- Students will evaluate American leadership in global politics after World War II. In a discussion, students will read an excerpt from President Eisenhower's "military-industrial complex" speech and discuss the dangers he warned against and how these dangers were a result of World War II. Then, students will take a position on whether his concerns were valid, using evidence to support their opinion. [CR 4: Theme 1 (NAT-3.0) and Theme 7 (WOR-2.0) and CR 8]

Required reading: *By the People*, Chapter 23: Living in a World at War, 1939–1945 [CR 2]

Potential readings and images: 1932 campaign poster for Hitler; Lend-Lease Act; - photographs of Nazi leaders and soldiers; map of Nazi Europe, 1941; hand-drawn map of Japanese Empire in 1933; graph of U.S. unemployment rate and GNP from 1940–1945; map of Japanese power in the Pacific; map of internment camps; map

of the War in Europe and North Africa; map of the War in the Pacific; wartime posters; transcript of Joint Address to Congress Leading to a Declaration of War Against Japan; photographs of Allied soldiers; photographs of wartime efforts on the home front [CR 1: Textual, Visual, Maps, and Quantitative]

Unit 8: Prosperity and Change, 1945–1989

In this unit, students will do the following:

- Examine how the United States established and maintained its leadership position in global politics.
- Assess the impact of post-war prosperity and a desire for normalcy in society, politics, and culture.
- Analyze the debates over the power of the federal government and the appropriate means of achieving political goals both internationally and domestically.
- Evaluate the successes of the civil rights movement in meeting its political and legal goals as well as the subsequent cultural and political responses to the movement.

Sample activities in this unit:

- Students will analyze life in post-war United States. In an activity, students will identify historical patterns of continuity and change and determine the causes and effects of these changes by writing a short essay. (Skill 5) [CR 8]
- Students will analyze the reasons for and results of U.S. diplomatic, economic, and military initiatives overseas. Students will make two cause- and-effect chains for the Korean and Vietnam Wars. Then, students will write a short essay to compare and contrast these two wars and to explain why U.S. intervention in East Asia escalated in ways that interventions in Latin America did not. [CR 4: Theme 7 (WOR-2.0), and CR 8]
- Students will compare and contrast various perspectives on the role of the federal government in American lives, analyzing cause and effects. In response to a series of prompts, students will read excerpts from speeches by Presidents Eisenhower, Kennedy, and Johnson. Students will write a short essay in which they consider the cause and effects of the Cold War and contrast the tone and ideas of the latter two presidents with Eisenhower in order to determine how these differences have affected political debates and policies. (Skill 5) [CR 4: Theme 2 (POL-3.0) and CR 8]
- Students will analyze the arguments for and against segregation. In a portfolio writing assignment, students will study a series of primary sources,

including excerpts from *Harry Brigs v. Elliot*, *Davis v. Country School Board*, and *Brown v. Board*. Then, students will write an argumentative essay that includes a thesis statement about the legal arguments used on both sides, using evidence from the excerpts to support their thesis. [CR 4: Theme 1 (NAT-1.0), CR 8, and CR 9]

Required reading: *By the People*, Chapter 24: *The World the War Created, 1945– 1952*; Chapter 25: *Complacency and Change, 1952–1965*; Chapter 26: *Lives Changed, 1961–1968*; Chapter 27: *Rights, Reaction, and Limits, 1968–1980*; and Chapter 28: *The Reagan Revolution, 1980–1989* [CR 2]

Potential readings and images: photograph of returning U.S. soldiers; photograph of Levittown; excerpt from President Truman's Inaugural Address; bar graph showing number of births for the United States from 1929–1980; map of "Americans on the Move"; line graph showing share of African American population living in southern United States from 1910–1970; map of "A Divided Germany"; map of "A Divided Europe"; excerpt from Truman Doctrine; excerpt from Marshall Plan; excerpt from press release announcing U.S. recognition of Israel; Chinese propaganda poster; photograph of bomb shelter; map of the interstate highway system; photographs of Vietnam war protests; photograph of Berlin Wall; excerpt from Armistice Agreement for the Restoration of the South Korean State; aerial photograph of missiles in Cuba; excerpt from Tonkin Gulf Resolution; map of "Civil Rights Events, 1953–1963"; photographs of segregation; Executive Order 10730: Desegregation of Central High School; excerpt from the Civil Rights Act (1964); excerpt from the Voting Rights Act; photograph from March on Washington; map of "Americans in Poverty"; thematic map showing "The Impact of the Voting Rights Act"; map showing "The War in Vietnam"; quote from President Richard Nixon; quote from Chief Justice Warren Burger; quotes from President Reagan; bar graphs comparing real family income from 1980–1990; photograph of protest against ERA; map showing "Support of and Opposition to the ERA"; map of U.S. nuclear plants [CR 1: Textual, Visual, Maps, and Quantitative]

Unit 9: A New World Order, 1989–The Present

In this unit, students will do the following:

- Analyze the impact of new technologies and scientific advancements on the American economy and society.
- Assess the significance of the new global challenges that emerged after the end of the Cold War.
- Evaluate the motives, goals, and popularity of the conservative movement that emerged during the 1980s.

- Examine the changes in the United States as a result of new foreign, economic, and technological issues.
- Analyze the most recent history of the United States from September 11, 2001, to the present.

Sample activities in this unit:

- Students will analyze the technological changes that have occurred in the United States in the twenty-first century. Students will select their most prized technological possession, such as a smartphone or laptop, and describe this device to someone living 20 years ago. Students will write a short essay to describe how the technology works and why it is both culturally and economically important today. [CR 4: Theme 3 (WXT-3.0)]
- Students will connect the 2008 financial crisis and Hurricane Katrina. In response to a prompt, students will write a paragraph to evaluate the extent to which each event was both a natural disaster and a human-made disaster, using evidence from the lesson materials to support their response. [CR 4: Theme 6 (GEO-1.0) and CR 8]

Required reading: *By the People*, Chapter 29: A New World Order, 1989–2001 and Chapter 30: Entering a New Time, 2001 to the Present [CR 2]

Potential readings and images: quote from "New World Order" speech by President George H.W. Bush; map of "Europe after Communism"; map of former Yugoslavia; photographs of new technological devices; photograph of World Trade Center attacks; map showing results of 2000 election; excerpts from speeches by President George W. Bush; map of Afghanistan and Iraq; photographs from after Hurricane Katrina [CR 1: Textual, Visual and Maps]

Unit 10: Review and Full-Length Practice Exam

In this unit, students will do the following:

- Review the entire course, using the results of the mid-semester check and unit tests to focus this review. This includes analysis of the cause and effects of key events and developments after the Civil War. (Skill 5)
- Complete a full-length practice exam in the style of the AP United States History exam, over the course of four days.

Unit 11: Semester Project

In the project unit, students will choose one of the seven themes covered in this course (American and National Identity; Politics and Power; Work, Exchange, and

Technology; Culture and Society; Migration and Settlement; Geography and the Environment; or America in the World) and analyze historical developments and processes related to the theme. Students will draw on the information they learned throughout both semesters to create a multimedia presentation that showcases the theme's relevancy. Students analyze and cite scholarly secondary sources as they develop a thematic presentation portfolio. (Skills 1, 2, 3) [CR 4: may cover any theme depending on student choice]

Unit 12: Semester Exam

In this unit, students will do the following:

- Demonstrate knowledge from this semester by completing a graded semester exam written in the style of AP United States History.

APPENDIX A CURRICULUM

A.2 COURSE GUIDES

h. HEALTH AND PHYSICAL EDUCATION

This document is part of Appendix A: Curriculum.

It includes course guides for each Health and Physical Education class.

- Physical Education K
- Physical Education 1
- Physical Education 2
- Physical Education 3
- Physical Education 4
- Physical Education 5
- Health and Physical Education 6
- Health and Physical Education 7
- Health and Physical Education 8
- Health, Fitness, and Nutrition
- Physical Education
- Personal Fitness

Course guides provide detailed information on the curriculum including course descriptions, unit summaries, lesson objectives, activities, and assessment types. Course guides include information on:

- Planned instruction (provided in the unit summary of each unit within individual Course Guides)
- Course objectives (provided in the unit and lesson objectives within individual Course Guides)
- Activities (provided in the unit summary and lesson objectives of each unit within individual Course Guides)

Health and Physical Education 6

Health and Physical Education 6

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

The Health course will provide the student with the foundation for concepts and skills necessary for lifelong health and physical fitness. In the health portion of the course, the student will be introduced to and assessed on various topics ranging from body systems to proper nutrition and fitness, as well as understanding what it means to be healthy. The student will also be introduced to skills that can be applied toward healthy behaviors. The physical education portion of the course will offer great freedom as the student will be able to choose a physical education regimen that will fit the student's individual needs. The student will be given a choice of three paths that place emphasis on lifelong activities as well as current fitness trends. Physical education lessons are geared toward a "physically fit" lifestyle that will aid the student in the years to come and ensure a higher quality of life.

Course Outline

Health and Physical Education 6

1. Your Health and Wellness

1. Overall Health
 - Identify the three parts of the health triangle
 - Describe the relationship between overall health and wellness
 - Explain the importance of maintaining balance among your physical, mental/emotional, and social health
2. Factors Affecting Your Health
 - Identify factors that affect your health
 - Explain how your behavior and choices play a role in your health
 - Describe how your health is affected by your behavior
3. Your Health Is Your Responsibility
 - Identify skills that help you maintain a healthy life
 - Explain the importance of healthy life skills
4. Responsible Decision Making
 - Identify the steps involved in making responsible decisions
 - Explain the importance of values when making decisions
 - Practice good decision-making skills
5. Create Your Health Goals
 - Explain the importance of having goals

- Describe the steps of setting goals
- Develop a plan to achieve your goals

2. Your Character Counts

1. A Healthy Self-Concept
 - Describe your self-concept
 - Identify what influences your self-concept
 - Explain how you can build a healthy self-concept
2. Your Character Counts
 - Identify good character traits
 - Explain how character is developed
 - Describe what defines good character
3. Expressing Emotions
 - Explain what causes emotions
 - Express strong feelings in a healthy way
 - Discuss the importance of teen abstinence
4. Stress is All around Us
 - Explain what stress is
 - Describe how stress affects the body
 - List strategies for managing stress
5. Emotional Problems
 - Describe the different types of emotional problems
 - Recognize key warning signs of suicide
 - Identify resources for help with emotional problems

3. Healthy Relationships

1. Communication Skills
 - Explain the various ways people communicate
 - Describe how to become a better speaker and listener
 - Identify the three communication styles
2. Your Family
 - Recognize various types of family structures
 - Identify your family role
 - Explain how members of a family care for each other
3. Friends and Peers
 - Identify the qualities a good friend should have
 - Recognize the character traits of friends
 - Compare and contrast the two different types of peer pressure
4. How to Use Refusal Skills
 - Identify how to resist peer pressure using refusal skills
 - Demonstrate negative peer pressure refusal skills
5. Resolving Conflicts
 - Explain the reason for conflicts
 - Describe methods of protecting yourself from violence
 - Discuss negotiation strategies for resolving conflicts

4. Nutrition

1. Nutrients Your Body Needs
 - Identify the six main nutrient groups
 - Determine the proper foods you can eat to obtain nutrients
 - Analyze a recipe for key nutrients
2. Guidelines for Eating Healthy
 - Identify the five food groups
 - Discuss the proper use of the MyPlate food guidance system
 - Demonstrate how to use the MyPlate to plan a nutrient-rich meal
3. Healthy Choices
 - Recognize what influences your food choices
 - Interpret guidelines for choosing healthy foods
 - Explain how healthy weight is maintained
 - Examine the various eating behavior problems

5. Personal Health

1. Your Teeth, Skin, and Hair
 - Demonstrate how to keep your teeth and gums healthy
 - Discuss examples of how to take care of your skin
 - Describe the proper care for hair and nails
2. Protecting Your Eyes and Ears
 - Outline proper care for your eyes and ears
 - Demonstrate how to protect your hearing
3. Choosing Health Products
 - Explain influences on your consuming choices
 - Demonstrate how to wisely choose health products
 - Evaluate how consumer choices are influenced by the media
4. Using Medicines Responsibly
 - Explain the benefits of medicine
 - Interpret medicine label information
5. Health Care in Your Community
 - Distinguish between the different types of health care providers
 - Outline the importance of regular health checkups
6. First Aid for Emergencies
 - Explain strategies for responding to injuries
 - Outline the steps to help someone who is bleeding
 - Demonstrate the universal sign for choking
 - Describe how to help a burn victim

6. Human Body Systems

1. Your Cells and Systems
 - Connect the body's building blocks
 - Classify the major body systems and describe their functions
2. Bones and Muscles Working Together
 - Classify the parts and functions of the skeletal system
 - Examine the parts and functions of the muscular system
 - Discover ways to protect the bones and muscles

3. The Digestion and Elimination Cycle
 - Relate the parts and functions of the digestive system
 - Relate the parts and functions of the excretory system
 - Summarize ways to care for the digestive and excretory systems
4. Heart, Lungs, and Nerves Working Together
 - Describe how blood circulates through the body
 - Investigate how your nervous system controls body functions
 - Examine environmental factors that influence respiratory health

7. Tobacco

1. The Dangers of Tobacco
 - Outline how tobacco damages your health
 - Illustrate how tobacco leads to addiction
2. Teen Tobacco Use
 - Describe influences that contribute to teens trying tobacco
 - Connect negative influences to teen tobacco use
3. Free From Tobacco
 - Simulate how to say no to tobacco
 - Outline methods of giving up tobacco use

8. Using Alcohol and Other Drugs

1. Alcohol: Dangerous Drinking
 - Relate how alcohol affects the body and the mind
 - Investigate why some teens use alcohol
2. The Dangers of Alcohol Use
 - Investigate the alcohol cycle of addiction
 - Establish the health risks of drinking during pregnancy
 - Outline alcohol-free strategies to reduce stress
3. The Look of Illegal Drug Use
 - Recognize the dangers of illegal drugs
 - Compare marijuana and inhalant risks
 - Classify the harmful effects of drug abuse
 - Correlate recovery and withdrawal
 - Summarize treatments for drug addicts

Health and Physical Education 7

Health and Physical Education 7

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

The Health course will guide the student through material that will promote healthy, active lifestyles. Health topics include issues that are relevant to the age group, such as mental and emotional health, conflict resolution, and bullying. The student will also be immersed in the prevention and avoidance of drugs, alcohol, and tobacco. The student will receive the necessary strategies to help avoid the pitfalls of unhealthy and risky behaviors. The physical education portion of the course will offer great freedom as the student will be able to choose a physical education regimen that will fit the student's individual needs. The student will be given a choice of three paths that place emphasis on lifelong activities as well as current fitness trends. Physical education lessons are geared toward a "physically fit" lifestyle that will aid the student in the years to come and ensure a higher quality of life.

Course Outline

Health and Physical Education 7

1. Understanding Health and Wellness

1. Overall Health

- Identify the three different aspects of health
- Determine the link between health and wellness
- Describe how the body and mind are connected

2. Taking Responsibility for Your Health

- List and explain the three steps necessary for achieving health goals
- Identify the seven health skills needed to ensure a healthy you

3. Factors That Affect Your Health

- Explain why heredity is a health factor you cannot control
- Describe two types of environmental health factors and explain the role each plays in your total health

4. Understanding Health Risks

- Identify health risks
- Describe health consequences of risks and risky behavior
- Describe strategies you can use to evaluate health risks

2. Food and Nutrition

1. Nutrients

- Define “nutrient” and identify the three classes of nutrients that supply your body with energy
 - Describe how your body gets energy from the food you eat
 - Describe the role of carbohydrates, proteins, and fats as nutrients
 - Recognize sources of carbohydrates, proteins, and fats in your diet
 - Learn how to select foods to create a healthy, balanced diet
2. Choosing Food Wisely
 - Identify three main reasons why you eat
 - Describe the different influences on choices of food
 - Evaluate food choices using food labels
 - Identify healthy food choices using the MyPlate plan
 3. Planning Healthy Meals
 - Explain how dietary guidelines can help you plan a healthy diet
 - Utilize the MyPlate plan and Dietary Guidelines for Americans to plan healthy meals
 4. Digestion
 - Identify the three main functions of the digestive system
 - Describe the process of digestion
 - Identify digestive organs and their functions
 - Describe how your body eliminates waste products
 5. Healthy Body Image
 - Examine how heredity, activity level, and body composition affect your weight
 - Explain what body mass index (BMI) is
 - Describe the benefits of having a positive body image
 6. Maintaining a Healthy Weight
 - State the benefits of maintaining a healthy weight
 - Identify health problems related to being overweight and underweight
 - Identify three common eating disorders
 - Explain the dangers of eating disorders
3. **Mental and Emotional Health**
 1. Personality
 - Identify the five traits that define personality
 - Identify factors that affect how your personality develops
 - Describe the stages of personality development
 2. Self-Esteem
 - Define self-esteem and compare the effects of high and low self-esteem on your health
 - Explain how self-esteem develops and changes as you grow
 - Identify ways to improve self-esteem
 - Summarize how to achieve your potential through the hierarchy of needs
 - Identify the qualities of a self-actualized person
 3. Emotions
 - Differentiate between primary and learned emotions
 - Understand the importance of being aware of your emotions
 - Identify ways to cope with difficult emotions
 4. Stress
 - Define stress and identify sources of stress
 - Describe the body’s reaction to stress
 - Identify effective strategies to manage stress

5. Mental Disorders
 - Recognize symptoms of mental disorders
 - Identify causes of mental disorders
 - Identify different types of mental disorders

4. Resolving Conflicts and Preventing Violence

1. Conflict
 - Define and explain the nature of conflict
 - Identify causes of conflict
 - Recognize the signs of conflict
 - Describe different types of conflict
2. Conflict Resolution
 - Identify characteristics of healthy relationships
 - Describe skills for resolving conflict
 - Practice conflict resolution
3. Violence
 - Define violence and identify types of violence
 - Identify causes and risk factors of violence
 - Describe the cycle of violence in dating relationships
 - Identify characteristics of gangs
4. Abuse
 - Define abuse
 - Describe different types of abuse
 - Recognize signs of abuse
 - Recognize that abuse is never the fault of the victim

5. Tobacco

1. Chemicals in Tobacco Products
 - Identify dangerous substances in tobacco products
 - Explain how nicotine affects the body
 - Describe nicotine addiction
2. The Respiratory System
 - Explain the function of the respiratory system
 - Describe the breathing process
 - Trace the path of air through the respiratory system
 - Identify problems of the respiratory system and ways to keep it healthy
3. Teens and Tobacco
 - Identify factors that influence a teen's decision about tobacco use
 - Describe different tobacco products
 - Describe changes in tobacco use over the past few decades
4. Risks of Tobacco Use
 - Describe long-term health risks of using tobacco products
 - Identify the risks of exposure to secondhand smoke
 - List ways to avoid exposure to secondhand smoke
5. Saying No to Tobacco
 - Recognize the importance of refusal skills to avoid tobacco use
 - Identify benefits of being tobacco free

- Describe tips for quitting tobacco use

6. Alcohol

1. Alcohol's Effects on the Body
 - Identify facts about alcohol and describe short-term effects of alcohol on the body
 - Define blood alcohol concentration (BAC) and identify factors that affect BAC
 - Identify life-threatening effects of alcohol
2. The Nervous System
 - Identify the functions of the nervous system
 - Explain the structure and function of a neuron
 - Differentiate between the central and peripheral nervous systems
 - Identify problems of the nervous system and ways to keep your nervous system healthy
3. Teens and Alcohol
 - Identify factors that influence teen drinking
 - Explain the risks of underage drinking
4. Long-Term Risks of Alcohol
 - Identify serious long-term health effects of alcohol abuse
 - Describe the stages and treatment of alcoholism
 - Identify how alcohol abuse affects others
5. Choosing Not to Drink
 - Understand how refusal skills can help you stick to your decision not to drink
 - Identify and practice refusal skills
 - Describe benefits of avoiding situations where alcohol is present

7. Drugs

1. Legal and Illegal Drugs
 - Differentiate between legal and illegal drugs
 - Differentiate between drug abuse, drug misuse, and appropriate drug use
 - Describe different ways drugs affect your body
 - Identify risks of drug abuse
2. Commonly Abused Drugs
 - Describe the effects of different classes of drugs on the body
 - Identify classes of drugs of concern in recent years
3. Factors Affecting Drug Abuse
 - Identify risk factors for drug abuse
 - Identify protective factors that help you stay drug free
4. Choosing to Be Drug Free
 - Recognize signs of drug abuse
 - Identify treatment options for people who abuse drugs
 - Describe steps you can take to stay drug free

Health and Physical Education 8

Health and Physical Education 8

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

The Health course will introduce the student to vital health concepts and reinforce health skills that promote healthy behaviors. The student will learn the functions and structures of various body systems as well as the care and prevention of disease to these systems. The student will learn about communicable diseases and how to prevent the spread of such diseases. The student will also be able to demonstrate the importance of proper nutrition by planning and analyzing meals and nutritional values. Proper actions in emergencies and safety procedures will also be included. The physical education portion of the course will offer great freedom as the student will be able to choose a physical education regimen that will fit the student's individual needs. The student will be given a choice of three paths that place emphasis on lifelong activities as well as current fitness trends. Physical education lessons are geared toward a "physically fit" lifestyle that will aid the student in the years to come and ensure a higher quality of life.

Course Outline

Health and Physical Education 8

1. Understanding Your Health

1. Factors Affecting Overall Health
 - Define health today
 - Identify and describe the three sides of the health triangle
 - Explain how habits affect wellness
2. Changes in the Teen Years
 - Describe physical changes that occur during the teen years
 - Describe the mental and emotional changes experienced during adolescence
 - Explain how change during adolescence may affect your relationships
 - Identify some healthy behaviors that contribute to emotional and mental health
3. How to Make Responsible Health Decisions
 - Recognize the importance of lifestyle factors in a person's health
 - Describe risk-reducing behaviors and habits to reduce risks in your life
 - Understand how to evaluate sources of health information

2. Mental and Emotional Health

1. Understanding Mental and Emotional Health
 - Describe characteristics of good mental and emotional health
 - Recognize factors that affect your self-esteem

- Identify skills that help to build your self-esteem
2. Emotions and Behavior
 - Recognize common emotions
 - Discover healthy ways to express emotions
 - Identify how to manage anger in a healthful way
 3. How to Manage Stress
 - Recognize the causes of stress
 - Explain how your body responds to stress
 - Describe habits for managing stress in your life
 4. Dealing with Loss
 - Understand the stages of reactions that are associated with the grieving process
 - Describe strategies for dealing with personal loss
 - Find out how to emotionally support someone through the grief process

3. **Mental and Emotional Problems**

1. Mental and Emotional Health Disorders
 - Identify five types and signs of anxiety disorders
 - Discover the common causes of mental and emotional health disorders
 - Identify and describe two mood disorders
 - Describe three signs of clinical depression
2. Suicide Prevention
 - Recognize warning signs of teen suicide
 - Describe the causes of teen suicide
 - Understand how to communicate to help someone who may be suffering from a mental or emotional health problem
3. Help for Mental and Emotional Disorders
 - Recognize why you or someone you know may be avoiding getting help for a mental illness
 - Describe the kinds of therapies used to treat mental and emotional disorders
 - Identify professionals who help people with mental health problems

4. **Nutrition for Health**

1. The Benefits of Nutrition
 - Describe the importance of nutrition on the body
 - Explain how your mood can affect the foods that you eat
2. Essential Nutrients for Wellness
 - Identify the six major categories of nutrients
 - Describe three ways your body uses nutrients
3. Using Nutritional Guidelines
 - Explain how to adequately use MyPlate as a guide for healthy eating
 - Describe the recommendations for healthy eating provided by the Dietary Guidelines for Americans
4. Planning for Meals and Snacks
 - Understand why breakfast is the most important meal of the day
 - Identify meal planning tips
 - Identify healthy ways to choose a snack

5. **Your Body Image**

1. Learning to Maintain a Healthy Weight
 - Understand the importance of a healthy body image
 - Describe how food and physical activity have a major impact on your weight
 - Identify three ways to maintain a healthy weight
2. Living with an Eating Disorder
 - Identify signs and symptoms of eating disorders
 - Describe the health risks associated with eating disorders
 - Identify where someone can get help for an eating disorder

6. Your Body Systems

1. Human Skeletal System
 - Describe the functions of the skeletal system
 - Identify four types of joints located in the body
 - Describe problems that can occur within the skeletal system
 - Identify behaviors that can keep your skeletal system healthy
2. Human Muscular System
 - Describe the functions of the muscular system
 - Identify the differences between various muscle types
 - Identify behaviors that can keep your muscular system healthy
3. Human Circulatory System
 - Describe the process of circulation
 - Identify and explain the parts of the circulatory system
 - Identify behaviors that can keep your circulatory system healthy
4. Human Respiratory System
 - Describe how your body uses the air you breathe
 - Identify and explain the parts and functions of the respiratory system
 - Identify ways to maintain a healthy respiratory system
5. Human Nervous System
 - Describe the functions of the nervous system
 - Identify and explain the different parts of the nervous system
 - Identify ways to protect your nervous system from injury
6. The Human Digestive and Excretory Systems
 - Describe the process of excretion
 - Identify ways to prevent problems to the digestive and excretory systems
 - Identify behaviors for good digestive health
7. Human Endocrine System
 - Identify the main functions of the endocrine system
 - Describe the jobs done by the different endocrine glands
 - Explain disorders of the endocrine system
8. Human Reproductive System
 - Identify the parts of the male and female reproductive systems
 - Describe three functions of the female reproductive system
 - Identify problems that can be associated with the male and female reproductive systems
 - Identify ways to keep your reproductive system healthy

7. Infectious Diseases

1. Understanding Infectious Diseases

- List the causes of infectious diseases
 - Differentiate how germs are spread
2. How Does the Body Fight Infectious Disease?
 - List the three lines of defense your body has against infectious disease
 - Identify how the immune system functions
 - Describe how antibodies defend against diseases
 3. Common Infectious Diseases
 - Name four common infectious diseases
 - Discuss what causes colds and how to treat them
 - Describe what you can do to prevent infectious diseases

8. Safety and Emergencies

1. Being Safe at Home and School
 - Identify how to stay safe in the home and at school
 - Define the parts of an accident chain
 - Identify safe habits
2. Being Safe Outdoors and on the Road
 - Identify ways to avoid injuries in the water and outdoors
 - Define how to stay safe as a pedestrian
 - Differentiate safety and traffic rules for bicycles, skates, skateboards, and scooters
3. First Aid
 - Describe what are known as Universal Precautions
 - List the steps to take in an emergency
 - Organize your own first aid kit
4. Handling Common Emergencies
 - Explain the different types on common emergencies
 - Identify first-aid treatments for common emergencies
 - Understand when it is time to call for medical assistance
5. Medical and Life-Threatening Emergencies
 - Differentiate the different types of life-threatening emergencies
 - List the steps to perform rescue breathing
 - Describe the symptoms of shock
 - Recite how to help someone who is choking

Health, Fitness and Nutrition

Health, Fitness and Nutrition

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise Health, Fitness, and Nutrition. In this course, the student will study a variety of health-related topics and learn the benefits of fitness. The student will gain a new awareness of his own fitness level and nutritional needs. The student will also learn how to adopt long-term, healthy habits and lifestyle changes to improve and inspire his overall state of well being.

This course will also teach the student how fitness can influence one's self image and will help him to understand the value of respecting his own body. The student will explore the dangers of alcohol and drug use and develop social strategies to avoid peer pressure. The student will also examine such things as eating disorders, prevention of injury, and first aid.

Semester A Outline

1. **Health and Wellness**
 - Describe health, wellness, and fitness; identify the risk factors that may affect a person's well-being
 - Identify health-related and skill-related factors that may affect fitness
 - Recognize the importance of training principles and techniques
 - Describe the anatomy of joints and ways to maintain healthy joints
 - Describe flexibility and various ways to maintain and increase it
2. **Strengthen your Muscles**
 - Describe the components of the circulatory system and the benefits of exercise on the circulatory system
 - Describe the respiratory system and actions that threaten the health of the respiratory system
 - Identify the different types of muscles and muscle fibers
 - Identify ways to improve muscular strength and endurance
 - Describe the benefits of aerobic training
3. **Final Exam**
 - Health, Fitness, and Nutrition Final Exam

Semester B Summary:

In the Health, Fitness, and Nutrition course, the student will study a variety of health-related topics and learn the benefits of fitness. The student will gain a new awareness of his own fitness level and nutritional needs. The student will also learn how to adopt long-term, healthy habits and lifestyle changes to improve and inspire his overall state of well

being. This course will also teach the student how fitness can influence one's self image and will help him to understand the value of respecting his own body. The student will explore the dangers of alcohol and drug use and develop social strategies to avoid peer pressure. The student will also examine such things as eating disorders, prevention of injury, reproductive health, and first aid.

Semester B Outline

1. **Building a Healthy Body**
 - Explain the role of fat in the body; describe the health hazards associated with excess body fat
 - Recognize the role that good nutrition and proper hydration play in weight control and overall health
 - Describe the dangers of poor eating habits; identify various aspects of eating disorders
 - Describe stress management and the connection to stress-related health problems
 - Identify the negative effects of habits such as alcohol, drugs, and tobacco
2. **Developing an Exercise Plan**
 - Describe the treatment and prevention of common exercise injuries
 - Recognize the importance of first aid in various situations
 - Describe the proper attire and equipment for various exercise activities
 - Explain the benefits of adherence to a regular exercise plan
 - Discuss the options for an exercise location and ways to involve the entire family in a fitness plan
3. **Reproductive Health**
 - Educate students about the human reproductive system
 - Present abstinence as the best method of avoiding teen pregnancy
 - Present abstinence as the best method in preventing infection
 - Familiarize students with strategies for assertive communication
 - Present family planning in terms of marriage
4. **Final Exam**
 - Health, Fitness, and Nutrition Final Exam

Personal Fitness

Personal Fitness

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will study physical fitness and a variety of health-related topics. The student will gain an understanding of the proper ways to exercise and diet, and will learn how to assess his own fitness level. The student will learn what fitness can do and how to attain the highest possible fitness level.

Course Outline:

1. Fitness Awareness and Understanding

1. The Importance of Fitness
 - Learn to identify and understand the five health-related factors of fitness
 - Learn to identify and understand the six skill-related factors of fitness
2. Fitness Testing
 - Identify the factors to be considered before engaging in a physical fitness program
 - Describe how the health-related components will increase by applying the principles you develop in your own exercise program
3. Components of Fitness
 - Learn the principles of overload, progression, and specificity
 - Understand your working heart rate
4. Guidelines for the Exercise Session
 - Understand the importance of warming up and cooling down
 - Plan your own exercise sessions, including warm-up and cool-down
5. Understanding How the Joints Move
 - Define flexibility
 - Describe the importance of flexibility to health and fitness
 - Explain how flexibility is developed
 - Describe how flexibility is increased through the application of general principles of training
6. Applying Fitness Principles to Flexibility
 - Define overload, specificity, and progression as they relate to flexibility
 - Give examples of various types of stretches
 - Explain the difference between dynamic and static stretches

7. Stretching Exercises

- Describe which exercises increase range of motion in specific joints
- Provide criteria for correctly performing flexibility exercises

2. Cardiovascular Fitness

1. Anatomical Structure of the Heart and How It Works

- Define cardiovascular fitness
- Describe how the cardiovascular system works
- Recognize the major structural features of the heart
- Understand blood pressure

2. Respiratory System Functions

- Describe the respiratory process and its relationship to fitness
- Identify the major structural features of the lungs
- Learn the benefits of aerobic exercise and determine your target heart rate

3. Muscle Fibers

- Learn to identify two types of muscle fibers
- Describe the functions of the two types of muscle fibers
- Identify the differences among skeletal, smooth, and cardiac muscles

4. Types of Muscles

- There are no objectives for this lesson.

5. Developing Muscular Endurance

- Learn the methods of developing cardiovascular fitness, muscular strength, and endurance
- Learn the effects of exercise on the muscular system
- Identify different types of aerobic exercises and their benefits

6. Diseases Associated With Poor Aerobic Conditioning

- Discuss the importance of attaining an optimal cardiovascular level
- Identify the benefits of muscular endurance
- Name the diseases associated with poor aerobic conditioning

7. Aerobic Training Benefits

- Explain how aerobic training impacts the respiratory system
- Explain how aerobic training impacts the cardiovascular system
- Explain how aerobic training impacts the muscular system

8. Oxygen Transport

- Describe systemic circulation and oxygen transport
- Identify blood vessels, arteries, veins, and capillaries
- Explain the difference between systemic and pulmonary circulation

9. Body Fat and Obesity

- Develop an understanding of body fat and related terms
- Discuss the benefits of low body fat percentage
- Identify the health hazards of high body fat percentage

3. Nutrition

1. Understanding Nutrients

- Identify the six major nutrients
- Identify the best food sources for each one
- Identify the basic food groups
- Analyze your own eating habits to meet your goals for RDAs

Learn to select foods that will provide the optimal nutrition benefits

2. Sports Nutrition Myths

Learn the facts about the most common myths about nutrition

Learn to identify the myths associated with sports drinks, protein supplements, and salt tablets

3. Hydration

Discuss the importance of hydration and re-hydration

Describe the hazards and effects of dehydration

Learn to identify associated symptoms

Discuss the negative side-effects of the use of diuretics

4. Weight Control

Discuss the causes of obesity and how it develops

Learn the terms related to body composition

Describe the guidelines for weight control and methods of determining your ideal body weight

5. Fad Diets

Learn the importance of maintaining a well-balanced diet

Recognize health risks as a result of fad dieting

6. Anorexia Nervosa and Bulimia

Describe the hazards of eating disorders

Discuss the psychological and physiological effects

Identify the symptoms

7. Stress

Discuss the body's reaction to stress and the three stages of stress

Identify symptoms and prevention

Learn various methods of relieving and coping with stress

4. **Designing Your Personal Exercise Program**

1. Exercising Safely/Designing Your Exercise Program

Describe common exercises and injuries

Discuss how to prevent problems before they occur by avoiding certain exercises

2. Final Exam

There are no objectives for this lesson.

Physical Education 1

Physical Education 1

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Welcome to Physical Education 1! Each week, the student will learn a new game or activity. There will be games and activities that may be played inside, while others will be better suited for outdoor play. The games and activities in this course are grouped in thematic units. In each lesson, the student will find a brief description of that week's game. Each week a new game will be added, but the previous lessons' games will still be listed for the student to see. In addition to the activities described in the lessons, students will also have the option of participating in yoga or an individual or team sport.

Course Outline:

1. Get Up and Move

1. Introduction to Physical Education 1
 - Learn about the three different options that Connections Academy students have to fulfill their Physical Education requirement
2. Ping-Pong Pass
 - Demonstrate motor skills needed for throwing and catching
 - Refine hand-eye coordination through process of throwing and catching
3. Limbo Lights
 - Play a limbo game without using a limbo stick
 - Demonstrate flexibility and balance through movement
4. Push-ups
 - Demonstrate how to do a basic push-up
 - Demonstrate how to do different variations of push-ups
 - Identify the different parts of the body that the different push-up variations target
5. Side Straddle Hop
 - Demonstrate how to do a side straddle hop or jumping jack
6. Musical Hoops
 - Demonstrate how to correctly use a hula hoop

- Use a hula hoop as part of exercises to strengthen the oblique muscles
7. Plyometrics
 - Define plyometrics
 - Participate in plyometric exercises
 8. Marsupial Mania
 - Demonstrate locomotor patterns of jumping
 - Practice jumping distances

2. Making Healthy Choices

1. Nutrition: USDA's MyPlate
 - Identify the five food groups that make up USDA's MyPlate
 - Name specific foods and what food group they belong to
2. Nutrition: Choosing Healthy Food
 - Identify foods from the different food groups
 - Create a menu for a healthy, balanced dinner
3. Exercise
 - Define exercise
 - Explain the benefits of exercise on the heart and lungs
 - Measure the effects of exercise on the pulse rate
4. Personal Hygiene
 - Define personal hygiene and explain why it is important to overall health
 - Describe the proper hand washing technique

3. Make Your Own Fun

1. Make Your Own Kite
 - Construct and fly two kites out of household materials
 - Demonstrate motor skills needed to fly a kite
2. Make Your Own Plisbee
 - Demonstrate manipulative skills used to throw and catch
 - Improve hand-eye coordination through throwing and catching accurately
3. Make Your Own Catcher's Cup
 - Demonstrate accurate hand-eye coordination and spatial relationships to be able to catch a ball on a string

4. Games from Around the World

1. Brinca (Spain)
 - Demonstrate balance and coordination through a series of hops, steps, and jumps
2. Chenco (Southeast Native American tribes)
 - Demonstrate motor skills needed for throwing
 - Utilize hand-eye coordination and depth perception to participate in an activity from Native American culture
3. Japanese Horseshoes (Japan)
 - Demonstrate accurate throwing techniques to knock over a target
 - Improve throwing accuracy through practice
4. Lamé Hen (China)
 - Demonstrate motor skills needed to hop on one foot

- Balance on one leg long enough to pick up items from the ground
- 5. Lompat Tali (Indonesia)
 - Demonstrate locomotor skills necessary to jump rope
 - Participate in fundamental movements such as jumping and hopping
- 6. Down, Down, Down (Australia)
 - Demonstrate proficiency in throwing and catching a ball
 - Utilize depth perception to be able to catch a ball

5. Show Your Strength

1. Bowling for Bottles
 - Demonstrate hand-eye coordination necessary to knock over a target with a ball
2. Give Yourself a Hand
 - Improve balance and coordination
 - Use motor skills necessary to jump from one space to another
3. Soaring Slippers
 - Demonstrate motor skills needed to throw accurately at a target
 - Utilize hand-eye coordination necessary for throwing
4. Ping Pong Pockets
 - Demonstrate throwing accuracy by hitting a specific target
5. Sponge Toss
 - Demonstrate ability to throw and catch
 - Be able to throw objects into a specific container

Physical Education 2

Physical Education 2

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Welcome to Physical Education 2! Each week, the student will learn a new game or activity. There will be games and activities that may be played inside, while others will be better suited for outdoor play. The games and activities in this course are grouped in thematic units. In each lesson, the student will find a brief description of that week's game. Each week a new game will be added, but the previous lessons' games will still be listed for the student to see. In addition to the activities described in the lessons, students will also have the option of participating in yoga or an individual or team sport.

Course Outline:

1. Get Up and Move

1. Introduction to Physical Education 2
 - Learn about the three different options that Connections Academy students have to fulfill their Physical Education requirement
2. Space Awareness: Balance
 - Demonstrate an understanding of stationary balance and moving balance
3. Tightrope Walker
 - Demonstrate how to maintain balance while walking a tightrope
4. Body Toss
 - Demonstrate how to properly throw underhand
 - Demonstrate how to aim for and successfully hit a target with an underhand throw
5. Side Straddle Hop
 - Demonstrate how to do a side straddle hop or jumping jack
6. Scarf Juggling
 - Demonstrate juggling using three scarves
7. Jumping Jacks to the Music
 - Demonstrate stamina and endurance by performing jumping jacks to music
8. Where Are You Going?
 - Demonstrate flexibility and gross motor control by moving the body in various directions

2. Making Healthy Choices

1. Nutrition: MyPlate
 - Identify the five food groups that make up MyPlate
 - Name specific foods and what food group they belong to
2. Nutrition: Choosing Healthy Food
 - Identify foods from the different food groups
 - Create a menu for a healthy, balanced dinner
3. Exercise
 - Define exercise
 - Explain the benefits of exercise on the heart and lungs
 - Measure the effects of exercise on the pulse rate
4. Personal Hygiene
 - Define personal hygiene and explain why it is important to overall health
 - Describe the proper hand washing technique

3. Games You Can Make!

1. Make Your Own Cheerleader Pompoms
 - Demonstrate locomotor skills with basic cheerleading moves
2. Make Your Own Coffee Can Stilts
 - Demonstrate gross motor control and balance while walking on tin can stilts
3. Make Your Own Swirling Dancing Ribbons
 - Demonstrate motor control and body awareness with rhythmic gymnastics
4. Ab Wheelie
 - Demonstrate coordination and core strength
5. Don't Fall in the Lava
 - Demonstrate locomotor skills and coordination
6. Beach Ball Lift
 - Demonstrate strength in the legs and abdominal muscles

4. Games from Around the World

1. Greece: The Snail Game
 - Demonstrate balance and coordination through a series of hops, steps, and jumps
2. Romania: Rings Game
 - Demonstrate hand-eye coordination
3. Germany: Hit the Pot and Sardines
 - Demonstrate interpersonal cooperation and team spirit
4. China: Hopping Chicken and Jump Over the Band
 - Demonstrate locomotor skills and coordination
5. Colombia: Oba
 - Demonstrate hand-eye coordination
6. Indonesia: Jumping Rope
 - Demonstrate coordination and physical perseverance

5. How Strong Are You?

1. Deck of Cards
 - Demonstrate stamina and endurance through the performance of various exercises
2. Jump Start Your Heart
 - Demonstrate an understanding of heart healthy activities
3. Get Around This!
 - Demonstrate physical stamina by hopping, jumping, and running
4. Get Up and Dance!
 - Demonstrate stamina, flexibility, and endurance by moving and dancing to music
5. Let's Build Your Muscles!
 - Demonstrate strength and endurance through strength training

Physical Education 3

Physical Education 3

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Our third grade students are expected to understand and demonstrate clearly-defined combinations of movements. Each week the student will learn one or more new activities. In addition, the student will learn the importance of nutrition as it relates to health and physical fitness. The student will learn life skills throughout the curriculum. In each lesson, the student will find a brief description of that week's activity. Each week a new activity will be added, but the previous activities can always be reviewed.

Course Outline:

1. The Presidential Fitness Challenge: Introduction

1. About the President's Challenge
 - Learn about the Presidential fitness programs
2. Powerful Pacer and Mighty Mile
 - Learn the proper way to do the mile run/walk
 - Learn the proper way to complete the pacer test.
3. Perfect Push-ups
 - Learn the proper way to do push-ups
4. Terrific Trunk Lift and Stretchy Sit-and-Reach
 - Learn the proper way to do the Stretchy Sit-and-Reach
 - Learn the proper way to do the Terrific Trunk Lift

2. Moving, Stretching, and Strengthening

1. Jumping and Leaping
 - Jump as high as you can
 - Jump as far as you can
 - Leap as far as you can
2. Move It!
 - Move quickly
 - Change direction quickly
3. Did You Catch That?
 - Catch a ball using two hands

4. Which Way Am I Going?
 - Perform jumps in various directions
 - Run in various directions
5. I Am Strong and Sturdy
 - Balance using four supports
 - Balance using three supports
 - Balance using two supports
6. Upper Body Strength
 - Use upper body strength to perform various activities
7. Twist and Turn
 - Perform skills that cross the mid-line of the body
 - Twist the torso as far as possible
8. Bending and Stretching
 - Demonstrate ankle, knee, and hip flexibility
9. Jumping Beans
 - Jump while keeping your balance
 - Jump rope several times consecutively
10. Jumping Beans II
 - Jump in a diagonal direction with control
 - Jump as quickly as possible in various directions
11. Lower Body Strength
 - Demonstrate lower body strength

3. **Developing a Healthy Exercise Routine**

1. A Healthy Exercise Routine
 - Learn the principles of exercise
 - Learn the components of an exercise routine
 - Learn how to properly warm up and cool down
2. Flexibility Training
 - Learn about the importance of flexibility
 - Incorporate stretching into a daily exercise routine
3. Aerobic Training
 - Learn about the importance of aerobic activity
 - Incorporate aerobic activity into a daily exercise routine
4. Strength and Endurance Training
 - Learn the importance of muscular strength
 - Learn the importance of muscular endurance
 - Incorporate strength and endurance into a daily exercise routine

4. **Your Body and Exercise**

1. Body Composition
 - Learn how to calculate Body Mass Index
 - Learn about different body types
2. Nutrition and Healthy Eating
 - Learn about essential nutrients
 - Learn why eating a healthy diet is important

3. The Importance of Fluids
 - Learn why fluids are important during exercise
 - Learn about homeostasis

4. Injuries
 - Learn how to prevent exercise-related injuries
 - Learn how to care for exercise-related injuries

5. **The Presidential Fitness Challenge**

1. Endurance Run/Walk and Shuttle Run
 - Complete the endurance run/walk
 - Complete the shuttle run
2. Pull-ups or Push-ups and Curl-ups
 - Complete as many pull-ups or push-ups as you can in one minute
 - Complete as many curl-ups as you can in one minute
3. V-Sit and Reach
 - Perform the v-sit and reach exercise

6. **Games Around the World**

1. Asia
 - Participate in games played by children in Asia
 - Demonstrate locomotor skills necessary for running and jumping
2. Europe
 - Participate in games that are played by children in Europe
 - Demonstrate locomotor skills necessary for running and jumping
3. Africa
 - Learn about games that are played in Africa
 - Demonstrate locomotor skills necessary for running and jumping
4. Australia
 - Learn about games that are played in Australia
 - Demonstrate locomotor skills necessary to run

Physical Education 4

Pearson

Physical Education 4

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

At the fourth grade level, student's hand-eye coordination has improved, allowing for advanced instruction in individual and partner activities. Fourth grade students are able to understand rules and the importance of following them. The development of a healthy lifestyle requires that the student acquire knowledge to make positive decisions about exercise, and nutrition. The student's participation and progress will be monitored through the Physical Activity Log and periodic performance tests.

The President's Council on Physical Fitness and Sports Tests will be part of his/her curriculum. Depending on the program chosen, the student will have the opportunity to record his results on a periodic basis, and receive the appropriate award depending on the performance level.

Course Outline:

1. The Presidential Fitness Challenge: Introduction

1. About the Presidential Fitness Challenge
 - Learn about the Presidential Fitness Challenge programs, which include the Presidential Active Lifestyle program and the Presidential Physical Fitness program
2. Powerful Pacer and Mighty Mile
 - Learn the proper way to do the mile run/walk
 - Learn the proper way to complete the pacer test
 - Demonstrate accurate completion of the mile run/walk
 - Demonstrate accurate completion of the pacer test
3. Perfect Push-ups and Curl-ups
 - Learn the proper way to do push-ups
 - Demonstrate proper technique while doing push-ups
 - Learn the proper way to do curl-ups
 - Demonstrate proper technique while doing curl-ups
4. Terrific Trunk Lift and Stretchy Sit-and-Reach
 - Learn the proper way to do the Stretchy Sit-and-Reach
 - Learn the proper way to do the Terrific Trunk Lift

2. Learning Locomotor Skills

1. Jumping and Leaping
 - Demonstrate the locomotor skills necessary to participate in a variety of jumping routines
 - Learn the fundamentals of jumping and how it can help to improve overall physical fitness
2. Move It!
 - Demonstrate your speed and quickness through a series of movement drills
 - Practice the shuttle run, a part of the Presidential Physical Fitness Program
3. Did You Catch That?
 - Demonstrate locomotor skills necessary to catch a ball
 - Demonstrate locomotor skills necessary to throw a ball to another person
 - Improve hand-eye coordination and depth perception by catching a ball thrown by another person
4. Which Way Am I Going?
 - Develop an understanding of the physical fitness concept of agility and demonstrate your agility through a series of exercise drills
 - Demonstrate the locomotor skills necessary to run and stop quickly
5. I Am Strong and Sturdy
 - Demonstrate appropriate balancing technique by participating in a series of balancing exercises
 - Demonstrate upper body strength necessary to complete push-ups
6. Upper Body Strength
 - Demonstrate the ability to utilize upper body strength to participate in various exercises
 - Improve upper body strength by performing exercises that target the upper body muscles
7. Twist and Turn
 - Demonstrate flexibility through a series of stretching exercises
 - Increase flexibility in the upper body and abdomen by performing various twisting exercises
8. Bending and Stretching
 - Demonstrate flexibility through a series of stretching exercises
 - Increase flexibility by performing various stretching exercises
9. Jumping Beans
 - Demonstrate the ability to jump while maintaining balance in order to participate in jumping rope
 - Demonstrate jumping techniques
10. Jumping Beans II
 - Demonstrate balance and coordination necessary to participate in a variety of jumping routines
11. Lower Body Strength
 - Demonstrate lower body strength by participating in a variety of exercises
 - Improve lower body strength by performing exercises that target those muscles
- 3. Developing A Healthy Exercise Routine**
 1. A Healthy Exercise Routine
 - Identify the four principles of exercise
 - Identify the components of an exercise routine
 - Demonstrate how to properly warm-up and cool-down
 2. Flexibility Training
 - Learn about the importance of flexibility and its overall health benefits
 - Demonstrate a variety of stretching techniques in order to improve flexibility
 - Incorporate stretching into your daily exercise routine

3. Aerobic Training
 - Learn the principles and importance of aerobic activity
 - Demonstrate aerobic activity and incorporate it into a daily exercise routine
4. Strength and Endurance Training
 - Learn the importance of muscular strength
 - Learn the importance of muscular endurance
 - Incorporate strength and endurance exercises into a daily exercise routine
- 4. Your Body and Exercise**
 1. Body Composition
 - Learn about different body types and the characteristics of each
 - Identify the three components of body composition
 - Calculate your Body Mass Index using a BMI Calculator
 2. Nutrition & Healthy Eating
 - Identify the five food groups that make up MyPlate
 - Explain why eating a healthy diet is important to overall wellness
 - Name specific foods and what food group they belong to
 3. The Importance of Fluids
 - Define homeostasis and explain the role it plays in body system regulation
 - Explain why replacing fluids is important during exercise
 4. Injuries
 - Learn how to prevent exercise-related injuries
 - Learn how to care for exercise-related injuries
- 5. The Presidential Fitness Challenge**
 1. Endurance Run/Walk and Shuttle Run
 - Participate in The Presidential Physical Fitness Challenge
 - Complete the endurance run/walk
 - Complete the shuttle run
 2. Pull-ups or Push-ups and Curl-ups
 - Participate in The Presidential Physical Fitness Challenge
 - Complete pull-ups or push-ups
 - Complete curl-ups
 3. V-Sit and Reach
 - Participate in The Presidential Physical Fitness Challenge
 - Complete the v-sit and reach
- 6. Games Around The World**
 1. Asia
 - Participate in games that are played by children in Asia
 - Demonstrate locomotor skills necessary for running and jumping
 2. Europe
 - Participate in games that are played by children in Europe
 - Demonstrate locomotor skills necessary for running and jumping
 - Demonstrate hand-eye coordination necessary to catch a ball with a cup
 3. Australia
 - Participate in games that are played by children in Australia
 - Demonstrate hand-eye coordination necessary to throw and catch a ball

- Demonstrate locomotor skills necessary to run
4. Africa
- Participate in games that are played by children in Ghana
 - Demonstrate locomotor skills necessary for running and jumping

Physical Education 5

Pearson

Physical Education 5

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

At the fifth grade level, students understand the concept of fair play and begin to recognize the varying fitness levels within the appropriate age standards. Playing by the rules and respecting self and others are emphasized as students participate in cooperative physical education activities. Students see how levels of physical activity and food intake are related to a healthy productive life-style.

The President's Council on Physical Fitness and Sports Tests will be part of his/her curriculum. Depending on the program chosen, the student will have the opportunity to record his results on a periodic basis, and receive the appropriate award depending on the performance level.

Course Outline:

1. The Presidential Fitness Challenge: Introduction

1. About the Presidential Fitness Challenge
 - Learn about the Presidential Fitness Challenge programs, which include the Presidential Active Lifestyle program and the Presidential Physical Fitness program
2. Powerful Pacer and Mighty Mile
 - Learn the proper way to do the mile run/walk
 - Learn the proper way to complete the pacer test
 - Demonstrate accurate completion of the mile run/walk
 - Demonstrate accurate completion of the pacer test
3. Perfect Push-ups and Curl-ups
 - Learn the proper way to do push-ups
 - Demonstrate proper technique while doing push-ups
 - Learn the proper way to do curl-ups
 - Demonstrate proper technique while doing curl-ups
4. Terrific Trunk Lift and Stretchy Sit-and-Reach
 - Learn the proper way to do the Stretchy Sit-and-Reach
 - Learn the proper way to do the Terrific Trunk Lift

2. Learning Locomotor Skills

1. Steal the Ball

- Develop locomotor skills of running, and dribbling a ball with your feet
 - 2. Marathon Walk/Run
 - Develop the locomotor skills of walking and running
 - 3. Up and Down the Step Aerobics
 - Develop and demonstrate coordination
 - 4. Let's Get Jumping
 - Develop and demonstrate the locomotor skill of jumping
 - 5. Let's Have a Ball
 - Develop the locomotor skills of throwing and catching a ball
 - Develop eye-hand coordination skills
 - 6. Throw and Catch
 - Develop accurate throwing, catching, visual tracking, and dexterity
 - 7. You Can Build a Strong Upper Body
 - Develop knowledge of exercises that strengthen the upper body
 - 8. Get Flexible
 - Develop flexibility by performing bending and stretching exercises
 - 9. Strong Legs Will Take You Far
 - Develop strength in the lower body through interval training
 - 10. Core Strength: Twisting and Turning
 - Develop core strength through the use of twisting and turning skills
 - 11. Fitness Around the House
 - Develop fitness skills by performing exercises that address different components of fitness
- 3. Developing a Healthy Exercise Routine**
1. A Healthy Exercise Routine
 - Identify the four principles of exercise
 - Identify the components of an exercise routine
 - Demonstrate how to properly warm up and cool down
 2. Flexibility Training
 - Demonstrate an understanding of the importance of flexibility and its overall health benefits
 - Demonstrate a variety of stretching techniques in order to improve flexibility
 - Incorporate stretching into your daily exercise routine
 3. Aerobic Training
 - Demonstrate an understanding of the importance of aerobic activity
 - Demonstrate an understanding of aerobic activities and include them in a daily exercise routine
 4. Training for Strength and Endurance
 - Demonstrate an understanding of the importance of muscular strength
 - Demonstrate an understanding of the importance of muscular endurance
 - Incorporate strength and endurance exercises into a daily exercise routine
- 4. Your Body and Exercise**
1. Body Composition
 - Learn about different body types and the characteristics of each
 - Identify the three components of body composition
 - Calculate your Body Mass Index using a BMI Calculator

2. Nutrition & Healthy Eating
 - Identify the five food groups that make up MyPlate
 - Explain why eating a healthy diet is important to overall wellness
 - Name specific foods and what food group they belong to
3. The Importance of Fluids
 - Define homeostasis and explain the role it plays in body system regulation
 - Explain why replacing fluids is important during exercise
4. Injuries
 - Learn how to prevent exercise-related injuries
 - Learn how to care for exercise-related injuries

5. **The Presidential Fitness Challenge**

1. Endurance Run/Walk and Shuttle Run
 - Participate in The Presidential Physical Fitness Challenge
 - Complete the endurance run/walk
 - Complete the shuttle run
2. Pull-ups or Push-ups and Curl-ups
 - Participate in The Presidential Physical Fitness Challenge
 - Complete pull-ups or push-ups
 - Complete curl-ups
3. V-Sit and Reach
 - Participate in The Presidential Physical Fitness Challenge
 - Complete the v-sit and reach

6. **Games Around The World**

1. Asia
 - Participate in games that are played by children in Asia
 - Demonstrate locomotor skills necessary for running and jumping
2. Europe
 - Participate in games that are played by children in Europe
 - Demonstrate locomotor skills necessary for running and jumping
 - Demonstrate hand-eye coordination necessary to catch a ball with a cup
3. Australia
 - Participate in games that are played by children in Australia
 - Demonstrate hand-eye coordination necessary to throw and catch a ball
 - Demonstrate locomotor skills necessary to run
4. Africa
 - Participate in games that are played by children in Ghana
 - Demonstrate locomotor skills necessary for running and jumping

Physical Education K

Pearson

Physical Education K

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, physical education encourages students to develop their fine motor skills, movement, and confidence to enjoy healthy physical activity regularly. A combination of interactive and hands-on activities teaches students essential skills. Students learn how to respect themselves and others while playing.

Course Outline:

1. Physically Active Lifestyle

1. Physical Activities
 - Select and demonstrate activities that are classified as physical activity or exercise
2. Benefits of Physical Activity
 - Recognize that exercise benefits the body and the brain
3. Not Being Active
 - Identify disadvantages of not being physically active
4. Being Active Outside of School
 - Engage in at least one physical activity outside of school
 - Create a book of physical activities
5. Feelings and Physical Activity
 - Identify the emotional benefits to your brain from participating in physical activities
6. Enjoyable Physical Activities
 - Identify one physical activity that is enjoyable and state why it is fun

2. Introduction to Common Movements

1. Moving Forward, Sideways, and Backward
 - Show how your body can move forward, backward and sideways
 - Explain why it is important to understand direction
2. Playing Ball
 - Demonstrate kicking, throwing, catching, and striking a ball
 - Describe how different actions used with balls produce various results
3. Stretching

- Show how your body can stretch, bend, swing, twist
 - Explain why it is important to stretch before exercising
4. Determining Direction
 - Distinguish between directional relationships with an object and your body
 5. Balancing and Body Parts
 - Demonstrate balancing while bearing weight on both feet, one foot, and on hands and knees
 6. Moving to a Rhythm
 - Experiment with clapping, tapping, and moving to a steady beat

3. Let's Move

1. Bending, Pushing, Pulling, and Squatting
 - Identify and perform squatting, bending, pulling, and pushing
 - Describe the difference between squatting, bending, pulling, and pushing
2. Let's Travel
 - Differentiate between hopping, skipping, jumping, and running
 - Perform a hop, skip, jump, and run
3. What Body Parts Can You Name?
 - Label the different parts of the body used in physical activity
 - Identify various body parts
4. My Space, Our Space
 - Determine the difference between personal and general space
 - Perform movements using both personal and general space
5. Are You Fast or Slow?
 - Identify fast and slow movements
 - Explain how fast and slow movements look and feel different
 - Demonstrate the difference between slow and fast movements while traveling
6. Twist and Bend your Body
 - Demonstrate head flexion, head extension, and head rotation

4. Effects of Exercise

1. Do You Notice a Change?
 - Explain that fast heart rate, sweat, and heavy breathing accompany exercise
 - Discuss why your heart rate increases, breathing deepens, and sweating occurs during exercise
2. Building Muscle Strength
 - Describe muscles
 - Demonstrate the ability to lift and support body weight
3. The Lungs
 - Identify where the lungs are located
 - Describe what lungs help you do
4. Importance of Sleep
 - Explain the importance of rest and sleep for the body
5. Flexibility
 - Participate in exercises that increase flexibility in the shoulders, legs, and trunk
 - Describe and select a stretching activity that provides enjoyment
6. Daily Physical Activity

- Identify the benefits that occur when involved in daily physical activity
- Develop and track a physical activity goal

5. **Responsibility, Respect, and Enjoyment**

1. Importance of Following Rules
 - State why it is important to follow rules when participating in physical activity
 - Illustrate the importance of following rules and consequences of not following rules
2. Dressing for Physical Activity
 - Identify appropriate clothing to wear when exercising
 - Explain how proper clothing and shoes help prevent injury
3. Staying Safe in the Water
 - Explain basic water safety rules
4. Using Equipment
 - Discuss the proper use of sporting equipment
5. Emergencies
 - Discuss appropriate reactions during emergencies in physical activities
6. Working Together
 - Explain the benefits of working together in physical activity
7. Positive Feelings During Physical Activity
 - Identify specific positive feelings associated with participating in physical activity
8. Try a New Sport or Activity
 - Summarize why it is important to try a new sport or activity
 - Explain how physical activity provides the opportunity for social interaction

Physical Education

Physical Education

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will use previously acquired skills in a wide range of elective activities. The course places priority on self-motivated physical activities that the student can participate in now and later in life, and incorporates skill competencies, written assignments, and class evaluations into some of the units. The student will be expected to show proficiency in the activities that are important for his personal development at the appropriate age. The student's physical fitness level will be assessed and recorded. As an online learner, the student will utilize relevant Web sites and streaming videos provided in the lessons.

Course Outline:

1. Fitness

1. Stretching Lesson
 - Focus Quiz: There are no objectives for this lesson
2. Cardiovascular Training
 - Define and explore methods of cardiovascular exercise
 - Distinguish between high intensity and low intensity cardiovascular exercise
 - Explore the relationship between the heart rate and effective cardiovascular exercise
3. Physical Fitness Testing
 - Identify the areas of physical fitness measured by the Presidential Physical Fitness Test
 - Participate in the Presidential Physical Fitness Test program
 - Assess your strengths and weaknesses with regard to physical fitness
4. Weight Training
 - Identify the areas of physical fitness measured by the Presidential Physical Fitness Test
 - Participate in the Presidential Physical Fitness Test program
 - Assess your strengths and weaknesses with regard to physical fitness

2. Team Sports

1. Soccer Skill Progression
 - Focus Quiz: There are no objectives for this lesson

2. Soccer Rules and Positions
 - Identify common rules and regulations of soccer
 - Examine common strategies used by soccer players and teams
 3. Basketball Skills Progression
 - Focus Quiz: There are no objectives for this lesson
 4. Basketball Rules, Positions, and Current Events
 - Identify common rules and regulations of basketball
 - Examine common strategies used by basketball players and teams
 5. Baseball and Softball Skills Progression
 - Focus Quiz: There are no objectives for this lesson
 6. Baseball and Softball Rules and History
 - Identify common rules and regulations of baseball and softball
 - Examine common strategies used by baseball and softball players and teams
 7. Volleyball Skills Progression
 - Focus Quiz: There are no objectives for this lesson
 8. Volleyball Rules, Rotation, and Scoring
 - Identify the rules and regulations of volleyball
 - Examine common strategies used by volleyball players and teams
3. **Individual Sports**
 1. Golf Skills
 - Introduction: There are no objectives for this lesson
 2. Golf Rules and Scoring
 - Identify common rules, regulations, and scoring techniques used when playing golf
 - Examine common strategies used by golf players
 - Investigate the workings and personalities of the Professional Golfers Association
 3. Tennis Skills and Rules
 - Introduction: There are no objectives for this lesson
 4. Lifelong Recreation Activities
 - Introduction: There are no objectives for this lesson
4. **Final Exam**
 1. Final Exam
 - There are no objectives for this lesson.

APPENDIX A CURRICULUM

A.3 ELECTIVES K – 12 AND OTHER CLASSES

This document is part of Appendix A: Curriculum.

It includes alignment documents for electives and other classes for students in Kindergarten through Grade 12.

- Anatomy and Physiology 1
- Animation
- Art History
- Art in World Cultures
- Astronomy 1
- Career Planning and Skill Development
- Careers in Criminal Justice
- College Prep with ACT
- College Prep with SAT
- Concepts of Engineering and Technology
- Cosmetology 1
- Cosmetology 2
- Culinary Arts
- Digital Photography 1
- Driver's Education
- Early Childhood Education
- Educational Technology and Online Learning K
- Educational Technology and Online Learning 1
- Educational Technology and Online Learning 2
- Educational Technology and Online Learning 3
- Educational Technology and Online Learning 4
- Educational Technology and Online Learning 5
- Educational Technology and Online Learning 6
- Educational Technology and Online Learning 7
- Educational Technology and Online Learning 8
- Freshman Success
- Health Science 1
- Health Science 2
- Health Science Public Health
- Home Life
- Introduction to Computer Applications
- Introduction to Drawing
- Introduction to Graphic Design
- Medical Terminology 1
- Senior Success
- Sports Management

What you will learn in this course

Anatomy and Physiology 1a: Introduction

Whether you plan on pursuing a career in health sciences or simply looking to gain an understanding of how the human body works, you'll first need to understand the relationship between anatomy and physiology. Learn how to read your body's story through understanding cell structure and their processes, and discover the functions and purposes of the skeletal, muscular, nervous, and cardiovascular systems, as well as diseases that affect those systems.

Unit 1: Human Body Organization

While Anatomy and Physiology courses are required for students beginning their journeys to a career in a health science, they can also be of great value to others who are simply wanting to improve their own health and wellbeing. Just as it's easier to navigate a foreign country if you understand the language spoken, it's easier to navigate the human body if you understand the terminology related to the forms and functions of this fascinating area of study. If you're lost in

Italy, hopefully you have a translation app. If you're lost and trying to figure out how one symptom might be a clue to a larger problem in a patient, this material will help you navigate your way through body systems.

What will you learn in this unit?

- Define and discuss the terms anatomy and physiology and their relationship to one another
- Describe the levels of organization of the human body from simple to complex
- Define and describe the anatomical positions and directional terms used in human anatomy
- Locate and describe the main regions, sections, and cavities of the body

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Activity	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Chemistry of the Body

Remember how we talked about one cell being smaller than a period? It's mind-blowing to think that something so small has so much control over all of our body systems. There are over 200 different types of cells in the body that make up a total of 100 TRILLION cells in one person. Think about it for a minute: that number is the number 1 followed by 14 zeroes!

Let's take a look at how cells are designed to make sure the human body stays healthy and balanced. Understanding cell design and reproduction is key to understanding how each body system works and how they interact to sustain life.

What will you learn in this unit?

- Summarize the relationships among homeostasis, control systems, and feedback loops
- Explain the structure and function of typical cells

Pennwood Cyber Charter School Application

- Explain mitosis and meiosis: their similarities and differences
- Describe and discuss how damage to one type of cell and/or tissue may impact the function of other cells and tissues

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: The Skeletal System

Can you imagine what it would be like if you didn't have any bones and were only made up of muscle and skin? You wouldn't be able to walk very well, type on the keyboard or, certainly, be able to dance! There are 206 bones in the adult human skeleton. When we are born, we have more than 250 bones in our bodies, and as we grow and develop, some of the smaller bones fuse together to form stronger, longer and less pliable bone. The skeleton is not only what determines the shape and size of an individual, but it allows us to walk upright and perform the activities of daily life.

What will you learn in this unit?

- Describe the structure and function of bones
- Identify the different types of bones
- Differentiate between the axial and appendicular skeleton
- Classify joints and their specific functions
- Summarize common diseases and disorders of the skeletal system

UNIT 3 Assignments

Assignment	Type
Unit 3 Critical Thinking Questions	Homework
Unit 3 Lab	Homework
Unit 3 Activity	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: The Muscular System

Sit perfectly still while you look at your computer screen. You might think that none of your muscles are moving, but they are. The diaphragm, the sheet of muscle that rests under your lungs, is contracting and relaxing to facilitate your breathing when you're at rest or in motion. Muscles also perform other functions that you may not have considered; not only does the muscular system move your limbs, it also interacts with other body systems to support vital movements around your body. Let's see what muscles do for you.

What will you learn in this unit?

- Explain the structure and function of muscles and muscle tissue
- Describe the sliding filament theory
- Interpret the names of various muscles based on Latin terms
- Distinguish between a muscle strain and other muscle injuries

UNIT 4 Assignments	
Assignment	Type
Unit 4 Critical Thinking Questions	Homework
Unit 4 Lab	Homework
Unit 4 Activity	Homework
Unit 4 Discussion 1	Discussion
Unit 4 Discussion 2	Discussion

Anatomy and Physiology 1a Midterm Exam

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first four units in this course (Note: You will be able to open this exam only one time.)

MIDTERM Assignments	
Assignment	Type
Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 5: The Nervous System

Snap your fingers. Can you imagine that in the time it took you to snap, a nerve impulse could travel the length of a football field? Now, think about an amazingly fast relay race. Your nervous system is like a relay: the baton gets passed from one group of cells to the next to deliver a message with lightning speed. It's not one individual that carries the baton the length of the football field; it's multiple people passing the baton across the length of the impulse to make the movement or sensation happen. Once you examine all the individual parts of the nervous system and how they work together, you'll appreciate how fascinating it is.

What will you learn in this unit?

- Outline the organization and functions of the central and autonomic nervous systems
- Locate and identify the major regions of the brain and describe their functions
- Analyze the basic structure and functions of the cranial nerves, spinal cord, and special sense organs
- Discuss common diseases and disorders of the neurological system

UNIT 5 Assignments	
Assignment	Type

Unit 5 Critical Thinking Questions	Homework
Unit 5 Lab	Homework
Unit 5 Activity	Homework
Unit 5 Discussion 1	Discussion
Unit 5 Discussion 2	Discussion
Unit 5 Quiz	Quiz

Unit 6: The Integumentary System

The integumentary system is one of the most unappreciated in the body. Most people might guess that the brain, heart, or lungs are the most important organ in the body, but the integumentary system plays a vital role in maintaining homeostasis and protecting all of these other important organs. Let's learn what makes the integumentary system so important.

What will you learn in this unit?

- Analyze the structure and function of the integumentary systems
- Discuss potential alterations in skin integrity
- Demonstrate the knowledge and skill related to performing effective hand hygiene
- Identify and analyze common diseases and disorders of the integumentary system

UNIT 6 Assignments	
Assignment	Type
Unit 6 Critical Thinking Questions	Homework
Unit 6 Lab	Homework
Unit 6 Activity	Homework
Unit 6 Discussion 1	Discussion
Unit 6 Discussion 2	Discussion
Unit 6 Quiz	Quiz

Unit 7: Essential Knowledge About Blood

Have you ever accidentally cut yourself so badly that your blood started to pool? As horrifying as that experience can be, it's also fascinating to consider exactly what that deep red liquid is. Blood is a tissue that is made up of millions and millions of cells and chemicals that are dissolved within it. Like other body systems, it has multiple intricate parts that work together to perform functions within its own assigned body system and coordinate activities with other body systems. It's the levels of the various components of blood, the path they take to circulate in the body, and their relationship with our heart and lungs that contribute to maintaining homeostasis.

What will you learn in this unit?

- Distinguish between the various types of blood vessels
- Demonstrate knowledge of the composition of blood
- Identify the different ABO compatibilities
- Describe various disorders and diseases of the blood and its components

UNIT 7 Assignments	
Assignment	Type
Unit 7 Critical Thinking Questions	Homework
Unit 7 Lab	Homework
Unit 7 Activity	Homework
Unit 7 Discussion 1	Discussion
Unit 7 Discussion 2	Discussion
Unit 7 Quiz	Quiz

Unit 8: The Cardiovascular System and The Heart

We've all seen images on television of someone dramatically grabbing their chest and dropping to the ground, presumably having a heart attack. These significant injuries are a result of problems within the heart that are similar to the flickering of electricity in a room or clogged pipes in a sink. As you move through this unit, you will learn about the power grid and the plumbing in the heart, what happens when they are in top condition, and what happens when there is a disruption in service.

What will you learn in this unit?

- Describe the structure and function of the heart and circulatory pathways
- Compare and contrast systemic and pulmonary circulation
- Summarize the path for electrical conduction in the heart
- Discuss common diseases and disorders that affect the cardiovascular system

UNIT 8 Assignments	
Assignment	Type
Unit 8 Critical Thinking Questions	Homework
Unit 8 Lab	Homework
Unit 8 Activity	Homework
Unit 8 Discussion 1	Discussion
Unit 8 Discussion 2	Discussion
Unit 8 Quiz	Quiz

Anatomy and Physiology 1a Final Exam

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from units five to eight in this course – the last four units. (Note: You will be able to open this exam only one time.)

FINAL Assignments	
Assignment	Type
Final Exam	Exam
Final Exam Discussion	Discussion

What you will learn in this course

Anatomy and Physiology 1b: Discovering Form and Function

Examine the form and function of even more body systems. Learn about the structure, function, and interrelation between the lymphatic, immune, respiratory, digestive, urinary, and endocrine systems. The reproductive system is also discussed along with hereditary traits and genetics. And discover the importance of accurate patient documentation as well as the technology used in the industry.

Unit 1: The Lymphatic and Immune System

As you've already learned, the lymphatic and immune system is one of the major body systems. Some texts will label this body system as simply 'lymphatic' and exclude the immune system perhaps because you can't see it. For the purposes of this course, however, we're going to combine the lymphatic and immune systems so that you develop an understanding of how these

two systems work together to protect the human body from bacteria, viruses, and harmful cells within the body (in autoimmune disease and cancer for example).

What will you learn in this unit?

- Describe the structure and function of the immune system
- Compare and contrast the different types of immunity
- Explain the relationship between the lymphatic and circulatory systems
- Discuss common diseases and disorders of the lymphatic and immune system (etiology, prevention, pathology, diagnosis, treatment, and rehabilitation)

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Activity	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: The Respiratory System

It's obvious that the respiratory system is important. All cells of the body require energy, and this energy cannot be obtained through chemical reactions without oxygen. The respiratory system not only provides the route to collect the oxygen that is used in each of the metabolic processes that sustain life, but it also provides the route to rid the body of carbon dioxide, the by-product of many of these metabolic processes. In this unit you will examine the structures that support the respiratory system, explore how oxygen is brought to the sites of cellular metabolism to help maintain homeostasis, and learn what happens when the respiratory system is compromised. Now, take a deep breath and read on.

What will you learn in this unit?

- Describe the structure and function of the respiratory system

Pennwood Cyber Charter School Application

- Compare and contrast ventilation and respiration
- Explain gas exchange
- Discuss common diseases and disorders of the respiratory system (etiology, prevention, pathology, diagnosis, treatment, and rehabilitation)

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: The Digestive System

The digestive system is quite familiar to us since we are aware that we use it several times a day. There are so many mechanical and chemical processes, however, that take place to ensure the food we eat is digested and absorbed for use by the body. We might not realize just how complex and critical this body system is. Prepare to be amazed.

What will you learn in this unit?

- Describe the organization of the digestive system
- Explain the structure and function of the digestive system
- Discuss the six digestive processes and the digestive enzymes
- Describe diseases and disorders of the digestive system

UNIT 3 Assignments	
Assignment	Type
Unit 3 Critical Thinking Questions	Homework

Unit 3 Lab	Homework
Unit 3 Activity	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: The Urinary System

We might not enjoy speaking about the functions of the urinary system in our everyday lives, but this body system is critical to our health and to our body's ability to maintain homeostasis. It's important to understand the urinary system but also the important relationships between this system and others, such as the circulatory system. Did you know that the bladder can hold 1000 ml—or one whole liter—of urine?

What will you learn in this unit?

- Describe the organization of the urinary system
- Explain the structure and function of the urinary system at both a macro and micro level
- Compare and contrast the female and male urinary systems
- Explain how urine is formed and excreted from the body
- Describe diseases and disorders of the urinary system

UNIT 4 Assignments	
Assignment	Type
Unit 4 Critical Thinking Questions	Homework
Unit 4 Lab	Homework
Unit 4 Activity	Homework
Unit 4 Discussion 1	Discussion
Unit 4 Discussion 2	Discussion
Unit 4 Quiz	Quiz

Anatomy and Physiology 1b Midterm Exam

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first four units in this course (Note: You will be able to open this exam only one time.)

MIDTERM Assignments	
Assignment	Type
Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 5: The Reproductive System and Genetics

The differences between men and women enable us to create unique and precise human offspring. How can we predict what diseases individuals will have, and how specifically do human beings grow from being tiny cells of fertilization? It's truly fascinating to consider that each of us exists based on odds similar to winning the lottery. When someone tells you that you're one in a million, you're actually going to respond, "no, I'm one in fifteen million." Read on to find out why!

What will you learn in this unit?

- Compare and contrast the organization of the male and female reproductive systems
- Explain the structure and function of the reproductive system
- Discuss genes and chromosomes from conception to birth
- Understand how a negative is used to create an image print
- Describe common diseases and disorders of the reproductive system

UNIT 5 Assignments	
Assignment	Type
Unit 5 Critical Thinking Questions	Homework
Unit 5 Lab	Homework

Unit 5 Activity	Homework
Unit 5 Discussion 1	Discussion
Unit 5 Discussion 2	Discussion
Unit 5 Quiz	Quiz

Unit 6: The Endocrine System

This is the last body system that you will explore in this course. Have you decided yet which one you feel is the most important? Which one, if it fails, will impact a person's life the most? Have you thought about whether breathing is more important than the message the brain sends to the lungs to perform the action of breathing? Is your decision firm? What if you now learn that there are two organ systems that work together more than any others to maintain homeostasis? Would this change your mind? In this unit you are going to learn about the intricate ways that the glands and organs of the endocrine system work with the nervous system to ensure that all the hormone, electrolyte, and fluid levels are kept in balance. After working through this unit, you'll be asked which is truly your favorite unit and the one that you believe plays the most important role in sustaining life.

What will you learn in this unit?

- Describe the organization of the endocrine system
- Explain the structure and function of organs of the endocrine system
- Explain how the endocrine system maintains homeostasis
- Describe diseases and disorders of the endocrine system

UNIT 6 Assignments	
Assignment	Type
Unit 6 Critical Thinking Questions	Homework
Unit 6 Lab	Homework
Unit 6 Activity	Homework
Unit 6 Discussion 1	Discussion
Unit 6 Discussion 2	Discussion
Unit 6 Quiz	Quiz

Unit 7: Assessing and Documenting Anatomy and Physiology

Have you ever read a journal or a personal memoir? Even a newspaper that recalls a series of events? If you have, you know that what makes them complete and informative is detail. The use of dates, times, and specific words helps the reader understand exactly what is being described by the author. A complete health assessment allows a healthcare provider to develop a full story or sequence of events that apply to a person's situation. The recording of this information on paper or electronically ensures that care can be provided in a consistent, safe way.

What will you learn in this unit?

- Identify purposes of a healthcare record
- Discuss legal guidelines for documentation
- Describe confidentiality and the laws that govern patient privacy
- Describe the different methods of data collection
- Conduct a health history
- Organize a basic body systems physical assessment

UNIT 7 Assignments	
Assignment	Type
Unit 7 Critical Thinking Questions	Homework
Unit 7 Lab	Homework
Unit 7 Activity	Homework
Unit 7 Discussion 1	Discussion
Unit 7 Discussion 2	Discussion
Unit 7 Quiz	Quiz

Unit 8: The Science & Technology of Anatomy & Physiology

You've already learned that anatomy and physiology courses are required for students who are beginning their journey to a career in health science or for individuals who want to improve their own health and wellbeing. Along this journey, you may have had questions about where it all began and what the proof is behind certain things that you read, or maybe you've even

questioned why you would possibly need to know some of this material. This unit will bring you back to the beginnings of anatomy and physiology as a science and hopefully answer some of the remaining questions you have about why anatomy and physiology is important. You’ll also explore more about the various healthcare careers that use anatomy and physiology as a foundational tool in their scopes of practice.

What will you learn in this unit?

- Describe the history of anatomy and physiology as a science
- Distinguish between the scopes of practice of various healthcare professions
- Differentiate between qualitative and quantitative research
- Discuss examples of different types of research studies that can advance the science of anatomy and physiology
- Illustrate the ways in which healthcare professionals work collaboratively

UNIT 8 Assignments

Final Exam	Exam
Final Exam Discussion	Discussion

What you will learn in this course

Animation 1a: Introduction

Have you ever watched a cartoon or played a video game where the animation of characters captivated you so much you wanted to create your own? If so, it's time to immerse yourself in the world of animation. Meet the industry players such as directors, animators, and 3D modelers. Develop your story by exploring design, the 12 principles of animation, creating a storyboard, and leveraging the tools of the trade. Let's bring your story to life with animation!

Unit 1: Basics of Animation

As a kid, you had your favorite cartoon to watch. You never missed a show, you probably binge-watched entire seasons in one day, and you were always left wanting more. But as you became more and more engrossed by the magic unfolding before your eyes, one question kept creeping into your mind: How did they do that? Not a question that can be easily answered; and soon the voice asking that question grew louder and louder in your brain until it was impossible to think of

anything else, and your thirst for knowledge needed to be quenched. This has led you here, right now, to learn the secrets of this magical world; and make no mistake, this is magic. After all, magic is really just unexplained science. So let’s dive into that science.

What will you learn in this unit?

1. Trace the origins and early history of the art of animation
2. Explore how the eye and brain process moving images
3. Compare the differences between past animation techniques and current animation technologies.
4. Understand the 12 principles of animation that form the foundation of animation
5. Apply two principles: squash and stretch and straight ahead action

UNIT 1 Assignments

Unit 1 Activity 1	Homework
Unit 1 Activity 2	Homework
Unit 1 Quiz	Quiz
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion

Unit 2: Hand-Drawn Animation

Have you ever told a story to your friends? Maybe it was something exciting that just happened to you? In the moment of retelling that awesome experience, what do your hands tend to do? Humans move their hands when telling a story, especially when it makes them passionate. Now imagine people love your story so much that everyone wants to hear it, and sometimes more than once. Are you going to retell the same story over and over again? What if there were a way it could be retold without repeating yourself to every person who wants to hear it, but—and here’s the catch—you still get to use your hands? Dating back to the tales of the earliest cave dwellers, prehistoric humans figured out how to retell a story consistently. Welcome to hand-drawn animation.

What will you learn in this unit?

1. Understand the history of hand-drawn animation
2. Recognize common forms of traditional animation that are still in use today
3. Apply the elements and principles of design
4. Identify differences between the two most common forms of hand-drawn animation: Disney animation and Japanese anime
5. Explain the effect of animation on today's society

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Activity 1	Homework
Unit 2 Activity 2	Homework
Unit 2 Quiz	Quiz
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion

Unit 3: Camera Animation and Camera Angles

Thor lies beaten under the boot of Thanos who is about to strike him with a final blow. Suddenly, Thanos is struck by Mjolnir, the hammer only Thor is able to wield. Thanos turns to see who performed the impossible feat, and he can't believe his eyes. Standing before him, wielding the hammer and challenging him to a fight, is Captain America. Great moments like these are remarkably memorable, but they can't be executed without making the right decision about where to position the camera. Get ready to master the role of the silent character that most audience members overlook: the camera.

What will you learn in this unit?

1. Recognize the common camera angles used in animation
2. Compare the effectiveness of different camera angles and what they contribute to the mood of the animation
3. Explain camera movements used in animation to emphasize the effects of different camera angles

4. Tell a story through visuals and dialogue—in short, make a live action video!

UNIT 3 Assignments	
Assignment	Type
Unit 3 Critical Thinking Questions	Homework
Unit 3 Activity 1	Homework
Unit 3 Activity 2	Homework
Unit 3 Quiz	Quiz
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion

Unit 4: The Computer Animation Industry

Ever wonder how magicians create magic in movies and video games? The magicians we’ll be talking about are directors, animators, and 3D modelers, and their magic wands are computers, capable of performing an infinite number of algorithmic formulas that are too difficult to solve with calculators. Come inside and see how something created so easily in the imagination comes “alive” in the virtual world of computer animation.

What will you learn in this unit?

1. Understand the basics of computer animation
2. Explain the challenges faced by creators involved in major movies or video games and how they solve them
3. Describe how films and video games are created from start to finish
4. Identify the intricacies of post-production and other aspects involved in the of creation of motion pictures and video games
5. Judge the impact of technology on the business of animation

Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 5: Digital 2D Animation

It's time to create computer animation! Now that you have knowledge about how animation works, it's time to put that knowledge into practice by creating an animation cycle—that is, an animation specifically made to be looped—commonly used in the industry. To do this, you'll get to try out a new animation tool: the animation software known as Tupi.

What will you learn in this unit?

1. Describe the Tupi user interface
2. Apply a basic understanding of Tupi's tools
3. Create an animation cycle with a moving background
4. Explain one of the most important principles of animation: timing

Unit 5 Quiz	Quiz
Unit 5 Discussion 1	Discussion
Unit 5 Discussion 2	Discussion

Unit 6: Animated Emotion

People directly communicate to one another through emotions. If animation is to succeed at simulating the real world, it is only natural to expect that animators will understand how facial expressions and body movement works. The main purpose of creating a film or interactive story is to communicate a message to the audience—that is, what the animators want the audience to experience when watching it. In this unit, you will think about what kind of message you want to express to the audience and how to communicate that message through animation.

What will you learn in this unit?

1. Explain the rules governing motion in the world of animation
2. Understand different styles of acting and expressions
3. Develop your message to the audience through planning and management
4. Communicate your message through expressions

Unit 7: Visual Storytelling

Want to go to the movies? Well, why do people go? Because of the story! It draws them in and makes them care about the characters, and it lets them immerse themselves in another world. Storytelling dates back to the days of the cave dwellers, and it remains the best way to entertain modern humans. How do you make sure your story will captivate the audience? We have the secrets and the tricks right here—come along and we will tell you a story about telling a story!

What will you learn in this unit?

1. Understand the three-act script structure
2. Classify different types of story patterns
3. Identify the importance of story in animation
4. Give characters depth and personality
5. Create storyboards for animation

Unit 8: The Tools We Use

The ever-growing number of tools used in both the video game and film industries seems to increase by the month. Each tool extends the boundaries of the cutting-edge technology used to confound the minds of amazed audience members—which includes skeptical professionals who

you might well think had already seen it all. In this unit, you will be introduced to the core tools that form the foundation of video game and film production and learn how to apply them for the purposes of your own animation.

What will you learn in this unit?

1. Understand traditional and digital tools used in the industry
2. Recognize how each tool is vital to specific stages in the production pipeline
3. Identify common file formats used in the industry and why they are chosen over other formats

What you will learn in this course

Animation 1b: Animating Your Creativity

It's time to start animating like the pros! In this hands-on course, you'll immediately start exploring the software Blender, your gateway to 3D modeling, computer animation, and postproduction procedures used in the film industry. Discover 3D modeling and animation of characters. Explore the basics of human anatomy and form to apply rigging, joints, and texture. Examine rendering and lighting effects and how to apply sound. And discover careers so you can start using your new skills right away.

Unit 1: Introduction to Blender

This unit marks your introduction to Blender, one of the industry's most powerful core programs—in fact, it is used to create the kind of video games and movies you see in the media today. Best of all, Blender is designed for beginners, regardless of your level of computer literacy. Your

introduction to Blender will also be your gateway to 3D modeling, computer animation, and postproduction procedures used in the film industry.

What will you learn in this unit?

1. Navigate Blender’s interface
2. Demonstrate a basic understanding of 3D modeling
3. Perform the basic steps required to create computer animation

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Activity 1	Homework
Unit 1 Activity 2	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Jumping into 3D Animation

Ready to finally see what it takes to create 3D animation? In this unit, you will delve further into Blender to discover more of the power it offers in creating three-dimensional animation. You will visualize different attributes of animation and explore the concept of object interaction to understand why objects move the way they do. Once you complete these lessons you will have a newfound appreciation and critical eye for computer animation.

What will you learn in this unit?

1. Recognize the different types of 3D animation
2. Explain kinematic animation
3. Demonstrate the concept of F-curves in speeding up and slowing down animation
4. Navigate the graph editor used in 3D animation
5. Apply the following principles of animation: anticipation, pose to pose, and slow in/slow out

Unit 2 Quiz	Quiz

Unit 3: Introduction to Modeling & Texture

Have you ever watched an extremely vivid and polished animated movie or 3D video game and wondered to yourself, “How do they create those 3D characters?” In this unit, you’ll begin to explore the basic tools and techniques involved in creating 3D models for characters, and then you’ll even get to create a 3D model of your own!

What will you learn in this unit?

1. Explain the basic principles of 3D modeling
2. Understand the basic principles involved in texturing 3D models
3. Apply materials, displacement maps, and textures to 3D models
4. Use basic modeling tools to create complex objects from primitive ones

Unit 4: The Basics of Batch Render

Watching the beauty and the awe-inspiring moments of CGI is one of the great attractions of the silver screen today. Everything from the grandest shots to the most beautiful surroundings may be taken for granted by the audience; however, a shot that lasts as little as two to three seconds takes a lot of work and collaboration by a group of people. The process of rendering brings all the elements of that hard work into one seamless sequence of images. Now it's time for you to become part of that process.

What will you learn in this unit?

1. Understand the rendering process, including anti-aliasing, multi-passes, and channels
2. Explain the basics of lighting effects and create a system to light up a scene
3. Adjust render settings to create a desired effect or the final look of a model and/or an animation
4. Render an image and batch render an animation

Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 5: Introduction to Rigging: Joints & Weights

Without rigging, the magic of animation does not exist, which makes it essential that you understand some of the basic science behind movement. After all, shouldn't a realistic depiction of the way characters move in a digital world reflect the physics of our own movement in the real world? To accomplish this, we will examine how a virtual skeleton is constructed inside a beautifully created 3D model and consider the careful procedure of attaching that skeleton to a sophisticated puppet that is unlike anything you have ever seen.

What will you learn in this unit?

1. Construct a skeletal joint system in Blender
2. Recognize the basic functions of joint orientation and how joints move an object like a humanoid character
3. Understand the relationship between the joint system and the “skin” of a 3D model
4. Produce an animatic that is crucial to the production of computer animation

Unit 6: Human Anatomy and Form

Animated characters are not real, so animators do not really need to understand the human body, right? Wrong! You do need to know how to draw the human form, including its bone structure and muscles, and appreciate how body mechanics perform in the real world to draw not only believable characters but also stylized, animated ones. Together, we will tackle the basics and then you can let your imagination fly, while taking your audience along for the ride.

