China under the Qin and Han dynasties

5. Ancient India and China Portfolio

- Use historical and geographic information to draw inferences and conclusions
- Write and cite evidence to defend a thesis statement

6. Unit Review and Test

- Analyze the development of the ancient civilizations of India and China
- Explain the influences of ancient India and China on modern civilization
- Analyze the origins and key teachings of Hinduism, Buddhism, Daoism, and Confucianism

6. Ancient Greece

1. Early Greece

- Explain the origins and decline of early Minoan and Mycenaean civilizations
- Describe the culture of early Minoan and Mycenaean civilizations
- Describe the cultural legacy of early Greek civilization
- Analyze social, political and economic characteristics of early Minoan and Mycenaean civilizations

2. The Greek City-States

- Describe the lasting impact of the political ideas and structures of the ancient Greek city-states
- Compare and contrast the systems of government among classical Greek city-states
- Describe the roles of men, women, and families in early Greek city-states
- Explain the effects of conflict among the city-states of Athens and Sparta
- Use maps to evaluate the impact of geographic factors on the formation of Greek city-states

3. Greek Thinkers, Artists, Writers, and Leaders

- Analyze the political and philosophical ideas of classical Greek thinkers, including those of Socrates, Plato, and Aristotle
- Evaluate the influence of classical Greek political thought on modern institutions of law and government
- Identify the impact of innovations and ideas from classical Greek scientists and mathematicians
- Analyze the artistic, architectural, and literary achievements of ancient Greece

4. Unit Review and Test

- Explain the causes and effects of the development of the classical civilization of Greece
- Analyze how the ethical and moral principles of early civilizations affected the development of Western political thought
- Evaluate the origin and impact of mathematical, scientific, and technological ideas in classical Greece
- Explain the influence of religious and philosophical beliefs in ancient Greece on modern society

7. Ancient Rome

1. The Roman Republic

- Explain the political legacy of the Roman republic
- Summarize characteristics and institutions of the Roman republic
- Describe the roles of men, women, and the family in the Roman republic
- Evaluate the influence of senators, consuls, and other officials in the Roman republic
- Describe elements of culture in early Rome and the Roman republic

2. The Roman Empire: Rise and Decline

- Summarize events that led to the rise of the Roman empire
- Explain contributing factors to the decline of the western Roman empire
- Identify the contributions of significant Romans
- Compare and contrast Roman society and government under the Roman republic and the Roman empire

3. The Legacy of Rome

- Describe the lasting influence of Roman political institutions
- Describe the literary, artistic, and other elements of culture handed down from ancient Rome
- Describe the scientific, mathematical, and technological achievements of ancient Rome
- Explain how the Roman empire spread and integrated culture on three continents

4. The Origins of Christianity

- Explain the origins and key teachings of Christianity
- Analyze the similarities and differences between Christian ethics and Roman law and governance
- Assess the role of individuals in the development and spread of Christianity

5. Unit Review and Test

- Explain the causes and effects of the development of the classical civilization of Rome

- Analyze how the ethical and moral principles of early civilizations affected the development of Western political thought
- Evaluate the origin and impact of mathematical, scientific, and technological ideas in classical Rome
- Explain the influence of religious and philosophical beliefs in ancient Rome on modern society

8. Medieval Christian Europe, Part I

1. The Early Middle Ages

- Describe the rise and influence of the Byzantine empire
- Describe social, political, and economic characteristics of early medieval Europe
- Identify factors behind the spread of Christianity in medieval Europe
- Explain the role of Christianity in uniting medieval Europe and the Byzantine empire
- Explain the influence of geographic factors on medieval European civilization
- Describe the impact of the fall of Rome on European civilization

2. Feudalism and the Manor Economy

- Describe the development of feudalism and manorialism during the Middle Ages
- Summarize the characteristics of feudalism and manorialism in Western Europe
- Explain the economic and social impacts of medieval feudalism and manorialism
- Describe the roles of women and families in medieval society

3. The Medieval Christian Church and Crusades

- Describe causes and effects of the spread of Christianity in medieval Europe
- Describe the rising influence of the Church on society and politics in medieval Europe
- Explain the causes and effects of interaction among Christians, Jews, and Muslims in medieval Europe
- Compare and contrast Roman Catholicism with Eastern Orthodoxy
- Describe changes to medieval society and economic activity over time, as well as the impact of medieval guilds
- Describe the impact of the Church on the roles of women in medieval society

4. The Feudal Monarchs and the Church

- Explain the rise of strong monarchs in medieval Europe
- Describe how the relationship between religious and secular leaders in medieval Europe changed over time
- Describe limits on the powers of medieval monarchies
- Evaluate how the Magna Carta limited the power of the monarch

5. Unit Review and Test

- Analyze the causes and effects of the formation of medieval Europe
- Explain the effects of the economic system of manorialism
- Explain the causes and effects of the rise of the Byzantine empire
- Evaluate the development of Christianity in the Middle Ages

9. Medieval Christian Europe, Part II

1. A Flourishing Culture in the Middle Ages

- Describe key examples of art, architecture, literature, and music characteristic of the Middle Ages
 - Identify cultural influences on medieval art, architecture, literature, and music
 - Explain the impact of European art, architecture, literature, and music on other cultures and society today
 - Describe medieval institutions of education and their role in society, culture, and politics
 - Describe the lasting cultural impact of the Byzantine empire
2. The Late Middle Ages: A Time of Upheaval
- Explain factors that contributed to the decline of medieval Europe
 - Describe challenges faced by the Church in the late Middle Ages
 - Identify causes and consequences of the Black Death and the Hundred Years' War
3. Russia and Eastern Europe
- Describe the influence of geographic factors on the rise of Russian civilization
 - Explain the origins and influence of the Russian Orthodox Church
 - Summarize political, economic, and cultural aspects of tsarist Russia
 - Describe political and cultural influences on Eastern European kingdoms
 - Explain the impact of Mongol rule on Russia and Eastern Europe
 - Produce a written guide to life in medieval Europe that analyzes the experiences and roles of the serf, merchant and artisan, noble, and ruling class
4. Unit Review and Test
- Explain the lasting impact of the culture of the Middle Ages
 - Analyze the causes and effects of the decline of medieval Europe
 - Explain how geography influenced the rise and development of Eastern Europe
 - Evaluate how modern government is affected by earlier forms of government

10. The Muslim World and Africa

1. The Origins of Islam
- Locate and identify the significance of Mecca and Medina to Islam
 - Explain the role of Muhammad and his followers in the development of Islam
 - Describe the origins and early spread of Islam
 - Summarize the key teachings of Islam
 - Evaluate the political and social impact of Islam
2. A Muslim Empire and Its Achievements
- Describe the circumstances that gave rise to Muslim empires in Southwest Asia and North Africa
 - Describe society and government under early Islamic empires
 - Summarize the artistic, literary, scientific, and other cultural achievements of early Muslim civilization
3. The Ottoman and Safavid Empires
- Describe the causes and effects of the rise of the Ottoman and Safavid empires
 - Describe interactions among Muslim, Christian, and Jewish peoples under Ottoman rule

- Summarize social and political characteristics of the Ottoman and Safavid empires
4. Early Civilizations of Africa
 - Describe the impact of Islam on early civilizations in North Africa
 - Summarize political, economic, social, and cultural characteristics of civilizations in Africa
 - Evaluate how geographic features made possible human settlement and encouraged human migration in the region
 5. West and East Africa
 - Describe the influence of geographic features on the formation of civilization in West Africa and East Africa
 - Explain the factors that contribute to economic interdependence in the region
 - Evaluate the influence of Islam, Judaism, and Christianity on the formation of civilizations in the region
 6. Diverse Peoples and Traditions in Africa
 - Describe the ways in which art, architecture, and literature reflect African civilization
 - Evaluate the impact of Islam and Christianity on the development of African civilization
 - Explain the role of men, women, and family in African civilizations
 7. Unit Review and Test
 - Explain the causes and effects of the rise of the Ottoman empire
 - Analyze the rise of Islam and its influence on Europe, Asia, and Africa
 - Analyze the development of the early civilizations of Africa
 - Explain how the arts and religion influence culture

11. Civilizations in Asia

1. The Delhi Sultanate and Mughal India
 - Describe the interaction of Muslims and Hindus and the influence of Islam and Hinduism on events in India
 - Describe significant institutions and ideas that originated in India
 - Summarize the central tenets and spread of Islam, Hinduism, and Sikhism in India
 - Analyze the significance of the Taj Mahal as a cultural icon
 - Explain causes and consequences of the Mongol invasion of India
2. Golden Ages of China: Tang and Song Dynasties
 - Summarize the political, economic, and social characteristics of Tang and Song China
 - Describe the artistic, scientific, mathematic, and technological achievements of Tang and Song China
 - Explain the roles of men, women, and family in Tang and Song China
 - Evaluate the importance of trade to the development of Tang and Song China
 - Assess the lasting cultural influence of Tang and Song China
3. The Mongol Empire and Ming China
 - Describe the causes and consequences of the Mongol invasion of China
 - Summarize the political, social, and economic characteristics of China under Mongol rule and the Ming dynasty

- Identify the contributions of Genghis Khan and Kublai Khan
 - Explain the significance of the Pax Mongolica
 - Describe the importance of economic and cultural activity in Ming China
4. Korea and Japan
- Describe the impact of geographic factors on the development of Korean and Japanese civilization
 - Explain the development of Zen Buddhism and Shinto belief systems
 - Explain China's influence on civilization in Korea and Japan
 - Describe society under dynastic Korea and feudal Japan
 - Summarize the cultural achievements of the Choson dynasty in Korea and the Heian period in Japan
5. The Many Cultures of Southeast Asia
- Explain the influence of India and China on empires in Southeast Asia
 - Summarize the social, political, and economic characteristics of empires in Southeast Asia
 - Describe the artistic, architectural, and other cultural achievements of Southeast Asian civilizations
 - Evaluate the impact of geographic factors on the formation of empires in Southeast Asia
 - Describe the spread of religious ideas in Southeast Asia
6. Unit Review and Test
- Analyze the development of early civilizations in Asia
 - Explain the causes and effects of Mongol invasions on early civilizations
 - Evaluate the influence of the Ming dynasty on world trade
 - Explain the origin and impact of mathematical, scientific, and technological ideas in China prior to 1750
 - Explain the impact of interactions among cultures in Asian civilizations

12. The Renaissance and Reformation

1. The Italian Renaissance
- Summarize the causes and effects of the Italian Renaissance
 - Explain how Renaissance ideas encouraged individualism and secularism
 - Describe examples of art, architecture, and literature from the Italian Renaissance
 - Use maps to evaluate the spread of Renaissance ideas
 - Explain how Renaissance art and literature reflect the culture by which they were produced
2. The Renaissance in Northern Europe
- Explain the impact of the printing press on European society
 - Summarize the causes and effects of the Renaissance in northern Europe
 - Explain how the Renaissance in northern Europe encouraged individualism and secularism
 - Describe the significance of key examples of art, architecture, and literature from the Renaissance in northern Europe
 - Explain how northern Renaissance art and literature reflects the culture by which it was produced

3. The Protestant Reformation

- Describe causes and effects of the Protestant Reformation
- Explain the impact of the printing press on the spread of Reformation ideas
- Summarize the roles of key individuals in the Reformation
- Describe the relationship between Protestant reforms and the growth of individualism and secularism

4. Reformation Ideas Spread

- Compare and contrast the origins and practices of Protestant sects that emerged during the Reformation
- Explain the causes and effects of the Catholic Counter-Reformation
- Evaluate the impact of Reformation ideas on European society and politics
- Analyze the roles of men, women, and children during the Reformation

5. The Scientific Revolution

- Explain the scientific method and its significance to the Scientific Revolution
- Identify contributions by Copernicus, Galileo, Isaac Newton, Robert Boyle, and other scientists during the Scientific Revolution
- Evaluate the nature of the Scientific Revolution as a revolution
- Explain the causes and effects of the Scientific Revolution in Europe and around the world
- Explain the relationship between the Scientific Revolution and ideas about individualism and secularism

6. Unit Review and Test

- Evaluate the effects of the Renaissance on world history
- Evaluate the effects of the Reformation on world history
- Evaluate the effects of the Scientific Revolution on world history

13. New Global Connections

1. Europeans Explore Overseas

- Identify causes and consequences of European exploration in the fifteenth and sixteenth centuries
- Describe the role of trade in increasing global economic interdependence
- Explain the influence of geographic factors on European exploration and trade
- Describe the human characteristics of places in Africa, Asia, and the Americas encountered by European explorers

2. Europeans Gain Footholds in Asia

- Explain the effects of European exploration and trade in Asia
- Describe the influence of Ming China on international trade
- Identify sources of conflict and competition in global trade in the fifteenth and sixteenth centuries
- Evaluate the impact of geographic factors on global trade

3. European Conquests and Colonies

- Summarize events that led to European exploration and colonization of the Americas

- Describe the impact of European exploration on the Americas and on Native American civilizations
 - Describe the role of trade and competition in European exploration and colonization
 - Evaluate the role of geographic factors in European exploration and colonization
 - Compare and contrast life in the Spanish, Portuguese, French, and English colonies
4. The Slave Trade and Its Impact on Africa
- Explain the causes and effects of the Atlantic slave trade
 - Compare and contrast the conditions endured by enslaved Africans in different parts of the Americas
 - Explain the geographic, economic, and cultural significance of triangular trade
5. Effects of Global Contact
- Explain the causes and effects of the Columbian Exchange
 - Describe the role of mercantilism in European colonization
 - Explain factors that led to Europe’s Commercial Revolution
 - Evaluate geographic features that influenced Europeans trade and colonization
6. Unit Review and Test
- Assess the causes and effects of European trade, exploration, and expansion
 - Evaluate the effects of European colonization in the Americas
 - Analyze the effects of the Atlantic slave trade
 - Explain how European exploration led to global economic change

14. World History Semester Exam

1. World History Semester Exam Review
- Explain the role of geography in shaping civilization
 - Describe factors that influence the structure of government and the exercise of government power
 - Assess the relationship between the political, economic, and social elements of civilization
 - Explain the interrelationship among elements of culture, including art and architecture, literature, science and technology, religion, and political ideology
 - Analyze causes and consequences of economic and social activity, including settlement, trade, migration, colonization, and conflict and cooperation
2. World History Semester Exam
- There are no objectives for this lesson.*

SEMESTER B

1. Course Overview

1. Getting Started in World History
- There are no objectives for this lesson.*

2. Absolutism and Revolution

1. Absolute Monarchy in Spain and France
- Describe the absolute monarchies of Spain under Philip II and France under Louis XIV

- Describe the rights of citizens under absolute monarchies in Spain and France
 - Summarize the cultural achievements of Spain's golden century
 - Describe economic and social aspects of Philip II's Spain and Louis XIV's France
2. Rise of Austria, Prussia, and Russia
- Explain how conflict among nations changed the map of Europe
 - Evaluate the influence of Catherine the Great on Russia and on global relations
 - Describe characteristics of absolute monarchies and the rights of citizens under those monarchies in Austria, Prussia, and Russia
3. Triumph in England and the Enlightenment
- Explain the development of democratic ideas during the Enlightenment
 - Explain the political and social theories of significant Enlightenment thinkers
 - Explain the major tenets and the lasting impact of the English Bill of Rights
 - Identify the causes and effects of the English Civil War and the Glorious Revolution
 - Explain the economic theories of Adam Smith and their impact on the development of the free enterprise system
 - Describe the influence of Elizabeth I on England and on global politics
 - Describe the characteristics of oligarchical rule in England
4. The American Revolution
- Describe the impact of Enlightenment thought on the American Revolution
 - Identify the causes and effects of the American Revolution
 - Describe characteristics of government and the rights of citizens under the U.S. Constitution
 - Evaluate the global impact of the American Revolution and the precedents established by the U.S. Constitution
 - Identify democratic institutions and processes in the United States
5. The French Revolution
- Describe the impact of Enlightenment thought on the French Revolution
 - Identify causes and effects of the French Revolution
 - Describe the impact of earlier revolutions and documents on the French Revolution
 - Explain the events that led from the French Revolution to the rise of Napoleon Bonaparte
 - Describe characteristics of government and the rights of citizens following the French Revolution
 - Summarize the efforts of women to win suffrage during the French Revolution
6. The Age of Napoleon
- Explain the causes and effects of the Napoleonic Wars, in Europe and around the world
 - Explain how Napoleon rose to power in France
 - Describe characteristics of government and the rights of citizens under Napoleon's rule in France
 - Compare and contrast the causes and effects of the American Revolution and the French Revolution
7. Absolutism and Revolution Portfolio

- Use historical and geographic information to draw inferences and conclusions
- Write and cite evidence to defend a thesis statement

8. Unit Review and Test

- Evaluate major events during the Age of Absolutism
- Compare and contrast two revolutions during the Age of Absolutism
- Identify and evaluate the characteristics of various forms of political systems including absolute monarchy, democracy, oligarchy, republic, and limited monarchy
- Explain and compare the ideas of major philosophers of the era
- Explain the influence of political, legal, and economic ideas found in historical documents

3. The Industrial Revolution

1. The First Industrial Revolution

- Describe the causes and effects of the Industrial Revolution, including why England was the first country to industrialize
- Summarize the impact of industrialization on women, children, and families
- Identify significant inventions and innovations of the Industrial Revolution
- Describe how the Industrial Revolution shaped the economic theories of capitalism, socialism, and communism
- Describe the relationship between industrialization, urbanization, and the free enterprise system

2. The Second Industrial Revolution

- Explain the economic, political, and social consequences of the second Industrial Revolution
- Contrast the achievements of the second Industrial Revolution with those of the first Industrial Revolution
- Describe the impact of industrialization on standards of living and ways of life
- Evaluate the changing relationship between big business and labor
- Assess the geographic context of the Industrial Revolution

3. The Changing Ways of Life and Thought

- Explain the origins, efforts, and outcomes of the women's suffrage movement
- Describe the cultural impact of industrialization, including the development of Romanticism and Realism
- Explain how artistic and literary works reflected the culture in which they were produced, as well as universal themes
- Explain how specific inventions and innovations changed daily life and society in the late nineteenth and early twentieth centuries

4. Unit Review and Test

- Explain the causes of the Industrial Revolution
- Evaluate how the Industrial Revolution brought about social, economic, scientific, and cultural change
- Explain the historical origins and characteristics of various systems, including capitalism, socialism, and communism

4. Nationalism and the Spread of Democracy

1. Change in Europe and Latin America

- Explain the origins, including the role of nationalism, of political revolution in Europe and Latin America
- Describe the outcomes of political revolution in Europe and Latin America
- Explain the contributions of significant individuals in revolutionary nationalist movements
- Summarize the economic and social effects of political change in Europe and Latin America

2. The Unification of Germany and Italy

- Explain the role of nationalism in uniting German and Italian kingdoms
- Summarize the causes and consequences of the unification of Germany
- Summarize the causes and consequences of the unification of Italy
- Describe the significant roles played by German and Italian leaders
- Assess German and Italian society and economic growth under nationalist rule

3. Changes and Division in Britain and France

- Describe the influence of Queen Victoria on English and global politics and society
- Evaluate the changing roles and rights of women in England and France in the late nineteenth century
- Summarize the causes and effects of democratic and economic reforms in France at the turn of the century
- Summarize the causes and effects of democratic and economic reforms in England at the turn of the century
- Explain the sources of conflict in late nineteenth-century English and French society

4. Growth of the United States

- Describe the changing roles of women in the United States in the late nineteenth and early twentieth centuries
- Evaluate geographic factors that made possible the expansion of the United States
- Describe the impact of industrialization on the expansion and economic growth of the United States
- Evaluate Manifest Destiny as a nationalist idea that united and divided citizens in the United States
- Summarize the causes and effects of the abolition of slavery in the United States

5. Nationalism in Eastern Europe and Russia

- Describe how nationalist forces in Central and Eastern Europe led to conflict
- Explain the causes and effects of Russian expansion in the nineteenth century
- Describe characteristics of autocratic rule in Russia
- Summarize the origins and consequences of the Crimean War
- Describe social, political, and economic impacts of industrialization in Russia

6. Nationalism and the Spread of Democracy Portfolio

- Analyze the impact of conflict and cooperation among groups and organization on global development and relations

7. Unit Review and Test

- Identify and evaluate the influence of various economic, social, and political conditions on political revolutions in the nineteenth century
- Summarize the effects of political and economic reform in Europe and Latin America
- Evaluate the contributions of significant individuals in revolutionary nationalist movements
- Describe the impact of industrialization on nationalism in the United States

5. The Age of Imperialism

1. The New Imperialism

- Explain causes and effects of Western imperialism
- Describe the relationship between industrialization and imperialism
- Evaluate the impact of geographic and technological factors on Western imperialism
- Describe political, economic, social, and cultural characteristics of Western imperial rule

2. European Colonies in Africa

- Explain the causes of European imperialism in Africa
- Explain the effects of Western imperial rule in Africa
- Describe the geographic impact of Western imperial rule in Africa
- Describe the perspective of resistance movements to Western imperial rule
- Describe the culture of indigenous peoples in Africa

3. Europe in the Muslim World

- Summarize the causes of European interest in Southwest Asia, North Africa, and India
- Compare and contrast the influence of Western imperial powers on different Muslim nations and India
- Describe the political, economic, social, and cultural impact of European involvement in Southwest Asia, North Africa, and India
- Analyze the response of Indian and Muslim peoples and nations to Western imperialism
- Assess the causes and effects of the Armenian genocide

4. China and the West

- Explain the economic interest of Western powers in China
- Describe the efforts and consequences of Western nations to open China to trade
- Analyze efforts to resist Western imperialism and the role of Sun Yat-sen (Sun Yixian) in Chinese independence
- Evaluate the relationship between Western imperialism and regional conflict

5. Japan, Southeast Asia, and the Pacific

- Explain the causes and effects of Western interest in Japan, Southeast Asia, and the Pacific
- Explain the origins and consequences of Japanese imperialism
- Evaluate geographic influences on trade, imperialism, and conflict in Japan, Southeast Asia, and the Pacific
- Evaluate the role of transportation and technology in opening Japan, Southeast Asia, and the Pacific to foreign influence
- Describe the efforts and outcomes of independence movements in the region

6. The Americas in the Age of Imperialism

- Summarize the political, economic, social, and cultural causes that gave rise to American imperialism
- Compare and contrast American influence in different regions of the world
- Use maps to evaluate the impact of geographic factors on American involvement in Latin America
- Describe the origins and consequences of independence movements in Latin America
- Compare and contrast the independence movement in Canada with that of Latin American nations
- Compare and contrast the perspectives of imperial powers and those colonized

7. Unit Review and Test

- Analyze the political and economic motivations behind imperialism
- Explain how European powers expanded their empires during the Age of Imperialism
- Evaluate the political, cultural, social, and economic impact of European imperialism
- Discuss the characteristics and effects of imperialism from multiple perspectives
- Explain the role of technology in European imperialism

6. World War I and the Russian Revolution

1. World War I Begins

- Explain how militarism and nationalism led to World War I
- Explain how the alliance system contributed to the onset of World War I
- Explain how political rivalries and ethnic tensions moved Europe toward World War I
- Summarize actions and arguments by national leaders that contributed to the outbreak of war
- Use maps to evaluate the influence of geographic factors on the start of World War I

2. Fighting the Great War

- Describe major characteristics of World War I, including the use of trench warfare
- Explain the impact of modern technology on the conduct of World War I
- Summarize the human and economic costs of the war, including attacks against civilians
- Identify significant battles and turning points of World War I

3. World War I Ends

- Analyze the arguments and events that led the United States to enter World War I
- Explain the political and economic effects of the Treaty of Versailles and the formation of the League of Nations
- Describe the impact of the United States' refusal to join the League of Nations
- Describe the mandate system that resulted from the end of the war
- Explain the global impact of the influenza pandemic in 1918
- Describe the roles of women in the war
- Describe the use of propaganda to mobilize nations for total war

4. Revolution in Russia

- Explain the establishment of the Union of Soviet Socialist Republics
- Distinguish between the revolutions of 1917 in Russia

- Summarize the causes and effects of the Russian Revolution
- Describe the conflict and politically motivated violence that resulted from the Russian Revolution

5. Unit Review and Test

- Analyze the causes, major events, and effects of World War I
- Evaluate how technological innovation impacted the characteristics of World War I
- Explain the political and economic impacts of the League of Nations, Wilson's Fourteen Points, and the Treaty of Versailles
- Identify the causes and effects of the Russian Revolution

7. The World Between the Wars

1. Latin America, Africa, and the Middle East

- Explain the causes and effects of political revolution in Mexico
- Explain the causes and effects of political revolution in Central and South America
- Explain the origins and outcomes of nationalist movements in Africa and the Middle East
- Evaluate the Good Neighbor Policy of the United States and its consequences
- Explain the impact of global depression on nations in Latin America, Africa, and the Middle East
- Describe life in South Africa under the rule of apartheid

2. India Seeks Self-Rule

- Explain the causes and effects of the Indian independence movement
- Describe the use of nonviolent disobedience by supporters of Indian self-rule
- Describe life in India under British imperial rule
- Identify specific reforms sought by Mohandas Gandhi in India
- Explain the role of Mohandas Gandhi in protesting British rule of India

3. New Forces in China and Japan

- Describe the causes and effects of the competition for power between Chinese Nationalists and Communists
- Explain the origins and consequences of the rise of Japanese ultranationalists
- Assess the role of Emperor Hirohito and Mao Zedong in achieving political change in Japan and China
- Explain the impact of global depression on events in China and Japan
- Summarize political, economic, and social challenges faced by republican and liberal forces in China and Japan

4. The West After World War I

- Describe foreign policy challenges faced by Western nations following World War I
- Explain the causes and effects of the Great Depression on the United States and Europe
- Summarize global responses to the Great Depression
- Describe scientific, artistic, literary, and other cultural achievements in the United States and Europe between the world wars
- Explain the changing roles of women in the period between the world wars

5. Dictators in Italy and the Soviet Union

- Explain the causes and effects of Benito Mussolini's rise to power in Italy
- Explain how Joseph Stalin secured power in the Soviet Union
- Explain the response of Stalin's Soviet Union to economic depression
- Describe political, economic, and social aspects of totalitarian rule in Italy and the Soviet Union
- Evaluate the human cost of Stalin's economic policies and political purges

6. The Rise of Nazi Germany

- Explain the causes and effects of the rise to power of Adolf Hitler and the Nazi party in Germany
- Summarize the key tenets and goals of Adolf Hitler and the Nazi party
- Describe the response of Adolf Hitler and the Nazi party to global depression
- Describe life in Germany under the fascist rule of the Nazi party

7. Unit Review and Test

- Identify and evaluate the rise of totalitarian governments after World War I
- Explain the causes and effects of nationalist movements after World War I
- Explain the roles of various world leaders between the world wars
- Describe the impact of global economic depression after World War I
- Evaluate the cultural, technological, and scientific changes that occurred between the world wars

8. World War II

1. Aggression, Appeasement, and War

- Explain the causes and effects of the Nazi-Soviet Pact in 1939
- Describe the impact of the Japanese invasion of China and Southeast Asia
- Summarize the political, military, and economic causes that led to World War II
- Sequence the chain of events that led to a declaration of war by Britain and France
- Assess the impact of policies of appeasement and nonintervention on World War II
- Summarize the role of world leaders, including Adolf Hitler, Francisco Franco, and Winston Churchill, in the outbreak of war

2. Axis Powers Advance

- Explain why the attack on Pearl Harbor brought the United States into World War II
- Summarize the advance of Nazi forces across Europe
- Describe causes and effects of the Nazi invasion of the Soviet Union
- Use maps to assess geographic challenges faced by Nazi Germany during World War II

3. The Holocaust

- Identify population groups persecuted by the Nazis during the Holocaust
- Explain events and policies pursued by the Nazis during the Holocaust
- Describe the responses of Allied nations and world leaders to the Holocaust
- Summarize the human costs of the Holocaust

4. The Allies Turn the Tide

- Describe turning points in World War II
- Explain Allied goals and strategies during World War II
- Describe the contributions of women to World War II
- Use maps to evaluate the impact of geographic factors on events during World War II
- Identify and discuss possible justifications for war

5. Victory for the Allies

- Explain the role of world leaders in negotiating the peace after World War II
- Summarize the human costs of World War II
- Explain the events that led to the conclusion of World War II
- Describe the formation and purpose of the United Nations
- Explain the role of atomic weapons in bringing World War II to a close
- Explain the significance of the Nuremberg Trials
- Use maps to assess geographic factors in the outcome of World War II

6. Unit Review and Test

- Identify and evaluate the causes, major events, and effects of World War II
- Describe the impact of World War II on the civilian population
- Describe the impact of military and political leaders prior to and during World War II
- Discuss the justification of war

9. The Cold War Era

1. A New Global Conflict

- Explain causes and effects of the Cold War
- Describe the origins and outcomes of political uprisings against Soviet rule in Eastern Europe
- Assess the goals of alliances and international organizations during the Cold War
- Evaluate causes and effects of the arms race that took place during the Cold War
- Contrast life under totalitarian rule in the Soviet Union and Eastern European satellite nations with life in democratic nations
- Use maps to assess the influence of geographic factors in the Cold War

2. The Western Democracies and Japan

- Describe the postwar economic recovery of Japan and European nations
- Explain the economic and political challenges faced by the United States and Western European nations following World War II
- Assess the effectiveness of the civil rights movement in the United States in achieving democratic reform
- Explain the role of Margaret Thatcher in postwar Britain
- Assess the impact of World War II and the Cold War on colonial independence movements

3. Communism and War in Asia

- Analyze the causes and effects of the Chinese Civil War, including the role of Mao Zedong
- Explain Chinese influence on conflict in Southeast Asia
- Explain how the Cold War contributed to violent conflict in Korea, Vietnam, and Cambodia

- Describe the circumstances of the mass murder committed by the Khmer Rouge in Cambodia
- Analyze the Cold War strategies and goals pursued by the United States and the Soviet Union in Asia
- Compare and contrast the social, political, and military situations in Korea, Vietnam, and Cambodia that contributed to the outbreak of war

4. The Cold War Ends

- Explain the role of key leaders, including Lech Walesa, Mikhail Gorbachev, and Ronald Reagan, in bringing about the end of the Cold War
- Describe events that led to the collapse of communism in Eastern Europe and in the Soviet Union
- Analyze the causes of the decline of communist economies in the late twentieth century
- Explain the rise of free market economies in Eastern Europe and Asia following the collapse of the Soviet Union
- Describe the global consequences of the breakup of the Soviet Union

5. Unit Review and Test

- Identify and evaluate the social, political, and technological structures of the United States and the Soviet Union during the Cold War
- Analyze the effects of the spread of communism to non-Soviet nations
- Describe the global effect of the fall of the Soviet Union

10. New Nations Emerge

1. New Nations in South Asia and Southeast Asia

- Explain the impact of U.S. and Soviet Cold War policies on nations in South Asia and Southeast Asia
- Assess the political impact of Indira Gandhi's policies in India
- Analyze the influence of geographic and cultural factors on the formation of new nations in South Asia and Southeast Asia
- Describe the nation-building efforts undertaken in South Asia and Southeast Asia and their outcomes
- Describe the rights of citizens in democratic India
- Explain how citizens' rights differ under militaristic and democratic governments in Myanmar, Indonesia, and the Philippines

2. African Nations Win Independence

- Describe the origins and outcomes of independence movements in Africa
- Explain social, cultural, and economic challenges faced by African nations today
- Analyze the causes and effects of genocide in Darfur and Rwanda
- Describe the international response to humanitarian crises in Africa
- Use maps to evaluate geographic factors that have contributed to conflict within and among African nations
- Evaluate the need for strong government in order for new nations to succeed

3. The Modern Middle East Takes Shape

- Describe the origins and consequences of nation-building in the Middle East

- Describe economic, political, cultural, and ethnic challenges faced by countries in the Middle East in the past and today
 - Describe life under theocratic rule in the Middle East
 - Compare and contrast systems of governance among nations in the Middle East
 - Describe the role of Golda Meir in achieving Israeli independence
4. Conflicts in the Middle East
- Describe the causes and effects of ongoing conflict in the Middle East
 - Summarize domestic and foreign policy challenges faced by nations in the Middle East
 - Evaluate efforts to restore and maintain peace in the Middle East
 - Describe political, social, cultural, and ethnic characteristics of Middle Eastern nations that have contributed to conflict
5. Unit Review and Test
- Explain how geography and culture influenced independence movements in Asia, Africa, and the Middle East
 - Explain the causes and effects of regional conflicts in various parts of the world
 - Explain the effects of influential figures in nation-building during the late twentieth century
 - Summarize the efforts to maintain peace in the Middle East

11. The World Today Part I

1. Challenges of Development
- Evaluate the benefits of economic growth for people in developing nations
 - Describe the impact of technology on economic growth and social change in developing nations
 - Describe characteristics of industrialized and developing nations
 - Describe efforts of African groups and individuals, including the work of Wangari Maathai, to improve their economies and societies
 - Summarize efforts to overturn the system of apartheid in South Africa and the outcomes, including the role of Nelson Mandela
 - Describe economic, social, health, and environmental challenges faced by African nations today
2. Rapid Development in China and India
- Describe examples of political repression in China
 - Describe challenges faced by China and India today
 - Explain the contributions of Mother Teresa
 - Explain civil efforts to reform economic, social, and political systems in China
 - Explain civil efforts to reform economic, social, and political systems in India
 - Evaluate the impact of economic reforms in China and India
3. Latin American Nations Move Toward Democracy
- Describe the impact of economic conditions on Latin American society
 - Explain democratic reform movements and their outcomes in Latin America
 - Evaluate how U.S. intervention contributed to the rise of repressive regimes in Latin America

- Identify examples of political repression and resistance efforts in Latin American nations
 - Explain the formation and goals of the Organization of American States
 - Describe the contributions of Oscar Romero and Mothers of the Plaza de Mayo to reform in Latin America
4. The Industrialized World
- Explain the purpose and contributions of the European Union
 - Describe the impact of market economic policies in Russia and in Asia
 - Compare political and economic changes in Europe and Russia since the end of the Cold War
 - Assess factors that contributed to violence in the Balkans
 - Explain economic and social challenges faced by Russia and the government’s responses
5. Unit Review and Test
- Compare challenges in developing nations
 - Identify and evaluate human rights issues in various nations and regions of the world
 - Summarize the role and impact of individuals and organizations on political and social reform

12. The World Today Part II

1. Globalization and Trade
- Identify contributing factors to globalization, including industrialization and technological innovation
 - Explain political, economic, social, and cultural impacts of globalization on nations around the world
 - Assess the role of international treaties and organizations in growing global trade
 - Summarize causes and effects of global economic interdependence, including competition, scarcity, and specialization
2. Modern Issues in International Society
- Explain the global impact of terrorism in the late twentieth and early twenty-first centuries
 - Identify examples of modern humanitarian crises in the world
 - Assess the international response to human rights issues
 - Explain economic, environmental, and social challenges faced by nations today
3. Advances in Science and Technology
- Explain the causes and effects of the space race
 - Describe how computers and the Internet have changed the ways in which people live and communicate ideas and information
 - Summarize the economic impact of modern technological innovations
 - Evaluate the effects and potential effects of biotechnology and genetic engineering
 - Assess the impact of technology on standards of living in developed and developing nations
4. Unit Review and Test
- Explain the risks and benefits of globalization and interdependence
 - Describe modern advancements in science and technology
 - Evaluate threats to global security

13. World History Semester Exam

1. World History Semester Exam Review

- Summarize the contributions of individuals, groups, and institutions to historic events
- Explain the origins of and changes in civic ideals and practices over time
- Assess the impact of global connections on economics, culture, and politics
- Describe the development of systems of production, distribution, and consumption, as well as their impact on societies
- Analyze factors that influence continuity and change within and among civilizations

2. World History Semester Exam

There are no objectives for this lesson.

World History (Prescriptive)

CR World History

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

This is the first of two courses that comprise World History. Pearson's *World History* provides the basis for instruction. This course provides the student with a comprehensive examination of world history from ancient times through the Global Age. The student will begin by exploring prehistory and early civilizations, focusing on the ancient civilizations of the Americas, Egypt, India, China, Greece, and Rome. The student will then study Medieval Christian Europe from the early to the late Middle Ages, followed by regional civilizations with a focus on the Muslim world, Africa, and Asia. Finally, the student will explore early modern times with a focus on the Renaissance, Reformation, and the Global Age.

SEMESTER B

This is the second of two courses that comprise World History. Pearson's *World History* provides the basis for instruction. This course provides the student with a comprehensive examination of world history from the Age of Absolutism through the present day. The student will explore social, political, and economic changes of the nineteenth and twentieth centuries, focusing on the Industrial Age and independence movements around the globe, including the impact of nationalism, imperialism, and the world wars. The later part of the course covers such topics as the Cold War, new nations, and the effects of globalization.

Course Outline:

SEMESTER A

15. Course Overview

1. Getting Started in World History

There are no objectives for this lesson.

16. Origins of Civilization

1. Learning About Our Past

- Identify how scientists and scholars use evidence to learn about the past
- Explain the methods anthropologists use to study prehistory
- Describe how archaeological discoveries influence views about early humans

2. The Neolithic Revolution

- Identify characteristics of early humans during the Old Stone Age
- Analyze how the Neolithic Revolution changed the way early humans lived

- Explain how economic factors such as surplus caused political changes during the Neolithic Revolution

3. A Civilization Begins

- Explain the impact of farming on life among Neolithic peoples
- Describe the cultural, political, and economic characteristics of early river civilizations
- Describe the emergence of social hierarchies in early river civilizations
- Explain how job specialization and other economic changes gave rise to organized government in early river civilizations
- Infer how cooperation within and conflict among early civilizations may have impacted the use of resources
- Use a map to explain the impact of geographic factors on early human settlement

4. Unit Review and Test

- Explain how scientists use evidence to interpret history
- Explain the features of early civilizations
- Identify the effects of Neolithic Revolution on humanity

17. Ancient Middle East and Egypt

1. Sumer and Mesopotamia

- Evaluate the lasting impact of ancient civilizations in Mesopotamia
- Identify causes and effects of the rise of the Persian empire
- Describe the impact of Hammurabi's Code on later political and legal ideas
- Describe political, economic, and social characteristics of ancient civilizations and empires in Mesopotamia
- Explain the influence of geographic factors on ancient Mesopotamian civilizations and empires

2. The Hebrews and the Origins of Judaism

- Describe the development of monotheism
- Explain the origins, key teachings, and influence of Judaism
- Evaluate the impact of the Jewish Ten Commandments on later political and legal ideas
- Describe the social, economic, political, and religious characteristics of ancient Israel
- Explain the impact of geographic factors on the development of Hebrew civilization and the spread of Judaism

3. Egyptian Civilization

- Explain events and conditions that led to the rise of Egyptian civilization
- Explain the lasting legacy of ancient Egypt
- Explain the impact of geographic factors on ancient Egyptian civilization
- Describe the government, society, and religious beliefs of ancient Egypt
- Describe the technological, artistic, and other cultural achievements of ancient Egypt
- Compare the social status of women in Egypt to that of other women in the ancient world

4. Unit Review and Test

- Analyze the development of the ancient civilizations of the Middle East and Egypt

- Explain the influences of ancient Egypt and Middle Eastern civilizations on modern civilization
- Analyze the origins and key teachings of Judaism

18. The Americas

1. Civilizations in Middle America

- Explain how the Neolithic Revolution gave rise to civilizations in Middle America
- Explain the influence of the Olmec civilization on the development of the Maya and the Aztec civilizations
- Compare political, economic and social characteristics of the Maya and Aztec civilizations
- Summarize the scientific and cultural achievements of the Maya and the Aztec
- Infer how cooperation within and conflict among early Middle American civilizations affected use of resources in the region

2. The World of the Incas

- Describe political, economic, and social characteristics of the Inca civilization
- Summarize the scientific and cultural achievements of early Andean cultures and the Incas
- Evaluate how unity and cooperation within the Inca empire enabled the Inca to better control resources
- Explain how early Andean civilizations gave rise to the Incas
- Describe the roles of women and family in the Inca empire
- Use maps to evaluate the impact of geographic features on the settlement and expansion of the Incas

3. The People of North America

- Describe the political, economic, and social characteristics of early peoples in North America
- Explain how the competition for resources led to cooperation within and conflict among Native American groups
- Describe the impact of farming on the rise of civilization in North America
- Compare the roles of women and men among early peoples in North America
- Evaluate the impact of geographic factors on the development of distinct culture groups in North America

4. Unit Review and Test

- Describe the development and decline of the Mayan, Incan, and Aztec civilizations
- Evaluate the origin of major scientific, mathematical, and technological advances in the Maya, Inca, and Aztec civilizations

19. Ancient India and China

1. Early Civilization and Religion in South Asia

- Explain the origins and key teachings of Hinduism and Buddhism
- Describe the religious, political, and cultural legacy of early civilizations in South Asia
- Evaluate the impact of geographic factors on the rise and decline of early civilizations in South Asia
- Analyze the political, economic, social, and religious features of early civilizations in South Asia

2. Powerful Empires Emerge in India

- Explain the origins and influence of the Maurya and Gupta empires

- Describe the political, social, economic, and religious characteristics of the Maurya empire
 - Describe the political, social, economic, and religious characteristics of the Gupta empire
 - Evaluate the impact of geographic factors on the rise and decline of the Maurya and Gupta empires
 - Describe the roles of women, children and family in the Maurya and Gupta empires
 - Write and cite evidence to defend a thesis statement
3. Ancient Civilization in China
- Describe the origins and impact of the development of the Zhou empire in China
 - Explain how early river valley civilizations in China gave rise to later civilizations
 - Explain geographic influences on the development of early civilizations in China
 - Analyze the political, social, economic, and religious characteristics of the Zhou empire in China
 - Summarize the key teachings of Confucianism and Daoism
4. Strong Rulers Unite China
- Summarize the scientific, technological, and cultural achievements of Han China
 - Describe the spread of Buddhism in ancient China
 - Explain the causes behind the decline of Han China
 - Evaluate the legacy of the Qin and Han dynasties in China
 - Describe social, political, and economic characteristics of China under the Qin and Han dynasties
5. Ancient India and China Portfolio
- Use historical and geographic information to draw inferences and conclusions
 - Write and cite evidence to defend a thesis statement
6. Unit Review and Test
- Analyze the development of the ancient civilizations of India and China
 - Explain the influences of ancient India and China on modern civilization
 - Analyze the origins and key teachings of Hinduism, Buddhism, Daoism, and Confucianism

20. Ancient Greece

1. Early Greece
- Explain the origins and decline of early Minoan and Mycenaean civilizations
 - Describe the culture of early Minoan and Mycenaean civilizations
 - Describe the cultural legacy of early Greek civilization
 - Analyze social, political and economic characteristics of early Minoan and Mycenaean civilizations
2. The Greek City-States
- Describe the lasting impact of the political ideas and structures of the ancient Greek city-states
 - Compare and contrast the systems of government among classical Greek city-states
 - Describe the roles of men, women, and families in early Greek city-states
 - Explain the effects of conflict among the city-states of Athens and Sparta

- Use maps to evaluate the impact of geographic factors on the formation of Greek city-states
3. Greek Thinkers, Artists, Writers, and Leaders
 - Analyze the political and philosophical ideas of classical Greek thinkers, including those of Socrates, Plato, and Aristotle
 - Evaluate the influence of classical Greek political thought on modern institutions of law and government
 - Identify the impact of innovations and ideas from classical Greek scientists and mathematicians
 - Analyze the artistic, architectural, and literary achievements of ancient Greece
 4. Unit Review and Test
 - Explain the causes and effects of the development of the classical civilization of Greece
 - Analyze how the ethical and moral principles of early civilizations affected the development of Western political thought
 - Evaluate the origin and impact of mathematical, scientific, and technological ideas in classical Greece
 - Explain the influence of religious and philosophical beliefs in ancient Greece on modern society

21. Ancient Rome

1. The Roman Republic
 - Explain the political legacy of the Roman republic
 - Summarize characteristics and institutions of the Roman republic
 - Describe the roles of men, women, and the family in the Roman republic
 - Evaluate the influence of senators, consuls, and other officials in the Roman republic
 - Describe elements of culture in early Rome and the Roman republic
2. The Roman Empire: Rise and Decline
 - Summarize events that led to the rise of the Roman empire
 - Explain contributing factors to the decline of the western Roman empire
 - Identify the contributions of significant Romans
 - Compare and contrast Roman society and government under the Roman republic and the Roman empire
3. The Legacy of Rome
 - Describe the lasting influence of Roman political institutions
 - Describe the literary, artistic, and other elements of culture handed down from ancient Rome
 - Describe the scientific, mathematical, and technological achievements of ancient Rome
 - Explain how the Roman empire spread and integrated culture on three continents
4. The Origins of Christianity
 - Explain the origins and key teachings of Christianity
 - Analyze the similarities and differences between Christian ethics and Roman law and governance
 - Assess the role of individuals in the development and spread of Christianity
5. Unit Review and Test

- Explain the causes and effects of the development of the classical civilization of Rome
- Analyze how the ethical and moral principles of early civilizations affected the development of Western political thought
- Evaluate the origin and impact of mathematical, scientific, and technological ideas in classical Rome
- Explain the influence of religious and philosophical beliefs in ancient Rome on modern society

22. Medieval Christian Europe, Part I

1. The Early Middle Ages

- Describe the rise and influence of the Byzantine empire
- Describe social, political, and economic characteristics of early medieval Europe
- Identify factors behind the spread of Christianity in medieval Europe
- Explain the role of Christianity in uniting medieval Europe and the Byzantine empire
- Explain the influence of geographic factors on medieval European civilization
- Describe the impact of the fall of Rome on European civilization

2. Feudalism and the Manor Economy

- Describe the development of feudalism and manorialism during the Middle Ages
- Summarize the characteristics of feudalism and manorialism in Western Europe
- Explain the economic and social impacts of medieval feudalism and manorialism
- Describe the roles of women and families in medieval society

3. The Medieval Christian Church and Crusades

- Describe causes and effects of the spread of Christianity in medieval Europe
- Describe the rising influence of the Church on society and politics in medieval Europe
- Explain the causes and effects of interaction among Christians, Jews, and Muslims in medieval Europe
- Compare and contrast Roman Catholicism with Eastern Orthodoxy
- Describe changes to medieval society and economic activity over time, as well as the impact of medieval guilds
- Describe the impact of the Church on the roles of women in medieval society

4. The Feudal Monarchs and the Church

- Explain the rise of strong monarchs in medieval Europe
- Describe how the relationship between religious and secular leaders in medieval Europe changed over time
- Describe limits on the powers of medieval monarchies
- Evaluate how the Magna Carta limited the power of the monarch

5. Unit Review and Test

- Analyze the causes and effects of the formation of medieval Europe
- Explain the effects of the economic system of manorialism
- Explain the causes and effects of the rise of the Byzantine empire
- Evaluate the development of Christianity in the Middle Ages

23. Medieval Christian Europe, Part II

1. A Flourishing Culture in the Middle Ages

- Describe key examples of art, architecture, literature, and music characteristic of the Middle Ages
- Identify cultural influences on medieval art, architecture, literature, and music
- Explain the impact of European art, architecture, literature, and music on other cultures and society today
- Describe medieval institutions of education and their role in society, culture, and politics
- Describe the lasting cultural impact of the Byzantine empire

2. The Late Middle Ages: A Time of Upheaval

- Explain factors that contributed to the decline of medieval Europe
- Describe challenges faced by the Church in the late Middle Ages
- Identify causes and consequences of the Black Death and the Hundred Years' War

3. Russia and Eastern Europe

- Describe the influence of geographic factors on the rise of Russian civilization
- Explain the origins and influence of the Russian Orthodox Church
- Summarize political, economic, and cultural aspects of tsarist Russia
- Describe political and cultural influences on Eastern European kingdoms
- Explain the impact of Mongol rule on Russia and Eastern Europe
- Produce a written guide to life in medieval Europe that analyzes the experiences and roles of the serf, merchant and artisan, noble, and ruling class

4. Unit Review and Test

- Explain the lasting impact of the culture of the Middle Ages
- Analyze the causes and effects of the decline of medieval Europe
- Explain how geography influenced the rise and development of Eastern Europe
- Evaluate how modern government is affected by earlier forms of government

24. The Muslim World and Africa

1. The Origins of Islam

- Locate and identify the significance of Mecca and Medina to Islam
- Explain the role of Muhammad and his followers in the development of Islam
- Describe the origins and early spread of Islam
- Summarize the key teachings of Islam
- Evaluate the political and social impact of Islam

2. A Muslim Empire and Its Achievements

- Describe the circumstances that gave rise to Muslim empires in Southwest Asia and North Africa
- Describe society and government under early Islamic empires
- Summarize the artistic, literary, scientific, and other cultural achievements of early Muslim civilization

3. The Ottoman and Safavid Empires

- Describe the causes and effects of the rise of the Ottoman and Safavid empires

- Describe interactions among Muslim, Christian, and Jewish peoples under Ottoman rule
 - Summarize social and political characteristics of the Ottoman and Safavid empires
4. Early Civilizations of Africa
- Describe the impact of Islam on early civilizations in North Africa
 - Summarize political, economic, social, and cultural characteristics of civilizations in Africa
 - Evaluate how geographic features made possible human settlement and encouraged human migration in the region
5. West and East Africa
- Describe the influence of geographic features on the formation of civilization in West Africa and East Africa
 - Explain the factors that contribute to economic interdependence in the region
 - Evaluate the influence of Islam, Judaism, and Christianity on the formation of civilizations in the region
6. Diverse Peoples and Traditions in Africa
- Describe the ways in which art, architecture, and literature reflect African civilization
 - Evaluate the impact of Islam and Christianity on the development of African civilization
 - Explain the role of men, women, and family in African civilizations
7. Unit Review and Test
- Explain the causes and effects of the rise of the Ottoman empire
 - Analyze the rise of Islam and its influence on Europe, Asia, and Africa
 - Analyze the development of the early civilizations of Africa
 - Explain how the arts and religion influence culture

25. Civilizations in Asia

1. The Delhi Sultanate and Mughal India
- Describe the interaction of Muslims and Hindus and the influence of Islam and Hinduism on events in India
 - Describe significant institutions and ideas that originated in India
 - Summarize the central tenets and spread of Islam, Hinduism, and Sikhism in India
 - Analyze the significance of the Taj Mahal as a cultural icon
 - Explain causes and consequences of the Mongol invasion of India
2. Golden Ages of China: Tang and Song Dynasties
- Summarize the political, economic, and social characteristics of Tang and Song China
 - Describe the artistic, scientific, mathematic, and technological achievements of Tang and Song China
 - Explain the roles of men, women, and family in Tang and Song China
 - Evaluate the importance of trade to the development of Tang and Song China
 - Assess the lasting cultural influence of Tang and Song China
3. The Mongol Empire and Ming China
- Describe the causes and consequences of the Mongol invasion of China

- Summarize the political, social, and economic characteristics of China under Mongol rule and the Ming dynasty
 - Identify the contributions of Genghis Khan and Kublai Khan
 - Explain the significance of the Pax Mongolica
 - Describe the importance of economic and cultural activity in Ming China
4. Korea and Japan
- Describe the impact of geographic factors on the development of Korean and Japanese civilization
 - Explain the development of Zen Buddhism and Shinto belief systems
 - Explain China's influence on civilization in Korea and Japan
 - Describe society under dynastic Korea and feudal Japan
 - Summarize the cultural achievements of the Choson dynasty in Korea and the Heian period in Japan
5. The Many Cultures of Southeast Asia
- Explain the influence of India and China on empires in Southeast Asia
 - Summarize the social, political, and economic characteristics of empires in Southeast Asia
 - Describe the artistic, architectural, and other cultural achievements of Southeast Asian civilizations
 - Evaluate the impact of geographic factors on the formation of empires in Southeast Asia
 - Describe the spread of religious ideas in Southeast Asia
6. Unit Review and Test
- Analyze the development of early civilizations in Asia
 - Explain the causes and effects of Mongol invasions on early civilizations
 - Evaluate the influence of the Ming dynasty on world trade
 - Explain the origin and impact of mathematical, scientific, and technological ideas in China prior to 1750
 - Explain the impact of interactions among cultures in Asian civilizations

26. The Renaissance and Reformation

1. The Italian Renaissance
- Summarize the causes and effects of the Italian Renaissance
 - Explain how Renaissance ideas encouraged individualism and secularism
 - Describe examples of art, architecture, and literature from the Italian Renaissance
 - Use maps to evaluate the spread of Renaissance ideas
 - Explain how Renaissance art and literature reflect the culture by which they were produced
2. The Renaissance in Northern Europe
- Explain the impact of the printing press on European society
 - Summarize the causes and effects of the Renaissance in northern Europe
 - Explain how the Renaissance in northern Europe encouraged individualism and secularism
 - Describe the significance of key examples of art, architecture, and literature from the Renaissance in northern Europe

- Explain how northern Renaissance art and literature reflects the culture by which it was produced
3. The Protestant Reformation
 - Describe causes and effects of the Protestant Reformation
 - Explain the impact of the printing press on the spread of Reformation ideas
 - Summarize the roles of key individuals in the Reformation
 - Describe the relationship between Protestant reforms and the growth of individualism and secularism
 4. Reformation Ideas Spread
 - Compare and contrast the origins and practices of Protestant sects that emerged during the Reformation
 - Explain the causes and effects of the Catholic Counter-Reformation
 - Evaluate the impact of Reformation ideas on European society and politics
 - Analyze the roles of men, women, and children during the Reformation
 5. The Scientific Revolution
 - Explain the scientific method and its significance to the Scientific Revolution
 - Identify contributions by Copernicus, Galileo, Isaac Newton, Robert Boyle, and other scientists during the Scientific Revolution
 - Evaluate the nature of the Scientific Revolution as a revolution
 - Explain the causes and effects of the Scientific Revolution in Europe and around the world
 - Explain the relationship between the Scientific Revolution and ideas about individualism and secularism
 6. Unit Review and Test
 - Evaluate the effects of the Renaissance on world history
 - Evaluate the effects of the Reformation on world history
 - Evaluate the effects of the Scientific Revolution on world history

27. **New Global Connections**

1. Europeans Explore Overseas
 - Identify causes and consequences of European exploration in the fifteenth and sixteenth centuries
 - Describe the role of trade in increasing global economic interdependence
 - Explain the influence of geographic factors on European exploration and trade
 - Describe the human characteristics of places in Africa, Asia, and the Americas encountered by European explorers
2. Europeans Gain Footholds in Asia
 - Explain the effects of European exploration and trade in Asia
 - Describe the influence of Ming China on international trade
 - Identify sources of conflict and competition in global trade in the fifteenth and sixteenth centuries
 - Evaluate the impact of geographic factors on global trade
3. European Conquests and Colonies

- Summarize events that led to European exploration and colonization of the Americas
 - Describe the impact of European exploration on the Americas and on Native American civilizations
 - Describe the role of trade and competition in European exploration and colonization
 - Evaluate the role of geographic factors in European exploration and colonization
 - Compare and contrast life in the Spanish, Portuguese, French, and English colonies
4. The Slave Trade and Its Impact on Africa
- Explain the causes and effects of the Atlantic slave trade
 - Compare and contrast the conditions endured by enslaved Africans in different parts of the Americas
 - Explain the geographic, economic, and cultural significance of triangular trade
5. Effects of Global Contact
- Explain the causes and effects of the Columbian Exchange
 - Describe the role of mercantilism in European colonization
 - Explain factors that led to Europe's Commercial Revolution
 - Evaluate geographic features that influenced Europeans trade and colonization
6. Unit Review and Test
- Assess the causes and effects of European trade, exploration, and expansion
 - Evaluate the effects of European colonization in the Americas
 - Analyze the effects of the Atlantic slave trade
 - Explain how European exploration led to global economic change

28. World History Semester Exam

1. World History Semester Exam Review
- Explain the role of geography in shaping civilization
 - Describe factors that influence the structure of government and the exercise of government power
 - Assess the relationship between the political, economic, and social elements of civilization
 - Explain the interrelationship among elements of culture, including art and architecture, literature, science and technology, religion, and political ideology
 - Analyze causes and consequences of economic and social activity, including settlement, trade, migration, colonization, and conflict and cooperation

2. World History Semester Exam

There are no objectives for this lesson.

SEMESTER B

14. Course Overview

1. Getting Started in World History

There are no objectives for this lesson.

15. Absolutism and Revolution

1. Absolute Monarchy in Spain and France

- Describe the absolute monarchies of Spain under Philip II and France under Louis XIV
 - Describe the rights of citizens under absolute monarchies in Spain and France
 - Summarize the cultural achievements of Spain's golden century
 - Describe economic and social aspects of Philip II's Spain and Louis XIV's France
2. Rise of Austria, Prussia, and Russia
- Explain how conflict among nations changed the map of Europe
 - Evaluate the influence of Catherine the Great on Russia and on global relations
 - Describe characteristics of absolute monarchies and the rights of citizens under those monarchies in Austria, Prussia, and Russia
3. Triumph in England and the Enlightenment
- Explain the development of democratic ideas during the Enlightenment
 - Explain the political and social theories of significant Enlightenment thinkers
 - Explain the major tenets and the lasting impact of the English Bill of Rights
 - Identify the causes and effects of the English Civil War and the Glorious Revolution
 - Explain the economic theories of Adam Smith and their impact on the development of the free enterprise system
 - Describe the influence of Elizabeth I on England and on global politics
 - Describe the characteristics of oligarchical rule in England
4. The American Revolution
- Describe the impact of Enlightenment thought on the American Revolution
 - Identify the causes and effects of the American Revolution
 - Describe characteristics of government and the rights of citizens under the U.S. Constitution
 - Evaluate the global impact of the American Revolution and the precedents established by the U.S. Constitution
 - Identify democratic institutions and processes in the United States
5. The French Revolution
- Describe the impact of Enlightenment thought on the French Revolution
 - Identify causes and effects of the French Revolution
 - Describe the impact of earlier revolutions and documents on the French Revolution
 - Explain the events that led from the French Revolution to the rise of Napoleon Bonaparte
 - Describe characteristics of government and the rights of citizens following the French Revolution
 - Summarize the efforts of women to win suffrage during the French Revolution
6. The Age of Napoleon
- Explain the causes and effects of the Napoleonic Wars, in Europe and around the world
 - Explain how Napoleon rose to power in France
 - Describe characteristics of government and the rights of citizens under Napoleon's rule in France
 - Compare and contrast the causes and effects of the American Revolution and the French Revolution

7. Absolutism and Revolution Portfolio

- Use historical and geographic information to draw inferences and conclusions
- Write and cite evidence to defend a thesis statement

8. Unit Review and Test

- Evaluate major events during the Age of Absolutism
- Compare and contrast two revolutions during the Age of Absolutism
- Identify and evaluate the characteristics of various forms of political systems including absolute monarchy, democracy, oligarchy, republic, and limited monarchy
- Explain and compare the ideas of major philosophers of the era
- Explain the influence of political, legal, and economic ideas found in historical documents

16. The Industrial Revolution

1. The First Industrial Revolution

- Describe the causes and effects of the Industrial Revolution, including why England was the first country to industrialize
- Summarize the impact of industrialization on women, children, and families
- Identify significant inventions and innovations of the Industrial Revolution
- Describe how the Industrial Revolution shaped the economic theories of capitalism, socialism, and communism
- Describe the relationship between industrialization, urbanization, and the free enterprise system

2. The Second Industrial Revolution

- Explain the economic, political, and social consequences of the second Industrial Revolution
- Contrast the achievements of the second Industrial Revolution with those of the first Industrial Revolution
- Describe the impact of industrialization on standards of living and ways of life
- Evaluate the changing relationship between big business and labor
- Assess the geographic context of the Industrial Revolution

3. The Changing Ways of Life and Thought

- Explain the origins, efforts, and outcomes of the women's suffrage movement
- Describe the cultural impact of industrialization, including the development of Romanticism and Realism
- Explain how artistic and literary works reflected the culture in which they were produced, as well as universal themes
- Explain how specific inventions and innovations changed daily life and society in the late nineteenth and early twentieth centuries

4. Unit Review and Test

- Explain the causes of the Industrial Revolution
- Evaluate how the Industrial Revolution brought about social, economic, scientific, and cultural change
- Explain the historical origins and characteristics of various systems, including capitalism, socialism, and communism

17. Nationalism and the Spread of Democracy

1. Change in Europe and Latin America

- Explain the origins, including the role of nationalism, of political revolution in Europe and Latin America
- Describe the outcomes of political revolution in Europe and Latin America
- Explain the contributions of significant individuals in revolutionary nationalist movements
- Summarize the economic and social effects of political change in Europe and Latin America

2. The Unification of Germany and Italy

- Explain the role of nationalism in uniting German and Italian kingdoms
- Summarize the causes and consequences of the unification of Germany
- Summarize the causes and consequences of the unification of Italy
- Describe the significant roles played by German and Italian leaders
- Assess German and Italian society and economic growth under nationalist rule

3. Changes and Division in Britain and France

- Describe the influence of Queen Victoria on English and global politics and society
- Evaluate the changing roles and rights of women in England and France in the late nineteenth century
- Summarize the causes and effects of democratic and economic reforms in France at the turn of the century
- Summarize the causes and effects of democratic and economic reforms in England at the turn of the century
- Explain the sources of conflict in late nineteenth-century English and French society

4. Growth of the United States

- Describe the changing roles of women in the United States in the late nineteenth and early twentieth centuries
- Evaluate geographic factors that made possible the expansion of the United States
- Describe the impact of industrialization on the expansion and economic growth of the United States
- Evaluate Manifest Destiny as a nationalist idea that united and divided citizens in the United States
- Summarize the causes and effects of the abolition of slavery in the United States

5. Nationalism in Eastern Europe and Russia

- Describe how nationalist forces in Central and Eastern Europe led to conflict
- Explain the causes and effects of Russian expansion in the nineteenth century
- Describe characteristics of autocratic rule in Russia
- Summarize the origins and consequences of the Crimean War
- Describe social, political, and economic impacts of industrialization in Russia

6. Nationalism and the Spread of Democracy Portfolio

- Analyze the impact of conflict and cooperation among groups and organization on global development and relations

7. Unit Review and Test

- Identify and evaluate the influence of various economic, social, and political conditions on political revolutions in the nineteenth century
- Summarize the effects of political and economic reform in Europe and Latin America
- Evaluate the contributions of significant individuals in revolutionary nationalist movements
- Describe the impact of industrialization on nationalism in the United States

18. The Age of Imperialism

1. The New Imperialism

- Explain causes and effects of Western imperialism
- Describe the relationship between industrialization and imperialism
- Evaluate the impact of geographic and technological factors on Western imperialism
- Describe political, economic, social, and cultural characteristics of Western imperial rule

2. European Colonies in Africa

- Explain the causes of European imperialism in Africa
- Explain the effects of Western imperial rule in Africa
- Describe the geographic impact of Western imperial rule in Africa
- Describe the perspective of resistance movements to Western imperial rule
- Describe the culture of indigenous peoples in Africa

3. Europe in the Muslim World

- Summarize the causes of European interest in Southwest Asia, North Africa, and India
- Compare and contrast the influence of Western imperial powers on different Muslim nations and India
- Describe the political, economic, social, and cultural impact of European involvement in Southwest Asia, North Africa, and India
- Analyze the response of Indian and Muslim peoples and nations to Western imperialism
- Assess the causes and effects of the Armenian genocide

4. China and the West

- Explain the economic interest of Western powers in China
- Describe the efforts and consequences of Western nations to open China to trade
- Analyze efforts to resist Western imperialism and the role of Sun Yat-sen (Sun Yixian) in Chinese independence
- Evaluate the relationship between Western imperialism and regional conflict

5. Japan, Southeast Asia, and the Pacific

- Explain the causes and effects of Western interest in Japan, Southeast Asia, and the Pacific
- Explain the origins and consequences of Japanese imperialism
- Evaluate geographic influences on trade, imperialism, and conflict in Japan, Southeast Asia, and the Pacific
- Evaluate the role of transportation and technology in opening Japan, Southeast Asia, and the Pacific to foreign influence
- Describe the efforts and outcomes of independence movements in the region

6. The Americas in the Age of Imperialism

- Summarize the political, economic, social, and cultural causes that gave rise to American imperialism
- Compare and contrast American influence in different regions of the world
- Use maps to evaluate the impact of geographic factors on American involvement in Latin America
- Describe the origins and consequences of independence movements in Latin America
- Compare and contrast the independence movement in Canada with that of Latin American nations
- Compare and contrast the perspectives of imperial powers and those colonized

7. Unit Review and Test

- Analyze the political and economic motivations behind imperialism
- Explain how European powers expanded their empires during the Age of Imperialism
- Evaluate the political, cultural, social, and economic impact of European imperialism
- Discuss the characteristics and effects of imperialism from multiple perspectives
- Explain the role of technology in European imperialism

19. World War I and the Russian Revolution

1. World War I Begins

- Explain how militarism and nationalism led to World War I
- Explain how the alliance system contributed to the onset of World War I
- Explain how political rivalries and ethnic tensions moved Europe toward World War I
- Summarize actions and arguments by national leaders that contributed to the outbreak of war
- Use maps to evaluate the influence of geographic factors on the start of World War I

2. Fighting the Great War

- Describe major characteristics of World War I, including the use of trench warfare
- Explain the impact of modern technology on the conduct of World War I
- Summarize the human and economic costs of the war, including attacks against civilians
- Identify significant battles and turning points of World War I

3. World War I Ends

- Analyze the arguments and events that led the United States to enter World War I
- Explain the political and economic effects of the Treaty of Versailles and the formation of the League of Nations
- Describe the impact of the United States' refusal to join the League of Nations
- Describe the mandate system that resulted from the end of the war
- Explain the global impact of the influenza pandemic in 1918
- Describe the roles of women in the war
- Describe the use of propaganda to mobilize nations for total war

4. Revolution in Russia

- Explain the establishment of the Union of Soviet Socialist Republics
- Distinguish between the revolutions of 1917 in Russia

- Summarize the causes and effects of the Russian Revolution
- Describe the conflict and politically motivated violence that resulted from the Russian Revolution

5. Unit Review and Test

- Analyze the causes, major events, and effects of World War I
- Evaluate how technological innovation impacted the characteristics of World War I
- Explain the political and economic impacts of the League of Nations, Wilson's Fourteen Points, and the Treaty of Versailles
- Identify the causes and effects of the Russian Revolution

20. The World Between the Wars

1. Latin America, Africa, and the Middle East

- Explain the causes and effects of political revolution in Mexico
- Explain the causes and effects of political revolution in Central and South America
- Explain the origins and outcomes of nationalist movements in Africa and the Middle East
- Evaluate the Good Neighbor Policy of the United States and its consequences
- Explain the impact of global depression on nations in Latin America, Africa, and the Middle East
- Describe life in South Africa under the rule of apartheid

2. India Seeks Self-Rule

- Explain the causes and effects of the Indian independence movement
- Describe the use of nonviolent disobedience by supporters of Indian self-rule
- Describe life in India under British imperial rule
- Identify specific reforms sought by Mohandas Gandhi in India
- Explain the role of Mohandas Gandhi in protesting British rule of India

3. New Forces in China and Japan

- Describe the causes and effects of the competition for power between Chinese Nationalists and Communists
- Explain the origins and consequences of the rise of Japanese ultranationalists
- Assess the role of Emperor Hirohito and Mao Zedong in achieving political change in Japan and China
- Explain the impact of global depression on events in China and Japan
- Summarize political, economic, and social challenges faced by republican and liberal forces in China and Japan

4. The West After World War I

- Describe foreign policy challenges faced by Western nations following World War I
- Explain the causes and effects of the Great Depression on the United States and Europe
- Summarize global responses to the Great Depression
- Describe scientific, artistic, literary, and other cultural achievements in the United States and Europe between the world wars
- Explain the changing roles of women in the period between the world wars

5. Dictators in Italy and the Soviet Union

- Explain the causes and effects of Benito Mussolini's rise to power in Italy
- Explain how Joseph Stalin secured power in the Soviet Union
- Explain the response of Stalin's Soviet Union to economic depression
- Describe political, economic, and social aspects of totalitarian rule in Italy and the Soviet Union
- Evaluate the human cost of Stalin's economic policies and political purges

6. The Rise of Nazi Germany

- Explain the causes and effects of the rise to power of Adolf Hitler and the Nazi party in Germany
- Summarize the key tenets and goals of Adolf Hitler and the Nazi party
- Describe the response of Adolf Hitler and the Nazi party to global depression
- Describe life in Germany under the fascist rule of the Nazi party

7. Unit Review and Test

- Identify and evaluate the rise of totalitarian governments after World War I
- Explain the causes and effects of nationalist movements after World War I
- Explain the roles of various world leaders between the world wars
- Describe the impact of global economic depression after World War I
- Evaluate the cultural, technological, and scientific changes that occurred between the world wars

21. World War II

1. Aggression, Appeasement, and War

- Explain the causes and effects of the Nazi-Soviet Pact in 1939
- Describe the impact of the Japanese invasion of China and Southeast Asia
- Summarize the political, military, and economic causes that led to World War II
- Sequence the chain of events that led to a declaration of war by Britain and France
- Assess the impact of policies of appeasement and nonintervention on World War II
- Summarize the role of world leaders, including Adolf Hitler, Francisco Franco, and Winston Churchill, in the outbreak of war

2. Axis Powers Advance

- Explain why the attack on Pearl Harbor brought the United States into World War II
- Summarize the advance of Nazi forces across Europe
- Describe causes and effects of the Nazi invasion of the Soviet Union
- Use maps to assess geographic challenges faced by Nazi Germany during World War II

3. The Holocaust

- Identify population groups persecuted by the Nazis during the Holocaust
- Explain events and policies pursued by the Nazis during the Holocaust
- Describe the responses of Allied nations and world leaders to the Holocaust
- Summarize the human costs of the Holocaust

4. The Allies Turn the Tide

- Describe turning points in World War II
 - Explain Allied goals and strategies during World War II
 - Describe the contributions of women to World War II
 - Use maps to evaluate the impact of geographic factors on events during World War II
 - Identify and discuss possible justifications for war
5. Victory for the Allies
- Explain the role of world leaders in negotiating the peace after World War II
 - Summarize the human costs of World War II
 - Explain the events that led to the conclusion of World War II
 - Describe the formation and purpose of the United Nations
 - Explain the role of atomic weapons in bringing World War II to a close
 - Explain the significance of the Nuremberg Trials
 - Use maps to assess geographic factors in the outcome of World War II
6. Unit Review and Test
- Identify and evaluate the causes, major events, and effects of World War II
 - Describe the impact of World War II on the civilian population
 - Describe the impact of military and political leaders prior to and during World War II
 - Discuss the justification of war

22. The Cold War Era

1. A New Global Conflict
- Explain causes and effects of the Cold War
 - Describe the origins and outcomes of political uprisings against Soviet rule in Eastern Europe
 - Assess the goals of alliances and international organizations during the Cold War
 - Evaluate causes and effects of the arms race that took place during the Cold War
 - Contrast life under totalitarian rule in the Soviet Union and Eastern European satellite nations with life in democratic nations
 - Use maps to assess the influence of geographic factors in the Cold War
2. The Western Democracies and Japan
- Describe the postwar economic recovery of Japan and European nations
 - Explain the economic and political challenges faced by the United States and Western European nations following World War II
 - Assess the effectiveness of the civil rights movement in the United States in achieving democratic reform
 - Explain the role of Margaret Thatcher in postwar Britain
 - Assess the impact of World War II and the Cold War on colonial independence movements
3. Communism and War in Asia
- Analyze the causes and effects of the Chinese Civil War, including the role of Mao Zedong
 - Explain Chinese influence on conflict in Southeast Asia
 - Explain how the Cold War contributed to violent conflict in Korea, Vietnam, and Cambodia

- Describe the circumstances of the mass murder committed by the Khmer Rouge in Cambodia
 - Analyze the Cold War strategies and goals pursued by the United States and the Soviet Union in Asia
 - Compare and contrast the social, political, and military situations in Korea, Vietnam, and Cambodia that contributed to the outbreak of war
4. The Cold War Ends
- Explain the role of key leaders, including Lech Walesa, Mikhail Gorbachev, and Ronald Reagan, in bringing about the end of the Cold War
 - Describe events that led to the collapse of communism in Eastern Europe and in the Soviet Union
 - Analyze the causes of the decline of communist economies in the late twentieth century
 - Explain the rise of free market economies in Eastern Europe and Asia following the collapse of the Soviet Union
 - Describe the global consequences of the breakup of the Soviet Union
5. Unit Review and Test
- Identify and evaluate the social, political, and technological structures of the United States and the Soviet Union during the Cold War
 - Analyze the effects of the spread of communism to non-Soviet nations
 - Describe the global effect of the fall of the Soviet Union

23. New Nations Emerge

1. New Nations in South Asia and Southeast Asia
- Explain the impact of U.S. and Soviet Cold War policies on nations in South Asia and Southeast Asia
 - Assess the political impact of Indira Gandhi's policies in India
 - Analyze the influence of geographic and cultural factors on the formation of new nations in South Asia and Southeast Asia
 - Describe the nation-building efforts undertaken in South Asia and Southeast Asia and their outcomes
 - Describe the rights of citizens in democratic India
 - Explain how citizens' rights differ under militaristic and democratic governments in Myanmar, Indonesia, and the Philippines
2. African Nations Win Independence
- Describe the origins and outcomes of independence movements in Africa
 - Explain social, cultural, and economic challenges faced by African nations today
 - Analyze the causes and effects of genocide in Darfur and Rwanda
 - Describe the international response to humanitarian crises in Africa
 - Use maps to evaluate geographic factors that have contributed to conflict within and among African nations
 - Evaluate the need for strong government in order for new nations to succeed
3. The Modern Middle East Takes Shape
- Describe the origins and consequences of nation-building in the Middle East

- Describe economic, political, cultural, and ethnic challenges faced by countries in the Middle East in the past and today
 - Describe life under theocratic rule in the Middle East
 - Compare and contrast systems of governance among nations in the Middle East
 - Describe the role of Golda Meir in achieving Israeli independence
4. Conflicts in the Middle East
- Describe the causes and effects of ongoing conflict in the Middle East
 - Summarize domestic and foreign policy challenges faced by nations in the Middle East
 - Evaluate efforts to restore and maintain peace in the Middle East
 - Describe political, social, cultural, and ethnic characteristics of Middle Eastern nations that have contributed to conflict
5. Unit Review and Test
- Explain how geography and culture influenced independence movements in Asia, Africa, and the Middle East
 - Explain the causes and effects of regional conflicts in various parts of the world
 - Explain the effects of influential figures in nation-building during the late twentieth century
 - Summarize the efforts to maintain peace in the Middle East

24. The World Today Part I

1. Challenges of Development
- Evaluate the benefits of economic growth for people in developing nations
 - Describe the impact of technology on economic growth and social change in developing nations
 - Describe characteristics of industrialized and developing nations
 - Describe efforts of African groups and individuals, including the work of Wangari Maathai, to improve their economies and societies
 - Summarize efforts to overturn the system of apartheid in South Africa and the outcomes, including the role of Nelson Mandela
 - Describe economic, social, health, and environmental challenges faced by African nations today
2. Rapid Development in China and India
- Describe examples of political repression in China
 - Describe challenges faced by China and India today
 - Explain the contributions of Mother Teresa
 - Explain civil efforts to reform economic, social, and political systems in China
 - Explain civil efforts to reform economic, social, and political systems in India
 - Evaluate the impact of economic reforms in China and India
3. Latin American Nations Move Toward Democracy
- Describe the impact of economic conditions on Latin American society
 - Explain democratic reform movements and their outcomes in Latin America
 - Evaluate how U.S. intervention contributed to the rise of repressive regimes in Latin America

- Identify examples of political repression and resistance efforts in Latin American nations
- Explain the formation and goals of the Organization of American States
- Describe the contributions of Oscar Romero and Mothers of the Plaza de Mayo to reform in Latin America

4. The Industrialized World

- Explain the purpose and contributions of the European Union
- Describe the impact of market economic policies in Russia and in Asia
- Compare political and economic changes in Europe and Russia since the end of the Cold War
- Assess factors that contributed to violence in the Balkans
- Explain economic and social challenges faced by Russia and the government's responses

5. Unit Review and Test

- Compare challenges in developing nations
- Identify and evaluate human rights issues in various nations and regions of the world
- Summarize the role and impact of individuals and organizations on political and social reform

25. The World Today Part II

1. Globalization and Trade

- Identify contributing factors to globalization, including industrialization and technological innovation
- Explain political, economic, social, and cultural impacts of globalization on nations around the world
- Assess the role of international treaties and organizations in growing global trade
- Summarize causes and effects of global economic interdependence, including competition, scarcity, and specialization

2. Modern Issues in International Society

- Explain the global impact of terrorism in the late twentieth and early twenty-first centuries
- Identify examples of modern humanitarian crises in the world
- Assess the international response to human rights issues
- Explain economic, environmental, and social challenges faced by nations today

3. Advances in Science and Technology

- Explain the causes and effects of the space race
- Describe how computers and the Internet have changed the ways in which people live and communicate ideas and information
- Summarize the economic impact of modern technological innovations
- Evaluate the effects and potential effects of biotechnology and genetic engineering
- Assess the impact of technology on standards of living in developed and developing nations

4. Unit Review and Test

- Explain the risks and benefits of globalization and interdependence
- Describe modern advancements in science and technology
- Evaluate threats to global security

26. World History Semester Exam

1. World History Semester Exam Review

- Summarize the contributions of individuals, groups, and institutions to historic events
- Explain the origins of and changes in civic ideals and practices over time
- Assess the impact of global connections on economics, culture, and politics
- Describe the development of systems of production, distribution, and consumption, as well as their impact on societies
- Analyze factors that influence continuity and change within and among civilizations

2. World History Semester Exam

There are no objectives for this lesson.

World History Honors

Honors World History

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise Honors World History. Pearson's *World History* provides the basis for instruction. This rigorous course provides the student with a comprehensive examination of world history from ancient times through the Global Age. The student will begin by exploring prehistory and early civilizations, focusing on the ancient civilizations of the Americas, Egypt, India, China, Greece, and Rome. The student will then study Medieval Christian Europe from the early to the late Middle Ages, followed by regional civilizations with a focus on the Muslim world, Africa, and Asia. Finally, the student will explore early modern times with a focus on the Renaissance, Reformation, and the Global Age. Portfolios, comprehension questions, and unit tests are differentiated from the standard World History course to provide a higher level of rigor for Honors students.

Semester A Outline

1. Course Overview

1. Getting Started in World History

2. Origins of Civilization

1. Learning About Our Past

- Identify how scientists and scholars use evidence to learn about the past
- Explain the methods anthropologists use to study prehistory
- Describe how archaeological discoveries influence views about early humans

2. The Neolithic Revolution

- Identify characteristics of early humans during the Old Stone Age
- Analyze how the Neolithic Revolution changed the way early humans lived
- Explain how economic factors such as surplus caused political changes during the Neolithic Revolution

3. A Civilization Begins

- Explain the impact of farming on life among Neolithic peoples
- Describe the cultural, political, and economic characteristics of early river civilizations

- Describe the emergence of social hierarchies in early river civilizations
- Explain how job specialization and other economic changes gave rise to organized government in early river civilizations
- Infer how cooperation within and conflict among early civilizations may have impacted the use of resources
- Use a map to explain the impact of geographic factors on early human settlement

4. Unit Review and Test

- Explain how scientists use evidence to interpret history
- Explain the features of early civilizations
- Identify the effects of Neolithic Revolution on humanity

3. Ancient Middle East and Egypt

1. Sumer and Mesopotamia

- Evaluate the lasting impact of ancient civilizations in Mesopotamia
- Identify causes and effects of the rise of the Persian empire
- Describe the impact of Hammurabi's Code on later political and legal ideas
- Describe political, economic, and social characteristics of ancient civilizations and empires in Mesopotamia
- Explain the influence of geographic factors on ancient Mesopotamian civilizations and empires

2. The Hebrews and the Origins of Judaism

- Describe the development of monotheism
- Explain the origins, key teachings, and influence of Judaism
- Evaluate the impact of the Jewish Ten Commandments on later political and legal ideas
- Describe the social, economic, political, and religious characteristics of ancient Israel
- Explain the impact of geographic factors on the development of Hebrew civilization and the spread of Judaism

3. Egyptian Civilization

- Explain events and conditions that led to the rise of Egyptian civilization
- Explain the lasting legacy of ancient Egypt
- Explain the impact of geographic factors on ancient Egyptian civilization
- Describe the government, society, and religious beliefs of ancient Egypt
- Describe the technological, artistic, and other cultural achievements of ancient Egypt
- Compare the social status of women in Egypt to that of other women in the ancient world

4. Unit Review and Test

- Analyze the development of the ancient civilizations of the Middle East and Egypt
- Explain the influences of ancient Egypt and Middle Eastern civilizations on modern civilization
- Analyze the origins and key teachings of Judaism

4. The Americas

1. Civilizations in Middle America

- Explain how the Neolithic Revolution gave rise to civilizations in Middle America

- Explain the influence of the Olmec civilization on the development of the Maya and the Aztec civilizations
- Compare political, economic, and social characteristics of the Maya and Aztec civilizations
- Summarize the scientific and cultural achievements of the Maya and the Aztec
- Infer how cooperation within and conflict among early Middle American civilizations affected use of resources in the region

2. The World of the Incas

- Describe political, economic, and social characteristics of the Inca civilization
- Summarize the scientific and cultural achievements of early Andean cultures and the Incas
- Evaluate how unity and cooperation within the Inca empire enabled the Inca to better control resources
- Explain how early Andean civilizations gave rise to the Incas
- Describe the roles of women and family in the Inca empire
- Use maps to evaluate the impact of geographic features on the settlement and expansion of the Incas

3. The People of North America

- Describe the political, economic, and social characteristics of early peoples in North America
- Explain how the competition for resources led to cooperation within and conflict among Native American groups
- Describe the impact of farming on the rise of civilization in North America
- Compare the roles of women and men among early peoples in North America
- Evaluate the impact of geographic factors on the development of distinct culture groups in North America

4. Unit Review and Test

- Describe the development and decline of the Mayan, Incan, and Aztec civilizations
- Evaluate the origin of major scientific, mathematical and technological advances in the Maya, Inca, and Aztec civilizations

5. Ancient India and China

1. Early Civilization and Religion in South Asia

- Explain the origins and key teachings of Hinduism and Buddhism
- Describe the religious, political, and cultural legacy of early civilizations in South Asia
- Evaluate the impact of geographic factors on the rise and decline of early civilizations in South Asia
- Analyze the political, economic, social, and religious features of early civilizations in South Asia

2. Powerful Empires Emerge in India

- Explain the origins and influence of the Maurya and Gupta empires
- Describe the political, social, economic, and religious characteristics of the Maurya empire
- Describe the political, social, economic, and religious characteristics of the Gupta empire
- Evaluate the impact of geographic factors on the rise and decline of the Maurya and Gupta empires
- Describe the roles of women, children, and family in the Maurya and Gupta empires

- Write and cite evidence to defend a thesis statement

3. Ancient Civilization in China

- Describe the origins and impact of the development of the Zhou empire in China
- Explain how early river valley civilizations in China gave rise to later civilizations
- Explain geographic influences on the development of early civilizations in China
- Analyze the political, social, economic, and religious characteristics of the Zhou empire in China
- Summarize the key teachings of Confucianism and Daoism

4. Strong Rulers Unite China

- Summarize the scientific, technological, and cultural achievements of Han China
- Describe the spread of Buddhism in ancient China
- Explain the causes behind the decline of Han China
- Evaluate the legacy of the Qin and Han dynasties in China
- Describe social, political, and economic characteristics of China under the Qin and Han dynasties

5. Ancient India and China Portfolio

- Use historical and geographic information to draw inferences and conclusions
- Write and cite evidence to defend a thesis statement

6. Unit Review and Test

- Analyze the development of the ancient civilizations of India and China
- Explain the influences of ancient India and China on modern civilization
- Analyze the origins and key teachings of Hinduism, Buddhism, Daoism, and Confucianism

6. Ancient Greece

1. Early Greece

- Explain the origins and decline of early Minoan and Mycenaean civilizations
- Describe the culture of early Minoan and Mycenaean civilizations
- Describe the cultural legacy of early Greek civilization
- Analyze social, political, and economic characteristics of early Minoan and Mycenaean civilizations

2. The Greek City-States

- Describe the lasting impact of the political ideas and structures of the ancient Greek city-states
- Compare and contrast the systems of government among classical Greek city-states
- Describe the roles of men, women, and families in early Greek city-states
- Explain the effects of conflict among the city-states of Athens and Sparta
- Use maps to evaluate the impact of geographic factors on the formation of Greek city-states

3. Greek Thinkers, Artists, Writers, and Leaders

- Analyze the political and philosophical ideas of classical Greek thinkers, including those of Socrates, Plato, and Aristotle

- Evaluate the influence of classical Greek political thought on modern institutions of law and government
- Identify the impact of innovations and ideas from classical Greek scientists and mathematicians
- Analyze the artistic, architectural, and literary achievements of ancient Greece

4. Unit Review and Test

- Explain the causes and effects of the development of the classical civilization of Greece
- Analyze how the ethical and moral principles of early civilizations affected the development of Western political thought
- Evaluate the origin and impact of mathematical, scientific, and technological ideas in classical Greece
- Explain the influence of religious and philosophical beliefs in ancient Greece on modern society

7. Ancient Rome

1. The Roman Republic

- Explain the political legacy of the Roman republic
- Summarize characteristics and institutions of the Roman republic
- Describe the roles of men, women, and the family in the Roman republic
- Evaluate the influence of senators, consuls, and other officials in the Roman republic
- Describe elements of culture in early Rome and the Roman republic

2. The Roman Empire: Rise and Decline

- Summarize events that led to the rise of the Roman empire
- Explain contributing factors to the decline of the western Roman empire
- Identify the contributions of significant Romans
- Compare and contrast Roman society and government under the Roman republic and the Roman empire

3. The Legacy of Rome

- Describe the lasting influence of Roman political institutions
- Describe the literary, artistic, and other elements of culture handed down from ancient Rome
- Describe the scientific, mathematical, and technological achievements of ancient Rome
- Explain how the Roman empire spread and integrated culture on three continents

4. The Origins of Christianity

- Explain the origins and key teachings of Christianity
- Analyze the similarities and differences between Christian ethics and Roman law and governance
- Assess the role of individuals in the development and spread of Christianity

5. Unit Review and Test

- Explain the causes and effects of the development of the classical civilization of Rome
- Analyze how the ethical and moral principles of early civilizations affected the development of Western political thought

- Evaluate the origin and impact of mathematical, scientific, and technological ideas in classical Rome
- Explain the influence of religious and philosophical beliefs in ancient Rome on modern society

8. Medieval Christian Europe, Part I

1. The Early Middle Ages

- Describe the rise and influence of the Byzantine empire
- Describe social, political, and economic characteristics of early medieval Europe
- Identify factors behind the spread of Christianity in medieval Europe
- Explain the role of Christianity in uniting medieval Europe and the Byzantine empire
- Explain the influence of geographic factors on medieval European civilization
- Describe the impact of the fall of Rome on European civilization

2. Feudalism and the Manor Economy

- Describe the development of feudalism and manorialism during the Middle Ages
- Summarize the characteristics of feudalism and manorialism in Western Europe
- Explain the economic and social impacts of medieval feudalism and manorialism
- Describe the roles of women and families in medieval society

3. The Medieval Christian Church and Crusades

- Describe causes and effects of the spread of Christianity in medieval Europe
- Describe the rising influence of the Church on society and politics in medieval Europe
- Explain the causes and effects of interaction among Christians, Jews, and Muslims in medieval Europe
- Compare and contrast Roman Catholicism with Eastern Orthodoxy
- Describe changes to medieval society and economic activity over time, as well as the impact of medieval guilds
- Describe the impact of the Church on the roles of women in medieval society

4. The Feudal Monarchs and the Church

- Explain the rise of strong monarchs in medieval Europe
- Describe how the relationship between religious and secular leaders in medieval Europe changed over time
- Describe limits on the powers of medieval monarchies
- Evaluate how the Magna Carta limited the power of the monarch

5. Unit Review and Test

- Analyze the causes and effects of the formation of medieval Europe
- Explain the effects of the economic system of manorialism
- Explain the causes and effects of the rise of the Byzantine empire
- Evaluate the development of Christianity in the Middle Ages

9. Medieval Christian Europe, Part II

1. A Flourishing Culture in the Middle Ages

- Describe key examples of art, architecture, literature, and music characteristic of the Middle Ages

- Identify cultural influences on medieval art, architecture, literature, and music
 - Explain the impact of European art, architecture, literature, and music on other cultures and society today
 - Describe medieval institutions of education and their role in society, culture, and politics
 - Describe the lasting cultural impact of the Byzantine empire
2. The Late Middle Ages: A Time of Upheaval
- Explain factors that contributed to the decline of medieval Europe
 - Describe challenges faced by the Church in the late Middle Ages
 - Identify causes and consequences of the Black Death and the Hundred Years' War
3. Russia and Eastern Europe
- Describe the influence of geographic factors on the rise of Russian civilization
 - Explain the origins and influence of the Russian Orthodox Church
 - Summarize political, economic, and cultural aspects of tsarist Russia
 - Describe political and cultural influences on Eastern European kingdoms
 - Explain the impact of Mongol rule on Russia and Eastern Europe
 - Produce a short story, play, or video that analyzes the experiences and roles of the serf, merchant and artisan, noble, and ruling class
4. Unit Review and Test
- Explain the lasting impact of the culture of the Middle Ages
 - Analyze the causes and effects of the decline of medieval Europe
 - Explain how geography influenced the rise and development of Eastern Europe
 - Evaluate how modern government is affected by earlier forms of government

10. The Muslim World and Africa

1. The Origins of Islam
- Locate and identify the significance of Mecca and Medina to Islam
 - Explain the role of Muhammad and his followers in the development of Islam
 - Describe the origins and early spread of Islam
 - Summarize the key teachings of Islam
 - Evaluate the political and social impact of Islam
2. A Muslim Empire and Its Achievements
- Describe the circumstances that gave rise to Muslim empires in Southwest Asia and North Africa
 - Describe society and government under early Islamic empires
 - Summarize the artistic, literary, scientific, and other cultural achievements of early Muslim civilization
3. The Ottoman and Safavid Empires
- Describe the causes and effects of the rise of the Ottoman and Safavid empires
 - Describe interactions among Muslim, Christian, and Jewish peoples under Ottoman rule
 - Summarize social and political characteristics of the Ottoman and Safavid empires

4. Early Civilizations of Africa

- Describe the impact of Islam on early civilizations in North Africa
- Summarize political, economic, social, and cultural characteristics of civilizations in Africa
- Evaluate how geographic features made possible human settlement and encouraged human migration in the region

5. West and East Africa

- Describe the influence of geographic features on the formation of civilization in West Africa and East Africa
- Explain the factors that contribute to economic interdependence in the region
- Evaluate the influence of Islam, Judaism, and Christianity on the formation of civilizations in the region

6. Diverse Peoples and Traditions in Africa

- Describe the ways in which art, architecture, and literature reflect African civilization
- Evaluate the impact of Islam and Christianity on the development of African civilization
- Explain the role of men, women, and family in African civilizations

7. Unit Review and Test

- Explain the causes and effects of the rise of the Ottoman empire
- Analyze the rise of Islam and its influence on Europe, Asia, and Africa
- Analyze the development of the early civilizations of Africa
- Explain how the arts and religion influence culture

11. Civilizations in Asia

1. The Delhi Sultanate and Mughal India

- Describe the interaction of Muslims and Hindus and the influence of Islam and Hinduism on events in India
- Describe significant institutions and ideas that originated in India
- Summarize the central tenets and spread of Islam, Hinduism, and Sikhism in India
- Analyze the significance of the Taj Mahal as a cultural icon
- Explain causes and consequences of the Mongol invasion of India

2. Golden Ages of China: Tang and Song Dynasties

- Summarize the political, economic, and social characteristics of Tang and Song China
- Describe the artistic, scientific, mathematic, and technological achievements of Tang and Song China
- Explain the roles of men, women, and family in Tang and Song China
- Evaluate the importance of trade to the development of Tang and Song China
- Assess the lasting cultural influence of Tang and Song China

3. The Mongol Empire and Ming China

- Describe the causes and consequences of the Mongol invasion of China
- Summarize the political, social, and economic characteristics of China under Mongol rule and the Ming dynasty
- Identify the contributions of Genghis Khan and Kublai Khan

- Explain the significance of the Pax Mongolica
 - Describe the importance of economic and cultural activity in Ming China
4. Korea and Japan
- Describe the impact of geographic factors on the development of Korean and Japanese civilization
 - Explain the development of Zen Buddhism and Shinto belief systems
 - Explain China's influence on civilization in Korea and Japan
 - Describe society under dynastic Korea and feudal Japan
 - Summarize the cultural achievements of the Choson dynasty in Korea and the Heian period in Japan
5. The Many Cultures of Southeast Asia
- Explain the influence of India and China on empires in Southeast Asia
 - Summarize the social, political, and economic characteristics of empires in Southeast Asia
 - Describe the artistic, architectural, and other cultural achievements of Southeast Asian civilizations
 - Evaluate the impact of geographic factors on the formation of empires in Southeast Asia
 - Describe the spread of religious ideas in Southeast Asia
6. Unit Review and Test
- Analyze the development of early civilizations in Asia
 - Explain the causes and effects of Mongol invasions on early civilizations
 - Evaluate the influence of the Ming dynasty on world trade
 - Explain the origin and impact of mathematical, scientific, and technological ideas in China prior to 1750
 - Explain the impact of interactions among cultures in Asian civilizations

12. The Renaissance and Reformation

1. The Italian Renaissance
- Summarize the causes and effects of the Italian Renaissance
 - Explain how Renaissance ideas encouraged individualism and secularism
 - Describe examples of art, architecture, and literature from the Italian Renaissance
 - Use maps to evaluate the spread of Renaissance ideas
 - Explain how Renaissance art and literature reflect the culture by which they were produced
2. The Renaissance in Northern Europe
- Explain the impact of the printing press on European society
 - Summarize the causes and effects of the Renaissance in northern Europe
 - Explain how the Renaissance in northern Europe encouraged individualism and secularism
 - Describe the significance of key examples of art, architecture, and literature from the Renaissance in northern Europe
 - Explain how northern Renaissance art and literature reflects the culture by which it was produced
3. The Protestant Reformation

- Describe causes and effects of the Protestant Reformation
 - Explain the impact of the printing press on the spread of Reformation ideas
 - Summarize the roles of key individuals in the Reformation
 - Describe the relationship between Protestant reforms and the growth of individualism and secularism
4. Reformation Ideas Spread
- Compare and contrast the origins and practices of Protestant sects that emerged during the Reformation
 - Explain the causes and effects of the Catholic Counter-Reformation
 - Evaluate the impact of Reformation ideas on European society and politics
 - Analyze the roles of men, women, and children during the Reformation
5. The Scientific Revolution
- Explain the scientific method and its significance to the Scientific Revolution
 - Identify contributions by Copernicus, Galileo, Isaac Newton, Robert Boyle, and other scientists during the Scientific Revolution
 - Evaluate the nature of the Scientific Revolution as a revolution
 - Explain the causes and effects of the Scientific Revolution in Europe and around the world
 - Explain the relationship between the Scientific Revolution and ideas about individualism and secularism
6. Unit Review and Test
- Evaluate the effects of the Renaissance on world history
 - Evaluate the effects of the Reformation on world history
 - Evaluate the effects of the Scientific Revolution on world history

13. New Global Connections

1. Europeans Explore Overseas
- Identify causes and consequences of European exploration in the fifteenth and sixteenth centuries
 - Describe the role of trade in increasing global economic interdependence
 - Explain the influence of geographic factors on European exploration and trade
 - Describe the human characteristics of places in Africa, Asia, and the Americas encountered by European explorers
2. Europeans Gain Footholds in Asia
- Explain the effects of European exploration and trade in Asia
 - Describe the influence of Ming China on international trade
 - Identify sources of conflict and competition in global trade in the fifteenth and sixteenth centuries
 - Evaluate the impact of geographic factors on global trade
3. European Conquests and Colonies
- Summarize events that led to European exploration and colonization of the Americas
 - Describe the impact of European exploration on the Americas and on Native American civilizations

- Describe the role of trade and competition in European exploration and colonization
 - Evaluate the role of geographic factors in European exploration and colonization
 - Compare and contrast life in the Spanish, Portuguese, French, and English colonies
4. The Slave Trade and Its Impact on Africa
- Explain the causes and effects of the Atlantic slave trade
 - Compare and contrast the conditions endured by enslaved Africans in different parts of the Americas
 - Explain the geographic, economic, and cultural significance of triangular trade
5. Effects of Global Contact
- Explain the causes and effects of the Columbian Exchange
 - Describe the role of mercantilism in European colonization
 - Explain factors that led to Europe's Commercial Revolution
 - Evaluate geographic features that influenced Europeans trade and colonization
6. Unit Review and Test
- Assess the causes and effects of European trade, exploration, and expansion
 - Evaluate the effects of European colonization in the Americas
 - Analyze the effects of the Atlantic slave trade
 - Explain how European exploration led to global economic change

14. World History Semester Exam

1. World History Semester Exam Review
- Explain the role of geography in shaping civilization
 - Describe factors that influence the structure of government and the exercise of government power
 - Assess the relationship between the political, economic, and social elements of civilization
 - Explain the interrelationship among elements of culture, including art and architecture, literature, science and technology, religion, and political ideology
 - Analyze causes and consequences of economic and social activity, including settlement, trade, migration, colonization, and conflict and cooperation
 - Explain factors that lead to Europe's Commercial Revolution
2. World History Semester Exam

Semester B Summary:

This is the second of two courses that comprise Honors World History. Pearson's *World History* provides the basis for instruction. This course provides the student with a comprehensive examination of world history from the Age of Absolutism through the present day. The student will explore social, political, and economic changes of the nineteenth and twentieth centuries, focusing on the Industrial Age and independence movements around the globe, including the impact of nationalism, imperialism, and the world wars. The later part of the course covers such topics as the Cold War, new nations, and the effects of globalization. Portfolios, comprehension questions, and unit tests are differentiated from the standard World History course to provide a higher level of rigor for Honors students.