What will you learn in this unit?

1. Identify both the facial and body proportions of a human
2. Describe the basic anatomy of the human body
3. Discuss the importance of poses in an animation and how they communicate emotion
4. Create exaggerated poses using a functional character rig

Unit 7: Connecting Sound to Animation

Sound in your animation is just as important as visuals; without it, people would never jump from their seats while watching scary horror movies. Why? Because of the anticipation! Sound can heighten excitement and create a sense of realism or exaggeration. In this unit, you will discover the key role sound plays in animation and see how sound is imported, edited, and integrated with visual elements.

What will you learn in this unit?

1. Identify basic sound elements in movies and video games
2. Describe the basics of sound editing in Blender
3. Explain how lip syncing is created
4. Combine images and sound

Unit 8: A Career in Animation

Animation is fun stuff! Who would not want to spend their days making amusing characters do silly things to entertain audiences? On the other hand, perhaps you have a more serious side and would like to apply your talents to medicine, the military, or engineering — that is possible for animators too! Whatever your dream, today is the first day on the path to a lifetime of fulfilling work as an animator. Seize the day!

What will you learn in this unit?

1. Create a portfolio and demo reel to present to potential employers
2. Describe concerns related to intellectual property and copyright law
3. Find training opportunities and develop your networking skills
4. Learn how to maintain an established business relationship

Art History

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

Welcome to the first semester of Art History! In this course, the student will take up the question “What is art?” as he explores the artistic endeavors of early civilizations. Early in the course, the student will explore some of the basic elements and principles of art and its role in human history and the development of culture. He will also think about the ways that a work of art interacts with human sensory perception to produce a particular effect, as well as various other factors that affect the interpretation of a work of art. Once the student has obtained a basic foundation in art theory, he will begin to examine the history of art from its earliest manifestations in prehistoric times up through the ancient Egyptian civilization.

SEMESTER B

Welcome to the second semester of Art History! In this course, the student will build upon his basic foundation in art theory to examine the history of art. He will trace the history of art from ancient Greece to the Roman Empire. Along the way, the student will encounter art forms such as pottery, architecture, and sculpture. By the end of the course, the student will not only have acquired a knowledge of ancient art history, the student will also have a better understanding of art as both a reflection and engine of history.

Course Outline:

SEMESTER A

1. Journey Through Ancient Art History

1. What You Will Learn

- Take a "virtual" field trip to the Metropolitan Museum of Art
- Examine how an artist's feelings are evident in his or her works
- Consider how your own culture influences your perspective of art
- Respond to the question “What is Art?”

2. Beginning the Journey

- Examine the three viewpoints of art
- List and explain the five major reasons art is created
- Follow the analytical steps for art history and art criticism

3. Elements of Art

- List and apply the elements of art
 - Explore the influence of nature on art
4. The Principles of Art
- Examine, identify, and apply the principles of art
 - Consider choices, intentions, and strategies artists employ
 - Develop a visual vocabulary and appreciation of the visual arts

2. **Art at the Start: Early Civilization**

1. Prehistoric Expression: Making Pictures
- Discover, examine, and define prehistoric art
 - Explore cave paintings
 - Assess cave art in Altamira, Spain, and its direct significance to the journey of human history
 - Appraise cave art in Lascaux, France, in terms of geography, discovery, and humankind's early complex visual representation
2. Prehistoric Expression: Stone Monoliths
- Identify and interpret Paleolithic art
 - Develop new art vocabulary related to Stone Age art
 - Explore the history and giant stone monoliths of Easter Island
 - Explore the history and mystery of Stonehenge
 - Apply, transfer and correlate visual observation with poetic writing
3. Fertile Crescent: Sumerian Art and Architecture
- Explore the earliest civilizations that developed in the Fertile Crescent
 - Learn about the civilization of ancient Sumeria
 - Discover, view, and explore Sumerian art and architecture
4. Fertile Crescent: Assyrian and Neo-Babylonian Art
- Examine the history and art of the Assyrian Empire
 - Discover the Neo-Babylonian Period and related architecture
 - Examine the history of Persia and its pottery
5. Art History A Midterm Project
- Select a topic for an original research project
 - Use information from a variety of sources to formulate answers to the research questions
 - Follow MLA style for documenting information from sources

3. **Egypt: Art on the Nile**

1. An Oasis of Art: Geography and History
- Explore the geography of the Nile River Valley
 - Read an overview of the history of Ancient Egypt
 - Get acquainted with the essentials of Egyptian religious beliefs
 - Learn about the significance of papyrus and the method of its production
 - Examine the practice and process of mummification
2. An Oasis of Art: Art Written in Stone
- Revisit and gain architectural knowledge of the Step Pyramid and the pyramids of Giza
 - Understand and appreciate the religion of ancient Egypt
 - Gain knowledge and understanding of hieroglyphics as well as the ability to use picture writing

- Look at the significance and role of tomb painting
- 3. A Grand New Egypt: Monuments to a Grand Egypt
 - Learn about that renowned and mysterious monument, the Sphinx
 - Explore the obelisk
- 4. Grand New Egypt: King Tut and the New Kingdom
 - Examine important events, rulers, and achievements of the New Kingdom
 - Refine your understanding of art and architecture from the three main eras of ancient Egypt
 - Examine the life of one of ancient Egypt's most powerful female pharaohs
 - View antiquities from ancient Egypt and use your critical thinking skills to explain how these antiquities are representative of the culture to which they belong
- 4. **Final Review and Exam**
 1. Art History A Final Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, keywords and vocabulary terms, and all important concepts that may be covered on this exam
 2. Art History A Final

There are no objectives for this lesson.

SEMESTER B

1. **Greece: Gods and Glory**
 1. The World of Ancient Greece
 - Discover how democracy was born
 - Familiarize yourself with the history and culture of the Early Archaic
 - Archaic, Classical, and Hellenistic periods in Greek history
 2. Greek Architecture
 - Identify the three types of Greek columns
 - Examine the columns' application in structures found in Greece and in the United States
 - Explore Greek buildings and temples
 - Develop a comprehensive understanding of the Parthenon by examining its origin, history, and architecture
 3. Greek Pottery
 - Examine Greek artistic influences
 - Expand your knowledge of pottery
 - Explore the purpose, function, and intention of Greek pottery
 4. Greek Sculpture: An Overview
 - Distinguish the three major periods of Greek sculpture
 - Classify sculpture according to its characteristics
 - View examples of sculpture from each period
 5. Archaic Sculpture
 - Discover how the Archaic style of sculpture developed
 - Learn to recognize the characteristics of Archaic sculpture
 - Distinguish Archaic sculpture from Greek sculpture of other periods
 6. Classical Sculpture
 - Become acquainted with the characteristics of Classical Greek sculpture

- Study the Discobolus, the epitome of the Classical period
 - View sculpture by Classical sculptors Myron and Praxiteles
7. Hellenistic Sculpture
 - Study the influences Alexander the Great had in developing Hellenism
 - View Hellenistic sculpture and its characteristics
 8. Art History B Midterm Project
 - Select a topic for an original research project
 - Use information from a variety of sources to formulate answers to the research questions
 - Follow MLA style for documenting information from sources

2. **Ancient Rome: Art of an Empire**

1. Introduction to Ancient Rome: History and Culture
 - Explore early Rome
 - Look at the growth of the Roman Republic
2. Introduction to Ancient Rome: Roman Art Overview
 - Examine the development of Roman art
 - Gain an understanding of Roman sculptures
3. Roman Sculpture: Greek Influences
 - Understand the influence of the Greeks on Roman sculpture
 - Explore some of the Vatican Museum's examples of Greco-Roman sculpture
4. Roman Sculpture: Roman Portraiture
 - Explore Roman portrait sculptures in detail
 - Discover the public and private use of portrait sculpture
 - Study the use of portraiture on Roman coins and gems
5. Roman Architecture: An Introduction
 - Understand Roman architecture from an historical perspective
 - Learn the basics of Roman architecture
 - Develop a visual sense of Roman architecture
6. Roman Architecture: Arches and Columns
 - Explore how the Romans developed the arch
 - Study Roman use of columns
 - Reflect on how the Greeks influenced Roman columns
7. Domestic Roman Architecture
 - Explore the development of Roman domestic architecture
 - Discover the impressive architecture of Roman palaces

3. **Final Review and Exam**

1. Art History B Final Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, keywords and vocabulary terms, and all important concepts that may be covered on this exam
2. Art History B Final

There are no objectives for this lesson.

What you will learn in this course

Art in World Cultures

Who is the greatest artist of all time? Is it Leonardo daVinci? Claude Monet? Michelangelo? Pablo Picasso? Is the greatest artist of all time someone whose name has been lost to history? You will learn about some of the greatest artists while also creating art of your own, including digital art. We will explore the basic principles and elements of art, learn how to critique art, and examine some of the traditional art of the Americas, Africa, and Oceania in addition to the development of Western art.

Unit 1: Introduction to the Visual Arts

Pablo Picasso once said, “The purpose of art is washing the dust of daily life off our souls.” Art speaks to our emotions and imaginations. It allows us to see the world in different ways and fulfill the need to create. In this unit, we will begin our exploration of the history of art around

the world. We will learn about some of the common forms of visual art and discuss why people create art. We will also explore some of the careers that relate to art history.

What will you learn in this unit?

- Define “visual art” and distinguish visual arts from other forms of art.
- Identify common forms of visual art.
- Discuss why people create art.
- Discuss art movements and art periods.
- Describe career options related to art history and the study of art.

Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: The Elements and Principles of Art

In this unit, we will explore some of the aspects that help make great art great. We’ll learn more about the basic building blocks of artworks, including lines, color, texture, shape, form, and space. We’ll also discuss how these building blocks are used with art by looking at some of the design principles that artists use to arrange art elements within a piece of art. We will discuss design principles such as harmony, proportion, balance, and dominance.

What will you learn in this unit?

- Define art concepts such as hue, value, shape, form, and balance.
- Identify the elements of art.
- Identify some of the design principles that artists use.
- Discuss how the elements of art are used within art pieces.
- Discuss how design principles are used to arrange the elements of art.

UNIT 2 Assignments

Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Critiquing Art

How can you identify a good piece of art? Art critiques can help us better understand artworks and help us identify those pieces of art that illustrate superior skills. In this unit, we will learn more about art critiques, including why we do art critiques and how context can influence them. We will also walk through an art critique of a famous French Romantic painting *The Raft of the Medusa* by Theodore Gericault.

What will you learn in this unit?

- Define art critique.
- Identify some of the benefits of doing art critiques.
- Explain how context can influence an art critique.
- Discuss the steps that can be used to complete an art critique.
- Engage in an art critique of the painting *The Raft of the Medusa*.

Unit 4: Prehistoric Art

When did humans begin creating art? What did the first pieces of artwork look like? What function did early artwork have for people? Prehistoric art represents the earliest human art. Although these artworks are shrouded in mystery, they give us a small glimpse into the lives and beliefs of prehistoric people. In this unit, we'll learn more about some of the artwork that has been found from prehistoric times, including cave paintings, sculptures, and megaliths. We'll explore what is known about these pieces of art and what they might tell us about the people that created them.

What will you learn in this unit?

- Define prehistoric art and discuss why much of this art remains a mystery to archaeologists and art historians.
- Describe cave paintings and discuss some of the theories about why they were created.
- Compare and contrast Paleolithic and Neolithic art.
- Examine prehistoric sculpture and the reasons it may have been created.
- Discuss prehistoric megalith monuments and examine the theories about why these monuments were created.

Unit 4 Discussion 2	Discussion
Unit 4 Quiz	Quiz

Unit 5: Ancient Art

As human societies continued to develop, so did their art. The great ancient societies, such as Ancient Egypt and Ancient Greece, produced some of the most famous pieces of art and

architecture known to the world. In this unit, we will focus on three of the ancient cultures from the Mediterranean and Near East, including the Sumerians, Ancient Egypt, and Ancient Greece. We will examine the characteristics of art from these groups and explore some of the pieces that they produced.

What will you learn in this unit?

- Identify some of the common characteristics of ancient art.
- Discuss the art of ancient Sumerians.
- Explain how Ancient Egyptian religion influenced its art.
- Identify and discuss the styles of Ancient Greek architecture.
- Identify the styles of Ancient Greek sculpture and pottery.

Unit 6: Ancient Roman, Early Christian, and Medieval Art

The period of Western art from the ancient Romans to the medieval period produced some of the world’s most important cathedrals and other grand buildings. Even the ruins of Roman architecture can give us pause with its beauty and advancements. In this unit, we will learn more about the architecture of these periods, as well as some of the other types of art that were produced. These pieces of art and the techniques the artists used helped form the foundations of the Western art we know today.

What will you learn in this unit?

- Describe the features used in Roman architecture.
- Examine early Christian art and its influence on later architecture and art.
- Define Byzantine, migration, and insular art and the characteristics of these art periods.

Pennwood Cyber Charter School Application

- Discuss the characteristics of Romanesque art.
- Identify the common features of Gothic architecture.

Unit 7: The Renaissance

In Western art, the period known as the Renaissance produced some of the most famous works of art, including the *Mona Lisa*, the ceiling of the Sistine Chapel, and *The Last Supper*. These works of art helped shape Western art as we know it and became part of our popular culture. In this unit, we will learn more about the art produced during the Renaissance as well as Early Netherlandish art. We will be introduced to some of the greatest artworks produced in Western art and learn more about how their artists were influenced by the social world around them.

What will you learn in this unit?

- Identify the characteristics of Renaissance art.
- Discuss Early Netherlandish art and its relationship to Renaissance art.
- Explain how other disciplines of study and social factors influenced Renaissance art.
- Examine some of the most famous works of Renaissance art, including those by Leonardo da Vinci, Michelangelo, and Raphael.
- Define Mannerism and discuss how it differed from the art of the High Renaissance.

Unit 8: Art of the Americas

From massive geoglyphs to sculptures made of jade, indigenous cultures in the Americas have created some amazing works of art. In this unit, we will focus on pre-Columbian art in the Americas. In doing so, we will look at art from the Olmec, Maya, Aztec, and Inca cultures as well as art created in North America, such as beadwork, basket art, and totem poles.

What will you learn in this unit?

- Discuss geoglyphs in North and South America.
- Define pre-Columbian art in the Americas.
- Identify prehistoric painting in the Americas.
- Examine art from major cultural empires in Mesoamerica and South America, including the Olmec, Maya, Aztec, and Inca cultures.
- Discuss indigenous art in North America such as beadwork, baskets, and totem poles.

Unit 9: From the Baroque to the Romantics

The Renaissance in Europe is often regarded as the height of art. It produced great masterpieces and some of the greatest artists in history. However, art didn't end when the Renaissance ended. Instead, new artists innovated, revived classical forms, and challenged themselves. In this unit, we will consider four of the main art periods and styles that came after the Renaissance, including Baroque, rococo, neoclassical and Romantic art.

What will you learn in this unit?

- Identify the characteristics of Baroque, rococo, neoclassical and Romantic art.
- Discuss the social and political influences on Baroque, rococo, neoclassical, and Romantic art.
- Explain how art from earlier periods influenced Baroque, rococo, neoclassical, and Romantic art.
- Examine some of the important pieces of art from the Baroque, rococo, neoclassical and Romantic periods.
- Compare and contrast Baroque art with Renaissance art.

Unit 10: Modern Art

During the 19th century, the beginnings of modern art emerged. Styles and periods such as Realism, Impressionism, and Postimpressionism formed the foundation for later art styles and movements. The development of photography also provided artists with both a new art form and new inspiration. In this unit, we will learn more about the art and artists that shaped the early modern period and look forward to postmodern and contemporary art.

What will you learn in this unit?

- Define art movements such as Impressionism, Postimpressionism, Expressionism, and Realism.
- Identify the characteristics of Impressionistic and Postimpressionistic art.
- Describe how modern art movements build on and react to other movements.
- Discuss some of the major artists of Impressionism and Postimpressionism.
- Discuss the beginning of photography and its use as an art form.

Unit 11: African Art

Africa is home to the earliest humans and some of the earliest known art. Although African art has sometimes been dismissed as “primitive,” the art produced in Africa is some of the longest continuously practiced art in the world, and its influences are seen across the globe. In this unit,

we will learn more about premodern African art, including rock art, sculpture, and masks. We will also learn more about some of the most famous examples of African architecture.

What will you learn in this unit?

- Identify the phases of rock engraving found in Africa.
- Describe the sculptures created by different cultures in Africa.
- Discuss the different types of masks created and what materials were used to make them.
- Identify some of the famous architectural creations in Africa.
- Discuss some of the social and natural factors that influenced the creation of art in Africa.

Unit 12: Oceanic Art

Does art reflect the world around us? Can we learn about a culture from the art it produces? Pacific or Oceanic art offers us a chance to explore how the natural world, religious beliefs, and other aspects of culture affect the art created within a group. In this unit, we will examine some of the art created in Polynesia, Micronesia, Melanesia, and Australia, exploring how the art has been influenced by culture, the Pacific Ocean, and other aspects.

What will you learn in this unit?

- Identify some of the characteristics of Oceanic art.
- Describe some of the human sculptures found in Polynesia.
- Discuss how the Pacific Ocean and life on Pacific islands influenced Micronesian art.
- Learn more about Bisj poles and other Melanesian art creations.
- Identify some of the styles of rock art present in Australia.

What you will learn in this course

ASTRONOMY 1A: INTRODUCTION

Ever wondered how the Earth developed and exists in the vastness of space? How do the scientific laws of motion and gravity play a role in its existence? Discover answers to these questions and explore the origin of the universe, the Milky Way, and other galaxies and stars, including the concepts of modern astronomy and the methods used by astronomers to learn more about the universe.

Unit 1: The Universe

We will take a journey through space and time from the beginning to the end of the universe. Can you think of anything larger or more expansive than the universe? How was the universe created? How is the universe changing? What exactly is our universe made from? These are all questions that scientists have been trying to answer since the idea of a universe was formed in the minds of our earliest cosmologists. Astronomers and other scientists have since accumulated

a great deal of knowledge about what has happened—and what is currently happening—since the inception of the universe.

What will you learn in this unit?

- Describe the study of the cosmos.
- Discuss the theory of the origin of the universe.
- Analyze the evidence that supports the Big Bang theory.
- Examine the composition of matter and how it is distributed within the universe.
- Describe the theories of evolution and fate of the universe.

Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Techniques and Tools of the Trade: Studying the Universe

At one point or another, you have probably looked up at the sky at night and thought about how big the universe really is. At times, space can appear like an empty vacuum, and other times, we realize that the universe is filled with such a wide variety of materials, substances, and celestial bodies that it seems more than overwhelming. Scientists have been studying the universe for thousands of years in various ways using many different processes and tools. Today, astronomers follow the scientific method and utilize several types of astronomical tools including binoculars, telescopes, and even software that can replicate the night sky! How will you apply these techniques and tools to study our universe?

What will you learn in this unit?

- Distinguish science from pseudoscience

Pennwood Cyber Charter School Application

- Discuss the impact of scientific research on our society
- Follow the steps of the scientific method to conduct an astronomy investigation
- Choose proper tools and follow safety procedures in the field

Unit 3: The Earth, Moon, and Sun Systems

Day turns into night, and summer turns into fall. Why do we experience these predictable changes on Earth? In this unit, we will explore the systems and interactions between the sun, Earth, and moon. You will learn how the Earth’s motion in space causes us to experience days, nights, and seasons in a cyclic pattern. We will discuss the properties of gravity and how gravity affects the relationships between orbiting bodies in space. You will discover how solar and lunar eclipses occur and examine the characteristics, origin, and phases of the moon.

What will you learn in this unit?

- Learn about the movements of celestial bodies in the sky.
- Describe how the motion of the Earth causes seasons and night-day cycles.
- Identify the characteristics and phases of the moon.
- Explore how the moon’s gravitational pull manipulates tides on Earth.
- Distinguish between a lunar eclipse and a solar eclipse.

Unit 4: Stars

What are stars? Where did they come from? Will stars evolve with time? In this unit you will discover the secrets behind the stars in our night sky. We will solve the mystery behind why and how stars shine. We will explore the characteristics and composition of stars. You will learn how astronomers classify types of stars using the H-R diagram and how stars are identified within the celestial sphere. Finally, we will examine the evolution, or life cycle, of a star from conception to death.

What will you learn in this unit?

- Describe the composition and characteristics of stars.
- Learn how astronomers identify and describe constellations such as Ursa Major, Ursa Minor, Orion, and Cassiopeia.
- Analyze and characterize stars by their physical and chemical properties.
- Explain the use of diagrams and models in obtaining physical data on stars.
- Examine the evolution of stars.

Unit 5: Galaxies

Galaxies are beautiful, majestic, and mysterious places within our universe. Our home in the Milky Way galaxy is a galactic suburb, far from other galaxies. Our Sun is just one of approximately 500 billion stars in our galaxy, meaning that there could possibly be up to 500 billion solar systems, maybe like our own, in the universe. In addition, the Milky Way galaxy is only one of the 50 billion to one trillion galaxies that are thought to exist in our observable universe. Compared with the whole universe, our home, Earth, is like a speck of sand in the largest desert imaginable.

In this unit, we will examine and describe the evolution, organization, distribution, and differences among types of galaxies. You will be able to characterize the movement of galaxies within the universe and describe the properties of our own galaxy, the Milky Way. Finally, we will discover the incredibly mysterious and dark forces that shift and shape galaxies.

What will you learn in this unit?

- Differentiate and describe the types of galaxies within the universe.
- Characterize the Milky Way.
- Identify how galaxies are organized and distributed within the universe.

- Describe the evolution of galaxies.
- Examine the forces that shape galaxies of stars.

Unit 6: The Milky Way

You have just traveled through the universe, exploring the different galaxies that make up outer space. Now, it's time to return to our own galaxy: the Milky Way. The Milky Way galaxy is what houses the solar system within which our planet Earth resides. Just how old is the Milky Way? And what kind of tools do scientists use to understand our galaxy? It's time to drive a little deeper into our home galaxy of the Milky Way.

What will you learn in this unit?

- Find ways to determine the age of the Milky Way
- Discover the oldest planet located in the Milky Way
- Decipher why there are more younger stars than older stars in the galaxy
- Understand Gaia Mapping and how it is used today

Unit 7: Black Holes

Possibly no celestial object has captured the attention and imagination of scientists and lay people the way black holes have. Even before they were officially “discovered,” people noticed areas of darkness in the night sky. Now that we know more about black holes, it seems the questions just keep coming. Their power and force are only beginning to be understood by scientists.

What will you learn in this unit?

- Define black holes and understand why they are important
- Trace the history of black holes
- Answer questions about how we detect black holes, how they form, and how big and strong they are
- Discuss what happens at the event horizon and singularity of a black hole
- Investigate time travel options that black holes might offer

Unit 8: Becoming a Space Professional

Now that we've discussed what the universe is, how it is studied, and where we fit in, you may be eager to explore ways that you can continue learning even more about space! In this unit we'll explore careers in astronomy from astronauts who literally travel through the stars to the crew that supports them on the ground—and much more. Whether you have more technical and mathematical skills, love writing and communication, or want to “stay in school” forever, there is likely a career for you in the aerospace industry.

What will you learn in this unit?

- Understand what skills are required to enter into various space-related careers
- Discuss the roles in the mission control center that support astronauts in space
- Investigate other careers that support space missions and exploration
- Create an education plan that will prepare you for a career in astronomy

Career Planning and Skill Development

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Summary:

As a high school student, it may seem like entering the workforce is right around the corner. It's important that you're prepared. The Career Planning and Skill Development course will introduce you to the workforce by having you explore your interests, values, and skills. Knowing yourself better in this way will help you plan for your future career. As part of this planning process, you will learn about a variety of career fields—from business, to education, to public service. Many career fields may interest you. The course also teaches you the important task of finding a job. You will learn how to write a cover letter and resume, fill out a job application, and act in an interview. You will learn the qualities of a successful employee, and additional career-related skills, such as problem-solving and communication.

Course Outline

1. Introduction to Career Planning

1. Why Do I Need a Job?
 - Differentiate between needs and wants
 - Identify goods and services, and how the economy relates to career opportunities
 - Identify the effects of supply and demand on the job market
2. Career Planning
 - Identify potential career types and categories
 - Identify career research resources
3. Career Expectations
 - Manage career expectations
 - Determine personal values
4. Introduction to Career Planning Unit Test

There are no objectives for this lesson.

2. Self-Assessment

1. My Personality
 - Analyze your interests, aptitudes and skills
2. My Interests, Aptitudes, and Skills
 - Analyze your skills, values, and personality type
 - Identify personal traits suited for certain types of careers
3. My Skills and Values
 - Analyze your skills and values

- Identify personal traits suited for certain types of careers
 - 4. Self-Assessment Analysis Portfolio
 - Analyze the results of self-assessment questionnaires
 - 5. My Education
 - Explore the different levels of training and education available
 - Explore different avenues of training and education
 - Identify different degrees and how they can be obtained
 - 6. Self-Assessment Unit Test
- 3. Career Exploration**
1. Career Fields
 - There are no objectives for this lesson.*
 2. Agriculture, Food and Natural Resources
 - Identify career categories
 - Determine the educational path appropriate for specific types of jobs
 3. Architecture and Construction
 - Identify career categories and types
 - Determine the educational paths appropriate for specific types of careers
 4. Arts, A/V Technology, and Communication
 - Identify different categories and career types
 - Determine the educational path appropriate for specific types of jobs
 5. Business Management and Administration
 - Identify different categories and career types
 - Determine the educational path appropriate for specific types of careers
 6. Careers in Education and Training
 - Identify different categories and career types
 - Determine the educational paths appropriate for specific types of careers
 7. Finance
 - Identify career categories and types
 - Determine the educational paths appropriate for specific types of careers
 8. Government and Public Administration
 - Identify different categories and career types
 - Determine the educational paths appropriate for specific types of careers
 9. Health Science
 - Identify different categories and career types
 - Determine the educational paths appropriate for specific types of careers
 10. Hospitality and Tourism
 - Identify different categories and career types within the cluster
 - Determine the educational paths appropriate for specific types of careers
 11. Human Services
 - Identify different categories and career types
 - Determine the educational paths appropriate for specific types of careers
 12. Information Technology
 - Identify different categories and career types
 - Determine the educational paths appropriate for specific types of careers
 13. Law, Public Safety, Corrections and Security
 - Identify different categories and career types
 - Determine the educational paths appropriate for specific types of careers
 14. Manufacturing
 - Identify categories and career types

- Determine the educational paths appropriate for specific types of careers
- 15. Marketing
 - Identify career research resources
 - Determine the educational path appropriate for specific types of careers
- 16. Science, Technology, Engineering, and Mathematics
 - Identify different categories and career types
 - Determine the educational paths appropriate for specific types of careers
- 17. Transportation, Distribution, and Logistics
 - Identify different categories and career types
 - Determine the educational paths appropriate for specific types of careers
- 18. Entrepreneurial Opportunities
 - Identify entrepreneurial opportunities
- 19. Career Exploration Unit Test

4. **Planning Your Future**

1. Decision-Making
 - Apply the decision-making process to situations in your life
2. How to Achieve My Career Goals
 - Identify post-high school education and training options
3. Deciding on a Career
 - Identify some career options based upon your personality and desires
4. Academic and Career Plan
 - Formulate an academic and career plan
5. Planning for the Financial Costs of Education
 - Identify and apply factors to be considered when planning the financial costs of education and other expenses
6. Planning Your Future Unit Test

5. **Searching for a Job**

1. The Importance of Goals
 - Identify personal goals
2. Developing a Career Pathway
 - Define short-term goal
 - Define long-term goal
 - Differentiate between short-term and long-term goals
 - Identify personal career goal
3. What Do I Want From a Job?
 - Identify employer benefits
4. How Do I Find a Job?
 - Examine the different options for finding a job
 - Conduct career research
5. Applying for a Job
 - Create all application requirements, including a resume and cover letter, for a job in your chosen career
6. Writing a Resume
 - Create all application requirements, including a resume and cover letter, for a job in your chosen career
7. Preparing a Cover Letter
 - Create all application requirements, including a resume and cover letter, for a job in your chosen career
8. Preparing for an Interview
 - Conduct an informational interview and then send a thank you letter

9. Searching for a Job Unit Test

6. **Starting a New Job**

1. Being Successful in the Workplace
 - Practice filling out new hire documents
 - Demonstrate knowledge of work place policies and procedures to be successful in the workplace
2. Legal and Ethical Issues in the Workplace
 - Recognize discrimination, prejudice, stereotypes, and different forms of harassment
 - Identify the difference between a right and a responsibility
 - Define the purpose of labor laws
3. Workplace Policies and Procedures
 - Demonstrate knowledge of work place policies and procedures to be successful in the workplace
4. Career Advancement
 - Evaluate ways to stay competitive in a changing workforce
5. Starting a New Job Unit Test

7. **Workplace Skills**

1. Teamwork and Communication
 - Recall the 3 Cs of teamwork: communication, commitment, and collaboration
 - Communicate effectively through presentations, letters and electronic communications
2. Problem-Solving Skills
 - Recognize and understand a problem from a "big picture" perspective and from the perspective of all involved players
 - Identify how to solve a problem using a ten-step process
3. Productivity and Quality in the Workplace
 - Identify how to be productive in the workplace
 - Define ethics and values
4. Workplace Skills Unit Test

What you will learn in this course

Careers in Criminal Justice 1a: Introduction

Have you ever wondered what steps take place as people move through the court system? The criminal justice system is a very complex field that requires dedicated people willing to pursue equal justice for all. Explore different career choices and how the juvenile justice system, the correctional system, and the trial process all work together to maintain social order.

Unit 1: Overview of Criminal Justice

Most people know that when we declared our independence from Britain in 1776, we became a nation of our own. Few people, however, realize that with our newfound freedoms came the burden of responsibility. No longer subject to the laws of the monarchy, early Americans had to come up with a new system of justice. One that would keep our citizens safe from harm. Thus, the criminal justice system in the United States was born. Over the years, the American criminal justice system has undergone many changes, and they continues to adapt to new

challenges and societal demands. In this unit, we will explore the history and purpose of the criminal justice system as well as its many different parts.

What will you learn in this unit?

- Identify the history and goals of the criminal justice system.
- Discuss how political, moral, and economic concerns lead to the development of laws.
- Describe the history of corrections.
- Describe the parts and functions of the criminal justice system.

Unit 1 Activity 1	Homework
Unit 1 Activity 2	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: History of the Criminal Justice System

We often have a tendency to look back on the past with rose-tinted glasses. Things seemed simpler “back then,” didn’t they? Did crime really have a place in society when our grandparents were young, or when our nation was young, or when human civilization as we know it was just being born? The short answer is: yes! Let’s trace the history of crime and criminal justice from our earliest human ancestors up to modern times.

What will you learn in this unit?

- Understand the factors that influenced crime and punishment in nomadic tribes and early agrarian civilizations
- Compare ancient Roman law and punishment to our current criminal justice system
- Discuss legal documents from early American colonial history
- Detail early American prison reform efforts

- Conduct debate on the causes of crime in American society

Unit 3: US Laws: Freedom versus Responsibility

At the very core of the criminal justice system is the law. We know that chaos that would ensue if there were no laws that citizens were expected to abide by. Laws create social order that (ideally) reflect social values. When offenders break the law, they must be punished. But there are so many types of laws and different punishments for violating them! Let’s explore different ways to classify laws and crimes and the sentences offenders might receive for violating those laws and committing crimes.

What will you learn in this unit?

- Identify characteristics of criminal and civil law
- Clarify elements and classifications of crimes
- Distinguish between federal and state laws and local laws and ordinances
- Trace how laws are made
- Discuss rights granted various Constitutional amendments
- Describe criminal law procedures in Florida

Unit 4: Introduction to Careers in Criminal Justice

When deciding which criminal justice career path to go down, you'll need to look into several different factors, including the projected growth, what education is required, the duties of this role, and how much money you'll expect to make. You will also want to take an inventory of your personal characteristics and determine which position is your “best fit.” For example, if you are a compassionate person and love to help people who are trying to get their lives back on track, you might consider becoming a probation or parole officer. If you're more analytical and like to solve a good mystery, a career as a forensic scientist might be a better fit. Whatever you do, you'll want to do it with passion and strong ethics. Because after all, the whole point of the justice system is to stop the offending while protecting one and all!

What will you learn in this unit?

- Identify and describe career opportunities in the criminal justice system
- Examine the job duties and skills needed to excel in specific roles
- Consider the prerequisites for job entry into the criminal justice system
- Explore the salary expectations for entry level positions in the criminal justice system

MIDTERM Assignments	
Assignment	Type
Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 5: Inside the Courtroom

Are you poised to enter a career in criminal justice? Maybe. But either way, all United States citizens may also interact with the criminal justice system when they are called to participate in jury duty. Understanding how a courtroom functions, by focusing on various court structures, each step of a trial process, and the roles and responsibilities of those involved, you will prepare yourself for to enter the criminal justice field, either as a professional or as a civil servant on jury duty. What's involved? We'll meet the people you'll run into in a courtroom and take a look at courtroom demeanor, as well as take part in a mock trial. You may proceed!

What will you learn in this unit?

- Describe the people in a courtroom
- Evaluate the pretrial process
- Discuss the parts of a trial
- Consider various post-trial processes and sentences
- Differentiate between the roles and responsibilities of the people involved in the trial processes
- Determine appropriate courtroom demeanor and participate in a mock trial

Unit 6: The Juvenile Justice System

Did you know that kids as young as seven used to be sentenced and imprisoned right alongside adults? Up until the Industrial Revolution, young children and teens were subjected to cruel and unusual punishments. While some young offenders are still tried in adult courts today, most young people who run into trouble with the law are dealt with by the juvenile justice system. There are several key differences between the juvenile justice system and the criminal justice system, but it wasn't always this way. By recognizing those differences and looking at how judges and courts have shaped today's juvenile justice system, we learn more about how to help at-risk youth avoid the cycle of the adult justice system.

What will you learn in this unit?

- Review the history of the juvenile justice system in the United States
- Identify the programs and agencies within the juvenile justice system and describe their roles and responsibilities
- Determine law enforcement procedures related to juvenile delinquency
- Analyze current trends in juvenile justice
- Discuss Florida's juvenile court system, including procedures and alternative programs

Unit 7: Correctional Facilities

Do you know what happens to a convicted criminal after they are handcuffed and escorted out of the courtroom? Not many people are aware of the reality of prison life. Even the shows that are centered around those who are “locked up” are filled with misinformation. Instead of relying on these types of shows, let’s explore the types of correctional facilities employed by the US criminal justice system. We will also investigate the programs and procedures that seek to punish and rehabilitate prisoners and how these compare to systems of the past. You'll have the opportunity to evaluate the philosophy behind controversial ethical practices and decide for yourself which facilities and strategies are effective, and which do more harm than good.

What will you learn in this unit?

- Differentiate between local, state, and federal correctional systems
- Compare and contrast different types of prison and community-based programs
- Identify major correctional operations procedures and programs
- Debate issues concerning the rights of inmates
- Understand correctional reform and the responsibilities of correctional officers

Unit 8: People Skills in Criminal Justice

In the high-risk field of law enforcement, people skills could literally make the difference between life and death for both officer and suspect. As is probably clear by now, it takes a special kind of person to choose to enter the criminal justice field and to carry out the duties of their role well. These careers require a unique skill set, including specialized interpersonal and personal skills. Because the men and women in these roles interact with the public daily in an attempt to protect the safety of individuals, apprehend criminals, and investigate crimes, a high level of social intelligence and the ability to communicate effectively with others is critical. The good news is that even if you have decided that a career in criminal justice is not for you, you still stand to benefit from the things we'll discuss here. After all, employability skills are requirements for anyone who wants to be successful in finding and keeping a job of any kind!

What will you learn in this unit?

- Recognize personal traits that help one succeed in the criminal justice field
- Apply strategies for working well with others
- Consider personal stressors and evaluate methods for resolution
- Plan solutions for situations that require crisis management and conflict resolution
- Identify the interpersonal skills, work habits, and ethics necessary for ongoing employment in an environment of human diversity

What you will learn in this course

Careers in Criminal Justice 1b: Finding Your Specialty

Have you ever thought about a career as a police officer, an FBI or DEA agent, or any occupation that seeks to pursue justice for all? Careers in criminal justice can be found at local, county, state, federal, and international levels, and even in the private sector. Explore some of the various occupations in this field through this course, while simultaneously learning how they interact with each other and other first responders.

Discover important aspects of criminal justice careers, such as implementing interviewing techniques, collaborating with other agencies and departments, cooperating with global partners, and communicating with various audiences. All of these tasks are completed while understanding the importance of ethical decision making in criminal justice. It is important to know and have the character required to know the difference between right and wrong to be successful in this field. If a career in criminal justice is something you hope to pursue, the course ends with some helpful information for finding employment in criminal justice.

Unit 1: The Role of Private Security

Since the beginning of time, people have been looking for unique ways to protect themselves and their property. But believe it or not, government-funded police forces have only fulfilled that role for a short portion of our history! From something called the Pinkerton Agency to the Secret Service, private security is an integral part of American history.

What will you learn in this unit?

1. Compare and contrast public security agents to private security workers
2. Recall the history of private security in both ancient and modern societies
3. Identify career opportunities available in private security and their responsibilities
4. Characterize special investigative units such as the Secret Service and its role in security

Unit 2: Other Roles in Criminal Justice

If you're interested in the criminal justice field but don't plan on working patrol, don't fret. There are many different jobs and career progression opportunities that will allow you to work in a field you'll enjoy without having to go a traditional route. From border security chaplains to aviation enforcement agents, who knew that so many criminal justice roles existed?

What will you learn in this unit?

1. Summarize the role of a SWAT team member
2. Analyze similarities and differences between detectives and private investigators
3. Understand the different roles and responsibilities of the US Border Security and its divisions

4. Recall the purpose of the United States Drug Enforcement Agency (DEA)

Unit 3: Working with Medical Emergency and Fire Departments

EMS and fire service play important roles in keeping communities safe across the nation. Choosing a career in either of these fields requires training and certification, and students who wish to pursue these careers can join several agencies and organizations to prepare them for these careers. Overall, public agencies such as fire, EMS, police, court corrections, and security systems must work together to ensure communities are safe for the families that populate them.

What will you learn in this unit?

1. Describe the role of emergency medical services in public safety
2. Explain the duties and responsibilities of firefighters
3. Research and participate in community and student organizations
4. Examine the roles and responsibilities of first responders

Unit 3 Activity 2	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Global Perspective: Collaborating with INTERPOL

INTERPOL operating on a global basis is one of the most important aspects of international public safety. These special agents are responsible not only for helping catch criminals but also for providing valuable resources to member countries' law enforcement departments to help fight international crime. This organization comes from a long history of technological advancements, status changes, and more. Overall, a career in INTERPOL is a rewarding and meaningful one.

What will you learn in this unit?

1. Explain the goal of INTERPOL
2. Describe the history of INTERPOL
3. Discuss the different job roles that exist within INTERPOL
4. Identify how INTERPOL collaborates with law enforcement agencies to stop international crime

Midterm Discussion	Discussion

Unit 5: Spotlight on Interrogation

Interrogation plays an important role in law enforcement. When used correctly, it has the potential to develop relationships and solve crimes. In order for this process to be productive, police officers must build rapport with their communities and use effective communication techniques. When executed properly, interviews and interrogations will assist law enforcement in the pursuit of the truth and help avoid wrongful convictions.

What will you learn in this unit?

1. Describe interview techniques used by law enforcement
2. Determine how establishing rapport can benefit police officers in their jobs
3. Explain how police officers effectively communicate with suspects and inmates
4. Identify elements of wrongful conviction and resources for victims of wrongful conviction

Unit 6: Evaluating Ethics in Criminal Justice Systems

Ethics is an important part of the criminal justice system because the actions people take ensure that members abide by the moral obligation of their role. They make daily decisions that need to be fair and equal to all. It is also important to understand how the public is protected by laws, regulations, and policies when members of the criminal justice system act unethically. But these aren't the only ethical considerations involved in the criminal justice system. We will also look at the death penalty, solitary confinement, and the incarceration of elderly individuals.

What will you learn in this unit?

1. Discuss both perspectives of common ethical quandaries in the criminal justice field such as the death penalty or solitary confinement
2. Understand the codes of ethics for the criminal justice system and specifically law enforcement officers
3. Explain laws, regulations, and policies that govern criminal justice professionals
4. Analyze how constitutional laws impact law enforcement officials and their actions

UNIT 6 Assignments

Unit 6 Discussion 2	Discussion
Unit 6 Quiz	Quiz

Unit 7: Communication in Criminal Justice

You've probably heard a police officer say, "10-4" or spell out a name or address such as "Nora-Ida-Charles-King." Why do they do this? And what does it mean? Nearly all career fields have their own languages, so to speak, and the field of criminal justice is no exception. Although good

verbal and nonverbal communication skills can be helpful in almost any line of work, there are specific communication skills, vocabulary, and even special “codes” necessary for success in criminal justice. We will look at many of the skills and special equipment that law enforcement officers and others in the criminal justice field need to do their jobs efficiently and effectively.

What will you learn in this unit?

1. Explain the purpose and demonstrate the use of communication codes and the phonetic alphabet
2. Describe different equipment and protocols used by law enforcement officers to communicate with each other and the public
3. Identify communication and jurisdictional problems that may arise as multiple agencies work together
4. Identify the unique interpersonal skills required in communicating with inmates, coworkers, and the general public

UNIT 7 Assignments	
Assignment	Type
Unit 7 Critical Thinking Questions	Homework
Unit 7 Activity 1	Homework
Unit 7 Activity 2	Homework
Unit 7 Discussion 1	Discussion
Unit 7 Discussion 2	Discussion
Unit 7 Quiz	Quiz

Unit 8: Finding Employment in Criminal Justice

There are many job opportunities available in the criminal justice system for those who are interested in the field and willing to do what is required to earn the necessary qualifications. We’ll discuss the steps one needs to take in order to prepare for, locate, evaluate, and apply to job opportunities in this competitive job arena. But simply landing the job isn’t the end of this process. You’ll also need to think about what it takes to be a good employee and what to do if you decide to change career fields in the future.

What will you learn in this unit?

1. Identify sources of information for employment and training opportunities and career options in the field of criminal justice
2. Conduct a job search and identify the training, experience, and other qualifications required for different positions
3. Complete a job application, resume, and cover letter
4. Apply effective job interview techniques
5. Describe how to make job changes appropriately

Final Exam Discussion	Discussion

College Prep with ACT

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This course will help the student navigate through the Shmoop ACT Exam Prep Web site, access two full ACT® practice tests, and learn the necessary skills in order to take the ACT test. This course also includes several lessons on other critical aspects of preparing for college, including developing a college resume, writing effective personal essays, and requesting letters of recommendation.

This course is intended to prepare the student to take the ACT test. As the student works through the course, he will focus on learning more about his strengths and weaknesses as well as learn test-taking strategies that are specific to the ACT test. That way, when the student takes the actual test, the scores will be a good representation of the student's abilities.

Finally, the student will submit a College Planning Portfolio, which will reflect the areas for improvement that the student has identified throughout this course.

Course Outline

1. **College Prep with ACT**
 1. Preparing for College: Follow Your Dreams
 - Begin to document your strengths, interests, talents, and goals
 - Begin researching colleges and universities
 2. Introduction to the ACT & Diagnostic Testing
 - Take diagnostic tests to assess current abilities
 - Research ACT test registration information
 3. Preparing for College: Official Transcripts
 - Examine the features of transcripts and fully understand what they mean
 - Relate transcript information to the college admissions process
 - Review academic coursework to determine college readiness
 4. College Readiness Standards
 - Document and analyze current areas of academic strength and weakness
 5. ACT Practice Test: English
 - Take practice test to assess current English knowledge and abilities

- Review ways to improve English content knowledge and abilities
6. Preparing for College: Resumes & Recommendations
 - Learn how to craft a résumé
 - Draft and revise your résumé
 - Begin documenting your achievements in résumé form
 - Learn how to obtain appropriate letters of recommendation
 7. ACT Practice Test: Math
 - Review practice test questions and answers to develop content knowledge and abilities
 - Review ways to improve mathematics skills
 8. ACT Practice Test: Reading
 - Review reading content areas and test-taking strategies
 - Analyze areas of academic strength and weakness
 9. ACT Practice Test: Writing
 - Take practice test to assess current writing abilities
 - Review ways to improve writing abilities
 10. ACT Practice Test: Science
 - Take practice test to assess current science knowledge and abilities
 - Review ways to improve science content and knowledge
 11. Preparing for College: The Application Essay
 - Become familiar with the essential components of the college application essay
 12. Take the Online Timed ACT Practice Test
 - Practice taking the ACT test under timed conditions
 - Review and analyze test results
 - Develop strategies for improving test scores
 13. Preparing for College: Face-to-Face Interviews
 - Learn about and practice interview techniques and strategies
 - Understand what a good "fit" for college means to you
 14. Preparing for College: Financial Aid
 - Become familiar with financial aid terminology and process
 - Start to research financial aid options
 15. Create Your College Planning Portfolio
 - Create a College Planning Portfolio to fully prepare for taking the ACT

College Prep with SAT

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This course will help the student navigate through the Official SAT Practice on the Khan Academy website, access four full SAT practice tests and multiple practice quizzes, and learn the necessary skills in order to be well-prepared to take the SAT test. This course also includes several lessons on other critical aspects of preparing for college, including developing the college resume, writing effective personal essays, and requesting letters of recommendation.

This course is intended to prepare the student to take the SAT test. As the student works through the course, he will focus on learning more about his strengths and weaknesses as well as learn test-taking strategies that are specific to the SAT test. That way, when the student takes the actual test, the scores will be a good representation of the student's abilities.

Finally, the student will submit a College Planning Portfolio, which will reflect the areas for improvement that the student has identified throughout this course.

Course Outline

1. College Prep with SAT

1. Preparing for College: Follow Your Dreams
 - Begin to document your strengths, interests, talents, and goals
 - Begin researching colleges and universities
2. Introduction to the SAT & Pretest
 - Set up your access to the Official SAT Practice from the Khan Academy website
 - Assess your SAT test preparedness by taking the diagnostic quizzes
3. Preparing for College: Official Transcripts
 - Examine the features of transcripts and fully understand what they mean
 - Relate transcript information to the college admissions process
 - Review academic coursework to determine college readiness
4. About the SAT and How to Do Your Best
 - Increase your familiarity with the SAT test
 - Review your SAT pretest results to improve content area knowledge
5. SAT Critical Reading

- Improve your critical reading abilities through completion of SAT practice activities and personal reflection.
 - Make journal entries to focus learning
6. Preparing for College: Résumés & Recommendations
 - Learn how to craft a résumé
 - Draft and revise your résumé
 - Begin documenting your achievements in résumé form
 7. SAT Writing & Language
 - Improve writing and reading skills through completion of the Reading & Writing practice
 - Make journal entries to focus learning
 8. SAT Math
 - Improve your mathematical abilities by completing practice questions and reviewing answers
 - Make journal entries to focus learning
 9. SAT Full-Length Timed Practice Test 1
 - Take the full-length timed SAT test to be better prepared for taking the actual SAT test
 - Understand how the practice test is different from the actual SAT test
 10. SAT Practice Test 1: Review Answers
 - Improve content area knowledge by reviewing answers to the practice SAT test
 - Make journal entries to focus learning
 11. Preparing for College: The Application Essay
 - Become familiar with the essential components of the college application essay
 12. SAT Full-length Timed Practice Test 2
 - Take a second full-length timed SAT practice test to prepare for taking the actual SAT test
 - Analyze your progress by comparing scores
 - Make journal entries focused on college admissions planning
 13. Preparing for College: Face-to-Face Interviews
 - Learn about and practice interview techniques and strategies
 - Understand what a good "fit" for college means to you
 14. Preparing for College: Financial Aid
 - Become familiar with financial aid terminology and process
 - Start to research financial aid options
 15. Create Your Personal Improvement Plan
 - Create a College Planning Portfolio to fully prepare for taking the actual SAT test

What you will learn in this course

Concepts of Engineering and Technology

Each day, we are surrounded by technology and engineering projects. From our phones to the bridges we drive over, engineering and technology influence many parts of our lives. In Concepts of Engineering and Technology, you will learn more about engineering and technology careers and what skills and knowledge you'll need to succeed in these fields. You'll explore innovative and cutting-edge projects that are changing the world we live in and examine the design and prototype development process. Concepts of Engineering and Technology will also help you understand the emerging issues in this exciting career field.

Unit 1: Development and Understanding of Engineering

Have you ever wondered how civilization continues to design, build, and improve machines and structures around the world? Looking at the skyline of any major city, you can see a crazy number of tall buildings, lengthy bridges, and engines purring under endless equipment. We all know

these inventions are critical to our modern way of life, yet we don't always understand the knowledge required to create such innovation. Have you ever peered up at a towering skyscraper and marveled at the mere impossibility of it? It is, in fact, not only possible but also just part of a day's work for an engineer. In this course, you'll be exploring the various fields of this occupation, its history, the important role it plays in human life, and the ethical issues related to engineering. So buckle up; here we go!

What will you learn in this unit?

- Distinguish the differences between science, technology, and engineering
- Understand and use technical terms
- Discuss important technological developments from the past
- Identify the various technological ages and the rate of current development
- Discuss some of the ethical concerns around technology

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Activity	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Making Problems into Ideas

It's easy to identify a problem but not always as easy to figure out a solution. An engineer's job is to take pesky things like problems and apply a functional process that will eventually result in a technological solution. That problem-solving process involves a series of important steps, steps that are imperative for success. Understanding these techniques is critical for an engineer, as is knowing the differences among the various technological systems that aid in the process. You could say that an engineer has a sizeable toolbox of strategies at his disposal. This unit will explain those tools and how they can best be used on the job. It will also help you to develop your own process through the development of an engineering notebook.

What will you learn in this unit?

- Discuss open and closed systems
- Identify how technological systems interact to achieve goals
- Find technological solutions through problem solving
- Design and maintain a computation engineering notebook

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: From Sketches to Products

As an engineer, you will likely find yourself in a situation where you know exactly what you want to build, but the only problem is your ideas are stuck in your head. Finding a way to express ideas and bring them to fruition is a challenge, even for an engineer, and understanding the design process is a critical part of the course of action. Obviously, designing something requires that you also have a firm grasp on the materials needed and how they are characterized within an experiment. Simply put, this means engineers must conceptualize their goals while remembering the pragmatic elements required to achieve them. *How can I get what I want with what I have?* Working out a design process is a balancing act between the creative and the scientific worlds. Having a vision is essential, but understanding the reality of how to achieve that vision is equally important. You can't have one without the other.

What will you learn in this unit?

- Describe the fundamental processes needed for a project, including design and prototype development
- Identify the chemical, mechanical, and physical properties of engineering materials

- Assess risks and benefits of a design solution
- Maintain a professional portfolio

UNIT 3 Assignments	
Assignment	Type
Unit 3 Critical Thinking Questions	Homework
Unit 3 Lab	Homework
Unit 3 Activity	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Civil Engineering

Are you a practical person? Do you like to see things running smoothly and efficiently? Do you worry about systems that break down and create problems? If the answers are yes, you may want to learn more about civil engineering, a field that focuses on precisely these issues in the real world. The world is filled with roads, buildings, airports, tunnels, dams, bridges, and water supply systems. The world needs a qualified person to design, build, supervise, operate, and maintain these things. And as we all know, these “things” are not negotiable. They must be supported with ideas and hard work to keep our society chugging along and, in some cases, sprinting along as we continue to evolve into an increasingly accelerated species. Civil engineering is arguably the oldest discipline in this field, dating back to 3000 BCE, and definitely one of the most pragmatic. I mean, if you don’t have a roof over your head, what do you have?

What will you learn in this unit?

- Work in teams to apply the design process
- Assume different roles within an engineering project
- Develop and test a project model
- Use time-management skills to meet project objectives
- Use criteria to meet project expectations
- Describe and demonstrate team functions, quality, and requirements

UNIT 4 Assignments

Concepts of Engineering & Technology Midterm Exam

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first four units in this course (Note: You will be able to open this exam only one time.)

MIDTERM Assignments

Assignment	Type
Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 5: Mechanical Engineering

Were you one of those kids who liked to take things apart or, more truthfully, break them to see what was inside? Did you pull the wings off your new mechanical toy butterfly to examine how they were attached? Maybe you even managed to put it back together. These preoccupations with machinery and its secrets are also the wonderings of a mechanical engineer. How does this broad field really function? And exactly what type of engineer does it require? A mechanical engineer has a large, albeit sometimes unusual, scope of interests and plays an integral part in the running of the modern world. So maybe the kid taking the remote control apart instead of watching the actual television is on her or his way to an exciting career as a mechanical engineer.

What will you learn in this unit?

- Define and describe the applications of physical and mechanical systems
- Describe various career opportunities and emerging issues within these fields
- Explain the history of mechanical engineering and its current trajectory
- Apply design concepts to problems in physical and mechanical systems

UNIT 5 Assignments

Unit 5 Discussion 1	Discussion
Unit 5 Discussion 2	Discussion
Unit 5 Quiz	Quiz

Unit 6: Chemical Engineering

If there's one word to remember today, it's creation! Creation is everything; creation is life. It's awesome to study and understand the natural world through science or identify the makeup of different substances through the wonders of chemistry; however, what does it take to use both of the disciplines of chemistry and engineering to create something entirely new? Something that can improve human life, feed the planet, save lives, and change the face of reality? As you will soon find out, it takes a chemical engineer. Chemical engineering, an incredibly complex and challenging field of engineering, is particularly exciting because of its relationship to substances and conceptualizing how they can be used to form new ones. A chemical engineer not only has to understand science, mathematics, and chemistry but must also have the skills to funnel all that knowledge into the alchemy of any entirely new and innovative result. And voilà! Now you have creation, the essence of chemical engineering and the very essence of life.

What will you learn in this unit?

- Describe applications of process control and automation systems
- Describe career opportunities in process control and automation systems

Pennwood Cyber Charter School Application

- Apply design concepts and identify fields related to process control and automation systems while identifying emerging issues
- Understand and follow safety tests and guidelines while recognizing how to classify and dispose of hazardous materials and waste

Unit 7: Biological Engineering

If you consider healing the world a worthwhile endeavor, then you have the spirit of a bioengineer. Nature is filled with different materials under the ground, in the sky, and far down in the murky depths of the sea. Learning how to use these organisms is key to this evolving world of discovery. The natural world continues to provide many priceless resources that we are free to use at our discretion; however, we must remember to remain ethical and thoughtful in this process so as not to deplete the world and ourselves. Unlike chemical engineering, which creates synthetic materials through nature, bioengineers simply use the materials of the earth to generate what is needed to improve human life. Just remember: biology + engineering = bioengineering. Bioengineers are the naturalists of the engineering world and some of the most effective innovators of our time.

What will you learn in this unit?

- Describe the different fields of biotechnology
- Identify the underlying principles of bioengineering
- Understand career opportunities, related fields, and emerging trends in biotechnology
- Apply design concepts to problems in biotechnology

- Discuss inherent ethical dilemmas in bioengineering and technology

UNIT 7 Assignments

Unit 7 Lab	Homework
Unit 7 Activity 1	Homework
Unit 7 Activity 2	Homework
Unit 7 Discussion 1	Discussion
Unit 7 Discussion 2	Discussion
Unit 7 Quiz	Quiz

Unit 8: Impossible Engineering!

Thinking back on all the incredible challenges engineers have overcome in their profession, it's easy to be positively astonished by the amount of innovation the world has seen. Rarely do people have the ability to predict the future, yet engineers have proved time and time again that wild dreams can eventually become reality. Looking back at all the awe-inspiring engineering developments over the years and remembering that at one time they too seemed impossible, it's safe to say society is likely in store for a lot of surprising advancements in the next hundred years. What are the areas engineers hope to develop during the 21st century? How will society look as a result? Engineers may have a lot of tools in their toolboxes, but the word impossible is definitely not one of them.

What will you learn in this unit?

- Define impossible engineering
- Conduct and present research on emerging and innovative technology
- Describe ethical behavior and decision making through the use of examples
- Differentiate among discrimination, harassment, and equality

What you will learn in this course

COSMETOLOGY 1: CUTTING EDGE STYLES

Interested in a career in cosmetology? This course provides an introduction to the basics of cosmetology. Students will explore career options in the field of cosmetology, learn about the common equipment and technologies used by cosmetologists, and examine the skills and characteristics that make someone a good cosmetologist. Students will also learn more about some of the common techniques used in caring for hair, nails, and skin in salons, spas, and other cosmetology related businesses.

Unit 1: Introduction to Cosmetology

Students are introduced to the cosmetology field in this unit, including the specialization within the profession and current global trends in the industry. They will also learn the required training, licensing, and certifications for the various specializations and where to acquire them, as well as the kinds of careers and employment opportunities available in the field.

What will you learn in this unit?

- Explain current trends in the cosmetology industry
- Discuss various careers in the cosmetology field
- Define growth and trends within the cosmetology industry
- Identify employment opportunities, including entrepreneurship, and preparation requirements in the field of cosmetology services
- Investigate technical knowledge and skills required to be successful in careers in the personal care services area

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Project 1	Homework
Unit 1 Project 2	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Basic Biology for Cosmetologists

Cosmetology is all about the body, so it is time to learn basic anatomy. While providing an overview of the major systems of the human body, this unit details the parts of the body that cosmetologists spend the majority of their time grooming, including hair, skin, and nails. Understanding the components of tissue and cells helps cosmetologists tell the difference between healthy hair, skin, and nails and those that need further treatment or indicate health problems. There has always been a relationship between cosmetology and health, as will be explained in this unit. Finally, this unit will explore how some simple home beauty treatments have a noticeable effect on the body.

What will you learn in this unit?

- Recognize and identify the major systems in the human body
- Identify principles of biology, tissues, and cells to provide and select safe and effective personal care products and services

Pennwood Cyber Charter School Application

- Recognize and identify principles of human anatomy to classify areas of potential problems in order to provide needed personal care services
- Discuss the relationship between cosmetology and medicine
- Prepare some healthy beauty treatments and understand why they work

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Project 1	Homework
Unit 2 Project 2	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Standards and Safety

Now that you understand some basic biology, this unit will identify the steps that cosmetologists need to take to keep their clients safe and healthy. Not only is this important for the clients, it is also the law. Salons need to maintain excellent health and safety records to stay in business, and cosmetologists are the ones who define these records. Students will know and understand the governing policies and the proper procedures for maintaining a safe and sanitary environment as well as the different levels of cleaning and their uses. This unit prepares students for a career in cosmetology by providing background on the hazards of the industry for both clients and employees and cosmetologists' responsibilities when it comes to health and safety.

What will you learn in this unit?

- Demonstrate knowledge of the rules and regulations established by the governing body and industry standards
- Identify and practice emergency policies and procedures regarding health and safety to achieve a safe and healthy environment at all times
- Recognize risks and potentially hazardous situations to maintain a clean safety record when providing personal care services

Pennwood Cyber Charter School Application

- Differentiate among types of cleaning and their uses
- Identify appropriate agencies and sources for health and safety information in the cosmetology field

UNIT 3 Assignments	
Assignment	Type
Unit 3 Critical Thinking Questions	Homework
Unit 3 Project 1	Homework
Unit 3 Project 2	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Legal and Ethical Standards

You have learned a lot about safety and how to keep yourself, clients, and coworkers healthy, and now it is time to consider ethical and legal responsibilities. Now it is time to explore professional standards and ethics, how they are defined in the workplace, and specific issues that are particularly relevant to those in the cosmetology field. This unit will also define the concept of legal liability and how that shapes job performance, especially when working with the public. Professionalism is an important part of success in this industry, and this unit defines what that looks like for those interested in a cosmetology career.

What will you learn in this unit?

- Explain the concepts and skills of the profession in simulated and actual work situations
- Define the elements of professional presentation
- Model ethical and legal conduct while working in the human services industry
- Recognize ethical violations in the workplace
- Demonstrate actions that comply with legal requirements for personal liability to guide personal conduct in the human services setting

UNIT 4 Assignments

Unit 4 Critical Thinking Questions	Homework
Unit 4 Lab	Homework
Unit 4 Project 1	Homework
Unit 4 Project 2	Homework
Unit 4 Discussion 1	Discussion
Unit 4 Discussion 2	Discussion
Unit 4 Quiz	Quiz

Unit 5: Providing Services

Now that you have an understanding of the professional responsibilities that cosmetologists have, it is time to explore what they actually do for clients. This unit will introduce some of the most common procedures performed by cosmetologists, including those involving hair, skin, nails, and hair removal. Through exploring these treatments and the chemical reactions that enable them, you will begin to have a sense of which of the subfields in cosmetology most appeals to you should you decide to pursue this career. In addition, this unit explores beauty culture and how it relates to the work of professional cosmetologists.

What will you learn in this unit?

- Apply academic skills to the field of cosmetology
- Describe some of the basic services performed by cosmetologists
- Relate principles of chemistry by explaining the composition, structure, and properties of substances and of chemical processes to provide a broad range of personal care services
- Define and explain beauty culture
- Analyze contemporary beauty standards as portrayed in advertising

Unit 6: Tools of the Trade

This unit will identify some of the tools used in the various branches of cosmetology. Students will come to understand how various implements are used and be able to provide details about their proper care and maintenance. These implements can be quite expensive and are really important for doing well, so it is essential that cosmetologists take good care of them. You will also understand some of the differences between commercial-grade products and those available to consumers. In addition, the unit explores the hairstyles of past decades, how ideas of beauty reflect the times that produce them, and the beauty products available.

What will you learn in this unit?

- Describe the function and application of the tools, equipment, technologies, and materials used in cosmetology
- Identify and choose techniques and principles and safely use tools and instruments to develop efficient and safe delivery of client services that enhance client satisfaction
- Explain basic requirements for maintaining cosmetology equipment

Pennwood Cyber Charter School Application

- Understand and describe the ways in which hairstyles reflect the era in which they were popular
- Explain some of the techniques used in hairstyles of the past

Unit 6 Quiz	Quiz

Unit 7: The Basis of the Business—The Client

Providing the kind of service that clients expect and attracting clients are important parts of a cosmetologist’s job. Students will learn about building and maintaining a client base. This includes not only providing clients with the services they require, but also ensuring that salons stay in touch with the clients they represent. It will also explore how technology can be used to monitor client preferences and services as well as maintain an updated client base. By understanding what clients expect from cosmetologists and what they are looking for, you will be better prepared to develop the kind of clients that can be the foundation of your business. Students will also look at what makes a good customer experience and explore the history of nail salons in North America.

What will you learn in this unit?

- Interpret patterns of current information and resources on personal care services to attract new clientele and satisfy and retain present clientele
- Investigate organizational policies, procedures, and regulations to establish personal care organization priorities to accomplish the mission and provide high-quality service to a diverse set of clients

Pennwood Cyber Charter School Application

- Apply technology to analyze data and information in order to make appropriate recommendations for personal care services
- Identify the aspects of a good salon experience
- Explain the rise of the nail service industry

Unit 8: Creating a Thriving Cosmetology Business

Every business in cosmetology requires understanding customers. This unit will examine what brings customers into salons and what keeps them coming back so that cosmetologists can effectively create and manage a client base by defining what customers are looking for when building a relationship with a cosmetologist. It will also provide strategies for making the most out of a client base and explain the reasons clients choose to leave cosmetologists. Because not all interactions with customers will go well, strategies for dealing with difficult customers are discussed. The unit examines the ways technology can help cosmetologists anticipate client needs and identify trends in the beauty industry.

What will you learn in this unit?

- Interpret patterns of current information and resources on personal care services to attract new clientele and satisfy and retain present clientele
- Identify current trends in the cosmetology industry
- Define the expectations customers have when purchasing cosmetology services
- Employ strategies to deal with difficult clients
- Recognize the factors used to evaluate a client base

Unit 9: Basic Business Skills and Skin Care

This unit will continue to explore the profession of cosmetology by detailing the ways in which cosmetologists are typically paid and the relationships they form with salons so that students can evaluate the positive and negative aspects of these arrangements. In addition, this unit focuses on the qualities of the skin, which include identifying the basic skin types, understanding skin color and tone, and making appropriate makeup choices. It also examines the basic elements of a healthy skin care routine.

What will you learn in this unit?

- Compare economic and accounting principles and practices when providing personal care services to promote business success and growth
- Evaluate the different pay structures within the cosmetology field
- Explain the different qualities of skin, including type, tone, and texture
- Demonstrate the core elements of a good skin care routine
- Choose appropriate cleansing products for different skin types

Unit 10: Marketing Your Cosmetology Business

This unit will explore important elements of leaders in the cosmetology field and the qualities that not only develop leadership skills but also open the door to new professional opportunities. It will also examine elements of the business side of the cosmetology field, such as managing inventory and acquiring supplies. Marketing is another important element of cosmetology, and this unit covers the basics of a good marketing plan for a cosmetology business, including how to attract and retain clients using social media.

What will you learn in this unit?

- Interpret systems that manage various personal care resources required for business practice
- Research client information to attract new clientele and retain present clientele
- Explore administrative and clerical procedures and systems to provide client satisfaction
- Critique leadership skills within a community setting to maintain positive relationships that enhance personal care business opportunities
- Propose advertising principles when selecting and using media to attract and retain clientele

What you will learn in this course

COSMETOLOGY 2: THE BUSINESS OF SKIN AND NAIL CARE

This vibrant industry needs skilled and personable professionals well-versed in the latest trends and technological advances. Explore what the day-to-day life of a cosmetologist is like, and discover that cosmetology is much more than knowing and applying techniques. Learn skin care and facials, how to give manicures and pedicures, how to apply artificial nails, and gain an understanding of different hair removal techniques. Discover the next steps towards launching a rewarding and creative career in cosmetology.

Unit 1: Working in a Salon

Everyone wants to feel beautiful. Wouldn't it be great to enter a profession where you can help people look their best? Cosmetology has many areas you can work in to achieve your dreams. Here we will look at some of the basics of becoming a salon professional, from communicating

well to keeping the workplace safe. Put your best foot forward as we start our journey behind the scenes in the beauty industry.

What will you learn in this unit?

- Begin building your professional image
- Communicate effectively using reflective listening
- Name the main types of skin disorders
- Employ infection control measures
- Identify the functions of Safety Data Sheets

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework

Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Nails: Basics of Fingers and Toes

Many women (and men!) want to have beautiful hands and feet. Think of all the celebrities who show off beautifully manicured fingernails and perfectly pedicured feet. Professional nail care is a huge market, as we all want to look as nice as the rich and famous. Learn the basics of professional nail care, products, and tools, and start on your way to beautifying those toes and fingers. Pick a color, and let's get started!

What will you learn in this unit?

- Distinguish the differences between the cuticle and the eponychium
- Assess the nails and skin for common problems
- Comply with safety and infection control measures for nail care
- Perform a basic manicure including hand massage

- File nails into the five basic shapes for women

Unit 3: Nail Enhancements: From Tips to Wraps

The glamor of nail extensions used to be only for royalty or the extremely wealthy. Now, with newer and more accessible methods for applying long and sculpted nails, ordinary people can have outrageously attractive nails. From “acrylics” to gel and nail wraps, learn how to extend and shape nails for the modern and glamorous clients in your community!

What will you learn in this unit?

- Apply nail tips properly
- Explain the chemistry of acrylic nail enhancements
- Work with UV or LED cured gel nail products
- Maintain tips and acrylic, gel, and nail wraps
- Utilize proper safety procedures when applying nail enhancements

Unit 4: Specialty Treatments

Salons offer all kinds of great services to pamper their customers. But what are these mysterious specialty “spa” services? Extra massage time, paraffin treatments, French manicures, sculpted nails, and nail art, just to name a few! These glorious extras can be for added relaxation, treatment for rough skin, or to achieve extra beauty of the nails. About the ever-popular French manicure—we will teach you how to do that right here. The best part: these extras give you even more chances to not only wow your clients but make extra money too! And after you have pampered your clients, are you up for creating some magnificent nail art? Let your creativity run wild as we learn some more techniques that will dazzle your clients!

What will you learn in this unit?

- Distinguish the differences between express and spa services for nails
- Safely use paraffin treatments for hands and feet
- Perform a classic French manicure
- Apply nail forms and sculpt nails into different shapes
- Experiment with the tools to create nail art

Unit 5: Skin Care: Facials

A clear and clean complexion sparkles from a mile away. Learn how to perform facials, and clients will flock to you because you help them reveal their inner beauty on their faces! Facials are relaxing and help people put their best face forward—cleansed and treated, no matter what skin type they have. What are those mysterious products and machines that are used for facials? They are mysteries no longer—you will learn how and why to use the right products and techniques to give a terrific, rejuvenating facial.

What will you learn in this unit?

- Identify the major skin types and their features
- Name the different product types that are used in facials
- Describe the benefits of electrotherapy
- Record all important information in the client record
- Perform a basic facial, choosing the correct products for the skin type

Unit 6: Skin Care: Hair Removal

Hair! It can be beautiful or it can be an unwelcome distraction. In a salon, you can have your tresses and locks clipped, curled, dyed, and styled, but most of us also have some stray facial hair we'd rather get rid of. Look no further: the secrets to safe, sanitary, and effective facial hair removal are at your fingertips. Shape those brows, remove stray chin hair, and safely remove that upper lip hair! Clients will love these services and you will be their beauty secret. Facial hair, what facial hair? I never saw a thing!

What will you learn in this unit?

- Recognize the major contraindications for hair removal
- Describe the differences between the many types of hair removal
- Shape the eyebrows to complement face shape
- Wax the eyebrows, upper lip, and chin using sanitary procedures
- Instruct clients on home care after a hair removal service

Unit 7: Skin Care: Makeup for Every Face

Fresh, trendy, and dramatic! Professional makeup application takes practice, but here you will learn the basic techniques to start you on your way. Make any client look like a celebrity with your knowledge of face shapes, contouring, and special eye techniques. With a few colors, the right tools, and your creativity, help everyone feel like a star on the red carpet!

What will you learn in this unit?

- Identify face shapes and use contour to complement and conceal
- Use color theory to choose appropriate makeup colors for your clients
- Perform a professional makeup application
- Safely apply and remove artificial eyelashes
- Design variations on the smoky eye shadow style

Unit 8: Expanding Your Skills

Ready, set, go! Are you ready to take the next step towards a career as a cosmetologist? Read on and you will find everything you need to know about getting the right training, studying for your

licensure exam, and working on getting your first job! Prepare to put your best foot—and hand, and face—forward to get ready for success in the beauty profession!

What will you learn in this unit?

- Compare the pros and cons of different beauty school programs
- Methodically prepare for your licensing exam
- Use the power of networking to expand your contacts
- Compile a professional portfolio and resume
- Evaluate whether salon entrepreneurship is a good choice for you

Final Exam Discussion	Discussion
-----------------------	------------

What you will learn in this course

Culinary Arts 1a: Introduction

Thinking of a career in the foodservice industry or looking to develop your culinary skills? Explore basic cooking and knife skills while preparing you for entry into the culinary world. Discover the history of food culture, food service, and global cuisines while learning about food science principles and preservation. Prepare for your future by building the professional, communication, leadership, and teamwork skills that are crucial to a career in the culinary arts.

Unit 1: The Safe Kitchen

The culinary process of cooking, baking, and preparing food is the only edible art form in the world, which means it is a pretty unique field of study. This characteristic also makes it a particularly enjoyable and valuable skill to learn. Who doesn't want to eat their own creation? But before you even think of tying on an apron, there are a few kitchen safety rules you won't want to miss, especially if you hope to enjoy your delicious "art" free from cuts, burns, and other

cooking-related injuries. Once you understand how to handle any accidents or unexpected emergencies that might pop up in the kitchen, you will be one step closer to cooking up your own culinary masterpiece.

What will you learn in this unit?

- Discuss the dos and don'ts of basic cooking
- Describe standard procedures for chemical hazard control
- Explain the importance of safety procedures in the workplace
- Identify and use proper first aid procedures for kitchen-related accidents and injuries

UNIT 1 Assignments

Unit 1 Activity	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Knife Skills

There's a reason why the television show "Iron Chef" uses two giant knives as their symbol. Not only is it recognizable, it instantly tells the viewer what is most valuable and vital in the kitchen of the culinary gods—their chef's knives! From the massive cleaver to the delicate boning knife, there is a special cutting tool for every recipe in the cooking world. To use and maintain these sharp blades properly, free from injury and stress, certainly takes some talent, but it is well worth the effort. Because once you have the knowledge of knives under your apron straps, you're ready to start cooking with fire.

What will you learn in this unit?

- Discuss the importance of proper knife safety
- Explain and demonstrate basic knife techniques

- Identify and explain the four key knives in a professional kitchen
- Describe various cutting methods and the role they play in food preparation

Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Food Safety

Food is a wonderful thing. It is delicious, nutritious, and enjoyable—but sadly, it can also be dangerous if not handled properly. And for individuals hoping to find success in the culinary world, understanding areas like sanitation, storage, and waste management in a kitchen environment is the only way to fight this danger. It is not possible to whip up edible masterpieces for people to enjoy until you recognize the many ways bacteria and foodborne illnesses can ruin your efforts, not to mention make people sick. That’s why all chefs, no matter how talented and famous they are, make all-around cleanliness and proper food handling their top priority.

What will you learn in this unit?

- Apply sanitation standards to the kitchen environment
- Identify the key elements of foodborne illnesses and how to prevent them
- Explain the process and importance of waste management in the food industry
- Describe the inventory process and how it affects food preparation and safety

Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Cuisine and Culture

Any time you want to really understand something, you need to start at the beginning. And in the case of food, the beginning extends back hundreds of thousands of years to a time when an open fire was the only method of cooking. But through centuries of culinary “trial and error,” we have finally arrived at a point where we understand food better than ever. Science and technology have contributed greatly to our knowledge of food, always building on the existing foundation of culture and tradition. Using both older approaches and beliefs along with new findings, chefs are now able to explore the world of edible ingredients like never before.

What will you learn in this unit?

- Explain food science and how it affects the culinary world
- Identify various cooking methods and how they affect food
- Describe different cuisines and their relationship to culture and history
- Differentiate between proteins and other food groups

Unit 5: Garde Manger: The Cold Kitchen

If you are interested in finding a unique place in the culinary world where your artistry can shine, the cold kitchen environment of the garde manger might be the place for you. From classic mixed green salad to avocado crabmeat soup to seared cardamom duck with poached tangerine relish, this realm of food preparation is cool for many reasons. Not only is the history of the garde manger a long and fascinating one, it has set a foundation for artistry and culinary achievement that is second to none. Using skills and many tricks of the trade, these chefs are able to produce all sorts of chilled delights that are appealing to both the senses and the taste buds. Fresh, chilled, sweet, tangy, spicy, creamy, crunchy, the beauty of the garde manger proves fire isn't the only way to cook.

What will you learn in this unit?

- Explain the history and significance of the garde manger
- Describe the types of dishes prepared in the cold kitchen
- Identify proper preservation methods, both new and old
- Detail the basic equipment in the garde manger

Unit 5 Quiz	Quiz

Unit 6: The Principles of Food

There is a lot more to food than meets the eye—and the mouth. Every ingredient written up in a menu and served up on a plate has its own unique set of characteristics, mannerisms, and preferences, much like a person. Further, every ingredient, down to the last potato peel, is associated with a monetary cost of some kind, which is why chefs must learn to straddle the world of art and finance. On one side, they are engaging with food creatively, while on the other side, they must also look at the entire process with a practical eye. They must know how to craft a menu without losing sight of their budgetary goals, always shooting for the best value with the most yield. Striking this balance is critical in the food service industry, where things must be both delicious and affordable.

What will you learn in this unit?

- Describe a standardized recipe and its significance to the food industry
- Perform cost analysis on an original recipe
- Explain the application of weights and measures in a food service setting
- Discuss the principles of food preparation

Unit 6 Quiz	Quiz

Unit 7: Professionalism

Entering the world of cuisine is about far more than just cooking. It has its own rich history, language, and professional hierarchy of positions—almost like a mini-kingdom. With the executive chef as the royal monarch, all the other roles unfold beneath to create a network of individuals collaborating as a team to deliver up the best possible food from their kitchen. And being part of this kingdom demands knowledge of its unique rules and expectations, many of which are unwritten and unspoken. But don't be fooled—the cultural climate of a professional kitchen is as real as fire, and it will burn you if don't learn how to get along, communicate, and most importantly, bring your personal best every single time you pick up a pan. For those who can handle the heat, it is one of the most exciting and fulfilling places on earth.

What will you learn in this unit?

- Discuss the history of food service and some of its contributing figures
- Describe the various roles of the kitchen hierarchy
- Define professionalism and its key tenets
- Explain the importance of oral and written communication in the workplace

Unit 8: Leadership, Teamwork, and Ethics

No one said being a chef is a simple profession. It is a world filled with rules, challenges, and expectations, all of which have to be honored and met. Despite its history, the professional kitchen is not really a traditional workplace. It's dangerous and filled with fire and sharp objects. It's a place where tempers run high and performance is everything. It can be a tiring, stressful, and hectic environment. And these realities can sometimes heighten the professional drama and make certain challenges seem insurmountable. But what's important to remember is that life in the kitchen often mirrors the challenges of daily life. People yell, and things sometimes get intense. There are a diverse number of people, backgrounds, and ideas. Things get messed up, and then they get fixed. Just like life. That's why people in food service depend heavily on the strength of their leaders and their team to get the job done, no matter what. Working through personal and professional challenges in a fast-paced environment is an adrenaline rush like no other, and many of the best chefs in the world will tell you they wouldn't trade it for anything.

What will you learn in this unit?

- Describe effective leadership in the workplace
- Explain the role of teamwork in the kitchen
- Discuss the importance of team diversity
- Identify and exhibit professional work ethics

What you will learn in this course

Culinary Arts 1b: Finding Your Palate

Did you know that baking is considered a science? Discover how to elevate your culinary skills through the creation of stocks, soups, sauces, and learn baking techniques. Examine sustainable food practices and the benefits of nutrition while maintaining taste, plating, and presentation to truly wow your guests. Explore careers in the culinary arts for ways to channel your newfound passion!

Unit 1: The Healthy, Sustainable Kitchen

As an aspiring chef, the effort to embrace health and sustainability is important on many levels. Not only is the kitchen a culinary landscape where nutrition is created, it is also the scene of tremendous waste. That's why a firm understanding of nutritional principles must go hand in hand with a clear sense of how kitchen ingredients and processes can be maintained and supported over long periods of time. This combination of information gives chefs the power to

create delicious food while still keeping an awareness of other important factors, like the health and well-being of diners and the world.

What will you learn in this unit?

- Describe the six major food groups and how they affect dietary health
- Apply nutritional principles during food preparation and planning
- Discuss the strengths and weaknesses of nutritional guidelines
- Demonstrate healthy cooking techniques
- Explain the importance of sustainability in the kitchen and how it can be achieved

Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Tools of the Trade

Setting up your workspace in busy professional kitchen is a lot like preparing for a scheduled natural disaster. You can never be fully prepared for it, and you never know what you are going to get—all you know is the rush is going to hit and it’s going to hit big. What you can do is be ready to make your workstation hum. The goal is to make it through the shift successfully, perhaps even enjoying the process of learning as you go. The kitchen is not always predictable and it’s not always pretty—but if you can master the use of your own tools and equipment, you will emerge from the madness in one piece. And along the way, the kitchen brigade will look out for you, help you, and hopefully share a few thoughts on how to improve your cooking game.

What will you learn in this unit?

- Describe the tools and equipment found in a commercial kitchen

Pennwood Cyber Charter School Application

- Explain how to best select, use, and maintain kitchen equipment
- Develop and use an equipment checklist in the kitchen
- Discuss proper mise en place in a kitchen workstation

Unit 2 Activity	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Stocks, Sauces, and Soups

There's a secret to cooking that many people don't know. It's not all about the size of the pork chop or the heat of the fire. And success as a chef is not based solely on the sharpness of your knives or the creativity of your mind. While those aspects are certainly important, they don't rule the culinary world. Instead, the true talent of a chef relies on a much smaller detail—namely, cooking technique. This skillfulness in creating the most basic dishes is the foundation of all cooking, from haute cuisine to simple burgers. When your method or approach to simple foods is spot-on, it translates into larger masterpieces in the kitchen. That's why stocks, soups, and sauces are such a critical piece of your culinary education. As the foundation for flavor, these liquid delights are one of the first building blocks for new chefs who are looking to develop a strong skillset. And once they are mastered, the colorful, delicious landscape of food becomes even more accessible.

What will you learn in this unit?

- Define the four essential components of cooking stock
- Identify and describe the two classifications of soup
- Discuss the principles of thickening agents
- Explain the characteristics and derivatives of the five mother sauces

Unit 4: Baking: Breads, Cakes, & Cookies

The world of baking may seem vast and complicated—and maybe it is a little—but it also has a some very clear ingredients and methods. Anyone new to baking can easily set up a full-service kitchen with just nine essential ingredients and a working knowledge of how these substances fit together to create all sorts of delicious treats. Once the basic science of baking is clear, everything else is just icing on the cake.

What will you learn in this unit?

- Describe various baking methods
- Identify the basic ingredients involved in baking
- Explain the principles of food science in baking techniques
- Discuss the ways baking is considered both a science and an art

Unit 5: Culinary Business and Entrepreneurship

We've talked about food as science and art; now it is time to look at it as a business. If you choose to join the kitchen brigade, you are in for a fast-paced environment, but there are a lot of different ways to incorporate yourself into the food service world outside of cooking in a commercial kitchen. Remember, the culinary arts are about taking tradition and turning it into something innovative and delicious, which is why it's important to understand more about the current trends in food service and how they affect the industry as a whole.

What will you learn in this unit?

- Discuss the history and trends of the food service industry
- Explain the procedures of purchasing, receiving, and issuing
- Identify how entrepreneurs maximize opportunity
- Describe various marketing strategies in food service

Unit 5 Discussion 2	Discussion
Unit 5 Quiz	Quiz

Unit 6: Service, Style, and Satisfaction

When we think about the art of cooking, it's easy to stay focused on things like ingredients, methods, and nutrition, but it's also important to remember the culinary experience is precisely that—an *experience* comprised of many elements beside what's on the menu. For diners, eating in a restaurant, especially an upscale one, offers the chance to enjoy great service while also appreciating the flavors and overall presentation of the food itself. And as a food service professional, this experience is directly linked to personal pride, expert efforts, and a dedication to positive customer relations. When it comes to culinary artistry, the areas of service, style, and satisfaction are yet another place where creativity reigns.

What will you learn in this unit?

- Differentiate between different types and styles of food service
- Identify proper techniques for handling customer relations
- Describe some methods of effective food presentation
- Explain formal dining etiquette from the perspective of both a server and a customer

Unit 7: Choosing Your Culinary Career

A professional opportunity is not worth much if you don't know how to take advantage of it. Seeking ways to maximize what's in front of you, both personally and professionally, is key to finding employment as well as staying happy at work. From self-assessment to networking to setting goals, choosing your culinary career demands a lot of skills and knowledge, but most of all, it requires confidence and the belief that you can achieve all of your dreams with the right moves.

What will you learn in this unit?

- Identify career and employment opportunities
- Explain various steps in the career decision-making process
- Discuss different levels of education and training required for food service
- Describe ways to manage multiple roles and responsibilities

Unit 8: Networking for Success

With so much knowledge in your head about the tools, techniques, and etiquette of the culinary world, it's time to start thinking about how all this information can help you transform your foodie dreams and goals into real, tangible achievements. Learning how to map out your journey

through the food service industry is just as important as understanding the secrets to great soups and sauces; it just takes some motivation, a little inspiration, and a whole lot of self-confidence to visualize the career you want in food service, hospitality, and beyond. You are not alone in this journey; plenty of industry professionals and leadership organizations are there to help you reach your goal.

What will you learn in this unit?

- Explain the significance of professional organizations in hospitality and food service
- Create a personal leadership plan
- Identify leadership and teamwork opportunities to enhance your professional skills
- Name and define several prominent culinary associations

What you will learn in this course

DIGITAL PHOTOGRAPHY 1A: INTRODUCTION

Have you wondered how professional photographers manage to capture that perfect image? Gain a better understanding of photography by exploring camera functions and the elements of composition while putting theory into practice by taking your own spectacular shots! Learn how to display your work for exhibitions and develop skills important for a career as a photographer.

Unit 1: Taking The First Shot

Welcome to the digital age of information *and* photography! This recent growth in technology has obviously changed our lives in many ways, and the realm of photography is no exception. While digital photography shares many characteristics with the traditional artform, digitization of the equipment, the process, and the products related to photography have been positively earth-shattering for expert and amateur photographers alike. With these rapidly advancing abilities,

photographers have drastically changed the way they document the many things they see, incorporating significantly more convenience, ease, and efficacy. So get ready! Now you, too, can be a part of the digital photography wave, changing the visual world in colorful, innovative ways.

What will you learn in this unit?

- Identify and explain basic camera anatomy and function
- Discuss the main subjects found in photography
- Explain how to care for and maintain camera equipment
- Describe how a camera is held and used

Unit 2: Moving Into Manual

When you were a small child, you had to learn how to walk before you could run—and grasping the art of digital photography isn’t much different. At first, using automatic settings that allow you to explore without too much concern for control can be a great way to learn the ropes and get comfortable with your camera. But there will likely come a time when you, as an emerging visual artist, feel ready to “run” with your camera by taking on the challenge of manual settings. To prepare you for this next step, let’s explore the many ways basic camera functions are affected by certain manual modes and how you can use them to create exactly the right setting for your shot. Not only will this help you make informed photographic decisions, it will ensure you get the most out of your time behind the lens—and with the highest quality result.

What will you learn in this unit?

Pennwood Cyber Charter School Application

- Explain the significance of file format
- Identify different types of camera lens and how they function
- Discuss the workings of a light meter.
- Discover the importance of exposure and overall lighting effects

Unit 3: A Snapshot of History

When you stop to consider how far the field of photography has come over the years, it's nothing short of amazing. As both a casual hobby and a profound form of creative expression, it has become an increasingly accessible practice that's now available to every one of us. Yet, simultaneously, it has also risen to find a legitimate place in the world of fine art. Not so sure? Simply look back at the tremendous legacy left behind by the various artists who have embraced photography as a way to enhance their lives and their art form. By taking even a brief peak through the lens of the past at the innovators, scientists, and creators who came before us in the field, we can often trace emerging trends still widely seen today. And interestingly enough, such an understanding can often be incredibly helpful in teaching us how to take our own visions to the next level. So, are you ready? Let's go!

What will you learn in this unit?

- Explain the difference between art and fine art photography
- Identify and discuss selected artists who have contributed to the development of photography
- Identify and discuss general themes and trends in different periods of photographic history
- Describe the mechanics of early photographic systems

Unit 4: The Nature of Light

Have you ever noticed the soft light that illuminates the sky as the sun rises each morning? Or maybe you've smiled while watching a child squeal in delight as they chase their own shadow? Maybe you've even considered trying to capture such moments and the different moods that the light and the shadows create? To do this effectively, you'll want to understand how the elements of light and control work together to create certain effects. For those who want to really, truly grasp the magic behind photography, this is a critical step and one that takes a working knowledge of where light comes from, how it is characterized, and what it can accomplish in a picture. But once you have this practical awareness in your mind, an entire world of creative possibility opens that you can both enjoy *and* control.

What will you learn in this unit?

- Identify light sources and describe how they differ
- Explain how to effectively use available light
- Describe safe and proper use of photographic tools and processes
- Discuss the characteristics of color and how they are affected by light

Unit 5: Creative Composition

Have you ever noticed how some things come so easily while others simply...don't? The world of digital photography is no exception—sometimes you manage to capture the perfect candid shot with no real effort, while other times you need to purposefully arrange and tweak various elements to achieve the desired effect. Because digital photography is often an artistic endeavor, there are no hard, fast “rules” for how to make this easier, but there are plenty of tried and true suggestions! Learning some of these visual organizational strategies, as well as how your camera can help you apply them, will give you the control and understanding you need to find just the right composition, no matter where or what you are shooting. And once you have these things under your belt, you will begin to see subjects and their placement in a whole new way—which means the emerging photographer in you can more easily communicate your vision to the world!

What will you learn in this unit?

- Explain various composition techniques and their effects
- Identify the appropriate lens for a subject

- Discuss how a camera lens relates to visual composition
- Describe the basic components of a tripod and other support equipment

Unit 6: Producing Great Images

Have you ever wondered if it is possible to snap pictures and collaborate with other creatives but still make your own artistic visions a reality—all while actually making money? If you have, the answer is yes, yes, and yes. All of those things are fully achievable if you understand your options and what it takes to access them in the real world. Finding a job, or even a full-blown career, in digital photography is not only realistic, it’s entirely within your grasp with the right motivation and know-how. Learning more about the various roles in professional photography is just the first step in finding out how these visual artists use their love of imagery to carve out a life of art and work, bound together by a solid devotion to the craft and a path toward ongoing personal satisfaction and success.

What will you learn in this unit?

- Identify job titles associated with digital photography
- Discuss the interrelationship among artists
- Describe the various stages of production
- Explain photographic terms and jargon

Unit 6 Quiz	Quiz

Unit 7: Manipulation and Management

Some people would say the absolute best part of digital photography is not learning about lenses or how to zoom in on a great subject but what can actually be done with those images once they are captured in digital form. Image editing and the art of manipulation offer digital photographers a whole new canvas for visual art while also opening a vast world of technical design tools. Turns out the creativity doesn't actually end when the lens cap goes back on—but rather it continues *en force* as photographers turn to software, filters, and effects to bring out the best in their pictures while also harnessing the power of personal imagination. Learning how you can take advantage of these creative options is the first step in navigating the post-production world and understanding more about how to protect your own work while also enjoying the billions of images you see every day.

What will you learn in this unit?

- Explain how image editing and manipulation affects the craft
- Apply design skills to create original works of art
- Discuss the significance of image distortion in digital photography
- Define and discuss the boundaries of copyright protection

Unit 8: Presenting Your Work

After so much effort spent behind the camera lens, aren't you excited for the day when you are finally able to share your photographic talent with the world? This next step in your artistic journey is exciting because it offers you a chance to produce a real event while also channeling your inner artistic vision. And it might surprise you to learn that pulling off your very own photographic art exhibition is not only possible—it's tremendously satisfying. Once you learn how easy it is to plan and present your own work to the public, you'll be itching to get started on planning your first big event. A big dose of positivity, some creative vision, and genuine effort is all you really need.

What will you learn in this unit?

- Discuss the key components of a photographic exhibition
- Create an artistic statement
- Explain the various ways a print can be mounted and installed
- Identify the important factors in a budget

Final Exam Discussion	Discussion

What you will learn in this course

Digital Photography 1b: Creating Images with Impact!

Building on the prior prerequisite course, further develop your photography skills by learning more professional tips, tricks, and techniques to elevate your images. Explore various photographic styles, themes, genres, and artistic approaches. Learn more about photojournalism and how to bring you photos to life. Using this knowledge, build a portfolio of your work to pursue a career in this field!

Unit 1: Photojournalism: Real Life in Pictures

Who takes those photos that appear in the news every day? What about those in magazines or on television and the internet? The answer is photojournalists—they're the professionals charged with the challenging task of finding the best angle on every story they cover. Related to photojournalism, street photographers and documentary photographers also strive to tell the truth of the real world in arresting visual images. These days, anyone can be witness to a historic

event by snapping a cell phone photo that may even be featured around the world. So whether you want to be a citizen photojournalist and document the happenings in your town or a jet-setting war photographer, photographing real life can make headlines near and far.

What will you learn in this unit?

- Apply the ethical rules of photojournalism
- Create photos using the “decisive moment” idea of Cartier-Bresson
- Connect the history of photojournalism to the Pictorialist and straight photography movements
- Analyze the use of citizen journalists by professional news organizations

Unit 2: Context is Everything: Style and Genre

Can you tell a stock photo from a propaganda photo? How about the difference between a glamour and a celebrity photo? All these photo genres have stylistic cues that might provide some clues, but many of them inspire each other so it’s entirely possible to find elements of one genre in another entirely different genre. How about a fashion wildlife shot? Or an ethnographic product shot? Read on to find out how context, aesthetics, cultural sensitivity, and ethics come together in the wide world of photography.

What will you learn in this unit?

- Discern the difference between creative and editorial photography genres
- Compare and contrast stylistic characteristics of different genres of photography

- Differentiate between ethnographic photography and authentic cultural expression
- Analyze photographs by using aesthetic, historical, and contextual cues

Unit 2 Quiz	Quiz

Unit 3: There’s an App for That

In the days before digital photography, people often spent a great deal of time printing and organizing their photographs. This process could be time consuming, potentially pricey, and often required a good amount of storage space and materials. Enter the era of digital photography—we’re going to dive into how you can be a far more efficient digital file clerk for your photos, keeping them safe, polishing them to make them perfect, and sharing them with the world. And the great part is that you don’t have to lug big boxes and risk paper cuts! Organization, of course, is a huge part of being a great photographer. Working with your digital files—which will multiply to the thousands before you know it—is what can make or break a professional career. But don’t stress! Together we’ll uncover how to best manage this beast, and when you need to find that perfect photo, you won’t have to search under every rock—you will have it all organized at your fingertips!

What will you learn in this unit?

- Choose an appropriate workflow and image editing software
- Describe and use three different types of photo metadata
- Experiment with post-processing tools like white balance, tone, and color settings
- Set up a photo gallery on a photo-sharing website that can function as a digital portfolio

Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Words and Pictures: Composing Meaning

We have delved into how to organize your photographic process *technically*, but what about the creative side? What is your creative process? Perhaps you would benefit from developing a sketchbook to work on ideas. Or, dive into studying the elements of visual art and the principles of design so that you have tools to talk about your work. Together, we'll begin to find new ways to go deeper into your artwork by using your verbal skills along with your visual creativity and your technical skill. While we're at it, we'll also learn a bit from some famous artists who combined photography and text in their work.

What will you learn in this unit?

- Analyze the visual elements in a photograph or other work of art
- Apply the principles of design to the creation of photographs or analysis of composition
- Compare and contrast ways of thinking about visual perception in photography
- Implement an open-ended creative process in photography

Midterm Discussion	Discussion

Unit 5: Don't Listen to the Haters: Productive Critique

People are often all too glad to share their opinions. Everyone loves to pipe in with “I love it!” or “that stinks.” But uninformed or quick opinions are not likely to help you improve your photography skills and artistry. However, a solid critique (covering both objective and subjective points about your photos) can make you see your photos in a whole new light. Together, we’ll discover how to both critique other people’s work as well as how to request and respond to feedback we receive. Last, we’ll learn a bit about different styles of interpretation so that we can pull meaning from photos in different ways.

What will you learn in this unit?

- Define the term critique and differentiate it from criticism
- Critique photos and photo series with multiple tools
- Utilize constructive criticism to improve photographic artistry
- Interpret the meaning of photographs through multiple perspectives

Unit 5 Quiz	Quiz

Unit 6: Finding Your Peeps: Photography and Community

We humans are social creatures. Getting together with other photographers is one way to find community, learn new things, get critiques, and share your photography. While online photo communities have a lot to offer, finding your peers in person is a great way to go deeper into developing a community to support you in your work. Plus, you need to learn how to collaborate if you want to work with a group to develop exhibits or projects. Photography can also be a tool to bring together other communities too, giving voice to those who are often unseen in the media. Community-based photography projects offer a way to collaborate or cooperate with community groups to bring new content to the public eye and give back with your developing photography skills. Let's take a deeper look at this, as well as how to develop your own artistic voice and recognize the voice and style of other photographers.

What will you learn in this unit?

- Discuss the importance of photography clubs, today and throughout photographic history
- Connect the changes in photography to the technological changes that have happened in the medium
- Distinguish between collaboration, cooperation, and teamwork and integrate the collaborative process into group projects
- Engage community members in photography projects
- Assess the artistic voice and style of famous photographers and peers

Unit 7: Digital Video: Production and Post-Production

Digital photo overload! How do the professionals handle the thousands of photos they create? You know how to organize them in folders, but how do you pick which ones to show in your portfolio? As you'll quickly see, it's important to learn strategies for culling the masses of photos into a concise, organized portfolio with a theme. Putting together your portfolio with a theme, an audience in mind, and good formatting will allow you to apply for art schools or gallery shows, bringing your photography to the next level. Developing skills that will support your professional career, including soft skills and business skills for the budding photography entrepreneur, is also key. After all, by keeping your photography ideas organized you'll be better set to inspire new ones as you continue as a student, amateur, or even professional photographer.

What will you learn in this unit?

- Analyze and organize your process for choosing portfolio photos
- Tailor your portfolio to the intended audience, whether it is art school, a gallery show, or a client
- Apply soft skills like adaptability, interpersonal communication, and time management to support a photography career
- Develop a plan to continue to learn technical skills, business skills, and to grow as a creative photographer, whether amateur, student, or professional

Unit 8: Presenting Your Portfolio

Ready, set, take a bow! It's time to reflect on your photography, linking it to other photographers both past and contemporary, and also contemplate how far you have come during this course. Remember to take inspiration from other photographers *and* your own progress and use it to propel you to finalize your portfolio, making it as polished and fabulous as you can. Finally, take a deep breath and look forward to the possible ways that you can incorporate your photography skills into your life—whether as a career, a useful addition to your job skills, or a satisfying hobby.

What will you learn in this unit?

- Connect your photographic work to that of famous photographers of yesterday and today
- Analyze your progress and creatively write and revise your artist's statement
- Sequence your portfolio in an aesthetically pleasing way
- Research, identify, and pursue job or avocational opportunities in photography

Driver's Education

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will learn the fundamental skills for responsible driving. This course emphasizes the mechanics of driving, execution of driving operations, and rules of safe driving. The student will identify and recognize traffic laws, signs and other markings, and basic checks on a vehicle. In addition, the student will learn the rules for sharing the roadway, responding to weather conditions, and other vehicle emergencies.

Course Outline

1. The Driving Task

1. Introduction to the Course

- Describe the three parts of the highway transportation system
- Explain how the National Highway Safety Act affects drivers
- Explain how the National Traffic and Motor Vehicle Safety Act helps keep drivers and passengers safe

2. You Are the Driver

- Describe mental, social, and physical factors that might affect your driving ability and how these skills help you be a low-risk driver
- Analyze the four steps in the IPDE process in relation to a fictitious driving situation
- Explain the legal, financial, environmental, and personal responsibilities that drivers have and give an example of each
- Describe the stages of a graduated driver license program and the purpose of each
- Explain the purpose of the organ donor program
- Express the implied consent law in two cause-and-effect statements

3. Signs, Signals, and Roadway Markings

- List the different categories of road signs by color and purpose
- Explain what to do at an intersection in these situations: green, yellow, or red light; arrows; flashing lights; lane signals; pedestrian in crosswalk; traffic-control officers' signaling
- Describe proper use of road and street markings, including center lines (solid, broken, yellow, and white); highway exit ramps; railroad and school crossings; and parking restrictions
- Explain the effect and purpose of rumble strips and raised roadway markers

4. Basic Vehicle Operation

- Describe how to use the operational controls in vehicles

- List communication and comfort devices that are available for use in vehicles
- Create a labeled diagram showing the purposes of the gauges and warning lights on a vehicle's instrument panel
- Identify steps you can take to reduce risk while walking to your vehicle and before getting into your vehicle
- Describe smooth acceleration and braking actions and why they are important
- Explain how, when, and why you should choose a driving target
- Compare the functions, advantages, and disadvantages of automatic and manual transmissions

5. Performing Basic Maneuvers

- Explain when and how to use vehicle mirrors, including rearview mirrors, outside mirrors, and convex mirrors
- Describe the steps and risks involved in backing up a vehicle
- Explain how to make left turns, right turns, and turnabouts, including lane positioning and use of signal lights
- Describe the different types of turnabouts and when to use each type
- Explain how to park a vehicle, including angle, perpendicular, and parallel parking methods
- Compare the reasons for choosing angle, perpendicular, or parallel parking

6. The Driving Task Unit Test

There are no objectives for this lesson.

2. Being a Responsible Driver

1. Managing Risk and the IPDE Process

- Outline the key components of the Identify part of IPDE
- Describe steps drivers can take to implement the Prediction part of IPDE
- List the options available to drivers when implementing the Decide part of IPDE
- Describe the differences between the three lane positions within a single lane
- Identify the three actions a driver has to choose from when carrying out the Execute part of IPDE
- List the options that a driver has for communicating with other drivers
- Explain why it is critical that drivers selectively use the IPDE Process

2. Effects of Driver Condition

- Describe how emotions can affect your ability to drive and how you can manage your emotions
- Describe the relationship between driving and different vision issues
- List ways that your senses can make you a safer driver
- Identify possible sensory distractions and ways to manage them
- List actions drivers can take to combat fatigue
- Describe ways that medicines, carbon monoxide, smoking, aging, and illnesses affect drivers
- Explain how adaptations can help drivers with permanent disabilities to compensate

3. Alcohol, Other Drugs, and Driving

- Describe the mental and physical effects alcohol has on people and the problems alcohol can cause for drivers
- Explain the significance of blood-alcohol concentration (BAC) and the factors that affect it
- Explain the relationship between driving and different drugs including over-the-counter medicine, prescription medicine, depressants, stimulants, hallucinogenic drugs, and the combination of alcohol and drugs
- Explain laws and choices that relate to a person who is driving under the influence
- Explain what peer pressure is, the problems it can cause, and how to say no to it so you can make responsible decisions on your own

4. Managing Distractions

- Compare distractive and inattentive driving including examples of each
- List the four distraction classifications with examples of each and how to avoid them
- Explain the dangers of using a mobile communications device while driving
- List the three categories of inside-the-vehicle distractions with examples of each and how to avoid each
- List the three categories of outside-the-vehicle distractions with examples of each and how to avoid each

5. Being a Responsible Driver Unit Test

There are no objectives for this lesson.

3. **Controlling Your Vehicle**

1. Natural Laws and Car Control

- Describe how inertia, momentum, energy of motion, and gravity affect a vehicle
- Explain traction in relation to car control, tread and proper inflation, driver actions, and traction reduction
- Explain vehicle control in relation to gravity, vehicle balance, speed, sharpness of curves, vehicle load, and road shape
- Explain factors that determine stopping distances and affect braking distances
- Identify factors that affect force of impact in a collision
- Describe the uses and benefits of safety belts and air bags
- Explain how to safely transport children in vehicles

2. Negotiating Intersections

- Explain how to recognize and maneuver an intersection
- Explain how to know who has the right of way and how to handle it
- Describe how to both turn and go straight at intersections with traffic lights or signs
- Describe an uncontrolled intersection and how to both turn and go straight at uncontrolled intersections
- Describe passive and active railroad crossings and actions drivers should take at them
- Describe the benefits of roundabouts, how traffic flow compares between roundabouts and intersections with signals, and procedures for driving through roundabouts

3. Sharing the Roadway

- Explain steps pedestrians and drivers can take to keep pedestrians safe
- Explain how drivers can search for and help protect cyclists
- Explain why riders of bicycles and mopeds are vulnerable on the roadway and guidelines they should follow
- Explain why and how drivers need to look out for motorcyclists
- Describe procedures and gear that can help keep motorcyclists and scooter riders safe
- Describe risks and procedures for following, passing, and meeting both large and low-speed vehicles
- Explain the rules regarding driving near school buses and emergency vehicles

4. Driving in Adverse Conditions

- Describe how drivers can best deal with low-visibility situations
- Explain how drivers can make their vehicles more visible at dawn and dusk
- Explain how drivers can deal both with night driving and with bright headlights at night
- Explain how to drive safely in rain and snow
- Describe precautions for driving in windy conditions, hot weather, and cold weather

5. Handling Emergencies

- List actions to handle each of these situations: tire failure, brake failure, engine or steering failure, loss of forward vision, vehicle fires
- Explain how to safely continue driving down the road if one or more wheels goes off the road or if you have to make an emergency swerve
- Explain how to handle these driving risks: potholes, too-fast curves, and a vehicle sinking in water
- Describe ways to avoid or minimize collisions
- List steps to take if a collision occurs
- Explain financial responsibility law and how it relates to insurance
- List types of vehicle insurance and factors that affect the cost of insurance

6. Controlling Your Vehicle Unit Test

There are no objectives for this lesson.

4. Driving in Different Environments

1. Driving in City Traffic and Rural Areas

- Identify difficulties with city driving and tips for safe city driving
- Describe how to use a 3-second following distance and how to safely manage a tailgater
- Explain how to cover the brake and why you would do so
- Identify difficulties with driving on rural roadways and tips for safe rural driving
- Explain safe handling of curves, hills, intersections, two-lane roads, multilane rural highways, following distances, passing, and being passed
- Explain how to safely deal with slow-moving vehicles, animals, and railroad crossings

2. Driving on Highways

- Describe the different types of highways and interchanges
- Explain procedures and possible problems when using entrance ramps, acceleration lanes, and merge lanes
- Describe how to use the IPDE Process on the Interstate Highway System and when exiting a freeway
- Identify the steps and possible problems when exiting a freeway
- Describe the risks drivers face due to highway hypnosis and velocitation
- Explain the procedures to follow if you need to pull your car over to the shoulder
- Describe toll plazas, the risks associated with them, and how drivers can reduce the risks

3. Driving in Different Environments Unit Test

5. Final Exam

1. Final Exam

What you will learn in this course

Early Childhood Education 1a: Introduction

Are you curious to see what it takes to educate and nurture early learners? Use your curiosity to explore the fundamentals of childcare, like nutrition and safety, but also the complex relationships caregivers have with parents and their children. Examine the various life stages of child development and the best educational practices to enrich their minds while thinking about a possible future as a childcare provider!

Unit 1: Childcare Roles and Obligations

Understanding the differing roles and responsibilities of parents and caregivers is essential for students considering a career in child care. Both parents and childcare providers provide love and nurturing and model appropriate behavior for children. Parents and caregivers work as a team, with the parent as the primary authority and the caregiver as an essential support to the

parent. Caregivers have a responsibility to maintain an environment that is safe, healthy, and respectful for the children in their care.

What will you learn in this unit?

- Explain why early childhood education matters.
- Describe different types of families and parenting arrangements.
- Describe the legal responsibilities of parenthood.
- Discuss the moral or ethical responsibilities of parenthood.
- Describe the basic responsibilities of childcare providers.
- Explain how culture and diversity impact the childcare environment.

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Activity	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: A Clean, Safe and Healthy Childcare Environment

Childcare homes and facilities, regardless of size, have a responsibility to provide a clean and safe environment for children in their care. Understanding cleanliness standards and child safety is essential for all childcare providers, whether employees or owners. Appropriate hygiene in the childcare environment will reduce illness, prevent pests, and keep children healthy. Child proofing and other child-safety measures reduce risks for children in care. Together, these measures create a clean, safe, and healthy environment for both children and caregivers.

What will you learn in this unit?

- Demonstrate how to sanitize and disinfect the childcare environment.
- Demonstrate proper hand-washing technique and practices.

Pennwood Cyber Charter School Application

- Describe safe infant sleep habits.
- Describe appropriate security for the childcare home or center.

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity 1	Homework
Unit 2 Activity 2	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Food and Nutrition

Children in care typically consume a significant portion of their daily food at the childcare center or facility. Many children eat breakfast, lunch, and snacks away from home. Providing healthy, tasty meals is an essential part of caring for children, from infants through school-age kids. Good nutrition provides children with a healthy start in life that will remain with them throughout their lives.

What will you learn in this unit?

- Describe and explain the USDA and state requirements for meals in a childcare facility.
- Explain what is required for participation in the Child and Adult Food Care Program.
- Explain how to plan meals and menus for children.
- Describe positive mealtime strategies.

UNIT 3 Assignments

Unit 3 Critical Thinking Questions	Homework
Unit 3 Lab	Homework
Unit 3 Activity	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Rules and Regulations

Laws regulate the standards and operation of childcare facilities. These laws cover both small and large childcare facilities and providers, including small-scale registered childcare homes, somewhat larger licensed childcare homes, and fully staffed childcare centers. Understanding the laws controlling childcare facilities is essential for any potential childcare provider.

What will you learn in this unit?

- Describe the types of childcare facilities.
- Explain how childcare facilities are regulated.
- Describe the rules that apply to childcare facilities.
- Describe the signs and symptoms of child abuse.
- Explain how to speak to a child disclosing abuse.

Early Childhood Education 1a Midterm Exam

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first four units in this course (Note: You will be able to open this exam only one time.)

MIDTERM Assignments	
Assignment	Type
Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 5: Pregnancy and Childbirth

Many of the families that you work with may be experiencing pregnancy and childbirth as you care for their children. As a childcare provider, studying the dynamics surrounding pregnancy and childbirth will help you relate to families and develop an understanding of early child development as well.

What will you learn in this unit?

- Describe the signs and stages of pregnancy
- Explain the characteristics of each trimester of pregnancy
- Discuss best practices for a healthy pregnancy and how prenatal medical care commonly proceeds
- Analyze the stages of birth from onset of contractions to delivery of the placenta
- Consider the benefits of breastfeeding

UNIT 5 Assignments	
Assignment	Type
Unit 5 Critical Thinking Questions	Homework
Unit 5 Lab	Homework

Unit 5 Discussion 1	Discussion
Unit 5 Discussion 2	Discussion
Unit 5 Quiz	Quiz

Unit 6: Early Childhood Development

Understanding child development enables the childcare provider to maintain appropriate expectations regarding skills and behavior for children from infancy through the early school years. A thorough understanding of typical child development also allows the provider to recognize developmental delays and serve as an essential part of the care team for special needs children.

What will you learn in this unit?

- Define and discuss physical, cognitive, language, and social development.
- Describe the typical stages of development from infancy through the school years.
- Describe how to recognize typical developmental milestones.
- Explain when to talk to parents about possible developmental delays.

Unit 6 Activity 1	Homework
Unit 6 Activity 2	Homework
Unit 6 Discussion 1	Discussion
Unit 6 Discussion 2	Discussion
Unit 6 Quiz	Quiz

Unit 7: Special Needs and Inclusivity

It is important for early childhood professionals to understand not just typical child development but also the needs of children with disabilities. From birth to school-age, all

children need affection, stimulation, attention, and care—and they all want to have fun! This is no different for children with special needs; they just often need some assistance to participate in activities happily and safely. In this unit, we’ll explore the evolution of special education as a whole, with a focus on inclusive classrooms, and walk through some of the most prominent special needs you may encounter when working as an early childhood educator.

What will you learn in this unit?

- Review the history of and landmark turning points in special education
- Discuss how disabilities like Down syndrome and cleft palate affect infants’ needs
- Describe how toddlers cope with disabilities like autism or muscular dystrophy
- Explain the way inclusive classrooms function for pre-school and school-aged children

Unit 7 Lab	Homework
Unit 7 Activity	Homework
Unit 7 Discussion 1	Discussion
Unit 7 Discussion 2	Discussion
Unit 7 Quiz	Quiz

Unit 8: Spotlight on Administration: Setting Up Your Childcare Program

There are many roles to fill in the early childhood sector, but none of these jobs would exist without the hard work of entrepreneurs who start businesses and create jobs. Making the transition from early childhood educator to business owner will require you to consider some the legal, financial, and logistic aspects of running a business. You may not feel you’re ready for this yet, so we’ll start by walking through a day in the life of a business owner. Along the way, you’ll grow in responsibility and business know-how, learning to attract your ideal customers to book your special services, and grow your business through various stages of development.

What will you learn in this unit?

Pennwood Cyber Charter School Application

- Understand the daily life and responsibilities of an early childhood entrepreneur
- Decide on a legal business structure that meets your needs
- Plan for business finances, including budgets, expenses, and taxes
- Discuss how marketing, advertising, and sales generate income for a business
- Discern growth strategies to increase business revenue

Final Exam Discussion	Discussion

What you will learn in this course

Early Childhood Education 1b: Developing Early Learners

Building on the previous prerequisite course, discover the joys of providing exceptional childcare and helping to develop future generations. Learn the importance of play and use it to build engaging educational activities that build literacy and math skills through each stage of childhood and special need. Use this knowledge to develop your professional skills well suited to a career in childcare!

Unit 1: Play: A Child's Work

Early childcare workers and caregivers serve a key role in facilitating play for young children. From birth to age six, play is essential for the child's growth and development, providing a vast array of learning opportunities. Understanding the value of play, its role in the childcare home or center, and how adults can encourage and support children's play is an essential part of understanding early childhood development and early childhood education.

What will you learn in this unit?

- Describe how children develop and grow cognitively during early childhood
- Describe when play behaviors develop and how children play at different ages
- Explain what the types of play are and how they benefit children
- Explain how to integrate play into children’s activities in a childcare setting

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Activity	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Guidance and Discipline

Creating a positive, loving, and enriching environment for children requires not only an understanding of child development, nutrition, and safety but also the ability to discipline and guide children. Maintaining a well-controlled classroom and teaching children appropriate behavior are essential responsibilities of any childcare provider. With additional knowledge about discipline and guidance, you will be prepared to work together with children, parents, and coworkers to create a positive and nurturing space.

What will you learn in this unit?

- Describe the three basic types of child discipline
- Explain how to effectively communicate with children
- Explain how to use positive language to create good behavior and self-esteem
- Describe when to intervene and help children manage their own interactions
- Explain how to discipline children at different ages

UNIT 2 Assignments

Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Communication, Observation and Recording

While caring for children is the childcare provider's primary responsibility, care providers also must communicate with parents, observe children, and record those observations. By maintaining open and positive communication with parents, you can work as a team, acting in the best interest of the children in your care. Observation and recording are two essential tools that can provide parents with information about their children and provide care providers with additional insights about both individual children and the functions of the classroom or daycare home.

What will you learn in this unit?

- Demonstrate developmentally appropriate communication with children
- Demonstrate how to talk with parents and maintain open communication
- Describe what observation is and how to observe children
- Explain screenings, assessments, evaluations, and proper record keeping in a childcare setting
- Describe and discuss how to use your observations to improve the care of children

UNIT 3 Assignments

Assignment	Type
Unit 3 Critical Thinking Questions	Homework
Unit 3 Lab	Homework

Unit 3 Activity	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Early Literacy Skills

Building language and literacy skills is essential in early childhood. Childcare providers can help children develop a broad vocabulary, language skills, and letter recognition in preparation for kindergarten. While childcare facilities may opt for a more or less academic perspective, creating a rich environment with ample access to language and books will help children be ready to learn to read.

What will you learn in this unit?

- Describe how to encourage language development in young children
- Identify ways young children use language
- Explain what a literacy-rich environment looks like and how to create one
- List the six essential pre-literacy skills
- Explain how to support children in learning pre-literacy skills

UNIT 4 Assignments

Early Childhood Education 1b Midterm Exam

Pennwood Cyber Charter School Application

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first four units in this course (Note: You will be able to open this exam only one time.)

MIDTERM Assignments	
Assignment	Type
Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 5: Early Math Skills

Early math skills build upon and are informed by early literacy skills! Think about it—we use words to describe mathematical patterns and phenomena like “more” and “less,” so the more a child’s verbal ability grows, the more they can manipulate complex mathematical concepts. Childcare providers can encourage children to develop early pre-math skills through play and everyday interactions.

What will you learn in this unit?

- Explain pre-math skills that children should know before entering kindergarten
- Understand how math skills develop from birth to age two
- Discuss building math skills during the toddler years
- Define math skills children should learn in pre-school
- Reflect on how personal math experiences may impact teaching and discuss creating a math-rich learning environment

Assignment	Type
Unit 5 Critical Thinking Questions	Homework
Unit 5 Lab	Homework
Unit 5 Activity	Homework

Unit 5 Discussion 1	Discussion
Unit 5 Discussion 2	Discussion
Unit 5 Quiz	Quiz

Unit 6: Planning Appropriate Curriculum and Activities

Children need the opportunity to engage in self-directed and teacher-directed activities each day. The good news is that there are almost endless curriculum planning resources available to help you develop engaging and enriching lessons for your students. We'll go over some of the most common and effective curriculum models and some fun ideas for children of all ages in the extracurricular subjects of physical activity, outdoor play, and arts and music.

What will you learn in this unit?

- Understand the components of pedagogy, including curriculum, teaching methodology, and child socialization
- Explore some popular curriculum models
- Create your own curriculum through thematic and lesson planning
- Consider activities to foster physical exercise, outdoor play, and music and arts exploration in children of all ages

UNIT 6 Assignments

Unit 6 Discussion 1	Discussion
Unit 6 Discussion 2	Discussion
Unit 6 Quiz	Quiz

Unit 7: Using Technology in Early Childhood Education

So much of cognitive and social development occurs during the first few years of life. But how does technology (and, more specifically, screen use) impact that growth? We all likely have memories of favorite childhood TV shows or movies that taught us letters, shapes, or how to be a good friend, so we know that technology can be a useful tool in building important early childhood skills. We'll explore appropriate use of technology in the early childhood setting and experiment with some of the newest trends and tools the media world has to offer young learners.

What will you learn in this unit?

- Explain best practices when using media and technology with young children
- Describe how to choose quality and age-appropriate media for infants, toddlers, and preschoolers
- Discuss administrative concerns around educational technology, including technology policies and technology tools for teachers
- Consider contemporary issues in educational technology

UNIT 7 Assignments	
Assignment	Type
Unit 7 Critical Thinking Questions	Homework
Unit 7 Lab	Homework
Unit 7 Activity	Homework
Unit 7 Discussion 1	Discussion
Unit 7 Discussion 2	Discussion
Unit 7 Quiz	Quiz

Unit 8: Personal Goals and Development

The study of early childhood education and child development may provide the basis for a career in child care, early childhood education, or other fields strongly related to child care and children's welfare and well-being. During this course, you may have discovered subjects of strong personal interest and feel drawn to a particular aspect of early childhood education, from nutrition to children with special needs. Regardless of your personal interests, if you opt to

pursue a career working with children, you need to consider your educational goals, your personal dreams, and the best way to build a successful and rewarding career.

What will you learn in this unit?

- Explain how to develop an educational plan that will help you to meet your goals
- Describe good work habits
- Describe where to find and how to use professional-development opportunities
- Explain what personality traits will help you succeed
- Explain how to care for yourself while caring for children

Final Exam Discussion	Discussion

Educational Technology and Online Learning K

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, students will explore the features of a draw and paint program as a tool to support emerging reading, writing, and mathematics skills. They will locate letters and numbers on the keyboard. A study skills unit will introduce them to listening and visualization skills that will support learning across the school day. Students will recognize safe and responsible use of technology resources so that they can become model digital citizens.

Course Outline

1. Internet Safety

1. Cyber Community
 - Identify the concept of community and apply it to knowledge of the Internet
 - Identify and discuss vocabulary words related to the Internet
 - Relate and connect the physical community to the abstract concept of a cyber community
 - Complete a hands-on activity to reinforce vocabulary and concepts introduced
2. Cyber Citizenship
 - Identify the qualities of being a good friend
 - Understand that a bully is mean to people on purpose
 - Understand that bullying can be online and offline
3. Cyber Security
 - Examine the concept that computers can become infected with viruses
 - Explain why it is important to use caution and to seek help when opening e-mail
 - Discuss the concept of the computer virus
 - Engage in a discussion with the Learning Coach to learn about computer viruses
4. Personal Safety
 - Develop an understanding of the term identity
 - Describe how an identity is formed online
 - Explain why a trusted adult can help create and keep a student's online identity safe

2. Tux Paint

1. Beginning Consonant C
 - Academic: Identify and write an uppercase and a lowercase letter c and pronounce the correct consonant sound
 - Academic: Illustrate the difference between an uppercase and a lowercase letter c

- Academic: Interpret pictures in order to identify words that begin with the letter c
 - Technology: Demonstrate how to use the Paint tool in Tux Paint to illustrate an uppercase and a lowercase letter c
 - Technology: Demonstrate how to use the Eraser tool in Tux Paint to edit mistakes
2. Beginning Consonant D
- Academic: Identify and write an uppercase and a lowercase letter d and pronounce the correct consonant sound
 - Academic: Interpret pictures in order to identify words that begin with the letter d
 - Technology: Demonstrate how to use the Paint tool in Tux Paint to illustrate an uppercase and a lowercase letter d
 - Technology: Demonstrate how to use the Eraser tool in Tux Paint to edit mistakes
 - Technology: Demonstrate how to use the Stamp tool in Tux Paint to illustrate words that begin with the letter d
3. Beginning Consonant J
- Academic: Identify and write an uppercase and a lowercase letter j and pronounce the correct consonant sound
 - Academic: Interpret pictures in order to identify words that begin with the letter j
 - Technology: Demonstrate how to use the Paint tool and Rainbow effect button in Tux Paint to illustrate an uppercase and a lowercase letter j
 - Technology: Demonstrate how to use the Eraser tool in Tux Paint to edit mistakes
 - Technology: Apply a background image to a Tux Paint project
4. Beginning Consonant K
- Academic: Identify and write an uppercase and a lowercase letter k and pronounce the correct consonant sound
 - Academic: Illustrate the difference between an uppercase and a lowercase letter k
 - Academic: Interpret pictures in order to identify words that begin with the letter k
 - Technology: Demonstrate how to use features of the Paint tool in Tux Paint to illustrate an uppercase and a lowercase letter k using different sizes, strokes, and colors
 - Technology: Demonstrate how to use the Eraser tool in Tux Paint to edit mistakes
5. Beginning Consonant L
- Academic: Identify and write an uppercase and a lowercase letter l and pronounce the correct consonant sound
 - Academic: Interpret pictures in order to identify words that begin with the letter l
 - Technology: Demonstrate how to use the Paint tool in Tux Paint to illustrate an uppercase and a lowercase letter l using different sizes, strokes, and colors
 - Technology: Demonstrate how to use the Eraser tool in Tux Paint to edit mistakes
 - Technology: Demonstrate how to use the Stamp tool in Tux Paint to locate and integrate sign language symbols into Tux Paint pictures
6. Beginning Consonant M
- Academic: Identify and write an uppercase and a lowercase letter m and pronounce the correct consonant sound
 - Academic: Interpret pictures in order to identify words that begin with the letter m
 - Technology: Demonstrate how to use the Paint tool in Tux Paint to illustrate an uppercase and a lowercase letter m using different sizes, strokes, and colors
 - Technology: Demonstrate how to use the Eraser tool in Tux Paint to edit mistakes
 - Technology: Demonstrate how to use the Calligraphy effect button in Tux Paint to illustrate key words beginning with the letter m
7. Beginning Consonant N

- Academic: Identify and write an uppercase and a lowercase letter n and pronounce the correct consonant sound
 - Academic: Illustrate the difference between an uppercase and a lowercase letter n
 - Academic: Interpret pictures in order to identify words that begin with the letter n
 - Technology: Demonstrate how to use the Text tool and Shift key in Tux Paint to type key words in both uppercase and lowercase letters
 - Technology: Demonstrate how to use the Undo button in Tux Paint to edit mistakes
8. Beginning Consonant Q
- Academic: Identify and write an uppercase and a lowercase letter q and pronounce the correct consonant sound
 - Academic: Interpret pictures in order to identify words that begin with the letter q
 - Technology: Demonstrate how to use the Paint tool in Tux Paint to illustrate an uppercase and a lowercase letter q
 - Technology: Demonstrate how to use the Text tool and Shift key in Tux Paint to type key words in both uppercase and lowercase letters and format text in different colors
 - Technology: Demonstrate how to use the Undo button in Tux Paint to edit mistakes
9. Beginning Consonant S
- Academic: Identify and write an uppercase and a lowercase letter s and pronounce the correct consonant sound
 - Technology: Demonstrate how to use the Text tool and Shift key in Tux Paint to type key words in both uppercase and lowercase letters
 - Technology: Demonstrate how to use the Letters selector to format text in different font styles
 - Technology: Demonstrate how to use the Undo button in Tux Paint to edit mistakes
 - Technology: Demonstrate how to use the Stamp tool in Tux Paint to illustrate words that begin with the letter s
10. Beginning Consonant T
- Academic: Identify and write an uppercase and a lowercase letter t and pronounce the correct consonant sound
 - Technology: Demonstrate how to use the Text, Magic, and Paint tools to type and illustrate key words
 - Technology: Demonstrate how to use the Text tool and format text in different colors, font styles, and sizes
 - Technology: Demonstrate how to use the Undo button in Tux Paint to edit mistakes
 - Technology: Demonstrate how to use the Stamp tool in Tux Paint to illustrate words that begin with the letter t
11. Frequent Words: all, are, at, but, and who
- Academic: Identify and pronounce high frequency words all, are, at, but, and who
 - Academic: Define high frequency words all, are, at, but, and who
 - Academic: Compose meaningful sentences using high frequency words all, are, at, but, and who
 - Technology: Demonstrate how to use the Paint tool and Text tool in Tux Paint to write and type high frequency words all, are, at, but, and who
 - Technology: Demonstrate how to use the Stamp tool in Tux Paint to illustrate the meaning of high frequency words all, are, at, but, and who
12. Frequent Words: did, do, eat, get, good, and have
- Academic: Identify and pronounce high frequency words did, do, eat, get, good, and have
 - Academic: Define high frequency words did, do, eat, get, good, and have
 - Academic: Compose meaningful sentences using high frequency words did, do, eat, get, good, and have

- Technology: Demonstrate how to use the Paint tool and Text tool in Tux Paint to write and type high frequency words did, do, eat, get, good, and have
- Technology: Demonstrate how to use the Stamp tool in Tux Paint to illustrate the meaning of high frequency words did, do, eat, get, good, and have

13. Frequent Words: he, like, new, no, on, and will

- Academic: Identify and pronounce high frequency words he, like, new, no, on, and will
- Academic: Define high frequency words he, like, new, no, on, and will
- Academic: Compose meaningful sentences using high frequency words he, like, new, no, on, and will
- Technology: Demonstrate how to use the Paint tool and Text tool in Tux Paint to write and type high frequency words he, like, new, no, on, and will
- Technology: Demonstrate how to use the Stamp tool in Tux Paint to illustrate the meaning of high frequency words he, like, new, no, on, and will

14. Recognizing Shapes

- Academic: Identify and name squares, circles, triangles, and rectangles
- Academic: Illustrate different shapes at various sizes
- Technology: Demonstrate how to use the Shapes tool and Color palette in Tux Paint in order to draw two-dimensional shapes in various colors
- Technology: Demonstrate how to use the Text tool in Tux Paint and label individual shapes

15. Naming Shapes

- Academic: Identify, name, and draw squares, circles, triangles, and rectangles
- Academic: Classify polygons based on number of sides
- Technology: Demonstrate how to use the Shapes tool and Color palette in Tux Paint and draw two-dimensional shapes in various colors
- Technology: Demonstrate how to use the Text tool and Color palette in Tux Paint and label polygons in various colors
- Technology: Demonstrate how to use the Stamp tool in Tux Paint to compile real-world pictures that represent polygons

3. Keyboarding

1. Keyboarding A–M

- Identify and type the letters A–M on the keyboard

2. Keyboarding N–Z

- Identify and type the letters N–Z on the keyboard

3. Keyboarding Numbers and Letters

- Identify and type the letters A–Z on the keyboard
- Identify and type the numbers 0–9 on the keyboard

4. Study Skills

1. Online Learning and a Proper Work Environment

- Academic: Identify familiar environments and compare them to the online learning environment
- Academic: Identify tips for successful online learning
- Technology: Apply digital tools and resources to address a variety of tasks and problems

2. Listening and Speaking

- Academic: Discuss the importance of having good listening skills
- Academic: Describe ways that effective speakers help listeners
- Technology: Illustrate and communicate original ideas and stories using digital tools and resources

- Technology: Demonstrate the ability to navigate virtual environments
3. Visualization
- Academic: Describe how pictures and other visuals enhance reading and writing
 - Academic: Explain how visuals help demonstrate understanding
 - Academic: Create a visual in Tux Paint to share information
 - Technology: Demonstrate how to use simulations and graphic organizers to explore and depict patterns of growth, such as the life cycles of plants and animals

Educational Technology and Online Learning 1

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, students build on foundational skills while using software to draw, type, and format text, and create presentations to support academic skills. Students learn listening and organizational skills and set attainable learning goals. Students become responsible users of technology as they learn about Internet safety and appropriate online behavior.

Course Outline

1. **Keyboarding**

1. Keyboarding Numbers and Letters
 - Identify and type the letters A–Z on the keyboard
 - Identify and type the numbers 0–9 on the keyboard
2. Keyboarding Rows
 - Identify the home row of the keyboard
 - Identify the rows above and below the home row
 - Demonstrate how to use the keyboard to type the home row keys and the rows above and below the home row
3. J, F, Space Bar
 - Apply proper touch typing skills to type the letters J and F and the space bar
 - Demonstrate correct posture and finger position while typing
4. D and K
 - Apply proper touch typing skills to type the letters D and K
 - Demonstrate correct posture and finger position while typing
5. S and L
 - Apply proper touch typing skills to type the letters S and L
 - Demonstrate correct posture and finger position while typing
6. A and ;
 - Apply proper touch typing skills to type the letter A and ; (semicolon)
 - Demonstrate correct posture and finger position while typing
7. G and H
 - Apply proper touch typing skills to type the letters G and H

- Demonstrate correct posture and finger position while typing

2. Microsoft® Word

1. High Frequency Words

- Academic: Identify and read high frequency words
- Academic: Compose sentences using high frequency words
- Technology: Demonstrate how to type text and use the Enter key to begin new lines in a document
- Technology: Demonstrate how to italicize, bold, and underline text using font formatting buttons in the Home ribbon
- Technology: Demonstrate how to apply a different font face, color, and size using the Font Face, Font Color, and Font Size drop-down menus

2. How Is the Character Feeling?

- Academic: Describe how a character in a story feels
- Academic: Analyze how a character in a story feels using key words
- Technology: Demonstrate how to type words in meaningful sentences
- Technology: Demonstrate how to adjust and apply formatting to font using menus and buttons within the Home ribbon

3. Descriptive Words

- Academic: Describe pictures using descriptive words
- Academic: Compose sentences using descriptive words
- Technology: Demonstrate how to type words in meaningful sentences
- Technology: Demonstrate how to change the font face and font color using the Font Face and Font Size drop-down menus
- Technology: Demonstrate how to insert clip art to illustrate key words

4. Counting the Sides of Shapes

- Academic: Identify and classify shapes based on their attributes
- Technology: Demonstrate how to insert and format shapes in a document using the Shapes drop-down menu
- Technology: Demonstrate how to insert a text box using the Text Box drop-down menu, and type numbers within a text box
- Technology: Demonstrate how to insert a table using the Text Box drop-down menu, add the correct number of rows and columns, and format the table in a document

5. Highlighting Main Idea

- Academic: Identify the main idea in informational text
- Technology: Demonstrate how to highlight the main idea of an article using the Highlighter tool
- Technology: Demonstrate how to use Word Art to create titles in a document
- Technology: Demonstrate how to add meaningful clip art to an article to express the main idea

6. Navigating Text Features

- Academic: Identify text features in informational text
- Academic: Analyze and assess the use of text features in informational text
- Technology: Demonstrate how to insert text boxes to add labels or captions to pictures
- Technology: Demonstrate how to change the style of text
- Technology: Demonstrate how to highlight main ideas using the Highlighter tool

7. Creating a Poster

- Academic: Plan and design an informational poster
- Academic: Create an informational poster using text features
- Technology: Demonstrate how to insert pictures from the computer into a document

- Technology: Demonstrate how to use font formatting features, insert shapes, clip art, and add text boxes in a document

3. Microsoft® PowerPoint

1. Classifying Information

- Academic: Identify similarities among objects
- Academic: Classify and categorize objects based on their similarities
- Technology: Demonstrate how to build a presentation by inserting new slides using the New Slide drop-down menu
- Technology: Demonstrate how to incorporate titles within text boxes on each slide to name a category
- Technology: Illustrate classified objects using clip art

2. The Food Chain

- Academic: Identify and sequence plants and animals in a food chain
- Academic: Create a food chain to illustrate how animals satisfy their need for food
- Technology: Demonstrate how to incorporate new slides in order to build a presentation
- Technology: Demonstrate typing text and adding clip art to illustrate the food chain
- Technology: Demonstrate how to select and move slides in order to create a food chain

4. Microsoft® Excel

1. Skip Counting by 5s and 10s

- Academic: Identify number patterns for multiples of 5 and 10
- Academic: Demonstrate skip counting in increments of 5 and 10 utilizing a hundreds chart
- Technology: Demonstrate navigating between cells using the mouse
- Technology: Demonstrate changing the cell fill color using the Fill drop-down menu

2. Parts of 10

- Academic: Identify and illustrate parts of 10 using a ten-frame
- Technology: Demonstrate typing numbers in cells and navigating between worksheets
- Technology: Demonstrate changing the cell fill color using the Fill drop-down menu to illustrate parts of 10

3. Finding the Missing Part

- Academic: Demonstrate counting on a hundreds chart
- Academic: Identify the missing part of 10
- Academic: Complete a part-part-whole table
- Technology: Demonstrate typing numbers in cells and navigating between worksheets
- Technology: Demonstrate changing the cell fill color using the Fill drop-down menu

4. Graphing Data

- Academic: Collect data in order to generate graphs and charts in Microsoft® Excel
- Academic: Analyze graphs to identify and compare the amount in each category
- Academic: Identify the similarities and differences between a bar graph and a pie chart
- Technology: Demonstrate how to type in cells to add data
- Technology: Analyze graphs to compare data

5. Internet Safety

1. Cyber Community

- Demonstrate an understanding of cyberspace as a community of real people
- Demonstrate an understanding that children need to have the help of an adult when exploring the cyber community

2. Cyber Citizenship
 - Explain that bullying is intentionally hurting or being mean to someone
 - Identify the differences between offline and online bullying
3. Cybersecurity
 - Explore e-mail as a means of communication
 - Identify when an e-mail or communication on the Internet can make a person feel uncomfortable
 - Create a strategy for responding to communication that is inappropriate
 - Demonstrate safe and cooperative use of technology
4. Personal Safety, Part 1
 - Describe how computers can become infected with viruses
 - Discuss the concept of what a computer virus is, how a virus spreads, the damage a virus can cause, and virus prevention techniques
 - Demonstrate safe and cooperative use of technology
5. Personal Safety, Part 2
 - Explain the basic danger of revealing personal information online
 - Explain that there are strangers in the cyber community, just as there are strangers in the physical community
 - Apply learning by making informed choices about revealing information online
 - Demonstrate safe and cooperative use of technology

6. Study Skills

1. Creating a Proper Work Environment
 - Describe the importance of having a special work environment
 - Identify ways to develop a work environment
 - Identify good study habits
 - Apply digital tools and resources to address a variety of tasks and problems
2. Listening and Following Directions
 - Recognize the importance of understanding and following directions
 - Identify skills in listening and following directions
 - Apply digital tools and resources to illustrate skills in listening and following directions
3. Using Visuals
 - Identify how maps offer ways to understand new information about places
 - Explain how maps demonstrate what is known about places
 - Communicate about technology using developmentally appropriate and accurate terminology
 - Apply digital tools and resources to address a variety of tasks and problems
 - Demonstrate the ability to navigate in virtual environments such as electronic books, simulation software, and websites
4. Organization
 - Learn the importance of managing your time and activities
 - List steps to prepare for daily study and activities
 - Communicate about technology using developmentally appropriate and accurate terminology
 - Independently apply digital tools and resources to address a variety of tasks and problems
 - Demonstrate the ability to navigate in virtual environments such as electronic books, simulation software, and websites
5. Online Learning

- Compare and contrast online learning with a bricks-and-mortar school
 - Describe how an online student may use a computer
 - Apply digital tools and resources to address a variety of tasks and problems
 - Communicate about technology using developmentally appropriate and accurate terminology
6. Goal Setting
- Explain what goals are
 - Create a personal goal and a learning goal
 - Discuss technology using developmentally appropriate and accurate terminology

Education Technology and Online Learning 2

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, students use appropriate technology tools and resources to complete projects, and solve problems. Students use software to draw, write, organize, and present information and data. Students learn listening and organizational skills and set attainable learning goals. Students become responsible users of technology as they learn about Internet safety and appropriate online behavior.

Course Outline

1. **Keyboarding**

1. Keyboarding Numbers and Letters
 - Identify and type the letters A–Z on the keyboard
 - Identify and type the numbers 0–9 on the keyboard
2. Keyboarding Rows
 - Identify the home row of the keyboard
 - Identify the rows above and below the home row
 - Demonstrate how to type letters above and below the home row
3. Keyboarding Practice Animals
 - Identify and type the letters A–Z on the keyboard
 - Identify and demonstrate how to type words relating to four animals
4. Keyboarding Review
 - Identify the home row keys
 - Apply proper touch typing skills to type the letters J, F, D, K, and the space bar
 - Demonstrate correct posture and finger position while typing
5. Y and T
 - Apply proper touch typing skills to type the letters Y and T
 - Demonstrate proper touch typing posture and finger position while typing
6. B and N
 - Apply proper touch typing skills to type the letters B and N
 - Demonstrate proper touch typing posture and finger position while typing
7. U and R
 - Apply proper touch typing skills to type the letters U and R
 - Demonstrate proper touch typing posture and finger position while typing
8. V and M

- Apply proper touch typing skills to type the letters V and M
 - Demonstrate proper touch typing posture and finger position while typing
9. E and I
- Apply proper touch typing skills to type the letters E and I
 - Demonstrate proper touch typing posture and finger position while typing
10. Review
- Apply proper touch typing skills to type simple words using the keys learned in Lessons 1–10
 - Demonstrate proper touch typing posture and finger position while typing

2. Microsoft® Word

1. Words with Consonant Blends: -ng and -nk
 - Academic: Identify the correct sounds for -ng and -nk consonant blends
 - Academic: Demonstrate how to read words with -ng and -nk consonant blends
 - Academic: Relate knowledge of -ng and -nk consonant blends to identify other words with -ng and -nk consonant blends
 - Technology: Demonstrate how to insert and format tables in a document, including typing and changing the size of text, and change cell fill color using the Fill drop-down menu
 - Technology: Demonstrate how to highlight consonant blends using the Highlighter drop-down menu
2. Identifying Common and Proper Nouns
 - Academic: Identify common and proper nouns and recognize each in a sentence
 - Academic: Compose sentences using common and proper nouns
 - Technology: Demonstrate how to type words and sentences in a document
 - Technology: Demonstrate how to use the Shift key to type capital letters
 - Technology: Demonstrate how to type common and proper nouns into the correct column within a table
3. Rhyming Words
 - Academic: Identify word families to create rhyming words
 - Academic: Identify words that rhyme with one another
 - Technology: Demonstrate how to type words and sentences within a document
 - Technology: Demonstrate how to highlight word families using the Highlighter tool
 - Technology: Demonstrate how to create and insert WordArt to label a word family
4. Reading and Writing Poetry
 - Academic: Discuss and create a poem using rhyming words
 - Academic: Identify and describe rhyming words in a poem
 - Technology: Demonstrate how to type words and begin separate lines in a poem using the Enter key
 - Technology: Demonstrate how to properly use the Center Align button to align the poem in the center of a page
5. Writing an Acrostic Poem
 - Academic: Identify the structure of an acrostic poem
 - Academic: Create a named acrostic poem
 - Technology: Demonstrate how to select text using the select all keyboard shortcut Ctrl + A
 - Technology: Demonstrate how to format text using the Font Face and Font Color drop-down menus
6. Writing a Haiku
 - Academic: Identify a haiku poem and describe its structure
 - Academic: Compose a haiku poem

- Technology: Demonstrate how to center align text using the Center Align button
- Technology: Demonstrate how to format text, change font face, and change font size using the Font Size drop-down menu
- Technology: Demonstrate how to insert clip art using the Clip Art button in the Insert ribbon

7. Identifying Characters in Dialogue

- Academic: Identify the different characters speaking within a story and a poem
- Academic: Analyze character interactions and view points within a story dialogue
- Technology: Identify different characters within a story dialogue, and color code them using the Highlighter tool
- Technology: Demonstrate how to insert quotation marks when typing a sentence in a document

8. Compare and Contrast

- Academic: Create, analyze, compare, and contrast still life artwork
- Academic: Describe patterns or themes found in artwork
- Technology: Demonstrate how to create a table to compare and contrast
- Technology: Demonstrate how to format text within a table
- Technology: Demonstrate inserting an image from the computer into a document using the Picture button

9. Writing a Book Report

- Academic: Compose a book report
- Academic: Paraphrase text and identify the main idea and supporting details
- Technology: Demonstrate how to type words, sentences, and numbers to create a book report
- Technology: Demonstrate how to use the Spelling and Grammar tool to make corrections

3. **Microsoft® PowerPoint**

1. Sequencing Events

- Academic: Identify and explain sequence words
- Technology: Demonstrate how to use the Slide Sorter View to move slides within a presentation
- Technology: Identify the main idea and create a title slide using the New Slide drop-down menu
- Technology: Demonstrate how to incorporate appropriate clip art in a presentation to illustrate the main idea
- Technology: Demonstrate how to add text to individual slides within a presentation

2. Sequencing Events II

- Academic: Identify sequencing words and explain the order of events
- Technology: Demonstrate how to use the Slide Sorter View to sequence slides within a presentation
- Technology: Create a new title slide and add text to individual slides within a presentation
- Technology: Demonstrate how to incorporate appropriate clip art for a presentation
- Technology: Apply a different font color using the Font color drop-down menu to identify sequencing words

4. **Microsoft® Excel**

1. Identifying Compound Words

- Academic: Identify and explain the two words that make up a compound word
- Academic: Identify compound words
- Technology: Demonstrate how to select and type in cells and navigate between worksheets
- Technology: Apply borders to cells using the Borders drop-down menu in the Home ribbon

2. Identifying Prefixes and Suffixes

- Academic: Identify and understand the meaning of prefixes and suffixes

- Academic: Demonstrate how to break down words into root words, prefixes, and suffixes
 - Technology: Apply and change the color of borders using the Borders drop-down menu in the Home ribbon
 - Technology: Explain how to type in cells and demonstrate individual cell navigation
3. Place Value
- Academic: Identify how many ones, tens, and hundreds are in a number
 - Academic: Demonstrate how to write a number in standard form
 - Technology: Explain how to type in cells and demonstrate individual cell navigation
 - Technology: Apply cell borders using the Borders drop-down menu
 - Technology: Format and apply a cell fill color using the Fill drop-down menu
4. Making 10 to Add 9
- Academic: Demonstrate how to use ten-frames to help make groups of 10 in order to add 9
 - Academic: Solve addition facts to gain fluency and demonstrate an increased sense of number awareness and relationships
 - Technology: Demonstrate how use the Fill drop-down menu to change the cell fill color in order to practice addition facts and make groups of 10
 - Technology: Demonstrate how to type numbers in cells
5. Making 10 to Add 8
- Academic: Demonstrate how to use ten-frames to help make groups of 10 in order to add 8
 - Academic: Solve addition facts to gain fluency and demonstrate an increased sense of number awareness and relationships
 - Technology: Demonstrate how to use the Fill drop-down menu to change the fill color of cells in order to practice addition facts and make groups of 10
 - Technology: Demonstrate how to type numbers within cells
6. Adding with Regrouping
- Academic: Explain and use math vocabulary: addend and sum
 - Academic: Solve addition problems involving regrouping
 - Academic: Evaluate addition strategies, including drawing the addition problem and using virtual manipulatives
 - Technology: Demonstrate and evaluate how Microsoft® Excel can be helpful in checking answers
 - Technology: Demonstrate how to navigate individual cells in a workbook
7. Thinking Addition to 10 to Subtract
- Academic: Demonstrate how to subtract using the concept of addition
 - Academic: Explain how addition and subtraction strategies work
 - Academic: Investigate fact families in order to understand the relationship between subtraction and addition
 - Technology: Demonstrate how to use the Fill drop-down menu to change the cell fill color
 - Technology: Demonstrate how to type numbers within cells

5. Study Skills

1. Creating a Proper Work Environment
 - Identify characteristics of a study space
 - Evaluate an environment to determine what makes it a good study space
2. Listening and Following Directions
 - Identify attributes of a good listener
 - Explain why it is important to have good listening skills
3. Visualization

- Identify how timelines and pictures make new information easier to understand
 - Explain how timelines and pictures provide a way to show what is known about events
4. Organization
 - Explain why a schedule is an important organizational tool for learning
 - Create a study schedule
 5. Online Learning
 - Compare online learning with bricks-and-mortar schools
 - Analyze feelings about new aspects of online learning
 6. Goal Setting
 - Identify the difference between short-term and long-term goals
 - Create one long-term goal and two short-term goals

6. Internet Safety

1. Cyber Citizenship: Part 1
 - Distinguish between the community and the cyber community
 - Demonstrate an understanding that children need to have the help of an adult when exploring the cyber community
2. Cyber Citizenship: Part 2
 - Describe cyberspace as a community of real people
 - Discuss how unkind communication in cyberspace is the same as unkind communication in the physical world
 - Identify appropriate online behavior as netiquette
 - Explain that children need to have the help of an adult when exploring the cyber community
 - Distinguish between bullying in the community and in cyberspace
3. Cybersecurity
 - Describe e-mail as a means for communication
 - Explain that computers can be damaged by e-mails containing computer viruses
 - Explain safe procedures for using e-mail
4. Personal Safety: Part 1
 - Explain the need to make responsible choices to ensure personal safety when using the Internet
 - Identify ways to ensure personal safety in cyberspace
5. Personal Safety: Part 2
 - Explain the need to make responsible choices to ensure personal safety when using the Internet
 - Identify ways to ensure personal safety in cyberspace
6. Acceptable Use Policy
 - Create usable and age-appropriate guidelines for safe and responsible technology use
 - Discuss consequences for unacceptable use
 - Develop procedures for responding to unsafe or inappropriate online situations

Educational Technology and Online Learning 3

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, students use appropriate technology tools and resources to complete projects, manage information, and solve problems. Students use software to write, organize, analyze, and present information and data. Students learn listening and organizational skills and set attainable learning goals. Students become responsible users of technology as they learn about Internet safety and appropriate online behavior.

Course Outline

1. Keyboarding

1. Keyboarding Rows: Part 1

- Demonstrate how to type the home row and the rows above and below the home row
- Demonstrate proper touch typing posture and finger position while typing
- Identify the home row of the keyboard
- Identify the rows above and below the home row

2. Keyboarding Rows: Part 2

- Apply proper touch typing skills and finger position while typing
- Demonstrate how to type the home row and the rows above and below the home row
- Identify the home row of the keyboard
- Identify the rows above and below the home row

3. Letter C and the Comma Key

- Apply proper touch typing skills and finger position to type the letter C and the comma key
- Demonstrate how to type the home row and the rows above and below the home row
- Identify the home row of the keyboard
- Identify the rows above and below the home row

4. Letters W and O

- Apply proper touch typing skills and finger position to type the letters W and O
- Demonstrate how to type the home row and the rows above and below the home row
- Identify the home row of the keyboard
- Identify the rows above and below the home row

5. Letter X and the Period Key

- Identify the home row of the keyboard
 - Identify the rows above and below the home row
 - Demonstrate how to type the home row and the rows above and below the home row
 - Apply proper touch typing skills and finger position to type the letter X and the period key
6. Letters Q and P
- Identify the home row of the keyboard
 - Identify the rows above and below the home row
 - Demonstrate how to type the home row and the rows above and below the home row
 - Apply proper touch typing skills and finger position to type the letters Q and P
7. Letter Z and the Forward Slash Key
- Identify the home row of the keyboard
 - Identify the rows above and below the home row
 - Demonstrate how to type the home row and the rows above and below the home row
 - Apply proper touch typing skills and finger position to type the letter Z and the forward slash key
8. Review
- Identify the home row of the keyboard
 - Identify the rows above and below the home row
 - Demonstrate how to type the home row and the rows above and below the home row
 - Apply proper touch typing skills and finger position to type simple words
- 2. Online/Internet Safety**
1. Cyber Community
- Demonstrate an understanding of rules to follow to stay safe when online
 - Distinguish between the physical community and the cyber community
 - Describe the concept of cyber citizenship
2. Citizenship and Safety
- Distinguish between appropriate and inappropriate websites
 - Demonstrate an understanding of rules to follow to stay safe when online
 - Explain the concept of cyber citizenship
3. Cyberbullying
- Compare and contrast bullying in the physical community to cyberbullying
 - Describe kindness and how it relates to Internet behavior
 - Demonstrate how to use appropriate resources if confronted with an online bully
 - Explain how netiquette relates to cyber citizenship
4. Cybersecurity and E-mail Attachments
- Describe how computers can be damaged by e-mails containing computer viruses
 - Demonstrate prevention techniques to avoid computer viruses
 - Explain safe procedures for using e-mail
5. Intellectual Property: Part 1
- Describe different types of media that are intellectual property, such as writings, music, videos, and computer games
 - Explain how property on the Internet can be owned just like physical property
 - Demonstrate an understanding of the copyright laws that protect intellectual property
6. Intellectual Property: Part 2
- Explain the meaning of the copyright symbol
 - Demonstrate use of the copyright symbol to indicates one's ownership of intellectual property
 - Create a project to demonstrate and share knowledge about use of the copyright symbol
7. Personal Safety: Part 1
- Demonstrate an understanding of the term identity

- Compare how an identity is formed offline to how it is formed online
 - Demonstrate why a positive online identity is important
 - Explain how a person who communicates online can demonstrate his or her identity
8. Personal Safety: Part 2
- Explain the terms tag, post, share, blog, upload, download, and social network as they apply to online activities
 - Describe how personal information can be made public when taking part in online activities that seem safe
 - Demonstrate techniques to maintain personal information privacy while taking part in online activities
9. Safe Interaction
- Demonstrate making responsible choices to be sure of personal safety when using the Internet
 - Create a Microsoft® PowerPoint presentation that lists safety tips when using the Internet and appropriate websites for children

3. Study Skills

1. Listening Skills
- Explain the importance of active listening
 - Describe characteristics of an active listener
2. Organization and Time Management
- Explain the importance of being organized and having a study schedule
 - Create a study schedule
3. Note Taking
- Use note-taking strategies to make sense of information
4. Using Timelines
- Use visual organizers to improve writing and organize information
 - Use a CE-created Timeline to analyze information provided
5. Online Learning
- Compare online and bricks-and-mortar schools
 - Describe the benefits and challenges of being an online learner
6. Goal Setting
- Distinguish between short- and long-term goals
 - Set short- and long-term goals for learning

4. Microsoft® Word

1. Consonant Blends
- Academic: Demonstrate how to read and write words with the beginning consonant blends cr-, fr-, pl-, pr-, and sm-
 - Technology: Use the Enter key to start a new line of text in a document
 - Technology: Demonstrate how to insert a table in a document to sort and organize words
 - Technology: Demonstrate how to highlight consonant blends using the Highlighter drop-down menu
2. Contractions
- Academic: Demonstrate how to read and write contractions
 - Academic: Evaluate and revise writing using the Spelling and Grammar tool
 - Technology: Use the Enter key to start a new line of text in a document
 - Technology: Demonstrate how to insert a table in a document to organize words
 - Technology: Demonstrate how to format text by changing the font face, font size, and font style to bold, italics, or underline in order to identify contractions
3. Reference Tools

- Academic: Use an online dictionary to define words
 - Technology: Use the Research button to access the online dictionary
 - Technology: Minimize and maximize a window to organize documents
4. Multiple-Meaning Words
- Academic: Clarify the meaning of multiple-meaning words
 - Academic: Use the words that come before and after an unknown word in a sentence to understand its meaning
 - Technology: Use the Enter key to start a new line of text in a document
 - Technology: Demonstrate how to type sentences with multiple-meaning words within a document
 - Technology: Change the font color of clue words in a sentence that help you figure out the correct meaning of multiple meaning words
5. Connecting Adjectives to the Real World
- Academic: Use adjectives in sentences to improve descriptive writing skills
 - Technology: Use the Enter key to start a new line of text in a document
 - Technology: Demonstrate how to type sentences with adjectives within a document
 - Technology: Demonstrate how to change the font face, font size, and font style in order to bold, italicize, or underline adjectives
 - Technology: Insert clip art in a document and write sentences with adjectives describing the picture
6. Adverbs
- Academic: Use adverbs in sentences to improve writing skills
 - Technology: Demonstrate how to properly use the Center Align button to align a title in the center of a page
 - Technology: Demonstrate how to type words and sentences within a document and wrap text around a picture
 - Technology: Demonstrate how to change the font face, font size, and font style to bold, italicize, or underline adverbs
 - Technology: Insert clip art in a document and write sentences with adverbs describing the picture
7. Choose the Best Title - Main Idea
- Academic: Create a title for a story based on the main idea
 - Technology: Type words and sentences within a document to explain how you chose a new title for the story
 - Technology: Demonstrate how to use the keyboard shortcuts Ctrl + C and Ctrl + V to copy and paste the best titles for stories from one document to another document quickly
 - Technology: Demonstrate how to create and insert WordArt for a title of a story
8. Pictures Supporting Stories
- Academic: Explain how illustrations contribute to a story
 - Technology: Demonstrate how to type words and sentences within a document
 - Technology: Demonstrate how to change the font face, font size, and font style to bold, italics, or underline to draw attention to important ideas
 - Technology: Demonstrate how to properly use the Left, Right, or Center Align buttons to align text on a page
9. Characters Influencing a Story
- Academic: Describe how a character's actions in a story contribute to the sequence of events
 - Technology: Demonstrate how to format text, change font face, and change font size to draw attention to important text

10. Compare and Contrast

- Academic: Compare and contrast the plots of two stories written by the same author
- Technology: Demonstrate how to format text using the Bold button in the Home Ribbon
- Technology: Demonstrate how properly use the Center align button

11. Pollution

- Academic: Research information on pollution to identify the harmful effects on the environment and how to reduce air, water, and land pollution
- Academic: Organize information into an outline with headings and subtopics
- Technology: Use the outline view to organize research on actions to reduce pollution

5. Microsoft® PowerPoint

1. Ordering Numbers

- Academic: Demonstrate how to order three-digit numbers in standard and expanded form
- Technology: Demonstrate how to insert and format a text box within slides in a presentation in order to compare numbers
- Technology: Use the Slide Sorter view to change the order of the slides to show your understanding of ordering numbers

2. Adding Three-Digit Numbers

- Academic: Demonstrate how to add three-digit numbers
- Technology: Demonstrate how to use the Annotation tool in Slide Show view
- Technology: Demonstrate how to save a final copy of the annotated presentation that shows how you solved the math problem

3. Fractions

- Academic: Identify the numerator and denominator of fractions
- Academic: Utilize pictures in order to compare fractions
- Technology: Demonstrate how to insert and add a table using the Table drop-down menu to organize information on fractions
- Technology: Demonstrate knowledge of comparing fractions by using the Shape Fill drop-down menu to change the cell fill color within a table

4. Quadrilaterals

- Academic: Identify and illustrate examples of quadrilaterals, such as a rectangle, square, or rhombus
- Technology: Demonstrate how to insert and format a text box
- Technology: Demonstrate how to insert and format shapes

5. Scientific Method

- Academic: Explain and sequence the steps of the scientific method
- Academic: Plan and conduct an experiment using the scientific method
- Technology: Explain how to insert WordArt to illustrate concepts in a presentation
- Technology: Demonstrate how to type text within a table to display collected information

6. Natural Disasters

- Academic: Describe different types of natural disasters and their impact on the environment and society
- Academic: Create an action plan by researching information about a variety of natural disasters to determine societal and environmental impacts
- Technology: Create a Microsoft® PowerPoint presentation that describes an action plan to respond to natural disasters
- Technology: Demonstrate how to insert a new slide and add a text box to add information about natural disasters

- Technology: Demonstrate how to insert WordArt and clip art to illustrate concepts about natural disasters

6. Microsoft® Excel

1. Place Value

- Academic: Demonstrate how to compare three-digit numbers from least to greatest
- Academic: Demonstrate how to write a number in standard and expanded form
- Academic: Explain that a three-digit number represents hundreds, tens, and ones
- Technology: Demonstrate how to type numbers in a cell and format the cells to appear in a table using the Borders drop-down menu
- Technology: Demonstrate how to apply a cell fill color using the Fill drop-down menu to show which number is greater

2. Multiplication and Repeated Addition

- Academic: Solve multiplication and addition problems
- Academic: Identify the relationship between multiplication and repeated addition
- Technology: Demonstrate how to use the AutoSum function to find the sum of an addition problem
- Technology: Demonstrate how to create and type formulas in Microsoft® Excel to solve multiplication problems
- Technology: Explain how to create a table and type data into cells

3. Commutative Property

- Academic: Demonstrate how to add three addends using the commutative property
- Academic: Solve a word problem by adding three addends together
- Technology: Demonstrate how to create and type a formula to solve an addition problem
- Technology: Utilize the AutoSum and AutoFill features to add and apply an addition formula to other cells in the workbook

4. How Many More, How Many Less

- Academic: Apply subtraction concepts to solve one- and two-step problems to determine “how many more” or “how many less”
- Academic: Apply knowledge of bar graphs to interpret data
- Technology: Identify and label parts of a bar graph in order understand the data
- Technology: Utilize the subtraction formula in Microsoft® Excel to solve problems

5. Measuring Liquids: Capacity

- Academic: Apply multiplication concepts in order to convert units of capacity
- Academic: Identify units of capacity: gallons, quarts, pints, and cups
- Technology: Demonstrate how to type and apply a multiplication formula to convert liquid measurements

6. Area

- Academic: Apply addition concepts to find the area of a rectangle by adding the square units
- Academic: Demonstrate how to calculate the area of a rectangle by multiplying the length and width
- Technology: Demonstrate how to type and apply a multiplication formula in a spreadsheet to calculate area of a rectangle
- Technology: Add data to a table to organize length and width measurements

7. Perimeter

- Academic: Apply addition concepts to calculate the perimeter of a shape when given the length of sides

- Academic: Demonstrate how to find the length of an unknown side when given the perimeter of a shape
 - Technology: Use Geoboard software to design shapes and calculate perimeter
 - Technology: Demonstrate how to type and apply an addition formula in a Microsoft® Excel spreadsheet to calculate perimeter
 - Technology: Add data to a table to organize the lengths of each side of a shape
8. Sorting Data
- Academic: Describe how to interpret data in a bar graph
 - Technology: Demonstrate how to order numbers from least to greatest using the Sort button
 - Technology: Demonstrate how to create a bar graph using provided data and label it accordingly

Educational Technology and Online Learning 4

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, students use appropriate technology tools and resources to complete projects, manage information, and solve problems. Students use software to write, organize, analyze, and present information and data. Students learn listening and organizational skills and set attainable learning goals. Students become responsible users of technology as they learn about internet safety, appropriate online behavior, and effective search and website evaluation strategies.

Course Outline

1. **Keyboarding**

1. Keyboarding Review
 - Apply proper touch typing techniques to enter words and phrases
 - Demonstrate correct finger positions while typing
 - Understand digital input, digital output, and processing
2. Speed and Accuracy: Lesson 1
 - Develop speed and accuracy while copying provided text
 - Apply proper touch typing techniques to enter words, phrases, and numbers
 - Demonstrate correct finger positions while typing
3. Speed and Accuracy: Lesson 2
 - Develop speed and accuracy while copying provided text
 - Apply proper touch typing techniques to enter words, phrases, and numbers
 - Demonstrate correct finger positions while typing
4. Speed and Accuracy: Lesson 3
 - Develop speed and accuracy while copying provided text
 - Apply proper touch typing techniques to enter words, phrases, and numbers
 - Demonstrate correct finger positions while typing
5. Speed and Accuracy: Lesson 4
 - Develop speed and accuracy while copying provided text
 - Apply proper touch typing techniques to enter words, phrases, and numbers
 - Demonstrate correct typing posture and finger positions while typing
6. Speed and Accuracy: Lesson 5
 - Develop speed and accuracy while copying provided text

- Apply proper touch typing techniques to enter words, phrases, and numbers
 - Demonstrate correct typing posture and finger positions while typing
7. Speed and Accuracy: Lesson 6
 - Develop speed and accuracy while copying provided text
 - Apply proper touch typing techniques to enter words, phrases, and numbers
 - Demonstrate correct typing posture and finger positions while typing
 8. Speed and Accuracy: Lesson 7
 - Develop speed and accuracy while copying provided text
 - Apply proper touch typing techniques to enter words, phrases, and numbers
 - Demonstrate correct typing posture and finger positions while typing
 9. Keyboarding Review 2
 - Develop speed and accuracy while copying provided text
 - Apply proper touch typing techniques to enter words, phrases, and numbers
 - Demonstrate correct typing posture and finger positions while typing

2. Internet Safety

1. Netiquette in the Cyber Community
 - Describe cyberspace as a community of real people
 - Compare characteristics of communication in the physical world with communication in cyberspace
 - Demonstrate an understanding that unkind communication in cyberspace is the same as unkind communication in the physical world
 - Demonstrate how to respond appropriately if faced with unkind communication in cyberspace
 - Create a table comparing communication in the physical world with cyberspace
2. Cyber Predator Awareness
 - Define and discuss the terms predator, prey, inappropriate, and anonymous as they relate to online communication
 - Identify and describe basic components of a predator's grooming process
 - Create examples of safe responses and/or actions for each step of the grooming process
3. Cyberbullying
 - Identify general key attributes of kindness and being considerate online
 - Identify and describe the key attributes of bullying
 - Compare and contrast bullying in the physical community and the cyber community
 - Analyze the relationship between netiquette and cybercitizenship
 - Identify and utilize appropriate resources if confronted with an online bully
4. Malicious Code in E-mail
 - Identify and describe the security risks associated with e-mail
 - Define and discuss the term malicious code and other vocabulary related to cybersecurity risks
5. Spam, Scams, and Phishing
 - Describe the basic way phishing, spam, and scam e-mails solicit personal information
 - Explain age-appropriate ways to deal with phishing, spam, and scam e-mails
6. Goldy Locks and IP
 - Explain the rights of intellectual property on the Internet and the rights copyright provide for creative material
 - Explain the potential consequences associated with plagiarism and other forms of intellectual property theft
 - Create a story to entertain and teach about copyright in Microsoft® Word
7. Keeping it Personal
 - Discuss that posted personal information on the Internet is public

- Discuss why it can be unsafe to post personal information on the Internet
 - Describe why it is necessary to inform an adult before filling out information online
8. Inappropriate Websites
 - Explain the concept of the Internet as an online community comparable to the physical community
 - Discuss the concept that there are inappropriate places online
 - Demonstrate an understanding of how to avoid or exit inappropriate places
 - Discuss family policy on inappropriate website access
 9. Acceptable Use Policy
 - Demonstrate an understanding of acceptable use, identify the consequences of unacceptable use, and describe procedures for responding to unsafe or inappropriate online situation

3. Study Skills

1. Listening Skills
 - Identify the importance and attributes of active listening
 - Create a goal for active listening
 - Generate a table stating goals for active listening in different settings
2. Organization and Time Management
 - Understand the importance of being organized and having a study schedule
 - Create a study schedule that incorporates flexibility
3. Note Taking and Summarizing
 - Utilize note taking strategies to learn, think about, and remember important information
 - Adapt a note taking template that can be adjusted for various assignments
4. Using Graphic Organizers
 - Evaluate and validate information on the World Wide Web
 - Collect information in a graphic organizer
5. Online Learning
 - Review the similarities and differences of online learning and bricks-and-mortar learning
 - Create a presentation that describes the synthesis of a new school combining the advantages of both online learning and bricks-and-mortar learning
6. Goal Setting
 - Distinguish between short- and long-term goals
 - Develop short- and long-term academic goals
 - Generate a spreadsheet organizer to track progress toward accomplishing goals

4. Microsoft® Word

1. There, Their, They're To, Too, Two
 - Academic: Compose and define a list of homophones
 - Technology: Develop a digital homophone book using homophones correctly in sentences
 - Technology: Demonstrate formatting the font size, font face, and font color using the Font Size, Font Face, and Font Color drop-down menus
 - Technology: Arrange and highlight text using the text alignment buttons and the Highlighter tool in the Home ribbon
 - Technology: Select and insert clip art to illustrate homophones
2. Nouns and Pronouns
 - Academic: Identify and categorize nouns and pronouns
 - Academic: Compose a piece of writing using nouns and pronouns correctly in sentences
 - Technology: Demonstrate typing, and indent a paragraph using the Tab key, and Indentation buttons
 - Technology: Format and adjust line spacing within the Paragraph menu

- Technology: Apply an underline to nouns and pronouns using the Underline button
3. Synonyms
 - Academic: Select words with similar but not identical meanings using the Microsoft Word thesaurus
 - Academic: Identify synonyms for common words
 - Technology: Formulate a table with multiple rows and columns
 - Technology: Identify, select, and type synonyms in the correct cells of a table using the thesaurus in Microsoft Word
 - Technology: Demonstrate formatting text alignment using buttons in Home ribbon
 4. Making Inferences
 - Academic: Analyze clues from text to make inferences
 - Technology: Insert SmartArt graphics into a document
 - Technology: Organize text clues and inferences in SmartArt graphics
 - Technology: Demonstrate the skill of dragging and dropping text boxes
 5. Points of View
 - Academic: Generate two pieces of writing correctly implementing first-person and third-person point of view
 - Academic: Identify points of view within a text
 - Technology: Demonstrate formatting the font size and font face using the Font Size and Font Face drop-down menus
 - Technology: Demonstrate using the Spelling and Grammar tool to correct spelling errors in document
 6. Vivid Language: Similes
 - Academic: Identify similes within poems
 - Academic: Interpret and create similes
 - Technology: Create and insert a table with multiple rows and columns
 - Technology: Demonstrate formatting a table by inserting new rows
 7. Vivid Language: Metaphors
 - Academic: Analyze metaphors to understand the underlying meaning
 - Academic: Generate original metaphors
 - Academic: Differentiate between similes and metaphors
 - Technology: Illustrate metaphors using WordArt and clip art
 8. Summarizing Poetry
 - Academic: Construct a summary of a poem
 - Technology: Demonstrate typing and indenting using the Tab key
 - Technology: Examine and correct spelling errors using the Spelling and Grammar tool
 9. Folktales
 - Academic: Describe and create a folktale
 - Academic: Understand that all folktales have a central theme or message
 - Technology: Design a graphic organizer by inserting text boxes from the Insert ribbon
 - Technology: Demonstrate knowledge of Microsoft Word formatting: font color, font style, font size, Spelling and Grammar tool, and Tab key
5. **Microsoft® PowerPoint**
1. Story Map
 - Academic: Understand story elements and identify them within a story
 - Technology: Formulate a presentation about story elements

- Technology: Demonstrate selecting and inserting clip art and action buttons from the Insert ribbon
 - Technology: Apply a theme using the Design ribbon to enhance the presentation
2. Compare and Contrast
- Academic: Compare and contrast concepts from text
 - Technology: Construct a presentation comparing and contrasting alternative forms of energy and animals
 - Technology: Implement and apply slide transitions using the Transition to This Slide drop-down menu in the Transitions ribbon
 - Technology: Demonstrate selecting and inserting clip art and action buttons in the Insert ribbon
3. Life Cycles
- Academic: Analyze the life cycle of a plant or animal
 - Academic: Evaluate the ability to create a presentation using a rubric
 - Technology: Develop a presentation analyzing the life cycle of a plant or animal
 - Technology: Demonstrate the ability to apply slide transitions and slide designs to a presentation
 - Technology: Insert hyperlinks and clip art in a presentation to create an interactive life cycle

6. Microsoft® Excel

1. Word Problems: Addition and Subtraction
- Academic: Recognize key words to solve addition and subtraction word problems
 - Technology: Calculate sums and differences using a formula
 - Technology: Demonstrate formatting font color of mathematical key words using the Font Color drop-down menu in the Mini toolbar
 - Technology: Insert borders around the sums and differences from the Border drop-down menu in the Home ribbon
2. Word Problems: Multiplication and Division
- Academic: Recognize key words to solve multiplication and division word problems
 - Technology: Calculate products and quotients using a formula
 - Technology: Demonstrate formatting font color of mathematical key words using the Font Color drop-down menu in the Mini toolbar
 - Technology: Insert borders around the products and quotients from the Border drop-down menu in the Home ribbon
3. Rounding
- Academic: Identify and round numbers to the ones place
 - Technology: Insert and apply the ROUND function to round numbers to the nearest ones place
 - Technology: Apply the AutoSum feature to add multiple numbers together
 - Technology: Adjust the cell alignment using the Center Align button in the Home ribbon
4. Graphing Expenses
- Academic: Analyze net profits from a lemonade stand over a 5 day period
 - Technology: Organize data into cells of a workbook
 - Technology: Formulate a line graph based on lemonade net profits and cups sold
5. Investigating Bar Graphs
- Academic: Calculate the mean, median, and mode of a set of data
 - Technology: Construct a bar graph using the Bar drop-down menu in the Insert ribbon
 - Technology: Demonstrate formatting by inserting titles and labels for the bar graph
6. Root Words from Science

- Academic: Identify and interpret the meaning of words with prefixes and suffixes
- Technology: Segregate and arrange word parts (prefixes, suffixes, and root/base words) into individual cells of a workbook
- Technology: Demonstrate formatting the font size, font face, and font color of word parts (prefixes, suffixes, and root/base words) using the Font Size, Font Face, and Font Color drop-down menus

Educational Technology and Online Learning 5

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, students use appropriate technology tools and resources to complete projects, manage information, and solve problems. Students use software to write, organize, analyze, and present information and data. Students learn listening and organizational skills and set attainable learning goals. Students become responsible communicators and users of technology as they learn about intellectual property, Internet safety, and effective search and evaluation strategies.

Course Outline

1. **Keyboarding**

1. Speed and Accuracy: Lesson 8
 - Demonstrate proper touch typing posture and finger position while typing
 - Apply proper touch typing techniques to type sentences from a text
 - Develop speed and accuracy while copying provided text
2. Speed and Accuracy: Lesson 9
 - Demonstrate proper touch typing posture and finger position while typing sentences
 - Apply proper touch typing techniques to type text from a story
 - Develop speed and accuracy while copying provided text
3. Speed and Accuracy: Lesson 10
 - Demonstrate proper touch typing posture and finger position while typing sentences from stories
 - Apply proper touch typing techniques to type sentences from stories
 - Develop speed and accuracy while copying provided text
4. Speed and Accuracy: Lesson 11
 - Demonstrate proper touch typing posture and finger position while typing sentences from stories
 - Apply proper touch typing techniques to type sentences from stories
 - Develop speed and accuracy while copying provided text
5. Speed and Accuracy: Lesson 12
 - Demonstrate proper touch typing posture and finger position while typing
 - Apply proper touch typing techniques to type sentences from stories and random text

- Develop speed and accuracy while copying provided text
- 6. Speed and Accuracy: Lesson 13
 - Demonstrate proper touch typing posture and finger position while typing
 - Apply proper touch typing techniques to type words and phrases
 - Develop speed and accuracy while copying provided text
- 7. Speed and Accuracy: Lesson 14
 - Demonstrate proper touch typing posture and finger position while typing
 - Apply proper touch typing techniques to type sentences from a story
 - Develop speed and accuracy while copying provided text
- 8. Keyboarding Review
 - Demonstrate proper touch typing posture and finger position while typing
 - Apply proper touch typing techniques to type numbers, words, and phrases
 - Develop speed and accuracy while copying a paragraph

2. Internet Safety

1. Cybersecurity
 - Identify viruses, worms, Trojan horses, and spyware as programs that can make a computer work improperly
 - Summarize basic techniques to prevent viruses, worms, Trojan horses, and spyware infection
 - Discuss information with parents to check on personal computer security
2. Digital Literacy
 - Define the term media literacy
 - Identify types of media
 - Explain the importance of media literacy
3. Blogging
 - Explain security risks associated with blogging
 - Identify specific risky behaviors associated with blogging
 - Describe positive techniques for safe blogging
4. Cyberbullying
 - Identify and describe elements of cyberbullying
 - Explain the moral in a contemporary fairy tale
5. Text Messaging Safety
 - Describe text and instant messaging and their associated vocabulary
 - Explain the need to follow basic safety rules and netiquette when text or instant messaging
6. Predator Identification
 - List safety rules for behavior toward strangers in the physical community that also apply to behavior toward strangers in cyberspace
 - Explain the importance of refusing inappropriate online relationships
 - Describe how to interact appropriately and safely online
7. Intellectual Property, Fair Use, and Copyright I
 - Demonstrate an understanding that property on the Internet can be owned just like physical property
 - Relate the term intellectual property to something that is created in a person's mind
 - Understand different types of media as intellectual property: writings, music, videos, games, etc.
 - Explain that piracy is stealing from real people
8. Intellectual Property, Fair Use, and Copyright II
 - Identify unauthorized uses of copyrighted materials as acts of piracy and plagiarism
 - Define fair use and copyright law
9. Cyber Citizenship

- Explain safe and appropriate behavior in cyberspace
- Identify ways to be a good cyber citizen
- Plan the components of an educational story for a younger audience

3. Study Skills

1. Listening Skills
 - Identify and apply the qualities of an active listener
 - Summarize how to use active listening strategies
 - Explain the importance of being a good listener by recording active listening strategies using the audio recording tool
2. Organization and Time Management
 - Demonstrate how to use organizational strategies to track, plan, and manage a schedule
 - Create a weeklong calendar to organize tasks
3. Note Taking
 - Identify different learning styles and different ways to take notes
 - Demonstrate how to take notes
 - Discuss the purpose of note taking
4. Virtual Tours
 - Demonstrate the ability to complete an online virtual tour to learn about places without traveling to them
 - Evaluate the usefulness of a virtual tour in enhancing learning
5. Online Learning
 - Describe online learning
 - Discuss the pros and cons of online learning
6. Goal Setting
 - Distinguish between short- and long-term goals
 - Plan short- and long-term goals for a possible career
 - Create a short- and long-term career goals brochure to track progress toward reaching these goals

4. Microsoft® Word

1. Fact Versus Opinion
 - Academic: Identify and distinguish the differences between facts and opinions in text
 - Technology: Demonstrate selecting text in a document using the mouse
 - Technology: Demonstrate using keyboard shortcuts, Ctrl+ C and Ctrl + V in order to copy and paste text in a document and table
2. Greek Roots
 - Academic: Identify and define the Greek roots photo-, geo-, demo-, and -ology used in context
 - Academic: Examine words with Greek roots to compare meanings of words with common roots
 - Technology: Demonstrate how to type words and sentences and move to the next line using the Enter key
 - Technology: Incorporate and format a table with the correct number of rows and columns using the Table drop-down menu
 - Technology: Illustrate Greek roots in context using different colors within the Highlighter drop-down menu
3. Subjects and Predicates
 - Academic: Identify subjects and predicates within existing sentences
 - Academic: Create original sentences containing both a simple subject and predicate
 - Technology: Insert a table with the correct number of columns and rows, adjust the table settings within the Insert Table window, and format text within a table

- Technology: Illustrate subjects and predicates in context using different highlighting colors
4. Verb Tenses
 - Academic: Identify the difference between past, present, and future tense
 - Academic: Modify inappropriate use of verb tense within existing sentences
 - Technology: Format the font color of text using the Font Color drop-down menu to identify incorrect verb tenses
 - Technology: Demonstrate aligning text using the alignment buttons in the Home ribbon
 5. Editing a Friendly Letter
 - Academic: Identify and write the components of a friendly letter, such as heading, greeting, body, and closing
 - Technology: Generate changes in a document using Track Changes
 - Technology: Apply alignment and font formatting using menus and buttons in the Home ribbon
 - Technology: Revise a document using the Spelling and Grammar tool
 6. Drafting an Outline
 - Academic: Identify the main idea within a text
 - Academic: Differentiate between the main idea and the supporting details within a text
 - Academic: Apply knowledge of text outlines to real-life applications
 - Technology: Construct an outline using Outline View in Microsoft® Word
 - Technology: Develop multiple levels within the outline using the Promote and Demote arrow buttons
 7. Similes and Metaphors
 - Academic: Interpret figurative language and include it in a poem
 - Academic: Define and identify similes and metaphors
 - Technology: Generate and type a poem with multiple lines using the Enter key
 - Technology: Arrange a poem on the center of a page using the Center Align button
 - Technology: Apply bold and underline formatting to the title of a poem using the Bold and Italics buttons available in the Mini Toolbar
 8. Poetry
 - Academic: Identify the speaker and analyze voice within poetry
 - Academic: Create original poetry
 - Technology: Arrange a poem on the center of a page using the Center Align button
 - Technology: Generate and type a poem with multiple lines using the Enter key
 9. Coordinate Grids
 - Academic: Identify and label the axes of a coordinate grid
 - Academic: Identify and define ordered pairs on a coordinate grid
 - Technology: Demonstrate inserting a text box and formatting text within the textbox
 - Technology: Illustrate ordered pairs on a coordinate grid by inserting shapes using the Shapes drop-down menu
 10. Number Prefixes
 - Academic: Identify number prefixes and define words that begin with number prefixes
 - Academic: Categorize words with similar meanings within a table
 - Technology: Demonstrate inserting shapes to illustrate number prefixes
 - Technology: Construct and insert a table and type within it
5. **Microsoft® PowerPoint**
1. Antonyms and Synonyms
 - Academic: Identify and define antonyms and synonyms using a thesaurus

- Academic: Explain the difference between synonyms and antonyms
 - Technology: Demonstrate inserting and typing synonyms and antonyms in new text boxes
 - Technology: Demonstrate inserting a new slide using the New Slide drop-down menu
 - Technology: Illustrate the definitions of synonyms and antonyms using clip art
2. Reflections, Translations, and Rotations
- Academic: Describe how to reflect, translate, and rotate a shape
 - Academic: Create patterns with translations, reflections, and rotations using shapes
 - Technology: Apply animations and motion paths to shapes to simulate transformations
3. Sequence Ideas for Writing
- Academic: Demonstrate knowledge of main idea and supporting details to sequence ideas during writing
 - Technology: Arrange the correct slide sequence using the Slide Sorter view
 - Technology: Create a themed presentation with various slide layouts, clip art, text and animations
 - Technology: Apply animated entrance effects to sequence text and clip art on a slide
4. Compare and Contrast Fables
- Academic: Identify and define a fable
 - Academic: Compare and contrast the similarities and differences between fables
 - Academic: Relate similarities in the theme, topic, and main idea between various fables
 - Technology: Demonstrate how to insert and format SmartArt graphics to compare and contrast fables
 - Technology: Demonstrate how to insert clip art and shapes to illustrate the characteristics of a fable
5. How a Bill Becomes a Law
- Academic: Explain the process used to make a bill a law
 - Academic: Identify and define key vocabulary used during the bill creation process
 - Technology: Design a presentation using various slide layouts, clip art, and images to explain the bill process
6. Food Chains
- Academic: Construct and define organisms in a food chain
 - Academic: Examine the interrelationship between plants, animals, and fungi
 - Academic: Define an herbivore, omnivore, and carnivore
 - Technology: Demonstrate how to insert and format SmartArt to illustrate various stages of a food chain
 - Technology: Construct an interactive food chain by adding action buttons and hyperlinks to different slides within a presentation

6. Microsoft® Excel

1. Place Value
- Academic: Identify place value of digits
 - Academic: Relate groups of 10 to 100 and 1,000
 - Technology: Navigate and type within cells
 - Technology: Insert shapes into a workbook to represent place values
 - Technology: Apply a fill color to shapes to help sort different place values
2. Identifying Patterns
- Academic: Identify odd and even numbers in patterns
 - Technology: Apply a fill color to cells to illustrate odd and even number patterns
 - Technology: Insert an addition formula to build numbers and develop patterns

3. Comparing Decimals
 - Academic: Demonstrate how to compare decimals using the less than $<$, greater than $>$, and equal to $=$ symbols
 - Academic: Compare decimals to the hundredths place
 - Technology: Apply a fill color to cells to illustrate decimals
 - Technology: Apply borders to cells to illustrate a hundredths grid
4. Multiplying by Powers of Ten
 - Academic: Explain movement of a decimal point when a number is multiplied by 10, 100, or 1,000
 - Academic: Apply powers of ten to multiplication problems
 - Technology: Demonstrate how to insert a multiplication formula to multiply a decimal by 10, 100, or 1,000
 - Technology: Navigate and type within cells
5. Area
 - Academic: Apply variables to replace numerals in mathematical equations
 - Academic: Calculate the area of squares and rectangles
 - Technology: Create uniform cells by applying a set column width
 - Technology: Illustrate a square and rectangle by applying borders to groups of cells
 - Technology: Compute the area of a square and rectangle by inserting a multiplication formula
6. Area of Irregular Shapes
 - Academic: Demonstrate how to compute the areas of irregular shapes
 - Academic: Apply formulas to find the area of irregular shapes
 - Technology: Apply borders to groups of cells to illustrate regular shapes within an irregular shape
 - Technology: Demonstrate how to insert a fill color to identify rectangles within irregular shapes
7. Converting Customary Units of Length
 - Academic: Identify the customary units of length: feet and miles
 - Academic: Demonstrate how to convert customary units of length using multiplication and division formulas
 - Technology: Insert multiplication and division formulas to convert feet to miles and miles to feet
8. Bodies of Water on Earth
 - Academic: Identify, collect, and categorize data on the major bodies of water on Earth
 - Technology: Identify and create a major type of graph (line, pie, or bar graph)
 - Technology: Generate graphs to illustrate variations in surface area

Educational Technology and Online Learning 6

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Students progress to more sophisticated work in this course, including the use of electronic media and software to apply academic concepts in the creation of meaningful organizers, projects, and presentations. Students locate, retrieve, and evaluate data in order to construct and analyze databases. Students produce presentations on Internet safety, online predators, and cyberbullying. At the end of the course, students become effective communicators and collaborators as they plan, evaluate and synthesize research emphasizing current issues with technology.