Semester B Outline

1. Course Overview

1. Getting Started in World History

2. **Absolutism and Revolution**

1. Absolute Monarchy in Spain and France

- Describe the absolute monarchies of Spain under Philip II and France under Louis XIV
- Describe the rights of citizens under absolute monarchies in Spain and France
- Summarize the cultural achievements of Spain's golden century
- Describe economic and social aspects of Philip II's Spain and Louis XIV's France

2. Rise of Austria, Prussia, and Russia

- Explain how conflict among nations changed the map of Europe
- Evaluate the influence of Catherine the Great on Russia and on global relations
- Describe characteristics of absolute monarchies and the rights of citizens under those monarchies in Austria, Prussia, and Russia

3. Triumph in England and the Enlightenment

- Explain the development of democratic ideas during the Enlightenment
- Explain the political and social theories of significant Enlightenment thinkers
- Explain the major tenets and the lasting impact of the English Bill of Rights
- Identify the causes and effects of the English Civil War and the Glorious Revolution
- Explain the economic theories of Adam Smith and their impact on the development of the free enterprise system
- Describe the influence of Elizabeth I on England and on global politics
- Describe the characteristics of oligarchical rule in England

4. The American Revolution

- Describe the impact of Enlightenment thought on the American Revolution
- Identify the causes and effects of the American Revolution
- Describe characteristics of government and the rights of citizens under the U.S. Constitution
- Evaluate the global impact of the American Revolution and the precedents established by the U.S. Constitution
- Identify democratic institutions and processes in the United States

5. The French Revolution

- Describe the impact of Enlightenment thought on the French Revolution
- Identify causes and effects of the French Revolution
- Describe the impact of earlier revolutions and documents on the French Revolution
- Explain the events that led from the French Revolution to the rise of Napoleon Bonaparte
- Describe characteristics of government and the rights of citizens following the French Revolution
- Summarize the efforts of women to win suffrage during the French Revolution

6. The Age of Napoleon

- Explain the causes and effects of the Napoleonic Wars, in Europe and around the world
- Explain how Napoleon rose to power in France

- Describe characteristics of government and the rights of citizens under Napoleon's rule in France
- Compare and contrast the causes and effects of the American Revolution and the French Revolution

7. Absolutism and Revolution Portfolio

- Use historical and geographic information to draw inferences and conclusions
- Write and cite evidence to defend a thesis statement
- Evaluate the rights of citizens under different forms of government

8. Unit Review and Test

- Evaluate major events during the Age of Absolutism
- Compare and contrast two revolutions during the Age of Absolutism
- Identify and evaluate the characteristics of various forms of political systems including absolute monarchy, democracy, oligarchy, republic, and limited monarchy
- Explain and compare the ideas of major philosophers of the era
- Explain the in

3. The Industrial Revolution

1. The First Industrial Revolution

- Describe the causes and effects of the Industrial Revolution, including why England was the first country to industrialize
- Summarize the impact of industrialization on women, children, and families
- Identify significant inventions and innovations of the Industrial Revolution
- Describe how the Industrial Revolution shaped the economic theories of capitalism, socialism, and communism
- Describe the relationship between industrialization, urbanization, and the free enterprise system

2. The Second Industrial Revolution

- Explain the economic, political, and social consequences of the second Industrial Revolution
- Contrast the achievements of the second Industrial Revolution with those of the first Industrial Revolution
- Describe the impact of industrialization on standards of living and ways of life
- Evaluate the changing relationship between big business and labor
- Assess the geographic context of the Industrial Revolution

3. The Changing Ways of Life and Thought

- Explain the origins, efforts, and outcomes of the women's suffrage movement
- Describe the cultural impact of industrialization, including the development of Romanticism and Realism
- Explain how artistic and literary works reflected the culture in which they were produced, as well as universal themes
- Explain how specific inventions and innovations changed daily life and society in the late nineteenth and early twentieth centuries

4. Unit Review and Test

- Explain the causes of the Industrial Revolution
- Evaluate how the Industrial Revolution brought about social, economic, scientific, and cultural change
- Explain the historical origins and characteristics of various systems, including capitalism, socialism, and communism

4. Nationalism and the Spread of Democracy

1. Change in Europe and Latin America

- Explain the origins, including the role of nationalism, of political revolution in Europe and Latin America
- Describe the outcomes of political revolution in Europe and Latin America
- Explain the contributions of significant individuals in revolutionary nationalist movements
- Summarize the economic and social effects of political change in Europe and Latin America

2. The Unification of Germany and Italy

- Explain the role of nationalism in uniting German and Italian kingdoms
- Summarize the causes and consequences of the unification of Germany
- Summarize the causes and consequences of the unification of Italy
- Describe the significant roles played by German and Italian leaders
- Assess German and Italian society and economic growth under nationalist rule

3. Changes and Division in Britain and France

- Describe the influence of Queen Victoria on English and global politics and society
- Evaluate the changing roles and rights of women in England and France in the late nineteenth century
- Summarize the causes and effects of democratic and economic reforms in France at the turn of the century
- Summarize the causes and effects of democratic and economic reforms in England at the turn of the century
- Explain the sources of conflict in late nineteenth-century English and French society

4. Growth of the United States

- Describe the changing roles of women in the United States in the late nineteenth and early twentieth centuries
- Evaluate geographic factors that made possible the expansion of the United States
- Describe the impact of industrialization on the expansion and economic growth of the United States
- Evaluate Manifest Destiny as a nationalist idea that united and divided citizens in the United States
- Summarize the causes and effects of the abolition of slavery in the United States

5. Nationalism in Eastern Europe and Russia

- Describe how nationalist forces in Central and Eastern Europe led to conflict
- Explain the causes and effects of Russian expansion in the nineteenth century
- Describe characteristics of autocratic rule in Russia
- Summarize the origins and consequences of the Crimean War

- Describe social, political, and economic impacts of industrialization in Russia

6. Unit Review and Test

- Identify and evaluate the influence of various economic, social, and political conditions on political revolutions in the nineteenth century
- Summarize the effects of political and economic reform in Europe and Latin America
- Evaluate the contributions of significant individuals in revolutionary nationalist movements
- Describe the impact of industrialization on nationalism in the United States

5. The Age of Imperialism

1. The New Imperialism

- Explain causes and effects of Western imperialism
- Describe the relationship between industrialization and imperialism
- Evaluate the impact of geographic and technological factors on Western imperialism
- Describe political, economic, social, and cultural characteristics of Western imperial rule

2. European Colonies in Africa

- Explain the causes of European imperialism in Africa
- Explain the effects of Western imperial rule in Africa
- Describe the geographic impact of Western imperial rule in Africa
- Describe the perspective of resistance movements to Western imperial rule
- Describe the culture of indigenous peoples in Africa

3. Europe in the Muslim World

- Summarize the causes of European interest in Southwest Asia, North Africa, and India
- Compare and contrast the influence of Western imperial powers on different Muslim nations and India
- Describe the political, economic, social, and cultural impact of European involvement in Southwest Asia, North Africa, and India
- Analyze the response of Indian and Muslim peoples and nations to Western imperialism
- Assess the causes and effects of the Armenian genocide

4. China and the West

- Explain the economic interest of Western powers in China
- Describe the efforts and consequences of Western nations to open China to trade
- Analyze efforts to resist Western imperialism and the role of Sun Yat-sen (Sun Yixian) in Chinese independence
- Evaluate the relationship between Western imperialism and regional conflict

5. Japan, Southeast Asia, and the Pacific

- Explain the causes and effects of Western interest in Japan, Southeast Asia, and the Pacific
- Explain the origins and consequences of Japanese imperialism
- Evaluate geographic influences on trade, imperialism, and conflict in Japan, Southeast Asia, and the Pacific
- Evaluate the role of transportation and technology in opening Japan, Southeast Asia, and the Pacific to foreign influence

- Describe the efforts and outcomes of independence movements in the region

6. The Americas in the Age of Imperialism

- Summarize the political, economic, social, and cultural causes that gave rise to American imperialism
- Compare and contrast American influence in different regions of the world
- Use maps to evaluate the impact of geographic factors on American involvement in Latin America
- Describe the origins and consequences of independence movements in Latin America
- Compare and contrast the independence movement in Canada with that of Latin American nations
- Compare and contrast the perspectives of imperial powers and those colonized

7. Unit Review and Test

- Analyze the political and economic motivations behind imperialism
- Explain how European powers expanded their empires during the Age of Imperialism
- Evaluate the political, cultural, social, and economic impact of European imperialism
- Discuss the characteristics and effects of imperialism from multiple perspectives
- Explain the role of technology in European imperialism

6. World War I and the Russian Revolution

1. World War I Begins

- Explain how militarism and nationalism led to World War I
- Explain how the alliance system contributed to the onset of World War I
- Explain how political rivalries and ethnic tensions moved Europe toward World War I
- Summarize actions and arguments by national leaders that contributed to the outbreak of war
- Use maps to evaluate the influence of geographic factors on the start of World War I

2. Fighting the Great War

- Describe major characteristics of World War I, including the use of trench warfare
- Explain the impact of modern technology on the conduct of World War I
- Describe the use of propaganda to mobilize nations for total war
- Summarize the human and economic costs of the war, including attacks against civilians
- Identify significant battles and turning points of World War I

3. World War I Ends

- Analyze the arguments and events that led the United States to enter World War I
- Explain the political and economic effects of the Treaty of Versailles and the formation of the League of Nations
- Describe the impact of the United States' refusal to join the League of Nations
- Describe the mandate system that resulted from the end of the war
- Explain the global impact of the influenza pandemic in 1918
- Describe the roles of women in the war
- Describe the use of propaganda to mobilize nations for total war

4. Revolution in Russia

- Explain the establishment of the Union of Soviet Socialist Republics
- Distinguish between the revolutions of 1917 in Russia
- Summarize the causes and effects of the Russian Revolution
- Describe the conflict and politically motivated violence that resulted from the Russian Revolution

5. Unit Review and Test

- Analyze the causes, major events, and effects of World War I
- Evaluate how technological innovation impacted the characteristics of World War I
- Explain the political and economic impacts of the League of Nations, Wilson's Fourteen Points, and the Treaty of Versailles
- Identify the causes and effects of the Russian Revolution

7. The World Between the Wars

1. Latin America, Africa, and the Middle East

- Explain the causes and effects of political revolution in Mexico
- Explain the causes and effects of political revolution in Central and South America
- Explain the origins and outcomes of nationalist movements in Africa and the Middle East
- Evaluate the Good Neighbor Policy of the United States and its consequences
- Explain the impact of global depression on nations in Latin America, Africa, and the Middle East
- Describe life in South Africa under the rule of apartheid

2. India Seeks Self-Rule

- Explain the causes and effects of the Indian independence movement
- Describe the use of nonviolent disobedience by supporters of Indian self-rule
- Describe life in India under British imperial rule
- Identify specific reforms sought by Mohandas Gandhi in India
- Explain the role of Mohandas Gandhi in protesting British rule of India

3. New Forces in China and Japan

- Describe the causes and effects of the competition for power between Chinese Nationalists and Communists
- Explain the origins and consequences of the rise of Japanese ultranationalists
- Assess the role of Emperor Hirohito and Mao Zedong in achieving political change in Japan and China
- Explain the impact of global depression on events in China and Japan
- Summarize political, economic, and social challenges faced by republican and liberal forces in China and Japan

4. The West After World War I

- Describe foreign policy challenges faced by western nations following World War I
- Explain the causes and effects of the Great Depression on the United States and Europe
- Summarize global responses to the Great Depression

- Describe scientific, artistic, literary, and other cultural achievements in the United States and Europe between the world wars
- Explain the changing roles of women in the period between the world wars

5. Dictators in Italy and the Soviet Union

- Explain the causes and effects of Benito Mussolini's rise to power in Italy
- Explain how Joseph Stalin secured power in the Soviet Union
- Explain the response of Stalin's Soviet Union to economic depression
- Describe political, economic, and social aspects of totalitarian rule in Italy and the Soviet Union
- Evaluate the human cost of Stalin's economic policies and political purges

6. The Rise of Nazi Germany

- Explain the causes and effects of the rise to power of Adolf Hitler and the Nazi party in Germany
- Summarize the key tenets and goals of Adolf Hitler and the Nazi party
- Describe the response of Adolf Hitler and the Nazi party to global depression
- Describe life in Germany under the fascist rule of the Nazi party

7. Unit Review and Test

- Identify and evaluate the rise of totalitarian governments after World War I
- Explain the causes and effects of nationalist movements after World War I
- Explain the roles of various world leaders between the world wars
- Describe the impact of global economic depression after World War I
- Evaluate the cultural, technological, and scientific changes that occurred between the world wars

8. World War II

1. Aggression, Appeasement, and War

- Explain the causes and effects of the Nazi-Soviet Pact in 1939
- Describe the impact of the Japanese invasion of China and Southeast Asia
- Summarize the political, military, and economic causes that led to World War II
- Sequence the chain of events that led to a declaration of war by Britain and France
- Assess the impact of policies of appeasement and nonintervention on World War II
- Summarize the role of world leaders, including Adolf Hitler, Francisco Franco, and Winston Churchill, in the outbreak of war

2. Axis Powers Advance

- Explain why the attack on Pearl Harbor brought the United States into World War II
- Summarize the advance of Nazi forces across Europe
- Describe causes and effects of the Nazi invasion of the Soviet Union
- Use maps to assess geographic challenges faced by Nazi Germany during World War II

3. The Holocaust

- Identify population groups persecuted by the Nazis during the Holocaust
- Explain events and policies pursued by the Nazis during the Holocaust

- Describe the responses of Allied nations and world leaders to the Holocaust
- Summarize the human costs of the Holocaust

4. The Allies Turn the Tide

- Describe turning points in World War II
- Explain Allied goals and strategies during World War II
- Describe the contributions of women to World War II
- Use maps to evaluate the impact of geographic factors on events during World War II
- Identify and discuss possible justifications for war

5. Victory for the Allies

- Explain the role of world leaders in negotiating the peace after World War II
- Summarize the human costs of World War II
- Explain the events that led to the conclusion of World War II
- Describe the formation and purpose of the United Nations
- Explain the role of atomic weapons in bringing World War II to a close
- Explain the significance of the Nuremberg Trials
- Use maps to assess geographic factors in the outcome of World War II

6. Unit Review and Test

- Identify and evaluate the causes, major events, and effects of World War II
- Describe the impact of World War II on the civilian population
- Describe the impact of military and political leaders prior to and during World War II
- Discuss the justification of war

9. **The Cold War Era**

1. A New Global Conflict

- Explain causes and effects of the Cold War
- Describe the origins and outcomes of political uprisings against Soviet rule in Eastern Europe
- Assess the goals of alliances and international organizations during the Cold War
- Evaluate causes and effects of the arms race that took place during the Cold War
- Contrast life under totalitarian rule in the Soviet Union and Eastern European satellite nations with life in democratic nations
- Use maps to assess the influence of geographic factors in the Cold War

2. The Western Democracies and Japan

- Describe the postwar economic recovery of Japan and European nations
- Explain the economic and political challenges faced by the United States and Western European nations following World War II
- Assess the effectiveness of the civil rights movement in the United States in achieving democratic reform
- Explain the role of Margaret Thatcher in postwar Britain

3. Communism and War in Asia

- Analyze the causes and effects of the Chinese Civil War, including the role of Mao Zedong

- Explain Chinese influence on conflict in Southeast Asia
- Explain how the Cold War contributed to violent conflict in Korea, Vietnam, and Cambodia
- Describe the circumstances of the mass murder committed by the Khmer Rouge in Cambodia
- Analyze the Cold War strategies and goals pursued by the United States and the Soviet Union in Asia
- Compare and contrast the social, political, and military situations in Korea, Vietnam, and Cambodia that contributed to the outbreak of war

4. The Cold War Ends

- Explain the role of key leaders, including Lech Walesa, Mikhail Gorbachev, and Ronald Reagan, in bringing about the end of the Cold War
- Describe events that led to the collapse of communism in Eastern Europe and in the Soviet Union
- Analyze the causes of the decline of communist economies in the late twentieth century
- Explain the rise of free market economies in Eastern Europe and Asia following the collapse of the Soviet Union
- Describe the global consequences of the breakup of the Soviet Union

5. Unit Review and Test

- Identify and evaluate the social, political, and technological structures of the United States and the Soviet Union during the Cold War
- Analyze the effects of the spread of communism to non-Soviet nations
- Describe the global effect of the fall of the Soviet Union

10. New Nations Emerge

1. New Nations in South Asia and Southeast Asia

- Explain the impact of U.S. and Soviet Cold War policies on nations in South Asia and Southeast Asia
- Assess the political impact of Indira Gandhi's policies in India
- Analyze the influence of geographic and cultural factors on the formation of new nations in South Asia and Southeast Asia
- Describe the nation-building efforts undertaken in South Asia and Southeast Asia and their outcomes
- Describe the rights of citizens in democratic India
- Explain how citizens' rights differ under militaristic and democratic governments in Myanmar, Indonesia, and the Philippines

2. African Nations Win Independence

- Describe the origins and outcomes of independence movements in Africa
- Explain social, cultural, and economic challenges faced by African nations today
- Analyze the causes and effects of genocide in Darfur and Rwanda
- Describe the international response to humanitarian crises in Africa
- Use maps to evaluate geographic factors that have contributed to conflict within and among African nations
- Evaluate the need for strong government in order for new nations to succeed

3. The Modern Middle East Takes Shape

- Describe the origins and consequences of nation-building in the Middle East
 - Describe economic, political, cultural, and ethnic challenges faced by countries in the Middle East in the past and today
 - Describe life under theocratic rule in the Middle East
 - Compare and contrast systems of governance among nations in the Middle East
 - Describe the role of Golda Meir in achieving Israeli independence
4. Conflicts in the Middle East
- Describe the causes and effects of ongoing conflict in the Middle East
 - Summarize domestic and foreign policy challenges faced by nations in the Middle East
 - Evaluate efforts to restore and maintain peace in the Middle East
 - Describe political, social, cultural, and ethnic characteristics of Middle Eastern nations that have contributed to conflict
5. Unit Review and Test
- Explain how geography and culture influenced independence movements in Asia, Africa, and the Middle East
 - Explain the causes and effects of regional conflicts in various parts of the world
 - Explain the effects of influential figures in nation-building during the late twentieth century
 - Summarize the efforts to maintain peace in the Middle East

11. The World Today Part I

1. Challenges of Development
- Evaluate the benefits of economic growth for people in developing nations
 - Describe the impact of technology on economic growth and social change in developing nations
 - Describe characteristics of industrialized and developing nations
 - Describe efforts of African groups and individuals, including the work of Wangari Maathai, to improve their economies and societies
 - Summarize efforts to overturn the system of apartheid in South Africa and the outcomes, including the role of Nelson Mandela
 - Describe economic, social, health, and environmental challenges faced by African nations today
2. Rapid Development in China and India
- Describe examples of political repression in China
 - Describe challenges faced by China and India today
 - Explain the contributions of Mother Teresa
 - Explain civil efforts to reform economic, social, and political systems in China
 - Explain civil efforts to reform economic, social, and political systems in India
 - Evaluate the impact of economic reforms in China and India
3. Latin American Nations Move Toward Democracy
- Describe the impact of economic conditions on Latin American society
 - Explain democratic reform movements and their outcomes in Latin America

- Evaluate how U.S. intervention contributed to the rise of repressive regimes in Latin America
 - Identify examples of political repression and resistance efforts in Latin American nations
 - Explain the formation and goals of the Organization of American States
 - Describe the contributions of Oscar Romero and Mothers of the Plaza de Mayo to reform in Latin America
4. The Industrialized World
- Explain the purpose and contributions of the European Union
 - Describe the impact of market economic policies in Russia and in Asia
 - Compare political and economic changes in Europe and Russia since the end of the Cold War
 - Assess factors that contributed to violence in the Balkans
 - Explain economic and social challenges faced by Russia and the government's responses
5. Unit Review and Test
- Compare challenges in developing nations
 - Identify and evaluate human rights issues in various nations and regions of the world
 - Summarize the role and impact of individuals and organizations on political and social reform

12. The World Today Part II

1. Globalization and Trade
- Identify contributing factors to globalization, including industrialization and technological innovation
 - Explain political, economic, social, and cultural impacts of globalization on nations around the world
 - Assess the role of international treaties and organizations in growing global trade
 - Summarize causes and effects of global economic interdependence, including competition, scarcity, and specialization
2. Modern Issues in International Society
- Explain the global impact of terrorism in the late twentieth and early twenty-first centuries
 - Identify examples of modern humanitarian crises in the world
 - Assess the international response to human rights issues
 - Explain economic, environmental, and social challenges faced by nations today
3. The World Today Portfolio
- Use historical and geographic information to draw inferences and conclusions
 - Write and cite evidence to defend a thesis statement
 - Compare and contrast conditions in developing and developed nations around the world
4. Advances in Science and Technology
- Explain the causes and effects of the space race
 - Describe how computers and the Internet have changed the ways in which people live and communicate ideas and information
 - Summarize the economic impact of modern technological innovations
 - Evaluate the effects and potential effects of biotechnology and genetic engineering
 - Assess the impact of technology on standards of living in developed and developing nations

5. Unit Review and Test

- Explain the risks and benefits of globalization and interdependence
- Describe modern advancements in science and technology
- Evaluate threats to global security

13. World History Semester Exam

1. World History Semester Exam Review

- Summarize the contributions of individuals, groups, and institutions to historic events
- Explain the origins of and changes in civic ideals and practices over time
- Assess the impact of global connections on economics, culture, and politics
- Describe the development of systems of production, distribution, and consumption, as well as their impact on societies
- Analyze factors that influence continuity and change within and among civilizations

2. World History Semester Exam

American Government (Prescriptive)

CR American Government A Syllabus

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Principles of Government

Lesson	Description	Time (min)	Objective(s)
 Principles of Government	This module lesson introduces students to the principles in government.	15	
 Government and the State	This lesson defines government, the powers it holds, and the purpose it holds in the United States and other countries.	45	<p>Define government and the basic powers every government holds</p> <p>Describe the four characteristics of the state</p> <p>Identify four theories that attempt to explain the origin of the state</p> <p>Understand the purpose of government in the United States and other countries</p>
 Quiz: Government and the State			

Lesson	Description	Time (min)	Objective(s)
 Forms of Government	This lesson covers the ways governments are classified and the distribution of government within a state and among the branches.	45	Understand three different ways governments are classified Define systems of government based on who can participate Identify different ways that power can be distributed geographically within a state Describe distribution of government power between the executive branch and the legislative branch
 Quiz: Forms of Government

Course guides provide detailed information on the curriculum including course descriptions, unit summaries, lesson objectives, activities, and assessment types. Course guides include information on:

- Planned instruction (provided in the unit summary of each unit within individual Course Guides)
- Course objectives (provided in the unit and lesson objectives within individual Course Guides)
- Activities (provided in the unit summary and lesson objectives of each unit within individual Course Guides)

Elementary Chinese I

Elementary Chinese I

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Chinese I is an introductory-level course that will introduce the student to Mandarin Chinese. The units are designed to introduce the student to Chinese language and culture through familiar topics such as my family, my week, and food. Culture is presented throughout the course to help the student make connections between his culture and the culture of people in the Mandarin-speaking world.

Course Outline

1. My World

1. Welcome to Mandarin!
 - Explain why it is good to learn about other countries and their languages
 - Identify how to greet people in Mandarin
 - Recognize how Mandarin words are written
 - Recognize and say Mandarin words using the English alphabet
2. What's Your Name?
 - Introduce yourself in Mandarin using your first and last names
 - Recognize and say the Mandarin words for "boy" and "girl"
 - Recognize the tone marks used in pinyin terms and identify the four tones they represent
3. What Is Your Family Like?
 - Recognize the sound and say the Mandarin words for "father," "mother," "family," and "my"
 - Identify family traditions in the Mandarin-speaking world
4. Meet My Family!
 - Recognize the sound and say the Mandarin words for "sister" and "brother"
 - Recognize the sound and say the Mandarin word for the number "zero"
 - Write and recognize the characters for the numbers "one," "two," and "three"
 - Identify the oldest son as the child that received the highest honors in the traditional Mandarin-speaking world
 - Describe the one-child rule
5. Meet My Friends!

- Recognize the sounds and state the words for "friend" and for the numbers "four," "five," and "six"
 - Write and recognize the characters for the numbers "four," "five," and "six"
 - Examine and discuss friendships in the Mandarin-speaking world
6. Happy Birthday to Me!
- Recognize the sound and say the Mandarin words for "years old" and "birthday" and the numbers "seven" to "ten"
 - Write and recognize the characters for the numbers "seven" to "ten"
 - State your age in Mandarin
 - Examine how birthdays are celebrated in the Mandarin-speaking world
7. A Fun Day – and Night!
- Recall and use the correct Mandarin vocabulary to greet others and identify family members and friends
 - Recognize the important characteristics of Mandarin: characters, tones, and tone marks
 - Recognize and write the Mandarin words for the numbers "one" to "ten"
 - Explain why it is good to learn Mandarin and its importance in the world
 - Describe families in the Mandarin-speaking world

2. My Time

1. My Monday Morning Routine
- Recognize the sound and say the Mandarin words for "Monday," "wake up," "bus," and "school"
 - Write and recognize the Mandarin characters for "Monday"
 - Describe the typical morning activities for a student in the Mandarin-speaking world
 - Compare the morning activities of a student in the Mandarin-speaking world with your own morning activities
2. Today is Tuesday
- Recognize the sound and say the Mandarin words for "Tuesday," "class," "classmate," and "subject"
 - Write and recognize the Mandarin characters for "Tuesday"
 - Describe a typical school day for Mandarin-speaking world students
 - Discuss what learning about a typical day in the life of Mandarin students can teach you about their culture
3. After-School Activities
- Recognize the sound and say the Mandarin words for "Wednesday," "music," "sports," "art," and "homework"
 - Write and recognize the Mandarin characters for "Wednesday"
 - Describe the typical after-school activities of a student in the Mandarin-speaking world
4. My Free Time
- Recognize the sound and state the Mandarin words for "Thursday," "reading," "Internet," and the numbers 11 through 19
 - Write and recognize the Mandarin characters for "Thursday" and the numbers 11 through 19
 - List some activities a student in the Mandarin-speaking world typically does during free time on weekdays
 - Compare the free-time activities of students in the Mandarin-speaking world with your free-time activities
5. It's Friday!

- Recognize the sound and say the Mandarin terms for "Friday," "television," "talking," and the number 20
- Write and recognize the Mandarin characters for "Friday" and the number 20
- Describe what Mandarin-speaking world students do with their families in the evenings

6. It's the Weekend!

- Recognize the sound and say the Mandarin words for "Saturday," "play," "chores," and the numbers 30, 40, 50, 60, 70, 80, and 90
- Recognize and write the Mandarin characters for the numbers 30, 40, 50, 60, 70, 80, and 90
- Describe what an elementary student in the Mandarin-speaking world might do on Saturday
- Compare the Saturday activities of a student in the Mandarin-speaking world with your typical Saturday activities

7. Sunday in the Park

- Recognize the sound and characters for "Sunday" and write the Mandarin character for "Sunday"
- Recall the Mandarin vocabulary learned in prior lessons
- Recall what you have learned about Mandarin tones and tone marks
- Recall what you have learned about schools and activities in the Mandarin-speaking world

3. My Food

1. It's Time to Eat

- Recognize the sound and say the Mandarin words for "food," "breakfast," "lunch," and "dinner"
- Recognize and write the Mandarin character for "food"
- Examine what meal time is like in the Mandarin-speaking world
- Compare meal time traditions in the Mandarin-speaking world with your meal time traditions

2. It's Breakfast Time

- Recognize the sound and say the Mandarin words for "morning," "milk," "bread," "tea," and "rice"
- Recognize and write the Mandarin characters for "morning"
- Identify common breakfast foods in the Mandarin-speaking world
- Compare breakfast in the Mandarin-speaking world with your typical breakfast

3. It's Time for Lunch!

- Identify foods eaten during lunchtime in China
- Compare American lunchtime to Chinese lunchtime
- Recognize the sound and say the Mandarin words for "afternoon," "noodles," "soup," and "water"

4. Mom's Famous Fish Dish

- Recognize the sound and say the Mandarin words for "evening," "fish," "chicken," and "salad"
- Recognize and write the Mandarin word for "evening"
- Discuss what students in the Mandarin-speaking world eat for dinner
- Compare dinners in the Mandarin-speaking world with dinners eaten in the United States

5. Snack Time

- Recognize the sound and say the Mandarin words for "banana," "apple," "carrot," and "red"
 - Recognize and write the Mandarin characters for "red"
 - Discuss snacks in the Mandarin-speaking world
 - Compare snacks in the Mandarin-speaking world with the snacks you normally eat
6. To the Market
- Recognize the sound and say the Mandarin terms for "shop," "fruit," "vegetable," and "yellow"
 - Recognize and write the Mandarin characters for "yellow"
 - Apply your knowledge of what stores are like in the Mandarin-speaking world to create a portfolio
 - Compare and contrast stores in the Mandarin-speaking world with stores in the United States
7. Visiting a Chinese Restaurant
- Recognize the sound and say the Mandarin word "blue"
 - Recognize and write the Mandarin characters for "blue"
 - Compare mealtime traditions in the Mandarin-speaking world and the United States

Elementary Chinese II

Elementary Chinese II

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will further develop communication skills in Mandarin Chinese at a more advanced level. The student will continue to learn about Chinese culture by exploring historic places in China and other Mandarin-speaking countries, and by learning about holidays and special traditions celebrated there. In addition, the student will practice Mandarin Chinese skills by continuing to converse with a native Mandarin speaker.

Course Outline

1. My Travels

1. Visiting the Great Wall
 - Recognize the sounds and say the Mandarin words for "big," "small," "close," and "far"
 - Recognize and write the Mandarin characters for "big" and "small"
 - Discuss key facts about the Great Wall
2. My Trip to Shanghai
 - Recognize the sound and say the Mandarin words for "city," "building," "car," and "plane"
 - Recognize and write the Mandarin characters for "city"
 - Demonstrate the correct tones used for each vocabulary word
 - Identify the main characteristics of Shanghai
3. An Incredible Find!
 - Recognize the sound and say the Mandarin words for "happy," "sad," "angry," and "excited"
 - Recognize and write the Mandarin characters for "happy"
 - Describe the Terracotta Warriors
4. Meeting the Pandas in Sichuan
 - Recognize the sound and say the Mandarin words for "black," "white," "green," and "orange"
 - Recognize and write the Mandarin characters for "white"
 - Recognize the importance of the panda to the people of China
 - Discuss what life is like in the small towns of Sichuan
5. Visiting Tibet

- Recognize the sound and say the Mandarin words for "town," "mountain," "low," and "high"
 - Recognize and write the Mandarin character for "mountain"
 - Recognize Tibet as a part of the Mandarin-speaking world and locate it on a map
 - Describe main features of Tibet
6. My Trip to Taiwan
- Recognize the sound and say the Mandarin words for "sea," "island," "boat," and "sad"
 - Recognize and write the Mandarin character for "sea"
 - Recognize that Taiwan was once a much closer part of China
 - Locate Taiwan on a map and describe its main characteristics
7. Visiting Singapore
- Apply the Mandarin vocabulary learned in prior lessons
 - Recall and use what you have learned about Mandarin tones and tone marks
 - Recall and use what you have learned about travel and traditions in the Mandarin-speaking world

2. My Holidays

1. Chinese New Year (Spring Festival)
- Recognize the sound and say the Mandarin words for "year," "moon," "animal," and "festival"
 - Recognize and write the Mandarin characters for "festival" and "moon"
 - Recognize the importance of the Chinese New Year
 - Identify some Chinese New Year traditions
2. Lantern Festival
- Recognize the sound and say the Mandarin words for "children," "fun," "love," and "sky"
 - Recognize the sound and write the Mandarin character for "love"
 - Read about and discuss traditions of the Lantern Festival
3. Tomb-Sweeping Day
- Recognize the sound and say the Mandarin words for "January," "February," "March," "April," and "May"
 - Recognize and write the Mandarin characters for "January," "February," "March," "April," and "May"
 - Recognize the importance of honoring ancestors to people in the Mandarin-speaking world
 - Describe Tomb-Sweeping Day traditions
4. Dragon Boat Festival
- Recognize the sound and state the Mandarin words for June, July, August, September, and dragon
 - Recognize and write the Mandarin for June, July, August, and September
 - Recognize that this festival celebrates the memory of a poet from the past
 - Identify Dragon Boat Festival traditions
5. Chinese Valentine's Day
- Recognize the sound and say the Mandarin words for October, November, December, please, and thank you
 - Recognize and write the Mandarin characters for October, November, and December
 - Identify Chinese Valentine's Day traditions

- Compare and contrast Chinese Valentine's Day with Valentine's Day in the United States

6. Mid-Autumn Festival

- Apply the Mandarin vocabulary learned in prior lessons
- Recall and describe what you have learned about festivals in the Mandarin-speaking world

3. My Home

1. Our New Home!

- Recognize the sound and state the Mandarin words for "home," "buy," "expensive," and "cheap"
- Recognize and write the Mandarin character for "home"
- Recognize considerations when buying a home, in the Mandarin-speaking world, including feng shui traditions
- Identify the different types of housing in the Mandarin-speaking world

2. Our Living Room

- Recognize the sound and state the Mandarin words for "living room," "sofa," "feel," "sad," and "pet"
- Recognize and write the Mandarin character for "living room"
- Identify cultural traditions in the Mandarin-speaking world to decorate a living room
- Recognize how having a pet in the Mandarin-speaking world has changed over time and the importance of pets to its culture

3. Our Dining Room

- Recognize the sound and state the Mandarin words for "dining room," "dining table," "chair," and "eat"
- Recognize and write the Mandarin characters for "dining room" and "eat"
- Identify traditions in the Mandarin-speaking world to decorate a dining room
- Identify the story of a traditional dining table
- Identify some etiquette rules for meal time in the Mandarin-speaking world, and compare them with the ones used in the United States

4. Our Kitchen

- Recognize the sound and state the Mandarin words for "kitchen," "stove," "tap/faucet," and "window"
- Recognize and write the Mandarin character for "kitchen"
- Read and analyze the story of the Kitchen God
- Compare some characteristics of kitchens in the Mandarin-speaking world with the kitchen in your home

5. My Bedroom

- Recognize the sound and state the Mandarin words "bedroom," "bed," "(to) like," and "clothes"
- Recognize and write the Mandarin characters for "bedroom"
- Recognize the main characteristics of bedrooms in the Mandarin-speaking world, and compare them with bedrooms in the United States
- Identify the history and relevance of silk in the Mandarin-speaking world, as well as traditional clothes

6. Our Garden

- Recognize the sound and state the Mandarin words for "garden," "flower," "beautiful," and "(to) plant"
- Recognize and write the Mandarin characters for "flower" and "garden"

- Compare the characteristics of gardens in the Mandarin-speaking world to a garden you might have at your home
 - Identify national and popular flowers in the Mandarin-speaking world
7. You Are Our Guest!
- Apply the Mandarin vocabulary learned in prior lessons
 - Recall and describe what you have learned about homes and traditions in the Mandarin-speaking world
 - Recall and apply integrated vocabulary and culture words learned in previous units

Elementary Sign Language

Elementary Sign Language

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will be introduced to the fundamental concepts of American Sign Language. The student will explore vocabulary, numbers, grammar, and conversational skills using basic signing and fingerspelling techniques.

Course Outline

1. Intro

1. History/Culture
 - Define Deaf culture
 - Define Deaf community
 - Explain the characteristics of the Deaf community and Deaf culture
2. About ASL
 - Define American Sign Language (ASL)
 - Describe deaf education in America
3. ABCs
 - Learn the parameters of American Sign Language
 - Identify the manual alphabet
 - Demonstrate the manual alphabet
4. Fingerspelling
 - Fingerspell 3 and 4 letter words
 - Identify fingerspelled words
5. Greetings
 - Learn the rules for greetings, name signs, and saying goodbye
 - Be able to greet and introduce yourself to an ASL user
6. Etiquette
 - Define etiquette
 - Explain the social rules of the Deaf community
7. Unit Review
8. Unit Test

2. Numbers

1. Numbers 0–20
 - Sign the numbers 0–20
2. Numbers 21–100
 - Sign the numbers 21–100
3. Counting and Money
 - Demonstrate the signs for dollars, cents, and how much
 - Recognize the signs for numbers between 0 and 100
 - Demonstrate the signs for numbers between 0 and 100
4. Review
 - *There are no objectives for this lesson.*
5. Numbers Unit Test
 - *There are no objectives for this lesson.*

3. **Time**

1. On the Clock
 - Sign whole-hour times
2. Days of the Week
 - Sign the days of the week
3. Months of the Year
 - Sign the months of the year
4. Seasons and Holidays
 - Demonstrate how to sign the four seasons
5. Unit Review
6. Unit Test

4. **Nouns**

1. Family
 - Demonstrate the different signs for family members
 - Use the signs for family to have a signed conversation
2. Places
 - Learn the ASL signs for different places in the community
3. Food
 - Demonstrate the signs for different foods
 - Demonstrate the signs for different utensils
 - Identify ASL images of foods and utensils
4. Colors
 - Demonstrate the signs for different colors
5. Animals
 - Demonstrate signs for various animals
6. Review
7. Unit Test

5. **Descriptions**

1. Adjectives
 - Demonstrate signs for common adjectives
 - Demonstrate proper placement of adjectives
2. Feelings/Health
 - Demonstrate use of indexing
 - Demonstrate signs for common feelings
3. Sizes and Amounts
 - Demonstrate signs for sizes
 - Demonstrate signs for amounts
4. Possession

- Demonstrate signs for possessive pronouns
- 5. Locations
 - Demonstrate proper signs for various locations
- 6. Review
- 7. Unit Test

Elementary Spanish I

Elementary Spanish I

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Elementary Spanish I is an introductory-level course that will introduce the student to Spanish. The units are designed to introduce the student to Spanish language and culture through familiar topics such as family and friends, my home, and food.  - Select which pronoun, y or en, to use including using correct placement
10. Structures
11. Synthèse 2A: Le Zapping
 - Apply vocabulary about brand names and preferences
12. La santé Portfolio
13. La santé Practice
14. La santé Test
5. **La technologie**
 1. Contextes 3A
 - Use vocabulary to discuss technology
 2. Contextes 3B
 - Use vocabulary to discuss parts of a car and the technology found in a car
 3. Contextes
 4. Les sons et les lettres 3A
 - Produce correct pronunciation of final consonants in French
 5. Les sons et les lettres 3B
 - Demonstrate correct pronunciation of the letter x in French
 6. Structures 3A.1
 - Apply prepositions with infinitives orally and in writing
 7. Structures 3A.2
 - Form reciprocal verbs orally and in writing
 8. Structures 3B.1
 - Conjugate irregular verbs ouvrir and offrir, and other similar verbs
 9. Structures 3B.2
 - Form verbs in the conditional tense
 - Apply correct spelling changes when forming the conditional tense
 - Conjugate irregular verbs in the conditional tense
 10. Structures
 11. Synthèse 3A: Le Zapping
 - Use new vocabulary to write about technology in France
 12. La technologie Portfolio
 13. La technologie Practice
 14. La technologie Test
6. **Semester A**

1. Semester A Practice
2. Semester A Test

Semester B Summary:

French III B is a continuation of the first two and a half years of French instruction. The student will continue to sharpen his listening, speaking, reading, and writing skills through a variety of activities. This course is organized into five topics: health, home, measurement, professions, and my history. The student will learn to express himself using an ever-increasing vocabulary, verbs in various tenses, articles, and adjectives. The student will review all verb tenses, including present tense, past tense, future tense, conditional tense, the passive voice, imperative verbs, and more. The student will learn to use two-object pronouns and review grammar from previous French instruction. Grammar is introduced and practiced in innovative and interesting ways with a variety of learning styles in mind. Elements of the French-speaking world and culture appear throughout the course, including people, geographical locations, and histories. The student will also learn about the various countries where French is spoken.

Semester B Outline

1. Introduction to French III

1. Welcome to French III!

2. En ville

1. Contextes 4A
 - Use vocabulary to discuss location in a city or town
2. Contextes 4B
 - Use vocabulary to discuss navigating a city or town
3. Contextes
4. Les sons et les lettres 4A
 - Apply proper French pronunciation to the letter h
5. Les sons et les lettres 4B
 - Apply rules of capitalization in French
 - Compare rules of capitalization in English and French
6. Structures 4A.1
 - Form present, past, and conditional tenses of voir, croire, recevoir, and apercevoir
7. Structures 4A.2
 - Construct negative and affirmative expressions orally and in writing
8. Structures 4B.1
 - Conjugate verbs using the simple future tens
 - Organize information on a timeline, using future tense to describe events
9. Structures 4B.2
 - Compose irregular verbs using simple future tense orally and in writing
10. Structures
11. Synthèse 4A: Le Zapping
 - Use new vocabulary to describe information about French-speaking cities
 - Compare a city in France with a city in the student's region in writing
12. En ville Portfolio
13. En ville Practice
14. En ville Test

3. L'avenir et les métiers

1. Contextes 5A

- Use vocabulary to discuss daily life in an office
 - Explain steps for obtaining a job in the correct sequence
 - Recall vocabulary to read classified ads for jobs in French
2. Contextes 5B
 - Use vocabulary to discuss professions
 - Apply new vocabulary to write captions about professions
 3. Contextes
 4. Les sons et les lettres 5A
 - Apply correct punctuation when writing
 - Compare English and French punctuation
 5. Les sons et les lettres 5B
 - Apply neologisms of the English language (or borrowed words) when speaking and writing French
 6. Structures 5A.1
 - Form verbs using the simple future tense with quand and dès que
 - Compare verb tenses in English and French, including when French uses future tense, while English uses present tense
 7. Structures 5A.2
 - Apply the interrogative pronoun lequel in all its forms
 8. Structures 5B.1
 - Select the correct verb tenses with si clauses
 9. Structures 5B.2
 - Select proper relative pronouns when writing in French
 10. Structures
 11. Synthèse 5A: Le Zapping
 - Describe a traditional profession in France
 12. L'avenir et les métiers Portfolio
 13. L'avenir et les métiers Practice
 14. L'avenir et les métiers Test
- 4. L'espace vert**
1. Contextes 6A
 - Use vocabulary to discuss the environment and ways to protect it
 - Organize events from a story in chronological order
 - Exchange written information to compare everyday products, practices, and perspectives in native and other cultures
 2. Contextes 6B
 - Use vocabulary to discuss the environment
 - Describe francophone countries and the environment
 3. Contextes
 4. Les sons et les lettres 6A
 - Apply proper spelling rules in French
 - Compare spelling rules in English and French
 5. Les sons et les lettres 6B
 - Use homophones in writing
 - Determine meaning of words using context (including parts of speech)
 6. Structures 6A.1
 - Select proper demonstrative pronouns when writing
 - Use demonstrative pronouns in writing to describe illustrations.
 7. Structures 6A.2
 - Form verbs using the subjunctive tense with impersonal expressions of opinion

- Apply impersonal expressions of opinion correctly selecting the subjunctive and infinitive
- 8. Structures 6B.1
 - Conjugate verbs using the subjunctive tense with impersonal expressions of will and emotion
 - Apply impersonal expressions of will and emotion with the subjunctive and infinitive, determining which expressions require subjunctive or infinitive
- 9. Structures 6B.2
 - Produce the comparative and superlative forms of nouns
- 10. Structures
- 11. Synthèse 6A: Le Zapping
 - Describe banking in a francophone country and the effects on the environment
 - Organize events from a story in chronological order
 - Create an oral presentation about an organization that protects the environment in a francophone country
- 12. L'espace vert Portfolio
- 13. L'espace vert Practice
- 14. L'espace vert Test

5. **Les arts**

1. Contextes 7A
 - Describe illustrations using vocabulary about the arts
2. Contextes 7B
 - Use vocabulary to discuss the arts
 - Describe the importance of the arts in writing, using learned vocabulary
3. Contextes
4. Les sons et les lettres 7A
 - Produce liaisons to connect sounds in French
 - Examine liaisons between different parts of speech
5. Les sons et les lettres 7B
 - Produce acronyms in French with proper pronunciation, noting that some acronyms are spelled out while others are read like words
6. Structures 7A.1
 - Form verbs using the subjunctive tense with verbs of doubt, disbelief, and uncertainty
 - Categorize which expressions require the subjunctive and which require the indicative
 - Describe illustrations using verbs of doubt and certainty in writing
 - Conjugate irregular verbs in the subjunctive tense
7. Structures 7A.2
 - Select correct possessive pronouns with prepositions and être à orally and in writing
8. Structures 7B.1
 - Conjugate verbs using the subjunctive tense with conjunctions
 - Select correct conjunctions when writing sentences
 - Determine the correct verb tense, subjunctive or indicative, depending on prepositions and conjunctions
9. Structures 7B.2
 - Form verbs using the subjunctive tense
 - Organize pictures of events in chronological order after listening to a story
 - Select the correct verb tense, subjunctive or indicative, depending on

impersonal expressions, prepositions, and conjunctions

- Compose an advertisement using impersonal expressions, verbs of doubt and certainty, and prepositions

10. Structures

11. Synthèse 7A: Le Zapping

- Identify cultural elements in a film
- Describe an artistic event in a dramatic way incorporating new vocabulary
- Create a different ending for a film using learned vocabulary

12. Les arts Portfolio

13. Les arts Practice

14. Les arts Test

6. **Semester B**

1. Semester B Practice

2. Semester B Test

French IV

French IV

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

French IV A continues to build on the skills the student has mastered in his previous French courses. The student will continue to sharpen his listening, speaking, reading, and writing skills through a variety of activities. Throughout the five topics in the course, the student will learn to express himself using an ever-increasing vocabulary, present-tense verbs, past-tense verbs, future-tense verbs, conditional-tense verbs, subjunctive mood, articles, and adjectives. Grammar is introduced and practiced in innovative and interesting ways with a variety of learning styles in mind. The course is rich in authentic reading material and native-speaker recordings and presentations to enrich culture, grammar, and vocabulary presentations. Elements of the French-speaking world and culture appear throughout the course, including people, geographical locations, and histories.

Semester A Outline

1. **Ressentir et vivre**

1. Pour commencer
 - Use vocabulary to discuss relationships
 - Use commands to give advice
 - Use a variety of transitions
2. Vocabulaire
3. Court métrage
 - Use vocabulary to discuss relationships
 - Sort events in order after watching a film
 - Compare and contrast types of relationships, using target vocabulary
 - Apply target vocabulary to write an email giving advice
4. Imaginez: Les États-Unis
 - Identify relationships between the United States and France from the Age of Exploration
 - Determine contributions of French-speaking and francophone individuals
 - Create a presentation about a francophone event or place
5. Structures 1.1
 - Conjugate –er verbs with spelling change patterns in the present tense

6. Structures 1.2
 - Construct irregular verbs in the present and futur proche tenses
 - Form idiomatic expressions with faire in the present tense
 - Use target vocabulary to give advice in writing
 - Describe family members and their activities in writing using target vocabulary
7. Structures 1.3
 - Compose questions using interrogative words, including adjectives and pronouns
 - Construct questions with est-ce que
 - Apply inversion to compose questions
8. Structures
9. Fiche de grammaire 1.4
 - Construct the present tense of regular -er and -ir verbs and irregular -re verbs
10. Fiche de grammaire 1.5
 - Construct the imperative to give a command or suggestion
11. Culture
 - Describe elements of francophone culture in the United States.
12. Ressentir et vivre Portfolio
 - Compare two texts using organizational features
13. Ressentir et vivre Practice
 - Use culturally appropriate behavior when trying new food
14. Ressentir et vivre Test

2. Habiter en ville

1. Pour commencer
 - Use vocabulary to discuss transportation and life in a city
 - Use a variety of interjections in conversation
2. Vocabulaire
3. Court métrage
 - Use vocabulary to discuss relationships
 - Describe characters in a film, using target vocabulary about relationships
 - Create a diary entry about a film
4. Imaginez: La France
 - Identify characteristics of Marseilles and Lyon
 - Compare and contrast the cities of Marseilles and Lyon
 - Analyze a photograph, discussing advantages of city living
 - Create an itinerary that describes a trip to Marseilles or Lyon
5. Structures 2.1
 - Select the correct reflexive, reciprocal, and pronominal verbs to use orally and in writing
 - Describe illustrations using reflexive verbs to discuss daily activities
 - Form present tense of verbs when writing
 - Apply the imperative form to give commands
6. Structures 2.2
 - Select correct endings for adjectives, depending on number and gender orally and in writing
 - Apply correct word order for adjectives orally and in writing
 - Describe a favorite place or city using adjectives in writing
7. Structures 2.3
 - Create sentences with adverbs orally and in writing, using correct formation

- Apply correct word order for adverbs orally and in writing
 - Describe what a person's activities using adverbs in writing
8. Structures
 9. Fiche de grammaire 2.4
 - Determine when to use definite and indefinite nouns in writing, paying close attention to gender and agreement
 - Produce correct agreement with singular and plural nouns
 10. Fiche de grammaire 2.5
 - Distinguish between the use of *il est* and *c'est*, and use them with correct agreement
 - Compose sentences with subject pronouns with the verb *être*, using correct agreement
 11. Culture
 - Describe cultural elements in a francophone culture
 - Create a program for a cultural event in writing
 12. Habiter en ville Portfolio
 - Use organizational features of texts to analyze them
 13. Habiter en ville Practice
 14. Habiter en ville Test
3. **L'influence des médias**
1. Pour commencer
 - Use vocabulary to discuss media orally and in writing
 - Create a news report in writing, using target vocabulary
 2. Vocabulaire
 3. Court métrage
 - Apply vocabulary to answer questions about and discuss the media
 - Summarize a short film
 - Compose an article using techniques found in the media, using target vocabulary
 - Create a portrait of a character in a film
 4. Imaginez: Le Québec
 - Identify cultural and historical aspects of Quebec, including the Quiet Revolution, politics, festivals, food, music, and film
 - Determine contributions of French-speaking people to Quebec's culture
 - Create a brochure to demonstrate understanding of Quebec's culture
 - Describe photographs of cultural aspects in Quebec

 - Form the *passé composé* with the verb *avoir*
 - Utilize adverbs with the *passé composé* with correct word order
 - Identify the difference between the *passé composé* and present tenses
 6. Structures 3.2
 - Construct the *passé composé* with the verb *être*
 - Form the *passé composé* with reflexive and reciprocal verbs
 7. Structures 3.3
 - Compare and contrast the *passé composé* and imperfect tenses
 - Conjugate verbs in the *passé composé* and imperfect tenses
 8. Structures
 9. Fiche de grammaire 3.4
 - Employ possessive adjectives with agreement of gender and number
 10. Fiche de grammaire 3.5
 - Conjugate verbs in the imperfect tense

- List the uses of the imperfect tense
 - 11. L'influence des médias Portfolio
 - 12. L'influence des médias Practice
 - 13. L'influence des médias Test
- 4. La valeur des idées**
1. Pour commencer
 - Use vocabulary to discuss justice and politics
 2. Vocabulaire
 3. Court métrage
 - Select correct vocabulary to discuss justice and politics
 - Sort events from a film in chronological order
 - Create a paragraph in writing to propose a solution to a current political issue
 - Compose a letter in writing about a current political issue
 4. Imaginez: Les Antilles
 - Identify cultural and historical aspects of Antilles
 - Determine contributions of French-speaking individuals on Antilles
 - Describe a photograph of Antilles, using target vocabulary
 - Create a journal entry about the cultural and historical aspects of Antilles
 5. Structures 4.1
 - Conjugate verbs in the plus-que-parfait tense
 - Differentiate between the use of the passé composé and plus-que-parfait tenses
 6. Structures 4.2
 - Select correct word order with negation
 - Utilize indefinite adjectives and pronouns
 7. Structures 4.3
 - Conjugate irregular -ir verbs
 - Correctly form stem-changing -ir verbs
 8. Structures
 9. Fiche de grammaire 4.4
 - Apply demonstrative adjectives in singular and plural forms
 10. Fiche de grammaire 4.5
 - Conjugate verbs in the passé simple tense
 - Conjugate verbs in the passé composé
 11. La valeur des idées Portfolio
 12. La valeur des idées Practice
 13. La valeur des idées Test
- 5. La société en évolution**
1. Pour commencer
 - Identify and recall vocabulary about current cultural issues
 2. Vocabulaire
 3. Court métrage
 - Select vocabulary about current cultural issues
 - Compose sentences in writing about a film to explain cultural heritage and diversity
 - Produce a written composition about multiculturalism
 - Create an email about prejudice
 4. Imaginez: L'Afrique de l'Ouest
 - Identify cultural and historical aspects of West Africa
 - Determine contributions of French-speaking people in West Africa
 - Describe photographs of historical and cultural aspects of West Africa

5. Structures 5.1
 - Employ partitive articles
 - Utilize expressions of quantity
 - Differentiate between definite, indefinite, and partitive articles
6. Structures 5.2
 - Differentiate between the usage of the pronouns y and en
7. Structures 5.3
 - Apply the correct order of pronouns in sentences and in commands
 - Form the imperative with the correct order of pronouns
8. Structures
9. Fiche de grammaire 5.4
 - Differentiate between direct and indirect object pronouns with the correct verb tenses
10. Fiche de grammaire 5.5
 - Utilize past participle agreement with the passé composé and the verb être
 - Conjugate the passé composé of reflexive verbs
11. La société en évolution Portfolio
 - Describe how societal attitudes are reflected in school systems in Africa and the United States
12. La société en évolution 2
 - Argue to change a school policy
 - Clearly express a personal opinion
13. La société en évolution Practice
 - Argue to change a school policy
 - Discuss how societal attitudes are reflected in the school system of another culture
14. La société en évolution Test
 - Argue to change a school policy
 - Discuss how societal attitudes are reflected in the school system of another culture

6. Semester A

1. Semester A Practice
 - Use a variety of interjections in conversation
 - Use culturally appropriate behavior when trying new food
 - Compare familiar and unfamiliar cityscapes
 - Discuss how societal attitudes are reflected in the school system of another culture
 - Argue to change a school policy
2. Semester A Test
 - Use a variety of interjections in conversation
 - Use culturally appropriate behavior when trying new food
 - Compare familiar and unfamiliar cityscapes
 - Discuss how societal attitudes are reflected in the school system of another culture
 - Argue to change a school policy

Semester B Summary:

This course is a continuation of the first three and a half years of French instruction. The student will continue to sharpen his listening, speaking, reading, and writing skills through a variety of activities. Throughout the five topics in this course, the student will learn to express himself

using an ever-increasing vocabulary, present-tense verbs, past-tense verbs, future-tense verbs, conditional-tense verbs, subjunctive mood, articles, and adjectives. Grammar is introduced and practiced in innovative and interesting ways with a variety of learning styles in mind. The course is rich in authentic reading material and native-speaker recordings and presentations to enrich culture, grammar, and vocabulary presentations. Elements of the French-speaking world and culture appear throughout the course, including people, geographical locations, and histories.

Semester B Outline

1. Las générations que bougent

1. Pour commencer
 - Use vocabulary to discuss family
2. Vocabulaire
3. Court métrage
 - Use vocabulary to discuss family
 - Create an oral presentation using learned vocabulary by analyzing key questions
 - Organize the events in a film
 - Create an email about a the film using learned vocabulary
4. Imaginez: L'Afrique du Nord et le Liban
 - Identify cultural and historical aspects of North Africa and Lebanon
 - Describe a photograph of cultural aspects of North Africa in writing
5. Structures 6.1
 - Form the present subjunctive tense orally and in writing
 - Employ impersonal expressions and expressions of will and emotion with the subjunctive tense
 - Compare and contrast subjects using the subjunctive tense when necessary
6. Structures 6.2
 - Utilize demonstrative pronouns with correct agreement of gender and number orally and in writing
7. Structures 6.3
 - Conjugate irregular -re verbs orally and in writing in multiple tenses
8. Structures
9. Fiche de grammaire 6.4
 - Employ disjunctive pronouns in writing
 - Utilize indirect object pronouns in writing
10. Fiche de grammaire 6.5
 - Utilize possessive pronouns with correct agreement of gender and number in writing
 - Compare possessive adjectives and possessive pronouns
11. Las générations que bougent Portfolio
12. Las générations que bougent Practice
13. Las générations que bougent Test

2. À la recherche du progrès

1. Pour commencer
 - Use vocabulary to discuss technology used to carry out research
2. Vocabulaire
3. Court métrage
 - Use vocabulary to discuss technology used to carry out research
 - Summarize a short film in writing
 - Interpret a short film in writing

- Create a story based on the short film using target vocabulary
- 4. Imaginez: La Belgique, la Suisse et le Luxembourg
 - Identify cultural and historical aspects of Belgium, Switzerland, and Luxembourg
 - Determine contributions of people from Belgium, Switzerland, and Luxembourg
 - Describe a photograph of cultural aspects of a French-speaking country
 - Compose a report about the importance of a cultural aspect (chocolate) of Belgium, incorporating photographs and writing
- 5. Structures 7.1
 - Form the comparative and superlative forms of adjectives and adverbs in writing
 - Apply correct word order when creating sentences with comparatives and superlatives
 - Compare and contrast objects using comparatives and superlatives
- 6. Structures 7.2
 - Conjugate regular and irregular verbs in the futur simple tense orally and in writing
- 7. Structures 7.3
 - Form the subjunctive tense after expressions of doubt and conjunctions orally and in writing
 - Conjugate the past subjunctive tense orally and in writing
- 8. Structures
- 9. Fiche de grammaire 7.4
 - Utilize past participles as adjectives with agreement in gender and number orally and in writing
 - Describe a photograph using past participles as adjectives in writing
- 10. Fiche de grammaire 7.5
 - Employ expressions of time orally and in writing
- 11. À la recherche du progrès Portfolio
- 12. À la recherche du progrès Practice
- 13. À la recherche du progrès Test
- 3. **S'évader et s'amuser**
 1. Pour commencer
 - Use vocabulary to discuss hobbies orally and in writing
 2. Vocabulaire
 3. Court métrage
 - Use vocabulary to discuss hobbies in writing
 - Summarize a short film, answering questions orally and in writing
 - Interpret a short film, using target vocabulary
 4. Imaginez: L'océan Indien
 - Identify cultural and historical aspects of French-speaking countries in the Indian Ocean
 - Describe a photograph of cultural aspects of French-speaking countries in writing
 5. Structures 8.1
 - Employ infinitives orally and in writing with correct pronoun placement
 - Form infinitives with negation orally and in writing
 - Construct infinitives in the past and present tenses in writing
 6. Structures 8.2
 - Utilize prepositions with geographical names orally and in writing

- Create an oral presentation about a geographic location, using correct prepositions
- 7. Structures 8.3
 - Conjugate verbs in the conditional tense orally and in writing
 - Identify the uses for the conditional tense
- 8. Structures
- 9. Fiche de grammaire 8.4
 - Employ prepositions with the infinitive form orally and in writing
- 10. Fiche de grammaire 8.5
 - Form the subjunctive tense after indefinite antecedents and in superlative statements orally and in writing
 - Differentiate between usage of subjunctive and indicative tenses
- 11. S'évader et s'amuser Portfolio
 - Describe in written messages a friend's difficult situation
- 12. S'évader et s'amuser Practice
- 13. S'évader et s'amuser Test
- 4. **Perspectives de travail**
 1. Pour commencer
 - Use vocabulary to discuss work and finances orally and in writing
 2. Vocabulaire
 3. Court métrage
 - Use vocabulary to discuss work in writing
 - Summarize short film using target vocabulary, answering questions orally and in writing
 - Organize events of a short film in chronological order
 - Analyze a short film using target vocabulary
 - Analyze the meaning of a song that contains target vocabulary
 4. Imaginez: L'Afrique Centrale
 - Identify cultural and historical aspects of Central Africa
 - Determine contributions of French-speaking people in Central Africa
 - Describe the cultural aspects of a photograph, using target vocabulary
 - Create a report about Central Africa with photographs to support the writing
 5. Structures 9.1
 - Employ relative pronouns orally and in writing
 - Demonstrate proper use of indefinite relative pronouns orally and in writing
 6. Structures 9.2
 - Form the present participle orally and in writing
 7. Structures 9.3
 - Conjugate irregular -oir verbs orally and in writing
 8. Structures
 9. Fiche de grammaire 9.4
 - Compare the difference between the verbs savoir and connaître and correctly use each verb in context
 10. Fiche de grammaire 9.5
 - Construct the faire causatif structure in writing
 11. Perspectives de travail Portfolio
 - Describe a service-learning project in written communication with a peer
 12. Perspectives de travail Practice
 13. Perspectives de travail Test
- 5. **Les richesses naturelles**
 1. Pour commencer

- Use vocabulary to discuss the environment orally and in writing
 - 2. Vocabulaire
 - 3. Court métrage
 - Apply vocabulary to discuss the environment in writing
 - Summarize a short film about the environment, answering questions in writing
 - Organize events in a short film in chronological order
 - Interpret a short film in writing, using target vocabulary
 - 4. Imaginez: La Polynésie française
 - Identify cultural and historical aspects of French Polynesia
 - Describe the cultural aspects found in a photograph in writing, using target vocabulary
 - Create a report on cuisine in French Polynesia, using target vocabulary
 - 5. Structures 10.1
 - Conjugate verbs in the past conditional tense orally and in writing
 - 6. Structures 10.2
 - Form verbs in the future perfect tense orally and in writing
 - Organize parts of a sentence chronologically, using the verb tense to determine the correct order
 - 7. Structures 10.3
 - Construct siclauses with the present, imparfait, and plus-que-parfait tenses orally and in writing
 - 8. Structures
 - 9. Fiche de grammaire 10.4
 - Employ indirect discourse, changing the subjects and verbs correctly in writing
 - Identify the difference between direct and indirect discourse
 - 10. Fiche de grammaire 10.5
 - Form the passive voice in writing
 - Identify the difference between active and passive voices
 - 11. Les richesses naturelles Portfolio
 - 12. Les richesses naturelles Practice
 - 13. Les richesses naturelles Test
6. **Semester B**
- 1. Semester B Practice
 - 2. Semester B Test

German I

German I

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

This is a beginning level course that will introduce the student to a variety of areas of language learning.

In Semester A, the student will learn listening, speaking, reading, and writing skills through a variety of activities. Throughout the five units, or themes, of material (greetings, the date, weather, time, and colors), the student will learn to express himself using an ever-increasing vocabulary, present-tense verbs, articles, and adjectives. Grammar is introduced and practiced in innovative and interesting ways with a variety of learning styles in mind. Culture is presented throughout the course.

In Semester B, the student will learn listening, speaking, reading, and writing skills through a variety of activities. Throughout the five units, or themes, of material (city, family, food, leisure time, and school and chores), the student will learn to express himself using an ever-increasing vocabulary, present-tense verbs, articles, and adjectives. Grammar is introduced and practiced in innovative and interesting ways with a variety of learning styles in mind. Culture is presented throughout the course to help the learner focus on the German-speaking world, people, geographical locations, and histories.

Semester A

1. Die Grüße

1. Lektion 1
 - Identify unit objectives and expectations
 - Identify German words frequently used in English
2. Lektion 2
 - Identify vocabulary and expressions for greetings and farewells
 - Identify reasons for learning the German language
3. Lektion 3
 - Recognize and recite the German alphabet

- Identify special characters in German, and how to make them on a computer
- 4. Lektion 4
 - Use greetings and farewells appropriate to time and situation
- 5. Lektion 5
 - Apply knowledge of German to give your name and ask for someone's name
- 6. Lektion 6
 - Apply knowledge of German to ask and answer the question, "Where are you from?"
 - Use vocabulary to express how you are doing
 - Compose a written conversation that demonstrates the ability to give a greeting, ask basic questions, and give a farewell
- 7. Lektion 7
 - Apply knowledge of German to ask and answer the question, "Where do you live?"
- 8. Lektion 8
 - Identify characteristics of Frankfurt
 - Recall how to respond to basic questions about yourself in German
- 9. Lektion 9
 - Determine when to use the formal or informal form of "you"
- 10. Lektion 10
 - Apply knowledge of German to ask and answer the question, "Where do you live?"
 - Recall vocabulary for greetings and farewells
 - Ask and answer basic questions in formal and informal situations
- 11. Lektion 11
 - Identify several places where German is spoken
- 12. Lektion 12
 - Identify German contributions that impact American culture
 - Recall unit vocabulary
- 13. Lektion 13
 - Ask and answer basic questions in formal and informal situations
 - Use vocabulary to refer to other people
 - Compare and contrast the structure of the German and English languages
- 14. Lektion 14
 - Describe people using vocabulary and the third person singular conjugation
 - Apply proper word order when asking and answering questions
- 15. Lektion 15
 - Recall unit vocabulary
- 16. Lektion 16
 - Identify biographical information about Albert Einstein
- 17. Lektion 17

2. **Der Kalender**

- 1. Lektion 1
 - Use vocabulary related to the days of the week
- 2. Lektion 2
 - Identify geographic and cultural characteristics of Germany
- 3. Lektion 3
 - Identify architectural characteristics of Germany
 - Identify cultural characteristics of Munich
 - Use vocabulary for common activities
- 4. Lektion 4
 - Ask and answer questions in a written conversation about activities using the days of the week
- 5. Lektion 5

- Identify rules of German etiquette, including appearance, nonverbal communication, and gestures
6. Lektion 6
 - Apply singular and plural nouns appropriately
 - Apply definite articles in agreement with gender and plurality
 - Apply rules of gender and plurality to nouns
 7. Lektion 7
 - Identify characteristics of calendars in Germany
 - Identify numbers 0 to 10
 8. Lektion 8
 - Apply knowledge of numbers 0 to 10 to perform simple math equations in German
 9. Lektion 9
 - Identify numbers 0 to 31
 - Use vocabulary to ask for and express the date; apply knowledge of German conventions to write and interpret the date
 10. Lektion 10
 - Obtain and provide information about friends and their activities by conjugating verbs into the third person using the appropriate third-person pronouns
 11. Lektion 11
 - Apply rules of grammar to subject pronouns
 12. Lektion 12
 - Match subject pronouns in German to their English equivalents
 13. Lektion 13
 - Use vocabulary related to months
 14. Lektion 14
 - Match months in German to their English translations
 15. Lektion 15
 - Conjugate regular verbs in the present tense
 - Match verb endings with the appropriate pronoun
 16. Lektion 16
 - Demonstrate listening proficiency by matching spoken German with its written English translation
 17. Lektion 17
3. **Das Wetter**
1. Lektion 1
 - Identify characteristics of the weather in Germany
 2. Lektion 2
 - Use vocabulary and expressions to ask about and describe the weather
 - Match weather phrases in German to their English translations
 3. Lektion 3
 - Identify Celsius as the scale used to measure temperature in Germany and many other countries
 - Use vocabulary and expressions to ask about and describe the temperature
 - Apply knowledge of the Celsius scale to determine whether a temperature is cold, cool, warm, or hot
 - Apply knowledge of vocabulary to identify information from a reading passage about the weather, seasons, and other information
 - Engage in written conversations about the weather and locations
 4. Lektion 4
 - Use action verbs to describe what the weather is doing
 - Use vocabulary related to seasons

- Demonstrate proficiency with spoken German by recording yourself reciting a German poem
 - Write journal entries describing the date and day, your activities, and the weather
5. Lektion 5
 - Match vocabulary related to the weather and date to their English translations
 - Match vocabulary related to the weather to the appropriate season
 6. Lektion 6
 - Identify characteristics of sport, recreation, and leisure activities in Germany
 7. Lektion 7
 - Identify characteristics of German homes
 - Identify characteristics of German towns or villages, including gardens, shops, and food stores
 8. Lektion 8
 - Conjugate the irregular verbs haben and sein in the present tense
 9. Lektion 9
 - Describe your likes
 10. Lektion 10
 - Describe your dislikes
 - Use interrogative pronouns to ask for specific information
 - Engage in written conversations about likes and dislikes
 11. Lektion 11
 - Section introduction
 12. Lektion 12
 - Use vocabulary related to sports and leisure activities
 13. Lektion 13
 - Match vocabulary related to sports and leisure activities to their English translations
 - Apply knowledge of vocabulary to identify information from a reading passage about activities and likes
 - Conjugate the irregular verbs lesen, fern sehen, and Rad fahren in the present tense
 14. Lektion 14
 - Identify the correct verb form for subject pronouns and verbs
 - Use vocabulary related to leisure activities
 - Use interrogative pronouns to ask for specific information
 15. Lektion 15
 - Apply inverted word order to ask yes/no questions
 - Match questions about activities to their English translations
 - Apply knowledge of unit vocabulary to identify specific information from a reading passage
 - Demonstrate speaking proficiency and knowledge of question structure, formal and informal address, and unit vocabulary when asking and answer questions
 16. Lektion 16
 - Match unit vocabulary to their English translations
 - Demonstrate listening proficiency by matching spoken German questions with appropriate responses
 17. Lektion 17
4. **Die Uhrzeit**
1. Lektion 1
 - Identify geographic and cultural characteristics of Switzerland
 - Use vocabulary related to places found in a city or town
 2. Lektion 2
 - Match vocabulary related to places found in a city or town with their English translations
 - Identify verbs associated with specific places in a city or town
 3. Lektion 3

- Match verbs with their English translations
 - Evaluate how specific products manufactured in Austria, Germany, or Switzerland reflect their culture
4. Lektion 4
 - Apply vowel change patterns to conjugate the irregular (stem-changing) verbs laufen, fahren, sprechen, nehmen, sehen, and lesen
 - Use irregular verbs to ask and answer questions about specific activities
 - Apply knowledge of German vocabulary to identify specific information from a reading passage
 5. Lektion 5
 - Recall interrogative pronouns
 - Change word order in a question to obtain more specific information
 - Match questions about activities to their English translations
 6. Lektion 6
 - Conjugate the irregular verb sein in the present tense
 - Conjugate the irregular verbs laufen, fahren, sprechen, nehmen, sehen, and lesen
 7. Lektion 7
 - Identify cultural characteristics of Switzerland
 - Describe your location and what you are doing there
 - Use the prepositions in and im to describe where you are
 8. Lektion 8
 - Recall numbers 0 to 100
 - Apply knowledge of numbers 0 to 100 to perform simple math equations in German
 9. Lektion 9
 - Apply knowledge of numbers and time-specific vocabulary to express the time
 - Identify differences between the 24- and 12-hour clock
 10. Lektion 10
 - Demonstrate listening proficiency by identifying a spoken time
 - Apply knowledge of numbers and time-specific vocabulary to express the time
 - Identify European time zones; identify the difference in time between European countries and U.S. Eastern Standard Time
 11. Lektion 11
 - Use the phrase "Um wie viel Uhr?" to ask what time something takes place
 - Use the preposition um to express at what time something takes place
 - Apply knowledge of numbers and time-specific vocabulary to express the time
 12. Lektion 12
 - Recall vocabulary specific to expressing the time
 13. Lektion 13
 - Recall vocabulary related to places found in a city or town
 - Demonstrate listening proficiency by answering questions about a spoken passage
 14. Lektion 14
 - Identify historical characteristics of Switzerland
 - Apply knowledge of numbers 0 to 100 to perform simple math equations in German
 15. Lektion 15
 - Translate English phrases and questions about time, place, and activities into German
 - Apply time-manner-place sentence order
 - Match times expressed in the 12-hour clock to those expressed in the 24-hour clock
 16. Lektion 16
 - Apply knowledge of numbers 0 to 100 to perform simple math equations in German
 - Demonstrate listening proficiency by matching spoken times and numbers to their numeric or written forms

17. Lektion 17

5. **Die Farben**

1. Lektion 1

- Compare German and English sentence structure

2. Lektion 2

- Identify adjectives commonly used to describe people
- Conjugate the irregular verb sein in the present tense

3. Lektion 3

- Match forms of sein to their appropriate pronouns
- Conjugate the separable prefix verb aussehen to ask about or describe how someone looks

- Apply knowledge of German vocabulary to identify specific information from a reading passage
- Write a description of yourself using adjectives and the verb sein
- Use vocabulary to ask someone what he or she looks like
- Identify fairy tales as an important aspect of German culture

5. Lektion 5

- Use vocabulary specific to colors
- Match colors to their English translations

6. Lektion 6

- Conjugate the separable prefix verb aussehen to ask about or describe how someone looks
- Match adjectives to their English translations

7. Lektion 7

- Use vocabulary specific to colors

8. Lektion 8

- Use vocabulary related to school
- Match school subjects to their English translations
- Use the phrase "es gibt" to express what there is or there are
- Use the verb haben to express possession

9. Lektion 9

- Use the phrase "es gibt" to express what there is or there are
- Use the verb haben to express possession
- Change the form of articles for masculine direct objects

10. Lektion 10

- Change the form of articles for masculine direct objects
- Transcribe spoken words

11. Lektion 11

- Identify kindergarten as a concept that came to the United States from Germany
- Combine nouns appropriately to form compound nouns
- Use the preposition zum to express using something for a purpose

12. Lektion 12

- Recall prior learning
- Recall rules of pronunciation, such as those for "s" before "t" or "p" at the beginning of a word or syllable sounds like /sch/, and the "ei" and "ie" vowel sounds

13. Lektion 13

- Identify English translations for school supplies
- Identify specific cognates and false cognates between English and German
- Recall rules of pronunciation, such as those for "s" before "t" or "p" at the beginning of a word or syllable sounds like /sch/, and the "ei" and "ie" vowel sounds

14. Lektion 14

- Apply rules of gender and plurality to articles and adjective endings

15. Lektion 15

- Apply rules of gender and plurality to articles and adjective endings

16. Lektion 16

6. **Semester Exam**

1. Semester Exam

Semester B

1. **Die Stadt**

1. Lektion 1

- Identify unit objectives and expectations
- Recall vocabulary for places in a city or town

2. Lektion 2

- Identify differences between the city and the country
- Use vocabulary specific to places in the city and the country
- Match vocabulary specific to places in the city and the country to their English translations

3. Lektion 3

- Use indefinite articles in agreement with gender and plurality

4. Lektion 4

- Identify characteristics of the Spanish Riding School and Lipizzan stallions
- Conjugate the verb wissen

5. Lektion 5

- Use vocabulary specific to expressing location in relation to another place
- Apply the dative case

6. Lektion 6

- Use modal auxiliary verbs to express desires, abilities, and obligations

7. Lektion 7

- Use modal auxiliary verbs to express desires, abilities, and obligations

8. Lektion 8

- Differentiate between using möchte and a verb + gern to express whether you would like or you do like

9. Lektion 9

- Translate spoken German into written English
- Use modal auxiliary verbs to express desires, abilities, and obligations

10. Lektion 10

- Use modal auxiliary verbs to express desires, abilities, and obligations
- Translate spoken German into written English

11. Lektion 11

- Identify biographical characteristics of Johan Strauß, Jr.
- Apply knowledge of German vocabulary to identify specific information from a reading passage
- Describe your town, including what places are located there and where they are located in relation to other places in the town

12. Lektion 12

- Conjugate modal auxiliary verbs
- Use modal auxiliary verbs to express desires, abilities, and obligations

13. Lektion 13

- Use vocabulary to ask and answer the questions "Where are you going?" and "Why?"

14. Lektion 14

- Use vocabulary to ask and answer the questions "Where are you going?" and "Why?"
- Use dative and accusative prepositions

15. Lektion 15

- Translate vocabulary and expressions from the unit
- Apply dative and accusative prepositions to unit vocabulary

16. Lektion 16

- Recall unit vocabulary and grammar

17. Lektion 17

2. **Die Familie**

1. Lektion 1

- Recall vocabulary for expressing dates in German
- Use vocabulary related to family members

2. Lektion 2

- Use vocabulary related to family members
- Match vocabulary related to family members to their English translations

3. Lektion 3

- Use possessives to express what you do or do not have

4. Lektion 4

- Use vocabulary for expressing dates in German

5. Lektion 5

- Use vocabulary and expressions to ask and answer the question, "When is your birthday?"
- Apply pronunciation when singing in German

6. Lektion 6

- Use adjectives to make comparisons
- Match German expressions to their English translations
- Use possessives to express what you or someone else does or does not have

7. Lektion 7

- Use vocabulary related to family members

8. Lektion 8

- Express personal preferences and the preferences of others

9. Lektion 9

- Express personal preferences and the preferences of others

10. Lektion 10

- Apply forms of the possessive adjective sein in agreement with gender and plurality

11. Lektion 11

- Apply forms of the possessive adjectives ihr, unser, and euer in agreement with gender and plurality

12. Lektion 12

- Use possessive adjectives

13. Lektion 13

- Use vocabulary related to family members
- Identify cultural characteristics of German birthdays and other special events

14. Lektion 14

- Use vocabulary and expressions related to birthdays and other special events

15. Lektion 15

- Apply knowledge of German vocabulary to identify specific information from a reading passage
- Use vocabulary related to family members
- Use possessive adjectives

16. Lektion 16

- Match vocabulary and expressions related to birthdays and other special events to their English translations

17. Lektion 17

3. Das Essen

1. Lektion 1
 - Recall vocabulary and expressions for discussing preferences
 - Identify vocabulary related to breakfast and breakfast foods
2. Lektion 2
 - Use vocabulary related to breakfast and breakfast foods
 - Match vocabulary related to breakfast foods with their English translations
3. Lektion 3
 - Use vocabulary related to dining
 - Identify characteristics of the Black Forest
 - Describe your breakfast preferences and ask about the preferences of others; describe the preferences of others
4. Lektion 4
 - Identify cultural characteristics of the midday Mittagessen and Mittagspause in Germany
 - Use vocabulary related to food and dining
5. Lektion 5
 - Use vocabulary to describe whether someone is hungry or thirsty
 - Use accusative pronouns to describe specific objects
6. Lektion 6
 - Use accusative pronouns to describe specific objects
 - Use vocabulary related to beverages
 - Categorize vocabulary associated with food and drinks
7. Lektion 7
 - Match expressions related to food and dining to their English translations
8. Lektion 8
 - Identify characteristics of the Black Forest
 - Identify German cultural perspectives and practices related to dining
9. Lektion 9
 - Use accusative prepositions and prepositional phrases to show the relationship between two things
 - Use vocabulary related to food and dining
 - Demonstrate proficiency by responding in writing to spoken questions
10. Lektion 10
 - Identify German cultural perspectives and practices related to dining
11. Lektion 11
 - Match accusative prepositions with their English translations
 - Translate prepositional phrases into German
12. Lektion 12
 - Identify German cultural perspectives and practices related to dining
13. Lektion 13
 - Apply knowledge of German vocabulary to identify specific information from a reading passage
 - Use vocabulary and expressions related to dining in a restaurant
14. Lektion 14
 - Use vocabulary and expressions related to dining in a restaurant
15. Lektion 15
 - Recall vocabulary and expressions related to food and dining
16. Lektion 16
17. Lektion 17

4. Die Freizeit

1. Lektion 1

- Use vocabulary and expressions related to sports and leisure activities
 - 2. Lektion 2
 - Match vocabulary and expressions related to sports and leisure activities to their English translations
 - Use vocabulary and expressions related to sports and leisure activities
 - 3. Lektion 3
 - Apply knowledge of German vocabulary to identify specific information from reading passages
 - Use vocabulary and expressions generally used in telephone conversations
 - 4. Lektion 4
 - Determine whether to use forms of Sport, machen, or treiben when talking about sports
 - Use vocabulary to describe the frequency of actions
 - Match vocabulary for time and frequency to their English translations
 - 5. Lektion 5
 - Identify cultural and geographical characteristics of northern Germany
 - Recall accusative and dative prepositions
 - 6. Lektion 6
 - Recall forms of the definite article "the"
 - Describe the time of day or frequency that you perform specific activities
 - 7. Lektion 7
 - Recall accusative and dative prepositions
 - 8. Lektion 8
 - Use vocabulary and expressions related to sports and leisure activities
 - 9. Lektion 9
 - Use vocabulary to describe the frequency of actions
 - Apply knowledge of German vocabulary to identify specific information from written and spoken passages
 - Use vocabulary and expressions related to sports and leisure activities
 - 10. Lektion 10
 - Use accusative and dative prepositions
 - 11. Lektion 11
 - Use vocabulary and expressions related to sports and leisure activities
 - Identify similarities and differences between American and German cultures relative to leisure time
 - 12. Lektion 12
 - Use accusative and dative prepositions
 - 13. Lektion 13
 - Identify how to extend and accept an invitation
 - 14. Lektion 14
 - Identify how to extend, accept, and decline an invitation
 - 15. Lektion 15
 - Identify similarities and differences between American and German cultures relative to leisure time
 - Use vocabulary and expressions related to sports and leisure activities
 - Use vocabulary to describe the frequency of actions
 - 16. Lektion 16
 - Apply knowledge of German to extend, accept, and decline invitations
 - 17. Lektion 17
5. **Die Schule und Pflichten**
- 1. Lektion 1
 - Recall vocabulary related to school and education

2. Lektion 2
 - Identify characteristics of schools and a typical student's day in Germany
 - Compare the typical school day in Germany to the typical school day in the United States
 - Use vocabulary related to school and school supplies
 3. Lektion 3
 - Use vocabulary related to school subjects
 - Match vocabulary related to school subjects with their English translations
 4. Lektion 4
 - Use vocabulary related to school subjects
 5. Lektion 5
 - Use words to describe sequence; use appropriate vocabulary to express schedule information
 - Describe your school schedule and ask a classmate about his or school schedule
 6. Lektion 6
 - Recall conjugations for stem-changing verbs
 - Identify characteristics of the typical German and European school schedule
 7. Lektion 7
 - Use vocabulary and expressions related to transportation
 8. Lektion 8
 - Identify characteristics of German homes
 9. Lektion 9
 - Use vocabulary and expressions related to homes and furniture
 - Describe your home
 10. Lektion 10
 - Use vocabulary and expressions related to appliances, cleaning supplies, and household chores
 - Match vocabulary and expressions related to appliances, cleaning supplies, and household chores with their English translations
 - Use the noun "man" to describe what one does
 11. Lektion 11
 - Use vocabulary and expressions related to appliances, cleaning supplies, and household chores
 - Conjugate and use mixed verbs to express duty, preference, and ability

 - Use separable-prefix verbs and multiple-verb sentences
 15. Lektion 15
 - Recall unit vocabulary and grammar
 - Apply knowledge of German vocabulary to identify specific information from spoken passages
 - Describe your home life, including the chores that you do
 - Describe your habits and preferences concerning school and studying
 16. Lektion 16
6. **Semester Exam**
1. Semester Exam

German II

German II

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

German II A is an intermediate level course that will introduce the student to a variety of areas of language learning. In this course, the student will continue to learn listening, speaking, reading, and writing skills through a variety of activities. Throughout the five units, or themes, of material (daily routine, animals, pastimes, the body, and descriptions), the student will learn to express himself using an ever-increasing vocabulary, past-tense verbs, demonstrative articles, and adjectives. Grammar is introduced and practiced in innovative and interesting ways with a variety of learning styles in mind. Culture is presented throughout the course to help the learner focus on the German-speaking world, people, geographical locations, and histories.

Semester A Outline

1. **Der Tagesablauf**
 - Introduce oneself in German
 - Distinguish between cognates and false friends
 - Use reflexive verbs to describe daily activities
 - Tell and ask for the time
 - Discuss likes and dislikes of Bavarian food
2. **Die Tiere**
 - Identify additional cognate patterns and avoid more false friends.
 - Talk about pets, farm animals and exotic animals.
 - Form the comparative and superlative of German adjectives.
 - Use demonstrative adjectives to talk about which things students prefer.
 - Experience Berlin, Germany's capital.
3. **Die Freizeit**
 - Engage in conversations about hobbies.
 - Obtain and present information about sports and other pastimes.
 - Make comparison statements
 - Make superlative statements
 - Place direct object pronouns correctly
4. **Der Körper**
 - Talk about what one does with different body parts.
 - Report physical complaints to a doctor.

- Describe various illnesses.
 - Use indirect object pronouns to refer to body parts.
 - Speak in the past tense about things that happened.
5. **Die Beschreibung**
- Describe oneself and others using "sein" and adjectives.
 - Obtain and present information about people's nationalities.
 - Use verbs of motion in the past tense.
 - Differentiate the verbs "kennen" and "wissen".
 - Discuss the German state of Baden-Württemberg.
6. **Semester Exam**
1. Semester Exam
 - Identify strategies that you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, answers to lesson questions, and key vocabulary terms

Semester B Summary:

This course is a continuation of German II A. In this course, the student will continue to learn listening, speaking, reading, and writing skills through a variety of activities. Throughout the five units, or themes, of material (house, shopping, leisure, travel destinations, and flying), the student will learn to express himself using an ever-increasing vocabulary, past-tense verbs, dative expressions, and adjectives. Grammar is introduced and practiced in innovative and interesting ways with a variety of learning styles in mind. Culture is presented throughout the course to help the learner focus on the German-speaking world, people, geographical locations, and histories.

Semester B Outline

1. **Das Haus**
 - Talk about your house using terminology related to different rooms and furnishings
 - Discuss events that happened in the past
 - Learn additional cognate patterns
 - Explore homes in other countries
 - Continue to develop conversational skills in German
2. **Das Einkaufen**
 - Use the numbers beyond one hundred to obtain and understand pricing information
 - Talk about shopping habits and preferences
 - Ask for and understand information related to purchasing various goods
 - Compare shopping habits such as the use of credit cards, ATMs etc. in Germany and the U.S.
 - Explore the KaDeWe, Germany's largest department store
3. **Die Freizeit Angebot**
 - Discuss a variety of types of entertainment
 - Describe German snack foods
 - Use more past tense forms
 - Use adjectives and adverbial phrases of time
 - Respond negatively to questions
4. **Reiseziele**
 - Discuss plans for traveling and camping
 - Express feelings and describe experiences
 - Demonstrate your understanding of the dependent clauses

- Obtain and present information using indirect questions
- Review giving commands

5. **Flugreisen**

- Discuss plans for taking an international trip
- Experience the steps necessary when entering a German-speaking country
- Engage in conversations using "in order to..." to link cause and effect
- Obtain and present information using the 24-hour time system
- Navigate public transportation in German-speaking countries

6. **Semester Exam**

1. Semester Exam

German III

German III

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

Semester A Outline

1. Introduction to German III

1. Welcome to German III!

2. Gesundheit

1. Lektion 1A Kontext (Day 1)

- Identify vocabulary to discuss everyday routines
- Recognize vocabulary for parts of the body
- Organize events in chronological order

2. Lektion 1A Kontext (Day 2)

- Label the parts of the body
- Recognize vocabulary to discuss everyday routines
- Demonstrate listening comprehension, writing down dictated words

3. Lektion 1A Aussprache und Rechtschreibung

- Produce vocalic r with proper pronunciation
- Demonstrate listening comprehension by writing down dictated words

4. Lektion 1A Fotoroman

- Recall vocabulary that discusses everyday routines
- Summarize a short film, discussing the details and characters

5. Lektion 1A Kultur

- Identify cultural aspects found in Germany
- Summarize information about cultural aspects in Germany

6. Strukturen 1A.1 (Day 1)
 - Form reflexive verbs with accusative reflexive pronouns
7. Strukturen 1A.1 (Day 2)
 - Select the correct reflexive pronoun in sentences
 - Conjugate reflexive verbs with accusative reflexive pronouns
8. Strukturen 1A.2 (Day 1)
 - Produce reflexive verbs with dative reflexive pronouns
 - Select the correct article to use with reflexive verbs
9. Strukturen 1A.2 (Day 2)
 - Differentiate between the accusative and dative cases
 - Select the correct reflexive pronoun
 - Compose sentences with reflexive verbs and dative reflexive pronouns
10. Strukturen 1A.3 (Day 1)
 - Form reciprocal and reflexive verbs with prepositions
 - Distinguish the difference between reciprocal and reflexive verbs
 - Produce sentences with reflexive pronouns
 - Describe pictures using reciprocal and reflexive verbs
11. Strukturen 1A.3 (Day 2)
 - Distinguish the difference between reciprocal and reflexive verbs
 - Select the correct reflexive pronoun
 - Describe pictures using reciprocal and reflexive verbs
12. Lektion 1A (Review)
 - Produce correct pronunciation for the vocabulary in this unit
 - Recognize vocabulary to discuss everyday routines
13. Lektion 1A (Quiz)
14. Zapping
 - Summarize a television advertisement
15. Lektion 1B Kontext (Day 1)
 - Recognize vocabulary and expressions related to healthcare
16. Lektion 1B Kontext (Day 2)
 - Recognize vocabulary to discuss illnesses and injuries
 - Select the correct dative pronoun
 - Demonstrate listening comprehension to match sentences with pictures
17. Lektion 1B Aussprache und Rechtschreibung
 - Produce correct pronunciation of different syllabic stress
 - Demonstrate listening comprehension, writing down dictated sentences
18. Lektion 1B Fotoroman
 - Summarize a short film
 - Organize events from a short film in chronological order
19. Lektion 1B Kultur
 - Summarize information about an apothecary in Germany
20. Strukturen 1B.1 (Day 1)
 - Conjugate verbs in the subjunctive tense
 - Compose sentences in the subjunctive tense
21. Strukturen 1B.1 (Day 2)
 - Conjugate verbs in the subjunctive tense
 - Differentiate between the indicative and subjunctive tenses
22. Strukturen 1B.2 (Day 1)
 - Compose sentences with the subjunctive form *würden* plus the infinitive
 - Describe pictures using the subjunctive form *würden* plus the infinitive

23. Strukturen 1B.2 (Day 2)
24. Lektion 1B (Review)
 - Produce correct pronunciation for the vocabulary in this unit
 - Recognize vocabulary to discuss illness, injuries, and healthcare
25. Lektion 1B (Quiz)
26. Panorama
 - Identify cultural and historical aspects in Germany
27. Lesen and Hören
28. Gesundheit Portfolio
29. Gesundheit Practice
30. Gesundheit Test

3. Stadtleben

1. Lektion 2A Kontext (Day 1)
 - Identify vocabulary to discuss errands
 - Produce vocabulary to discuss errands with correct pronunciation
2. Lektion 2A Kontext (Day 2)
 - Recall vocabulary related to errands and places in town
3. Lektion 2A Aussprache und Rechtschreibung
 - Produce proper pronunciation of the glottal stop
 - Demonstrate listening comprehension, writing dictated sentences
4. Lektion 2A Fotoroman
 - Summarize a short film, including describing characters
5. Lektion 2A Kultur
 - Identify vocabulary about pedestrian zones
6. Strukturen 2A.1 (Day 1)
 - Select the correct subordinating conjunction in sentences
 - Distinguish the difference between als and wenn
7. Strukturen 2A.1 (Day 2)
 - Select the appropriate subordinating conjunction
 - Construct sentences with als and the perfect tense
8. Strukturen 2A.2 (Day 1)
 - Compose sentences using adjectival nouns
9. Strukturen 2A.2 (Day 2)
 - Produce sentences with adjectival nouns
10. Strukturen 2A.3 (Day 1)
 - Conjugate verbs in the future I tense
11. Strukturen 2A.3 (Day 2)
 - Form verbs in the future I tense in writing
12. Lektion 2A (Review)
 - Recognize vocabulary to discuss errands and places in town
 - Demonstrate proper pronunciation of this unit's vocabulary
13. Lektion 2A (Quiz)
14. Kurzfilm
 - Summarize a short film
15. Lektion 2B Kontext (Day 1)
 - Identify vocabulary about a city
16. Lektion 2B Kontext (Day 2)
 - Recall vocabulary about life in a city, matching English to German words
 - Define vocabulary using antonyms
 - Discuss directions to a variety of places in a city

17. Lektion 2B Aussprache und Rectshreibung
 - Demonstrate proper pronunciation of borrowed words
 - Demonstrate listening comprehension, writing dictated sentences
18. Lektion 2B Fotoroman
 - Summarize a short film
 - Organize events of a film in chronological order
19. Lektion 2B Kultur
 - Identify cultural aspects in Germany, including the arts
20. Strukturen 2B.1 (Day 1)
 - Select the correct preposition of direction in writing
21. Strukturen 2B.1 (Day 2)
 - Construct sentences with prepositions of direction
 - Demonstrate listening comprehension, matching pictures to dictated sentences
22. Strukturen 2B.2 (Day 1)
 - Identify vocabulary to discuss nationalities
23. Strukturen 2B.2 (Day 2)
 - Recall vocabulary to discuss nationalities, including country names, adjectives, and languages
24. Lektion 2B (Review)
 - Recognize vocabulary about life in a city and nationalities
 - Demonstrate proper pronunciation of vocabulary in this unit
25. Lektion 2B (Quiz)
26. Panorama
 - Identify cultural, historical, and geographic aspects of a region in Germany
27. Lesen and Horen
 - Identify contributions of German writers
 - Identify information about the German government system
28. Stadtleben Portfolio
29. Stadtleben Practice
30. Stadtleben Test

4. Semester A

1. Semester Exam Practice
2. Semester Exam

Semester B Outline

1. Introduction to German III

1. Welcome to German III!

2. Beruf und Karriere

1. Lektion 3A Kontext (Day 1)
 - Define vocabulary to discuss jobs and careers
2. Lektion 3A Kontext (Day 2)

- Recall vocabulary related to jobs, careers, and activities in the office
 - Organize events in chronological order
 - Demonstrate listening comprehension, matching pictures to dictated sentences
3. Lekiton 1A Aussprache und Rectshreibung
 - Produce proper pronunciation for borrowed words
 - Demonstrate listening comprehension, writing dictated sentences
 4. Lektion 3A Fotoroman
 - Summarize a short film
 5. Lektion 3A Kultur
 - Identify cultural aspects of a German-speaking country
 6. Lektion 3A Kultur
 - Select the correct relative pronouns in sentences
 7. Strukturen 3A.1 (Day 2)
 - Select the correct relative pronouns in sentences
 - Identify the relative pronouns in a sentence, using listening comprehension
 8. Strukturen 3A.2 (Day 1)
 - Compose sentences with the correct form of the past tense
 9. Strukturen 3A.2 (Day 2)
 - Produce the correct forms of the past tense
 - Describe pictures using the past tense
 - Identify the different forms of the past tense orally
 10. Lektion 3A (Review)
 - Recognize vocabulary to discuss jobs, careers, and activities in an office
 - Demonstrate proper pronunciation for vocabulary in this unit
 11. Lektion 3A (Quiz)
 12. Kurzfilm
 - Identify vocabulary from a short film
 - Organize events from a short film in chronological order
 13. Lektion 3B Kontext (Day 1)
 - Identify vocabulary to discuss different types of jobs and careers
 14. Lektion 3B Kontext (Day 2)
 - Recall vocabulary to discuss jobs and careers
 15. Lekiton 3B Aussprache und Rectshreibung
 - Recognize near-cognates
 - Produce proper pronunciation of near-cognates
 - Demonstrate listening comprehension, writing dictated sentences
 16. Lektion 3B Fotoroman
 - Describe characters in a short film
 - Summarize a short film
 17. Lektion 3B Kultur
 - Identify elements of German society, including social insurance
 18. Strukturen 3B.1 (Day 1)
 - Conjugate verbs in the future II tense
 19. Strukturen 3B.1 (Day 2)
 - Form verbs in the future II tense
 - Distinguish between future I, future II, and perfect tenses
 20. Strukturen 3B.2 (Day 1)
 - Select the appropriate adjectival endings
 21. Strukturen 3B.2 (Day 2)
 - Select the appropriate adjectival endings

- Form the correct adjectival endings in writing
22. Lektion 3B (Review)
 - Recall vocabulary related to jobs, careers, and activities in an office
 - Demonstrate proper pronunciation for vocabulary words in this unit
 23. Lektion 3B (Quiz)
 24. Panorama
 - Identify cultural, historical, and geographic aspects of regions of Germany
 25. Lesen and Hören
 - Identify contributions of German writers
 - Distinguish between past, present, and future tenses of verbs
 - Demonstrate listening comprehension, taking notes about the conversation
 26. Beruf und Karriere Portfolio
 27. Beruf und Karriere Practice
 28. Beruf und Karriere Test

3. Natur

1. Lektion 4A Kontext (Day 1)
 - Identify vocabulary to discuss nature and a variety of environments
2. Lektion 4A Kontext (Day 2)
 - Recall vocabulary related to nature
3. Lektion 4A Aussprache und Rechtschreibung
 - Demonstrate proper intonation when speaking
 - Demonstrate listening comprehension by writing dictated sentences
4. Lektion 4A Fotoroman
 - Summarize a short film
 - Describe characters in a short film
5. Lektion 4A Kultur
 - Identify geographic aspects of Germany
 - Identify contributions of a German geographer
6. Strukturen 4A.1 (Day 1)
 - Conjugate verbs in the past subjunctive
 - Compose sentences in the past subjunctive tense
7. Strukturen 4A.1 (Day 2)
 - Select correct form of the auxiliary verb
 - Compose sentences in the past subjunctive tense
 - Demonstrate listening comprehension, writing dictated sentences
8. Strukturen 4A.2 (Day 1)
 - Select the correct form of the present participle
 - Form the present participle in sentences
9. Strukturen 4A.2 (Day 2)
 - Select the correct adjectival endings
 - Form the present participle correctly
 - Identify when present participles are used as adjectives
 - Demonstrate listening comprehension, writing dictated sentences
10. Lektion 4A (Review)
 - Recall vocabulary to discuss nature
 - Demonstrate proper pronunciation for target vocabulary
11. Lektion 4A (Quiz)
12. Kurzfilm
 - Summarize a short film about nature
13. Lektion 4B Kontext (Day 1)

- Identify vocabulary to discuss environmental issues
14. Lektion 4B Kontext (Day 2)
 - Recall vocabulary related to environmental issues, matching English to German words
 15. Lektion 4B Aussprache und Rechtschreibung
 - Repeat tongue twisters with proper pronunciation
 - Demonstrate listening comprehension by writing dictated sentences
 16. Lektion 4B Fotoroman
 - Summarize a short film
 17. Lektion 4B Kultur
 - Identify an environmental issue in Germany
 18. Strukturen 4B.1 (Day 1)
 - Form subjunctive I verb tense with indirect speech
 - Distinguish between the indicative and subjunctive I tenses
 19. Strukturen 4B.1 (Day 2)
 - Distinguish between the indicative and subjunctive I tenses in indirect speech
 - Form the subjunctive tense
 - Identify the past, present, and future subjunctive tenses
 20. Strukturen 4B.2 (Day 1)
 - Differentiate between the active and passive voices
 - Form the passive voice
 21. Strukturen 4B.2 (Day 2)
 - Distinguish between the active and passive voices
 - Compose sentences with the present tense of the passive voice and modals
 22. Lektion 4B (Review)
 - Recognize vocabulary related to environmental issues
 - Demonstrate proper pronunciation of target vocabulary
 23. Lektion 4B (Quiz)
 24. Panorama
 - Identify cultural, historical, and geographic aspects of regions in Germany
 25. Lesen and Hören
 - Identify poems about the environment
 - Identify contributions of German writers
 - Summarize information about environmental issues
 26. Natur Portfolio
 27. Natur Practice
 28. Natur Test

4. Semester B

1. Semester Exam Practice
2. Semester Exam

Middle Chinese I

Middle Chinese I

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Chinese I is an introductory-level course that will introduce the student to Mandarin Chinese. The units are designed to introduce the student to Chinese language and culture through familiar topics such as my family, my week, and food. Culture is presented throughout the course to help the student make connections between his culture and the culture of people in the Mandarin-speaking world.

Course Outline:

1. My World

1. Welcome to Mandarin!
 - Recognize the Mandarin words for "hello," "I," "teacher," and "am/is/are"
 - Recognize and write the Mandarin word for the number "one"
 - Recognize that Mandarin words are written using characters
 - Recognize and say Mandarin words using the English alphabet
 - Explain why it is important to learn about other countries and their languages
2. What's Your Name?
 - State your first and last name in Mandarin
 - Recognize and say the Mandarin words for "boy," "girl," "this," and "you"
 - Recognize and write the Mandarin word for "two"
 - Recognize the four tones of the Mandarin language
 - Identify the tone marks used to explain how to say Mandarin words aloud
3. Meeting My Parents
 - Recognize the sound and say the Mandarin words for "father," "mother," "family," and "my"
 - Write and recognize the Mandarin character for the number "three"
 - Examine and discuss family culture in the Mandarin-speaking world
4. Meet My Siblings!

- Recognize the sound and say the Mandarin words for "sister," "brother," and the numbers "four" and "five"
 - Write and recognize the Mandarin characters for the numbers "four" and "five"
 - Discuss the importance of the oldest son in the traditional Mandarin-speaking world
 - Describe the one-child rule
5. Meet My Friends
- Recognize the sound and state the Mandarin terms for "friend," "love," and the numbers "six," "seven," and "eight"
 - Write and recognize the characters for the numbers "six," "seven," and "eight"
 - Examine and discuss friendships in the Mandarin-speaking world
6. It's Party Time!
- Recognize the sound and say the Mandarin words for "birthday," "happy," "years old," and the numbers "nine," "ten," and "zero"
 - Write and recognize the characters for the numbers "nine," "ten," and "zero"
 - State your age in Mandarin
 - Examine how birthdays are celebrated in the Mandarin-speaking world
7. Time for a Break
- Recall and use Mandarin vocabulary to greet others and identify family members and friends
 - Recognize the important characteristics of Mandarin: characters, sounds, tone, and marks
 - Recognize and write the Mandarin words for the numbers zero to ten
 - Explain why it is important to learn Mandarin and its importance in the world
 - Describe families in the Mandarin-speaking world

2. My Time

1. It's Monday Morning!
- Recognize the sound and say the Mandarin words for "Monday," "wake up," "bus," "take," and "good morning"
 - Write and recognize the Mandarin characters for "Monday"
 - Identify the typical weekday morning activities of a student in the Mandarin-speaking world
 - Use proper Mandarin terms to greet people you might see in the morning
2. A Day at School
- Recognize the sound and say the Mandarin words for "class," "classmate," "school," and "Tuesday"
 - Write and recognize the Mandarin characters for "Tuesday"
 - Identify typical school day traditions and activities for Mandarin-speaking students
3. After School Time
- Recognize the sound and say the Mandarin words for "Wednesday," "music," "sports," "homework," and "listen"
 - Write and recognize the Mandarin character for "Wednesday"
 - Identify the typical after-school activities of a student in the Mandarin-speaking world
4. Time to Relax!
- Recognize the sound and state the Mandarin terms for "reading," "Internet," "Thursday," and the numbers 11 through 19

- Recognize and write the Mandarin terms for "Thursday" and the numbers 11 through 19
 - Describe what a student in the Mandarin-speaking world typically does during free time on weekdays
 - Compare the free time activities of students in the Mandarin-speaking world with your free time activities
5. It's Friday!
- Recognize the sound and say the Mandarin terms for "Friday," "talking," "television," "watching," and the number 20
 - Recognize and write the Mandarin characters for "Friday" and the number 20
 - Identify what students in the Mandarin-speaking world do with their families on weeknights
6. It's the Weekend
- Recognize the sound and say the Mandarin terms for "chores," "play," "Saturday," "Sunday," and the numbers 30, 40, 50, 60, 70, 80, and 90
 - Write and recognize the Mandarin characters for "Saturday," "Sunday," and the numbers 30, 40, 50, 60, 70, 80, and 90
 - Describe what a middle school student in the Mandarin-speaking world might do on a weekend
 - Compare the weekend activities of a student in the Mandarin-speaking world with your typical weekend activities
 - Discuss what learning about a typical day in the life of Mandarin students can teach you about their culture
7. Bringing It All Together: Sunday Afternoon
- Recall the Mandarin vocabulary about morning routines, school, activities, the days of the week, and the numbers 0 to 90 learned in prior lessons
 - Recall the Mandarin vocabulary learned in the prior unit about greetings, family, friends, and birthdays
 - Recognize and write the Mandarin characters for the days of the week and the numbers you have learned from 0 to 90
 - Recall what you have learned about schools and activities in the Mandarin-speaking world

3. My Food

1. Mandarin Meals
- Recognize the sound and say the Mandarin terms for "food," "breakfast," "lunch," "dinner," and "eat"
 - Recognize and write the Mandarin character for "eat"
 - Compare mealtime traditions in the Mandarin-speaking world with your mealtime traditions
2. Good Morning!
- Recognize the sound and say the Mandarin words for "milk," "bread," "tea," "drink," and "morning"
 - Recognize and write the Mandarin character for "morning"
 - Compare breakfast in the Mandarin-speaking world with your typical breakfast
3. It's Time for Lunch!

- Recognize the sound and say the Mandarin words for "afternoon," "soup," "water," "noodles," and "sandwich"
 - Recognize and write the Mandarin characters for "afternoon" and "water"
 - Discuss what students in the Mandarin-speaking world typically eat for lunch
 - Compare and contrast Mandarin-speaking world lunches with a typical lunch in the United States
4. Mom's Famous Fish Dish
- Recognize the sound and say the Mandarin terms for "evening," "fish," "chicken," "rice," and "vegetable"
 - Recognize and write the Mandarin term for "evening"
 - Compare dinners in the Mandarin-speaking world with dinners eaten in the United States
 - Discuss what studying Mandarin and American foods can teach you about each culture
5. Snack Time
- Recognize the sound and say the Mandarin words for "fruit," "banana," "apple," "yellow," and "red"
 - Recognize and write the Mandarin characters for "red" and "yellow"
 - Discuss snacks in the Mandarin-speaking world
 - Compare Mandarin-speaking world snacks with the snacks you normally eat
6. Visiting a Chinese Restaurant
- Recognize the sound and say the Mandarin words for "blue," "menu," "money," "please," and "thank you"
 - Recognize and write the Mandarin character for "blue"
 - Identify the type of money used in China
 - Compare the traditions surrounding going to a restaurant in the Mandarin-speaking world with the traditions of eating out in the United States
7. Going to Market
- Recognize the sound of and speak the Mandarin vocabulary for mealtimes, times of day, foods, and colors learned in this unit
 - Recognize and write the Mandarin characters for "morning," "afternoon," "evening," "red," "yellow," "blue," "eat," and "water"
 - Compare your own culture's meals and traditions with meals and traditions in the Mandarin-speaking world
 - Discuss what studying Mandarin and American foods can teach you about their cultures

Middle Chinese II

Middle Chinese II

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Middle Chinese II enables the student to further develop his communication skills as studies Mandarin Chinese at a more advanced level. - Recognize the important achievements of Cuban artists and athletes, as well as salsa performers

6. The Playground

- Recognize and say the Spanish words for recess, swing set, soccer, baseball, sport, game, and (to) play
- Demonstrate the correct use of the Spanish verb (to) play with the preposition “with”
- Compare and contrast the popular sports of the Dominican Republic with those of the United States
- Identify geographic and cultural characteristics of the Dominican Republic

7. My Graduation

- Recall and use the Spanish words for school and classrooms, as well as objects and activities related to school
- Compare and contrast a graduation ceremony in the Spanish-speaking world with one in the United States
- Recognize the influence of Caribbean culture upon the culture of the United States
- Identify geographic characteristics of the coral reefs of the Caribbean Sea

2. My Clothes

1. My Everyday Clothes

- Recognize and say the Spanish words for pants, shirt, blouse, T-shirt, socks, old, and new
- Demonstrate correct use of the Spanish 1st and 2nd person possessive
- Recognize some traditional clothes used in the Spanish-speaking world
- Recognize the cultural influence of the Spanish-speaking population within the United States

2. My Winter Clothes

- Recognize and say the Spanish words for coat, sweater, winter, fall, cold, and heat
- Demonstrate the correct use of the Spanish verb (to) have
- Identify geographic and cultural characteristics of California, including Los Angeles, Fresno, and other places related to Spanish culture

- Recognize the technological advances being made in the Silicon Valley
3. My Summer Clothes
 - Recognize and say the Spanish words for dress, shorts, skirt, spring, summer, and swimsuit
 - Demonstrate correct use of the Spanish verb (to) use and (to wear)
 - Identify geographic and cultural characteristics of Florida, including outdoor activities and Cultural Fridays
 4. My Accessories
 - Recognize and say the Spanish words for sunglasses, belt, purse, cap, hat, and gloves
 - Demonstrate the correct use of the Spanish verb (to) put on/wear
 - Identify geographic and cultural characteristics of Texas, including the Chihuahuan Desert and the rodeo
 5. My Shoes
 - Recognize and say the Spanish words for shoes, boots, sandals, sneakers, formal, and informal
 - Demonstrate the correct use of Spanish adverbs
 - Recognize the important characteristics and achievements of Spanish fashion designers and other important Spanish-speaking people of the United States
 6. My Formal Clothes
 - Recognize and say the Spanish words for suit, tie, evening dress, striped, checked, and plain
 - Demonstrate the correct use of the Spanish interrogative ¿Cómo?
 - Identify geographic and cultural characteristics of New York City, including Spanish-speaking neighborhoods, food, and theater
 7. International Day at School
 - Recall and use the Spanish words for types of clothing and the seasons, as well as qualities and activities related to clothing
 - Recognize the influence of the Spanish-speaking population upon United States culture
 - Explain what it means for the United States to be "a cultural melting pot"
3. **My Neighborhood**
 1. My Neighborhood
 - Recognize and say the Spanish words for neighborhood, neighbor, street, avenue, and square
 - Demonstrate the correct use of the Spanish verb (to) live
 - Identify the unique features of neighborhoods found in the Spanish-speaking world
 - Identify geographic and cultural characteristics of Central America, including the concept of a town plaza
 2. My Neighbors
 - Recognize and say the Spanish words for community helpers, firefighter, police officer, mail carrier, guard, and doctor
 - Demonstrate the correct use of the Spanish verb (to) help
 - Recognize general characteristics of the roles of Costa Rican community helpers
 - Identify geographic and cultural characteristics of Costa Rica, including local parks and wildlife
 3. Services in My Community

- Recognize and say the Spanish words for hospital, post office, police station, left, right, in front, and behind
 - Recall the correct use of the Spanish interrogative ¿Dónde?
 - Identify common breakfast items shared in Panamá, including frituras
 - Identify geographic and cultural characteristics of Panamá, including the Panamá Canal
4. My Favorite Places
- Recognize and say the Spanish words for park, movie theater, museum, library, near, and far
 - Demonstrate the correct use of the Spanish verb (to) come from, as well as Spanish contractions
 - Recognize the important characteristics and achievements of the Nicaraguan poet Rubén Darío
 - Identify geographic and cultural characteristics of Nicaragua, including the National Library
5. Traveling in My Neighborhood
- Recognize and say the Spanish words for bike, car, pedestrian crossing, traffic light, and (to) walk
 - Recall and combine previously learned Spanish vocabulary with the verb (to) walk in order to create new expressions
 - Recognize the main characteristics of public transportation in Honduras
 - Identify geographic and cultural characteristics of Honduras, including the Cusuco National Park
6. Enjoying the Neighborhood

Sign Language 6 - 8

Middle Sign Language

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will be introduced to the fundamental concepts of American Sign Language. The student will explore vocabulary, grammar, and conversational skills using basic signing and fingerspelling techniques, and will begin to learn about Deaf culture and the Deaf community. A webcam and recording device are required for this course

Course Outline

1. Intro

1. History/Culture
 - Define Deaf culture
 - Define Deaf community
 - Identify key cultural norms in the Deaf community
 - Identify unique characteristics of the Deaf culture
2. About ASL
 - Define ASL
 - Identify elements of signed language
 - Track dates and events in the introduction of sign language education to America
 - Name key contributors to deaf education in America
3. Dialogue
 - Describe conventions used to transcribe ASL
 - Use transcription conventions to translate written text into ASL sentences
4. ABCs
 - Identify elements of signed language
 - Name the four parameters of signed language
 - Sign the alphabet
5. Fingerspelling
 - Fingerspell 3, 4, and 5 letter words
 - Recognize fingerspelled words
 - Fingerspell proper nouns
6. Greetings

- Use ASL to greet others and introduce yourself
 - Follow the cultural rules associated with greetings, name signs, and good-byes
7. Etiquette
 - Define etiquette
 - Describe social rules and behaviors observed during interaction in the Deaf community
 - Identify key vocabulary
 8. Review
 9. Unit Test
2. **Numbers**
 1. Numbers 1–1,000
 - Sign numbers 0–1,000
 - Explain the unique number patterns for numbers 1–10, 11–15, 16–19, 20, 21–99, 100–900, and 1,000
 2. Counting and Money
 - Demonstrate the signs for dollar, cents, and how much
 - Recognize the signs for numbers between 0 and 100
 - Demonstrate the signs for numbers between 0 and 100
 3. Math, Weights, and Measures
 - Demonstrate signs for weights, measures, and simple math functions
 4. Review
 5. Unit Test
 3. **Time**
 1. The Clock
 - Be able to identify the signs relating to the telling of time
 - Be able to demonstrate the signs relating to the telling of time
 - Be able to describe various times that events happen
 2. Days and Months
 - Recognize signs for days of the week and months of the year
 - Demonstrate signs for days of the week and months of the year
 - Construct simple sentences using days and months
 3. Seasons and Holidays
 - Recognize and be able to accurately sign the four seasons of the year
 - Recognize and be able to to accurately sign various holidays
 4. Review
 5. Unit Test
 4. **Nouns**
 1. Identifying and Indexing
 - Demonstrate signs for pronouns
 - Demonstrate indexing
 2. People
 - Demonstrate signs for family members
 - Recognize signs for family members
 3. Agent
 - Be able to demonstrate signs of agent
 - Use agent correctly with other signs to show jobs or occupations that people may have
 4. Dialogue
 - Students will learn how to use punctuation correctly in ASL

- Students will incorporate suffixes into signed dialogue
- 5. Places and Things
 - Demonstrate signs for the names of places and things
- 6. Review
- 7. Unit Test

5. **Descriptions**

1. Comparative Adjectives
 - Learn the ASL method for using comparative adjectives
 - Make comparisons using correct ASL signs
2. DCL Classifiers - Size and Shape Specifiers
 - Identify what a classifier is and what function it serves in ASL
 - Use classifiers correctly in signed conversation
3. Possession
 - Demonstrate the ASL handshape to indicate possession
 - Be able to accurately sign the various personal pronouns to show possession
4. Colors
 - Using ASL, correctly make the signs for various colors
 - Using the ASL signs for colors, as well as previously learned signs, sign descriptive sentences
5. Location
 - Demonstrate how to accurately sign various locations using ASL
 - Use the signs for different locations in descriptive sentences
6. Dialogue
 - Use correct nonmanual markers in place of state of being verbs
 - Explain how nonmanual markers can change the meaning of a sentence
7. Review
8. Unit Test

Course Outline

SEMESTER A

1. Introduction to ASL

1. What Is the Deaf Community?

- Examine unique aspects of the Deaf community

Introductions and Greetings Vocabulary

- Accurately comprehend and produce ASL vocabulary related to introductions and greetings

Introduction to Fingerspelling

- Accurately produce and comprehend ASL vocabulary
- Interpret and apply fingerspelling techniques

Parameters and Production of Signs

- Identify and analyze the five parameters of signs

Quiz

- Compare members of the Deaf community to members of the mainstream hearing community
- Accurately comprehend and produce ASL vocabulary related to introductions and greetings
- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters in specialized contexts
- Identify and analyze essential grammatical components of ASL related to parameters and production

Introduction Portfolio

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

Signing in Space

What Is Deaf Culture?

- Compare members of the Deaf community to members of the mainstream hearing community

Pronouns and Possessives

Numbers 0–30

- Accurately comprehend and produce ASL vocabulary related to pronouns and possessives

Indexing in Space

- Accurately produce and comprehend ASL vocabulary for numbers 0-30

Quiz

- Analyze and apply indexing in space

- Recognize how members of the Deaf community differ from members of the hearing community
- Examine and produce ASL vocabulary related to pronouns and possessives
- Comprehend and produce ASL vocabulary, letters, and numbers in specialized contexts
- Distinguish essential grammatical components of ASL related to indexing in space

Signing in Space Portfolio

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

Structures and Strategies

Beginnings of American Sign Language

- Examine Deaf history and the development of ASL

Signed Vocabulary—Family

- Accurately comprehend and produce ASL vocabulary related to family

Receptive Fingerspelling Techniques

- Use receptive fingerspelling to produce ASL letters

Sentence Structures for Statements

- Analyze and interpret sentence structures for statements in ASL

Quiz

- Examine the historical development of ASL
- Recognize and produce ASL vocabulary related to family
- Identify the fundamentals of receptive fingerspelling
- Interpret essential grammatical components of ASL related to parameters and production

Indexing in Space

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

Indicating People

Name Signs

- Examine the use of name signs in the Deaf community

Signed Vocabulary-People around Town

- Accurately comprehend and produce ASL vocabulary related to people around town

Expressive Fingerspelling Techniques

- Identify strategies for expressive fingerspelling

Agent Marker

- Analyze the role of the Agent marker in ASL

Quiz

- Comprehend the fundamentals of name signs in the Deaf community
- Distinguish and produce ASL vocabulary related to people around town
- Identify strategies for expressive fingerspelling

- Recognize the significance of the agent marker in ASL

Agent Marker for Roles

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

Community, Calendar, and Clock

Locations of ASL

- Identify geographical Deaf communities in the United States

Signed Vocabulary—Calendar

- Accurately comprehend and produce ASL vocabulary related to the calendar

The Clock and Time

- Comprehend how to indicate specific times in ASL

Sentence Structures for Questions

- Analyze sentence structures used for questions in ASL

Quiz

- Identify geographical Deaf communities in the United States
- Comprehend and produce signs related to the calendar
- Implement ASL to indicate specific times
- Comprehend and produce sentence structures for questions in ASL

Calendar

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

SEMESTER B

Course Summary:

This course follows Sign Language I A. The goal of Sign Language I B is for the student to become a confident signer by mastering American Sign Language grammar and building vocabulary. Lessons incorporate the various important components of signs including handshape, position, movement, palm orientation, and non-manual markers. The student’s vocabulary is strengthened by studying special categories such as lexicalized signs, classifiers, and topic-related signs. The student will learn to translate from Standard English into American Sign Language gloss. A webcam and recording device are required for this course.

1. Advancing the Fundamentals

1. American Sign Language in Deaf culture

- Identify sources of opposition to the Deaf community

Signed Vocabulary—At School

- Accurately comprehend and produce ASL vocabulary related to school

Numbers 31–60

- Recognize and comprehend signs for numbers 31-60

Introduction to Glossing

- Identify key components of ASL gloss

Quiz

- Examine the opposition to ASL and its effects
- Comprehend and produce basic school vocabulary in ASL
- Comprehend and produce basic number vocabulary in ASL
- Identify and analyze key components of ASL gloss

Class Scheduling

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

Careers and Comparisons

Successful Deaf Individuals

- Identify successful Deaf and hard of hearing individuals

Signed Vocabulary—Work and Careers

- Accurately comprehend and produce ASL vocabulary related to work and careers

Numbers 61–99

- Recognize and comprehend signs for numbers 61-99

Body Shifting for Combinations, Comparisons, and C

- Comprehend the method of body shifting in ASL

Quiz

- Recognize successful Deaf and hard of hearing individuals
- Identify and produce basic signs related to work
- Identify and produce basic number signs
- Comprehend the method of body shifting in ASL

Comparing Careers

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

Pronominals in Space

Deaf President Now!

- Examine a famous event in Deaf history

Signed Vocabulary—Food and Drink

- Accurately comprehend and produce ASL vocabulary related to food

Numbers to 999

- Recognize and comprehend signs for numbers through 999

Pronominal Classifiers

- Analyze the use of pronominal classifiers in ASL

Quiz

- Investigate the Deaf President Now event
- Identify and produce essential food and drink signs
- Identify and produce number signs
- Analyze pronominal classifiers

Pronominals for Food and Drink

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

Sports and Recreation

Sports in the Deaf Community

- Recognize the importance of sports and recreation in the Deaf community

Signed Vocabulary—Sports and Recreation

- Accurately comprehend and produce ASL vocabulary related to sports and recreation
- Numbers to 1 Million

- Recognize and comprehend signs for numbers to 1 million

Instrumental Classifiers

- Analyze and interpret the use of instrumental classifiers in ASL

Quiz

- Examine the importance of sports and recreation in the Deaf community
- Identify and produce basic ASL vocabulary related to sports and recreation
- Identify and produce number signs
- Analyze and interpret instrumental classifiers

Sports Classifiers

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

Times and Tenses

Deaf Culture Today

- Examine changes that have produced today's Deaf culture

Signed Vocabulary—Seasons and Holidays

- Accurately comprehend and produce ASL vocabulary related to seasons and holidays

Signing Years

- Recognize and comprehend signs for numbers related to years

Indicating Tense

- Analyze and interpret the grammatical features of using tense in ASL

Quiz

- Explore changes that have contributed to what Deaf culture is today
- Identify and produce basic signs related to seasons and holidays
- Identify and produce signs related to years
- Analyze and interpret the grammatical features of using tense in ASL

Story in Time

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

Sign Language II

Sign Language II

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book

Semester A Summary:

In this course, the student will continue his study of American Sign Language. The student will expand his ASL vocabulary, grammar, and conversational skills. In addition, the student will complete activities and exercises that help him understand the culture of deaf and hard-of-hearing community. A webcam and recording device are required for this course.

Semester B Summary:

In this course, the student will extend the study of American Sign Language at the intermediate level. The student will expand his ASL vocabulary, grammar, and conversational skills, and advance his signing and fingerspelling strategies. The student will continue to analyze elements of Deaf culture and issues surrounding the Deaf community, focusing on careers and continuing education options that utilize American Sign Language. A webcam and recording device are required for this course.

Course Outline

SEMESTER A

1. Descriptions in Space

1. Deaf Literature
 - Examine and explain features of Deaf literature
2. Signed Vocabulary—Animals and Colors
 - Accurately produce ASL vocabulary related to animals and colors
3. Advanced Expressive Fingerspelling Techniques
 - Examine and apply methods for advancing expressive fingerspelling skills
4. Descriptive Classifiers
 - Analyze and interpret descriptive classifiers
5. Quiz
 - Examine features of Deaf literature
 - Identify and produce basic signs related to animals and their colors
 - Identify and apply expressive fingerspelling skills
 - Analyze and interpret descriptive classifiers
6. Animal Description
 - Accurately produce and comprehend ASL vocabulary

- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

2. **Travel and Transportation**

1. ASL Storytelling
 - Examine and explain key components of storytelling in the Deaf community
2. Signed Vocabulary—Travel and Transportation
 - Accurately produce ASL vocabulary related to travel and transportation
3. Advanced Receptive Fingerspelling Techniques
 - Examine and apply advanced receptive fingerspelling techniques
4. Noun/Verb Pairs
 - Analyze and interpret the grammatical feature of noun/verb pairs in ASL
5. Quiz
 - Examine key components of storytelling in the Deaf community
 - Identify and produce basic signs related to travel and transportation
 - Identify and apply advanced receptive fingerspelling techniques
 - Analyze and interpret the grammatical feature of noun/verb pairs in ASL
6. Travel and Transportation
 - Accurately produce and comprehend ASL vocabulary
 - Accurately produce and comprehend ASL letters and numbers in specialized contexts
 - Demonstrate essential grammatical components of ASL
 - Demonstrate mastery of ASL vocabulary and grammar

3. **Modifying for Degree**

1. Deaf Poetry
 - Examine and explain the characteristics of Deaf poetry
2. Signed Vocabulary—Weather and Feelings
 - Accurately produce ASL vocabulary related to weather and feelings
3. Signing Symbols
 - Accurately produce signs for symbols in ASL
4. Modifying Signs for Degree
 - Analyze and interpret how to modify signs for degree in ASL
5. Quiz
 - Examine the characteristics of Deaf poetry
 - Identify and produce basic signs related to weather and feelings
 - Identify and produce symbols in ASL
 - Analyze and interpret how to modify signs for degree in ASL
6. Weather Modification
 - Accurately produce and comprehend ASL vocabulary
 - Accurately produce and comprehend ASL letters and numbers in specialized contexts
 - Demonstrate essential grammatical components of ASL
 - Demonstrate mastery of ASL vocabulary and grammar

4. **Special Names and Lists**

1. Deaf Art
 - Examine and explain general and specific types of Deaf artwork
2. Signed Vocabulary—Chores and Errands
 - Accurately produce ASL vocabulary related to chores and errands
3. Special Numbers and Lists

- Examine and apply methods of producing signs for ordinal numbers
- 4. Listing on Non-Dominant Hand
 - Analyze and interpret how to list on the non-dominant hand
- 5. Quiz
 - Examine the concept of Deaf art
 - Identify and produce basic signs for chores and errands
 - Identify and produce signs for ordinal numbers
 - Analyze and interpret how to list on the non-dominant hand
- 6. Non-Dominant Listing
 - Accurately produce and comprehend ASL vocabulary
 - Accurately produce and comprehend ASL letters and numbers in specialized contexts
 - Demonstrate essential grammatical components of ASL
 - Demonstrate mastery of ASL vocabulary and grammar

5. Events throughout Time

1. Deaf Music
 - Examine and explain features of Deaf music
2. Signed Vocabulary—Lifetime Events
 - Accurately produce ASL vocabulary related to lifetime events
3. Ages
 - Examine and apply methods for producing signs related to ages
4. Conceptual Accuracy
 - Analyze and interpret the topic of conceptual accuracy in ASL
5. Quiz
 - Examine the features of Deaf music
 - Identify and produce signs related to lifetime events
 - Identify and produce signs related to ages
 - Analyze and interpret the topic of conceptual accuracy in ASL
6. Story or Song
 - Accurately produce and comprehend ASL vocabulary
 - Accurately produce and comprehend ASL letters and numbers in specialized contexts
 - Demonstrate essential grammatical components of ASL
 - Demonstrate mastery of ASL vocabulary and grammar

SEMESTER B

1. Continuing ASL and Advanced Techniques

1. American Sign Language in Careers
 - Investigate and explain the methods of using American Sign Language in different careers
2. Signed Vocabulary—Schedules and Events
 - Accurately produce ASL vocabulary related to schedules and events
3. Calendar Number Incorporation
 - Apply methods for signing vocabulary for number incorporated time
4. ASL Idioms
 - Analyze and interpret essential ASL idioms
5. Quiz
 - Examine how various careers utilize ASL
 - Identify and produce signs for schedules and events
 - Identify and produce signs for number incorporated time
 - Analyze and interpret essential ASL idioms

6. Number Incorporation

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

2. Around the House and in the Schools

1. More about Deaf and Hard of Hearing Education

- Investigate and explain the characteristics of Deaf and hard of hearing education as a career

2. Signed Vocabulary Around the House

- Accurately produce ASL vocabulary related to being around the house

3. Nominal Numbers and Combinations

- Produce signs for nominal numbers and number/letter combinations in ASL

4. Registers in ASL

- Analyze and interpret registers in ASL

5. Quiz

- Examine key components of Deaf and hard of hearing education
- Identify and produce signs related to being around the house
- Identify and produce signs related to nominal numbers and number/letter combinations
- Analyze and interpret registers in ASL

6. License Plate and Bar Code

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

3. Interpreting Options and Advanced Fingerspelling

1. More about Sign Language Interpreting

- Investigate and explain the characteristics of sign language interpreting as a career

2. Signed Vocabulary—Making Requests

- Accurately produce ASL vocabulary related to making requests

3. Lexicalized Fingerspelling

- Apply methods for Lexicalized Fingerspelling in ASL

4. Temporal Aspects

- Analyze and interpret temporal aspects in ASL

5. Quiz

- Examine sign language interpreting as a career choice
- Identify and produce signs related to making requests and commands
- Identify and produce signs using Lexicalized Fingerspelling
- Analyze and interpret temporal aspects in ASL

6. Making Requests

- Accurately produce and comprehend ASL vocabulary
- Accurately produce and comprehend ASL letters and numbers in specialized contexts
- Demonstrate essential grammatical components of ASL
- Demonstrate mastery of ASL vocabulary and grammar

4. Audiological Options and Advanced Situations

1. More about Audiology and Hearing
 - Investigate and explain the characteristics of audiology and speech language pathology as careers
 2. Health and Emergencies -Signed Vocabulary
 - Accurately produce ASL vocabulary related to health and emergencies
 3. Math and Money
 - Produce signs for math and money
 4. Body-Verb Agreement Signs
 - Analyze and interpret body-verb agreement signs
 5. Quiz
 - Examine audiology and speech-language pathology as career choices
 - Identify and produce signs related to health and emergencies
 - Identify and produce signs related to math and money
 - Analyze and interpret body-verb agreement signs
 6. The Flu
 - Accurately produce and comprehend ASL vocabulary
 - Accurately produce and comprehend ASL letters and numbers in specialized contexts
 - Demonstrate essential grammatical components of ASL
 - Demonstrate mastery of ASL vocabulary and grammar
- 5. Other Sign Languages and Systems**
1. Other Signing Systems in the United States
 - Investigate and explain the various sign language systems used in the United States
 2. Signed Vocabulary—Places around the World
 - Accurately produce ASL vocabulary related to places around the world
 3. Initialized Signs
 - Apply methods for producing initialized signs
 4. Rhetorical Questions in ASL
 - Analyze and interpret rhetorical questions in ASL
 5. Quiz
 - Examine several different signing systems used throughout the United States
 - Identify and produce signs related to places around the world
 - Identify and produce initialized signs
 - Analyze and interpret rhetorical questions in ASL
 6. Rhetorical Sentence Structure
 - Accurately produce and comprehend ASL vocabulary
 - Accurately produce and comprehend ASL letters and numbers in specialized contexts
 - Demonstrate essential grammatical components of ASL
 - Demonstrate mastery of ASL vocabulary and grammar

Spanish I

Spanish I

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Spanish I A is a beginning level course that will introduce the student to a variety of areas of the Spanish language. In this course, the student will learn listening, speaking, reading, and writing skills through interesting and engaging activities. This course is organized into five topics including greetings, the date, weather, time, and colors. The student will learn to express himself using an ever-increasing vocabulary, present-tense verbs, articles, and adjectives. Grammar is introduced and practiced in innovative and interesting ways with a variety of learning styles in mind. Elements of the Spanish-speaking world and culture appear throughout the course, including people, geographical locations, and histories.

Course Outline

1. ¡Bienvenidos!

1. Welcome!

- Apply knowledge of how to greet people at different times of day and introduce yourself to others
- Apply knowledge of the Spanish alphabet to spell and pronounce words
- Identify why it is valuable to learn about the Spanish language and culture
- Explain where the Spanish language comes from and how it has changed over time

2. Mis clases

- Identify things commonly found in a traditional classroom
- Identify parts of the human body
- Apply knowledge of how to ask for help
- Identify relevant geographical and cultural characteristics of Spain
- Examine the different ways the Spanish language is spoken in different regions around the world

3. Let's Count!

- Identify numbers to count, tell time, and talk about the day and date
- Apply knowledge of written and spoken language about the weather and seasons
- Examine the weather and seasonal characteristics of Spanish-speaking countries
- Identify the differences between formal and informal speech
- Identify Spanish cognates and their usefulness for learning a language

2. Lo que nos gusta

1. Mis actividades

- Identify and describe activities people like and don't like to do

- Analyze common activities of high school students
 - Examine famous soccer academies within the Spanish-speaking world
2. Mis amigos
 - Apply knowledge of expressing like/dislike of common activities
 - Identify distinct musical styles and dances from throughout the Spanish-speaking world
 - Examine how friends spend time together and activity preferences for the summer and winter
 3. ¡Me gusta!
 - Apply knowledge of infinitives and their endings
 - Identify important places and things to do in Central Spain
 - Examine Mexico City for its popular activities and cultural or historical sites
 4. ¿Me gusta o no me gusta?
 - Identify patterns of negation and write negative sentences
 - Apply knowledge of expressing agreement and disagreement
 - Compare and contrast characteristics of public squares in the Spanish-speaking world with U.S. malls
 - Examine the culture and activities of Argentina
 5. Repaso de Lo que nos gusta
 - Recall vocabulary, expressions, and grammar concepts
 - Recall popular activities in the Spanish-speaking world, including artistic pursuits, dances, and games
 - Examine the cultural importance of conversation in the Spanish-speaking world, including meeting at outdoor cafés and the concept of sobremesa
 6. Lo que nos gusta Unit Test
3. **¿Cómo somos?**
 1. ¿Cómo soy?
 - Apply knowledge of vocabulary related to personality traits
 - Analyze the cultural concept of friendship and family within the Spanish-speaking world
 - Examine the culture and popular activities of Cuba
 2. ¿Cómo eres?
 - Describe what you and others are like using personality trait vocabulary
 - Compare the Salsa dance of Latin America, the U.S., and around the world
 - Examine Latin American artists' personalities such as Fernando Botero, David Alfaro Siqueiros, and Pablo Picasso
 - Examine the Bronx Museum of the Arts, as well as Spanish-speaking cultural centers in New York City
 3. Adjetivos y artículos
 - Apply knowledge of adjectives and definite/indefinite articles
 - Examine the Pan American Games
 - Identify various characteristics of the Galápagos Islands
 4. Para usar los adjetivos
 - Apply knowledge of word order and the placement of adjectives
 - Identify cultural and personal characteristics of people in Uruguay
 - Examine the life and works of María Nsúé Angüe, an Equatorial Guinean writer
 5. Review of ¿Cómo somos?

- Recall previously learned vocabulary, expressions, and grammar concepts
- Identify the cultural significance in the game of dominoes throughout the Spanish-speaking world.
- Examine the folktale "El Cadejo" from El Salvador

6. ¿Cómo somos? Unit Test

4. **Mis clases**

1. Mi día

- Apply knowledge of vocabulary related to school subjects and supplies
- Compare and contrast the characteristics of schools in various Spanish-speaking countries with those of schools in the United States
- Examine the daily activities of a Mexican art class

2. Las clases

- Apply knowledge of vocabulary related to school schedules and subject descriptions
- Examine the use of the 24-hour clock in the Spanish-speaking world

Spanish III

Spanish III

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Spanish III A is a continuation of the first two years of Spanish instruction. The student will continue to sharpen his listening, speaking, reading, and writing skills through a variety of activities. This course is organized into five topics: feelings, transportation, work, countries, and the future. The student will learn to express himself using an ever-increasing vocabulary, present-tense verbs, past-tense verbs, articles, and adjectives. Elements of the Spanish-speaking world and culture appear throughout the course, including people, geographical locations, and histories.

Spanish III B is a continuation of the first two and a half years of Spanish instruction. The student will continue to sharpen his listening, speaking, reading, and writing skills through a variety of activities. Throughout the five topics covered in this course, the student will learn to express himself using an ever-increasing vocabulary, present-tense verbs, past-tense verbs, future-tense verbs, conditional-tense verbs, articles, and adjectives. Grammar is introduced and practiced in innovative and interesting ways with a variety of learning styles in mind. Elements of the Spanish-speaking world and culture appear throughout the course, including people, geographical locations, and histories.

Course Outline

 - Identify cultural aspects of Spanish-speaking countries
 24. Atando cabos (Portfolio)
 - Write an itinerary for a trip for a friend, considering the friend's preferences
 25. Online Practice
 26. Unit Test

4. La naturaleza

1. Contextos (Day 1)
 - Identify vocabulary to discuss nature
 - Express answers to questions about environments with a partner
 - Predict what will happen in different places in a conversation with a partner
 - Generate a list of famous people with a group and predict where they will be in the future
 - Devise conversations with a partner given prompts about real-life situations
 - Prepare a presentation about reefs in Costa Rica and Puerto Rico
2. Contextos (Day 2)
 - Select correct vocabulary to discuss a magazine article about various environments
3. Contextos (Day 3)
 - Identify vocabulary to discuss nature
4. Contextos (Quiz)
5. Fotonovela (Day 1)
 - Summarize events from a short film
 - Describe characters in a short film
6. Fotonovela (Day 2)
 - Summarize events in a short film
 - Describe characters in a short film

7. El mundo hispano (Day 1)
 - Identify geographical aspects, such as coral reefs, in Spanish-speaking countries
 - Present information about reefs in writing
8. El mundo hispano (Day 2)
 - Identify vocabulary to discuss nature
9. Estructura 6.1 (Day 1)
10. Estructura 6.1 (Day 2)
 - Form the future tense of verbs
11. Estructura 6.1 (Day 3)
 - Form the future tense of verbs in writing
12. Estructura 6.2 (Day 1)
 - Produce the subjunctive tense with adverbial clauses
 - Identify conjunctions that require the subjunctive tense
13. Estructura 6.2 (Day 2)
 - Compare the use of the indicative and subjunctive tenses with adverbial clauses
14. Estructura 6.2 (Day 3)
 - Form the subjunctive tense with adverbial clauses
15. Estructura 6.3 (Day 1)
 - Produce sentences with the prepositions a, hacia, and con
 - Differentiate between the uses of a, hacia, and con
16. Estructura 6.3 (Day 2)
 - Select the correct pronoun (a, hacia, and con) in writing
17. Estructura 6.3 (Day 3)
 - Produce sentences with the prepositions a, hacia, and con
 - Select the correct pronoun (a, hacia, and con)
18. Estructura (Quiz)
19. Gramática adicional 6.4
 - Produce sentences with adverbs, including proper formation with -mente
 - Distinguish between adverbs and adjectives
20. En pantalla
 - Identify vocabulary from a short film
 - Summarize a short film
21. Literatura
 - Identify vocabulary from a literary selection
 - Summarize a literary selection
 - Analyze a short story
22. Cultura
 - Identify vocabulary to discuss nature
 - Describe conservation efforts in Spanish-speaking countries
23. Atando cabos
 - Identify spelling patterns and their corresponding pronunciations
 - Describe the environment of Vieques, Puerto Rico, including the current levels of pollution and health
 - Identify vocabulary and grammar points taught in the unit
24. Atando cabos (Portfolio)

- Prepare a poster about a World Heritage site, including researching the topic

25. Online Practice

26. Unit Test.

5. Semester B

1. Semester Review (Day 1)

2. Semester Review (Day 2)

3. Online Practice.

4. Semester Exam

APPENDIX A CURRICULUM

A.2 COURSE GUIDES

f. FINE ARTS

This document is part of Appendix A: Curriculum.

It includes course guides for each Fine Arts class.

- Art 1
- Art 2
- Art 3
- Art 4
- Art 5
- Art 6
- Art 7
- Art 8
- Art K
- Discovering Music I
- Discovering Music II
- Discovering Music III
- Experiencing Music I
- Experiencing Music II
- Experiencing Music III
- Exploring Music I
- Exploring Music II
- Exploring Music III
- Living Music I
- Living Music II

Course guides provide detailed information on the curriculum including course descriptions, unit summaries, lesson objectives, activities, and assessment types. Course guides include information on:

- Planned instruction (provided in the unit summary of each unit within individual Course Guides)
- Course objectives (provided in the unit and lesson objectives within individual Course Guides)
- Activities (provided in the unit summary and lesson objectives of each unit within individual Course Guides)

Art 1

Art 1

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course the student will develop and use skills in art, building on his knowledge about line, shape, and color. Your student will be introduced to other elements of art as well as to the principles of design. This course will enable your student to develop his creative side through the introduction of art media and the exploration of art themes. The activities in this course include practicing drawing, learning about color, creating designs using balance and patterns, and working with three dimensional forms.

Course Outline

1. Elements of Art

1. Learning About Lines: Practice Drawing
 - Demonstrate an understanding of line as a element of art
 - Develop knowledge about line by practice - drawing different kinds of lines
2. Lines: Making a Drawing
 - Demonstrate an understanding that line is an element of art
 - Demonstrate an understanding that lines are used to express ideas in a visual way
3. Shapes
 - Identify shape as an element of art
 - Demonstrate an understanding that lines make shapes
 - Differentiate between geometric and organic shapes
4. Organic Shape Collage
 - Continue to demonstrate an understanding that shape is an element of art
 - Demonstrate an understanding of the difference between geometric and organic shapes
 - Demonstrate an understanding of collage techniques
5. Draw Animals Using Shapes
 - Demonstrate an understanding of shape as an important part of artmaking
6. Mixing Colors
 - Demonstrate an understanding of color as an element of art
 - Demonstrate an understanding of primary and secondary colors
 - Demonstrate an understanding that primary colors are mixed to make secondary colors
7. Color: Paint an Animal

- Demonstrate an understanding of primary and secondary colors
 - Demonstrate an understanding of mixing colors
 - Demonstrate an understanding of the effects different colors have on works of art
8. Color Value: Paint a Landscape
- Demonstrate an understanding of color value
 - Demonstrate an understanding of tints and shades
9. Discovering Texture
- Demonstrate an understanding of texture as an element of art
 - Demonstrate an understanding of the difference between visual and tactile texture
10. Form and Texture in Clay
- Identify form as an element of art
 - Demonstrate an understanding of the difference between shape and form

2. Principles of Design

1. Patterns All Around Us
- Become familiar with pattern as a principle of design
 - Demonstrate an understanding of patterns by printing a pattern
2. In Balance
- Become familiar with balance as a principle of design
 - Differentiate between formal and informal balance
3. Emphasis in Artwork
- Demonstrate an understanding of emphasis in artwork
 - Demonstrate an understanding of the term "focal point"
4. Creating Contrast in Art
- Become familiar with contrast as a principle of design
 - Demonstrate an understanding of how contrast is used in artwork
5. Getting the Movement and Rhythm in Art
- Demonstrate an understanding of movement and rhythm as principles of design
6. Working with Harmony and Unity
- Demonstrate an understanding of harmony and unity as principles of design

3. Art Media

1. Magazine Photo Collage
- Demonstrate an understanding of the medium of photo collage
 - Demonstrate an understanding of the term composition
2. Nighttime Crayon Resist
- Demonstrate an understanding of the crayon resist technique
 - Demonstrate an understanding of how color value is used to show a specific time of day
3. Monoprinting with Paint
- Demonstrate an understanding of the printing process by creating a monoprint
4. Magical Mosaics
- Demonstrate an understanding of the mosaic technique
5. Mixed Media African Mask
- Demonstrate the ability to construct a work of art using a variety of art media
 - Demonstrate an understanding of formal balance

6. The Potter's Art

- Demonstrate an understanding of ceramic forms
- Distinguish types of pottery from different cultures and time periods
- Demonstrate an understanding of how pottery is used for a variety of purposes in different cultures

4. Themes in Art

1. My Self-Portrait

- Demonstrate an understanding of portrait as a theme in art
- Demonstrate an understanding of the correct placement of facial features
- Demonstrate an understanding of the cultural characteristics of portraits

2. A Portrait of My Family

- Understand family portraits as a theme in art
- Understand portraits as a means of recording family history
- Demonstrate understanding of placement and proportion

3. Objects from Every Day

- Understand still life as a theme in art
- Demonstrate an understanding of proportion
- Demonstrate an understanding of the technique of overlapping

4. Under the Sea Crayon Resist

- Demonstrate an understanding about life in the ocean
- Understand the ocean as an important ecosystem
- Demonstrate an understanding of crayon resist techniques
- Demonstrate an understanding of how the environment influences art

5. A Special Occasion

- Demonstrate an understanding of how special occasions are celebrated in different cultures
- Demonstrate an understanding of how elements of art can be used to illustrate a special occasion

6. A Story Quilt Square

- Demonstrate an understanding of symbols
- Become familiar with story quilts as a theme in art

Art 2

Art 2

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, your student will continue to develop and use skills in art, building on his knowledge about line, shape, and color. Your student will be introduced to other art elements as well as to the principles of design. This course will enable your student to develop his creative side through the introduction of art media and through the exploration of art themes. The activities in this course include drawing, learning about color, creating designs using balance and patterns, and working with three-dimensional forms.

Course Outline

1. **Laying the Foundation**

1. What Can You Do with a Line?
 - Develop familiarity with different kinds of lines
 - Demonstrate an understanding of what artists do with different lines
2. Everything Has a Shape
 - Learn about the difference between geometric and organic shapes
 - Develop familiarity with how shapes are combined in artwork
3. Texture
 - Learn about the connection between line and texture
 - Demonstrate an understanding of the difference between visual texture and tactile texture
 - Develop familiarity with the different techniques used by artists to show visual texture
4. Color in Your World
 - Learn about primary colors
 - Demonstrate an understanding of how primary colors are mixed to make secondary colors
5. Value
 - Demonstrate an understanding of how colors are made lighter and darker
 - Learn about shadows
6. Seeing in Three Dimensions
 - Demonstrate an understanding of the difference between two-dimensional shape and three-dimensional form
 - Learn about three-dimensional sculpture, including "sculpture in the round"

7. The Area Around You

- Identify space as an element of art
- Learn about the picture plane as "space"
- Demonstrate an understanding of space in artwork
- Understand simple perspective (near and far objects) and overlapping

2. Principles of Art

1. Get in Balance

- Learn about the principle of balance
- Demonstrate an understanding of the difference between formal and informal balance

2. Pattern

- Learn about the principle of pattern
- Understand how colors, lines, and shapes can be repeated in order to make a pattern
- Become familiar with the use of patterns in artwork

3. Movement and Rhythm

- Learn about the principles of movement and rhythm
- Develop an understanding of how artists use movement and rhythm to keep the viewer interested and to move the viewer's eye through an artwork
- Demonstrate knowledge of the elements of line, shape, and color as they are used to create movement and rhythm in artwork

4. Unity and Harmony

- Learn about the principles of unity and harmony
- Develop an understanding of the use of color, line, texture, and shape as they are used to create unity and harmony in a work of art

5. Variety

- Learn about the principle of variety and its function in art
- Understand how using a variety of colors, shapes, lines, textures, and patterns can make artwork unique and fun to look at

6. Contrast and Emphasis

- Explore the principles of emphasis and contrast
- Develop an understanding of focal point as the most important part of a work of art
- Learn about the ways that artists create the focal point in an artwork, including the use of contrast

3. Mixing the Media: The Making of Art

1. Art Where You Live

- Understand art as a reflection of the environment in which we live
- Learn how artists throughout time have depicted the environment around them

2. Games We Like to Play

- Learn about techniques used to draw people in motion
- Develop an understanding of muscles and joints and how they help us move

3. The Ins and Outs of Weaving

- Develop knowledge of different kinds of weaving, including textiles and basketry
- Understand the loom and its function, as well as warp threads and weft threads
- Learn about weaving from different cultures, including kente cloth from West Africa

4. Puppets Tell a Story

- Learn about different styles of puppets from different cultures

- Understand that puppets are used to actively tell a story or a fable with a moral
 - Learn about various kinds of puppets of different sizes and materials
5. Sculpture: Art We Can Walk Around
 - Learn about different kinds of sculpture
 - Learn to differentiate between sculpture in the round and relief sculpture
 - Become familiar with various types of sculpture
 6. Art to Wear: Jewelry
 - Understand jewelry as a type of applied art
 - Become familiar with some different types of jewelry
 - Learn about how the making and wearing of jewelry or other adornment has different meanings in various cultures around the world
 7. Assembling All Materials!
 - Learn about the technique of assemblage
 - Look at examples of assemblage artworks that have been created from found objects

4. Connections: Art in Other Subjects

1. Art and Science: Rainforest Printmaking
 - Learn about the connections between art and science
 - Develop a familiarity with the influence of science on works of art
 - Become familiar with the nature-inspired art of Henri Rousseau
2. Art and Math: You Take the Cake!
 - Learn about the connections between art and math
 - Demonstrate an understanding of simple fractions by creating a painting of a cake that shows fractional parts
 - Learn about the mathematically-inspired art of Wayne Thiebaud
3. Art and Language: Letter Designs Using Your Name
 - Learn about the connections between art and language
 - Become familiar with words and letters as an ingredient of design
 - Develop knowledge about the incorporation of words into artworks, including drawing, painting, and sculpture
4. Art and History: A Portrait from the Past
 - Learn about the connections between art and history
 - Develop an understanding of portraits and their significance—including the concept of a self-portrait—and how portraits can reveal the ways that people lived in past periods
 - Demonstrate an understanding of portraits and history by drawing a self-portrait that shows details from another period in time
5. Art and Seasons: Four Seasons Drawing
 - Learn about the seasons as they are expressed through forms of art
 - Develop and demonstrate familiarity with the main characteristics of each season, and with the ways in which artists depict seasons in their work
6. Art and Nutrition: Make a Colorful Food Collage
 - Learn about the concept of nutrition and eating well
 - Become familiar with the presence of food in works of art, including advertisements
 - Learn and demonstrate understanding of the technique of collage

Art 3

Art 3

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This course focuses on arts and crafts inspired by the four seasons. The student will examine and create artwork based on seasonal characteristics or common cultural trends. The student will be exposed to art history, art criticism, and art production activities with a multicultural focus. Creative freedom is experienced as the student uses his imagination and several types of media and processes. These processes include drawing, painting, printmaking, sculpture, bookmaking, and techniques for creating crafts and fiber arts.

Course Outline

1. Summer Strokes

1. Practice and Patience
 - Define the terms drawing, contour line, and shading
 - Distinguish between abstract and representational art
 - Demonstrate the techniques of contour drawing and shading using a pencil
2. Back-to-School Expressions: Pattern Portraits
 - Define the terms pattern and portrait
 - Draw an expressive line portrait that includes a variety of patterns
3. Summer Tunnel Book
 - Define the terms artists' books and book arts
 - Construct a tunnel-style book based on a summer experience
4. Using Watercolor
 - Define the term watercolor
 - Demonstrate watercolor techniques
5. A View of the Water: A Watercolor Seascape
 - Define the term seascape
 - Distinguish between the background, middle ground, and foreground of a picture
 - Draw and paint a watercolor seascape
6. Unit 1 Review and Test
 - Review the terms and concepts presented in Unit 1

2. Autumn Arts

1. A Leaf Montage
 - Distinguish between organic and geometric shapes
 - Compose a montage drawing using overlapping, geometric, and organic leaf shapes
2. Harvest Still Life
 - Define the term still life
 - Demonstrate one or more of the following drawing techniques: shading, overlapping, and changes in object size and placement
 - Create a still life drawing from life
3. Masks from Many Cultures
 - Recognize symmetrical objects and images
 - List the ways masks are used
 - Construct a three-dimensional mask from paper
4. Pottery and People
 - Define the terms clay, pinch pot, and coil
 - Build a homemade clay pot using pinch and coil construction
5. Family and Friends
 - Describe, judge, and draw conclusions about an artwork
 - Identify an important artist and artwork from history
6. Unit 2 Review and Test
 - Review the terms and concepts presented in Unit 2

3. Winter Highlights

1. Fur, Fuzz, and Feathers
 - Define the terms line, texture, and print
 - Distinguish between line directions
 - Create an animal print using line and texture
2. Weaving Warmth
 - Define the terms weaving and loom
 - Distinguish between the warp and weft
 - Demonstrate the plain weave technique
3. Seeing Shadows
 - Recognize the purpose of shadows in realistic artworks
 - Describe the meaning of the term light source
 - Paint a watercolor landscape with shadows
4. Portraits and Importance
 - Describe the functions of a portrait
 - Identify an important artist from history
 - Apply the proportions of a human face
 - Create a miniature self-portrait
5. Unit 3 Review and Test
 - Review the terms and concepts presented in Unit 3

4. Spring into Art

1. Flowers, Sprouts, and Weeds
 - Define the terms collage and illustration
 - Identify a contemporary artist

- Apply watercolor and drawing techniques to create texture
 - Design a collage illustrating plants and creatures
2. Weather in Art
 - Distinguish between warm and cool colors
 - Describe, judge, and draw conclusions about an artwork
 - Identify an important artist and artwork from history
 3. Sensational Suns
 - Define the terms folk art, relief, and sculpture
 - Create a sun design using patterns
 - Build a relief sun sculpture using clay slab construction
 4. Outdoor Action Figures
 - Draw a human figure in a pose
 - Create a self-portrait drawing with you in motion
 - Identify three ways an artist can show motion
 5. Unit 4 Review and Test
 - Review the terms and concepts presented in Unit 4

Art 4

Art 4

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course the student will be introduced to works of art from several continents. Before humans developed written language, they recorded their thoughts and ideas using what we now call visual art. Throughout time the growth and development of civilizations around the world have been recorded and defined through the works of artists. Students will become familiar with the art elements and the principles of design and with how these elements and principles are applied to create visual art in diverse cultures.

Course Outline

1. **A European Adventure**

1. Expressions in Lines
 - Demonstrate an understanding of the art element of line
 - Identify the art element of line as a means of expression
 - Compare realistic and expressionistic styles of artwork
2. Texture: What You See and Feel
 - Demonstrate an understanding of texture as an element of art
 - Differentiate between visual and tactile texture
3. All About Color
 - Demonstrate an understanding of color value
 - Compare and contrast color values in artwork
 - Demonstrate an understanding how to make tints and shades
4. Warm and Cool Expressions
 - Demonstrate an understanding of the properties of color
 - Differentiate between warm and cool colors
 - Demonstrate an understanding of how color can create a mood in artwork
5. Picasso and the Circus
 - Demonstrate an understanding of background, middleground, and foreground
6. Shape, Space, Cityscape
 - Demonstrate an understanding of shape and space as elements of art
 - Differentiate between geometric and organic shapes
 - Become familiar with the medium of art books

7. Forms and Shapes: Still Life
 - Differentiate between forms and shapes
 - Demonstrate an understanding of light and shadow
 - Demonstrate an understanding of composition in artwork
8. Create a Colorful Portrait
 - Compare and contrast styles of portraits
 - Demonstrate an understanding of realistic style
 - Demonstrate an understanding about correct placement of facial features
9. Unit 1 Review and Test
 - Review the terms and concepts presented in Unit 1

2. African Travels

1. African Style: Changes and Interpretations
 - Identify how African art forms changed established European art
2. Ceremonial Dress: Create a Mask with Meaning
 - Demonstrate the ability to identify the three types of African masks
 - Demonstrate an understanding of the purposes of African masks
 - Demonstrate an understanding of symmetrical balance
3. Special Guardians: Kota Figures
 - Identify the Gabon and Congo regions in West Africa
 - Develop an understanding of the Kota people and the Kota image
 - Demonstrate an understanding of cardboard construction techniques
4. Mudcloth Resist
 - Demonstrate an understanding of how patterns are used in African textiles
 - Demonstrate an understanding of emphasis, pattern, and rhythm in design
5. Symbols in Cloth: Adinkra Designs
 - Demonstrate an understanding of symbols
 - Demonstrate an understanding of symbols on adinkra cloth
6. Colorful Beads
 - Demonstrate an understanding of how beads are used in Yoruba culture
 - Demonstrate an understanding of how color is used in Yoruba culture
7. A View from the Side: Egyptian Profiles
 - Demonstrate an understanding of life in ancient Egypt
 - Demonstrate an understanding of proportion
 - Demonstrate an understanding of Egyptian wall paintings
8. Unit 2 Review and Test
 - Review the terms and concepts presented in Unit 2

3. Above and Below: Art in the Americas

1. Transition to the New World
 - Demonstrate an understanding of African contributions to cultures in the New World
2. The Harlem Renaissance
 - Demonstrate an understanding of the art forms of the Harlem Renaissance
3. Expressing Mood: Abstract Expressionism
 - Demonstrate an understanding of abstract expression

- Demonstrate an understanding of how abstract expressionism changed art
- Demonstrate an understanding of how the elements of art are used in abstract expressionism
- 4. Beauty Around Us: Designs of Native America
 - Demonstrate an understanding of Native American artifact functions
 - Demonstrate an understanding of some Native American traditions
- 5. The Art of the Kuna: Mola Designs
 - Demonstrate an understanding of the Kuna people
 - Demonstrate an understanding of mola design standards
- 6. Unit Review and Test
 - Review the concepts and terms learned in Unit 3

4. **The Expressive Art of Asia**

1. Painting Quietly: Sumi-e
 - Demonstrate an understanding of effective use of line
 - Demonstrate an understanding of the role of nature in Japanese art
 - Demonstrate an understanding of writing haiku poems
2. Paper: More Than Just for Writing
 - Demonstrate an understanding of how paper is used in Japan
3. The Dance of the Dragon
 - Demonstrate an understanding of art forms from China
 - Demonstrate an understanding of paper construction techniques
4. Indonesian Batik Design
 - Demonstrate an understanding of radial balance
 - Demonstrate an understanding of the diversity of Indonesian visual art
5. Hands from India
 - Demonstrate an understanding of the art forms of India
 - Demonstrate an understanding of mehndi design
6. Stories in Miniature
 - Demonstrate an understanding of miniature painting from India
7. Unit 4 Review and Unit Test
 - Review the terms and concepts presented in Unit 4

Art 5

Art 5

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will be introduced to works of art through time. Throughout history the growth and development of civilizations around the world have been recorded and defined through the works of artists. The student will become familiar with the art elements, the principles of design, and how these elements and principles were applied to create visual art in different time periods and cultures.

Course Outline

1. The Ancient World

1. The Lines of Ancient Animals
 - Demonstrate an understanding of the art element of line
 - Identify and apply the art element of line as a means of expression
 - Create an image from imagination and memory that communicates a story
2. Arts, Rocks, and Shapes
 - Demonstrate an understanding of shape as an element of art
 - Distinguish between organic and geometric shapes
 - Distinguish between pictographs and petroglyphs
 - Apply the element of shape in a stencil painting
3. Textures in Ancient Mexico
 - Distinguish between tactile and visual texture
 - Apply the element of texture to a personal artwork
 - Demonstrate an understanding of Mayan subject matter
4. Ancient Greece: Vases and Stories
 - Demonstrate an understanding of the functions of ancient Greek vases
 - Distinguish between two types of forms
 - Create a design inspired by ancient Greek vases
 - Communicate a personal story through a drawing
5. All Roads Lead to Rome
 - Demonstrate an understanding of background, middleground, and foreground
 - Distinguish between styles of Roman wall painting
 - Apply perspective techniques to a personal artwork

6. Bits and Pieces: Islamic Mosaics
 - Demonstrate an understanding of mosaic construction
 - Differentiate between primary and secondary colors
7. Unit 1 Review and Test
 - Review the terms and concepts presented in Unit 1

2. The Middle Ages to the Renaissance

1. Colored Light: Radial Balance in a Rose Window
 - Distinguish among the three types of balance
 - Demonstrate an understanding of the functions of stained glass windows in the Middle Ages
 - Apply radial balance to create an original design
2. Your Large Initial: Illuminated Manuscripts
 - Demonstrate an understanding of the purposes of illuminated manuscripts
 - Demonstrate an understanding of emphasis
3. Art in Medieval Japan: Painted Patterns
 - Apply a pattern to an original artwork
 - Demonstrate an understanding of pattern in Medieval Japanese paintings
4. Paint Like Michelangelo
 - Describe and apply the art principle of harmony
 - Identify the artwork of Michelangelo Buonarroti
 - Demonstrate an understanding of the Renaissance
5. Movement and Rhythm: A Renaissance Cityscape
 - Demonstrate an understanding of movement and rhythm
 - Apply the art principles of movement and rhythm to an original artwork
6. Art Meets Math: Where Lines Come Together
 - Demonstrate an understanding of one-point perspective
7. A True Renaissance Man: Leonardo da Vinci
 - Demonstrate an understanding of the life and work of Leonardo da Vinci
8. Unit 2 Review and Test
 - Review the terms and concepts presented in Unit 2

3. Baroque/Rococo

1. In The Royal Style: Versailles
 - Identify elements of baroque and rococo architecture
 - Understand motivations for architectural decisions
 - Design a home based on your own architectural decisions
2. Rococo Art
 - Identify elements of the rococo style in visual artwork
 - Create a drawing or painting influenced by the rococo style
3. Games Children Play
 - Investigate genre painting and the work of Chardin
 - Create a painting or photograph influenced by Chardin's style that shows games you like to play
4. Quiet Time
 - Investigate warm and cool color schemes
 - Create a collage that uses color to create a mood

5. Baroque and Rococo Unit Review and Test
 - Review the terms and concepts presented in Unit 3

4. Romanticism and the Modern Age

1. Constable's Romantic Landscape
 - Identify elements of landscape painting
 - Understand the use of perspective, light, and contrast in Constable's work
 - Create your own landscape based on your experience of the weather
2. Your Impressionism: Monet, Cassatt, Van Gogh
 - Identify key discoveries during the Impressionist period
 - Understand the use of light, color, and mood in Impressionist painting
 - Create your own moody landscapes
3. Color Your World Differently: Matisse
 - Identify key discoveries during the Fauvist period
 - Describe the use of color and mood in Matisse's work
 - Create your own "wild-beast" collage
4. Taking a Walk around Cubism: Picasso
 - Identify key processes used by the Cubists
 - Describe the use of line, shape, value, and form
 - Create a multimedia piece inspired by Cubist processes
5. Icons and Illusions: Pop and Op
 - Identify key elements of pop and op art
 - Use contemporary images and color theory to create a poster with an icon and personal message
6. Romanticism and the Modern Age Review and Test
 - Review the terms and objectives from Unit 4: Romanticism and the Modern Age
 - Take a short exam to test comprehension

5. Critiquing Art

1. Aesthetics: How You Look at Art
 - Define aesthetics
 - Apply personal aesthetic judgments to the artwork reviewed in previous lessons
2. What Does an Artist Do?
 - Consider the roles artists have played in society over time
 - Investigate a career in the arts
3. It's Your Call: Art Criticism
 - Learn the steps involved in making educated judgments about artwork
 - Curate a show, and write a review based on your own work
4. Critiquing Art Review and Test
 - Review the terms and objectives from Unit 5: Critiquing Art
 - Take a short exam to test comprehension

Art 6

Art 6

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

The middle school art program is organized around the three artistic processes of creating, presenting, and responding. In addition, the program emphasizes how art and design can drive innovation in the same way science, technology, engineering, and mathematics do. Throughout the courses, students use various media and techniques to construct projects, collaborate with peers, and critique their own work as well as the work of other artists.

In Semester A, students explore the wide range and variety of visual arts. They learn the basic elements of art and principles of design and apply them in their own creative ways. The semester culminates in a study of factors involved in evaluating and critiquing art.

Semester A Outline

1. **Course Overview**

1. Getting Started in Middle School Art

2. **What Is Art?**

1. Defining Art

- Define and summarize key concepts of art
- Describe the basic purposes of art creation
- Analyze the purpose and success of art

2. Tell Your Story

- Summarize how art is used to tell stories and record culture and history
- Recognize personal stories that are part one's heritage
- Analyze art work to determine the purpose and historical information being shared

3. Art and Entertainment

- Recognize and understand the purpose of art in terms of entertainment
- Use creativity to develop original characters and images
- Justify the choices made in the creation of art

4. Express Yourself

- Recognize the importance of personal expression
- Demonstrate the ability to use art as a means of expression

- Evaluate the artwork of others to understand the emotions or opinions being expressed in the art

5. Art and Aesthetics

- Demonstrate an understanding of the meaning of aesthetics
- Design a collection of art that is aesthetically pleasing
- Evaluate the qualities of individual pieces of art

6. Design and Production

- Identify the purpose of design in terms of utilitarian products used each day
- Carry out activities that enhance abilities to be creative
- Assess how ability to be creative can enhance skills used to design products
- Review the objectives of the unit as a whole

3. The Elements of Art

1. Interpreting Lines

- Describe various types of lines
- Analyze how those lines are used in art
- Create art that focuses on line usage

2. The Shapes that Form the World

- Identify different types of shapes
- Interpret how shapes are used to create objects in images
- Evaluate images for the use of shapes

3. What You See and What You Feel

- Interpret what texture is in art
- Analyze how texture is created and used in art

4. The Colors Around Us

- Identify color families
- Learn how to mix colors
- Analyze how colors affect art
- Create art based on color theories

5. The Value in Art

- Define value and contrast
- Demonstrate understanding of value to create highlights and shadows

6. The Space In Between

- Recognize positive and negative space
- Demonstrate understanding of space in terms of drawing objects
- Evaluate images for use of space

7. It's All About Perspective

- Define perspective and rules for drawing in perspective
- Apply those rules to create a 1 point perspective drawing

8. Elements in Review

- Review all terms and concepts presented in the unit
- Analyze meaning of terms as they apply to art
- Use the elements of art to evaluate the quality of artwork
- Use experiences with art to interpret and critique artwork

4. Principles of Design

1. Variety in Art
 - Describe what variety means in art
 - Construct art based on the concept of variety
 - Justify choices made during artistic creations
2. Is There Movement in a Still Image?
 - Comprehend the premise of rhythm and movement in art
 - Analyze how rhythm and movement were used in various pieces of art
3. The Patterns You See
 - Define patterns in art
 - Produce a design that utilizes patterns
 - Critique the success of the design
4. What We Emphasize
 - Define emphasis as it applies to art
 - Observe usage of emphasis in art
 - Analyze the effectiveness of emphasis in creating an obvious focal point
5. Proportion
 - Define proportion
 - Apply the theory of proportion in art production
6. Harmony Created
 - Identify harmony as it applies to art
 - Distinguish various ways that harmony is created when making art
7. Balancing Act
 - Define various types of balance
 - Create imagery based on the various types of balance
 - Justify decisions made in the creation process
8. Principles in Review
 - Review all terms and processes learned during the unit

5. Responding to Art

1. Responding to Criteria
 - Identify criteria for evaluating different types of art
 - Communicate meaning through art
 - Apply the evaluation criteria to a piece of art
 - Justify decisions made in artwork
2. The Portrait
 - Describe the characteristics of portraiture
 - Create art based on those characteristics
 - Evaluate artwork based on the characteristics of quality portraits
3. The Art of Impressionism
 - Describe the characteristics of Impressionism
 - Create art based upon the characteristics of Impressionism
4. What's in a Name?
 - List basic rules of one-point perspective
 - Create an illustration in one-point perspective
 - Evaluate art based on preset criteria of perspective

5. Being an Art Critic

- Apply appropriate criteria to analyze, select, and respond to art
- Critique choices artists, designers, and curators make when creating or presenting artwork
- Identify reasons why criteria used to evaluate artwork would vary
- Reflect on the procedures and products of art and design
- Analyze the traits of artwork that communicate effectively

Semester B Summary:

The middle school art program is organized around the three artistic processes of creating, presenting, and responding. In addition, the program emphasizes how art and design can drive innovation in the same way science, technology, engineering, and mathematics do. Throughout the courses, students use various media and techniques to construct projects, collaborate with peers, and critique their own work as well as the work of other artists.

In Semester B, students consider the preservation and protection of art. They then explore how international, national, and local art influences ideas, actions, cultures, and environments. Using this information, students build their own ideas of the role art plays in their lives.

Semester B Outline

1. Course Overview

1. Getting Started in Middle School Art

2. Protecting and Respecting Art

1. Why Do We Need to Preserve Artwork?
 - Identify causes of damage to artwork
 - Analyze artworks and classify appropriate conservation techniques based on media
 - Understand why preserving art is culturally important
2. Careers in Preservation and Conservation
 - Identify careers available in preservation and conservation
 - Identify skill sets needed for art preservation and conservation careers
3. Is It Worth It?
 - Explore several criteria used in assessing the value of art
 - Use criteria to analyze art to assess whether it should be preserved
4. On View Now And Forever?
 - Select the most appropriate location to safely store and display artwork
5. Is it Archival? An Art Lab
 - Perform a series of experiments on preservation materials and situations
 - Report experiment findings
6. Preservation Panorama
 - Analyze different methods for preserving and presenting art work
 - Apply processes used to decide what artwork gets preserved and presented
 - Identify the professionals involved in preservation and presentation of artworks
 - Choose where to store, present, and preserve artwork
 - Explain the responsibilities artists face when creating works of art and design

3. The World of Art

1. Art in Context

- Recognize that works of art that appear similar can have different meanings and uses depending on the cultural context in which they were created
 - Interpret art based on cultural context
2. Meaning and Culture
 - Given cultural background, interpret artwork to determine its uses, functions, and significance
 3. The Story Behind the Artifact
 - Differentiate between an insider's perspective and an outsider's perspective on the cultural significance of an object
 4. Here and There; Then and Now
 - Compare the original cultural value of artwork with its new value in a different culture
 - Compare the original purpose and value of historical artwork with its purpose and value today
 - Interpret art based on its cultural context
 - Compare similar styles of artwork in different cultures and time periods
 5. Art Metamorphosis
 - Explore reasons for the evolution of artistic style
 - Investigate how artists from various cultures and time periods inspire each other
 - Create art that is inspired by a particular era or artistic style
 6. Complex Contexts
 - Analyze how works of art influence your world view
 - Understand factors that influence creativity
 - Evaluate how art helps us understand people living in different cultures, areas of the world, and/or periods of time
 - Evaluate how understanding people living in different cultures, areas of the world, and/or periods of time helps us respond to art
 - Critique works of art using cultural, geographical, and/or historical contexts
- 4. Art In Your Community**
1. Imagining a Community
 - Analyze why artists create community art and the purposes of community art
 - Identify how artists represent their communities using community art
 2. Community Celebration
 - Analyze and evaluate art that celebrates community events
 3. Depicting our Neighbors
 - Investigate artists' values by analyzing who they choose to depict and how the work is displayed
 - Identify good placements for community murals and recognize why
 - Create a plan for a community mural that depicts members of the community
 4. Pictures: Giving Community Meaning
 - Identify, analyze, and respond to cultural norms as expressed through community art and murals
 - Act as art historians to interpret images and connect them to cultures
 5. Perspectives in Community Art
 - Master vocabulary and basic skills of perspective drawing, to create space
 - Evaluate community art for its use of linear and atmospheric perspective
 - Incorporate perspective in the completion of a community art mural plan
 6. Community Art: A View Through the Wide-Angle Lens

- Respond to and evaluate community art according to criteria such as positive depiction of community, use of perspective, purpose of artwork, event celebrated, and culture norms depicted

5. Art in Your Life

1. Surrounded by Art
 - Differentiate between art objects and functional objects
 - Categorize objects as functional, art, or both using aesthetic judgment
2. Careers in Art
 - Review careers in art and analyze what skills would be necessary to excel at the career
3. The Collector
 - Create a collection based on stated aesthetic preferences and other organizing principles
 - Interpret other collectors' works for evidence of aesthetic preferences and historical interests
4. The Critic
 - Identify the role of the art critic in guiding tastes in the art market
 - Recognize and practice the role of art criticism in the creative revision process
5. Art of Memory
 - Identify and analyze artworks that represent a significant memory, experience, or event in the life of the artists
6. The Power of Influence
 - Analyze how artists have been influenced by other individuals, styles, or events
 - Assemble a portfolio of artworks that inspire the artistic process and explain the connection to personal artwork

Art 7

Art 7

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

The middle school art program is organized around the three artistic processes of creating, presenting, and responding. In addition, the program emphasizes how art and design can drive innovation in the same way science, technology, engineering, and mathematics do. Throughout the courses, students use various media and techniques to construct projects, collaborate with peers, and critique their own work as well as the work of other artists.

In Semester A, students explore the wide range and variety of visual arts. They learn the basic elements of art and principles of design and apply them in their own creative ways. The semester culminates in a study of factors involved in evaluating and critiquing art.

Semester A Outline

1. **Course Overview**
 1. Getting Started in Middle School Art
2. **What Is Art?**
 1. Why Is Art Created?
 - Understand the purpose of creating art
 - Apply skills and knowledge to create works of art for a purpose
 - Analyze the choices made in all artistic decisions
 2. Utilitarian or Aesthetic
 - Identify art made for utilitarian purposes and art that is made for aesthetic purposes
 - Produce a design that is either utilitarian or aesthetic
 - Compare designs to others of a similar nature
 3. Communication Is the Key
 - Recognize what message various pieces of art communicate
 - Compare different art pieces to determine purpose and message
 - Evaluate the artist's success in conveying the intended message
 4. The Importance of Creativity
 - Define creativity and why it is important
 - Apply skills to demonstrate creative ability

- Evaluate the success of artistic creations

5. Reviewing Purpose

- Reflect on the scope and diversity of visual arts
- Investigate the role of art as a means to better understand people and the world
- Establish a framework for evaluating works of art

3. The Essentials of Visual Arts

1. Reviewing the Elements

- Describe and apply the elements of art

2. The Principles of Design

- Describe each of the principles of design
- Comprehend how those principles are used in art

3. Versatile Lines

- Identify basic lines
- Demonstrate how those lines can be used to create each of the principles of design

4. Morphing Shapes

- Identify basic shapes
- Demonstrate how shapes can be used to create the principles of art

5. Pop Art

- Recognize how color can be used as a tool for emphasis
- Discuss the movement of pop art
- Create pop art pieces that utilize color as emphasis
- Justify choices made in the process of creating

6. The Value of Proportion

- Summarize the basic concepts of facial proportions
- Discuss the importance of contrast and value when creating art
- Demonstrate understanding of facial proportions
- Demonstrate the usage of contrast in value

7. Emphasizing Perspective

- Review the basic concepts of perspective, emphasis, and unity
- Construct a drawing that employs the concepts of perspective, emphasis, and unity
- Evaluate the success of the drawing

8. Elements and Principles in Review

- Experiment with the elements of art
- Make original artwork through investigation and planning
- Use the elements of art to evaluate the quality of artwork
- Use experiences with art to interpret and critique artwork
- Explain proper care and maintenance of art equipment and materials

4. The Application of Art

1. The Math Connection – Tessellations

- Describe how art is connected to math through the use of patterns and tessellations
- Identify and create tessellation patterns

2. Art and Language Arts – The Storyteller

- Identify the connection between visual and verbal storytelling
- Carry out the process of storytelling through creating a story map

- Create art based on a story map
3. Art and Science – From Earth to Canvas
 - Identify materials used in creating art
 - Discuss how materials are created from natural resources
 4. Social Studies and Art – Decoding the Past
 - Describe how historical information is often recorded visually rather than verbally
 - Recognize what visual clues are present in modern society
 - Analyze the story that is interpreted based on the visual clues created by the artist
 5. The Application of Art Review Quiz
 - Experiment with the principles of design to communicate ideas in original artwork
 - Analyze the effectiveness of the principles of design to convey ideas
 - Use personal experiences with design and artwork to interpret and create work that is cross-curricular
 - Explain the importance of experimentation and initiative when developing original artwork

5. Responding to Art

1. Responding to Criteria
 - Identify different genres of art
 - Understand different criteria for evaluating artwork
 - Create specific criteria to evaluate a genre of art
 - Analyze artwork based on criteria
2. Evaluating a Genre
 - Understand concepts that define a genre or a group of artwork
 - Develop ideas for evaluating a group of artwork based upon a particular genre
 - Evaluate artwork based upon the criteria established for the genre
3. Extending the Collection
 - Interpret a theme for a group of artwork
 - Create artwork based on a genre
 - Justify decisions
4. Presenting Your Message
 - Select art to represent a message
 - Create a collection based upon a message
 - Justify decisions made
5. Responding to Art Review
 - Apply appropriate criteria to analyze, select, and respond to art
 - Critique choices artists, designers, and curators make when creating or presenting artwork
 - Identify reasons why criteria used to evaluate artwork would vary
 - Analyze the traits of artwork that communicates effectively

Semester B Summary:

The middle school art program is organized around the three artistic processes of creating, presenting, and responding. In addition, the program emphasizes how art and design can drive innovation in the same way science, technology, engineering, and mathematics do. Throughout the courses, students use various media and techniques to construct projects, collaborate with peers, and critique their own work as well as the work of other artists.

In Semester B, students consider the preservation and protection of art. They then explore how international, national, and local art influences ideas, actions, cultures, and environments. Using this information, students build their own ideas

of the role art plays in their lives.

Semester B Outline

1. Course Overview

1. Getting Started in Middle School Art

2. Protecting and Respecting Art

1. The Evolution of Style
 - Analyze historical artwork from a cultural perspective
 - Examine art trends and styles across time and culture
 - Understand reasons for stylistic change
2. Pick Your Medium
 - Explain how and why artists choose a medium
3. Heritage Sites: Place Preservation
 - Explore World Heritage Sites and identify why they are important to preserve
4. With Great Art Comes Great Responsibility
 - Analyze the responsibilities artists have when they create and exhibit artwork
 - Understand the factors artists consider before they hang a piece for exhibition
5. Passive Observer Responsible Viewer?
 - Analyze the responsibilities of the viewer when looking at and responding to a work of art
6. A Path to Preservation and Respect
 - Analyze historical artwork from a cultural perspective
 - Examine art trends and styles across time and culture
 - Understand reasons for stylistic change
 - Explain how and why artists choose a medium
 - Explore World Heritage Sites and identify why they are important to preserve
 - Analyze the responsibilities artists have when they create and exhibit artwork
 - Understand the factors artists consider before they hang a piece for exhibition

3. The World of Art

1. Harmonious Principles: The World of Chinese Art
 - Understand how philosophy and culture influenced the development of various art forms
 - Create artwork that illustrates aspects of philosophy and culture
2. Mathematics Meets Art: The Golden Ratio
 - Analyze the use of the golden ratio in art and architecture
 - Understand ways that the golden ratio has been a guiding principle in the art of multiple cultures
3. The Beast: Animal Representations in Art
 - Evaluate ways that animals are used in art to represent people or ideas
 - Compare animal art from different cultures
4. The Ideal: Representations of Soldiers and Saints
 - Identify the use of artistic composition techniques to elevate the status of strategic individuals in history
 - Analyze gesture and grouping of figures to interpret the relationships between them
5. The Creation of American Culture Through Art

- Analyze symbolic development of national identity through artwork in the early days of the American republic

4. Art in Your Community

1. The Art of Money
 - Examine the images that compose currency from various countries and interpret what they say about national identity
 - Understand the technology and artistic methods used to manufacture currency
2. Monumental Sculptures: We Remember
 - Observe and analyze war memorials from various time periods and compare and contrast styles and purposes
 - Explore the purpose behind the creation of war memorials
3. Monumental Design
 - Analyze the process of monument design with an in-depth model
 - Analyze and discuss why symbolism and placement of artworks is important
4. Building Community: Architecture
 - Describe processes and techniques practiced by architects
 - Analyze ways architects send a message through structural elements
 - Create an architectural drawing
5. Community Art: Mundane to Magnificent
 - Analyze the purposes of a range of art
 - Understand methods used in the creation of a wide range of community art
 - Explore reasons creativity and beauty are important to human existence

5. Art in Your Life

1. Interior Landscapes: Designing a Room
 - Analyze ways that interior designers create a space for specific purposes
 - Compare interior designs from different time periods
 - Redesign a space to match a specific purpose
2. Reproductions: The Art and History of Printing
 - Compare and contrast printing technology and techniques from various times in history
 - Reflect on ways that printing has impacted the spread of ideas in images and text
3. Photography: Instant Art?
 - Analyze photographs across time and cultures for the ways they portray subjects and send a message through composition and techniques
 - Understand how photography has altered the way we create and share images
4. Convincing Images: The Art of Advertising
 - Analyze the role of art in creating effective advertisements
 - Learn about careers in the field of professional advertising
 - Discuss the choices advertising professionals make when crafting an advertisement with a specific message
5. Caring for the Environment: Recycled Art
 - Analyze the ways that artists use recycled media to communicate a message
6. Intersecting Art Forms
 - Analyze the ways that artists use mixed media to communicate a message
 - Create a mixed media piece that conveys a particular theme

Art 8

Art 8

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

The middle school art program is organized around the three artistic processes of creating, presenting, and responding. In addition, the program emphasizes how art and design can drive innovation in the same way science, technology, engineering, and mathematics do. Throughout the courses, students use various media and techniques to construct projects, collaborate with peers, and critique their own work as well as the work of other artists.

In Semester A, students explore the wide range and variety of visual arts. They learn the basic elements of art and principles of design and apply them in their own creative ways. The semester culminates in a study of factors involved in evaluating and critiquing art.

Semester A Outline

1. **Course Overview**
 1. Getting Started in Middle School Art
2. **What Is Art?**
 1. The Role of Inspiration
 - Define inspiration
 - Explore the role that inspiration plays in the creation of art
 - Evaluate personal inspiration factors
 - Create art based on personal inspiration
 2. What Is Art to You?
 - Describe the various roles art has played through history
 - Interpret the purpose/role of various art pieces
 - Create art based on the role of preserving heritage
 3. Creativity and Innovation
 - Define creativity and innovation
 - Investigate the role of creativity and innovation in the creation of art
 - Create art based on the concepts of creativity and innovation
 4. What Type of Artist Do You Want to Be?
 - Explore the role played by art in the communication of ideas
 - Analyze the types of messages that prompt a personal response

- Develop an art piece that effectively communicates a message you want to convey to others
5. Art in Review
 - Reflect on the scope and diversity of the visual arts
 - Investigate the role of art as a means for better understanding people and the world
 - Establish a framework for evaluating works of art

3. The Essentials of Visual Arts

1. Review of the Elements and Principles of Art
 - Define the elements and principles of art
 - Create tools that will help with understanding of the elements and principles
2. Billboard Designs
 - Discuss the use of color to create emphasis and balance
 - Create a design that utilizes the element of color to create emphasis and balance
3. A New Perspective
 - Identify the steps and concepts of drawing in two-point perspective
 - Describe the importance of value when drawing in perspective
 - Create an image in two-point perspective that is harmonious
 - Assess the success of the image created
4. Drawing the Human Body
 - Define the correct proportions of drawing the human body
 - Understand how basic shapes can be used to draw the different parts of the human body
 - Create a drawing of the human body that utilizes value and texture correctly
5. Painting Contrast
 - Define the concepts of color, value, and movement
 - Create art based on the elements and principles of color, value, and movement
 - Assess the success and purpose of the art piece created.
6. Reviewing the Essentials
 - Experiment with the elements and principles of art
 - Make original artwork through investigation and planning
 - Use the elements of art to evaluate the quality of artwork
 - Use experiences with art to interpret and critique artwork
 - Explain proper care and maintenance of art equipment and materials

4. Art Connections

1. The Math Connection
 - Understand the connection between math and the visual arts
 - Explore a correlation of math and art as a career field
2. Art and Language Arts
 - Describe the connection between language arts and the visual arts
 - Examine an example of the connection between the two arts
3. Social Studies and Art
 - Relate the visual arts to the study of social studies
 - Investigate the connection by analyzing current events that impact students
4. Art and Science
 - Explain how the visual arts and sciences are connected through the field of conversation
 - Create a product that exemplifies the connection between visual arts and sciences

5. Art Connections Review

- Experiment with the principles of design to communicate ideas in original artwork
- Evaluate the relation between art and core subject areas
- Evaluate the impact of art on careers that relate to other subject areas
- Analyze the effectiveness of the principles of design to convey ideas through art
- Use personal experiences with design and artwork to interpret and create contemporary artwork
- Explain the importance of experimentation and initiative when developing original artwork and designs

5. Responding to Art

1. The Role of Inspiration

- Develop criteria that identifies different styles of art
- Develop evaluation criteria for artwork as it applies to a particular style

2. Creating a Portfolio

- List the characteristics of your artwork
- Justify decisions made in creating a portfolio of work

3. Creativity and Innovation

- Interpret artwork based upon your criteria
- Create artwork based upon your criteria
- Justify decisions regarding artistic choices

4. Presenting a Collection

- Select a piece of art to represent your skill and style
- Create art based your criteria
- Justify decisions regarding artistic choices

5. Responding to Art Review

- Analyze the traits of artwork that communicate effectively
- Apply appropriate criteria to analyze, select, and respond to art
- Critique choices made by artists, designers, and curators when creating or presenting artwork
- Identify reasons why criteria used to evaluate artwork vary

Semester B Summary:

The middle school art program is organized around the three artistic processes of creating, presenting, and responding. In addition, the program emphasizes how art and design can drive innovation in the same way science, technology, engineering, and mathematics do. Throughout the courses, students use various media and techniques to construct projects, collaborate with peers, and critique their own work as well as the work of other artists.

In Semester B, students consider the preservation and protection of art. They then explore how international, national, and local art influences ideas, actions, cultures, and environments. Using this information, students build their own ideas of the role art plays in their lives.

Semester B Outline

1. Course Overview

1. Getting Started in Middle School Art

2. Protecting and Respecting Art

1. External Memory: Art Reveals Culture

- Analyze art and artifacts that document the everyday life of a culture
 - Identify and evaluate the cultural messages that artists send through their artwork
2. External Memory: Art Reveals Opinions
 - Analyze art and artifacts that document the major issues of a time and place
 - Identify and evaluate the ways that artists communicate cultural opinions through their artwork
 3. Advanced Art Preservation
 - Understand advanced science technology and techniques behind art preservation
 4. Nontraditional Art Preservation
 - Analyze preservation methods for nontraditional and contemporary forms of art
 - Evaluate examples of nontraditional art including installation and environmental art
 5. Who Determines the Display?
 - Understand the factors that determine selection of artwork for preservation and exhibits
 6. The Conservation Conundrum
 - Analyze the benefits and drawbacks of art preservation and restoration

3. The World of Art

1. The Art of War
 - Interpret the role of art and artists during times of war
 - Analyze ways that artists use visual composition to create scenes of conflict
2. Engineering Empires
 - Compare architecture and engineering developments across cultures
 - Use inference to learn information about culture and government based on architectural records
3. Democratic Architecture
 - Analyze the visual and structural similarities between Greek architecture and buildings and sculptures in America
 - Identify visual messages communicated by the elements of Greek architecture
4. Mass Art: Technology and the Industrial Revolution
 - Analyze the impact of technology and the Industrial Revolution on past and present art
 - Understand ways that technology has influenced the spread of art and artistic ideas
5. Designing a World: Engineering Movies
 - Compare the work of a set designer or special effects artist to an architect or city planner
 - Identify factors movie artists must consider to create a believable world
 - Understand careers of key movie professionals
 - Understand ways that culture is revealed in movies
6. Machu Picchu to Movies
 - Connect artworks with the underlying philosophies they represent
 - Compare and contrast architectures across cultures
 - Compare and contrast engineering and technological developments across cultures and time

4. Art in Your Community

1. Revealing Landscapes: Metropolis and Nature
 - Examine human-made and natural landscapes for clues about our relationship with the natural world

- Identify ways that artists from around the world represent culture and worldviews through landscapes or cityscapes
 - Analyze ways that artists use various media and techniques to depict objects in the space of a landscape or cityscape
2. The Art of Public Spaces
 - Explore the purpose, meaning, and uses of public spaces
 - Analyze the design and symbolism of public spaces for clues about values and culture
 3. Wearable Art
 - Analyze fashions across time for clues about values and culture
 - Outline the tasks of professional fashion artists and the ways they use principles of art and design to create clothing
 4. The Artist as Inventor
 - Compare traits that artists and inventors have in common
 - Analyze and explore ways that artists have used their creativity to produce meaningful inventions
 5. Art to Teach, Art to Heal
 - Compare the skills and job responsibilities of art educators and art therapists
 - Analyze the unique ways that art educators and art therapists use art to teach and heal in a community
 6. Multiple Paths to Creativity
 - Analyze and review different types of outlets for artistic creativity
 - Create a portfolio that demonstrates exploration and skill in your preferred method of artistic creativity

5. Art In Your Life

1. Textile Art: The Fabric of Your Life
 - Examine the techniques and materials that are used in the creation of textiles
 - Analyze textiles to see how artists from various locations use elements of art such as pattern, repetition, form, and balance to send messages about culture and value
2. Take a Seat On a Work of Art
 - Examine furniture from different cultures and time periods for its purpose, design, and materials
 - Analyze ways that artists have used balance, repetition, rhythm, color, and form to create unity in furniture design
3. The Art of Illustration
 - Identify the ways that illustration is used to visualize a story or message
 - Explore and analyze messages sent through various types of illustration such as books and illuminated manuscripts
4. Finding Inspiration: Artistic Motivation
 - Identify and analyze motivating factors, inspirations, methods, and materials for young artists
 - Create a portfolio of your inspirations, motivations, and preferred methods and materials
5. Art of Your Generation
 - Identify and analyze motivating factors, inspirations, methods, and materials for young artists
 - Create a portfolio of your inspirations, motivations, and preferred methods and materials

Art K

Art K

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will explore color, line, and shape. A combination of interactive and hands-on studio projects encourages the student to create art, sharpen fine motor skills, and explore areas of interest in art. Artistic modes include drawing, painting, assembling, and sculpting.

Course Outline

1. Art Is Everywhere

1. Art Is Everywhere!
 - Identify and describe the five elements of shape in the environment and in artworks
 - Illustrate the five elements of shape using finger paints
2. Let's Draw Lines
 - Draw variations of lines
 - Draw straight lines using a ruler
 - Create art using crayons, markers, and lines
3. Lots and Lots of Dots
 - Create a mixed-media collage using cut-out paper dots and dot-shaped objects
4. Art Around the World
 - Create a Diwali pattern using chalk
 - Describe a family tradition
5. Learning to See and Draw Like an Artist
 - Observe and recreate elements of shape using a pencil
 - Create original collage art using an online program
 - Demonstrate creativity and knowledge of elements of shape in a collage
6. Elements of Art
 - Create original artwork using the five elements of shape
 - Select and use a variety of media to create art
 - Use the numbers 1–5 in original artwork

2. Coloring the Season

1. Colors All Around Us
 - Identify warm and cool colors
 - Identify primary and secondary colors
 - Identify opposite colors
 - Create original artwork using warm and cool colors
2. Fluttering Colors
 - Demonstrate beginning awareness of the concept of symmetry as a mirror image
 - Describe migration and why monarch butterflies migrate
 - Create a watercolor painting of a monarch butterfly
3. See and Draw Like an Artist
 - Observe and recreate the elements of shape and mirror images using pencil
 - Create a still life arrangement which demonstrates emerging awareness of balance and space
4. Autumn Arrangement
 - Create a fall-themed table centerpiece using objects found in nature and around the house
 - Demonstrate emerging awareness of balance and space in an artwork
5. Painting the Seasons
 - Paint a fall scene using watercolors and crayons
 - Demonstrate emerging awareness of space and balance within an artwork
 - Demonstrate understanding of warm and cool colors by utilizing them appropriately within an artwork
 - Demonstrate emerging awareness of a horizon line

3. Winter Is Taking Shape

1. Shapes in Art
 - Identify and draw basic shapes: circle, oval, triangle, square, and rectangle
 - Create a mosaic design using crayons and black marker
2. Snowflakes
 - Create snowflakes by cutting shapes into coffee filters
 - Identify and create patterns
3. It's Wintertime!
 - Create a mixed-media snowman using paint, objects, and glue
 - Identify and use texture in an original artwork
4. See and Draw Like an Artist
 - Observe and recreate the elements of shape using pencil
 - Create patterns with shape
5. Art Around the World
 - Create a kite that shows shapes, pattern, and balance
 - Demonstrate understanding of mixed media, texture, pattern, and basic shapes

4. Art Forms

1. Clay Animals
 - Identify elements of shape in sculptures
 - Relate sculptures to history and cultures
 - Create an animal sculpture using clay and the elements of shape
2. Carnival Mask
 - Create an animal mask using mixed media

- Describe a mixed-media artwork
- 3. Learning to See and Draw Like an Artist
 - Use mental imagery to visualize artwork
 - Observe and recreate the elements of shape using pencil
 - Demonstrate balance and space in an artwork composition
- 4. Art Around the World
 - Create an artwork using twigs, yarn, and glue
 - Describe the traditions of the Bulgarian “Baba Marta” celebration
 - Identify the elements within artworks
- 5. Abuela Mural
 - Describe a mural
 - Design a mural using paint and observation
 - Identify elements of art within an illustration
- 6. Art All Around Us
 - Create a playground scene using sculpture techniques
 - Identify and use mixed-media in an original artwork

5. Springtime Painting

1. It’s Springtime
 - Define watercolor artwork
 - Create a painting using watercolors
 - Identify the five elements of art used in a watercolor painting
2. Blooming Flowers
 - Create a vase of flowers using mixed media
 - Identify the five elements of art in your artwork
3. Learning to See Like an Artist
 - Use mental imagery to visualize artwork
 - Create an original watercolor
 - Demonstrate balance and space in an artwork composition
4. Egg Carton Monsters
 - Create recycled artwork using mixed media
 - Define recycled materials
 - Identify the types of media used in a mixed-media artwork
5. Art Around the World
 - Create a traditional mud painting
 - Differentiate between patterned and non-patterned sequences
 - Examine the link between family traditions and the art connected with those traditions
6. Painting Shapes
 - Categorize the five elements of shape
 - Create texture in artwork
 - Create an original artwork using finger and sponge painting

6. Summertime Art

1. Here Comes Summer
 - Classify colors as either warm or cool
 - Identify warm and cool colors found in nature during summertime

- Draw a summer nature scene using warm and cool colors
2. Outdoor Art
 - Identify natural objects to be used in artwork
 - Use sun-printing techniques to create an original artwork
 - Describe textures found in nature
 3. See and Draw Like an Artist
 - Use mental imagery to visualize artwork
 - Draw a duplication image of summer shapes using the basic elements
 - Create an original online drawing using natural elements
 - Analyze how the 5 elements of shape were used in an original artwork
 4. Art Around the World
 - Discuss cultural traditions of the Inti Raymi celebration in Ecuador
 - Create a model of a sun flag from Ecuador
 5. Cooking Up Crayons
 - Identify different colors
 - Use primary colors to create secondary colors
 - Draw a picture using newly-created tools
 6. My Art
 - Use elements of shape to create an original artwork
 - Incorporate cool and warm colors into an original artwork
 - Identify primary and secondary colors in an original artwork

Discovering Music I

Discovering Music I

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Designed for students in grades 3–5, this course teaches fundamental musicianship skills from a Western-Classical approach, while aligning to the National Core Arts Standards. The course challenges the student to improve listening, notation, analysis, performance, and improvisation skills. With audio, visual, and interactive technologies, this course provides a unique and advanced learning experience.