Course Outline

1. Introduction

1. Keyboarding Rows
 - Apply proper keyboarding techniques to improve accuracy, speed, and overall efficiency in computer operation
2. History of Technology
 - Examine how computer technology has evolved over time
 - Distinguish how changes in technology throughout history have impacted different aspects of the world
3. Hardware, Components, and Operating Systems
 - Distinguish the difference between hardware and software, and input and output devices
 - Identify hardware, software, components and the operating system of a computer and other technology devices
4. File Management and Organization
 - Identify different file extensions, and demonstrate proper naming conventions of files
 - Evaluate course folder structure to ensure that it is effective for the specified purpose
 - Create a course folder structure using subfolders to organize and manage files
5. Troubleshooting Computer Issues
 - Develop and apply strategies for identifying and solving routine hardware and software problems

2. Microsoft® Word

1. Verbs: Past, Present, and Future
 - Academic: Use correct verb tense (past, present, and future) when writing or editing text
 - Technology: Distinguish correct and incorrect verb tense in sentences, and then demonstrate necessary corrections using the Track Changes feature
 - Technology: Select text in a variety of ways and utilize keyboard shortcuts to cut and paste verbs according to past, present, and future tense
2. Context Clues
 - Academic: Analyze context clues in order to determine the meaning of a word
 - Technology: Demonstrate highlighting and modifying text to identify the context clues of an unknown word using a macro
 - Technology: Examine sentences to determine which type of context clue is employed in the sentence and label the clue using heading styles available in the Home ribbon
3. Analyzing Literature
 - Academic: Analyze the effect of figurative language on the tone or meaning of a poem
 - Academic: Explore how the author's choice of words shapes the meaning of a poem
 - Technology: Insert and modify a quick table in order to compare and contrast poems
 - Technology: Add headings to a table and merge cells to allocate more space to analyze poetry
4. Greek Mythology
 - Academic: Identify and explain the purpose or social message of ancient myths
 - Technology: Publish a plan for an original myth, and enhance the document by inserting clip art with text wrapped around it and adding a title using WordArt
 - Technology: Determine the theme of a story and then format text using the Mini toolbar to identify what parts of the story support the theme
5. Personification
 - Academic: Define personification
 - Academic: Identify examples of personification
 - Academic: Describe the impact that personification has on the imagery in poetry
 - Technology: Develop a SmartArt graphic that uses images and text
 - Technology: Evaluate and incorporate clip art to illustrate the meaning of personified text
6. Drawing Inferences
 - Academic: Draw inferences about the main character in a text
 - Technology: Utilize the comment feature to answer questions requiring a literature analysis to draw conclusions and inferences
 - Technology: Modify text using the Font window to indicate the answers explicitly stated in the text
7. Technology for Searching
 - Academic: Conduct a scholarly search using Boolean operators
 - Academic: Locate information about Alexander the Great that supports a research topic
 - Technology: Conduct an Internet search about Alexander the Great using filters to narrow results in EBSCO
 - Technology: Modify a table to include a hyperlink to the site, proper citation, and brief notes about each resource
8. Writing an Outline: Alexander the Great
 - Academic: Develop an outline based on research
 - Technology: Generate an outline based on notes to plan an expository essay about Alexander the Great
9. Writing an Expository Essay

- Academic: Construct an expository essay which includes an introduction, thesis, body, and conclusion
- Technology: Utilize multimedia sources to insert images and captions
- Technology: Demonstrate inserting an endnote to cite sources
- Technology: Demonstrate correcting grammatical and punctuation errors using the Spelling and Grammar tool

3. Microsoft® PowerPoint

1. Technology for Publishing
 - Academic: Develop the storyline for a personal narrative
 - Technology: Demonstrate using the Record Audio Tool to record a personal narrative story varying the tone of voice, pace, and volume of speech
2. Analyzing Plots
 - Academic: Order the key events of a plot in the correct sequence
 - Academic: Describe the elements of plot and analyze how they impact the readability of a story
 - Technology: Use Slide Sorter View to put key events of a story in order to show how the plot of a story unfolds in a series of episodes
 - Technology: Insert text boxes to identify the elements of plot in a story
 - Technology: Insert a Title slide to add a title to the story
3. Narrative Writing
 - Academic: Alter the character's decision at a crucial point in the story and analyze how that change will impact the plot resolution
 - Academic: Propose a new ending for a known story
 - Technology: Create a nonlinear presentation using the Action tool to create a story with alternate endings
 - Technology: Apply transitions to slides to make the presentation engaging to the audience
4. Values Portrayed in Literature
 - Academic: Adopt the values portrayed in an old story and recreate and apply them in current setting
 - Technology: Apply slide timings to publish a short story
 - Technology: Hide and unhide slides to create a cohesive story when the presentation is published
 - Technology: Publish a short story created in Microsoft® PowerPoint as a movie
5. Food Chains
 - Academic: Explain how the food chain works
 - Academic: Create a simple food chain
 - Academic: Formulate a hypothesis predicting what would happen if an organism was removed from the food chain
 - Technology: Demonstrate the food chain by inserting shapes and connecting provided images
 - Technology: Construct a complex nonlinear interactive presentation using action buttons to demonstrate the interactions between organisms in a food chain

4. Microsoft® Excel

1. Ordering Positive and Negative Numbers
 - Academic: Sort integers from greatest to least and from least to greatest
 - Technology: Demonstrate keyboard shortcuts to copy and paste and cut and paste data in a spreadsheet
 - Technology: Sort integers from greatest to least and least to greatest using the Sort feature

2. Estimating by Rounding
 - Academic: Identify parts of an equation using mathematical terms
 - Academic: Round two-digit numbers involving three addends in an equation
 - Technology: Utilize the MROUND function to round two-digit numbers involving three addends in an equation
 - Technology: Employ the AutoSum feature to check mental addition of a list of numbers
3. Graphing Data
 - Academic: Select the type of graph that is most appropriate for the data to be displayed
 - Academic: Evaluate advantages and disadvantages of various types of graphs
 - Technology: Graph two data series in multiple formats in order to evaluate the graphs' advantages and disadvantages
4. Interpreting Histograms
 - Academic: Display provided numerical data in a histogram
 - Academic: Explain the difference between a bar graph and a histogram
 - Technology: Build a histogram using the Microsoft® Excel add-in with provided data
5. Creating a Database
 - Academic: Analyze a set of data to answer statistical questions
 - Technology: Build a database to analyze data and solve problems
6. Filtering a Database
 - Academic: Identify and describe patterns in provided data
 - Academic: Given specific database formats, determine filter criteria
 - Technology: Apply filters and use the Sort feature in a database to identify and describe patterns in data
7. Technology for Data Analysis
 - Academic: Collect and interpret data using filtering options and graphs in Microsoft® Excel
 - Technology: Build a database based on data collected in a survey
 - Technology: Analyze collected data using the Filter and Sort functions
 - Technology: Chart numeric data using appropriate graph

5. Study Skills

1. Organization and Time Management
 - Create and follow a study schedule
 - Organize a work/study area
 - Describe benefits of developing good study skills
2. Using Graphic Organizers
 - Use a process and organizer to evaluate and validate information from the World Wide Web
3. Memory Aids
 - Devise ways to remember important facts and information
4. Study Strategies
 - Explain the importance of good note taking as a test preparation strategy
 - Use one new note-taking strategy while completing homework
5. Test-Taking Strategies
 - Identify test-taking strategies that you will use when taking the next test in each of your current courses
6. Goal Setting
 - Describe the importance of goal setting in education

- Develop SMART long-term and short-term goals for middle school

7. Learning Through Games and Simulations

- Utilize and evaluate educational interactive games and simulations in order to demonstrate understanding

6. Internet Safety

1. Acceptable Use Policy

- Explain the purpose of rules and define Acceptable Use Policy (AUP)
- Evaluate an AUP and create an AUP for your learning environment

2. Cybersecurity

- Define spyware and virus
- Describe security risks associated with downloading items online
- Evaluate personal activity on the Internet with regard to putting your computer or information at risk

3. Cyber Community

- Compare social roles in the online community to social roles in the physical community
- Identify features of inappropriate websites and how to avoid them
- Discuss how cybercitizenship is a necessary component for online communities

4. Text Messaging and Netiquette

- Identify the safety risks associated with cell phones and texting
- Define netiquette and describe how it can help you effectively communicate when texting

5. Cyberbullying

- Define cyberbullying and describe ways to prevent it
- Analyze how student actions impact others
- Describe how netiquette can be used to prevent cyberbullying

6. Safeguarding Identity

- Describe how to safely engage in online relationships
- Explain risks of providing too much personal information in online profiles, forms, and forums

7. Protecting Yourself from Online Predators

- List safety rules for behavior toward strangers in the physical community that also apply to behavior toward strangers in cyberspace
- Explain the importance of refusing inappropriate online relationships
- Describe how to interact appropriately and safely online

8. Digital Literacy I: Successful Searches

- Compare different types of search engines
- Write search engine queries that will get quality results and select the most appropriate search string results

9. Digital Literacy II: Website Validity

- Explain the importance of using sites that are valid and reliable
- Evaluate online resources for validity and reliability

10. Intellectual Property Basics

- Distinguish between tangible property and intellectual property
- Define copyright and identify copyrighted materials

11. Plagiarism and Fair Use

- Define plagiarism and identify how plagiarism occurs

- Explain the basic guidelines for fair use of intellectual property

7. **Digital Publishing**

1. Exploring a Topic
 - Research the impact of technology on the workplace or a career of choice using Boolean search strategies
 - Apply questioning and research skills to narrow down a topic for investigation
2. Investigating Design
 - Describe basic elements of design and how they apply to multimedia
3. Selecting an Application and Publishing Work
 - Analyze applications focusing on advantages and disadvantages of each
 - Evaluate an application's usefulness for various purposes
 - Select methods for publishing research
 - Create a multimedia presentation to reflect your research investigation
4. Collaborating Online
 - Utilize technology to share ideas and collaborate with peers
 - Evaluate others' works using provided criteria
5. Evaluating Your Product
 - Revise and edit a project based on provided criteria

Educational Technology and Online Learning 7

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Students progress to more sophisticated work in this course, including the use of electronic media and software to apply academic concepts in the creation of meaningful organizers, projects, and presentations. Students locate, retrieve, and evaluate data to construct and analyze databases. Students produce presentations on Internet safety, online predators, and cyber bullying. At the end of the course, students become effective communicators and collaborators as they plan, evaluate, and synthesize research emphasizing current issues with technology.

Course Outline

1. Introduction

1. Keyboarding
 - Recognize the home row keys on the keyboard
 - Recognize the keys in rows above and below the home row
 - Utilize keys from the home row and the rows above and below the home row to type words, phrases, and sentences
 - Demonstrate appropriate posture and positioning for keyboarding
2. History of Technology
 - Identify how changes in technology throughout history have impacted different aspects of the world
3. Hardware, Components, and Operating Systems
 - Distinguish the difference between hardware and software, and input and output devices
 - Identify and define types of hardware, software, operating systems, and components of a computer and other technology devices
4. File Management and Organization
 - Identify different file extensions, and demonstrate proper naming conventions of files
 - Practice saving a document as different files types in Microsoft® Word
 - Create a course folder structure using subfolders to organize and manage files
 - Organize files into appropriate folders and analyze a folder hierarchy
5. Computer Troubleshooting
 - Apply troubleshooting techniques in preparation for minor computer problems that may occur

2. Microsoft® Word

1. Fact vs. Opinion in Publications
 - Academic: Evaluate text to determine whether it is a fact or opinion
 - Academic: Provide support of ideas from information in the text that verifies it is fact or opinion
 - Technology: Apply an underline to words using the Underline button and the Underline Style drop-down menu available in the Font window
 - Technology: Create and insert SmartArt to organize facts and opinions
2. Using a Thesaurus
 - Academic: Compare similar writings that use synonyms for overused words
 - Academic: Utilize different types of thesaurus sources to obtain synonyms and integrate them in previously written sentences
 - Technology: Utilize thesaurus.com and the Thesaurus feature in Microsoft® Word to search for synonyms
 - Technology: Demonstrate how to highlight text using the Highlighter drop-down menu in order to color code adjectives and adverbs
 - Technology: Apply edits to two documents using the View Side by Side feature
 - Technology: Construct and insert a table in a document with a specified number of columns and rows and format text within the table
3. Idioms
 - Academic: Evaluate the use of figurative language in general with the characteristics of idioms
 - Academic: Implement idioms within personal writing and research the meaning of idioms
 - Technology: Create a document containing two columns and headings at the top of each column
 - Technology: Format and edit a SmartArt graphic in order explain an idiom
 - Technology: Insert a clip art image into a SmartArt graphic illustrating an idiom
4. Organizing Writing
 - Academic: Analyze a story to discover the importance of order and organization in narrative writing
 - Academic: Evaluate different types of graphic organizers that can be used to organize different types of writing including timelines, personal narratives, and fictional story
 - Academic: Utilize different graphic organizers to help with organizing writing ideas
 - Technology: Utilize SmartArt to format and create a graphic organizer
 - Technology: Insert and format shapes in a document in order to construct a graphic organizer
5. Reading Textual, Functional, and Recreational Text
 - Academic: Analyze different types of text and determine attributes associated with factual, textual, and recreational text
 - Academic: Identify characteristics of different types of text
 - Academic: Determine uses for each type of text in real-life settings
 - Technology: Utilize and format a table in a document to identify text characteristics
 - Technology: Format a checklist to use as a personal resource when writing
6. Points of View
 - Academic: Establish point of view by writing from a literal visual point of view
 - Academic: Enhance writing by utilizing different points of view for different narratives
 - Academic: Analyze points of view and associate different characteristics with each type of view
 - Technology: Edit images embedded in a document and create captions using the Insert Caption button
 - Technology: Utilize the Highlighter tool to highlight words in captions
7. History: Personal Narratives

- Academic: Distinguish between the attributes of spoken speech and written text
 - Academic: Recognize both point of view and voice in writing
 - Technology: Utilize, insert and format a SmartArt graphic to create a Venn diagram comparing written and spoken word
 - Technology: Change orientation of the document from portrait to landscape
8. Writing a Personal Narrative
- Academic: Utilize prewriting organizers in order to write a personal narrative
 - Academic: Incorporate figurative language into writing
 - Technology: Develop and type a rough draft personal narrative in a Microsoft® Word document
 - Technology: Insert and format text boxes to separate parts of the story
9. Revising and Editing Writing
- Academic: Evaluate the process of revising and editing to understand the meaning of each
 - Academic: Analyze personal writing through the revision and editing process
 - Technology: Use the revising and editing features in Microsoft® Word including the Spelling and Grammar tool and the Thesaurus

3. Microsoft® PowerPoint

1. Technology for Publishing
- Academic: Publish a final copy of a personal narrative
 - Technology: Record a personal narrative using the Record Audio tool in Microsoft® PowerPoint
 - Technology: Insert images and sound within the presentation
2. Using Context Clues
- Academic: Read and analyze historical text
 - Academic: Identify unknown or unfamiliar words and use context clues to determine their meaning
 - Technology: Utilize the Thesaurus feature to infer the meaning of the unfamiliar word
 - Technology: Demonstrate adding additional slides to a presentation using the New Slide drop-down menu
 - Technology: Create a presentation and apply a different font color to text to illustrate the context clues and define unfamiliar words
3. Graphing Probability
- Academic: Explore basic probability
 - Academic: Observe frequencies of an event by collecting and tallying data
 - Academic: Investigate relationships of the event by creating a table to analyze data
 - Technology: Demonstrate inserting a graph or chart using the Microsoft® Excel charting function within Microsoft® PowerPoint
4. Graphing Probability Part 2
- Academic: Determine probability of events and analyze the relationships
 - Academic: Analyze the probability of an event using the terms greater or lesser likelihood
 - Technology: Demonstrate inserting a graph or chart using the Microsoft® Excel charting function within Microsoft® PowerPoint
 - Technology: Adjust and format graphs in a presentation using the Design, Layout, and Format ribbons
 - Technology: Use the Record tool to share information within the presentation
5. Technology for Searching
- Academic: Search, examine, and assess research articles to determine authenticity and sound reasoning
 - Technology: Create a presentation to share information from research

- Technology: Modify a table and insert hyperlinks to maintain a record of reliable sources and websites
6. Technology for Inquiry
 - Academic: Conduct an Internet search for information and evaluate the text for authenticity
 - Academic: Organize resources from Internet research
 - Technology: Conduct a scholarly search using Boolean operators within the EBSCO and Grolier™ databases to find information about Earth's history
 - Technology: Create a bulleted list in Microsoft® PowerPoint
 7. Technology for Communication Geologic Time Scale
 - Academic: Outline geological research and illustrate the time scale sequence logically
 - Technology: Insert and format SmartArt to organize and sequences events
 - Technology: Create a presentation to sequence events of the geological time scale
4. **Microsoft® Excel**
1. Estimate by Rounding
 - Academic: Determine when it is appropriate to round decimal numbers up or down to the nearest whole number
 - Academic: Solve multi-step problems by rounding decimals
 - Technology: Round numbers with decimals to practice estimation using the ROUND function
 - Technology: Apply formulas to multiple cells in a workbook using the AutoFill feature
 2. Function Tables
 - Academic: Create input/output tables from expressions
 - Academic: Solve word problems and equations using an input/output table
 - Technology: Create an input/output table in Excel to show answers to equations
 - Technology: Insert and apply multiplication and addition formulas to an input/output table
 3. Real-World Data
 - Academic: Balance a checkbook within a provided resource
 - Technology: Insert formulas into an Excel workbook to determine the balance of the checkbook
 - Technology: Insert and apply the SUM function to add multiple cells together
 4. Finding the Mean and Range of Data
 - Academic: Organize data to enable easier comparison
 - Academic: Compute the range and mean for a list of numbers
 - Technology: Apply formulas in a workbook to find the mean and range of data
 5. Sorting and Filtering Data
 - Academic: Analyze data in a database to identify similarities and differences
 - Technology: Organize, sort and filter data in a database to identify trends
 - Technology: Define and identify fields, field names and records in a database
 6. Graphing Data
 - Academic: Evaluate different types of graphs and determine appropriate graphs for certain types of data
 - Technology: Graph two data series in multiple formats and evaluate the graphs' advantages and disadvantages
 7. Survey and Graphing Analysis
 - Academic: Evaluate a random sample for fair and unbiased questions
 - Academic: Compare and analyze collected data
 - Technology: Organize information into a data table in Excel
 - Technology: Create a graph from the data table in Excel to compare data

5. Study Skills

1. Organization and Time Management
 - Identify characteristics of time management
 - Identify time management skills that need improving
 - Design a weekly schedule to improve time management skills
2. Using Graphic Organizers: Timelines
 - Evaluate a timeline as a tool to support learning
 - Create a timeline
3. Memory Aids
 - Identify key elements in creating memory tools, acronyms, and acrostics
 - Construct original acronyms and acrostics using information from current academic courses
4. Study Strategies
 - Identify different study skills
 - Formulate a method of studying that works best for you
5. Test-Taking Strategies
 - Distinguish between characteristics of objective questions and essay questions
 - Evaluate personal test-taking strategies
 - Utilize test-taking strategies
6. Goal Setting
 - Express the characteristics of successful and well-thought-out goals
 - Apply study skills while developing short- and long-term goals
7. Learning through Games and Simulations
 - Research examples of simulations and interactive games for education online
 - Analyze trends that occur when repeating simulations with different data
 - Predict outcomes when data in a simulation is changed

6. Internet Safety

1. Acceptable Use Policy
 - Identify necessary components of an acceptable use policy (AUP)
 - Review the school's AUP
 - Develop AUP guidelines
2. Cybersecurity
 - Identify key general attributes of the threats to the security of computers and information via the Internet, such as viruses, worms, and Trojan horses
 - Understand how to protect computers from viruses, worms, Trojan horses, and spyware
 - Understand basic prevention and maintenance that can be done to protect the computer, such as operating system updates, firewalls, spyware checks, virus protection, etc.
3. Cyber Community
 - Describe different ways to communicate
 - Differentiate between appropriate and inappropriate websites
 - Describe different ways to handle inappropriate websites
4. Social Networks
 - Identify media that is commonly shared online
 - Define the relevance of intellectual property rights to online sharing in an age appropriate way
 - Compare the relationship of intellectual property rights to linking on personal social networking pages

5. Cyberbullying
 - Identify bystanders who may be involved in a cyberbullying incident
 - Use a variety of resources to explore the characteristics and behaviors of bystanders and upstanders
 - Draw conclusions about the actions of various participants in bullying incidents
6. Safety in Online Gaming
 - Evaluate the concept of online gaming
 - Understand the safety and security risks associated with online gaming
 - Develop an action plan for informing others of how to play online safely
7. Safeguarding Identity
 - Evaluate the concept of identity theft
 - Critique the security risks associated with revealing private information online
 - Develop an action plan for dealing with identity theft that can be shared with parents
8. Online Shopping
 - Evaluate the safety risks associated with online shopping
 - Take preventative measures when shopping online to help ensure personal safety and computer security
9. Blogging
 - Evaluate the security risks associated with online journaling and blogging
 - Identify specific risky behaviors associated with online journaling
 - Determine positive techniques to blog online
10. Cyber Predators
 - Evaluate risks involved in engaging in online friendships
 - Discuss basic strategies for interacting online
 - Demonstrate understanding of risky online interaction through a selected project/activity
11. Safety in Online Relationships
 - Apply the concept of willing participation
 - Evaluate risk-taking in the context of a cyber predator case
 - Make conclusions about who is most at risk for potentially dangerous online relationships
 - Make conclusions about how to maintain safe and healthy online relationships
12. Digital Literacy
 - Compare how the Internet and media publications can be used in positive ways, as well as in negative or unethical ways
 - Create a code of conduct governing Internet use
 - Consider the consequences of various means of online publication
13. Understanding Intellectual Property
 - Make a distinction between tangible property and intellectual property
 - Define intellectual property that has been created in the mind before it is turned into a material item
 - Identify copyrighted materials as tangible works that are protected from being copied, distributed, performed, or changed without the creator's or owner's permission
 - Identify the impact made when intellectual property rights are not respected
 - Relate the concepts of intellectual property to reveal available online materials: music, videos, software, etc.
14. Music Copyright Basics
 - Apply copyright laws to online usage of music

- Determine legal alternatives when using copyrighted music for school assignments and/or personal use

15. Plagiarism and the World Wide Web

- Define plagiarism
- Identify how plagiarism occurs
- Follow the basic guidelines for fair use of intellectual property

16. Peer-to-Peer Networks

- Define and understand the concept of peer-to-peer networks
- Identify the safety and security risks, as well as legal issues, surrounding peer-to-peer networks
- Understand and correct misconceptions about the use of peer-to-peer networks

7. **Digital Publishing**

1. Exploring a Topic

- Utilize Boolean search strategies to research ethical implications of technology
- Develop a research plan, and identify stakeholders involved
- Apply questioning and research skills to narrow down a topic for investigation

2. Investigating Design

- Define the elements of design including line, shape, texture, color, value, and space
- Understand the uses for line, shape, texture, color, value, and space in design
- Apply the basic elements of design to edit work
- Utilize the GNU Image Manipulation Program to edit images

3. Creating a Multimedia Presentation

- Create a multimedia presentation to communicate the ethical implications of technology and artificial intelligence

4. Collaborating Online

- Utilize technology to share ideas and collaborate with peers
- Evaluate others' works using provided criteria

5. Evaluating the Product

- Self-evaluate a product in regard to audience, purpose, design, and content delivery

Educational Technology and Online Learning 8

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Students progress to more sophisticated work in this course, including the use of electronic media and software to apply academic concepts in the creation of meaningful organizers, projects, and presentations. Students locate, retrieve, and evaluate data in order to construct and analyze databases. Students produce presentations on Internet safety, online predators, and cyberbullying. At the end of the course, students become effective communicators and collaborators as they plan, evaluate, and synthesize research emphasizing current issues with technology.

Course Outline

1. Introduction

1. Typing Skills

- Utilize keys from the home row, and rows above and below the home row to type individual letters and words
- Identify spelling errors with the opportunity to self-correct

2. Hardware, Components, and Operating Systems

- Compare and contrast input, output, processing, and data storage devices
- Describe computer hardware, components, and system
- Identify personal software programs
- Create a course folder structure using subfolders to organize and manage files

3. Computer Troubleshooting

- Examine troubleshooting techniques related to everyday computer use
- Recommend solutions to various computer problems
- Identify appropriate resolutions to common computer problems

2. Microsoft® Word

1. Verbs in the Active and Passive Voice

- Academic: Apply both active and passive voice in writing
- Academic: Construct a news article with proper paragraph alignment and indentation
- Technology: Compose a typed news article using the Tab key to indent text or apply double spacing between paragraphs using the Enter key

2. Verbs Expressing Mood

- Academic: Identify and analyze indicative, imperative, and subjunctive verb moods in context
 - Technology: Demonstrate how to bold, italicize, and underline text using buttons and menus available in the Home ribbon
 - Technology: Apply the same font face throughout a document
3. Characters, Setting, and Plot
- Academic: Identify parts of a story
 - Academic: Outline and summarize the characters, setting, and plot of a story
 - Technology: Organize the structure of a story within a document by inserting columns and column breaks to add headings
4. Thematic Poetry
- Academic: Illustrate the rhyme scheme of a favorite song
 - Academic: Identify and explain the theme and rhyme scheme of poetry
 - Technology: Demonstrate inserting a table to construct and display the rhyme scheme of poetry
5. Technology for Searching: Cyberbullying
- Academic: Locate articles in a database using specific search parameters
 - Technology: Construct a search log to cite works by inserting a table and hyperlinks
 - Technology: Apply font formatting to identify key information gained in research
 - Technology: Conduct online database searches using Boolean operators
6. Technology for Publishing: Cyberbullying
- Academic: Design an informative or explanatory text about cyberbullying
 - Academic: Identify important information to educate others about cyberbullying
 - Technology: Utilize multimedia sources to insert images and captions
 - Technology: Demonstrate inserting a footnote to cite sources
 - Technology: Demonstrate correcting grammatical and punctuation errors using the Spelling and Grammar tool

3. Microsoft® PowerPoint

1. Natural Disasters
- Academic: Identify several types of natural disasters
 - Academic: Conduct in-depth research into one natural disaster
 - Technology: Utilize Microsoft® PowerPoint to create an informative presentation about a natural disaster
 - Technology: Integrate Action buttons, images, and text boxes to create multidimensional slides in a presentation about a natural disaster
2. Today in History
- Academic: Outline historical events in chronological order
 - Academic: Utilize visual aids to enhance presentations
 - Technology: Create a historical timeline, utilizing transitions between slides in Microsoft® PowerPoint
 - Technology: Incorporate animations into a timeline
3. Historical Points of View
- Academic: Explore the history of the women’s suffrage movement in the United States of America
 - Academic: Examine political cartoons to understand differences in opinion
 - Technology: Create a Microsoft® PowerPoint presentation of the women’s suffrage movement using the Photo Album feature
 - Technology: Provide analysis of images from the women’s suffrage era in a digital presentation

4. Progressive Era
 - Academic: Identify key issues and themes of the Progressive Era
 - Academic: Describe aspects of the Progressive Era utilizing a concept map
 - Technology: Create a concept map by inserting and formatting a SmartArt graphic in a Microsoft® PowerPoint presentation
5. Technology for Publishing: Progressive Era
 - Academic: Analyze and research reforms of the Progressive Era
 - Academic: Create a concept map based on research about a Progressive Era topic
 - Technology: Search for historical prints and photographs using the Library of Congress database
 - Technology: Construct a presentation about the Progressive Era incorporating slide transitions and animations

4. Microsoft® Excel

1. Scatter Plots
 - Academic: Create a scatter plot in order to visualize relationships within data
 - Academic: Identify and name ordered pairs on a scatter plot using the x- and y-axes
 - Technology: Examine data organized in columns and rows in Microsoft Excel
 - Technology: Build a scatter plot diagram in Microsoft Excel using given coordinates
 - Technology: Interchange the x- and y-axes of a scatter plot in Microsoft Excel
2. Scatter Plots: Comparing Variables
 - Academic: Create and analyze data in scatter plot diagrams
 - Academic: Investigate common trends within scatter plot diagrams
 - Technology: Analyze a scatter plot diagram
 - Technology: Utilize Microsoft® Excel to create a data table
3. Scatter Plots: Trend Lines
 - Academic: Explore the relationship between a country's land area and population
 - Academic: Identify and describe reasons for outliers along a trend line
 - Technology: Create a digital scatter plot to analyze trends
 - Technology: Insert a trend line into a scatter plot to determine negative or positive correlation
4. Creating a Database
 - Academic: Collect data in order to create a digital database
 - Technology: Construct a database in Microsoft® Excel by entering data into fields and records
 - Technology: Define and understand the purpose of fields (cells) and records (rows) in a database
 - Technology: Reorganize and analyze data in a database using the sorting and filtering options
5. Creating a Pivot Table
 - Academic: Utilize an existing database to support further data analysis
 - Technology: Create and modify a pivot table to analyze data
 - Technology: Format data to display percentages and currency using the Format Cells window
6. Frequencies
 - Academic: Calculate frequencies within a set of data
 - Academic: Interpret data trends using a histogram
 - Technology: Create a histogram using the column chart option in Microsoft® Excel
7. Data Analysis
 - Academic: Create and conduct an original survey
 - Academic: Interpret survey data using tools in Microsoft® Excel
 - Technology: Create and analyze a scatter plot using original data
 - Technology: Enter original data into a worksheet in Microsoft Excel

5. Study Strategies

1. Tools for Organization and Time Management
 - Identify time management skills
 - Create a planning tool to manage time
 - Identify time management areas of improvement
2. Idea Organization Using Graphic Organizers
 - Evaluate the usefulness of a digital graphic organizer
3. Idea Organization Using Memory Aids
 - Generate memory aids for academic concepts
 - Differentiate between various types of memory aids
4. Learning Through Games and Simulations
 - Examine personal learning gain through an online science game
 - Assess the value of online games and simulations for learning
5. Study Strategies
 - Identify current study habits
 - Construct a presentation on study strategies
6. Test-Taking Strategies
 - Examine test-taking strategies for five types of tests
 - Prepare concise summaries of test-taking strategies
7. Goal Setting
 - Identify objectives to reach educational or career goals
 - Devise a goal-planning presentation based on academic study skills

6. Internet Safety

1. Acceptable Use Policy
 - Identify important features of an Acceptable Use Policy
 - Review the school's Acceptable Use Policy
2. Proactive Protection Online
 - Identify the basic risks associated with Internet use
 - Illustrate knowledge of a chosen Internet security topic
 - Create a presentation conveying an Internet security topic
 - Develop an understanding that those met online are strangers
3. Cybersafety and Photo Management
 - Identify appropriate behavior for photo management on the Internet
 - Recommend alternative actions for cybersafety scenarios
4. Your Digital Footprint
 - Differentiate between active and passive digital footprints
 - Identify reasons why digital footprints matter
 - Create an informative brochure about digital footprints
5. Cyberbullying
 - Gain a basic understanding of cyberbullying through reading and discussion
 - Summarize theme and key learning points from a story in a Microsoft® PowerPoint presentation
 - Discuss strategies for coping with an online bullying situation
6. Computer and Internet Health Issues
 - Explore health issues that result from prolonged computer usage

- Identify strategies to maintain health and body while using digital technologies
7. Media Literacy
 - Define media literacy
 - Identify sources of bias in media
 - Create a media product to promote media literacy
 8. The Power of Media
 - Identify media sources
 - Define and assess public service announcements (PSAs)
 - Understand the power the media have in changing perceptions and behavior
 - Utilize media to put a message out
 9. Predator Awareness
 - Identify online behavior that is unsafe, demonstrating an understanding of how to avoid online predators
 - Understand the grooming process as it relates to online predators
 - Promote Internet usage related to predator awareness
 10. Cyber Community Citizenship
 - Define communities in both the physical and virtual worlds
 - Evaluate website safety and appropriateness
 11. Creation and Copyright
 - Categorize tangible and intellectual property
 - Develop an understanding of online piracy
 - Explain the importance of obeying copyright laws
 12. Music Makers: Scripts
 - Recognize terminology related to copyrights in the music industry
 - Describe the effects of copyright laws on a group of people
 13. Plagiarism
 - Define plagiarism and paraphrase
 - Illustrate ways to avoid plagiarism
 14. Fair Use
 - Identify fair use and recommend actions for its application
 - Create a poster of tips for copyright rules and fair-use exceptions
 15. Integrated Literacy
 - Review security concepts related to the online community
 - Plan and prepare the components of an educational story
 - Write a story relating online safety measures to a younger audience
- 7. Digital Publishing**
1. Exploring a Topic
 - Investigate the impact that technology has had on education
 - Utilize Boolean search operators to conduct research
 2. Investigating Design
 - Identify and define elements of design
 - Analyze how the design element was used to create a logo
 - Apply various design elements within a digital project
 3. Creating a Movie

- Design an informative presentation using movie software to communicate the impact of technology on education
4. Collaborating Online
 - Evaluate and provide feedback on student work
 5. Evaluating the Product
 - Conduct a self-assessment of a project based on the criteria presented in a rubric

Freshman Success

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

The Freshman Success course aids students in a successful transition to high school. The courses units include Resources, Integrity, High School 101, Strategies for Success, and College and Career Readiness.

The following are the course objectives:

- Get to know available high school resources and support system
- Realize the importance of conducting oneself with integrity
- Understand why it is important to graduate from high school
- Identify and practice some general strategies that will contribute to success
- Learn about next steps after high school
- Get started on the right foot

Course Outline

1. Freshman Success Course Overview

1. Introduction

- Get to know your high school resources and support system
- Realize the importance of conducting yourself with integrity
- Understand why it is important to graduate from high school
- Identify and practice some general strategies that will contribute to your success
- Learn about next steps after high school in just a few short years
- Get started on the right foot

2. Resources

1. You Are Not Alone
2. About You
3. Navigating Connexus®
4. Getting Organized
5. Tips and Tricks
6. Social Opportunities

3. Integrity

1. Academic Integrity

- Describe academic dishonesty.
- Identify examples of academic dishonesty.

- Develop strategies to protect your personal academic integrity.
- 2. How to Avoid Plagiarism and Cheating
 - Learn ways to avoid plagiarism and cheating when you are completing your assignments and tests.
- 3. Communications Etiquette
- 4. Bullying Stops with Me
 - Identify different types of bullying.
 - Explain how to help if faced with a bullying situation, either as a victim or a bystander.
 - Understand how to build healthy relationships with others.
- 5. Grade Check #1
 - Identify at least one action you have taken as a result of your reflection to bring up one or more of your grades.

4. High School 101

1. Graduation Requirements
2. Grade Point Average (GPA)
3. High School Grade Book
 - Learn how to use your Grade Book.
4. High School Transcript and Four-Year Plan
5. State Testing

5. Strategies for Success

1. Learning Preferences
 - Explore different kinds of learning preferences
2. Note Taking
 - Learn various tips that will help make your note-taking more efficient and more effective.
3. Research Tools
 - Learn to identify qualities of a credible source as well as learn search methods for finding sources.
4. Time Management
 - Explore different strategies to help manage your time effectively.
5. Study Habits
 - Identify a particular habit that you can improve upon
6. Test-Taking Strategies
 - Learn, practice, and utilize some common test-taking strategies to improve your performance.
7. Managing Stress
 - Review some of the topics covered in this course to help you manage your stress
8. Goal Setting
9. Growth Mindset
 - Learn what a growth mindset is, as opposed to a fixed one
10. Math! We've Got This!
 - Explore different strategies to help manage your attitude towards math and improve your math study skills
11. Grade Check # 2
 - Identify at least one action you have taken as a result of your reflection to bring up one or more of your grades.

6. College and Career Readiness

1. Options After High School
2. Interests, Abilities, and Values
 - Learn about yourself and what careers may be a good fit for you

3. College Majors and Job Market
4. College Entrance Exams
5. College Exploration
 - Choose 2–3 colleges that you are particularly interested in and do some research to learn more about them
6. Grade Check # 3
 - Identify at least one action you have taken as a result of your reflection to bring up one or more of your grades.

What you will learn in this course

Health Sciences: The Whole Individual

Will we ever find a cure for cancer? What treatments are best for conditions like diabetes and asthma? How are illnesses like meningitis, tuberculosis, and the measles identified and diagnosed? Health sciences provide the answers to questions such as these. In this course, students will be introduced to the various disciplines within the health sciences, including toxicology, clinical medicine, and biotechnology. They will explore the importance of diagnostics and research in the identification and treatment of diseases. The course presents information and terminology for the health sciences and examines the contributions of different health science areas.

Unit 1: The World of Health Sciences

Since ancient times, people have tried to gain a better understanding of diseases and health. They have studied, experimented, and observed in an effort to learn what causes disease, what

treatments work best, and how best to promote health. Although the methods of doing so may differ today, we are still applying scientific methods to learn more about health and wellness. In this unit, we will learn more about the field of health science, including some of the history of health sciences and trends in the field.

What will you learn in this unit?

- Discuss the history of health sciences.
- Explain the different areas of the healthcare system.
- Examine different types of healthcare sites.
- Consider different payment options in the healthcare system.
- Discuss some of the trends affecting the health sciences.

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Careers in Health Science

The health sciences include a wide range of career options. Many people are attracted to health science careers in order to help others and to prevent disease and illness. In this unit, we will learn more about some of the career options available in the field of health sciences. We will also consider some of the different levels of patient care in the field and some of the common characteristics shared by health science professionals.

What will you learn in this unit?

- Discuss the different levels of service in the healthcare field.
- Learn about some of the common characteristics shared by healthcare professionals.
- Examine different health science professions and their contributions to the field.
- Discuss some of the responsibilities within health science professions.

Pennwood Cyber Charter School Application

- Learn more about licensing, certification, and educational requirements in health science careers.

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: The Life Span

Throughout our lives, we experience a number of changes physically, mentally, emotionally, and socially. These changes can have an impact on our overall health and wellness. In this unit, we will learn more about the different stages of the human life span and the development that occurs during each stage. In doing so, we will also learn more about health issues that may be related to people's development at each stage of the life span.

What will you learn in this unit?

- Define and discuss human development and the different aspects of development.
- Identify the different stages of the human life span.
- Examine some of the physical development and changes that occur during each stage of the life span.
- Discuss some of the cognitive development and changes that occur during each stage of the life span.
- Consider some of the health issues that may affect people at each stage of the life span.

UNIT 3 Assignments	
Assignment	Type

Unit 3 Critical Thinking Questions	Homework
Unit 3 Lab	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Technical Skills

Health science careers often require specialized knowledge and skills. These are important so that health science professionals can effectively help individuals care for their health. In this unit, we will learn more about some of these skills, including checking vital signs, converting measurements, and performing emergency CPR and other actions.

What will you learn in this unit?

- Identify vital signs and how vital signs are measured.
- Review the different systems of measurement that affect health science professions.
- Discuss the steps in performing CPR.
- Examine AEDs and how they are used.
- Discuss some common first aid practices.

Unit 5: Health and Wellness

Cancer, diabetes, HIV/AIDS, heart disease, stroke; our world sometimes seems like it is full of illness and disease. We spend billions of dollars each year in medical treatments and research into treating these diseases. However, we are not necessarily at the mercy of disease and illness. We can make choices in our lives that lower our risk of illness and disease and make us healthier. In this unit, we will learn more about the area of health and wellness. We'll discuss preventative medicine and examine some of the alternative and complementary practices that people use to stay healthier and treat conditions that they may encounter.

What will you learn in this unit?

- Examine the different dimensions of health.
- Define preventative medicine.
- Discuss aspects of preventative medicine.
- Examine some alternative medical systems.
- Consider some alternative and complementary medical practices.

Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 6: Leadership and Teamwork

For the health sciences to work effectively and efficiently, strong leadership and teamwork needs to be present. In this unit, we will learn more about these two areas, including discussing what makes a person a good leader and what characteristics are shared by effective teams. We'll also learn more about some of the theories and explanations for why certain people become leaders and the ways in which they lead others.

What will you learn in this unit?

- Discuss some theories of leadership and leadership styles.
- Identify some of the characteristics that leaders often have.
- Discuss the characteristics of effective healthcare teams.
- Examine steps in building an effective healthcare team.
- Consider some conflict styles and approaches to conflict resolution that people often use.

Unit 6 Quiz	Quiz

Unit 7: Health Communication

Communication is a vital aspect of the health sciences. By communicating, health science professionals exchange ideas, discuss treatments with patients, and give instructions to other healthcare professionals. In this unit, we will explore health communication and how to make

this communication more effective. We'll learn more about barriers to communication and techniques that healthcare professionals can use to improve communication with patients and other healthcare professionals.

What will you learn in this unit?

- Define communication and health communication.
- Discuss some of the characteristics of health communication.
- Examine barriers to effective communication.
- Learn about active listening techniques.
- Explore aspects of body language in healthcare settings.

Unit 8: Ethics and Legal Issues

The health science field often involves complex situations and decisions. It is also a field where simple mistakes can have devastating consequences. As such, the health sciences intersect with both legal and ethical issues on a regular basis. In this unit, we'll learn more about some of the legal responsibilities that healthcare professionals have and some of the ethical issues that exist in the health sciences today.

What will you learn in this unit?

- Define medical legal terms such as medical malpractice and negligence.
- Discuss the legal responsibilities of health science professionals.
- Identify laws and practices that protect patients in the healthcare system.
- Consider how medical ethics affect the health sciences.
- Explore the legal and ethical issues of medical confidentiality and end-of-life care.

UNIT 8 Assignments

Unit 8 Quiz	Quiz

Unit 9: Safety

What would you do if a fire started in a hospital? What if you were exposed to bloodborne pathogens? In this unit, we will learn about some of the common risks in the health sciences and how health science professionals can reduce their risks when dealing with these potential dangers. In particular, we will discuss common healthcare risks such as bloodborne pathogens, fires, falls and trips, injuries, infections, and stress.

What will you learn in this unit?

- Discuss bloodborne pathogens and how the risk of exposure can be reduced.
- Understand the actions that a healthcare professional should take if a fire breaks out in a setting with patients.
- Examine how ergonomics help to reduce the risk of pain and injuries for healthcare workers.
- Discuss how to reduce the risk of infections.
- Consider the effects of stress and how stress can be reduced for healthcare professionals.

Unit 10: Informatics and Technology

Technology is having a great impact on the world today, including in the health sciences. In this unit, we will consider some of the ways that technology impacts health informatics. We will discuss some of the advantages and disadvantages of electronic health data and records and learn about some of the ways in which technology is changing health communication. We will also discuss the effects that intercultural communication can have on communication and informatics.

What will you learn in this unit?

- Define medical technology and informatics.
- Examine the advantages and disadvantages of electronic data records.
- Consider some of the ways that technology is affecting health communication and informatics.
- Discuss how to write an effective health e-mail.
- Examine how intercultural differences can affect health communication.

What you will learn in this course

Health Science 2: Patient Care & Medical Services

Challenging. Variable. Rewarding. These three words can be used to describe many careers in the health sciences. In this course, you will learn more about what it takes to be a successful health science professional, including how to communicate with patients. You'll explore the rights and responsibilities of both patients and health science professionals in patient care and learn more about how to promote wellness among patients and health care staffs. Finally, you'll learn more about safety in health science settings and the challenges and procedures of emergency care, infection control, and blood-borne pathogens.

Health Science 2 Certification Project

Learning Objectives:

- Receive training in cardio pulmonary respiration (CPR)

Pennwood Cyber Charter School Application

- Receive training for using an automated external defibrillator (AED)
- Receive training in removing foreign body airway obstructions (FBOA)
- Receive training in basic first aid

CERTIFICATION PROJECT Assignments	
Assignment	Type
Health Science 2 Certification Project	Homework

Unit 1: Healthcare Systems

Health services is one of the fastest-growing industries in the United States, and this unit explores the ways in which these services are delivered. Health insurance is an important part of the industry, and there are several types to meet patients' needs. Taking care of patients is not just up to doctors; it requires a team of healthcare professionals to ensure patients' needs are met. For this team to be effective, the patient needs to work with the team and do their part to help the team deliver the most effective care. As with all industries, health science adapts with the times, including responding to new legislation, using technology to improve services, and responding to pressing health issues.

What will you learn in this unit?

- Identify the basic components of the health care delivery system, including public, private, government, and nonprofit sectors
- Discuss common methods of payment for health care services
- Describe the composition and functions of a health care team
- Explain factors that influence the current delivery system of health care
- Interpret the impact of emerging issues—including technology, epidemiology, bioethics, and socioeconomics—on health care delivery systems

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework

Unit 1 Activity	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Communication in Healthcare

This unit explores the importance of communication skills in health science. One of the first steps is using the specific language of the medical profession. This shared language helps health care workers communicate with each other. Furthermore, many professionals will spend a lot of time communicating with patients. Understanding the basics of effective communication can help health care professionals get the information they need to best serve their patients. In addition, recognizing some of the reasons that communication breaks down lets health science professionals avoid some common pitfalls.

What will you learn in this unit?

- Correctly use appropriate medical terminology and abbreviations
- Explain the importance of patient/client education regarding health care
- Develop basic speaking and active listening skills
- Analyze elements of communication using a sender–receiver model
- Distinguish between and report on subjective and objective information

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Legal Responsibilities and Patients' Rights

This unit explores the various ways in which health care is regulated and the obligations these requirements create for the members of the healthcare team. The standard for patient care is defined at many levels, ranging from federal law to the rules of an individual healthcare facility. Healthcare professionals need to know all relevant laws and how to inform patients of their rights while undergoing medical treatment.

What will you learn in this unit?

- Discuss the legal framework of the health care occupations, including scope-of-practice legislation
- Recognize practices that could result in malpractice, liability, negligence, abandonment, false imprisonment, and fraud
- Identify standards of the Health Insurance Portability and Accountability Act (HIPAA)
- Explain the Patient's Bill of Rights
- Describe advance directives

UNIT 3 Assignments	
Assignment	Type
Unit 3 Critical Thinking Questions	Homework
Unit 3 Lab	Homework
Unit 3 Activity	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Healthcare Workers' Responsibilities in the Workplace

This unit explores the laws designed to protect employees in health care, including their right to a safe workplace free of harassment. At the same time, employees in health care need to be particularly mindful of the professional ethics that define how they perform their duties. Those in health care will face a variety of ethical issues in the course of their work since life or death choices are part of the job. Legal and ethical obligations work together to provide guidelines for those in the field to effectively care for patients. These ethics also help shape employee

behavior, particularly in such sensitive areas as the handling of controlled substances, where accountability is key.

What will you learn in this unit?

- Explain the laws governing harassment, labor, and employment
- Differentiate between legal and ethical issues in health care
- Recognize and learn how to report illegal or unethical practices of health care workers
- Identify and compare personal, professional, and organizational ethics
- Distinguish among the five schedules of controlled substances

UNIT 4 Assignments	
Assignment	Type
Unit 4 Critical Thinking Questions	Homework
Unit 4 Lab	Homework
Unit 4 Discussion 1	Discussion
Unit 4 Discussion 2	Discussion
Unit 4 Quiz	Quiz

Unit 5: Wellness

This unit explores the principle of wellness and what it takes to be physically and mentally healthy. Regular screening and examinations are an essential part of the equation, as is attention to diet and exercise. These health habits make a difference over the course of a lifetime. Avoiding high-risk behavior—such as smoking, consuming alcohol, and taking illegal drugs—also makes for a longer and healthier life. Managing stress, even in extreme circumstances, such as after the death of a loved one, is also an important skill. When individuals take these steps to maintain wellness, they are paving the way for a long and healthy life. In addition to traditional medical practice, for an increasing number of Americans, personal wellness depends on using alternative medicine to promote health and wellness.

What will you learn in this unit?

- Describe strategies for prevention of diseases, including health screenings and examinations

Pennwood Cyber Charter School Application

- Discuss the adverse effects of the use of alcohol, tobacco, and both legal and illegal drugs on the human body, and apply safety practices related to these and other high-risk behaviors
- Explain the basic concepts of positive self-image, wellness, and stress
- Develop a wellness and stress-control plan that can be used in personal and professional life
- Recognize the steps in the grief process

Health Science 2 Midterm Exam

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first five units in this course (Note: You will be able to open this exam only one time.)

MIDTERM Assignments	
Assignment	Type
Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 6: Workplace Safety

Pennwood Cyber Charter School Application

This unit explores the many safety practices put into place by the Occupational Safety and Health Administration (OSHA) and the Centers for Disease Control (CDC) to protect those working in health care on the job. Safety comes through proper training on managing common hazards in the workplace, such as working with chemicals and moving heavy objects or patients. Creating a safe environment is not just for employees; health care workers need to keep their own, their coworkers', and their patients' safety in mind as well. Making sure that they avoid common medical errors and follow recommended guideline for identifying patients help make patients safer while they are in medical facilities. Guidelines for moving patients also benefit employees and patients since they eliminate the chance of injury for both. In the event of an emergency, health care workers need to be able to take care of themselves and their patients, so knowing emergency procedures is also part of a successful career in the health sciences.

What will you learn in this unit?

- Recognize safe and unsafe working conditions and know how to report safety hazards
- Identify and describe methods in medical error reduction and prevention in various health care settings
- Follow Materials Data Safety sheets (MSDS) and comply with safety signs, symbols, and labels
- Demonstrate proper body mechanics and ergonomics
- Implement fire, safety, disaster, and evacuation procedures

UNIT 6 Assignments	
Assignment	Type
Unit 6 Critical Thinking Questions	Homework
Unit 6 Lab	Homework
Unit 6 Discussion 1	Discussion
Unit 6 Discussion 2	Discussion
Unit 6 Quiz	Quiz

Unit 7: Emergency Care and Infection Control

This unit explores the basic procedures for administering first aid and when it is appropriate to offer emergency treatment to a stranger in public. It also defines the body's vital signs and provides basic instructions for taking and recording them. Understanding the role of microbes

and how they move through the environment allows those in health care to limit their spread through sterilization processes, hand-washing, and appropriate disposal of biohazardous materials. When these steps are taken, the environment is safer for everyone. When problems emerge in a health care setting, turning to root-cause analysis offers valuable insight into the core issues creating the problems. Only when these are identified can productive solutions be put in place.

What will you learn in this unit?

- Describe legal parameters relating to the administration of emergency care
- Monitor and record vital signs
- Define principles of infection control, including standard and transmission-based precautions
- Demonstrate knowledge of medical asepsis and practice procedures, such as hand-washing and isolation
- Explain and apply the theory of root-cause analysis

UNIT 7 Assignments	
Assignment	Type
Unit 7 Critical Thinking Questions	Homework
Unit 7 Lab	Homework
Unit 7 Activity	Homework
Unit 7 Discussion 1	Discussion
Unit 7 Discussion 2	Discussion
Unit 7 Quiz	Quiz

Unit 8: Technology in Healthcare and Medical Math

This unit explores the role of technology in health care, particularly the kinds of computers and medical devices that health care professionals use to perform the basic duties of their jobs. Computers are used for everything, from recording information to diagnosing medical problems, so those working in health care need to know how to use them effectively. One of the most common uses of technology is for communication, whether it's researchers sharing medical breakthroughs around the world or patients communicating more effectively with their doctors.

As valuable as technology is, those in health care still need to use their basic math skills.

Understanding basic principles, like ratios or how to convert pounds to kilograms, ensures that medical professionals have the skills that they need to get the job done.

What will you learn in this unit?

- Describe technology applications in health care
- Measure time, temperature, distance, capacity, and mass/weight
- Evaluate data and draw conclusions
- Construct viable arguments and critique the reasoning of others
- Organize and communicate the results obtained by observation and experimentation

UNIT 8 Assignments	
Assignment	Type
Unit 8 Critical Thinking Questions	Homework
Unit 8 Lab	Homework
Unit 8 Activity	Homework
Unit 8 Discussion 1	Discussion
Unit 8 Discussion 2	Discussion
Unit 8 Quiz	Quiz

Unit 9: Blood-Borne Illnesses

This unit examines the most common blood-borne illnesses, including HIV/AIDS, and hepatitis B and C. Understanding how these viruses are transmitted is one of the most important steps in preventing their spread. Specific behaviors encourage the spread of these diseases, and health care professionals are obligated to educate patients about what they need to do to reduce risk. In addition, specific processes must be followed when testing patients for blood-borne illnesses. Because these diseases pose a risk to health care workers, they also need to know how to protect themselves and the actions to take should they be in danger of infection.

What will you learn in this unit?

- Demonstrate knowledge of the legal aspects of HIV/AIDS, including testing

Pennwood Cyber Charter School Application

- Identify community resources and services available to individuals with diseases caused by blood-borne pathogens
- Recognize at-risk behaviors that promote the spread of diseases caused by blood-borne pathogens, and the public health education necessary to combat the spread of these diseases
- Apply infection control techniques designed to prevent the spread of diseases caused by blood-borne pathogens to the care of all patients following CDC guidelines
- Recognize emerging diseases and disorders

UNIT 9 Assignments	
Assignment	Type
Unit 9 Critical Thinking Questions	Homework
Unit 9 Lab	Homework
Unit 9 Activity	Homework
Unit 9 Discussion 1	Discussion
Unit 9 Discussion 2	Discussion
Unit 9 Quiz	Quiz

Unit 10: Getting a Job in the Healthcare Industry

This unit explores expectations of professional conduct in the health care industry, including personal qualities of health care workers and attention to personal presentation. It also emphasizes the importance of teamwork and the components of effective leadership. You will get an overview of the multiple career paths available in health care and learn the process of looking and applying for a job. This includes an overview of the education and credentialing requirements in health care and how to navigate the application process.

What will you learn in this unit?

- Demonstrate the personal traits or attitudes desirable in a member of the health care team
- Discuss levels of education; credentialing requirements, including licensure and certification; employment opportunities; workplace environments; and career growth potential
- Compare careers within the health science career pathways (diagnostic services, therapeutic services, health informatics, support services, biotechnology research and development)
- Develop a job-specific résumé

- Identify characteristics of effective teams

Health Science 2 Final Exam

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from units six to ten in this course – the last five units. (Note: You will be able to open this exam only one time.)

FINAL Assignments	
Assignment	Type
Final Exam	Exam
Final Exam Discussion	Discussion

What you will learn in this course

Health Science: Public Health

What is public health? Who decides which diseases get funding and which do not? What are the reasons for health inequality? Study both infectious and non-communicable diseases as well as learn how we conquer these on a community and global level through various methods, including proper hygiene, sanitation, and nutrition. Explore the role of worldwide current and future technologies and the ethics and governance of health on a global scale, and discover unique career opportunities you can pursue to make a difference.

Field Experience Project (Optional)

Some states require field experience, and this course includes a field experience project. Check with your school's administrator about how to complete this project. Recommended materials for the field experience appear below. Schools are responsible for overseeing and assessing this experience.

Pennwood Cyber Charter School Application

- Transportation to and from field experience
- Proper attire for chosen field experience
- Notebook or clipboard with loose-leaf paper
- Audio recording app (optional)
- Landline or cell phone to make phone calls

Unit 1: What is Global Health?

Global Health: Those two words are large enough on their own, but together, they create a wide, almost-impossible scope for a healthcare worker. How can one person ever hope to care for the entire world? Fortunately, it isn't up to individuals working alone; this task requires that national and regional healthcare systems work together for the improvement of everyone's health. It's easy enough now for people to pack up and travel across the planet; and diseases do the same thing. Only through coordination and cooperation can we hope to offer quality health care to everyone.

What will you learn in this unit?

- Describe an epidemiologist's contributions to public health
- Assess the world's health through data analysis
- Explain how the Sustainable Development Goals and global health are related
- Analyze a country's response to a disease outbreak and determine if their health system is sustainable

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Activity	Activity
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Why So Unequal?

Different countries and regions have different burdens of disease, and even within the same country or neighborhood, the health of individual people varies widely. Why are there such great variances in personal health? What causes them? While some of these differences are influenced by biological distinctions, many are a byproduct of sociological systems humans have created. To understand why health, access to health care, and motivation for treatment varies across the globe, we have to look more closely at the systems that are creating these differences.

What will you learn in this unit?

- Explain how inequities arise when groups move from norms into institutionalized systems
- Analyze historical global healthcare models against the institutionalization of racism
- Describe how the social determinants of health care have as great an impact on personal health as biological determinants
- Give examples of inequity in the US healthcare system

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity	Activity
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Who's in Charge?

Once countries accept that they are responsible for providing health care to their residents, they have to decide *how* they will provide it and *who* will pay for it. Healthcare systems are the result of these decisions, and they vary greatly from country to country. Everyone wants access to quality health care without great risk to their savings account, but some health-system models are friendlier to the pocketbook than others. Comparing the different systems of countries gives a clear view of national priorities and helps us to appreciate their concerns.

What will you learn in this unit?

- List the actors in a healthcare system and describe their roles
- Describe the four healthcare system models, giving the advantages and priorities of each
- Analyze how differing priorities around the principles of healthcare systems can result in inequity
- Understand how the United States healthcare system compares to other countries

UNIT 3 Assignments	
Assignment	Type
Unit 3 Critical Thinking Questions	Homework
Unit 3 Lab	Homework
Unit 3 Activity	Activity
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Location, Location, Location

Where you are matters to your health. Your location on this planet—from the country you live in, down to the nitty-gritty of what part of your city you live in, to where you go to work or school, and how you travel to get there—all impact your health to a degree. While biological and social factors have stronger, more immediate, impacts on a person’s health, we can’t leave out an environmental analysis because, like it or not, we are one with our environment, in sickness and in health.

What will you learn in this unit?

- Give examples of environmental health concerns at the household, workplace, community/regional, and global levels
- Describe how environmental health concerns are magnified as you move up the scale from the household level to the global level
- Analyze your immediate environment for environmental health concerns
- Offer steps someone could take to protect themselves from common household or workplace environmental concerns

UNIT 4 Assignments

Assignment	Type
Unit 4 Critical Thinking Questions	Homework
Unit 4 Lab	Homework
Unit 4 Activity	Activity
Unit 4 Discussion 1	Discussion
Unit 4 Discussion 2	Discussion
Unit 4 Quiz	Quiz

Unit 5: The Big Killers: Infectious Diseases

Infectious diseases really play the bad guys in the global health scenario. They are caused by pathogens invading our space and making us sick. This means that they are completely avoidable, if we could only isolate ourselves from all possible infectious materials and organisms. The problem is that we are social people; we interact. And as we interact, we exchange all kinds of things, from the visible to the invisible. One would hope that if we could just put some really good laws and public service announcements in place, we could rid the world of infectious disease. Too bad global health isn't as easy as that.

What will you learn in this unit?

- Define and use epidemiological terms related to disease transmission
- Describe the different ways malaria, HIV/AIDS, and tuberculosis are transmitted
- Analyze the efficacy of various control methods used for infectious diseases
- Explain the challenges related to global eradication of malaria, HIV/AIDS, and tuberculosis

UNIT 5 Assignments

Assignment	Type
Unit 5 Critical Thinking Questions	Homework

Unit 5 Activity	Activity

Unit 5 Discussion 1	Discussion
Unit 5 Discussion 2	Discussion
Unit 5 Quiz	Quiz

Unit 6: The Big Killers: Noncommunicable Diseases

There is a whole other category of diseases that are not passed from person to person.

Noncommunicable diseases, such as heart disease, cancer, and diabetes, are often the delayed result of a number of preventable lifestyle choices. Though they used to be slow-moving and would show up in late adulthood, noncommunicable diseases are taking over as the major causes of death worldwide and are affecting younger and younger people. To understand these trends, we have to look at how economic forces and other motivating factors have become obstacles to healthy, lower-risk lifestyles.

What will you learn in this unit?

- Explain how noncommunicable diseases differ from infectious diseases in the way someone contracts the disease, and in their control and prevention options
- Describe how noncommunicable diseases are the result of personal lifestyle choices that are influenced by a number of societal factors
- List the steps for first-aid treatment for heart attacks, seizures, diabetic reactions, and stroke
- Reason why mental health must be given the same status as physical health in a patient’s prevention and treatment plan

Midterm Discussion	Discussion

Unit 7: Fight Back: WASH

Are you itching to see what is being done about all these global health problems? A huge focus in global health is on providing universal access to clean water and safe sanitation. Through a combination of education, behavior modification, and infrastructure creation projects, households and communities experience a significant drop in infectious disease incidence. And when people are less sick, they have more energy to improve their lives, which is an all-around win for households and societies in general.

What will you learn in this unit?

- Describe the challenges associated with changing people’s behavior
- Analyze the success of WASH projects in different countries
- Explain how WASH projects scale up from the household to the global level
- Suggest a water or sanitation project that would work best in a community, given the environmental and cultural context

UNIT 7 Assignments	
Assignment	Type
Unit 7 Critical Thinking Questions	Homework
Unit 7 Lab	Homework

Unit 7 Activity	Activity
Unit 7 Discussion 1	Discussion
Unit 7 Discussion 2	Discussion
Unit 7 Quiz	Quiz

Unit 8: Fight Back: Nutrition

No matter whether you live in a place with no farm stands nearby or right next to a giant supermarket, a primary human concern is finding something to eat. Worldwide, people are struggling with eating well. Some people cannot get access to foods that provide enough energy and nutrients to keep them strong and healthy, so they lose what little reserves their bodies have. Other people have plenty of food options and select foods that do not supply the right kind of energy and nutrients, so instead of gaining muscle and strength, they gain fat. Proper eating habits directly contribute to personal health; therefore, food quality, food access, and food systems are important considerations in global health care.

What will you learn in this unit?

- Explain the different categories and signs of malnutrition
- Differentiate between macronutrients and micronutrients, giving examples of the roles they play in physical health
- Give examples of how looking at food production from a food systems perspective puts an emphasis on sustainability
- Describe how a conflict or other emergency situation creates health challenges

UNIT 8 Assignments

Unit 8 Activity	Activity
Unit 8 Discussion 1	Discussion
Unit 8 Discussion 2	Discussion
Unit 8 Quiz	Quiz

Unit 9: Fight Back: Maternal and Child Health

Women’s bodies can do amazing things. They can become a home for a fetus to develop within during pregnancy. Afterward, like other mammals, women’s milk becomes a food source for their young. Each step of an infant’s developmental process up until they are weaned off breastmilk is directly influenced by the health of the mother. Even after weaning, young children are utterly dependent on their caretakers to ensure that they have the things they need to be healthy and strong. From a global health perspective, taking care of mothers and children at this vulnerable time of pregnancy and early childhood helps to ensure the overall survival and flourishing of humans.

What will you learn in this unit?

- Summarize how women’s empowerment affects global health
- Give examples of specific moments in a woman’s life where her empowerment will lead to better health outcomes for herself and her family
- Describe several national food-fortification efforts, including their challenges and their outcomes
- Explain why cultural sensitivity is a key skill for a healthcare worker

Unit 10: Global Health Innovation

Whether you’re a chef, a mechanic, an Olympic athlete, or a pilot, having the proper tools makes your work a whole lot easier, not to mention safer. And better tools definitely yield better results. Health care is no different. Healthcare professionals need proper devices to diagnose and treat their

patients, not to mention research better methods of performing their services. Limit a healthcare professional’s tools, and you lose lives. Technology can do a lot for improving global health.

What will you learn in this unit?

- Identify the uses for imaging devices common to high-income countries’ radiology departments
- List and define the five categories of global healthcare innovation
- Give an example of an innovation for each of the five categories
- Assess a global healthcare project to see if it is well rounded and culturally appropriate

UNIT 10 Assignments	
Assignment	Type
Unit 10 Critical Thinking Questions	Homework
Unit 10 Lab	Homework
Unit 10 Activity	Activity
Unit 10 Discussion 1	Discussion
Unit 10 Discussion 2	Discussion
Unit 10 Quiz	Quiz

Unit 11: Trial and Error: Clinical Trials and Ethics

As a medical researcher and innovator, you create clinical trials to test your ideas. These studies might lead to new drugs, devices, or other therapeutics that improve people’s lives. That’s the positive side of research. But before a drug makes it onto the market, a lot of decisions are made about what disease to focus on and how to create and test the drug. These decisions are part of clinical trial planning and must follow certain guidelines to make sure everyone is being treated fairly and with respect.

What will you learn in this unit?

- Give examples of quantitative research methods and their benefits
- Describe which moral framework related to health care is the most similar to your own
- Explain why ethics must be a part of health care and research studies
- Judge whether a clinical trial was performed ethically or not

UNIT 11 Assignments

Unit 11 Critical Thinking Questions	Homework
Unit 11 Lab	Homework
Unit 11 Activity	Activity
Unit 11 Discussion 1	Discussion
Unit 11 Discussion 2	Discussion
Unit 11 Quiz	Quiz

Unit 12: Reaching Global Health

You've got the keys to the castle now! With the Sustainable Development Goals in your pocket, and all the case studies you've read from around the world, not to mention the developing list of careers contributing to different aspects of health care and the analytical framework to use when looking at health-related interventions, you've got all that you need to take the next step and become a global-health worker.

What will you learn in this unit?

- Give examples of content you've learned in this course that demonstrate each of the core competencies for global health
- Summarize what different healthcare professions contribute to global health and the SDGs
- Identify health-related volunteer programs or fellowship opportunities that interest you
- Explain the personal steps you can take to be healthy

Unit 12 Quiz	Quiz

Health Science Public Health Final Exam

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from units seven to twelve in this course – the last six units.
(Note: You will be able to open this exam only one time.)

Final Exam Discussion	Discussion

Home Life

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will choose from a selection of project-based activities designed to develop skills for daily living. Topics will include a variety of activities appropriate for all grade levels. Each project will include a portfolio assignment.

Home Life has been designed to allow families with multiple students to work together on a series of home-based projects. These include cooking, crafts, sewing, home maintenance, family outings, and genealogy.

Each project will be comprised of approximately four to six two-hour sessions that may be completed on a weekly basis or chunked together in a weekend or two. To receive credit, students must complete five, choosing the activities that best suit their family situation and interests.

This course will be graded by completion. Students must choose and complete at least five projects from a variety of topics to receive credit for this course. Students can submit more than five projects but they are only required to submit five. Projects will be submitted through the portfolio drop boxes at the end of each lesson. These projects are meant to be enjoyable activities that provide an opportunity for hands-on learning and valuable family time!

Course Outline:

1. **In the Kitchen**
 1. Chocolate Asphalt
 2. Pizza Pie
 3. Baking
 4. Culinary Creatures
2. **In the Garage**
 1. Home Maintenance
 2. Car Maintenance
 3. Bird House
 4. Building Bridges
3. **In the Store**
 1. Money Sense
 2. Building a Business: Lemonade Stand

4. In the Garden

1. Herb Garden
2. My Own Secret Garden
3. What It Means to Be Green
4. Orienteering
5. Backyard Ecosystem
6. Stargazing

5. In the Family

1. Family Outing
2. Genealogy
3. The Name of the Game
4. Making Music
5. Camp Craft
 - Understand how to plan an overnight camping trip
 - Identify essential gear
 - Understand the concept of “Leave-No-Trace” camping
 - Identify potentially harmful plants, animals, and insects
6. Interactive Art
 - Create original artwork
 - Analyze techniques by famous artists and translate the artists’ techniques into original artwork
 - Recognize and create post-impressionist, abstract expressionist, and Fauvism inspired artwork
7. Pet Care
 - Identify different types of pets, both common and uncommon
 - Summarize the responsibilities and costs involved in owning a pet
 - Apply good pet-care habits and practices to the care of your own pet
 - Create a photo journal displaying your pet-care knowledge and skills
 - Choose a pet that is right for you based upon your family’s needs and ability to meet the pet’s needs
8. Photography
 - Explore the history of photography
 - Understand and employ techniques that produce appealing photographs
9. Textiles and Clothing
 - Explain the history and purpose of textiles
 - Describe differences in fabric types
 - Compare how fashion changed during several eras
 - Design and implement patterns using multiple techniques
 - Create a finished product using textiles

Introduction to Computer Applications

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Students progress to more sophisticated work in this course, including the use of electronic media and software to apply academic concepts in the creation of meaningful organizers, projects, and presentations. Students locate, retrieve, and evaluate data in order to construct and analyze databases. Students produce presentations on Internet safety, online predators, and cyberbullying. At the end of the course, students become effective communicators and collaborators as they plan, evaluate, and synthesize research emphasizing current issues with technology.

Course Outline

1. Introduction

1. Typing Skills

- Utilize keys from the home row, and rows above and below the home row to type individual letters and words
- Identify spelling errors with the opportunity to self-correct

2. Hardware, Components, and Operating Systems

- Compare and contrast input, output, processing, and data storage devices
- Describe computer hardware, components, and system
- Identify personal software programs
- Create a course folder structure using subfolders to organize and manage files

3. Computer Troubleshooting

- Examine troubleshooting techniques related to everyday computer use
- Recommend solutions to various computer problems
- Identify appropriate resolutions to common computer problems

2. Microsoft® Word

1. Verbs in the Active and Passive Voice

- Academic: Apply both active and passive voice in writing
- Academic: Construct a news article with proper paragraph alignment and indentation

- Technology: Compose a typed news article using the Tab key to indent text or apply double spacing between paragraphs using the Enter key
- 2. Verbs Expressing Mood
 - Academic: Identify and analyze indicative, imperative, and subjunctive verb moods in context
 - Technology: Demonstrate how to bold, italicize, and underline text using buttons and menus available in the Home ribbon
 - Technology: Apply the same font face throughout a document
- 3. Characters, Setting, and Plot
 - Academic: Identify parts of a story
 - Academic: Outline and summarize the characters, setting, and plot of a story
 - Technology: Organize the structure of a story within a document by inserting columns and column breaks to add headings
- 4. Thematic Poetry
 - Academic: Illustrate the rhyme scheme of a favorite song
 - Academic: Identify and explain the theme and rhyme scheme of poetry
 - Technology: Demonstrate inserting a table to construct and display the rhyme scheme of poetry
- 5. Technology for Searching: Cyberbullying
 - Academic: Locate articles in a database using specific search parameters
 - Technology: Construct a search log to cite works by inserting a table and hyperlinks
 - Technology: Apply font formatting to identify key information gained in research
 - Technology: Conduct online database searches using Boolean operators
- 6. Technology for Publishing: Cyberbullying
 - Academic: Design an informative or explanatory text about cyberbullying
 - Academic: Identify important information to educate others about cyberbullying
 - Technology: Utilize multimedia sources to insert images and captions
 - Technology: Demonstrate inserting a footnote to cite sources
 - Technology: Demonstrate correcting grammatical and punctuation errors using the Spelling and Grammar tool

3. Microsoft® PowerPoint

1. Natural Disasters
 - Academic: Identify several types of natural disasters
 - Academic: Conduct in-depth research into one natural disaster
 - Technology: Utilize Microsoft® PowerPoint to create an informative presentation about a natural disaster
 - Technology: Integrate Action buttons, images, and text boxes to create multidimensional slides in a presentation about a natural disaster
2. Today in History
 - Academic: Outline historical events in chronological order
 - Academic: Utilize visual aids to enhance presentations
 - Technology: Create a historical timeline, utilizing transitions between slides in Microsoft® PowerPoint
 - Technology: Incorporate animations into a timeline

3. Historical Points of View
 - Academic: Explore the history of the women’s suffrage movement in the United States of America
 - Academic: Examine political cartoons to understand differences in opinion
 - Technology: Create a Microsoft® PowerPoint presentation of the women’s suffrage movement using the Photo Album feature
 - Technology: Provide analysis of images from the women’s suffrage era in a digital presentation
4. Progressive Era
 - Academic: Identify key issues and themes of the Progressive Era
 - Academic: Describe aspects of the Progressive Era utilizing a concept map
 - Technology: Create a concept map by inserting and formatting a SmartArt graphic in a Microsoft® PowerPoint presentation
5. Technology for Publishing: Progressive Era
 - Academic: Analyze and research reforms of the Progressive Era
 - Academic: Create a concept map based on research about a Progressive Era topic
 - Technology: Search for historical prints and photographs using the Library of Congress database
 - Technology: Construct a presentation about the Progressive Era incorporating slide transitions and animations

4. Microsoft® Excel

1. Scatter Plots
 - Academic: Create a scatter plot in order to visualize relationships within data
 - Academic: Identify and name ordered pairs on a scatter plot using the x- and y-axes
 - Technology: Examine data organized in columns and rows in Microsoft Excel
 - Technology: Build a scatter plot diagram in Microsoft Excel using given coordinates
 - Technology: Interchange the x- and y-axes of a scatter plot in Microsoft Excel
2. Scatter Plots: Comparing Variables
 - Academic: Create and analyze data in scatter plot diagrams
 - Academic: Investigate common trends within scatter plot diagrams
 - Technology: Analyze a scatter plot diagram
 - Technology: Utilize Microsoft® Excel to create a data table
3. Scatter Plots: Trend Lines
 - Academic: Explore the relationship between a country’s land area and population
 - Academic: Identify and describe reasons for outliers along a trend line
 - Technology: Create a digital scatter plot to analyze trends
 - Technology: Insert a trend line into a scatter plot to determine negative or positive correlation
4. Creating a Database
 - Academic: Collect data in order to create a digital database
 - Technology: Construct a database in Microsoft® Excel by entering data into fields and records
 - Technology: Define and understand the purpose of fields (cells) and records (rows) in a database
 - Technology: Reorganize and analyze data in a database using the sorting and filtering options
5. Creating a Pivot Table
 - Academic: Utilize an existing database to support further data analysis
 - Technology: Create and modify a pivot table to analyze data

- Technology: Format data to display percentages and currency using the Format Cells window
6. Frequencies
 - Academic: Calculate frequencies within a set of data
 - Academic: Interpret data trends using a histogram
 - Technology: Create a histogram using the column chart option in Microsoft® Excel
 7. Data Analysis
 - Academic: Create and conduct an original survey
 - Academic: Interpret survey data using tools in Microsoft® Excel
 - Technology: Create and analyze a scatter plot using original data
 - Technology: Enter original data into a worksheet in Microsoft Excel
- 5. Study Strategies**
1. Tools for Organization and Time Management
 - Identify time management skills
 - Create a planning tool to manage time
 - Identify time management areas of improvement
 2. Idea Organization Using Graphic Organizers
 - Evaluate the usefulness of a digital graphic organizer
 - Analyze idea organization for a Google Earth tour by exploring the tool in terms of your hometown
 3. Idea Organization Using Memory Aids
 - Generate memory aids for academic concepts
 - Differentiate between various types of memory aids
 4. Learning Through Games and Simulations
 - Examine personal learning gain through an online science game
 - Assess the value of online games and simulations for learning
 5. Study Strategies
 - Identify current study habits
 - Construct a presentation on study strategies
 6. Test-Taking Strategies
 - Examine test-taking strategies for five types of tests
 - Prepare concise summaries of test-taking strategies
 7. Goal Setting
 - Identify objectives to reach educational or career goals
 - Devise a goal-planning presentation based on academic study skills
- 6. Internet Safety**
1. Acceptable Use Policy
 - Identify important features of an Acceptable Use Policy
 - Review the school's Acceptable Use Policy
 2. Proactive Protection Online
 - Identify the basic risks associated with Internet use

- Illustrate knowledge of a chosen Internet security topic
 - Create a presentation conveying an Internet security topic
 - Develop an understanding that those met online are strangers
3. Cybersafety and Photo Management
 - Identify appropriate behavior for photo management on the Internet
 - Recommend alternative actions for cybersafety scenarios
 4. Your Digital Footprint
 - Differentiate between active and passive digital footprints
 - Identify reasons why digital footprints matter
 - Create an informative brochure about digital footprints
 5. Cyberbullying
 - Gain a basic understanding of cyberbullying through reading and discussion
 - Summarize theme and key learning points from a story in a Microsoft® PowerPoint presentation
 - Discuss strategies for coping with an online bullying situation
 6. Computer and Internet Health Issues
 - Explore health issues that result from prolonged computer usage
 - Identify strategies to maintain health and body while using digital technologies
 7. Media Literacy
 - Define media literacy
 - Identify sources of bias in media
 - Create a media product to promote media literacy
 8. The Power of Media
 - Identify media sources
 - Define and assess public service announcements (PSAs)
 - Understand the power the media have in changing perceptions and behavior
 - Utilize media to put a message out
 9. Predator Awareness
 - Identify online behavior that is unsafe, demonstrating an understanding of how to avoid online predators
 - Understand the grooming process as it relates to online predators
 - Promote Internet usage related to predator awareness
 10. Cyber Community Citizenship
 - Define communities in both the physical and virtual worlds
 - Evaluate website safety and appropriateness
 11. Creation and Copyright
 - Categorize tangible and intellectual property
 - Develop an understanding of online piracy
 - Explain the importance of obeying copyright laws
 12. Music Makers: Scripts
 - Recognize terminology related to copyrights in the music industry
 - Describe the effects of copyright laws on a group of people

13. Plagiarism

- Define plagiarism and paraphrase
- Illustrate ways to avoid plagiarism

14. Fair Use

- Identify fair use and recommend actions for its application
- Create a poster of tips for copyright rules and fair-use exceptions

15. Integrated Literacy

- Review security concepts related to the online community
- Plan and prepare the components of an educational story
- Write a story relating online safety measures to a younger audience

7. Digital Publishing

1. Exploring a Topic

- Investigate the impact that technology has had on education
- Utilize Boolean search operators to conduct research

2. Investigating Design

- Identify and define elements of design
- Analyze how the design element was used to create a logo
- Apply various design elements within a digital project

3. Creating a Movie

- Design an informative presentation using movie software to communicate the impact of technology on education

4. Collaborating Online

- Evaluate and provide feedback on student work

5. Evaluating the Product

- Conduct a self-assessment of a project based on the criteria presented in a rubric

Introduction to Drawing

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Learning to draw is like learning any new skill: it takes practice, practice, practice. Introduction to Drawing is a one-semester course for beginning and intermediate artists that provides training in the application of artistic processes and skills. In this course, you will learn the basics of line, contour, shading, texture, perspective, composition, and action drawing. You will examine artwork and demonstrate your newly learned skills by creating several original works of art and compiling a portfolio of your artwork.

Course Outline

1. **Materials and Techniques**

- Identify the elements of art
- Identify tools used for pencil drawing
- Use a variety of pencil drawing techniques

2. **Training Your Eye**

- Differentiate contour drawing and outline
- Identify why careful observation so important when learning to draw
- Identify the tools and processes can you use to draw more accurately
- Compare and contrast the processes of drawing with and without a grid

3. **Line and Shape**

- Identify the characteristics of line
- Compare and contrast organic and geometric lines
- Identify implied lines
- Identify the characteristics of shape
- Identify the ways in which artists use shapes to organize their drawings or paintings

4. **Shading and Texture**

- Identify how value and shading affect drawing
- Differentiate natural and artificial light
- Differentiate actual and visual texture
- Identify the methods of chiaroscuro and tenebrism

5. **Introduction to Drawing Midterm Exam**

- Review the concepts you learned up to this point in this course
- Take a test to assess your understanding of the course content

6. Perspective

- Identify how linear perspective has on a drawing
- Differentiate one- and two-point perspective
- Identify atmospheric perspective
- Identify the purpose of the vanishing point in linear perspective

7. Proportion

- Identify how golden mean is applied in art and architecture
- Identify the role proportion plays in the creation of artwork
- Identify how the rule of 8 applies to the placement of features on the face
- Identify where the proportions of the golden mean are found in nature

8. Composition

- Differentiate the elements and principles of art
- Identify how artists use the principles of art to communicate ideas in their artwork
- Identify the purpose of thumbnail sketches in composition
- Apply the principles of art to your drawing
- Differentiate formal and informal compositions

9. Drawing Gestures and Action

- Differentiate gesture and action drawing
- Identify the types of line used in gesture and action drawing
- Identify the goals of gesture and action drawing

10. Art Evaluation and Careers

- Identify the four steps for evaluating a piece of artwork
- Describe how the elements and principles of art are used in a piece of artwork
- Interpret a piece of artwork to determine the author's purpose
- Judge a piece of artwork based on its subject, content, and composition

11. Introduction to Drawing Final Exam

- Review the concepts you learned in this course
- Take a test to assess your understanding of the course content

Introduction to Graphic Design A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Can people communicate without using words? Do different colors invoke different emotions? Can artists use various textures to communicate a range of ideas? Absolutely! Designed to develop an understanding and appreciation for design, the Introduction to Graphic Design A course teaches the student to interpret visual representations and to communicate his or her own ideas and information graphically. By raising the student's awareness of design, this intermediate-level course establishes a strong foundation in the basic principles of graphic design. This course, the first in a two-semester series, introduces the student to scenarios that can be solved by applying creative techniques that yield innovative and effective design solutions. Though the course is structured around computer-assisted graphic design, the student will examine other types of design as well. The student will also learn to use Inkscape, an image-editing program that is provided, and will create several design compositions using this program.

Understanding the history of any area of study is important to learning about and appreciating society today. In Introduction to Graphic Design B, the second course in a two-semester series, the student will be introduced to the history of design and how various design movements have contributed to the field of design. The student will get answers to questions such as "What role does design play in society?" and "How does the field of design relate to other facets of society?" Understanding where the field of design comes from will help the student to appreciate the aesthetics and purposes for design today. In addition, this course expands on foundational knowledge in the basic principles of graphic design. The student will learn to communicate visually through effective layout and interface design. The student will also be introduced to appropriate techniques for the evaluation of art and design. Though the course is structured around computer-assisted graphic design, the student will examine other types of design as well. The student will learn to use Inkscape, an image-editing program that is provided for him or her, and will create several design compositions using this program.