Course Outline

1. Expressing Groovy Beats

1. Welcome to Music
 - Identify music as a way to communicate ideas and feelings
 - Recognize and reproduce pitch, beat, and rhythm in music
 - Compose music using two different pitches
2. Writing a Groovy Beat
 - Recognize and produce a steady beat
 - Differentiate between whole notes, half notes, quarter notes, and pairs of eighth notes for simple rhythms
 - Create, play, and sing a variety of rhythmic patterns
3. Quicker Rhythms
 - Recognize and produce a steady beat
 - Differentiate among eighth notes, half notes, and quarter notes for simple rhythms
 - Create, play, and sing a variety of rhythmic patterns
 - Understand and create using improvisation
4. Silence

- Identify notation for simple rhythmic rests
 - Play and sing a variety of rhythmic patterns
5. Loud and Soft
 - Identify the notation of dynamics in music
 - Articulate dynamic contrast in performance and practice
 - Order dynamic markings from softest to loudest
 6. The Ruler of Time
 - Identify the different time signatures found in music
 - Compose using a variety of time signatures
 7. Ticktock
 - Describe a metronome and identify its purpose
 - Identify a variety of speed indications in music
 - Demonstrate speed variations in performance and practice
 8. Buttons and Ties
 - Identify and articulate dotted rhythms
 - Identify the result of tying notes together in music notation
 9. Expressing Groovy Beats Unit Review
 - Review all previous concepts and objectives for Unit 1
 - Take the unit test
 10. Expressing Groovy Beats Unit Test

2. Musical Palette

1. A Musician's Palette
 - Identify the components of pitch
 - Contrast the functions of melody and harmony
 - Create melodies and melodic shapes using high and low pitches
 - Compose a musical story using high and low pitches
2. Grand Staff
 - Identify the grand staff (treble and bass clef)
 - Identify and notate pitches on a treble staff and bass staff
3. Step Ladder
 - Identify sharps and flats
 - Explain how sharps and flats change pitch
 - Compose a musical selection including sharps, flats, and repeated pitches
4. Catchy Tunes
 - Identify the components of pleasing melody
 - Describe the length and structure of a phrase
 - Adapt phrasing in performance and practice
 - Compose a short melody that includes phrases
5. Major
 - Identify structure of a major scale using whole and half steps
 - Aurally differentiate between tonic and dominant

- Notate short melodies using the first five notes of the C major scale

6. Solfège

- Introduce solfège system and syllables
- Apply solfège syllables to the major scale by singing and performing hand gestures
- Notate pitches, rhythms, and solfège syllables for a given musical example

7. Minor

- Identify the structure of minor scales
- Differentiate between major and minor scales
- Notate pitches, rhythms, and solfège syllables in minor tonality

8. The Key

- Differentiate and identify major and minor key signatures
- Analyze key signatures in repertoire

9. Articulation

- Identify the common articulation marks found in music
- Practice and perform using proper articulation
- Notate pitches, rhythms, and articulations in a given audio example
- Compose a short piece using three different articulations

10. Unit 2 Composition Portfolio

- Compose a short piece of music combining concepts from Unit 1 and 2, including the notation of a melody using elements of pitch, rhythm, articulation, and musical expression
- Sing a composed melody with solfège and hand gestures, and play it on the virtual instrument

11. Musical Palette Unit Review

- Review melody, pitch, harmony, scales, key signatures, and articulations
- Prepare for the Musical Palette Unit Test

12. Musical Palette Unit Test

3. Instrument Family Reunion

1. Welcome to the Orchestra

- Identify the sections of an orchestra
- Identify the role of a conductor
- Play a musical selection using more than one instrumental sound

2. Strings

- Identify the timbre of stringed instruments
- Identify the instruments within the strings family
- Differentiate between bowed and plucked strings
- Identify string instruments from other cultures
- Sight-read and compose two-, three-, and four-measure musical examples

3. Woodwinds

- Identify the blowing techniques in woodwind instruments
- Identify the instruments within the woodwind family

- Compare western-classical instruments to woodwind instruments from other time periods and cultures
 - Sightread, notate, and/or compose a short musical example of 2–4 measures
4. Brass
 - Identify the material and blowing (vibrating) technique of brass instruments
 - Identify the instruments within the brass family
 - Describe traditional uses for brass instruments
 - Sightread, notate, and compose a melody
 5. Percussion
 - Identify the instruments within the percussion family
 - Differentiate between pitched and non-pitched percussion
 - Sightread and notate six measures of timpani music in bass clef
 - Compose short rhythm patterns at varying tempos
 6. Keyboards
 - Identify the history of keyboard instruments
 - Differentiate between mechanisms in piano and harpsichord
 - Identify the instruments within the keyboard family
 - Sightread five measures of piano music
 - Notate a brief musical passage as performed by a pianist
 7. Electronic Instruments
 - Describe programming and how it is used in electronic instruments
 - Identify common devices that also serve as electronic instruments
 - Sightread a short musical example
 - Compose a short musical selection using sampled water sounds
 8. The Band
 - Identify standard instruments found in a wind ensemble
 - Compare and contrast the orchestra and marching band
 - Sightread and notate a short musical example
 9. Composition Portfolio
 - Compose a short piece of music with instrumentation and musical elements inspired by descriptive titles
 10. Instrument Family Reunion Unit Review
 11. Instrument Family Reunion Unit Test

4. **Traveling Through Time: A Musical Journey**

1. Introduction to Music History
 - Identify and understand the style periods of western classical music
2. Early Western Classical Styles
 - Identify important composers and styles from the Renaissance era
 - Differentiate between sacred and secular music
 - Identify the Mass
 - Compose a short melody of four to eight measures in the Renaissance style of music

3. Baroque I
 - Identify key elements that began the Baroque style
 - Identify important composers and styles from the Baroque period
4. Baroque II
 - Identify important composers and pieces from the Baroque period
 - Identify the musical form cantata
 - Identify compositional structure of a fugue
 - Compose a short variation of a fugue theme
5. Classical I
 - Describe the transitional elements from the Baroque style to the Classical style
 - Identify important composers and pieces from the Classical period
 - Identify and demonstrate the concerto in the Classical period
6. Classical II
 - Identify important composers and styles from the Classical period
 - Identify the classical symphony and its structure
7. Romantic I
 - Describe the transitional elements from the classical style to the Romantic style
 - Identify important composers and pieces from the Romantic period
 - Analyze the use of word painting in standard repertoire
 - Compose a short melody that includes word painting
8. Romantic II
 - Identify important composers and styles from the Romantic period
 - Identify compositional styles used during the Romantic period
 - Analyze and describe a standard tone poem
9. Modern
 - Describe how Modern techniques evolved
 - Identify and understand avant-garde and Futurism music and concepts
 - Understand the musical concepts of John Cage
10. Modern II
 - Describe development of minimalism
 - Identify minimalist music
 - Explore modern compositional techniques by studying Steve Reich and Philip Glass
11. Traveling Through Time: A Musical Journey Review
12. Traveling Through Time: A Musical Journey Test

Discovering Music II

Discovering Music II

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Designed for students in grades 3–5, this course builds on fundamental musicianship skills introduced in Discovering Music I. Aligning to the National Core Arts Standards, the course teaches the student to explore new concepts in rhythm and notation, as well as improve listening, notation, analysis, performance, and improvisation skills. The student will use a basic understanding of the orchestra to explore instrumentation and orchestration in more depth, and analyze compositional style from a range of periods. With audio, visual, and interactive technologies, this course provides a unique and advanced learning experience. Discovering Music I is a prerequisite for this course.

Course Outline

1. **Rock-Solid Rhythm**

1. Back to the Basics

- Review the note values, rests, and meters learned previously
- Recognize note values and rests by sight and by sound and demonstrate understanding through use in musical performance and composition
- Compare the value in beats of different rhythmic patterns
- Check rhythmic notation for incomplete measures and make them complete
- Compose and perform rhythmic notation

2. Short and Sweet

- Recognize sixteenth notes and use them in reading and performing rhythmic patterns
- Combine sixteenth notes with other note values and rests to compose and play a variety of rhythmic patterns
- Compare the value in beats of different rhythmic patterns, including those with sixteenth notes
- Check rhythmic notation for incomplete measures and make them complete
- Demonstrate subdividing the beat

3. Getting in Groups

- Recognize eighth rests and sixteenth rests

- Identify new rhythmic figures containing sixteenth notes and eighth notes
 - Compare rhythmic figures and patterns of different lengths
 - Demonstrate correct use of new rhythmic figures in performance
4. Connecting the Dots
 - Recognize dotted quarter notes and use them in reading and performing rhythmic patterns
 - Compare the value in beats of different rhythmic patterns, including those with dotted quarter notes
 - Check rhythmic notation for incomplete measures and make them complete
 5. Off the Beaten Path
 - Identify syncopation in music
 - Demonstrate understanding of syncopation through listening, reading, and playing syncopated rhythms
 - Identify the ragtime style of music
 - Describe a musical style with syncopation and compose story elements to go along with it
 6. Swing It
 - Identify the style, sound, and feel of swing
 - Demonstrate understanding of the swing style through listening, reading and improvising swing rhythms
 - Compare rhythms performed straight and in a swing style
 7. A Different Kind of Time
 - Explain compound meter
 - Perform rhythmic notation in compound meter
 8. Rock-Solid Rhythm Unit Review
 - Review all previous concepts and objectives for Unit 1
 9. Rock-Solid Rhythm Unit Test

2. Musical Tapestry

1. Which Pitch?
 - Memorize the location of pitches on the grand staff
 - Develop an expanded reading range above and below the grand staff through ledger lines
2. Intervals
 - Memorize intervals visually and aurally
3. A Major Mood
 - Memorize the major scale pattern
 - Construct major scales and identify tonic, subdominant, and dominant tones within the scale
 - Check notation of major scales for accuracy
 - Describe mood in music
 - Map ascending and descending direction of notes within a major melody
4. A Minor Mood
 - Memorize the minor scale pattern
 - Construct minor scales and identify tonic, subdominant, and dominant tones within the scale
 - Check notation of minor scales for accuracy
 - Describe mood in music
 - Map ascending and descending direction of notes within a minor melody
5. The Keys, Please
 - Identify and memorize key signatures

- Recognize the relationship between key signatures in the circle of fifths
 - Analyze music to distinguish related key signatures as major or minor
6. Three of a Kind
 - Define triads and classify their quality
 - Recognize triads visually and aurally
 - Construct triads
 7. Composition/Improvisation Portfolio
 - Use the major and minor scales to compose and improvise in musical phrases
 8. Following the Leader
 - Recognize a common chord progression visually and aurally
 - Describe the sound and feel of chord tension and resolution
 9. Musical Tapestry Unit Review
 - Review all previous concepts and objectives for Unit 2
 10. Musical Tapestry Unit Test
3. **Colors of the Orchestra**
 1. Instrument Families
 - Recognize instrument families aurally and visually
 - Organize instruments into families
 - Distinguish between sounds of individual instruments
 - Distinguish types of ensembles through aural recognition
 2. Bring the Strings!
 - Recognize string instruments visually and aurally
 - Describe sound characteristics and physical features of individual instruments in the string family
 - Organize instruments in the string family by voice range
 3. Woodwinds
 - Recognize woodwind instruments visually and aurally
 - Describe sound characteristics and physical features of individual instruments in the woodwind family
 - Organize instruments in the woodwind family by single or double reed
 - Compose a variation of a melody
 4. Brass
 - Recognize brass instruments visually and aurally
 - Describe sound characteristics and physical features of individual instruments in the brass family
 - Compare voice ranges of instruments in the brass family and organize instruments from low to high
 5. Percussion
 - Recognize percussion instruments visually and by description
 - Describe sound characteristics, physical features, and construction of percussion instruments
 - Classify instruments of the percussion family as pitched or nonpitched
 - Identify roles of percussion instruments in different types of ensembles
 - Improvise a rhythm section with percussion instruments
 6. Keyboard
 - Describe the development of keyboard instruments throughout history
 - Describe the role of keyboard instruments in ensembles and as a solo instruments

- Recognize keyboard instruments aurally and by description
 - Compare the classification of keyboard instruments in different instrument families
7. The Art of Arranging
 - Define arranging and describe considerations of instrumentation
 - Analyze instrumentation of repertoire
 - Arrange music for multiple instruments
 8. The Role of the Conductor
 - Describe the role of the conductor
 - Describe the development of the role of the professional conductor
 - Execute basic conducting patterns
 9. Composition Portfolio
 - Compose music for multiple instruments using a variety of musical elements, including pitch, rhythm, dynamics, articulation, and key
 - Make external associations with instruments
 10. Colors of the Orchestra Unit Review
 - Review all previous concepts and objectives for Unit 3
 11. Colors of the Orchestra Unit Test

4. Musical Makings

1. Composer Spotlight: The Baroque Period
 - Describe the influences and ideals of the Baroque period
 - Identify George Frideric Handel as a major figure of the Baroque period and describe his contributions
 - Examine repertoire for characteristics of Baroque style
2. Composer Spotlight: The Classical Period
 - Describe the influences and ideals of the Classical period
 - Identify Wolfgang Amadeus Mozart as a major figure of the Classical period and describe important works
 - Examine repertoire for characteristics of Classical style
3. Composer Spotlight: The Romantic Period
 - Describe the transitional time between the Classical and Romantic periods
 - Identify Franz Schubert and Johannes Brahms as major composers of the Romantic period
 - Compare characteristics from different style periods
 - Examine repertoire for characteristics of Romantic style
 - Compose in the style of the Romantic lied
4. Composer Spotlight: The Twentieth Century
 - Describe reactions to the Romantic period that led to Impressionism
 - Describe the influence and style of the music of Claude Debussy and Maurice Ravel
 - Compare the music of Debussy and Ravel with art from the same period
 - Examine repertoire for Impressionist characteristics
5. Composer Spotlight: Atonality
 - Identify compositional characteristics in works by composers from the twentieth and twenty-first centuries
 - Describe atonality and Arnold Schoenberg's style of 12-tone music
 - Compose music using Schoenberg's concept of the tone row
6. Musical Makings Unit Review

- Review all previous concepts and objectives for Unit 4

7. Musical Makings Unit Test

Discovering Music III

Discovering Music III

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Designed for students in grades 3–5, this course enhances the student's knowledge of musical cultures as he or she discovers a musical identity. Aligning to the National Core Arts Standards, this course provides the student with engaging opportunities to combine musical knowledge with an exploration of different art forms to create new personal works. The student will apply foundational knowledge of music to a variety of musical styles and cultures. With audio, visual, and interactive technologies, this course provides a unique and advanced learning experience. Discovering Music I and Discovering Music II are prerequisites for this course.

Course Outline

1. Creative Foundations

1. Back to the Top
 - Classify music according to its music style
 - Identify the role musicians play in society today and through history
2. Rhythmic Precision
 - Differentiate between multiple rhythmic values
 - Perform a variety of rhythmic patterns
3. Accenting Rhythms
 - Compose a work using a variety of rhythmic values
4. Silence Is Golden
 - Identify notation for rests
 - Play and sing different rhythmic patterns that incorporate a variety of rests
 - Differentiate among multiple rhythmic values
5. The Grand Staff
 - Identify notes on the grand staff
 - Label the clefs on the grand staff
 - Perform a variety of melodic patterns

6. One Step at a Time
 - Identify a half step visually and aurally
 - Differentiate enharmonic spellings
 7. Major Keys
 - Construct a major scale
 - Differentiate between whole steps and half steps visually and aurally
 8. Scale Singing
 - Construct scales using appropriate solfège and hand signs
 - Perform using correct solfège and hand signs
 9. The Key Signature
 - Perform a work that changes key
 - Identify key signatures
 - Construct major scales based on key signatures
 10. Minor Keys
 - Analyze the quality of minor scales aurally
 - Construct minor scales based on their key signature
 - Identify major and minor parallels
 11. Making Melodies
 - Identify tools composers use to create melodies
 - Analyze the components of a compelling melody
 12. Melodic Master
 - Analyze artistic intentions through a composition
 - Demonstrate advanced composition techniques
 - Create an original melody
 13. Creative Foundations Unit Review
 - Review Unit 1 topics
 14. Creative Foundations Unit Test
2. **Many Musical Roles**
1. Roles and Responsibilities
 - Describe the relationship between composer, performer, and listener
 - Compare and contrast different types of composers, performers, and listeners
 2. The Composer
 - Describe the relationship between the composer and the audience
 - Identify the questions a composer may ask him/herself while composing
 - Compose a piece of music based on given criteria
 3. The Performer
 - Identify the role of the performer in the musical community
 - Compare performances of a composition
 4. The Listener
 - Describe the role of the listener
 - Identify characteristics of a sophisticated listener
 - Critique musical compositions from a compositional and performance standpoint
 5. Musical Careers
 - Identify job opportunities related to music

6. Inspiration
 - Define and explain the term muse
 - Analyze music to determine inspiration
7. A Musical Society
 - Describe the importance of music in other art forms
 - Describe the history of music patronage
 - Compose a piece of music based on given criteria
8. The Role of Improvisation
 - Describe the role of improvisation to each musician
 - Identify the necessary skills for an improviser
 - Improvise a composition to accompany a scene
9. Many Musical Roles Unit Review
 - Review Unit 2 topics
10. Many Musical Roles Unit Test

3. Musical Influences

1. You Be the Judge
 - Compare and contrast objective and subjective judgments
2. Everyone's a Critic
 - Describe the role of a critic
 - Evaluate a musical performance
3. Fusing Music
 - Describe fusion in music
 - Use the voice to create an example of fusion
4. Innovation
 - Describe tradition as it relates to musical culture
 - Identify elements of innovation in music
 - Transform an existing melody into an innovative composition
5. Against the Grain
 - Describe the role of the Doctrine of the Affections in Baroque music
 - Describe contributions by composers who did not conform to rules
6. Art Inspired
 - Describe the influence of art on music
 - Analyze the imagery used in Mussorgsky's Pictures at an Exhibition
 - Compose a piece of music based on given criteria
7. Impressionism
 - Describe characteristic traits of Impressionist music and art
 - Improvise a composition inspired by art
8. Twentieth-Century Web
 - Describe characteristics of different genres of music from the 20th century
 - Create a Futurist composition
9. Technology and Music
 - Compare differences in current and older technology
10. MIDI

- Describe the use of MIDI in music

11. Lyrics

- Describe the structure of lyrics
- Deduce and outline song structure from the analysis of song recording
- Identify and describe the use of chosen music elements that express the mood of a given set of lyrics

12. Writing Lyrics

- Create a set of lyrics following a rhyme scheme

13. Musical Influences Unit Review

- Review Unit 3 topics

14. Musical Influences Unit Test

4. **A Musical Community**

1. Musical Meditation

- Describe reasons people listen to music other than for enjoyment
- Describe the meditative process as it relates to music
- Compose lyrics for an existing melody

2. Music and Language

- Identify the origin of a piece of music based on characteristics
- Describe musical “grammar and vocabulary” or characteristics of select music forms and genres
- Compose a series of call-and-response musical phrases

3. Music and Culture

- Describe how the purpose of music differs across cultures
- Describe ethnomusicology
- Identify how cultural traditions influence composers

4. Folk Forms

- Describe instruments used in folk music from different cultures
- Respond to music with art that represents characteristics of that music

5. Evolution of Rock

- Describe the evolution of rock music
- Analyze images that show the cultural style of rock
- Sightread lead guitar and rhythm melodies from rock music

6. Cultures Today

- Describe characteristics of electronic and hip-hop music
- Play a melody using a synthesizer

7. Your Own Drum

- Develop criteria for assessing different musical works
- Analyze likes and dislikes about a given musical work

8. Recording the Future

- Describe how music has been distributed over the last 100 years
- Describe the evolution of rock and classical music
- Play a song by ear using the virtual instrument

9. A Musical Community Unit Review

- Review Unit 4 topics

10. A Musical Community Unit Test

Experiencing Music I

Experiencing Music I

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

This course is designed for students in grades K-2 and explores differences between music and everyday sounds, and also how the body hears and responds to music. Aligning to the National Core Arts Standards, the course introduces skills that assist the student in making music individually and with another person. The student will identify instrument characteristics and sounds and begin to consider the way music of the student's own culture might sound different to a person from another culture. With audio, visual, and interactive technologies, this course provides a unique and advanced learning experience.

1. Music and Me!

1. What Is Music?
 - Differentiate between sounds in everyday life and musical patterns, highlighting aspects unique to music such as organized rhythmic patterns and recognizable melodies
 - Execute a steady beat through clapping and snapping along with a recording
2. Move to the Beat!
 - Explore ways in which the body responds to, listens to, and creates music
 - Perform a steady beat on a musical instrument
 - Demonstrate full body movement while warming up
3. Getting the Rhythm!
 - Explore ways in which the body responds to, listens to, and creates music
 - Practice a variety of activities to begin developing skills relating to the following: responding to a visual cue, responding to an auditory cue, singing individually, and singing with another person
 - Sing ta and ti rhythm patterns
 - Improvise a rhythm around a steady beat
4. Time to Sing!
 - Explore ways in which the body responds to, listens to, and creates music
 - Practice a variety of activities to begin developing skills relating to the following: responding to a visual cue, responding to an auditory cue, performing individually, and performing with another person

- Perform a simple melody, synchronized to a steady beat alongside a recording (matching tempo, pulse, and simple pitch variations by singing/playing)
 - Perform a scale on the Virtual Xylophone
5. Making Music Together!
- Explore ways in which the body responds to, listens to, and creates music
 - Practice a variety of activities to continue developing skills relating to the following: responding to a visual cue, responding to an auditory cue, performing individually, and performing with another person
 - Perform a simple melody, matching tempo, rhythm, and simple pitch variations
 - Perform “Hot Cross Buns” using the Virtual Xylophone and voice
6. Music and Me! Unit Review
- Review all previous concepts and objectives for Unit 1
7. Music and Me! Unit Test

2. Fast and Slow, Stop and Go

1. Getting the Beat!
- Develop a degree of motor control (stop and go) as a precursor for performance of simple rhythmic patterns on an instrument
 - Practice and perform a steady beat using ta
 - Sing a melody along with a rhythmic pattern
2. Breaking It Down
- Develop a degree of motor control (stop and go) as a precursor for performance of simple rhythmic patterns on an instrument
 - Identify rhythmic patterns using ta and ti-ti
 - Create rhythmic patterns using ta and ti-ti
3. Taking a Rest
- Develop a degree of motor control (stop and go) as a precursor for performance of simple rhythmic patterns on an instrument
 - Recognize craft-stick notation for ta, ti-ti, and rest
 - Perform a nursery rhyme in rhythm
4. Rhythms on the Virtual Xylophone
- Develop a degree of motor control (stop and go) as a precursor for performance of simple rhythmic patterns on an instrument
 - Recognize craft-stick notation for ta, ti-ti, and sh
 - Perform rhythmic patterns using ta, ti-ti, and sh on the Virtual Xylophone
 - Compose rhythmic patterns with melodies
5. Slow as a Tortoise
- Recognize and perform craft-stick notation for ta, ti-ti, and rest on the Virtual Xylophone
 - Identify different tempos
 - Connect tempo to mood and emotion
 - Compose and play a song with a slow tempo
6. Fast as a Hare!
- Recognize and perform craft-stick notation for ta, ti-ti, and rest on the Virtual Xylophone
 - Identify different tempos
 - Connect tempo to mood and emotion
 - Compose and play a song with a fast tempo

7. Changing Tempos
 - Recognize and perform craft-stick notation for ta, ti-ti, and rest on the Virtual Xylophone
 - Recognize changes in tempo both among different compositions and within a composition
 - Compose and play a composition with tempo changes on the Virtual Xylophone
8. Fast and Slow, Stop and Go Unit Review
 - Review all previous concepts and objectives for Unit 2
9. Fast and Slow, Stop and Go Unit Test

3. High and Low, Loud and Soft

1. Notes on a Ladder
 - Identify, sing, and play C (do) on the Virtual Xylophone
 - Perform rhythmic patterns using ta, ti-ti, and sh/rest
 - Compose a one-note song for the Virtual Xylophone
2. High and Low
 - Differentiate sounds that are higher and lower in pitch in relation to each other
 - Identify, sing, and play D (re) on the Virtual Xylophone
 - Compose and perform a two-note melody on the Virtual Xylophone
3. Loud and Soft
 - Define and recognize changes in dynamics
 - Identify, sing, and play E (mi) on the Virtual Xylophone
 - Perform "Mary Had a Little Lamb" on the Virtual Xylophone
 - Compose and perform a three-note melody on the Virtual Xylophone
4. A Little Bit Loud
 - Recognize changes in dynamics
 - Identify, sing, and play F (fa) on the Virtual Xylophone
 - Perform a song on the Virtual Xylophone
 - Improvise a four-note melody on the Virtual Xylophone
5. A Little Bit Soft
 - Demonstrate changes in dynamics
 - Identify, sing, and play G (sol) on the Virtual Xylophone
 - Recognize dynamics differences in a classical rep composition
 - Sing and perform "Jingle Bells" on the Virtual Xylophone
6. Twinkle, Twinkle, Little Star
 - Demonstrate changes in dynamics
 - Identify, sing, and play A (la) on the Virtual Xylophone
 - Recognize dynamic, tempo, and pitch differences in a classical rep composition
 - Sing and perform "Twinkle, Twinkle, Little Star" on the Virtual Xylophone
 - Compare and contrast the same rhythmic pattern played on different pitches
7. A Full Scale
 - Demonstrate changes in dynamics
 - Identify, sing, and play B (ti) and C (do) on the Virtual Xylophone
 - Recognize dynamic, tempo, and pitch differences in a classical rep composition
 - Sing and perform "Three Blind Mice" on the Virtual Xylophone
 - Compose several songs using different pitches with the same rhythmic pattern
8. High and Low, Soft and Loud Unit Review
 - Review all previous concepts and objectives for Unit 3

9. High and Low, Soft and Loud Unit Test

4. **Music Around The World**

1. Starting a Trip Around the World
 - Describe beat, rhythm, tempo, dynamics, and the scale
 - Analyze a performance of "Are You Sleeping?"
 - Compose and perform a song about a sleeping animal
2. Rhythms of Latin America
 - Execute fine motor movement while performing rhythmic patterns on an instrument
 - Compare and contrast songs from different cultures using the same melody
 - Create a set of maracas
 - Improvise a rhythmic accompaniment to a song
3. Asian Music and Drama
 - Compare and contrast uses of a single melody in different cultures
 - Create a traditional Noh theatre mask
 - Perform a dance to traditional Japanese music
4. Exploring Europe
 - Describe how emotions are expressed through and connected to music
 - Identify the waltz beat
 - Compose and perform a melody for a waltz
5. Arriving in Australia
 - Identify instruments from various cultures
 - Build and create sounds with a didgeridoo
 - Compose and perform an original composition about an animal
6. African Music Adventure
 - Perform multiple rhythmic patterns over the same beat
 - Create a dance to a traditional African beat and instrument
7. Share Your Own Culture
 - Describe the student's family and culture
 - Compare and contrast various cultures
 - Compose and perform a song about the student's own culture
8. Unit Review
 - Review all previous concepts and objectives for Unit 4
9. Music Around the World Unit Test

Experiencing Music II

Experiencing Music II

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

This course is designed for students in grades K-2 and introduces basic components of music: melody and rhythm. Aligning to the National Core Arts Standards, the course teaches the student to explore an individual voice by creating beats and rhythms. In addition, the student will use critical listening skills to analyze music while participating in interactive experiences. With audio, visual, and interactive technologies, this course provides a unique and advanced learning experience.

1. Singing, Moving, and Shaking!

1. Music Is Everywhere!
 - Recognize the difference between everyday sounds and sounds that create musical pieces or songs
2. I Can Use Different Voices!
 - Discriminate between the four ways humans use the voice: calling, singing, speaking, and whispering
3. Beat or Rhythm?
 - Create and model the differences between a steady beat and a rhythm pattern
4. Putting It All Together!
 - Arrange rhythm, sound, and voice patterns and phrases to create an original song
5. Making a Melody
 - Arrange rhythm patterns and sounds to create an original song
6. I'd Like to Write a Song!
 - Compose a short composition using the elements of rhythm and melody
7. How Many Are Coming for Dinner?
 - Identify and categorize singers into a solo, duet, or chorale
8. I Can Sing!

- Recognize and understand how to sing properly using breath control
- 9. Singing, Moving, and Shaking! Unit Review
 - Review all previous concepts and objectives for Unit 1
 - Take the unit test
- 10. Singing, Moving, and Shaking! Unit Test
 - Review all previous concepts and objectives for Unit 1
 - Take the unit test

2. **A Musical Adventure!**

1. Seeing the Big Picture
 - Identify a few of the visual elements of basic music notation
2. Staircases in the House
 - Identify and show synthesis of steps and skips on the music staff through listening and visual exercises
3. Treasure Hunt
 - Review and accurately select music symbols
 - Compare music to a road map
4. Sol and Mi Buddies!
 - Demonstrate solfège pitches sol and mi by singing and signing them
5. A Maze of Melodies
 - Demonstrate solfège hand signs and recognize the pitches they represent
6. Rhythm
 - Design rhythms using pictorial symbols and direction placement
 - Demonstrate knowledge of short and long rhythms through illustration
7. Destination Island
 - Create a musical composition putting together all of the concepts learned so far
8. A Musical Adventure! Unit Review
 - Review all previous concepts and objectives for Unit 2.
 - Take the unit test
9. A Musical Adventure! Unit Test
 - Complete Unit 2 Test

3. **High, Low, Loud, Soft!**

1. How Low Can You Go?
 - Distinguish low sounds played by specific instruments of the orchestra through critical listening
2. Up, Up, and Away!
 - Distinguish aurally and describe high sounds played by instruments of the orchestra
3. Putting Them Together
 - Compare and contrast high and low sounds and select and categorize sounds into those two categories
4. Shh . . . Did You Hear That?
 - Examine how instruments make soft sounds
 - Relate soft sounds to high and low sounds as found in the orchestra
5. Quiet Down, It's Loud in Here!

- Identify how instruments make loud sounds
- 6. Which One Is It: Soft or Loud?
 - Diagram soft and loud songs using a graphic organizer
- 7. What's that Sound?
 - Demonstrate an understanding of instrument timbre
- 8. High, Low, Loud, Soft! Unit Review
 - Review all previous concepts and objectives for Unit 3
 - Take the unit test
- 9. High, Low, Loud, Soft! Unit Test
 - Assess unit skills and concepts

4. Sound Familiar?

1. You and Me in the USA: Music and Culture
 - Sing various folk songs from the United States
 - Identify steady beat and various rhythms in the songs
 - Examine and explore the culture of the United States by connecting American culture through literacy and music
2. China: Rhythms and Rhymes
 - Examine and explore the instruments of China and Chinese culture through literacy and music
 - Compare the differences between two songs from contrasting cultures
3. African Music and Culture
 - Use body percussion to perform rhythms in an African song
 - Recognize the difference between loud and soft sounds in an African folk song
 - Examine and explore the culture of Africa through literacy and music
4. We're Not That Different After All!
 - Summarize this unit by comparing and contrasting the three different cultures and songs from United States, China, and Africa
 - Synthesize previous music concepts from other units into this lesson including the following: high/low, loud/soft, short/long, and use of dynamic terms piano and forte
 - Critically listen and analyze three songs from around the world
5. Sound Familiar? Unit Review
 - Review all previous concepts and objectives for Unit 4
 - Take the unit test
6. Sound Familiar? Unit Test
 - Complete the Unit Test for Unit 4

Experiencing Music III

Experiencing Music III

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

This course is designed for students in grades K-2 and deepens the student's understanding of the roles musicians play in today's society. Aligning to the National Core Arts Standards, this course uses dynamic media to help the student discover a musical identity while expanding knowledge of the foundations of music. The student will apply foundational knowledge to different musical styles and literature. With audio, visual, and interactive technologies, this course provides a unique and advanced learning experience.

1. Creative Foundations

1. Making Music
 - Differentiate between music and sounds
 - Produce a steady beat
2. Get the Rhythm
 - Differentiate beat and rhythm
 - Play and sing a variety of rhythmic patterns
3. Quarter Notes
 - Identify notation for quarter notes
 - Identify quarter notes in audio
 - Play and sing quarter notes with a steady beat
 - Write notation for quarter notes
4. Two Eighths for a Quarter
 - Identify notation for eighth notes
 - Describe eighth notes in relation to quarter notes
 - Play and sing a variety of rhythmic patterns
 - Identify notation for a variety of rhythmic patterns
5. Two Quarters Make a Half
 - Identify notation for half notes
 - Describe half notes in relation to quarter notes
 - Play and sing a variety of rhythmic patterns
 - Write notation for a rhythmic pattern
6. Two Halves Make a...
 - Identify notation for whole notes

- Describe whole notes in relation to half, quarter, and eighth notes
 - Describe four-four time
 - Play and sing a variety of rhythmic patterns
7. A Short Stop or a Long Nap?
- Identify notation for rests
 - Describe rests in relation to lengths of time
 - Write notation for a variety of rhythmic patterns
 - Play a variety of rhythmic patterns
8. A Tree of Music
- Differentiate whole notes, half notes, quarter notes, and eighth notes on a note tree
 - Differentiate whole rests, half rests, and quarter rests on a note tree
9. Pitch Perfect
- Define pitch and melody
 - Identify steps and skips in a variety of melodies
 - Play a melody with steps and skips
10. A Musical Roller Coaster
- Identify ascending and descending motion in a variety of melodies
 - Analyze melodic contour in a variety of melodies
 - Sing and play a variety of melodic contours
11. Making Choices: Fast or Slow
- Describe tempo in musical composition
 - Interpret creative choices in compositions
 - Play a variety of rhythms with different tempos
12. Making Choices: Loud or Soft
- Describe dynamics in musical compositions
 - Interpret creative choices in compositions
 - Compose a song about weather
13. Creative Foundations Unit Review
- Review all previous concepts and objectives for Unit 1
14. Creative Foundations Unit Test
- 2. A Musician's Role**
1. Starting the Scale
- Demonstrate knowledge of solfège through hand signals
 - Correctly locate pitches on a scale
 - Play and sing melodies using do, re, and mi
2. Sol Fa Away
- Demonstrate knowledge of solfège through hand signals
 - Correctly locate pitches on a scale
 - Sing melodies using do, re, mi, fa, and sol
3. Back to the Start
- Demonstrate knowledge of solfège through hand signals
 - Correctly locate pitches on a scale
 - Play a melody using the full C-major scale
4. Creating Music

- Describe the role of a composer
 - Describe how a composer uses elements of music to communicate with others
 - Compose a melody for another person to perform
5. Taking the Stage
 - Describe the role of a performer
 - Analyze dynamic and tempo markings
 - Interpret and perform a melody according to dynamic and tempo markings
 6. Responding to Music
 - Describe the role of the listener
 - Compare and contrast the roles of composer, performer, and listener
 - Evaluate responses to music performances
 7. Exploring Context
 - Describe how context affects the way a composer, performer, and listener interpret music
 - Compose a piece of music to accompany a film
 8. Responding Through Composition
 - Analyze the context of a musical composition
 - Perform a musical composition
 - Compose a new piece in response to an existing one
 9. Composing and Performing
 - Describe elements of music
 - Compose and perform original music
 - Evaluate and revise a musical composition
 10. A Musician's Role Unit Review
 - Review all concepts and objectives for Unit 2
 11. The Musician's Role Unit Test
- 3. The Art of Music**
1. Making Music from Images
 - Describe how art influences music.
 - Evaluate how a composition evokes visual art.
 2. Music and Storytelling
 - Compare and contrast telling stories through words and telling stories through music.
 - Analyze a composition as it relates to and reflects a story.
 - Write a musical composition based on a story
 3. Dance to the Music
 - Describe the connection between dance and music
 - Compose music based on a type of dance
 4. If It Isn't Baroque...
 - Describe characteristics of Baroque art and music.
 - Compose and perform a melody with a set ostinato.
 5. A Love of Nature
 - Describe characteristics of Romantic art, music, and poetry
 - Compose a poem to accompany a selection of Romantic music
 6. Impressed with Impressionism
 - Describe characteristics of Impressionist art and music

- Compose and perform music inspired by Impressionist art

7. Express Yourself

- Describe characteristics of Expressionism
- Create Expressionist art
- Perform Expressionist music with a graphic score

8. Breaking the Mold

- Describe characteristics of Dadaism
- Create a collage expressing a reaction to Dadaist music

9. The Sounds of the Future

- Describe characteristics of Futurism
- Create a Futurist composition

10. Keeping Things Simple

- Describe characteristics of Minimalism
- Perform a Minimalist composition

11. Music in Response to Art

- Analyze a piece of visual art
- Create a musical composition inspired by visual art
- Evaluate personal work and artistic process

12. Creating Art in Response to Music

- Analyze a song's use of elements of music
- Create visual art inspired by a song
- Evaluate personal work and artistic process

13. The Art of Music Unit Review

- Review all concepts and objectives for Unit 3

14. The Art of Music Unit Test

4. Musical Cultures

1. Discovering Musical Culture

- Identify components of musical culture
- Describe the importance of studying music to preserve culture

2. Sharing Music the Old-Fashioned Way

- Describe characteristics of folk music
- Analyze a folk composition
- Play a folk song

3. Cool Jazz

- Describe characteristics of jazz
- Analyze a jazz composition
- Improvise rhythms around a jazz beat

4. Free Swinging Beats

- Describe characteristics of swing music
- Respond to swing music through dancing
- Play swing rhythms

5. Down with the Blues

- Describe characteristics of blues
- Analyze a blues composition

- Compose and perform a blues song to a beat
 - Perform a blues rhythm
6. Country Crooning
 - Describe characteristics of country music
 - Analyze a country music composition
 - Improvise a country song
 7. Rocking Out
 - Describe characteristics of rock music
 - Identify lead and rhythm guitar in rock music
 - Improvise with the voice over rock and roll rhythms
 8. Get the Beat with Hip-Hop
 - Describe characteristics of hip-hop music
 - Analyze a hip-hop composition
 - Compose and perform a hip-hop song
 9. Experimenting With Electronic Music
 - Describe characteristics of electronic music
 - Create an electronic music composition
 10. Your Musical Autobiography
 - Create a musical autobiography analyzing musical identity
 11. Musical Cultures Unit Review
 - Review all concepts and objectives for Unit 4
 12. Musical Cultures Unit Test

Exploring Music I

Exploring Music I

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Designed for students in grades 6–8, this course teaches fundamental musicianship skills approached from a Western-Classical style, while aligning to National Core Arts Standards. The course challenges the student to improve listening, notation, analysis, performance, and improvisation skills. With audio, visual, and interactive technologies, the course provides a unique and advanced learning experience for the student. Audio, visual, and interactive technologies, this course provides a unique and advanced learning experience.

1. Feel the Pulse

1. What Is Music?
 - Identify and define music and its components
 - Examine the various tools you will use to read, write, perform, and analyze music
 - Analyze musical elements in selected examples
2. Rhythmic Groove
 - Identify and define durational symbols of sound (notes)
 - Perform rhythmic patterns containing a variety of notes
 - Identify tools that assist musicians in performing music
3. Dividing Beats
 - Identify division of note duration
 - Perform rhythmic patterns containing eighth and sixteenth notes
4. Silence, Please!
 - Identify and define durational symbols of silence (rests)
 - Perform rhythmic patterns containing a variety of rests
 - Consider why a composer would use silence in a piece of music
5. Dots and Ties
 - Identify dots and ties and explain how they modify the duration of notes and rests
 - Describe syncopation and perform syncopated rhythms accurately
 - Compose, perform, and dictate rhythmic patterns containing dots and ties

6. What Time Is It?
 - Organize durational symbols into various time signatures.
 - Distinguish between duple, triple, and quadruple meter.
 - Analyze a single song in different time signatures.
7. Turn Up the Volume!
 - Identify and define terms and symbols relating to volume (dynamics) in music
 - Compare and contrast the way composers use dynamics to create a mood or atmosphere
 - Create a dynamic scheme for a familiar melody
8. Speed It Up a Little!
 - Identify and define terms of tempo
 - Aurally distinguish between various tempi
9. Feel the Pulse Review
 - Review all previous concepts and objectives for Unit 1
10. Feel the Pulse Unit Test
 - Identify and describe key words and concepts presented in Unit 1
 - Evaluate students' ability to apply skills and concepts presented in Unit 1

2. Building Blocks

1. Compositional Tools
 - Identify and describe some of the tools composers use to express ideas
 - Consider various career paths a composer might choose
 - Compare the emotional effect of melodies in the course repertoire
2. Notating Pitch
 - Define pitch
 - Describe the correlation between pitch and the piano keyboard
 - Identify treble clef
3. About the Bass
 - Describe the correlation between pitch and the piano keyboard
 - Identify bass clef
 - Identify the grandstaff
4. Stepping Up
 - Identify and define accidentals, enharmonics, and steps
 - Perform accidentals in compositions
5. Major Scales
 - Identify the structure of a major scale using whole steps and half steps
 - Compose a major scale using whole steps and half steps
 - Differentiate both aurally and visually between half steps and whole steps
6. Singing It
 - Identify and define solfège and its usage in writing music
 - Apply solfège syllables to major scales
7. Minor Scales
 - Identify the structure of minor scales in terms of whole steps and half steps
 - Compose minor scales using whole steps and half steps
 - Compare the musical character of melodies in different modes
8. What Is the Key?

- Identify major and minor key signatures
- Interpret key signatures in course repertoire correctly
- Analyze relationships between parallel and relative keys

9. Making Melodies

- Identify the components of a pleasing melody
- Identify and define phrase and cadence
- Analyze melodies in the course repertoire

10. Do It Yourself

- Understand and analyze the necessary components to construct a melody
- Compose a piece of music emphasizing melody

11. Texture

- Identify and define common types of musical texture
- Analyze various textures found in the course repertoire

12. Building Blocks Review

- Review all previous concepts and objectives for Unit 2

13. Building Blocks Unit Test

- Take the unit test

3. **What Is an Orchestra?**

1. What Is an Orchestra?

- Describe the orchestra
- Identify instruments and instrument families found in an orchestra
- Describe the role of a conductor
- Draw a seating chart for a modern orchestra

2. Strings

- Identify instruments that make up the string family
- Identify and describe sound production in string instruments
- Compare Western classical instruments to string instruments used in other cultures
- Aurally differentiate between high strings (violin) and low strings (cello or double bass)

3. Woodwinds

- Identify the instruments that make up the woodwind family
- Organize woodwind instruments according to sound production
- Critique the use of woodwind instruments in a composition

4. The Brass Family

- Identify instruments that make up the brass family and describe their sound production
- Aurally differentiate between high brass (trumpet) and low brass (trombone or tuba)
- Describe historical functions of brass instruments
- Compare the sound of a natural horn to that of a modern horn

5. The Percussion Family

- Identify instruments in the percussion family and describe their method of sound production
- Differentiate between pitched and nonpitched percussion
- Compare Western classical instruments to percussion instruments used in other cultures

6. Keyboard Instruments

- Identify instruments that make up the keyboard family and describe their history
- Compare the differences in sound production in various keyboard instruments (organ, harpsichord, piano)

- Support your opinion on having a piano play music originally written for harpsichord

7. Electronic Instruments

- Identify the history of electronic instruments
- Describe programming and how it is used in electronic instruments
- Identify the transformation of common devices into electronic instruments
- Discuss how today's computer technology could be applied to music composition

8. What Is an Orchestra? Review

- Review all previous concepts and objectives for Unit 3.

9. What Is an Orchestra? Unit Test

- Identify and describe the primary instruments and families within the orchestra
- Summarize the history of the orchestra and the families of instruments

4. **Time Travel**

1. Introduction to Music History

- Identify and describe the role of a musicologist
- Summarize the stylistic periods of Western classical music

2. Time to Sing

- Identify important composers and styles of the Renaissance
- Identify the parts of the Ordinary of the Mass
- Differentiate between sacred and secular music
- Compose a melody on a given text that demonstrates word painting

3. If It Ain't Baroque

- Identify and describe important elements of Baroque style
- Identify and define concerto grosso
- Draw a chart outlining the structure of a fugue

4. Bach Looms Large

- Identify the highlights of Bach's life and describe his contributions to music
- Compare and contrast Baroque opera and cantata

5. The Classical Period

- Identify important composers and styles of the Classical period
- Draw a diagram outlining sonata-allegro form

6. The Mozart Myth

- Identify highlights in Mozart's life and describe his musical contributions
- Compare and contrast characteristics of Baroque and Classical style

7. Beethoven

- Identify highlights of Beethoven's life and describe his contributions to music
- Give your appraisal of critics' remarks about Beethoven's Fifth Symphony

8. Isn't It Romantic?

- Identify important composers and styles of the Romantic era
- Analyze a Romantic lied for word painting

9. Entering the Twentieth Century

- Identify important composers and styles from the turn of the twentieth century
- Identify and define symphonic poem
- Compose a melody using a whole-tone scale

10. The Modern Period

- Identify important composers and styles from the early twentieth century
 - Discuss your thoughts on the future trends in music
11. Stylistic Composition Portfolio
- Compose a piece of music emphasizing melody
12. Time Travel Review
- Review all previous concepts and objectives for Unit 4
13. Time Travel Unit Test
- Take the Unit 4 test

Exploring Music II

Exploring Music II

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Designed for students in grades 6–8, this course reviews and expands fundamental musicianship skills approached from a Western-Classical style, while aligning to the National Core Arts Standards. The student will review and expand basic skills and concepts of rhythm and notation that were introduced in Exploring Music I. The student will use classic repertoire to analyze compositional style and improve listening, notation, analysis, performance, and improvisation skills. With audio, visual, and interactive technologies, the course provides a unique and advanced learning experience. Exploring Music I is a prerequisite for this course.

1. Cool Pulsations

1. Get Started
 - Examine ways in which music impacts your life
 - Demonstrate an understanding of the elements that make up music
 - Examine the various tools used to read, write, improvise, and perform music
2. Rhythm—It’s Everywhere!
 - Identify a variety of rhythmic patterns using whole notes, half notes, quarter notes, eighth notes, sixteenth notes, dotted notes, and corresponding rests
 - Compose a variety of rhythmic patterns using whole notes, half notes, quarter notes, eighth notes, sixteenth notes, dotted notes, triplets, and corresponding rests
 - Play and sing a variety of rhythmic patterns using whole notes, half notes, quarter notes, eighth notes, sixteenth notes, dotted notes, triplets, and corresponding rests
3. Dots and Ties
 - Identify the use of ties and dotted rhythms in select repertoire
 - Read, write, and perform music using ties, dotted rhythms, and syncopation
4. Meter—Make It Simple!
 - Distinguish between simple and compound meter
 - Compose and perform a variety of rhythmic patterns in a variety of meters

5. Say It This Way . . .
 - Identify a variety of tempo in music
 - Demonstrate an understanding of tempo vocabulary
 - Read and perform tempo variations in music
6. Speed It Up, Slow It Down
 - Identify ways in which tempo can change in a piece of music or within a given phrase of music
 - Identify ways in which dynamics can change in a piece of music or within a given phrase of music
 - Demonstrate tempo variations in performance
 - Demonstrate dynamic variations in performance
7. Cool Pulsations Unit Review
 - Review all previous concepts and objectives for Unit 1
8. Cool Pulsations Unit Test

2. **Absolute-ly**

1. Grand Staff
 - Review pitch fundamentals, including clefs and note names on the grand staff
 - Demonstrate reading pitches on the grand staff
2. Step Ladder
 - Review pitch fundamentals, including clefs and note names on the grand staff
 - Define half and whole step as it relates to piano keys
 - Aurally and visually determine the differences between whole and half steps
3. Major in This!
 - Identify the major scale pattern of whole steps and half steps
 - Construct major scales in various keys
 - Review the solfège system and syllables
 - Apply solfège syllables to the major scale
4. Minor Steps
 - Review the construction of a major scale
 - Review the minor scale pattern of half steps and whole steps
 - Differentiate between major and minor scales
 - Differentiate between the three forms of the minor scale
 - Describe a parallel minor scale and how it relates to the major scale
5. Find the Key
 - Differentiate and identify major and minor key signatures
 - Analyze key signatures in repertoire
6. Intervals
 - Identify intervals aurally and visually
 - Construct intervals above a given note
 - Analyze intervals in the melodies of course repertoire
7. Triads
 - Construct triads on each scale degree
 - Explain the importance of the tonic and dominant triads
 - Analyze selected triads in the course repertoire
8. Composition Portfolio
 - Compose an original melody

9. Absolute-ly Unit Review
 - Evaluate knowledge of musical concepts covered in this unit
10. Absolute-ly Unit Test

3. Stylistic Imprints

1. A Historical Journey
 - Explain the importance of studying music from a historical perspective
 - Examine how history has influenced the evolution of music over time
 - Understand the general characteristics and dates of Western classical style periods
2. Life and Times in the Middle Ages
 - Identify important musical styles and characteristics of music from the Medieval style period
 - Explain sociocultural practices that influenced the music in the Middle Ages
3. The Rebirth
 - Analyze music from the Renaissance style period
 - Identify important musical styles and characteristics of music from the Renaissance style period
 - Identify important composers from the Renaissance style period
4. Baroque Brilliance
 - Recognize sociocultural factors that influenced music from the Baroque style period
 - Identify important musical styles and characteristics of music from the Baroque style period
 - Identify important composers from the Baroque style period
5. Copy Me!
 - Identify fugal style and explain a fugue's main parts
 - Recognize parts of a fugue aurally
 - Learn important biographical information about Johann Sebastian Bach
 - Identify the harpsichord as an important Baroque keyboard instrument
6. It's Classic!
 - Recognize sociocultural factors that influenced music from the Classical style period
 - Describe the transitional elements from the Baroque style to Classical style
 - Identify important musical styles and characteristics of music from the Classical style period
7. The First Viennese School
 - Identify important composers from the Classical style period
 - Recognize the compositional styles of Franz Joseph Haydn, Wolfgang Amadeus Mozart, and Ludwig van Beethoven
 - Analyze works composed in the Classical period by different composers
8. Bold Expressions
 - Recognize sociocultural factors that influenced music from the Romantic style period
 - Describe the transitional elements from the Classical style to Romantic style
 - Identify important characteristics of music from the Romantic style period
 - Identify important composers from the Romantic style period
9. Impress Me
 - Identify important musical characteristics from the Impressionist style period
 - Identify important composers who wrote in the Impressionist style period
 - Compose a melody using the whole-tone scale
10. A New Sound
 - Identify characteristics of styles from the Modern period
 - Identify important composers from the Modern period, including some American composers

- Describe elements of ragtime style and its use in social settings

11. Stylistic Imprints Unit Review

- Review all previous concepts and objectives for Unit 3

12. Stylistic Imprints Unit Test

- Identify and describe key words and concepts presented in Unit 3
- Evaluate students' ability to apply skills and concepts presented in Unit 3 • Evaluate students' ability to apply skills and concepts presented in Unit 3

4. **Architecturally Sound**

1. Organize Your Music

- Memorize intervals visually and aurally

2. Bach: Brandenburg Concerto No. 5

- Examine Johann Sebastian Bach's Brandenburg Concerto No. 5 in D Major, BWV 1050, as a representative work of its historical period, identifying key elements that make it so
- Identify the key rhythmic, melodic, and harmonic elements of Bach's Brandenburg Concerto No. 5 and investigate their use as organizing principles

3. Mozart: The Magic Flute I

- Examine Wolfgang Amadeus Mozart's The Magic Flute as a representative work of its historical period, identifying key elements that make it so
- Identify the key, rhythmic, melodic, and harmonic elements of The Magic Flute and investigate their use as organizing principles

4. Mozart: The Magic Flute II

- Examine Wolfgang Amadeus Mozart's The Magic Flute as a representative work of its historical period, identifying key elements that make it so
- Identify the key rhythmic, melodic, and harmonic elements of The Magic Flute and investigate their use as organizing principles

5. Schubert: Piano Trio No. 1

- Examine Franz Schubert's Piano Trio No. 1 in B-flat Major, op. 99, D. 898, as a representative work of its historical period, identifying key elements that make it so
- Identify the key rhythmic, melodic, and harmonic elements of Schubert's Piano Trio No. 1 and investigate their use as organizing principles

6. Brahms: Piano Concerto No. 2

- Examine Johannes Brahms's Piano Concerto No. 2 in B-flat Major, op. 83, as a representative work of its historical period, identifying key elements that make it so
- Identify the key rhythmic, melodic, and harmonic elements of Brahms's Piano Concerto No. 2 and investigate their use as organizing principles

7. Composition and Analysis Portfolio

- Compose an original piece of music
- Provide an analysis of musical elements in original composition

8. Architecturally Sound Unit Review

- Review all previous concepts and objectives for Unit 4

9. Architecturally Sound Unit Test

Exploring Music III

Exploring Music III

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Designed for students in grades 6–8, this course enhances the student's knowledge of musical cultures as he or she discovers a musical identity. Aligning to the National Core Arts Standards, this course provides the student with engaging opportunities to combine musical knowledge with an exploration of different art forms to create new personal works. The student will apply foundational knowledge of music to a variety of musical styles and cultures. With audio, visual, and interactive technologies, this course provides a unique and advanced learning experience. Exploring Music I and Exploring Music II are prerequisites for this course.

1. Creative Foundations

1. Back to the Top
 - Identify what elements make up music
 - Describe different types of music and what makes them similar
 - Identify the role musicians play in society today and throughout history
2. Writing a Groovy Beat
 - Articulate and produce a steady beat
 - Differentiate between whole notes, half notes, quarter notes, eighth notes, and sixteenth notes in simple rhythms
 - Sing a variety of rhythmic patterns
 - Identify and compare time signatures
3. Silence Is Golden
 - Identify rhythmic notation for rests
 - Play and sing different rhythmic patterns that incorporate a variety of rests
4. Staff Meeting
 - Identify notes across multiple staves
 - Compose a variety of melodic patterns
5. One Step at a Time

- Identify the difference between whole and half steps
- Apply pertinent vocabulary in the appropriate context
- Design melodies aligned with guidelines

6. Major Keys

- Describe the qualities of major and minor scales
- Construct a scale based on its key signature
- Identify key signatures

7. Minor Keys

- Describe the qualities of minor scales
- Construct minor scales based on their key signature
- Transform a scale into its parallel major or minor

8. Making Melodies

- Identify tools composers use to create melodies
- Analyze the components of a compelling melody

9. Major League

- Create major chords using provided criteria
- Identify the three notes necessary to create a major chord

10. Minor Changes

- Create minor chords using provided criteria
- Identify the three notes necessary to create a minor chord
- Compare the tonal qualities of minor and major chords

11. In Harmony

- Compose diatonic chord progressions using major and minor chords
- Analyze the relationship between scales and chords

12. Musical Communication

- Analyze a composer's artistic intentions through a composition
- Demonstrate advanced composition techniques
- Create an original work including melody and harmony

13. Unit 1 Review

14. Unit 1 Test

2. A Musician's Role

1. Different Roles

- Describe the relationship among the composer, performer, and listener
- Identify and describe the specific role of the composer, performer, and listener

2. The Composer

- Describe the relationship between the composer and the listener
- State questions a composer might consider while composing music
- Compose a piece of music based on a select criteria

3. Understanding the Performer

- Identify and describe the role of the performer in the music community
- Compare performances given by different musicians and identify which element each musician altered to make each performance

4. The Listener

- Identify characteristics of an active listener

- Conclude which listening habits are characteristic of active listening
 - Use active listening skills to identify distinct characteristics and features of a piece of music
5. Composing Your World
 - Identify possible sources of inspiration
 - Analyze and appraise objects, people, and events in your own life as possible inspirations for music compositions
 6. Enhanced Listening
 - Evaluate a musical composition with select criteria
 - Analyze program music for musical elements used by a composer to portray the stated story or mood of the music
 7. A Musical Society
 - Assess and evaluate the value of music to multimedia projects
 - Attribute descriptions to musical passages based on given criteria
 8. Spontaneous Compositions
 - Compare and describe the differences and similarities between the music material from a non-improvised passage and an improvised passage in a song
 - Improvise melodies based on a select criteria
 9. Unit 2 Review
 10. Unit 2 Test

3. The Art of Music

1. You Be the Judge
 - Understand how to compare and contrast musical works across time periods
 - Evaluate a musical performance
2. Everyone's a Critic
 - Create a personal set of criteria for evaluating music
 - Evaluate musical performances based on a personal set objective and subjective criteria
3. Apples and Oranges
 - Describe similarities or differences between works across genres
 - Understand how genres and idioms are defined by characteristics
4. Tradition vs. Innovation
 - Identify factors that drive innovation in music
 - Compose a piece of music based on given criteria
 - Describe how technology shapes music
5. Movers and Shakers
 - Predict future changes in the practice of music
 - Identify contributions made by individual composers
 - Perform a period piece of music
6. Impressionism
 - Compare multiple forms of art from the same period
 - Describe characteristic traits within a given period
7. Modernism
 - Match composers with music characteristic of their era
 - Describe how music relates to world events
8. Popular Music

- Develop criteria for evaluating popular music
 - Identify works that are characteristic of modern popular music
9. Current Artistic Communities
- Describe how different artistic communities influence one another
 - Identify social contributions of artistic communities
 - Improvise melodies within given criteria
10. Technology in Music
- Compare and contrast current and older technology
 - Identify how technology influences the arts
11. Artistic Influence
- Evaluate artistic works from different fields
 - Compare musical works from different eras
12. Derivative Works
- Evaluate works from a variety of artistic disciplines
 - Create a derivative work
 - Identify ways in which the arts are connected
13. Unit Review
14. Unit Test
- 4. Musical Cultures**
1. Purpose of Music
- Understand and evaluate personal uses of music
 - Develop criteria for assessing purposes of music
2. Music and Culture
- Describe how the purpose of music differs across cultures
 - Identify how cultural traditions influence composers
3. Music and Language
- Identify the origin of a piece of music based on its characteristics
 - Describe how culture influences creative works
4. Folk Forms
- Describe similarities of instruments from different cultures
 - Create improvised melodies over a given chord progression
 - Identify cultures associated with pieces of music
5. A Shared Heritage
- Analyze instrument designs across cultures
6. Cultures Today
- Describe the relationship between art and society
 - Understand characteristics of different genres of music
7. Your Own Drum
- Develop criteria for assessing different musical works
 - Analyze what you like or dislike about a given musical work
8. The Future of Music
- Predict the course of future music
 - Relate current events to future outcomes
 - Identify the role technology plays in musical advancement

9. Musical Cultures Review

- Review the learning objectives for the unit

10. Musical Cultures Test

- Assess understanding of the objectives of the Unit.

Living Music I

Living Music I

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Designed for students in grades 9–12, this course teaches fundamental musicianship skills from a Western-Classical approach, while aligning to National Core Arts Standards. The course challenges the student to improve listening, notation, analysis, performance, and improvisation skills. With audio, visual, and interactive technologies, the course provides a unique and advanced learning experience for the student.

1. Keeping Time: Understanding Rhythm

1. Welcome to Music
 - Identify the components that make up music
 - Examine the various tools with which you will be learning how to read, write, improvise, perform, and analyze music
2. Measuring Time: Beats and Duration
 - Recognize and produce a steady beat
 - Identify and perform whole notes, half notes, and quarter notes
3. Measuring Time: New Notes
 - Identify and perform eighth notes and sixteenth notes.
4. Measuring Silence: Rests
 - Recognize and identify rest symbols for whole notes, half notes, quarter notes, eighth notes, and sixteenth notes
5. Grouping Beats
 - Demonstrate appropriate usage of time signatures (2/4, 3/4, 4/4, 6/8, 3/8, 2/2)
 - Illustrate ability to use notes and rests to create rhythmic compositions in various meters
6. Conducting Patterns and Tempo
 - Recognize the standard conducting patterns for 2/4, 3/4, 4/4, 2/2, and 6/8
 - Define standard tempo terms and apply them to music
7. Breaking the Pattern
 - Identify some of the ways composers use rhythm as an expressive tool

- Evaluate ways in which tempo can be altered within a piece
- 8. Dynamics
 - Define the primary dynamic markings and their abbreviations
 - Identify some of the ways in which composers use dynamics to create musical interest
 - Evaluate some of the differences in dynamic usage from one composer to another
- 9. Keeping Time: Understanding Rhythm Unit Review
 - Review all previous concepts and objectives for Unit 1
- 10. Keeping Time: Understanding Rhythm Unit Test

There are no objectives for this lesson.

2. **Keeping Score: Understanding Music Notation**

1. Introduction to Musical Notation
 - Identify some of the tools that composers use to sculpt music
 - Apply broad topics of articulation, harmony, intervals, and pitch to vocal performance
 - Analyze the effects of these variables on musical outcome
2. Pitch
 - Demonstrate understanding of the concept of pitch
 - Locate middle C and other pitches on the piano keyboard and on the staff in both treble and bass clef
 - Read from a multi-line score
3. Intervals
 - Label and construct basic intervals
 - Relate half steps and whole steps to the piano keyboard
 - Differentiate between stepwise and leaping motion
4. Major Scales and Key Signatures
 - Construct major scales in various keys
 - Use accidentals appropriately to create specific intervals
5. Minor Scales and More
 - Identify minor scales, whole tone scales, and chromatic scales
 - Build minor scales in various keys
 - Distinguish major from minor in written music and in aural examples
 - Define parallel and relative keys and recognize examples
6. Texture
 - Construct a melody, demonstrating understanding of contour, functions of key scale degrees, stepwise and leaping motion, and other principles of good melody-writing
7. Chords and Harmony
 - Describe, construct, and identify major triads on first, fourth, and fifth scale degrees
 - Describe and recognize arpeggios
 - Distinguish consonant chords from dissonant chords by ear
8. Phrases and Cadences
 - Define and recognize, and write cadences
 - Analyze common phrase structures
9. Themes and Forms
 - Define theme, binary, and ternary form

- Assess longer movement structures in terms of repetition and contrast
10. Finishing Touches: Ornamentation and Articulation
 - Label, differentiate, and explain some of the markings that composers use to indicate ornaments and articulation
 11. Composition Portfolio
 - Compose a 24-measure work that demonstrates understanding of phrasing, instrumentation, clefs, pitch, rhythm, cadences, texture, dynamics, articulation, and ornamentation
 12. Understanding Music Notation Unit Review
 - Review all previous concepts and objectives for Unit 2
 - Take the unit test
 13. Understanding Music Notation Unit Test
 - Evaluate student's knowledge and skill applying Unit 2 concepts
- 3. It's All Relative: The Musical Family Tree**
1. What Is an Orchestra?
 - Define the term orchestra
 - Identify the major instrument families and what defines each family
 - Summarize the role of the conductor
 - Define instrumentation and timbre
 - Reconstruct the standard orchestral seating chart by section
 2. The String Family
 - Examine the qualities of string instruments
 3. The Woodwind Family
 - Examine the qualities of woodwind instruments
 4. The Brass Family
 - Examine the qualities of brass instruments
 5. The Percussion Family
 - Examine the qualities and history of percussion instruments
 - Apply basic drumming techniques at home
 - Identify possible uses for home items as percussion instruments
 - Differentiate by sight and sound the major members of the percussion family and introduce auxiliary members of the family
 6. Keyboard Instruments
 - Reconstruct the history of the keyboard instruments, from harpsichord and clavichord to organ to piano
 - Evaluate their relationship to string and percussion families
 - Differentiate by sight and sound the major keyboard instruments
 7. Identification Portfolio
 - Apply previously learned notation-reading and ear-training skills to identify errors in a score and recording
 8. Chamber Music
 - Define ensemble and chamber music
 - Summarize some of the major types of chamber music ensembles: string quartet, woodwind quintet, brass quintet, percussion ensemble, sonata, piano trio
 9. The Musical Family Tree Unit Review

- Review all previous concepts and objectives for Unit 3

10. The Musical Family Tree Unit Test

There are no objectives for this lesson.

4. **The Big Picture: Music History and Styles**

1. The Study of Music
 - Describe some nonperformance jobs in music
 - Explain how composers have made a living over the last 500 years
2. Pre-Baroque and Baroque Periods
 - Understand elements of Renaissance music
 - Recognize and apply elements of Baroque style to performance and improvisation
 - Identify characteristics of Baroque composers, forms, and styles
3. Behold, the Beauty of Bach
 - Identify the style of a fugue and its parts
 - Analyze Johann Sebastian Bach's Fugue in G Minor, BWV 578
4. The Classical Period
 - Identify major composers, styles, and historical influences in the Classical period
 - Distinguish by ear and score-examination works composed in the Classical period
5. Mozart's Marvelous Melodies
 - Understand Mozart's Concerto for Clarinet in A Major as a representative work of Classical style
6. Beethoven's Revolutionary Writing
 - Demonstrate an understanding of late-Classical style and theme-and-variation form
 - Demonstrate an understanding of Beethoven's compositional style in Symphony No. 5 in C Minor, op. 67
7. The Romantic Period
 - Demonstrate an understanding of Romantic composers and their musical styles and forms
 - Construct a Romantic-style programmatic composition
8. Chopin's Lacy Lyricism
 - Analyze Chopin's Nocturne No. 2 in E-flat Major, op. 9, no. 2 from historical, theoretical, and performance perspectives
 - Describe the historical context in which Chopin's Nocturne No. 2 in E-flat Major, op. 9, no. 2 was written
9. Twentieth and Twenty-First Century Music
 - Identify major composers, styles, trends, and historical influences in twentieth century and twenty-first century music
 - Distinguish works composed in this era by ear and score-examination
10. Debussy's Desires and Dreams
 - Analyze Debussy's Prelude to the Afternoon of a Faun from historical, theoretical, and performance perspectives
 - Describe the historical context in which Debussy's Prelude to the Afternoon of a Faun was written
11. Stylistic Composition Portfolio
 - Compose a 24-measure work for 2-4 instruments
 - Demonstrate and apply knowledge of instrumental ranges, clefs, meters, and key signatures

- Explain compositional decisions in a paragraph-long essay
12. The Big Picture: Music History and Styles Review
- Review all previous concepts and objectives for Unit 4
13. The Big Picture: Music History and Styles Unit Test
- Evaluate student's knowledge and skill at applying Unit 4 concepts

Living Music II

Living Music II

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Designed for students in grades 9–12, this course enhances the student’s fundamental musicianship skills from a Western-Classical approach, while aligning to National Core Arts Standards. The student will review and deepen skills and concepts of rhythm and notation learned and practiced in Living Music I. Through the use of virtual tools and analysis of classic repertoire, the student will work to improve listening, notation, analysis, performance, and composition skills. With audio, visual, and interactive technologies, the course provides a unique and advanced learning experience for the student. Living Music I is a prerequisite for this course.

1. Inspired to Move

1. Getting Started
 - Explain the components that make up music
 - Examine the various tools with which you will be learning how to read, write, improvise, perform, and analyze music
 - Examine the role that music plays in your life
2. Rhythm: The Building Blocks
 - Identify, perform, and compose with a variety of rhythmic patterns including whole, half, quarter, eighth, sixteenth, and dotted notes, triplets, and corresponding rests
3. Meter: It's Simple!
 - Define meter and demonstrate appropriate usage of time signatures, with emphasis on cut time and compound meters
 - Illustrate ability to use notes and rests to create rhythmic compositions in various meters
 - Use and follow appropriate conducting gestures
4. Working Together: Texture Portfolio
 - Demonstrate understanding of rhythmic relationships in polyphonic textures
 - Perform a rhythmic pattern as part of a polyphonic texture
 - Compose music using polyphonic textures
5. Meter: Not So Simple
 - Explain the organization of beat groupings in irregular meters

- Identify the use of mixed meter in recorded examples
 - Sing and play irregular and mixed meters
6. Inspired to Move Unit Review
 - Review all previous concepts and objectives for Unit 1
 7. Inspired to Move Unit Test
 - Evaluate student's knowledge and skill applying Unit 1 concepts

2. Inspired to Relate

1. The Warm-Up Pitch
 - Recall and summarize key pitch concepts learned previously
 - Use previously acquired knowledge of pitch concepts in a variety of performance exercises
2. Intervals: Quantity and Quality
 - Identify intervals by number (or size) and quality, both visually and aurally
 - Aurally distinguish between intervals of different qualities (e.g., major sixth and minor sixth)
 - Read, write, and improvise using a wide variety of melodic and harmonic intervals
3. In Harmony: Triads
 - Visually identify chords by root, inversion, and quality
 - Aurally distinguish between chords of different qualities (e.g., major triad and minor triad)
 - Read, write, and improvise using major, minor, augmented, and diminished chords
4. Beyond Do, Re, Mi: All Sorts of Scales
 - Recognize and identify six scale types, both visually and aurally
 - Sing, play, improvise, and compose with six scale types
 - Explain the difference between the three types of minor scales
5. Unlocking Key Signatures
 - Recognize and apply all of the major and minor key signatures
 - Use the circle of fifths as a tool to identify major and minor key signatures
 - Explain the difference between relative and parallel keys
6. Not-By-Accidentals
 - Recognize and identify the use of accidentals within otherwise diatonic musical passages, both visually and aurally
 - Explain the difference between accidentals and sharps and flats within a key signature
7. Fully Functional
 - Identify diatonic chord functions, both visually and aurally
 - Correctly label and reproduce diatonic chord functions in musical notation
8. Conclusive Cadences
 - Identify the four major cadence types, visually and aurally
 - Explain the differences between the four cadence types and why they are used
9. Your Turn: Composition Portfolio
 - Compose a musical work that demonstrates understanding of the pitch concepts covered in this unit
10. Inspired to Relate Unit Review
 - Review all previous concepts and objectives for Unit 2
11. Inspired to Relate Unit Test
 - Evaluate student's knowledge and skill applying Unit 2 concepts

3. Inspired to Create

1. More than Entertainment: Functions of Music
 - Examine the many practical and aesthetic purposes that music has across cultures
 - Assess your own experience with the 10 functions of music
2. The Middle Ages and the Renaissance
 - Recognize the sociopolitical factors that influenced musical practices in the Middle Ages and the Renaissance, and describe their impact on music and the other arts
 - Describe Renaissance style traits in recorded musical examples
3. Baroque Grandeur I
 - Summarize musical styles, compositional techniques, and performance practices from the Baroque period
 - Recognize the sociopolitical factors that influenced musical practices in the Baroque period, and describe their impact on music and the other arts
 - Examine a representative work from the Baroque period and identify the influence of the doctrine of affections
4. Baroque Grandeur II
 - Summarize musical styles, compositional techniques, and performance practices from the Baroque period
 - Recognize the sociopolitical factors that influenced musical practices in the Baroque period, and describe their impact on music and the other arts
 - Explain why selected great composers are representative of the style period
5. The Enlightened Classical Spirit I
 - Summarize musical styles, compositional techniques, and performance practices from the Classical period
 - Relate Classical musical style to the values of Enlightenment philosophy
 - Explain why Wolfgang Amadeus Mozart is representative of the style period
6. The Enlightened Classical Spirit II: Composition
 - Summarize musical styles, compositional techniques, and performance practices from the Classical period
 - Compose a short aria with recitative
7. The Romantic Period: Not Just for Romance I
 - Summarize musical styles, compositional techniques, and performance practices from the Romantic period
 - Recognize the sociopolitical factors that influenced musical practices in the Romantic period, and describe their impact on music and the other arts
 - Identify Romantic style traits in the music of Felix Mendelssohn, Richard Wagner, and Johannes Brahms
8. The Romantic Period: Not Just for Romance II
 - Summarize musical styles, compositional techniques, and performance practices from the Romantic period
 - Recognize the sociopolitical factors that influenced musical practices in the Romantic period, and describe their impact on music and the other arts
 - Explain why Johannes Brahms and Pyotr Ilyich Tchaikovsky are representative of the style period
9. No Holds Barred: Music of the Twentieth Century
 - Recognize the sociopolitical factors that influenced musical practices in the twentieth century and describe their impact on music and the other arts
 - Compare and contrast twentieth-century music with the style periods that preceded it
 - Improvise a melody using the 12-tone method

10. Rise of the Jazz Cats
 - Describe the style traits of each of the major jazz types
 - Discuss jazz music as a reflection of American cultural values in the twentieth century
 - Explain why selected great composers are representative of the style period
11. Inspired to Create Unit Review
 - Review all previous concepts and objectives for Unit 3
12. Inspired to Create Unit Test
 - Evaluate knowledge and skill in applying unit concepts

4. Inspired to Understand

1. Introduction to Analysis
 - Identify key concepts and themes that will guide the analysis of selected repertoire
 - Explain the value of analytical practice as a facet of one's musicianship
2. Bach: Brandenburg Concerto No. 5 I
 - Examine Johann Sebastian Bach's Brandenburg Concerto No. 5 in D Major, BWV 1050, as a representative work of its historical period, identifying key elements that make it so
3. Bach: Brandenburg Concerto No. 5 II
 - Identify the key rhythmic elements of Johann Sebastian Bach's Brandenburg Concerto No. 5 in D Major, BWV 1050, and investigate their use as an organizing principle
 - Identify the key melodic and harmonic elements of Bach's Brandenburg Concerto No. 5 and investigate their use as an organizing principle
4. Bach: Brandenburg Concerto No. 5 III
 - Identify and perform key motives and themes from Johann Sebastian Bach's Brandenburg Concerto No. 5 in D Major, BWV 1050, and investigate their use as an organizing principle
 - Recognize the use of improvisation in Bach's Brandenburg Concerto No. 5 as a common practice of the Baroque period
5. Bach: Brandenburg Concerto No. 5 IV
 - Identify and perform key motives and musical ideas from Johann Sebastian Bach's Brandenburg Concerto No. 5 in D Major, BWV 1050, and investigate their use as an organizing principle
 - Recognize the use of Baroque dance rhythms in a piece of concert music
6. Mozart: The Magic Flute I
 - Examine Wolfgang Amadeus Mozart's The Magic Flute as a representative work of its historical period, identifying key elements that make it so
7. Mozart: The Magic Flute II
 - Recognize the use of secondary dominant chords in Wolfgang Amadeus Mozart's The Magic Flute and compose music using a secondary dominant
 - Interpret Mozart's setting of text to music to enhance its meaning
 - Identify formal structures in select arias from The Magic Flute
8. Mozart: The Magic Flute III
 - Recognize the influence of Enlightenment philosophy in Wolfgang Amadeus Mozart's and Emanuel Schikaneder's work
 - Compare musical elements of two pieces from The Magic Flute, and explain how they support the symbolism of the plot
9. Schubert: Piano Trio No. 1 I
 - Examine Franz Schubert's Piano Trio No. 1 in B-flat Major, op. 99, D. 898, as a representative work of its historical period, identifying key elements that make it so

- Identify the key themes of Schubert's Piano Trio No. 1 and investigate their use as an organizing principle
 - Identify ways in which Schubert departed from the use of traditional sonata form in his Piano Trio No. 1
10. Schubert: Piano Trio No. 1 II
- Recognize and perform examples of Franz Schubert's unconventional approach to tonality in Piano Trio No. 1 in B-flat Major, op. 99, D. 898
 - Identify the specific musical elements that express an emotional effect in the second movement
11. Schubert: Piano Trio No. 1 III
- Identify similarities between compositional techniques of composers from differing time periods
 - Recognize and describe the "joking" elements that a composer may use in a scherzo
12. Brahms: Piano Concerto No. 2 I
- Describe the musical and emotional characteristics of Johannes Brahms's Piano Concerto No. 2 in B-flat Major, op. 83
 - Recognize thematic development in the first movement of Brahms's Piano Concerto No. 2
13. Brahms: Piano Concerto No. 2 II
- Describe significant musical moments in Johannes Brahms's Piano Concerto No. 2 in B-flat Major, op. 83
 - Recognize and compose with the characteristics of a scherzo
14. Brahms: Piano Concerto No. 2 III
- Outline the formal structure of the fourth movement of Johannes Brahms's Piano Concerto No. 2 in B-flat Major, op. 83, through listening and score study
 - Implement a wide musical vocabulary to describe the characteristics of the piece
 - Summarize the movement's place as part of a larger work and as a representative work of the Romantic period
15. Inspired to Understand Unit Review
- Review all previous concepts and objectives for Unit 4
16. Inspired to Understand Unit Test

Cyber Charter School Application for Pennwood Cyber Charter School

**Binder #4: Appendix A.2.g – A.2.h; A.3; A.4
(Advanced Placement, Health & PE, and
Electives Course Guides; Materials List)**

Submission Date: October 3, 2022

Submitted By: Marc LeBlond

APPENDIX A CURRICULUM

A.2. COURSE GUIDES

g. ADVANCED PLACEMENT

This document is part of Appendix A: Curriculum.

It includes alignment documents for Advanced Placement classes for students.

- AP Biology
- AP Calculus
- AP Computer Science Principles
- AP English Language and Composition
- AP English Literature and Composition
- AP Environmental Science
- AP Human Geography
- AP Macroeconomics
- AP Microeconomics
- AP Psychology
- AP Statistics
- AP United States Government and Politics
- AP United States History

AP Biology

AP Biology Syllabus

Curricular Requirements	Page(s)
CR1 The teacher and students have access to college-level resources including a recently published (within the last 10 years) college-level textbook and reference materials in print or electronic format.	4
CR2 The course provides opportunities to develop student understanding of the required content outlined in each of the units described in the AP Course and Exam Description (CED).	10–32
CR3 The course provides opportunities to develop student understanding of the big ideas.	4–7
CR4 The course provides opportunities for students to develop the skills related to Science Practice 1: Concept Explanation.	5–6, 12, 14, 16–17, 19, 21, 24, 26–28, 30, 32
CR5 The course provides opportunities for students to develop the skills related to Science Practice 2: Visual Representations.	5–7, 12, 14, 16–17, 19, 21, 24, 26, 28, 30, 34
CR6 The course provides opportunities for students to develop the skills related to Science Practice 3: Questions and Methods.	6–7, 10, 12, 14, 16–19, 21, 24, 26–28, 30, 32, 34–35
CR7 The course provides opportunities for students to develop the skills related to Science Practice 4: Representing and Describing Data.	6–7, 14, 17, 21, 32–35
CR8 The course provides opportunities for students to develop the skills related to Science Practice 5: Statistical Test and Data Analysis.	5–7, 14, 18–19, 24, 26, 28, 30, 32–35

<p>CR9 The course provides opportunities for students to develop the skills related to Science Practice 6: Argumentation.</p>	<p>5, 19–20, 24, 26, 34</p>
<p>CR10 The course provides students with opportunities to apply their knowledge of AP Biology concepts to real-world questions or scenarios (including societal issues or technological innovations) to help them become scientifically literate citizens.</p>	<p>21, 24, 32–33</p>
<p>CR11 Students spend a minimum of 25% of instructional time engaged in a wide range of hands-on, inquiry-based laboratory investigations to support the learning of required content and development of science practice skills throughout the course. Students must conduct a minimum of two labs per big idea.</p>	<p>5–8, 10, 12, 14, 16–18, 20–21, 24, 26–28, 32, 34</p>
<p>CR12 The course provides opportunities for students to record and present evidence of their laboratory investigations.</p>	<p>5–7, 10, 12, 14, 16–18, 20–21, 24, 26–27, 32, 34–35</p>

Course Summary

In this course, the student will gain a foundation in the Life Sciences by focusing on four major themes: 1) how evolution drives the diversity and unity of life; 2) how life uses free energy to maintain homeostasis; 3) how living systems store, retrieve, transmit, and respond to information; and 4) how biological systems interact with each other. These themes are supported by a broad range of biological subdisciplines including biochemistry, molecular biology, cell biology, genetics, physiology, and ecology. The student will use practical experimentation to develop inquiry and reasoning skills to explore these themes throughout the course. This course effectively prepares the student for success on the AP[®] Biology exam by promoting the deductive reasoning and experimental interpretation skills emphasized in the AP curriculum.

Course Units

Semester A	Semester B
<ul style="list-style-type: none"> • Unit 1: Course Overview • Unit 2: Lab Safety, Equipment, and Scientific Methods • Unit 3: The Chemistry of Life • Unit 4: Biological Macromolecules Lab • Unit 5: The Cell (Structure and Function; Cell Communication) • Unit 6: Cell Structure Lab • Unit 7: Cell Cycle Lab • Unit 8: Mid-Semester Check • Unit 9: Metabolism (Cellular Energetics) • Unit 10: Cellular Respiration Lab (Cellular Energetics) • Unit 11: Photosynthesis Lab (Cellular Energetics) • Unit 12: Mitosis, Meiosis, and Inheritance (Heredity) • Unit 13: Mendelian Genetics Lab (Heredity) • Unit 14: Gene Expressions and Biotechnology (Gene Expressions and Regulation) • Unit 15: Biotechnology Lab • Unit 16: Semester Exam 	<ul style="list-style-type: none"> • Unit 1: Course Overview • Unit 2: Mechanisms of Evolution (Natural Selection) • Unit 3: Darwinian Evolution Lab • Unit 4: Phylogeny Lab • Unit 5: The Evolutionary History of Biological Diversity • Unit 6: Unicellular Organisms Lab • Unit 7: Multicellular Organisms Lab • Unit 8: Mid-Semester Check • Unit 9: Animal Form and Function • Unit 10: Digestion, Circulation, and Respiration Lab • Unit 11: Excretion and Nervous System Lab • Unit 12: Ecology • Unit 13: Ecology Lab • Unit 14: Review and Full-Length Practice Exam • Unit 15: Semester Project: Research Paper • Unit 16: Semester Exam

Resource Requirements [CR1]

Urry, L., Cain, M., Wasserman, S., Minorsky, P., and Jane Reece. *Campbell Biology*. 11th ed., Pearson Higher Education, 2016.

Advanced Placement Biology Content [CR3] Big Ideas

Big idea 1: The process of evolution drives the diversity and unity of life.

Activity:

Students will answer questions about the age of Earth and evolution. In addition, they will research and discuss the role of individuals, such as Charles Darwin, in evolutionary biology. [CR4, SP1]

Labs:

Darwinian Evolution Lab [CR5, CR8, CR9, CR11, CR12, SP2, SP4, SP5, SP6] Students will use models to demonstrate Hardy-Weinberg Equilibrium and natural selection in populations. They will use scientific theories to explain how small ecological changes can affect populations, communities, and ecosystems.

Phylogeny Lab [CR5, CR8, CR11, CR12, SP2, SP5, SP6]

Students will construct cladograms based on genetic evidence to demonstrate the evolutionary relationship among different organisms. They will analyze these data and explain how organisms diverged from one another.

Big idea 2: Biological systems utilize free energy and molecular building blocks to grow, to reproduce, and to maintain dynamic homeostasis.

Activity:

Students will draw the electron transfer chain and chemiosmosis. They will label the drawings appropriately. [CR5, SP2]

Labs:

Cellular Respiration Lab [CR5, CR6, CR11, CR12, SP2, SP3, SP5, SP6]

Students will use respirometers and the gas laws to measure the rate of cellular respiration of germinating pea seeds. They will develop a scientific question, plan and collect data, and use scientific theories to explain their data.

Photosynthesis Lab [CR5, CR6, CR11, CR12, SP2, SP3, SP5, SP6]

Students will indirectly measure the net rate of photosynthesis in leaf disks by floating leaf disk assay. Students will develop a scientific question; plan, collect,

and analyze data; evaluate evidence to identify the impact of environmental factors on photosynthesis rates; and use scientific theories to explain their data.

Big idea 3: Living systems store, retrieve, transmit, and respond to information essential to life processes.

Activity:

Students will create a stop-motion video or digital flipbook of the cell cycle. They will draw sketches of the events taking place in the G₁, S, and G₂ phases of interphase; draw a set of diagrams representing the events taking place during mitosis and cytokinesis; and compare their drawings to ones in *Campbell Biology*. [CR5, SP2]

Labs:

Mendelian Genetics Lab [CR4, CR5, CR7, CR11, CR12, SP1, SP2, SP5, SP6]

Students will use Punnett squares to perform monohybrid and dihybrid crosses. They will predict and calculate the probabilities of the genotypes and phenotypes of mice offspring and parents. They will explain their predictions using accepted theories of genetic inheritance.

Biotechnology Lab [CR5, CR6, CR11, CR12, SP1, SP2, SP3, SP5]

Students will investigate biotechnology methods and bioengineer a corn plant. They will use a simulation of DNA analysis to identify twin frogs and a simulation of genetic engineering to engineer a new corn plant. Students will also create an action plan for bioengineering their corn plant and a diagram of their genetically engineered plant.

Big idea 4: Biological systems interact, and these systems and their interactions possess complex properties.

Activity:

Students will find an ecosystem and identify types of organisms from each trophic level. They will create a flow chart for the ecosystem they chose. [CR5, SP2]

Labs:

Digestion, Circulation, and Respiration Lab [CR5, CR8, CR11, CR12, SP2, SP3, SP5, SP6]

Students will build a flowchart of the digestive system. They will analyze how the composition of blood changes through the circulatory system. They will measure their blood pressure and pulse, and determine how they are related to blood flow. Students will build a lung capacity estimator and use it to measure their lung capacity at rest and after exercise.

Ecology Lab [CR5, CR6, CR7, CR11, CR12, SP2, SP3, SP5]

Students will create a closed-model ecosystem and examine the presence of trophic structure and nutrient cycles in ecosystems. They will combine producers, consumers, and decomposers in a controlled aquatic ecosystem and determine how organisms are connected through trophic structure and nutrient cycling.

Students will also travel to field sites to document evidence of trophic structure and of the cycling of nutrients in nature.

Writing Assignments

In each lesson, students respond to questions about their textbook readings and other resources both within the online learning platform and in a notebook, as needed. Students will also complete a research paper based on a scientific study in which they create a hypothesis, plan out experimental methods, collect data, analyze data, and draw conclusions.

Laboratory Simulations [CR11, CR12]

The course is also structured around inquiry in the laboratory simulations and the use of the six science practices throughout the course.

Students will spend a minimum of 25 percent of this course participating in laboratory simulations/field studies. [CR11] Students will also maintain a portfolio throughout the course that documents all of their laboratory investigations. [CR12]

Science Practices

SP1: Concept Explanation

Explain biological concepts, processes, and models presented in written format.

SP2: Visual Representations

Analyze visual representations of biological concepts and processes.

SP3: Questions and Methods

Determine scientific questions and methods.

SP4: Representing and Describing Data

Represent and describe data.

SP5: Statistical Test and Data Analysis

Perform statistical tests and mathematical calculations to analyze and interpret data.

SP6: Argumentation

Develop and justify scientific arguments using evidence.

Assessments

Throughout the course, a variety of formative and summative assessments are used to assess student learning and prepare students for the expectations of the AP Biology exam. Students are provided with ample opportunity for skill practice, engagement in meaningful discourse with their peers, and application of their understanding via tasks that are representative of real-world scenarios. Summative assessment types lend themselves to a deeper level of rigor and include portfolios and discussions. Formative assessments are designed to be auto-graded to give students and teachers instant feedback for targeted instruction.

Most lessons contain a quick check assessment that covers the objectives in the lesson, and most units have at least one cumulative quiz that also assesses lesson objectives. Each instructional unit culminates in an online practice to help students review unit concepts and skills, followed by a unit test that consists of multiple choice and short answer and/or essay questions. To aid students in retaining content throughout the course of a semester, a mid-semester check unit appears in the middle of each semester, featuring a low-risk practice assessment covering the

objectives learned up to that point during the semester.

A graded full-length practice exam in the style of the AP Biology exam is given at the end of Semester B. Each semester ends with a semester exam.

Most units feature a discussion or portfolio that promotes critical thinking by expanding on topics students have learned. Each semester ends with a semester project and a semester exam. Graded assessments and participation all count toward the student's final grade.

Course Outline

Semester A

Unit 1: Course Overview [CR1, CR2]

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Ensure they have the required materials for the course. [CR1]
- Learn about the types of activities that will appear in the course.

Unit 2: Lab Safety, Equipment, and Scientific Methods [CR2, CR6, CR11, CR12, SP3, SP4]

In this unit, students will do the following:

- Understand and perform safe laboratory practices.
- Identify common laboratory equipment (e.g. graduated cylinder, beaker, flask, pipette, micropipette, Petri dish).
- State the four steps of a typical scientific method (observation, hypothesizing, experimentation, conclusion) and describe how they are employed.
- Define the independent and dependent variable in a given experiment and analyze what controls are needed to increase the validity of the experiment.
- Plan and carry out their own investigation using scientific methods.
- Record work in the Lab Safety, Equipment, and Scientific Methods Lab Report to

be submitted and graded by the teacher. Lab report

sections include the following:

- Make an Observation
- Ask a Question
- Formulate a Hypothesis
- Design and Conduct an Experiment
- Analyze Results
- Make a Conclusion

Sample activities in this unit:

- Students will perform a household experiment that will allow them to go through all steps of the scientific method (e.g., comparing absorbing ability among different paper towel brands). [CR6, CR11, CR12, SP3, SP4]
- Students will learn about the scientific method, laboratory equipment, and safety procedures. They will define the independent and dependent variable in a given experiment and analyze what controls are needed to increase the validity of the experiment. (CR6, CR11, CR12, SP3)

Unit 3: The Chemistry of Life [CR2, CR4, CR5, SP1, SP2]

In this unit, students will do the following:

- Differentiate the chemical elements found in living things and how they assemble to form larger molecules.
- Explain how the properties of water and carbon make them essential to life.
- Compare the four classes of biological macromolecules and describe their functions.

Sample activities in this unit:

- Students will use representations and models to represent the molecular bonds that hold important biological molecules together, including carbohydrates, proteins, lipids, and nucleic acids. (LO 4.1, LO 4.2, LO 4.3) [CR5, SP2]
- Students will participate in a discussion about how the same repeating molecular units can produce a large number of varied structures among different organisms. (LO 1.15, LO 1.16) [CR4, SP1]

Unit 4: Biological Macromolecules Lab [CR2, CR4, CR6, CR11, CR12, SP1, SP3]

In this unit, students will do the following:

- Differentiate between biological macromolecules using biochemical assays.
- Explain and simulate the dehydration synthesis of biological macromolecules.
- Record work in the Biological Macromolecules Lab Report to be submitted to the teacher. Lab

report sections include the following:

- Complete table to identify nutrients.
- Build a glucose molecule and dehydrate then hydrate the molecule. Sample

activities in this unit:

- Students will perform two laboratory simulations to investigate biological macromolecules.
 - a. Students will use representations and models to simulate the dehydration synthesis of carbohydrate polymers.
 - b. Students will plan and implement data collection strategies to use qualitative tests to identify unknown biological macromolecules
- *Science practice skills applied:* 1, 3, 4 [CR11, CR12]
- *Enduring understandings:* 4.A, 4.C

Unit 5: The Cell [CR2, CR4, CR5, SP1, SP2, SP3]

In this unit, students will do the following:

- Describe the current definition of a cell, based on cell theory.
- Describe the structure and function of cell membranes.
- Explain how cells transport materials through their membranes using passive transport (diffusion), facilitated diffusion, active transport, and bulk transport.
- Describe the major cell organelles and subcellular structures in prokaryotic and eukaryotic (plant and animal) cells and state the function of each.
- Explain the steps by which cells respond to internal and external signals. Sample activities

in this unit:

- Students will apply cell theory and its implications for defining life, as well as the difference between cell functions in unicellular versus multicellular

organisms. (LO 4.8, LO 4.9, LO 4.10). [CR4, SP1]

- Students will create, analyze and refine models of cell signaling systems and then generate scientific questions involving the evolution of cell signaling systems. (LO 3.31, LO 3.32, LO 3.33) [CR5, SP2, SP3]

Unit 6: Cell Structure Lab [CR2, CR4, CR5, CR6, CR7, CR8, CR11, CR12, ,SP1, SP2, SP3, SP4, SP5]

In this unit, students will do the following:

- Identify subcellular structures found in cells.
- Apply the scientific method to explain the behavior of large and small molecules partitioning across a semipermeable membrane.
- Record work in the Cell Structure Lab report to be submitted to the teacher. Lab sections include the following:
 - Cell Structure Table
 - Reading percent concentration table
 - Reading percent concentration graph
 - Build physical model of cell

Sample activities in this unit:

- Students will perform two laboratory simulations to investigate cell structures and function.
 - a. Students will use models to represent the different organelles and subcellular components of the cell and identify their function.
 - b. Students will engage in scientific questioning and plan, collect, and analyze data to explain their observations about osmosis, and to predict when osmosis will occur.
 - *Science practice skills applied:* 1, 2, 3, 4, 5 [CR 2, 4, 5, 6, 7, 8, 11, 12]
 - *Enduring understandings:* 2.B, 4.A, 4.C [SC 3b, 3d]

Unit 7: Cell Cycle Lab [CR2, CR4, CR5, CR6, CR11, CR12, SP1, SP2, SP3]

In this unit, students will do the following:

- Describe what characterizes each stage of the cell cycle.
- Describe what characterizes each stage of mitosis.
- Explain the consequences of cellular reproduction that is unregulated.
- Record work in the Cell Cycle Lab report to be submitted to the teacher. Lab

sections include the following:

- Cell Division Phase sketches and summary table.
- Cell cycle phase length table
- Mitosis and Meiosis Modeling
- Simulating Meiosis

Sample activities in this unit:

- Students will participate in a lab simulation in which they use representations and models to communicate what occurs during the cell cycle. They will use scientific explanations and theories to explain what occurs during cancer, in terms of errors in controlling the cell cycle.
 - *Science practice skills applied:* 1, 2, 3 [CR 2, 4, 5, 6, 11, 12]
 - *Learning objectives applied:* 3.7, 3.8

Unit 8: Mid-Semester Check [CR2]

In this unit, students will do the following:

- Review the topics that they have learned from the beginning of the course.
- Demonstrate knowledge by completing a graded mid-semester check in the style of the AP Biology exam.

Unit 9: Metabolism [CR2, CR4, CR5, CR6, CR7, SP1, SP2, SP3, SP4]

In this unit, students will do the following:

- Explain how cells use free energy during metabolism to maintain homeostasis.
- Differentiate anaerobic respiration from aerobic respiration and describe the processes that occur in each.
- Compare photosynthesis to cellular respiration and explain the processes that occur in each.

Sample activities in this unit:

- Students will use models to represent cellular respiration and photosynthesis, ask scientific questions regarding the functioning and evolution of cellular respiration and photosynthesis, and design and interpret experiments regarding the products and reactants of respiration and photosynthesis. (LO 2.4, LO 2.41, LO 2.5, LO 4.6) [CR5, CR6, SP2, SP3]
- Students will participate in a discussion about why cells need energy to function and how that energy is taken in, transported, and consumed. (LO 2.5, LO 4.5, LO 4.6)[CR4, SP1]
- Students will complete an activity to show how there are a number of factors that can affect the rate of an enzyme-facilitated reaction. They will graph the number of toothpicks broken as a function of time. [CR7, SP4]
- Students will label the reactants, the products, and the activation energy on a graph of a chemical reaction. They will label the reactants with a plus or a minus to indicate energy level at the completion of the reaction and will identify the reaction as exergonic or endergonic. [CR7, SP4]
- Students will research other examples of fermentation and anaerobic respiration and will compare and contrast each of these examples with aerobic respiration. [CR4, SP1]
- Students will perform an experiment to demonstrate the cellular respiration process. [CR6, SP3]
- Students will model the Calvin cycle and use the model to explain the Calvin cycle's role in photosynthesis. (CR4, CR5, SP1, SP2)

Unit 10: Cellular Respiration Lab [CR2, CR6, CR11, CR12, SP3, SP4, SP6]

In this unit, students will do the following:

- Apply the scientific method to explain the production of gases during respiration.
- Record work in the Cellular Respiration Lab report to be submitted to the teacher.

Lab sections include:

- Form hypothesis.
- Respirometer readings table
- Results
- Conclusion

Sample activities in this unit:

- Students will participate in a laboratory simulation in which they measure the rate of cellular respiration of living organisms. They will develop a scientific question, plan and collect data, and use scientific theories to explain their data.
 - *Science practice skills applied:* 3, 4, 6 [CR 2, 6, 11, 12]
 - *Learning objectives:* (2.4, 2.41, 2.5, 4.6)

Unit 11: Photosynthesis Lab [CR2, CR6, CR8, CR11, CR12, SP3, SP4, SP5, SP6]

In this unit, students will do the following:

- Apply the scientific method to explain the production of gases during photosynthesis.
- Record work in the Photosynthesis Lab report to be submitted to the teacher. Lab sections include the following:

- Preliminary Floating Disk table
- Scientific Method steps

Sample activities in this unit:

- Students will participate in a laboratory simulation in which they measure the rate of photosynthesis of living organisms. They will develop a scientific question, plan and collect data, analyze data, and use scientific theories to explain their data.
- Students will measure the rate of photosynthesis of living organisms. They

will develop a scientific question, plan and collect data, analyze data, and use scientific theories to explain their data.

- *Science practice skills applied:* 3, 4, 5, 6 [CR 2, 6, 8, 11, 12]
- *Learning objectives:* (2.4, 2.41, 2.5, 4.6)

Unit 12: Mitosis, Meiosis, and Inheritance [CR2, CR4, CR5, CR9, SP1, SP2, SP6]

In this unit, students will do the following:

- Describe the steps involved in cellular reproduction.
- Differentiate between meiosis and mitosis and explain how it results in genetic variation.
- Analyze the chromosomal basis of inheritance and explain how it leads to Mendelian patterns of inheritance.

Sample activities in this unit:

- Students will construct models to show how meiosis transfers information to the next generation. (LO 3.10, LO 3.11, LO 3.12, LO 4.5, LO 4.6) [CR4, CR5, SP1, SP2]
- Students will apply mathematical models to validate Mendelian genetic theory and predict genotypic and phenotypic ratios in Mendelian and non- Mendelian inheritance systems. (LO 3.14) [CR5, CR9, SP2, SP-6]
- Students will discuss the benefits versus the harmful effects of telomerase expression. They will research and write an essay explaining their position on the topic. [CR9, SP6]

Unit 13: Mendelian Genetics Lab [CR2, CR5, CR6, CR8, CR9, CR11, CR12, SP2, SP5, SP6]

In this unit, students will do the following:

- Predict the genotype and phenotypes of parents and offspring using Punnett squares from one- and two-trait Mendelian crosses.
 - Perform Punnett square analysis for non-Mendelian genes, such as codominant, incomplete dominant, and X-linked traits.
 - Record work in the Mendelian Genetics Lab report to be submitted to the teacher.
- Lab sections include the following:

- Monohybrid Punnett square

- Genotype and phenotype ratio table
- Dihybrid Punnett square

Sample activities in this unit:

- Students will participate in a laboratory simulation in which they use Punnett squares to calculate the genotype of offspring and parents. They will explain their predictions using accepted theories of genetic inheritance.
 - *Science practice skills applied:* 2, 6 [CR 2, 5, 6, 8, 9, 11, 12]
 - *Learning objectives:* 3.2, 3.3

Unit 14: Gene Expressions and Biotechnology [CR2, CR4, CR5, CR6, CR7, SP1, SP2, SP3, SP4]

In this unit, students will do the following:

- Describe the steps of transcription and translation.
- Define gene regulation and describe where, when and how gene expression is controlled within cells.
- Compare how different genes are expressed and regulated among prokaryotes and eukaryotes.
- Define mutation and describe how it can affect the evolution of a population.
- Apply biotechnological techniques to bioengineering problems. Sample

activities in this unit:

- Students will plan a procedure for a genetic transformation using plasmids or other modern biotechnological technique, as well as a data collection plan, which will provide evidence that the transformation was successful. (LO 3.1, 3.3, 3.5, 3.6, 4.7) [CR6, CR7, SP3, SP4]
- Students will research the evolution of a gene family and write a brief essay explaining what gene duplication and mutation events led to the divergence of the gene family. Students will create a chart listing the different ways that genomes can vary and summarizing what they know about each. [CR4, CR5, SP1, SP2]

Unit 15: Biotechnology Lab [CR2, CR6, CR10, CR11, CR12, SP3]

In this unit, students will do the following:

- Apply the scientific method to identify genetically similar organisms using simulated biotech methods such as restriction enzyme analysis of DNA and gel electrophoresis.
- Describe the methods and social issues involved with bioengineering techniques using simulations, such as genetic engineering techniques used to create insect or herbicide-tolerant plants.
- Design engineering solutions to bioengineering problems.
- Record work in the Biotechnology Lab report to be submitted to the teacher.

Sample activities in this unit:

- Students will participate in a laboratory simulation in which they use restriction enzymes to identify genetically related individuals and create a strategy to engineer genetically-transformed corn plants.
 - *Science practice skills applied:* 3[CR 6, 10, 11, 12]
 - *Enduring understandings:* 3.B, 3.C

Unit 16: Semester Review and Exam [CR2]

In this unit, students will do the following:

- Review all topics covered this semester.
- Demonstrate knowledge by completing a graded semester exam written in the style of the AP Biology exam.