Course Outline

Introduction to Graphic Design A

1. **Image Editing Software**
 1. Inkscape Software
2. **What is Design?**
 1. A Definition of Design
 - Define design and differentiate design from art

- Identify the intentions of a visual design, and evaluate how well the design meets these intentions

Visual Literacy

- Define cognitive overload and explain how one might avoid it in the design process
- Describe the role design plays in problem solving
- Define visual literacy
- Explain how limitations on the design process might affect the final design

Design with a Purpose

- Explain how context comes into play in design
- Explain why it is important that designers prioritize their focus when working on a design
- List and describe the three main purposes of design

Career Opportunities in Graphic Design

- Define ergonomics and describe how important it is to the design process
- Examine career opportunities in the visual arts to determine requisite skills, qualifications, supply-and-demand, market location, and potential earnings
- Explain how the field of graphic design is beneficial to society

What is Design? Unit Test

Art Form and Media

Graphic Design Media

- Define artistic media
 - Differentiate between fine and applied arts
 - Describe how the use of technology in the field of graphic design has been significant
 - Describe the history of technologies that are used in graphic design
 - Recognize how design processes of the past have influenced the vocabulary of modern design

Technology and Safety in the Studio

- Determine ways to safely dispose of electronic waste
- Explore ways that technology can help the environment
- Recognize technology transfer
- Identify ways to ensure safety in the studio

Techniques

- Identify techniques that artists use that influence viewers' responses to a piece of artwork

Copyright

- Define copyright
- Describe in your own words the reasons behind copyright laws
- Identify examples of copyright infringement
- Identify the copyright status of a given work
- Name each Creative Commons license and describe what each license protects

Art Form and Media Unit Test

The Design Process

Designing for an Audience

- Define the audience of a given design project
- Explain what factors to consider during an audience analysis
- Identify the major factors that need to be addressed based on a given design project's audience

The Design Process

- Describe how attitude affects creativity

- List the steps in the design process

Phase 1: Using Your Imagination

- Describe the two phases of the design process
- Describe the creative strategies of brainstorming, reverse brainstorming, free association, connecting ideas, and perspectives
- Describe how brainstorming, reverse brainstorming, free association, connecting ideas, and perspectives can be effective creative strategies
- Use the creative strategies of brainstorming, reverse brainstorming, free association, connecting ideas, and perspectives

Phase 2: Being Practical

- List and describe the four steps of phase two of the design process

Designing with Technology

- Explain the purpose of a prototype
- Describe what a recursive process is and how it is beneficial in a design project
- Describe the need and/or purpose behind a given design project
- Describe the role constraints and trade-offs play in the design process
- List the steps of the design process

The Design Process Unit Test

Elements of Design

Line

- Describe the messages that various types of lines can relay
- Describe the purposes of lines in design
- List and define the basic elements of design
- Use one or more lines in a design to communicate a message

Shape

- Describe the purposes of shapes in design
- Differentiate shape and form
- Differentiate figure and ground and identify how positive and negative space can be used in design
- Explain the potential connotations of any given shape
- Use one or more shapes in a design to communicate a message

Space

- Describe ways in which white space affects a design
- Describe ways to create nonlinear perspective in a two-dimensional design
- Differentiate linear, nonlinear, two-point, and three-point perspective
- Identify the vanishing point, horizon, and point of view in a design that uses linear perspective
- Use space in a design to communicate a message

Color

- Define value
- Describe each type of color scheme that is used in design
- Differentiate warm and cool colors
- Explain the potential connotations of any given color
- Explain the purpose of the color wheel
- Identify the complementary and tertiary colors of any given color
- List the primary and secondary colors

Texture

- Define texture
- Differentiate tactile and visual texture
- Explain how texture is used in design
- Explain the various factors a designer must consider when using texture

Type

- Define stroke, stem, x-height, baseline, ascender, descender, serif, sans serif, counter, point size, and ligature
- Describe evocative typography
- Describe the most generally accepted guidelines for the use of font in a design
- Explain how the choice of typeface can affect a design
- Explain why leading, kerning, and alignment are important in the design of text
- List and describe the seven basic families of type

Elements of Design Portfolio

- Use the elements of design to create a design

Elements of Design Unit Test

Principles of Design

Balance

- Differentiate near symmetry and perfect symmetry
- Differentiate symmetrical, asymmetrical, and radial balance
- Differentiate vertical and horizontal symmetry
- Explain how focal point is important in design
- Explain how various types of symmetry can be used to create balance in a design
- List and define the basic principles of design
- Use balance effectively in a visual design

Rhythm

- Differentiate regular, flowing, and progressive rhythm
- Explain how repetition, alternating patterns, gradation, and discord can be used to create rhythm in a design
- Use rhythm effectively in a visual design

Contrast

- Describe the diminuendo effect
- Describe the purposes of contrast in design
- Describe various ways to create contrast in a design
- Use contrast effectively in a visual design

Dominance

- Describe misplaced dominance
- Describe the purposes of dominance in design
- Describe the three levels of dominance in design
- Differentiate positive and negative space
- Explain why visual hierarchy is important in design
- Use dominance effectively in a visual design

Harmony

- Describe how continuance can be created in a visual design
- Explain how alignment can affect how the viewer perceives a design
- Explain the principles of proximity and similarity
- Use harmony effectively in a visual design

Principles of Design Unit Test

Final Project and Exam

Flag Design Final Project

- Use symbolism to communicate an idea
- Combine elements and principles of design appropriately in a piece of artwork

Graphic Design A Final Exam

Introduction to Graphic Design B

1. Image Editing Software

1. Inkscape Software
2. Exploring Inkscape

2. History of Graphic Design Part 1

1. Graphic Design Styles and Movements
 - Explain how design trends influenced later designers and thus their designs
 - Explain how historical events affected design styles during each movement
 - Explain why motifs are important
 - List the various design movements that occurred between 1850 and 2000

Victorian

- Explain how fashion, architecture, and packaging and marketing were influenced during the Victorian era
- Explain how the Victorian movement got its name
- Describe the characteristics of Victorian design
- Identify examples of Victorian design
- List some of the most famous Victorian designers

Arts and Crafts

- Explain the cultural shifts that led to the beginning of the Arts and Crafts movement
- Describe the characteristics of Arts and Crafts design
- List some of the most famous Arts and Crafts designers
- Identify examples of Arts and Crafts design

Art Nouveau

- Describe how the Art Nouveau movement got its name
- Describe the characteristics of Art Nouveau design
- Explain how Art Nouveau is a total style
- Identify examples of Art Nouveau design
- List some of the most famous Art Nouveau designers

Bauhaus

- Describe the decline of the Bauhaus movement
- Describe the characteristics of Bauhaus design
- Explain how the Bauhaus movement was influenced by the philosophy of the school after which it was named
- Identify examples of Bauhaus design
- List the most famous Bauhaus designers and their contributions to design

Art Deco

- Describe how the Art Deco movement got its name

- Describe the characteristics of Art Deco design
- Explain how Art Deco is a total style
- Identify examples of Art Deco design
- List some of the most famous Art Deco designers

Test: History of Graphic Design Part 1

History of Graphic Design Part 2

Doo-Wop

- Describe what events affected the Doo-Wop movement
- Describe the main characteristics of Doo-Wop design
- Describe which designers are best known from the Doo-Wop movement and why
- Identify examples of Doo-Wop design

International Typographic Style

- Describe the main characteristics of ITS
- Describe what led to the ITS movement
- Identify examples of ITS
- List which designers are best known from the ITS movement and why

Pop Art

- Describe the main characteristics of the Pop Art movement
- Explain what influenced and inspired the Pop Art movement
- Identify examples of Pop Art
- List which designers are best known for the Pop Art movement and why

Deconstructivism

- Describe the characteristics of Deconstructivism design
- Explain how the Deconstructivism movement got its start
- Identify examples of Deconstructivism
- List the most famous designers from the Deconstructivism movement

Digital Design

- Describe the typical characteristics of digital design
- Explain how the digital design movement got its start
- Explain what information graphics is and how it relates to digital design
- Identify examples of digital design
- List the most famous digital designers and information architects

Project: Historical Piece

- Create a design based upon an artistic movement

Test: History of Graphic Design Part 2

Layout

Layout

- Describe the importance of layout in design
- Describe the main purposes of a good layout
- Describe the purpose of a storyboard
- Explain why usability is important in design
- List the elements of a design that are typically described on a storyboard

Creating a Layout

- Describe how the audience of a design should be reflected in its layout
- Describe how the goal of a design should be reflected in its layout

- Describe how the topic of a design should be reflected in its layout

Balance, Hierarchy, and Consistency

- Describe the three levels of dominance
- Describe the various factors that affect a layout's balance
- Explain how dominance can be used to create hierarchy in a design
- Explain why consistency is important in the design of a layout
- List the steps for creating visual hierarchy

General Layout Guidelines

- Explain the Z-pattern and how it affects the design of a layout
- Explain the visual center of a layout
- Explain the rule of thirds
- Describe what factors to consider when laying out a design
- Identify the most appropriate alignment for a given image in a design

Type Layout

- Describe the factors to consider when choosing type attributes for a design
- Describe the importance of chunking
- Explain how designers use white space
- List and describe the various attributes of type
- Use the most appropriate spacing when designing type

Test: Layout

Designing for the Web

Interface Design

- Define interface and describe several examples
- Describe the various types of information, or navigation, structures and identify which navigation structure is most appropriate for a given situation
- Effectively communicate a message visually on-screen
- List and describe the seven considerations for web design
- List the most important usability factors to consider when designing for interaction

Navigation

- Describe the purpose of a site map
- Describe the purpose of breadcrumbs
- Explain how context affects the design of a navigation system
- Explain why it is so important to consider navigation in the design of an interface
- List and describe various navigation elements
- List and describe the five types of navigation
- List and describe various ways to mark a user's location on a website

Designing for the Web

- Differentiate between interface design considerations for online and local access applications
- List and describe the seven main factors to consider when designing for the web

Branding and Visual Identity

- Explain the importance of branding
- Identity elements of visual identity
- Analyze and evaluate the design of a website

Test: Designing for the Web

Final Project and Exam

Culminating Art Project

- Evaluate a piece of artwork from a gallery or museum using evaluation guidelines
- Evaluate your own artwork using evaluation guidelines

Graphic Design B Final Exam

What you will learn in this course

Medical Terminology 1a: Introduction

Learning the language is essential for careers in health science. Join word parts to form medical terms, associations within body systems, and better communicate with colleagues and patients. Build your proficiency and confidence with this course and prepare yourself for a career in health sciences.

Unit 1: Word Elements: Where it all Begins

Medical terminology is a language unique to a specialized field. To better understand medical terms, you need to first get to know the origin of words, how to dissect them, and how to build them. Part of this dissection and building process involves learning word parts and how to put those pieces together. In this unit we will learn prefixes, suffixes, and combining forms. We will also learn about origins of words that cannot be broken down using traditional methods. Additionally, we'll explore how some of these terms are abbreviated and cases in which these

abbreviations are not acceptable practice. So, let’s start putting the pieces of the puzzle together and learn more about this special language!

What will you learn in this unit?

- Describe the components making up a medical term and the process for defining a word using those components
- Explain uses for prefixes, suffixes, and combining forms
- Recognize commonly used prefixes, suffixes, and combining forms
- Identify common medical abbreviations as well as those on the Do Not Use List
- Describe the origin of an eponym and give examples of common eponyms

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Activity	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: The Building Blocks of the Body

The body is an amazing structure made up of many cells, tissues, organs, and systems. We can break down the way the body is built from the tiniest structure up to entire body systems. Taken as a whole, we then learn about body movement and organization of body structures. By studying the cavities, regions, and quadrants of body organization, we are able to locate organs and other body structures and, by using this organizational system, health care providers are better able to pinpoint conditions and accurately communicate with patients. Ready to become an expert in navigating and identifying these structures? Let’s get started!

What will you learn in this unit?

- Describe the building blocks of the body and how they are organized, from cell to system

Pennwood Cyber Charter School Application

- Define anatomic position and terms related to a change in that position
- Explain terms related to body movement and communicate body planes as related to anatomic position
- Explain the division of the body into cavities
- Describe the regions and quadrants of the abdomen and identify organs found in the different cavities, regions, and quadrants

UNIT 2 Assignments	
Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Move It: Understanding Body Movement

With so many body parts, we need to be able to describe exactly how each part moves. Medical terms relating to movement allow us to do just that! By exploring the world of body movement, we find different types of movement and different types of joints that make this happen. As part of this world, we'll learn abbreviations used commonly in medical documentation relating to these body parts and their movements. In addition, we'll discover the many career possibilities related to the movement of body parts. Ready? Let's get moving!

What will you learn in this unit?

- Define medical terms related to body movement
- Explain movements using medical terminology
- Describe types of joints found in the body
- Identify commonly used abbreviations related to movement
- Understand occupations related to body movements

UNIT 3 Assignments

Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Breathing Easy: The Respiratory System

Breathing is an essential part of health and body function. The organs of the respiratory system make up a complex tree-like structure that helps us breathe without even thinking about it. To be an effective healthcare provider we must be familiar with the medical terminology that refers to the diseases, conditions, treatments, and tests of this system. We also need to be able to write and translate abbreviations and terms when documenting about this system. Let's take a deep breath and explore this airy world!

What will you learn in this unit?

- Identify and describe the functions of the organs in the respiratory system
- Recognize prefixes, suffixes, and combining forms related to the respiratory system
- Describe diseases and conditions of the respiratory system
- Explain common treatments and tests used when evaluating conditions of the respiratory system
- Write and translate abbreviations used in medical documentation for respiratory conditions

UNIT 4 Assignments

Medical Terminology 1a Midterm Exam

- Review information acquired and mastered from this course up to this point.
- Take a course exam based on material from the first four units in this course (Note: You will be able to open this exam only one time.)

MIDTERM Assignments	
Assignment	Type
Midterm Exam	Exam
Midterm Discussion	Discussion

Unit 5: Going with the Flow: The Cardiovascular System

We feel our heart beat all the time, but what's the reason and what's it really doing? We'll now explore the cardiovascular system with its organs and find our answers! As we investigate the workings of this system, we'll learn the medical terms and word parts that describe different areas. As with any part of the body, things can go wrong. Our journey will take us through some of the conditions and diseases of this system, along with tools, tests, and treatments used in this world. Let's get our blood pumping!

What will you learn in this unit?

- Describe the organs of the cardiovascular system and their functions
- Recognize and use the prefixes, suffixes, and combining forms related to the cardiovascular system
- Identify common diseases and conditions of the cardiovascular system
- Explain tools, procedures, and tests used in diagnosing and treating the cardiovascular system
- Use and decode abbreviations commonly used when referring to the cardiovascular system

Unit 6: Keep Calm and Explore the Nervous System

With so many organs, tissues, and cells in the body, something must be in control! That's where the nervous system comes into play. To be an effective healthcare team member, we need to learn the functions of the nervous system, the disorders associated with it, and ways to fix it. We also need to study the language, its word parts, and ways to abbreviate it. So, who's in control here? Let's find out on our journey through the nervous system!

What will you learn in this unit?

- Identify the organs of the nervous system and describe their functions
- Recognize and use prefixes, suffixes, and combining forms related to the nervous system
- Describe conditions, disorders, and diseases of the nervous system
- Explain tests, procedures, and treatments used for nervous system conditions
- Translate and use abbreviations in medical documentation related to the nervous system

Unit 6 Quiz	Quiz

Unit 7: Skin, It's Got You Covered!

When you look at someone, what is the main thing you see? Skin is probably not your first answer, but if you really think about it, that's probably the best answer. That's because skin is the body's largest organ. There's more to this world than meets the eye though. Let's explore this complex world of tiny accessory organs and see just how much work this underrated system actually does.

What will you learn in this unit?

- Identify organs in the integumentary system and their functions
- Translate medical terms associated with the integumentary system using prefixes, suffixes, and combining forms
- Describe common diseases and conditions associated with the integumentary system
- Explain tests, procedures, and treatments used for conditions of the integumentary system
- Use abbreviations associated with the integumentary system

Unit 7 Quiz	Quiz

Unit 8: Hold Me Up: Musculoskeletal System

What allows us to stand? What protects our vital organs? How do we move? As we journey through the musculoskeletal system, we'll find the answers to these questions and so much more. Our exploration will help us identify terms, conditions, tests, and treatments for this system. We'll also work on our skills at decoding abbreviations for this system. Get ready to play detective and find out what's really holding us up!

What will you learn in this unit?

- Describe the organs of the musculoskeletal system and explain their functions
- Recognize prefixes, suffixes, and combining forms used in relation to the musculoskeletal system
- Explain common conditions and diseases of the musculoskeletal system
- Identify common tests and treatments for conditions and diseases involving the musculoskeletal system
- Translate abbreviations and other medical documentation using terms related to the musculoskeletal system

Final Exam Discussion	Discussion

What you will learn in this course

Medical Terminology 1b: Discovering Word Foundations

Discover the medical terminology associated with even more body systems to increase your ability to master prefixes, suffixes, and roots. Connect this language to real-world patients and clinical settings through practical applications and specific scenarios. Launch your health knowledge with detailed medical terms.

Unit 1: Waste Away! The Urinary System

As the body takes in the materials that it needs, there has to be a way to get rid of the materials it doesn't need. When we explore the urinary system, we'll find out how this happens. We'll also look at the word parts, terms, and abbreviations that are commonly used to relay information about this system. As with any complicated system, things can go wrong, so we'll discuss diseases that affect the urinary system and ways to treat them. Come along as we keep what's good and waste the rest!

What will you learn in this unit?

- Describe the organs of the urinary system and how each functions
- Identify commonly used prefixes, suffixes, and word parts of the urinary system
- Define common conditions and diseases that affect the urinary system
- Explain tests and procedures used in treating urinary system conditions
- Translate medical documentation using abbreviations and medical terminology of the urinary system

UNIT 1 Assignments	
Assignment	Type
Unit 1 Critical Thinking Questions	Homework
Unit 1 Lab	Homework
Unit 1 Activity	Homework
Unit 1 Discussion 1	Discussion
Unit 1 Discussion 2	Discussion
Unit 1 Quiz	Quiz

Unit 2: Creating the Future: The Reproductive System

What makes a male different from a female? As we explore the reproductive system, we'll learn about the many organs that make these two very different! We'll improve our translation skills as we look at word parts and abbreviations related to this system. We will also explore the diseases and conditions related to this system and the many ways to treat them. The world of medical terminology is a big one, let's put together another piece of the puzzle!

What will you learn in this unit?

- Describe organs of the reproductive system and their functions
- Identify prefixes, suffixes, and combining forms related to the reproductive system
- Define common diseases and conditions that affect the reproductive system
- Explain tests, treatments, and procedures used to treat conditions affecting the reproductive system
- Translate medical terms and abbreviations related to the reproductive system

UNIT 2 Assignments

Assignment	Type
Unit 2 Critical Thinking Questions	Homework
Unit 2 Lab	Homework
Unit 2 Activity	Homework
Unit 2 Discussion 1	Discussion
Unit 2 Discussion 2	Discussion
Unit 2 Quiz	Quiz

Unit 3: Carry It, Clean It, Fight It: Blood, Lymph, and Immune Systems

What does blood do other than fill the vessels? What's it made of? How does the body defend itself against invaders? The answers to these questions lie in the exploration of the blood, lymphatic, and immune systems. These systems are so connected we explore them together! During our exploration, we'll discover diseases and conditions as well as treatments and tests for these systems. We'll also add another piece to our medical terminology puzzle as we learn word parts, terms, and abbreviations. Let's see how the body transports, cleans, and defends!

What will you learn in this unit?

- Describe the parts and organs of the blood, lymphatic, and immune systems
- Identify prefixes, suffixes, and combining forms related to the blood, lymphatic, and immune systems
- Define conditions and treatments that affect the blood, lymphatic, and immune systems
- Explain the tests, treatments, and procedures related to the blood, lymphatic, and immune systems
- Translate medical documents using medical terminology and abbreviations related to the blood, lymphatic, and immune systems

UNIT 3 Assignments

Assignment	Type

Unit 3 Lab	Homework
Unit 3 Activity	Homework
Unit 3 Discussion 1	Discussion
Unit 3 Discussion 2	Discussion
Unit 3 Quiz	Quiz

Unit 4: Superpowers? No, Special Senses!

The abilities to see and to hear are remarkable characteristics that allow us to perceive the world differently. These special senses are a lot like superpowers in that they allow us to analyze our surroundings in many ways. As we dig deeper into these senses, we'll see the conditions and treatments as well as the terminology used to refer to the eyes and ears. As we add this piece of the medical terminology puzzle, we'll see what kind of powers we really have!

What will you learn in this unit?

- Describe the organs and parts that make up the special senses
- Recognize prefixes, suffixes, and combining forms used to make medical terms related to the special senses
- Identify conditions and diseases that impact the special senses
- Explain the tests, procedures, and treatments used in diagnosis and treatment of conditions of the special senses
- Transcribe, translate, and abbreviate medical terminology related to the special senses

Unit 5: Take What's Needed, Let the Rest Go: The Digestive System

For humans, food is one of the essential elements needed to survive, but what does the body do with that food once we take it in? We'll now find out by tracking the course of food through the digestive system to discover the organs and the parts of those organs that make them work properly. We'll see the many word parts and abbreviations that are used to describe this system, as well as its conditions, diseases, tests, and treatments. This journey takes many twists and turns, let's start the adventure!

What will you learn in this unit?

- Describe the organs and functions of the digestive system
- Recognize the prefixes, suffixes, and combining forms used to describe terms related to the digestive system
- Identify conditions and diseases that impact the digestive system
- Explain tests, procedures, and treatments used for the diagnosis and treatment of digestive system disorders
- Translate and abbreviate documentation related to the digestive system

Unit 5 Discussion 2	Discussion
Unit 5 Quiz	Quiz

Unit 6: Taking Control! The Endocrine System

Have you ever wondered what controls the processes in the body? What makes one thing speed up but later slow down? The answer to these questions is found in the study of the endocrine system. As we explore this complicated world, we'll investigate the conditions and diseases that occur when things go wrong. We'll also discover the tools, tests, and treatments to fix those conditions. Before we finish our exploration, we'll become familiar with the medical language and abbreviations unique to the endocrine system. Let's find out how the body takes control!

What will you learn in this unit?

- Describe the organs of the endocrine system, including their functions
- Recognize and use prefixes, suffixes, and combining forms related to the endocrine system
- Define common diseases and conditions of the endocrine system
- Explain the tools, tests, and treatments used for diseases and conditions of the endocrine system
- Translate medical terms and abbreviations related to the endocrine system

Unit 6 Quiz	Quiz

Unit 7: Providing the Foundation: Medical Specialties

As we've seen, the body is made of multiple, complex body systems that require vast knowledge to diagnose and treat. To provide the services needed for the diagnosis and treatments of many conditions, medical specialties rise to the occasion! We'll now explore the prefixes, suffixes, combining forms, and abbreviations that create the medical terminology for these areas. We'll also identify the tests, procedures, and treatments provided by each area. Let's discover the areas that give support and provide a firm foundation for the medical world!

What will you learn in this unit?

- Describe the functions of specialty areas like pharmacology, psychiatry, oncology, genetics, radiology, and pathology
- Recognize prefixes, suffixes, and combining forms used in pharmacology, psychiatry, oncology, genetics, radiology, and pathology
- Identify conditions and diseases diagnosed and treated by pharmacology, psychiatry, oncology, genetics, radiology, and pathology
- Explain tools, procedures, and treatments used by pharmacology, psychiatry, oncology, genetics, radiology, and pathology
- Translate medical documents that include medical terminology and abbreviations used by pharmacology, psychiatry, oncology, genetics, radiology, and pathology

Unit 7 Discussion 2	Discussion
Unit 7 Quiz	Quiz

Unit 8: Putting It Together: A Healthcare Perspective

As we've seen throughout our explorations of the various body systems, each has its own set of conditions, tests, treatments, and medical language. When working in the medical world, those systems aren't always separate. In many cases, patients have complex issues that cross boundaries and require knowledge of all body systems. Let's now follow a few patients and see things from a healthcare perspective!

What will you learn in this unit?

- Identify medical terminology of the respiratory, cardiovascular, integumentary, digestive, urinary, reproductive, musculoskeletal, blood, immune, nervous, and special senses systems
- Break down medical terms of the respiratory, cardiovascular, integumentary, digestive, urinary, reproductive, musculoskeletal, blood, immune, nervous, and special senses systems into parts using your knowledge of prefixes, suffixes, and combining forms
- Translate medical documents of the respiratory, cardiovascular, integumentary, digestive, urinary, reproductive, musculoskeletal, blood, immune, nervous, and special senses systems using knowledge of abbreviations and medical terminology
- Recognize organs of the respiratory, cardiovascular, integumentary, digestive, urinary, reproductive, musculoskeletal, blood, immune, nervous, and special senses systems
- Understand tools, treatments, and tests used for diseases and disorders of the respiratory, cardiovascular, integumentary, digestive, urinary, reproductive, musculoskeletal, blood, immune, nervous, and special senses systems

Final Exam Discussion	Discussion

Senior Success

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Seniors will explore post-secondary options including colleges, careers, and more. Students will be exposed to tools and resources designed to best prepare them for life after high school. Through completion of this course, students will gain exposure to information about financial aid, the college application process, résumé writing and graduation information, as well as the opportunity to reflect on their high school career.

Course Outline:

1. Getting Started

This unit will introduce you to the course so you can take advantage of the many resources available to you as you begin your senior year.

1. Introduction to the Course
2. Message Board Scavenger Hunt

2. Life After High School

This unit will help you consider your options after you graduate from high school.

1. Options After High School
2. Sharing and Individualizing Your Plans
3. My Educational Records

3. College Exploration

In case college is an option for you when you graduate, this unit will prepare you for college exploration.

1. College Entrance Exams
2. Finding the Right College
3. College Applications
4. Visiting a College
5. Mid-Semester Check

4. Senior Tasks

There are many tasks you will have to complete before graduating. This unit will outline these so that your transition out of high school will be a smooth one.

1. Graduation

5. Financial Considerations

Part of your consideration about college should be the cost of attending. This unit will guide you in making an informed decision.

1. Financial Aid

2. FAFSA and Scholarships

6. Career Exploration

You may consider pursuing a career when you graduate from high school. This unit will help you explore careers that align to your interests.

1. Choosing a Career
2. Additional Career Considerations
3. Writing a Résumé

7. Final Tasks

As you finish this course and your senior year, this unit will allow you to reflect on your current progress in your courses and what you may need to do in order to finish out the year with the best possible grades.

1. End-of-Semester Check

Sports Management

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This course will introduce you to the fast-growing field of sports management. You will explore topics such as sports marketing, branding, ticket sales, public relations, broadcasting, and breaking into the business of sports management. This course will also discuss the role of sports in society and the importance of an ethical approach to sports management.

Course Outline

1. Introduction to Sports Management

1. What Is Sports Management?
 - Identify minor league affiliations
 - Identify sports leagues with opportunities for sports management
 - Describe the importance of sports management
2. Organization of Professional Teams
 - Identify typical jobs in a professional team's business office
 - Describe the chain of command within sports franchises
 - Describe the role of ownership in sports franchises
3. Revenue Streams for Sports Teams
 - Understand revenue streams for sports franchises
 - Understand the role and importance of sponsors
 - Create a revenue plan for a professional franchise and venue
4. Event and Facility Management
 - Learn the role of municipal governments in facility management
 - Identify the relationship between sports franchises and facility management
 - Define and discuss special events and their impact on facility management

2. Sports Marketing and Sales

1. Brand Management
 - Understand the importance of establishing and maintaining a brand
 - Explain the importance of brand loyalty and the impact it has on marketing strategy in sports
 - Develop marketing strategies that positively impact a brand
2. Marketing Campaigns
 - Describe and create marketing campaigns
 - Define what makes a successful marketing campaign and list its components
 - Explain the relationship between marketing campaigns and other elements of sports marketing

3. Ticketing
 - Describe the ticketing process
 - Recognize different kinds of ticketing options
 - Identify the role ticketing plays in the revenue stream of a sports team

4. Sponsorships in Sports
 - Describe the role sponsorships play in the revenue of a sports team
 - Recognize the process for securing sponsorships
 - Create a sponsorship portfolio for your minor league baseball team

3. Media and Public Relations

1. Sports Management and the Media
 - Describe the relationship between sports and the media
 - Understand the various ways teams communicate with the media
2. Public Relations
 - Identify best practices for public relations in the sports industry
 - Recognize the importance of public relations in the sports industry
 - Compare and contrast media and public relations
3. Sports Broadcasting
 - Recognize the relationship between professional sports teams and sports broadcasters
 - Identify the relationship between sponsorship and the media
4. New Media and Sports Management
 - Identify the role of new media in professional sports
 - Explain the pros and cons of new media in sports management

4. Ethics in Sports Management

1. The Impact of Sports on Society
 - Understand and analyze the cultural and economic roles of sports in modern society
2. Professional Sports in the Local Community
 - Explain the relationship between sports teams and local communities
 - Describe ways sports teams contribute to communities
 - Describe how members of sports teams become effective leaders in communities
3. Sports Law
 - Explain the relationship sports law has with sports management
 - Identify areas of sports management where legality most comes into play
 - Recognize the role the federal government has played in sports law
4. Philosophy of Sports
 - Describe why sports philosophy is important to sports management
 - Explain the relationship between values and sport
 - Recognize how competition affects sports philosophy
5. Ethical Principles For Sports Managers
 - Describe business ethics in sports
 - Evaluate different mission statements throughout sports
 - Develop a sample mission statement for a sports team

6. Case Studies in Sports Management Ethics
 - Identify ethical issues that sports managers confront
 - Recognize the appropriate methods for managing ethical issues
5. **Careers in the Sports Industry**
 1. Career Paths in Sports Management
 - Identify ways to break into the sports industry
 - Discuss careers in sports management
 2. Breaking into the Industry
 - Identify ways to prepare yourself for a job in sports
 3. The Job Search in the Sports Industry
 - Create a resume
 - Explain your qualifications during a mock interview
 4. Sports Management Final Portfolio
 - Create a portfolio about a minor baseball team that includes a revenue plan as well as brand management and public relations strategies

	Unit Name	Lesson Number
Opinion/Argumentative Conventions of Language		
CC.1.4.2.L Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling.		
• Capitalize proper nouns.	The Earth's Forces	4, 5
	Look at the Sky	3, 4
	Ways People Help	2, 4, 5
	Weather Alert!	2, 4, 5
	Poems About Nature	5
• Use commas and apostrophes appropriately.	The Earth's Forces	4, 5
	Look at the Sky	3, 4
	Ways People Help	3, 4, 5
	Weather Alert!	2, 4, 5
	Poems About Nature	1, 2, 3, 4, 5
• Spell words drawing on common spelling patterns.	The Earth's Forces	1, 2, 3, 4
	Look at the Sky	1, 2, 3, 4, 5
	Ways People Help	1, 2, 4
	Weather Alert!	1, 2, 3, 4, 5
	Poems About Nature	1, 2, 3, 5
• Consult reference material as needed.	Weather Alert!	2, 4, 5
Narrative		
CC.1.4.2.M Write narratives to develop real or imagined experiences or events.	Pets are Our Friends	5
	Animals and Nature	1, 2
	Animals in Poems	5
	The Earth's Forces	3, 4, 5
	The World of Ideas	5
Narrative Focus		
CC.1.4.2.N Establish a situation and introduce a narrator and/or characters.	Pets are Our Friends	5
	Animals and Nature	1, 2
	Animals in Poems	5
	The Earth's Forces	3, 4, 5
	The World of Ideas	5
Narrative Content		
CC.1.4.2.O Include thoughts and feelings to describe experiences and events to show the response of characters to situations.	Pets are Our Friends	5
	Animals and Nature	1, 2
	Animals in Poems	5
	The Earth's Forces	3, 4, 5
	The World of Ideas	5

Pennsylvania Core Standards English Language Arts: Grade 2	Language Arts 2 A/B	
	Unit Name	Lesson Number
Narrative Organization		
CC.1.4.2.P Organize a short sequence of events, using temporal words to signal event order; provide a sense of closure.	Animals and Nature	1, 2
	The Earth's Forces	4, 5
Narrative Style		
CC.1.4.2.Q Choose words and phrases for effect	Pets are Our Friends	5
	Animals and Nature	1, 2
	Animals in Poems	5
	The Earth's Forces	3, 4, 5
	The World of Ideas	5
Narrative Conventions of Language		
CC.1.4.2.R Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling.		
• Capitalize proper nouns.	Pets are Our Friends	5
	Animals and Nature	1, 2
	Animals in Poems	5
	The Earth's Forces	3, 4, 5
	The World of Ideas	5
• Use commas and apostrophes appropriately.	Pets are Our Friends	3, 4, 5
	Animals in Poems	2, 3, 4, 5
	The Earth's Forces	4
• Spell words drawing on common spelling patterns.	Pets are Our Friends	1, 3, 5
	Animals and Nature	1, 2, 3, 4, 5
	Animals in Poems	1, 3, 4, 5
	The Earth's Forces	1, 2, 3, 4
	The World of Ideas	1, 2, 3, 4, 5
• Consult reference material as needed.	Weather Alert!	4, 5
	Preserving Our Earth	4, 5
Response to Literature		
Intentionally Blank		
Production and Distribution of Writing		
Writing Process		

Pennsylvania Core Standards English Language Arts: Grade 2	Language Arts 2 A/B	
	Unit Name	Lesson Number
CC.1.4.2.T With guidance and support from adults and peers, focus on a topic and strengthen writing as needed by revising and editing.	Families Around the World	4
	Pets are Our Friends	5
	Animals in Stories	3, 4
	Animal Habitats	5
	Baby Animals	2, 4, 5
	Animals in Poems	5
	Ways People Help	5
	Weather Alert!	5
	Folktales about Nature	4
	Poems about Nature	5
	Cooperation Works!	3, 4
	Preserving Our Earth	2, 4, 5
	Rights and Rules	5
	Money Matters	2, 4
	The World of Ideas	3
Technology and Publication		
CC.1.4.2.U With guidance and support, use a variety of digital tools to produce and publish writing including in collaboration with peers.	Families Working Together	4, 5
	Animal Habitats	5
	Baby Animals	5
	Animals in Poems	5
	Weather Alert!	5
	Express Yourself	5
	Our Culture Makes Us Special	5
	Poems about Nature	5
	Our Heroes	5
	Rights and Rules	4
Conducting Research		
CC.1.4.2.V Participate in individual or shared research and writing projects.	Plant Myths and Facts	4
	We Need Energy	3, 4
	Money Matters	2, 4, 5
Credibility, Reliability, and Validity of Sources		
CC.1.4.2.W Recall information from experiences or gather information from provided sources to answer a question.	Families Around the World	5
	Animals Need Our Care	5
	Animals and Nature	5
	Animals in Stories	5
	Baby Animals	5
	Look at the Sky	5
	Weather Alert!	5
	Different Places	5
	Earth Changes	4, 5
	Folktales about Nature	5
	Poems about Nature	3
	Being a Good Citizen	5
	Preserving Our Earth	4, 5
	Plant Myths and Facts	5
	We Need Energy	5
Money Matters	5	

Pennsylvania Core Standards English Language Arts: Grade 2	Language Arts 2 A/B	
	Unit Name	Lesson Number
Range of Writing		
CC.1.4.2.X Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes and audiences.	Animals in Nature	4
	Animals in Stories	2, 3, 4
	Baby Animals	1, 2, 3, 4, 5
	The Earth's Forces	4
	Look at the Sky	2, 3, 4
	Weather Alert!	1, 2, 3, 4, 5
	Being a Good Citizen	4
	Cooperation Works!	2, 3, 4
	Preserving Our Earth	1, 2, 3, 4, 5
	Plant Myths and Facts	4
	We Need Energy	2, 3, 4
	Money Matters	1, 2, 3, 4, 5
	1.5 Speaking and Listening	
Comprehension and Collaboration		
Collaborative Discussion		
CC.1.5.2.A Participate in collaborative conversations with peers and adults in small and larger groups.	Families Around the World	1
	Animals Need Our Care	5
	Animals in Stories	2
	Animal Habitats	5
	Baby Animals	5
	Animals in Poems	5
	Ways People Help	5
	Weather Alert!	1, 5
	Express Yourself	1, 5
	Different Places	5
	Earth Changes	1, 5
	Our Culture Makes Us Special	5
	Folktales about Nature	1, 5
	Poems about Nature	5
	Being a Good Citizen	5
	Cooperation Works!	5
	Our Heroes	5
	Preserving Our Earth	5
	Rights and Rules	1, 5
	Plant Myths and Facts	5
	We Need Energy	1, 5
	Team Up to Explore	1, 5
	Money Matters	5
The World of Ideas	5	

Pennsylvania Core Standards English Language Arts: Grade 2	Language Arts 2 A/B	
	Unit Name	Lesson Number
Comprehension and Collaboration Critical Listening CC.1.5.2.B Recount or describe key ideas or details from a text read aloud or information presented orally or through other media.		
	Friends Help Friends	2
	Families Around the World	2
	Pets are Our Friends	2
	Animals Need Our Care	2
	Families Working Together	2
	Animals and Nature	2

1.5 Speaking and Listening		
Comprehension and Collaboration		
Collaborative Discussion		
CC.1.5.3.A Engage effectively in a range of collaborative discussions on grade-level topics and texts, building on others’ ideas and expressing their own clearly.	Adventure Stories	• Adventure Stories: Speak and Listen
	Acting Out Folktales	• Acting Out Folktales: Speak and Listen
	Animal Behaviors	• Animal Behaviors: Speak and Listen
	Animal Features	• Animal Features: Fluency
	Asking for Help	• Asking for Help: Genre • Asking for Help: Write
	Out in Space	• Out in Space: Speak/Listen
	It Happens at Night!	• It Happens at Night!: Genre
	Changes in the Night Sky	• Changes in the Night Sky: Genre • Changes in the Night Sky: Fluency
Comprehension and Collaboration		
Critical Listening		
CC.1.5.3.B Determine the main ideas and supporting details of a text read aloud or information presented in diverse media formats, including visually, quantitatively, and orally.	Discovering Folktales	• Discovering Folktales: Speak and Listen
	Characters Who Change	• Characters Who Change: Speak and Listen
	Clever Characters	• Clever Characters: Genre
	Acting Out Folktales	• Acting Out Folktales: Genre
	Amazing Animals	• Amazing Animals: Genre • Amazing Animals: Speak and Listen
	Animal Behaviors	• Animal Behaviors: Genre
	Learning New Things	• Learning New Things: Genre
	Learning from Science	• Learning from Science: Comprehension
	Exploring the World	• Exploring the World: Genre
	Think Creatively	• Think Creatively: Speak/Listen
	Conflicts Help Us Grow	• Conflicts Help Us Grow: Genre
	Getting to Know You	• Getting to Know You: Speak/Listen
	Keeping an Open Mind	• Keeping an Open Mind: Genre
	Asking for Help	• Asking for Help: Genre
Changes in the Night Sky	• Changes in the Night Sky: Genre	

Pennsylvania Core Standards English Language Arts: Grade 3	Language Arts 3 A/B	
	Unit Name	Lesson Name
Comprehension and Collaboration Evaluating Information		
CC.1.5.3.C Ask and answer questions about information from a speaker, offering appropriate detail.	Animal Features	• Animal Features: Fluency
	Asking for Help	• Asking for Help: Genre
	Out in Space	• Out in Space: Speak/Listen
	It Happens at Night!	• It Happens at Night!: Genre
	Changes in the Night Sky	• Changes in the Night Sky: Genre • Changes in the Night Sky: Fluency
Presentation of Knowledge and Ideas Purpose, Audience, and Task		
CC.1.5.3.D Report on a topic or text, tell a story, or recount an experience with appropriate facts and relevant, descriptive details, speak clearly with adequate volume, appropriate pacing, and clear pronunciation.	Learning from Science	• Learning from Science: Speak and Listen
	Exploring the World	• Exploring the World: Speak and Listen • Exploring the World: Write
	Asking for Help	• Asking for Help: Write
	Dangers to Our Oceans	• Dangers in Our Oceans: Speak/Listen • Dangers in Our Oceans: Write
Presentation of Knowledge and Ideas Context		
CC.1.5.3.E Speak in complete sentences when appropriate to task and situation in order to provide requested detail or clarification.	Adventures on Water	• Adventures on Water: Speak and Listen
	Family First	• Family First: Speak/Listen
	Dangers to Our Oceans	• Dangers in Our Oceans: Write
Integration of Knowledge and Ideas Multimedia		
CC.1.5.3.F Create engaging audio recordings of stories or poems that demonstrate fluid reading at an understandable pace; add visual displays when appropriate to emphasize or enhance certain facts or details.	Clever Characters	• Clever Characters: Speak and Listen
	Acting Out Folktales	• Acting Out Folktales: Write
	Family First	• Family First: Fluency
	Keeping an Open Mind	• Keeping an Open Mind: Fluency
	The Importance of Oceans	• The Importance of Oceans: Genre
	Dangers to Our Oceans	• Dangers in Our Oceans: Fluency • Dangers in Our Oceans: Write
Conventions of Standard English		
CC.1.5.3.G Demonstrate command of the conventions of standard English when speaking based on grade 3 level and content.	Acting Out Folktales	• Acting Out Folktales: Comprehension
	Amazing Animals	• Amazing Animals: Speak and Listen
	Animals and Their Habitats	• Animal Habitats: Speak and Listen
	Animal Behaviors	• Animal Behaviors: Speak and Listen
	Animal Features	• Animal Features: Speak and Listen
	Think Creatively	• Think Creatively: Speak/Listen
	Conflicts Help Us Grow	• Conflicts Help Us Grow: Speak/Listen

Language Arts 4

	Unit Name	Lesson Name
1.1 Foundational Skills		
Book Handling		
Intentionally Blank		
Print Concepts		
Intentionally Blank		
Phonological Awareness		
Intentionally Blank		
Phonics and Word Recognition		
CC.1.1.4.D		
Know and apply grade-level phonics and word analysis skills in decoding words.		
<ul style="list-style-type: none"> Use combined knowledge of all letter-sound correspondences, syllabication patterns, and morphology to read accurately unfamiliar multisyllabic words. 	Actions Speak Louder than Words	• Actions and Words: Genre
	A Bird's Eye View	• A Bird's Eye View: Genre
	Unearthing the Past	• Unearthing the Past: Genre
	Seriously Funny	• Seriously Funny: Comprehension
Fluency		
CC.1.1.4.E		
Read with accuracy and fluency to support comprehension:		
<ul style="list-style-type: none"> Read on-level text with purpose and understanding. 	Actions Speak Louder than Words	• Actions Speak Louder than Words: Speak/Listen
<ul style="list-style-type: none"> Read on-level text orally with accuracy, appropriate rate, and expression on successive readings. 	A Fresh Point of View	• A Fresh Point of View: Fluency
<ul style="list-style-type: none"> Use context to confirm or self-correct word recognition and understanding, rereading as necessary. 	The Science of Sickness	• The Science of Sickness: Comprehension
1.2 Reading Informational Text		
Key Ideas and Details		
Main Idea		
CC.1.2.4.A		
Determine the main idea of a text and explain how it is supported by key details; summarize the text.	Mighty Medicines	<ul style="list-style-type: none"> Mighty Medicines: Fluency Mighty Medicines: Synthesize
Key Ideas and Details		
Text Analysis		
CC.1.2.4.B		
Refer to details and examples in text to support what the text says explicitly and make inferences.	Mighty Medicines	• Mighty Medicines: Speak/Listen
	Nature's Medicines	• Nature's Medicines: Fluency
Key Ideas and Details		
Text Analysis		
CC.1.2.4.C		
Explain events, procedures, ideas, or concepts in a text, including what happened and why, based on specific information in the text.	Nature's Medicines	• Nature's Medicines: Synthesize
Craft and Structure		
Point of View		
CC.1.2.4.D		
Compare and contrast an event or topic told from two different points of view.	Watching Animals	• Watching Animals: Synthesize

Pennsylvania Core Standards English Language Arts: Grade 4	Language Arts 4 A/B	
	Unit Name	Lesson Name
Craft and Structure Text Structure		
CC.1.2.4.E Use text structure to interpret information (e.g., chronology, comparison, cause/effect, problem/solution).	Holding Onto History	• Holding Onto History: Genre
Craft and Structure Vocabulary		
CC.1.2.4.F Determine the meaning of words and phrases as they are used in grade-level text, including figurative language.	Seriously Funny	• Seriously Funny: Comprehension • Seriously Funny: Speak/Listen
Integration of Knowledge and Ideas Diverse Media		
CC.1.2.4.G Interpret various presentations of information within a text or digital source and explain how the information contributes to an understanding of text in which it appears.	Finding the Cure	• Finding the Cure: Speak/Listen
	Creature Features	• Creatures Features: Fluency
Integration of Knowledge and Ideas Evaluating Arguments		
CC.1.2.4.H Explain how an author uses reasons and evidence to support particular points in a text.	We Need Trees	• We Need Trees: Genre
Integration of Knowledge and Ideas Analysis Across Texts		
CC.1.2.4.I Integrate information from two texts on the same topic to demonstrate understanding of that topic.	Trial, Error, and--Oops	• Trial, Error, and--Oops: Fluency
Vocabulary Acquisition and Use		
CC.1.2.4.J Acquire and use accurately grade-appropriate conversational, general academic, and domain-specific words and phrases, including those that signal precise actions, emotions, or states of being and that are basic to a particular topic.	Keeping Promises	• Keeping Promises: Speak/Listen
	All Fired Up	• All Fired Up: Comprehension • All Fired Up: Fluency
Vocabulary Acquisition and Use		
CC.1.2.4.K Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade-level reading and content, choosing flexibly from a range of strategies and tools.	Actions Speak Louder than Words	• Actions and Words: Comprehension
	Animal Power	• Animal Power: Genre
Range of Reading		
CC.1.2.4.L Read and comprehend literary non-fiction and informational text on grade level, reading	A Bird's Eye View	• A Bird's Eye View: Comprehension
	Mighty Medicines	• Mighty Medicines: Speak/Listen
1.3 Reading Literature		
Key Ideas and Details Theme		
CC.1.3.4.A Determine a theme of a text from details in the text; summarize the text.	Actions Speak Louder than Words	• Actions and Words: Fluency
	Understanding Animals	• Understanding Animals: Fluency

Pennsylvania Core Standards English Language Arts: Grade 4	Language Arts 4 A/B	
	Unit Name	Lesson Name
Key Ideas and Details Text Analysis		
CC.1.3.4.B Cite relevant details from text to support what the text says explicitly and make inferences.	Actions Speak Louder than Words	• Actions and Words: Fluency
	A Boost in Kindness	• A Boost in Kindness: Fluency
Key Ideas and Details Literary Elements		
CC.1.3.4.C Describe in depth a character, setting or event in a story or drama, drawing on specific details in the text.	Understanding Animals	• Understanding Animals: Speak/Listen
Craft and Structure Point of View		
CC.1.3.4.D Compare and contrast an event or topic told from two different points of view.	Watching Animals	• Watching Animals: Synthesize
Craft and Structure Text Structure		
CC.1.3.4.E Explain major differences between poems, drama and prose and refer to the structural elements of each when writing or speaking about a text.	Watching Animals	• Watching Animals: Fluency
	Seriously Funny	• Seriously Funny: Speak/Listen
	Acting Out History	• Acting Out History: Speak/Listen Extend the lesson to explain major differences between poems, drama and prose.
Craft and Structure Vocabulary		
CC.1.3.4.F Determine the meaning of words and phrases as they are used in grade-level text, including figurative language.	Seriously Funny	• Seriously Funny: Comprehension • Seriously Funny: Speak/Listen
Integration of Knowledge and Ideas Sources of Information		
CC.1.3.4.G Make connections between the text of a story or drama and a visual or oral presentation of the text, identifying where each version reflects specific descriptions and directions in the text.	A World of Gods and Heroes	• A World of Gods and Heroes: Speak/Listen
Integration of Knowledge and Ideas Text Analysis		
CC.1.3.4.H Compare and contrast similar themes, topics, and patterns of events in literature, including texts from different cultures.	A Bird's Eye View	• A Bird's Eye View: Fluency • A Bird's Eye View: Synthesize
	A World of Gods and Heroes	• A World of Gods and Heroes: Speak/Listen
	Animal Power	• Animal Power: Speak/Listen
Vocabulary Acquisition and Use Strategies		
CC.1.3.4.I Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade-level reading and content, choosing flexibly from a range of strategies and tools.	Actions Speak Louder than Words	• Actions and Words: Comprehension
	Animal Power	• Animal Power: Genre

Pennsylvania Core Standards English Language Arts: Grade 4	Language Arts 4 A/B	
	Unit Name	Lesson Name
Vocabulary Acquisition and Use		
CC.1.3.4.J Acquire and use accurately grade-appropriate conversational, general academic, and domain-specific words and phrases, including those that signal precise actions, emotions, or states of being and that are basic to a particular topic.	Keeping Promises	• Keeping Promises: Speak/Listen
	All Fired Up	• All Fired Up: Genre • All Fired Up: Fluency
Range of Reading		
CC.1.3.4.K Read and comprehend literary fiction on grade-level, reading independently and proficiently.	Actions Speak Louder than Words	• Actions and Words: Fluency
1.4 Writing		
Informative/ Explanatory		
CC.1.4.4.A Write informative/ explanatory texts to examine a topic and convey ideas and information clearly.	Keeping Promises	• Keeping Promises: Genre
Informative/Explanatory Focus		
CC.1.4.4.B Identify and introduce the topic clearly.	All Fired Up	• All Fired Up: Comprehension
Informative/Explanatory Content		
CC.1.4.4.C Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic; include illustrations and multimedia when useful to aiding comprehension.	Keeping Promises	• Keeping Promises: Genre • Keeping Promises: Comprehension
	Objects Tell Stories	• Objects Tell Stories: Genre • Objects Tell Stories: Speak/Listen
Informative/Explanatory Organization		
CC.1.4.4.D Group related information in paragraphs and sections, linking ideas within categories of information using words and phrases; provide a concluding statement or section; include formatting when useful to aiding comprehension.	Keeping Promises	• Keeping Promises: Genre • Keeping Promises: Comprehension • Keeping Promises: Fluency
Informative/Explanatory Style		
CC.1.4.4.E Use precise language and domain-specific vocabulary to inform about or explain the topic.	Keeping Promises	• Keeping Promises: Speak/Listen
Informative/Explanatory Conventions of Language		
CC.1.4.4.F Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling.	Kindness Goes a Long Way	• Kindness Goes a Long Way: Comprehension
	Lessons in Kindness	• Lessons in Kindness: Comprehension
	Acting Out History	• Acting Out History: Fluency
Opinion/Argumentative		
CC.1.4.4.G Write opinion pieces on topics or texts.	A Fresh Point of View	• A Fresh Point of View: Speak/Listen
Opinion/Argumentative Focus		

Pennsylvania Core Standards English Language Arts: Grade 4	Language Arts 4 A/B	
	Unit Name	Lesson Name
CC.1.4.4.H Introduce the topic and state an opinion on the topic. Opinion/Argumentative Content	A Fresh Point of View	• A Fresh Point of View: Speak/Listen
CC.1.4.4.I Provide reasons that are supported by facts and details. Opinion/Argumentative Organization	A Fresh Point of View	• A Fresh Point of View: Speak/Listen
CC.1.4.4.J Create an organizational structure that includes related ideas grouped to support the writer’s purpose and linked in a logical order with a concluding statement or section related to the opinion. Opinion/Argumentative Style	You Can Make a Difference	• You Can Make a Difference: Speak/Listen • You Can Make a Difference: Fluency
CC.1.4.4.K Choose words and phrases to convey ideas precisely. Opinion/Argumentative Conventions of Language	You Can Make a Difference	• You Can Make a Difference: Fluency
CC.1.4.4.L Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling. Narrative	It Takes Teamwork	• It Takes Teamwork: Genre • It Takes Teamwork: Comprehension • It Takes Teamwork: Speak/Listen
CC.1.4.4.M Write narratives to develop real or imagined experiences or events. Narrative Focus	Watching Animals	• Watching Animals: Synthesize
CC.1.4.4.N Orient the reader by establishing a situation and introducing a narrator and/or characters. Narrative Content	Watching Animals	• Watching Animals: Comprehension
CC.1.4.4.O Use dialogue and descriptions to develop experiences and events or show the responses of characters to situations; use concrete words and phrases and sensory details to convey experiences and events precisely. Narrative Organization	Watching Animals	• Watching Animals: Fluency
	Understanding Animals	• Understanding Animals: Speak/Listen
	People Need Animals	• People Need Animals: Genre
CC.1.4.4.P Organize an event sequence that unfolds naturally, using a variety of transitional words and phrases to manage the sequence of events; provide a conclusion that follows from the narrated experiences and events. Narrative Style	Watching Animals	• Watching Animals: Speak/Listen
	Understanding Animals	• Understanding Animals: Fluency
	People Need Animals	• People Need Animals: Comprehension

Pennsylvania Core Standards English Language Arts: Grade 4	Language Arts 4 A/B	
	Unit Name	Lesson Name
CC.1.4.4.Q Choose words and phrases to convey ideas precisely.	Watching Animals	• Watching Animals: Fluency
Narrative Conventions of Language		
CC.1.4.4.R Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling.	Watching Animals	• Watching Animals: Fluency
	People Need Animals	• People Need Animals: Speak/Listen • People Need Animals: Fluency
Response to Literature		
CC.1.4.4.S Draw evidence from literary or informational texts to support analysis, reflection, and research, applying grade-level reading standards for literature and informational texts.	Kindness Goes a Long Way	• Kindness Goes a Long Way: Comprehension • Kindness Goes a Long Way: Synthesize
	Holding Onto History	• Holding Onto History: Comprehension
Production and Distribution of Writing Writing Process		
CC.1.4.4.T With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing.	Watching Animals	• Watching Animals: Comprehension
	People Need Animals	• People Need Animals: Fluency
	Objects Tell Stories	• Objects Tell Stories: Genre
Technology and Publication		
CC.1.4.4.U With some guidance and support, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of one page in a single sitting.	Humans Help Out	• Humans Help Out: Write
Conducting Research		
CC.1.4.4.V Conduct short research projects that build knowledge through investigation of different aspects of a topic.	Objects Tell Stories	• Objects Tell Stories: Fluency
Credibility, Reliability, and Validity of Sources		
CC.1.4.4.W Recall relevant information from experiences or gather relevant information from print and digital sources; take notes and categorize information, and provide a list of sources.	Objects Tell Stories	• Objects Tell Stories: Speak/Listen
	All Fired Up	• All Fired Up: Speak/Listen
Range of Writing		
CC.1.4.4.X Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes and audiences.	A Bird's Eye View	• A Bird's Eye View: Fluency
	People Need Animals	• People Need Animals: Comprehension • People Need Animals: Speak/Listen
	Holding Onto History	• Holding Onto History: Comprehension
1.5 Speaking and Listening Comprehension and Collaboration Collaborative Discussion		
CC.1.5.4.A Engage effectively in a range of collaborative discussions on grade-level topics and texts, building on others' ideas and expressing their own clearly.	Actions Speak Louder than Words	• Actions Speak Louder than Words: Speak/Listen
	Explaining the Natural World	• Explaining the Natural World: Speak/Listen

Pennsylvania Core Standards English Language Arts: Grade 4	Language Arts 4 A/B	
	Unit Name	Lesson Name
Comprehension and Collaboration Critical Listening		
CC.1.5.4.B Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.	Seriously Funny	• Seriously Funny: Genre
	Animal Power	• Animal Power: Synthesize
	It Takes Teamwork	• It Takes Teamwork: Speak/Listen
	Creature Features	• Creature Features: Fluency
Comprehension and Collaboration Evaluating Information		
CC.1.5.4.C Identify the reasons and evidence a speaker provides to support particular points.	We Need Trees	• We Need Trees: Genre
Presentation of Knowledge and Ideas Purpose, Audience, and Task		
CC.1.5.4.D Report on a topic or text, tell a story, or recount an experience in an organized manner, using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly with adequate volume, appropriate pacing, and clear pronunciation.	Kindness Goes a Long Way	• Kindness Goes a Long Way: Speak/Listen
	A Bird's Eye View	• A Bird's Eye View: Fluency
Presentation of Knowledge and Ideas Context		
CC.1.5.4.E Differentiate between contexts that require formal English versus informal situations.	Keeping Promises	• Keeping Promises: Speak/Listen
Integration of Knowledge and Ideas Multimedia		
CC.1.5.4.F Add audio recordings and visual displays to presentations when appropriate to enhance the development of main ideas or themes.	Humans Help Out	• Humans Help Out: Comprehension • Humans Help Out: Speak/Listen
Conventions of Standard English		
CC.1.5.4.G Demonstrate command of the conventions of standard English when speaking based on grade 4 level and content.	Explaining the Natural World	• Explaining the Natural World: Speak/Listen

Language Arts 5

Pennsylvania Core Standards English Language Arts: Grade 5	Language Arts 5 A/B

Credibility, Reliability, and Validity of Sources		
CC.1.4.9–10.W Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.	The Research Paper	<ul style="list-style-type: none"> • Unit Introduction: The Research Paper • Prewriting: Forming Research Questions • Prewriting: Developing a Research Proposal • Prewriting: Gathering Information • Prewriting: Taking Notes • Prewriting: Synthesizing Information
Range of Writing		
CC.1.4.9–10.X Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.	The Forces of Nature The Research Paper	<ul style="list-style-type: none"> • Writing Workshop: Description (Draft) • Prewriting: Developing a Research Proposal • Drafting: Wrapping It Up
1.5 Speaking and Listening		
Comprehension and Collaboration Collaborative Discussion		
CC.1.5.9–10.A Initiate and participate effectively in a range of collaborative discussions on grade-level topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.	Romeo and Juliet Crossing Borders	<ul style="list-style-type: none"> • Romeo and Juliet: Act II • Romeo and Juliet: Act II, continued • Delfino II: Diez in the Desert • Poems Across the Divide
Comprehension and Collaboration Critical Listening		
CC.1.5.9–10.B Evaluate a speaker’s perspective, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.	Growing Up Romeo and Juliet	<ul style="list-style-type: none"> • The Bass, the River, and Sheila Mant: Wetherell • Romeo and Juliet: Unit Introduction
Comprehension and Collaboration Evaluating Information		
CC.1.5.9–10.C Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.	The Research Paper	<ul style="list-style-type: none"> • Prewriting: Evaluating Information
Presentation of Knowledge and Ideas Purpose, Audience, and Task		
CC.1.5.9–10.D Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning; ensure that the presentation is appropriate to purpose, audience, and task.	Growing Up	<ul style="list-style-type: none"> • Poems of Passage: Booth, Collins, Lorde
Presentation of Knowledge and Ideas Context		
CC.1.5.9–10.E Adapt speech to a variety of contexts and tasks.	Growing Up The Research Paper Crossing Borders	<ul style="list-style-type: none"> • Poems of Passage: Booth, Collins, Lorde • Creating a Multimedia Presentation • Delfino II: Diez in the Desert
Integration of Knowledge and Ideas Multimedia		
CC.1.5.9–10.F Make strategic use of digital media in presentations to add interest and enhance understanding of findings, reasoning, and evidence.	The Research Paper	<ul style="list-style-type: none"> • Creating a Multimedia Presentation
Conventions of Standard English		
CC.1.5.9–10.G Demonstrate command of the conventions of standard English when speaking based on Grades 9–10 level and content.	This standard is fully met in English 10.	

English 10

Pennsylvania Core Standards (2014) English Language Arts: Grades 9-10	Language Arts 10 A/B	
	Unit Name	Lesson Name
1.2 Reading Informational Text		
Key Ideas and Details		
Main Idea		
CC.1.2.9-10.A Determine a central idea of a text and analyze its development over the course of the text, including how it emerges and is shaped and refined by specific details; provide an objective summary of the text.	The Literature of the Americas	• Course Introduction
Key Ideas and Details		
Text Analysis		
CC.1.2.9-10.B Cite strong and thorough textual evidence to support analysis of what the text says explicitly, as well as inferences and conclusions based on an author’s explicit assumptions and beliefs about a subject.	The Literature of the Americas	• Course Introduction • Emancipation • Day of the Butterfly
	East Asia and the Pacific Rim	• From Emperor to Citizen: P'u Yi
	Europe I	• Writing Workshop • Writing Workshop Expository Essay
	East Asia and the Pacific Rim	• Writing Workshop: Literary Analysis Rough Draft • Writing Workshop: Literary Analysis Final Draft
Key Ideas and Details		
Text Analysis		
CC.1.2.9-10.C Apply appropriate strategies to analyze, interpret, and evaluate how an author unfolds an analysis or series of ideas or events, including the order in which the points are made, how they are introduced and developed, and the connections that are drawn between them.	Nonfiction: Persuasion	• Preparation: Develop Arguments • Public Speaking • Writing Workshop: Persuasive Speech: Outline
Craft and Structure		
Point of View		
CC.1.2.9-10.D Determine an author’s particular point of view and analyze how rhetoric advances the point of view.	Adventures of Huckleberry Finn	• Adventures of Huckleberry Finn: Lesson 1
	Nonfiction: Persuasion	• Revising Your Speech • Presentation
Craft and Structure		
Text Structure		
CC.1.2.9-10.E Analyze in detail how an author’s ideas or claims are developed and refined by particular sentences, paragraphs, or larger portions of a text.	Nonfiction: Persuasion	• Prewriting: Persuasive Writing • Preparation: Develop Arguments
Craft and Structure		
Vocabulary		
CC.1.2.9-10.F Analyze how words and phrases shape meaning and tone in texts.	The Literature of the Americas	• Crossroads: A Sad Vaudeville
	Adventures of Huckleberry Finn	• Adventures of Huckleberry Finn: Lesson 1 • Adventures of Huckleberry Finn: Lesson 2
	Nonfiction: Persuasion	• Presentation
	East Asia and the Pacific Rim	• From Emperor to Citizen: P'u Yi
Integration of Knowledge and Ideas		
Diverse Media		
CC.1.2.9-10.G Analyze various accounts of a subject told in different mediums (e.g., a person’s life story in both print and multimedia), determining which details are emphasized in each account.	Europe I	• The Love Song of J. Alfred Prufrock

Pennsylvania Core Standards (2014) English Language Arts: Grades 9-10	Language Arts 10 A/B	
	Unit Name	Lesson Name
Integration of Knowledge and Ideas Evaluating Arguments		
CC.1.2.9–10.H Delineate and evaluate the argument and specific claims in a text, assessing the validity of reasoning and relevance of evidence.	Nonfiction: Persuasion	<ul style="list-style-type: none"> • Prewriting: Persuasive Writing • Revising Your Speech
	Middle East and South Asia II	<ul style="list-style-type: none"> • Writing Workshop: Research Proposal: Final Draft
Integration of Knowledge and Ideas Analysis Across Texts		
CC.1.2.9–10.I Analyze seminal U.S. documents of historical and literary significance, including how they address related themes and concepts.	The Literature of the Americas	<ul style="list-style-type: none"> • Emancipation
	Adventures of Huckleberry Finn	<ul style="list-style-type: none"> • Adventures of Huckleberry Finn: Lesson 5
Vocabulary Acquisition and Use		
CC.1.2.9–10.J Acquire and use accurately general academic and domain specific words and phrases, sufficient for reading, writing, speaking, and listening at the college- and career-readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.	The Literature of the Americas II	<ul style="list-style-type: none"> • When Greeks Meet • The Third Bank of the River • The Book of Sand
	Adventures of Huckleberry Finn	<ul style="list-style-type: none"> • Adventures of Huckleberry Finn: Lesson 1 • Adventures of Huckleberry Finn: Lesson 2 • Adventures of Huckleberry Finn: Lesson 3 • Adventures of Huckleberry Finn: Lesson 5 • Adventures of Huckleberry Finn: Lesson 6 • Adventures of Huckleberry Finn: Lesson 7 • Adventures of Huckleberry Finn: Lesson 8
	The Importance of Being Earnest	<ul style="list-style-type: none"> • Act I, First Half • Act I, Second Half • Act II, First Half • Act II, Second Half • Act III
Vocabulary Acquisition and Use		
CC.1.2.9–10.K Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade-level reading and content, choosing flexibly from a range of strategies and tools.	The Literature of Americas I	<ul style="list-style-type: none"> • Course Introduction
	East Asia and the Pacific Rim	<ul style="list-style-type: none"> • From Emperor to Citizen: P'u Yi
Range of Reading		
CC.1.2.9–10.L Read and comprehend literary nonfiction and informational text on grade level, reading independently and proficiently.	This standard is fully met in English 9.

Pennsylvania Core Standards (2014) English Language Arts: Grades 11-12	Language Arts 11 A/B	
	Unit Name	Lesson Name
Craft and Structure Vocabulary		
CC.1.2.11–12.F Evaluate how words and phrases shape meaning and tone in texts.	Voices of Modernism (1920s–1940s)	• Hemingway
	The Great Gatsby	• The Great Gatsby: Tone and Point of View
Integration of Knowledge and Ideas Diverse Media		
CC.1.2.11–12.G Integrate and evaluate multiple sources of information presented in different media or formats (e.g., visually, quantitatively) as well as in words in order to address a question or solve a problem.	Early American and Colonial Literature	• Earliest Voices: William Bradford
	The Great Gatsby	• The Great Gatsby: The Jazz Age • The Great Gatsby: F. Scott Fitzgerald
Integration of Knowledge and Ideas Evaluating Arguments		
CC.1.2.11–12.H Analyze seminal texts based upon reasoning, premises, purposes, and arguments.	Early American and Colonial Literature	• Earliest Voices: William Bradford • Earliest Voices: Thomas Paine • Earliest Voices: The Founding Fathers
Integration of Knowledge and Ideas Analysis Across Texts		
CC.1.2.11–12.I Analyze foundational U.S. and world documents of historical, political, and literary significance for their themes, purposes, and rhetorical features.	Early American and Colonial Literature	• Earliest Voices: William Bradford • Earliest Voices: Thomas Paine • Earliest Voices: The Founding Fathers This standard is partially met in this course. The world documents are met in English 12.
Vocabulary Acquisition and Use		
CC.1.2.11–12.J Acquire and use accurately general academic and domain-specific words and phrases, sufficient for reading, writing, speaking, and listening at the college- and career-readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.	Early American and Colonial Literature	• Contemporary Voice: Fred Veilleux
Vocabulary Acquisition and Use		
CC.1.2.11–12.K Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade-level reading and content, choosing flexibly from a range of strategies and tools.	Early American and Colonial Literature	• American Literature: Our Nation's Voice • Earliest Voices: Anne Bradstreet, Phillis Wheatley • Earliest Voice: Jonathan Edwards • Earliest Voices: Olaudah Equiano • Earliest Voices: Thomas Paine • Earliest Voices: The Founding Fathers
	The Night Thoreau Spent in Jail	• Obedience Versus Nonconformity • Transcendentalism: Progress or Threat? • Opposing the War • A Solitary Man • Doing the Impossible • One of the Crowd
	Post War Voices Emerge (1950s–1960s)	• Beat Generation
	Realism and Regionalism	• Sarah Orne Jewett
Range of Reading		
CC.1.2.11–12.L Read and comprehend literary nonfiction and informational text on grade level, reading independently and proficiently.	The Research Paper	• Nonfiction Writing I • Nonfiction Writing II
	The Great Gatsby	• The Great Gatsby: The Jazz Age • The Great Gatsby: F. Scott Fitzgerald

Informative/Explanatory Conventions of Language		
CC.1.4.11–12.F Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling.	American Romanticism	<ul style="list-style-type: none"> • Ralph Waldo Emerson

Pennsylvania Core Standards (2014) English Language Arts: Grades 11-12	Language Arts 11 A/B	
	Unit Name	Lesson Name
Opinion/Argumentative		
CC.1.4.11–12.G Write arguments to support claims in an analysis of substantive topics.	American Romanticism	• Ralph Waldo Emerson
	Voices of Modernism	• Writing Workshop: Literary Analysis Rough Draft • Writing Workshop: Literary Analysis Final Draft
	Post War Voices Emerge (1950s-1960s)	• Speeches
Opinion/Argumentative Focus		
CC.1.4.11–12.H Write with a sharp, distinct focus identifying topic, task, and audience.		
• Introduce the precise, knowledgeable claim.	American Romanticism	• Ralph Waldo Emerson
	Voices of Modernism	• Writing Workshop: Literary Analysis Rough Draft • Writing Workshop: Literary Analysis Final Draft
	Post War Voices Emerge (1950s-1960s)	• Speeches
Opinion/Argumentative Content		
CC.1.4.11–12.I Distinguish the claim(s) from alternate or opposing claims; develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant evidence for each while pointing out the strengths and limitations of both in a manner that anticipates the audience’s knowledge level, concerns, values, and possible biases.	American Romanticism	• Ralph Waldo Emerson
	Voices of Modernism	• Writing Workshop: Literary Analysis Rough Draft • Writing Workshop: Literary Analysis Final Draft
	Post War Voices Emerge (1950s-1960s)	• Speeches
Opinion/Argumentative Organization		
CC.1.4.11–12.J Create organization that logically sequences claim(s), counterclaims, reasons, and evidence; use words, phrases, and clauses as well as varied syntax to link the major sections of the text to create cohesion and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims; provide a concluding statement or section that follows from and supports the argument presented.		
• Use precise language, domain-specific vocabulary, and techniques such as metaphor, simile, and analogy to manage the complexity of the topic.	Voices of Modernism	• Writing Workshop: Literary Analysis Rough Draft • Writing Workshop: Literary Analysis Final Draft
	Post War Voices Emerge (1950s-1960s)	• Compare and Contrast • Speeches • The Final Draft
Opinion/Argumentative Style		
CC.1.4.11–12.K Write with an awareness of the stylistic aspects of composition.		
• Establish and maintain a formal style and objective tone while attending to the norms of the discipline in which they are writing.	American Romanticism	• Ralph Waldo Emerson
	Voices of Modernism	• Writing Workshop: Literary Analysis Rough Draft • Writing Workshop: Literary Analysis Final Draft
	Post War Voices Emerge (1950s-1960s)	• Speeches

Pennsylvania Core Standards (2014) English Language Arts: Grades 11-12	Language Arts 11 A/B	
	Unit Name	Lesson Name
Opinion/Argumentative Conventions of Language		
CC.1.4.11-12.L Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling.	American Romanticism	• Ralph Waldo Emerson
Narrative		
CC.1.4.11-12.M Write narratives to develop real or imagined experiences or events.	The Night Thoreau Spent in Jail	• Crafting a Scene
	Realism and Regionalism	• Alternate Ending: Final Draft
	Contemporary Postmodernism	• Personal Narrative: Final Draft
Narrative Focus		
CC.1.4.11-12.N Engage and orient the reader by setting out a problem, situation, or observation and its significance, establishing one or multiple points of view, and introducing a narrator and/or characters.	The Night Thoreau Spent in Jail	• Crafting a Scene
	Realism and Regionalism	• Alternate Ending: Final Draft
	Contemporary Postmodernism	• Personal Narrative: Final Draft
Narrative Content		
CC.1.4.11-12.O Use narrative techniques such as dialogue, description, reflection, multiple plotlines, and pacing to develop experiences, events, and/or characters; use precise words and phrases, telling details, and sensory language to convey a vivid picture of the experiences, events, settings, and/or characters.	The Night Thoreau Spent in Jail	• Crafting a Scene
	Realism and Regionalism	• Alternate Ending: Final Draft
	Contemporary Postmodernism	• Personal Narrative: Final Draft
Narrative Organization		
CC.1.4.11-12.P Create a smooth progression of experiences or events using a variety of techniques to sequence events so that they build on one another to create a coherent whole and build toward a particular tone and outcome; provide a conclusion that follows from and reflects on what is experienced, observed, or resolved over the course of the narrative.	The Night Thoreau Spent in Jail	• Crafting a Scene
	Realism and Regionalism	• Alternate Ending: Final Draft
	Contemporary Postmodernism	• Personal Narrative: Final Draft
Narrative Style		
CC.1.4.11-12.Q Write with an awareness of the stylistic aspects of writing.		
• Use parallel structure.	Incorporate and assign an activity to write with an awareness of the stylistic aspects of writing using parallel structure.	
• Use various types of phrases and clauses to convey specific meanings and add variety and interest.	The Night Thoreau Spent in Jail	• Crafting a Scene
	Realism and Regionalism	• Alternate Ending: Final Draft
	Contemporary Postmodernism	• Personal Narrative: Final Draft
• Use precise language, domain-specific vocabulary, and techniques such as metaphor, simile, and analogy to manage the complexity of the topic.	The Night Thoreau Spent in Jail	• Crafting a Scene
	Realism and Regionalism	• Alternate Ending: Final Draft
	Contemporary Postmodernism	• Personal Narrative: Final Draft
Narrative Conventions of Language		
CC.1.4.11-12.R Demonstrate a grade-appropriate command of the conventions of standard English grammar, usage, capitalization, punctuation, and spelling.	Realism and Regionalism	• Sarah Orne Jewett

	Unit Name	Lesson Name
Range of Writing		
CC.1.4.11–12.X Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.	Early American and Colonial Literature	• Timed Writing Assessments
	American Romanticism	• Descriptive Essay: Rough Draft
	The Night Thoreau Spent in Jail	• A Solitary Man
	Realism and Regionalism	• Alternate Ending: Rough Draft
	Voices of Modernism	• Writing Workshop: Literary Analysis Rough Draft
	Post War Voices Emerge (1950s-1960s)	• Compare and Contrast • The Rough Draft • The Final Draft
	The Research Paper	• Nonfiction Writing I • Nonfiction Writing II
1.5 Speaking and Listening		
Comprehension and Collaboration		
Collaborative Discussion		
CC.1.5.11–12.A Initiate and participate effectively in a range of collaborative discussions on grade-level topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively	Early American and Colonial Literature	• Timed Writing Assessments
	American Romanticism	• Walt Whitman
	The Night Thoreau Spent in Jail	• One of the Crowd
	Realism and Regionalism	• Sarah Orne Jewett
	The Research Paper	• Synthesizing and Organizing
	The Great Gatsby	• The Great Gatsby: Significance of Time
Comprehension and Collaboration		
Critical Listening		
CC.1.5.11–12.B Evaluate how the speaker’s perspective, reasoning, and use of evidence and rhetoric affect the credibility of an argument through the author’s stance, premises, links among ideas, word choice, points of emphasis, and tone.	Early American and Colonial Literature	• Contemporary Voice: Fred Veilleux • Earliest Voices: Thomas Paine
	American Romanticism	• Contemporary Literary Criticism • Ralph Waldo Emerson • Walt Whitman
	The Night Thoreau Spent in Jail	• One of the Crowd
Comprehension and Collaboration		
Evaluating Information		
CC.1.5.11–12.C Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitative, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.	Early American and Colonial Literature	• Timed Writing Assessments
Presentation of Knowledge and Ideas		
Purpose, Audience, and Task		
CC.1.5.11–12.D Present information, findings, and supporting evidence, conveying a clear and distinct perspective; organization, development, substance, and style are appropriate to purpose, audience, and task.	Early American and Colonial Literature	• Earliest Voice: Jonathan Edwards
	American Romanticism	• Contemporary Literary Criticism • Ralph Waldo Emerson • Walt Whitman
	The Night Thoreau Spent in Jail	• The Play’s the Thing
	Post War Voices Emerge (1950s-1960s)	• The Final Draft

Pennwood Cyber Charter School Application

Pennsylvania Core Standards (2014) English Language Arts: Grades 11-12	Language Arts 11 A/B	
	Unit Name	Lesson Name
Presentation of Knowledge and Ideas Context		
CC.1.5.11–12E Adapt speech to a variety of contexts and tasks.	The Night Thoreau Spent in Jail	• The Play's the Thing
	Post War Voices Emerge (1950s-1960s)	• The Final Draft
Integration of Knowledge and Ideas Multimedia		
CC.1.5.11–12.F Make strategic use of digital media in presentations to add interest and enhance understanding of findings, reasoning, and evidence.	American Romanticism	• Walt Whitman
	Contemporary Postmodernism	• Multicultural Meter: Many New Voices in the Mix
Conventions of Standard English		
CC.1.5.11–12.G Demonstrate command of the conventions of standard English when speaking based on Grades 11–12 level and content.	Incorporate and assign an activity to demonstrate command of the conventions of standard English when speaking based on Grades 11–12 level and content.	

English 12

Pennsylvania Core Standards (2014) English Language Arts: Grades 11-12	Language Arts 12 A/B	
	Unit Name	Lesson Name
1.2 Reading Informational Text		
Key Ideas and Details		
Main Idea		
CC.1.2.11–12.A Determine and analyze the relationship between two or more central ideas of a text, including the development and interaction of the central ideas; provide an objective summary of the text.	The Anglo-Saxon Period: 449-1066	• Unit Introduction
	The Middle Ages: 1066-1485	• The Middle Ages: Unit Introduction
	The Renaissance: 1485-1660	• The Renaissance: 1485–1660: Unit Introduction
	The Restoration and the Enlightenment: 1660-1798	• Lesson 1: Unit Introduction
	The Romantic Period (1798-1832)	• Unit Introduction
	The Victorian Age (1832-1901)	• Unit Introduction
	The Modern Era (1901-Present)	• Unit Introduction: A New Era
Key Ideas and Details		
Text Analysis		
CC.1.2.11–12.B Cite strong and thorough textual evidence to support analysis of what the text says explicitly, as well as inferences and conclusions based on and related to an author’s implicit and explicit assumptions and beliefs.	The Anglo-Saxon Period: 449-1066	• Unit Introduction
	The Middle Ages: 1066-1485	• The Middle Ages: Unit Introduction
	The Renaissance: 1485-1660	• The Renaissance: 1485–1660: Unit Introduction
	The Restoration and the Enlightenment: 1660-1798	• Lesson 1: Unit Introduction
	The Victorian Age (1832-1901)	• Unit Introduction
	The Modern Era (1901-Present)	• Unit Introduction: A New Era
	Key Ideas and Details	
Text Analysis		
CC.1.2.11–12.C Analyze the interaction and development of a complex set of ideas, sequence of events, or specific individuals over the course of the text.	The Anglo-Saxon Period: 449-1066	• Unit Introduction
	The Renaissance: 1485-1660	• The Renaissance: 1485–1660: Unit Introduction
	The Restoration and the Enlightenment: 1660-1798	• Lesson 1: Unit Introduction
	The Victorian Age (1832-1901)	• Unit Introduction
	The Modern Era (1901-Present)	• Unit Introduction: A New Era
Craft and Structure		
Point of View		
CC.1.2.11–12.D Evaluate how an author’s point of view or purpose shapes the content and style of a text.	Frankenstein	• Frankenstein (1)
Craft and Structure		
Text Structure		
CC.1.2.11–12.E Analyze and evaluate the effectiveness of the structure an author uses in his or her exposition or argument, including whether the structure makes points clear, convincing, and engaging.	The Restoration and the Enlightenment: 1660-1798	• Lesson 2: Diaries: Pepys • Lesson 4: The Satirical Essay: Swift • Lesson 6: Writing Workshop: Creative Writing
	Frankenstein	• Frankenstein (8)
Craft and Structure		
Vocabulary		
CC.1.2.11–12.F Evaluate how words and phrases shape meaning and tone in texts.	The Middle Ages: 1066–1485	• The Canterbury Tales: "The Prologue"
	The Renaissance: 1485–1660	• Epigrams and Songs: Jonson
	The Romantic Period (1798–1832)	• Romantic Poetry: Blake
	The Victorian Age (1832–1901)	• Arnold
	The Modern Era (1901–Present)	• Owen, Brooke, Sassoon

Pennsylvania Core Standards (2014) English Language Arts: Grades 11-12	Language Arts 12 A/B	
	Unit Name	Lesson Name
Integration of Knowledge and Ideas Diverse Media		
CC.1.2.11–12.G Integrate and evaluate multiple sources of information presented in different media or formats (e.g., visually, quantitatively) as well as in words in order to address a question or solve a problem.	Frankenstein	• Frankenstein (3)
Integration of Knowledge and Ideas Evaluating Arguments		
CC.1.2.11–12.H Analyze seminal texts based upon reasoning, premises, purposes, and arguments.	This standard is fully met in English 11.	
Integration of Knowledge and Ideas Analysis Across Texts		
CC.1.2.11–12.I Analyze foundational U.S. and world documents of historical, political, and literary significance for their themes, purposes, and rhetorical features.	The Anglo-Saxon Period: 449-1066	• Unit Introduction
	The Restoration and the Enlightenment: 1660-1798	• Lesson 1: Unit Introduction
	The Victorian Age (1832-1901)	• Unit Introduction
	The Modern Era (1901-Present)	• Unit Introduction: A New Era
	This standard is partially met in this course. The U.S. documents are met in English 11.	
Vocabulary Acquisition and Use		
CC.1.2.11–12.J Acquire and use accurately general academic and domain-specific words and phrases, sufficient for reading, writing, speaking, and listening at the college- and career-readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.	This standard is fully met in English 11.	
Vocabulary Acquisition and Use		
CC.1.2.11–12.K Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on grade-level reading and content, choosing flexibly from a range of strategies and tools.	This standard is fully met in English 11.	
Range of Reading		
CC.1.2.11–12.L Read and comprehend literary nonfiction and informational text on grade level, reading independently and proficiently.	The Anglo-Saxon Period: 449-1066	• Unit Introduction
	The Renaissance: 1485-1660	• The Renaissance: 1485–1660: Unit Introduction
	The Restoration and the Enlightenment: 1660-1798	• Lesson 1: Unit Introduction • Lesson 2: Diaries: Pepys
	The Romantic Period (1798-1832)	• Unit Introduction
	The Victorian Age (1832-1901)	• Unit Introduction
	The Modern Era (1901-Present)	• Unit Introduction: A New Era • Virginia Woolf

	Unit Name	Lesson Name
Comprehension and Collaboration Critical Listening		
CC.1.5.11–12.B Evaluate how the speaker’s perspective, reasoning, and use of evidence and rhetoric affect the credibility of an argument through the author’s stance, premises, links among ideas, word choice, points of emphasis, and tone.	Macbeth	<ul style="list-style-type: none"> • History and Heroes; Witches and Warriors • Act I, Scenes I–II • Act I, Scenes III–V • Act I, Scenes VI–VII
	The Renaissance: 1485-1660	<ul style="list-style-type: none"> • Sonnets: Shakespeare
	Frankenstein	<ul style="list-style-type: none"> • Frankenstein (1) • Frankenstein (2) • Frankenstein (3) • Frankenstein (4)
Comprehension and Collaboration Evaluating Information		
CC.1.5.11–12.C Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitative, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.	Writing a Research Paper	<ul style="list-style-type: none"> • Writing a Research Paper • Gathering Information
Presentation of Knowledge and Ideas Purpose, Audience, and Task		
CC.1.5.11–12.D Present information, findings, and supporting evidence, conveying a clear and distinct perspective; organization, development, substance, and style are appropriate to purpose, audience, and task.	Writing a Research Paper	<ul style="list-style-type: none"> • Editing, Proofreading, and Publishing
Presentation of Knowledge and Ideas Context		
CC.1.5.11–12E Adapt speech to a variety of contexts and tasks.	The Anglo-Saxon Period: 449-1066	<ul style="list-style-type: none"> • Unit Introduction
	Writing a Research Paper	<ul style="list-style-type: none"> • Revising at the Sentence Level
Integration of Knowledge and Ideas Multimedia		
CC.1.5.11–12.F Make strategic use of digital media in presentations to add interest and enhance understanding of findings, reasoning, and evidence.	Writing a Research Paper	<ul style="list-style-type: none"> • Writing a Research Paper • Gathering Information • Organizing a Paper • Citations and Works Cited Page
Conventions of Standard English		
CC.1.5.11–12.G Demonstrate command of the conventions of standard English when speaking based on Grades 11–12 level and content.	Incorporate and assign an activity to demonstrate command of the conventions of standard English when speaking based on Grades 11–12 level and content.	

APPENDIX A CURRICULUM

A.5 ALIGNMENT DOCUMENTS

b. MATHEMATICS K - 12

This document is part of Appendix A: Curriculum.

It includes alignment documents for each Mathematics core class for students in Kindergarten through Grade 12.

- Math K
- Math 1
- Math 2
- Math 3
- Math 4
- Math 5
- Math 6
- Math 7
- Algebra Readiness (Pre-Algebra)
- Algebra 1
- Algebra 2
- Geometry

Math K

Pennsylvania Core Standards Mathematics: Kindergarten	Math K A/B	
	Unit Name	Lesson Number
2.1. Numbers and Operations		
(A) Counting & Cardinality		
CC.2.1.K.A.1 Know number names and write and recite the count sequence.	One to Five	5, 6, 7, 8, 9
	Comparing and Ordering 0 to 5	5, 8, 9
	Six to Ten	1, 2, 3, 4, 6, 7, 8, 9
	Comparing and Ordering Numbers 0 to 10	1, 10
	Numbers to 100	1, 3, 5
	Decomposing Numbers 11 to 19	1
CC.2.1.K.A.2 Apply one-to-one correspondence to count the number of objects.	One to Five	5, 6, 7, 8
	Comparing and Ordering 0 to 5	8, 9
	Six to Ten	1, 2, 3, 4, 6, 7, 8
	Comparing and Ordering Numbers 0 to 10	9, 10
	Numbers to 100	1, 3, 5
	Decomposing Numbers 11 to 19	1
CC.2.1.K.A.3 Apply the concept of magnitude to compare numbers and quantities.	One to Five	5, 6, 8, 9
	Comparing and Ordering 0 to 5	2, 3, 4, 8, 9, 10
	Six to Ten	1, 3, 6, 9
	Comparing and Ordering Numbers 0 to 10	1, 2, 3, 4, 5, 7, 8, 9, 10, 11
	Numbers to 100	1, 2
	Understanding Subtraction	3
	Composing and Decomposing Numbers to 10	10
(B) Numbers & Operations in Base Ten		
CC.2.1.K.B.1 Use place value to compose and decompose numbers within 19.	Understanding Addition	2, 3, 6, 8
	Understanding Subtraction	2, 3, 6, 8
	Composing and Decomposing Numbers to 10	1, 2, 3, 4, 6, 7, 8, 9
	Composing Numbers 11 to 19	5
	Decomposing Numbers 11 to 19	6
(C) Numbers & Operations— Fractions		
Intentionally Blank		
2.2 Algebraic Concepts		
(A) Operations and Algebraic Thinking		
CC.2.2.K.A.1 Extend concepts of putting together and taking apart to add and subtract within 10.	Comparing and Ordering Numbers 0 to 10	4, 5, 7, 8, 9, 10
	Understanding Addition	1, 2, 3, 4, 6, 7, 8
	Understanding Subtraction	1, 2, 4, 6, 7, 8
	Composing and Decomposing Numbers to 10	2, 4, 7, 9, 10
2.3 Geometry		
(A) Geometry		
CC.2.3.K.A.1 Identify and describe two- and three-dimensional shapes.	Identifying and Describing Shapes	1, 2, 3, 4, 5, 7, 8, 10
	Geometry	2, 3, 6, 7
CC.2.3.K.A.2 Analyze, compare, create, and compose two- and three-dimensional shapes.	Identifying and Describing Shapes	1, 2, 4, 7, 8, 9
	Geometry	2, 3, 5, 6, 7, 9

Pennsylvania Core Standards Mathematics: Kindergarten	Math K A/B	
	Unit Name	Lesson Number
2.4 Measurement, Data, and Probability		
(A) Measurement and Data		
CC.2.4.K.A.1 Describe and compare attributes of length, area, weight, and capacity of everyday objects.	Measurement	1, 2, 3, 6, 7, 8, 9
	Identifying and Describing Shapes	10
	One to Five	5, 6, 7, 8
	Comparing and Ordering 0 to 5	8, 9
	Six to Ten	1, 2, 3, 4, 6, 7, 8
CC.2.4.K.A.4 Classify objects and count the number of objects in each category.	Numbers to 100	1, 3, 5
	Decomposing Numbers 11 to 19	1
	Measurement	1
	Identifying and Describing Shapes	7, 10
	Geometry	7

Math 1

Pennsylvania Core Standards Mathematics: Grade 1	Math 1 A/B	
	Unit Name	Lesson Number
2.1. Numbers and Operations		
(A) Counting & Cardinality		
Intentionally Blank		
(B) Numbers & Operations in Base Ten		
CC.2.1.1.B.1 Extend the counting sequence to read and write numerals to represent objects.	Addition Facts to 20: Use Strategies	1, 2
	Subtraction Facts to 20: Use Strategies	3
	Extend the Counting Sequence	2, 3, 4, 5
	Understand Place Value	1
	Compare Two-Digit Numbers	1, 2
CC.2.1.1.B.2 Use place value concepts to represent amounts of tens and ones and to compare two digit numbers.	Addition and Subtraction Problems to 10	2, 5
	Work With Addition and Subtraction Equations	6
	Understand Place Value	1, 2, 3, 4, 5
	Compare Two-Digit Numbers	1, 2, 3, 4, 5
	Use Models and Strategies to Add Tens and Ones	5, 6, 7, 8
	Use Models to Subtract Tens	1, 2, 4, 5, 6, 7
CC.2.1.1.B.3 Use place value concepts and properties of operations to add and subtract within 100.	Use Models and Strategies to Add Tens and Ones	1, 2, 4, 5, 6, 7, 8, 9
	Use Models to Subtract Tens	1, 2, 3, 4, 5, 6
(C) Numbers & Operations— Fractions		
Intentionally Blank		
2.2 Algebraic Concepts		
(A) Operations and Algebraic Thinking		
CC.2.2.1.A.1 Represent and solve problems involving addition and subtraction within 20.	Addition and Subtraction Problems to 10	1, 2, 3, 4, 5, 6, 7, 8
	Fluently Add and Subtract within 10	1, 2, 3, 4, 5, 6, 7, 8, 9
CC.2.2.1.A.2 Understand and apply properties of operations and the relationship between addition and subtraction.	Addition and Subtraction Problems to 10	1, 2, 4, 5, 6, 7, 8
	Fluently Add and Subtract within 10	1, 3, 4, 5, 6, 7, 8, 9
	Addition Facts to 20: Use Strategies	1, 2, 3, 4, 5, 6, 7, 8
	Subtraction Facts to 20: Use Strategies	1, 2, 3, 4, 5, 6, 7, 8
2.3 Geometry		
(A) Geometry		
CC.2.3.1.A.1 Compose and distinguish between two- and three-dimensional shapes based on their attributes.	Reason with Shapes and Their Attributes	1, 2, 3, 4, 5, 6, 7, 8
CC.2.3.1.A.2 Use the understanding of fractions to partition shapes into halves and quarters.	Equal Shares of Circles and Rectangles	1, 2, 3, 4
2.4 Measurement, Data, and Probability		
(A) Measurement and Data		
CC.2.4.1.A.1 Order lengths and measure them both indirectly and by repeating length units.	Measure Lengths	3, 4
CC.2.4.1.A.2 Tell and write time to the nearest half hour using both analog and digital clocks.	Time	3
CC.2.4.1.A.4 Represent and interpret data using tables/charts	Represent and Interpret Data	1, 2, 3, 4

Math 2

Pennsylvania Core Standards Mathematics: Grade 2	Math 2 A/B	
	Unit Name	Lesson Number
2.1. Numbers and Operations		
(A) Counting & Cardinality		
Intentionally Blank		
(B) Numbers & Operations in Base Ten		
CC.2.1.2.B.1 Use place value concepts to represent amounts of tens and ones and to compare three digit numbers.	Numbers to 1,000	1, 2, 3, 4, 5, 6, 8, 9, 10
	Add using Models and Strategies	1, 5, 6, 7
	Subtract using Models and Strategies	1, 5, 6, 7
CC.2.1.2.B.2 Use place value concepts to read, write, and skip count to 1000.	Numbers to 1,000	1, 2, 4, 5, 6, 7
CC.2.1.2.B.3 Use place value understanding and properties of operations to add and subtract within 1000.	Add within 100 Using Strategies	1, 2, 3, 4, 5, 7
	Fluently Add within 100	1, 2, 3, 4, 6
	Subtract within 100 Using Strategies	1, 2, 3, 4, 5, 6, 7
	Fluently Subtract within 100	1, 2, 3, 4, 5, 6
	Solving with Addition and Subtraction	1, 2, 3, 4
	Add using Models and Strategies	1, 2, 3, 4, 5, 6, 7
	Subtract using Models and Strategies	1, 2, 3, 4, 5, 6, 7
(C) Numbers & Operations— Fractions		
Intentionally Blank		
2.2 Algebraic Concepts		
(A) Operations and Algebraic Thinking		
CC.2.2.2.A.1 Represent and solve problems involving addition and subtraction within 100.	Add within 100 Using Strategies	1, 2, 3, 4, 5, 7
	Fluently Add within 100	1, 2, 3, 4, 6
	Subtract within 100 Using Strategies	1, 2, 3, 4, 5, 6, 7
	Fluently Subtract within 100	1, 2, 3, 4, 5, 6
	Solving with Addition and Subtraction	1, 2, 3, 4
	Add using Models and Strategies	1, 2, 3, 4, 5, 6, 7
	Subtract using Models and Strategies	1, 2, 3, 4, 5, 6, 7
CC.2.2.2.A.2 Use mental strategies to add and subtract within 20.	Fluently Add and Subtract within 20	1, 2, 3, 4, 5, 6, 7, 8, 9, 10
	Work with Equal Groups	2, 3
CC.2.2.2.A.3 Work with equal groups of objects to gain foundations for multiplication.	Work with Equal Groups	3
2.3 Geometry		
(A) Geometry		
CC.2.3.2.A.1 Analyze and draw two- and three-dimensional shapes having specified attributes.	Shapes and Their Attributes	3, 4
CC.2.3.2.A.2 Use the understanding of fractions to partition shapes into halves, quarters, and thirds.	Shapes and Their Attributes	6, 7, 8
2.4 Measurement, Data, and Probability		
(A) Measurement and Data		
	Measuring Length	1, 2, 3, 4, 5, 6, 7, 8

Pennsylvania Core Standards Mathematics: Grade 2	Math 2 A/B	
	Unit Name	Lesson Number
CC.2.4.2.A.1 Measure and estimate lengths in standard units using appropriate tools.	More Addition, Subtraction, and Length	1, 2, 4
	Graphs and Data	1
CC.2.4.2.A.2 Tell and write time to the nearest five minutes using both analog and digital clocks.	Work with Time and Money	3
CC.2.4.2.A.3 Solve problems and make change using coins and paper currency with appropriate symbols.	Work with Time and Money	1, 2, 6
CC.2.4.2.A.4 Represent and interpret data using line plots, picture graphs, and bar graphs.	Graphs and Data	1, 2, 3, 4, 5
	Measuring Length	7, 8
CC.2.4.2.A.6 Extend the concepts of addition and subtraction to problems involving length.	More Addition, Subtraction, and Length	1, 2, 3

Math 3

Pennsylvania Core Standards Mathematics: Grade 3	Math 3 A/B	
	Unit Name	Lesson Number
2.1. Numbers and Operations		
(A) Counting & Cardinality		
Intentionally Blank		
(B) Numbers & Operations in Base Ten		
CC.2.1.3.B.1 Apply place value understanding and properties of operations to perform multi-digit arithmetic.	Strategies to Add and Subtract Fluently Add and Subtract within 1,000	1, 2, 4, 7 1, 2, 3, 4, 5, 6
(C) Numbers & Operations— Fractions		
CC.2.1.3.C.1 Explore and develop an understanding of fractions as numbers.	Understand Fractions as Numbers Fraction Equivalence and Comparison	1, 2, 3, 4, 5, 6 1, 2, 3, 4, 5, 6, 7, 8
2.2 Algebraic Concepts		
(A) Operations and Algebraic Thinking		
CC.2.2.3.A.1 Represent and solve problems involving multiplication and division.	Whole Number Multiplication and Division Multiplication Facts: Use Patterns Apply Properties of Multiplication Division Facts: Use Multiplication Fluently Multiply and Divide Within 100 Multiply by Multiples of 10	1, 2, 3, 4, 5, 6, 7 1, 2, 3, 4, 5, 6 1, 2, 3, 4, 5, 6, 7 1, 2, 3, 4, 5, 6, 7, 8, 9 1, 2, 3, 4, 5, 6, 7 1, 2, 3
CC.2.2.3.A.2 Understand properties of multiplication and the relationship between multiplication and division.	Whole Number Multiplication and Division Division Facts: Use Multiplication Fluently Multiply and Divide Within 100	1 1, 2, 3, 4, 5, 7, 8, 9 2, 3, 5, 6, 7
CC.2.2.3.A.3 Demonstrate multiplication and division fluency.	Whole Number Multiplication and Division Multiplication Facts: Use Patterns Apply Properties of Multiplication Division Facts: Use Multiplication Fluently Multiply and Divide Within 100 Multiply by Multiples of 10	1, 2, 3, 4, 5, 6, 7 1, 2, 3, 4, 5, 6 1, 2, 3, 4, 5, 6, 7 1, 2, 3, 4, 5, 6, 7, 8, 9 1, 2, 3, 4, 5, 6, 7 1, 2, 3
CC.2.2.3.A.4 Solve problems involving the four operations, and identify and explain patterns in arithmetic.	Whole Number Multiplication and Division Multiplication Facts: Use Patterns Apply Properties of Multiplication Division Facts: Use Multiplication Fluently Multiply and Divide Within 100 Multiply by Multiples of 10 Strategies to Add and Subtract Fluently Add and Subtract within 1,000 Solve Problems with Whole Numbers	1, 2, 3, 4, 5, 6, 7 1, 2, 3, 4, 5, 6 1, 2, 3, 4, 5, 6, 7 1, 2, 3, 4, 5, 6, 7, 8, 9 1, 2, 3, 4, 5, 6, 7 1, 2, 3 1, 2, 4, 5, 6 1, 2, 3, 4, 5, 6 1, 2, 3, 4
2.3 Geometry		
(A) Geometry		

Pennsylvania Core Standards Mathematics: Grade 3	Math 3 A/B	
	Unit Name	Lesson Number
CC.2.3.3.A.1 Identify, compare, and classify shapes and their attributes.	Attributes of Two-Dimensional Shapes	1, 2, 3, 4
CC.2.3.3.A.2 Use the understanding of fractions to partition shapes into parts with equal areas and express the area of each part as a unit fraction of the whole.	Understand Fractions as Numbers Fraction Equivalence and Comparison	1, 2, 3, 4, 5, 6 1, 2, 3, 4, 5, 6, 7, 8
2.4 Measurement, Data, and Probability		
(A) Measurement and Data		
CC.2.4.3.A.1 Solve problems involving measurement and estimation of temperature, liquid volume, mass or length.	Represent and Interpret Data Time, Mass, Capacity	1 4, 5, 6, 7, 8
CC.2.4.3.A.2 Tell and write time to the nearest minute and solve problems by calculating time intervals.	Time, Mass, Capacity	1, 2, 3, 8
CC.2.4.3.A.3 Solve problems and make change involving money using a combination of coins and bills.	Solve Problems with Whole Numbers Represent and Interpret Data	1, 2, 3, 4 6
CC.2.4.3.A.4 Represent and interpret data using tally charts, tables, pictographs, line plots, and bar graphs.	Represent and Interpret Data	1, 2, 3, 4, 5
CC.2.4.3.A.5 Determine the area of a rectangle and apply the concept to multiplication and to addition.	Whole Number Multiplication and Division Multiplication Facts: Use Patterns Apply Properties of Multiplication Division Facts: Use Multiplication Connect Area to Multiplication and Addition	1, 3 5, 6 2, 3, 4, 5, 6 1, 2, 3, 4, 9 4, 5, 6, 7
CC.2.4.3.A.6 Solve problems involving perimeters of polygons and distinguish between linear and area measures.	Solve Perimeter Problems	1, 2, 3, 4, 5

Math 4

Pennsylvania Core Standards Mathematics: Grade 4	Math 4 A/B	
	Unit Name	Lesson Number
2.1. Numbers and Operations		
(A) Counting & Cardinality		
Intentionally Blank		
(B) Numbers & Operations in Base Ten		
CC.2.1.4.B.1 Apply place value concepts to show an understanding of multi-digit whole numbers.	Generalize Place Value Understanding	1, 2, 3, 4, 5
	Fluently Add and Subtract Multi-Digit Numbers	1, 4
	Multiply by 1-Digit Numbers	1, 4, 6, 7, 8, 9
	Multiply by 2-Digit Numbers	5, 7, 8
	Divide by 1-Digit Numbers	1, 3, 5, 7, 9
CC.2.1.4.B.2 Use place value understanding and properties of operations to perform multi-digit arithmetic.	Understand and Compare Decimals	2, 5
	Fluently Add and Subtract Multi-Digit Numbers	1, 3, 4, 5, 6
	Multiply by 1-Digit Numbers	1
(C) Numbers & Operations— Fractions	Multiply by 2-Digit Numbers	1, 3, 4, 5, 6, 7, 8, 9, 10
CC.2.1.4.C.1 Extend the understanding of fractions to show equivalence and ordering.	Fraction Equivalence and Ordering	1, 2, 3, 4, 5, 6
	Addition and Subtraction of Fractions	7, 8
CC.2.1.4.C.2 Build fractions from unit fractions by applying and extending previous understandings of operations on whole numbers.	Addition and Subtraction of Fractions	2, 9, 10
	Multiplication Concepts with Fractions	1
CC.2.1.4.C.3 Connect decimal notation to fractions, and compare decimal fractions (base 10 denominator, e.g, 19/100).	Understand and Compare Decimals	1, 3
2.2 Algebraic Concepts		
(A) Operations and Algebraic Thinking		
CC.2.2.4.A.1 Represent and solve problems involving the four operations.	Fluently Add and Subtract Multi-Digit Numbers	1, 3, 4, 5, 6
	Multiply by 1-Digit Numbers	1, 2, 3, 4, 6, 7, 8, 9
	Multiply by 2-Digit Numbers	1, 3, 4, 5, 6, 7, 8, 9
	Divide by 1-Digit Numbers	1, 2, 3, 4, 5, 6, 7, 8, 9
	Solve Problems with Whole Numbers	1, 2, 3, 4
	Factors and Multiples	2, 4, 5
CC.2.2.4.A.2 Develop and/or apply number theory concepts to find factors and multiples.	Angles and Angle Measurement	5
	Factors and Multiples	1, 2, 3, 4, 5
CC.2.2.4.A.4 Generate and analyze patterns using one rule.	Algebra: Generate and Analyze Patterns	2, 4
2.3 Geometry		
(A) Geometry		
CC.2.3.4.A.1 Draw lines and angles and identify these in two-dimensional figures.	Angles and Angle Measurement	4, 5
CC.2.3.4.A.2 Classify two-dimensional figures by properties of their lines and angles.	Lines, Angles, and Shapes	2, 3, 6
CC.2.3.4.A.3 Recognize symmetric shapes and draw lines of symmetry.	Lines, Angles, and Shapes	4, 5

Pennsylvania Core Standards Mathematics: Grade 4	Math 4 A/B	
	Unit Name	Lesson Number
2.4 Measurement, Data, and Probability		
(A) Measurement and Data		
CC.2.4.4.A.1 Solve problems involving measurement and conversions from a larger unit to a smaller unit.	Find Equivalence in Units of Measure	1, 2, 3, 4, 5
CC.2.4.4.A.2 Translate information from one type of data display to another.	Show and Interpret Data on Line Plots	3: Extend the lesson to translate information from one data display to another.
CC.2.4.4.A.4 Represent and interpret data involving fractions using information provided in a line plot.	Show and Interpret Data on Line Plots	1, 2, 3, 4
CC.2.4.4.A.6 Measure angles and use properties of adjacent angles to solve problems.	Angles and Angle Measurement	2, 3, 4, 5, 6

Math 5

Pennsylvania Core Standards Mathematics: Grade 5	Math 5 A/B	
	Unit Name	Lesson Number
2.1. Numbers and Operations		
(A) Counting & Cardinality		
Intentionally Blank		
(B) Numbers & Operations in Base Ten		
CC.2.1.5.B.1 Apply place value to show an understanding of operations and rounding as they pertain to whole numbers and decimals.	Understand Place Value	1, 2, 3, 4, 5, 6, 7
	Add and Subtract Decimals to Hundredths	2
	Multiply Multi-Digit Whole Numbers	2, 4
	Strategies to Multiply Decimals	1, 2, 3, 7, 8, 9
	Strategies to Divide Whole Numbers	1, 2, 3
CC.2.1.5.B.2 Extend an understanding of operations with whole numbers to perform operations including decimals.	Strategies to Divide Decimals	1, 2, 3, 4, 5, 6
	Add and Subtract Decimals to Hundredths	1, 3, 4, 5, 6
	Strategies to Multiply Decimals	1, 2, 3, 4, 5, 6, 7, 8
	Strategies to Divide Decimals	1, 2, 3, 4, 5, 6, 7
(C) Numbers & Operations— Fractions		
CC.2.1.5.C.1 Use the understanding of equivalency to add and subtract fractions.	Add and Subtract Fractions	3, 4, 5, 7, 8, 9, 10
CC.2.1.5.C.2 Apply and extend previous understandings of multiplication and division to multiply and divide fractions.	Multiply Fractions	1, 2, 3, 4, 6, 7
	Divide Fractions	2, 3, 4, 5, 6, 7, 8
2.2 Algebraic Concepts		
(A) Operations and Algebraic Thinking		
CC.2.2.5.A.1 Interpret and evaluate numerical expressions using order of operations.	Algebra: Numerical Expressions	1, 2, 5
CC.2.2.5.A.4 Analyze patterns and relationships using two rules.	Understand Place Value	7
	Multiply Multi-Digit Whole Numbers	1
	Strategies to Multiply Decimals	1
	Strategies to Divide Whole Numbers	1, 2
	Strategies to Divide Decimals	1, 6
	Graph Points on the Coordinate Plane	3, 4
	Algebra: Patterns and Relationships	1, 2, 3, 4
2.3 Geometry		
(A) Geometry		
CC.2.3.5.A.1 Graph points in the first quadrant on the coordinate plane and interpret these points when solving real world and mathematical problems.	Graph Points on the Coordinate Plane	1, 2, 3, 4
	Algebra: Patterns and Relationships	3, 4
CC.2.3.5.A.2 Classify two-dimensional figures into categories based on an understanding of their properties.	Classify Two-Dimensional Figures	1, 2, 3, 4
2.4 Measurement, Data, and Probability		
(A) Measurement and Data		
CC.2.4.5.A.1 Solve problems using conversions within a given measurement system.	Convert Measurements	1, 2, 3, 4, 5, 6, 7, 8

Pennsylvania Core Standards Mathematics: Grade 5	Math 5 A/B	
	Unit Name	Lesson Number
CC.2.4.5.A.2 Represent and interpret data using appropriate scale.	Represent and Interpret Data	1, 2, 3: Extend lesson 3 to represent and interpret data using appropriate scale.
CC.2.4.5.A.4 Solve problems involving computation of fractions using information provided in a line plot.	Represent and Interpret Data	1, 2, 3, 4
CC.2.4.5.A.5 Apply concepts of volume to solve problems and relate volume to multiplication and to addition.	Understand Volume Concepts	1, 2, 3, 4, 5, 6

Math 6

Pennsylvania Core Standards (2014) Mathematics: Grade 6	Math 6 A/B	
	Unit Name	Lesson Name
2.1. Numbers and Operations		
(D) Ratios & Proportional Relationships		
CC.2.1.6.D.1 Understand ratio concepts and use ratio reasoning to solve problems.	Ratios, Proportions, and Percents	<ul style="list-style-type: none"> • Ratios and Equivalent Ratios • Understanding and Using Unit Rates • Proportions • Scale Drawings • Putting It All Together: Ratios, Rates, Proportions
(E) The Number System		
CC.2.1.6.E.1 Apply and extend previous understandings of multiplication and division to divide fractions by fractions.	Multiplying and Dividing Fractions	<ul style="list-style-type: none"> • Multiplying a Whole Number and a Fraction • Multiplying Two or More Fractions • Multiplication with Mixed Numbers • Multiplication of Fractions Review • Division with Fractions • Division with Mixed Numbers • Solving Equations with Fractions
CC.2.1.6.E.2 Identify and choose appropriate processes to compute fluently with multi-digit numbers.	Whole Numbers and Decimals	<ul style="list-style-type: none"> • Order of Operations in Numerical Expressions • Problem Solving: The Four-Step Plan
	Patterns and Variables	<ul style="list-style-type: none"> • Algebraic Expressions • What Are Equations? • Problem Solving and Equations

CC.2.3.HS.A.7 Apply trigonometric ratios to solve problems involving right triangles.	Right Triangles and Trigonometry	• Trigonometry • Angles of Elevation and Depression • Law of Sines and Law of Cosines
CC.2.3.HS.A.8 Apply geometric theorems to verify properties of circles.	Circles	• Tangent Lines • Chords and Arcs
CC.2.3.HS.A.9 Extend the concept of similarity to determine arc lengths and areas of sectors of circles.	Circles	• Chords and Arcs • Inscribed Angles • Angle Measures and Segment Lengths • Circles in the Coordinate Plane
CC.2.3.HS.A.10 Translate between the geometric description and the equation for a conic section.	Circles	• Circles in the Coordinate Plane
CC.2.3.HS.A.11 Apply coordinate geometry to prove simple geometric theorems algebraically.	Polygons and Quadrilaterals	• Proofs Using Coordinate Geometry
CC.2.3.HS.A.12 Explain volume formulas and use them to solve problems.	Surface Area and Volume	• Volumes of Prisms and Cylinders • Volumes of Pyramids and Cones • Surface Areas and Volumes of Spheres • Areas and Volumes of Similar Solids • Cereal Box Design Project
CC.2.3.HS.A.13 Analyze relationships between two-dimensional and three-dimensional objects.	Tools of Geometry	• Nets and Drawings for Visualizing Geometry
	Surface Area and Volume	• Space Figures and Cross Sections • Surface Areas of Prisms and Cylinders • Surface Areas of Pyramids and Cones • Volumes of Prisms and Cylinders • Volumes of Pyramids and Cones • Surface Areas and Volumes of Spheres • Areas and Volumes of Similar Solids
CC.2.3.HS.A.14	Transformations	• Personal Logo
	Polygons and Quadrilaterals	• Blueprint Project

Pennsylvania Core Standards (2014) Mathematics: High School	Geometry A/B	
	Unit Name	Lesson Name
Apply geometric concepts to model and solve real world problems.	Area	• Car Wheel Project
	Surface Area and Volume	• Cereal Box Design Project
2.4 Measurement, Data, and Probability		
(B) Statistics and Probability		
CC.2.4.HS.B.1 Summarize, represent, and interpret data on a single count or measurement variable.	This standard is fully met in Algebra 1 and Algebra 2.	
CC.2.4.HS.B.2 Summarize, represent, and interpret data on two categorical and quantitative variables.	This standard is fully met in Algebra 1 and Algebra 2.	
CC.2.4.HS.B.3 Analyze linear models to make interpretations based on the data.	This standard is fully met in Algebra 1 and Algebra 2.	
CC.2.4.HS.B.4 Recognize and evaluate random processes underlying statistical experiments.	This standard is fully met in Algebra 2.	
CC.2.4.HS.B.5 Make inferences and justify conclusions based on sample surveys, experiments, and observational studies.	This standard is fully met in Algebra 1 and Algebra 2.	
CC.2.4.HS.B.6 Use the concepts of independence and conditional probability to interpret data.	This standard is fully met in Algebra 2.	
CC.2.4.HS.B.7 Apply the rules of probability to compute probabilities of compound events in a uniform probability model.	This standard is fully met in Algebra 2.	

APPENDIX A CURRICULUM

A.5 ALIGNMENT DOCUMENTS

c. SCIENCE K - 12

This document is part of Appendix A: Curriculum.

It includes alignment documents for each Science core class for students in Kindergarten through Grade 12.

- Science K
- Science 1
- Science 2
- Science 3
- Science 4
- Science 5
- Science 6
- Science 7
- Science 8
- Physical Science
- Biology
- Chemistry
- Physics

Science K

Pennsylvania Academic Standards Science: Kindergarten	Science K A/B	
	Unit Name	Lesson Number
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
3.1.K.A1. Identify the similarities and differences of living and nonliving things.	Living and Nonliving Things	1, 2, 3
2 Energy Flow		
Intentionally Blank		
3 Life Cycles		
3.1.K.A3 Observe, compare, and describe stages of life cycles for plants and/or animals.	Plants and Animals	1, 2, 3, 4, 5
4 Cell Cycles		
Intentionally Blank		
5 Form and Function		
3.1.K.A5 Observe and describe structures and behaviors of a variety of common animals.	Living and Nonliving Things	5, 6, 7
6 Organization		
Intentionally Blank		
7 Molecular Basis of Life		
Intentionally Blank		
8 Unifying Themes		
Intentionally Blank		
3.1.B. Genetics		
1 Heredity		
3.1.K.B1. Observe and describe how young animals resemble their parents and other animals of the same kind.	Plants and Animals	1, 2, 3
2 Reproduction		
Intentionally Blank		
3 Molecular Basis of Life		
Intentionally Blank		
4 Biotechnology		
Intentionally Blank		
5 Unifying Themes		
Intentionally Blank		
3.1.C. Evolution		
1 Natural Selection		
Intentionally Blank		
2 Adaptation		
3.1.K.C2. Describe changes animals and plants undergo throughout the seasons.	More Plants and Animals	1
3 Unifying Themes		

Pennsylvania Academic Standards Science: Kindergarten	Science K A/B	
	Unit Name	Lesson Number
3.1.K.C3. CONSTANCY AND CHANGE Describe changes that occur as a result of climate.	More Plants and Animals	1
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
3.2.K.A1. Identify and classify objects by observable properties of matter. Compare different kinds of materials and	All About Objects	1, 2, 3, 4, 5, 6, 8
	Matter and Mixtures	2, 3, 4
2 Structure of Matter		
Intentionally Blank		
3 Matter and Energy		
3.2.K.A3. Describe the way matter can change.	Matter and Mixtures	1, 5
4 Reactions		
Intentionally Blank		
5 Unifying Themes		
3.2.K.A5. CONSTANCY AND CHANGE	All About Objects	2
	Matter and Mixtures	1, 2, 3
3.2.B. Physics		
1 Force & Motion of Particles and Rigid Bodies		
Intentionally Blank		
2 Energy Storage and Transformations: Conservation Laws		
Intentionally Blank		
3 Heat/Heat Transfer		
3.2.K.B3. Describe how temperature can affect the body.	More Plants and Animals	3: Incorporate and assign an activity to describe how temperature can affect the body.
4 Electrical and Magnetic Energy		
Intentionally Blank		
5 Nature of Waves (Sound and Light Energy)		
Intentionally Blank		
6 Unifying Themes		
3.2.K.B6. ENERGY Recognize that light from the sun is an important source of energy for living and nonliving systems and some source of energy is needed for all organisms to stay alive and grow.	Living and Nonliving Things	4: Extend the lesson to recognize that light from the sun is an important source of energy for living and nonliving systems and some source of energy is needed for all organisms to stay alive and grow.
3.3. Earth and Space Sciences		
3.3.A. Earth Structure, Processes and Cycles		
1 Earth Features and the Processes that Change It		

Pennsylvania Academic Standards Science: Kindergarten	Science K A/B	
	Unit Name	Lesson Number
3.3.K.A1. Distinguish between three types of earth materials – rock, soil, and sand.	Earth and Sky	2: Extend the lesson to distinguish between three types of earth materials– rock, soil, and sand.
2 Earth's Resources/Materials		
Intentionally Blank		
3 Earth's History		
Intentionally Blank		
4 Water		
3.3.K.A4. Identify sources of water for human consumption and use.	More Plants and Animals	2
5 Weather and Climate		
3.3.K.A5. Record daily weather conditions using simple charts and graphs	More Plants and Animals Earth and Sky	1 6, 7, 8
6 Unifying Themes		
Intentionally Blank		
3.3.B. Origin and Evolution of the Universe		
1 Composition and Structure		
Intentionally Blank		
2 Unifying Themes		
Intentionally Blank		
3.4. Technology and Engineering Education		
3.4.A. The Scope of Technology		
1 Characteristics of Technology		
Intentionally Blank		
2 Core Concepts of Technology		
Intentionally Blank		
3.4.B. Technology and Society		
1 Effects of Technology		
Intentionally Blank		
2 Technology and Environment		
Intentionally Blank		
3 Society and Development of Technology		
Intentionally Blank		
4 Technology and History		
Intentionally Blank		
3.4.C. Technology and Engineering Design		
1 Design Attributes		
Intentionally Blank		
2 Engineering Design		
Intentionally Blank		
3 Research & Development, Invention & Innovation, Experimentation/Problem Solving and Troubleshooting		

Pennsylvania Academic Standards Science: Kindergarten	Science K A/B	
	Unit Name	Lesson Number
Intentionally Blank		
3.4.D. Abilities for a Technological World		
1 Applying the Design Process		
Intentionally Blank		
2 Using and Maintaining Technological Systems		
Intentionally Blank		
3 Assessing Impact of Products and Systems		
Intentionally Blank		
3.4.E. The Designed World		
1 Medical Technologies		
Intentionally Blank		
2 Agricultural and Related Biotechnologies		
Intentionally Blank		
3 Energy and Power Technologies		
Intentionally Blank		
4 Information and Communication Technologies		
Intentionally Blank		
5 Transportation Technologies		
Intentionally Blank		
6 Manufacturing Technologies		
Intentionally Blank		
7 Construction Technologies		
Intentionally Blank		

Science 1

Pennsylvania Academic Standards Science: Grade 1	Science 1 A/B	
	Unit Name	Lesson Number
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
3.1.1.A1. Categorize living and nonliving things by external characteristics.	Be a Scientist	1
	Plants are Living Things	1
	All About Animals	1, 2, 4, 5
2 Energy Flow		
3.1.1.A2. Investigate the dependence of living things on the sun’s energy, water, food/nutrients, air, living space, and shelter.	Plants Grow and Change	3
	All About Animals	3
	Places to Live	1, 3, 4
3 Life Cycles		
Intentionally Blank		
4 Cell Cycles		
Intentionally Blank		
5 Form and Function		
3.1.1.A5. Identify and describe plant parts and their function.	Plants are Living Things	2, 3, 4
	Places to Live	2
6 Organization		
Intentionally Blank		
7 Molecular Basis of Life		
Intentionally Blank		
8 Unifying Themes		
Intentionally Blank		
3.1.B. Genetics		
1 Heredity		
3.1.1.B1. Grow plants from seed and describe how they grow and change. Compare to adult plants.	Plants Grow and Change	3
2 Reproduction		
Intentionally Blank		
3 Molecular Basis of Life		
Intentionally Blank		
4 Biotechnology		
Intentionally Blank		
5 Unifying Themes		
Intentionally Blank		
3.1.C. Evolution		
1 Natural Selection		
Intentionally Blank		
2 Adaptation		
Intentionally Blank		
3 Unifying Themes		

Pennsylvania Academic Standards Science: Grade 1	Science 1 A/B	
	Unit Name	Lesson Number
3.1.1.C3. CONSTANCY AND CHANGE Describe changes that occur as a result of habitat.	Places to Live	4
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
3.2.1.A1. Observe and describe the properties of liquids and solids. Investigate what happens when solids are mixed with water and other liquids are mixed with water.	Matter Everywhere	1, 2, 4
	Changes in Matter	3
	On the Move	4
2 Structure of Matter		
Intentionally Blank		
3 Matter and Energy		
3.2.1.A3. Identify how heating, melting, cooling, etc., may cause changes in properties of materials.	Matter Everywhere	2
	Changes in Matter	1, 2, 4
	Energy Everywhere	1
4 Reactions		
3.2.1.A4. Observe and describe what happens when substances are heated or cooled. Distinguish between changes that are reversible (melting, freezing) and not reversible (e.g. baking a cake, burning fuel).	Matter Everywhere	2
	Changes in Matter	1, 2, 4
	Energy Everywhere	1
5 Unifying Themes		
3.2.1.A5. CONSTANCY AND CHANGE	Matter Everywhere	1, 2, 4
	Changes in Matter	2
3.2.B. Physics		
1 Force & Motion of Particles and Rigid Bodies		
3.2.1.B1. Demonstrate various types of motion.	On the Move	1
3.2.1.B1. Observe and describe how pushes and pulls change the motion of objects.	On the Move	1, 3
2 Energy Storage and Transformations: Conservation Laws		
Intentionally Blank		
3 Heat/Heat Transfer		
3.2.1.B3. Observe and record daily temperatures. Draw conclusions from daily temperature records as related to heating	Weather and Seasons	4
	The Sky	2
4 Electrical and Magnetic Energy		
Intentionally Blank		
5 Nature of Waves (Sound and Light Energy)		
3.2.1.B5. Compare and contrast how light travels through different materials. Explore how mirrors and prisms can be used to redirect a light beam.	Energy Everywhere	4

Pennsylvania Academic Standards Science: Grade 1	Science 1 A/B	
	Unit Name	Lesson Number
6 Unifying Themes		
3.2.1.B6. ENERGY Recognize that light from the sun is an important source of energy for living and nonliving systems and some source of energy is needed for all organisms to stay alive and grow.	Places to Live	4
3.3. Earth and Space Sciences		
3.3.A. Earth Structure, Processes and Cycles		
1 Earth Features and the Processes that Change It		
3.3.1.A1. Observe, describe, and sort earth materials. Compare the composition of different soils.	Looking at Earth	3
	Caring for Earth	2
2 Earth's Resources/Materials		
Intentionally Blank		
3 Earth's History		
Intentionally Blank		
4 Water		
3.3.1.A4. Identify and describe types of fresh and salt-water bodies (ocean, rivers, lakes, ponds).	Places to Live	3
	Looking at Earth	1
5 Weather and Climate		
3.3.1.A5. Become familiar with weather instruments.	Weather and Seasons	1, 3, 4
	The Sky	2
6 Unifying Themes		
Intentionally Blank		
3.3.B. Origin and Evolution of the Universe		
1 Composition and Structure		
3.3.1.B1. Explain why shadows fall in different places at different times of the day.	The Sky	3
2 Unifying Themes		
Intentionally Blank		
3.4. Technology and Engineering Education		
3.4.A. The Scope of Technology		
1 Characteristics of Technology		
Intentionally Blank		
2 Core Concepts of Technology		
Intentionally Blank		
3.4.B. Technology and Society		
1 Effects of Technology		
Intentionally Blank		
2 Technology and Environment		
Intentionally Blank		
3 Society and Development of Technology		
Intentionally Blank		
4 Technology and History		

Pennsylvania Academic Standards Science: Grade 1	Science 1 A/B	
	Unit Name	Lesson Number
Intentionally Blank		
3.4.C. Technology and Engineering Design		
1 Design Attributes		
Intentionally Blank		
2 Engineering Design		
Intentionally Blank		
3 Research & Development, Invention & Innovation, Experimentation/Problem Solving and Troubleshooting		
Intentionally Blank		
3.4.D. Abilities for a Technological World		
1 Applying the Design Process		
Intentionally Blank		
2 Using and Maintaining Technological Systems		
Intentionally Blank		
3 Assessing Impact of Products and Systems		
Intentionally Blank		
3.4.E. The Designed World		
1 Medical Technologies		
Intentionally Blank		
2 Agricultural and Related Biotechnologies		
Intentionally Blank		
3 Energy and Power Technologies		
Intentionally Blank		
4 Information and Communication Technologies		
Intentionally Blank		
5 Transportation Technologies		
Intentionally Blank		
6 Manufacturing Technologies		
Intentionally Blank		
7 Construction Technologies		
Intentionally Blank		

Science 2

Pennsylvania Academic Standards Science: Grade 2	Science 2 A/B	
	Unit Name	Lesson Number
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
Intentionally Blank		
2 Energy Flow		
Intentionally Blank		
3 Life Cycles		
3.1.2.A3. Identify similarities and differences in the life cycles of plants and animals.	Plants	3, 4
	Looking at Habitats	2, 3
4 Cell Cycles		
Intentionally Blank		
5 Form and Function		
3.1.2.A5. Explain how different parts of a plant work together to make the organism function.	Plants	1, 3
6 Organization		
Intentionally Blank		
7 Molecular Basis of Life		
Intentionally Blank		
8 Unifying Themes		
Intentionally Blank		
3.1.B. Genetics		
1 Heredity		
Intentionally Blank		
2 Reproduction		
Intentionally Blank		
3 Molecular Basis of Life		
Intentionally Blank		
4 Biotechnology		
Intentionally Blank		
5 Unifying Themes		
Intentionally Blank		
3.1.C. Evolution		
1 Natural Selection		
Intentionally Blank		
2 Adaptation		
3.1.2.C2. Explain that living things can only survive if their needs are being met.	Plants	1
	Looking at Habitats	4
	Kinds of Habitats	1, 2, 4
3 Unifying Themes		

Pennsylvania Academic Standards Science: Grade 2	Science 2 A/B	
	Unit Name	Lesson Number
3.1.2.C3. CONSTANCY AND CHANGE Describe some plants and animals that once lived on Earth, (e.g., dinosaurs) but cannot be found anymore. Compare them to now living things that resemble them in some way (e.g. lizards and birds).	Looking at Habitats	4, 5
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
Intentionally Blank		
2 Structure of Matter		
Intentionally Blank		
3 Matter and Energy		
3.2.2.A3. Demonstrate how heating and cooling may cause changes in the properties of materials.	Changes in Matter Using Energy	1, 3, 4 1, 5
4 Reactions		
3.2.2.A4. Experiment and explain what happens when two or more substances are combined (e.g. mixing, dissolving, and separated (e.g. filtering, evaporation).	Changes in Matter	5
5 Unifying Themes		
3.2.2.A5. CONSTANCY AND CHANGE Recognize that everything is made of matter.	Looking at Matter	1, 3, 4
3.2.B. Physics		
1 Force & Motion of Particles and Rigid Bodies		
Intentionally Blank		
2 Energy Storage and Transformations: Conservation Laws		
3.2.2.B2. Explore and describe how different forms of energy cause changes. (e.g., sunlight, heat, wind)	Changes in Matter Using Energy	4 1, 3, 6
3 Heat/Heat Transfer		
Intentionally Blank		
4 Electrical and Magnetic Energy		
Intentionally Blank		
5 Nature of Waves (Sound and Light Energy)		
Intentionally Blank		
6 Unifying Themes		
3.2.2.B6. ENERGY	Plants Looking at Habitats	1 3
3.3. Earth and Space Sciences		
3.3.A. Earth Structure, Processes and Cycles		
1 Earth Features and the Processes that Change It		
Intentionally Blank		
2 Earth's Resources/Materials		

Pennsylvania Academic Standards Science: Grade 2	Science 2 A/B	
	Unit Name	Lesson Number
Intentionally Blank		
3 Earth's History		
Intentionally Blank		
4 Water		
3.3.2.A4. Explore and describe that water exists in solid (ice) and liquid (water) form.	Land and Water	3
	Observing Weather	2
3.3.2.A4. Explain and illustrate evaporation and condensation.	Land and Water	3
	Observing Weather	2
5 Weather and Climate		
Intentionally Blank		
6 Unifying Themes		
Intentionally Blank		
3.3.B. Origin and Evolution of the Universe		
1 Composition and Structure		
3.3.2.B1. Observe and record • location of the Sun and the Moon in the sky over a day. • changes in the appearance of the Moon over a month.	Earth and Space	1, 2, 4, 5
3.3.2.B1. Observe, describe, and predict seasonal patterns of sunrise and sunset.	Earth and Space	3
2 Unifying Themes		
Intentionally Blank		
3.4. Technology and Engineering Education		
3.4.A. The Scope of Technology		
1 Characteristics of Technology		
Intentionally Blank		
2 Core Concepts of Technology		
Intentionally Blank		
3.4.B. Technology and Society		
1 Effects of Technology		
Intentionally Blank		
2 Technology and Environment		
Intentionally Blank		
3 Society and Development of Technology		
Intentionally Blank		
4 Technology and History		
Intentionally Blank		
3.4.C. Technology and Engineering Design		
1 Design Attributes		
Intentionally Blank		
2 Engineering Design		
Intentionally Blank		

Pennsylvania Academic Standards Science: Grade 2	Science 2 A/B	
	Unit Name	Lesson Number
3 Research & Development, Invention & Innovation, Experimentation/Problem Solving and Troubleshooting		
Intentionally Blank		
3.4.D. Abilities for a Technological World		
1 Applying the Design Process		
Intentionally Blank		
2 Using and Maintaining Technological Systems		
Intentionally Blank		
3 Assessing Impact of Products and Systems		
Intentionally Blank		
3.4.E. The Designed World		
1 Medical Technologies		
Intentionally Blank		
2 Agricultural and Related Biotechnologies		
Intentionally Blank		
3 Energy and Power Technologies		
Intentionally Blank		
4 Information and Communication Technologies		
Intentionally Blank		
5 Transportation Technologies		
Intentionally Blank		
6 Manufacturing Technologies		
Intentionally Blank		
7 Construction Technologies		
Intentionally Blank		

Science 3

Pennsylvania Academic Standards Science: Grade 3	Science 3 A/B	
	Unit Name	Lesson Name
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
3.1.3.A1 Describe characteristics of living things that help to identify and classify them.	Variation and Change	<ul style="list-style-type: none"> • Features of Living Things • Living Things and Non Living Thing • Compare Living and Non Living Things • Characteristics of Living Things
2 Energy Flow		
3.1.3.A2 Describe the basic needs of living things and their dependence on light, food, air, water, and shelter.	Plant and Animal Life Cycles	<ul style="list-style-type: none"> • Plant Needs • Plant Needs Portfolio: Investigate • Plant Needs Portfolio: Communicate • Plants and Animal Life Cycles Apply
3 Life Cycles		
3.1.3.A3 Illustrate how plants and animals go through predictable life cycles that include birth, growth, development, reproduction, and death.	Plant and Animal Life Cycles	<ul style="list-style-type: none"> • Animal Life Cycles • Plant Life Cycles • Life Cycle Comparison • Plants and Animal Life Cycles Apply
4 Cell Cycles		
3.1.3.A4 Intentionally Blank		
5 Form and Function		
3.1.3.A5 Identify the structures in plants that are responsible for food production, support, water transport, reproduction, growth, and protection.	Plant Structures	<ul style="list-style-type: none"> • Plant Parts • Internal Plant Structures • Plant Reproduction • Plant Structure Portfolio: Plan • Plant Structure Portfolio: Investigate • Plant Structure Portfolio: Communicate
6 Organization		
3.1.3.A6 Intentionally Blank		
7 Molecular Basis of Life		
3.1.3.A7 Intentionally Blank		
8 Unifying Themes		
3.1.3.A8 Intentionally Blank		
3.1.B. Genetics		
1 Heredity		
3.1.3.B1 Understand that plants and animals closely resemble their parents.	Plant Structures	<ul style="list-style-type: none"> • Inherited Traits of Plants • Comparing Offspring to Parent
2 Reproduction		
3.1.3.B2 Intentionally Blank		
3 Molecular Basis of Life		

Pennsylvania Academic Standards Science: Grade 3	Science 3 A/B	
	Unit Name	Lesson Name
3.1.3.B3 Intentionally Blank		
4 Biotechnology		
3.1.3.B4 Intentionally Blank		
5 Unifying Themes		
3.1.3.B5 PATTERNS Identify characteristics that appear in both parents and offspring.	Heredity	<ul style="list-style-type: none"> • Comparing Offspring to Parent
3.1.C. Evolution		
1 Natural Selection		
3.1.3.C1 Recognize that plants survive through adaptations, such as stem growth towards light and root growth downward in response to gravity.	Plant Structures	<ul style="list-style-type: none"> • Plant Adaptations
3.1.3.C1 Recognize that many plants and animals can survive harsh environments because of seasonal behaviors (e.g. hibernation, migration, trees shedding leaves).	Animal Groups	<ul style="list-style-type: none"> • Environmental Changes
2 Adaptation		
3.1.3.C2 Describe animal characteristics that are necessary for survival.	Variation and Change	<ul style="list-style-type: none"> • Features of Living Things • Living Things and Non Living Thing • Compare Living and Non Living Things • Characteristics of Living Things
3 Unifying Themes		
3.1.3.C3 CONSTANCY AND CHANGE Recognize that fossils provide us with information about living things that inhabited the Earth long ago.	Fossils	<ul style="list-style-type: none"> • Fossil Formation • Fossil Clues • Fossil Discovery • Extinction • Characteristics of Organisms • Fossil Apply
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
3.2.3.A1 Differentiate between properties of objects such as size, shape, and weight and properties of materials that make up the objects such as color, texture, and hardness.	States of Matter	<ul style="list-style-type: none"> • Physical Properties of Matter
3.2.3.A1 Differentiate between the three states of matter, classifying a substance as a solid, liquid, or gas.	States of Matter	<ul style="list-style-type: none"> • States of Matter • Properties of Matter
2 Structure of Matter		
3.2.3.A2 Recognize that all objects and materials in the world are made of matter.	States of Matter	<ul style="list-style-type: none"> • States of Matter Introduction • States of Matter • Properties of Matter • Physical Properties of Matter • States of Matter Apply
3 Matter and Energy		

Pennsylvania Academic Standards Science: Grade 3	Science 3 A/B	
	Unit Name	Lesson Name
3.2.3.A3 Demonstrate how heating and cooling may cause changes in the properties of materials including phase changes.	States of Matter	<ul style="list-style-type: none"> • Heating and Cooling Matter • Changing States • States of Matter Apply
4 Reactions		
3.2.3.A4 Use basic reactions to demonstrate observable changes in properties of matter (e.g., burning, cooking).	States of Matter	<ul style="list-style-type: none"> • Heating and Cooling Matter • Changing States • States of Matter Apply
5 Unifying Themes		
3.2.3.A5 CONSTANCY AND CHANGE Recognize that everything is made of matter.	States of Matter	<ul style="list-style-type: none"> • States of Matter Introduction • States of Matter • Properties of Matter • Physical Properties of Matter • States of Matter Apply
3.2.B. Physics		
1 Force & Motion of Particles and Rigid Bodies		
3.2.3.B1 Explain how movement can be described in many ways.	Forces and Motion	<ul style="list-style-type: none"> • Changes in Motion • Patterns of Motion
2 Energy Storage and Transformations: Conservation Laws		
3.2.3.B2 Explore energy’s ability to cause motion or create change.	Forces and Motion	<ul style="list-style-type: none"> • Objects in Motion and at Rest • Tug of War • Moving a Feather Part 1 Portfolio • Moving a Feather Part 2 Portfolio • Moving a Feather Part 3 Portfolio
3.2.3.B2 Explore how energy can be found in moving objects, light, sound, and heat.	Forces and Motion	<ul style="list-style-type: none"> • Energy
3 Heat/Heat Transfer		
3.2.3.B3 Explore temperature changes that result from the addition or removal of heat.	States of Matter	<ul style="list-style-type: none"> • Heating and Cooling Matter
4 Electrical and Magnetic Energy		
3.2.3.B4 Identify and classify objects and materials that are conductors or insulators of electricity.	Magnets	<ul style="list-style-type: none"> • Characteristics of Magnets
3.2.3.B4 Identify and classify objects and materials as magnetic or non-magnetic.	Magnets	<ul style="list-style-type: none"> • Characteristics of Magnets
5 Nature of Waves (Sound and Light Energy)		
3.2.3.B5 Recognize that light travels in a straight line until it strikes an object or travels from one material to another.	Forces and Motion	<ul style="list-style-type: none"> • Energy
6 Unifying Themes		
3.2.3.B6 ENERGY Recognize that light from the sun is an important source of energy for living and nonliving systems and some source of energy is needed for all organisms to stay alive and grow.	Plant and Animal Life Cycles	<ul style="list-style-type: none"> • Plant Needs
3.3. Earth and Space Sciences		
3.3.A. Earth Structure, Processes and Cycles		
1 Earth Features and the Processes that Change It		

Pennsylvania Academic Standards Science: Grade 3	Science 3 A/B	
	Unit Name	Lesson Name
3.3.3.A1 Explain and give examples of the ways in which soil is formed.	Fossils	• Minerals
2 Earth's Resources/Materials		
3.3.3.A2 Identify the physical properties of minerals and demonstrate how minerals can be tested for these different physical properties.	Fossils	• Minerals
3 Earth's History		
3.3.3.A3 Intentionally Blank		
4 Water		
3.3.3.A4 Connect the various forms of precipitation to the weather in a particular place and time.	Weather and Climate	<ul style="list-style-type: none"> • Climate • Climate Data • Comparing Climates • Weather Data • Comparing Weather Data • Weather Trends
5 Weather and Climate		
3.3.3.A5 Explain how air temperature, moisture, wind speed and direction, and precipitation make up the weather in a particular place and time.	Weather and Climate	<ul style="list-style-type: none"> • Climate • Climate Data • Comparing Climates • Weather Data • Comparing Weather Data • Weather Trends
6 Unifying Themes		
3.3.3.A6 Intentionally Blank		
3.3.B. Origin and Evolution of the Universe		
1 Composition and Structure		
3.3.3.B1 Relate the rotation of the earth and day/night, to the apparent movement of the sun, moon, and stars across the sky.	Weather and Climate	• Earth's Rotation
3.3.3.B1 Describe the changes that occur in the observable shape of the moon over the course of a month.	Weather and Climate	• Earth's Rotation
2 Unifying Themes		
3.3.3.B2 Intentionally Blank		
3.4. Technology and Engineering Education		
3.4.A. The Scope of Technology		
1 Characteristics of Technology		
3.4.3.A1 Identify how the natural made world and the human made world are different.	Technology	• Introduction Technology and Engineering
2 Core Concepts of Technology		
3.4.3.A2 Identify that some systems are found in nature and some systems are made by humans.	Weather and Climate	• Weather Hazards Portfolio: Analyzing
3 Technology Connections		

Pennsylvania Academic Standards Science: Grade 3	Science 3 A/B	
	Unit Name	Lesson Name
3.4.3.A3 Identify how the study of technology uses many of the same ideas and skills as many other subjects.	Plant and Animal Life Cycles	• Environmental Changes
3.4.B. Technology and Society		
1 Effects of Technology		
3.4.3.B1 Describe how using technology can be good or bad.	Technology	• Engineering and the Design Process
2 Technology and Environment		
3.4.3.B2 Explain how materials are re-used or recycled.	Technology	• Engineering and the Design Process
3 Society and Development of Technology		
3.4.3.B3 Identify and define products made to meet individual needs versus wants.	Technology	• Engineering and the Design Process
4 Technology and History		
3.4.3.B4 Illustrate how people have made tools to provide food, clothing, and shelter.	Technology	• Engineering and the Design Process
3.4.C. Technology and Engineering Design		
1 Design Attributes		
3.4.3.C1 Recognize design is a creative process and everyone can design solutions to problems.	Technology	• Products, Procedures, and Processes
2 Engineering Design		
3.4.3.C2 Explain why the design process requires creativity and consideration of all ideas.	Technology	• Products, Procedures, and Processes
3 Research & Development, Invention & Innovation, Experimentation/Problem Solving and Troubleshooting		
3.4.3.C3 Recognize that all products and systems are subject to failure; many products and systems can be fixed.	Technology	• Products, Procedures, and Processes
3.4.D. Abilities for a Technological World		
1 Applying the Design Process		
3.4.3.D1 Identify people’s needs and wants and define some problems that can be solved through the design process.	Magnets	• Designing Magnet Solutions • Magnet Solutions Portfolio • Magnets Apply
	Technology	• Construction and Design
2 Using and Maintaining Technological Systems		
3.4.3.D2 Observe, analyze and document how simple systems work.	Forces and Motion	• Moving a Feather Part 2 Portfolio
3 Assessing Impact of Products and Systems		
3.4.3.D3 Collect information about everyday products and systems by asking questions.	Forces and Motion	• Moving a Feather Part 2 Portfolio
3.4.E. The Designed World		
1 Medical Technologies		
3.4.3.E1 Identify the technologies that support and improve quality of life.	Technology	• Technology and Industry
2 Agricultural and Related Biotechnologies		
3.4.3.E2 Identify some processes used in agriculture that require different procedures, products, or systems.	Technology	• Technology and Industry

Pennsylvania Academic Standards Science: Grade 3	Science 3 A/B	
	Unit Name	Lesson Name
3 Energy and Power Technologies		
3.4.3.E3 Recognize that tools, machines, products, and systems use energy in order to do work.	Technology	<ul style="list-style-type: none"> • Technology and Industry • Transportation and Construction
4 Information and Communication Technologies		
3.4.3.E4 Recognize that information and communication technology is the transfer of messages among people and/or machines over distances through the use of technology.	Technology	<ul style="list-style-type: none"> • Technology and Industry
5 Transportation Technologies		
3.4.3.E5 Understand that transportation has many parts that work together to help people travel.	Technology	<ul style="list-style-type: none"> • Transportation and Construction
6 Manufacturing Technologies		
3.4.3.E6 Explain how manufacturing systems design and produce products in quantity.	Technology	<ul style="list-style-type: none"> • Transportation and Construction
7 Construction Technologies		
3.4.3.E7 Recognize that people live, work, and go to school in buildings which are different types of structures.	Technology	<ul style="list-style-type: none"> • Construction and Design

Science 4

Pennsylvania Academic Standards Science: Grade 4	Science 4 A/B	
	Unit Name	Lesson Name
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
3.1.4.A1 Classify plants and animals according to the physical characteristics that they share.	Habitats	<ul style="list-style-type: none"> Plants and Animals
2 Energy Flow		
3.1.4.A2 Describe the different resources that plants and animals need to live.	Habitats	<ul style="list-style-type: none"> Types of Resources in habitats Living Things in Habitats Habitats
3 Life Cycles		
3.1.4.A3 Identify differences in the life cycles of plants and animals.	Habitats	<ul style="list-style-type: none"> Plants and Animals
4 Cell Cycles		
3.1.4.A4 Intentionally Blank		
5 Form and Function		
3.1.4.A5 Describe common functions living things share to help them function in a specific environment.	Animal Structures Habitats	<ul style="list-style-type: none"> External and Internal Animal Structures Environmental Adaptations Living Things in Habitats
6 Organization		
3.1.4.A6 Intentionally Blank		
7 Molecular Basis of Life		
3.1.4.A7 Intentionally Blank		
8 Unifying Themes		
3.1.4.A8 MODELS Construct and interpret models and diagrams of various animal and plant life cycles.	Habitats	<ul style="list-style-type: none"> Plants and Animals
3.1.B. Genetics		
1 Heredity		
3.1.4.B1 Describe features that are observable in both parents and their offspring.	Animal Structures	<ul style="list-style-type: none"> External and Internal Animal Structures Adaptations for Reproduction
2 Reproduction		
3.1.4.B2 Recognize that reproduction is necessary for the continuation of life.	Animal Structures Habitats Environmental Changes	<ul style="list-style-type: none"> Adaptations for Reproduction Animal Structures Apply Habitats Population Survival Population Survival
3 Molecular Basis of Life		
3.1.4.B3 Intentionally Blank		
4 Biotechnology		
3.1.4.B4 Intentionally Blank		

Pennsylvania Academic Standards Science: Grade 4	Science 4 A/B	
	Unit Name	Lesson Name
5 Unifying Themes		
3.1.4.B5 PATTERNS Identify observable patterns in the physical characteristics of plants or groups of animals.	Animal Structures	<ul style="list-style-type: none"> • External and Internal Animal Structures • Environmental Adaptations
3.1.C. Evolution		
1 Natural Selection		
3.1.4.C1 Identify different characteristics of plants and animals that help some populations survive and reproduce in greater numbers.	Animal Structures	<ul style="list-style-type: none"> • Environmental Adaptations • Animal Structures Apply
	Habitats	<ul style="list-style-type: none"> • Living things in habitats • Habitats Apply
	Environmental Changes	<ul style="list-style-type: none"> • Population Survival
3.1.4.C1 Describe how environmental changes can cause extinction in plants and animals.	Habitats	<ul style="list-style-type: none"> • living things in habitats • Habitats Apply
2 Adaptation		
3.1.4.C2 Describe plant and animal adaptations that are important to survival.	Animal Structures	<ul style="list-style-type: none"> • External and Internal Animal Structures • Environmental Adaptations • Animal Structures Apply
	Habitats	<ul style="list-style-type: none"> • Living Things in habitats • Habitats Apply
3 Unifying Themes		
3.1.4.C3 CONSTANCY AND CHANGE Compare fossils to one another and to currently living organisms according to their anatomical similarities and differences.	Earth's Layers and Features	<ul style="list-style-type: none"> • Patterns and Fossil Identification
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
3.2.4.A1 Identify and classify objects based on their observable and measurable physical properties.	Properties of Matter	<ul style="list-style-type: none"> • Solids, Liquids, and Gases • Color, Hardness, and Reflectivity • Thermal and Electrical Conductivity • Freezing and Boiling • Solubility • Matter Portfolio: Investigate
	Electricity and Magnets	<ul style="list-style-type: none"> • Insulators And Conductors
3.2.4.A1 Compare and contrast solids, liquids, and gases based on their properties.	Properties of Matter	<ul style="list-style-type: none"> • Solids, Liquids, and Gases
2 Structure of Matter		
3.2.4.A2 Demonstrate that materials are composed of parts that are too small to be seen without magnification.	Properties of Matter	<ul style="list-style-type: none"> • Matter Composition • Modeling Matter
3 Matter and Energy		
3.2.4.A3 Demonstrate the conservation of mass during physical changes such as melting or freezing.	Properties of Matter	<ul style="list-style-type: none"> • Modeling Matter
	Changes in Matter	<ul style="list-style-type: none"> • Physical and Chemical Change
4 Reactions		

Pennsylvania Academic Standards Science: Grade 4	Science 4 A/B	
	Unit Name	Lesson Name
3.2.4.A4 Recognize that combining two or more substances may make new materials with different properties.	Changes in Matter	<ul style="list-style-type: none"> Physical and Chemical Change Mixing Substances Portfolio: Plan Substances Portfolio: Investigate Changes in Matter Apply
5 Unifying Themes		
3.2.4.A5 MODELS Use models to demonstrate the physical change as water goes from liquid to ice and from liquid to vapor.	Properties of Matter	<ul style="list-style-type: none"> Solids, Liquids, and Gases
3.2.B. Physics		
1 Force & Motion of Particles and Rigid Bodies		
3.2.4.B1 Explain how an object’s change in motion can be observed and measured.	Electricity and Magnets	<ul style="list-style-type: none"> Energy
2 Energy Storage and Transformations: Conservation Laws		
3.2.4.B2 Identify types of energy and their ability to be stored and changed from one form to another.	Electricity and Magnets	<ul style="list-style-type: none"> Energy
3 Heat/Heat Transfer		
3.2.4.B3 Understand that objects that emit light often emit heat.	Light and Sound	<ul style="list-style-type: none"> Light Interactions
4 Electrical and Magnetic Energy		
3.2.4.B4 Apply knowledge of basic electrical circuits to the design and construction of simple direct current circuits.	Electricity and Magnets	<ul style="list-style-type: none"> Electricity and Magnets Apply
3.2.4.B4 Compare and contrast series and parallel circuits.	Electricity and Magnets	<ul style="list-style-type: none"> Types of Circuits
3.2.4.B4 Demonstrate that magnets have poles that repel and attract each other.	Electricity and Magnets	<ul style="list-style-type: none"> Magnets
5 Nature of Waves (Sound and Light Energy)		
3.2.4.B5 Demonstrate how vibrating objects make sound and sound can make things vibrate.	Light and Sound	<ul style="list-style-type: none"> Sound Investigation Light and Sound: Create
3.2.4.B5 Demonstrate how light can be reflected, refracted, or absorbed by an object.	Light and Sound	<ul style="list-style-type: none"> Light Interactions Classify Light Interactions Mirror Investigation Refraction Investigation
6 Unifying Themes		
3.2.4.B6 ENERGY Give examples of how energy can be transformed from one form to another.	Electricity and Magnets	<ul style="list-style-type: none"> Energy
3.3. Earth and Space Sciences		
3.3.A. Earth Structure, Processes and Cycles		
1 Earth Features and the Processes that Change It		
3.3.4.A1 Describe basic landforms.	Earth's Layers and Features	<ul style="list-style-type: none"> Earth's Features
3.3.4.A1 Identify the layers of the earth.	Earth's Layers and Features	<ul style="list-style-type: none"> Earth's Features
3.3.4.A1 Recognize that the surface of the earth changes due to slow processes and rapid processes.	Earth's Layers and Features	<ul style="list-style-type: none"> Rock Layers Changes in Environment

Pennsylvania Academic Standards Science: Grade 4	Science 4 A/B	
	Unit Name	Lesson Name
2 Earth's Resources/Materials		
3.3.4.A2 Identify basic properties and uses of Earth's materials including rocks, soils, water, and gases of the atmosphere.	Earth's Layers and Features	<ul style="list-style-type: none"> • Earth's Major Systems
3 Earth's History		
3.3.4.A3 Recognize that fossils provide evidence about the plants and animals that lived long ago and the nature of the environment at that time.	Earth's Layers and Features	<ul style="list-style-type: none"> • Patterns and Fossil Identification • Changes in Environment
4 Water		
3.3.4.A4 Recognize Earth's different water resources, including both fresh and saltwater.	Earth's Layers and Features	<ul style="list-style-type: none"> • Earth's Major Systems • Saltwater and Freshwater • Water on Earth
3.3.4.A4 Describe phase changes in the forms of water on Earth.	Properties of Matter	<ul style="list-style-type: none"> • Freezing and Boiling
5 Weather and Climate		
3.3.4.A5 Describe basic weather elements.	Earth's Layers and Features	<ul style="list-style-type: none"> • Weather on Earth
3.3.4.A5 Identify weather patterns over time.	Earth's Layers and Features	<ul style="list-style-type: none"> • Weather on Earth
6 Unifying Themes		
3.3.4.A6 MODELS/SCALE Identify basic landforms using models and simple maps.	Earth's Layers and Features	<ul style="list-style-type: none"> • Earth's Features • Identify Patterns
3.3.4.A6 CONSTANCY/ CHANGE Identify simple changes in the earth system as air, water, soil and rock interact.	Earth's Systems and Water Resources	<ul style="list-style-type: none"> • Interaction of Earth's Systems
3.3.4.A6 SCALE Explain how basic weather elements are measured.	Earth's Layers and Features	<ul style="list-style-type: none"> • Weather on Earth
3.3.B. Origin and Evolution of the Universe		
1 Composition and Structure		
3.3.4.B1 Identify planets in our solar system and their basic characteristics.	The Solar System	<ul style="list-style-type: none"> • Objects in the Solar System • Properties of Objects in Solar System • Size of Objects in the Solar System
3.3.4.B1 Describe the earth's place in the solar system that includes the sun (a star), planets, and many moons.	The Solar System	<ul style="list-style-type: none"> • Objects in the Solar System
3.3.4.B1 Recognize that the universe contains many billions of galaxies and that each galaxy contains many billions of stars.	The Solar System	<ul style="list-style-type: none"> • Objects in the Solar System
2 Unifying Themes		
3.3.4.B2 SCALES Know the basic characteristics and uses of telescopes.	The Solar System	<ul style="list-style-type: none"> • Objects in the Solar System

Pennsylvania Academic Standards Science: Grade 4	Science 4 A/B	
	Unit Name	Lesson Name
3.3.4.B2 PATTERNS/PHASES Identify major lunar phases.	The Solar System	• Properties of Objects in the Solar System
3.3.4.B2 PATTERNS Explain time (days, seasons) using solar system motions.	The Solar System	• Motion of Objects in Solar System • Size of Objects in the Solar System • Properties of Objects in the Solar System
3.4. Technology and Engineering Education		
3.4.A. The Scope of Technology		
1 Characteristics of Technology		
3.4.4.A1 Understand that tools, materials, and skills are used to make things and carry out tasks.	Technology	• Working Together
2 Core Concepts of Technology		
3.4.4.A2 Understand that systems have parts and components that work together.	Technology	• Working Together
3 Technology Connections		
3.4.4.A3 Describe how various relationships exist between technology and other fields.	Technology	• Impact of Technology
3.4.B. Technology and Society		
1 Effects of Technology		
3.4.4.B1 Describe how technology affects humans in various ways.	Technology	• Impact of Technology
2 Technology and Environment		
3.4.4.B2 Explain how the use of technology affects the environment in good and bad ways.	Technology	• Impact of Technology
3 Society and Development of Technology		
3.4.4.B3 Explain why new technologies are developed and old ones are improved in terms of needs and wants.	Technology	• Development of Technology
4 Technology and History		
3.4.4.B4 Describe how the history of civilization is linked closely to technological development.	Technology	• Development of Technology
3.4.C. Technology and Engineering Design		
1 Design Attributes		
3.4.4.C1 Understand that there is no perfect design.	Technology	• Development of Technology
2 Engineering Design		
3.4.4.C2 Describe the engineering design process: Define a problem. Generate ideas. Select a solution and test it. Make the item. Evaluate the item. Communicate the solution with others. Present the results.	Technology	• The Design Process
3 Research & Development, Invention & Innovation, Experimentation/Problem Solving and Troubleshooting		
3.4.4.C3 Explain how asking questions and making observations help a person understand how things work and can be repaired.	Technology	• Repairs and Improvements
3.4.D. Abilities for a Technological World		

Pennsylvania Academic Standards Science: Grade 4	Science 4 A/B	
	Unit Name	Lesson Name
1 Applying the Design Process		
3.4.4.D1 Investigate how things are made and how they can be improved.	Technology	• Repairs and Improvements
2 Using and Maintaining Technological Systems		
3.4.4.D2 Recognize and use everyday symbols (e.g. icons, simple electrical symbols measurement) to communicate key ideas.	Technology	• Repairs and Improvements
3.4.4.D2 Identify and use simple hand tools (e.g., hammer, scale) correctly and safely.	Technology	• Repairs and Improvements • Working Together
3 Assessing Impact of Products and Systems		
3.4.4.D3 Investigate and assess the influence of a specific technology or system on the individual, family, community, and environment.	Environmental Changes	• Environmental Changes: Research • Environmental Changes: Analyzing • Environmental Changes: Discussion
3.4.E. The Designed World		
1 Medical Technologies		
3.4.4.E1 Identify tools and devices that have been designed to provide information about a healthy lifestyle.	Technology	• The Design Process
2 Agricultural and Related Biotechnologies		
3.4.4.E2 Identify the technologies in agriculture that make it possible for food to be available year round.	Technology	• The Design Process
3 Energy and Power Technologies		
3.4.4.E3 Identify types of energy and the importance of energy conservation.	Electricity and Magnets	• Energy
4 Information and Communication Technologies		
3.4.4.E4 Explain how information and communication systems allow information to be transferred from human to human.	Light and Sound	• Light and Sound: Design
5 Transportation Technologies		
3.4.4.E5 Recognize that a transportation system has many parts that work together to help people travel and to move goods from place to place.	Technology	• Transportation and Manufacturing
6 Manufacturing Technologies		
3.4.4.E6 Identify key aspects of manufacturing processes (designing products, gathering resources and using tools to separate, form and combine materials in order to produce products).	Technology	• Transportation and Manufacturing
7 Construction Technologies		
3.4.4.E7 Understand that structures rest on foundations and that some structures are temporary, while others are permanent.	Technology	• Transportation and Manufacturing

Science 5

Pennsylvania Academic Standards Science: Grade 5	Science 5 A/B	
	Unit Name	Lesson Name
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
3.1.5.A1 Intentionally Blank		
2 Energy Flow		
3.1.5.A2 Describe how life on earth depends on energy from the sun.	Transfer of Energy	<ul style="list-style-type: none"> • Plant Growth • Photosynthesis • Animals and Food • Food Chains • Energy Flow • Transfer of Energy Apply
3 Life Cycles		
3.1.5.A3 Compare and contrast the similarities and differences in life cycles of different organisms.	Heredity and Living Cells	<ul style="list-style-type: none"> • Comparing Life Cycles
4 Cell Cycles		
3.1.5.A4 Intentionally Blank		
5 Form and Function		
3.1.5.A5 Explain the concept of a cell as the basic unit of life.	Heredity and Living Cells	<ul style="list-style-type: none"> • Plant and Animal Cells
3.1.5.A5 Compare and contrast plant and animal cells.	Heredity and Living Cells	<ul style="list-style-type: none"> • Plant and Animal Cells • Comparing Cells • Heredity and Living Cells Apply
6 Organization		
3.1.5.A6 Intentionally Blank		
7 Molecular Basis of Life		
3.1.5.A7 Intentionally Blank		
8 Unifying Themes		
3.1.5.A8 Intentionally Blank		
3.1.B. Genetics		
1 Heredity		
3.1.5.B1 Differentiate between inherited and acquired characteristics of plants and animals.	Heredity and Living Cells	<ul style="list-style-type: none"> • Instincts and Learned Behaviors • Inherited and Acquired Traits
2 Reproduction		
3.1.5.B2 Intentionally Blank		
3 Molecular Basis of Life		
3.1.5.B3 Intentionally Blank		
4 Biotechnology		

Pennsylvania Academic Standards Science: Grade 5	Science 5 A/B	
	Unit Name	Lesson Name
3.1.5.B4 Intentionally Blank		
5 Unifying Themes		
3.1.5.B5 Intentionally Blank		
3.1.C. Evolution		
1 Natural Selection		
3.1.5.C1 Describe how organisms meet some of their needs in an environment by using behaviors (patterns of activities) in response to information (stimuli) received from the environment.	Heredity and Living Cells	<ul style="list-style-type: none"> • Instincts and Learned Behaviors • Advantages and Survival
2 Adaptation		
3.1.5.C2 Give examples of how inherited characteristics (e.g., shape of beak, length of neck, location of eyes, shape of teeth) may change over time as adaptations to changes in the environment that enable organisms to survive.	Heredity and Living Cells	<ul style="list-style-type: none"> • Inherited Traits
3 Unifying Themes		
3.1.5.C3 Intentionally Blank		
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
3.2.5.A1 Describe how water can be changed from one state to another by adding or taking away heat.	Energy Transfer	<ul style="list-style-type: none"> • Heat Energy
2 Structure of Matter		
3.2.5.A2 Intentionally Blank		
3 Matter and Energy		
3.2.5.A3 Intentionally Blank		
4 Reactions		
3.2.5.A4 Intentionally Blank		
5 Unifying Themes		
3.2.5.A5 Intentionally Blank		
3.2.B. Physics		
1 Force & Motion of Particles and Rigid Bodies		
3.2.5.B1 Explain how mass of an object resists change to motion.	Energy Transfer	<ul style="list-style-type: none"> • Mass and Motion
2 Energy Storage and Transformations: Conservation Laws		

Pennsylvania Academic Standards Science: Grade 5	Science 5 A/B	
	Unit Name	Lesson Name
3.2.5.B2 Examine how energy can be transferred from one form to another.	Energy Transfer	<ul style="list-style-type: none"> • Light Energy • Electric Currents • Electrical Circuits • Converting Energy Portfolio: Day 1 • Converting Energy Portfolio: Design • Converting Energy Portfolio: Create • Converting Energy Portfolio: Test
	Transfer of Energy	<ul style="list-style-type: none"> • Plant Growth • Photosynthesis • Plant Matter • Animals and Food • Food Chains
3 Heat/Heat Transfer		
3.2.5.B3 Demonstrate how heat energy is usually a by-product of an energy transformation.	Energy Transfer	<ul style="list-style-type: none"> • Heat energy
4 Electrical and Magnetic Energy		
3.2.5.B4 Demonstrate how electrical circuits provide a means of transferring electrical energy when heat, light, sound, and chemical changes are produced.	Energy Transfer	<ul style="list-style-type: none"> • Electric Currents • Electrical Circuits
3.2.5.B4 Demonstrate how electromagnets can be made and used.	Energy Transfer	<ul style="list-style-type: none"> • Electromagnets
5 Nature of Waves (Sound and Light Energy)		
3.2.5.B5 Compare the characteristics of sound as it is transmitted through different materials.	Energy Transfer	<ul style="list-style-type: none"> • Sound Waves • Electric Currents
	Sound	<ul style="list-style-type: none"> • Sound Investigation: Plan
3.2.5.B5 Relate the rate of vibration to the pitch of the sound.	Sound	<ul style="list-style-type: none"> • Pitch, Volume, Vibration • Changes in Vibration • Sound Investigation: Plan • Sound Investigation: Conduct • Sound Apply
6 Unifying Themes		
3.2.5.B6 Intentionally Blank		
3.3. Earth and Space Sciences		
3.3.A. Earth Structure, Processes and Cycles		
1 Earth Features and the Processes that Change It		
3.3.5.A1 Describe how landforms are the result of a combination of destructive forces such as erosion and constructive erosion, deposition of sediment, etc.	Weathering and Erosion	<ul style="list-style-type: none"> • Constructive Forces • Constructive Forces and Landforms • Destructive Forces and Landforms • Erosion and Soil • Weathering and Erosion Apply
2 Earth's Resources/Materials		
3.3.5.A2 Describe the usefulness of Earth's physical resources as raw materials for the human made world.	Natural Energy Resources	<ul style="list-style-type: none"> • Renewable Resources • Nonrenewable Resources • Comparison of Energy Resources

Pennsylvania Academic Standards Science: Grade 5	Science 5 A/B	
	Unit Name	Lesson Name
3 Earth's History		
3.3.5.A3 Explain how geological processes observed today such as erosion, movement of lithospheric plates, and changes in the composition of the atmosphere are similar to those in the past.	Weathering and Erosion	• Erosion and Soil
4 Water		
3.3.5.A4 Explain the basic components of the water cycle.	Transfer of Energy	• The Water Cycle
5 Weather and Climate		
3.3.5.A5 Differentiate between weather and climate.	Weather and Climate	• Weather and Climate • Tracking Weather Data
3.3.5.A5 Explain how the cycling of water, both in and out of the atmosphere, has an effect on climate.	Transfer of Energy	• The Water Cycle
6. Unifying Themes		
3.3.5.A6 Intentionally Blank		
3.3.B. Origin and Evolution of the Universe		
1 Composition and Structure		
3.3.5.B1 Provide evidence that the earth revolves around (orbits) the sun in a year's time and that the earth rotates on its axis once approximately every 24 hours.	Weather and Climate Earth, Sun, and Stars	• Weather Patterns • Patterns of Change Portfolio: Patterns • Earth, Sun, and Stars Apply
2 Unifying Themes		
3.3.5.B2 Intentionally Blank		
3.4. Technology and Engineering Education		
3.4.A. The Scope of Technology		
1 Characteristics of Technology		
3.4.5.A1 Explain how people use tools and techniques to help them do things.	Weather and Climate Earth, Sun, and Stars	• Weather Data • The Sun and Other Stars • Brightness and Distance
2 Core Concepts of Technology		
3.4.5.A2 Understand that a subsystem is a system that operates as part of a larger system.	Technology	• Introduction Technology and Engineering
3 Technology Connections		
3.4.5.A3 Describe how technologies are often combined.	Technology	• Introduction Technology and Engineering
3.4.B. Technology and Society		
1 Effects of Technology		
3.4.5.B1 Explain how the use of technology can have unintended consequences.	Technology	• Engineering and the Design Process
2 Technology and Environment		
3.4.5.B2 Describe how waste may be appropriately recycled or disposed of to prevent unnecessary harm to the environment.	Technology	• Engineering and the Design Process
3 Society and Development of Technology		

Pennsylvania Academic Standards Science: Grade 5	Science 5 A/B	
	Unit Name	Lesson Name
3.4.5.B3 Describe how community concerns support or limit technological developments.	Technology	• Engineering and the Design Process
4 Technology and History		
3.4.5.B4 Identify how the way people live and work has changed history in terms of technology.	Technology	• Products, Procedures, and Processes
3.4.C. Technology and Engineering Design		
1 Design Attributes		
3.4.5.C1 Explain how the design process is a purposeful method of planning practical solutions to problems.	Technology	• Products, Procedures, and Processes
2 Engineering Design		
3.4.5.C2 Describe how design, as a dynamic process of steps, can be performed in different sequences and repeated.	Technology	• Products, Procedures, and Processes
3 Research & Development, Invention & Innovation, Experimentation/Problem Solving and Troubleshooting		
3.4.5.C3 Identify how invention and innovation are creative ways to turn ideas into real things.	Technology	• Products, Procedures, and Processes
3.4.D. Abilities for a Technological World		
1 Applying the Design Process		
3.4.5.D1 Identify ways to improve a design solution.	Energy Transfer	• Converting Energy Portfolio: Improve
2 Using and Maintaining Technological Systems		
3.4.5.D2 Use information provided in manuals, protocols, or by experienced people to see and understand how things work.	Technology	• Technology and Industry
3 Assessing Impact of Products and Systems		
3.4.5.D3 Determine if the human use of a product or system creates positive or negative results.	Technology	• Technology and Industry
3.4.E. The Designed World		
1 Medical Technologies		
3.4.5.E1 Identify how technological advances have made it possible to create new devices and to repair or replace certain parts of the human body.	Technology	• Technology and Industry
2 Agricultural and Related Biotechnologies		
3.4.5.E2 Understand that there are many different tools necessary to maintain an ecosystem, whether natural or man-made.	Ecosystems	• Terrestrial Ecosystems • Aquatic Ecosystems • Ecosystems Apply
3 Energy and Power Technologies		
3.4.5.E3 Explain how tools, machines, products, and systems use energy in order to do work.	Energy Transfer	• Electrical Circuits
4 Information and Communication Technologies		
3.4.5.E4 Describe how the use of symbols, measurements, and drawings promotes clear communication by providing a common language to express ideas.	Sound Transfer of Energy Weather and Climate	• Changes in Vibration • Energy Flow • Weather Data
5 Transportation Technologies		

Pennsylvania Academic Standards Science: Grade 5	Science 5 A/B	
	Unit Name	Lesson Name
3.4.5.E5 Examine reasons why a transportation system may lose efficiency or fail (e.g., one part is missing or	Technology	• Transportation and Construction
6 Manufacturing Technologies		
3.4.5.E6 Examine how manufacturing technologies have become an integral part of the engineered world.	Technology	• Transportation and Construction
7 Construction Technologies		
3.4.5.E7 Describe the importance of guidelines when planning a community.	Technology	• Transportation and Construction

Science 6

Pennsylvania Academic Standards Science: Grade 6	Science 6 A/B	
	Unit Name	Lesson Name
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
3.1.6.A1 Describe the similarities and differences of major physical characteristics in plants, animals, fungi, protists, and bacteria.	Biodiversity	<ul style="list-style-type: none"> • Common Characteristics • Physical Characteristics
2 Energy Flow		
3.1.6.A2 Describe how energy derived from the sun is used by plants to produce sugars (photosynthesis) and is transferred within a food chain from producers (plants) to consumers to decomposers.	Matter and Energy	<ul style="list-style-type: none"> • Making Food • Photosynthesis Portfolio 1 • Photosynthesis Portfolio 3 • Energy and Matter in an Ecosystem • Matter and Energy Apply
3 Life Cycles		
3.1.6.A3 Intentionally Blank		
4 Cell Cycles		
3.1.6.A4 Recognize that all organisms are composed of cells and that many organisms are unicellular and must carry out all life functions in one cell.	Reproductive Success	<ul style="list-style-type: none"> • Animal Structures
	Matter and Energy	<ul style="list-style-type: none"> • Matter and Energy Introduction • Breaking Down Food
5 Form and Function		
3.1.6.A5 Describe basic structures that plants and animals have that contribute to their ability to make or find food and reproduce.	Reproductive Success	<ul style="list-style-type: none"> • Reproduction in Flowering Plants • Non-Flowering Plants Reproduction • Successful Plant Reproduction • Animal Structures • Animal Behaviors • Reproductive Success Apply
6 Organization		
3.1.6.A6 Identify examples of unicellular and multicellular organisms.	Biodiversity	<ul style="list-style-type: none"> • Unicellular and Multicellular
7 Molecular Basis of Life		
3.1.6.A7 Intentionally Blank		
8 Unifying Themes		
3.1.6.A8 SCALE Explain why the details of most cells are visible only through a microscope.	Reproductive Success	<ul style="list-style-type: none"> • Animal Structures
3.1.B. Genetics		
1 Heredity		
3.1.6.B1 Intentionally Blank		
2 Reproduction		
3.1.6.B2 Intentionally Blank		
3 Molecular Basis of Life		

Pennsylvania Academic Standards Science: Grade 6	Science 6 A/B	
	Unit Name	Lesson Name
3.1.6.B3 Intentionally Blank		
4 Biotechnology		
3.1.6.B4 Intentionally Blank		
5 Unifying Themes		
3.1.6.B5 Intentionally Blank		
3.1.C. Evolution		
1 Natural Selection		
3.1.6.C1 Differentiate between instinctive and learned animal behaviors that relate to survival.	Reproductive Success	• Animal Structures
2 Adaptation		
3.1.6.C2 Intentionally Blank		
3 Unifying Themes		
3.1.6.C3 Intentionally Blank		
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
3.2.6.A1 Distinguish the differences in properties of solids, liquids, and gases.	Properties of Matter	• Thermal Energy
3.2.6.A1 Differentiate between volume and mass. Investigate that equal volumes of different substances usually have different masses.	Properties of Matter	• Mass, Weight, and Density
2 Structure of Matter		
3.2.6.A2 Compare and contrast pure substances with mixtures.	Properties of Matter	• Separating Mixtures
3 Matter and Energy		
3.2.6.A3 Explain and give examples of how mass is conserved in a closed system.	Properties of Matter	• Closed Systems
4 Reactions		
3.2.6.A4 Differentiate between physical changes and chemical changes.	Properties of Matter	• Physical vs. Chemical Change
5 Unifying Themes		
3.2.6.A5 CONSTANCY AND CHANGE Identify characteristic properties of matter that can be used to separate one substance from the other.	Properties of Matter	• Separating Mixtures • Matter and Atomic Structure Apply
3.2.B. Physics		
1 Force & Motion of Particles and Rigid Bodies		
3.2.6.B1 Explain how changes in motion require a force.	Energy of Motion	• Kinetic and Potential Energy
2 Energy Storage and Transformations: Conservation Laws		

Pennsylvania Academic Standards Science: Grade 6	Science 6 A/B	
	Unit Name	Lesson Name
3.2.6.B2 Describe energy as a property of objects associated with heat, light, electricity, magnetism, mechanical motion, and sound.	Properties of Matter	• Thermal Energy
	Energy of Motion Properties of Matter	• Energy Transfer and Kinetic Energy • Thermal Energy
3.2.6.B2 Differentiate between potential and kinetic energy.	Energy of Motion	• Kinetic and Potential Energy
3 Heat/Heat Transfer		
3.2.6.B3 Give examples of how heat moves in predictable ways, normally flowing from warmer objects to cooler ones until they reach the same temperature.	Properties of Matter	• Thermal Energy Transfer
3.2.6.B3 Explain the effect of heat on particle motion by describing what happens to particles during a phase change.	Properties of Matter	• Thermal Energy
4 Electrical and Magnetic Energy		
3.2.6.B4 Describe how electric current produces magnetic forces and how moving magnets produce electric current.	Non-Contact Forces	• Non-Contact Forces Portfolio 1 • Non-Contact Forces Portfolio 2 • Non-Contact Forces Portfolio 3
3.2.6.B4 Derive Ohm’s Law through investigation of voltage, current, and resistance.	Non-Contact Forces	• Electric Circuits
5 Nature of Waves (Sound and Light Energy)		
3.2.6.B5 Intentionally Blank		
6 Unifying Themes		
3.2.6.B6 ENERGY Demonstrate that heat moves in predictable ways from warmer objects to cooler ones.	Thermal Energy	• Kinetic Energy Transfer • Energy Transfer Device Portfolio 3 • Thermal Energy Apply
3.2.6.B6 SCALE Investigate that materials may be composed of parts too small to be seen without magnification.	Matter and Atomic Structure	• Matter and Atomic Structure Introduction • Thermal Energy
3.3. Earth and Space Sciences		
3.3.A. Earth Structure, Processes and Cycles		
1 Earth Features and the Processes that Change It		
3.3.6.A1 Recognize and interpret various mapping representations of Earth’s common features.	Earth’s Changing Surface	• Plate Tectonics • Ring of Fire • Volcanoes Change Earth’s Surface • Earth’s Changing Surface Apply
2 Earth’s Resources/Materials		
3.3.6.A2 Examine how soil fertility, composition, resistance to erosion, and texture are affected by many factors.	Earth’s Changing Surface	• Soil
3 Earth’s History		
3.3.6.A3 Intentionally Blank		
4 Water		

Pennsylvania Academic Standards Science: Grade 6	Science 6 A/B	
	Unit Name	Lesson Name
3.3.6.A4 Describe how water on earth cycles in different forms and in different locations, including underground and in the atmosphere.	Earth's Changing Surface	• Water Cycle
5 Weather and Climate		
3.3.6.A5 Describe the composition and layers of the atmosphere.	Atmosphere	• Atmospheric Layers
3.3.6.A5 Explain the effects of oceans on climate.	Atmosphere	• Polar Ice and Climate Change
3.3.6.A5 Describe how global patterns such as the jet stream and water currents influence local weather in measurable terms such as temperature, wind direction and speed, and precipitation.	Atmosphere	• Atmospheric Layers
6 Unifying Themes		
3.3.6.A6 MODELS/SCALES Describe the scales involved in characterizing Earth and its atmosphere.	Atmosphere	• Atmospheric Layers
3.3.6.A6 MODELS/SCALES Create models of Earth's common physical features.	Earth's Changing Surface	• Rocks Under Pressure • Volcanoes Change Earth's Surface • Earth's Changing Surface Apply
3.3.B. Origin and Evolution of the Universe		
1 Composition and Structure		
3.3.6.B1 Compare and contrast the size, composition, and surface features of the planets that comprise the solar system as well as the objects orbiting them.	Sun, Moon, Earth, Solar System	• Orbiting Bodies' Properties • Solar system Distancer System Scale
3.3.6.B1 Recognize the role of gravity as a force that pulls all things on or near the earth toward the center of the earth and in the formation of the solar system and the motions of objects in the solar system.	Sun, Moon, Earth, Solar System	• Gravity and Orbits • Orbiting Bodies' Properties
3.3.6.B1 Explain why the planets orbit the sun in nearly circular paths.	Sun, Moon, Earth, Solar System	• Gravity and Orbits
3.3.6.B1 Describe how the planets change their position relative to the background of the stars.	Sun, Moon, Earth, Solar System	• Introduction to Space
3.3.6.B1 Explain how the tilt of the earth and its revolution around the sun cause an uneven heating of the earth which in turn causes the seasons and weather patterns.	Sun, Moon, Earth, Solar System	• Reason for the Seasons • Asteroid Impact Portfolio 2 • Asteroid Impact Portfolio 3
2 Unifying Themes		
3.3.6.B2 MODELS Use models to demonstrate that earth has different seasons and weather patterns.	Sun, Moon, Earth, Solar System	• Reason for the Seasons • Asteroid Impact Portfolio 3
3.3.6.B2 MODELS Use models to demonstrate that the phases of the moon are a result of its orbit around Earth.	Sun, Moon, Earth, Solar System	• Moon Phases • Asteroid Impact Portfolio 2
3.4. Technology and Engineering Education		
3.4.A. The Scope of Technology		
1 Characteristics of Technology		
3.4.6.A1 Identify how creative thinking and economic and cultural influences shape technological development.	Waves	• Technologies for Information Transfer

Pennsylvania Academic Standards Science: Grade 6	Science 6 A/B	
	Unit Name	Lesson Name
2 Core Concepts of Technology		
3.4.6.A2 Describe how systems thinking involves considering how every part relates to others.	Solar System	• Gravity
3 Technology Connections		
3.4.6.A3 Explain how knowledge from other fields of study (STEM) integrate to create new technologies.	Technology	• Development of Technologies
3.4.B. Technology and Society		
1 Effects of Technology		
3.4.6.B1 Describe how economic, political, and cultural issues are influenced by the development and use of technology.	Technology	• Development of Technologies
2 Technology and Environment		
3.4.6.B2 Describe how technologies can be used to repair damage caused by natural disasters and to break down waste from the use of various products and systems.	Technology	• Technology Usage
3 Society and Development of Technology		
3.4.6.B3 Interpret how societal and cultural priorities are reflected in technological devices.	Technology	• Technology and STEM
4 Technology and History		
3.4.6.B4 Demonstrate how new technologies are developed based on people’s needs, wants, values, and/ or interests.	Sun, Moon, Earth, Solar System	• Gravity and Orbits
3.4.C. Technology and Engineering Design		
1 Design Attributes		
3.4.6.C1 Recognize that requirements for a design include such factors as the desired elements and features of a product or system or the limits that are placed on the design.	Engineering Design Portfolio	• Design Portfolio 1 • Design Portfolio 2 • Design Portfolio 3 • Design Portfolio 4 • Design Portfolio 5
2 Engineering Design		
3.4.6.C2 Show how models are used to communicate and test design ideas and processes.	Sun, Moon, Earth, Solar System	• Gravity and Orbits
3 Research & Development, Invention & Innovation, Experimentation/Problem Solving and Troubleshooting		
3.4.6.C3 Explain why some technological problems are best solved through experimentation.	Technology	• Technology and STEM
3.4.D. Abilities for a Technological World		
1 Applying the Design Process		
3.4.6.D1 Apply a design process to solve problems beyond the laboratory classroom.	Engineering Design Portfolio	• Design Portfolio 1 • Design Portfolio 2 • Design Portfolio 3 • Design Portfolio 4 • Design Portfolio 5
2 Using and Maintaining Technological Systems		

Pennsylvania Academic Standards Science: Grade 6	Science 6 A/B	
	Unit Name	Lesson Name
3.4.6.D2 Use computers appropriately to access and organize and apply information.	Sun, Moon, Earth, Solar system	<ul style="list-style-type: none"> • Moon Phases • Not Enough Hours
	Sun, Moon, Earth, Solar system	<ul style="list-style-type: none"> • Solar System Scale
	Earth's Changing Surface	<ul style="list-style-type: none"> • Mining Groundwater
	Properties of Matter	<ul style="list-style-type: none"> • Mass, Weight, and Density
	Waves	<ul style="list-style-type: none"> • How are Waves Transmitted? • Digitalized Signals
	Reproductive Success	<ul style="list-style-type: none"> • Analyzing Factors
3 Assessing Impact of Products and Systems		
3.4.6.D3 Design and use instruments to evaluate data.	Engineering Design Portfolio	<ul style="list-style-type: none"> • Design Portfolio 1 • Design Portfolio 2 • Design Portfolio 3 • Design Portfolio 4 • Design Portfolio 5
3.4.E. The Designed World		
1 Medical Technologies		
3.4.6.E1 Describe how advances and innovations in medical technologies are used to improve health care.	Technology	<ul style="list-style-type: none"> • Technology and STEM
2 Agricultural and Related Biotechnologies		
3.4.6.E2 Identify how emerging agricultural technologies have an effect on ecosystem dynamics and human/ animal food resources.	Earth's Changing Surface	<ul style="list-style-type: none"> • Mining Groundwater
3 Energy and Power Technologies		
3.4.6.E3 Investigate that power is the rate at which energy is converted from one form to another or transferred from one place to another.	Technology	<ul style="list-style-type: none"> • Development of Technologies
4 Information and Communication Technologies		
3.4.6.E4 Illustrate how communication systems are made up of a source, encoder, transmitter, receiver, decoder, and destination.	Technology	<ul style="list-style-type: none"> • Technologies for Information Transfer
3.4.6.E4 Examine how communications information technologies are used to help humans make decisions and solve problems	Technology	<ul style="list-style-type: none"> • How are Waves Transmitted?
5 Transportation Technologies		
3.4.6.E5 Demonstrate how transporting people and goods involves a combination of individuals and sub-systems, such as structural, propulsion, suspension, guidance, control, and support.	Technology	<ul style="list-style-type: none"> • Technology Usage
6 Manufacturing Technologies		
3.4.6.E6 Identify key aspects of manufacturing systems that use mechanical processes to change the form of natural materials (e.g., separating, forming, combining, conditioning).	Technology	<ul style="list-style-type: none"> • Rock and Mineral Resources
7 Construction Technologies		
3.4.6.E7 Explain how the type of structure determines the way the parts are put together.	Technology	<ul style="list-style-type: none"> • Technology Usage