Semester B

Unit 1: Course Overview [CR1, CR2]

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Ensure they have the required materials for the course. [CR1]
- Learn about the types of activities that will appear in the course.

Unit 2: Mechanisms of Evolution [CR2, CR4, CR5, CR8, CR10, SP1, SP2, SP5]

In this unit, students will do the following:

- Analyze how environmental factors can affect gene frequency in a gene pool.
- Compare the conditions that can result in speciation.
- Critique scientific hypotheses regarding the origin of life on Earth and reconcile these hypotheses to current understanding of phylogeny.

Sample activities in this unit:

- Students will use mathematical models to understand how populations change and will apply the mechanisms of evolution to explain these observations. (LO 1.1, LO 1.2, LO 1.3, LO 3.24) [CR4, CR5, SP1, SP2]
- Students will engage in a discussion on the societal issues related to evolutionary theory and its common misconceptions. [CR10]
- Students will explain how to use the Hardy-Weinberg equation to determine if a population is evolving. [CR8, SP5]

Unit 3: Darwinian Evolution Lab [CR2, CR5, CR6, CR8, CR9, CR11, CR12, SP3, SP5, SP6]

In this unit, students will do the following:

- Apply Hardy-Weinberg equilibrium and the mechanism of evolution to predict changes in the allele frequency of a simulated population during periods of equilibrium and selection.
- Record work in the Darwinian Evolution Lab report to be submitted to the teacher. Lab sections include the following:

- Rainfall and Bird Beak histogram
- Finch population graph
- Beak size graph
- Hardy-Weinberg Equilibrium table

Sample activities in this unit:

- Students will participate in a laboratory simulation in which they use models to demonstrate Hardy-Weinberg Equilibrium. They will then use Hardy-Weinberg Equilibrium to test for the presence of natural selection occurring in populations. They will analyze data and use scientific theories to explain how small ecological changes can affect populations, communities, and ecosystems.
 - *Science practice skills applied:* 3, 5, 6 [CR 5, 6, 8, 9, 11, 12]
 - *Learning objectives:* 1.1, 1.2, 1.3, 3.24

Unit 4: Phylogeny Lab [CR2, CR5, CR6, CR8, CR9, CR11, CR12, SP2, SP3, SP5, SP6]

In this unit, students will do the following:

- Use evidence from the comparison of DNA sequences through BLAST to deduce evolutionary relationships between organisms.
- Record work in the Phylogeny Lab report to be submitted to the teacher. Lab sections include the following:
 - Construct a cladogram
 - Compare percent similarity
 - Form hypothesis
 - Analyze cladograms

Sample activities in this unit:

- Students will participate in a laboratory simulation in which they construct cladograms based on genetic evidence to demonstrate the evolutionary relationship between different organisms. They will analyze these data and, applying the theory of evolution, explain how organisms diverged from each other.
 - *Science practice skills applied:* 2, 3, 5, 6 [CR 5, 6, 8, 9, 11, 12]
 - *Learning objectives:* 1.11, 1.12, 1.13, 1.17, 1.18, 1.19

Unit 5: The Evolutionary History of Biological Diversity [CR2, CR4, SP1]

In this unit, students will do the following:

- Compare organisms across the three domains of life and explain why viruses do not fit any of these classifications.
- Distinguish prokaryotes from each other and unicellular eukaryotes.
- Categorize eukaryotes into kingdoms and identify similarities and differences that exist within a kingdom.

Sample activities in this unit:

- Students will examine how organisms are classified and analyze those classifications to deduce the evolutionary history of groups of organisms. (LO 1.11, LO 1.12, LO 1.13, LO 1.16) [CR4, SP1]

Unit 6: Unicellular Organisms Lab [CR2, CR4, CR6, CR11, CR12, SP1, SP3]

- Explain the unity of life and diversity of life by observing and comparing similarities between bacteria.
- Record work in the Unicellular Organisms Lab report to be submitted to the teacher. Lab sections include the following:
 - Test table
 - Recording experiment results in table
 - Classify living organisms

Sample activities in this unit:

- Students will observe prokaryotic and eukaryotic unicellular life using virtual microscopy. They will identify traits that are common to all life, prokaryotes and eukaryotes, and they will identify differences that demonstrate the diversity of life in the biosphere.
 - *Science practice skills applied:* 1, 3 [CR 4, 6, 11, 12]
 - *Learning objectives:* 1.11, 1.12 1.13, 1.16

Unit 7: Multicellular Organisms Lab [CR2, CR4, CR6,

CR11, CR12, SP1, SP3]

In this unit, students will do the following:

- Explain the unity of life and diversity of life by observing and comparing similarities between phyla of multicellular organisms.
- Record work in the Multicellular Organisms Lab report to be submitted to the teacher. Lab sections include the following:
 - Traits of Different Phyla table
 - Classification of Multicellular Organisms table Sample

activities in this unit:

- Students will participate in a laboratory simulation in which they observe representative organisms from across multicellular phyla given 3–4 representative images of each phylum. They will then use the theory of common descent to explain the wide variety of organisms found at all scales in the biosphere.
 - *Science practice skills applied:* 1, 3 [CR 4, 6, 11]
 - *Learning objectives:* 1.11, 1.12 1.13, 1.16

Unit 8: Mid-Semester Check [CR2]

In this unit, students will do the following:

- Review the topics that they have learned from the beginning of the course.
- Demonstrate knowledge by completing a graded mid-semester check in the style of the AP Biology exam.

Unit 9: Animal Form and Function [CR2, CR4, CR5, CR6, CR8, SP1, SP2, SP3, SP5]

- Describe animal physiology and analyze how animals are adapted to their niches on Earth.
- Analyze how the digestive, circulatory, respiratory, immune, excretory, and endocrine systems interact to maintain homeostasis in animals.
- Explain how animals develop and utilize common signaling pathways in their development.
- Compare behavior among different animals and explain how behavior arises in animals through electrochemical signaling in the nervous system.

Sample activities in this unit:

- Students will engage in scientific questioning on the structure, function, and evolution of animal tissues, organs, and organ systems. (LO 4.8) [CR4, CR6, SP1, SP3]
- Students will use representations and models to analyze the structure and function of animal tissues, organs, and organ systems. (LO 4.9) [CR5, SP2]
- Students will analyze physiological processes mathematically and make predictions about how an organism's physiological state can change due to external influences. (LO 4.9) [CR4, CR8, SP1, SP5]

Unit 10: Digestion, Circulation, and Respiration Lab [CR2, CR4, CR5, CR6, CR7, CR8, C11, C12, SP1, SP2, SP3, SP4, SP5]

In this unit, students will do the following:

- Explain how the cells, tissues, and organs of the digestive system extract nutrients from food.
- Apply the scientific method to explain how the cells, tissues, and organs of the circulatory system respond to stress.
- Explain how the cells, tissues, and organs of the respiratory system transport gases.
- Record work in the Digestion, Circulation, and Respiration Lab report to be submitted to the teacher. Lab sections include the following:
 - Calculate volume of air
 - Formulate hypothesis
 - Create flowchart

- Write an essay

Sample activities in this unit:

- Students will participate in a laboratory simulation in which they use models and engage in scientific questioning to study the digestive, cardiovascular, and respiratory systems. They will plan, collect, and analyze data to explain physiological phenomena relating molecular processes to macroscopic organ systems. If accessible, students will participate in a cow heart dissection.
 - *Science practice skills applied:* 1, 3, 4, 5 [CR 4,5,6, 7, 8, 11, 12]
 - *Enduring understandings:* 2.A, 2.B, 2.C, 2.D, 2.E, 3.E, 4.A

Unit 11: Excretion and Nervous System Lab [CR2, CR4, CR6, CR7, CR8, CR11, CR12, SP1, SP3, SP4, SP5]

In this unit, students will do the following:

- Describe how the cells, tissues, and organs of the excretory system explain the composition of urine.
- Describe how the cells, tissues, and organs of the nervous system explain how humans perceive and respond to their environment.
- Record work in the Excretion and Nervous System Lab report to be submitted to the teacher. Lab sections include the following:
 - Senses table
 - Senses Neural map
 - Taste Receptor Density table
 - Smell Discrimination table
 - Two-Point Discrimination table
 - Localization of Sound table
 - Blind Spot table
 - Liquid Excretory System map
 - Urinalysis Lab table

Sample activities in this unit:

- Students will participate in a laboratory simulation in which they study ways by which the brain perceives the world and how wastes are eliminated by the kidneys. They will plan, collect, and analyze data to explain physiological phenomena relating molecular processes to macroscopic organ systems. They will complete the following sensory system exercises: taste threshold,

smell discrimination, two-point discrimination, thermal adaptation, localization of sound, proprioception, blind spot, visual acuity, astigmatism, myopia/hypermétropia, accommodation, and afterimages.

- *Science practice skills applied:* 1, 3, 4, 5 [CR 4, 6, 7, 8, 11, 12]
- *Learning objectives:* 3.40, 3.43, 3.44-3.49 4.8, 4.9

Unit 12: Ecology [CR2, CR4, CR7, CR8, CR10, SP1, SP4, SP5]

In this unit, students will do the following:

- Explain how individual interactions among organisms result in changes in populations.
- Explain how different populations interact in communities and ecosystems.
- Analyze the benefits and costs of strategies used to preserve ecosystems. Sample activities

in this unit:

- Students will use mathematics to model ecosystem interactions and collect and evaluate data to relate knowledge regarding matter and energy cycling across various ecological scales. (LO 4.11, LO 4.12, LO 4.13, LO 4.14, LO 4.15) [CR4, CR7, CR8, SP1, SP4, SP5]
- Students will participate in a discussion about human impact on the ecosystem, ecosystem services, and natural resource use. [CR10]
- Students will chart population growth in a set area over a set period of time for 1) amoebas in Lake Erie (r-selected) and 2) panthers in the Everglades (K-selected) and include information about the factors leading to changes in those populations. [CR7, SP4]

Students will practice calculating changes in population size by substituting sample numbers into a formula. [CR8, SP5]

Unit 13: Ecology Lab [CR2, CR5, CR6, CR9, CR11, CR12, SP2, SP3, SP6]

In this unit, students will do the following:

- Describe the ecological relationships present in natural ecosystems by creating a model ecosystem.
- Apply the scientific method to observe the cycling of matter in an actual ecosystem during a field walk.
- Record work in the Ecology Lab report to be submitted to the teacher. Lab sections include the following:
 - Recording data and observations
 - Complete field journal
 - Create nutrient and food chain diagrams Sample

activities in this unit:

- Students will participate in a laboratory simulation in which they observe a natural ecosystem and build a model ecosystem. They will engage in scientific questioning and apply scientific explanations to explain observations they make in the field.
 - *Science practice skills applied:* 2, 3, 6 [CR 5, 6, 9, 11, 12]
 - *Learning Objectives:* 4.13, 4.16

Unit 14: Semester Review and Full-Length Practice Exam [CR2, CR9, SP6]

In this unit, students will do the following:

- Review the entire course, using the results of the mid-semester check and unit tests to focus this review.
- Complete a full-length practice exam in the style of the AP Biology exam, over the course of three days.
- Students will explain how they feel about genetically modified organisms (GMOs) in grocery stores. They will use evidence to explain whether they feel safe consuming GMOs and if and how they would change governmental regulations on GMOs. (CR9, SP6)

Unit 15: Semester Project: Research Paper [CR2, CR6, CR7, CR8, CR12, SP3, SP4, SP5]

In the project unit, students will plan and carry out their own scientific observation using household materials or a local field area. They will create a project proposal that describes their hypothesis and their proposed experimental methods. They will then carry out their experiment inside or in the field. They will collect data and then analyze that data for trends, as well as present the data in the form of graphs or tables. They will then describe their study in a four-section scientific paper (introduction, methods, results, discussion). (CR6, CR7, CR8, CR12, SP3, SP4, SP5)

Unit 16: Semester Review and Exam [CR2]

In this unit, students will do the following:

- Review all topics covered this semester.
- Demonstrate knowledge by completing a graded semester exam written in the style of the AP Biology exam.

AP Calculus

**AP Calculus AB Syllabus**

Curricular Requirements	Page(s)
CR1a The course is structured around the enduring understandings within Big Idea 1: Change.	5, 6, 8, , 11, 14, 16 15
CR1b The course is structured around the enduring understandings within Big Idea 2: Limits.	6, 8, 10, 11, 13-16
CR1c The course is structured around the enduring understandings within Big Idea 3: Analysis of Functions.	12, 13-16
CR2a The course provides opportunities for students to reason with definitions and theorems.	5, 6, 7, 10, 12
CR2b The course provides opportunities for students to connect concepts and processes.	3, 5-8, 10, 12-16
CR2c The course provides opportunities for students to implement algebraic/computational processes.	4, 5, 6, 8, 10, 12-16
CR2d The course provides opportunities for students to engage with graphical, numerical, analytical, and verbal representations and demonstrate connections among them.	5, 6, 8, 10, 11, 12, 14-16
CR2e The course provides opportunities for students to build notational fluency.	5, 6, 8, 10, 12-14
CR2f The course provides opportunities for students to communicate mathematical ideas in words, both orally and in writing.	6-8, 11-16
CR3a Students have access to graphing calculators.	3, 5, 12, 14
CR3b Students have opportunities to use calculators to solve problems.	6-9, 11-15
CR3c Students have opportunities to use a graphing calculator to explore and interpret calculus concepts.	6-8, 11-16
CR4 Students and teachers have access to a college-level calculus textbook.	6-9, 12-15

Course Summary

In this course, students complete a full academic year of coursework similar to a first-year college-level calculus course. This course covers the framework, mathematical practices, and curriculum requirements for an AP[®] Calculus AB

course as required by the College Board. This course combines practical experience with the methods and applications of calculus and will prepare students to take the AP Calculus AB exam in the spring. The overarching topics in this course are limits and continuity, derivatives, integrals, and mathematical modeling. Students learn through direct instruction, regular checks and practices, discussions, portfolios, and a project completed during the second semester. Students also take a practice assessment for the AP Calculus AB exam prior to the actual AP Calculus test date.

Course Units

Where Big Ideas Are Taught

Big Idea	Semester A Units	Semester B Units
Change	A.3	
Limits	A.3	
Analysis of Functions	A.4, A.6, A.7	B.2, B.3, B.5

Resource Requirements

Finney, Ross L., Demana, Franklin D., Waits, Bert K., Kennedy, D., and David M. Bressoud. *Calculus: Graphical, Numerical, Algebraic*. 5th ed., Pearson Education, Inc., 2016.

Students are required to purchase their own AP Calculus AB approved graphing calculator. [CR3a]

Writing Assignments

In each lesson, students work on activities that involve writing solutions to problems that reinforce the instruction from the lesson. Students also reflect on the lesson by responding to meta-cognitive prompts, and reflecting on ways they can organize their learning using flow charts, concept maps, step-by-step problem-solving ideas, index cards, and other suggestions that encourage self-directed learning. [CR2b, CR2f]

Assessments

Throughout the course, a variety of formative and summative assessments are used to assess student learning and prepare students for the expectations of the AP Calculus AB exam. Students are provided with ample opportunity for skill practice, engagement in meaningful discourse with their peers, and application of their understanding via tasks that are representative of real-world scenarios. Summative assessment types lend themselves to a deeper level of rigor and include portfolios and discussions. Formative assessments are designed to be auto-graded to give students and teachers instant feedback for targeted instruction.

Most lessons contain a quick check assessment that covers the objectives in the lesson, and most units have at least one cumulative quiz that also assesses lesson objectives. Each instructional unit culminates in an online practice to help students review unit concepts and skills, followed by a unit test that consists of multiple choice and short answer and/or essay questions. To aid students in retaining content throughout the course of a semester, a mid-semester check unit appears in the middle of each semester, featuring a low-risk practice assessment covering the objectives learned up to that point during the semester.

A graded full-length practice exam in the style of the AP Calculus AB exam is given at the end of Semester B. Each semester ends with a semester exam.

Most units feature a discussion or portfolio that promotes critical thinking by expanding on topics students have learned. Each semester ends with a semester project and a semester exam. Graded assessments and participation all count toward the student's final grade.

LiveLesson® Online Classroom

Students will collaborate synchronously with peers through the LiveLesson system. LiveLesson sessions allow students to ask questions and take part in real-time discussions. During these sessions, students have the opportunity to describe concepts orally, as well as to work collaboratively with their peers to solve complex problems. These sessions are also used to reinforce difficult concepts and to provide a low-stakes environment for students to develop notational fluency and practice new skills and concepts.

Notational Fluency

Knowing the appropriate notation to use without obvious suggestion is characteristic of a student who performs well on the AP® Calculus AB exam. Throughout the course, there are many opportunities for students to develop and use notational skills. This happens frequently during LiveLessons as well as in sample free-response activities where students interpret problems presented verbally and show their solutions using the correct notation.

Course Outline

Semester A

Unit 1: Course Overview

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Ensure they have the required materials for the course. [CR3a, CR4]
- Learn about the types of activities that will appear in the course.

Unit 2: Prerequisites for Calculus

In this unit, students will do the following:

- Review essential prerequisite skills from precalculus. Sample

activities in this unit:

- Students become familiar with their calculator approved for AP courses, reviewing basic uses such as entering calculations and graphing functions, and how screen resolution issues can impact the appearance of certain graphs. [CR3a, CR3b]

Required reading: *Calculus: Graphical, Numerical, Algebraic*. 5th ed., Chapter 1: Prerequisites for Calculus [CR4]

Unit 3: Limits and Continuity [CR1a] [Big Ideas: Change, Limits]

In this unit, students will do the following:

- Calculate limits of functions at a point and interpret their meaning. [CR2a, CR2d, CR2e]
- Calculate limits of functions at infinity and interpret their meaning. [CR2a, CR2d, CR2e]
- Calculate infinite limits of functions and interpret their meaning. [CR2a, CR2d, CR2e]
- apply the concept of slope to tangent lines and rates of change. [CR2b, CR2c, CR3c]

Sample activities in this unit:

- Students complete an activity where they write infinite limits, and limits at infinity, to verify asymptotic behavior of functions. Students generalize to verify that for functions of the form

$f(x) = \frac{1}{x-k}$, where k is a constant, the vertical asymptote is $x = k$ because

$\lim_{x \rightarrow k^-} f(x) = -\infty$ and $\lim_{x \rightarrow k^+} f(x) = \infty$, and the horizontal asymptote is $y = 0$ because

$\lim_{x \rightarrow -\infty} f(x) = 0$ and $\lim_{x \rightarrow \infty} f(x) = 0$. [CR2e]

- Students apply what they learned in the unit by creating a concept map that
- shows hierarchies and interconnectedness between the different kinds of limits, including one-sided limits and limits at infinity, and continuity. The concept map is accompanied by 1–2 paragraphs of text that gives a verbal description of the concept map. [CR2b, CR2f]

Required reading: *Calculus: Graphical, Numerical, Algebraic*. 5th ed., Chapter 2: Limits and Continuity [CR4]

Unit 4: Derivatives [CR1a, CR1b] [Big Ideas: Analysis of Functions]

In this unit, students will do the following:

- Determine the conditions necessary for a function to be differentiable. [CR2a, CR2d, CR2e]
- Use the definition of a derivative to find derivatives of differentiable functions and derivatives at a point. [CR2a, CR2d, CR2e, CR3c]
- Apply the Intermediate Value Theorem for derivatives. [CR2a, CR2d, CR2e]
- Apply differentiation rules to find derivatives of functions. [CR2a, CR2d, CR2e]
- Solve problems involving rates of change. [CR2b, CR2c, CR3b]

Sample activities in this unit:

- Students participate in a discussion about derivatives. They examine the difference between the two definitions of a derivative:

$$f'(x) = \lim_{h \rightarrow 0} \frac{f(x-h) - f(x)}{x-h} \text{ and } f'(a) = \lim_{x \rightarrow a} \frac{f(x) - f(a)}{x-a}$$

Students discuss the two definitions using the same open-ended question and come up with their own specific example that uses both definitions.

Students resolve any misconceptions they might have about the use of these definitions based on other student responses. [CR2a, CR2b, CR2f]

- In this activity, students use their graphing calculator to complete a guided exploration where they explore the concept of differentiability at a point. Students are presented with a function of the form $f(x) = a\sqrt[3]{x-h}$

and asked to use the zoom feature on their calculator to investigate local linearity at $x = h$.

Students are guided to continue zooming and to give estimates of the slope of the tangent line at $x = h$ as they continue to zoom. Students are guided towards concluding that the tangent line at $x = h$ has an undefined slope. [CR3c]

- Students are given functions in different analytical forms and asked to sketch the function graphically showing maxima and minima, inflections points, asymptotes, where applicable, and express the form of the function verbally.
- In lesson 6, students use their calculator to find the numerical derivative of a function.

Required reading: *Calculus: Graphical, Numerical, Algebraic*. 5th ed., Chapter 3: Derivatives [CR4]

Unit 5: Mid-Semester Check [CR1a, CR1b]

In this unit, students will do the following:

- Review the topics that they have learned from the beginning of this semester.
- Demonstrate knowledge by completing a graded mid-semester check in the style of the AP Calculus AB exam.

Unit 6: More Derivatives [CR1b] [Big Ideas: Analysis of Functions]

In this unit, students will do the following:

- Use the chain rule to find derivatives of composite and implicitly defined functions. [CR2a, CR2d, CR2e]
- Determine derivatives of inverse trigonometric functions. [CR2a, CR2d, CR2e, CR3b]
- Determine derivatives of exponential functions. [CR2a, CR2d, CR2e, CR3b]
- Determine derivatives of logarithmic functions. [CR2a, CR2d, CR2e, CR3b] Sample activities

in this unit:

- Students engage in a discussion about implicitly-defined functions. They discriminate between implicitly-defined functions, determining when it is possible to break apart a function into two explicitly defined functions, and when it is not possible or convenient to do so. Students give examples of each kind of implicitly defined function and to manually compute the solutions of the examples they provide. Students in need of more insight into this topic benefit from their own participation as well as from reading other student responses. [CR2b, CR2c, CR2f]
- Students are provided with a series of functions, where their differentiation requires selection of the differentiation method. The types of functions include implicit functions as well as functions that require the application of the chain rule. Students should state the appropriate derivative rule for each function while engaging in this activity.

Required reading: *Calculus: Graphical, Numerical, Algebraic*. 5th ed., Chapter 4: More Derivatives [CR4]

Unit 7: Applications of Derivatives [CR1b] [Big ideas: Analysis of Functions]

In this unit, students will do the following:

- Identify local and global extreme values of a function. [CR2a, CR2b, CR2d, CR2e, CR3b, CR3c]
- Identify intervals over which a continuous function is increasing, decreasing, or constant. [CR2a, CR2b, CR2d, CR2e, CR3b, CR3c]
- Relate the graph of a function with the graphs of its first and second derivatives. [CR2b, CR2d]
- Apply the Mean Value Theorem to solve problems. [CR2a, CR3b,]
- Solve problems involving related rates. [CR2b, CR2c, CR3b, CR3c] Sample activities

in this unit:

- Students create a video in which they create their own twice-differentiable function and draw its graph without a calculator by analyzing its properties, including zeros, asymptotes, symmetry, first derivative, second derivative, local and global extreme values, the concavity test, concave up, and concave down. Students then show the graph of their function on a graphing calculator to verify their work. Students communicate orally and in writing to explain and show their work. A video that meets or exceeds expectations, as outlined in a grading rubric, demonstrates an understanding of how first- and second-order derivatives are used to more accurately draw the graph of the function.
- In the above Activity it will be additionally indicated to the students that their use of appropriate mathematical language, both written and spoken, will be checked.
- Students will develop models of real-world situations and solve these optimization or related rates problems using derivatives. Ex: Finding the value of x that maximize the area of a rectangle with side lengths x and $12 - x^2$.
- In lesson 1, students will identify the zeros of derivatives by hand and by using a calculator.
- In lesson 2, students will verify whether the conditions of the Mean Value Theorem or Rolle's Theorem are satisfied before applying the theorem.
- In lesson 3, students will match graphical, verbal, and analytical representations of functions.

functions. All students will have access to video players that they can use to create their presentation. [CR2b, CR2d, CR2f, CR3c]

- Students use their calculator to find derivatives at a point and apply it to modeling and optimization problems. [CR 3a, CR3b]

Required reading: *Calculus: Graphical, Numerical, Algebraic*. 5th ed., Chapter 5: Applications of Derivatives [CR4]

Unit 8: Semester Exam [CR1a, CR1b]

In this unit, students will do the following:

- Review all topics covered this semester.
- Demonstrate knowledge by completing a graded semester exam written in the style of the AP Calculus AB exam.

Semester B

Unit 1: Course Overview

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Ensure they have the required materials for the course. [CR3a, CR4]
- Learn about the types of activities that will appear in the course.

Unit 2: The Definite Integral [CR1c] [Big Ideas: Analysis of Functions]

In this unit, students will do the following:

- Write the limit of a Riemann sum in integral notation and find definite integrals using area. [CR2a, CR2b, CR2e]
- Apply the rules for definite integrals to evaluate definite integrals. [CR2a]
- Apply the Fundamental Theorem of Calculus to find antiderivatives. [CR2a, CR2b]
- Apply the evaluation part of the Fundamental Theorem of Calculus to evaluate definite integrals. [CR2a, CR2b, CR2c, CR3b, CR3c]
- Use the Trapezoidal Rule to approximate areas under a curve. [CR2a, CR2b, CR2e]

Sample activities in this unit:

- Students write 4–5 paragraphs explaining the Fundamental Theorem of Calculus Part 1 (the antiderivative part) and The Fundamental Theorem of Calculus Part 2 (the evaluation part). Students incorporate vocabulary words and terms associated with each theorem (i.e. definite integral, antidifferentiation, and limits of integration) associated with each part and explain the role of each when working with integrals. Students also explain the connection between the two parts. A paper that meets or exceeds expectations, as outlined in a grading rubric, demonstrates an understanding of, and the connection between, both parts of the Fundamental Theorem of Calculus. [CR2a, CR2b, CR2d, CR2f]
- Students complete an activity that involves writing definite integrals of the

form $\int_a^b f(x) dx$ the limit of a Riemann Sum $\lim_{n \rightarrow \infty} \sum_{k=1}^n f(c_k) \Delta x$. [CR2e]

- Students complete an activity and assignment that involves finding the average value of a function using the fnInt (NINT) function on their calculator. [CR3c]

Required reading: *Calculus: Graphical, Numerical, Algebraic*. 5th ed., Chapter 6: The Definite Integral [CR4]

Unit 3: Differential Equations and Mathematical Modeling [CR1b, CR1c] [Big Ideas: Analysis of Functions]

In this unit, students will do the following:

- Use substitution methods to evaluate definite and indefinite integrals. [CR2b, CR2c]
- Evaluate definite integrals using a calculator. [CR3b]
- Determine general and particular solutions to a differential equation. [CR2b, CR2c]
- Solve initial value problems. [CR2b, CR2c, CR2e, CR3b]
- Solve separable differential equations and apply them to solving problems relating to exponential growth and decay. [CR2b, CR2c, CR2e, CR3b]

Sample activities in this unit:

- Students create a graphic organizer under the topic of Differential Equations. The graphic organizer shows important relationships among the subtopics they have learned about in this unit. Key terms such as slope fields, indefinite integrals, substitution methods for integration, and separable differential equations, are included along with a description of each topic. [CR2b, CR2f]

Required reading: *Calculus: Graphical, Numerical, Algebraic*. 5th ed., Chapter 7 (7.1, 7.2, 7.4): Differential Equations and Mathematical Modeling [CR4]

Unit 4: Mid-Semester Check [CR1b, CR1c]

In this unit, students will do the following:

- Review the topics that they have learned from the beginning of this semester.
- Demonstrate knowledge by completing a graded mid-semester check in the style of the AP Calculus AB exam.

Unit 5: Applications of Definite Integrals [SC1c] [Big Ideas: Analysis of Functions]

In this unit, students will do the following:

- Solve problems involving accumulation and net change. [CR2b, CR2c, CR2d, CR3b, CR3c]
- Apply definite integrals to determine areas in the coordinate plane. [CR2b, CR2c, CR2d, CR2e, CR3b, CR3c]
- Apply definite integrals to determining volume of three-dimensional solids. [CR2b, CR2c, CR2d, CR2e, CR3b, CR3c]
- Integrate with respect to y to solve area and volume problems determined by functions of y . [CR2b, CR2c, CR2d, CR2e, CR3b, CR3c]

Sample activities in this unit:

- In this activity, students are given 4 problems relating to this unit. Each student chooses one problem to solve. In their solution, each student purposely introduces an error in notation. Students post their solution for other students to see. Other students exercise notational fluency by identifying the error in notation and by making corrections using the appropriate notation. [CR2b, CR2e, CR2f]
- Students use their graphing calculator to solve an equation of the form $ds/dt = 0$.
- Students use their calculator to calculate volumes by slicing, volumes of revolution, and volumes using cylindrical shells. [CR3a, CR3b]
- The students will find solutions to real-world problems, including the work done in stretching a spring.

Required reading: *Calculus: Graphical, Numerical, Algebraic*. 5th ed., Chapter 8 (8.1, 8.2, 8.3, 8.5): Applications of Definite Integrals [CR4]

Unit 6: Review and Full-Length Practice Exam [CR1a, CR1b, CR1c]

In this unit, students will do the following:

- Review the entire course, using the results of the mid-semester check and unit tests to focus this review.
- Use their graphing calculator to solve an equation of the form $ds/dx = 0$.

- Complete a full-length practice exam in the style of the AP Calculus AB exam, over the course of three days. This includes a multi-part problem where students apply the first derivative test for local extrema and provide justifications for answers.

Unit 7: Semester Project: Response to a Letter [CR1a, CR1b, CR1c]

In the project unit, students act as a mathematical consultant. They respond to a written letter in which a client asks the student to address a number of mathematical problems the client needs help solving. Students research solutions using nDeriv (NDER), fnInt (NINT), and graphical analysis features of their graphing calculator.

Students create and submit a verbal, numerical (including data), and computational response to the client's request. It is expected that the response is written in a way that demonstrates mastery of the enduring understandings. [CR2b, CR2c, CR2d, CR2f, CR3c]

Unit 8: Semester Exam [CR1b, CR1c]

In this unit, students will do the following:

- Review all topics covered this semester.
- Demonstrate knowledge by completing a graded semester exam written in the style of the AP Calculus AB exam.

AP Computer Science Principles

AP Computer Science Principles

Course Overview

The Zulama AP Computer Science Principles Course is structured by the Conceptual Framework established by the College Board. This includes six Computational Thinking Practices: Skills and five Big Ideas.

The content of the Zulama AP Computer Science Principles course was originally written and structured by Ruth Comley, faculty at the Entertainment Technology Center at Carnegie Mellon University in Pittsburgh, Pennsylvania. GameMaker Studio 2 was chosen as the game engine to teach computer science principles due to its professional game design interface, high interest skill development, and functional GML scripting language. The computer game design principles and skills high school students develop using GameMaker Studio 2 interfaced also are taught in the over 400 university game design programs in the United States, both at the undergraduate and graduate levels.

Through a study of computer science principles and game design, students in the Zulama AP Computer Science Principles course:

- apply computer science principles and transferable skills by building playable digital games,
- program using GML scripting language and the GameMaker Studio™ interface,
- engage in creative design opportunities by applying knowledge of game mechanics,
- collaborate in design teams using the iterative design process,
- expand knowledge of the global impact of computer innovations,
- explore career and advanced education opportunities in the study of computer science and computer game design through the Explore Computer Innovations activity
- design and code a playable game that meets the expectations of the Performance Task
- prepare for the College Board AP CSP Exam

Pedagogy

This AP Computer Science Principles course develops computational thinking practices that students use to problem solve and to critically analyze innovations in computing. The course is appropriate for students who have completed a high

school algebra course. Students learn advanced computer science principles by completing rigorous computer game projects. They plan, design, code, and test software using the scripting language GML in GameMaker: Studio. Students gain a deep understanding of the global impact of the Internet through the study of game design, game programming, and the fast growing and diverse global video game industry.

This course emphasizes building computer science vocabulary and applying computer science principles and essential knowledge of coding practices.

Students engage in a variety of activities where they design, code, iterate, and share playable games in a 2d environment defined through the course Big Ideas and Learning Objectives.

Total course time: 140 hours = approximately 37 weeks of instruction when delivered in 45 minute periods and 5 classroom periods per week. The course fits flexibly into other formats, such as block scheduling.

Course Delivery

Teachers and students each have their own login and password to access the digital curriculum through the browser-based Passport platform. This digital curriculum provides:

Features of Passport include:

- Content delivery
- Course scheduling
- Edulastic online assessment integration
- Real time gradebook
- Teacher to student messaging
- Teacher control of student rosters and passwords
- Teacher keys and other resources

Primary Programming Environment GameMaker Studio 2

Zulama AP Computer Science Principles Resources

AP CSP Conceptual Framework

Computational Thinking Practices

CPT1: Computational Solution Design

CPT2: Algorithms and Program Development **CPT3:**

Abstraction in Program Development **CPT4:** Code Analysis

CPT5: Computing Innovations

CPT6: Responsible Computing

Big Ideas

The AP Computer Science Principles course is built on five Big Ideas. For specific Enduring Understandings, Learning Objectives, and Essential Knowledge Statements that support each Big Idea, please refer to the [College Board Course and Exam Description \(CED\) binder](#) for AP CSP.

(CRD) Big Idea 1: Creative Development

When developing computing innovations, developers can use a formal, iterative design process or experimentation. While using either approach, developers will encounter phases of investigating and reflecting, designing, prototyping, and testing. Additionally, collaboration is an important tool to use at any phase of development because considering multiple perspectives allows for improvement of innovations

(DAT) Big Idea 2: Data

Data is central to computing innovations because it communicates initial conditions to programs and represents new knowledge. Computers consume data, transform data, and produce new data, allowing users to create new information or knowledge to solve problems through the interpretation of this data. Computers store data digitally, which means that the data must be manipulated in order to be presented in a useful way to the user.

(AAP) Big Idea 3: Algorithms and Programming

Programmers integrate algorithms and abstraction to create programs for creative purposes and to solve problems. Using multiple program statements in a specified order, making decisions, and repeating the same process multiple times are the building blocks of programs. Incorporating elements of abstraction, by breaking problems down into interacting pieces, each with their own purpose, makes writing complex programs easier. Programmers need to think algorithmically and use abstraction to define and interpret processes that are used in a program.

(CSN) Big Idea 4: Computing Systems and Networks

Computer systems and networks are used to transfer data. One of the largest and most commonly used networks is the Internet. Through a series of protocols, the Internet can be used to send and receive information and ideas throughout the world. Transferring and processing information can be slow when done on a single computer but leveraging multiple computers to do the work at the same time can significantly shorten the time it takes to complete tasks or solve problems.

(IOC) Big Idea 5: Impact of Computing

Computers and computing have revolutionized our lives. To use computing safely and responsibly, we need to be aware of privacy, security, and ethical issues. As programmers, we need to understand how our programs will be used and be responsible for the consequences. As computer users, we need to understand how to protect ourselves and our privacy when using a computer.

AP CSP Curricular Requirements

The Zulama AP CSP course supports each of the Big Ideas throughout the course content, collaborative and individual activities, and student reflections. The lesson activities support lesson content and provide opportunities for students to apply newly learned computer science concepts and skills. Thus, **students are expected to complete all lesson activities listed in the Module Guide.**

Module Guide

Module 1

Overview of Game Design and Computer Science Principles

Timeframe: 3 Lessons, approximately 16 hours

Module 1	
Big Ideas	CRD, DAT, AAP, CSN, IOC
Computational Thinking Practices	CTP 1, 2, 5, 6
Lessons	Essential Questions
<p>Lesson 1: Introduction Game Design CRD, CP1; CP5</p> <p>Lesson 2: Data and Computational Thinking CSN; CTP 2, 6</p> <p>Lesson 3: The Internet and Global Impact CSN; CTP 6</p>	<ul style="list-style-type: none"> ● Why are games a computing innovation? ● How is computational thinking used in game development? ● What are the positive and negative impacts of computers and the Internet?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Game design principles ● Working collaboratively in design teams ● Game mechanics 	
Questions	<ul style="list-style-type: none"> ● Module 1 Quiz ● AP CSP Topic Formative Assessment
Outcomes	<ul style="list-style-type: none"> ● Read binary data ● Determine impact of computing ● Analyze data collection and reporting ● Know Internet characteristics ● Gauge Internet usage ● Evaluate cybersecurity issues

Instructional Activities

Lesson 1: IDEA Teams and Computing Innovations Students pretend their IDEA Teams were the creators of Side Scroller, and discuss ways in which their collaboration might have made different choices. **CRD**

Lesson 2: Tell Time Using Binary Clocks Students study the examples of binary clocks, read the Binary Data section in Lesson 1, convert the LED binary settings to decimal numbers so that they can confirm the times. Then they will also complete exercises to represent binary data using hexadecimal digits and make comparisons. **DAT**

Lesson 2: Research the Impact of Games Students research and create a multimedia presentation that explores the impact of the global game design industry on today's society. The presentation should include statistics on how games are used for the greater good and careers in gaming as well as data of the student's choice. Sources should be cited and students should organize the data in a clear way. **IOC**

Lesson 2: Using Data for Information and Knowledge Students describe an app they use frequently and write a short summary of its purpose. Students give an example of data that it collects and how it uses and presents the data back to the user. Students share with the class what information or knowledge is gained from the reporting. **DAT**

Lesson 2: Database Design Problems: The Card Game Students consider how to best design a database for users. They consider search factors, variable, and how to simplify a database. Students consider the problem of scalability and develop a working blueprint that could be used to design a preliminary test site. **DAT**

Lesson 3: Compare Usage Students compare their Internet usage to what statistics indicate and support their comparison with a graphic. **CSN**

Lesson 3: Unauthorized Access Students research how unauthorized access to computing resources is gained and how they can stop or prevent that access. **CSN**

Lesson 3: Data and Security Students essay on the benefits and dangers of collecting and storing personal data on online databases. **CSN**

Lesson 3: Crowdsourcing and Large-Scale Problem Solving Students choose a crowdsourced research project online and explain how the people involved are participating in large-scale problem solving. **CSN**

Lesson 3: Ethical Use of Computers Students access their favorite search engine and search for articles related to the harmful effects of computing.

After reading and summarizing the article, students discuss ways to counteract the effect.

CSN

Lesson 3: Bringing Equity Students research equity and how it can be achieved in computing.

Students write an essay summarizing their findings. **IOC**

Lesson 3: Think Beyond the Code Students research an example of a computing innovation that ended up having consequences that the programmers probably didn't intend and decide how they might have done things differently. **CRN**

Lesson 3: Good and Bad Students research a well-known computing innovation and discuss both the pros and the cons of that innovation for society. **CRD Lesson 3: Internet Usage** Students share their

Internet usage habits, including

how much time is spent per day on the Internet and how it is spent. Students describe their use, such as playing games, accessing social media, using it for school-related projects, watching videos, or independently learning. **CSN**

Lesson 3: Internet Characteristics Students work in pairs and choose a topic from the Digital Ocean article to investigate and prepare to teach their classmates in a short presentation. Topics chosen should include IP addresses, protocols, and packets. **CSN**

Lesson 3: Impact of the Internet Students explain how the Internet has changed how individuals communicate and learn. **IOC**

Lesson 3: Cybersecurity Students read a selection of articles pertaining to cybersecurity from looking at encryption to recent security breaches. They respond to a writing prompt and describe a current cybersecurity concern and consider ways to address the issue. **CSN**

Lesson 3: Computer Vocabulary Word Art Students choose 15 words from their reading that describe computer science. They find a word cloud generator of their choice to complete the assignment. *Wordle* is one option, but others are available. Students then design a creative word art showcasing the computer science vocabulary found in Module 1. **CRD**

Lessons 1 - 3: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Article:** An Introduction to Networking Terminology, Interfaces, and Protocols, online DigitalOcean

<https://www.digitalocean.com/community/tutorials/an-introduction-to-networking-terminology-interfaces-and-protocols>

- **Article:** Internet Protocol
(<http://searchunifiedcommunications.techtarget.com/definition/Internet-Protocol>)

Module 2

Using GameMaker: Studio

Timeframe: 3 Lessons -- Approximately 4 hours

Module 2	
Big Ideas	CRD, DAT, CSN, IOC
Computational Thinking Practices	CTP 1, 3, 5, 6
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 4: Setting Up GameMaker Projects CRD; CTP 1 ● Lesson 5: GameMaker: Studio Interface CSN; CTP 5, 6 ● Lesson 6: Game Assets and GameMaker DAT, CSN; CTP 3 	<ul style="list-style-type: none"> ● How is a GameMaker project stored? ● What does the GameMaker interface look like? ● How are assets and projects transferred?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Downloading and installing software (GameMaker: Studio) ● Project file structure 	
Questions	<ul style="list-style-type: none"> ● Module 2 Quiz <ul style="list-style-type: none"> ● AP CSP Topic Formative Assessment
Outcomes	<ul style="list-style-type: none"> ● Set up file structures ● Explain software releases and version numbers ● Navigate GameMaker: Studio interface ● Use file compression formats

Instructional Activities

Lesson 6: Storing, Securing, and Compressing Data Students work in small, collaborative groups to research and create a multimedia presentation on compressed file formats. Include historical information, how data is secured, and technical information. **DAT**

Lesson 6: Investigating Data Sets Students work individually or in pairs to investigate metadata. Use file explorer and GameMaker project files to draw conclusions. **DAT**

Lesson 6: Computing Innovations Through the first two modules students have been exploring how computing has evolved and had an impact. Now they will look beyond video games and research how computing, and shared access to resources, has impacted innovation in other fields. Students present their findings in the form of a digital poster. **CSN**

Lessons 4 - 6: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Instructional Video:** How to Extract Zip Files

Module 3 Zulama Pinball

Timeframe: 5 Lessons -- Approximately 5 hours

Module 3	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4, 5, 6
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 7: Game Design Documents CRD; CTP 1, 5 ● Lesson 8: Parts of a GameMaker Game DAT; CTP 3, 5 	<ul style="list-style-type: none"> ● What does a game document include? ● What are the main resources used in a GameMaker Studio project? ● What resources are used in a game level?
<ul style="list-style-type: none"> ● Lesson 9: Backgrounds and Rooms CRD, DAT; CTP 2, 3 ● Lesson 10: Adding Code AAP; CTP 2, 3 ● Lesson 11: Complete Navigation Workshop CRD, DAT, CSN; CTP 1, 4, 6 	<ul style="list-style-type: none"> ● How do objects react to events? ● How is room navigation handled?

Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● One page design ● Game document ● Pair programming ● Create GameMaker project ● Sprites ● Objects ● instance 	
<p>Questions</p>	<ul style="list-style-type: none"> ● Module 3 Quiz ● AP CSP Topic Formative Assessment
<p>Outcomes</p>	<ul style="list-style-type: none"> ● Manipulate the GameMaker interface ● Add rooms and backgrounds ● Determine game flow ● Apply GML scripting skills, including: <ul style="list-style-type: none"> ● Create events and collisions ● Add functions and variables

Instructional Activities

Lesson 8: Designing New Playing Pieces Students work as a design team to add two new playing pieces to the game. Design team may be pair programmers or two pairs may form one team. This activity will begin here and will finish at the end of Zulama Pinball, and includes design of game art, application of game mechanics, and adding objects to the computer game environment. **CRD**

Lesson 10: Upload Completed Project File When students have finished all the tasks described in the lessons and tested that their game works, students export their GameMaker project and upload the GMZ file for review. **CRD, DAT**

Lesson 10: Levels of Abstraction Students respond to a writing prompt to discuss the multiple levels of abstraction they have seen from the game document to running their code (highest to lowest - rule set, pseudocode, GML code, compiled code, executed code.) **AAP**

Lesson 11: Upload Navigation Workshop Students export and upload their completed Navigation Workshop GMZ file. This Workshop includes making independent changes to the game to assess module outcomes **CRD, DAT**

Lessons 7 - 11: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Instructional Video:** Creating a Sprite
- **Instructional Video:** Creating an Object
- **Instructional Video:** Creating a Background
- **Instructional Video:** Creating a Room / Adding Objects
- **Instructional Video:** Writing Code
- **Instructional Video:** Exporting GMZ Files

Module 4

Making the Game Work

Timeframe: 4 Lessons -- Approximately 6 hours

Module 4	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 12: Controlling the Paddle AAP; CTP 1, 2, 3, 4 ● Lesson 13: Using Mouse input AAP; CTP 1, 2, 3, 4 	<ul style="list-style-type: none"> ● How is the paddle movement controlled by the player? ● What events are generated by mouse clicks?
<ul style="list-style-type: none"> ● Lesson 14: Collision with Ball AAP; CTP 1, 2, 3, 4 ● Lesson 15: Adding More Assets CRD, DAT; CTP 1, 2, 3, 4 	<ul style="list-style-type: none"> ● How are program errors interpreted and corrected? ● Why is the User Interface important?
Computer Science / Game Design Topics	Coding Concepts

<ul style="list-style-type: none"> ● Keyboard events ● Mouse events ● Randomization ● Collision handling ● Debugging ● User interface ● Draw events ● Font resource 	<ul style="list-style-type: none"> ● Conditional statement ● Random number functions ● Boolean variables ● Variable scope ● Global variables ● Constants ● “with” statement ● Interpreting error messages ● Draw functions
<p>Questions</p>	<ul style="list-style-type: none"> ● Module 4 Quiz ● AP CSP Topic Formative Assessment
<p>Outcomes</p>	<ul style="list-style-type: none"> ● Apply GML scripting skills <ul style="list-style-type: none"> ○ Use conditional statements, random number functions, variables, constants, and variable scope ○ Dynamically allocate game resources

Instructional Activities

Lesson 13: Practice with if Statements Students complete an if statement worksheet to assess their ability to trace logical programming statements. **AAP**

Lesson 14: GameMaker Tips Students respond to the writing prompt by posting to an online discussion thread: What GameMaker shortcuts have you discovered on your own that you find helpful? What web searches have you done and what online resources have helped you? How did you verify their credibility? Students then respond to a partner's suggestion after trying it out or using the online reference. **CRD, CSN**

Lesson 14: Debugging Exercise Students work as pair programmers to correct all errors in given project. They then export and upload it to the Zulama Learning and Content Management System. **AAP**

Lesson 15: Is the Game Fair? Students provide written answers to questions posed to address game design, iteration, and game balance. **CRD**

Lesson 15: Module 4 Guided Lessons Completed When students have finished all the tasks described in the lessons, tested, and iterated their game so they know it works correctly, students export their GameMaker project and upload the GMZ file to the Zulama Learning and Content Management System for review. **CRD, DAT**

Lessons 12 - 15: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Instructional Video:** Using Keyboard Events
- **Instructional Video:** Adding Code to Respond to Mouse Input
- **Instructional Video:** Adding a Rule
- **Instructional Video:** Making Objects Operational
- **Instructional Video:** Drawing the Score

Module 5

Finishing Zulama Pinball

Timeframe: 5 Lessons -- Approximately 8 hours

Module 5	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 16: Add Game Balance AAP; CTP 1, 2, 3, 4, ● Lesson 17: Add Rewards APP; CTP 1, 2, 3, 4 ● Lesson 18: Player Feedback AAP; CTP 2, 3, 4 ● Lesson 19: Designing a Level CRD, AAP; CTP 2, 3, 4 ● Lesson 20: Final Playtest CRD, IOC; CTP 4 	<ul style="list-style-type: none"> ● What is game balance and how can it be achieved in your game? ● How can variables be used to control game flow? ● How is winning or losing determined and communicated to the player? ● What needs to be considered to build a second level? ● What does playtesting involve? ● Why is playtesting a crucial step in game design?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Game balance ● Dynamic resource allocation ● Building and testing game feedback ● Game development cycle ● Working collaboratively in a design team ● Game design principles ● Playtest 	<ul style="list-style-type: none"> ● Conditional statement (if-else) ● Increment and decrement operators ● Compound if statement ● Global variables ● Develop and test ● Create application executable
Questions	<ul style="list-style-type: none"> ● Module 5 Quiz ● AP CSP Topic Formative Assessment
Outcomes	<ul style="list-style-type: none"> ● Apply GML scripting skills

	<ul style="list-style-type: none"> ○ Use compound conditional statements, increment and decrement operators, and variable scope ○ Dynamically allocate game resources ● Engage in the iterative process to design a second game level ● Playtest a game
--	---

Instructional Activities

Lesson 17: Add More Balance Students choose one of several brainstormed ideas from Lesson 15 and implement it in the game. Students consider choosing an original idea that will make the game more interesting but also take into account a change that can be successfully implemented with the deadlines set by the teacher. The explanation and file are uploaded for teacher review. **AAP**

Lesson 18: Guided Lessons Completed After finishing all tasks directed in the lessons, testing the game, and iterating as needed so the game works, export their GameMaker project. Students upload the GMZ file for teacher review. **CRD, DAT**

Lesson 19: Designing a Level Workshop Before making the changes in GameMaker, planning needs to be done. Students document their plans to implement an original level by completing a one page design document as well as adding to the game document used throughout Zulama Pinball.

Updating the game document includes writing pseudocode. Students upload their completed planning documents for teacher review. **CRD, DAT**

Lesson 19: New Level GMZ Workshop Once students have coded and tested their design changes, they export and upload their completed GMZ GameMaker project file for teacher review. **CRD, DAT**

Lesson 20: Evaluate the Playtest Students work in their design teams to evaluate the test results and brainstorm ideas for changes to games to make them more playable and fun. Students then provide written responses to writing prompts. **CRD**

Lessons 16 - 20: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Instructional Video:** Adding Player Lives
- **Instructional Video:** Adding a Bonus Feature, part 1
- **Instructional Video:** Adding a Bonus Feature, part 2
- **Instructional Video:** Win Conditions and Feedback
- **Instructional Video:** Making the Play Again Button Functional

Module 6 Ball

Bouncer

Timeframe: 4 Lessons -- Approximately 6 hours

Module 6	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 21: Rooms and Backgrounds AAP; CTP 1, 2, 3, 4 ● Lesson 22: Ball and Wall Objects AAP; CTP 1, 2, 3, 4 ● Lesson 23: Adding the Goal AAP; CTP 1, 2, 3, 4 ● Lesson 24: Create Playing Pieces Workshop CRD, DAT; CTP 1, 2, 3, 4 	<ul style="list-style-type: none"> ● What is required to set up game navigation when you begin a new game? ● How can instances be added easily to a room? ● How is the game won? ● What steps are required to set up the game’s playing pieces?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Pair Programming ● Create GameMaker project ● Set up game flow 	<ul style="list-style-type: none"> ● Using functions ● Random number functions

<ul style="list-style-type: none"> ● Level design ● Object instances ● Randomization ● Create game objects ● Project organization 	
<p>Questions</p>	<ul style="list-style-type: none"> ● Module 6 Quiz ● AP CSP Topic Formative Assessment
<p>Outcomes</p>	<ul style="list-style-type: none"> ● Apply GML scripting skills <ul style="list-style-type: none"> ○ Set up game flow in the Ball Bouncer game ○ Use random number functions ○ Use create events and collision events to control game flow

Instructional Activities

- Lesson 21: Ball Bouncer Room Navigation** Students set up the room navigation for their game according to the game document and upload their GMZ file for teacher review. **CRD, AAP, DAT**
- Lesson 23: Guided Lessons Completed** Student files show that room navigation, including moving to the end room when the ball hits the goal is complete. Students export and upload their tested game GMZ file for teacher review. **CRD, DAT**
- Lesson 24: Create Playing Pieces Workshop** Game flow should begin at the start screen and move to the main level when the play button is clicked. All five playing piece objects should be created and placed in the main room at the appropriate location in the bin area. Once students have completed the lessons and successfully playtested their game, they need to export the GMZ file and upload it for teacher review. **CRD, AAP, DAT**
- Lessons 21 - 24: Game Design Journal** Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Instructional Video:** Creating More Sprites

- **Instructional Video:** Coding Blocks
- **Instructional Video:** Incorporating the Goal

Module 7

Ball Bouncer Game Mechanics

Timeframe: 6 Lessons -- Approximately 10 hours

Module 7	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 25: Placing the Playing Pieces AAP; CTP 1, 2, 3, 4 ● Lesson 26: Taking a Closer Look AAP; CTP 1, 2, 3, 4 ● Lesson 27: User Interface AAP, DAT; CTP 1, 2, 3, 4 ● Lesson 28: Global Variables AAP; CTP 2, 3, 4 ● Lesson 29: Adding a Power Up AAP; CTP 2, 3, 4 ● Lesson 30: On Your Own Workshop CRD, DAT, IOC; CTP 1, 2, 3, 4 	<ul style="list-style-type: none"> ● How can Boolean variables be used to control dragging and dropping playing pieces? ● What fundamentals are used throughout games programming? ● What game elements need to be added to complete level design? ● Why is a global variable needed? ● What is the purpose of a power-up? ● How does a power-up add interest to the game? ● What should you be evaluating when playtesting your game?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Program logic ● Boolean logic ● Truth tables ● User Interface ● Game development cycle 	<ul style="list-style-type: none"> ● Boolean variables ● Compound conditionals ● Coordinate math ● Variable scope ● Variable types ● Constants ● Objects and instances

	<ul style="list-style-type: none"> ● Nested if statements ● Logical operators ● Dot notation
Questions	<ul style="list-style-type: none"> ● Module 7 Quiz ● AP CSP Topic Formative Assessment
Outcomes	<ul style="list-style-type: none"> ● Apply GML Scripting skills <ul style="list-style-type: none"> ○ Use Boolean variables, Boolean logic, constants, and nested if statements ○ Make decisions using computations based on instance’s coordinates ● Engage in the iterative process to test and debug the game

Instructional Activities

Lesson 25: The Rest of Pieces Students modify other playing pieces using the diamond object as a guide. Students playtest, address errors as needed, and upload the GMZ file for teacher review.

AAP

Lesson 26: Variables and Conditionals Practice Students provide written answers to a series of questions to show their code tracing prowess. They describe the error or determine the outcome when the code shown is run. **AAP**

Lesson 28: Relational Operators Students evaluate (and write) expressions using relational operators. **AAP**

Lesson 28: Instances and Variables Students read a scenario that analyzes instance vs. global variables. They then create a graphic organizer or multimedia presentation to demonstrate their understanding. Their visual, in turn, can be shared and discussed with other students to lead to deeper understanding. **AAP**

Lesson 28: Progress Check Students evaluate game elements and game mechanics that they feel would improve the game. Students identify these elements and provide a written plan for iterations. **CRD**

Lesson 29: How to Prevent Paddle from Rotating into Wall This is an online discussion question that has students suggesting ways to prevent the paddle in the game from rotating into one of the four walls. This activity gives

students an opportunity to brainstorm and sort through possible iterations for game improvement. **AAP**

Lesson 29: Module 7 Guided Lessons Completed Once all Module 7 game mechanics have been coded and tested, students export and upload their completed GMZ file for teacher review. CRD, DAT

Lesson 30: Make It Your Own Students complete the "Finish the Game" tasks. Then they choose at least three enhancements from their Game Design Journal or the Make it Your Own section to implement. **CRD**

Lesson 30: Is it Ready for Prime Time? Through a writing prompt, students evaluate their game and consider changes that would be effective to reach a wider audience and be required for widespread distribution. **CRD**

Lessons 25 - 30: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Instructional Video:** The Drag Function, part 1
- **Instructional Video:** The Drag Function, part 2
- **Instructional Video:** Creating User Interface
- **Instructional Video:** The Goal Top
- **Instructional Video:** Limiting Player Cards
- **Instructional Video:** Adding Power-Ups
- **Instructional Video:** Fixing the Bug

Module 8

Matching Game

Timeframe: 3 Lessons -- Approximately 5 hours

Module 8	
Big Ideas	CRD, DAT, AAP, CSN, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 31: Matching Game Setup AAP; CTP 1, 2, 3, 4 ● Lesson 32: Card Sprites CRD, AAP; CTP 2, 3, 4 ● Lesson 33: Controller Object AAP; CTP 2, 3, 4 	<ul style="list-style-type: none"> ● How is a simple, matching card game programmed? ● What is the purpose of one sprite containing multiple images? ● What is the purpose of the controller object?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Pair Programming ● Set up game flow ● Game timing ● Controller object 	<ul style="list-style-type: none"> ● Using alarms ● Using functions ● Coordinate math
Questions	<ul style="list-style-type: none"> ● Module 8 Quiz ● AP CSP Topic Formative Assessment
Outcomes	<ul style="list-style-type: none"> ● Apply GML Scripting skills <ul style="list-style-type: none"> ○ Manage variables at an advanced level ○ Use the controller object ○ Program alarms and timers, and turning cards over by changing sprites

Instructional Activities

Lesson 33: Research Simulation Games Activity Video games simulations are widespread. Students research examples of how video game simulations are used for training purposes in and create a multimedia presentation to report their findings. **CRD, CSN, IOC**

Lesson 33: Module 8 Guided Lessons Completed Students upload their fully playtested Matching game GMZ file for teacher review. **CRD, DAT**

Lessons 31 - 33: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Instructional Video:** Creating the Card Sprite
- **Instructional Video:** Creating the Alarms

Module 9

Finding Matches

Timeframe: 5 Lessons -- Approximately 9 hours Explore - Impact of Computing Innovation - 8 hours

Module 9	
Big Ideas	CRD, DAT, AAP, CSN, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4, 5, 6
Computing Innovations	Explore - Impact of Computing Innovations
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 34: <u>Managing Variables</u> AAP, CTP 2, 3, 4 ● Lesson 35: <u>Game Timing</u> AAP; CTP 2, 3, 4 ● Lesson 36: <u>Randomizing the Game</u> AAP; CTP 2, 3, 4 	<ul style="list-style-type: none"> ● How are matches determined and what role do variables play in controlling the game? ● How are alarms used to handle game timing? ● How can playability be improved?
<ul style="list-style-type: none"> ● Lesson 37: <u>Game Improvements</u> CRD, IOC; CTP 1, 4 ● Lesson 38: <u>Level Up</u> AAP; CTP 2, 3, 4 	<ul style="list-style-type: none"> ● What improvements can be made to the matching game? ● What changes are necessary to change a sprite's subimages?

Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Flowcharts ● Pseudocode 	<ul style="list-style-type: none"> ● Conditionals ● Global variables
<p>Questions</p>	<ul style="list-style-type: none"> ● Module 9 Quiz ● AP CSP Topic Formative Assessment
<p>Outcomes</p>	<ul style="list-style-type: none"> ● Apply GML scripting skills <ul style="list-style-type: none"> ○ Use conditionals and modulus operator ○ Apply randomization to the game ○ Use alarms ● Engage in the iterative process to test and debug the game ● Gain a deep understanding of computer innovations

Instructional Activities

Lesson 36: Module 9 Guided Lessons Completed Students upload their fully playtested Matching game GMZ file for teacher review. This represents the game version following completion of the guided lessons. **CRD, DAT, CSN**

Lesson 37: Finish the Basic Game Workshop Students upload their completed Matching Game GMZ file. Teacher review includes whether the UI is properly set up, gives appropriate feedback, and handles special test cases appropriately. **CRD, DAT, CSN**

Lesson 38: Edit Sprites Workshop Students add new images to their Matching game. Students access Creative Commons images to understand how computing has enabled broader access. Images should be resized and edited so that the game has a unique theme. Once inserted into the game and

playtested students should upload their GMZ file for teacher review. **CRD, DAT, CSN**

Lessons 34 - 38: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

At end of Module 9: Explore - Impact of Computing Innovations Students complete the Computing Innovations activities utilizing 8 hours of class time. Students should use the AP rubric and task guidelines to ensure all requirements are met. **CSN, IOC; CTP 1, 5, 6**

Instructional Resources

- **Instructional Video:** Checking for Matches
- **Instructional Video:** Fixing the Win Condition
- **Instructional Video:** Random Card Placement

Module 10

31 Game Setup

Timeframe: 6 Lessons -- Approximately 8 hours

Module 10	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 39: Set Up Playing Board CRD, DAT; CTP 1, 2, 3, 4 ● Lesson 40: For Loop AAP; CTP 2, 3, 4 ● Lesson 41: Arrays AAP; CTP 2, 3, 4 ● Lesson 42: Managing the Deck AAP; 1, 2, 3, 4 	<ul style="list-style-type: none"> ● What is required to set up game navigation when a game is started? ● How can lines of code be repeated? ● How are arrays used in programming? ● How is the deck of cards represented virtually? ● What programming is necessary to be able to score the cards?
<ul style="list-style-type: none"> ● Lesson 43: More Scripts AAP; CTP 1, 2, 3 ● Lesson 44: Deal the Hand Workshop DAT; CTP 1 	<ul style="list-style-type: none"> ● What planning and programming is necessary to set up the cards?

<p align="center">Computer Science / Game Design Topics</p>	<p align="center">Coding Concepts</p>
<ul style="list-style-type: none"> ● Pair Programming ● Set up game flow ● Loops ● Arrays ● Writing algorithms ● Implement game mechanics 	<ul style="list-style-type: none"> ● For loops ● Arrays ● Scripts ● Nested for loops ● Scripts (user-defined functions) ● Alarms
<p>Questions</p>	<ul style="list-style-type: none"> ● Module 10 Quiz ● AP CSP Topic Formative Assessment
<p>Outcomes</p>	<ul style="list-style-type: none"> ● Apply GML scripting skills <ul style="list-style-type: none"> ○ Demonstrate game flow in the Project 31 game ○ Describe data structures ○ Create one and two dimensional arrays, and loops ○ Identify variable scope ○ Use debug messages to test data structure ○ Consider additional detail on for loops and array indexing ○ Create and use GML scripts <ul style="list-style-type: none"> ■ Passing arguments ■ Returning values

Instructional Activities

Lesson 39: Playing 31 This activity provides an opportunity for students to post and respond to a discussion thread explaining their analysis of game mechanics used in the traditional card game 31 and how they will be applied in creating a digital version of the game. **CRD, IOC**

Lesson 41: Manipulating Arrays In this assignment students have the opportunity to use array notation to access cells of tables and to manipulate the contents. **AAP**

Lesson 43: Module 10 Guided Lessons Completed After thoroughly playtesting their game, students upload their GMZ file for teacher review. Functionality includes setup of room navigations and one card used for testing. **CRD, DAT**

Lesson 44: Deal the Hand Students have written code to set up room navigation, build a virtual deck, create objects for the player and opponent's hands, and dealt the first card hand. After thoroughly playtesting their game, students export and upload their GMZ file for teacher review. **AAP, DAT**

Lessons 39 - 44: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Instructional Video:** How to Play Scat: Card Games
- **Instructional Video:** Setting the Sprites
- **Instructional Video:** For Loop
- **Instructional Video:** Nested For Loop
- **Instructional Video:** Building the Deck
- **Instructional Video:** Swapping Two Cards
- **Instructional Video:** Dealing the Cards

Module 11

Build 31

Timeframe: 4 Lessons -- Approximately 8 hours

Module 11	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 45: The Player’s Turn AAP; CTP 2, 3, 4 ● Lesson 46: The Computer’s Turn AAP; CTP 2, 3, 4 ● Lesson 47: End the Hand AAP; CTP 2, 3, 4 ● Lesson 48: Finish the Game DAT; CTP 1 	<ul style="list-style-type: none"> ● What steps are required to code the player’s turn? ● What steps are necessary for the computer to take a turn? ● What needs to be done to end a hand? ● What improvements can be made to 31?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Implement game mechanics ● Implement game feedback ● Build and test feedback and game timing 	<ul style="list-style-type: none"> ● Scripts (user-defined functions) ● Alarms ● Develop and test
Questions	<ul style="list-style-type: none"> ● Module 11 Quiz ● AP CSP Topic Formative Assessment
Outcomes	<ul style="list-style-type: none"> ● Utilize key elements of a game design document ● Implement the game development process ● Apply gained knowledge to build the Project 31 game
	<ul style="list-style-type: none"> ● Apply iteration to debug the Project 31 game

Instructional Activities

Lesson 48: 31 Game Project Students have created a digital game version of the card game 31. Once tested and all errors have been corrected, students export their project and upload the compressed file for teacher review.

Students also describe the original change made to the game. **CRD, DAT, AAP**

Lesson 48: 31 Game Development Process Reflection Students write an essay about the process they followed to write the card game 31. Their essay should include detailed explanation of a section of their code, an overview of their project plan, and challenges during testing and how they overcame them. **CRD, IOC**

Lessons 45 - 48: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Instructional Resources

- **Instructional Video:** Discard
- **Instructional Video:** Selecting a Card from Discard

Module 12

Sky is Falling Cut Scene

Timeframe: 5 Lessons -- Approximately 7 hours

Module 12	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 49: Evolution of Transmedia World IOC; CTP 1 ● Lesson 50: Begin the Cut Scene CRD, AAP; CTP 1, 2, 3 ,4 ● Lesson 51: Construct the Timeline CRD, AAP; CTP 1, 2 ● Lesson 52: Finish the Cut Scene, AAP; CTP 2, 3, 4, ● Lesson 53: Cut Scene Workshop, DAT, IOC; CTP 1 	<ul style="list-style-type: none"> ● How is game navigation set up? ● How is a timeline used in GameMaker? ● What is a persistent object and when should it be used? ● How can horizontal and vertical speed be controlled and used? ● What can be done to make transitions smoother?

Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Set up game flow ● Use animation ● Use timelines ● Image alpha levels ● Persistent objects 	<ul style="list-style-type: none"> ● Functions ● Alarms ● Coordinate math
<p>Questions</p>	<ul style="list-style-type: none"> ● Module 12 Quiz ● AP CSP Topic Formative Assessment
<p>Outcomes</p>	<ul style="list-style-type: none"> ● Use cut scenes ● Use timelines to control when something happens ● Use animation ● Use layers and depth

Instructional Activities

Lesson 50: Make Lightning Move with Cloud Students revisit the cut scene previously coded where lightning only strikes when a cloud is not moving. Students change this so that the lightning object moves with the cloud object. **CRD, AAP**

Lesson 53: Refine the Cut Scene Once students complete the cut scene they evaluate the timing and add additional steps to improve the scene. After coding and testing, they export and upload their The Sky is Falling GMZ file for teacher review. **CRD, AAP, DAT**

Lessons 49 - 53: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they

engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Module 13

Sky is Falling Game

Timeframe: 5 Lessons -- Approximately 4 hours

Module 13	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 54: Animals Fall AAP; CTP 2, 3, 4 ● Lesson 55: Saving the Animals AAP; CTP 1, 2, 3, 4 ● Lesson 56: Game Timers and UI AAP; CTP 1, 2, 3, 4 ● Lesson 57: Restarting the Game AAP: 2, 3, 4; CTP 2, 3, 4 	<ul style="list-style-type: none"> ● How are the animal’s game mechanics implemented in code? ● How is code used to move two instances in sync? ● How can feedback be added to the game to let the players know how they are doing? ● What variables must be reset when the game is restarted?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Implement game mechanics ● Controlling spawning using percentages ● Build and test feedback and game timing 	<ul style="list-style-type: none"> ● Using dot notation ● Alarms ● Conditionals ● Functions ● Switch statements ● Develop and test
Questions	<ul style="list-style-type: none"> ● Module 13 Quiz ● AP CSP Topic Formative Assessment
Outcomes	<ul style="list-style-type: none"> ● Use conditionals at an advanced level

	<ul style="list-style-type: none"> ● Move one instance with another instance ● Create effective User Interface
--	--

Instructional Activities

Lesson 55: Captured Animals Investigation Students analyze the code that controls an animal’s collision with the boat. They make suggested changes to the conditional checks to investigate the effect on playing the game. Through a writing prompt, they report their findings. **CRD, DAT**

Lesson 55: Compare Search Algorithms Students compare linear and binary searches. The algorithms, conditions for use, and efficiency comparisons are investigated. **DAT**

Lesson 56: Can the Computer Solve all Problems? Computational problems, that is. Students use given sources, or research their own, to investigate what it means to solve a problem in reasonable time, to be unsolvable, or to be undecidable. **IOC**

Lesson 57: Play Again Workshop Once all functionality is working from following the guided lessons, students add code to restart the game. After testing they export and upload their The Sky is Falling GMZ file for teacher review. **CRD, AAP, DAT**

Lessons 54 - 57: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Module 14

Sky is Falling Enhancements

Timeframe: 5 Lessons -- Approximately 8 hours

Module 14	
Big Ideas	CRD, DAT, AAP, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4, 5
Computing Innovations	
Lessons	Essential Questions

<ul style="list-style-type: none"> ● Lesson 58: Lives and Capacity Bar AAP; CTP 1, 2, 3, 4 ● Lesson 59: Boat Control AAP; CTP 2, 3, 4 ● Lesson 60: Creating Paths AAP; CTP 2, 3, 4 ● Lesson 61: Sound AAP, DAT; CTP 1, 2, 3, 4, 5 ● Lesson 62: Create an Original Cut Scene CRD, AAP; CTP 1, 2, 3, 4 	<ul style="list-style-type: none"> ● How can online communities and coding forums help when adding new features? ● What factors should affect the speed of the boat? ● How are path resources used? ● How is sound added to a game? ● What steps are necessary to create an original cut scene?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Use coding forums ● Use sound in a game ● Game Development cycle 	<ul style="list-style-type: none"> ● Sound functions ● Control animations ● Develop and test
Questions	<ul style="list-style-type: none"> ● Module 14 Quiz ● AP CSP Topic Formative Assessment
Outcomes	<ul style="list-style-type: none"> ● Use sound in a game ● Use paths in a game ● Engage in the iterative process to design an original cut scene

Instructional Activities:

Lesson 59: Improving Boat Control Students make improvements to how the boat’s movement and height is controlled and report on the effect of their changes. **CRD, AAP**

Lesson 61: Game Sound Research Students research different sound file formats and create a digital presentation to report what they have learned. **IOC**

Lesson 61: Sound in Games You Play This activity provides an opportunity for students to post and respond to a discussion thread talking about how sound is used in games they play. **IOC**

Lesson 61: The Sky is Falling Completed Game Students upload their completed Sky is Falling Game GMZ file. Teacher review includes whether the game mechanics work properly, the sun moves along a path, and sound is used effectively in the game. **CRD, AAP, DAT**

Lesson 62: Original Cut Scene Design Document Students document their plans to design and code an original level by completing a one page design document. Students upload their completed planning document for teacher review. **CRD, DAT**

Lesson 62: Create Original Cut Scene Once students have coded and tested their cut scene they export and upload their completed GMZ GameMaker project file for teacher review. **AAP, DAT**

Lesson 62: Cut Scene Development Reflection Students will write an essay about the process they followed to write the original cut scene. Their essay should include detailed explanation of a section of their code and challenges during testing and how they overcame them. **CRD, IOC**

Lessons 58 - 62: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Module 15

Create Performance Task

Timeframe: 1 Lesson -- 12 hours

Create - Applications from Ideas Performance Task (12 hours class time)

Module 15	
Big Ideas	CRD, DAT, AAP, CSN, IOC
Computational Thinking Practices	CTP 1, 2, 3, 4,5, 6
Computing Innovations	Create Performance Task
Lessons	Essential Questions
<ul style="list-style-type: none"> Lesson 63: Overview of Create Performance Task CRD, DAT, AAP; CTP 1, 2, 3, 4, 5, 6 	<ul style="list-style-type: none"> What are the guidelines for the Performance Task: Create - Applications from Ideas?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> Iterate through the Software development cycle to create a digital product 	<ul style="list-style-type: none"> Summative/authentic assessment of coding concepts and skills learned during the course
Questions	<ul style="list-style-type: none"> AP CSP Topic Formative Assessment

<p>Outcomes</p>	<ul style="list-style-type: none"> ● Use design skills acquired in the course ● Use coding concepts and skills acquired in the course ● Create a digital artifact
------------------------	--

Instructional Activities:

Lesson 63: Create - Applications from Ideas Performance Task Students complete the through-course assessment utilizing at least 12 hours of class time. Students should use the AP rubric and task guidelines to ensure all requirements are met. **CRD, DAT, AAP**

Lesson 63: Create Performance Task Game Design Journal Students write an essay detailing their notes on the process as shown in their Game Design Journals. **CRD, IOC**

Lesson 63: Create Performance Task Review Students upload their completed game for teacher review. **CSN, IOC**

Lesson 63: Game Design Journal Students respond to writing prompts to make entries to their online Game Design Journal that details how they engage in the idea - design - iterate process, code, and analyze digital artifacts process. **CRD, IOC**

Module 16 (post APCSP exam)

Game Design Digital Portfolio Website

Timeframe: 2 Lessons -- Approximately 16 hours

Module 16	
Big Ideas	CRD, CSN, IOC
Computational Thinking Practices	CTP 1, 5, 6
Lessons	Essential Questions
<ul style="list-style-type: none"> ● Lesson 64: Digital Portfolio Website CRD, CSN, IOC; CTP 1, 5, 6 ● Lesson 65: Postmortem IOC; CTP 6 	<ul style="list-style-type: none"> ● What does a professional digital portfolio website look like? ● How can I showcase my computer science skills and talents?
Computer Science / Game Design Topics	Coding Concepts
<ul style="list-style-type: none"> ● Build and Iterate a Digital Portfolio Website 	
Assessments	none
Outcomes	<ul style="list-style-type: none"> ● Develop a digital portfolio website ● Publish a digital portfolio website

Instructional Activities

Lesson 64: Showcasing Your Work Students organize and plan visual structure of their digital portfolio website. Students then write descriptions of why they invested in designing games, what they enjoyed the most about computer game design and coding, explain their choice of game genres (serious games, education, adventure, puzzle, etc.), and articulate their iterative design process. **CRD, IOC**

Lesson 64: Building Your Digital Portfolio Website Students upload and showcase their playable games. Students include a one page design

document that serves as a quick view of their full game design document.

CRD, CSN

Lesson 64: Portfolio Presentation Students present their digital portfolio unpublished website to their peers for feedback. Students improve their website digital portfolios based on peer feedback, publish it to the Internet, and schedule a formal presentation to local business and / or educational leaders. **IOC**

Lesson 65: Postmortem Students complete a full game design journal entry that deconstructs the game design process, describes their success as a computer game developer, and reflects on the importance of advanced computer programming skills in the game design industry. **IOC**

Digital Portfolio Website Guide

1. Your digital portfolio should provide working examples of the games you have designed. If you have uploaded your games to a game design site, provide links to the games. Make sure the links are active. While it is fine to provide more than one example of your best work, note which example you consider your finest work. A separate game design rubric is used to assess the game you are showcasing.
2. Include a one page quick view document of the full game design document you developed for your best work example.
3. If your work has been archived somewhere, make sure to include information and a working link to where that archived game is found.
4. Your digital portfolio should include a description about why you are invested in designing games, what you enjoy most about designing games, and what game design focus particularly interests you. For example, are you interested in designing games for education? Serious games? Action games? Your writing should be insightful and describe your depth of interest in game design.
5. Share a game design experience. This should include iterations made after building a prototype for an internship, game jam, or game you've built for a project. Explain the reasoning behind the iterations and how they improved the playability of the game.
6. Document reflections on a game project. This is called the project postmortem. What went well? What were some challenges? How were those challenges overcome? Focus on your design team experience. Your understanding of the game design process, in particular the role of iteration, needs to be clearly articulated.

7. If you created a digital game, make sure you include the games you have designed. Add information on the role you took in creating each game and your assessment of the role you took within a design team.
8. Enjoy creating your digital portfolio. It should reflect your approach to game design. It also should reflect who you are, your unique creative skills, and your passion for game design.

Zulama Computer Game Digital Portfolio Rubric
(included in course teacher resources)

Criteria	Unsatisfactory	Basic	Proficient	Exemplary	Rating
Score	1	2	3	4	
Selection of Artifacts	Artifacts and work samples do not relate to the purpose of the portfolio.	Some artifacts and samples relate to the purpose of the portfolio.	Several artifacts and samples strongly support the purpose of the portfolio.	All artifacts and samples relate to the purpose of the portfolio.	
Descriptions	No explanation is provided for the importance of included artifacts.	Limited explanation is provided for some of the included artifacts.	Clear explanations are given for included artifacts, but with missing or limited insight into process and iterations.	Clear explanations are provided for all artifacts included in the portfolio, including several that give insight into the candidate's process and iteration.	
Layout	Portfolio lacks organization,	Portfolio is fairly well	Portfolio is well	Portfolio is engaging,	

	inconsistent use of fonts, color, theme, and font styles (bold, underline, italics).	organized but shows some inconsistencies in color, theme, use of fonts, and font styles.	organized, easily navigated and consistent in color, theme, use of fonts, and font styles.	well organized, and visually pleasing and consistent in color, theme, use of fonts, and font styles.	
Writing Quality	Writing shows several spelling, grammar, and syntax errors.	Writing shows few spelling, grammar, and syntax errors but is in need of a final review.	Writing is mostly error free.	Writing shows meticulous attention to detail and indicates close review of grammar, syntax, and font styles.	

Game Design Document	Major design details are missing from the Design Document. The scope and intent of the project is unclear.	Details are missing from the Design Document, leading to misinterpretation of parts of the plan.	The Design Document is clear, unambiguous, and complete.	The Design Document includes a student designed summary cover page, is clear, and complete.	
Aesthetics	Minimal use of audio and graphics in designed games.	Some use of audio and graphics, but both are lacking in creativity.	Good use of audio and graphics that add high interest to the game.	Exceptional use of audio and graphics, creating a highly interesting and captivating game.	

Implementation	The game mechanics do not function properly, hindering the playability of the game.	The game mechanics generally function but are not engaging for players.	The game mechanics function well and succeed in engaging players at some points in the game.	The game mechanics are well-designed and function well, resulting in a highly playable and engaging game.	
Design Team Collaboration	Has some difficulty working with others. At times resists the ideas of others. Lacks leadership and resists iteration.	Shows respect for new ideas, works effectively with individuals of diverse opinions. Plans and interacts with team in productive ways.	Works effectively with individuals embraces brainstorming and iteration. Provides team leadership.	Allows others to take the lead, embraces the ideas of others, fulfills team role with extra effort, and embraces the iterative process.	
Postmortem	Reflections do not indicate an understanding of the iteration in the game design process.	Reflections indicate some understanding of iterative process in game design.	Reflections include a good description of the importance of iteration in game design.	Reflections indicate a complete description of the worth of the iterative process.	
Total Score					

TEACHER NOTES

AP English Language and Composition

ADVANCED PLACEMENT LANGUAGE AND COMPOSITION

COURSE DESCRIPTION

In AP English Language and Composition, students investigate rhetoric and its impact on culture through analysis of notable fiction and nonfiction texts, from pamphlets to speeches to personal essays. The equivalent of an introductory college-level survey class, this course prepares students for the AP exam and for further study in communications, creative writing, journalism, literature, and composition.

Students explore a variety of textual forms, styles, and genres. By examining all texts through a rhetorical lens, students become skilled readers and analytical thinkers. Focusing specifically on language, purpose, and audience gives them a broad view of the effect of text and its cultural role. Students write expository and narrative texts to hone the effectiveness of their own use of language, and they develop varied, informed arguments through research. Throughout the course, students are evaluated with assessments specifically designed to prepare them for the content, form, and depth of the AP Exam.

COURSE TEXTS

Students will need access to the following texts, which they will obtain through the school or through their own means.

- *Into the Wild*, Jon Krakauer (Anchor, 1996). ISBN-10: 0385486804 / ISBN-13: 978-0385486804
- *The Great Gatsby*, F. Scott Fitzgerald (Scribner, 2004). ISBN-10: 0743273567 / ISBN-13: 978-0743273565
- *A Raisin in the Sun*, Lorraine Hansberry (Vintage, 2004). ISBN-10: 0679755330 / ISBN-13: 978-0679755333
- *The Way to Rainy Mountain*, N. Scott Momaday (University of New Mexico Press, 1976). ISBN-10: 0826304362 / ISBN-13: 978-0826304360

Non-Fiction Readings	Fiction Readings
Jon Krakauer, <i>Into the Wild</i>	F. Scott Fitzgerald, <i>The Great Gatsby</i>
N. Scott Momaday, <i>The Way to Rainy Mountain</i>	Lorraine Hansberry, <i>A Raisin in the Sun</i>

Patrick Henry, "Speech of Patrick Henry, March 23, 1775, in the Convention of Delegates of Virginia,"	Edgar Allan Poe, "The Raven" and "The Philosophy of Composition"
Thomas Paine, <i>Common Sense</i>	Mark Twain, "The War Prayer"
Thomas Paine, <i>The American Crisis</i>	Excerpts from <i>As I Lay Dying</i> by William Faulkner
"A Letter to Timothy Pickering about the Writing of the Declaration by John Adams"	Salvation by Langston Hughes
<i>The Declaration of Independence</i>	Katherine Anne Porter, "The Jilting of Granny Weatherall" from <i>Flowering Judas and Other Stories</i> .
<i>The Constitution</i>	T. S. Eliot, "The Love Song of J. Alfred Prufrock," in <i>Prufrock and Other Observations</i>
<i>Tinker v. Des Moines Independent Community School District</i>	Rita Dove, "Demeter's Prayer to Hades", from MOTHER LOVE
Susan B. Anthony, "Address of Susan B. Anthony," June 1873, in <i>An Account of the Proceedings on the Trial of Susan B. Anthony</i>	Judith Ortíz Cofer, "Gravity"
Ralph Waldo Emerson, from "The Essay on Self-Reliance"	Alan Weisman, <i>The World Without Us</i>
Henry David Thoreau, from <i>Walden; or, Life in the Woods</i>	Ray Bradbury, "Pedestrian"
Henry David Thoreau, "Resistance to Civil Government," in <i>Aesthetic Papers</i>	Kurt Vonnegut, "Harrison Bergeron"
Mark Twain, from <i>Life on the Mississippi</i>	Ted Chiang, "Exhalation" from EXHALATION: STORIES
Abraham Lincoln, <i>Second Inaugural Address</i>	
Frederick Douglass, Chapter V, in <i>Narrative of the Life of Frederick Douglass, an American Slave</i>	

"What to the Slave Is the Fourth of July?" July 5, 1852 by Frederick Douglass	
Samuel R. Thurston. "Oregon," <i>New-York Daily Tribune</i> , December 12, 1850	
Margaret Frink, <i>Journal of the Adventures of a Party of California Gold-seekers</i> , n.p., 1897	
Frederick Jackson Turner, "The Significance of the Frontier in American History," in <i>Report of the American Historical Association</i> , 1893,	
Every Man a King by Huey P. Long	
Franklin D. Roosevelt, "Address by Franklin D. Roosevelt, 1933," Swearing-In, Joint Congressional Committee on Inaugural Ceremonies,	
Adam Clayton Powell, Jr., "Speech on Civil Rights (1955),"	
Margaret Chase Smith, "Declaration of Conscience,"	
President Lyndon B. Johnson, "Special Message to the Congress: The American Promise," March 15, 1965	
John F. Kennedy, "Address at Rice University on the Nation's Space Effort," September 12, 1962	
James Baldwin, "Notes of a Native Son," in <i>Notes of a Native Son</i>	
Zora Neale Hurston, "How It Feels to Be Colored Me," <i>The World Tomorrow</i> .	
Tim O'Brien, <i>The Things They Carried</i>	
Amy Tan, "Fish Cheeks,"	
Samuel Griswold Goodrich, "Red Jacket's Speech," <i>Lives of Celebrated American Indians</i>	

Nicholas Carr, "Is Google Making Us Stupid?," July 1, 2008, <i>Atlantic Monthly</i> online	
Ray Kurzweil, "The Coming Merging of Mind and Machine," ScientificAmerican.com, March 23, 2009	

COURSE DESIGN

This two semester course is split into eight units (four units per semester) based on either thematic ideas or literary eras in chronological order. Each unit includes three lessons that focus on the analysis of at least three different texts.

COURSE STRUCTURE

Unit	Title
Semester One	
1	The American Revolution
2	Romanticism and Transcendentalism
3	The American Narrative
4	Modernism and the American Dream
Semester Two	
5	Modernism and Language
6	Redefining Home
7	Fractured Identities
8	The Influence of Science and Technology

LESSON STRUCTURE AND INSTRUCTIONAL STRATEGIES

With the exception of Semester 2 Units 1 and 3, which have only the first 11 activities listed below, each lesson is made up of 14 activities:

1. Journal: The journal provides an outlet for informal student writing that anticipates the ideas that will follow in the lesson.
2. Reading: Satellite Instructional Materials are interpretations of, conversations with, insights on, and criticisms of Anchor Texts. These readings may be in textual, visual, audio, or video form and are accompanied by an analytical reading guide.
3. Study: The first study in a lesson is an interactive instructional activity, functioning to present new information and to prepare students for coming materials. Studies will include textual, visual, audio and video instruction, as well as frequent embedded checkpoint opportunities to confirm and underscore student comprehension.
4. Quiz: Upon completion of the study, students will be assessed on their learning with a 10-question quiz.
5. Reading (Anchor Text): This reading is the anchor text, the focal point of the lesson. These readings connect to the previous readings and study and are accompanied by an analytical reading guide.
6. Study: The second study in a lesson assists students in thoroughly analyzing the anchor text by providing interaction

with selected portions of the text.

7. Quiz: Upon completion of the study, students will be assessed on their learning with a 10-question quiz.
8. Study: The third study in a lesson walks students through the development of an essay or speech draft (argumentative, analytical, or narrative).
9. Check-Up: The check-up is a grammar or speaking-based skill study. In many cases, the skills in the check-up are integrated into the revision task.
10. Practice or Project: The first practice or project in a lesson is the revision of the draft students created in the third STD. Students finalize their draft by implementing revision strategies.
11. Reading: Students will read an additional text that connects to the focus of the lesson, accompanied by an analytical reading guide.
12. Study: The fourth study in a lesson assists students in thoroughly analyzing the text by providing interaction with selected portions of the text.
13. Quiz: Upon completion of the study, students will be assessed on their learning with a 10-question quiz.
14. Check-Up: The second check-up of the lesson will provide students with an AP-style practice multiple choice test or practice timed essay prompt.

Unit and Semester Exams

At the end of each unit students take a two-part exam. Part 1 of the exam consists of multiple choice questions, modeled after the multiple choice section of the AP Exam. Part 2 of the exam asks students to create short-responses to AP style analysis prompts based on their readings over the course of the Unit.

At the end of each semester students take a proctored exam modeled after the AP Exam. The Semester Exam consists of 40 multiple choice questions and three free-response questions that mimic the AP Language and Composition free-response prompts.

Curricular Requirements

The course is structured to address curricular requirements in each semester and in a variety of units, giving students the chance to refine their skills of analysis and argument over the progression of the course instead of in a single unit.

Students will address the “big ideas” of rhetorical situation, claims and evidence, reasoning and organization, and style, continually being asked to analyze texts and develop arguments throughout each unit and lesson in the course.

Curricular Requirement	Semester 1	Semester 2
------------------------	------------	------------

<p>4: The course provides opportunities for students to develop the skills in Skill Category 2 – Rhetorical Situation (Writing): Make strategic choices in a text to address a rhetorical situation.</p> <p>6: The course provides opportunities for students to develop the skills in Skill Category 4 – Claims and Evidence (Writing): Analyze and select evidence to develop and refine a claim.</p> <p>8: The course provides opportunities for students to develop the skills in Skill Category 6 – Reasoning and Organization (Writing): Use organization and commentary to illuminate the line of reasoning in an argument.</p> <p>11: The course provides opportunities for students to write argumentative essays synthesizing material from a variety of sources.</p>	<p>Narrative Unit 2, Lesson 2: Develop a narrative poem. Unit 3, Lesson 1: Write a humorous personal narrative essay, incorporating techniques such as understatement and hyperbole.</p> <p>Analysis Unit 1, Lesson 2: Analyze the language of the Declaration of Independence.</p> <p>Unit 2, Lesson 1: Analyze the methods Whitman and Dickinson use to develop a specific tone. Unit 3, Lesson 2: Analyze the objective and subjective narrative formats of Douglass and Twain.</p> <p>Argumentative Unit 1, Lesson 1: Argue for or against the colonies’ separation from England (taking on role of colonist). Unit 2, Lesson 2: Argue for the effectiveness of a specific form of peaceful protest. Unit 3, Lesson 3: Argue for or against the creation of a monument for the pioneers.</p> <p>Argumentative (research-based) Unit 4, Lesson 1-3: Argue for or against the viability of the American Dream in today’s culture.</p>	<p>Narrative Unit 1, Lesson 3: Write a narrative that incorporates the stream-of-consciousness writing style. Unit 3, Lesson 2: Write a personal narrative that addresses a cultural conflict.</p> <p>Expository (research-based) Unit 2, Lesson 1-3: Explain the causes or effects of the civil rights movement.</p> <p>Unit 4, Lesson 1: Explain an environmental problem.</p> <p>Analysis Unit 1, Lesson 2: Analyze the language of a Modern poem and how it contributes to tone or purpose. Unit 3, Lesson 3: Analyze how the structure of <i>The Way to Rainy Mountain</i> enhances meaning. Unit 4, Lesson 4: Analyze the purpose of a short story.</p> <p>Argumentative Unit 3, Lesson 1: Argue for or against the appropriateness of the Vietnam memorial. Unit 4, Lesson 2: Argue for or against the belief that technology has been detrimental to our society.</p>

AP English Literature and Composition

AP® English Literature and Composition Syllabus

Curricular Requirements	Page(s)
CR1 The course is structured by unit, theme, genre, or other organizational approach that provides opportunities to engage with the Big Ideas throughout the course: Character, Setting, Structure, Narration, Figurative Language, Literary Argumentation.	6–15
CR2 The course includes works of short fiction, poetry, and longer fiction or drama from the range of literary periods (pre-20 th century and 20 th /21 st centuries).	6–15
CR3 The course provides opportunities for students to develop the skills in Skill Category 1: Explain the function of character.	6–8, 10–12, 14
CR4 The course provides opportunities for students to develop the skills in Skill Category 2: Explain the function of setting.	7–15
CR5 The course provides opportunities for students to develop the skills in Skill Category 3: Explain the function of plot and structure.	6–15
CR6 The course provides opportunities for students to develop the skills in Skill Category 4: Explain the function of the narrator or speaker.	7, 11, 13–14
CR7 The course provides opportunities for students to develop the skills in Skill Category 5: Explain the function of word choice, imagery, and symbols.	6–11, 13–15
CR8 The course provides opportunities for students to develop the skills in Skill Category 6: Explain the function of comparison.	7
CR9 The course provides opportunities for students to develop the skills in Skill Category 7: Develop textually substantiated arguments about interpretations of a portion or whole text.	4, 6–15
CR10 The course provides opportunities for students to write essays that proceed through multiple stages or drafts, including opportunities for conferring and collaborating with teacher and/or peers.	6–15

Big Ideas

Big Idea	Enduring Understanding	Page(s)
1. Character Skill Category 1	Characters in literature allow readers to study and explore a range of values, beliefs, assumptions, biases, and cultural norms represented by those characters.	6–10, 12, 14
2. Setting Skill Category 2	Setting and the details associated with it not only depict a time and place, but also convey values associated with that setting.	7–12, 14–15
3. Structure Skill Category 3	The arrangement of the parts and sections of a text, the relationship of the parts to each other, and the sequence in which the text reveals information are all structural choices made by a writer that contribute to the reader's interpretation of a text.	6–15
4. Narration Skill Category 4	A narrator's or speaker's perspective controls the details and emphases that affect how readers experience and interpret a text.	7–10, 12, 14
5. Figurative Language Skill Categories 5 and 6	Comparisons, representations, and associations shift meaning from the literal to the figurative and invite readers to interpret a text.	6–8, 10, 12–15
6. Literary Argumentation Skill Category 7	Readers establish and communicate their interpretations of literature through arguments supported by textual evidence.	8, 12, 14

Course Summary

In this course, students complete a full academic year of coursework similar to a first-year, college-level English course. This course covers the framework, reading and writing practices, and curriculum requirements for an AP® English Literature and Composition course as required by the College Board. This course combines practical experience in reading and analyzing imaginative and expository texts and will prepare students to take the AP English Literature and Composition exam in the spring. The overarching topics in this course are literary analysis and the drafting and revising of interpretative, expository, analytical, and argumentative writing.

Students learn through direct instruction, regular checks and practices, discussions, portfolios, and a project completed during the second semester. Students also take a practice assessment for the AP English Literature and Composition exam prior to the actual AP English Literature and Composition test date.

Course Units

Semester A	Semester B
<ul style="list-style-type: none"> • Unit 1: Course Overview • Unit 2: Reading Critically Across Genres • Unit 3: Poetry: Language, Style, and Tone • Unit 4: Novel Study • Unit 5: Mid-Semester Check • Unit 6: Introduction to Drama • Unit 7: Drama: <i>King Lear</i> • Unit 8: Semester Exam 	<ul style="list-style-type: none"> • Unit 1: Course Overview • Unit 2: Short Fiction • Unit 3: Poetry: Sound, Syntax, and Structure • Unit 4: Mid-Semester Check • Unit 5: Novel and Culture: <i>Invisible Man</i> • Unit 6: Review and Full-Length Practice Exam • Unit 7: Semester Project: Writing a Comparative Analysis • Unit 8: Semester Exam

Writing Assignments

In each lesson, students respond in a notebook to questions that reinforce the instruction from the lesson and respond to assigned readings and other resources. As they read the core texts, students also write regular entries in a reader-response journal, which they submit to be assessed twice a semester. Students also complete longer portfolios that require them to synthesize lesson content from across lessons and resources to analyze certain exam topics in-depth.

In addition to these writing activities, students also have opportunities throughout the course to practice the style of writing they will use on the AP exam: timed,

focused writing. Lessons throughout the course offer students sample AP passages and writing prompts, to which they must respond in class within a designated time period. Some of these writing-intensive lessons are followed by a revision lesson that allows students to revise and rewrite their responses [CR10].

Drafting and Revision

Portfolios are structured to allow for prewriting/drafting, teacher feedback, and revision. Students are given designated time during lessons to work on these portfolio assignments, but there is also an expectation that additional drafts and revisions take place outside of class [CR9].

Draft assignments come early in any given unit, allowing for time to teachers to provide feedback to students according to criteria on a rubric. As in keeping with the expected rigor of any AP course, this teacher feedback is wide-ranging, deep, and exhaustive. Teachers provide feedback [CR10] to students related to the specific guidelines of a particular assignment, as well as the following criteria: use of a wide-ranging, domain-specific vocabulary; use of a variety of sentence structures; logical organization of a written work; use of illustrative detail and examples, with a balance between the specific and the general; and effective use of rhetoric as related to tone, voice, and style.

Students are expected to implement teacher feedback—as well as demonstrate new skills and knowledge they have acquired in the unit—into the final draft of a portfolio, typically submitted near the end of a given unit.

Assessments

Throughout the course, a variety of formative and summative assessments are used to assess student learning and prepare students for the expectations of the AP English Literature and Composition exam. Students are provided with ample opportunity for skill practice, engagement in meaningful discourse with their peers, and application of their understanding via tasks that are representative of real-world scenarios. Summative assessment types lend themselves to a deeper level of rigor and include portfolios and discussions. Formative assessments are designed to be auto-graded to give students and teachers instant feedback for targeted instruction.

Most lessons contain a quick check assessment that covers the objectives in the lesson, and most units have at least one cumulative quiz that also assesses lesson objectives. Each instructional unit culminates in an online practice to help students review unit concepts and skills, followed by a unit test that consists of multiple choice and short answer and/or essay questions. To aid students in retaining content throughout the course of a semester, a mid-semester check unit appears in

the middle of each semester, featuring a low-risk practice assessment covering the objectives learned up to that point during the semester.

A graded full-length practice exam in the style of the AP English Literature and Composition exam is given at the end of Semester B. This exam closely mimics what students will see on the actual AP exam and includes a mix of multiple-choice questions based on a passage and timed writing prompts that simulate the free-response questions on the AP exam [CR10]. Each semester ends with a semester project and semester exam.

Most units feature a discussion or portfolio that promotes critical thinking by expanding on topics students have learned. Graded assessments and participation all count toward the student's final grade.

LiveLesson® Session: Online Classroom

Students will collaborate synchronously with peers through LiveLesson sessions. These sessions allow students to ask questions and take part in real-time discussions. During these sessions, students have the opportunity to discuss the literature they are reading, as well as to work collaboratively with their peers.

These sessions are also used to reinforce difficult concepts and to provide a low-stakes environment for students to practice new skills and concepts.

Course Outline

Semester A

Unit 1: Course Overview

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Learn about the types of activities that will appear in the course.

Unit 2: Reading Critically Across Genres [CR1, CR2, CR5, CR9] [Big Ideas 1, 3, 5]

In this unit, students will do the following:

- Define genre and identify characteristics of poetry, drama, fiction, and expository prose.
- Differentiate between literary characteristics in specific genres of writing.
- Analyze how textual details and stylistic features contribute to a text's theme.
- Analyze a text's genre, theme, and other stylistic features.