Science 7

Pennsylvania Academic Standards Science: Grade 7	Science 7 A/B	
	Unit Name	Lesson Name
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
3.1.7.A1 Describe the similarities and differences of physical characteristics in diverse organisms.	Cells	<ul style="list-style-type: none"> Plant and Animal Cells
	Body Systems	<ul style="list-style-type: none"> Body Systems Portfolio 1 Body Systems Portfolio 2 Body Systems Portfolio 3
	Organism Interactions	<ul style="list-style-type: none"> Classification
2 Energy Flow		
3.1.7.A2 Describe how organisms obtain and use energy throughout their lives.	Cells	<ul style="list-style-type: none"> Modeling Cells
	Body Systems	<ul style="list-style-type: none"> Body Systems Portfolio 1
3 Life Cycles		
3.1.7.A3 Explain why the life cycles of different organisms have varied lengths.	Reproduction and Genetics	<ul style="list-style-type: none"> Modeling Sexual Reproduction
4 Cell Cycles		
3.1.7.A4 Explain how cells arise from pre-existing cells.	Cells	<ul style="list-style-type: none"> Mitosis
5 Form and Function		
3.1.7.A5 Explain how the cell is the basic structural and functional unit of living things.	Cells	<ul style="list-style-type: none"> Unicellular and Multicellular Cells Apply
	Body Systems	<ul style="list-style-type: none"> Body Systems Hierarchy
6 Organization		
3.1.7.A6 Identify the levels of organization from cell to organism.	Body Systems	<ul style="list-style-type: none"> Body Systems Hierarchy
7 Molecular Basis of Life		
3.1.7.A7 Compare life processes (e.g. growth, digestion) at the organism level with life processes at the cellular level.	Cells	<ul style="list-style-type: none"> Plant and Animal Cells Modeling Cells Organelles
8 Unifying Themes		
3.1.7.A8 MODELS Apply the appropriate models to show interactions among organisms in an environment.	Organism Interactions	<ul style="list-style-type: none"> Relationships Among Organisms
3.1.B. Genetics		
1 Heredity		
3.1.7.B1 Explain how genetic instructions influence inherited traits.	Reproduction and Genetics	<ul style="list-style-type: none"> Modeling Sexual Reproduction Relate Genotypes and Phenotypes Genetic Factors and Growth Reproduction and Genetics Apply
3.1.7.B1 Identify Mendelian patterns of inheritance.	Reproduction and Genetics	<ul style="list-style-type: none"> Modeling Sexual Reproduction Relate Genotypes and Phenotypes
2 Reproduction		
3.1.7.B2 Compare sexual reproduction with asexual reproduction.	Reproduction and Genetics	<ul style="list-style-type: none"> Asexual and Sexual Reproduction
3 Molecular Basis of Life		

Pennsylvania Academic Standards Science: Grade 7	Science 7 A/B	
	Unit Name	Lesson Name
3.1.7.B3 Intentionally Blank		
4 Biotechnology		
3.1.7.B4 Describe how selective breeding and biotechnology can alter the genetic composition of organisms.	Reproduction and Genetics	• Human Influence on Traits
5 Unifying Themes		
3.1.7.B5 PATTERNS Compare and contrast observable patterns in the physical characteristics across families, strains and species.	Organism Interactions	• Classification • Organism Interaction Apply
3.1.C. Evolution		
1 Natural Selection		
3.1.7.C1 Describe how natural selection is an underlying factor in a population's ability to adapt to changes.	Reproduction and Genetics	• Traits, Survival, and Reproduction
2 Adaptation		
3.1.7.C2 Explain why the extinction of a species may occur when the environment changes.	Organism Interactions	• Relationships Among Organisms
3.1.7.C2 Explain that mutations can alter a gene and are the original source of new variations in a population.	Reproduction and Genetics	• Modeling Mutations
3 Unifying Themes		
3.1.7.C3 CONSTANCY AND CHANGE Identify evidence drawn from geology, fossils, and comparative anatomy that provides the basis for the theory of evolution.	Organism Interactions	• Evidence of Evolution
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
3.2.7.A1 Differentiate between elements, compounds, and mixtures.	Matter Properties	• Types of Matter
3.2.7.A1 Identify groups of elements that have similar properties.	Matter Properties	• Elements and Chemical Change
3.2.7.A1 Explain how materials are characterized by having a specific amount of mass in each unit of volume (density).	Matter Properties	• Types of Matter
2 Structure of Matter		
3.2.7.A2 Identify atoms as the basic building blocks of matter and that elements are composed of one type of atom.	Matter Properties	• Elements and Chemical Change
3 Matter and Energy		
3.2.7.A3 Explain how energy transfer can affect the chemical and physical properties of matter.	Matter Properties	• Elements and Chemical Change
4 Reactions		
3.2.7.A4 Describe how reactants change into products in simple chemical reactions.	Matter Properties	• Elements and Chemical Change
5 Unifying Themes		

Pennsylvania Academic Standards Science: Grade 7	Science 7 A/B	
	Unit Name	Lesson Name
3.2.7.A5 Intentionally Blank		
3.2.B. Physics		
1 Force & Motion of Particles and Rigid Bodies		
3.2.7.B1 Describe how unbalanced forces acting on an object change its velocity.	Force Interactions	<ul style="list-style-type: none"> • Force and Motion Portfolio 1 • Force and Motion Portfolio 2 • Force and Motion Portfolio 3 • Force Interactions Apply
3.2.7.B1 Analyze how observations of displacement, velocity, and acceleration provide necessary and sufficient evidence for the existence of forces.	Force Interactions	<ul style="list-style-type: none"> • Position, Distance, and Displacement
2 Energy Storage and Transformations: Conservation Laws		
3.2.7.B2 Describe how energy can be changed from one form to another (transformed) as it moves through a system or transferred from one system to another system.	Thermal Energy	<ul style="list-style-type: none"> • Energy Transfer Device Portfolio 1 • Energy Transfer Device Portfolio 2 • Energy Transfer Device Portfolio 3
3 Heat/Heat Transfer		
3.2.7.B3 Differentiate among convection, conduction, and radiation.	Thermal Energy	<ul style="list-style-type: none"> • Thermal Energy Transfer
3.2.7.B3 Explain why heat energy consists of the random motion and vibrations of the particles of matter.	Thermal Energy	<ul style="list-style-type: none"> • Kinetic and Thermal Energy • Matter and Temperature • Energy Transfer and Temperature • Kinetic Energy Transfer
4 Electrical and Magnetic Energy		
3.2.7.B4 Explain how electrical current is produced by the flow of electrons.	Force Interactions	<ul style="list-style-type: none"> • Electric and Magnetic Forces
3.2.7.B4 Explain and demonstrate how electric current produces magnetic forces and how moving magnets produce electric current.	Force Interactions	<ul style="list-style-type: none"> • Electric and Magnetic Forces
5 Nature of Waves (Sound and Light Energy)		
3.2.7.B5 Demonstrate that visible light is a mixture of many different colors.	Waves	<ul style="list-style-type: none"> • Light and Sound Waves
3.2.7.B5 Explain the construct of the electromagnetic spectrum.	Waves	<ul style="list-style-type: none"> • Light and Sound Waves
3.2.7.B5 Describe how sound and light energy are transmitted by waves.	Waves	<ul style="list-style-type: none"> • Properties of Waves • Light and Sound Waves
6 Unifying Themes		
3.2.7.B6 ENERGY Demonstrate that heat is often produced as energy is transformed through a system.	Thermal Energy	<ul style="list-style-type: none"> • Kinetic Energy Transfer
3.2.7.B6 ENERGY Demonstrate how the transfer of heat energy causes temperature changes.	Thermal Energy	<ul style="list-style-type: none"> • Energy Transfer and Temperature
3.3. Earth and Space Sciences		
3.3.A. Earth Structure, Processes and Cycles		
1 Earth Features and the Processes that Change It		

Pennsylvania Academic Standards Science: Grade 7	Science 7 A/B	
	Unit Name	Lesson Name
3.3.7.A1 Define basic features of the rock cycle.	Earth's Energy Systems	• The Rock Cycle
3.3.7.A1 Describe the layers of the earth.	Earth's Energy Systems	• The Structure of Earth
3.3.7.A1 Differentiate among the mechanisms by which heat is transferred through the Earth's system.	Weather	• Predicting Weather
2 Earth's Resources/Materials		
3.3.7.A2 Explain land use in relation to soil type and topography.	Geological Processes	• Water and Soil
3 Earth's History		
3.3.7.A3 Explain and give examples of how physical evidence, such as fossils and surface features of glaciation support theories that the Earth has evolved over geologic time.	Geological Processes	• Earth's Evolution
3.3.7.A3 Compare geologic processes over time.	Geological Processes	• Processes Over Time
4 Water		
3.3.7.A4 Differentiate among Earth's water systems.	Geological Processes	• Water and Soil
3.3.7.A4 Describe the motions of tides and identify their causes.	Geological Processes	• Water and Soil
5 Weather and Climate		
3.3.7.A5 Describe basic elements of meteorology.	Weather	• Relative Humidity • Air Pressure • Air Masses • Air Mass Interactions • Predicting Weather • Predicting Weather Portfolio 1 • Predicting Weather Portfolio 2 • Predicting Weather Portfolio 3
	Natural Hazards	• Tracking Hurricane Dorian
3.3.7.A5 Explain the relationship between the energy provided by the sun and the temperature differences among water, land and atmosphere.	Weather	• Predicting Weather
6 Unifying Themes		
3.3.7.A6 MODELS/SCALES Locate significant geologic structures using various mapping representations.	Geological Processes	• Processes Over Time
3.3.7.A6 CONSTANCY/CHANGE Describe changes in atmospheric conditions associated with various weather patterns.	Weather	• Air Pressure • Air Masses • Air Mass Interactions • Predicting Weather Portfolio 1 • Predicting Weather Portfolio 2 • Predicting Weather Portfolio 3

Pennsylvania Academic Standards Science: Grade 7	Science 7 A/B	
	Unit Name	Lesson Name
3.3.7.A6 CONSTANCY/CHANGE Describe geologic time as it related to earth processes.	Geologic Processes	• Processes Over Time
3.3.B. Origin and Evolution of the Universe		
1 Composition and Structure		
3.3.7.B1 Describe gravity as a major force in determining the motions of planets, stars, and the solar system.	Solar System	• Gravity
3.3.7.B1 Compare and contrast properties and conditions of objects in the solar system to those on Earth.	Solar System	• Orbiting Bodies' Properties
2 Unifying Themes		
3.3.7.B2 SCALE AND MEASUREMENT Identify a variety of instruments used to gather evidence about the universe.	Solar System	• Galaxies and the Universe
3.3.7.B2 PATTERNS Describe repeating patterns in the Sun-Earth-Moon system and the positions of stars.	Solar System	• Galaxies and the Universe
3.3.7.B2 SCALE Relate planetary size and distance in our solar system using an appropriate scale model.	Solar System	• Solar System Distances
3.4. Technology and Engineering Education		
3.4.A. The Scope of Technology		
1 Characteristics of Technology		
3.4.7.A1 Explain how technology is closely linked to creativity, which has resulted in innovation and invention.	Matter Properties	• Synthetic Materials , Natural Resources
2 Core Concepts of Technology		
3.4.7.A2 Explain how different technologies involve different sets of processes.	Design and Technology	• Design Process
3 Technology Connections		
3.4.7.A3 Explain how knowledge gained from other fields of study has a direct effect on the development of technological products and systems.	Design and Technology	• Technology Applied
3.4.B. Technology and Society		
1 Effects of Technology		
3.4.7.B1 Explain how the use of technology can have consequences that affect humans in many ways.	Design and Technology	• Technology and Society
2 Technology and Environment		
3.4.7.B2 Explain how decisions to develop and use technologies may be influenced by environmental and economic concerns.	Design and Technology	• Technology and society
3 Society and Development of Technology		
3.4.7.B3 Describe how invention and innovation lead to changes in society and the creation of new needs and wants.	Design and Technology	• Technology and society
4 Technology and History		

Pennsylvania Academic Standards Science: Grade 7	Science 7 A/B	
	Unit Name	Lesson Name
3.4.7.B4 Explain how many inventions and innovations have evolved by using deliberate and methodical processes of tests and refinements.	Design and Technology	• Design Process
3.4.C. Technology and Engineering Design		
1 Design Attributes		
3.4.7.C1 Describe how design, as a creative planning process, leads to useful products and systems.	Design and Technology	• Design Process
2 Engineering Design		
3.4.7.C2 Explain how modeling, testing, evaluating, and modifying are used to transform ideas into practical solutions.	Design and Technology	• Technology and Society
3 Research & Development, Invention & Innovation, Experimentation/Problem Solving and Troubleshooting		
3.4.7.C3 Describe how troubleshooting as a problem-solving method may identify the cause of a malfunction in a technological system.	Design and Technology	• Design Process
3.4.D. Abilities for a Technological World		
1 Applying the Design Process		
3.4.7.D1 Identify and collect information about everyday problems that can be solved by technology and generate ideas and requirements for solving a problem.	Design and Technology	• Design Process
2 Using and Maintaining Technological Systems		
3.4.7.D2 Select and safely use appropriate tools, products and systems for specific tasks.	Weather Body Systems Reproduction and Genetics	• Air Masses • Body Systems Portfolio 2 • Modeling Asexual Reproduction
3 Assessing Impact of Products and Systems		
3.4.7.D3 Use data collected to analyze and interpret trends in order to identify the positive or negative effects of a technology.	Design and Technology	• Engineering Design
3.4.E. The Designed World		
1 Medical Technologies		
3.4.7.E1 Investigate recent advancements in medical technologies and their impact on quality of life.	Design and Technology	• Technology Applied
2 Agricultural and Related Biotechnologies		
3.4.7.E2 Examine specialized equipment and practices used to improve the production of food, fiber, fuel, and other useful products and in the care of animals.	Design and Technology	• Technology Applied
3 Energy and Power Technologies		
3.4.7.E3 Examine the efficiency of energy use in our environment.	Design and Technology	• Technology Applied
4 Information and Communication Technologies		
3.4.7.E4 Illustrate how information can be acquired and sent through a variety of technological sources, including print and electronic media.	Design and Technology	• Technology and Society
5 Transportation Technologies		

Pennsylvania Academic Standards Science: Grade 7	Science 7 A/B	
	Unit Name	Lesson Name
3.4.7.E5 Explain how processes, such as receiving, holding, storing, loading, moving, unloading, delivering, evaluating, marketing, managing and communicating are necessary for the entire system to operate efficiently.	Design and Technology	<ul style="list-style-type: none"> • Manufacturing, Transportation, Construction
6 Manufacturing Technologies		
3.4.7.E6 Examine the processes involved in extracting (e.g., harvesting, drilling, mining) raw materials from the earth for use in manufacturing processes.	Design and Technology	<ul style="list-style-type: none"> • Manufacturing, Transportation, Construction
7 Construction Technologies		
3.4.7.E7 Examine subsystems found in the construction of a building.	Design and Technology	<ul style="list-style-type: none"> • Manufacturing, Transportation, Construction

Science 8

Pennsylvania Academic Standards Science: Grade 8	Science 8 A/B	
	Unit Name	Lesson Name
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
3.1.8.A1 Intentionally Blank		
2 Energy Flow		
3.1.8.A2 Intentionally Blank		
3 Life Cycles		
3.1.8.A3 Intentionally Blank		
4 Cell Cycles		
3.1.8.A4 Intentionally Blank		
5 Form and Function		
3.1.8.A5 Intentionally Blank		
6 Organization		
3.1.8.A6 Intentionally Blank		
7 Molecular Basis of Life		
3.1.8.A7 Intentionally Blank		
8 Unifying Themes		
3.1.8.A8 CHANGE AND CONSTANCY Explain mechanisms organisms use to adapt to their environment.	Natural Selection	<ul style="list-style-type: none"> • Define Natural Selection • Explain Natural Selection • Genetic Variation Over Time • Mathematics of Natural Selection • Natural Selection Apply
3.1.B. Genetics		
1 Heredity		
3.1.8.B1 Intentionally Blank		
2 Reproduction		
3.1.8.B2 Intentionally Blank		
3 Molecular Basis of Life		
3.1.8.B3 Intentionally Blank		
4 Biotechnology		
3.1.8.B4 Intentionally Blank		
5 Unifying Themes		
3.1.8.B5 Intentionally Blank		

Pennsylvania Academic Standards Science: Grade 8	Science 8 A/B	
	Unit Name	Lesson Name
3.1.C. Evolution		
1 Natural Selection		
3.1.8.C1 Explain how reproductive success coupled with advantageous traits over many generations contributes to natural selection.	Natural Selection	<ul style="list-style-type: none"> • Define Natural Selection • Explain Natural Selection • Genetic Variation Over Time • Traits, Survival, and Reproduction • Mathematics of Natural Selection • Natural Selection Apply
2 Adaptation		
3.1.8.C2 Intentionally Blank		
3 Unifying Themes		
3.1.8.C3 Intentionally Blank		
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
3.2.8.A1 Differentiate between mass and weight.	Gravity	<ul style="list-style-type: none"> • Gravitational Attraction and Mass • Investigating Gravity
2 Structure of Matter		
3.2.8.A2 Identify characteristics of elements derived from the periodic table.	Matter Interactions	<ul style="list-style-type: none"> • The Composition of Atoms • The Periodic Table • Conservation in Chemical Reactions
3 Matter and Energy		
3.2.8.A3 Explain how changes in matter are accompanied by changes in energy.	Matter Interactions	<ul style="list-style-type: none"> • Chemical Reactions
4 Reactions		
3.2.8.A4 Compare and contrast physical and chemical changes in terms of products.	Matter Interactions	<ul style="list-style-type: none"> • Matter Interactions Portfolio 1 • Matter Interactions Portfolio 2 • Matter Interactions Portfolio 3
5 Unifying Themes		
3.2.8.A5 Intentionally Blank		
3.2.B. Physics		
1 Force & Motion of Particles and Rigid Bodies		
3.2.8.B1 Explain how inertia is a measure of an object's mass.	Newton's Laws	<ul style="list-style-type: none"> • Newton's First Law • Newton's Second Law
3.2.8.B1 Explain how momentum is related to the forces acting on an object.	Newton's Laws	<ul style="list-style-type: none"> • Newton's Second Law
2 Energy Storage and Transformations: Conservation Laws		
3.2.8.B2 Identify situations where kinetic energy is transformed into potential energy, and vice versa.	Newton's Laws	<ul style="list-style-type: none"> • Potential and Kinetic Energy
3 Heat/Heat Transfer		
3.2.8.B3 Explain how changes in temperature are accompanied by changes in kinetic energy.	Newton's Laws	<ul style="list-style-type: none"> • Potential and Kinetic Energy

Pennsylvania Academic Standards Science: Grade 8	Science 8 A/B	
	Unit Name	Lesson Name
4 Electrical and Magnetic Energy		
3.2.8.B4 Compare and contrast atomic properties of conductors and insulators.	Matter Interactions	• Composition of Atoms
5 Nature of Waves (Sound and Light Energy)		
3.2.8.B5 Intentionally Blank		
6 Unifying Themes		
3.2.8.B6 PATTERNS Explain how physics principles underlie everyday phenomena and important technologies.	The Design World	• Physics and Chemistry in Design
3.3. Earth and Space Sciences		
3.3.A. Earth Structure, Processes and Cycles		
1 Earth Features and the Processes that Change It		
3.3.8.A1 Distinguish between physical and chemical weathering.	Age of Earth	• Physical Weathering of Rock • Chemical Weathering of Rock
3.3.8.A1 Compare and contrast the types of energy that drive Earth’s systems.	Climate	• The Climate System
2 Earth’s Resources/Materials		
3.3.8.A2 Describe renewable and nonrenewable energy resources.	Natural Resources	• Renewable and Nonrenewable Resources • Fossil Fuels
3 Earth’s History		
3.3.8.A3 Explain how matter on earth is conserved throughout the geological processes over time.	Age of Earth	• The Growing Atlantic Ocean
4 Water		
3.3.8.A4 Explain how the oceans form one interconnected circulation system powered by wind, tides, the Earth’s rotation, and water density differences.	Climate	• Ocean Currents • Ocean Circulation • The Climate System • Climate Apply
5 Weather and Climate		
3.3.8.A5 Explain how the curvature of the earth contributes to climate.	Climate	• Heating Patterns • The Climate System • Climate Apply
3.3.8.A5 Compare and contrast water vapor, clouds, and humidity.	Climate	• Atmospheric Currents
6 Unifying Themes		
3.3.8.A6 CHANGES Explain changes in earth systems in terms of energy transformation and transport.	Climate	• Atmospheric Currents • Thermal Energy • The Climate System • Climate Apply
3.3.8.A6 MODELS Explain how satellite images, models, and maps are used to identify Earth’s resources.	Impact of Humans	• Conserving Bioresources
3.3.B. Origin and Evolution of the Universe		
1 Composition and Structure		

Pennsylvania Academic Standards Science: Grade 8	Science 8 A/B	
	Unit Name	Lesson Name
3.3.8.B1 Explain how light, measured remotely, can be used to classify objects in the universe.	The Universe	• Galaxies
2 Unifying Themes		
3.3.8.B2 SCALE AND MEASUREMENT Explain measurements and evidence indicating the age of the universe.	The Universe	• Theories about the Universe
3.4. Technology and Engineering Education		
3.4.A. The Scope of Technology		
1 Characteristics of Technology		
3.4.8.A1 Analyze the development of technology based on affordability or urgency.	Impact of Humans	• Conserving Bioresources
2 Core Concepts of Technology		
3.4.8.A2 Explain how controls are steps that people perform using information about the system that causes systems to change.	The Design World	• Transportation Design
3 Technology Connections		
3.4.8.A3 Compare how a product, system, or environment developed for one setting may be applied to another setting.	The Design World	• Biotechnology
3.4.B. Technology and Society		
1 Effects of Technology		
3.4.8.B1 Evaluate the societal implications of the management of waste produced by technology.	The Design World	• Making Compost • Reducing Food Waste
2 Technology and Environment		
3.4.8.B2 Compare and contrast decisions to develop and use technologies as related to environmental and economic concerns.	Natural Resources Impact of Humans	• Energy Exploration • Conserving Mineral Resources • Conserving Bioresources
3 Society and Development of Technology		
3.4.8.B3 Explain how throughout history, new technologies have resulted from the demands, values, and interests of individuals, businesses, industries, and societies.	The Design World	• Design Technology
4 Technology and History		
3.4.8.B4 Explain how societal and cultural priorities and values are reflected in technological devices.	The Design World	• Design Technology
3.4.C. Technology and Engineering Design		
1 Design Attributes		
3.4.8.C1 Evaluate the criteria and constraints of a design.	Impact of Humans Non-Contact Forces Biodiversity	• Mitigating Human Impact Portfolio 2 • Non-Contact Forces Portfolio 3 • Biodiversity Portfolio 2 • Biodiversity Portfolio 3
2 Engineering Design		
3.4.8.C2 Explore the design process as a collaborative endeavor in which each person in the group presents his or her ideas in an open forum.	The Design World	• The Design World Introduction • Design Technology

Pennsylvania Academic Standards Science: Grade 8	Science 8 A/B	
	Unit Name	Lesson Name
3 Research & Development, Invention & Innovation, Experimentation/Problem Solving and Troubleshooting		
3.4.8.C3 Analyze how a multi-disciplinary (STEM) approach to problem solving will yield greater results.	The Design World	• Physics and Chemistry in Design
3.4.D. Abilities for a Technological World		
1 Applying the Design Process		
3.4.8.D1 Test and evaluate the solutions for a design problem.	Impact of Humans	• Mitigating Human Impact Portfolio 2 • Mitigating Human Impact Portfolio 3
2 Using and Maintaining Technological Systems		
3.4.8.D2 Operate and maintain systems in order to achieve a given purpose.	Impact of Humans	• Mitigating Human Impact Portfolio 3
	Matter Interactions	• The Periodic Table
	Gravity	• Investigating Gravity
3 Assessing Impact of Products and Systems		
3.4.8.D3 Interpret and evaluate the accuracy of the information obtained and determine its usefulness.	Impact of Humans	• Mitigating Human Impact Portfolio 3
3.4.E. The Designed World		
1 Medical Technologies		
3.4.8.E1 Analyze what technologies are used in genetic engineering and predict how it may change the future of medicine.	Natural Selection	• Human Influence on Traits
2 Agricultural and Related Biotechnologies		
3.4.8.E2 Describe how biotechnology applies the principles of biology to create commercial products or processes.	The Design world	• Biotechnology
3 Energy and Power Technologies		
3.4.8.E3 Examine power systems are used to drive and provide propulsion to other technological products or systems.	The Design World	• Transportation Design
4 Information and Communication Technologies		
3.4.8.E4 Describe how the design of the message is influenced by such factors as the intended audience, medium, purpose, and nature of the message.	The Design World	• Construction Design
5 Transportation Technologies		
3.4.8.E5 Describe how governmental regulations influence the design, operation and efficiency of transportation systems.	The Design World	• Transportation Technology
6 Manufacturing Technologies		
3.4.8.E6 Analyze the steps involved in the manufacturing process (e.g., design, development, production, marketing and servicing of products and systems).	Natural Resources	• Resource Processing
7 Construction Technologies		
3.4.8.E7 Analyze factors that determine structural design (e.g., building laws and codes, style, convenience, cost, climate, and function).	The Design World	• Construction Design

Physical Science

Pennsylvania Academic Standards Science: Physical Science	Physical Science A/B	
	Unit Name	Lesson Name
Main Ideas: Chemistry		
Scientific Method		
3.1.10.A6 Compare and contrast scientific theories	Atomic Structure	<ul style="list-style-type: none"> • Periodic Table Introduction Extend the lesson to compare and contrast scientific theories.
3.1.C.A6 Know that both direct and indirect observations are used by scientists to study the natural world and universe	Atomic Structure	<ul style="list-style-type: none"> • Composition of Atoms • Periodic Table Introduction

	Unit Name	Lesson Name
3.2.P.B1 Use force and mass to explain translational motion or simple harmonic motion of objects	Newton's Laws	<ul style="list-style-type: none"> • Newton's Second Law • Force, Mass and Acceleration • Newton's Third Law • Collision Forces
	Force and Motion	<ul style="list-style-type: none"> • Magnitude and Direction of Force • Forces that Change Motion • Velocity and Acceleration • Net Force and Acceleration
	Conservation of Momentum	<ul style="list-style-type: none"> • Zero Net Force
3.2.12.B2 Demonstrate how the law of conservation of momentum and conservation of energy provide alternate approaches to predict and describe the motion of objects	Properties	<ul style="list-style-type: none"> • Thermal Energy and Kinetic Molecular Theory
	Conservation of Momentum	<ul style="list-style-type: none"> • Momentum • The Moment of Impact • Using Vectors to Describe Momentum • Zero Net Force • Proving Conservation of Momentum • Conservation of Momentum Apply
	Energy of Motion	<ul style="list-style-type: none"> • Kinetic and Potential Energy • Predicting Changes in Kinetic Energy
3.2.10.B1 Analyze the relationships among the net forces acting on a body, the mass of the body, and the resulting acceleration using Newton's Second Law of Motion	Newton's Laws	<ul style="list-style-type: none"> • Newton's Second Law • Force, Mass and Acceleration • Collision Forces
	Force and Motion	<ul style="list-style-type: none"> • Forces that Change Motion • Velocity and Acceleration • Net Force and Acceleration
	Conservation of Momentum	<ul style="list-style-type: none"> • Zero Net Force • Momentum Portfolio Day 2
3.2.10.B1 Apply Newton's Law of Universal gravitation to the forces between two objects	Gravity	<ul style="list-style-type: none"> • Gravitational Force, Attraction and Mass
3.2.10.B1 Use Newton's third law to explain forces as interactions between bodies	Newton's Laws	<ul style="list-style-type: none"> • Newton's Third Law • Collision Forces
	Force and Motion	<ul style="list-style-type: none"> • Magnitude and Direction of Force • Forces that Change Motion
	Conservation of Momentum	<ul style="list-style-type: none"> • Using Vectors to Describe Momentum
3.2.10.B1 Describe how interactions between objects conserve momentum	Conservation of Momentum	<ul style="list-style-type: none"> • Conservation of Momentum Introduction • Momentum • The Moment of Impact • Using Vectors to Describe Momentum • Zero Net Force • Proving Conservation of Momentum • Momentum Portfolio Day 1 • Momentum Portfolio Day 2 • Momentum Portfolio Day 3

Pennsylvania Academic Standards Science: Physical Science	Physical Science A/B	
	Unit Name	Lesson Name
3.2.P.B6 Use Newton's laws of motion and gravitation to describe and predict the motion of objects ranging from atoms to the galaxies	Newton's Laws	<ul style="list-style-type: none"> • Newton's First Law • Newton's Second Law • Force, Mass and Acceleration • Newton's Third Law • Collision Forces
	Force and Motion	<ul style="list-style-type: none"> • Magnitude and Direction of Force • Forces that Change Motion • Velocity and Acceleration • Net Force and Acceleration
	Conservation of Momentum	<ul style="list-style-type: none"> • Momentum • The Moment of Impact • Using Vectors to Describe Momentum • Zero Net Force • Conservation of Momentum Apply
3.2.12.B6 Compare and contrast motions of objects using forces and conservation laws	Properties	<ul style="list-style-type: none"> • Thermal Energy and Kinetic Molecular Theory
	Newton's Laws	<ul style="list-style-type: none"> • Newton's First Law • Newton's Second Law • Force, Mass and Acceleration • Newton's Third Law • Collision Forces
	Force and Motion	<ul style="list-style-type: none"> • Magnitude and Direction of Force • Forces that Change Motion • Velocity and Acceleration • Net Force and Acceleration
	Conservation of Momentum	<ul style="list-style-type: none"> • Momentum • The Moment of Impact • Using Vectors to Describe Momentum • Zero Net Force • Proving Conservation of Momentum • Momentum Portfolio Day 1 • Momentum Portfolio Day 3 • Conservation of Momentum Apply
	Energy of Motion	<ul style="list-style-type: none"> • Kinetic and Potential Energy • Factors that Affect Kinetic Energy
Work/Power		
3.2.10.B2 Explain the relationships between work and power	Force and Work	<ul style="list-style-type: none"> • Force and Work Relationships
Energy, Temperature/Heat		
3.2.10.B2 Explain how the overall energy flowing through a system remains constant	Properties	<ul style="list-style-type: none"> • Thermal Energy and Kinetic Molecular Theory
	Energy of Motion	<ul style="list-style-type: none"> • Kinetic and Potential Energy • Predicting Changes in Kinetic Energy
3.2.10.B2 Describe the work-energy theorem	Force and Work	<ul style="list-style-type: none"> • Force and Work Relationships
	Properties	<ul style="list-style-type: none"> • Thermal Energy and Kinetic Molecular Theory

Pennsylvania Academic Standards Science: Physical Science	Physical Science A/B	
	Unit Name	Lesson Name
3.2.10.B6 Explain how the behavior of matter and energy follow predictable patterns that are defined by laws	Energy of Motion	<ul style="list-style-type: none"> • Kinetic and Potential Energy • Predicting Changes in Kinetic Energy
	Energy and Forces	<ul style="list-style-type: none"> • Two Object Interaction • Stored Energy Changes I • Stored Energy Changes II • Cause and Effect • Energy and Forces Motion Portfolio 1
	Thermal Energy	<ul style="list-style-type: none"> • Thermal Energy Unit Introduction • Matter and Temperature • Energy Transfer and Temperature • Thermal Energy Transfer Device Portfolio 1 • Thermal Energy Transfer
3.2.C.B3 Describe the law of conservation of energy	Properties	• Thermal Energy and Kinetic Molecular Theory
	Energy of Motion	• Kinetic and Potential Energy
	Thermal Energy	• Thermal Energy Transfer Device Portfolio 1
3.2.8.B2 Identify situations where kinetic energy is transformed into potential energy, and vice versa	Properties	• Thermal Energy and Kinetic Molecular Theory
	Energy of Motion	<ul style="list-style-type: none"> • Kinetic and Potential Energy • Predicting Changes in Kinetic Energy • Energy Transfer and Kinetic Energy
	Energy and Forces	<ul style="list-style-type: none"> • Two Object Interaction • Stored Energy Changes II • Energy and Forces Motion Portfolio 1 • Energy and Forces Motion Portfolio 3
	Thermal Energy	• Matter and Temperature
3.3.8.A2 Describe renewable and nonrenewable energy resources	Energy of Motion	• Renewable and Non-renewable Energy
3.2.10.B3 Explain how heat energy will move from a higher temperature to a lower temperature until equilibrium is reached	Thermal Energy	<ul style="list-style-type: none"> • Thermal Energy Unit Introduction • Matter and Temperature • Thermal Energy Transfer Device Portfolio 2 • Thermal Energy Transfer
3.2.10.B3 Analyze the processes of convection, conduction, and radiation between objects or regions that are at different temperatures	Thermal Energy	<ul style="list-style-type: none"> • Thermal Energy Unit Introduction • Thermal Energy Transfer Device Portfolio 1 • Thermal Energy Transfer Device Portfolio 2 • Thermal Energy Transfer
3.2.C.B3 Explain the difference between an endothermic process and an exothermic process	Properties	• Solutes and Solvents
	Chemical Reactions	<ul style="list-style-type: none"> • Total Bond Energy • Changes in Bond Energy
3.2.P.B3 Analyze factors that influence convection, conduction, and radiation between objects or regions that are at different temperatures.	Thermal Energy	<ul style="list-style-type: none"> • Thermal Energy Unit Introduction • Thermal Energy Transfer Device Portfolio 1 • Thermal Energy Transfer Device Portfolio 2 • Thermal Energy Transfer
	Properties	• Thermal Energy and Kinetic Molecular Theory
	Chemical Reactions	<ul style="list-style-type: none"> • Reaction Rates Portfolio 1 • Reaction Rates Portfolio 2

Pennsylvania Academic Standards Science: Physical Science	Physical Science A/B	
	Unit Name	Lesson Name
3.2.8.B3 Explain how changes in temperature are accompanied by changes in kinetic energy	Energy of Motion	<ul style="list-style-type: none"> • Predicting Changes in Kinetic Energy
	Energy and Forces	<ul style="list-style-type: none"> • Stored Energy Changes I • Stored Energy Changes II
	Thermal Energy	<ul style="list-style-type: none"> • Thermal Energy Unit Introduction • Kinetic and Thermal Energy • Matter and Temperature • Energy Transfer and Temperature • Thermal Energy Transfer
3.2.12.B4 Describe the relationship between average kinetic molecular energy, temperature, and phase changes	Properties	<ul style="list-style-type: none"> • Thermal Energy and Kinetic Molecular Theory • Gases Under Pressure
	Chemical Reactions	<ul style="list-style-type: none"> • Reaction Rates Portfolio 2
	Thermal Energy	<ul style="list-style-type: none"> • Thermal Energy Unit Introduction • Kinetic and Thermal Energy • Matter and Temperature • Energy Transfer and Temperature • Thermal Energy Transfer
Waves, Sound Waves, Light		
3.2.10.B5 Understand that waves transfer energy without transferring matter	Waves	<ul style="list-style-type: none"> • Waves Introduction • Wave Characteristics • Characteristics of Waves • Frequency and Wavelength • The Speed of Sound • Wavelength in Different Media
3.2.10.B5 Compare and contrast the wave nature of light and sound	Waves	<ul style="list-style-type: none"> • Waves Introduction • Wave Characteristics
3.2.10.B5 Describe the components of the electromagnetic spectrum	Waves	<ul style="list-style-type: none"> • Wave Characteristics • Characteristics of Waves
3.2.10.B5 Describe the difference between sound and light waves	Waves	<ul style="list-style-type: none"> • Waves Introduction • Wave Characteristics
3.2.P.B5 Explain how waves transfer energy without transferring matter	Waves	<ul style="list-style-type: none"> • Wave Characteristics • Sound Wave Phenomena • Characteristics of Waves • The Speed of Sound • Wavelength in Different Media
3.2.P.B5 Explain how waves carry information from remote sources that can be detected and interpreted	Waves	<ul style="list-style-type: none"> • Sound Wave Phenomena • Wave Application • Digital and Analog Systems
3.2.P.B5 Describe the causes of wave frequency, speed, and wavelength	Waves	<ul style="list-style-type: none"> • Lens and Mirrors • Sound Wave Phenomena • Characteristics of Waves • Frequency and Wavelength • The Speed of Sound • Waves in Different Media • Wavelength in Different Media • Wave Application

Pennsylvania Academic Standards Science: Physical Science	Physical Science A/B	
	Unit Name	Lesson Name
3.2.12.B5 Research how principles of wave transmissions are used in a wide range of technologies	Waves	<ul style="list-style-type: none"> • Sound Wave Phenomena • Wavelength in Different Media • Wave Application • Digital and Analog Systems • Life Without Digital Systems • Pros and Cons of Digital Systems
3.2.12.B5 Research technologies that incorporate principles of wave transmission	Waves	<ul style="list-style-type: none"> • Characteristics of Waves • Frequency and Wavelength • Wavelength in Different Media • Wave Application • Life Without Digital Systems • Pros and Cons of Digital Systems
Electricity, Magnetism		
3.2.10.B4 Describe quantitatively the relationships between voltage, current, and resistance to electrical energy and power	Non-Contact Forces	<ul style="list-style-type: none"> • Electrical Energy Properties
3.2.10.B4 Describe the relationship between electricity and magnetism as two aspects of a single electromagnetic force	Energy and Forces	<ul style="list-style-type: none"> • Stored Energy Changes I • Stored Energy Changes II • Cause and Effect • Energy and Forces Motion Portfolio 1 • Energy and Forces Motion Portfolio 2 • Energy and Forces Motion Portfolio 3
	Non-Contact Forces	<ul style="list-style-type: none"> • Non-Contact Forces Introduction • Strength of Magnetic Forces • Non-Contact Forces Portfolio 3
3.2.P.B4 Explain how stationary and moving particles result in electricity and magnetism	Energy and Forces	<ul style="list-style-type: none"> • Stored Energy Changes I • Stored Energy Changes II • Cause and Effect • Energy and Forces Motion Portfolio 1
	Non-Contact Forces	<ul style="list-style-type: none"> • Electrical Circuits • Strength of Magnetic Forces • Non-Contact Forces Portfolio 1 • Non-Contact Forces Portfolio 3 • Electromagnetism in Use
3.2.P.B4 Develop qualitative and quantitative understanding of current, voltage, resistance, and the connections among them	Energy and Forces	<ul style="list-style-type: none"> • Energy and Forces Motion Portfolio 1
	Non-Contact Forces	<ul style="list-style-type: none"> • Conductors and Insulators • Electrical Energy Properties • Electrical Circuits
3.2.P.B4 Explain how electrical induction is applied in technology	Energy and Forces	<ul style="list-style-type: none"> • Stored Energy Changes I • Stored Energy Changes II • Cause and Effect • Energy and Forces Motion Portfolio 1
	Non-Contact Forces	<ul style="list-style-type: none"> • Non-Contact Forces Introduction • Electrical Circuits • Electromagnetism in Use

Pennsylvania Academic Standards Science: Physical Science	Physical Science A/B	
	Unit Name	Lesson Name
3.2.12.B4 Describe conceptually the attractive and repulsive forces between objects relative to their charges and the distance between them	Energy and Forces	<ul style="list-style-type: none"> • Two Object Interaction • Strength of Electrical Forces
	Non-Contact Forces	<ul style="list-style-type: none"> • Non-Contact Forces Portfolio 1 • Non-Contact Forces Portfolio 2 • Non-Contact Forces Portfolio 3 • Electromagnetism in Use

Biology

Pennsylvania Academic Standards Science: Biology		Biology A/B	
	Unit Name	Lesson Name	
3.1. Biological Sciences			
3.1.A. Organisms and Cells			
1 Common Characteristics of Life			
3.1.B.A1 Describe the common characteristics of life.	Cells and Body Systems	<ul style="list-style-type: none"> • What Goes In Must Come Out • What is a Virus 	
	Biodiversity	<ul style="list-style-type: none"> • Carry Capacity 	
3.1.B.A1 Compare and contrast the cellular structures and degrees of complexity of prokaryotic and eukaryotic organisms.	DNA	<ul style="list-style-type: none"> • Genes, Chromosomes, and DNA 	
	Cells and Body Systems	<ul style="list-style-type: none"> • Structures of the Cell • Cell Structures 	
	Energy Flow	<ul style="list-style-type: none"> • Energy Flow Apply 	
3.1.B.A1 Explain that some structures in eukaryotic cells developed from early prokaryotic cells (e.g., mitochondria, chloroplasts)	Cells and Body Systems	<ul style="list-style-type: none"> • Structures of the Cell • Cell Structures 	
2 Energy Flow			
3.1.B.A2 Identify the initial reactants, final products, and general purposes of photosynthesis and cellular respiration.	Cell Work	<ul style="list-style-type: none"> • Photosynthesis • Photosynthesis: Energy Conversion • Photosynthesis Portfolio 1 • Photosynthesis Portfolio 2 • Photosynthesis Portfolio 3 • Cellular Respiration and Matter • Making and Breaking Bonds for Energy • Cellular Respiration • Cell Work Apply 	
	Biochemistry	<ul style="list-style-type: none"> • Respiration Overview • Biochemistry Apply 	
	Carbon Cycle	<ul style="list-style-type: none"> • Living Things and the Carbon Cycle • Cell Work and Carbon • Carbon Cycle Apply 	
	Energy Flow	<ul style="list-style-type: none"> • Describing the Flow of Energy • Energy Flow Apply 	
3.1.B.A2 Explain the important role of ATP in cell metabolism.	Cell Work	<ul style="list-style-type: none"> • Photosynthesis: Energy Conversion • Cellular Respiration and Matter • Making and Breaking Bonds for Energy • Heat and Cellular Respiration 	
3.1.B.A2 Describe the relationship between photosynthesis and cellular respiration in photosynthetic organisms.	Cell Work	<ul style="list-style-type: none"> • Cell Work Apply 	
	Biochemistry	<ul style="list-style-type: none"> • You Are What You Eat • What All Biomolecules Have in Common • Biochemistry Apply 	
	Carbon Cycle	<ul style="list-style-type: none"> • Living Things and the Carbon Cycle • Cell Work and Carbon • Carbon Cycle Apply 	

	Energy Flow	<ul style="list-style-type: none"> • Cycling of Matter and Energy • Life Processes • Recycling of Matter • Describing the Flow of Energy • Energy Flow Apply
3.1.B.A2 Explain why many biological macromolecules such as ATP and lipids contain high energy bonds.	Cell Work	<ul style="list-style-type: none"> • Making and Breaking Bonds for Energy • Energy and Matter Conservation
3.1.B.A2 Explain the importance of enzymes as catalysts in cell reactions.	Biochemistry	<ul style="list-style-type: none"> • Respiration Overview
3.1.B.A2 Identify how factors such as pH and temperature may affect enzyme function.	Biochemistry	<ul style="list-style-type: none"> • What All Biomolecules Have in Common • Chemical Reactions
3.1.B.A2	Biochemistry	<ul style="list-style-type: none"> • Chemical Reactions
3 Life Cycles		
3.1.B.A3 Explain how all organisms begin their life cycles as a single cell and that in multicellular organisms, successive generations of embryonic cells form by cell division.	Mitosis	<ul style="list-style-type: none"> • Mitosis Unit Introduction • Complex Organisms
4 Cell Cycles		
3.1.B.A4 Summarize the stages of the cell cycle.	Cells and Body Systems	<ul style="list-style-type: none"> • Disruptions of the Cell Cycle
	Mitosis	<ul style="list-style-type: none"> • Complex Organisms • Mitosis Apply
3.1.B.A4 Examine how interactions among the different molecules in the cell cause the distinct stages of the cell cycle which can also be influenced by other signaling molecules.	Cells and Body Systems	<ul style="list-style-type: none"> • Disruptions of the Cell Cycle
3.1.B.A4 Explain the role of mitosis in the formation of new cells and its importance in maintaining chromosome number during asexual reproduction.	Mitosis	<ul style="list-style-type: none"> • Complex Organisms • Inputs and Outputs of Mitosis • Mitosis in Complex Organisms • Mitosis and Genetic Information • How Cells Are Used in the Body • Mitosis Apply
3.1.B.A4 Compare and contrast a virus and a cell. Relate the stages of viral cycles to the cell cycle.	Cells and Body Systems	<ul style="list-style-type: none"> • What is a Virus • Disruptions of the Cell Cycle
5 Form and Function		
3.1.B.A5 Relate the structure of cell organelles to their function (energy capture and release, transport, waste removal, protein synthesis, movement, etc.).	Cells and Body Systems	<ul style="list-style-type: none"> • What Goes In Must Come Out • Structures of the Cell
3.1.B.A5 Explain the role of water in cell metabolism.	Cell Work	<ul style="list-style-type: none"> • Energy and Matter Conservation
3.1.B.A5 Explain how the cell membrane functions as a regulatory structure and protective barrier for the cell.	Cells and Body Systems	<ul style="list-style-type: none"> • What Goes In Must Come Out
3.1.B.A5 Describe transport mechanisms across the plasma membrane.	Cells and Body Systems	<ul style="list-style-type: none"> • What Goes In Must Come Out
6 Organization		
3.1.B.A6 Explain how cells differentiate in multicellular organisms.	Mitosis	<ul style="list-style-type: none"> • Mitosis in Complex Organisms • Gene Expression

7 Molecular Basis of Life		
3.1.B.A7 Analyze the importance of carbon to the structure of biological macromolecules.	Biochemistry	<ul style="list-style-type: none"> • The Building Blocks of Life • The Essential Sugar Molecule
3.1.B.A7 Compare and contrast the functions and structures of proteins, lipids, carbohydrates, and nucleic acids.	DNA	<ul style="list-style-type: none"> • Genes, Chromosomes, and DNA
	Biochemistry	<ul style="list-style-type: none"> • Biochemistry Unit Introduction • The Building Blocks of Life • The Essential Sugar Molecule • What All Biomolecules Have in Common • Chemical Reactions • Reliable Sources • Biochemistry Apply
3.1.B.A7 Explain the consequences of extreme changes in pH and temperature on cell proteins.	Homeostasis Portfolio	<ul style="list-style-type: none"> • Homeostasis Portfolio 1 • Homeostasis Portfolio 2 • Homeostasis Portfolio 3
	Biochemistry	<ul style="list-style-type: none"> • Chemical Reactions
8 Unifying Themes		
3.1.B.A8 CHANGE AND CONSTANCY Recognize that systems within cells and multicellular organisms interact to maintain homeostasis.	Cells and Body Systems	<ul style="list-style-type: none"> • Parts of a Multicellular Organism • Modeling Body Systems • Interactions Between Systems • Models Versus Actual Body Systems • Cells and Body Systems Apply
	Homeostasis Portfolio	<ul style="list-style-type: none"> • Homeostasis Portfolio 1 • Homeostasis Portfolio 2 • Homeostasis Portfolio 3
3.1.B.A8 PATTERNS Demonstrate the repeating patterns that occur in biological polymers.	Biochemistry	<ul style="list-style-type: none"> • The Essential Sugar Molecule • What All Biomolecules Have in Common • Chemical Reactions • Matter Conservations Matters
3.1.B.A8 SYSTEMS Describe how the unique properties of water support life.	Cell Work	<ul style="list-style-type: none"> • Energy and Matter Conservation
3.1.B. Genetics		
1 Heredity		
3.1.B.B1 Explain that the information passed from parents to offspring is transmitted by means of genes which are coded in DNA molecules.	DNA	<ul style="list-style-type: none"> • DNA Unit Introduction • Genes, Chromosomes, and DNA
3.1.B.B1 Explain the basic process of DNA replication.	Mitosis	<ul style="list-style-type: none"> • Complex Organisms
	Genetic Variation	<ul style="list-style-type: none"> • Genetic Variation from Meiosis • Genetic Variation Apply
3.1.B.B1 Describe the basic processes of transcription and translation.	DNA	<ul style="list-style-type: none"> • How Cells Make Proteins
3.1.B.B1 Explain how crossing over, jumping genes, and deletion and duplication of genes results in genetic variation.	Genetic Variation	<ul style="list-style-type: none"> • Genetic Variation from Meiosis • Genetic Variation from Errors • Genetic Variation Apply
	DNA	<ul style="list-style-type: none"> • Genes, Chromosomes, and DNA • Gene Expression

<p>3.1.B.B1 Explain how mutations can alter genetic information and the possible consequences on resultant cells.</p>	<p>Genetic Variation</p>	<ul style="list-style-type: none"> • Genetic Variation from Errors • Environmental Genetic Variation • Genetic Mutations Produce Variation • Genetic Variations Can Be Inherited • Genetic Variation Apply
<p>2 Reproduction</p>	<p>Biological Evolution</p>	<ul style="list-style-type: none"> • Genetic Variation and Evolution
<p>3.1.B.B2 Describe how the process of meiosis results in the formation of haploid gametes and analyze the importance of meiosis in sexual reproduction.</p>	<p>Genetic Variation</p>	<ul style="list-style-type: none"> • Genetic Variation from Meiosis • Genetic Variations Can Be Inherited
<p>3.1.B.B2 Compare and contrast the function of mitosis and meiosis.</p>	<p>Biological Evolution</p>	<ul style="list-style-type: none"> • Genetic Variation and Evolution
<p>3.1.B.B2 Illustrate that the sorting and recombining of genes in sexual reproduction results in a great variety of possible gene combinations in offspring.</p>	<p>Mitosis</p>	<ul style="list-style-type: none"> • Mitosis Unit Introduction • Complex Organisms • Inputs and Outputs of Mitosis • Mitosis in Complex Organisms • Mitosis and Genetic Information
<p>3.1.B.B2</p>	<p>Genetic Variation</p>	<ul style="list-style-type: none"> • Genetic Variation from Meiosis • Genetic Variation from Meiosis • Genetic Variation from Errors • Genetic Mutations Produce Variation • Genetic Variations Can Be Inherited • Sources of New DNA Combinations
<p>3 Molecular Basis of Life</p>	<p>Biological Evolution</p>	<ul style="list-style-type: none"> • Genetic Variation and Evolution
<p>3.1.B.B3 Describe the basic structure of DNA, including the role of hydrogen bonding.</p>	<p>DNA</p>	<ul style="list-style-type: none"> • Genes, Chromosomes, and DNA
<p>3.1.B.B3 Explain how the process of DNA replication results in the transmission and conservation of the genetic code.</p>	<p>Genetic Variation</p>	<ul style="list-style-type: none"> • Genetic Variation Unit Introduction • Genetic Variation from Errors
<p>3.1.B.B3 Describe how transcription and translation result in gene expression.</p>	<p>Genetic Variation</p>	<ul style="list-style-type: none"> • Genetic Variation from Meiosis
<p>3.1.B.B3 Differentiate among the end products of replication, transcription, and translation.</p>	<p>DNA</p>	<ul style="list-style-type: none"> • Gene Expression • Gene Expression and Gene Regulation
<p>3.1.B.B3 Cite evidence to support that the genetic code is universal.</p>	<p>DNA</p>	<ul style="list-style-type: none"> • Genes, Chromosomes, and DNA
<p>4 Biotechnology</p>	<p>Genetic Variation</p>	<ul style="list-style-type: none"> • Genetic Variation from Errors
<p>3.1.B.B4 Explain how genetic technologies have impacted the fields of medicine, forensics, and agriculture.</p>	<p>DNA</p>	<ul style="list-style-type: none"> • Genetically Modified Organisms

5 Unifying Themes		
3.1.B.B5 PATTERNS	DNA	• Genetic Research
	Genetic Variation	• Genetic Variation from Meiosis
3.1.B.B5 PATTERNS Distinguish among observed inheritance patterns caused by several types of genetic traits (dominant, recessive, codominant, sex-linked, polygenic, incomplete dominance, multiple alleles).	DNA	• Genetic Research • Genetic Factors in Inheritance
	Genetic Variation	• Organizing Data About Expressed Traits • Analyzing Data About Traits
3.1.B.B5 CONSTANCY AND CHANGE	DNA	• Genes, Chromosomes, and DNA
	Genetic Variation	• Genetic Variation from Errors
3.1.B.B5 CONSTANCY AND CHANGE Explain how gene actions, patterns of heredity, and reproduction of cells and organisms account for the continuity of life.	DNA	• Gene Expression and Gene Regulation • Genetic Factors in Inheritance
	Genetic Variation	• Genetic Variation Unit Introduction • Genetic Variation from Meiosis • Genetic Variation from Errors • Genetic Variations Can Be Inherited
3.1.B.B5 SCALE Demonstrate how inherited characteristics can be observed at the molecular, cellular, and organism levels.	DNA	• Genetic Research • Genetic Factors in Inheritance
	Genetic Variation	• Genetic Variations Can Be Inherited • Sources of New DNA Combinations
3.1.C. Evolution		
1 Natural Selection		
3.1.B.C1 Describe species as reproductively distinct groups of organisms.	Biodiversity	• Classification of Living Things • Biodiversity at Different Scales
	Biological Evolution	• Environmental Change
3.1.B.C1 Analyze the role that geographic isolation can play in speciation.	Biological Evolution	• Evolution Versus Natural Selection • Environmental Change
3.1.B.C1 Explain how evolution through natural selection can result in changes in biodiversity through the increase or decrease of genetic diversity within a population.	Biodiversity	• Biodiversity at Population Levels
	Genetic Variation	• Genetic Mutations Produce Variation • Organizing Data About Expressed Traits
	Natural Selection	• Natural Selection Over Time • Heredity and Reproductive Success • Natural Selection Apply
	Biological Evolution	• How Resources Affect Evolution • Genetic Variation and Evolution • Differential Reproduction • Modeling Evolution • Evolution Versus Natural Selection
3.1.B.C1 Describe how the degree of kinship between species can be inferred from the similarity in their DNA sequences.	Biodiversity	• Classification of Living Things
	Natural Selection	• Heredity and Reproductive Success
	Biological Evolution	• Genetic Variation and Evolution • Environmental Change
2 Adaptation		
3.1.B.C2 Describe the theory suggesting that life on Earth arose as a single, primitive prokaryote about 4 billion years ago and that for the next 2 billion years, a huge diversity of single-celled organisms evolved.	Biological Evolution Evidence	• Biological Evolution Evidence
3.1.B.C2 Analyze how increasingly complex, multicellular organisms evolved once cells with nuclei developed.	Biological Evolution Evidence	• Biological Evolution Evidence

<p>3.1.B.C2 Describe how mutations in sex cells may be passed on to successive generations and that the resulting phenotype may help, harm, or have little or no effect on the offspring's success in its environment.</p>	<p>Genetic Variation</p>	<ul style="list-style-type: none"> • Genetic Variation from Errors • Environmental Genetic Variation • Genetic Mutations Produce Variation • Genetic Variations Can Be Inherited • Organizing Data About Expressed Traits • Analyzing Data About Traits • Genetic Variation Apply
<p>3.1.B.C2 Describe the relationship between environmental changes and changes in the gene pool of a population</p>	<p>Genetic Variation</p>	<ul style="list-style-type: none"> • Analyzing Data About Traits • Expressed Traits • Genetic Variation Apply
	<p>Natural Selection</p>	<ul style="list-style-type: none"> • Natural Selection Over Time • Heredity and Reproductive Success • High Altitude Living • Evolution of the Influenza Virus • Color and Natural Selection • Natural Selection Apply
	<p>Biological Evolution</p>	<ul style="list-style-type: none"> • How Resources Affect Evolution • Environmental Change • Environmental Change • Effects of Change
<p>3 Unifying Themes</p>		
<p>3.1.B.C3 CONSTANCY AND CHANGE Compare and contrast various theories of evolution.</p>	<p>Natural Selection</p>	<ul style="list-style-type: none"> • Natural Selection Unit Introduction • Natural Selection Over Time
	<p>Biological Evolution</p>	<ul style="list-style-type: none"> • Differential Reproduction • Modeling Evolution • Group Behavior
<p>3.1.B.C3 CONSTANCY AND CHANGE Interpret data from fossil records, anatomy and physiology, and DNA studies relevant to the theory of evolution.</p>	<p>Natural Selection</p>	<ul style="list-style-type: none"> • Competitive Advantage • Transitional Fossils
	<p>Biological Evolution</p>	<ul style="list-style-type: none"> • Genetic Variation and Evolution • Modeling Evolution • Effects of Change • Biological Evolution Apply
	<p>Biological Evolution Evidence</p>	<ul style="list-style-type: none"> • Evolution Evidence Unit Introduction • Biological Evolution Evidence • Fossil Record and Embryology • Evidence of Evolution • Evolution Evidence Apply
<p>3.1.B.C3 PATTERNS Discuss the implications of a universal genetic code for evolution.</p>	<p>Biological Evolution</p>	<ul style="list-style-type: none"> • Differential Reproduction
	<p>Biological Evolution Evidence</p>	<ul style="list-style-type: none"> • Biological Evolution Evidence • Fossil Record and Embryology • Evolution Evidence Apply

Chemistry

Pennsylvania Academic Standards Science: Chemistry	Chemistry A/B	
	Unit Name	Lesson Name
3.1. Biological Sciences		
3.1.A. Organisms and Cells		
1 Common Characteristics of Life		
Standard - 3.1.C.A1 Explain the chemistry of metabolism.	New Unit Suggested	Incorporate and assign an activity to explain the chemistry of metabolism.
2 Energy Flow		
Standard - 3.1.C.A2 Describe how changes in energy affect the rate of chemical reactions.	Reaction Rates	<ul style="list-style-type: none"> • Reaction Rates Portfolio 1 • Reaction Rates Portfolio 2 Incorporate and assign an activity in Reaction Rates Portfolio 2 to describe how changes in energy affect the rate of chemical reactions.
4 Cell Cycles		
3.1.C.A4. Relate mitosis and meiosis at the molecular level	New Unit Suggested	Incorporate and assign an activity to relate mitosis and meiosis at the molecular level.
7 Molecular Basis of Life		
3.1.C.A7. Illustrate the formation of carbohydrates, lipids, proteins, and nucleic acids.	New Unit Suggested	Incorporate and assign an activity to illustrate the formation of carbohydrates, lipids, proteins, and nucleic acids.
3.1.B. Genetics		
3 Molecular Basis of Life		
3.1.C.B3. Describe the structure of the DNA and RNA molecules.	New Unit Suggested	Incorporate and assign an activity to describe the structure of the DNA and RNA molecules.
5 Unifying Themes		
3.1.C.B5. PATTERNS Use models to demonstrate patterns in biomacromolecules.	New Unit Suggested	Incorporate and assign an activity to use models to demonstrate patterns in biomacromolecules.
3.1.C. Evolution		
2 Adaptation		
3.1.C.C2. Use molecular models to demonstrate gene mutation and recombination at the molecular level.	New Unit Suggested	Incorporate and assign an activity to use molecular models to demonstrate gene mutation and recombination at the molecular level.
3.2. Physical Sciences: Chemistry and Physics		
3.2.A. Chemistry		
1 Properties of Matter		
3.2.C.A1. Differentiate between physical properties and chemical properties.	Introduction to Chemistry	<ul style="list-style-type: none"> • Physical vs. Chemical Change • Mixtures
3.2.C.A1. Differentiate between pure substances and mixtures; differentiate between heterogeneous and homogeneous mixtures.	Introduction to Chemistry	<ul style="list-style-type: none"> • Physical vs. Chemical Change • Mixtures

Pennsylvania Academic Standards Science: Chemistry	Chemistry A/B	
	Unit Name	Lesson Name
3.2.C.A1. Explain the relationship of an element’s position on the periodic table to its atomic number, ionization energy, electro-negativity, atomic size, and classification of elements.	The Periodic Table	<ul style="list-style-type: none"> • Atomic Number • Stable Ions • Valence Electrons 1 • Element Groupings • Element Arrangement • Reactivity
3.2.C.A1. Use electro-negativity to explain the difference between polar and nonpolar covalent bonds.	Simple Chemical Reactions	<ul style="list-style-type: none"> • Bonding of Atoms in Reactions Incorporate and assign an activity to use electro-negativity to explain the difference between polar and nonpolar covalent bonds.
2 Structure of Matter		
3.2.C.A2. Compare the electron configurations for the first twenty elements of the periodic table.	The Periodic Table	<ul style="list-style-type: none"> • Atomic Number
3.2.C.A2. Relate the position of an element on the periodic table to its electron configuration and compare its reactivity to the reactivity of other elements in the table.	The Periodic Table	<ul style="list-style-type: none"> • Element Groupings
	Simple Chemical Reactions	<ul style="list-style-type: none"> • Patterns of Properties • Covalent and Ionic Bonding • Valence Electrons • Patterns of Attraction • Chemical Equations • Bonding of Atoms in Reactions • Macroscopic Patterns of Reactivity
3.2.C.A2. Explain how atoms combine to form compounds through both ionic and covalent bonding.	The Periodic Table	<ul style="list-style-type: none"> • Bonds
	Simple Chemical Reactions	<ul style="list-style-type: none"> • Covalent and Ionic Bonding
3.2.C.A2. Predict chemical formulas based on the number of valence electrons.	Simple Chemical Reactions	<ul style="list-style-type: none"> • Valence Electrons
3.2.C.A2. Draw Lewis dot structures for simple molecules and ionic compounds.	The Periodic Table	<ul style="list-style-type: none"> • Bonds • Ions
3.2.C.A2. Predict the chemical formulas for simple ionic and molecular compounds.	Simple Chemical Reactions	<ul style="list-style-type: none"> • Composition and Formula
3.2.C.A2. Use the mole concept to determine number of particles and molar mass for elements and compounds.	Conservation of Mass	<ul style="list-style-type: none"> • Use the Mole • Reactants vs. Products • Calculating Mass • Specific Mass Conversions • Mass and Atoms
3.2.C.A2. Determine percent compositions, empirical formulas, and molecular formulas.	Simple Chemical Reactions	<ul style="list-style-type: none"> • Composition and Formula
3 Matter & Energy		
Standard - 3.2.C.A3 Describe the three normal states of matter in terms of energy, particle motion, and phase transitions.	Introduction to Chemistry	<ul style="list-style-type: none"> • Physical vs. Chemical Change
Standard - 3.2.C.A3 Identify the three main types of radioactive decay and compare their properties.	Nuclear Processes	<ul style="list-style-type: none"> • Radioactive Decay Energy • Alpha Particle Emission
Standard - 3.2.C.A3 Describe the process of radioactive decay by using nuclear equations and explain the concept of half-life for an isotope.	Nuclear Processes	<ul style="list-style-type: none"> • Modeling Fission • Radioactive Decay Energy

Pennsylvania Academic Standards Science: Chemistry	Chemistry A/B	
	Unit Name	Lesson Name
Standard - 3.2.C.A3 Compare and contrast nuclear fission and nuclear fusion.	Nuclear Processes	<ul style="list-style-type: none"> Modeling Nuclear Processes Modeling Fusion Modeling Fission
4 Reactions		
Standard - 3.2.C.A4 Predict how combinations of substances can result in physical and/or chemical changes.	Introduction to Chemistry	<ul style="list-style-type: none"> Physical vs. Chemical Change Patterns of Properties Covalent and Ionic Bonding Valence Electrons Patterns of Attraction Chemical Equations Bonding of Atoms in Reactions Macroscopic Patterns of Reactivity
	Simple Chemical Reactions	<ul style="list-style-type: none"> Balanced Reactions Balanced Chemical Equations Claiming Conservation Mathematical Representations
Standard - 3.2.C.A4 Interpret and apply the laws of conservation of mass, constant composition (definite proportions), and multiple proportions.	Simple Chemical Reactions	<ul style="list-style-type: none"> Balanced Reactions Balanced Chemical Equations Claiming Conservation Mathematical Representations
	Conservation of Mass	<ul style="list-style-type: none"> Balanced Reactions Balanced Chemical Equations Claiming Conservation Mathematical Representations Reactants vs. Products
Standard - 3.2.C.A4 Balance chemical equations by applying the laws of conservation of mass.	Simple Chemical Reactions	Types of Reactions
	Conservation of Mass	<ul style="list-style-type: none"> Use the Mole Calculating Mass Specific Mass Conversions
Standard - 3.2.C.A4 Classify chemical reactions as synthesis (combination), decomposition, single displacement (replacement), double displacement, and combustion.	Conservation of Mass	<ul style="list-style-type: none"> Use the Mole Calculating Mass Specific Mass Conversions
5 Unifying Themes		
Standard - 3.2.C.A5 MODELS Recognize discoveries from Dalton (atomic theory), Thomson (the electron), Rutherford (the nucleus), and Bohr (planetary model of atom), and understand how each discovery leads to modern theory.	The Periodic Table	<ul style="list-style-type: none"> Historical Understandings
	Introduction to Chemistry	<ul style="list-style-type: none"> Atomic Composition
Standard - 3.2.C.A5 MODELS Describe Rutherford's "gold foil" experiment that led to the discovery of the nuclear atom. Identify the major components (protons, neutrons, and electrons) of the nuclear atom and explain how they interact.	The Periodic Table	<ul style="list-style-type: none"> Historical Understandings
3.2.B. Physics		
2 Energy Storage and Transformations: Conservation Laws		
Standard - 3.2.C.B2 Explore the natural tendency for systems to move in a direction of disorder or randomness (entropy).	Energy in Chemical Reactions I	<ul style="list-style-type: none"> New Lesson Suggested Incorporate and assign an activity to explore the natural tendency for systems to move in a direction of disorder or randomness (entropy).

Pennsylvania Academic Standards Science: Chemistry	Chemistry A/B	
	Unit Name	Lesson Name
3 Heat/Heat Transfer		
Standard - 3.2.C.B3 Describe the law of conservation of energy.	Energy in Chemical Reactions I	<ul style="list-style-type: none"> • New Lesson Suggested Incorporate and assign an activity to describe the law of conservation of energy.
Standard - 3.2.C.B3 Explain the difference between an endothermic process and an exothermic process.	Energy in Chemical Reactions I	<ul style="list-style-type: none"> • Total Bond Energy

Physics

Pennsylvania Academic Standards Science: Physics	Physics A/B	
	Unit Name	Lesson Name
3.2: Physical Sciences: Chemistry and Physics		
3.2.B: Physics		
1 Force & Motion of Particles and Rigid Bodies		
Standard - 3.2.P.B1 Differentiate among translational motion, simple harmonic motion, and rotational motion in terms of position, velocity, and acceleration.	Kinematics	<ul style="list-style-type: none"> Distance and Displacement Speed and Velocity Acceleration
	Newton's Laws and Dynamics Introduction	<ul style="list-style-type: none"> Hooke's Law
	Circular Motion and Gravitation	<ul style="list-style-type: none"> Centripetal Force
Standard - 3.2.P.B1 Use force and mass to explain translational motion or simple harmonic motion of objects.	Kinematics	<ul style="list-style-type: none"> Acceleration
	Newton's Laws and Dynamics Introduction	<ul style="list-style-type: none"> Hooke's Law Second Law of Motion
Standard - 3.2.P.B1 Relate torque and rotational inertia to explain rotational motion.	Circular Motion and Gravitation	<ul style="list-style-type: none"> Rotation
2 Energy Storage and Transformations: Conservation Laws		
Standard - 3.2.P.B2 Explain the translation and simple harmonic motion of objects using conservation of energy and conservation of momentum.	Energy and Work	<ul style="list-style-type: none"> Forms of Energy Conservation of Mechanical Energy
	Momentum	<ul style="list-style-type: none"> What is Momentum Conservation of Momentum
Standard - 3.2.P.B2 Describe the rotational motion of objects using the conservation of energy and conservation of angular momentum.	Circular Motion and Gravitation	<ul style="list-style-type: none"> Rotation
Standard - 3.2.P.B2 Explain how gravitational, electrical, and magnetic forces and torques give rise to rotational motion.	Circular Motion and Gravitation	<ul style="list-style-type: none"> Satellites Rotation
3 Heat/Heat Transfer		
Standard - 3.2.P.B3 Analyze the factors that influence convection, conduction, and radiation between objects or regions that are at different temperatures.	Thermodynamics	<ul style="list-style-type: none"> First Law of Thermodynamics Thermal Energy Transfer Portfolio 2
4 Electrical and Magnetic Energy		
Standard - 3.2.P.B4 Explain how stationary and moving particles result in electricity and magnetism.	Electricity and Circuits	<ul style="list-style-type: none"> Coulomb's Law Electric Current and Magnetic Field
	Electricity and Magnetism	<ul style="list-style-type: none"> Electric Current and Magnetic Field Investigating Currents and Fields
Standard - 3.2.P.B4 Develop qualitative and quantitative understanding of current, voltage, resistance, and the connections among them.	Electricity and Circuits	<ul style="list-style-type: none"> Electric Fields Ohmic Device Resistance Series and Parallel Circuits Kirchhoff's Laws and Circuits
Standard - 3.2.P.B4 Explain how electrical induction is applied in technology.	Electricity and Magnetism	<ul style="list-style-type: none"> Measurable Effects of Electromagnetism
5 Nature of Waves (Sound and Light Energy)		
Standard - 3.2.P.B5 Explain how waves transfer energy without transferring matter.	Waves	<ul style="list-style-type: none"> Comparing Waves Characteristics of Waves
Standard - 3.2.P.B5 Explain how waves carry information from remote sources that can be detected and interpreted.	Waves	<ul style="list-style-type: none"> Wave Application Waves Portfolio 1 Waves Portfolio 2 Waves Portfolio 3

Pennsylvania Academic Standards Science: Physics	Physics A/B	
	Unit Name	Lesson Name
Standard - 3.2.P.B5 Describe the causes of wave frequency, speed, and wave length.	Waves	<ul style="list-style-type: none"> • Characteristics of Waves • Frequency and Wavelength
6 Unifying Themes		
Standard - 3.2.P.B6 PATTERNS SCALE MODELS CONSTANCY/CHANGE Use Newton’s laws of motion and gravitation to describe and predict the motion of objects ranging from atoms to the galaxies.	Newton's Laws and Dynamics Introduction	<ul style="list-style-type: none"> • Force and Newton's First Law • Second Law of Motion • Newton's Third Law
	Circular Motion and Gravitation	<ul style="list-style-type: none"> • Gravitational Attraction • Satellites

APPENDIX A CURRICULUM

A.5 ALIGNMENT DOCUMENTS

d. SOCIAL STUDIES K - 12

This document is part of Appendix A: Curriculum.

It includes alignment documents for each Social Studies core class for students in Kindergarten through Grade 12.

- Social Studies K
- Social Studies 1
- Social Studies 2
- Social Studies 3
- Social Studies 4
- Social Studies 5
- Social Studies 6
- Social Studies 7
- Social Studies 8
- American Government
- US History
- World History
- Economics

Social Studies K

Pennsylvania Academic Standards Social Studies: Kindergarten	Social Studies K A/B	
	Unit Name	Lesson Number
Civics and Government		
5.1. Principles and Documents of Government		
Rule of Law		
5.1.K.A. Explain the purpose of rules.	My Family, My School	6
Laws and Government		
5.1.K.B. Explain the need for rules.	My Family, My School	6
Principles and Ideals that Shape Government		
5.1.K.C. Define respect for self and others.	My Family, My School	2, 4
	Everybody Works	5
Documents and Ideals that Shape Pennsylvania and US Government		
5.1.K.D. Intentionally Blank		
Individual Rights		
5.1.K.E. Demonstrate responsibilities in the classroom.	My Family, My School	3: Extend the lesson to demonstrate responsibilities in the classroom.
Symbols		
5.1.K.F. Identify significant American holidays and their symbols.	Our Traditions	1, 6, 7, 10
Civics Rights and Responsibilities		
5.2.K.A Identify responsibilities at school.	My Family, My School	3: Extend the lesson to identify responsibilities at school.
Conflict and Resolution		
5.2.K.B. Identify a problem and discuss possible solutions.	My Family, My School	9
Leadership and Public Service		
5.2.K.C. Identify classroom projects/activities that support leadership and service.	My Family, My School	9: Extend the lesson to identify classroom projects/activities that support leadership and service.
Competent and Responsible Citizens		
5.2.K.D. Explain responsible classroom behavior.	My Family, My School	2
	Everybody Works	5
5.3. How Government Works		
Branches of Government		
5.3.K.A. Intentionally Blank		
Structure, Organization, and Operation of Governments		

Pennsylvania Academic Standards Social Studies: Kindergarten	Social Studies K A/B	
	Unit Name	Lesson Number
5.3.K.B. Identify the role of adults in authority at home or in school.	My Family, My School	7
Government Services		
5.3.K.C. Identify roles of fire fighters, police officers, and emergency workers.	My Family, My School	7
Leadership and Political Elections		
5.3.K.D. Intentionally Blank		
Elements of the Election Process		
5.3.K.E. Intentionally Blank		
Conflict and the Court System		
5.3.K.F. Identify and explain behaviors for responsible classroom citizens .	My Family, My School	2
	Everybody Works	5
Interest Groups		
5.3.K.G. Intentionally Blank		
Media Influences		
5.3.5.H. Intentionally Blank		
Taxes		
5.3.K.I. Intentionally Blank		
Systems of Government		
5.3.5.J. Intentionally Blank		
5.4. How International Relationships Function		
Countries and Conflicts		
5.4.K.A. Identify conflict in the classroom.	My Family, My School	4, 9
Tools of Foreign Policy		
5.4.K.B. Identify how students can work together.	My Family, My School	1, 4
International Organizations		
5.4.K.C. Intentionally Blank		
Media and its Influence		
5.4.K.D. Intentionally Blank		
How Foreign Policy is Influenced		

Pennsylvania Academic Standards Social Studies: Kindergarten	Social Studies K A/B	
	Unit Name	Lesson Number
5.4.K.E. Intentionally Blank		
Economics		
6.1. Scarcity and Choice		
Scarcity and Choice		
6.1.K.A Identify how scarcity influences choice.	Everybody Works	8
Limited Resources		
6.1.K.B. Identify family wants and needs.	Everybody Works	1, 2
Opportunity Costs		
6.1.K.C. Identify choices to meet needs.	Everybody Works	8
Incentives and Choice		
6.1.K.D. Identify a choice based on family interest.	Everybody Works	8
6.2. Markets and Economic Systems		
Goods and Services		
6.2.K.A. Identify goods and consumers.	Everybody Works	8, 9
Market Competition		
6.2.K.B. Intentionally Blank		
Advertising and Media		
6.2.K.C. Identify advertisements that encourage us to buy things.	Everybody Works	8: Extend the lesson to identify advertisements that encourage us to buy things.
Price Determination		
6.2.K.D. Identify currency and how it is used.	Everybody Works	3, 4, 8
Economic Health		
6.2.K.E. Intentionally Blank		
Private Economic Institutions		
6.2.K.F. Intentionally Blank		
Economic Systems		
6.2.K.G. Intentionally Blank		
6.3. Functions of Government		
Goods and Services		

Pennsylvania Academic Standards Social Studies: Kindergarten	Social Studies K A/B	
	Unit Name	Lesson Number
6.3.K.A. Intentionally Blank		
Government Involvement in the Economy		
6.3.K.B. Intentionally Blank		
Taxation		
6.3.K.C. Intentionally Blank		
Government's Role in International Trade		
6.3.K.D. Identify products produced in the region or state.	Everybody Works	9: Extend the lesson to identify products produced in the region or state.
6.4. Economic Interdependence		
Specialization		
6.4.K.A. Identify the specialized role performed by each member of the family.	Everybody Works	6
Trade		
6.4.K.B. Intentionally Blank		
Multinational and Non-Governmental Organizations		
6.4.K.C. Intentionally Blank		
Factors Contributing to Economic Interdependence		
6.4.K.D. Identify individual wants and needs.	Everybody Works	1, 2, 8
6.5. Income, Profit, and Wealth		
Factors Influencing Wages		
6.5.K.A. Identify individuals who volunteer in the community.	My Family, My School	7: Extend the lesson to identify individuals who volunteer in the community.
Labor Productivity		
6.5.K.B. Intentionally Blank		
Types of Businesses		
6.5.KC. Identify goods and services provided by local businesses.	Everybody Works	9: Extend the lesson to identify goods and services provided by local businesses.
Profits and Losses		
6.5.K.D. Intentionally Blank		
Distribution of Wealth		

Pennsylvania Academic Standards Social Studies: Kindergarten	Social Studies K A/B	
	Unit Name	Lesson Number
6.5.K.E. Intentionally Blank		
Entrepreneurship		
6.5.K.F. Intentionally Blank		
Costs and Benefits of Saving		
6.5.K.G. Intentionally Blank		
Interest Rates		
6.5.K.H. Intentionally Blank		
Geography		
7.1. Basic Geographic Literacy		
Geographic Tools		
7.1.K.A. Interpret a simple map of a known environment.	Where We Live Our Traditions	1, 2, 3, 4, 5, 6, 7, 8 9
Location of Places and Regions		
7.1.K.B. Describe the location of places in the home, school, and community to gain an understanding of relative location.	Where We Live	2, 3, 5
7.2. Physical Characteristics of Places and Regions		
Physical Characteristics		
7.2.K.A. Describe the characteristics of homes and businesses located in the community to gain an understanding of physical features.	Where We Live	2
Physical Processes		
7.2.K.B. Identify land and water forms.	Where We Live Our Traditions More Where We Live	6, 7, 8 9 5
7.3. Human Characteristics of Places and Regions		
Human Characteristics		
7.3.K.A. Describe how weather affects daily life.	More Where We Live	1, 2, 3, 5
7.4. Interactions Between People and the Environment		
Impact of Physical Systems on People		
7.4.K.A. Identify local bodies of water and landforms to gain an understanding of their impact on the local community.	Where We Live More Where We Live	7 3
Impact of People on Physical Systems		
7.4.K.B. Intentionally Blank		
History		
8.1. Historical Analysis and Skills Development		

Pennsylvania Academic Standards Social Studies: Kindergarten	Social Studies K A/B	
	Unit Name	Lesson Number
Continuity and Change over Time		
8.1.K.A. Identify chronological sequence through days, weeks, months, and years (calendar time).	Life Then and Now	3, 4, 5, 6, 12, 13, 14
Fact/Opinion and Points of View		
8.1.K.B. With guidance and support, differentiate facts from opinions as related to an event.	Life Then and Now	7: Incorporate and assign an activity to, with guidance and support, differentiate facts from opinions as related to an event.
Research		
8.1.K.C. Explain how to locate information in a source.	Life Then and Now	7
8.2. Pennsylvania History		
Contributions from Individuals and Groups (PA)		
8.2.K.A. Identify people in authority.	My Family, My School	7: Extend the lesson to identify people in authority (in PA).
Historical Documents, Artifacts, and Places (PA)		
8.2.K.B. Examine photographs of documents, artifacts, and paces unique to Pennsylvania.	Life Then and Now	8: Extend the lesson to examine photographs of documents, artifacts, and paces unique to Pennsylvania.
Impact of Continnity and Change on PA History		
8.2.K.C. Intentionally Blank		
Conflict and Cooperation (PA)		
8.2.K.D. Demonstrate an understanding of conflict.	My Family, My School	4: Extend the lesson to demonstrate an understanding of conflict.
8.3. United States History		
Contributions of Individuals and Groups (US History)		
8.3.K.A. Identify American people related to national holidays.	Our Traditions	7, 10
Historical Documents and Artifacts (US History)		
8.3.K.B. Identify documents and artifacts important to the classroom community.	My Family, My School	10: Incorporate and assign an activity to identify documents and artifacts important to the classroom community.
Impact of Continuity and Change on US History		
8.3.K.C. Demonstrate an understanding of time order.	Life Then and Now	1, 3, 4, 6, 12, 13, 14
Conflict and Cooperation (US)		
8.3.K.D. Intentionally Blank		

Pennsylvania Academic Standards Social Studies: Kindergarten	Social Studies K A/B	
	Unit Name	Lesson Number
8.4. World History		
Contributions of Individuals and Groups (World)		
8.4.K.A. Explain how cultures celebrate.	Our Traditions	1, 5, 6, 9, 10
Historical Documents, Artifacts, and Sites (World)		
8.4.K.B. Intentionally Blank		
Impact of Continuity and Change (World)		
8.4.K.C. Identify different celebrations of different cultures from around the world.	Our Traditions	5, 9
Conflict and Cooperation (World)		
8.4.K.D. Demonstrate an understanding of conflict and cooperation.	My Family, My School	1, 4

Social Studies 1

Pennsylvania Academic Standards Social Studies: Grade 1	Social Studies 1 A/B	
	Unit Name	Lesson Number
Civics and Government		
5.1. Principles and Documents of Government		
Rule of Law		
5.1.1.A. Explain the purposes of rules in the classroom and school community.	My School, My Community	7
Laws and Government		
5.1.1.B. Explain the importance of rules in the classroom.	My School, My Community	8
Principles and Ideals that Shape Government		
5.1.1.C. Define equality and the need to treat everyone equally.	My School, My Community	8: Extend the lesson to define equality and the need to treat everyone equally.
Documents and Ideals that Shape Pennsylvania and US Government		
5.1.1.D. Explain the importance of written rules and laws.	My School, My Community	8
Individual Rights		
5.1.1.E. Describe students' responsibilities in the school and community.	My School, My Community	6
Symbols		
5.1.1.F. Identify national symbols.	My School, My Community	14, 15
Civics Rights and Responsibilities		
5.2.1.A. Identify and explain the importance of responsibilities at school and at home.	My School, My Community	6: Extend the lesson to identify and explain the importance of responsibilities at school and at home.
Conflict and Resolution		
5.2.1.B. Identify a problem and attempt to solve with adult or peer assistance.	My School, My Community	9
Leadership and Public Service		
5.2.1.C. Identify school projects / activities that support leadership and public service.	My School, My Community	3: Extend the lesson to identify school projects / activities that support leadership and public service.
Competent and Responsible Citizens		
5.2.1.D. Explain responsible school behavior.	My School, My Community	6
5.3. How Government Works		
Branches of Government		
5.3.1.A. Identify the roles of local government (fire, police, etc.).	My School, My Community	12, 13
Structure, Organization, and Operation of Governments		

Pennsylvania Academic Standards Social Studies: Grade 1	Social Studies 1 A/B	
	Unit Name	Lesson Number
5.3.1.B. Identify the services of local government. Government Services	My School, My Community	12, 13
5.3.1.C. Identify the value of fire fighters, police officers and emergency workers in the community. Leadership and Political Elections	My School, My Community	12: Extend the lesson to identify the value of fire fighters, police officers and emergency workers in the community.
5.3.1.D. Identify positions of authority in the classroom community. Elements of the Election Process	My School, My Community	11
5.3.1.E. Identify situations in the school or community when it is beneficial to have an elected official represent the people. Conflict and the Court System	My School, My Community	12: Extend the lesson to identify situations in the school or community when it is beneficial to have an elected official represent the people.
5.3.1.F. Identify and explain behaviors for responsible classroom citizens and possible consequences for inappropriate action. Interest Groups	My School, My Community	2, 3, 8: Extend lesson 8 to identify and explain possible consequences for inappropriate action.
5.3.K.G. Intentionally Blank Media Influences		
5.3.6.H. Explain how information /news is conveyed to the public. Taxes	Looking at Our World	10
5.3.1.I. Provide examples of taxation. Systems of Government	My School, My Community	13: Incorporate and assign an activity to provide examples of taxation.
5.3.6.J. Describe situations where voting eases conflict. 5.4. How International Relationships Function	My School, My Community	9: Extend the lesson to describe situations where voting eases conflict.
Countries and Conflicts		
5.4.1.A. Identify ways to avoid conflict. Tools of Foreign Policy	My School, My Community	9
5.4.1.B. Describe how classrooms can work together.	My School, My Community	6: Incorporate and assign an activity to describe how classrooms can work together.

Pennsylvania Academic Standards Social Studies: Grade 1	Social Studies 1 A/B	
	Unit Name	Lesson Number
International Organizations		
5.4.1.C. Intentionally Blank		
Media and its Influence		
5.4.1.D. Identify different means of receiving information/news.	Looking at Our World	10
How Foreign Policy is Influenced		
5.4.1.E. Explain how a classroom community reaches compromise.	My School, My Community	9: Extend the lesson to explain how a classroom community reaches compromise.
Economics		
6.1. Scarcity and Choice		
Scarcity and Choice		
6.1.1.A. Identify scarcity of resources within the family.	Work in the Community	5
Limited Resources		
6.1.1.B. Identify classroom wants and needs.	Work in the Community	2: Extend the lesson to identify classroom wants and needs.
Opportunity Costs		
6.1.1.C. Identify choice based on needs versus wants.	Work in the Community	5, 6
Incentives and Choice		
6.1.1.D. Identify a choice based on classroom interest.	Work in the Community	5, 6
6.2. Markets and Economic Systems		
Goods and Services		
6.2.1.A. Identify goods, consumers, and producers.	Work in the Community	7, 8, 9, 10, 11, 12
Market Competition		
6.2.1.B. Intentionally Blank		
Advertising and Media		
6.2.1.C. Identify advertisements that encourage us to buy things based on want rather than need.	Work in the Community	9: Incorporate and assign an activity to identify advertisements that encourage us to buy things based on want rather than need.
Price Determination		
6.2.1.D. Explain the role of money in determining price.	Work in the Community	9: Incorporate and assign an activity to explain the role of money in determining price.
Economic Health		

Pennsylvania Academic Standards Social Studies: Grade 1	Social Studies 1 A/B	
	Unit Name	Lesson Number
6.2.1.E. Identify the impact on a community when a business opens.	Work in the Community	10: Incorporate and assign an activity to identify the impact on a community when a business opens.
Private Economic Institutions		
6.2.1.F. Intentionally Blank		
Economic Systems		
6.2.1.G. Define an economic system at the individual level.	Work in the Community	8: Incorporate and assign an activity to define an economic system at the individual level.
6.3. Functions of Government		
Goods and Services		
6.3.1.A. Identify examples of goods and services.	Work in the Community	7, 8, 9, 10, 11, 12
Government Involvement in the Economy		
6.3.1.B. Intentionally Blank		
Taxation		
6.3.1.C. Intentionally Blank		
Government's Role in International Trade		
6.3.1.D. Identify products produced in the United States.	Work in the Community	7: Extend the lesson to identify products produced in the United States.
6.4. Economic Interdependence		
Specialization		
6.4.1.A. Identify specialization of work in the community.	Work in the Community	16
Trade		
6.4.1.B. Intentionally Blank		
Multinational and Non-Governmental Organizations		
6.4.1.C. Intentionally Blank		
Factors Contributing to Economic Interdependence		
6.4.1.D. Describe how individuals differ in their wants and needs and why people buy and sell things.	Work in the Community	2: Extend the lesson to describe how individuals differ in their wants and needs and why people buy and sell things.
6.5. Income, Profit, and Wealth		
Factors Influencing Wages		

Pennsylvania Academic Standards Social Studies: Grade 1	Social Studies 1 A/B	
	Unit Name	Lesson Number
6.5.1.A. Identify individuals who work for wages in the community. Labor Productivity	Work in the Community	1, 15, 16
6.5.1.B. Identify different jobs and the purpose of each. Types of Businesses	Work in the Community	1, 14, 15, 16
6.5.1.C. Identify businesses and their corresponding goods and service. Profits and Losses	Work in the Community	16
6.5.1.D. Identify ways to earn money. Distribution of Wealth	Work in the Community	14
6.5.1.E. Describe what tools (tangible assets) are necessary to complete a task. Entrepreneurship	Work in the Community	15
6.5.1.F. Identify buyers and sellers (people) buy and sell things. Costs and Benefits of Saving	Work in the Community	9, 11, 12
6.5.1.G. Explain the need to save money. Interest Rates	Work in the Community	12
6.5.1.H. Intentionally Blank Geography		
7.1. Basic Geographic Literacy		
Geographic Tools		
7.1.1.A. Identify geographic tools. Location of Places and Regions	Finding Places	2, 7, 8
7.1.1.B. Describe places in geographic reference in physical features. 7.2. Physical Characteristics of Places and Regions	Looking at Our World	2, 3, 5, 6
Physical Characteristics		
7.2.1.A. Identify physical characteristics in the community and region. Physical Processes	Looking at Our World	3, 6
7.2.1.B. Identify the basic physical processes that affect the physical characteristics of places.	Looking at Our World	3: Extend the lesson to identify the basic physical processes that affect the physical characteristics of places.
7.3. Human Characteristics of Places and Regions		
Human Characteristics		

Pennsylvania Academic Standards Social Studies: Grade 1	Social Studies 1 A/B	
	Unit Name	Lesson Number
7.3.1.A. Identify the local climate and how it determines the way people live.	Looking at Our World	8: Extend the lesson to identify the local climate and how it determines the way people live.
7.4. Interactions Between People and the Environment Impact of Physical Systems on People		
7.4.1.A. Describe how lakes, rivers, and streams impact people.	Looking at Our World	2: Extend the lesson to describe how lakes, rivers, and streams impact people.
Impact of People on Physical Systems		
7.4.1.B. Intentionally Blank		
History		
8.1. Historical Analysis and Skills Development Continuity and Change over Time		
8.1.1.A. Demonstrate an understanding of chronology.	Our Past, Our Present	4, 7
Fact/Opinion and Points of View		
8.1.1.B. Identify a problem or dilemma surrounding an event.	Our Past, Our Present	10
Research		
8.1.1.C. Identify sources of historical information.	Our Past, Our Present	8, 9
8.2. Pennsylvania History Contributions from Individuals and Groups (PA)		
8.2.1.A. Identify groups of people who contribute to a community.	My School, My Community	3: Extend the lesson to identify groups of people who contribute to a community.
Historical Documents, Artifacts, and Places (PA)		
8.2.1.B. Identify symbols, slogans, or mottos that are representative of the state.	My School, My Community	New Lesson Suggested: Incorporate and assign an activity to identify symbols, slogans, or mottos that are representative of the state.
Impact of Continuity and Change on PA History		
8.2.1.C. Identify holiday and cultural celebrations in a community and why they are celebrated.	Traditions We Share	1, 7, 8, 9, 10, 13, 14, 15
Conflict and Cooperation (PA)		
8.2.1.D. Identify historical conflict in the community.	My School, My Community	9: Extend the lesson to identify historical conflict in the community.
8.3. United States History Contributions of Individuals and Groups (US History)		

Pennsylvania Academic Standards Social Studies: Grade 1	Social Studies 1 A/B	
	Unit Name	Lesson Number
8.3.1.A. Identify Americans who played a significant role in American history. Historical Documents and Artifacts (US History)	Traditions We Share	11, 12
8.3.1.B. Identify American landmarks and their significance. Impact of Continuity and Change on US History	My School, My Community	14, 15
8.3.1.C. Identify examples of change. Conflict and Cooperation (US)	Our Past, Our Present	12, 13, 14, 15, 16
8.3.1.D. Identify conflict and describe ways to cooperate with others by making smart choices. 8.4. World History Contributions of Individuals and Groups (World)	My School, My Community	9
8.4.1.A. Explain why cultures celebrate. Historical Documents, Artifacts, and Sites (World)	Traditions We Share	1, 7, 9, 10, 15
8.4.1.B. Explain the importance of world landmarks. Impact of Continuity and Change (World)	Traditions We Share	13, 14
8.4.1.C. Identify holidays and ceremonies of selected world cultures Conflict and Cooperation (World)	Traditions We Share	1, 7, 8, 9, 10, 15
8.4.1.D. Describe examples of conflict and cooperation in the classroom community.	My School, My Community	9: Extend the lesson to describe examples of conflict and cooperation in the classroom community.