Sample activities in this unit:

- Writing Assignment: Students will read the story "Desiree's Baby," by Kate Chopin, and complete a dialectical notebook entry responding to 8–10 quotations from the story. They will also complete a plot analysis of the story and identify how terms used in the lesson are applied in the story. In addition, they will consider what adjectives they would use to describe a character in the story and *how* they know these things about this character. They will provide support from the text for each of their descriptive terms. [CR3, CR5, CR7, CR9]
- Writing Assignment: Students will read the literary criticism article "Generic Translation and Thematic Shift in Susan Glaspell's 'Trifles' and 'A Jury of Her Peers.'" Then they will write a summary of the article in their notebook. They should include any observations about how this analysis connects to themes they have explored in the works in this unit. Then they will outline an analysis of theme in Susan Glaspell's *Trifles*. They should include a thesis statement clearly asserting a theme, followed by three interpretive assertions, each with three supporting textual details. [CR9]

- Discussion: Students participate in a collaborative discussion about two texts covered in the course so far. They will analyze the texts' treatment of similar or related themes, identifying a common subject and comparing the way the two texts treat the subject. They will also discuss other concepts related to theme, such as form or genre, characterization, types of character, irony, or figurative language. [CR3, CR7, CR8]

Required reading:

- Jane Austin, *Pride and Prejudice* (Chapter 3 excerpt)
- Elizabeth Barret Browning, "XXI," *Sonnets from the Portuguese*
- Elizabeth Barret Browning, "LXIII," *Sonnets from the Portuguese*
- Kate Chopin, "Desiree's Baby"
- Susan Glaspell, *Trifles*

Unit 3: Poetry: Language, Style, and Tone [CR1, CR2, CR5, CR4, CR7, CR8, CR9, CR10] [Big Ideas 1, 2, 3, 4, 5]

In this unit, students will do the following:

- Define and identify examples of imagery and figurative language in poetry, including allusion, irony, metaphor, personification, and simile.
- Analyze the effects of imagery and figurative language on both tone and theme.
- Evaluate the effectiveness of a poet's use of diction, imagery, and figurative language in various styles of poetry.
- Compare and contrast poems from different historical eras.
- Revise writing based on teacher feedback. Sample

activities in this unit:

- Activity: Students will read "Ebb" by Edna St. Vincent Millay and write about how the poet uses comparisons of simile and metaphor to create meaning [CR8]
- Activity: Students rewrite clichéd similes to create fresh comparisons [CR8]
- Activity: Students will analyze use of personification by Robert Frost in "A Brook in the City" [CR8]
- Activity: Students will write an analysis of allusions in "In the Reading Room" by David Ferry [CR8]
- Portfolio: Students will write a critical analysis essay that analyzes the different stylistic choices that two poets from different eras make in developing a similar theme. Their essay will focus on poetry written between

the Renaissance and the Romantic eras. Students will submit a draft to the teacher and submit a revised final essay based on teacher feedback. [CR2, CR3, CR4, CR5, CR6, CR7, CR8, CR9, CR10]

Required reading:

- Selections from Poetry Foundation and the online texts *English Renaissance Poetry* and *English Romantic Poetry*, including the following:
 - William Blake, selections from *Songs of Innocence* and *Songs of Experience*
 - Margaret Atwood, “Siren Song”
 - Nikki Giovanni, “Mothers”
 - W.B. Yeats, “The Second Coming”
 - Matthew Arnold, “Dover Beach”
 - John Keats, “Odes”
 - Gary Soto, “Oranges”
 - John Donne, Selections
 - Lord Byron, “Childe Harold’s Pilgrimage”

Unit 4: Novel Study [CR1, CR2, CR3, CR7, CR4, CR5, CR9, CR10] [Big Ideas 1, 2, 3, 4, 5, 6]

In this unit, students will do the following:

- Examine and analyze the elements of novels, including plot, characterization, dialogue, point of view, theme, tone, voice, and overall structure.
- Evaluate the significance and effectiveness of an author’s use of figurative elements, including figurative language, diction, symbolism, imagery, and motifs.
- Analyze an author’s use of structural elements such as narrative order and syntax on a novel’s theme.
- Compare and contrast the social and cultural values expressed by novels written in a variety of time periods.
- Revise writing based on teacher feedback. Sample

activities in this unit:

- Portfolio: Students will write an argumentative essay interpreting and evaluating the author’s use of figurative language, imagery, symbolism, and tone. Students must make and explain a judgement about how the textual details relate to the artistry and quality of the author’s work. [CR1, CR7, CR9, CR10]

Required reading:

Students will read excerpts from diverse authors and texts, including the following:

- Miguel de Cervantes, *Don Quixote*
- Daniel Defoe, *Robinson Crusoe*
- Fyodor Dostoyevsky, *Notes from Underground*
- George Eliot, *Middlemarch*
- E. M. Forster, *A Room with a View*
- Henry James, *The Portrait of a Lady*
- Edith Wharton, *The Age of Innocence*
- Virginia Woolf, *The Voyage Out*

Students will also choose to read one of these novels independently:

- Jane Austin, *Pride and Prejudice*
- Charlotte Brontë, *Jane Eyre*
- Emily Bronte, *Wuthering Heights*
- Willa Cather, *O Pioneers!*
- Joseph Conrad, *Lord Jim*
- Charles Dickens, *A Tale of Two Cities*
- Charles Dickens, *Great Expectations*
- Gustave Flaubert, *Madame Bovary*
- Thomas Hardy, *Tess of the D'Urbervilles*
- Nathaniel Hawthorne, *The Scarlet Letter*
- James Joyce, *A Portrait of the Artist as a Young Man*
- Herman Melville, *Moby-Dick*
- Mary Shelley, *Frankenstein*
- Mark Twain, *The Adventures of Huckleberry Finn*

Unit 5: Mid-Semester Check [CR1, CR2, CR7, CR5, CR4] [Big Ideas 2, 3, 5]

In this unit, students will do the following:

- Review the topics that they have learned from the beginning of this semester.
- Demonstrate knowledge by completing a graded mid-semester check in the style of the AP English Literature and Composition exam.

Unit 6: Introduction to Drama [CR1, CR2, CR4, CR8, CR9] [Big Ideas 1, 2, 3, 4]

In this unit, students will do the following:

- Define and identify types of drama, including choreopoem, comedy, farce, tragedy, tragicomedy, tragic hero.
- Analyze the influence of cultural, historical, literary, and social contexts on the development of drama.
- Explain the relationship between drama and audience, including how a drama impacts a specific audience in a specific time and place.
- Compare and contrast drama with other forms of writing.
- Engage in collaborative discussion of the cultural and social influences on and effects of drama.

Sample activities in this unit:

- Discussion: Students will participate in a collaborative discussion responding to the first scene in *King Lear*. They will discuss ideas such as the cultural and social values that are evident in this first scene. [CR4]

Required reading: Students will read excerpts from different plays:

- William Congreve, *Love for Love: A Comedy*
- Euripides, *Medea*
- Henrik Ibsen, *A Doll's House*
- William Shakespeare, *King Lear*
- Oscar Wilde, *The Importance of Being Earnest*

Unit 7: Drama: *King Lear* [CR1, CR2, CR3, CR5, CR7, CR5, CR9, CR10] [Big Ideas 1, 2, 3, 4, 5]

In this unit, students will do the following:

- Analyze the key ideas, plot elements, and central characters in a drama, including how characters embody archetypal elements, are motivated to act, and experience transformation.
- Analyze the ways in which a dramatist uses diction and syntax to establish meaning, create voice, and develop tone.
- Identify a dramatist's use of symbolism and motif throughout a play and analyze how the use of these devices affects theme.

- Use evidence from a drama, including a dramatist’s use of plot elements, symbols, characterization, dramatic irony, diction, and syntax, to analyze how a theme is developed.
- Revise writing based on teacher feedback. Sample

activities in this unit:

- Portfolio: Students will analyze how Shakespeare uses elements of drama and literature in *King Lear* to develop the theme of power and corruption. This culminates in an analytical essay in which students use elements from the play—including characterization, point of view, dramatic irony, monologue, soliloquy, figurative language, symbolism, and tone—to explore how Shakespeare develops a central theme. [CR3, CR6, CR7, CR9, CR10]

Required reading: William Shakespeare, *King Lear*

Unit 8: Semester Exam [CR1, CR2, CR7, CR5, CR4, CR9] [Big Ideas 2, 3]

In this unit, students will do the following:

- Review all topics covered this semester.
- Demonstrate knowledge by completing a graded semester exam written in the style of the AP English Literature and Composition exam

Semester B

Unit 1: Course Overview

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Learn about the types of activities that will appear in the course.

Unit 2: Short Fiction [CR1, CR2, CR3, CR4, CR5, CR9, CR10,] [Big Ideas 1, 2, 3, 4, 5, 6]

In this unit, students will do the following:

- Define genre and identify characteristics of short fiction, including setting, plot, character, dialogue, point of view, and theme.
- Identify characteristics of short fiction and analyze their impact on tone, voice, and point of view and the relationship between style and theme.
- Evaluate the impact of short fiction, including those written in nontraditional styles, on cultural and literary norms.
- Analyze a variety of works of short fiction, both traditional and nontraditional, and differentiate between authors' techniques.
- Revise work based on teacher feedback. Sample

activities in this unit:

- Portfolio: Students will analyze a work of fiction, "The Metamorphosis," and write an argumentative essay to explain how its author pushes both socio-cultural and literary boundaries to address important issues of the time period. Students will submit a draft of their analysis to teacher for feedback and revise using feedback [CR1, CR2, CR4, CR10]

Required reading:

- Kate Chopin, "The Awakening"
- Ralph Ellison, *Invisible Man* (Prologue and Chapter 1)
- Charlotte Perkins Gilman, "The Yellow Wallpaper"
- Franz Kafka, "The Metamorphosis"
- Jonathan Swift, "A Modest Proposal"

Unit 3: Poetry: Sounds and Syntax [CR1, CR2, CR5, CR9, CR10,] [Big Ideas 3, 5]

In this unit, students will do the following:

- Define and identify examples of the following types of poetic structures: ballad verse, blank verse, free verse, heroic couplet, and terza rima.
- Analyze and evaluate the effect of syntax on tone and meaning, including the use of rhyme scheme and verse.
- Analyze and evaluate an author’s use of sound devices in poetry, including alliteration, assonance, cacophony, consonance, and onomatopoeia.
- Develop an argument about the quality and overall artistic merit of a contemporary poem.
- Revise writing based on teacher feedback. Sample

activities in this unit:

- Portfolio: Students will write a textual analysis essay that analyzes and evaluates the relationship between new poetic styles and meaning. They will research contemporary poetry and choose a poem from a suggested list that they believe has artistic merit. [CR4, CR5, CR6, CR7, CR9, CR10]

Required reading: Selections from Poetry Foundation and the online texts *English Renaissance Poetry* and *English Romantic Poetry*, including the following:

- Louise Erdrich, “Indian Boarding School: The Runaways”
- Mary Oliver, “Singapore”
- Judith Ortiz Cofer, “Women Who Love Angels”
- T.S. Eliot, “The Love Song of J. Alfred Prufrock”
- Wallace Stevens, “Thirteen Ways of Looking at a Blackbird”
- Robert Frost, “The Oven Bird”
- Amy Lowell, “Venus Transiens”
- William Wordsworth, “Lines Written a Few Miles Above Tintern Abbey”
- Samuel Taylor Coleridge, “The Rime of the Ancient Mariner”
- Percy Bysshe Shelley, Sonnets

Unit 4: Mid-Semester Check [CR1, CR2, CR7, CR5, CR4] [Big Ideas 2, 3, 5]

In this unit, students will do the following:

- Review the topics that they have learned from the beginning of this semester.
- Demonstrate knowledge by completing a graded mid-semester check in the style of the AP English Literature and Composition exam.

Unit 5: Novel and Culture: *Invisible Man* [CR1, CR2, CR3, CR7, CR5, CR6, CR4, CR9, CR10,] [Big Ideas 1, 2, 5, 6]

In this unit, students will do the following:

- Analyze the effect of using characteristics of memoir and first-person point of view on the development of character in *Invisible Man*.
- Evaluate the impact Ellison's use of imagery, figurative language, and symbolism have on the development of theme in *Invisible Man*.
- Analyze the cultural and social context of *Invisible Man* and evaluate their effect on the meaning.
- Evaluate the relationship between Ellison's characterization of the narrator and the cultural themes of the novel.
- Analyze the characteristics of Bildungsroman and existentialism in relation to *Invisible Man*.

Sample activities in this unit:

- Portfolio: Students will use the themes of identity and perception to write an argumentative essay to answer these questions: *How does one become an individual? How is the individual shaped by social and cultural forces?* Students will use excerpts from the novel, as well as information from their own experiences, to answer this question in a well-structured essay. [CR1, CR3, CR4, CR6, CR9, CR10]

Required reading: Ralph Ellison, *Invisible Man*

Unit 6: Review and Full-Length Practice Exam [CR1, CR2, CR7, CR5, CR4, CR10, CR9,] [Big Ideas 2, 3, 5]

In this unit, students will do the following:

- Review the entire course, using the results of the mid-semester check and unit tests to focus this review.
- Complete a full-length practice exam in the style of the AP English Literature and Composition exam, over the course of three days.

Unit 7: Semester Project: Writing a Comparative Analysis [CR1, CR2, CR7, CR5, CR9, CR10] [Big Ideas 3, 5]

In the project unit, students write a comparative analysis using one expository prose text and one fictional text. Their analysis will synthesize information from both texts to explore how authors use elements of literature in both fiction and prose. Students will participate in peer reviews and revise their projects accordingly.

Required reading:

- Rupert Brooke, “Niagara Falls”
- Henry David Thoreau, “Where I Lived, And What I Lived For”
- Ralph Waldo Emerson, “Nature”
- John Muir, “Yosemite”
- Marian Storm, “A Woodland Valentine”

Unit 8: Semester Exam [CR1, CR2, CR7, CR5, CR4, CR9] [Big Ideas 2, 3, 5]

In this unit, students will do the following:

- Review all topics covered this semester.
- Demonstrate knowledge by completing a graded semester exam written in the style of the AP English Literature and Composition exam.

AP Environmental Science

AP Environmental Science

Course Overview

Name	AP Environmental Science
Description	<p>AP Environmental Science provides two semesters of material designed to offer students a solid foundation in introductory college-level environmental science. The course is structured around the four big ideas and the seven science practices. Each semester is divided into four units with two or three lessons in each unit. Those lessons are further divided into several activities in which students read, acquire content knowledge through interactives, complete written practice, take quizzes, and summative assessments.</p> <p>The course provides students with the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world. The course draws upon various disciplines, including geology, biology, environmental studies, environmental science, chemistry, and geography in order to explore a variety of environmental topics. Topics explored include natural systems on Earth; biogeochemical cycles; the nature of matter and energy; the flow of matter and energy through living systems; populations; communities; ecosystems; ecological pyramids; renewable and nonrenewable resources; land use; biodiversity; pollution; conservation; sustainability; and human impacts on the environment. AP Environmental Science prepares students for the AP exam and for further study in science, health sciences, or engineering.</p> <p>The AP Environmental Science course provides a learning experience focused on allowing students to develop their critical thinking skills and cognitive strategies. Scientific inquiry skills are embedded in the direct instruction, wherein students learn to ask scientific questions, deconstruct claims, form and test hypotheses, and use logic and evidence to draw conclusions about the concepts. Students perform hands-on labs and projects that give them insight into the nature of science and help them understand environmental concepts, as well as how evidence can be obtained to support those concepts. Virtual lab activities enable students to engage in investigations that would otherwise require long periods of observation at remote locations and to explore simulations that enable environmental scientists to test predictions. During both hands-on and virtual labs, students form hypotheses; collect, analyze, and manipulate data; and report their findings and conclusions. Throughout this course, students are given an opportunity to understand how biology, earth science, and physical science are applied to the study of the environment and how technology and engineering are contributing solutions for studying and creating a sustainable biosphere.</p> <p>Robust scaffolding, rigorous instruction, relevant material, and regular active learning opportunities ensure that students can achieve mastery of the skills necessary to excel on the AP exam.</p>

Prerequisites	Recommended: Two years of high school laboratory science, including life science and physical science, along with at least one year of algebra
CR 1 Instructional Resources	<p>The majority of the instructional resources for this course are available to students online through the actual course.</p> <p>In addition, either the student or the school must purchase the following: Environment: The Science Behind the Stories, 7th Edition. Jay Withgott. (Pearson, 2019) Acceptable alternate: 6 th ed. (2018). Acceptable alternate: 5th ed. (2014). OR Environment, 9th Edition. Peter H. Raven, David M. Hassenzahl, Mary Catherine Hager, Nancy Y. Gift, and Linda R. Berg. (John Wiley & Sons, 2015)</p> <p>Various lab materials that can be purchased individually or in a kit through a third-party vendor. Access to the link to purchase the kit is provided to all students.</p>

The following key should help you understand the different types of activities in which students engage.

Activity type	Description
Read	Students are provided a reading passage in their textbook and complete the provided reading guide.
Lab	Student complete a hands-on lab, the provided questions and lab report.
Discuss	Students discuss topics in an online forum. Students are provided questions to direct their thinking and help them prepare as they interact with other students.
Explore	Students visit provided websites and complete questions after reading about a topic.
Practice	Students answer questions regarding what they have learned thus far.
Quiz	Computer administered and automatically graded assessment.
Review	Review of the material covered in a unit or over a semester
Study	Primary instructional online content that teaches new concepts through multimedia and interactivity. Links to relevant web resources are often included.
Test	Assessment covering the material introduced in a unit.

CR 2 Environmental Legislation and Policies

AP Environmental Science details multiple pieces of environmental legislation, initiatives, and policies in unit 9, lesson 3 and interwoven throughout the course. They are listed below:

- Antarctic Treaty System
- Kyoto Protocol
- Montreal Protocol
- United Nations Framework Convention on Climate Change
- Paris Agreement
- Environmental Protection Treaty
- Migratory Birds and Game Mammals Treaty
- Polar Bear Treaty
- Migratory Bird Act
- Ramsar Convention
- Convention on International Trade in Endangered Species
- Convention on Biological Diversity
- International Treaty on Plant Genetic Resources for Food and Agriculture
- Endangered Species Act
- World Trade Organization
- United Nations and European Union
- Comprehensive Environmental Compensation Liability Act
- Resource Conservation Recovery Act
- Safe Drinking Water Act
- Delaney Clause
- Clean Power Plan
- Clean Water Act
- Soil and Water Resources Conservation Act
- Clean Air Act
- National Environmental Policy Act
- National Park Service Organic Act

CR 3 Big Ideas and Required Content

Apex Learning’s AP Environmental Science course is designed around the four big ideas, the enduring understanding within the big ideas, and the essential knowledge that supports that enduring understanding.

<p>Big Idea 1: Energy Transfer (ENG) Energy conversions underlie all ecological processes. Energy cannot be created; it must come from somewhere. As energy flows through systems, at each step, more of it becomes unusable.</p>
<p>Big Idea 2: Interactions Between Earth Systems (ERT) The Earth is one interconnected system. Natural systems change over time and space. Biogeochemical systems vary in ability to recover from disturbances.</p>
<p>Big Idea 3: Interactions Between Different Species and the Environment (EIN) Humans alter natural systems and have had an impact on the environment for millions of years. Technology and population growth have enabled humans to increase both the rate and scale of their impact on the environment.</p>
<p>Big Idea 4: Sustainability (STB) Human survival depends on developing practices that will achieve sustainable systems. A suitable combination of conservation and development is required. The management of resources is essential. Understanding the role of cultural, social, and economic factors is vital to the development of solutions</p>

Apex Learning Unit Title and Content		College Board CED Unit Titles	Big Ideas
1	<p><u>Introduction to AP Environmental Science</u></p> <ul style="list-style-type: none"> Carbon, nitrogen, phosphorus, and water cycles 	Unit 1: The Living World: Ecosystems	ERT
2	<p><u>Earth’s Physical Systems</u></p> <ul style="list-style-type: none"> Tectonic plates Soil formation and erosion Earth's atmosphere Global wind patterns Earth's geography and climate El Niño and La Niña Ocean warming and acidification 	Unit 4: Earth Systems and Resources Unit 9: Global Change	ERT, ENG, STB
3	<p><u>Ecosystem Structure</u></p> <ul style="list-style-type: none"> Introduction to ecosystems Terrestrial and aquatic biomes Primary productivity Trophic levels The flow of energy in an ecosystem and the 10% rule Food chains and food webs Introduction to biodiversity Ecosystem services Island biogeography Ecological tolerance Natural disruptions to ecosystems Ecological succession Ocean warming and acidification Human impacts on diversity 	Unit 1: The Living World: Ecosystems Unit 2: The Living World: Biodiversity Unit 9: Global Change	ERT, ENG, STB, EIN

6	<u>Land and Water Use</u> <ul style="list-style-type: none"> The Green Revolution Types and effects of irrigation Pest-control methods Meat production methods and overfishing The impacts of mining Urbanization and ecological footprints Introduction to sustainable practices including crop rotation and aquaculture Invasive species Human impacts on diversity 	Unit 5: Land and Water Use Unit 9: Global Change	EIN, STB
7	<u>Energy Consumption and Resources</u> <ul style="list-style-type: none"> Energy sources and fuel types, including fossil fuels, ethanol, and nuclear power Natural sources of energy, including solar power, wind, geothermal, and hydroelectric power Energy conservation methods Human impacts on diversity 	Unit 6: Energy Resources and Consumption Unit 9: Global Change	ENG, EIN
8	<u>Pollution and Waste Management</u> <ul style="list-style-type: none"> The tragedy of the commons The impacts of mining Introduction to air pollution Photochemical smog Indoor air pollution Methods to reduce air pollutants Acid rain Noise pollution Sources of pollution Human impact on ecosystems Thermal pollution Solid waste disposal and waste reduction methods Pollution and human health Pathogens and infectious diseases Ozone depletion Human impacts on diversity 	Unit 5: Land and Water Use Unit 7: Atmospheric Pollution Unit 8: Aquatic and Terrestrial Pollution Unit 9: Global Change	EIN, STB
9	<u>Global Challenges</u> <ul style="list-style-type: none"> Global energy consumption and distribution of natural resources Global climate change Human impacts on diversity 	Unit 6: Energy Resources and Consumption Unit 9: Global Change	ENG, EIN, STB

CR 4, 5, 6, 7, 8, 9 and 10

The seven science practices are embedded throughout the course. A unit breakdown is included below and specific examples of each science practice is listed below the unit breakdown.

*Unit tests and semester exams are not listed but do appear at the end of each unit and each semester.

Semester 1 consists of units 1-4. Semester 2 consists of units 5-8.

UNIT 1	Apex Learning Unit Title: Introduction to AP Environmental Science CED Unit: Unit 1: The Living World: Ecosystems Science Practices 1, 2, 4, 5, 6, 7
Lesson 1	Science and the Environment
1.1.1	Study: The Interdisciplinary Science Identify the many fields of science that contribute to the study and understanding of the interrelated, dynamic systems of Earth's environment. Relate examples of environmental studies and equipment to specialized fields of science. Recommend areas of expertise that might contribute information relevant to specific environmental issues.
1.1.2	Quiz: The Interdisciplinary Science
1.1.3	Study: Applied Science and Technology Describe the role of technology in environmental science and human society. Identify commonly used devices and systems that are important to environmental studies. Describe the importance of technology and environmental studies to human health and well-being.
1.1.4	Quiz: Applied Science and Technology
1.1.5	Practice: Science and the Environment Identify the many fields of science that contribute to the study and understanding of the interrelated, dynamic systems of Earth's environment. Relate examples of environmental studies and equipment to specialized fields of science. Recommend areas of expertise that might contribute information relevant to specific environmental issues. Describe the role of technology in environmental science and human society. Identify commonly used devices and systems that are important to environmental studies. Use the Internet to locate and collect information about GPS and GIS technology. Discuss the validity and impact of scientific research on environmental issues related to human activities.
1.1.6	Read: Science and the Environment Read about science and the environment.
1.1.7	Quiz: Science and the Environment
1.1.8	Explore: GPS and GIS Technology Relate examples of environmental studies and equipment to specialized fields of science. Describe the role of technology in environmental science and human society. Identify commonly used devices and systems that are important to environmental studies. Describe the importance of technology and environmental studies to human health and well-being.
1.1.9	Lab: Investigate Your Ecological Footprint Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error.
1.1.10	Discuss: Investigate Your Ecological Footprint Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a

	discussion with your peers.
Lesson 2	Energy and Systems
1.2.1	Study: Matter and Energy
	Recognize the major types of matter that make up the biosphere. Recognize the forms of energy that enter and flow through the geosphere. Identify the processes that transform energy as it moves through the geosphere. Compare the characteristics of different surfaces on Earth, including albedo and heat capacity. Differentiate among scavengers, decomposers, and detritivores. Trace the flow of matter and energy through a food chain and a food web.
1.2.2	Quiz: Matter and Energy
1.2.3	Study: The Flow of Matter and Energy Differentiate among scavengers, decomposers, and detritivores. Trace the flow of matter and energy through a food chain and a food web.
1.2.4	Quiz: The Flow of Matter and Energy
1.2.5	Study: Biogeochemical Cycles Trace the movement of water in the water cycle from one part of the environment to another. Trace the movement of carbon in the carbon cycle from one part of the environment to another. Trace the movement of nitrogen and phosphorus from one part of the environment to another.
1.2.6	Quiz: Biogeochemical Cycles
1.2.7	Practice: Matter and Energy in the Biosphere Recognize the major types of matter that make up the biosphere. Recognize the forms of energy that enter and flow through the geosphere. Identify the processes that transform energy as it moves through the geosphere. Compare the characteristics of different surfaces on Earth, including albedo and heat capacity. Differentiate among scavengers, decomposers, and detritivores. Trace the flow of matter and energy through a food chain and a food web.
1.2.8	Lab: Investigate Cycling of O ₂ and CO ₂ Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error.
1.2.9	Discuss: Investigate Cycling of O ₂ and CO ₂ Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers.
UNIT 2	Apex Learning Unit Title: Earth's Physical Systems CED Title: Unit 4: Earth Systems and Resources; and Unit 9: Global Change Science Practices 1, 2, 3, 4, 5, 7
Lesson 1	They Hydrosphere
2.1.1	Project: Part I — Explore Your Local Physical Environment Research and describe the physical features and abiotic factors that characterize the geographical area in which you live.
2.1.2	Study: Bodies of Water Identify the characteristics of the major types of bodies of water. Describe the formation of and characteristics of the major types of bodies of water.
2.1.3	Quiz: Bodies of Water

2.1.4	Study: Movements of the Hydrosphere Relate solar energy to ocean currents and the distribution of heat around the globe. Describe the causes and effects of ocean waves and tides. Trace the path of groundwater from soil to the ocean.
2.1.5	Quiz: Movements of the Hydrosphere
2.1.6	Practice: The Hydrosphere Describe the reasons that liquid water can exist on Earth. Describe the formation of and characteristics of the major types of bodies of water. Relate solar energy to ocean currents and the distribution of heat around the globe. Identify reasons for fluctuations in sea level. Describe the causes and effects of ocean waves and tides. Trace the path of groundwater from soil to the ocean.
2.1.7	Read: The Hydrosphere Read about the hydrosphere.
2.1.8	Quiz: The Hydrosphere
2.1.9	Lab: Investigate Watershed Analysis Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error.
2.1.10	Discuss: Investigate Watershed Analysis Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers.
Lesson 2	The Atmosphere
2.2.1	Study: Structure and Movements of the Atmosphere Describe the structure, composition, and temperature of Earth's atmosphere. Identify the processes of wind generation and relate them to different types of local and global wind systems.
2.2.2	Quiz: Structure and Movements of the Atmosphere
2.2.3	Study: Weather and Climate Describe the major climate zones and their characteristics. Explain how ocean currents, wind patterns, and topography affect climate. Explain how Earth's orbit, tilt, and wobble affect the planet's climate. Describe the effects of El Niño and La Niña on global weather patterns.
2.2.4	Quiz: Weather and Climate
2.2.5	Practice: The Atmosphere Describe the structure, composition, and temperature of Earth's atmosphere. Identify the processes of wind generation and relate them to different types of local and global wind systems. Describe the major climate zones and their characteristics. Explain how ocean currents, wind patterns, and topography affect climate. Explain how Earth's orbit, tilt, and wobble affect the planet's climate. Describe the effects of El Niño and La Niña on global weather patterns. Discuss the validity and impact of scientific research on environmental issues related to human activities.
2.2.6	Lab: Investigate Passive Heating and Cooling Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error.
2.2.7	Discuss: Investigate Passive Heating and Cooling Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers.
Lesson 3	The Geosphere

2.3.1	Study: Earth's Crust and Landforms Relate the surface features of Earth's crust to the theory of plate tectonics. Distinguish erosional features and depositional features of Earth's crust.
2.3.2	Quiz: Earth's Crust and Landforms
2.3.3	Study: Soil Composition and Structure Identify the types of weathering and the agents of each type of weathering. Describe the types of soil and the processes of soil formation.
2.3.4	Quiz: Soil Composition and Structure
2.3.5	Study: Movements of Land and Soil Identify the types of erosion and their effects on Earth's crust. Relate the different types of faults to the different types of tectonic plate boundaries.
2.3.6	Quiz: Movements of Land and Soil
2.3.7	Checkup: The Geosphere Relate the surface features of Earth's crust to the theory of plate tectonics. Distinguish erosional features and depositional features of Earth's crust. Identify the types of weathering and the agents of each type of weathering. Describe the types of soil and the processes of soil formation. Identify the types of erosion and their effects on Earth's crust. Relate the different types of faults to the different types of tectonic plate boundaries. Discuss the validity and impact of scientific research on environmental issues related to human activities.
2.3.8	Read: The Geosphere Read about the geosphere
2.3.9	Quiz: The Geosphere
2.3.10	Explore: Earthquake Prediction and Readiness Recognize areas on Earth where earthquakes are likely to occur. Distinguish the three types of earthquake waves. Describe how geologists rate the destructive force of an earthquake. Identify ways that human communities in earthquake zones can prepare for and limit damages caused by strong earthquakes.
Lesson 4	Earth's Physical Systems Wrap-up
2.4.1	Project: Part II — Explore Your Local Physical Environment Research and describe the physical features and abiotic factors that characterize the geographical area in which you live.
UNIT 3	Apex Learning Unit Title: Ecosystem Structure CED Title: Unit 1: The Living World: Ecosystems; Unit 2: The Living World: Biodiversity; and Unit 9: Global Change Science Practices 1, 2, 4, 5, 6
Lesson 1	Nature of Ecosystems
3.1.1	Project: Part I — Explore Your Local Ecosystem Recognize the major types of biotic factors in an ecosystem and their roles in the biosphere. Distinguish biological species, populations, and communities. Identify the abiotic factors in an ecosystem and their importance to living organisms. Explain how biotic factors interact with the abiotic factors of an ecosystem.
3.1.2	Study: What Is a Biological Community? Distinguish biological communities from populations and ecosystems. Identify major types of biological communities.
3.1.3	Quiz: What Is a Biological Community?
3.1.4	Study: Species Interactions Describe the types of interactions that occur among the species in biological communities. Analyze food chains and food webs that describe the interactions of species in a biological community. Explain the nature and importance of ecological niches.

3.1.5	Quiz: Species Interactions
3.1.6	Study: Community Structure Model the makeup of communities using ecological pyramids. Understand the factors that affect community stability and biodiversity.
3.1.7	Quiz: Community Structure
3.1.8	Practice: Nature of Ecosystems Distinguish biological communities from populations and ecosystems. Identify major types of biological communities. Describe the types of interactions that occur among the species in biological communities. Analyze food chains and food webs that describe the interactions of species in a biological community. Explain the nature and importance of an ecological niche. Model the makeup of communities using ecological pyramids. Understand the factors that affect community stability and biodiversity
3.1.9	Explore: The Importance of Coral Reefs
	Describe characteristics of aquatic ecosystems. Evaluate the importance of individual ecosystems to the health of biomes and the biosphere.
Lesson 2	Changes in Ecosystems
3.2.1	Study: Natural Disturbances and Succession Describe how destructive natural events in the geosphere can affect ecosystems. Predict the effects of the removal of species from biological communities. Predict the effects of the introduction of nonnative species on communities.
3.2.2	Quiz: Natural Disturbances and Succession
3.2.3	Study: Evolution and Biodiversity Identify the sources and importance of genetic diversity in natural populations, ecosystems, and the biosphere. Summarize the process of natural selection and its role in biological evolution. Predict changes that may occur in an ecosystem when its amount of biodiversity changes.
3.2.4	Quiz: Evolution and Biodiversity
3.2.5	Checkup: Changes in Ecosystems Describe how destructive natural events in the geosphere can affect ecosystems. Predict the effects of the removal of species from biological communities. Predict the effects of the introduction of nonnative species on communities. Recognize the sources and importance of genetic diversity in natural populations, ecosystems, and the biosphere. Summarize the process of natural selection and its role in biological evolution. Predict changes that may occur in an ecosystem when its amount of biodiversity changes. Discuss the validity and impact of scientific research on environmental issues related to human activities.
3.2.6	Read: Changes in Ecosystems Read about changes in ecosystems.
3.2.7	Quiz: Changes in Ecosystems
3.2.8	Lab: Investigate Using a Dichotomous Key Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error
3.2.9	Discuss: Investigate Using a Dichotomous Key Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers
Lesson 3	Ecosystems and Biomes
3.3.1	Study: Aquatic Ecosystems Describe characteristics of aquatic ecosystems.
3.3.2	Quiz: Aquatic Ecosystems

3.3.3	Study: Land Ecosystems Identify the major land and aquatic biomes. Describe the distinguishing biotic and abiotic features of a given biome. Compare the plants and animals of your local biome with those of the other major biomes found in North America
3.3.4	Quiz: Land Ecosystems
3.3.5	Read: Ecosystems and Biomes Read about ecosystems and biomes
3.3.6	Quiz: Ecosystems and Biomes
3.3.7	Checkup: Ecosystems and Biomes Describe characteristics of land ecosystems. Describe characteristics of aquatic ecosystems. Identify the major land and aquatic biomes. Describe the distinguishing biotic and abiotic features of a given biome. Compare the plants and animals of your local biome with those of the other major biomes found in North America. Evaluate the importance of individual ecosystems to the health of biomes and the biosphere. Discuss the validity and impact of scientific research on environmental issues related to human activities.
3.3.8	Lab: Investigate Primary Productivity Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error
3.3.9	Discuss: Investigate Primary Productivity Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers
Lesson 4	Ecosystem Structure Wrap-up
3.4.1	Project: Part II — Explore Your Local Ecosystem Recognize the major types of biotic factors in an ecosystem and their roles in the biosphere. Distinguish biological species, populations, and communities. Identify the abiotic factors in an ecosystem and their importance to living organisms. Explain how biotic factors interact with the abiotic factors of an ecosystem.
UNIT 4	Apex Learning Unit Title: Population Ecology CED Title: Unit 3: Populations; Unit 5: Land and Water Use; and Unit 9: Global Change Science Practices 1, 2, 3, 4, 5, 6, 7
Lesson 1	Population Ecology
4.1.1	Study: Characteristics of Populations Identify characteristics used to describe populations. Identify limiting factors that affect populations and their characteristics. Describe a population's carrying capacity and the factors that determine the carrying capacity. Explain how populations change in size.
4.1.2	Quiz: Characteristics of Populations
4.1.3	Study: Population Growth Describe the factors that produce both positive and negative population growth. Compare exponential and logistic patterns of population growth. Explain the significance of studying populations over time
4.1.4	Quiz: Population Growth

4.1.5	Practice: Population Biology Identify characteristics used to describe populations. Identify limiting factors that affect populations and their characteristics. Describe a population's carrying capacity and the factors that determine the carrying capacity. Explain how populations change in size. Describe the factors that produce both positive and negative population growth. Compare exponential and logistic patterns of population growth. Explain the significance of studying populations over time.
4.1.6	Lab: Investigate Estimating Population Size Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error.
4.1.7	Discuss: Investigate Estimating Population Size Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers.
Lesson 2	Human Populations
4.2.1	Study: Human Population Dynamics Describe historical trends in human population growth and distribution. Identify characteristics of human populations
4.2.2	Quiz: Human Population Dynamics
4.2.3	Study: Human Communities Describe the purposes of human communities. Identify different kinds of human communities. Explain how individuals work together in groups. Explain how individuals and groups work together in communities
4.2.4	Quiz: Human Communities
4.2.5	Checkup: Human Populations Describe historical trends in human population growth and distribution. Identify characteristics of human populations. Describe the purposes of human communities. Identify different kinds of human communities. Explain how individuals work together in groups. Explain how individuals and groups work together in communities
4.2.6	Read: Human Populations Read about human populations
4.2.7	Quiz: Human Populations
4.2.8	Explore: Public Health Policies Research objectives and accomplishments of public health policies
Lesson 3	Impacts of Population Growth
4.3.1	Study: Renewable Resources Identify renewable resources on which humans depend. Differentiate between renewable and nonrenewable resources. Evaluate the cost-benefit trade-offs of using renewable resources instead of nonrenewable resources
4.3.2	Quiz: Renewable Resources
4.3.3	Study: Nonrenewable Resources Identify nonrenewable resources on which humans depend. Differentiate between renewable and nonrenewable resources. Describe how the use of natural resources will affect future generations of humans
4.3.4	Quiz: Nonrenewable Resources
4.3.5	Practice: Impacts of Population Growth Identify renewable resources on which humans depend. Identify nonrenewable resources on which humans depend. Differentiate between renewable and nonrenewable resources. Evaluate the cost-benefit trade-offs of using renewable resources instead of nonrenewable resources. Describe how the use of natural resources will affect future

	generations of humans. Describe alternative forms of energy production
4.3.6	Read: Impacts of Population Growth
4.3.7	Quiz: Impacts of Population Growth
4.3.8	Lab: Investigate Resource Consumption Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error.
4.3.9	Discuss: Investigate Resource Consumption Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers
UNIT 6	Apex Learning Unit Title: Land and Water Use CED Title: Unit 5: Land and Water Use; and Unit 9: Global Change Science Practices 1, 2, 3, 4, 5, 6
Lesson 1	Obtaining Earth’s Resources
6.1.1	Project: Part I — Explore Your Local Environmental Challenges Research and describe environmental challenges that affect the geographical area in which you live
6.1.2	Study: Land and Water Resources Identify natural resources obtained from Earth's land and water and used to support the lifestyles of humans. Recognize the interdependence of natural resources. Evaluate the economic significance of natural resources
6.1.3	Quiz: Land and Water Resources
6.1.4	Study: Agriculture, Forestry, and Fishing Identify types and sources of biological resources used to produce food and goods that support human lifestyles. Evaluate the economic significance of natural resources. Recognize the interdependence of natural resources.
6.1.5	Quiz: Biological Resources
6.1.6	Study: Mineral Resources and Mining Identify types and sources of mineral resources used to produce goods and energy that support human lifestyles. Learn about types of mining and the environmental effects of mining. Recognize the interdependence of natural resources.
6.1.7	Quiz: Mineral and Energy Resources
6.1.8	Practice: Earth's Natural Resources Identify the types of Earth's land and water used to support the lifestyles of humans. Identify types and sources of mineral resources used to produce goods and energy that support human lifestyles. Recognize the interdependence of natural resources. Identify types and sources of biological resources used to produce food and goods that support human lifestyles
6.1.9	Lab: Investigate How Pollutants Affect Plants Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error.
6.1.10	Discuss: Investigate How Pollutants Affect Plants Discuss the results of the investigation.

Lesson 2	Recreation and Urban Development
6.2.1	Study: Recreation, Conservation, and Urban Development Summarize the effects on natural ecosystems of human activities such as recreation, urbanization, conservation, preservation, restoration, and resource gathering and management.
6.2.2	Quiz: Recreation, Conservation, and Urban Development
6.2.3	Study: Human Cultures and Societies Summarize the nature and purpose of human cultures and societies. Identify examples of different types of human cultures and societies.
6.2.4	Quiz: Human Cultures and Societies
6.2.5	Practice: Land Use and Its Effects Evaluate the economic significance of natural resources. Summarize the effects and cost-benefit trade-offs of practices used in commercial agriculture, forestry, and fishing. Evaluate the hazards and risks involved in obtaining natural resources. Evaluate the hazards and risks to human health and well-being involved in obtaining and managing natural resources. Summarize the advantages and disadvantages of using different energy resources. Summarize the effects on natural ecosystems of human activities such as recreation, urbanization, conservation, preservation, restoration, and resource gathering and management. Discuss the validity and impact of scientific research on environmental issues related to human activities
6.2.6	Read: Recreation and Urban Development Read about recreation and urban development.
6.2.7	Quiz: Recreation and Urban Development
6.2.8	Explore: Effects of Climate Change Explore scientists' predictions about the effects of global climate change on the biosphere.
Lesson 3	Sustainable Resources
6.3.1	Study: Sustainable Food Production Explain the goal of using sustainable practices in food production, resource management, and human societal development. Describe sustainable methods of food production, resource management, and human societal development. Compare traditional practices used in food production, resource management, and human societal development with sustainable practices. Identify advantages and disadvantages of using "green" and sustainable practices in food production, resource management, and human societal development.
6.3.2	Quiz: Sustainable Food Production
6.3.3	Study: Sustainable Resource Management Explain the goal of using sustainable practices in food production, resource management, and human societal development. Describe sustainable methods of food production, resource management, and human societal development. Compare traditional practices used in food production, resource management, and human societal development with sustainable practices. Identify advantages and disadvantages of using "green" and sustainable practices in food production, resource management, and human societal development.
6.3.4	Quiz: Sustainable Resource Management

6.3.5	<p>Checkup: Sustainable Practices</p> <p>Explain the goal of using sustainable practices in food production, resource management, and human societal development. Describe sustainable methods of food production, resource management, and human societal development. Compare traditional practices used in food production, resource management, and human societal development with sustainable practices. Identify advantages and disadvantages of using "green" and sustainable practices in food production, resource management, and human societal development. Summarize the process of carbon dioxide sequestration and technologies that achieve it. Discuss the validity and impact of scientific research on environmental issues related to human activities.</p>
6.3.6	<p>Read: Sustainable Practices</p> <p>Read about sustainable practices.</p>
6.3.7	<p>Quiz: Sustainable Practices</p>
6.3.8	<p>Lab: Investigate Food Security</p> <p>Conduct a scientific investigation, using a scientific process and demonstrating the proper and safe use of laboratory equipment. Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error.</p>
6.3.9	<p>Discuss: Investigate Food Security</p> <p>Discuss the results of the investigation</p>
Lesson 4	<p>Land and Water Use Wrap-up</p>
6.4.1	<p>Project: Part II — Explore Your Local Environmental Challenges</p> <p>Research and describe environmental challenges that affect the geographical area in which you live.</p>
UNIT 7	<p>Apex Learning Unit Title: Energy Consumption and Resources (CED Unit 6, 9)</p> <p>CED Title: Unit 6: Energy Resources and Consumption; and Unit 9: Global Change</p> <p>Science Practices 1, 2, 4, 5, 6, 7</p>
Lesson 1	<p>Energy Concepts and Traditional Sources</p>
7.1.1	<p>Study: Types of Energy</p> <p>Learn about different types of energy and examples of each type.</p>
7.1.2	<p>Quiz: Types of Energy</p>
7.1.3	<p>Study: Fossil Fuels</p> <p>Identify types and sources of mineral resources used to produce goods and energy that support human lifestyles. Recognize the interdependence of natural resources.</p>
7.1.4	<p>Quiz: Fossil Fuels</p>
7.1.5	<p>Practice: Energy Concepts and Traditional Sources</p> <p>Identify the types of Earth's land and water used to support the lifestyles of humans. Identify types and sources of mineral resources used to produce goods and energy that support human lifestyles. Recognize the interdependence of natural resources. Identify types and sources of biological resources used to produce food and goods that support human lifestyles</p>
7.1.6	<p>Read: Energy Concepts and Traditional Sources</p> <p>Read about energy concepts and traditional sources</p>
7.1.7	<p>Quiz: Energy Concepts and Traditional Sources</p>
7.1.8	<p>Lab: Investigate Home Energy Usage</p> <p>Conduct a home energy audit.</p>

7.1.9	Discuss: Investigate Home Energy Audits Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers
Lesson 2	Energy and Sustainability
7.2.1	Study: Energy and Sustainability Learn about the advantages and disadvantages of different energy sources; learn how to apply scientific reasoning to analyze socially relevant energy issues.
7.2.2	Quiz: Energy and Sustainability
7.2.3	Study: Alternative Energy Resources Describe how the use of natural resources will affect future generations of humans. Describe alternative forms of energy production.
7.2.4	Quiz: Alternative Energy Resources
7.2.5	Practice: Resource Availability Identify renewable resources on which humans depend. Identify nonrenewable resources on which humans depend. Differentiate between renewable and nonrenewable resources. Evaluate the cost-benefit trade-offs of using renewable resources instead of nonrenewable resources. Describe how the use of natural resources will affect future generations of humans. Describe alternative forms of energy production
7.2.6	Explore: Fluid-Injection Wells and Induced Seismicity Explore and evaluate fluid-injection wells and induced seismicity.
7.2.7	Read: Energy and Sustainability Read about energy and sustainability
7.2.8	Quiz: Energy and Sustainability
7.2.9	Lab: Investigate Sustainable Energy Determine sustainable combinations of practices for generating and using energy.
7.2.10	Discuss: Investigate Sustainable Energy Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers
UNIT 8	Apex Learning Unit Title: Pollution and Waste Management CED Title: Unit 5: Land and Water Use; Unit 7: Atmospheric Pollution; Unit 8: Aquatic and Terrestrial Pollution; and Unit 9: Global Change Science Practices 1, 2, 3, 4, 5, 6, 7
Lesson 1	Pollution and Waste Management
8.1.1	Study: Water, Air, and Land Pollution Identify point sources and nonpoint sources of air, land, and water pollution. Describe the effects of pollution on oceans, freshwater supplies, air, and land. Recognize the consequences of air, land, and water pollution on human health and societies. Evaluate the hazards pollutants pose to wildlife and other types of natural resources.
8.1.2	Quiz: Water, Air, and Land Pollution
8.1.3	Study: Waste Management Describe methods of waste management, including burial in a landfill, dumping, incineration, composting, recycling, and reuse. Evaluate the impact of waste management and reduction strategies on resource availability.
8.1.4	Quiz: Waste Management
8.1.5	Practice: Pollution and Waste Management

	Identify point sources and nonpoint sources of air, land, and water pollution. Describe the effects of pollution on oceans, freshwater supplies, air, and land. Recognize the consequences of air, land, and water pollution on human health and societies. Evaluate the hazards pollutants pose to wildlife and other types of natural resources. Describe methods of waste management, including burial in a landfill, dumping, incineration, composting, recycling, and reuse. Evaluate the impact of waste management and reduction strategies on resource availability.
8.1.6	Read: Pollution and Waste Management Read about pollution and waste management
8.1.7	Quiz: Pollution and Waste Management
8.1.8	Lab: Investigate Recycling Practices Compare the effectiveness of recycling techniques.
8.1.9	Discuss: Investigate Recycling Practices Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers
Lesson 2	Impacts of Pollution
8.2.1	Study: The Tragedy of the Commons Recognize the definition and examples of a "common." Describe how the overuse and degradation of natural resources affects the biosphere and human societies.
8.2.2	Quiz: The Tragedy of the Commons
8.2.3	Study: Managing the Commons Describe how conservation and preservation of natural resources affect their availability and quality. Relate conservation and preservation of natural resources to the sustainability of ecosystems and human societies.
8.2.4	Quiz: Managing the Commons
8.2.5	Study: Protecting Water, Air, and Land Summarize the history, provisions, and effects of the National Park Service Act. Summarize the history, provisions, and effects of the Clean Air Act. Summarize the history, provisions, and effects of the Clean Water Act. Summarize the history, provisions, and effects of the Soil and Water Resources Conservation Act.
8.2.6	Quiz: Protecting Water, Air, and Land
8.2.7	Checkup: The Concept of the Commons Recognize the definition and examples of a "common." Describe how the overuse and degradation of natural resources affects the biosphere and human societies. Describe how conservation and preservation of natural resources affect their availability and quality. Relate conservation and preservation of natural resources to the sustainability of ecosystems and human societies.
8.2.8	Explore: Carbon Dioxide Sequestration Summarize the process of carbon dioxide sequestration and technologies that achieve it.
8.2.9	Lab: Investigate Air Quality Identify point source and nonpoint source causes of air pollution.
8.2.10	Discuss: Investigate Air Quality Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers.

UNIT 9	<p>Apex Learning Unit Title: Global Challenges</p> <p>CED Title: Unit 6: Energy Resources and Consumption; and Unit 9: Global Change</p> <p>Science Practices 1, 2, 4, 5, 6, 7</p>
Lesson 1	The Global Community
9.1.1	Project: Part I — Explore Sustainability for Your Local Environment
	<p>Identify your state and local legislation designed to protect the environment and natural resources. Evaluate the effects of national, state, and local environmental and resource protection laws on your local environment. Identify sustainable practices that have been adopted in your local environment. Recommend practices that might contribute to the sustainability of your local environment.</p>
9.1.2	<p>Study: Sustainable Societal Development</p> <p>Explain the goal of using sustainable practices in food production, resource management, and human societal development. Describe sustainable methods of food production, resource management, and human societal development. Compare traditional practices used in food production, resource management, and human societal development with sustainable practices. Identify advantages and disadvantages of using "green" and sustainable practices in food production, resource management, and human societal development.</p>
9.1.3	Quiz: Sustainable Societal Development
9.1.4	<p>Study: The Global Economy</p> <p>Recognize the interrelatedness of the global economy. Identify complex real-world problems faced by the global economy. Evaluate possible solutions to complex real-world problems in a global economy. Evaluate the need for cooperative human behaviors in mitigating and preventing complex real-world problems.</p>
9.1.5	Quiz: The Global Economy
9.1.6	<p>Practice: The Global Community</p> <p>Summarize the nature and purpose of human cultures and societies. Identify examples of different types of human cultures and societies. Recognize the interrelatedness of the global economy. Identify complex real-world problems faced by the global economy. Evaluate possible solutions to complex real-world problems in a global economy. Evaluate the need for cooperative human behaviors in mitigating and preventing complex real-world problems</p>
9.1.7	<p>Read: The Global Community</p> <p>Read about the global community</p>
9.1.8	Quiz: The Global Community
9.1.9	<p>Lab: Investigate Human Carrying Capacity</p> <p>Determine Earth's carrying capacity for human populations</p>
9.1.10	<p>Discuss: Investigate Human Carrying Capacity</p> <p>Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers.</p>
Lesson 2	Global Climate Change
9.2.1	<p>Study: Climate Change</p> <p>Describe effects of air pollution on the natural systems that regulate Earth's climate. Analyze the historical trends observed in global climate data. Relate human activities to observed changes in global climate. Evaluate differing views on global warming and climate change</p>
9.2.2	Quiz: Climate Change

9.2.3	Study: Effects of Climate Change Summarize scientists' predictions about the effects of global climate change on the biosphere. Evaluate differing views on global warming and climate change
9.2.4	Quiz: Effects of Climate Change
9.2.5	Checkup: Environmental Change Describe effects of air pollution on the natural systems that regulate Earth's climate. Analyze the historical trends observed in global climate data. Relate human activities to observed changes in global climate. Evaluate differing views on global warming and climate change. Summarize scientists' predictions about the effects of global climate change on the biosphere. Discuss the validity and impact of scientific research on environmental issues related to human activities.
9.2.6	Read: Global Climate Change Read about global climate change
9.2.7	Quiz: Global Climate Change
9.2.8	Lab: Investigate Dissolved Oxygen Levels Explore dissolved oxygen levels
9.2.9	Discuss: Investigate Dissolved Oxygen Levels Analyze data by using data tables, calculating the range and average of a set of measurements, and identifying sources of error. Evaluate lab procedures and results in a discussion with your peers
Lesson 3	Global Environmental Policies
9.3.1	Study: Protecting Environmental Quality Summarize the goals and provisions of international treaties and protocols that address the effects of human activities on the environment, including the Antarctic Treaty System, Montreal Protocol, and Kyoto Protocol. Evaluate the effects of international treaties and protocols on environmental quality and global cooperation.
9.3.2	Quiz: Protecting Environmental Quality
9.3.3	Study: Protecting Wildlife and Biodiversity Summarize the goals and provisions of international treaties and protocols that address biodiversity, such as the United Nations' Convention of International Trade in Endangered Species (CITES), the RAMSAR Convention on Wetlands, the International Treaty on Plant Genetic Resources for Food and Agriculture, and the Convention on Biological Diversity. Evaluate the effects of international treaties and protocols on environmental quality and global cooperation.
9.3.4	Quiz: Protecting Wildlife and Biodiversity
9.3.5	Practice: Global Environmental Policies Summarize the goals and provisions of international treaties and protocols that address the effects of human activities on the environment, including the Antarctic Treaty System, Montreal Protocol, and Kyoto Protocol. Summarize the goals and provisions of international treaties and protocols that address biodiversity, such as the United Nations' Convention of International Trade in Endangered Species (CITES), the RAMSAR Convention on Wetlands, the International Treaty on Plant Genetic Resources for Food and Agriculture, and the Convention on Biological Diversity. Evaluate the effects of international treaties and protocols on environmental quality and global cooperation. Discuss the validity and impact of scientific research on environmental issues related to human activities.
9.3.6	Read: Global Environmental Policies Read about global environmental policies
9.3.7	Quiz: Global Environmental Policies

9.3.8	<p>Explore: Biodiversity Hot Spots Summarize the process of natural selection and its role in biological evolution. Explain the importance of biodiversity in the biosphere.</p>
Lesson 4	Global Challenges Wrap-up
9.4.1	<p>Project: Part II — Explore Sustainability for Your Local Environment Identify your state and local legislation designed to protect the environment and natural resources. Evaluate the effects of national, state, and local environmental and resource protection laws on your local environment. Identify sustainable practices that have been adopted in your local environment. Recommend practices that might contribute to the sustainability of your local environment.</p>

CR 4: Science Practice 1: Concept Application

- Unit 2: Lesson 1: Activity 6: Practice: The Hydrosphere
 - In this practice activity, students are asked to describe the causes and effects of ocean waves and tides.
- Unit 3: Lesson 1: Activity 8: Practice: The Nature of Ecosystems
 - In this practice activity, students are asked to explain what would happen in the scenario provided:
 - In a mangrove swamp, mangrove tree crabs consume the leaves of mangroves and are food for other animals. By eating decaying mangrove leaves, animal wastes, and dead animals, they help create detritus that forms the base of many of the swamp's aquatic food chains. In addition, they burrow in the wet soil, which mixes air containing oxygen with the soil. What is likely to happen to the stability of the community if a disease destroys the population of mangrove tree crabs?
 - Unit 6: Lesson 1: Activity 2: Study: Land and Water Resources
 - Students answer the question “What would be a negative consequence of transporting water through a hot, dry desert in open canals?” after viewing a picture of the Granite Reef Diversion Dam near Mesa, Arizona.

CR 5: Science Practice 2: Visual Representations

- Unit 1: Lesson 2: Activity 7: Practice: Matter and Energy in the Biosphere
 - In this practice activity students are asked to both draw and label the various biogeochemical cycles. They are asked to indicate where certain components of the cycles are and answer questions explaining portions of the cycles.
- Unit 4: Lesson 1: Activity 3: Study: Population Growth
 - Students use an interactive tool to create representations of a population of prairie dogs experiencing a variety of limiting factors. They are then asked to answer the following question:
 - how is this graph different from the one you saw when resources were unlimited, and what does this mean?

CR 6: Science Practice 3: Text Analysis

- Unit 2: Lesson 1: Activity 1: Project: Part I – Explore Your Local Physical Environment
 - In this project, students make and record observations about the geology, hydrology, and climate in the area in which they live. Use the Internet to research your area and collect data. Analyze your observations and data. They are asked to visit various provided websites and are charged with determining which websites they deem reliable sources of information and those that are not reliable sources. They are also asked to defend their selections.
- Unit 6: Lesson 2: Activity 8: Explore: Effects of Climate Change
 - Students read multiple articles by visiting provided websites and answer questions regarding the information within. The following question requires students to consider the author’s purpose and reasoning.
 - What type of questions were the researchers asking in order to determine whether the wildlife management techniques were effective?

CR 7: Science Practice 4: Scientific Experiments

- Unit 4: Lesson 3: Activity 8: Lab: Investigate Resource Consumption
 - Students are asked to write a scientific question, a hypothesis that would test it,

and design an experiment including independent variables, dependent variables, and constants. They are asked to write their procedures and create their data tables. Finally, they carry out their designed experiment, record their data, and analyze their results.

- Unit 8: Lesson 1: Activity 8: Lab: Investigate Recycling Practices
 - Students research their local recycling center, collect items they think are recyclable from their home, create an experiment to test their own hypothesis, gather data, and draw conclusions. Student questions are provided below:
 - Write a hypothesis that states the percentage of the items that you think will be accepted by your local recycling center.
 - Did your results support or refute your hypothesis? Use data to support your answer.

CR 8: Science Practice 5: Data Analysis

- Unit 6: Lesson 1: Activity 1: Project: Part I – Explore Your Local Environmental Challenges
 - Students conduct research both online and from print resources to learn more about their local environmental challenges. They are asked several questions regarding their research and the connections to their local community.
 - Look up the population growth in your area. How has the population changed in the last 20 years? 50 years? How do you think this impacts your environment?
- Unit 8: Lesson 2: Activity 9: Lab Investigate Air Quality
 - Students research air pollution from a website, specifically in their zip code. They write a hypothesis for a situation that would cause a change in the air quality rating for their local area. They then test their hypothesis using the website and are asked the following questions:
 - What patterns did you notice in the data you collected in Part 1? Did any of those patterns support or refute your hypothesis? How? Be sure to include numbers in your analysis.

CR 9: Science Practice 6: Mathematical Routines

- Unit 3: Lesson 3: Activity 8: Lab: Investigate Primary Productivity
 - While completing the conclusions portion of the lab, students are asked to calculate net primary productivity in the following scenario:
 - If NPP is the net increase in biomass per unit of area per unit of time, calculate the NPP of each biome.
- Unit 7: Lesson 1: Activity 8: Lab: Investigate Home Energy Use
 - Students are asked to calculate the kilowatt hours each appliance in their home uses in a day, then use that calculation to determine both the monetary cost to them and the environmental cost.
 - Using your data collected in Part 2, calculate the amount of energy (in kilowatt-hours) each appliance uses in a day, the cost to you (in dollars), and the cost to the environment (in pounds of CO₂ produced to generate that amount of electricity).
- Unit 9: Lesson 1: Activity 9: Lab: Investigate Human Carrying Capacity
 - Students are asked to research 7 different regions in terms of population. They first gather data about life expectancy, number of children per

running a simulation for 50 years. Finally, they calculate the growth rate for each region.

CR 10: Science Practice 7: Environmental Solutions

- Unit 1: Lesson 1: Activity 9: Lab: Investigate your Ecological Footprint
 - Students are asked to use a website to determine their ecological footprint. They are then charged with identifying three things that they could change that would decrease their footprint, developing a hypothesis, making the changes, gathering new data, and then analyzing that data.
- Unit 7: Lesson 2: Activity 10: Discuss: Investigate Sustainable Energy
 - In this discussion students are asked to answer questions to prepare for their online discussion with classmates. One of the questions is listed below:
 - Some of the opponents of biodiesel say that it is impractical because it currently costs more to make and distribute than traditional diesel. This is because the processes are new and there are not as many pumping stations. What do you think about this? Should biodiesel be made more common or not? Why?

CR 11: Lab Investigations

Apex Learning’s AP Environmental Science course consists of 16 hands on labs, this will encompass 25% of the time spent in the course. Many of the labs have an inquiry-based and/or a field work component to them that gives students the freedom to design and investigate on their own and work hands on with the discipline.

Any lab calling for inquiry or field work in indicated below as well as a description of the learning objective within.

Each unit contains 2 labs. Below is a summary of each:

Lab	Lab Title	Learning Objective	Other
1	Investigate Your Ecological Footprint	Students collect data about their life and resource consumption to measure their current ecological footprint. Then they calculate a value for their ecological footprint, which represents the amount of land required to provide all the natural resources they use. Next, they form a hypothesis about three changes they can make in their lifestyle to reduce their ecological footprint and then calculate the difference those changes would make.	Inquiry
2	Investigate Cycling of O ₂ and CO ₂	In this lab, students observe the release of O ₂ and CO ₂ into the environment. Gas production by two types of organisms will serve as evidence of photosynthesis and cellular respiration in action. In part 1, they vary the amount of sugar present and observe the effect on cellular respiration. They also observe how the rates of these processes vary as environmental conditions vary. In part 2, they vary the amount of light and	

		observe the effect on photosynthesis.	
3	Investigate Watershed Analysis	Students investigate their local watershed. First, they use government data to research features of the local area of the watershed, and then they identify a source of water in their watershed and test it at three different points.	
4	Investigate Passive Heating and Cooling	This lab requires students to research ideas and then model how provided factors affect the heating and cooling of a home. First, they build a home without any energy-saving improvements. Then they change the home design to be more energy-efficient. They test both homes and evaluate their energy efficiency by measuring temperature changes in each when they are exposed to a warming source of light.	Inquiry
5	Investigate Using a Dichotomous Key	Students observe an insect and describe it. After that, they go to a website and use a dichotomous key to identify the insect based on its characteristics. They then select a leaf from a tree in their area and identify the tree using a different website.	Field Work
6	Investigate Primary Productivity	In this lab, students collect data and samples of plant matter in order to measure the NPP of two simulated biomes. After determining the net productivity of two model biomes, the desert and the rain forest, they calculate gross productivity and analyze how the different situations lead to different productivities.	Field Work
7	Investigate Estimating Population Size	Students use a technique for capturing, marking, and recapturing small invertebrates such as insects, snails, or pill bugs that live in their local area. Then they run a capture-and-recapture simulation and perform some calculations to determine the accuracy of capture-and-recapture studies of population size.	Field Work
8	Investigate Resource Consumption	Students model resource consumption using cereal and spoons. They then design their own simulation and make some inferences about resource consumption in the real world. They imagine that the cereal they are using is a real resource.	Inquiry

9	Investigate How Pollutants Affect Plants	During this lab, students test concentrations of the salt NaCl on germinating radish seedlings. They then make a hypothesis about the effects of other pollutants on plant germination and design an experiment to test the hypothesis.	Inquiry
10	Investigate Food Security	Students assemble a list of foods, then identify the processing plants they come from. They then determine how far the food traveled to get to them, and identify the impacts of that journey.	
11	Investigate Home Energy Usage	This lab requires students to look at their monthly electricity bill and evaluate their home's energy usage. Students analyze their appliances, which can be rated using various terms. They also calculate kilowatt hours, watts, and cost per kilowatt hour.	
12	Investigate Sustainable Energy	In this lab, students make crude biodiesel by reacting vegetable oil with methanol and a catalyst (KOH or NaOH). They then separate biodiesel and the by-product (glycerin), measure the yield of each, and answer questions about the process.	
13	Investigate Recycling Practices	Students collect the glass, metal, plastic, and paper items in their home that they think are recyclable. Then they analyze the items according to the local recycling guidelines and reevaluate them for proper recycling or disposal.	Inquiry Field Work
14	Investigate Air Quality	Students complete two investigations of the air quality in their local area, including data research and a field investigation. First, they use an air pollution website to research their local types and levels of air pollution and then use data to test a hypothesis about the local air pollution patterns. They then observe bioindicator plants in their neighborhood to look for signs of damage from air pollution.	Inquiry Field Work
15	Investigate Human Carrying Capacity	Students learn how to use a simulation to explore population growth and population pyramids. They then research current estimates for different factors on global, regional, and local levels and apply those conditions to the simulation to observe how they affect population growth. Finally, they alter the factors in the simulation to observe how population growth and population pyramids can change.	
16	Investigate Dissolved Oxygen Levels	Students set up an experiment to determine how different levels of a pollutant affect the amount of dissolved oxygen in a water sample. To detect DO, they use methylene blue. They use yeast to model the microorganisms and milk to model the pollutant. They then design an experiment to test how temperature affects DO levels. These procedures allow them make a model to simulate what happens in aquatic systems.	Inquiry

In addition to the labs listed above, students complete a two-part project requiring them to explore their local physical environment that requires multiple sessions of field work. At eight different points throughout the course, they will re-visit their project to either check their accuracy or add another layer of investigation data.

Project Part I: Explore Your Local Physical Environment

- Unit 2: Lesson 1: Activity 1
 - Research and describe the physical features and abiotic factors that characterize the geographical area in which you live.
- Unit 3: Lesson 1: Activity 1
 - Recognize the major types of biotic factors in an ecosystem and their roles in the biosphere. Distinguish biological species, populations, and communities. Identify the abiotic factors in an ecosystem and their importance to living organisms. Explain how biotic factors interact with the abiotic factors of an ecosystem.
- Unit 6: Lesson 1: Activity 1
 - Research and describe environmental challenges that affect the geographical area in which you live
- Unit 9: Lesson 1: Activity 1
 - Identify your state and local legislation designed to protect the environment and natural resources. Evaluate the effects of national, state, and local environmental and resource protection laws on your local environment. Identify sustainable practices that have been adopted in your local environment. Recommend practices that might contribute to the sustainability of your local environment.

Project Part II: Explore Your Local Physical Environment

- Unit 2: Lesson 4: Activity 1
 - Research and describe the physical features and abiotic factors that characterize the

geographical area in which you live.

- Unit 3: Lesson 4: Activity 1
 - Recognize the major types of biotic factors in an ecosystem and their roles in the biosphere. Distinguish biological species, populations, and communities. Identify the abiotic factors in an ecosystem and their importance to living organisms. Explain how biotic factors interact with the abiotic factors of an ecosystem.
- Unit 6: Lesson 4: Activity 1
 - Research and describe environmental challenges that affect the geographical area in which you live.
- Unit 9: Lesson 4: Activity 1
 - Identify your state and local legislation designed to protect the environment and natural resources. Evaluate the effects of national, state, and local environmental and resource protection laws on your local environment. Identify sustainable practices that have been adopted in your local environment. Recommend practices that might contribute to the sustainability of your local environment.

CR 12: Evidence of Scientific Investigations

In this AP Environmental Science course, each student is expected to maintain a lab notebook that contains each of their lab reports collectively.

Each lab requires students to compile data, draw conclusions and justify their thinking. Although each of the 16 labs lends itself to various levels of scientific thinking, there are some commonalities to the evidence and conclusions that students are expected to document. Details are listed in the table below.

Lab	Lab Title	Lab Components
1	Investigate Your Ecological Footprint	Calculate Summarize Create a Hypothesis Data Recording Analyze Draw Conclusions
2	Investigate Cycling of O ₂ and CO ₂	Observe Data Recording Analyze Draw Conclusions Suggest a new Question
3	Investigate Watershed Analysis	Data Recording Analyze Draw Conclusions
4	Investigate Passive Heating and Cooling	Research Build Data Recording Analyze Draw Conclusions
5	Investigate Using a Dichotomous Key	Data Recording Analyze

		Draw Conclusions
6	Investigate Primary Productivity	Data Recording Analyze Draw Conclusions
7	Investigate Estimating Population Size	Capture and Re-capture
		Data Recording Analyze Draw Conclusions
8	Investigate Resource Consumption	Model Design your Own Experiment Analyze Draw Conclusions
9	Investigate How Pollutants Affect Plants	Data Recording Design your Own Experiment Analyze Draw Conclusions
10	Investigate Food Security	Assess Data Recording Calculate Analyze Draw Conclusions
11	Investigate Home Energy Usage	Research Data Recording Analyze Draw Conclusions
12	Investigate Sustainable Energy	Observe Data Recording Analyze Draw Conclusions Predict
13	Investigate Recycling Practices	Collect Research Data Recording Analyze Draw Conclusions
14	Investigate Air Quality	Research Create a Hypothesis Data Recording Analyze Draw Conclusions
15	Investigate Human Carrying Capacity	Research Compare Data Data Recording Analyze Draw Conclusions

16	Investigate Dissolved Oxygen Levels	Data Recording Design your Own Experiment Analyze Draw Conclusions
----	-------------------------------------	---

AP Human Geography

AP Human Geography Syllabus

Scoring Component	Page(s)
SC 1 The course provides a systematic study of the nature of geography.	5, 6
SC 2 The course provides a systematic study of perspectives of geography.	5, 6
SC 3 The course provides a systematic study of population geography.	6, 7
SC 4 The course provides a systematic study of cultural patterns and processes.	7, 8, 9
SC 5 The course provides a systematic study of political organization of space.	9, 10
SC 6 The course provides a systematic study of agriculture and rural land use.	11, 12
SC 7 The course provides a systematic study of industrialization and economic development.	12, 13
SC 8 The course provides a systematic study of cities and urban land use.	14, 15
SC 9 The course teaches the use of landscape analysis to examine human organization of space.	5, 6
SC 10 The course teaches spatial relationships at different scales ranging from the local to the global	6, 9, 10, 12, 13
SC 11 The course teaches students how to use and interpret maps and spatial data.	5, 6, 8, 9, 15
SC 12 The course teaches students how to use and interpret geographical models.	6, 11, 12, 14

Big Ideas and Course Skills	Page(s)
<p>Big Idea 1: Patterns and Spatial Organization (PSO)</p> <p>The course teaches that spatial patterns and organization of human society are arranged according to political, historical, cultural, and economic factors.</p>	7
<p>Big Idea 2: Impacts and Interactions (IMP)</p> <p>The course teaches that complex relationships of cause and effect exist among people, their environments, and historical and contemporary actions.</p>	6

<p>Big Idea 3: Spatial Process and Societal Change (SPS)</p> <p>The course teaches that a spatial perspective allows for a focus on the ways phenomena are related to one another in particular places, which in turn allows for the examination of human organization and its environmental consequences</p>	<p>11</p>
--	------------------

CS 1 The course teaches students how to analyze geographic theories, approaches, concepts, processes, or models in theoretical and applied contexts.	5, 6, 8, 11, 14
CS 2 The course teaches students how to analyze geographic patterns, relationships, and outcomes in applied contexts.	7, 9, 11
CS 3 The course teaches students how to analyze and interpret quantitative geographic data represented in maps, tables, charts, graphs, satellite images, and infographics.	5, 6, 11, 12, 15
CS 4 The course teaches students how to analyze and interpret qualitative geographic information represented in maps, images (e.g., satellite, photographs, cartoons), and landscapes.	5, 8, 9
CS 5 The course teaches students how to analyze geographic theories, approaches, concepts, processes, and models across geographic scales to explain spatial relationships.	6, 9, 12, 13

Course Summary

The AP® Human Geography course will provide high school students with college-level instruction in using a spatial perspective to study how humans understand and use Earth's surface. Students will become skilled in interpreting maps and geospatial data in order to draw conclusions about what is revealed and hidden.

Students will hone their analysis skills by learning to recognize, interpret, and assess patterns related to population, culture, and politics. Students will also consider how regions develop, including agriculture versus urban land use issues. This course is presented thematically by exam topic to reinforce that regions cannot be considered in isolation. This course will effectively prepare students for the AP exam by practicing the skills necessary to apply geographic concepts, interpret data, and synthesize information in both multiple choice and constructed response formats.

Resource Requirements

Rubenstein, James M. *The Cultural Landscape: An Introduction to Human Geography*. 12th ed., Pearson Education, Inc., 2017.

The course and online textbook provides a collection of maps, atlases, and other resource materials for use by students. Each chapter includes an Explore feature using Google Earth to aid students in analyzing and interpreting maps.

Online Resources

EBSCOhost Research Database <https://www.ebsco.com/products/research-databases>

Google Earth <https://www.google.com/earth/> Khan Academy

<https://www.khanacademy.org> Library of Congress

<https://www.loc.gov>

National Oceanic and Atmospheric Administration <https://www.noaa.gov>

Writing Assignments

In each lesson, students respond to questions about the textbook readings and other resources in a notebook. Students also complete longer portfolio writing assignments that require them to synthesize lesson content from across lessons and resources to analyze certain exam topics in-depth.

Assessments

Throughout the course, a variety of formative and summative assessments are used to assess student learning and prepare students for the expectations of the AP Human Geography exam. Students are provided with ample opportunity for skill practice, engagement in meaningful discourse with their peers, and application of their understanding via tasks that are representative of real-world scenarios. Summative assessment types lend themselves to a deeper level of rigor and include portfolios and discussions. Formative assessments are designed to be auto-graded to give students and teachers instant feedback for targeted instruction.

Most lessons contain a quick check assessment that covers the objectives in the lesson, and most units have at least one cumulative quiz that also assesses lesson objectives. Each instructional unit culminates in an online practice to help students review unit concepts and skills, followed by a unit test that consists of multiple choice and short answer and/or essay questions. To aid students in retaining content throughout the course of a semester, a mid-semester check unit appears in the middle of each semester, featuring a low-risk practice assessment covering the objectives learned up to that point during the semester.

A graded full-length practice exam in the style of the Human Geography exam is given at the end of Semester B. Each semester ends with a semester exam.

Most units feature a discussion or portfolio that promotes critical thinking by expanding on topics students have learned. Each semester ends with a semester project and a semester exam. Graded assessments and participation all count toward the student's final grade.

Course Outline

Semester A

Unit 1: Course Overview

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Ensure they have the required materials for the course.
- Learn about the types of activities that will appear in the course.

Unit 2: This Is Geography

In this unit, students will do the following:

- Evaluate the nature of geography and what it means to examine the world from a spatial perspective. [SC 1]
- Apply major geographical perspectives and concepts to examine issues. [SC 2, CS 1.A]
- Apply landscape analysis and spatial thinking to describe how humans organize space. [SC 9]
- Interpret maps and geospatial data. [SC 11, CS 3, CS 4]
- Interpret quantitative and qualitative data. [CS 3, CS 4]
- Apply quantitative and qualitative data to explain geographic patterns and processes. [CS 3, CS 4]

Sample activities in this unit:

- Students will apply what they have learned about the perspectives of geography shown in different representations of Earth. In an activity, students will conduct research to analyze how the representation of Earth as a globe as opposed to a flat map (Mercator projection) affects their perception of the size of countries and continents. Using their research, they will describe what it means to examine the world from a spatial perspective. [SC 1 and SC 11, CS 1.A]
- Students will practice interpreting maps presented in *The Cultural Landscape* and geospatial data by applying what they have learned about the elements of maps and geographic information science. [CS 3.A, CS 4.A, CS 4.F] In an activity, students will draw a mental map depicting the route between two familiar places and labeling prominent features. They will examine the map to identify which features could be identified using remote sensing and which would require ground truthing. Then, they will compare their mental map with an online mapping service to determine the role of geographic information science in the online map and how accurate their mental map is. [SC 1 and SC 11, CS 1.C]
- Students will evaluate the geographic concept of globalization. In a discussion, students will consider the connections between globalization and local diversity, using examples from their local hometown or region, in order to take a stance on whether globalization is good or bad and to support their opinion with evidence. [SC 2]
- Students will use landscape analysis on a familiar location. In an activity, students will describe how the landscape of their hometown is organized through cultural features and examine any instances of economic inequality or unequal access in the organization. [SC 9]

- Students will use spatial thinking to consider maps at a variety of scales. In a series of activities, students will examine maps of Dubai and use each map's scale to interpret the information shown in the map. Then, they will use a list of geographic coordinates as geospatial data to identify the cities found in those locations. [SC 9, SC 10, and SC 11, CS 5.A, CS 5.B, CS 5.C]

Required reading: *The Cultural Landscape*, Chapter 1: This is Geography [SC 1 and SC 2, CS 1, CS 3, CS 4, CS 5]

Unit 3: Population and Health

In this unit, students will do the following:

- Describe physical and human factors that influence population geography. [SC 3]
- Evaluate the influence of geographic patterns and characteristics on cultural, political, economic, and urban systems.
- Analyze the growth and decline of populations over time and space. [CS 3]

Sample activities in this unit:

- Students will analyze population composition. In an activity, students will conduct research online, using sites such as the U.S. Census Bureau, to create a modified population pyramid using data from their state or city. The population pyramid will represent three groups: people over 65, people under 18, and the remaining population. Students will use the data and pyramid to calculate the elderly support ratio. [SC 3, CS 3.C, CS 3.E]
- Students will apply what they learned about the demographic transition model to the history of the United States. In a series of activities, students will explain when the United States shifted to stage 2 and stage 3. Then, students will compare their explanations to graphs showing the demographic transition for three other countries and describe the patterns and relationships they observe. [SC 3 and SC 12, CS 1.D, CS 3.B]
- Big Idea 2: Students will explain contemporary and historical trends in population growth and decline. In a portfolio, students will write an essay that analyzes Japan's population changes, including the causes, and compares its situation to that of other countries. Using evidence gathered from the internet and reference books about Japan and other countries, they will analyze how overall population changes affect health and sustainable practices. [SC 3, CS 3.D]

Required reading: *The Cultural Landscape*, Chapter 2: Population and Health [SC 3, CS 1, CS 3]

Unit 4: Migration

In this unit, students will do the following:

- Analyze the cultural and demographic causes and effects of migration. [SC 3, CS 2]
- Evaluate the economic push and pull factors that result in migration. [CS 2]
- Assess how much political and environmental factors influence migration. [CS 2]

Sample activity in this unit:

- Big Idea 1: Students will explain how push and pull factors contribute to migration, and analyze the cultural, economic, environmental, and political consequences of migration. [CS 2.A] In an activity, students will read a fictional scenario about a family's migration, identify the push and pull factors that influence the choice to leave a homeland, and analyze the obstacles that might prevent the family's efforts to leave. [SC 3, CS 2.B]

Required reading: *The Cultural Landscape*, Chapter 3: Migration [SC 3, CS 2]

Unit 5: Folk and Popular Culture

In this unit, students will do the following:

- Examine the various definitions of culture.
- Examine cultural differences and regional patterns. [CS 2]
- Describe cultural patterns and processes. [SC 4] Sample

activities in this unit:

- Students will compare and contrast popular and folk culture and the geographic processes associated with each. In an activity, students will design a logo for a new social media company whose main objective is to resurrect or preserve folk cultures. Students will describe the symbol's design, how it represents the company mission, and how it will spread company values, as well as how the company may impact the existing popular or folk cultures, and possible consequences. [SC 4]
- Students will explain how culture is expressed in landscapes and how land and resource use represent cultural identity. In an activity, students will synthesize information from the unit and cite examples from various cultures or time periods to write an explanation of how geography impacts the ways in which culture develops. [SC 4, CS 2.D]

Required reading: *The Cultural Landscape*, Chapter 4: Folk and Population Culture [SC 4, CS 2]

Unit 6: Mid-Semester Check

In this unit, students will do the following:

- Demonstrate knowledge that they have learned from the beginning of the course by completing a graded mid-semester check in the style of the AP Human Geography exam.

Unit 7: Language and Religion

In this unit, students will do the following:

- Analyze how languages affect culture.
- Evaluate how languages vary by place and region. [SC 4, CS 1, CS 4]
- Analyze how religions affect culture.
- Evaluate how religions vary by place and region. [SC 4]

Sample activities in this unit:

- Students will explain the cultural patterns and landscapes related to languages, and evaluate hypotheses of language distribution. [CS 1.E] In an activity, students will research the origin of a language, such as Esperanto, Cornish, or Ket. Students will trace the origin of the language and explain whether the language migrated with its people to or from other parts of the world, and whether it is still spoken today. [SC 4]
- Students will explain the cultural patterns and landscapes related to religion. In an activity, student will examine a map from *The Cultural Landscape* illustrating the most numerous religions by country and world region. Students will use evidence from this map to explain how religions spread, including the ideas of diffusion and distribution. [SC 4 and SC 11, CS 4.B, CS 4.C, CS 4.D, CS 4.E]

Required reading: *The Cultural Landscape*, Chapter 5: Languages and Chapter 6: Religions [SC 4, CS 1, CS 4]

Unit 8: Ethnicities

In this unit, students will do the following:

- Analyze how ethnic differences affect culture.
- Evaluate how ethnicities vary by place and region. [SC 4, CS 4]

Sample activities in this unit:

- Students will use maps and cartograms from *The Cultural Landscape* to assess the spatial and place dimensions of cultural groups in the past and present. [CS 4.E] In a series of activities, students will conduct research on a selected ethnicity in order to describe what makes this ethnicity unique and where it is distributed. Then, students will extend their research by describing any conflicts this ethnicity has had with others and why. They will also explain how geographic analytic tools can provide evidence in ethnic conflicts, noting any limitations to the tool's use. [SC 4, SC 2.E]
- Students will analyze the impacts of diffusion as related to ethnicities. In an activity, students will write an analysis of articles from the United Nations related to ethnic separation, ethnic cleansing, and diversity. [SC 4]

Required reading: *The Cultural Landscape*, Chapter 7: Ethnicities [SC 4, CS 2, CS 4]

Unit 9: Political Geography

In this unit, students will do the following:

- Evaluate how the contemporary political map has been shaped by events of the past. [SC 5 and SC 11]
- Examine how spatial political patterns reflect ideas of territoriality and power at a variety of scales. [SC 10, CS 2, CS 5]
- Analyze how the forces of globalization challenge contemporary political– territorial arrangements.

Sample activities in this unit:

- Students will analyze the spatial relationships between political systems and patterns of culture and economy. In a series of activities, students will analyze the current situations regarding the Northern Ireland border and Brexit negotiations as well as Cyprus. They will compare and contrast the effect of the cultural borders in these two regions. [SC 5, CS 2.B]
- Students will evaluate the role and efficacy of political boundaries on different scales. [CS 5.C] In a portfolio, students will write an argumentative essay about who should create political boundaries and how disputes should be solved. Students will include specific examples and describe problematic situations regarding border disputes as well as situations in which problems were successfully resolved. Students will use evidence from independent research to support their thesis statements. [SC 5 and SC 10]

- Students will explain how the political, economic, cultural, and technological elements of globalization challenge state sovereignty. In a series of activities, students will read an article about Qatar’s position on United Nations peacekeeping efforts. Then, students will research how the UN Charter is being (or has been) implemented in another country they select. Finally, students will compare the UN Charter in these two countries (Qatar and the other country they selected). [SC 5]

Required reading: *The Cultural Landscape*, Chapter 8: Political Geography [SC 5]

Unit 10: Semester Exam

In this unit, students will do the following:

- Review all topics covered this semester.
- Demonstrate knowledge by completing a graded semester exam written in the style of the AP Human Geography exam.

Semester B

Unit 1: Course Overview

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Ensure they have the required materials for the course.
- Learn about the types of activities that will appear in the course.

Unit 2: Food and Agriculture

In this unit, students will do the following:

- Evaluate the effects of agricultural development on the natural environment.
- Analyze how major agricultural regions reflect physical geography and economic factors. [SC 6]
- Analyze how settlement patterns and rural land use are reflected in the cultural landscape. [SC 6]
- Evaluate the societal effects of changes in food production and consumption.

Sample activities in this unit:

- **Big Idea 3:** Students will analyze agricultural production and rural land use as well as the interdependence among regions. In an activity, students will read an article about rice growers in the United States and compare the agricultural processes in this country with those in developing Asian countries. They will describe the challenges and benefits of producing rice in California for export to Japan, how cultivation differs in low-density areas compared to high-density areas, how a region affects the agricultural practices there, and potential consequences due to population changes. [SC 6]
- Students will analyze the application of von Thünen’s land use model to agricultural production. In an activity, students will apply what they have learned about agribusiness and commercial agriculture to explain the guiding principle of von Thünen’s model and what other factors a farmer might consider in addition to the model when selecting a type of agriculture to practice. [SC 6 and SC 12, CS 1.B, CS 1.D, CS 1.E]
- Students will use the EBSCOhost research databases and other sources to analyze issues related to the changing nature of contemporary agriculture, and predict how current trends will affect agriculture. [CS 2.C, CS.3.F] In a portfolio, students will write an essay in which they take a stance on the role of biotechnology in agriculture. In their essay, students will clearly state a

position in a thesis statement, describe how biotechnology is used in agriculture, support their position with specific examples and evidence, and present and refute important arguments against their position. [SC 6]

Required reading: *The Cultural Landscape*, Chapter 9: Food and Agriculture [SC 6, CS 1, CS 2, CS 3]

Unit 3: Development

In this unit, students will do the following:

- Assess how the Industrial Revolution facilitated improvements in standards of living.
- Apply measures of development to understand patterns of social and economic differences at a variety of scales. [SC 10, SC 5]
- Explain why development is a process that varies across space and time. [SC 7]

Sample activities in this unit:

- Students will assess the availability of inequality-adjusted human development data gathered from the United Nations. [CS 3.F]
- Students will apply measures of development and the standard of living to understand the difference between “developed” and “developing” countries. In a series of activities, students will choose one developed country and one developing country from a list. Students will conduct research and explain why each is considered developed or developing. Then, students will choose one of the measures of standard of living, conduct research to find the current measurement for the two countries, and explain the factors that have impacted each measurement. [SC 7 and SC 10]
- Students will study Rostow’s economic development model and apply it to a local area. During instruction, students will read about this model, study an image of a festival in Chichicastenango in Guatemala and explain which of Rostow’s stages of development is shown. [SC 7 and SC 12]
- Students will study Weber’s industrial location model and apply it to a local industry. During instruction, students will read about Weber’s “least-cost” theory and use a local industry to explain whether it matches Weber’s model of industrialization. [CS 5.D] Then, students will explain what factors other than access to raw materials may determine the particular location of an industry.[SC 7 and SC 12]

- Students will analyze the causes and consequences of international trade and growing interdependence in the world economy. In a discussion, students will consider the benefits to fair trade and weigh them against the costs.
- Students will cite evidence to support their opinion and explain how they will address any counterarguments. [SC 7]

Required reading: *The Cultural Landscape*, Chapter 10: Development [SC 7, CS 3, CS 5]

Unit 4: Industry and Energy

In this unit, students will do the following:

- Assess the strengths and weaknesses of sustainable development.
- Apply the strategy of sustainable development to address resource depletion and environmental degradation.
- Evaluate how factors like situation and site affect how and where industry develops. [SC 7]

Sample activities in this unit:

- Students will analyze industrial location on a regional scale. In an activity, students will consider how weather conditions influence the choice of a factory site between the North and the South in the United States. Students will choose an industry and a corresponding factory site. Depending on the location, students will explain the impact of weather events, the transportation options available, and the benefits of choosing another location or multiple locations. [SC 7 and SC 10, CS 5.C]
- Students will analyze international trade and industrialization globally. In an activity, students will research the labels on their clothing for the countries of origin and production locations in those countries. Students will reflect on what they discovered about these industrial locations. [SC 7, CS 5.C]
- Students will analyze industrial locations on a local scale. In an activity, students will describe the industries located in their state, the factors that have attracted industries there, and the challenges these industries face. [SC 7 and SC 10, CS 5.C]
- Students will analyze sustainability issues related to industrialization and development. In a discussion, students will consider the benefits and costs of buying domestic versus foreign-made clothes. Students will select one role (American manufacturer, Canadian government, or Mexican worker) and present this role's perspective toward NAFTA. Then, students will take on the role of EPA agents and re-evaluate NAFTA from that role's perspective. [SC 7]

Required reading: *The Cultural Landscape*, Chapter 11: Industry and Energy [SC 7, SC 5]

Unit 5: Mid-Semester Check

In this unit, students will do the following:

- Review the topics that they have learned from the beginning of this semester.
- Demonstrate knowledge by completing a graded mid-semester check in the style of the AP Human Geography exam.

Unit 6: Services and Settlements

In this unit, students will do the following:

- Explain how the form, function, and size of urban settlements are constantly changing. [SC 8]
- Apply models to understand the distribution and size of cities. [SC 12]
- Analyze how models of internal city structure and urban development provide a framework for urban analysis. [SC 8, CS 1.A, CS 1.B, CS 1.D, CS 1.E]

Sample activities in this unit:

- Students will explain the factors that initiate and drive urbanization and suburbanization. In an activity, students will read an article about millennials and evaluate what effects millennials moving back home with their parents will have on urban settlements and their economic bases. [SC 8]
- Students will evaluate the infrastructure of cities and apply models to explain the hierarchy and interaction patterns of urban settlements. [CS 1.D, CS 1.E] In an activity, students will research a city in the world with a population of over 2 million. They will describe the infrastructure of the city and any sustainability efforts or initiatives—such as urban farming, pollution control measures, and even urban development—that involve reshaping the city’s landscape to be more vertical than horizontal. [SC 8 and SC 12]

Required reading: *The Cultural Landscape*, Chapter 12: Services and Settlements [SC 8, CS 1]

Unit 7: Urban Patterns

In this unit, students will do the following:

- Analyze how built landscapes and social space reflect the attitudes and values of a population.
- Evaluate the economic, social, political, cultural, and environmental challenges facing urban areas. [SC 8]

Sample activities in this unit:

- Students will evaluate the geographic processes that impact business in urban areas. In an activity, students will analyze the business landscape of Montreal through photographs. They will apply what they have learned about urban patterns to propose solutions for businesses to encourage people to shop in the city during the winter. [SC 8]
- Students will analyze the demographic and population characteristics of cities using quantitative and qualitative data gathered from the U.S. Census Bureau. [CS 3.C] In an activity, students will conduct a social area analysis of a familiar area and use this data to reflect on how the built landscape reflects the population. [SC 8 and SC 11]
- Students will evaluate problems and propose possible solutions associated with urban issues. In a portfolio, students will conduct research on food deserts in urban zones and write a detailed report on what food deserts are, the challenges associated with them, and the possible solutions to reduce or eliminate them. [SC 8]

Required reading: *The Cultural Landscape*, Chapter 13: Urban Patterns [SC 8, CS 3]

Unit 8: Review and Full-Length Practice Exam

In this unit, students will do the following:

- Review the entire course, using the results of the mid-semester check and unit tests to focus this review.
- Complete a full-length practice exam in the style of the AP Human Geography exam, over the course of three days.

Unit 9: Semester Project

In the project unit, students will choose one topic (culture, economics, or politics) and create a multimedia presentation that connects this topic to human geography. Students will draw on what was learned in both semesters to develop a series of maps with supporting text that illustrates how this topic has shaped human geography over time. [SC 11]

Unit 10: Semester Exam

In this unit, students will do the following:

- Demonstrate knowledge from this semester by completing a graded semester exam written in the style of AP Human Geography.

AP Macroeconomics

AP Macroeconomics

Course Overview

Name	AP Macroeconomics
Description	<p>AP Macroeconomics students learn why and how the world economy can change from month to month, how to identify trends in our economy, and how to use those trends to develop performance measures and predictors of economic growth or decline. They'll also examine how individuals, institutions, and influences affect people, and how those factors can impact everyone's life through employment rates, government spending, inflation, taxes, and production. The equivalent of a 100-level college-level class, this course prepares students for the AP Exam and for further study in business, political science and history.</p> <p>The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.</p>
Teacher role	<p>All students enrolled in this course are assigned to a "section" and have a teacher who is charged with ensuring student success and addressing student questions, problems, and concerns. In addition, all students have a "mentor" who is available in their school or home and helps keep the student on track for completing the materials in a timely manner.</p>
Prerequisites	<ul style="list-style-type: none"> • Algebra II (or Math Analysis) • Recommended for qualified AP students
Length	One semester
Materials	<p>The majority of the required instructional material for this course is available to students online and is equivalent to a college-level textbook. (CR1) These materials were created and owned by our company. In addition, the following is an optional purchase:</p> <p>Tucker, I. B., ed. (2005) <i>Macroeconomics for Today</i>, 10th Edition. Mason, OH: Thomson/South-Western.</p> <ul style="list-style-type: none"> • Alternate editions also acceptable: 5th - 9th editions.

The following key should help you understand the different types of activities students engage in during the course:

Activity Type	Description
Discuss	<p>Students discuss topics in an online bulletin-board style forum. Teachers participate in these discussions as well and students receive credit for their participation.</p>
Exam	<p>Test administered at semester's end covering all material from the course. This exam is graded by the teacher and not only tests student understanding of the course material but is also designed to be a practice run for the AP exam itself.</p>

Practice	Students answer questions regarding what they have learned thus far. These assignments are graded by the teacher, who provides relevant feedback.
Quiz	Computer-administered and automatically graded assessment.
Review	Review of the material covered in a unit or over a semester
Study	Primary instructional online content that teaches new concepts through multimedia and interactivity,
Test	Assessment covering the material introduced in a unit, which is graded by the teacher.

Course Syllabus

Big Ideas (CR2):

The following big ideas are developed throughout the course: Economic Measurements (MEA), Markets (MKT), Macroeconomic Models (MOD), Macroeconomic Policies (POL).

- MEA (Economic Measurements):
 - Unit 3: Students will investigate circular flow and the four sector of the economy and how they relate to the health of the macroeconomy. They will examine GDP in several activities and will be asked to use that analysis to explore the relationship between income and expenditure as well as work through an analysis on the flows of production and income. They will analyze unemployment scenarios using various economic factors. They will also be asked to investigate and analyze concepts such as the relationship between interest rates and other factors like inflation, practice using variables, and apply inflation to real world situations.
 - Unit 6: Students will investigate the role of money and investigate demand for money, investment of money, and explore the money creation process. They will apply this knowledge to apply concepts of banking and money creation to the structure of the banking system and discuss whether or not the Fed has too much power, or not enough.
 - MEA: Students will explore the balance of payments, current and capital accounts, and trades and surpluses.
- MKT (Markets):
 - Unit 2: Students will investigate and analyze absolute and comparative advantages. They will also have a class discussion on comparative advantages. Lesson 3 focuses on supply and demand and students will discuss government involvement, analyze graphs of supply. And investigate equilibrium and the results of government intervention on a market.
 - Unit 7: Students will investigate the concept of trade and trade restrictions. They will explore exchange rates and calculate comparative advantage as it relates to exchange rates and supply and demand.
- MOD (Macroeconomic Models):

- Unit 2: Students will look at opportunity costs and marginal analysis, they will be asked to examine production possibilities curves and the efficiency of the graph. They will explore how specialization increases wealth and look for a PPF for the economy.
- Unit 4: Students will examine the concepts of aggregate supply and demand. They will synthesize this information into activities asking them to examine the role of production capacity on the shape of an AS curve. They will compute aggregate supply and demand. They will discuss whether gasoline prices are a function of *AD*, *AS*, or both. They will apply short-run and long-run *AD/AS* equilibrium to real life concepts and discuss what runs the short-run economy.
- POL (Macroeconomic Policies):
 - Unit 5: Students will investigate fiscal policy as it relates to Keynesian policy. They will discuss how fiscal policy contributes to the National Debt. Students will use the *AD/AS* Model to answer questions about the crowding out effect and its implications on government taxation and spending
 - Unit 6: Students will look at the tools the fed uses for monetary policy. They will research monetary policy with an emphasis on computation and graphical analysis. They will apply monetary policy concepts to real-life issues. They will discuss the monetarist stance that money supply should grow at a predictable rate. Lastly, they will investigate monetary and fiscal policies and discuss why a Great Depression style recession would not occur today.

Unit 1: What is Economics?

Topics covered in this unit:

- What is Economics?
- Scarcity, Wants, and Resources
- Scarcity and Value
- Markets
- Graphing
- Economics as a Science
- Three Fundamental Questions
- Different Ways to Organize an Economic System
- The U.S.: A Mixed Economy
- Four Economic Goals

Lesson 1: What is Economics?

Lesson Objectives:

- Describe the format of this course and the skills you'll need to do well.
- Explain what economics is a study of.
- Define macroeconomics and microeconomics.

- Define scarcity.
- Define resources, goods, services, and markets.
- List and explain the three questions that every economic system must answer.
- Explain the three basic economic systems and explain how they each answer the three basic economic questions.
- Explain why the term *mixed economies* describes the nature of most modern economic systems.
- Explain the goals of economic policy: efficient use of resources, price stability, full employment and economic growth.
- Explain the role of price in indicating the relative scarcity of a good.
- Read and interpret graphs.
- Define independent variable and dependent variable.
- Take data from a table and make a graph.
- Define origin, intercept, and slope.
- Determine a line's slope.
- Solve an equation.
- Take data from a graph or table and show it in an equation.
- Explain the common problems associated with economic application of the scientific method.

Practice - Introducing Macroeconomics	Go over the format and goals of the course. See how to succeed in the course and what to expect on the AP exam.
Discuss - Why Study Economics?	Introduce yourself to your classmates and discuss with them your definition of economics and your reasons for studying it. (Skill 1.A)
Study - Introduction to Economics	Explore the basics of economics, including goods, services, markets, and a fundamental concept of economics: scarcity. (Skill 1.A)
Practice - Investigate Graphing	Review the basics about tables, graphs, equations, slopes, and intercepts. (Skill 1.C)
Practice - Investigate Economics as a Science	Explore the scientific method and look at mistakes all scientists can make. Examine some special difficulties faced by economists. (Skill 1.A)
Study - Economic Systems	Examine the major questions every economic society faces and explore the different ways traditional, command, and mixed economies answer these questions. Look at efficiency, price stability, full employment, and economic growth. (Skill 1.A)

Discuss - The U.S. Economic System	With your classmates, discuss traditional, command, and market aspects of the U.S. economy and other world economies. (Skill 1.D)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content introduced in this lesson.

Lesson 2: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - What Is Economics?	Review your studies of basic economic terms and concepts presented in this unit. (Skill 1.A)
Practice - What is Economics?	Review common economic terms introduced in this unit. (Skill 1.B)
Discuss - Cram Session	Discuss economic terms and other concrete concepts about which you are unclear before you take the test.
Test - What Is Economics?	Take a 50-minute, teacher-graded test covering the main concepts introduced in this unit. The test includes both multiple-choice and free-response questions.

Unit 2: Basic Economic Concepts

Topics covered in this unit:

- Net benefits and Self-interest
- Costs Are Opportunity Costs
- Sunk Costs
- Positive and Normative Economics
- The Production Possibilities Frontier
- PPF and Opportunity Costs
- PPF and Efficiency
- Absolute and Comparative Advantage
- Trade Between Individuals
- Specialization
- Production Possibilities Frontier for an Economy
- International Trade: A Positive View

- International Trade: A Normative View
- Demand
- Change in Quantity Demanded
- Change in Demand
- Price Elasticity of Demand
- Supply
- Change in Quantity Supplied
- Price Elasticity of Supply
- Equilibrium
- Price Ceilings and Price Floors

Lesson 1: Cost and Benefits

Lesson Objectives:

- Relate how scarce resources and unlimited wants make decisions necessary.
- Define some key economic terms: scarcity, self-interest, opportunity cost, marginal analysis, and sunk costs.
- Explain the role of choice in economic theory.
- Distinguish between positive and normative economics.
- Interpret a graph called the production possibility frontier and explain how it's used to demonstrate scarcity, choice, and opportunity cost.
- Define the law of increasing opportunity costs.
- Relate the PPF to the concepts of efficiency, opportunity cost, and the law of increasing opportunity cost.

Study - Costs and Benefits	Examine definitions of opportunity costs and sunk costs as well as benefits and the idea of self-interest. Analyze decision alternatives by considering the opportunity costs and by using marginal analysis as well as positive and normative analysis. (Skill 1.A)
Discuss -Weighing Costs and Benefits	Discuss how you would weigh costs and benefits in various situations. Discuss the costs and benefits of taking an AP class. (Skill 2.A)
Study - Production Possibilities Frontier	Examine the production possibilities frontier (PPF) and how it's created. Investigate the relationship of opportunity cost and production, and look at the role of efficiency in the graph of the production possibilities frontier. (Skill 2.B)

Practice – Investigate the PPF	Further investigate the production possibilities frontier (PPF) and the associated concepts of efficiency, inefficiency, and unattainable production. (Skill 2.C)
Quiz – Wrap-Up	Answer questions to assess your understanding of the content covered in this lesson.

Lesson 2: Production and Trade

Lesson Objectives:

- Define and explain the concept of absolute advantage.
- Define and explain the concept of comparative advantage.
- Explain how specialization causes interdependence and trade.
- Explain why voluntary trade is beneficial to all parties in an exchange.
- Identify the key ideas of national production and trade, including the benefits of specialization, the relationship between economic growth and the PPF, shifts of the PPF, and advantages and disadvantages of free trade.

Study- Individual Production and Trade	Learn about the concepts of absolute advantage and comparative advantage, as well as how and why people agree to trade with each other. (Skill 1.A)
Practice - Investigate the Absolute and Comparative Advantage	Investigate the concepts of absolute advantage and comparative advantage. Work with both to analyze production, determine who should specialize in what kind of production, and consider the likely terms of trade between two producers. (Skill 1.B)
Discuss - Comparative Advantage	With your classmates, raise and discuss questions regarding comparative advantage. (Skill 1.D)
Study - National Production and Trade	Explore how specialization increases wealth and look at a PPF for an entire economy. Look at the things that increase the possible production in an economy and examine the role of trade in determining the PPF. (Skill 1.A)
Practice - Apply Concepts of Production and Trade	Bring together concepts about trade between individuals and between nations and show how they work together. Then submit your work to your teacher for a grade. (Skill 2.A)

Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.
----------------	--

Lesson 3: Demand and Supply

Lesson Objectives:

- Define and use the concept of demand to model the behavior of buyers.
- Define and use the concept of supply to model the behavior of sellers.
- Analyze and predict market interactions of buyers and sellers using the model of demand and supply.
- Understand the measure of price elasticity.

Study - Demand	Examine the concept of demand, demand curves, changes in demand, and the measure of price elasticity of demand. (Skill 1.A)
Practice - Investigate Demand	Use graphs and other methods of analysis to answer questions on demand, a change in quantity demanded, and a change in demand. (Skill 3.C)
Discuss - Demand Curves	Discuss what the government can do to raise or lower demand-and whether it should become involved at all. (Skill 2.A)
Study - Supply	Examine the concept of supply, supply curves, changes in supply, and the measure of price elasticity of supply. (Skill 1.B)
Practice - Investigate Supply	Use graphs and other methods of analysis to answer questions on supply, a change in quantity supplied, and a change in supply. (Skill 1.C)
Study - Equilibrium	Explore the concept of equilibrium and see how to determine changes in equilibrium. Examine government intervention-price supports and price floors-and the corresponding surpluses and shortages created by intervention. (Skill 2.C)
Practice - Investigate Equilibrium	Investigate the concepts of equilibrium and disequilibrium. Use graphs and other methods of analysis to explore the influence of changes in demand or supply (or both) on market equilibrium and examine the results

	of government intervention in a market. (Skill 3.A)
Practice - Apply Tools of Market Analysis	Bring together concepts about supply, demand, and market equilibrium, and show how they work together. Then send your work to your teacher for grading. (Skill 4.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content introduced in this lesson.

Lesson 4: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - Basic Economic Concepts	Review what you've learned in this unit about production, costs, trade, demand, and supply.
Practice - Basic Economic Concepts	Review the key terms and concepts introduced in this lesson.
Discuss - Cram Session	Discuss economic terms and other areas about which you are unclear before you take the test.
Test - Basic Economic Concepts	Take a test covering production, costs, trade, demand, and supply. This 50-minute teacher-graded test includes both multiple-choice and free-response questions.

Lesson 5: Diagnostic

Diagnostic - Basic Economic Concepts	Test your understanding of the key concepts covered in Unit 2.
--------------------------------------	--

Unit 3: Macroeconomic Variables

Topics covered in this unit:

- Sectors
- Markets
- Expenditures
- Income

- Circular Flow
- Gross Domestic Product
- Income and Expenditure
- Leakages and Injections
- National Income Accounts
- Measuring Growth
- Sources of Growth
- Savings vs. Spending
- Changes in Real and Nominal GDP
- Changes Over Time
- Real GDP, Unemployment, and other Variables
- Types of Unemployment
- Full Employment
- Costs of Unemployment
- CPI
- Measuring Inflation
- Issues with the CPI
- Interest Rates
- Components of Interest Rates
- Types of Interest Rates
- Investment
- Stocks, Bonds, & More
- Sources of Inflation
- Real Variables
- Costs of Inflation

Lesson 1: Gross Domestic Product

Lesson Objectives:

- Distinguish between the different sectors of the economy and the different types of income and expenditure.
- Draw and explain the circular flow of economic activity for a complex economy.
- Define gross domestic product.
- Explain the relationship between total income, total expenditure, and GDP.
- Compare and contrast different measures of economic well-being.
- Compare and contrast short- and long-run changes in RGDP.
- Describe the sources of long-term growth.
- Explain the short- and long-run trade-off for economic expansion.

Study - Circular Flow	Investigate the components of the circular flow model, and see the components put together to make a picture of an economy. (Skill 1.A)
-----------------------	---

Practice - Investigate Circular Flow	Investigate the circular flow model, identifying the components and working through various calculations to develop some very helpful and powerful equations for tracking the movement. (Skill 2.C)
Discuss - The Four Economic Sectors	Discuss the four sectors of the economy and how you'd rank them in determining the health of the macroeconomy. (Skill 1.D)
Study - National Income	Examine GDP and compare it to some other economic measures. Explore the relationship between income and expenditures in an economy. (Skill 1.D)
Practice - Investigate National Income	Work through an analysis of the flows of production and income in a fictitious country, use the concepts of nominal GDP and real GDP, and take a close look at injections and leakages. (Skill 3.B)
Practice - Apply Concepts of National Income	Apply the terms and concepts of national income to real world situations. Then send your work to your teacher for grading. (Skill 2.B)
Study- Long-Term Growth	Examine the problems with using only real GDP to measure growth. Look at the sources of long-term growth and the trade-off between spending today and future growth. (Skill 3.A)
Discuss - Conflict of Short- and Long-Term Growth	Defend your opinion regarding the benefits of long-term and short-term growth. (Skill 2.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content introduced in this lesson.

Lesson 2: Business Cycles and Unemployment

Lesson Objectives:

- Define the business cycle, including recessions and expansions.
- Explain the relationship between the business cycle and unemployment.
- Define unemployment and determine how it is calculated.
- Characterize the different types of unemployment.
- Explain full employment.
- Describe the costs of unemployment.

Study - The Business Cycle	Examine the business cycle and how it's evaluated.
Discuss - Future of the U.S. Economy	Make and defend predictions about the future of the U.S. economy. (Skill 3.A)
Study - Unemployment	Examine the categories of unemployment and the criteria for each: seasonal, frictional, cyclical, and structural unemployment. (Skill 1.A)
Practice -Apply Knowledge of Unemployment	Use economic factors to analyze various unemployment scenarios. Then send your work to your teacher for grading. (Skill 2.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content introduced in this lesson.

Lesson 3: Inflation

Lesson Objectives:

- Define inflation, including the different sources of inflation: demand-pull and cost-push.
- Explain the consumer price index and identify its advantages and disadvantages.
- Discuss interest rates and the effect of interest rates on investment and savings.
- Use a price index to calculate real income, real interest, and real GDP.
- Describe the costs of inflation.
- Calculate differences between real and nominal prices.

Study – CPI	Examine the CPI. See how it's calculated and learn how it's used to measure inflation. (Skill 1.B)
Discuss - List Your Own Market Basket	Describe a "market basket" for a typical college student. (Skill 1.A)
Practice - Investigate Inflation	Investigate many of the issues involving inflation and the inflation rate. Focus on issues related to the CPI (a price index), market baskets, and calculating the inflation rate. (Skill 1.C)
Study - Interest Rates	Explore interest rates and their effect on investment and the purchases of financial instruments. (Skill 2.C)
Practice - Investigate Interest Rates	Investigate the relationships between interest rates and other economic factors such as inflation and the CPI and analyze the market for loanable funds. (Skill 1.D)

Discuss - Inflation and the Economy	If moderate inflation is good for the economy, discuss whether cost-push or demand-pull inflation is better. (Skill 1.D)
Study - Inflation and Real Variables	Further examine the concepts of demand-pull and cost-push inflation. (Skill 1.B)
Practice - Investigate Real Variables	Practice using nominal variables and real variables in several contexts. (Skill 3.C)
Practice - Apply Knowledge of Inflation	Apply the concepts of inflation and interest to real world situations. Then send your work to your teacher for a grade. (Skill 3.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content introduced in this lesson.

Lesson 4: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - Macroeconomic Variables	Review your studies of gross domestic product, business cycles and unemployment, inflation, and the GDP as introduced in this lesson.
Practice - Macroeconomic Variables	Review the common economic terms (referring to macroeconomic variables) introduced in this unit.
Discuss - Cram Session	Discuss macroeconomic variables and other areas about which you are unclear before you take the test.
Test - Macroeconomic Variables	Take a test about macroeconomic variables. This 50-minute, teacher-graded test includes both multiple-choice and free-response questions.

Unit 4: The AD/AS Model

Topics covered in this unit:

- Aggregate Demand
- Changes in the Price Level
- Changes in Aggregate Demand
- Aggregate Supply

- Full Capacity
- Shape of AS Curve
- Shifts of AS
- Short Run Equilibrium
- Demand Shock
- Supply Shock
- Full Employment
- Long-Run Aggregate Supply
- Changes in Long-Run Equilibrium

Lesson 1: Aggregate Demand and Aggregate Supply

Lesson Objectives:

- Define aggregate demand.
- Identify and explain the elements of the aggregate demand (*AD*) graph.
- Distinguish between changes in the level of aggregate quantity demanded and aggregate demand.
- Identify the sources and effects of changes in *AD*.
- Define full capacity.
- Identify and explain the elements of the aggregate supply (*AS*) graph.
- Distinguish between changes in the level of aggregate quantity supplied and aggregate supply.
- Identify the sources and effects of changes in *AS*.

Study - Aggregate Demand	Examine aggregate demand (<i>AD</i>) and explore the role the price level plays in determining the shape of the <i>AD</i> curve. (Skill 1.C)
Practice - Investigate Aggregate Demand	Practice computing and graphing aggregate demand. (Skill 4.A)
Study - Aggregate Supply	Examine aggregate supply (<i>AS</i>) and explore the role the production capacity of an economy plays in determining the shape of the <i>AS</i> curve. (Skill 1.B)
Practice - Investigate Aggregate Supply	Practice computing and graphing aggregate supply. (Skill 4.A)
Discuss - Gasoline Prices	Defend your opinion about whether gasoline prices are a function of <i>AD</i> , <i>AS</i> , or both. (Skill 2.C)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 2: Short-Run AD/AS Equilibrium

Lesson Objectives:

- Define and explain short-run equilibrium in the AD/AS model.
- Identify the effects of changes in AD, AS, or both.

Study - Short-Run AD/AS Equilibrium	See how short-run economic equilibrium is determined by aggregate demand and short-run aggregate supply. Look at how changes in AD or AS, called shocks, change equilibrium. (Skill 2.C)
Practice - Investigate Short-Run AD/AS	Investigate equilibrium in the AD/AS model in the short run, with an emphasis on computation and graphing. (Skill 4.B)
Practice -Apply Concepts of Short-Run Equilibrium	Apply the concept of short-run AD/AS equilibrium to real life concepts. (Skill 3.C)
Discuss - The Short-Run Economy	Discuss whether the short-run economy is driven more by aggregate supply or aggregate demand factors. (Skill 3.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 3: Long Run AD/AS Equilibrium

Lesson Objectives:

- Define and explain long-run equilibrium in the AD/AS model.
- Identify the sources and effects of changes in long-run equilibrium.
- Define the natural rates of economic growth and unemployment.
- Identify the differences between AD/AS effects in the short run and in the long run.

Study- Long-Run AD/AS Equilibrium	Examine the concept of full employment. Explore reasons the full-employment level of output changes. Look at changes in long-run equilibrium caused by changes in aggregate demand or aggregate supply. (Skill 1.C)
Practice - Investigate Long-Run AD/AS	Use computation and graphs to investigate long-run AD/AS, including changes in aggregate supply. (Skill 4.C)
Discuss - Foreign Cars	If foreign cars are cheaper than domestic cars, defend your opinion about whether it helps or hinders our economy to buy them. (Skill 3.A)

Practice - Apply Concepts of <i>AD/AS</i>	Use the concepts of <i>AD/AS</i> to analyze a nation's price level and level of RGDP. Then send your work to your teacher for a grade. (Skill 3.C)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 4: Wrap-Up

Lesson Objective:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - The <i>AD/AS</i> Model	Review your studies of aggregate demand, aggregate supply and <i>AD/AS</i> equilibrium as introduced in this unit.
Practice - The <i>AD/AS</i> Model	Review common economic terms (referring to the <i>AD/AS</i> model) that were covered in this unit.
Discuss - Cram Session	Discuss <i>AD/AS</i> and other areas about which you are unclear before you take the test.
Test - The <i>AD/AS</i> Model	Take a 50-minute, teacher-graded test about the <i>AD/AS</i> model. It includes both multiple-choice and free-response questions.

Unit 5: Keynesian Economics and Fiscal Policy

Topics covered in this unit:

- Consumption
- MPC
- Changes in Consumption
- Investment
- Aggregate Expenditures
- Keynesian Equilibrium
- Changes in Equilibrium
- Sticky Prices
- AS Curve
- AD Curve
- Economic Change
- Keynesian Analysis
- *AD/AS* Analysis

- Fiscal Policy Today
- Tax and Spend
- Debt and Deficit
- Crowding Out
- Multiplier Effect

Lesson 1: The Keynesian Model

Lesson Objectives:

- Explain the building blocks of the Keynesian model, including the consumption function, the different components of aggregate expenditures, and the concept of equilibrium in the Keynesian model.
- Define the marginal propensity to consume and explain its effect on the Keynesian model.
- Graph the Keynesian model, show how changes in the economy are reflected on a graph, and make predictions about the economy based on the model.

Study- The Keynesian Model, Part 1	Explore consumption and investment functions as Keynes saw them. (Skill 1.A)
Practice - Investigate the Keynesian Model, Part 1	Apply the Keynesian model to graphs of consumption and investment. (Skill 4.B)
Discuss - Keynes and The Great Depression	Discuss the social and economic effects of the Great Depression. (Skill 1.B)
Study - The Keynesian Model, Part 2	Explore the different components of the Keynesian model and the definition of equilibrium. Look at the sources and results of changes in equilibrium. (Skill 1.A)
Practice - Investigate the Keynesian Model, Part 2	Work through issues related to the Keynesian model, with an emphasis on graphing and computation. Featured topics include aggregate expenditures, consumption, equilibrium, the spending and tax multipliers, changes in <i>AE</i> , and the marginal propensity to consume. (Skill 4.B)
Practice - Apply Concepts of the Keynesian Model	Synthesize the different concepts of the Keynesian model to build a comprehensive perspective. Then send your work to your teacher for a grade. (Skill 1.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 2: Keynes in *AD/AS*

Lesson Objectives:

- Given the same information, show an economy in the AD/AS framework and in the Keynesian framework.
- Compare and contrast the similarities and differences between the AD/AS model and the Keynesian model.

Study - Keynes in <i>AD/AS</i>	Examine the differences and similarities between the Keynesian and <i>AD/AS</i> models. Look at examples demonstrating the predictive power of each model. (Skill 1.B)
Discuss - Creating Supply or Demand	Express and defend your opinion regarding whether supply creates demand or demand creates supply. (Skill 2.A)
Practice - Apply the Keynesian Model to <i>AD/AS</i>	Practice graphing with the Keynes model in the <i>AD/AS</i> framework. Synthesize what you know and see how the two models relate to each other. Then send your work to your teacher for a grade. (Skill 4.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 3: Fiscal Policy

Lesson Objectives:

- Explain fiscal policy and show the effects graphically.
- Categorize the situations in which you expect fiscal policy to be effective and in which you expect it to be ineffective.
- Describe the basic structure of government spending and taxation.

Study - Fiscal Policy	See analyses of fiscal policy in the Keynesian and <i>AD/AS</i> models, explore the difficulties with fiscal policy, and examine why it's rarely used today. (Skill 1.A)
Practice - Investigate Fiscal Policy	Investigate the effects of fiscal policy, practice graphing the effects of fiscal policy, and apply and calculate the multiplier effect. (Skill 3.C)
Discuss - The National Debt	Express and defend your opinion regarding whether fiscal policy is responsible for the National Debt. (Skill 3.B)

Study- Government Spending and Taxation	Explore government spending and taxation in the U.S. economy, and examine the budget deficit and the national debt. (Skill 1.B)
Practice - Investigate Government Spending and Taxation	Using the <i>AD/AS</i> model, answer questions about the "crowding out" effect, and investigate its implications in terms of government taxation and spending. (Skill 3.C)
Practice - Apply Concepts of Fiscal Policy	Answer questions that will help you draw connections between different fiscal policy concepts. Then send what you've done to your teacher for grading. (Skill 1.D)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 4: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - Keynesian Economics and Fiscal Policy	Review your studies of Keynesian economics and fiscal policy as introduced in this unit.
Practice - The Keynesian Model	Review the key terms and concepts introduced in this unit.
Discuss - Cram Session	Discuss the Keynesian model, fiscal policy, and any areas about which you are unclear before you take the test.
Discuss - You Be the Teacher!	Make suggestions for completing a correctly answered, but incomplete, AP-style question about macroeconomics.
Test - Keynesian Economics and Fiscal Policy	Take a 50-minute, teacher-graded test on Keynesian economics and fiscal policy. It includes both multiple-choice and free response items.

Unit 6: Money

Topics covered in this unit:

- Functions of Money
- Examples of Money

- Liquidity
- Money Demand
- Fractional Reserve Banking
- The Federal Reserve
- Disintermediation
- History of the U.S. Banking System
- Money Creation
- Money Multiplier
- Money Supply
- Monetary and Fiscal Tools
- Required Reserve Ratio
- Discount Rate
- Open Market Operations
- Monetary Policy
- Contractions and Expansions
- Stagflation and the Fed
- Monetarism
- Laissez-Faire Debate
- Expectation Theory
- Interest Rates
- Phillips Curve
- Other Implications of Monetary and Fiscal Policies

Lesson 1: Money and Banks

Lesson Objectives:

- Understand the definition of money, including what it is, what it's used for, and how it's counted.
- Explain what it means to demand money and list the things that affect how much money people demand.
- Describe fractional reserve banking, including what it means and how it succeeds.
- Relate the process of money creation to fractional reserve banking.
- Use the money multiplier to calculate changes in the quantity of money in the economy.

Study - Money Demand	Explore the roles of money (unit of account, medium of exchange, store of value) and reasons people hold money (transactions, asset portfolio, protection against the unexpected). Examine how much money people hold at one time, and why. (Skill 1.A)
Practice - Investigate Money Demand	Use graphing to investigate money demand, the elements of investment, and the function

	of money. Practice calculating the quantity of money. (Skill 4.C)
Study - The Banking System	See an overview of the U.S. banking system, discover how fractional reserve banking works, look at the role of the Federal Reserve in the banking system, and investigate the S & L failure of the 1980s. (Skill 1.B)
Study - Money Creation	Explore the money creation process, the role of required reserves in determining the size of money creation, and the idea of money supply. (Skill 1.B)
Practice - Investigate Money Creation	Investigate money creation and the money supply, and practice using the money multiplier. (Skill 3.A)
Practice - Apply Concepts of Banking and Money Creation	Explore the banking system, the process of money creation, and the relationship between money creation and the structure of the banking system. Then send your work to your teacher for grading. (Skill 1.D)
Discuss - The Fed	Discuss whether the Fed has too much or not enough power. (Skill 1.D)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 2: Monetary Policy

Lesson Objectives:

- Define monetary policy.
- Explain each tool of monetary policy.
- Describe the effects of an expansionary monetary policy and state the conditions when this policy will be used.
- Describe the effects of a contractionary monetary policy and state the conditions when this policy will be used.

Study - Goals and Tools of Monetary Policy	Explore the three tools the Fed uses to control the quantity of money in the economy: the required reserve ratio, the discount rate, and open market operations. (Skill 1.A)
Study - Effects of Monetary Policy	Explore the process through which a change in the quantity of money in the economy

	changes the level of prices or production. (Skill 3.C)
Practice - Investigate Effects of Monetary Policy	Continue your investigations of monetary policy, with an emphasis on computation and graphical analysis. Look at the money market and the bond market and consider the effectiveness of monetary policy when other variables (notably the money demand curve change.) (Skill 2.C)
Practice - Apply Concepts of Monetary Policy	Bring together concepts related to monetary policy. Apply the concepts to real-life issues faced by economic policy makers at the Fed (or other central banks). Send your work to your teacher for scoring. (Skill 3.A)
Discuss - Monetarists	Discuss the Monetarist stance that the money supply should grow at a predictable rate. (Skill 1.D)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 3: Monetary and Fiscal Policy

Lesson Objectives:

- Compare and contrast monetary and fiscal policy.
- Explain the key arguments in favor of each policy.
- Explain the key arguments against each policy.
- Describe the combined effects of active monetary and fiscal policies.

Study – Monetary and Fiscal Policy	Compare and contrast monetary and fiscal policy. Look at the many issues associated with both policies and explore more recent developments in macroeconomic theory. (Skill 1.D)
Practice - Investigate Monetary and Fiscal Policy	Consider the strengths and weaknesses of fiscal and monetary policy, with an emphasis on computation and graphing. Issues covered include the Phillips curve, expectations theories, crowding-out, supply-side theories, the life-cycle theory of consumption, and the permanent income theory. (Skill 1.D)
Discuss - Another Great Depression?	Discuss why a Great-Depression-style recession would not occur today. (Skill 1.B)

Practice - Apply Concepts of Monetary and Fiscal Policy	Use your knowledge of monetary and fiscal policy to investigate the interaction between these policies and the expectations of the household sector. Then send your work to your teacher for grading. (Skill 3.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 4: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review – Money	Review your studies of money, banks, monetary policy, and fiscal policy as introduced in this unit.
Practice – Money	Review the key terms and concepts covered in this unit.
Discuss – Cram Session	Discuss money, banks, monetary policy, fiscal policy, and any areas about which you are unclear before you take the test.
Discuss - You Be the Teacher!	Make suggestions for completing a correctly answered but incomplete AP-style question about macroeconomics.
Test– Money	Take a 50-minute, teacher-scored test about money, banks, monetary policy, and fiscal policy. It includes both multiple-choice and free-response questions.

Unit 7: International Economics

Topics covered in this unit:

- Free Trade
- Protectionism
- Exchange Rates
- Current Account
- Capital Account
- Balance of Payments

- One Price
- Fiscal Policy
- Monetary Policy

Lesson 1: Trade

Lesson Objectives:

- Identify the advantages of free trade.
- Describe the ways a government can restrict trade and the effects of those restrictions.
- Explain the motives for protectionism.
- Use the concepts of demand and supply to evaluate the foreign exchange market.
- Use and define the current account, the capital account, and the balance of payments.

Study- Trade and Exchange Rates	Explore reasons why nations trade and impose trade restrictions. Look at the benefits of trade and investigate exchange rates, seeing how they're determined and what causes changes in exchange. (Skill 1.D)
Practice - Investigate Exchange Rates	Practice calculating comparative advantage. Take a look at exchange markets and practice using a supply and demand analysis to predict changes in exchange rates. (Skill 2.C)
Study - Balance of Payments	Explore current and capital accounts, the relationship between a trade deficit in goods and services and a trade surplus in capital, and the twin deficits effect. (Skill 1.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 2: An Open Economy

Lesson Objectives:

- Explain the law of one price and the concept of purchasing power parity.
- Use the balance of payments and the foreign exchange market to analyze the effects of fiscal policy on international trade.
- Use the balance of payments and the foreign exchange market to analyze the effects of monetary policy on international trade.

Study - Government Policy in an Open Economy	See how global economics can affect domestic fiscal and monetary policies. (Skill 3.B)
Discuss - Tariffs	Express and defend your opinion regarding

	whether tariffs should be used to punish other countries or to protect the United States. (Skill 3.A)
Practice - Apply Concepts of International Trade	Bring together and apply concepts related to international trade. Then send your work to your teacher for grading. (Skill 3.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 3: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - International Economics	Review your studies of trade and open economies as introduced in this unit.
Practice - International Economics	Review the key terms and concepts from this unit.
Discuss - Cram Session	Discuss trade, open economies, and any areas about which you are unclear before taking the test.
Discuss - You Be the Teacher!	Make suggestions for completing a correctly answered but incomplete AP-style question about international economies .
Test - International Economics	Take a 50-minute teacher-graded test about international economies. It includes both multiple-choice and free-response items.

Unit 8: Preparing for the AP Exam

No new content is introduced in this unit.

Lesson 1: Comprehensive Microeconomics Review and AP Exam Practice

Lesson Objectives:

- Describe the format of the AP Microeconomics Exam.
- Develop a plan for how you're going to study between now and exam day.
- Define and explain the significance of each key term and concept introduced in this course.
- Apply the concepts you've learned to specific questions.

- Apply your knowledge to questions that may look new on the surface but can be analyzed and answered using skills and knowledge you've gained in this course.
- Manage your time effectively as you prepare for, and take, the Final Exam and the AP Exam.

Study - AP Exam Preparation	See how to develop a strategy for studying for and taking the AP Exam. Find out what to expect in the Exam and get some tips on how to answer free-response questions.
Review - Microeconomics	Review your studies of macroeconomics in preparation for the AP Exam. This review includes an overview of the key concepts covered in the course, a review checklist, a suggested study plan and practice free-response questions.
Quiz - Practice Multiple-Choice Questions	Answer multiple-choice questions covering material about macroeconomics as a warm-up for taking the exam.
Discuss - Any Questions?	Raise questions concerning material you studied in this course before taking the Final Exam.
Final Exam - Microeconomics	Take the Final Exam in macroeconomics. This 2 1/2-hour teacher-graded exam includes both multiple-choice and free-response questions.

AP Microeconomics

AP Microeconomics

Course Overview

Name	AP Microeconomics
Description	<p>AP Microeconomics studies the behavior of individuals and businesses as they exchange goods and services in the marketplace. Students will learn why the same product costs different amounts at different stores, in different cities, at different times. They'll also learn to spot patterns in economic behavior and how to use those patterns to explain buyer and seller behavior under various conditions. Microeconomics studies the economic way of thinking, understanding the nature and function of markets, the role of scarcity and competition, the influence of factors such as interest rates on business decisions, and the role of government in promoting a healthy economy. The equivalent of a 100-level college course, AP Microeconomics prepares students for the AP Exam and for further study in business, history, and political science.</p> <p>The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.</p>
Teacher role	All students enrolled in this course are assigned to a "section" and have a teacher who is charged with ensuring student success and addressing student questions, problems, and concerns, as well as with grading student assignments, tests and the final examination. In addition, all students have a "mentor" who is available in their school or home and helps keep the student on track for completing the materials in a timely manner.
Prerequisites	<ul style="list-style-type: none"> Algebra I Recommended for qualified AP students
Length	One semester
Materials	<p>The majority of the required instructional material for this course is available to students online and is equivalent to a college-level textbook. These materials were created and owned by our company. In addition, the following is an optional purchase:</p> <p>Tucker, I. B., ed. (2018) <i>Microeconomics for Today</i>, 10th Edition. Mason, OH Thomson/ South-Western.</p> <ul style="list-style-type: none"> Alternate editions also acceptable: 5th-9th.

The following key should help you understand the different types of activities students engage in during the course:

Activity Type	Description
Discuss	Students discuss topics in an online bulletin-board style forum. Teachers participate in these discussions as well and students receive credit for their participation.
Exam	Test administered at semester's end covering all material from the course. This exam is graded by the teacher and not only tests student understanding of the course material, but is also designed to be a practice run for the AP exam itself.
Practice	Students answer questions regarding what they have learned thus far. These assignments are graded by the teacher, who provides relevant feedback.
Quiz	Computer-administered and automatically graded assessment.
Review	Review of the material covered in a unit or over a semester
Study	Primary instructional online content that teaches new concepts through multimedia and interactivity,
Test	Assessment covering the material introduced in a unit, which is graded by the teacher.

Skills

Skill 1 - Principles and Models: Define economic principles and models.

- Skill 1.A:
 - Unit 1, Lesson 1, Activity 1, Study: Introduction to Economics: Students will explore the basics of economics, including goods, services, markets, and a fundamental concept of economics: scarcity. This lesson requires students to take notes and describe basic economic principles, concepts, and models. They will take both self-guided notes and answer course-created short answer questions.
 - Unit 4, Lesson 1, Activity 1, Study: Business Organization: Students will explore the most common legal forms of business organizations – sole proprietorship, partnership, and corporation – and the advantages and disadvantages of each. As they move through the lesson, they will need to watch the lesson tutorial, take notes on key terms, and take individual notes on each tutorial section. This will require students to describe the basic economic concepts, principles, and models associated with business organization.
 - Unit 7, Lesson 1, Activity 1, Study: Externalities and Public Goods: Students will examine positive and negative externalities, and the role of government intervention in the case of market failures. Define non-rival consumption and non-exclusionary consumption and use these definitions to determine whether a good is public or private. As they move through the lesson, they will need to watch the lesson tutorial, take notes on key terms, and take individual notes on each tutorial section. This will require students to describe the basic economic concepts, principles, and models associated with public goods.
- Skill 1.B:
 - Unit 1, Lesson 1, Activity 5, Study: Economic Tools: Graphs and Equations: Students will review basic concepts about graphs, equations, slopes and intercepts and see how to apply these skills as they work with income graphs and formulas. Students will be able to identify different economic principles, concepts, or models illustrated by examples. As student progress through the lesson, they will learn and identify different ways that principles are modeled through graphs, and they will take notes on these methods.
 - Unit 3, Lesson 2, Activity 1, Study: Supply: Examine supply curves and see how to make one as you learn about the law of supply. Define supply and explore how the supply curve is the best choice of quantity at each market price. Students will watch the tutorial as the lesson progresses and take notes on their study guide. By the end of the lesson, students will be able to identify the economic principle of supply using data.
 - Unit 4, Lesson 1, Activity 4, Study: Production in the Short Run: See how firms make their decisions about production in the short run. Explore difference between the short run and the long run and the difference between variable and fixed factors of production. Examine how diminishing marginal product relates to cost and learn how the marginal and average product curve relate to one another and to the total product curve.
- Skill 1.C:
 - Unit 2, Lesson 1, Activity 3, Study: Production Possibilities Frontier: Students will learn about production possibilities frontiers and will investigate how to chart and graph data values to illustrate the concept.
 - Unit 4, Lesson 2, Activity 1, Study: Costs in the Short Run: Examine the costs a firm faces in the short run. Learn about the difference between fixed costs and variable costs. Learn how fixed, variable, and marginal costs change with production and differentiate between marginal and average costs. Students will complete this activity by watching a tutorial and taking detailed notes as they watch. They will need to take notes on key vocabulary and this will ask them to identify the principle of cost using data to show how those costs change with production.
 - Unit 7, Lesson 2, Activity 1, Study: Income Distribution and Taxes: See how income is spread through the U.S. economy and learn about the different types of taxation. Explore Lorenz curves, examine poverty, the role of government in income distribution, and the economics of taxation. Explore the problems inherent in using Lorenz curves as measures of income inequality and differentiate between proportional, progressive, and regressive policies. Students will watch tutorials and take notes where they will look at principles like the Lorenz curve and establish how to use quantitative data to chart the curve.

- Skill 1.D:
 - Unit 1, Lesson 1, Activity 4, Discuss: Scarcity and Value: Students will discuss the concepts of scarcity and value with their classmates. They will respond to two questions about scarcity and value and then will be required to discuss the differences of opinion they have with another student regarding the economic concepts.
 - Unit 3, Lesson 4, Activity 2, Practice: Investigate Elasticity of Demand: Students will investigate elasticity of demand as well as the relationship between elasticity and total revenue in this online interactive activity. As

students graph data, they will compare the difference between elastic and inelastic demand in short answer written responses.

- Unit 5, Lesson 4, Activity 4, Discuss : Market Structures: Students will discuss issues related to the main types of market structures with their classmates. The discussion will focus around the comparison of different market structures and which market is better for the specific example business.

Skill 2 – Interpretation: Explain given economic outcomes.

● Skill 2.A:

- Unit 2, Lesson 2, Activity 5, Practice: Apply Concepts of Production and Trade: Students will apply the concepts of comparative advantage and specialization to questions about individual and national production. They will answer questions regarding multiple economic scenarios that will require students to use the economic principles of comparative advantage and specialization to explain how an outcome occurs and what actions would need to be carried out to achieve that outcome.
- Unit 3, Lesson 2, Activity 4, Discuss: Another Determinant of Supply?: Students will explain their opinion about a possible addition to the list of determinants of supply-the number of suppliers in the market. Students will participate in a classroom discussion where they will have to focus on the principle of supply and discuss variables of supply and what effect those variables have on the outcome of different scenarios.
- Unit 4, Lesson 1, Activity 3: Discuss: Costs and Profits of Your Own Business: Choose a type of organization for your own business and discuss issues of cost and profit. This lesson will ask students to analyze key economic concepts and principles, discuss decisions they would make for their business, and analyze the outcomes of those decisions in a class wide discussion.

● Skill 2.B:

- Unit 3, Lesson 1, Practice: Apply concepts of Demand and Shifts of Demand Curves: Students will answer questions on demand and the determinants of demand. This will require students to use the economic principle of demand to analyze how different economic outcomes occur when there are different variables on demand. Students will complete this activity by answering several questions on hypothetical situations relating to the economic principle.
- Unit 3, Lesson 4, Activity 1, Study: Price Elasticity of Supply and Other Elasticities: Students will examine producer sensitivity to price changes, consumer sensitivity to income and the prices of related goods. Differentiate between elastic, inelastic and unit elastic supply. Explore the determinants of price elasticity of supply and how income elasticity of demand is used to categorize goods as normal or inferior. Also, explore how crossprice elasticity of demand is affected by the change in price of a complement, substitute and non- related goods. As students complete this lesson, they will watch the tutorial and take detailed notes on elasticity of supply. They will examine how multiple contributing variables lead to specific economic outcomes in relation to elasticity.
- Unit 6, Lesson 2, Activity 4: Practice: Apply Concepts of Factor Demand: Students will answer short answer questions about the demand for the factors of production. Throughout this lesson, students will be required to analyze multiple variables as they relate to factor demand. They will then use these variables to discuss economic outcomes as they relate to factor demand.

● Skill 2.C:

- Unit 2, Lesson 2, Activity 2, Practice: Investigate the Absolute and Comparative Advantage: Students will practice calculating comparative and absolute advantage in a scored, interactive, online activity. Students will interpret data to evaluate who has comparative advantage in multiple scenarios.
- Unit 3, Lesson 2, Activity 5, Practice: Investigate Shifts of Supply Curves: Students will investigate how to shift supply curves in this scored, interactive activity. Students will need to determine how supply curves change when situations are presented to them and reflect those changes using their calculations on graphs. Students also answer short answer questions in this assignment.
- Unit 6, Lesson 2, Activity 2, Practice: Investigate Labor Markets: Students will compare the outcomes of a regular labor market with a monopsonistic labor market, and answer questions about labor unions. Students will also use quantitative data to interpret the impact of labor costs on the economic outcome and success of Acme Company, a fictional company. There are short answer and extended response questions.

Skill 3 – Manipulation: Determine outcomes of specific economic situations.

● Skill 3.A:

- Appendix 2, Lesson 2, Activity 1, Practice: Costs and Profits: Students will discuss the costs and

Pennwood Cyber Charter School

benefits of taking specific classes with a focus on microeconomics. They will analyze the principles of cost and benefit and use this analysis to determine the outcome of their decision through a class discussion.

- Unit 3, Lesson 4, Activity 5, Practice: Apply Concepts of All Elasticities: Students will answer questions about price elasticity of supply and demand, income elasticity of demand, and cross-price elasticity of demand. Students will answer multiple questions about elasticity of supply and demand and will determine the outcome of various economic situations using their knowledge of elasticity.
- Skill 3.B:
 - Unit 3, Lesson 3, Activity 3, Study: Changes in Equilibrium: Students will look at supply and demand curves together as they explore the concept of market equilibrium. They will develop an understanding of how price ceilings and price floors affect the market and how price functions to ration a product. They will then see how changes in supply and demand affect market equilibrium and investigate price floors and price ceilings. Students will complete this through analytical questions that they will answer as reading and watching the lesson tutorial.
 - Unit 5, Lesson 2, Activity 6, Study: Monopolistic Competition: Students will examine the monopolistic competition market and find out about product differentiation. They will consider the market conditions that must exist for a market to be monopolistically competitive and how these competitors can increase their market share as well as how they set their output to maximize profit. Also, they will learn how to identify monopolistic competitors. Through tutorials and notes, students will determine the effect of changes on economic markets in relation to monopolies.
- Skill 3.C:
 - Unit 2, Lesson 1, Activity 4, Practice: Investigate the PPF: Students will investigate the production possibilities frontier and factors that affect it in an interactive, scored online activity. They will use data on phone calls and posters made in relation to a fundraiser in order to determine the effect of change and use that data by plotting it on a graph to illustrate that change.
 - Unit 6, Lesson 1, Activity 2, Practice: Investigate Factor Demand: Students will practice deriving a factor demand curve in this scored interactive activity. They will investigate change over time for a birdhouse company whose quantitative data and calculations change as they become more successful, and will analyze the results of the changes the business must make as a result.

Skill 4 – Graphing and Visuals: Model economic situations using graphs or visual representations.

- Skill 4.A:
 - Unit 2, Lesson 1, Activity 5, Practice: Apply Concepts of Basic Economics: Students will use the tools of the production possibilities frontier and marginal analysis to answer questions about production, cost, trade, and value. They will then draw and explain graphs that represent the economic model.
 - Unit 4, Lesson 1, Activity 5, Practice: Investigate Production in the Short Run: Students will practice creating marginal product curves, and answer questions about the production of a firm in the short run in this interactive scored exercise. Students will come up with data using average product and marginal product and then take that data and draw and accurately labeled graph to represent a production model.
 - Unit 7, Lesson 2, Activity 2, Practice: Investigate Taxes and Income Distribution: Students will practice working on a graph of the Lorenz curve, answer questions about the different types of taxes, and consider issues of redistribution and equity. The graphs that students produce should accurately depict taxes and income distribution on the Lorenz curve.
- Skill 4.B:
 - Unit 3, Lesson 1, Practice – Investigate Demand: Students will practice using demand schedules and demand curves in a scored, online, interactive activity. They will demonstrate their understanding of demand schedules and demand curves by using quantitative data and plotting that data on an accurately labeled graph in order to illustrate the demand for stereos.
 - Unit 5, Lesson 1, Practice – Apply Concepts of Perfect Competition: Students will answer questions about perfect competition and take quantitative data and plot it on various graphs. This will illustrate understanding of competition and how to represent the concept on a clearly labeled graph.
 - Unit 5, Lesson 2, Practice – Apply Concepts of Monopolies: Students will answer questions about monopolies and determine the correct course of action for a monopolist to minimize losses. They will then need to graph this data to illustrate their understanding of the scenarios provided in the lesson.

- Skill 4.C:
 - Unit 3, Lesson 1, Activity 4, Practice: Investigate Shifts of Demand Curves: Students will practice shifting demand curves in a scored, interactive activity. This lesson will ask students to demonstrate the effect of a change in demand on accurately labeled graphs in relation to demand of VCRs.

Pennwood Cyber Charter School

- Unit 4, Lesson 2, Activity 2, Practice: Investigate Costs in the Short Run: Students will practice using tables and graphs with different short-run cost information for a firm. This will demonstrate the effect of a change in an economic situation on an accurately labeled graph or visual. They will answer short and extended response questions.

Course Syllabus

Big Ideas (CR2):

There are four big ideas that will be addressed and labeled throughout the course.

- Scarcity and Markets (MKT)
- Costs, Benefits, and Marginal Analysis (CBA)
- Production Choices and Behavior (PRD)
- Market Inefficiency and Public Policy (POL)

The syllabus will clearly identify each of the big ideas and will identify them using their abbreviations to illustrate how they are interconnected and build on each other throughout the units of the course. For example:

Big Idea 3, Production Choices and Behavior, is a main focus of Units 2, 4, 5, and 6. In Unit 2, students will investigate national production and trade and how specialization increases wealth through the analysis of a PPF. They will also look at what could increase production and the role of trade in determining the PPF. In Unit 4, students will evaluate the connection between production in the short-run and in the long-run. They will quantitate this through the concept of marginal product curves.

Students will apply short-run and long-run costs that firms face and will apply these to tables and graphs detailing fixed, variable, and marginal costs. In Unit 5, students will investigate competition. They will complete activities asking them to determine perfect competition markets, work with competition graphs, and connect to long-run situations and efficiency. They will also focus on monopolies and the conditions that make a monopoly possible. They will draw marginal-revenue curves and investigate the cost curves of a natural monopoly. They will also examine the concepts of price discrimination and government regulation of monopolies. They will practice finding the profit-maximizing level of output for a monopolistic competitor. They will explore oligopolies through study activities and practices where they will work with graphs and tables to investigate oligopoly models. They will investigate the role of the government in competition and the role of market structures and mergers in competition. Finally, in Unit 6, students will investigate factor markets and factor demand. They will practice using demand curves and what causes shifts in those curves. They will learn about demand for labor and compensation for labor. In their investigation of labor markets, they will learn about rent, interest, and profit and analyze the role of profit in resources allocation.

Unit 1: What is Economics?

Big Ideas (CR2)

- Big Idea 1, Scarcity and Markets (MKT): How do individuals and economies confront the problem of scarcity? Why do people and other countries trade with one another?

Readings:

- *Microeconomics for Today*
 - Pages 2-6, 34

The content in this unit maps to the following sections of the College Board's Advanced Placement topic outline:

- A. Scarcity, choice, and opportunity cost
- D. Economic systems

Topics covered in this unit:

- What is Economics?
- Scarcity, Wants, and Resources
- Scarcity and Value
- Markets

- Graphs
- Equations
- Intercepts and Slopes
- Three Fundamental Questions
- Different Ways to Organize an Economic System
- The U.S.: A Mixed Economy
- Four Economic Goals

Lesson 1: What is Economics?

Lesson Objectives:

- Describe the format of this course and the skills you'll need to do well.
- Explain what economics is a study of.
- Define macroeconomics and microeconomics.
- Define scarcity.
- Define resources, goods, services, and markets.
- List and explain the three questions that every economic system must answer.
- Explain the three basic economic systems and explain how they each answer the three basic economic questions.
- Explain why the term *mixed economies* describes the nature of most modern economic systems.
- Explain the goals of economic policy: efficient use of resources, price stability, full employment and economic growth.
- Explain the role of price in indicating the relative scarcity of a good.
- Read and interpret graphs.
- Define independent variable and dependent variable.
- Take data from a table and make a graph.
- Define origin, intercept, and slope.
- Determine a line's slope.
- Solve an equation.
- Take data from a graph or table and show it in an equation.

Practice - Introducing Microeconomics	Go over the format and goals of the course. See how to succeed in the course and what to expect on the AP exam.
Discuss - Why Study Economics?	Introduce yourself to your classmates and discuss with them your definition of economics and your reasons for studying it.
Study - Introduction to Economics	Explore the basics of economics, including goods, services, markets, and a fundamental concept of economics: scarcity. (Skill 1.A)
Discuss - Scarcity and Value	Discuss the concepts of scarcity and value with your classmates. (Skill 1.D)
Study- Economic Tools: Graphs and Equations	Review basic concepts about graphs, equations, slopes and intercepts and see how to apply these skills as you work with income graphs and formulas. (Skill 1.B)
Study - Economic Systems	Examine the major questions every economic society faces and explore the different ways traditional, command, and mixed economies answer these questions. (Skill 1.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content introduced in this lesson.

Lesson 2: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - What Is Economics?	Review your studies of basic economic terms and concepts presented in this unit.
Practice - What is Economics?	Review common economic terms.
Discuss - Cram Session	Discuss economic terms and other concrete concepts about which you are unclear.
Test - What Is Economics?	Take a 50-minute, teacher-graded test covering the main concepts introduced in this unit. The test includes both multiple-choice and free-response questions.

Unit 2: Basic Economic Concepts

- Big Idea 1, Scarcity and Markets (MKT):
 - How do individuals and economies confront the problem of scarcity?
 - Why do people and other countries trade with one another?
- Big Idea 2, Costs, Benefits, and Marginal Analysis (CBA):
 - Why do all decisions have costs?
 - Why do people consider the additional costs and benefits of possible actions rather than just the total costs and benefits when making decisions?

Readings:

- *Microeconomics for Today*
 - Pages 6-14, 35-46, 403-413

The content in this unit maps to the following sections of the College Board’s Advanced Placement topic outline:

- I. Basic Economic Concepts
 - A. Scarcity, choice, and opportunity cost
 - B. Production possibilities curve
 - C. Comparative advantage, absolute advantage, specialization, and trade
 - E. Property rights and the role of incentives
 - F. Marginal analysis

Topics covered in this unit:

- Net benefits and Self-interest
- Costs Are Opportunity Costs
- Sunk Costs
- Positive and Normative Economics
- The Production Possibilities Frontier
- PPF and Opportunity Costs
- Absolute and Comparative Advantage
- Trade Between Individuals
- Specialization
- Production Possibilities Frontier for an Economy
- International Trade: A Positive View
- International Trade: A Normative View
- The Scientific Method & Difficulties
- Economics and Special Experimental Difficulties
- Theories and Models
- Four Types of Models

Lesson 1: Costs, Benefits, and PPF

Lesson Objectives:

- Relate how scarce resources and unlimited wants make decisions necessary.
- Explain the ideas of self-interest and net benefit.
- Define the concept of opportunity cost.
- Explain sunk costs and relate them to the idea of marginal analysis.
- Distinguish between positive and normative economics.
- Interpret a graph called a *production possibility frontier* and explain how it's used to demonstrate scarcity, choice, and opportunity cost.
- Define the law of increasing opportunity costs.
- Relate the PPF to the concepts of efficiency, opportunity cost, and the law of increasing opportunity cost.

Study - Costs and Benefits	Examine definitions of opportunity costs and sunk costs as well as benefits and the idea of self-interest. Analyze decision alternatives by considering the opportunity costs and by using marginal analysis as well as positive and normative analysis. (Skill 1.B)
Discuss -Weighing Costs and Benefits	Discuss how you would weigh costs and benefits in various situations. (Skill 3.A)
Study - Production Possibilities Frontier	See how economists use a Production Possibilities Frontier (PPF) graph to analyze the opportunity costs of a decision and its efficiency. (Skill 1.C)
Practice – Investigate the PPF	Investigate the PPF curve and factors that affect it in this interactive, scored, online activity. (Skill 3.C)
Practice - Apply Concepts of Basic Economics	Use the tools of the PPF and marginal analysis to answer questions about production, cost, trade, and value. Draw and explain graphs and send your work to your teacher for grading. (Skill 4.A)
Quiz – Wrap-Up	Answer questions to assess your understanding of the content covered in this lesson.

Lesson Objectives:

- Define and explain the concept of absolute advantage.
- Define and explain the concept of comparative advantage.
- Explain how specialization causes interdependence and trade.
- Explain why voluntary trade is beneficial to all parties in an exchange.
- Identify the key ideas of national production and trade, including the benefits of specialization, the relationship between economic growth and the PPF, shifts of the PPF, and advantages and disadvantages of free trade.

Study- Individual Production and Trade	Investigate issues related to specialization and trade. Explore the use of absolute advantage and comparative advantage to rank the ability of producers to create goods. (Skill 1.A)
Practice - Investigate the Absolute and Comparative Advantage	Practice calculating comparative and absolute advantage in this scored, interactive, online activity. (Skill 2.C)
Discuss - Comparative Advantage	With your classmates, raise and discuss questions regarding comparative advantage. (Skill 1.D)

Study - National Production and Trade	Examine specialization, opportunity costs, and the Production Possibilities Frontier, as they each relate to trade. Analyze production and trade decisions and consider positive and normative views of international trade. (Skill 1.C)
Practice - Apply Concepts of Production and Trade	Apply the concepts of comparative advantage and specialization to questions about individual and national production. Send your work to your teacher for scoring. (Skill 2.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 3: The Scientific Tools of Economics

Lesson Objectives:

- Describe how economists use the scientific method to study economic problems.
- Recognize research pitfalls.
- Recognize the special difficulties economists face when checking theories and give examples of each.
- Explain how models are used as a simplified representation of reality.
- Explain the two goals of an economic model: explanation and prediction.
- List and explain the four ways that models can be described: verbal, numeric, graphic, and algebraic.

Study - The Scientific Method	See how economists and other scientists use the scientific method to develop theories and test their ideas. Examine definitions of ceteris paribus and self-interest. (Skill 1.A)
Discuss - Economics and the Scientific Method	Discuss the particular challenges faced by economists using the scientific method. (Skill 1.D)
Study - Theories and Models	Explore the various ways ideas can be represented as models. Look at four types of models: verbal, numeric, graphic, and algebraic. List the characteristics of good models and explore the nature of economic models. (Skill 1.C)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content introduced in this lesson.

Lesson 4: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - Basic Economic Concepts	Review your studies of basic economic concepts as presented in this unit.
Practice - Basic Economic Concepts	Review the key terms and concepts introduced in this lesson.
Discuss - Cram Session	Discuss basic economic concepts and areas about which you are unclear.

Test - Basic Economic Concepts	Take a teacher-scored, 50-minute test covering the main concepts introduced in this unit. The test includes both free-response and multiple-choice items.
--------------------------------	---

Unit 3: Demand, Supply, Elasticity, and Choice

- Big Idea 1, Scarcity and Markets (MKT):
 - How do individuals and economies confront the problem of scarcity?
 - Why do people and other countries trade with one another?
- Big Idea 4, Market Inefficiency and Public Policy (POL):
 - How does government policy affect market outcomes?

Readings:

- *Microeconomics for Today*
 - Pages 59-83, 100-110, 124-127, 130-144, 154-161

The content in this unit maps to the following sections of the College Board's Advanced Placement topic outline:

- II. The Nature and Function of Product Markets
 - A. Supply and demand
 - 1. Market equilibrium
 - 2. Determinants of supply and demand
 - 3. Price and quantity controls
 - 4. Elasticity
 - a) Price, income, and cross-price elasticities of demand
 - b) Price elasticity of supply
 - 5. Consumer surplus, producer surplus, and market efficiency
 - B. Theory of consumer choice
 - 1. Total utility and marginal utility
 - 2. Utility maximization: equalizing marginal utility per dollar
 - 3. Individual and market demand curves
 - 4. Income and substitution effects

Topics covered in this unit:

- Demand Schedule and Curve
- Law of Demand
- Determinants of Demand
- Change in Demand and Change in Quantity Demanded
- Supply and Supply Curve
- Law of Supply
- Determinants of Supply
- Change in Supply and Change in Quantity Supplied
- Markets and Market Equilibrium
- Excess Demand and Excess Supply
- Price Ceilings and Floors
- Price Effect of Change in Demand
- Equilibrium Effect of Change in Supply
- Simultaneous Changes in Demand and Supply
- Price Elasticity of Demand
- Determinants of Price Elasticity of Demand
- Price Elasticity of Supply
- Determinants of Supply Elasticity
- Other Elasticities
- Consumer Surplus

Lesson 1: Demand

Lesson Objectives:

- Define the economic concept of demand.
- Explain and compile a demand schedule.
- Create a demand curve.
- Define the law of demand.

- Explain the income effect and substitution effect.
- List and explain the determinants of demand.
- Show and explain changes in demand due to changes in the determinants of demand.
- Define different categories of goods: normal and inferior goods and substitute and complement goods.
- State and show graphically the difference between a *change in the quantity demanded* and a *change in demand*.

Study - Demand	Explore the basics of consumer demand, model demand in a table, and see how to make a demand curve. Develop an understanding of the income and substitution effects and define demand. (Skill 1.B)
Practice - Investigate Demand	Practice using demand schedules and demand curves in this scored, online, interactive activity. (Skill 4.B)
Study- Determinants of Demand	See what affects consumer demand and how those effects are shown on a graph. Learn about a change in quantity demanded versus a change in demand and develop an understanding of the determinants of demand. Also explore terms used to classify good, such as "normal goods," "inferior goods," "complement goods," and "substitute goods." (Skill 1.A)
Practice - Investigate Shifts of Demand Curves	Practice shifting demand curves in a scored interactive activity. (Skill 4.C)
Practice - Apply Concepts of Demand and Shifts of Demand Curves	Answer questions on demand and the determinants of demand. Send your work to your teacher for grading. (Skill 2.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content covered in this lesson.

Lesson 2: Supply

Lesson Objectives:

- Define the economic concept of supply.
- Explain and compile a supply schedule.
- Draw a supply curve.
- Define the law of supply, including the role of increasing costs.
- List and explain the determinants of supply.
- Show and explain changes in supply due to changes in the determinants of supply.
- State and be able to represent graphically the difference between a change in the quantity supplied and a change in supply.

Study - Supply	Examine supply curves and see how to make one as you learn about the law of supply. Define supply and explore how the supply curve is the best choice of quantity at each market price. (Skill 1.B)
Practice - Investigate Supply	Practice using supply schedules and supply curves in this scored online interactive activity. (Skill 2.C)

Study - Determinants of Supply	See what affects suppliers' decisions to make and sell a good or service and how to show the effects graphically. Learn to differentiate between a change in quantity supplied and a change of supply and develop an understanding of the determinants of supply. (Skill 1.B)
Discuss - Another Determinant of Supply?	Explain your opinion about a possible addition to the list of determinants of supply-the number of suppliers in the market. (Skill 2.A)
Practice - Investigate Shifts of Supply Curves	Investigate how to shift supply curves in this scored interactive activity. (Skill 2.C)
Practice - Apply Concepts of Supply and Shifts of Supply Curves	Answer questions on supply and the determinants of supply, provide graphs and explanations, and send your work to your teacher for scoring. (Skill 4.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content covered in this lesson.

Lesson 3: Market Equilibrium and Price Determination

Lesson Objectives:

- Define markets and the idea of market competition.
- Define and explain equilibrium price and equilibrium quantity, and explain why equilibrium is a stable condition, ceteris paribus.
- Explain how demand and supply interact to determine equilibrium price and equilibrium quantity.
- Explain excess demand and excess supply.
- Explain the effect of a price ceiling on a market and define a shortage.
- Explain the effect of a price floor on a market and define a surplus.
- Predict and show graphically the effect of a change in demand, a change in supply, or a change in both on the equilibrium price and equilibrium quantity.
- Explain the adjustment process in the market when supply changes, demand changes, or both changes.

Study - Market Equilibrium	Look at supply and demand curves together as you explore the concept of market equilibrium. Develop an understanding of how price ceilings and price floors affect the market and how price functions to ration a product. (Skill 3.B)
Practice - Investigate Market Equilibrium	Practice finding and indicating market equilibrium in an online interactive scored activity. (Skill 3.B)
Study- Changes in Equilibrium	See how changes in supply and demand affect market equilibrium and investigate price floors and price ceilings. (Skill 3.B)
Practice - Investigate Changes in Equilibrium	Practice shifting supply and demand curves and notice how the shifts affect market equilibrium in this scored interactive activity. (Skill 3.B)
Practice - Apply Concepts of Market Equilibrium	Answer questions about market equilibrium, focusing on issues of price floors and ceilings and the adjustment to equilibrium. Send your work, including graphs and explanations, to your teacher for grading. (Skill 4.B)

Lesson 4: Elasticity and Consumer Choice

Lesson Objectives:

- Define elasticity.
- Calculate price elasticity of demand and explain the relationship between elasticity and total revenues.

- Explain the differences between elastic, inelastic, and unit elastic demand.
- Identify and explain the determinants of price elasticity of demand.
- Calculate and explain price elasticity of supply.
- Explain the characteristics of an elastic, inelastic, and unit elastic supply.
- Explain the determinants of the elasticity of supply.
- Explain income elasticity of demand and relate it to normal and inferior goods.
- Explain cross-price elasticity of demand and relate it to substitute and complement goods.
- Define utility and explain how it's measured and used.
- Explain the differences between marginal utility and total utility.
- Relate the concepts of utility to the shape of the demand curve.
- Explain the relationship between the downward-sloping demand curve and the law of diminishing marginal utility.
- Explain the relationship between allocating income and maximizing utility using marginal utility per dollar.
- Explain and show consumer surplus graphically.

Study - Price Elasticity of Demand	See how to measure consumer sensitivity to price changes. Differentiate between elastic, inelastic and unit elastic demand. Explore the determinants of price elasticity of demand and the relationship between elasticity and total revenue. (Skill 1.A)
Practice - Investigate Elasticity of Demand	Investigate elasticity of demand as well as the relationship between elasticity and total revenue in this online interactive activity. (Skill 1.D)
Study - Price Elasticity of Supply and Other Elasticities	Examine producer sensitivity to price changes, consumer sensitivity to income and the prices of related goods. Differentiate between elastic, inelastic and unit elastic supply. Explore the determinants of price elasticity of supply and how income elasticity of demand is used to categorize goods as normal or inferior. Also, explore how cross- price elasticity of demand is affected by the change in price of a complement, substitute and non-related good. (Skill 2.B)
Practice - Investigate Elasticity of Supply and Other Elasticities	Practice calculating price elasticity of supply, and examine income and cross-price elasticity in this scored interactive activity. (Skill 2.C)
Practice - Apply Concepts of All Elasticities	Answer questions about price elasticity of supply and demand, income elasticity of demand, and cross-price elasticity of demand. Submit your work to your teacher for evaluation (Skill 3.A)
Study - Utility	Examine the concepts behind the economic definition of consumer satisfaction: utility and consumer choice. Define marginal and total utility and explore how knowing these help consumers maximize utility. Also define and calculate consumer surplus. (Skill 1.A)
Practice - Investigate Utility and Consumer Surplus	Practice using the ideas of utility, and explore consumer surplus on a graph in an interactive scored activity. (Skill 4.C)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content introduced in this lesson.

Lesson 5: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - Demand, Supply, Elasticity, and Consumer Choice	Review your studies of demand, supply, elasticity, and consumer choice as presented in this unit.
Practice - Demand, Supply, Elasticity, and Consumer Choice	Review common terms (referring to demand, supply, elasticity, and consumer choice) introduced in this unit.
Discuss - Cram Session	Discuss demand, supply, elasticity, and consumer choice and any areas about which you are unclear.
Test - Demand, Supply, Elasticity, and Consumer Choice	Take a teacher-scored, 50-minute test covering the main concepts introduced in this unit. It includes both multiple-choice and free-response questions.

Unit 4: Firm Production, Costs, and Revenue

- Big Idea 2, Costs, Benefits, and Marginal Analysis (CBA):
 - How do businesses use marginal analysis to make decisions?
- Big Idea 3, Production Choices and Behavior (PRD)
 - What drives producers’ decision making?
 - How can a market be perfectly competitive?

Readings:

- *Microeconomics for Today*
 - Pages 180, 182-197

The content in this unit maps to the following sections of the College Board’s Advanced Placement topic outline:

- II. The Nature and Function of Product Markets
 - D. Production and costs
 1. Production functions: short and long run
 2. Marginal product and diminishing returns
 3. Short-run costs
 4. Long-run costs and economies of scale
 - E. Firm behavior and market structure
 1. Profit:
 - a. Accounting versus economic profits
 - b. Normal profit

Topics covered in this unit:

- Firms
- Sole Proprietorship, Partnerships, and Corporations
- Other Business Organizations
- Explicit and Implicit Costs
- Measures of Profit
- Production in the Short Run
- Fixed and Variable Resources
- Law of Diminishing Marginal Returns

- Total, Marginal, and Average Product Curves
- Short Run and Long Run Cost Curves
- Economies and Diseconomies of Scale

Lesson 1: Firm Production

Lesson Objectives

- Define the most common legal forms of business organization.
- Define explicit and implicit costs and relate these costs to the different types of profits-accounting profit, economic profit, and normal profit.
- Define the difference between the long run and the short run.
- Define marginal product and relate changes in marginal product to changes in total product, or total production.
- Explain increasing and decreasing marginal returns.

Study - Business Organization	Explore the three most common legal forms of business organizations - sole proprietorship, partnership, and corporation - and the advantages and disadvantages of each. (Skill 1.A)
Study - Costs and Profits	Examine the concepts behind the economic definition of costs and profits. Learn about three kinds of profit: accounting profit, normal profit, and economic profit and learn about implicit costs. (Skill 1.A)
Discuss - Costs and Profits of Your Own Business	Choose a type of organization for your own business and discuss issues of cost and profit. (Skill 2.A)
Study - Production in the Short Run	See how firms make their decisions about production in the short run. Explore difference between the short run and the long run and the difference between variable and fixed factors of production. Examine how diminishing marginal product relates to cost and learn how the marginal and average product curve relate to one another and to the total product curve. (Skill 1.B)
Practice - Investigate Production in Short Run	Practice creating marginal product curves, and answer questions about the production of a firm in the short run in this interactive scored exercise. (Skill 4.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content covered in this lesson.

Lesson 2: Costs in the Short Run and the Long Run

Lesson Objectives:

- Define, calculate, and graph total fixed cost, total variable cost, marginal cost, and total cost.
- Define, calculate, and graph average fixed cost, average variable cost, and average total cost.
- Explain the relationship between marginal cost and marginal returns.
- Explain the relationship between marginal cost and average variable cost, and marginal cost and average total cost.
- Explain the relationship between the firm's short-run and long-run average-total-cost curves.
- Define economies and diseconomies of scale, and list some of the sources of each.

Pennwood Cyber Charter School

- Relate economies of scale to the number of firms in an industry.
- Explain how the shape of the long-run average-total-cost curve is influenced by economies of scale, diseconomies of scale, and constant returns to scale.

Study - Costs in the Short Run	Examine the costs a firm faces in the short run. Learn about the difference between fixed costs and variable costs. Explore several "total" and "average" costs based on fixed and variable cost. Learn how fixed, variable, and marginal costs change with production and differentiate between marginal and average costs. (Skill 1.C)
Practice - Investigate Costs in the Short Run	Practice using tables and graphs with the different short-run cost information for a firm in an interactive scored exercise. (Skill 4.C)
Study - Costs in the Long Run	Focus on the long-run costs of a firm, particularly a firm's long-run average cost curve and see how the shape of this curve is affected by "economies of scale." Explore how economies and diseconomies of scale relate to increasing and decreasing marginal returns and how the long-run average cost curve relates to the short-run average cost curves. (Skill 1.B)
Practice - Investigate Costs in the Long Run	In this interactive scored exercise, practice identifying economies of scale and use short-run cost curves to create a long-run cost curve. (Skill 2.C)
Practice - Apply Concepts of Short-Run Costs, Long-Run Costs, and Profit	Answer questions about the production and costs faced by a firm in the long and short run. Submit your work, including tables and graphs, to your teacher for grading. (Skill 4.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content covered in this lesson.

Lesson 3: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - Firm Production, Costs, and Revenue	Review your studies of production and costs as covered in this unit.
Practice - Firm Production, Costs, and Revenue	Review common terms referring to production and costs introduced in this unit.
Discuss - Cram Session	Discuss production and costs and any areas about which you are unclear.
Test - Firm Production, Costs, and Revenue	Take a teacher-graded, 50-minute test covering the main concepts introduced in this unit. The test includes both multiple-choice and free-response items.

Unit 5: Market Structure

- Big Idea 3, Production Choices and Behavior (PRD)
 - What drives producers' decision making?
 - How are imperfectly competitive markets inefficient?

Readings:

- *Microeconomics for Today*
 - Pages 110-112, 211-231, 240-259, 268-286, 348-362

The content in this unit maps to the following sections of the College Board's Advanced Placement topic outline:

II. The Nature and Function of Product Markets

D. Firm behavior and market structure (25-35%)

1. Profit
 - a. Profit maximization: $MR=MC$ rule
2. Perfect competition
 - a. Profit maximization
 - b. Short-run supply and shutdown decision
 - c. Behavior of firms and markets in the short run and in the long run
 - d. Efficiency and perfect competition
3. Monopoly
 - a. Sources of market power
 - b. Profit maximization
 - c. Inefficiency of monopoly
 - d. Price discrimination
 - e. Natural monopoly
4. Oligopoly
 - a. Interdependence, collusion, and cartels
 - b. Game theory and strategic behavior
5. Monopolistic competition
 - a. Product differentiation and role of advertising
 - b. Profit maximization
 - c. Short-run and long-run equilibrium
 - d. Excess capacity and inefficiency

Topics covered in this unit:

- Perfectly Competitive Markets
- Short-Run Competition and Profits
- Minimizing Short-Run Losses
- Long-Run Perfect Competition
- Efficiency
- Monopoly and Monopolistic Marginal Revenue
- Monopolistic Profit Maximization, Efficiency, and Competition
- Price-Discriminating Monopolies
- Natural Monopolies and Product Differentiation
- Oligopoly and Market Concentration
- Oligopolistic Profit Maximization
- Oligopoly Models
- Oligopoly and Perfect Competition
- Perfect Competition and Monopolistic Competition
- Mergers
- Government Regulation, Antitrust Legislation, and Deregulation

Lesson 1: Perfect Competition

Lesson Objectives:

- List the characteristics of perfect competition.
- State why price, marginal revenue, and demand are all equal for a perfectly competitive firm.

- Explain and graphically show profit maximization for a perfectly competitive firm, including the market supply and demand curves and the firm's demand, marginal revenue, marginal cost, average-variable-cost, and average-total-cost curves.
- Show the profits of a perfectly competitive firm on a graph and show the break-even and shutdown points for the firm in the short run.
- Derive the short-run supply curve for a firm in a perfectly competitive market and the short-run market supply curve in a perfectly competitive market.
- Explain the difference between economic profits in the short run and in the long run for a perfectly competitive firm and explain the relationship between economic profits and free entry and exit that brings about long-run equilibrium.
- Describe the long-run supply curves for constant cost, increasing cost, and decreasing cost industries.
- Relate allocative efficiency to the perfectly competitive market.

Study - Perfect Competition, Part 1	Explore the characteristics of perfectly competitive markets, including why perfectly competitive firms can't set their own prices. Focus on is the relationship between price, marginal revenue, and demand in the context of a perfectly competitive firm. Learn how to determine the price and output of a perfectly competitive firm in the short run. (Skill 1.A)
Practice - Investigate Perfect Competition, Part 1	Investigate the characteristics of the perfect competition market structure and practice calculating profit maximization in this scored interactive exercise. (Skill 2.C)
Study - Perfect Competition, Part 2	Discover how perfectly competitive firms operate, look into the questions of when a perfectly competitive firm will choose to shut down and at what levels of output they break even or make a profit, and discuss why perfectly competitive firms make only a normal profit in the long run. (Skill 1.A)
Practice - Investigate Perfect Competition, Part 2	In this interactive, scored activity, practice working with the perfect competition graphs, including the long-run situation and the issue of efficiency. (Skill 3.C)
Practice - Apply Concepts of Perfect Competition	Answer questions about perfect competition and send your work, including graphs, to your teacher for grading. (Skill 4.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content covered in this lesson.

Lesson 2: Monopoly and Monopolistic Competition

Lesson Objectives:

- Explain the characteristics of a monopoly.
- Calculate, graph, and explain the relationship between a monopoly's demand curve, its marginal revenue curve, and its average revenue curve.
- Demonstrate graphically the monopoly's profit-maximizing price and output level.
- Show on a graph the monopolist's profits and determine the location of the ATC and AVC that will cause the firm to operate at a loss or shut down.
- Explain why monopolists don't have supply curves.

- Pennwood Cyber Charter School
Explain how and why a monopoly may produce with allocative inefficiency.

- Explain how and why a monopoly may produce with productive inefficiency.
- Define price discrimination and explain the market conditions that allow price discrimination to occur.
- Explain the costs and benefits of price discrimination to firms and consumers.
- Explain why the government grants exclusive rights to natural monopolies in exchange for the right to regulate production and pricing of these companies on the goods and services they provide.
- Describe government regulation of natural monopolies.
- Define the characteristics of monopolistic competition.
- Determine the output, price charged, and profit of a monopolistic competitor in both the short run and long run.
- Define market power and explain how product differentiation increases a monopolistic competitor's market power.
- Explain allocative and productive efficiency in a monopolistic competition market.

Study - Monopoly	Discuss the characteristics of monopolies, as well as the conditions that make a monopoly possible. Look at the relationship between the demand curve and marginal-revenue curve in the context of a monopoly. Learn how monopolies choose their price and output levels and explore why some people say that monopolies are inefficient. (Skill 1.A)
Practice - Investigate Monopoly	In this online, interactive, scored exercise, practice drawing marginal-revenue curves, and find the profit-maximizing level of output for a monopolist. (Skill 4.A)
Study - Monopolies: Special Cases	Examine the basics of price discrimination, discuss how governments regulate monopolies and learn about natural monopolies. (Skill 1.A)
Practice - Investigate Natural and Price-Discriminating Monopolies	Investigate the cost curves of a natural monopoly, and work on profit maximization when the monopolist can price discriminate in this scored interactive exercise. (Skill 2.C)
Practice - Apply Concepts of Monopolies	Answer questions about monopolies and send your work, including graphs, to your teacher for grading. (Skill 4.B)
Study - Monopolistic Competition	Examine the monopolistic competition market and find out about product differentiation. Consider the market conditions that must exist for a market to be monopolistically competitive and how these competitors can increase their market share as well as how they set their output to maximize profit. Also, you will learn how to identify monopolistic competitors. (Skill 3.B)
Practice - Investigate Monopolistic Competition	Practice finding the profit-maximizing level of output for a monopolistic competitor, and answer questions about that market structure in this scored interactive activity. (Skill 3.C)
Quiz – Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 3: Oligopoly

Lesson Objectives:

- Pennwood Cyber Charter School
Explain the characteristics of an oligopoly.

- Explain how interdependence among firms in an oligopoly leads to strategic behavior by those firms.
- Analyze cartels and explain the incentives to cheat on a collusive agreement.
- Explain the game theory approach to pricing in an oligopoly, including the prisoner's dilemma and tacit collusion.
- Describe the price leadership, or dominant firm, model of an oligopoly.
- Describe cost-plus pricing.
- Use the kinked demand curve model to explain price stability in an oligopoly.

Study - Oligopoly	See the main characteristics of an oligopoly and find out about profit maximization in an oligopoly. Consider how oligopolists set their prices and output levels. (Skill 1.A)
Practice - Investigate Oligopoly	Answer questions about oligopolies in a scored interactive exercise. (Skill 1.A)
Study - Oligopoly Models	Examine how to categorize the main types of oligopoly interaction. Look at how interdependence affirms can lead to collusion, price leadership, or price rigidity among the firms. Learn about cost-plus pricing, kinked demand curves, cartels and game theory. (Skill 1.D)
Practice - Investigate Oligopoly Models	While examining the different oligopoly models in this scored interactive activity, practice working with graphs and tables. (Skill 2.C)
Practice - Apply Concepts of Oligopoly and Oligopoly Models	Answer questions about the oligopoly market structure and send your work, including graphs, to your teacher for grading. (Skill 4.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content covered in this lesson.

Lesson 4: Comparing Markets and Imperfect Competition

Lesson Objectives:

- Understand the differences and similarities between the four basic market structures.
- Explain market concentration and the relationship between market concentration and market power.
- List and explain the three types of mergers.
- Explain the reasons for government regulation.
- List and explain the major antitrust laws.
- State the reasons the government is currently deregulating many industries.

Study - Market Structures and Mergers	Review the four market structures and their characteristics and explore the role of mergers in market structures. Differentiate between the three types of mergers—horizontal, vertical, and conglomerate. (Skill 1.D)
Practice - Investigate the Different Market Structures	In this interactive scored exercise, work with graphs showing all the market structures and investigate their similarities and differences. (Skill 2.C)

Study- Government and Imperfect Competition	See what actions the government takes to limit anti- competitive practices in the market and examine the major antitrust legislation that's been passed in the U.S. Explore the pros and cons of government regulation of firms. (Skill 1.B)
Discuss - Market Structures	With your classmates, discuss issues related to the main types of market structures. (Skill 1.D)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 5: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - Market Structure	Review your studies of perfect competition, monopoly, and oligopoly as presented in this unit.
Practice - Market Structure	Review common terms referring to market structure.
Discuss - Cram Session	With your classmates, discuss market structure and any areas about which you are unclear.
Discuss - You Be the Teacher!	Make suggestions for completing a correctly answered but incomplete AP-style question about a perfectly competitive market.
Test - Market Structure	Take a 50-minute, teacher-scored test covering the main concepts introduced in this unit. Both multiple-choice and free-response questions are included.

Unit 6: Factor Markets

- Big Idea 3, Production Choices and Behavior (PRD)
 - How are prices for resources determined?
 - How do firms use resource prices to make decisions?

Readings:

- *Microeconomics for Today*
 - Pages 294-310

The content in this unit maps to the following sections of the College Board’s Advanced Placement topic outline:

III. Factor Markets

- A. Derived factor demand
- B. Marginal revenue product
- C. Labor market and firms’ hiring of labor
- D. Market distribution of income

Topics covered in this unit:

- Derived Factor Demand
- Marginal Revenue Product
- Marginal Cost
- Shifts of Factor Demand
- Determinants of Elasticity of Factor Demand

- Pennwood Cyber Charter School
- Allocation of Resources
- Wages, Salaries, and Earnings

- Labor and Market Structures
- Labor Unions
- Rent
- Interest
- Profit

Lesson 1: Derived Factor Demand

Lesson Objectives

- Define derived demand and explain why the demand for a factor of production is a derived demand.
- Explain why the price of resources is important.
- Construct and explain a marginal-physical-product curve and a marginal-revenue-product curve, assuming perfect competition in both factor and product markets.
- Construct a marginal-physical-product curve and a marginal-revenue-product curve, assuming imperfect competition in both factor and product markets; compare this with the same graph for a situation of perfect competition in both markets.
- Explain the principle a profit-maximizing firm uses to determine the quantity of a resource to employ.
- Explain the relationship between the marginal revenue product and the demand for an input and relate the factor demand to the idea of diminishing marginal returns.
- State reasons for a change in factor demand.
- List and explain the determinants of elasticity of factor demand.
- Explain the method for finding the least-cost combination of resources and demonstrate your ability to use it.
- Explain the method of maximum-profit combination of resources and demonstrate your ability to use it.

Study-Factor Demand, Part 1	Discuss the marginal revenue product and marginal resource cost and examine the derived factor demand curve and its relationship to the marginal revenue product curve. (Skill 1.C)
Practice - Investigate Factor Demand	Practice deriving a factor demand curve in this scored interactive activity. (Skill 3.C)
Study- Factor Demand, Part 2	Explore the determinants of factor demand and the determinants of the elasticity of factor demand. (Skill 1.C)
Practice - Investigate Shifts in Factor-Demand Curves	Draw shifts in the factor demand curve and calculate elasticity of factor demand in an interactive exercise. (Skill 4.A)
Practice - Apply Concepts of Factor Demand	Answer questions on derived factor demand and send your work to your teacher for a grade. (Skill 2.C)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content covered in this lesson.

Lesson 2: Special Topics in Factor Demand

Lesson Objectives:

- Explain the difference between wages, salaries, and earnings.
- Explain why wages differ among occupations and workers.
- Compare the wage level and level of employment in a competitive labor market to those levels in a monopsonistic labor market.
- Analyze the effects of minimum wage laws on labor markets.
- Analyze the effects of labor unions on labor markets.
- Define economic rent.
- Explain what determines the amount of economic rent paid.
- Define interest, interest rate, nominal interest rate, and real interest rate; relate interest to the loanable funds market where money is borrowed for the purchase of capital goods, and money is loaned in return for interest.

Study - Labor	Examine the main issues regarding the demand for labor, including labor unions and monopsonistic labor markets. Differentiate between wages, salaries, and earnings, or compensation and discuss the reasons a worker would take a lower paying job over a higher paying job. Explore the characteristics of a perfectly competitive labor market and see how these differ from a labor market in which there's only one buyer of labor and examine the effect minimum wage laws and unions have on employment and wage levels. (Skill 1.A)
Practice - Investigate Labor Markets	In this scored, interactive activity, compare the outcomes of a regular labor market with a monopsonistic labor market, and answer questions about labor unions. (Skill 2.C)
Study - Rent, Interest, and Profit	Explore the main issues regarding the non-labor factors of production in the factor market: land, capital and entrepreneurial talent. Explore the markets for land and capital, including the payments made to the owners of capital. Consider interest rates and the role of inflation. Discuss economic rent, especially in relation to non-renewable resources. And finally, learn the different measures of profit and the role profit plays in resource allocation. (Skill 1.D)
Practice - Apply Concepts of Factor Demand	Answer questions about the demand for the factors of production and send your work to your teacher for scoring. (Skill 2.B)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 3: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review – Factor Markets	Review our studies of factor demand as presented in this unit.
Practice - Factor Markets	Review common terms referring to factor markets.
Discuss - Cram Session	With your classmates, discuss factor markets and any areas about which you are unclear.
Discuss - You Be the Teacher!	Make suggestions for completing a correctly answered but incomplete AP-style question about the labor market.
Test - Factor Markets	Take a 50-minute, teacher-graded test covering the main concepts introduced in this unit. The test includes both multiple-choice and free-response items.

Unit 7: Efficiency, Equity, and the Government

- Big Idea 4, Market Inefficiency and Public Policy (POL):
 - How do markets fail?
 - What role should the government play in markets?

Readings:

- *Microeconomics for Today*
 - Pages 100-117, 145-146, 321-337, 359-365, 372-392

The content in this unit maps to the following sections of the College Board’s Advanced Placement topic outline:

IV. Market Failure and the Role of Government

- A. Externalities
 - 1. Marginal social benefit and marginal social cost
 - 2. Positive externalities
 - 3. Negative externalities
 - 4. Remedies
- B. Public goods
 - 1. Public versus private goods
 - 2. Provision of public goods
- C. Public policy to promote competition
 - 1. Antitrust policy
 - 2. Regulation
- D. Income distribution
 - 1. Equity
 - 2. Sources of income inequality

Topics introduced in this unit:

- Market Failures
- Externalities
- Public Goods
- Government Intervention
- Income Distribution
- Poverty
- Taxes

Lesson 1: Market Failures

Readings:

- *Microeconomics for Today*
 - Chapter 12: Income Distribution, Poverty, and Discrimination
 - Chapter 13: Antitrust and

Regulation Lesson Objectives:

- Define externalities.
- Explain the government's role in correcting for negative externalities and increasing the incidence of positive externalities.
- Define public goods and explain how and why the government provides public goods.
- List and explain the sources of market failure.
- Analyze the effectiveness of government intervention in remedying market failures.

Study - Externalities and Public Goods	Examine positive and negative externalities, and the role of government intervention in the case of market failures. Define non-rival consumption and non-exclusionary consumption and use these definitions to determine whether a good is public or private. (Skill 1.A)
--	---

Practice - Investigate Externalities and Public Goods	In this scored interactive exercise, investigate and answer questions about the role and definition of externalities and public goods. (Skill 1.B)
Practice - Bring Together Externalities and Public Goods	Answer in-depth questions on externalities and the role of government in providing public goods. Then send your work to your teacher for grading. (Skill 1.A)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content presented in this lesson.

Lesson 2: Distribution of Income

Readings:

- *Microeconomics for Today*
 - Chapter 12: Income Distribution, Poverty, and

Discrimination Lesson Objectives:

- Measure an economy's income distribution using a Lorenz curve.
- Explain the distribution of wealth in the economy.
- Define poverty and describe methods of addressing the issue of poverty.
- Explain tax incidence.
- Explain tax equity.
- Define and explain the differences between progressive, proportional, and regressive taxes.

Study- Income Distribution and Taxes	See how income is spread through the U.S. economy and learn about the different types of taxation. Explore Lorenz curves, examine poverty, the role of government in income distribution, and the economics of taxation. Explore the problems inherent in using Lorenz curves as measures of income inequality and differentiate between proportional, progressive, and regressive policies. (Skill 1.C)
Practice - Investigate Taxes and Income Distribution	In this interactive scored exercise, practice working on a graph of the Lorenz curve, answer questions about the different types of taxes, and consider issues of redistribution and equity. (Skill 4.A)
Practice -Apply Concepts of Taxes and Income Distribution	Answer questions on taxes and income distribution and send your work to your teacher for scoring. (Skill 1.C)
Discuss - Your Opinion Counts: The Government and the Economy	Share and defend your opinions regarding the role of government in the economy or about the distribution of income. (Skill 1.D)
Quiz - Wrap-Up	Answer questions to assess your understanding of the content introduced in this lesson.

Lesson 3: Wrap-Up

Lesson Objectives:

- Define each key term and concept listed in each lesson of this unit.
- Explain the significance of each key term and concept listed in each lesson of this unit.
- Apply concepts you learned in this unit to specific questions.

Review - Efficiency, Equity, and the Role of Government	Review your studies of efficiency, equity, and the role of government as presented in this unit.
---	--

Practice - Efficiency, Equity, and the Role of Government	Review terms referring to efficiency, equity, and the role of government.
Discuss - Cram Session	With your classmates, discuss efficiency, equity, the role of government, and any areas about which you are unclear.
Discuss - You Be the Teacher!	Make suggestions for completing a correctly answered but incomplete AP-style question about the labor market.
Test - Efficiency, Equity, and the Role of Government	Take a 50-minute, teacher-graded test about the main concepts introduced in this unit. It includes both multiple-choice and free-response items.

Unit 8: Preparing for the AP Exam

No new content is introduced in this unit.

Lesson 1: Comprehensive Microeconomics Review and AP Exam Practice

Lesson Objectives:

- Describe the format of the AP Microeconomics Exam.
- Develop a plan for how you're going to study between now and exam day.
- Define and explain the significance of each key term and concept introduced in this course.
- Apply the concepts you've learned to specific questions.
- Apply your knowledge to questions that may look new on the surface but can be analyzed and answered using skills and knowledge you've gained in this course.
- Manage your time effectively as you prepare for, and take, the Final Exam and the AP Exam.

Study - AP Exam Preparation	Learn some tips and hints you can use while for preparing to take the AP Exam.
Review - Microeconomics	Review your studies of microeconomics in preparation for the AP Exam.
Quiz - Practice Multiple-Choice Questions	Answer multiple-choice questions covering material about microeconomics as a warm-up for taking the exam.
Discuss - Any Questions?	Raise questions concerning material you studied in this course before taking the Final Exam.
Final Exam - Microeconomics	Take the 135-minute, teacher-graded Final Exam that includes multiple-choice and free-response questions and includes a reading period.

AP Psychology

AP Psychology

Course Overview

Name	AP Psychology
Description	<p>AP Psychology provides an overview of current psychological research methods and theories. Students will explore the therapies used by professional counselors and clinical psychologists and examine the reasons for normal human reactions: how people learn and think, the process of human development and human aggression, altruism, intimacy, and self-reflection. They'll study core psychological concepts, such as the brain and sense functions, and learn to gauge human reactions, gather information, and form meaningful syntheses. Along the way, students will also investigate relevant concepts like study skills and information retention. The equivalent of a 100 level college survey course, AP Psychology prepares students for the AP Exam and for further studies in psychology and life sciences.</p> <p>The content aligns to the scope and sequence specified by the College Board and to widely used textbooks</p>
Teacher Role	All students enrolled in this course are assigned to a "section" and have a teacher who is charged with ensuring student success and addressing student questions, problems, and concerns. In addition, all students have a "mentor" who is available in their school or home and helps keep the student on track for completing the materials in a timely manner.
Prerequisites	<ul style="list-style-type: none"> • Biology • Recommended for qualified AP students
Length	One Semester
Materials	<p>The majority of the required instructional material for this course is available to students online. These materials were created and owned by our company. In addition, either the student or the school must purchase the following:</p> <p>Myers, David G. <i>Psychology</i>. 12th Ed. New York: Worth Publishing, 2017. Also acceptable: 11th Ed., 2015. (CR1)</p>

The following key should help you understand the different types of activities students engage in during the course:

Activity Type	Description
Discuss	Students discuss topics in an online bulletin-board style forum. Teachers participate in these discussions as well and students receive credit for their participation.
Explore	Students are provided with links to sites on the World Wide Web where they can do research or learn more about a particular topic.
Practice	Students answer questions regarding what they have learned thus far.
Quiz	Computer-administered and automatically graded assessment.
Review	Review of the material covered in a unit or over a semester.
Study	Primary instructional online content that teaches new concepts through multimedia and interactivity.
Quiz	Assessment covering the material introduced in a unit.

Skill Category Activities:

Below are descriptions of several activities that meet Skill Categories 1-3 (CR's 3-5). Additional activities that meet each skill are labeled with the corresponding CRs and skills in the course syllabus in the following section.

Skill Category 1: Define, explain, and apply concepts, behavior, theories, and perspectives, as outlined in the AP Course and Exam Description (CED).

- **1.1.4 Study: Modern Perspectives in Psychology:** In this assignment, students define and explain the eight most common perspectives of psychology through interactive assignments. These include short answer responses, drag and drop activities, and compare and contrast writing.
1.1.5 Practice: Comprehension Check: Students apply the concepts they learned in the previous Study assignment as they respond to a short quiz on the eight common perspectives.
- **3.1.3 Study: Operant Conditioning:** In this assignment students learn about and respond to questions about different aspects of operant conditioning and the theories and principles behind it.
3.1.5 Discuss: Conditioning: In a follow-up class discussion to the previous Study assignment, students apply the principles of operant conditioning to discuss how they would treat and cure phobias or bad habits.

Skill Category 2: Analyze and interpret quantitative data, as outlined in the AP Course and Exam Description (CED).

- **1.2.3 Study: Observational Studies:** In this assignment students are introduced to sampling and studies and the bias that can occur. Students are asked to look at sample quantitative data from a census and analyze and interpret it.
- **1.3.2 Study: The Normal Distribution z-Scores and Percentiles:** In this assignment, students must look at and analyze the quantitative data provided in various frequency plots of distribution about people attending a live music show.
1.3.3: Practice: Descriptive Statistics: Building off of what students learned in the previous Study assignment, students are now asked to read a chapter on descriptive statistics in which they must compute and interpret quantitative data in the form of histograms and frequency tables.

Skill Category 3: Analyze psychological research studies, as outlined in the AP Course and Exam Description (CED).

- **1.2.9 Practice: Evaluating Scientific Information:** In this assignment, students choose one of five provided psychological studies and are asked to assess and analyze the study. Students are provided with a dozen short analysis questions to respond to, culminating with a paragraph response that synthesizes the information they've gathered about the psychological study.
- **3.1.2 Explore: Little Albert and the Classical Conditioning of a Phobia:** In this assignment, students explore The Little Albert Experiment as it relates to classical conditioning and phobias and complete a worksheet with several short answer analysis questions about the study, including one about methodology and how/if the same methodology could be used today

Course Syllabus

Unit 1: History and Perspectives of Psychology (CED Unit 1)

Lesson 1: History and Perspectives of Psychology

Study — Development of Psychology as a Science	Learn about the development of psychology from early philosophy to modern science. (CR3 – Skill Category 1)
Explore – What Do You Know about Psychology? A Common Sense Test	Take a quick quiz on common sense and find out what you might already know about psychology.
Discuss – Getting Acquainted	Introduce yourself to students and instructor. Share information about yourself, your school, and your interest in psychology.
Study — Modern Perspectives in Psychology	Learn about eight of the most common perspectives in modern psychology: psychodynamic, behavioral, cognitive, humanistic, biomedical, evolutionary, socio-cultural, and social cognitive. (CR3 – Skill Category 1)
Practice — Comprehension Check	Answer questions to assess your understanding of the history and perspectives of psychology. (CR3 – Skill Category 1)
Study — Fields in Psychology	Learn about psychologists, psychiatrists, and counselors as well as the types of settings in which they work. (CR3 – Skill Category 1)
Practice — Careers in Psychology	Match psychology jobs to their functions (for example, neuropsychologists study brain function and how they influence behavior). (CR3 – Skill Category 1)
Practice – Identifying Perspectives in Psychology	Look at some case studies and explain the reasons why people act as they do. (CR5 – Skill Category 3)
Quiz – Comprehension Check	Answer questions to assess your understanding of the history and perspectives of psychology introduced in this lesson.

Lesson 2: Research Methods

Study — Introduction to Psychological Research	Get some explanations regarding the world of psychological research. (CR3 – Skill Category 1)
--	--

Explore — Why Learn about Psychological Research? An Introduction	Learn the key elements of how research should be conducted and designed so that you can better evaluate reports that may seem confusing. (CR3 – Skill Category 1)
Study — Observational Studies	Learn about surveys and other types of Information-gathering studies where the researcher does not exert control over the subjects. (CR4 – Skill Category 2)
Study — Experiments	Learn about studies where the researcher exerts control over the subjects and observes how they react. (CR5 – Skill Category 3)
Study — Hypothesis Testing	How science answers important 'yes or no' questions: setting up hypotheses, significance testing, and hypothesis testing in the real world. (CR3 – Skill Category 1)
Explore — Hypothesis Testing in Current Research	Explore current research and gain a deeper understanding of hypothesis testing and statistical significance. (CR4 – Skill Category 2, CR5 – Skill Category 3)
Study — Correlational Research	Learn how to analyze the relationship between two variables (for example, between TV watching and grades). (CR3 – Skill Category 1, CR4 – Skill Category 2)
Practice — Evaluating Research Design and Ethics	Evaluate the research design and ethical standards of several research proposals. (CR5 – Skill Category 3)
Practice — Fact from Fiction: Evaluating Scientific Information	Evaluate the quality of information from credible and non-credible sources and see how the source affects what you read or hear. (CR5 – Skill Category 3)
Practice — Comprehension Check	See how much you know about the basic research methods in psychology you've been learning in this lesson.
Discuss — Should Animals Be Used in Research?	Explore the pros and cons of animal research and experimentation in psychology. (CR3 – Skill Category 1)
Quiz — Comprehension Check	Answer multiple-choice questions to assess your understanding of research methods in psychology introduced in this lesson.

Lesson 3: Basic Statistics

Study – Basic Statistics	Learn basic measures of central tendency (averages) and variation (standard deviation). (CR3 – Skill Category 1, CR4 – Skill Category 2)
Study – The Normal Distribution z-Scores and Percentiles	Learn how the common ‘bell curve’ is used to determine probabilities and percentiles. (CR3 – Skill Category 1, CR4 – Skill Category 2)
Practice – Descriptive Statistics	Practice what you have learned about descriptive statistics with this PsychSim tutorial (from the textbook publisher). (CR4 – Skill Category 2)
Practice – Basic Statistics	Calculate, organize, and identify basic statistical data. (CR3 – Skill Category 1, CR4 – Skill Category 2)
Practice – Comprehension Check	Answer questions to assess your understanding of basic statistics to prepare for the lesson quiz.
Quiz – Comprehension Check	Answer questions to assess your understanding of basic statistics (for credit).

Lesson 4: History and Perspectives of Psychology Wrap-Up

Review — History and Perspectives of Psychology	Review the material introduced in this unit to prepare for the test.
Review — Advanced Placement Essay Writing	Learn about how to write Advanced Placement Exam essays.
Test — History and Perspectives of Psychology	Test your understanding of the key concepts covered in this unit. This 50-minute teacher-graded test includes both multiple-choice and essay questions.

Unit 2: Perception and Consciousness (CED Unit 2, CED Unit 3, CED Unit 6)

Lesson 1: The Nervous and Endocrine Systems

Study – Organization of the Nervous System	Learn about the main components of the human nervous system and how they work together. Explore the somatic nervous system and the different types of neurons. (CR3 – Skill Category 1)
Study – A Tour of the Brain	Learn about the brain, the most complicated system in the known universe. Study the different parts of the brain and their functions. (CR3 – Skill Category 1)
Explore – Hemisphere Specialization	Discover more about brain function and hemisphere specialization. Use the Myers PsychSim tutorials to learn how the hemispheres of the brain function separately and together. (CR3 – Skill Category 1)

	Category 1, CR5 – Skill Category 3)
Study – Methods for Studying the Brain	Read about the amazing tools that have given rise to exciting new discoveries about the brain. Learn about the brain observation devices EEG, CAT, MRI, and PET. (CR3 – Skill Category 1)
Practice – Neuron Activity	Label the structures of a neuron. (CR3 - Skill Category 1)
Practice – Comprehension Check	Answer questions to assess your understanding of the nervous system, the neuron basic brain structures and their functions, and how scientists study the human brain. (CR3 – Skill Category 1)
Study – The Endocrine System	Discover the system of hormones and glands that affects emotions and important processes such as growth. (CR3 – Skill Category 1)
Explore – Sheep Brain Dissection	Delve into the world of brain structures and functions by exploring a sheep’s brain at the Exploratorium site. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Practice – Brain Biology	Create a brain model that displays the various brain structures and outlines their various functions. (CR3 – Skill Category 1)
Quiz – Comprehension Check	Answer questions to assess your understanding of the nervous and endocrine systems.

Lesson 2: Genetic Influences

Study — Genetics and Genetic Diseases	Learn the basics of genes and chromosomes and how they affect behavior. (CR3 – Skill Category 1)
Study — Nature-Nurture and Twin Studies	Discover more how genes and the environment affect our behavior by exploring nature-nurture and twin studies. (CR3 – Skill Category 1)
Discuss — Nature or Nurture?	Explore the topic of nature vs. nurture with your classmates. Use concrete examples to support your view on how environmental or biological factors affect who and what we are. Which do you see as more influential and why? (CR3 – Skill Category 1)
Quiz — Comprehension Check	Answer questions to assess your understanding of genetic influences introduced in this lesson.

Lesson 3: Sensation and Perception

Study – Sensation	Learn how external and internal stimulation such as light, sound waves, taste, smell, and pressure are changed to an electrical-chemical impulse that relays information to the brain for further processing. (CR3 – Skill Category 1)
Study – Theories of Vision and Hearing	Read about the properties of light, the structures and functions of the eye, and how information is processed in the eye and in the brain. Then discover the properties of sound, the structures and functions of the ear, and how sound waves are processed to enable hearing. (CR3 – Skill Category 1)
Explore – Theories of Taste, Smell, and Position	Explore research and details about how we sense tastes and smells. Visit websites that provide information on these senses and the trigeminal sense as well. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Explore – Senses of Touch Position and Balance	Use the internet to learn about the kinesthetic (or proprioceptive) sense, the sense of touch and pain, and the vestibular sense (or sense of balance). (CR3 – Skill Category 1)
Explore – Fun with Your Senses	Now that you have some information about how the different sensory systems operate, try this “Challenge of the Senses.” (CR3 – Skill Category 1)
Study – Perception	Learn how the brain organizes and interprets information from sense organs. Required reading from Myers text: pages 237-269. (CR3)
Explore – Perception and Optical Illusions	Explore the connection between perceptual expectation and optical illusions. (CR3 – Skill Category 1)
Discuss – Extrasensory Perception	Share your view and provide specific examples to support your opinion about the existence of ESP. (CR3 – Skill Category 1)
Explore – Sensation and Perception Jeopardy	Check your understanding of sensation and perception with an online Jeopardy game.
Quiz – Comprehension Check	Answer questions to assess your understanding of sensation and perception.

Lesson 4: Consciousness

Explore — Theories of Consciousness	Explore different views on what it means to be conscious. Includes a review of some basic philosophy, including dualism and monism. (CR3 – Skill Category 1, CR5 – Skill Category 3)
-------------------------------------	---

Study – Sleep and Dreaming	Learn about the stages of sleep and some popular Theories about dreaming. Includes discussions of sleep stages, REM sleep, sleep disorders, dreaming, processing theories, and circadian rhythms. (CR3 – Skill Category 1, CR4- Skill Category 2)
Explore – Sleep Inventory and Tips for Sleeping Well	Take a sleep inventory to assess the quality of your sleep and visit a website for tips on sleeping well. (CR3 – Skill Category 1)
Discuss – Sleep	Discuss which sleep disorder you think would be the hardest with which to cope. Expand your discussion to also talk about the effect of getting too much or too little sleep on your waking life. (CR3 – Skill Category 1)
Practice – Stages of Sleep	Write answers to questions about the characteristics of the four stages of sleep and explain the distinguishing characteristics of REM and non-REM sleep. (CR3 – Skill Category 1)
Explore – Dream Interpretation	Keep a dream journal for a night then go online to examine its possible latent and manifest content. (CR3 – Skill Category 1)
Study – Hypnosis	Learn what hypnosis is and how it is used. (CR3 – Skill Category 1)
Practice – Comprehension Check	Answer questions to assess your understanding of sleep and hypnosis. (CR3 – Skill Category 1)
Study – Psychoactive Drugs	Learn the major classes of drugs (agonists, stimulants, depressants, opiates, hallucinogens, amphetamines, barbiturates, etc.) and what they do. (CR3 – Skill Category 1)
Quiz – Comprehension Check	Answer questions to assess your understanding of consciousness.

Lesson 5: Perception and Consciousness Wrap-Up

Review – Perception and Consciousness	Review the material introduced in this unit to prepare for the test.
Test – Perception and Consciousness	Test your understanding of the key concepts covered in this unit. This 50-minute teacher-graded test includes both multiple-choice and essay questions.

Unit 3: Thinking and Feeling (CED Unit 4, CED Unit 5, CED Unit 7)

Lesson 1: Classical and Operant Conditioning

Study — Classical Conditioning	Understand how a stimulus can become paired with a response. (CR3 – Skill Category 1)
Explore — Little Albert and the Classical Conditioning of a Phobia	Explore a classic and controversial experiment about classical conditioning in humans. As you think about how classical conditioning works, try to relate this experiment to your own experience and to today's standards of ethics. (CR3 – Skill Category 1 CR5 – Skill Category 3)
Study — Operant Conditioning	Learn about the basic processes of operant conditioning, including the role of consequences, such as rewards and punishments, and the impact of how these consequences are delivered. (CR3 – Skill Category 1)
Practice — Comprehension Check	Answer questions to assess your understanding of operant conditioning. (CR3 – Skill Category 1)
Discuss — Conditioning	Using your knowledge of classical and operant conditioning, discuss how phobias develop and how they can be treated. (CR3 – Skill Category 1)
Quiz — Comprehension Check	Answer questions to assess your understanding of classical and operant conditioning.

Lesson 2: Cognitive and Social Approaches to Learning

Study – Cognitive and Social Approaches to Learning	Examine two theories that expanded upon the original notions of classical conditioning and operant conditioning to include the influence of the social environment and mental processes on learning. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Practice – How Do We Teach Our Children?	Think about how various theories and experiments affect and influence the behavior of children, as well as the ways those theories can help parents raise those children. Also consider the ways certain learning theories can help kids get a better night's sleep. (CR3 – Skill Category 1, CR5 – Skill Category 3)

Quiz – Comprehension Check	Answer questions to assess your understanding of cognitive and social approaches to learning.
----------------------------	---

Lesson 3: Memory

Required reading from Myers: pages 349-393.

Study — Memory	Learn about basic models and systems of memory and consider some interesting memory related phenomena. (CR3 – Skill Category 1)
Explore — Testing Memory	Try some activities to test your memory and learn some things you can try to improve it. (CR3 – Skill Category 1)
Practice — Forgetting	Identify examples of retroactive and proactive interference, and retrograde and anterograde amnesia. (CR3 – Skill Category 1)
Explore — Mnemonic Devices	Learn how to use mnemonic devices to improve your recall of content. (CR3 – Skill Category 1)
Discuss — Mnemonic Devices	Use what you have learned in this lesson to explain how mnemonic devices can be used to improve study time and rate of retention. (CR3 – Skill Category 1)
Practice — Memory Practice	Review the “Encoding,” “Storage,” and “Memory Construction” sections in chapter 9 of your textbook. Then give short answers to some questions on what you've read and learned in this lesson. (CR3 – Skill Category 1)
Quiz — Comprehension Check	Answer questions to assess your understanding of memory as covered in this lesson.

Lesson 4: Cognition Problem Solving and Creativity

Study — Cognition	Learn theories about how we think. Consider the role of the brain, mental images and concepts, reasoning, decision making, and heuristics. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Study — Problem Solving and Creativity	Learn how problem-solving and creativity have been defined and studied. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Practice — Comprehension Check	Answer questions to assess your understanding of cognition problem solving and creativity. (CR3 – Skill Category 1)
Practice — Making Decisions and Forming Judgments	Distinguish between availability and representative heuristics, framing, and schemas as you prepare for the lesson quiz. (CR3 – Skill Category 1)
Quiz — Comprehension Check	Answer questions to assess your understanding of cognition, problem solving, and creativity as presented in this lesson.

Lesson 5: Language

Study – Language Development	Learn how people acquire and use language. Includes an overview of language development theories. (CR3 – Skill Category 1)
Explore – Case Study: Genie the Wild Child	Examine a historical case study of a feral child raised in isolation and the effects of this experience on language development. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Discuss – Do Animals Think?	Use concrete examples to support your opinion about whether you believe animals are self-aware and whether they use language. (CR3 – Skill Category 1)
Quiz – Comprehension Check	Answer questions to assess your understanding of language concepts covered in this lesson.

Lesson 6: Motivation and Emotions

Study – Overview of Motivation	Study some important theories about motivation including how it can be driven by biological needs. Includes overviews of instinct, drive reduction, incentive, and arousal theories. The hierarchy of needs and the achievement motive are also explored. (CR3 – Skill Category 1)
Study – Motivation of Hunger and Sex	Learn about two basic human drives. Explore the deprivation motive and the pleasure principle. (CR3 – Skill Category 1)
Study – Overview of Emotions	Explore some important theories about how emotions are triggered and created. Learn about the James- Lange bodily based theory, the Cannon-Bard thalamic theory, the Schacter and Singer cognitive theory, and the opponent-process theory. Required reading from Myers text: pages 513-567. (CR3 – Skill Category 1)
Explore – Facial Expressions	See how subtle differences in facial expression can be powerful communicators of emotion. (CR3 – Skill Category 1)
Discuss – Achievement	Using your knowledge of achievement, discuss what you would do as a coach or boss to motivate players or employees to achieve more. (CR3 – Skill Category 1)
Practice – Theories of Emotion	Student will read a series of scenarios and determine the matching theory of emotion (CR3 – Skill Category 1)
Practice – Comprehension Check	Check your understanding of motivation and emotion before you take the lesson quiz. (CR3 – Skill Category 1)

Quiz — Comprehension Check	Answer questions to assess your understanding of motivation and emotion as presented in this lesson.
----------------------------	--

Lesson 7: Stress Health and Coping

Study — Stress Health and Coping	Read theories about how people respond to stress and how to better cope with it. Learn about general adaptation theory, subjective well-being, learned optimism, and positive psychology. (CR3 – Skill Category 1)
Explore — Measuring Your Stress Level	Take an online evaluation of your current stress level. (CR3 – Skill Category 1)
Practice — Comprehension Check	Answer questions to assess your understanding of health, stress, and coping before you tackle the lesson quiz. (CR3 – Skill Category 1)
Quiz — Comprehension Check	Answer questions to assess your understanding of stress, health, and coping as introduced in this lesson.

Lesson 8: Thinking and Feeling Wrap-Up

Review — Thinking and Feeling	Review material to prepare for the test covering the material introduced in this unit.
Test — Thinking and Feeling	Test your understanding of the key concepts covered in this unit. This 50-minute teacher graded test includes multiple-choice and an essay question.

Unit 4: Development Testing and Individual Differences (CED Unit 5, CED Unit 6, CED Unit 7)

Lesson 1: Studying Child Development

Required reading from Myers: pages 139-164.

Study – Dimensions of Development	Examine some of the significant issues that developmental psychologists consider when studying human development. (CR3 – Skill Category 1)
Study – Developmental Research	Explore the complex problems and ingenious solutions for studying how people change over time. Learn about cross-sectional design, cohort comparison, longitudinal design, and sequential design. (CR3 – Skill Category 1)
Practice – Developmental Timeline	Create a timeline that outlines the key cognitive, social, and moral developmental stages in human development. (CR3 – Skill Category 1)
Quiz – Comprehension Check	Answer questions to assess your understanding of child development as presented in this lesson.

Lesson 2: Major Theories of Human Development

Study — A Survey of Perspectives and Theories of Development	Focus on some of the most important theories about how people develop. Learn about biological and evolutionary perspectives including, Freud's psychosexual theory, Erikson's psychosocial theory, Piaget's cognitive developmental theory, Kohlberg's stages of moral development, behavioral perspectives, Bandura's theory, and Vygotsky's sociocultural theory. (CR3 – Skill Category 1)
Explore — Parenting Styles	Explore different styles of parenting such as responsiveness and demandingness. (CR3 – Skill Category 1)
Discuss — Attachment	Discuss how attachment and different parenting styles affect human development, as well as the role of the father in the family. (CR3 – Skill Category 1)
Practice — Comprehension Check	Answer questions to assess your understanding of theories of development in preparation for the lesson quiz. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Quiz — Comprehension Check	Answer questions to assess your understanding of the theories of human development as presented in this lesson.

Lesson 3: Personality

Study — Psychodynamic Theories of Development	Learn theories about the role of unconscious conflicts in development. Explore Freud's levels of consciousness, structures of personality, conflict and guilt, and psychosexual stages of development. (CR3 – Skill Category 1)
Study — Psychoanalytic Perspectives on Personality	Dig into what creates personality and learn about various personality theories from the psychoanalytic perspective, including those of Freud, Jung, and Adler. (CR3 – Skill Category 1)
Practice — The Id, Ego and Superego	Develop a mastery of key terms and ideas about psychoanalytic personality theory. (CR3 – Skill Category 1)
Study — Other Perspectives on Personality	Explore behavioral, social-cognitive, humanistic, and trait approaches to understanding personality. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Practice – Theories of Personality	In a series of short essays, explain how the various theories of personality account for an introverted or extroverted personality. (CR3 – Skill Category 1)

Explore – Personality Testing	Take an online personality assessment (a brief version of Myers-Briggs) and think about whether the results are useful to you, whether you agree with them, and how you might design a personality test yourself. (CR3 – Skill Category 1 - CR4 – Skill Category 2)
Practice – Comprehension Check	Answer questions to assess your understanding of personality as covered in this lesson. (CR3 – Skill Category 1)
Discuss -- Personality	Discuss two theories of personality that you feel best explain the development of your personality. (CR3 – Skill Category 1)
Quiz – Comprehension Check	Answer questions to assess your understanding of personality as presented in this lesson.

Lesson 4: Testing and Individual Differences

Study — How Tests Are Created and Used	Look at how a test is constructed. Then discuss concepts that are related to designing good tests, such as reliability and validity. Finally, examine intelligence testing in particular, focusing on the problems in defining intelligence and on the possibility of cultural and ethnic bias in intelligence testing. (CR3 – Skill Category 1, CR4 – Skill Category 2)
Study — Common Types of Psychometric Tests	Learn about tests for intelligence personality and other traits. Examine the definitions, characteristics, intended purposes and some of the strengths and weaknesses of each type of test. (CR3 – Skill Category 1, CR4 – Skill Category 2)
Explore — Howard Gardner: The World of Multiple Intelligences	Discover your multiple intelligences profile. Think about your strength and weaknesses, how you might improve upon them, and whether the results surprised you. (CR3 – Skill Category 1, CR4 – Skill Category 2)

Discuss — Intelligence	Apply what you have learned about intelligence to answer one of these questions using examples to support your opinion. Is there a difference between men and woman? Is intelligence a measure of innate ability or simply hard intellectual work? Is intelligence determined at birth or is it something in our lives that we can improve or change? (CR3 – Skill Category 1)
Practice – Theories of Intelligence	Read descriptions and give the corresponding theories of intelligence. (CR3 – Skill Category 1)
Quiz – Comprehension Check	Answer questions to assess your understanding of personality testing and individual differences as introduced in this lesson.

Lesson 5: Developmental Testing and Individual Differences Wrap-Up

Review — Development Testing and Individual Differences	Review the material covered in this unit to prepare for the test.
Test — Development Testing and Individual Differences	Test your understanding of the key concepts taught in this unit. This 50-minute test is teacher graded and includes multiple-choice questions as well as an essay.

Unit 5: Abnormal Psychology and Social Psychology (CED Unit 1, CED Unit 8, CED Unit 9)

Lesson 1: Abnormal Psychology

Study — Overview of Abnormal Psychology	Look at the concept of "abnormal" and see how it has been defined has changed over the years. Then examine how several major theoretical perspectives approach "abnormality." Includes an introduction to the DSM-IV. (CR3 – Skill Category 1)
Study — Major Categories of Disorders	Become familiar with the major categories of disorders (such as anxiety, somatoform, dissociative, and affective) as defined by the DSM•IV. See how the disorders vary widely in terms of symptoms as well as prognosis. (CR3 – Skill Category 1)

Discuss — Psychological Disorders	Select a psychological disorder that you find intriguing. Discuss the symptoms and explain why and how you find it interesting. Or take up the issue of insurance coverage for mental disorders. (CR3 – Skill Category 1)
Study — Diagnosing Disorders	Practice diagnosing disorders according to how they're defined in the Diagnostic and Statistical Manual. (CR3 – Skill Category 1)
Explore — The Puzzle of Diagnosis	At the PsychSim website, examine several cases and diagnose the psychological disorder. (CR3 – Skill Category 1)
Practice — Diagnosing Psychological Disorders	Examine a set of five case studies. Then referring to the DSM-IV, give a diagnosis and explanation of the possible psychological disorder based on the symptoms described. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Practice – Comprehension Check	Answer questions to assess your understanding of psychological disorders in preparation for the lesson quiz. (CR3 – Skill Category 1)
Quiz – Comprehension Check	Answer questions to assess your understanding of abnormal psychology as presented in this lesson.

Lesson 2: Treatments

Study — Types of Therapies and Therapists	There exist various theoretical approaches to treatment, and each perspective differs in terms of how problems are targeted. See how each theoretical perspective is unique, and how different facets of each might be combined to form an eclectic treatment model. (CR3 – Skill Category 1)
Explore — Pharmacological Approaches to Treatment	Look at drug classifications and learn how prescription medications are used to treat mental illness. (CR3 – Skill Category 1)
Explore — Rogerian Therapy	Experience a short Rogerian therapy session at the PsychSim Tutorial site. (CR3 – Skill Category 1)
Practice — Therapy and Treatment	Now that you know something about the major psychotherapies and biomedical therapies, apply this information to outline a variety of treatment options for depression, explain the preventative health model, and discuss therapeutic effectiveness. (CR3 – Skill Category 1)
Practice — Comprehension Check	Answer questions to assess your understanding of treatments before taking the lesson quiz. (CR3 – Skill Category 1)
Quiz — Comprehension Check	Answer questions to assess your understanding of treatments and therapies as presented in this lesson.

Lesson 3: Attitudes and Social-Cognitive Theories

Study – Attitudes and Social-Cognitive Theories	Discuss attitude formation and attitude change. Then explore the processes by which we judge our own and others' behavior and examine the common biases that are a part of these processes. (CR3 – Skill Category 1)
Explore – Examine the Zimbardo Prison Study on the Power of Roles	Examine Zimbardo's historical case study to discover the power of roles and consider whether it explains Iraqi prisoner abuse. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Explore – Famous Studies in Social Psychology	Explore Asch's, Milgram's and Zimbardo's studies about group influence on individual behavior. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Discuss – Social Psychology	Provide a real-life example to support or refute the findings of one of the studies you learned about in the previous two activities. (CR3 – Skill Category 1)

Practice – Comprehension Check	Answer questions to assess your understanding of attitudes and social-cognitive theories. (CR3 – Skill Category 1)
Study – Friendliness Friendship and Love	Learn more about what brings people together and prompts them to love and help each other. (CR3 – Skill Category 1)
Quiz – Comprehension Check	Answer questions to assess your understanding of attitudes and Social-Cognitive theories as covered in this lesson.

Lesson 4: Groups and Intergroup Relations

Study — Concepts in Groups and Intergroup Relations	Learn about a basic concept in social psychology: the group. Learn important ideas and theories about how groups behave and interact. (CR3 – Skill Category 1)
Study — Contact Theory	Learn how contact between individuals in different groups can increase understanding and cooperation and reduce prejudice, stereotyping, and discrimination. Explore the Robbers Cave Study, the contact hypothesis, and the jigsaw classroom. (CR3 – Skill Category 1, CR5 – Skill Category 3)
Explore — Prisoner Dilemma: A Problem of Cooperation vs. Competition	Explore the effect of cooperation and competition on individual decision-making by playing a computer simulation game that mimics the Prisoner's Dilemma. (CR3 – Skill Category 1)
Explore — Dissonance Theory Persuasion and Consumer Behavior	Take a look at how commercials and print advertisements entice you to purchase their products through promotion of cognitive dissonance. (CR3 – Skill Category 1)
Discuss — Television and Aggression	Discuss whether violence, such as that shown on TV or depicted in video games creates or releases aggression in teens. (CR3 – Skill Category 1)
Practice — Pro-social vs. Anti-social Behavior	Use examples to write short essays that illustrate pro- social and anti-social group behavior. (CR3 – Skill Category 1)
Quiz – Comprehension Check	Answer questions to assess your understanding of groups and intergroup relations as introduced in this lesson.

Lesson 5: Abnormal Psychology and Social Psychology Wrap-Up

Review — Abnormal Psychology and Social Psychology	Review the material covered in this unit to prepare for the test.
Test — Abnormal Psychology and Social Psychology	Test your understanding of the key concepts introduced in this unit. The 50-minute test is teacher-graded and includes

	multiple-choice questions and an essay.
--	---

Unit 6: Course Review and Exam

Lesson 1: Course Review

Review — Myers Review Materials	Review the material you studied in this course and get a refresher on how to write a good exam essay.
---------------------------------	---

Lesson 2: Final Course Exam

Exam — Final Course Exam	Take the Course Final to assess your understanding of the content from both semesters. This two-hour exam is teacher-graded and includes multiple-choice questions as well as two essays.
--------------------------	---

AP Statistics

AP Statistics

Course Overview

Name	AP Statistics
Description	<p>AP Statistics gives students hands-on experience collecting, analyzing, graphing, and interpreting real-world data. They will learn to effectively design and analyze research studies by reviewing and evaluating real research examples taken from daily life. The next time they hear the results from another poll or study, they will know whether the results are valid. As the art of drawing conclusions from imperfect data and the science of real world uncertainties, statistics plays an important role in many fields. The equivalent of an introductory college-level course, AP Statistics prepares students for the AP Exam and for further study in science, sociology, medicine, engineering, political science, geography, and business.</p> <p>The content aligns to the scope and sequence specified by the College Board and to widely used textbooks.</p>
Teacher role	<p>All students enrolled in this course are assigned to a "section" and have a teacher who is charged with ensuring student success and addressing student questions, problems, and concerns. In addition, all students have a "mentor" who is available in their school or home and helps keep the student on track for completing the materials in a timely manner.</p>
Prerequisites	<ul style="list-style-type: none"> • Algebra II or Math Analysis • Recommended for qualified AP students
Length	Two semesters

Materials	<p>The majority of the required instructional material for this course is available to students online and is equivalent to a college-level textbook. These materials were created and owned by our company.</p> <p>In addition, either the student or the school must purchase the following:</p> <p>Graphing calculator such as the TI-84 Plus, TI-83, or TI-83 Plus</p> <p>Mendenhall, W., Beaver, R. J. & Beaver, B. M. (2005). <i>Introduction to Probability and Statistics</i>. 12th Ed. Belmont, CA: Thomson-Brooks/Cole.</p> <p>Sternstein, M. (2004). <i>Barron's How to Prepare for the AP Statistics: Advanced Placement Test in Statistics</i>. 3rd Ed. New York: Barron's.</p>
------------------	--

Course Design

Course Structure

Unit	Title
Semester One	
1	Describing Data
2	The Normal Distribution
3	Bivariate Data
4	Planning a Study
5	Probability
Semester Two	
6	Binomials and Distributions
7	Introduction to Inference
8	<i>t</i> Distribution for Means
9	Inference for Proportions
10	Inference for Tables and Least-Squares
11	Final Preparation for the AP Statistics Exam

Lesson Structure and Instructional Strategies

The following key should help you understand the different types of activities students engage in during the course:

Activity type	Description
Diagnostic	Pre- or post-test used to help students assess their mastery and understanding of the material introduced in the unit.

Discuss	Students discuss topics in an online bulletin-board style forum. Teachers participate in these discussions as well and students receive credit for their participation.
Exam	Test administered at semester's end covering all material from the course. The exam is in a format that mimics the AP exam and includes both multiple-choice and free-response sections.
Practice	Students answer questions regarding what they have learned thus far. There are scored and unscored practices. The scored practices are submitted to the instructor for grading. Answers are to be complete and justified. Unscored practices have solutions provided. Questions often include opportunities to apply new skills to real-world applications and use graphing calculators with statistical capabilities to describe data, determine probabilities, and perform tests [CR2].
Quiz	Computer-administered and automatically graded assessment. Student receives immediate feedback on correct answers and justification.
Review	Review of the material covered in a unit or over a semester. The review is organized by objectives from the unit and includes a summary of the concepts and practice problems with solutions.
Study	Primary instructional online content that teaches new concepts through multimedia and interactivity. Study content often includes opportunities to apply new skills to real-world applications and use graphing calculators with statistical capabilities to describe data, determine probabilities, and perform tests [CR2].
Test	Assessment covering the material introduced in a unit. Tests are in the same format as the AP exam and include both multiple-choice and free-response sections.

Unit and Semester Exams

At the end of each unit students take a two-part exam. Part 1 of the exam consists of multiple-choice questions, modeled after the multiple-choice section of the AP Statistics Exam. Part 2 of the exam asks students to create short-responses to AP style prompts based on their skill and understanding obtained over the course of the Unit.

At the end of each semester students take a proctored exam modeled after the AP Exam. The first semester exam consists of 25 multiple choice questions and five free-response questions that mimic the AP Statistics AB Exam. The second semester exam consists of 40 multiple-choice questions, and six free-response questions that mimic the AP Statistics Exam.

Course Outline

Semester One

Unit 1: Describing Data [College Board (CB) Unit 1, VAR, UNC] Unit 2: The Normal Distribution [CB Unit 1, VAR, UNC]

Unit 3: Bivariate Data [CB Unit 2, VAR, UNC, DAT] Unit 4: Planning a Study [CB Unit 3, VAR, DAT] Unit 5: Probability [CB Unit 4, VAR, UNC]

Semester Two

Unit 6: Binomials and Distributions [CB Unit 5, VAR, UNC] Unit 7: Introduction to Inference [CB Unit 7, VAR, UNC, DAT] Unit 8: t Distribution for Means [CB Unit 7, VAR, UNC, DAT] Unit 9: Inference for Proportions [CB Unit 6, VAR, UNC, DAT]

Unit 10: Inference for Tables and Least-Squares [CB Units 8 and 9, VAR, UNC, DAT] Unit 11: Final Preparation for the AP Statistics Exam

Curricular Requirements

The course is structured to address curricular requirements in each semester and in a variety of units, giving students the chance to refine their skills related to the Skills Categories over the progression of the course instead of in a single unit.

Students will address the “big ideas” of Variation and Distribution, Patterns and Uncertainty, and Data- Based Predictions, Decisions, and Conclusions [CR3], use graphing calculators with statistical capabilities to describe data, determine probabilities, and perform tests [CR2], and apply what they are learning to real- world problems throughout many units and lessons in the course.

Curricular Requirement	
4: The course provides opportunities for students to develop the course skills related to Skill Category 1: Selecting Statistical Methods, as outlined in the AP Course and Exam Description (CED). Select methods for collecting and/or analyzing data for statistical inference.	
1.A: Identify the question to be answered or problem to be solved (not assessed).	
1.B: Identify key and relevant information to answer a question or solve a problem.	
1.C: Describe an appropriate method for gathering and representing data.	
1.D: Identify an appropriate inference method for confidence intervals.	
1.E: Identify an appropriate inference method for significance tests.	
1.F: Identify null and alternative hypotheses.	
Semester 1 (Units 1-5)	Semester 2 (Units 6-10)

<p>Unit 4, Lesson 1 – Methods of Data Collection- Experiments and Studies: Students learn to explain the difference between various methods to collect data such as an observational study and an experiment, anecdotal and available data, a sample, and a census, and they also review various designs to determine if they a flawed and why. At the end of the lesson, students complete an assignment where they design experiments for four different scenarios. [VAR, DAT; 1.A, 1.B, 1.C]</p>	<p>Unit 10, Lesson 3 – Inference for the Least-Squares Line: Students learn to compute the least-squares regression line for bivariate data and confidence intervals for the slope of the population regression line, and perform significance tests for the slope of the population regression line. Students also practice with graphing calculator and MINITAB output on problems associated with</p>
---	--

Lesson Objectives

By the end of this lesson, you should be able to:

- Explain the differences between an *observational study* and an *experiment*.
- Explain the differences between anecdotal and available data, and between a sample and a census.
- Explain the following terms from the vocabulary of experiments: subject, factor, level, placebo, and placebo effect, control and control groups, treatments and treatment groups, bias, matching, matched pairs design, randomization, blocking, replication.
- Name and describe the three major principals of experimental design.
- Given a testable idea, describe a completely randomized design, a randomized matched pairs design, and a randomized block design, and explain which is best and why.

Examples

4.1.3 Quiz: Data Collection

Students answer ten questions about which methods of data collection are more accurate or which design methods are flawed depending on the given situation.

4.1.8 Practice: Choosing the Design of an Experiment

This practice requires students to design experiments for four scenarios. For example, A farm cooperative has asked you to design an experiment that measures the effects of light exposure on the growth of tulips in the Skagit Valley of Washington State. You hypothesize that tulips exposed to more direct light will grow at a faster rate than those exposed to less light. You also wonder whether the effects of light exposure persist when you control for the amount of moisture the plants receive. You want to create a randomized comparative design that considers three factors with the following levels: Light Exposure, Amount of Light Exposure, and Amount of Moisture Exposure.

You have 1,000 seedling plants at 12 different nurseries to use in your experiment. Your experiment should run six months in length.

inference for the least-squares regression line [VAR, UNC, DAT; 1.B, 1.D, 1.E] [CR2]

Lesson Objectives

By the end of this lesson, you should be able to:

- Given a bivariate data set, compute the least- squares regression line.
- Compute confidence intervals for the slope of a population regression line.
- Perform significance tests for the slope of a population regression line.

Examples

10.3.4 Practice: Graphing Calculator and MINITAB Output for Inference for the Least-Squares Line

Students complete 3 multi-step problems
 Problem 1: You want to determine whether knowing a student's final grade helps to predict how that student will evaluate their teacher. You ask 12 students to assign their math teacher a numeric grade between 0 and 100. You also record each student's final grade. (data provided)

- A. Construct a scatter plot for these data. Does there seem to be a linear relationship between the two variables?
- B. Use your graphing calculator to construct a least-squares regression line.
- C. Create a scatter plot of the residuals against the explanatory variable. Does the scatter plot support the assumption that the residuals are normally distributed about the regression line? Can you continue to use regression analysis to analyze these data?
- D. What are the null and alternative hypotheses for a two-sided significance test for this regression line?
- E. Using your graphing calculator, find your test statistic and p-value for this two-sided test.
- F. What's the standard error of the slope of this regression line?
- G. Construct a 95% confidence interval for the slope of the regression line.

<p>In your answer you should comment on a strategy for randomization, identify all the possible treatment groups, and discuss what might be a possible</p>	<p>interval (.776, 1.2384) for the slope of the regression line.</p> <p>10.3.5 Practice: Inference for the Least-Squares Line Students complete two 7- or 8-step problems</p>
--	--

<p>response variable. In addition, you should identify a couple confounding variables and discuss a method of controlling for one of these variables.</p>	<p>where they use t tests for hypotheses about the slope of a regression line, use their graphing calculators and interpret computer output, construct regression equations, make predictions, determine appropriateness of their predictions, evaluate significance tests, and construct and interpret confidence intervals.</p>
<p>Curricular Requirement</p>	
<p>5: The course provides opportunities for students to develop the course skills related to Skill Category 2: Data Analysis, as outlined in the AP Course and Exam Description (CED). Describe patterns, trends, associations, and relationships in data.</p> <p>2.A: Describe data presented numerically or graphically. 2.B: Construct numerical or graphical representations of distributions. 2.C: Calculate summary statistics, relative positions of points within a distribution, correlation, and predicted response. 2.D: Compare distributions or relative positions of points within a distribution.</p>	
<p>Semester 1 (Units 1-5)</p>	<p>Semester 1 (Units 1-5)</p>
<p>Unit 1, Lesson 2 – Displaying Distributions with Graphs: Students use data provided tables and graphs to answer questions and describe the data, construct graphical representations of distributions of data, and compare distributions of points within a distribution. [VAR, UNC; 2.A, 2.B, 2.D]</p> <p><u>Lesson Objectives</u> By the end of this lesson, you should be able to:</p> <ul style="list-style-type: none"> • Define the terms distribution and variable. • Present a given set of data graphically in a dot plot or line plot. • Present a given set of data graphically in a bar chart or pie chart. • Use frequency tables and relative frequency tables in the construction of histograms and cumulative frequency plots. Determine useful class widths for histograms. • Construct a stem-and-leaf plot and a back-to-back stem-and-leaf plot. • Identify the <i>shape</i> of a distribution from its <i>dot plot, histogram, or stem-and-leaf plot</i>. Specifically, identify a <i>uniform distribution, J-shaped distribution, mound-shaped distribution, or U-shaped distribution</i> and identify such features of distributions as <i>skewness, clusters, gaps, and outliers</i>. <p>• Use a graphing calculator to draw histograms.</p>	<p>Unit 3 – Bivariate Data: In the first half of this unit, students explore bivariate data as they construct scatter plots and identify instances of positive and negative association in the data (Lesson 1), calculate linear regression, use residuals to discuss the adequacy of a linear regression model, and use their graphing calculator to create residual plots and determine whether a linear regression gives an acceptable model for the relationship between the explanatory and response variable (Lesson 2), calculate the correlation coefficient, make predictions, and understand regression analysis (Lesson 3), and evaluate the impact of influential points and outliers on a data set in a regression setting (Lesson 4) [VAR, UNC, DAT; 2.A, 2.B, 2.C, 2.D] [CR2]</p> <p><u>Lesson Objectives</u> By the end of these 4 lessons, you should be able to:</p> <ul style="list-style-type: none"> • Construct a scatterplot when given a set of paired data • Identify instances of positive and negative association. • Distinguish between explanatory and response variables. • Distinguish between quantitative and categorical data.

Examples

1.2.2 Practice: What Can You Tell From Graphs?

Students use climate data provided from tables, bar graphs, pie charts, line graphs, and frequency distributions (dot plots), to answer questions and provide justification.

1.2.3 Discuss: Choosing Appropriate Graphs

In a follow-up activity to 1.2.2, students discuss the climate data in a class discussion with the following prompts:

- Describe the seasonal patterns of rainfall and temperature in each of the two cities. Which graphs best illustrate these seasonal changes as patterns? Why? In contrast, which graphs best describe the "typical" climate in each city? Why?
- What important climate information is missing from the data? Why don't these graphs tell the whole story about what the climate is really like?
- Using the graphs and tables, tell which city you'd rather live in. Use information from at least two graphs to support your answer.

1.2.7 Practice: Introduction to Stem-and-Leaf Plots

In this activity, students research stem-and-leaf plots and back-to-back stem-and-leaf plots. They also practice creating stem and leaf plots from provided data. Students evaluate the shape of the data and how it varies if the values of the stems are changed or combined.

- Calculate the linear regression line from a bivariate data set, interpret the correlation coefficient, and use the line to predict values of the response variable when given values for the explanatory variable.
- Calculate a set of residuals from a linear regression.
- Use residuals to discuss the adequacy of a linear regression model.
- Use your graphing calculator to create residual plots and determine whether a linear regression gives an acceptable model for the relationship between the explanatory and response variables.
- Calculate Pearson's correlation coefficient r for a set of paired data and explain its meaning.
- Explain the relationship between the correlation coefficient and the slope of the regression line.
- Calculate the coefficient of determination (r^2) for a set of paired data and explain its meaning.
- Interpret MINITAB output for regression and correlation.
- Distinguish between an outlier and an influential point.
- Identify and describe the influence of outliers and influential points in a regression setting.

Examples

3.1.2 Practice: Scatterplots and Bivariate Data

Student directions: In this Independent Study you'll create and interpret scatterplots. Although it's easy to create such plots by hand, the process can take a long time. Here are some instructions for creating a scatterplot using the TI-83/TI-84, in case you need a refresher. Let's assume you have the following data for a set for 10 individuals. The x-value represents the amount of change they have in their pocket (in cents), and the y-value represents their age (in years)....

Question 1: A social skills training program was implemented for seven students with mild handicaps in a study to determine whether the program caused improvement in pre/post measures and behavior ratings.

	<p>posttest scores for the seven students: <i>(data provided)</i></p>
--	---

	<p>A. Draw a scatterplot relating posttest score to pretest score. (You can create the scatterplot either by hand or by using the TI-83/TI-84.)</p> <p>B. Describe the relationship between pre- and posttest scores using the graph in part A. Do you see any trend?</p> <p>3.2.6 Practice: Linear Regression Lines</p> <p>Students are given data and instructed to calculate a regression equations, create a scatter plot and plot regression lines with the data, characterize the relationship between the x and y variables, calculate residuals, make predictions, and use data to justify their answers. Graphing calculators are used with this assignment.</p>
<p>Curricular Requirement</p>	
<p>6: The course provides opportunities for students to develop the course skills related to Skill Category 3: Using Probability and Simulation, as outlined in the AP Course and Exam Description (CED). Explore random phenomena.</p> <p>3.A: Determine relative frequencies, proportions, or probabilities using simulation or calculations.</p> <p>3.B: Determine parameters for probability distributions.</p> <p>3.C: Describe probability distributions.</p> <p>3.D: Construct a confidence interval, provided conditions for inference are met.</p> <p>3.E: Calculate a test statistic and find a p-value, provided conditions for inference are met.</p>	
<p>Semester 1 (Units 1-5)</p>	<p>Semester 2 (Units 6-10)</p>
<p>Unit 5, Lessons 4 and 5 – Probability Distributions and Means and Variances of Random Variables: In these two lessons, students determine probabilities using simulations and calculations, determine parameters for probability distributions, and describe probability distributions [VAR, UNC ; 3.A, 3.B, 3.C] [CR2]</p> <p><u>Lesson Objectives</u> By the end of these 2 lessons, you should be able to:</p> <ul style="list-style-type: none"> • Define <i>random variable</i>. • Distinguish between a discrete random variable and a continuous random variable. • Construct and interpret a <i>discrete probability distribution</i> and a <i>probability histogram</i>. • Calculate the <i>expected value (mean), variance, and standard deviation</i> of a discrete random variable. 	<p>Unit 7, Lessons 1 and 2 – Confidence Intervals for Means and Statistical Significance and P-Value: In these two lessons, students learn about point estimates, margin of error, confidence levels, with statistical significance, critical z-values, statistical confidence and p-values. They construct a confidence interval, generate random samples with their graphing calculator and practice obtaining confidence, and calculate p-values. [VAR, UNC; 3.D, 3.E] [CR2]</p> <p><u>Lesson Objectives</u> By the end of these 2 lessons, you should be able to:</p> <ul style="list-style-type: none"> • Define the term <i>confidence interval</i>, and use the definition to answer questions about confidence intervals. • Use differing confidence levels to construct confidence intervals for a population mean. • Identify the sample size needed to

<p>of a discrete random variable that has undergone a linear transformation.</p> <ul style="list-style-type: none">• Given the mean and standard deviation of two random variables X and Y, determine the mean	<p>create a confidence interval with a given level of confidence and margin of error.</p>
--	---

<p>and standard deviation of the random variables $X + Y$ and $X - Y$.</p> <p><u>Examples</u></p> <p>5.4.3 Practice: Discrete Probability Distributions Students use a graphing calculator to simulate random behavior of discrete variables, do virtual random experiments (such as die rolls, coin flips, and candy samples), and produce probability histograms. Students also complete an experiment by rolling two normal dice 200 times, then compare theoretical probability with their experimental results. Sample Question: A random variable X has the following probability distribution: (data provided)</p> <p>A. What is $P(2)$?</p> <p>B. Construct a probability histogram of the distribution.</p> <p>5.5.4 Practice: Computing Means and Variances Students complete practice problems to apply their knowledge of how to compute means, standard deviations, and variances for transformed or combined random variables. Sample question: Find the expected value of the number of questions you'd get right by guessing. What are the variance and standard deviation?</p>	<ul style="list-style-type: none"> • Define the terms <i>P-value</i> and <i>statistical significance</i>, and use the definitions to answer questions about these terms. • Calculate <i>P-values</i> for different sample outcomes and use them to determine statistical significance. <p><u>Examples</u></p> <p>7.1.5 Practice: Confidence Intervals Student Directions: Using your graphing calculator, you'll generate random samples and see how many of them give you confidence intervals that contain the population parameter. Step 1: Generate 20 random samples from the same population and take the mean of each sample. Step 2: Generate an 80% confidence interval for each mean. Step 3: See how many of your confidence intervals contain your population mean. Step 4: Try this process again with a 90% and 95% confidence interval.</p> <p>7.2.4 Quiz: Working With P-Values and Statistical Significance Students answer 10 questions to apply the principals of statistical significance and find P-values. Sample question: (<i>Data and information are provided.</i>) What's the <i>p</i>-value for winning 7 or more out of 100 rounds? Sample question: (<i>Data and information are provided.</i>) True or False: Using a significance level of .05, there's significant evidence that the population mean is actually lower than 3.4 kilograms.</p>
<p>Curricular Requirement</p>	

7: The course provides opportunities for students to develop the course skills related to Inference and Skill Category 4: Statistical Argumentation, as outlined in the AP Course and Exam Description (CED). Develop an explanation or justify a conclusion using evidence from data, definitions, or statistical inference.

- 1.D: Identify an appropriate inference method for confidence intervals.
- 1.E: Identify an appropriate inference method for significance tests.
- 1.F: Identify null and alternative hypotheses.
- 3.D: Construct a confidence interval, provided conditions for inference are met.
- 3.E: Calculate a test statistic and find a p-value, provided conditions for inference are met.
- 4.A: Make an appropriate claim or draw an appropriate conclusion.
- 4.B: Interpret statistical calculations and findings to assign meaning or assess a claim.
- 4.C: Verify that inference procedures apply in a given situation.
- 4.D: Justify a claim based on a confidence interval.
- 4.E: Justify a claim using a decision based on significance tests.

Semester 2 (Units 6-10)	Semester 2 (Units 6-10)
--------------------------------	--------------------------------

Unit 7, Lesson 3 – Significance and Hypothesis Testing: Means: In this lesson, students learn the four steps of the hypothesis testing procedure and learn about two-sided significance testing and confidence intervals. Students practice statistical argumentation. [UNC, DAT; 1.E, 1.F, 3.E, 4.A, 4.B, 4.C, 4.E] [CR2]

Lesson Objectives

By the end of this lesson, you should be able to:

- Summarize the steps in, and answer questions about, the hypothesis-testing procedure.
- Define *null hypothesis* and *alternative hypothesis*.
- Perform hypothesis tests for the mean of a population.
- Compare two-sided hypothesis tests and confidence intervals.

Example

7.3.4 Practice: Hypothesis Tests for Means

Hypothesis testing is a more formal process for making inferences about a population value based on a test statistic. The procedure for hypothesis testing may be divided into four steps.

1. State the null and alternative hypotheses in the context of the problem.
2. State the test that you plan to use to test your hypothesis and justify the assumptions (or the conditions) necessary to use that test. You'll see later in this section that if your alternative hypothesis is two sided, you might choose to test the hypothesis with a confidence interval rather than a *t*-test or a *z*-test.
3. Compute the test statistic of interest.
4. Give a conclusion in the context of the problem.

Activity Question 2: A fisheries report states that the mean length of bass in Lake Hypothesistesta is 14 inches, with a standard deviation of 4 inches. You think the population may have changed. You draw a random sample of 35 fish and find that the mean length is 12 inches.

A. To test whether the population mean is different from the 14 inches, what would you use for your null and alternative hypotheses? Be sure to state the hypotheses in the context of the problem.

Unit 9, Lesson 1 – Confidence Intervals and Hypothesis Tests for a Single Population Proportion: In this lesson, students learn about confidence intervals for a single population proportion and identify criteria for using *z*-procedures, construct a confidence interval using the point estimate, standard error, and the critical *z*-value and determine the sample size needed for a given margin of error.

Students create confidence *z*-intervals using formulas and a table and with a graphing calculator. Students complete more hypothesis testing and examine testing for a single population proportion with one- and two-tailed significance testing and learn the distinction between standard error in confidence intervals and

standard deviation in hypothesis testing. [UNC, DAT; 1.D, 3.D, 4.A, 4.B, 4.C, 4.D] [CR2]

Lesson Objectives

By the end of this lesson, you should be able to:

- Identify why and when it's proper to use *z*-procedures when dealing with proportions.
- Construct a confidence interval for a single population proportion using the point estimate, the standard error, and the critical *z*-value.
- Determine the sample size needed for a given margin of error when constructing a confidence interval for a population proportion.
- Explain the difference between the standard error of a sample proportion for a confidence interval and the standard deviation of a sample proportion for a significance test.
- Conduct a significance test about a single population proportion.

Example

9.1.5 Practice: Confidence Intervals for a Single Population Proportion

Question 3: A university wants to renovate a building on campus, and wants to know how many of the 20,000 active members of the alumni association would be willing to contribute funds to this project. However, this is the first time alumni donations would

<p>B. What test would you plan to use, how will the test work, and what are the conditions necessary to use the test? Does your situation meet those conditions?</p>	<p>be the sole financial source for such a project, and the university doesn't have an estimate of the proportion who would contribute toward the renovation.</p>
--	---

<p>C. Calculate your test statistic and P-value. Show your work, including the formulas that you use to calculate the statistic.</p> <p>D. What's your conclusion, using $\alpha = 0.5$?</p>	<p>A. If the university wanted to estimate, with a 95% confidence interval and a margin of error of 5%, the proportion of alumni who would be willing to donate to this project, what size sample would they need?</p> <p>B. The university draws a sample of 385 alumni, and 120 of them say they'd be willing to donate to the building renovation. Construct a 95% confidence interval for the proportion of alumni who would donate to the project.</p> <p>C. Based on the sample size from part b, can you consider this situation binomial? Can you use a normal approximation here?</p> <p>D. The university postpones plans for the building renovations until the following year, when researchers take another sample of 385 alumni. This time, 262 alumni say they'd contribute to the project. Construct a 95% confidence interval for the proportion of alumni who would make donations</p> <p>E. Use your graphing calculator to calculate a 99% confidence interval for the proportion of alumni who would donate to the building renovations (use $Q = 385$ and $x = 262$). (Show all work, functions, and inputs on your calculator too.)</p>

AP United States Government and Politics

AP United States Government and Politics

Curricular Requirements	Page
CR 1 The teacher and students have access to a college-level U.S. government and politics textbook and news media sources from multiple perspective.	7, 16
CR 2 The course includes the 9 required foundational documents and 15 required Supreme Court cases as described in the course and exam description.	2–3, 8-12, 15
CR 3 The course is structured to incorporate the big ideas and required content outlined in each of the units described in the course and exam description.	3–4, 6-15
CR 4 The course provides opportunities for students to develop the skills in the disciplinary practices and make connections to the big ideas: Practice 1: Concept Application	11, 15
CR 5 The course provides opportunities for students to develop the skills in the disciplinary practices and make connections to the big ideas: Disciplinary Practice 2: SCOTUS Application.	15
CR 6 The course provides opportunities for students to develop the skills in the disciplinary practices and make connections to the big ideas: Disciplinary Practice 3: Data Analysis.	13-14
CR 7 The course provides opportunities for students to develop the skills in the disciplinary practices and make connections to the big ideas: Disciplinary Practice 4: Source Analysis: Read, analyze, and interpret foundational documents and other text-based sources and make connections to at least one big idea.	6-14

CR 8 The course provides opportunities for students to develop the skills in the disciplinary practices and make connections to the big ideas: Disciplinary Practice 4: Source Analysis: Read, analyze, and interpret foundational documents and other text-based and visual sources.	13
Curricular Requirements	Page
CR 9 The course provides opportunities for students to develop the skills in the disciplinary practices and make connections to the big ideas: Disciplinary Practice 5: Argumentation.	9, 11, 14
CR 10 Students are provided with an opportunity to engage in a political science research or applied civics project tied to the course and exam description that culminates in a presentation of findings.	15

Course Summary

The AP® United States Government and Politics course will provide high school students with college-level instruction in using disciplinary practices to examine key ideas, institutions, and behaviors in American government. They will look critically at the fundamental beliefs and philosophies that shaped American government and how those ideas have been interpreted and applied throughout history. Students will develop a deep understanding of the U.S. Constitution and the American political system—both its formal and informal processes and procedures. Students will also examine specific governmental institutions, policies, interactions, and behaviors within the political system. Through their study of each of these areas, students will hone their reasoning skills by developing evidence-based arguments, interpreting various types of data, and analyzing key documents, including foundational documents and Supreme Court decisions.

The course is organized around five big ideas, each focused on a different aspect of U.S. government and politics. Students must master the major political concepts associated with each idea and grasp the significant foundational documents and Supreme Court decisions required by the standards. This course will effectively prepare students for the AP exam by practicing the skills necessary to draw reasoned conclusions in both multiple-choice and free-response formats.

All nine required foundational documents are incorporated into the course. Students will also read additional foundational documents based on state and local requirements and/or impact on U.S. constitutional democracy. [CR 2]

The following 15 required Supreme Court cases are incorporated within the course in order of appearance. [CR 2]

- *McCulloch v. Maryland* (1819)
- *United States v. Lopez* (1995)
- *Baker v. Carr* (1961)
- *Shaw v. Reno* (1993)
- *Marbury v. Madison* (1803)
- *Engel v. Vitale* (1962)
- *Wisconsin v. Yoder* (1972)
- *New York Times Co. v. United States* (1971)
- *Tinker v. Des Moines Independent Community School District* (1969)
- *Schenck v. United States* (1919)
- *Gideon v. Wainwright* (1963)
- *Roe v. Wade* (1963)
- *McDonald v. Chicago* (2010)
- *Brown v. Board of Education* (1954)
- *Citizens United v. Federal Election Commission* (2010)

After reading about each court case, usually with an excerpt from the majority opinion, students will answer analysis questions about it. For example, after reading about *McCullough v. Maryland*, students write several sentences in response to the question: How did *McCullough v. Maryland* expand the power of the federal government beyond the powers specifically enumerated in the Constitution?

Course Units

- Unit 1: Course Overview
- Unit 2: Foundations of Democracy (big ideas: Constitutionalism, Liberty and Order, Methods of Political Analysis)
- Unit 3: Interaction Among Branches (big ideas: Competing Policy-Making Interests, Methods of Political Analysis)
- Unit 4: Civil Liberties and Rights (big ideas: Liberty and Order, Methods of Political Analysis)
- Unit 5: Mid-Semester Check

- Unit 6: American Political Culture and Beliefs (big ideas: Civic Participation in Representative Democracy, Methods of Political Analysis)
- Unit 7: Political Participation (big ideas: Civic Participation in Representative Democracy, Methods of Political Analysis)
- Unit 8: Review and Full-Length Practice Exam Unit
- Unit 9: Semester Project: From Bill to Law
- Unit 10: Semester Exam

Resource Requirements

Edwards III, George C., Wattenberg, Martin P., and William G. Howell. *Government in America: People, Politics, and Policy*. 17th ed., Pearson Higher Education, 2018. [CR 1]

Writing Assignments

In each lesson, students respond to questions about their textbook readings and other resources in a notebook. Students also complete longer portfolio writing that requires them to synthesize lesson content from across lessons and resources to develop evidence-based argumentative essays.

Assessments

Throughout the course, a variety of formative and summative assessments are used to assess student learning and prepare students for the expectations of the AP United States Government and Politics exam. Students are provided with ample opportunity for skill practice, engagement in meaningful discourse with their peers, and application of their understanding via tasks that are representative of real-world scenarios. Summative assessment types lend themselves to a deeper level of rigor and include portfolios and discussions. Formative assessments are designed to be auto-graded to give students and teachers instant feedback for targeted instruction.

Most lessons contain a quick check assessment that covers the objectives in the lesson, and most units have at least one cumulative quiz that also assesses lesson objectives. Each instructional unit culminates in an online practice to help students review unit concepts and skills, followed by a unit test that consists of multiple choice and short answer and/or essay questions. To aid students in retaining content throughout the course of a semester, a mid-semester check unit appears in the semester, featuring a low-risk practice assessment covering the objectives learned up to that point during the semester.

A graded full-length practice exam in the style of the AP United States Government and Politics exam is given near the end of the semester. The semester ends with a semester exam.

Most units feature a discussion or portfolio that promotes critical thinking by expanding on topics students have learned. The semester ends with a semester project and a semester exam. Graded assessments and participation all count toward the student's final grade.

Course Outline

Semester A

Unit 1: Course Overview

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Ensure they have the required materials for the course.
- Learn about the types of activities that will appear in the course.

Unit 2: Foundations of Democracy

In this unit, students will do the following:

- Explain how the ideas that form the basis of limited government in the United States are reflected in the Declaration of Independence and U.S. Constitution.
- Explain the models of representative democracy and how they are visible in political institutions, politics, events, and debates.
- Analyze the factors that contributed to the development of the U.S. Constitution, including the weaknesses of the Articles of Confederation, the role of compromise during the Constitutional Convention, and the ratification debate.
- Assess how the Constitution protects the freedom and will of the people of the United States through separation of powers and checks and balances.
- Examine the different interpretations of how power should be balanced between the national and state governments.

Sample activities in this unit:

- Students will analyze the separation of powers through checks and balances and apply it to the competitive policy-making process. First, students will read Federalist, no. 51, identify the argument used for separation of powers, and summarize this argument in their own words. Then, students will connect this argument to Constitution and policy-making by writing a paragraph in response to the question: Is the policymaking gridlock built into the Constitution a blessing or a curse? [Practice 4: Source Analysis; CR 3 (Big Idea: Competing Policy- Making Interests; Enduring Understanding: PMI-1) and CR 7)

- Students will analyze the balance between government power and individual rights. First, students will examine the Anti-Federalist arguments in Brutus I and write a paragraph explaining why the consolidation of power is dangerous to individual liberty. Then, students will read about the modern debate on the scope of the federal government’s power and write a paragraph explaining how Anti-Federalists would react to the federal government’s scope today and how this modern debate reflects the arguments during ratification. [Practice 5: Argumentation; CR 3 (Big Idea: Liberty and Order; Enduring Understanding: LOR-1) and CR 7]
- Students will read two articles on state compliance with federal law. In a short essay, students will compare and contrast the arguments about federalism in each situation and then draw a conclusion about federalism and the scope of government power. [CR 1 (Big Idea: Constitutionalism; Enduring Understanding: CON-2)]
- Students will read the *Washington Post* article, “Congress’s latest target for reversal: An Obama attempt to modernize how we manage Public Lands.” Then students will write responses to comprehension questions about the arguments the article presents in favor of and in opposition to the Obama Administration’s public land management policies. [Practice 4: Source Analysis; CR1 (Big Idea: Civic Participation in Representative Democracy; Methods of Political Analysis: PRD 5.12, PRD 5.13)]
- Students will read the *EducationWeek* articles, “Obama Uses Funding, Executive Muscle to Make Often-Divisive Agenda a Reality,” and “Obama’s Complex Legacy on K-12: Bold Achievements, Fierce Blowback.” Then student’s will write responses to comprehension questions that compare how those policies relied on Federalism, how they faced opposition by state’s rights advocates, and how they shifted in from the beginning to the end of the Administration. [Practice 4: Source Analysis; CR1 (Big Idea: Civic Participation in Representative Democracy; Methods of Political Analysis: PRD 5.12, PRD 5.13)]
- Students will read the articles, “Scalia’s Blow for Federalism” from the *National Review* and “Republicans and Democrats Flip Usual Positions Over ‘Sanctuary Cities’” from *The Atlantic*. Then students will refer to those sources to write an analysis of how how *United States v. Lopez* relates to the Commerce Clause of the Constitution. [Practice 4: Source Analysis; CR1 (Big Idea: Civic Participation in Representative Democracy; Methods of Political Analysis: PRD 5.12, PRD 5.13)]

- Students will analyze and explain how *United States v. Lopez* relates to commerce clause and connect it to a contemporary Supreme Court case addressing a similar issue. Students will conduct research to find a recent case such as *Printz v. United States* in which *United States v. Lopez*, either the majority or dissenting opinion, was used as a precedent and present an argument for whether the current standing of the Court should be overturned. [Practice 2: SCOTUS Application; CR 2 and CR 7]
- Students will evaluate the big idea of constitutionalism. In a discussion, students will respond to at least two prompts, such as the following:
 - How does the Constitution promote compromise between factions, parties, and interest groups?
 - What is one debate, negotiation, compromise, or tension from the Constitutional Convention that is still important in politics and policymaking today, and why?
 - Does the government of the United States today most resemble a participatory democracy, a plural democracy, or an elite democracy? [CR 3 (Big Idea: Constitutionalism; Enduring Understanding: CON-1)]
- Students will visit the websites of their congressional representative and at least one senator from their state. As they review each site, students will look carefully at the issues and policymaking priorities that are most prominent on each lawmaker’s site and consider these questions:
 - How much emphasis is placed on local or regional issues that might impact individual constituents?
 - How much emphasis is placed on issues related to larger, national groups and debates?
 - How much emphasis is placed on the character traits of the lawmaker and his or her fitness for independent decision making?

Based on these descriptions, students will write several paragraphs to explain what similarities and differences they see in how the lawmakers represent themselves and their policy priorities. In their written response, students will also explain how these similarities and differences reflect the differences between the House and the Senate as well as how they reflect different models of representational democracy. [Practice 1: Concept Application; CR 3 (Big Idea: Competing Policy-Making Interests; Enduring Understanding: PMI-1) and CR 3]

Required reading: *Government in America*, Chapter 1, pp. 9–12; Chapter 2, pp. 26–40, 45–53; Chapter 3, pp. 61–82; and Chapter 11, pp. 310–319, 347–348.

Required foundational documents: Federalists no. 10 and 51; Brutus I; Declaration of Independence; Articles of Confederation; U.S. Constitution [CR 2]

Required Supreme Court cases: Students will read excerpts from the majority opinions in *McCulloch v. Maryland* (1819) and *United States v. Lopez* (1995) and answer analysis questions about each court case. [CR 2]

Unit 3: Interaction Among Branches

In this unit, students will do the following:

- Analyze the structure and powers of the legislative branch and the law-making process.
- Analyze how each branch of government provides oversight and limits the powers of other branches.
- Assess how the president can implement a policy agenda, the role of communication technology, evaluate news media sources from multiple perspectives, analyze potential conflicts with Congress, and the justifications for using formal and informal presidential powers.
- Evaluate the principle of judicial review and the political discussion about the Supreme Court’s power.
- Explain the discretionary and rule-making authority of the federal bureaucracy to carry out the government’s responsibilities.

Sample activities in this unit:

- Students will examine the power of Congress and its interaction with the president. In a series of activities, students will examine the power Congress to declare war. First, they will read the article “Power to Declare War” from Congress and write a paragraph to describe how the president can enter into military conflicts without Congress and how the War Resolution should limit this. Then, they will conduct research about one of the conflicts they explored in the previous article and write several paragraphs about the interactions between the legislative and executive branches. [CR 3 (Big Idea: Constitutionalism; Enduring Understanding: CON-3) and CR 7]
- Students will analyze the powers of the executive branch. In a portfolio, students will develop an argument in the form of an essay in which they take

a position on the expansion of powers and scope of the executive branch over time, and its impact on American politics and government. [CR 3 (Big Idea: Constitutionalism; Enduring Understanding: CON-4), and CR 9]

- Students will analyze the design of the judicial branch and how its power was increased through judicial review. Students will read an excerpt from
- *Marbury v. Madison* and write paragraph-long responses to a series of questions about how judicial power expanded since the Constitution, how the judicial branch is isolated from some of the democratic processes, and in what ways the Supreme Court can limit the power of Congress and the executive branch. [CR 3 (Big Idea: Constitutionalism; Enduring Understanding: CON-5)]
- Students will analyze the relationship between each branch of government and the federal bureaucracy in creating and enforcing policies. After studying this unit, students will complete a chart showing how the Constitution established each branch and how each branch is related to the specific parts of the federal bureaucracy. [CR 3 (Big Idea: Competing Policy-Making Interests; Enduring Understanding: PMI-2)]

Required reading: *Government in America*, Chapter 2, pp. 33–34 and 40–44; Chapter 11, pp. 319–322 and 329–333; Chapter 12, pp. 356–357 and 369; Chapter 13, pp. 373–374 and 400–401; Chapter 14, pp. 415–416 and 433; and Chapter 15, pp. 448–455 and 468–469.

Required foundational documents: Federalist, no. 70; Federalist, no. 78; and U.S. Constitution (Articles I and V). [CR 7]

Required Supreme Court cases: Students will read excerpts from the majority opinions in *Baker v. Carr* (1961), *Shaw v. Reno* (1993), and *Marbury v. Madison* (1803), and answer analysis questions about each court case. [CR 2]

Unit 4: Civil Liberties and Rights

In this unit, students will do the following:

- Explain the rights protected in the Bill of Rights and how the Constitution protects civil liberties.
- Examine how interpretations of the protections within the Bill of Rights have changed over time.
- Analyze the doctrine of selective incorporation and how the protections in constitutional amendments have been applied to the states.
- Assess how the interpretation and application of the due process clause in

- the Fourteenth Amendment has limited states from infringing upon individual rights.
- Assess how the equal protection clause in the Fourteenth Amendment has influenced policy changes in response to social movements, including the restriction and protection of minority rights.

Sample activities in this unit:

- Students will analyze how the courts interpret the Constitution, specifically the Bill of Rights, and how they have interpreted due process rights. Students will synthesize information presented in the course with excerpts from the Bill of Rights and related Supreme Court cases, specifically *Gideon v. Wainwright* and *Roe v. Wade*, and write several paragraphs in response to prompts about due process and the right to privacy. [CR 2 and CR 3 (Big Idea: Liberty and Order; Enduring Understanding: LOR-3)]
- Students will read the decision of *Tinker v. Des Moines*. In several paragraphs, students will identify the key findings and describe how those would apply to a high school football player refusing to stand for the national anthem in support of Black Lives Matter versus his coach's desire to suspend him. [CR 3 (Big Idea: Liberty and Order; Enduring Understanding: LOR-2) and CR 4]
- Students will examine the influence of citizen-state interactions on interpreting the Constitution. Students will write a short essay where they evaluate how the long history of how the women's movement encouraged a reinterpretation of the rights guaranteed by the Constitution. Students are encouraged to use language from applicable Supreme Court cases as supporting evidence. [Practice 2: SCOTUS Application; CR 3 (Big Idea: Civic Participation in a Representative Democracy; Enduring Understanding: PRD-1)]
- Students will connect the selective incorporation of protections in the Bill of Rights for the rights of the accused (LOR-3) to how U.S. political culture influences the balance between individual liberty and efforts to promote stability and order (PMI-4) by researching the legal aspects of the War on Terror. In response to a series of prompts, students will write several paragraphs about the legality or illegality of actions by the United States government in the wake of 9/11, particularly the Supreme Court's response to holding and trying suspected terrorists at Guantanamo Bay. [CR 3 (Big Idea: Liberty and Order; Enduring Understanding: LOR-2) and CR 7]
- Students will write a short essay where they distinguish between the rationale in *Plessy* versus the rationale in *Brown*. They will analyze this

distinction and develop some ideas about why the two decisions reached different conclusions. Then, students will read “Letter from Birmingham Jail” and write a paragraph to describe the author’s purpose and how the letter reflects the ideas embodied in the equal protection clause of the Fourteenth Amendment. [CR 3 (Big Idea: Civic Participation in a Representative Democracy; Enduring Understanding: PRD-1), CR 7 and CR 9]

- Student will analyze how the government has responded to social movements through the Civil Rights Act of 1964, Title IX, and the Voting Rights Act of 1965. After reading about these policies, students will write several paragraphs to explain the relationship between the advancement of civil rights and democratic principles as well as the way democratic principles can also lead to violations of civil rights. [CR 3 (Big Idea: Competing Policy- Making Interests: PMI-3)]
- Students will write paragraph responses to several prompts to demonstrate what they learned about Affirmative Action, including how and why this policy was developed, and how it works in American life today. [CR 3 (Big Idea: Constitutionalism; Enduring Understanding: CON-6)]

Required reading: *Government in America*, Chapter 4, pp. 86–87, 89–103, and 109–124; and Chapter 5, pp. 131–151 and 155–159

Required foundational documents: Letter from Birmingham Jail (Martin Luther King, Jr.); and U.S. Constitution (Bill of Rights) [CR 7]

Required Supreme Court cases: Students will read excerpts from the majority opinions in *Engel v. Vitale* (1962); *Wisconsin v. Yoder* (1972); *New York Times Co. v. United States* (1971); *Tinker v. Des Moines Independent Community School District* (1969); *Schenck v. United States* (1919); *Gideon v. Wainwright* (1963); *Roe v. Wade* (1973); *McDonald v. Chicago* (2010); and *Brown v. Board of Education* (1954) and answer analysis questions about each court case. [CR 2]

Unit 5: Mid-Semester Check

In this unit, students will do the following:

- Demonstrate knowledge that they have learned from the beginning of the course by completing a graded mid-semester check in the style of the AP United States Government and Politics exam.

Unit 6: American Political Culture and Beliefs

In this unit, students will do the following:

- Examine the cultural factors that shape how individuals and communities interpret core political values.
- Analyze how differing interpretations of key political values impact the relationships among citizens and between citizens and the government.
- Assess the elements of a scientific poll as well as the quality and credibility of public opinion polling data.
- Examine varying political ideologies and their views toward the government's role in market regulation and social issues.
- Evaluate how public policies reflect the values, attitudes, and beliefs of different political ideologies.

Sample activities in this unit:

- Students will analyze campaign ads from the most recent (or upcoming) elections. In several paragraphs, students will explain what beliefs about the American national identity these ads reflect. Students will also determine which demographics they think the ads target and why. Then, students will analyze a graph about changing demographics in the United States and write a paragraph to explain how demographics influence the development of political beliefs. [Practice 3: Data Analysis; CR 3 (Big Idea: Competing Policy- Making Interests; Enduring Understanding: PMI-4), CR 7, and CR 8]
- Students will examine a graph on polarization in Congress and provide a written explanation of several reasons why Congress is becoming increasingly divided by party ideology. Then, students will examine a table from a U.S. Census Bureau report and provide written responses to several prompts about demographics and voting patterns. [Practice 3: Data Analysis; CR 3 (Big Idea: Methods of Political Analysis; Enduring Understanding: MPA-1), and CR 6]
- Students will watch a video on public opinion of the war in Iraq and write a paragraph to explain the impact of public opinion data on this policy debate. Then, students will analyze a political cartoon on economic policy and provide a written response in which they take a position on whether the level of public information is so low that it poses a threat to democracy. Finally, students will analyze a graph of voter turnout by age (source: 2014 U.S. Census Bureau data) and write a paragraph about the relationship between demographics and what Americans know about public policy. [Practice 4: Source Analysis; CR 3 (Big Idea: Methods of Political Analysis; Enduring Understanding: MPA-2), CR 6, and CR 8]

- Students will explore the proper role of government in the marketplace and addressing social issues. In a portfolio, students will pose an evidence-based argument explaining one of the major differences between the liberal and conservative political ideologies in the United States and offer views on how active a role the government should take. They should express a thesis statement about the extent to which the government should take an active role in the marketplace and society. They should also describe each ideology's views on the proper role of government in market regulation and addressing social issues. Students' arguments should be supported with evidence from historical events and foundational documents. [CR 3 (Big Idea: Competing Policy-Making Interests; Enduring Understanding: PMI-4), CR 7 and CR 9]

Required reading: *Government in America*, Chapter 1, pp. 16–19; Chapter 6, pp. 164–169, 171–178, 180–183, and 188–189; Chapter 7, pp. 193–215; Chapter 8, pp. 219–225 and 230–237; Chapter 11, pp. 332–335; and Chapter 16, pp. 481–501

Unit 7: Political Participation

In this unit, students will do the following:

- Analyze the linkage institutions that facilitate citizens' participation in government, including the media, political parties, interest groups, and social movements.
- Analyze the factors that facilitate and deter voter participation in elections.
- Analyze the election process, including campaign organizations, finance, and strategies.
- Evaluate the positive and negative impacts of modern campaigns on the election process.

Sample activities in this unit:

- Students will consider the factors that influence political participation, including the media, structural barriers, and demographics. First, students will write a short essay from the perspective of an American citizen who chooses not to vote. If time allows, students will write a second essay refuting the points made in the first essay. Then, students will examine a table showing voter turnout by various groups (source: data from the 2012 and 2014 U.S. Census Bureau surveys) and explain how demographics influence political participation. [CR 3 [Big Ideas: Methods of Political Analysis and Civic Participation in a Representative Democracy; Enduring Understandings: MPA-3 and PRD-3] and CR 6]

- Students will examine how linkage institutions provide opportunities for participation and influence how people relate to government and policy-makers. Students will write a paragraph to explain how political parties, interest groups, elections, and the media function as linkage institutions. Then, students will write another paragraph to present other organizations that could serve as linkage institutions and what would have to happen for them to be effective as such. [CR 3 (Big Idea: Competing Policy-Making Interests; Enduring Understanding: PMI-5)]
- Students will examine federal policies on campaigning and donation rules. First, students will assess how President Obama raised campaign money and write a paragraph about whether it was ethical, considering the debates about campaign finance. Then, students will write several paragraphs to summarize the funds that candidates can receive from various sources and take a position on the ideal campaign finance laws, justifying their position with evidence. [CR 3 (Big Idea: Civic Participation in a Representative Democracy; Enduring Understanding: PRD-2)]
- Students will participate in a discussion about the winner-take-all system under the Electoral College versus the popular vote for electing the president. In this discussion, students will articulate an opinion about whether the Electoral College is the best process for national elections. [CR 3 (Big Idea: Civic Participation in a Representative Democracy; Enduring Understanding: PRD-2)]

Required reading: *Government in America*, Chapter 1, pp. 9–12; Chapter 2, pp. 26–40 and 45–53; Chapter 6, pp. 173 and 182–188; Chapter 7, pp. 201–212; Chapter 8, pp. 220, and 223–225; Chapter 9, pp. 244, 253–260, 263–274, and 276–279; and Chapter 10, pp. 298–299.

Supreme Court Cases: Students will read an excerpt from the majority opinion in *Citizens United v. Federal Election Commission* (2010) and answer analysis questions about this court case. [CR 2]

Unit 8: Review and Full-Length Practice Exam

In this unit, students will do the following:

- Review the entire course, using the results of the mid-semester check and unit tests to focus this review.
- Complete a full-length practice exam in the style of the AP United States Government and Politics exam, over the course of three days.

Unit 9: Semester Project

In the project unit, students will select a recently passed law addressing an issue of interest to them. They will map the law-making process from its creation as a bill to its passage by Congress, including any obstacles along the way. This project will culminate in a presentation of the students' finding. [CR 1, CR 4, CR 5, and CR 10]

Unit 10: Semester Exam

In this unit, students will do the following:

- Review all topics covered this semester.
- Demonstrate knowledge by completing a graded semester exam written in the style of the AP United States Government and Politics exam.

AP United States History

AP United States History Syllabus

Curricular Requirements	See pages:
CR1 The teacher and students have access to a college-level U.S. history textbook, diverse primary sources, and multiple secondary sources written by historians or scholars interpreting the past.	4, 7–10, 12–14, 17–19, 21–23
CR2 The course provides opportunities to develop student understanding of the required content outlined in each of the units described in the course and exam description.	4, 7–14, 17–20, 22, 23
CR3 The course provides opportunities to develop student understanding of the course themes.	4, 7–14, 17–20, 22, 23
CR4 The course provides opportunities for students to develop the Historical Thinking Skill 1: Developments and Processes.	6–14, 16–24
CR5 The course provides opportunities for students to develop the Historical Thinking Skill 2: Sourcing and Situation.	7, 10
CR6 The course provides opportunities for students to develop the Historical Thinking Skill 3: Claims and Evidence in Sources.	7, 10, 14
CR7 The course provides opportunities for students to develop the Historical Thinking Skill 4: Contextualization.	9, 11, 16, 18
CR8 The course provides opportunities for students to develop the Historical Thinking Skill 5: Making connections through the application of the three historical reasoning processes (comparison, causation, continuity and change)	8, 9, 12-14, 18, 20-23
CR9 The course provides opportunities for students to develop the Historical Thinking Skill 6: Argumentation	9, 22

Theme	Page Location(s)
--------------	-------------------------

Theme 1: American and National Identity (NAT)	9–11, 16, 18–20, 22
Theme 2: Politics and Power (POL)	9, 12–14, 17–20, 22
Theme 3: Work, Exchange, and Technology (WXT)	7–8, 11, 16, 19, 23
Theme 4: American and Regional Culture (ARC)	7, 9, 11, 13, 16
Theme 5: Migration and Settlement (MIG)	11, 12, 19
Theme 6: Geography and the Environment (GEO)	6, 12, 23
Theme 7: America and the World (WOR)	7, 8, 18, 20, 21
Theme 8: Social Structures (SOC)	6, 11, 13, 16

Course Summary

The AP[®] U.S. History course will provide high school students with college-level instruction in using disciplinary practices and historical reasoning to examine the history of the United States from pre-colonial time to the present. They will look critically at how the American identity has developed over the course of American history and how it has been informed by the changing nature of American culture and societal structures and norms. Students will recognize and interpret patterns of migration and settlement—both to and within the United States—and how those patterns impacted and were impacted by aspects of regional geography and environment. Students will also consider political and economic patterns and relationships in American history, both within the nation and with the global community at large.

Through their study of each of these areas, students will hone their reasoning skills to contextualize patterns and events, identify causation and continuity, and analyze change over time. The course is presented chronologically with content divided into nine time periods. In each unit, activities address the seven themes. This course will effectively prepare students for the AP exam by providing practice in the skills necessary to analyze primary and secondary sources, construct evidence-based arguments, and draw reasoned conclusions in both multiple choice and constructed response formats.

Course Units [CR 2, CR 3]

<p>Semester A</p> <ul style="list-style-type: none"> • Unit 1: Course Overview • Unit 2: Europe, the Americas, and Africa, Before 1492 • Unit 3: Settling North America, 1607–1754 • Unit 4: The American Revolution, 1754–1783 • Unit 5: Building a Nation, 1783–1800 • Unit 6: Mid-Semester Check • Unit 7: Manifest Destiny, 1801–1853 • Unit 8: Jacksonian Democracy, 1824–1854 • Unit 9: The Civil War, 1850–1877 • Unit 10: Semester Exam 	<p>Semester B</p> <ul style="list-style-type: none"> • Unit 1: Course Overview • Unit 2: The Gilded Age, 1866–1914 • Unit 3: The Progressive Movement, 1879–1919 • Unit 4: World War I, 1914–1918 • Unit 5: The Great Depression, 1919–1939 • Unit 6: Mid-Semester Check • Unit 7: World War II, 1939–1945 • Unit 8: Prosperity and Change, 1945–1989 • Unit 9: A New World Order, 1989–The Present • Unit 10: Review and Full-Length Practice Exam • Unit 11: Semester Project • Unit 12: Semester Exam
--	---

Resource Requirements

Fraser, James W. *By the People: A History of the United States*. AP ed., Pearson Education, Inc., 2018. [CR 1]

Writing Assignments

In each lesson, students respond to questions about their textbook readings and other resources in a notebook. Students also complete longer portfolio writing assignments that require them to synthesize lesson content from across lessons and resources to analyze certain exam topics in-depth.

Assessments

Throughout the course, a variety of formative and summative assessments are used to assess student learning and prepare students for the expectations of the AP United States History exam. Students are provided with ample opportunity for skill practice, engagement in meaningful discourse with their peers, and application of their understanding via tasks that are representative of real-world scenarios. Summative assessment types lend themselves to a deeper level of rigor and include portfolios and discussions. Formative assessments are designed to be auto-graded to give students and teachers instant feedback for targeted instruction.

Most lessons contain a quick check assessment that covers the objectives in the lesson, and most units have at least one cumulative quiz that also assesses lesson objectives. Each instructional unit culminates in an online practice to help students review unit concepts and skills, followed by a unit test that consists of multiple choice and short answer and/or essay questions. To aid students in retaining content throughout the course of a semester, a mid-semester check unit appears in the middle of each semester, featuring a low-risk practice assessment covering the objectives learned up to that point during the semester.

A graded full-length practice exam in the style of the AP United States History exam is given at the end of Semester B. Each semester ends with a semester exam.

Most units feature a discussion or portfolio that promotes critical thinking by expanding on topics students have learned. Each semester ends with a semester project and a semester exam. Graded assessments and participation all count toward the student's final grade.

Course Outline

Semester A

Unit 1: Course Overview

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Ensure they have the required materials for the course.
- Learn about the types of activities that will appear in the course.

Unit 2: Europe, the Americas, and Africa, Before 1492

In this unit, students will do the following:

- Analyze how native populations of North America developed distinct cultures by adapting to their environment.
- Assess the changes caused by contact among Native Americans, Europeans, and Africans through the Columbian Exchange.

Sample activities in this unit:

- Students will analyze the interaction, competition, and conflict among Native American groups. In response to a series of prompts, students will provide short written explanations of the conflicts among tribes in the Mississippi Valley, the relationship between the Aztecs and nearby tribes, and trade patterns of the Maya based on the natural resources in their regions. [CR 4: Theme 6 (GEO-1.0)]
- Students will analyze the relationship between culture and the environment for different Native American groups across regions and periods. In a short essay, students will describe a Native American culture, including how the culture adapted to its environment, its cultural characteristics, and how the culture is different than some of the others at the time. Students will gather information about this culture from the textbook and by conducting research.(Skill 5) [CR 4: Theme 8 (SOC-4.0)]
- Students will analyze the patterns of exchange that developed in the world as a result of the Columbian Exchange. In response to a prompt, students will select two of four primary sources and write a paragraph for each source that explains how it shows the lasting impact of the European exploration and the Columbian Exchange on the Americas. Students will synthesize

information from the lessons, textbook readings, and primary sources to support their explanations. Students will also analyze the involvement of governments regarding this issue. [CR 4: Theme 3 (WXT-2.0) and Theme 7 (WOR-1.0)]

Required reading: *By the People*, Chapter 1: The World Before 1492 and Chapter 2: First Encounters, First Conquests, 1492–1607 [CR 2]

Potential readings and images: Excerpt from *The Decameron* by Giovanni Boccaccio; "The Renaissance as Historical Period" from Scholastic GO! Grolier Online™; image of Viking long ships; image of *Niña*, *Pinta*, and *Santa María*; excerpt from *The Letters of Columbus to Ferdinand and Isabella*; excerpts from Hernán Cortés's letter to the king of Spain; painting of Pocahontas and John Smith; images and primary source text from "An Ongoing Voyage: What Became of 'America'" and "1492: An Ongoing Voyage" exhibitions from Library of Congress [CR 1, CR 5, CR 6]

Unit 3: Settling North America, 1607–1754

In this unit, students will do the following:

- Evaluate the European motivations for settling North America.
- Analyze the effects of European settlement, including competition for resources and conflict.
- Examine the political, social, cultural, and economic connections between the British colonies and Great Britain.

Sample activities in this unit:

- Students will examine the role of religion in the development of colonial North America. Students will analyze "A Model of Christian Charity" from John Winthrop. In one or two paragraphs, students will explain the purpose of this sermon, describe the author's point of view on the qualities he encourages, summarize the meaning of the sermon, and explain its historical significance. (Skill 4) [CR 4: Theme 4 (ARC-1.0) and CR 5]
- Students will analyze the economy and culture of colonial North America. In response to a prompt, students will write a two- to three-paragraph Time Traveler's Tourist Guide to colonial New France, describing its economic activities, and demographic and cultural characteristics. Then, as an extension to this activity, students will take on the perspective of a French explorer, trader, or colonist and write a letter in which they explain this person's motivations, goals, and challenges. In this letter, students should

also compare and contrast French colonization with colonization by other European powers. [CR 4: Theme 5 (MIG-1.0), and CR 8]

- Students will explain how different labor systems developed in the North American colonies and their effects on workers' lives. In response to a series of questions, students will write several paragraphs to explain how the European slave trade developed, the impact of indentured servitude on these people's lives, how slavery manifested in the northern colonies, the changes in the demographics of labor in Virginia, and what life was like for slaves in the colonies. Students will conduct research using primary and secondary sources about mercantilism, and James Oglethorpe's settlement of Georgia and write a two to three paragraph-long report citing primary and secondary sources (Skill 2) [CR 4: Theme 3 (WXT-1.0)]
- Students will explain how conflict between peoples influenced political developments in North America. In response to prompts, students will write one or two paragraphs to explain the causes and effects of ongoing wars between Britain and France and violence between Native Americans and colonists. [CR 4 Theme 7 (WOR-1.0)]
- Students will identify and explain historical developments and processes related to the formation of the United States by evaluating primary sources from Benjamin Franklin as well as the Albany Plan. Students will explain how these documents reflect a changing attitude in the British North American colonies toward self-governance and independence. (Skill 1) [CR 1: Theme 6 (WOR-1.0)]

Required reading: *By the People*, Chapter 3: Settlements, Alliances, and Resistances, 1607–1718 and Chapter 4: Creating the Culture of British North America, 1689–1754 [CR 2]

Potential readings and images: Excerpt from primary source text by Sir Robert Montgomery; excerpt from John Winthrop's "A Model of Christian Charity"; table of England's American and Island Colonies; painting of Elizabeth I; quote from Sir William Herbert; quote from French Jesuit missionary; quote from Huron Indian to Jesuit missionary Jean de Brébeuf; map of Gulf Coast; letter from Governor of New Mexico; excerpt from a letter by John Rolfe; Olaudah Equiano's "The Middle Passage"; "Religion and the Founding of the American Republic: Religion in Eighteenth-Century America" article and images from the Library of Congress; excerpt from John Locke's *The Second Treatise of Government*; excerpt from a letter to New England Minister John Cotton; quote from Andrew Hamilton during the trial of John Peter Zenger; "A Brief History of the Salem Witch Trials" article; "Crown v. John Peter Zenger" article; map of British colonies; letter from Benjamin Franklin to James Parker; Albany Plan of Union with table [CR 1: Textual, Visual, Maps, and Quantitative]

Unit 4: The American Revolution, 1754–1783

In this unit, students will do the following:

- Assess the impact of the French and Indian War on British policies.
- Examine the colonial responses to specific British policies.
- Apply the concepts in the Declaration of Independence to specific historical events and trends.
- Evaluate the outcomes of the American Revolution.

Sample activities in this unit:

- Students will analyze the causes, events, and effects of Pontiac's Rebellion. Students will read three primary source documents: an excerpt from a speech by Pontiac, an excerpt from a letter by George Washington, and an excerpt from the journal of William Trent. For each source document, students will write a paragraph analyzing the author's purpose, point of view, audience, and historical situation. Students will provide supporting details. Then, students will write several paragraphs to explain how these primary source documents help summarize the causes, events, and effects of Pontiac's Rebellion as well as how Native Americans and colonial British leaders viewed each other. (Skill 2) [CR 4: Theme 1 (NAT-4.0) and Theme 4 (ARC-4.0) and CR 8]
- Students will analyze the desire of many colonists to assert ideals of self- government in the face of renewed British imperial efforts. In a portfolio writing assignment, students will study acts of Parliament and then write an essay in which they develop and defend an argument that includes a thesis statement about whether the colonists were justified in breaking the law when protesting against British policies. Students will synthesize evidence from the entire unit and support their position or claim with historical sources. [CR 4: Theme 2 (POL-1.0), CR 7, and CR 9]
- Students will read an excerpt from Jonathan Mayhew's "A Discourse Concerning Unlimited Submission" and analyze his argument in favor of American independence. (Skill 3) [CR 6: Theme 1 (WOR-1.0)]

Required reading: *By the People*, Chapter 5: The Making of a Revolution, 1754– 1783 [CR 2]

Potential Readings: Excerpt from Archibald Hinshelwood, 1765; excerpt from resolutions on the Stamp Act, Massachusetts Assembly; excerpt from *Common Sense*; excerpt from Abigail Adams, letter to John Adams; excerpt from Washington's Circular Letter of Farewell to the Army; quote from Minavavana to Alexander Henry; quote from Archibald Hinshelwood [CR 1: Textual]

Unit 5: Building a Nation, 1783–1800

In this unit, students will do the following:

- Assess the impact of the American Revolution on society.
- Evaluate the experiments in government that resulted from the American Revolution
- Compare the structure of government under the Articles of Confederation versus the U.S. Constitution.

Sample activities in this unit:

- Students will explain the debates and controversies after the Constitutional Convention. In response to a prompt, students will read historical newspaper editorials in favor of and opposed to the ratification of the Constitution, analyzing the arguments used. Then, students will write their own editorial, focusing on a specific part of the Constitution, and express an opinion about whether to ratify the Constitution or not. [CR 4: Theme 1 (NAT-2.0)]
- Students will explain the arguments presented during the debate over the ratification of the Constitution. In a discussion, students will analyze the Federalist paper No. 84 and the Antifederalist essay “Brutus II” and discuss the significance of the author’s point of view, the author’s purpose, the audience, and the historical context of both documents. In response to the discussion questions, students will explain each author’s interpretation of the Constitution without a Bill of Rights. [CR 4: Theme 1 (NAT-2.0) and CR 5]
- Students will explain how the political party system developed in the early United States. Over the course of a lesson, students will respond to several prompts and write several paragraphs to explain why political parties developed. Then, students will create three political posters for the election of 1800—one for each of the major candidates—to highlight the political beliefs of each candidate as well as the candidate’s primary critiques of his opponents. [CR 4 (POL-1.0)]

Required reading: *By the People*, Chapter 6: Creating a Nation, 1783–1789, and Chapter 7: Practicing Democracy, 1789–1800 [CR 2]

Potential images: Engraving of Shays's Rebellion; chart of strengths, weaknesses, and impacts of the Articles of Confederation; images of tributes to George Washington [CR 1: Visual]

Unit 6: Mid-Semester Check

In this unit, students will do the following:

- Demonstrate knowledge that they have learned from the beginning of the course by completing a graded mid-semester check in the style of the AP United States History exam.

Unit 7: Manifest Destiny, 1801–1853

In this unit, students will do the following:

- Examine the emerging culture of the United States after the revolution.
- Assess the changes in the U.S. economy resulting from technological and commercial innovations.
- Evaluate the effects of expanding the land area of the United States based on Manifest Destiny.

Sample activities in this unit:

- Students will analyze the impact of religion on American politics, society, and culture by determining the extent to which religion and religious freedom were part of the national identity. In responses to a series of prompts, students will study the First Amendment as well as primary source documents and images and write several paragraphs to explain how religion united and divided Americans as well as the influence of federalism and republicanism on debates about religion. [CR 4: Theme 1 (NAT-1.0) and Theme 4 (ARC-1.0)]
- Students will analyze historical perspectives on Indian removal. Students will study three primary source documents expressing perspectives on Indian removal. By responding to prompts, students will write several paragraphs in which they analyze Jackson's point of view as president to understand his policy, how opponents responded to his perspective, and how the gender of the authors who wrote the opposing petitions affected their reception and place in society. [CR 4: Theme 4 (ARC-3.0) and CR 7]
- Students will analyze how scientific ideas and technological innovations developed and shaped society, institutions, and economic development. In responses to a series of questions about readings and videos, students will write several paragraphs to explain how the Industrial Revolution began, how the cotton gin impacted the institution of slavery, how water-powered textile mills shaped New England, and how transportation improvements impacted industrialization. [CR 4: Theme 8 (SOC-2.0) and Theme 3 (WXT-3.0)]
- Students will explain how migration affected American life. In response to a prompt, students will write a paragraph to describe the impact of increased settlement in Oregon on the people who lived there. [CR 4: Theme 5 (MIG-2.0)]
- Students will assess the ideology of Manifest Destiny over the course of the nineteenth century. In responses to a series of questions, students will write several paragraphs to explain the most significant components of this

ideology, how certain policies were justified based on it, and its most consequential outcomes. [CR 4: Theme 2 (POL-1.0) and CR 8]

- Students evaluate the motivations behind Manifest Destiny and evaluate the strengths and weaknesses of this ideal. In a discussion, students will analyze an excerpt from F. Jackson Turner's "The Frontier in American History" to determine its context and purpose. Then, students will explain Turner's thesis and why internal migration and patterns of settlement were causing the frontier to disappear. [CR 4: Theme 5 (MIG-2.0) and Theme 6 (GEO-1.0)]

Required reading: *By the People*, Chapter 8: Creating a New People, Expanding the Country, 1801–1823; Chapter 9: New Industries, New Politics, 1815–1828; and Chapter 11: Manifest Destiny: Expanding the Nation, 1830–1853 [CR 2]

Potential readings and images: Excerpts from Bill of Rights; timeline of significant dates; map of Louisiana Purchase; excerpt from Monroe Doctrine; advertisement for Blandy's portable steam engine and saw mills; quote from Black Hawk; quote from John O'Sullivan [CR 1: Textual, Visual, Maps, and Quantitative]

Unit 8: Jacksonian Democracy, 1824–1854

In this unit, students will do the following:

- Assess the effects of Jackson's presidency on the U.S. economy and politics.
- Evaluate how immigration, the debate over slavery, and the growth of the women's rights movement influenced the lives of Americans.
- Examine changes brought by the struggle to expand rights and citizenship to those in the United States.

Sample activities in this unit:

- Students will assess the effects of Jackson's presidency on the U.S. economy and politics. In response to a series of prompts, students will analyze the extent to which President Jackson represented the nation's interests as president. Then, students will analyze primary source excerpts from
- President Jackson, Henry Clay, and *McCulloch v. Maryland* and write a paragraph to determine whether the message of these excerpts contradicts, supports, or enhances the perspectives discussed in the lesson materials so far. Finally, students will examine a secondary source video and write a paragraph to explain why scholars think that Jackson's presidency represented the beginning of modern American democracy. [CR 4: Theme 2 (POL-1.0) and CR 8]

- Students will explain how artistic and philosophical ideas shaped politics. After reading about transcendentalism and excerpt from Emerson, students will respond to a prompt and write a paragraph to explain why Henry David Thoreau and Andrew Jackson would have agreed or disagreed about certain ideas. [CR 4: Theme 4 (ARC-2.0)]
- Students will analyze race and gender in American society during this time. In response to a prompt, students will read and analyze Sojourner Truth's speech "Ain't I a Woman?" and write several paragraphs to explain what it expresses about the role of women and race in American society. [CR 4: Theme 4 (ARC-3.0)]
- Students will compare the abolition movement that developed in the mid-1800s to earlier movements. In response to a series of prompts, students will write several paragraphs to explain how and why earlier movements influenced the growth of the abolition movement. [CR 4: Theme 2 (POL-2.0) and CR 8]
- Students will analyze similarities and differences between religious groups and spiritual movements across regions and periods. (Skill 5) [CR 4: Theme 8 (SOC-1.0)]

Required reading: *By the People*, Chapter 10: Democracy in the Age of Jackson, 1828–1844 and Chapter 12: Living in a Nation of Changing Lands, Changing Faces, Changing Expectations, 1831–1854 [CR 2]

Potential readings and images: quote from Margaret Smith about inauguration of Jackson; posters from Jackson's presidential campaign; excerpt from President Jackson's veto message regarding the Bank of the United States; excerpt from Henry Clay's speech "In Defense of the American System"; excerpt from *McCulloch v. Maryland*; map of Indian removal; excerpt from Madison's letter against nullification; excerpt from Horace Mann's *The Necessity of Education in a Republican Government*; excerpt from Declaration of Sentiments; Sojourner Truth's speech "Ain't I a Woman?"; map showing expanding slavery; selected lyrics from "Follow the Drinking Gourd" song [CR 1: Textual, Visual, and Maps]

Unit 9: The Civil War, 1850–1877

In this unit, students will do the following:

- Evaluate why the growing split between the North and the South led to secession and civil war.
- Assess the strategies used during the Civil War.
- Examine the impact of the war on American society, politics, and the economy.
- Evaluate the successes and failures of the Reconstruction era.

Sample activities in this unit:

- Students will evaluate the Reconstruction era using secondary sources. In a short essay, students will explore, compare, and critically analyze two historical interpretations of the Reconstruction era: Joseph Grégoire de Roulhac Hamilton's *Reconstruction in North Carolina* (New York: Columbia University, 1914) and Eric Foner's "Freedom's Dream Deferred" published in *American History*, vol. 50, no. 5 (Virginia: Historynet, 2015). [CR 1, CR 4: Theme 2 (POL-3.0), and CR 6]
- Students will evaluate the impact the policies after Reconstruction. In a portfolio writing assignment, students will read and analyze excerpts from early black codes as well as newspaper editorials that are critical of these codes. Then, students will write an essay in which they describe the causes and reasons for black codes, explain the effects on African Americans, and determine the extent to which black codes were another form of slavery. [CR 4: Theme 2 (POL-1.0), and CR 8]

Required reading: *By the People*, Chapter 13: The Politics of Separation, 1850– 1861; Chapter 14: And the War Came: The Civil War, 1861–1865; and Chapter 15: Reconstruction, 1865–1877 [CR 2]

Potential readings and images: Excerpt from the *Charleston Mercury*; poster of reward for fugitive slaves; selected lyrics from "John Brown" song; engraving of John Brown; primary source newspaper articles about Kansas-Nebraska Act; map reflecting the Compromise of 1850 and the Kansas-Nebraska Act; fragment of speech by Lincoln about Dred Scott case; excerpt from Lincoln-Douglas debate; map showing results of the election of 1860; excerpt from South Carolina Ordinance of Secession; map of major Civil War battles, 1861–1862; Constitution of the United States; Constitution for the Provisional Government of the Confederate States of America; paintings of Civil War soldiers; image of Scott's Great Snake; bar graphs comparing industrial workers, factories, and railroad tracks in Union vs. Confederacy; Gettysburg Address; map of major Civil War battles, 1863–1865; Thirteenth Amendment; letter from General Sherman to Lincoln; excerpt from Robert E. Lee's Farewell Address; image of "The First Vote"; excerpts from black codes; selected articles from *Chicago Tribune* [CR 1: Textual, Visual, Maps, and Quantitative]

Unit 10: Semester Exam

In this unit, students will do the following:

- Review all topics covered this semester.
- Demonstrate knowledge by completing a graded semester exam written in the style of the AP United States History exam.

Semester B

Unit 1: Course Overview

In this unit, students will do the following:

- Acquaint themselves with the goals and expectations of the course.
- Ensure they have the required materials for the course.
- Learn about the types of activities that will appear in the course.

Unit 2: The Gilded Age, 1866–1914

In this unit, students will do the following:

- Determine the factors that spurred the growth of industrial capitalism in the United States.
- Analyze the social and cultural impact of the migrations caused by industrialization on both urban and rural areas.
- Assess the cultural, intellectual, economic, and political movements that emerged from and in response to the Gilded Age.

Sample activities in this unit:

- Students will analyze Andrew Carnegie's perspective on industrial capitalism. In a discussion, students will read Carnegie's essay on wealth. In response to discussion questions, students will examine how it addressed the economic and social challenges of its time, describe the tradeoffs in U.S. values implied by the choices that he outlined, and frame Carnegie's argument in the context of a nation at a crossroads with the Industrial Revolution and widening class divisions. Students will also discuss the meaning of Carnegie's Gospel of Wealth and explain its historical significance, using evidence from the document to support their ideas. [CR 4: Theme 3 (WXT-1.0) and CR 7]
- Students will describe how African Americans viewed their role in the U.S. economy and society after Reconstruction. Students will read and analyze excerpts from W.E.B. Du Bois and Booker T. Washington and write a short essay in which they describe these authors' purpose and point of view on how African Americans will be successful in the New South. (CR 4: Theme 1 (NAT-4.0) and Theme 8 (SOC-2.0))
- Students will write a paragraph in which they analyze the ways in which the poem "The New Colossus" by Emma Lazarus reflects the spirit of the Gilded Age. (Skill 4) [CR 4: Theme 4 (ARC-1.0)]

Required reading: *By the People*, Chapter 16: Conflict in the West, 1865–1912; Chapter 17: The Gilded Age: Building a Technological and Industrial Giant and a

New Social Order, 1876–1913; and Chapter 18: Responses to Industrialism, Responses to Change, 1877–1914 [CR 2]

Potential readings and images: Painting of "American Progress"; Red Cloud's speech after Wounded Knee; transcript of Dawes Act; "Home on the Range" audio and lyrics; images of cowboys and frontier towns; excerpt from Mark Twain's *The Gilded Age*; "The Great Presidential Puzzle" political cartoon; photographs of Ellis Island;

"The New Colossus" by Emma Lazarus; images of immigrants; "The Anti-Chinese Wall" political cartoon; "The Great Department Store on Earth" political cartoon; excerpt from Henry Grady's "The New South"; excerpt from Ida B. Wells' *The Red Record*; excerpt from W.E.B. Du Bois's *The Talented Tenth*; excerpt from Booker T. Washington's "Cast Down Your Buckets Where You Are" speech; excerpt from "Wealth" by Andrew Carnegie; IWW recruitment poster; portrait of a granger [SC 1b: Textual and Visual]

Unit 3: The Progressive Movement, 1879–1919

In this unit, students will do the following:

- Evaluate Progressive efforts to address the social and economic problems created by rapid growth.
- Explain the methods used by Progressives to address political corruption and to enact other political reforms.
- Compare the social and political efforts of Progressives on both the national and local level.

Sample activity in this unit:

- Students will evaluate the social and economy problems during this time and explain the methods used by Progressives to address these problems. Students will choose a problem, examine primary sources related to that problem, and write a muckraking article in the style and tone of similar articles from Progressive journalists. [CR 4: Theme 2 (POL-2.0)]

Required reading: *By the People*, Chapter 19: Progressive Movements, Progressive Politics, 1879–1917 [CR 2]

Potential readings and images: Excerpt from Louis Brandeis; excerpt from *The Jungle* by Upton Sinclair; "On Riding a Bicycle" by Frances E. Willard; "The Siren Song of Partisanship" political cartoon; "On to Washington!" campaign poster; "How the Other Half Lives" by Jacob A. Riis; map of Prohibition in the States; map of major national parks; map and table showing results of election of 1912 [CR 1: Textual, Visual, Maps, and Quantitative]

Unit 4: World War I, 1914–1918

In this unit, students will do the following:

- Evaluate the various viewpoints about the role of the United States in the world and the best way to achieve national security before, during, and after World War I.
- Analyze how World War I transformed American society.

Sample activities in this unit:

- Students will evaluate the shifting foreign policy goals and national ideals of the United States before and after World War I. In a portfolio writing assignment, students will analyze excerpts from Presidents Wilson's "Joint Address to Congress Leading to a Declaration of War Against Germany," "Henry Cabot Lodge: Reservations with Regard to the Treaty," "An excerpt from the Senate Debate on the League of Nations," and "Wilson's Final Address in Support of the League of Nations." Students will write an essay that examines the arguments in primary sources for and against the League of Nations and compare them with the arguments for and against U.S. involvement in World War I. Students will make a claim supported by historical sources. [CR 4: Theme 1 (NAT-3.0) and Theme 7 (WOR-2.0), and CR 8]
- Students will evaluate social responses to U.S. involvement in World War I. Students will read an interview with a conscientious objector during World War I and write a short essay explaining this person's reasons for refusing to fight in the war. [CR 4: Theme 1 (NAT-3.0) and Theme 2 (POL-2.0)]

Required reading: *By the People*, Chapter 20: Foreign Policy and War in a Progressive Era, 1890–1919 [CR 2]

Potential readings and images: "Westward the Course of Empire Takes Its Way" painting; photographs and paintings of Hawaiian royalty; newspaper accounts of the Alaska Purchase; map of the United States in the world, 1900; "Then and Now" political cartoon; quote from Mark Twain; "A Thing Well Begun Is Half Done" political cartoon; quote from President Taft; "The Tug of War in the Far East" political cartoon; excerpt from President Theodore Roosevelt's Third Annual Message to Congress; map of U.S. intervention in the Caribbean and Latin America; excerpt from President Woodrow Wilson's 1914 Message to Congress; "Watch Your Step" political cartoon; photographs from World War I; map of Europe and the Middle East before and during World War I; excerpt from President Woodrow Wilson's 1917 Inaugural Address; wartime posters; map of Europe in 1919 [CR 1: Textual, Visual, and Maps]

Unit 5: The Great Depression, 1919–1939

In this unit, students will do the following:

- Evaluate the increasing influence of popular culture and consumerism on U.S. society.
- Compare and contrast the growing social trends of fundamentalism and modernism in the 1920s.
- Compare the social and political efforts of Progressives on both the national and local level.
- Analyze the causes of the Great Depression.
- Assess the short-term and long-term consequences of the Great Depression and the New Deal.

Sample activities in this unit:

- Students will analyze national identity in regards to citizenship through the lens of the Progressives and immigration policies. Students will analyze "Our Ideal Citizen" by Sinclair Lewis and the Quota Act of 1924. Using these documents, students will respond to prompts in order to explain who an ideal citizen is based on the text, why this description is important to understanding the national identity, who the ideal immigrant is, and what this suggests about American values during this time. [CR 4: Theme 1 (NAT-4.0) and Theme 5 (MIG-1.0)]
- Students will evaluate the different approaches to addressing the Great Depression through New Deal legislation. Students will use a graphic organizer to categorize various legislation by relief, recovery, and reform to show ways in which the government responded to economic issues. Then, students will describe the problem each piece of legislation was intended to address and the opposition to the legislation. [CR 4: Theme 2 (POL-3.0) and Theme 3 (WXT-2.0)]

Required reading: *By the People*, Chapter 21: A Unique, Prosperous, and Discontented Time, 1919–1929 and Chapter 22: Living in Hard Times, 1929–1939 [CR 2]

Potential readings and images: Photograph of IWW meeting; political cartoon about IWW; photograph of KKK parade; "Our Ideal Citizen" by Sinclair Lewis; Quota Act of 1924; map of people moving in the 1920s; maps comparing Harlem in 1911 and 1930; "Share Our Wealth" by Huey Long; table of major New Deal laws and agencies; map of the Dust Bowl [CR 1: Textual, Visual, Maps, and Quantitative]

Unit 6: Mid-Semester Check

In this unit, students will do the following:

- Review the topics that they have learned from the beginning of this semester.
- Demonstrate knowledge by completing a graded mid-semester check in the style of the AP United States History exam.

Unit 7: World War II, 1939–1945

In this unit, students will do the following:

- Examine the course of World War II, including military tactics, mobilization of the U.S. economy and society, and the war's impact on diverse American lives.
- Determine how World War II transformed American society.
- Analyze how the U.S. role in the Allied victory ushered in a new era of American global, political, and military leadership.

Sample activities in this unit:

- Students will compare the peace movements during World War I and II. Students will conduct research on these peace movements and write a comparative essay in which they analyze the similarities and differences in terms of the movements' historical contexts, what the similarities suggest about each movement, their goals, and how consistent their goals were with each context. [CR 4: Theme 2 (POL-2.0) and CR 8]