Social Studies 2

Pennsylvania Academic Standards Social Studies: Grade 2	Social Studies 2 A/B	
	Unit Name	Lesson Number
Civics and Government		
5.1. Principles and Documents of Government		
Rule of Law		
5.1.2.A. Explain the purposes of rules and their consequences in the classroom and school community.	My Community, My Country	8, 9: Extend lesson 9 to explain their consequences in the classroom and school community.
Laws and Government		
5.1.2.B. Explain the importance of rules in the classroom and school community.	My Community, My Country	8
Principles and Ideals that Shape Government		
5.1.2.C. Define fairness in working with others.	My Community, My Country	2
Documents and Ideals that Shape Pennsylvania and US Government		
5.1.2.D. Explain why school rules are written and posted.	My Community, My Country	8: Extend the lesson to explain why school rules are written and posted.
Individual Rights		
5.1.2.E. Describe citizens' responsibilities to the state of Pennsylvania and the nation.	My Community, My Country	3: Incorporate and assign an activity to describe citizens' responsibilities to the state of Pennsylvania and the nation.
Symbols		
5.1.2.F. Identify state symbols.	My Community, My Country	New Lesson Suggested: Incorporate and assign an activity to identify state symbols.
Civics Rights and Responsibilities		
5.2.2.A Identify and explain the importance of responsibilities at school, at home and the community.	My Community, My Country	2: Incorporate and assign an activity to identify and explain the importance of responsibilities at school, at home and the community.
Conflict and Resolution		
5.2.2.B. Identify a problem and probable solution.	My Community, My Country	7
Leadership and Public Service		
5.2.2.C. Identify community projects/activities that support leadership and public service.	My Community, My Country	7
Competent and Responsible Citizens		
5.2.2.D. Explain responsible community behavior.	My Community, My Country	2, 3
5.3. How Government Works		
Branches of Government		

Pennsylvania Academic Standards Social Studies: Grade 2	Social Studies 2 A/B	
	Unit Name	Lesson Number
5.3.2.A. Identify the role government plays in the community (education, transportation). Structure, Organization, and Operation of Governments	My Community, My Country	10
5.3.2.B. Identify local government leaders. Government Services	My Community, My Country	12
5.3.2.C. Identify other types of services provided by local government. Leadership and Political Elections	Working to Meet Our Needs	10, 11
5.3.2.D. Identify positions of authority at school. Elements of the Election Process	My Community, My Country	12: Extend the lesson to identify positions of authority at school.
5.3.2.E. Describe situations in the state or nation when having an elected official represent the people is beneficial. Conflict and the Court System	My Community, My Country	13: Incorporate and assign an activity to describe situations in the state or nation when having an elected official represent the people is beneficial.
5.3.2.F. Identify and explain behaviors for responsible school citizens and possible consequences for inappropriate action. Interest Groups	My Community, My Country	8, 9: Extend lesson 9 to identify and explain possible consequences for inappropriate action.
5.3.2.G. Intentionally Blank Media Influences		
5.3.7.H. Identify different forms of media. Taxes	Our Nation Past and Present	6: Extend the lesson to identify different forms of media.
5.3.2.I. Define taxes and why they are paid. Systems of Government	My Community, My Country	11: Extend the lesson to define taxes.
5.3.7.J. Identify the responsibilities of voters after the vote. 5.4. How International Relationships Function	My Community, My Country	6: Incorporate and assign an activity to identify the responsibilities of voters after the vote.
Countries and Conflicts		
5.4.2.A. Explain examples of conflict in the community, state, and nation. Tools of Foreign Policy	Our Nation Past and Present	12: Extend the lesson to explain examples of conflict in the community and state.

Pennsylvania Academic Standards Social Studies: Grade 2	Social Studies 2 A/B	
	Unit Name	Lesson Number
5.4.2.B. Identify ways that countries can work together.	My Community, My Country	New Lesson Suggested: Incorporate and assign an activity to identify ways that countries can work together.
International Organizations		
5.4.2.C. Explain why nations need to work together for peace.	My Community, My Country	New Lesson Suggested: Incorporate and assign an activity to explain why nations need to work together for peace.
Media and its Influence		
5.4.2.D. Identify the different types of media.	Our Nation Past and Present	6: Extend the lesson to identify the different types of media.
How Foreign Policy is Influenced		
5.4.2.E. Explain how a community reaches compromise.	My Community, My Country	10: Extend the lesson to explain how a community reaches compromise.
Economics		
6.1. Scarcity and Choice		
Scarcity and Choice		
6.1.2.A. Identify scarcity of resources within the school community.	Working to Meet Our Needs	3: Extend the lesson to identify scarcity of resources within the school community.
Limited Resources		
6.1.2.B Identify community wants and needs.	Working to Meet Our Needs	1, 2, 3, 7
Opportunity Costs		
6.1.2.C. Explain how choice has consequences.	Working to Meet Our Needs	6
Incentives and Choice		
6.1.2.D. Identify a choice based on community interest.	Working to Meet Our Needs	5
6.2. Markets and Economic Systems		
Goods and Services		
6.2.2.A. Identify goods, services, consumers, and producers in the local community.	Working to Meet Our Needs	1, 7, 8, 16
Market Competition		
6.2.2.B. Differentiate between markets and competition	Working to Meet Our Needs	13: Incorporate and assign an activity to differentiate between markets and competition.
Advertising and Media		
6.2.2.C. Define personal choice as related to buying an item.	Working to Meet Our Needs	1, 2, 3, 5, 6, 15

Pennsylvania Academic Standards Social Studies: Grade 2	Social Studies 2 A/B	
	Unit Name	Lesson Number
Price Determination		
6.2.2.D. Explain how demand for a consumer good impacts price.	Working to Meet Our Needs	12, 13
Economic Health		
6.2.2.E. Identify the impact on a community when a business closes.	Working to Meet Our Needs	16: Extend the lesson to identify the impact on a community when a business closes.
Private Economic Institutions		
6.2.2.F. Describe the role of financial institutions as related to consumers' financial needs.	Working to Meet Our Needs	15
Economic Systems		
6.2.2.G. Identify examples of an economic system.	Working to Meet Our Needs	New Lesson Suggested: Incorporate and assign an activity to identify examples of an economic system.
6.3. Functions of Government		
Goods and Services		
6.3.2.A. Identify examples of goods and services provided by the private sector.	Working to Meet Our Needs	10, 11, 12, 16
Government Involvement in the Economy		
6.3.2.B. Intentionally Blank		
Taxation		
6.3.2.C. Define taxes and who pays them.	My Community, My Country	11: Extend the lesson to define taxes.
Government's Role in International Trade		
6.3.2.D. Identify products produced outside the United States.	Working to Meet Our Needs	13
6.4. Economic Interdependence		
Specialization		
6.4.2.A. Identify local examples of specialization of work.	Working to Meet Our Needs	11: Extend the lesson to identify local examples of specialization of work.
Trade		
6.4.2.B. Intentionally Blank		
Multinational and Non-Governmental Organizations		
6.4.2.C. Identify products that come from many different countries.	Working to Meet Our Needs	13
Factors Contributing to Economic Interdependence		
6.4.2.D. Identify buyers and sellers and how their wants and needs are addressed.	Working to Meet Our Needs	2, 3, 6, 7, 12, 13, 14
6.5. Income, Profit, and Wealth		

Pennsylvania Academic Standards Social Studies: Grade 2	Social Studies 2 A/B	
	Unit Name	Lesson Number
Factors Influencing Wages		
6.5.2.A. Explain how money earned by individuals is used to meet needs and wants.	Working to Meet Our Needs	7, 10, 11, 13, 14, 15
Labor Productivity		
6.5.2.B. Different how different job skills impact earnings.	Working to Meet Our Needs	11: Extend the lesson to different how different job skills impact earnings.
Types of Businesses		
6.5.2.C. Describe the roles of local businesses.	Working to Meet Our Needs	16
Profits and Losses		
6.5.2.D. Describe money saving behaviors.	Working to Meet Our Needs	14, 15
Distribution of Wealth		
6.5.2.E. Describe the qualities that may be necessary to complete a task.	Working to Meet Our Needs	11: Extend the lesson to describe the qualities that may be necessary to complete a task.
Entrepreneurship		
6.5.2.F. Explain the responsibilities of a business owner.	Working to Meet Our Needs	16: Incorporate and assign an activity to explain the responsibilities of a business owner.
Costs and Benefits of Saving		
6.5.2.G. Identify how saving for a purchase occurs over time.	Working to Meet Our Needs	14, 15
Interest Rates		
6.5.2.H. Describe why people save money in the local bank.	Working to Meet Our Needs	15
Geography		
7.1. Basic Geographic Literacy		
Geographic Tools		
7.1.1A. Identify how basic geographic tools are used to organize information.	Finding Places	4, 5, 6, 7
Location of Places and Regions		
7.1.71B. Describe regions in geographic reference using physical features.	Finding Places	9, 10: Extend lesson 9 to describe regions in geographic reference using physical features.
7.2. Physical Characteristics of Places and Regions		
Physical Characteristics		
7.2.2.A. Identify the physical characteristics of places.	Finding Places	9, 10
Physical Processes		

Pennsylvania Academic Standards Social Studies: Grade 2	Social Studies 2 A/B	
	Unit Name	Lesson Number
7.2.2.B. Identify the basic physical processes that affect the physical characteristics regions.	Finding Places	9, 10: Extend lesson 9 to identify the basic physical processes that affect the physical characteristics regions.
7.3. Human Characteristics of Places and Regions		
Human Characteristics		
7.3.2.A. Identify the effect of local geography on the residents of the region (food, clothing, industry, trade, types of shelter, etc.).	Our Nation Past and Present	8
7.4. Interactions Between People and the Environment		
Impact of Physical Systems on People		
7.4.2.A. Identify how environmental changes can impact people.	The World Around Us	4, 5
Impact of People on Physical Systems		
7.4.2.B. Intentionally Blank		
History		
8.1. Historical Analysis and Skills Development		
Continuity and Change over Time		
8.1.2.A. Read and interpret information on simple timelines.	Our Nation Past and Present	4
Fact/Opinion and Points of View		
8.1.2.B. Identify documents relating to an event.	Our Nation Past and Present	5, 6: Extend lesson 5 to identify documents relating to an event.
Research		
8.1.2.C. Apply sources of historical information.	Our Nation Past and Present	5, 6
8.2. Pennsylvania History		
Contributions from Individuals and Groups (PA)		
8.2.2.A. Identify historical figures in the local community.	Our Nation Past and Present	14
Historical Documents, Artifacts, and Places (PA)		
8.2.2.B. Identify important buildings, statutes, and monuments associated with the state’s history.	My Community, My Country	New Lesson Suggested: Incorporate and assign an activity to identify important buildings, statutes, and monuments associated with the state’s history.
Impact of Continuity and Change on PA History		

Pennsylvania Academic Standards Social Studies: Grade 2	Social Studies 2 A/B	
	Unit Name	Lesson Number
8.2.2.C. Identify how commerce and industry and social organizations have changed over time in Pennsylvania.	Our Nation Past and Present	New Lesson Suggested: Incorporate and assign an activity to identify how commerce and industry and social organizations have changed over time in Pennsylvania.
Conflict and Cooperation (PA)		
8.2.2.D. Identify how conflict is impacted by ethnicity and race, working conditions, immigration, military conflict, and economics.	Our Nation Past and Present	New Lesson Suggested: Incorporate and assign an activity to identify how conflict is impacted by ethnicity and race, working conditions, immigration, military conflict, and economics.
8.3. United States History		
Contributions of Individuals and Groups (US History)		
8.3.2.A. Identify groups and organizations and their contributions to the United States.	Our Nation Past and Present	14: Extend the lesson to identify groups and organizations and their contributions to the United States.
Historical Documents and Artifacts (US History)		
8.3.2.B. Identify American artifacts and their importance in American history.	Our Nation Past and Present	11: Extend the lesson to identify American artifacts and their importance in American history.
Impact of Continuity and Change on US History		
8.3.2.C. Identify facts related to how different people describe the same event at different time periods.	Our Nation Past and Present	10: Incorporate and assign an activity to identify facts related to how different people describe the same event at different time periods.
Conflict and Cooperation (US)		
8.3.2.D. Demonstrate an understanding of how different groups describe the same event or situation.	Our Nation Past and Present	10: Incorporate and assign an activity to demonstrate an understanding of how different groups describe the same event or situation.
8.4. World History		
Contributions of Individuals and Groups (World)		
8.4.2.A. Explain why cultures have commemorations and remembrances.	Celebrating Our Traditions	5, 6, 7, 8, 14
Historical Documents, Artifacts, and Sites (World)		
8.4.2.B. Explain the significance of historical documents on world history.	Celebrating Our Traditions	New Lesson Suggested: Incorporate and assign an activity to explain the significance of historical documents on world history.

Pennsylvania Academic Standards Social Studies: Grade 2	Social Studies 2 A/B	
	Unit Name	Lesson Number
Impact of Continuity and Change (World)		
8.4.2.C. Identify how cultures have commemorations and remembrances.	Celebrating Our Traditions	1, 2, 5, 6, 7, 8, 14
Conflict and Cooperation (World)		
8.4.2.D. Identify global issues that require cooperation among nations.	Celebrating Our Traditions	New Lesson Suggested: Incorporate and assign an activity to identify global issues that require cooperation among nations.

Social Studies 3

Pennsylvania Academic Standards Social Studies: Grade 3	Social Studies 3 A/B	
	Unit Name	Lesson Name
Civics and Government		
5.1. Principles and Documents of Government		
Rule of Law		
Standard - 5.1.3.A Explain the purposes of rules, laws, and consequences.	US Government	<ul style="list-style-type: none"> • Purpose of a Government • Rules and Laws
Laws and Government		
Standard - 5.1.3.B Explain rules and laws for the classroom, school, and community.	Our Communities US Government	<ul style="list-style-type: none"> • Conflict in Communities • Rules and Laws

Economics		
6.1. Scarcity and Choice		
Scarcity and Choice		
Standard - 6.1.5.A Explain how limited resources and unlimited wants cause scarcity.	Economics	<ul style="list-style-type: none"> • Meeting Needs and Wants • Sellers and Consumers
Limited Resources		
Standard - 6.1.5.B Explain ways in which people meet their basic needs and wants.	Economics	<ul style="list-style-type: none"> • Meeting Needs and Wants • Sellers and Consumers
Standard - 6.1.5.B Demonstrate the use of human and capital resources in the production of a specific good.	Economics	<ul style="list-style-type: none"> • Meeting Needs and Wants
Opportunity Costs		
Standard - 6.1.5.C Explain how people's choices have different economic consequences.	Economics	<ul style="list-style-type: none"> • Meeting Needs and Wants • Sellers and Consumers
Incentives and Choice		
Standard - 6.1.5.D Demonstrate how availability of resources affects choices.	Economics	<ul style="list-style-type: none"> • Meeting Needs and Wants • Sellers and Consumers
6.2. Markets and Economic Systems		
Goods and Services		
Standard - 6.2.5.A Describe how goods and services are distributed.	Economics	<ul style="list-style-type: none"> • Goods, Services, and Assets

Pennsylvania Academic Standards Social Studies: Grade 5	Social Studies 5 A/B	
	Unit Name	Lesson Name
Market Competition		
Standard - 6.2.5.B Identify how pricing influences sellers and consumers.	Economics	<ul style="list-style-type: none"> • Meeting Needs and Wants • Sellers and Consumers • Economic Institutions
	Good Times and Hardships	<ul style="list-style-type: none"> • The Roaring Twenties
Advertising and Media		
Standard - 6.2.5.C Explain how advertising causes people to change their behavior in predictable ways.	Economics	<ul style="list-style-type: none"> • Sellers and Consumers
	Good Times and Hardships	<ul style="list-style-type: none"> • The Roaring Twenties
Price Determination		
Standard - 6.2.5.D Identify factors that cause changes in price.	Economics	<ul style="list-style-type: none"> • Sellers and Consumers • Economic Institutions
Economic Health		
Standard - 6.2.5.E Describe the impact of businesses opening and closing on Pennsylvania economy.	Economics	<ul style="list-style-type: none"> • Economic Institutions
Private Economic Institutions		
Standard - 6.2.5.F Compare and contrast types of private economic institutions.	Economics	<ul style="list-style-type: none"> • Economic Institutions
Economic Systems		
Standard - 6.2.5.G Describe various economic systems. <ul style="list-style-type: none"> • Traditional • Market • Command 	Economics	<ul style="list-style-type: none"> • Economic Systems
6.3. Functions of Government		
Goods and Services		
Standard - 6.3.5.A Describe the cost and benefits of government economic programs.	Economics	<ul style="list-style-type: none"> • Economic Decision Making
Government Involvement in the Economy		
Standard - 6.3.5.B Describe factors that influence government’s economic decision making.	Economics	<ul style="list-style-type: none"> • Economic Decision Making
Taxation		
Standard - 6.3.5.C Explore ways in which tax revenue is collected.	Economics	<ul style="list-style-type: none"> • Economic Decision Making
Government’s Role in International Trade		
6.3.5.D Intentionally Blank		
6.4. Economic Interdependence		
Specialization		
Standard - 6.4.5.A Explain why people specialize in the production of goods and services and divide labor.	Economics	<ul style="list-style-type: none"> • Goods, Services, and Assets
Trade		
Standard - 6.4.5.B Explain the growth in international trade.	Early Exploration	<ul style="list-style-type: none"> • The Columbian Exchange
	Economics	<ul style="list-style-type: none"> • International Economics
Multinational and Non-Governmental Organizations		

Pennsylvania Academic Standards Social Studies: Grade 5	Social Studies 5 A/B	
	Unit Name	Lesson Name
Standard - 6.4.5.C Explain how and where multinational corporations operate. Factors Contributing to Economic Interdependence	Economics	• International Economics
Standard - 6.4.5.D Identify various economic and non-economic organizations that contribute to interaction among individuals and nations. 6.5. Income, Profit, and Wealth Factors Influencing Wages	Economics	• International Economics
Standard - 6.5.5.A Describe how the availability of goods and services is made possible by the work of members of the society. Labor Productivity	Economics	• International Economics • Goods, Services, and Assets
Standard - 6.5.5.B Differentiate the requirements for different careers and occupations. Types of Businesses	Early Settlements	• The French and Dutch in North America
6.5.5.C Intentionally Blank Profits and Losses	Economics	• Goods, Services, and Assets
Standard - 6.5.5.D Explain how positive and negative incentives affect individual choices. Distribution of Wealth	Economics	• Sellers and Consumers
Standard - 6.5.5.E Identify tangible and intangible assets. Entrepreneurship	Economics	• Goods, Services, and Assets
Standard - 6.5.5.F Define entrepreneurship and its role in the local community. Costs and Benefits of Saving	Economics	• Entrepreneurship and Budgeting
Standard - 6.5.5.G Identify the costs and benefits of saving. Interest Rates	Economics	• Entrepreneurship and Budgeting
Standard - 6.5.5.H Identify the costs and benefits of borrowing. Geography	Economics	• Entrepreneurship and Budgeting
7.1. Basic Geographic Literacy Geographic Tools		
Standard - 7.1.5.A Describe how common geographic tools are used to organize and interpret information about people, places, and environment. Location of Places and Regions	Early Exploration	• Geography Day 1 • Geography Day 2
Standard - 7.1.5.B Describe and locate places and regions as defined by physical and human features. 7.2. Physical Characteristics of Places and Regions Physical Characteristics	Early Exploration	• Geography Day 1 • Geography Day 2 • Ancient American Civilization

Pennsylvania Academic Standards Social Studies: Grade 5	Social Studies 5 A/B	
	Unit Name	Lesson Name
Standard - 7.2.5.A Describe the characteristics of places and regions.	Early Exploration	<ul style="list-style-type: none"> • Geography Day 1 • Geography Day 2 • Ancient American Civilization
Physical Processes		
Standard - 7.2.5.B Identify the basic physical processes that affect the physical characteristics of places and regions.	Early Exploration	<ul style="list-style-type: none"> • Geography Day 1 • Geography Day 2
7.3. Human Characteristics of Places and Regions		
Human Characteristics		
Standard - 7.3.5.A Identify the human characteristics of places and regions using the following criteria:	Early Exploration	<ul style="list-style-type: none"> • Ancient American Civilization • Native American Culture
<ul style="list-style-type: none"> • Population • Culture • Settlement • Economic activities • Political activities 	Early Settlements	<ul style="list-style-type: none"> • The Spanish Colony in the Americas
	Good Times and Hardships	<ul style="list-style-type: none"> • A Voice from the Harlem Renaissance • The Roaring Twenties
	Modern American History	<ul style="list-style-type: none"> • Characteristics of Groups Day 2 • Looking Toward the Future Day 1 Apply
7.4. Interactions Between People and the Environment		
Impact of Physical Systems on People		
Standard - 7.4.5.A Describe and explain the effects of the physical systems on people within regions.	Early Exploration	<ul style="list-style-type: none"> • Adapting to Different Places
	Building Our Nation	<ul style="list-style-type: none"> • Jefferson and the Louisiana Purchase
Impact of People on Physical Systems		
Standard - 7.4.5.B Identify the effect of people on the physical systems within a community.	Early Exploration	<ul style="list-style-type: none"> • Adapting to Different Places
	Good Times and Hardships	<ul style="list-style-type: none"> • The Great Depression
History		
8.1. Historical Analysis and Skills Development		
Continuity and Change over Time		
Standard - 8.1.5.A Identify and explain the influences of economic features on continuity and change over time.	Westward Expansion and Civil War	<ul style="list-style-type: none"> • Inventions, Roads, and Railroads
	Good Times and Hardships	<ul style="list-style-type: none"> • The Roaring Twenties
Fact/Opinion and Points of View		
	Early Exploration	<ul style="list-style-type: none"> • The Columbian Exchange
	The American Revolution	<ul style="list-style-type: none"> • Tensions with Britain • Colonists Rebel • On the Battlefield
	Building Our Nation	<ul style="list-style-type: none"> • Trouble for Native Americans
Standard - 8.1.5.B Classify and analyze fact and opinion from multiple points of view, and secondary sources as related to historical events.	Westward Expansion and Civil War	<ul style="list-style-type: none"> • The Lone Star State • California Gold Rush • Worth Fighting For • Reconstruction Apply
	Modern American History	<ul style="list-style-type: none"> • Modern American History Introduction • A Dangerous World • The Cold War Continues • Civil Rights • Civil Rights Leaders • From the Great Society to Reagan
Research		
	Early Settlements	<ul style="list-style-type: none"> • Establishing a Colonial Government

6.1. Scarcity and Choice		
Scarcity and Choice		
6.1.6.A. Explain how limited resources and unlimited wants cause scarcity.	Incorporate and assign an activity to explain how limited resources and unlimited wants cause scarcity.	
Limited Resources		
6.1.6.B. Compare ways that people meet their needs with how they meet their wants.	Incorporate and assign an activity to compare ways that people meet their needs with how they meet their wants.	
6.1.6.B. Describe how resources are combined to produce different goods and services.	Ancient Egypt and Kush	• Egypt and Kush
	Early Civilizations of China	• The Han Dynasty Expands
	Feudal Europe	• Revival of Towns and Trade
Opportunity Costs		
6.1.6.C. Define opportunity cost and describe the opportunity cost of personal choice.	Incorporate and assign an activity to define opportunity cost and describe the opportunity cost of personal choice.	
Incentives and Choice		
6.1.6.D. Identify incentives that affect personal choices.	Incorporate and assign an activity to identify incentives that affect personal choices.	
6.2. Markets and Economic Systems		
Goods and Services		

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B	
	Unit Name	Lesson Name
6.2.6.A. Describe the interaction of consumers and producers of goods and services in the state and national economy.	Incorporate and assign an activity to describe the interaction of consumers and producers of goods and services in the state and national economy.	
Market Competition		
6.2.6.B. Explain why and how market competition takes place.	Incorporate and assign an activity to explain why and how market competition takes place.	
Advertising and Media		
6.2.6.C. Explain how advertising influences economic decisions.	Incorporate and assign an activity to explain how advertising influences economic decisions.	
Price Determination		
6.2.6.D. Describe how prices influence both buyers and sellers and explain why prices may vary for similar products.	Incorporate and assign an activity to describe how prices influence both buyers and sellers and explain why prices may vary for similar products.	
Economic Health		
6.2.6.E. Explain the causes and effects of expansion and contraction of businesses.	Incorporate and assign an activity to explain the causes and effects of expansion and contraction of businesses.	
Private Economic Institutions		
6.2.6.F. Explain the influence of private economic institutions on the local and state economy.	Incorporate and assign an activity to explain the influence of private economic institutions on the local and state economy.	
Economic Systems		
6.2.6.G. Examine how various economic systems address the three basic questions. • What to produce? • How? • For whom?	Incorporate and assign an activity to examine how various economic systems address the three basic questions: What to produce? How? For whom?	
6.3. Functions of Government		
Goods and Services		
6.3.6.A. Examine government's role in providing public goods and services.	Early Civilizations of China	<ul style="list-style-type: none"> • The Unification of China • The Han Dynasty Expands
	Ancient Greece	<ul style="list-style-type: none"> • Ancient Greek Society and Economic Expansion
	The Roman Republic	<ul style="list-style-type: none"> • The Republic Struggles
	The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Roman Empire Begins
Government Involvement in the Economy		
6.3.6.B. Describe the impact of government involvement in state and national economic activities.	Early Civilizations of China	<ul style="list-style-type: none"> • The Unification of China • The Han Dynasty Expands
	Ancient Greece	<ul style="list-style-type: none"> • Ancient Greek Society and Economic Expansion
	The Roman Republic	<ul style="list-style-type: none"> • Government of the Republic • Society in the Roman Republic
	The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Roman Empire Begins • Roman Culture and Its Legacy
	Feudal Europe	<ul style="list-style-type: none"> • Feudalism and the Manor Economy • Revival of Towns and Trade
Taxation		

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B	
	Unit Name	Lesson Name
6.3.6.C. Explain the cost and benefits of taxation.	Incorporate and assign an activity to explain the cost and benefits of taxation.	
Government's Role in International Trade		
6.3.6.D. Explain the benefits of international trade.	Mesopotamia	• The Phoenicians
	Ancient Egypt and Kush	• Egypt and Kush
	Early Civilizations of China	• The Han Dynasty Expands
	Ancient Greece	• Ancient Greek Society and Economic Expansion
	The Roman and Byzantine Empires	• The Roman Empire Begins • Origins of Christianity • Roman Culture and Its Legacy
6.4. Economic Interdependence		
Specialization		
6.4.6.A. Explain why people specialize in the production of goods and services and divide labor.	Origins of Civilization	• New Ways of Life • The Rise of Civilizations
	Early Civilizations of China	• The Han Dynasty Expands
	The Roman Republic	• Society in the Roman Republic
	Feudal Europe	• Feudalism and the Manor Economy • Revival of Towns and Trade
Trade		
6.4.6.B. Explain how trade affects standards of living.	Origins of Civilization	• New Ways of Life
	Mesopotamia	• The Phoenicians
	Ancient Egypt and Kush	• Egypt and Kush
	Early Civilizations of China	• The Huang River Valley • The Han Dynasty Expands
	Ancient Greece	• Ancient Greek Society and Economic Expansion
	The Roman and Byzantine Empires	• The Roman Empire Begins • Roman Culture and Its Legacy
	Feudal Europe	• Revival of Towns and Trade • The Decline of Medieval Society
Multinational and Non-Governmental Organizations		
6.4.6.C. Explain how multinational corporations contribute to economic interdependence.	Incorporate and assign an activity to explain how multinational corporations contribute to economic interdependence.	
Factors Contributing to Economic Interdependence		
6.4.6.D. Explain how transportation, communication networks, and technology contribute to economic interdependence.	Mesopotamia	• The Assyrian and Persian Empires • The Phoenicians
	Ancient Egypt and Kush	• Egypt and Kush
	Early Civilizations of China	• The Han Dynasty Expands
	Ancient Greece	• The Early Years of Greek Civilization • Ancient Greek Society and Economic Expansion

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B	
	Unit Name	Lesson Name
	The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Roman Empire Begins • Origins of Christianity • Roman Culture and Its Legacy
	Feudal Europe	<ul style="list-style-type: none"> • Revival of Towns and Trade
6.5. Income, Profit, and Wealth		
Factors Influencing Wages		
6.5.6.A. Describe how the availability of goods and services is made possible by the work of members of the society.	Origins of Civilization	<ul style="list-style-type: none"> • New Ways of Life • The Rise of Civilizations
	Ancient Egypt and Kush	<ul style="list-style-type: none"> • Egypt Under the Pharaohs
	Ancient Greece	<ul style="list-style-type: none"> • Ancient Greek Society and Economic Expansion
	The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Roman Empire Begins • Origins of Christianity
	Feudal Europe	<ul style="list-style-type: none"> • Revival of Towns and Trade
Labor Productivity		
6.5.6.B. Explain the concept of labor productivity.	Incorporate and assign an activity to explain the concept of labor productivity.	
Types of Businesses		
6.5.6.C. Intentionally Blank		
Profits and Losses		
6.5.6.D. Explain how profits and losses serve as incentives.	Incorporate and assign an activity to explain how profits and losses serve as incentives.	
Distribution of Wealth		
6.5.6.E. Describe how people accumulate tangible and intangible assets.	Incorporate and assign an activity to describe how people accumulate tangible and intangible assets.	
Entrepreneurship		
6.5.6.F. Explain the role of the entrepreneur in Pennsylvania.	Incorporate and assign an activity to explain the role of the entrepreneur in Pennsylvania.	
Costs and Benefits of Saving		
6.5.6.G. Identify the costs and benefits of saving.	Incorporate and assign an activity to identify the costs and benefits of saving.	
Interest Rates		
6.5.6.H. Explain the differences between interest rates for saving and borrowing.	Incorporate and assign an activity to explain the differences between interest rates for saving and borrowing.	
Geography		
7.1. Basic Geographic Literacy		
Geographic Tools		
	Origins of Civilization	<ul style="list-style-type: none"> • Humans Spread Out • Developing Complex Cultures • The Rise of Civilizations
	Mesopotamia	<ul style="list-style-type: none"> • The Phoenicians • Origins of Judaism • Beliefs of Judaism
	Ancient Egypt and Kush	<ul style="list-style-type: none"> • Egypt Under the Pharaohs

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B	
	Unit Name	Lesson Name
7.1.6.A. Describe how common geographic tools are used to organize and interpret information about people, places, and environment.	Early Civilizations of India	<ul style="list-style-type: none"> • The Indus Valley Civilization • Origins and Beliefs of Hinduism • Origins and Beliefs of Buddhism • The Maurya Empire Begins • Asoka's Rule
	Early Civilizations of China	<ul style="list-style-type: none"> • The Huang River Valley • The Han Dynasty Expands
	Civilizations of the Americas	<ul style="list-style-type: none"> • The Maya
	Ancient Greece	<ul style="list-style-type: none"> • Warfare in Ancient Greece • Alexander and the Hellenistic World
	The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Decline of the Roman Empire
Location of Places and Regions		
7.1.6.B. Describe and locate places and regions as defined by physical and human features.	Origins of Civilization	<ul style="list-style-type: none"> • The Rise of Civilizations
	Mesopotamia	<ul style="list-style-type: none"> • Civilization Emerges in Mesopotamia
	Ancient Egypt and Kush	<ul style="list-style-type: none"> • Egypt Under the Pharaohs • Achievements of Egyptian Civilization
	Early Civilizations of India	<ul style="list-style-type: none"> • The Indus Valley Civilization • Asoka's Rule
	Early Civilizations of China	<ul style="list-style-type: none"> • The Huang River Valley
	Civilizations of the Americas	<ul style="list-style-type: none"> • The Maya • The Aztecs • The Incas • North American Cultures
	Ancient Greece	<ul style="list-style-type: none"> • The Early Years of Greek Civilization • Ancient Greek Society and Economic Expansion
The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Byzantine Empire Rises 	
7.2. Physical Characteristics of Places and Regions		
Physical Characteristics		
7.2.6.A. Describe the characteristics of places and regions.	Origins of Civilization	<ul style="list-style-type: none"> • Humans Spread Out • Developing Complex Cultures • The Rise of Civilizations
	Mesopotamia	<ul style="list-style-type: none"> • Civilization Emerges in Mesopotamia • The Phoenicians
	Ancient Egypt and Kush	<ul style="list-style-type: none"> • Egypt Under the Pharaohs • Achievements of Egyptian Civilization • Egypt and Kush
	Early Civilizations of India	<ul style="list-style-type: none"> • The Indus Valley Civilization • Asoka's Rule
	River Valley Civilizations Portfolio	<ul style="list-style-type: none"> • River Valley Civilizations Portfolio
	Early Civilizations of China	<ul style="list-style-type: none"> • The Huang River Valley
	Civilizations of the Americas	<ul style="list-style-type: none"> • The Maya • The Aztecs • The Incas • North American Cultures

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B	
	Unit Name	Lesson Name
	Ancient Greece	• The Early Years of Greek Civilization
	The Roman Republic	• The Roman Republic Rises
	The Roman and Byzantine Empires	• The Byzantine Empire Rises
	Feudal Europe	• The Early and Middle Ages In Europe
Physical Processes		
7.2.6.B. Describe the physical processes that shape patterns on Earth’s surface.	Origins of Civilization	• Developing Complex Cultures • The Rise of Civilizations
	Mesopotamia	• Civilizations Emerge in Mesopotamia • The Phoenicians
	Ancient Egypt and Kush	• Egypt Under the Pharaohs
	Early Civilizations of India	• The Indus Valley Civilization • Asoka’s Rule
	River Valley Civilizations Portfolio	• River Valley Civilizations Portfolio
	Early Civilizations of China	• The Huang River Valley
7.3. Human Characteristics of Places and Regions		
Human Characteristics		
7.3.6.A. Describe the human characteristics of places and regions using the following criteria: • Population • Culture • Settlement • Economic activities • Political activities	Origins of Civilization	• The Distant Past • Humans Spread Out • Developing Complex Cultures • New Ways of Life • The Rise of Civilizations
	Mesopotamia	• Civilization Emerges in Mesopotamia • The Assyrian and Persian Empires • The Phoenicians • Origins of Judaism
	Ancient Egypt and Kush	• Egypt Under the Pharaohs • Achievements of Egyptian Civilization • Egypt and Kush
	Early Civilizations of India	• The Indus Valley Civilization • India’s Verdic Age • Origins and Beliefs of Hinduism • Origins and Beliefs of Buddhism • Asoka’s Rule • The Gupta Empire
	Civilizations of the Americas	• The Maya • The Aztecs • The Incas • North American Cultures
	Ancient Greece	• The Early Years of Greek Civilization • Ancient Greek Society and Economic Expansion
	The Roman Republic	• The Roman Republic Rises
	The Roman and Byzantine Empires	• The Byzantine Empire Rises

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B		
	Unit Name	Lesson Name	
	Feudal Europe	<ul style="list-style-type: none"> • The Early and Middle Ages In Europe • Revival of Towns and Trade • The Decline of Medieval Society 	
7.4. Interactions Between People and the Environment			
Impact of Physical Systems on People			
7.4.6.A. Describe and explain the effects of the physical systems on people within regions.	Origins of Civilization	<ul style="list-style-type: none"> • The Distant Past • Humans Spread Out • Developing Complex Cultures 	
	Mesopotamia	<ul style="list-style-type: none"> • Civilization Emerges in Mesopotamia • The Assyrian and Persian Empires • The Phoenicians 	
	Ancient Egypt and Kush	<ul style="list-style-type: none"> • Egypt Under the Pharaohs • Achievements of Egyptian Civilization • Egypt and Kush 	
	Early Civilizations of India	<ul style="list-style-type: none"> • The Indus Valley Civilization 	
	River Valley Civilizations Portfolio	<ul style="list-style-type: none"> • River Valley Civilizations Portfolio 	
	Early Civilizations of China	<ul style="list-style-type: none"> • The Huang River Valley • The Unification of China 	
	Civilizations of the Americas	<ul style="list-style-type: none"> • The Maya • The Aztecs • The Incas • North American Cultures 	
	Ancient Greece	<ul style="list-style-type: none"> • The Early Years of Greek Civilization • Ancient Greek Society and Economic Expansion • Warfare in Ancient Greece 	
	The Roman Republic	<ul style="list-style-type: none"> • The Roman Republic Rises 	
	The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Byzantine Empire Rises 	
	Feudal Europe	<ul style="list-style-type: none"> • The Early and Middle Ages In Europe • Revival of Towns and Trade • The Decline of Medieval Society 	
	Impact of People on Physical Systems		
	7.4.6.B. Describe and explain the effects of people on the physical systems within regions.	Mesopotamia	<ul style="list-style-type: none"> • Civilization Emerges in Mesopotamia • The Assyrian and Persian Empires • The Phoenicians
Ancient Egypt and Kush		<ul style="list-style-type: none"> • Egypt Under the Pharaohs • Achievements of Egyptian Civilization • Egypt and Kush 	
River Valley Civilizations Portfolio		<ul style="list-style-type: none"> • River Valley Civilizations Portfolio 	
Early Civilizations of China		<ul style="list-style-type: none"> • The Unification of China 	
Civilizations of the Americas		<ul style="list-style-type: none"> • The Maya 	
Feudal Europe		<ul style="list-style-type: none"> • Revival of Towns and Trade 	
History			
8.1. Historical Analysis and Skills Development			
Continuity and Change over Time			

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B	
	Unit Name	Lesson Name
8.1.6.A. Explain continuity and change over time using sequential order and context of events.	Mesopotamia	• Beliefs of Judaism
	Ancient Greece	• Alexander and the Hellenistic World
	The Roman Republic	• The Republic Struggles
	The Roman and Byzantine Empires	• The Roman Empire Begins • The Decline of the Roman Empire
	Feudal Europe	• Feudalism and the Manor Economy
Fact/Opinion and Points of View		
8.1.6.B. Differentiate between fact and opinion, multiple points of view, and primary and secondary sources to explain historical events.	Mesopotamia	• The Assyrian and Persian Empires • Origins of Judaism • Beliefs of Judaism
	Ancient Egypt and Kush	• Egypt Under the Pharaohs • Achievements of Egyptian Civilization • Egypt and Kush
	Early Civilizations of India	• Origins and Beliefs of Hinduism • Origins and Beliefs of Buddhism • The Maurya Empire Begins
	Early Civilizations of China	• The Zhou Dynasty • Chinese Belief Systems
	Ancient Greece	• The Early Years of Greek Civilization • Warfare in Ancient Greece • Ancient Greek Beliefs and Arts
	The Roman Republic	• Society in the Roman Republic • The Republic Struggles
	The Roman Republic Discussion	• The Roman Republic Discussion
	The Roman and Byzantine Empires	• The Roman Empire Begins • Origins of Christianity • Beliefs of Christianity
	Absolutism and Enlightenment	• Rise of Parliament in England • The Enlightenment
Research		
8.1.6.C. Identify a thesis statement using appropriate primary and secondary sources. (Reference RWSL Standard 1.8.5 Research)	Early Civilizations of India	• The Indus Valley Civilization • Origins and Beliefs of Hinduism • Origins and Beliefs of Buddhism • The Maurya Empire Begins
	River Valley Civilizations Portfolio	• River Valley Civilizations Portfolio
	Early Civilizations of China	• The Unification of China • Han Society and Achievements
	The Roman Republic	• Society in the Roman Republic • The Republic Struggles
	The Roman Republic Discussion	• The Roman Republic Discussion
Absolutism and Enlightenment	• Rise of Parliament in England • The Enlightenment	
8.2. Pennsylvania History		
Contributions from Individuals and Groups (PA)		

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B	
	Unit Name	Lesson Name
8.2.6.A. Explain the social, political, cultural, and economic contributions of individuals and groups from Pennsylvania.	Incorporate and assign an activity to explain the social, political, cultural, and economic contributions of individuals and groups from Pennsylvania.	
Historical Documents, Artifacts, and Places (PA)		
8.2.6.B. Describe the importance of significant historical documents, artifacts, and places critical to Pennsylvania history.	Incorporate and assign an activity to describe the importance of significant historical documents, artifacts, and places critical to Pennsylvania history.	
Impact of Continuity and Change on PA History		
8.2.6.C. Explain how continuity and change have impacted Pennsylvania history. <ul style="list-style-type: none"> • Belief systems and religions • Commerce and industry • Technology • Politics and government • Physical and human geography • Social organizations 	Incorporate and assign an activity to explain how continuity and change have impacted Pennsylvania history including: Belief systems and religions, Commerce and industry, Technology, Politics and government, Physical and human geography, Social organizations.	
Conflict and Cooperation (PA)		
8.2.6.D. Explain how conflict and cooperation among groups and organizations have impacted the history and development of Pennsylvania. <ul style="list-style-type: none"> • Ethnicity and race • Working conditions • Immigration • Military conflict • Economic stability 	Incorporate and assign an activity to explain how conflict and cooperation among groups and organizations have impacted the history and development of Pennsylvania including: Ethnicity and race, Working conditions, Immigration, Military conflict, Economic stability.	
8.3. United States History		
Contributions of Individuals and Groups (US History)		
8.3.6.A. Explain the social, political, cultural, and economic contributions of individuals and groups to United States history.	Incorporate and assign an activity to explain the social, political, cultural, and economic contributions of individuals and groups to United States history.	
Historical Documents and Artifacts (US History)		
8.3.6.B. Explain the importance of significant historical documents, artifacts, and places critical to United States history.	Incorporate and assign an activity to explain the importance of significant historical documents, artifacts, and places critical to United States history.	
Impact of Continuity and Change on US History		
8.3.6.C. Explain how continuity and change have impacted U.S. history. <ul style="list-style-type: none"> • Belief systems and religions • Commerce and industry • Technology • Politics and government • Physical and human geography • Social organizations 	Incorporate and assign an activity to explain how continuity and change have impacted U.S. history including: Belief systems and religions, Commerce and industry, Technology, Politics and government, Physical and human geography, Social organizations.	
Conflict and Cooperation (US)		

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B		
	Unit Name	Lesson Name	
8.3.6.D. Explain how conflict and cooperation among groups and organizations have impacted the history and development of the U.S. <ul style="list-style-type: none"> • Ethnicity and race • Working conditions • Immigration • Military conflict • Economic stability 	Incorporate and assign an activity to explain how conflict and cooperation among groups and organizations have impacted the history and development of the U.S. including: Ethnicity and race, Working conditions, Immigration, Military conflict, Economic stability.		
8.4. World History			
Contributions of Individuals and Groups (World)			
8.4.6.A. Explain the social, political, cultural, and economic contributions of individuals and groups to world history.	Origins of Civilization	<ul style="list-style-type: none"> • New Ways of Life • The Rise of Civilizations 	
	Mesopotamia	<ul style="list-style-type: none"> • Civilization Emerges in Mesopotamia • Origins of Judaism • Beliefs of Judaism 	
	Ancient Egypt and Kush	<ul style="list-style-type: none"> • Egypt Under the Pharaohs • Achievements of Egyptian Civilization • Egypt and Kush 	
	Early Civilizations of India	<ul style="list-style-type: none"> • The Indus Valley Civilization • India's Verdic Age • Origins and Beliefs of Hinduism • Origins and Beliefs of Buddhism 	
	River Valley Civilizations Portfolio	<ul style="list-style-type: none"> • River Valley Civilizations Portfolio 	
	Early Civilizations of China	<ul style="list-style-type: none"> • The Zhou Dynasty • The Unification of China • Han Society and Achievements 	
	Civilizations of the Americas	<ul style="list-style-type: none"> • The Maya 	
	Ancient Greece	<ul style="list-style-type: none"> • Ancient Greek Society and Economic Expansion • Democracy in Athens • Warfare in Ancient Greece • Ancient Greek Beliefs and Arts • Ancient Greek Learning • Alexander and the Hellenistic World 	
	The Roman Republic	<ul style="list-style-type: none"> • The Roman Republic Rises • The Republic Struggles 	
	The Roman Republic Discussion	<ul style="list-style-type: none"> • The Roman Republic Discussion 	
	The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Roman Empire Begins • Origins of Christianity • Beliefs of Christianity • The Byzantine Empire Rises 	
	Historical Documents, Artifacts, and Sites (World)		
		Mesopotamia	<ul style="list-style-type: none"> • Civilization Emerges in Mesopotamia • Origins of Judaism • Beliefs of Judaism

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B	
	Unit Name	Lesson Name
8.4.6.B. Identify and explain the importance of historical documents, artifacts, and sites which are critical to world history.	Ancient Egypt and Kush	<ul style="list-style-type: none"> • Egypt Under the Pharaohs • Achievements of Egyptian Civilization • Egypt and Kush
	Early Civilizations of India	<ul style="list-style-type: none"> • The Indus Valley Civilization • India's Verdic Age • Origins and Beliefs of Hinduism • Origins and Beliefs of Buddhism • The Maurya Empire Begins • Asoka's Rule • The Gupta Empire
	River Valley Civilizations Portfolio	<ul style="list-style-type: none"> • River Valley Civilizations Portfolio
	Ancient Greece	<ul style="list-style-type: none"> • The Early Years of Greek Civilization • Ancient Greek Beliefs and Arts • Ancient Greek Learning
	The Roman Republic Discussion	<ul style="list-style-type: none"> • The Roman Republic Discussion
	The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Roman Empire Begins • Origins of Christianity • Beliefs of Christianity • The Decline of the Roman Empire • The Byzantine Empire Rises
Impact of Continuity and Change (World)		
8.4.6.C. Explain how continuity and change have impacted world history. <ul style="list-style-type: none"> • Belief systems and religions • Commerce and industry • Technology • Politics and government • Physical and human geography • Social organizations 	Origins of Civilization	<ul style="list-style-type: none"> • The Distant Past • Humans Spread Out • Developing Complex Cultures • New Ways of Life • The Rise of Civilizations
	Mesopotamia	<ul style="list-style-type: none"> • Civilization Emerges in Mesopotamia • The First Empires • The Phoenicians • Origins of Judaism • Beliefs of Judaism
	Ancient Egypt and Kush	<ul style="list-style-type: none"> • Egypt Under the Pharaohs • Achievements of Egyptian Civilization • Egypt and Kush
	Early Civilizations of India	<ul style="list-style-type: none"> • The Indus Valley Civilization • India's Verdic Age • Origins and Beliefs of Hinduism • Origins and Beliefs of Buddhism • The Maurya Empire Begins • Asoka's Rule • The Gupta Empire
	Ancient Greece	<ul style="list-style-type: none"> • The Early Years of Greek Civilization • Ancient Greek Beliefs and Arts • Ancient Greek Learning

Pennsylvania Academic Standards (2009) Social Studies: Grade 6	Social Studies 6 A/B	
	Unit Name	Lesson Name
	The Roman and Byzantine Empires	<ul style="list-style-type: none"> • The Roman Empire Begins • Origins of Christianity • Beliefs of Christianity • The Decline of the Roman Empire • The Byzantine Empire Rises
Conflict and Cooperation (World)		
8.4.6.D. Examine patterns of conflict and cooperation among groups and organizations that impacted the development of the history of the world.	Mesopotamia	<ul style="list-style-type: none"> • The First Empires • The Phoenicians • Origins of Judaism • Beliefs of Judaism
	Ancient Egypt and Kush	<ul style="list-style-type: none"> • Egypt and Kush
	Early Civilizations of China	<ul style="list-style-type: none"> • The Unification of China

	Feudal Europe	<ul style="list-style-type: none"> • Feudalism and the Manor Economy • Conflicts Between Popes and Monarchs • England Takes Shape • The Crusades • The Reconquista

Social Studies 7

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
Civics and Government		
5.1. Principles and Documents of Government		
Rule of Law		
5.1.7.A. Cite functional examples of how the rule of law protects property rights, individual rights, and the common good.	Incorporate and assign an activity to cite functional examples of how the rule of law protects property rights, individual rights, and the common good.	
Laws and Government		
5.1.7.B. Identify the different types of government and the processes they use in making laws.	Introduction to Geography	<ul style="list-style-type: none"> • Government
	The Modern World	<ul style="list-style-type: none"> • Depression and the Rise of Totalitarianism
	The United States and Canada	<ul style="list-style-type: none"> • The United States and Canada at Work
	Middle America	<ul style="list-style-type: none"> • Mexico and Central America at Work
	South America	<ul style="list-style-type: none"> • South America at Work
	Europe Today	<ul style="list-style-type: none"> • Living and Working in Europe • Government in Europe
	Northern Eurasia	<ul style="list-style-type: none"> • The Soviet Union and its Breakup • Living in Northern Eurasia • Northern Eurasia at Work
	Africa	<ul style="list-style-type: none"> • Colonization and Independence in Africa • Living in Africa • Africa at Work
	Southwest and South Asia Today	<ul style="list-style-type: none"> • Governments in Southwest Asia • Living in South Asia • South Asia at Work
	East and Southeast Asia Today	<ul style="list-style-type: none"> • Living in East Asia • Southeast Asia at Work
Australia and the Pacific	<ul style="list-style-type: none"> • Living in Australia and the Pacific • Australia and the Pacific at Work 	
Principles and Ideals that Shape Government		
5.1.7.C. Explain how the principles and ideals shape local, state, and national government. <ul style="list-style-type: none"> • Liberty / Freedom • Democracy • Justice • Equality 	Introduction to Geography	<ul style="list-style-type: none"> • Government • Citizenship Extend the lessons to explain how the principles and ideals shape local, state, and national government including: Liberty / Freedom and Justice
Documents and Ideals that Shape Pennsylvania and US Government		
5.1.7.D. Summarize the basic principles and ideals within documents and the roles played by the framers as found in significant documents: <ul style="list-style-type: none"> • Declaration of Independence • United States Constitution • Bill of Rights • Pennsylvania Constitution 	Incorporate and assign an activity to summarize the basic principles and ideals within documents and the roles played by the framers as found in significant documents including: Declaration of Independence, United States Constitution, Bill of Rights, Pennsylvania Constitution	
Individual Rights		

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
5.1.7.E. Compare and contrast the individual rights guaranteed by the PA Constitution versus the U.S. Constitution.	Incorporate and assign an activity to compare and contrast the individual rights guaranteed by the PA Constitution versus the U.S. Constitution.	
Symbols		
5.1.7.F. Describe how the media uses political symbols to influence public opinion.	The Modern World	• Depression and the Rise of Totalitarianism
5.2. Rights and Responsibilities of Citizenship		
Civics Rights and Responsibilities		
5.2.7.A Compare and contrast rights and responsibilities of citizenship in the community, state, and nation.	Introduction to Geography	• Government • Citizenship Extend the lessons to compare and contrast rights and responsibilities of citizenship in the community, state, and nation.
Conflict and Resolution		
5.2.7.B. Compare the methods citizens use to resolve conflicts in society and government.	Introduction to Geography	• Government
	The United States and Canada	• Three American Indian Cultures
	South America	• Early South American Culture • South America at Work
	Europe Today	• Living and Working in Europe • Government in Europe
	Northern Eurasia	• The Soviet Union and its Breakup • Living in Northern Eurasia • Northern Eurasia at Work
Leadership and Public Service		
5.2.7.C. Describe the role of political leadership and public service.	Introduction to Geography	• Government
	The United States and Canada	• The United States and Canada at Work
	Middle America	• Mexico and Central America at Work
	South America	• Early South American Culture • South America at Work
	Europe Today	• Living and Working in Europe • Government in Europe
	Northern Eurasia	• The Soviet Union and its Breakup
Competent and Responsible Citizens		
5.2.7.D. Describe the citizen's role in the political process.	Introduction to Geography	• Government • Citizenship
	The United States and Canada	• The United States and Canada at Work
5.3. How Government Works		
Branches of Government		
5.3.7.A. Compare and contrast the responsibilities and powers of the three branches of government.	Introduction to Geography	• Government
	The United States and Canada	• The United States and Canada at Work
Structure, Organization, and Operation of Governments		
5.3.7.B. Define and compare the role and structure of local, state, and national governments.	Incorporate and assign an activity to define and compare the role and structure of local, state, and national governments.	
Government Services		

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
5.3.7.C. Describe how local, state, and national governments provide services.	Incorporate and assign an activity to describe how local, state, and national governments provide services.	
Leadership and Political Elections		
5.3.7.D. Identify leadership positions and the role of political party affiliation at the local, state, and national levels.	Incorporate and assign an activity to identify leadership positions and the role of political party affiliation at the local, state, and national levels.	
Elements of the Election Process		
5.3.7.E. Describe the closed primary voting process in Pennsylvania.	Incorporate and assign an activity to describe the closed primary voting process in Pennsylvania.	
Conflict and the Court System		
5.3.7.F. Identify the different levels of the court system.	Incorporate and assign an activity to identify the different levels of the court system.	
Interest Groups		
5.3.7.G. Explain the role of interest groups in local and Pennsylvania governments.	Incorporate and assign an activity to explain the role of interest groups in local and Pennsylvania governments.	
Media Influences		
5.3.7.H. Describe the influence of mass media on society.	The Modern World	<ul style="list-style-type: none"> • Depression and Rise of Totalitarianism • Continuing Conflicts • Living in Our Interdependent World
Taxes		
5.3.7.I. Identify types of local, state, and national taxes.	Incorporate and assign an activity to identify types of local, state, and national taxes.	
Systems of Government		
5.3.7.J. Identify various types of governments.	Introduction to Geography	• Government
	The Modern World	• Living in Our Interdependent World
	The United States and Canada	• The United States and Canada at Work
	South America	• South America at Work
	Europe Today	<ul style="list-style-type: none"> • Living and Working in Europe • Government in Europe • Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> • The Soviet Union and its Breakup • Living in Northern Eurasia • Northern Eurasia at Work • Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> • Colonization and Independence in Africa • Living in Africa • Africa at Work • Challenges Facing Africa
5.4. How International Relationships Function		
Countries and Conflicts		
	The Modern World	<ul style="list-style-type: none"> • World War I and the Russian Revolution • Depression and the Rise of Totalitarianism • Living in Our Interdependent World

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
5.4.7.A. Identify how countries have varying interests.	Middle America	<ul style="list-style-type: none"> • Independence for Mexico and Central America • History of the Caribbean • Mexico and Central America at Work
	Middle America Discussion	<ul style="list-style-type: none"> • Middle America Discussion
	South America	<ul style="list-style-type: none"> • European Colonization of South America • Independence for South America • South America at Work
	Europe Today	<ul style="list-style-type: none"> • Europe's Cultural Diversity • Living and Working in Europe • Government in Europe • Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> • Living in Northern Eurasia • Northern Eurasia at Work • Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> • Colonization and Independence in Africa • Living in Africa • Africa at Work • Challenges Facing Africa
	Southwest and South Asia Today	<ul style="list-style-type: none"> • Governments in Southwest Asia • Living in South Asia • South Asia at Work • Challenges Facing South Asia
	East and Southeast Asia Today	<ul style="list-style-type: none"> • Living in East Asia • Southeast Asia at Work • Challenges Facing Southeast Asia
	Australia and the Pacific	<ul style="list-style-type: none"> • Living in Australia and the Pacific • Australia and the Pacific at Work • Challenges Facing Australia and the Pacific
Tools of Foreign Policy		
5.4.7.B. Describe how countries coexist in the world community.	Introduction to Geography	<ul style="list-style-type: none"> • Government
	Europe Today	<ul style="list-style-type: none"> • Europe's Cultural Diversity • Living and Working in Europe • Government in Europe • Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> • The Soviet Union and its Breakup • Living in Northern Eurasia • Northern Eurasia at Work • Challenges Facing Northern Eurasia
International Organizations		
5.4.7.C. Intentionally Blank		
Media and its Influence		
5.4.7.D. Identify mass media sources and how they report world events.	Incorporate and assign an activity to identify mass media sources and how they report world events.	

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
How Foreign Policy is Influenced		
5.4.7.E. Intentionally Blank		
Economics		
6.1. Scarcity and Choice		
Scarcity and Choice		
6.1.7.A. Explain how limited resources and unlimited wants cause scarcity.	The United States and Canada	<ul style="list-style-type: none"> Challenges Facing the United States and Canada Extend the lesson to explain how limited resources and unlimited wants cause scarcity.
Limited Resources		
6.1.7.B Compare decisions made because of limited resources and unlimited wants.	Incorporate and assign an activity to compare decisions made because of limited resources and unlimited wants.	
6.1.7.B Describe how resources are combined to produce different goods and services.	Incorporate and assign an activity to describe how resources are combined to produce different goods and services.	
Opportunity Costs		
6.1.7.C. Define opportunity cost and describe the opportunity cost of personal choice.	Introduction to Geography	<ul style="list-style-type: none"> Economics Basics
Incentives and Choice		
6.1.7.D. Explain how positive and negative incentives affect behavior.	Introduction to Geography The Modern World	<ul style="list-style-type: none"> Economics Basics Living in Our Interdependent World
6.2. Markets and Economic Systems		
Goods and Services		
6.2.7.A. Describe the interaction of consumers and producers of goods and services in the state and national economy.	Introduction to Geography	<ul style="list-style-type: none"> Economics Basics Extend the lesson to describe the interaction of consumers and producers of goods and services in the state economy.
Market Competition		
6.2.7.B. Explain why and how market competition takes place.	Introduction to Geography The Modern World	<ul style="list-style-type: none"> Economics Basics Living in Our Interdependent World Extend the lesson to explain how market competition takes place.
Advertising and Media		
6.2.7.C. Explain how advertising influences economic decisions.	Incorporate and assign an activity to explain how advertising influences economic decisions.	
Price Determination		
6.2.7.D. Explain the effects that changes in price have on buyers and sellers.	Introduction to Geography	<ul style="list-style-type: none"> Economics Basics
Economic Health		
6.2.7.E. Explain the causes and effects of expansion and contraction of businesses.	Incorporate and assign an activity to explain the causes and effects of expansion and contraction of businesses.	
Private Economic Institutions		
6.2.7.F. Explain the influence of private economic institutions on the local and state economy.	Incorporate and assign an activity to explain the influence of private economic institutions on the local and state economy.	
Economic Systems		

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
6.2.7.G. Examine how various economic systems address the three basic questions. • What to produce? • How? • For whom?	Introduction to Geography	<ul style="list-style-type: none"> Economics Basics Extend the lesson to examine how various economic systems address the three basic questions including: What to produce? How? For whom?
6.3. Functions of Government		
Goods and Services		
6.3.7.A. Explain the impact of public goods and services on the local community and state.	Incorporate and assign an activity to explain the impact of public goods and services on the local community and state.	
Government Involvement in the Economy		
6.3.7.B. Describe the impact of government involvement in state and national economic activities.	Introduction to Geography	<ul style="list-style-type: none"> Economics Basics Government
	The Modern World	<ul style="list-style-type: none"> Depression and the Rise of Totalitarianism The Cold War Living in Our Interdependent World
	The United States and Canada	<ul style="list-style-type: none"> The United States and Canada at Work
Taxation		
6.3.7.C. Explain the cost and benefits of taxation.	Incorporate and assign an activity to explain the cost and benefits of taxation.	
Government's Role in International Trade		
6.3.7.D. Identify how governments limit or promote international trade.	Introduction to Geography	<ul style="list-style-type: none"> Trade and Development Government
	The Modern World	<ul style="list-style-type: none"> Depression and the Rise of Totalitarianism Living in Our Interdependent World
	The United States and Canada	<ul style="list-style-type: none"> The United States and Canada at Work
	Middle America	<ul style="list-style-type: none"> Spanish Colonization Independence for Mexico and Central America History of the Caribbean Mexico and Central America at Work
	South America	<ul style="list-style-type: none"> Independence for South America South America at Work Challenges Facing South America
	Europe Today	<ul style="list-style-type: none"> Europe's Cultural Diversity Living and Working in Europe Government in Europe Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> The Soviet Union and its Breakup Living in Northern Eurasia Northern Eurasia at Work Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> Colonization and Independence in Africa Living in Africa Africa at Work Challenges Facing Africa

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
6.4. Economic Interdependence		
Specialization		
6.4.7.A. Explain why people specialize in the production of goods and services and divide labor.	Introduction to Geography	<ul style="list-style-type: none"> Economics Basics Trade and Development
	Middle America	<ul style="list-style-type: none"> History of the Caribbean
	South America	<ul style="list-style-type: none"> South America at Work Challenges Facing South America
	East and Southeast Asia Today	<ul style="list-style-type: none"> East Asia at Work Southeast Asia at Work
Trade		
6.4.7.B. Analyze how changes in trade affect standards of living.	Introduction to Geography	<ul style="list-style-type: none"> Trade and Development
	The Modern World	<ul style="list-style-type: none"> Depression and the Rise of Totalitarianism Living in Our Interdependent World
	Middle America	<ul style="list-style-type: none"> Spanish Colonization Independence for Mexico and Central America History of the Caribbean
	South America	<ul style="list-style-type: none"> South America at Work Challenges Facing South America
	Europe Today	<ul style="list-style-type: none"> Living and Working in Europe Government in Europe Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> Russia Emerges
Africa	<ul style="list-style-type: none"> Colonization and Independence in Africa Living in Africa Africa at Work Challenges Facing Africa 	
Multinational and Non-Governmental Organizations		
6.4.7.C. Explain how multinational corporations and other non-government organizations contribute to economic interdependence.	The Modern World	<ul style="list-style-type: none"> Living in Our Interdependent World
	South America	<ul style="list-style-type: none"> South America at Work Challenges Facing South America
	East and Southeast Asia Today	<ul style="list-style-type: none"> East Asia at Work
Factors Contributing to Economic Interdependence		
	Introduction to Geography	<ul style="list-style-type: none"> Economics Basics Trade and Development Government
	The Modern World	<ul style="list-style-type: none"> World War I and the Russian Revolution Depression and the Rise of Totalitarianism Living in Our Interdependent World
	Middle America	<ul style="list-style-type: none"> Spanish Colonization History of the Caribbean Mexico and Central America at Work Challenges Facing Middle America

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
6.4.7.D. Explain how transportation, communication networks, and technology contribute to economic interdependence.	South America	<ul style="list-style-type: none"> • Early South American Culture • European Colonization of South America • Independence for South America • South America at Work • Challenges Facing South America
	Europe Today	<ul style="list-style-type: none"> • Europe's Cultural Diversity • Living and Working in Europe • Government in Europe • Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> • Russia Emerges • The Soviet Union and its Breakup • Living in Northern Eurasia • Northern Eurasia at Work • Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> • Living in Africa • Africa at Work • Challenges Facing Africa
6.5. Income, Profit, and Wealth		
Factors Influencing Wages		
6.5.7.A. Describe how people are compensated for their production of goods and services.	Incorporate and assign an activity to describe how people are compensated for their production of goods and services.	
Labor Productivity		
6.5.7.B. Describe the characteristics of productive workers.	Incorporate and assign an activity to describe the characteristics of productive workers.	
Types of Businesses		
6.5.7.C. Intentionally Blank		
Profits and Losses		
6.5.7.D. Explain the relationship between risk and reward.	Incorporate and assign an activity to explain the relationship between risk and reward.	
Distribution of Wealth		
6.5.7.E. Describe how people accumulate tangible and financial assets through income, saving, and financial investment.	Incorporate and assign an activity to describe how people accumulate tangible and financial assets through income, saving, and financial investment.	
Entrepreneurship		
6.5.7.F. Explain the role of entrepreneurship in Pennsylvania.	Incorporate and assign an activity to explain the role of entrepreneurship in Pennsylvania.	
Costs and Benefits of Saving		
6.5.7.G. Identify the costs and benefits of various financial tools available to savers.	Incorporate and assign an activity to identify the costs and benefits of various financial tools available to savers.	
Interest Rates		
6.5.7.H. Identify the effect of higher and lower interest rates.	Incorporate and assign an activity to identify the effect of higher and lower interest rates.	
Geography		
7.1. Basic Geographic Literacy		

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
Geographic Tools		
7.1.7.A. Explain how common geographic tools are used to organize and interpret information about people, places, and environment.	Introduction to Geography	<ul style="list-style-type: none"> • Geography Basics • People and the Environment • Culture and Society
	The Modern World	<ul style="list-style-type: none"> • World War I and the Russian Revolution • World War II • The Middle East
	The United States and Canada	<ul style="list-style-type: none"> • European Colonization
	Middle America	<ul style="list-style-type: none"> • Living in Mexico and Central America
	Northern Eurasia	<ul style="list-style-type: none"> • Russia Emerges • The Soviet Union and its Breakup
	Africa	<ul style="list-style-type: none"> • Colonization and Independence in Africa • Living in Africa
Location of Places and Regions		
7.1.7.B. Explain and locate places and regions as defined by physical and human features.	Introduction to Geography	<ul style="list-style-type: none"> • Geography Basics • People and the Environment • Culture and Society
	The United States and Canada Portfolio	<ul style="list-style-type: none"> • Moving to Canada Portfolio
	Middle America	<ul style="list-style-type: none"> • The Olmec and Maya Civilizations • Aztec Civilization • Living in Mexico and Central America • The Caribbean Today
	Northern Eurasia	<ul style="list-style-type: none"> • Russia Emerges
7.2. Physical Characteristics of Places and Regions		
Physical Characteristics		
7.2.7.A. Explain the characteristics of places and regions.	Introduction to Geography	<ul style="list-style-type: none"> • Geography Basics • Climate and Ecosystems
	The United States and Canada	<ul style="list-style-type: none"> • North American Indian Culture Regions • Living in the United States and Canada
	The United States and Canada Portfolio	<ul style="list-style-type: none"> • Moving to Canada Portfolio
	Middle America	<ul style="list-style-type: none"> • The Olmec and Maya Civilizations • Aztec Civilization • The Caribbean Today • Challenges Facing Middle America
	South America	<ul style="list-style-type: none"> • Early South American Culture • Challenges Facing South America
	Northern Eurasia	<ul style="list-style-type: none"> • Russia Emerges
	Africa	<ul style="list-style-type: none"> • Later African Civilizations • Living in Africa • Challenges Facing Africa
Physical Processes		
	Introduction to Geography	<ul style="list-style-type: none"> • Our Planet, Earth • Climate and Ecosystems

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
7.2.7.B. Describe the physical processes that shape patterns on Earth’s surface.	The United States and Canada	<ul style="list-style-type: none"> • North American Indian Culture Regions • Living in the United States and Canada
	Middle America	<ul style="list-style-type: none"> • The Olmec and Maya Civilizations • The Caribbean Today • Challenges Facing Middle America
	South America	<ul style="list-style-type: none"> • Early South American Culture • Challenges Facing South America
	Northern Eurasia	<ul style="list-style-type: none"> • Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> • Later African Civilizations
7.3. Human Characteristics of Places and Regions Human Characteristics		
7.3.7.A. Describe the human characteristics of places and regions using the following criteria: <ul style="list-style-type: none"> • Population • Culture • Settlement • Economic activities • Political activities 	The United States and Canada	<ul style="list-style-type: none"> • North American Indian Culture Regions • European Colonization • Living in the United States and Canada
	The United States and Canada Portfolio	<ul style="list-style-type: none"> • Moving to Canada Portfolio
	Middle America	<ul style="list-style-type: none"> • The Olmec and Maya Civilizations • Aztec Civilization • Spanish Colonization • Living in Mexico and Central America • The Caribbean Today • Challenges Facing Middle America
	South America	<ul style="list-style-type: none"> • Early South American Culture • Living in South America • Challenges Facing South America
	Europe Today	<ul style="list-style-type: none"> • Europe Today • Europe's Cultural Diversity • Living and Working in Europe • Government in Europe • Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> • Russia Emerges • The Soviet Union and its Breakup • Living in Northern Eurasia • Northern Eurasia at Work • Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> • Later African Civilizations • Colonization and Independence in Africa • Living in Africa • Africa at Work • Challenges Facing Africa
7.4. Interactions Between People and the Environment Impact of Physical Systems on People		

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
7.4.7.A. Describe and explain the effects of the physical systems on people within regions.	Introduction to Geography	<ul style="list-style-type: none"> • Our Planet, Earth • Climate and Ecosystems • People and the Environment • Culture and Society
	The Modern World	<ul style="list-style-type: none"> • The Middle East
	The United States and Canada	<ul style="list-style-type: none"> • North American Indian Culture Regions • Living in the United States and Canada • Challenges Facing the United States and Canada
	The United States and Canada Portfolio	<ul style="list-style-type: none"> • Moving to Canada Portfolio
	Middle America	<ul style="list-style-type: none"> • Aztec • Spanish Colonization • The Caribbean Today • Challenges Facing Middle America
	South America	<ul style="list-style-type: none"> • Early South American Culture • Living in South America • Challenges Facing South America
	Europe Today	<ul style="list-style-type: none"> • Europe's Cultural Diversity • Europe's Cultural Diversity • Living and Working in Europe • Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> • Russia Emerges • The Soviet Union and its Breakup • Living in Northern Eurasia • Northern Eurasia at Work • Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> • Later African Civilizations • Living in Africa • Africa at Work • Challenges Facing Africa
Impact of People on Physical Systems		
7.4.7.B. Describe and explain the effects of people on the physical systems within regions.	Introduction to Geography	<ul style="list-style-type: none"> • People and the Environment
	The Modern World	<ul style="list-style-type: none"> • Living in Our Interdependent World
	The United States and Canada	<ul style="list-style-type: none"> • Three American Indian Cultures • Challenges Facing the United States and Canada
	Middle America	<ul style="list-style-type: none"> • Challenges Facing Middle America
	South America	<ul style="list-style-type: none"> • Early South American Culture • European Colonization of South America • Living in South America • Challenges Facing South America
	Europe Today	<ul style="list-style-type: none"> • Living and Working in Europe • Challenges Facing Europe

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
	Northern Eurasia	<ul style="list-style-type: none"> • Living in Northern Eurasia • Northern Eurasia at Work • Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> • Later African Civilizations • Colonization and Independence in Africa • Living in Africa • Africa at Work • Challenges Facing Africa
History		
8.1. Historical Analysis and Skills Development		
Continuity and Change over Time		
8.1.7.A. Demonstrate continuity and change over time using sequential order and context of events.	The Modern World	• The Middle East
	The United States and Canada	• Building Nations
	Middle America	• Aztec Civilization
	South America	• Independence for South America
	Northern Eurasia	• The Soviet Union and its Breakup
	Africa	• Later African Civilizations
Fact/Opinion and Points of View		
8.1.7.B. Identify and use primary and secondary sources to analyze multiple points of view for historical events.	Introduction to Geography	• History Basics
	The Modern World	• World War II
		• The Cold War
		• New Nations Emerge
		• Continuing Conflicts
	The United States and Canada	• Three American Indian Cultures
		• European Colonization
	Africa	• Colonization and Independence in Africa
Research		
8.1.7.C. Form a thesis statement on an assigned topic using appropriate primary and secondary sources. (Reference RWSL Standard 1.8.5 Research)	Introduction to Geography	• History Basics
	The Modern World	• World War II
	Middle America Discussion	• Middle America Discussion
	South America	• Independence for South America
	Europe Today	• Government in Europe
	Africa	• Colonization and Independence in Africa
8.2. Pennsylvania History		
Contributions from Individuals and Groups (PA)		
8.2.7.A. Identify the social, political, cultural, and economic contributions of specific individuals and groups from Pennsylvania.	Incorporate and assign an activity to identify the social, political, cultural, and economic contributions of specific individuals and groups from Pennsylvania.	
Historical Documents, Artifacts, and Places (PA)		
8.2.7.B. Identify the role of local communities as related to significant historical documents, artifacts, and places critical to Pennsylvania history.	Incorporate and assign an activity to identify the role of local communities as related to significant historical documents, artifacts, and places critical to Pennsylvania history.	
Impact of Continuity and Change on PA History		

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
8.2.7.C. Explain how continuity and change have impacted Pennsylvania history as related to local communities. <ul style="list-style-type: none"> • Belief systems and religions • Commerce and industry • Technology • Politics and government • Physical and human geography • Social organizations 		Incorporate and assign an activity to explain how continuity and change have impacted Pennsylvania history as related to local communities including: Belief systems and religions, Commerce and industry, Technology, Politics and government, Physical and human geography, Social organizations.
Conflict and Cooperation (PA)		
8.2.7.D. Identify local connections and examples of conflict and cooperation among groups and organizations and how this impacted the history and development of Pennsylvania. <ul style="list-style-type: none"> • Ethnicity and race • Working conditions • Immigration • Military conflict • Economic stability 		Incorporate and assign an activity to identify local connections and examples of conflict and cooperation among groups and organizations and how this impacted the history and development of Pennsylvania including: Ethnicity and race, Working conditions, Immigration, Military conflict, Economic stability.
8.3. United States History		
Contributions of Individuals and Groups (US History)		
8.3.7.A. Classify the social, political, cultural, and economic contributions of individuals and groups throughout United States history.	The United States and Canada	<ul style="list-style-type: none"> • Three American Indian Cultures • European Colonization Extend the lessons to classify the social, political, cultural, and economic contributions of individuals and groups throughout United States history.
Historical Documents and Artifacts (US History)		
8.3.7.B. Examine the importance of significant historical documents, artifacts, and places critical to United States history.	Introduction to Geography	<ul style="list-style-type: none"> • Government
	The United States and Canada	<ul style="list-style-type: none"> • Three American Indian Cultures • European Colonization
	Europe Today	<ul style="list-style-type: none"> • Europe's Cultural Diversity
Impact of Continuity and Change on US History		
8.3.7.C. Compare how continuity and change have impacted U.S. history. <ul style="list-style-type: none"> • Belief systems and religions • Commerce and industry • Technology • Politics and government • Physical and human geography • Social organizations 	The United States and Canada	<ul style="list-style-type: none"> • North American Indian Culture Regions • European Colonization • Building Nations • Living in the United States and Canada
Conflict and Cooperation (US)		

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
8.3.7.D. Examine conflict and cooperation among groups and organizations in U.S. history. <ul style="list-style-type: none"> • Ethnicity and race • Working conditions • Immigration • Military conflict • Economic stability 	The United States and Canada	<ul style="list-style-type: none"> • North American Indian Culture Regions • European Colonization • Building Nations
8.4. World History		
Contributions of Individuals and Groups (World)		
8.4.7.A. Summarize the social, political, cultural, and economic contributions of individuals and groups in world history.	Middle America	<ul style="list-style-type: none"> • Aztec Civilization • Spanish Colonization • Living in Mexico and Central America • Mexico and Central America at Work
	South America	<ul style="list-style-type: none"> • Independence for South America • European Colonization of South America • Living in South America • Challenges Facing South America
	Europe Today	<ul style="list-style-type: none"> • Europe's Cultural Diversity • Living and Working in Europe • Government in Europe • Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> • The Soviet Union and its Breakup • Living in Northern Eurasia • Northern Eurasia at Work • Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> • Colonization and Independence in Africa • Living in Africa • Africa at Work • Challenges Facing Africa
	Southwest and South Asia Today	<ul style="list-style-type: none"> • Cultural Diversity in Southwest Asia • Where People Live and Work in Southwest Asia • Governments in Southwest Asia • Living in South Asia • Challenges Facing South Asia
	East and Southeast Asia	<ul style="list-style-type: none"> • Independent Southeast Asia • Living in East Asia • East Asia at Work • Southeast Asia at Work • Challenges Facing Southeast Asia
	Australia and the Pacific	<ul style="list-style-type: none"> • Early Cultures of Australia and the Pacific • Living in Australia and the Pacific • Challenges Facing Australia and the Pacific
Historical Documents, Artifacts, and Sites (World)		

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
8.4.7.B. Explain the importance of historical documents, artifacts, and sites which are critical to world history.	Europe Today	<ul style="list-style-type: none"> • Europe's Cultural Diversity • Government in Europe
	Africa	<ul style="list-style-type: none"> • Human Origins • Colonization and Independence in Africa
	Southwest and South Asia Today	<ul style="list-style-type: none"> • Conflicts in Southwest Asia • Challenges Facing South Asia
	East and Southeast Asia Today	<ul style="list-style-type: none"> • Later History of East Asia • Early History of Southeast Asia
	Australia and the Pacific	<ul style="list-style-type: none"> • Early Cultures of Australia and the Pacific
Impact of Continuity and Change (World)		
8.4.7.C. Differentiate how continuity and change have impacted world history. <ul style="list-style-type: none"> • Belief systems and religions • Commerce and industry • Technology • Politics and government • Physical and human geography • Social organizations 	The United States and Canada	<ul style="list-style-type: none"> • North American Indian Culture Regions • European Colonization • Building Nations
	Middle America	<ul style="list-style-type: none"> • Living in Mexico and Central America • Mexico and Central America at Work • Challenges Facing Middle America
	South America	<ul style="list-style-type: none"> • Early South American Culture • European Colonization of South America • Independence for South America • Living in South America
	Europe Today	<ul style="list-style-type: none"> • Europe's Cultural Diversity • Living and Working in Europe • Government in Europe • Challenges Facing Europe
	Northern Eurasia	<ul style="list-style-type: none"> • Russia Emerges • The Soviet Union and its Breakup • Living in Northern Eurasia • Northern Eurasia at Work • Challenges Facing Northern Eurasia
	Africa	<ul style="list-style-type: none"> • Colonization and Independence in Africa • Living in Africa • Africa at Work • Challenges Facing Africa
Conflict and Cooperation (World)		
	The Modern World	<ul style="list-style-type: none"> • World War I and the Russian Revolution • Depression and the Rise of Totalitarianism • World War II • The Cold War • Continuing Conflicts • Living in Our Interdependent World
	The United States and Canada	<ul style="list-style-type: none"> • North American Indian Culture Regions • European Colonization • Building Nations

Pennsylvania Academic Standards (2009) Social Studies: Grade 7	Social Studies 7 A/B	
	Unit Name	Lesson Name
8.4.7.D. Explain how conflict and cooperation among groups and organizations have impacted the history of the world.	Middle America	<ul style="list-style-type: none"> • Aztec Civilization • Spanish Colonization • Independence for Mexico and Central America • History of the Caribbean
	South America	<ul style="list-style-type: none"> • European Colonization of South America • Independence for South America • Living in South America • Challenges Facing South America

Social Studies 8

Pennsylvania Academic Standards (2009) Social Studies: Grade 8	Social Studies 8 A/B	
	Unit Name	Lesson Name
Civics and Government		
5.1. Principles and Documents of Government		
Rule of Law		
5.1.8.A. Identify the sources of the rule of law.	A Constitution for the United States	<ul style="list-style-type: none"> • Understanding the Constitution • Amending the Constitution
	Civics	<ul style="list-style-type: none"> • Civics, Politics, and Government • Constitutions and Government • Influential Ideas and Events
Laws and Government		
5.1.8.B. Outline how different systems of government function.	A Constitution for the United States	<ul style="list-style-type: none"> • A Weak Confederation • Understanding the Constitution • Amending the Constitution
	Civics	<ul style="list-style-type: none"> • Civics, Politics, and Government • Constitutions and Government • Influential Ideas and Events • National, State, and Local Government
Principles and Ideals that Shape Government		
5.1.8.C. Analyze the principles and ideas that shaped local, Pennsylvania, and national governments.	The Revolutionary Era	<ul style="list-style-type: none"> • Declaring Independence
<ul style="list-style-type: none"> • Liberty / Freedom • Democracy • Justice • Equality 	A Constitution for the United States	<ul style="list-style-type: none"> • Drafting a Constitution • Ideas that Influenced the Constitution • Federalists, Antifederalists, the Bill of Rights • Understanding the Constitution • Amending the Constitution
	Civics	<ul style="list-style-type: none"> • Constitutions and Government • American Political Identity • National, State, and Local Government
Documents and Ideals that Shape Pennsylvania and US Government		
5.1.8.D. Summarize the basic principles and ideals within documents and the roles played by the framers as found in significant documents:	The Revolutionary Era	<ul style="list-style-type: none"> • Declaring Independence
<ul style="list-style-type: none"> • Declaration of Independence • United States Constitution • Bill of Rights • Pennsylvania Constitution 	A Constitution for the United States	<ul style="list-style-type: none"> • Drafting a Constitution • Ideas that Influenced the Constitution • Federalists, Antifederalists, the Bill of Rights • Understanding the Constitution • Amending the Constitution
	Civics	<ul style="list-style-type: none"> • Constitutions and Government <p>Extend the lesson to include summarize the basic principles and ideals within documents and the roles played by the framers as found in significant documents including the Pennsylvania Constitution.</p>
Individual Rights		
5.1.8.E Compare and contrast the individual rights guaranteed by the PA Constitution versus the U.S. Constitution.	Civics	<ul style="list-style-type: none"> • Constitutions and Government • National, State, and Local Government <p>Extend the lessons to compare and contrast the individual rights guaranteed by the PA Constitution versus the U.S. Constitution.</p>

Pennsylvania Academic Standards (2009) Social Studies: Grade 8	Social Studies 8 A/B	
	Unit Name	Lesson Name
Symbols		
5.1.8.F. Analyze how political symbols are used by the media and leaders to influence public opinion.	The Revolutionary Era	<ul style="list-style-type: none"> • Tensions with Britain • Taking Up Arms
	Civics	<ul style="list-style-type: none"> • Public Opinion in a Democratic Society
	The Progressive Era	<ul style="list-style-type: none"> • A New Wave of Immigration • A Changing American Culture
5.2. Rights and Responsibilities of Citizenship		
Civics Rights and Responsibilities		
5.2.8.A. Summarize the role of citizens in terms of right and responsibilities in different government systems.	The Revolutionary Era	<ul style="list-style-type: none"> • Tensions with Britain
	A Constitution for the United States	<ul style="list-style-type: none"> • Understanding the Constitution • Amending the Constitution • Citizens' Rights and Responsibilities
	Civics	<ul style="list-style-type: none"> • Civics, Politics, and Government • National, State, and Local Government • Participation in a Democracy
Conflict and Resolution		
5.2.8.B. Describe how citizens resolve conflicts in society and government.	Civics	<ul style="list-style-type: none"> • Civics, Politics, and Government • National, State, and Local Government • Participation in a Democracy
	The Civil War	<ul style="list-style-type: none"> • Conflicts and Compromises
	The Progressive Era	<ul style="list-style-type: none"> • Progress and Setbacks for Social Justice
Leadership and Public Service		
5.2.8.C. Describe the role of political leadership and public service.	Civics	<ul style="list-style-type: none"> • American Political Identity • Civics, Politics, and Government • National, State, and Local Government • The Electoral Process
	Building on Economics Basics	<ul style="list-style-type: none"> • Government's Role in the Economy
Competent and Responsible Citizens		
5.2.8.D. Describe the citizen's role in the political process.	A Constitution for the United States	<ul style="list-style-type: none"> • Citizens' Rights and Responsibilities
	Civics	<ul style="list-style-type: none"> • Civics, Politics, and Government • Rights and Responsibilities of Citizenship • Participation in a Democracy
	The Progressive Era	<ul style="list-style-type: none"> • Progress and Setbacks for Social Justice
5.3. How Government Works		
Branches of Government		
5.3.8.A. Compare and contrast the responsibilities and powers of the three branches of government between Pennsylvania and the Federal government.	A Constitution for the United States	<ul style="list-style-type: none"> • Understanding the Constitution
	Civics	<ul style="list-style-type: none"> • Structure of the Government • National, State, and Local Government <p>Extend the lesson National, State, and Local Government to compare and contrast the responsibilities and powers of the three branches of government between Pennsylvania and the Federal government.</p>

Pennsylvania Academic Standards (2009) Social Studies: Grade 8	Social Studies 8 A/B	
	Unit Name	Lesson Name
Structure, Organization, and Operation of Governments		
5.3.8.B. Compare and contrast the policy-making process between Pennsylvania and the federal government.	A Constitution for the United States	<ul style="list-style-type: none"> Understanding the Constitution
	Civics	<ul style="list-style-type: none"> Structure of the Government National, State, and Local Government Extend the lesson Structure of the Government to compare and contrast the policy-making process between Pennsylvania and the federal government.
Government Services		
5.3.8.C. Describe how local, state, and national governments provide services.	A Constitution for the United States	<ul style="list-style-type: none"> Understanding the Constitution Amending the Constitution
	Civics	<ul style="list-style-type: none"> Structure of the Government National, State, and Local Government
	Building on Economics Basics	<ul style="list-style-type: none"> Government's Role in the Economy
Leadership and Political Elections		
5.3.8.D. Identify leadership positions and the role of political party affiliation at the local, state, and national levels.	Civics	<ul style="list-style-type: none"> Civics, Politics, and Government American Political Identity Structure of the Government National, State, and Local Government The Electoral Process Extend the lesson The Electoral Process to identify the role of political party affiliation at the local and state levels.
	The Progressive Era	<ul style="list-style-type: none"> The Progressive Presidents
Elements of the Election Process		
5.3.8.E. Describe the closed primary voting process in Pennsylvania.	Incorporate and assign an activity to describe the closed primary voting process in Pennsylvania.	
Conflict and the Court System		
5.3.8.F. Explain the various judicial levels of the U.S. and state.	Civics	<ul style="list-style-type: none"> Civics, Politics, and Government Influential Ideas and Events Structure of the Government
Interest Groups		
5.3.8.G. Explain the role of interest groups in the federal government process.	Incorporate and assign an activity to explain the role of interest groups in the federal government process.	
Media Influences		
5.3.8.H. Describe the influence of mass media on government.	Civics	<ul style="list-style-type: none"> Public Opinion in a Democratic Society
	The Early Republic	<ul style="list-style-type: none"> The Origin of Political Parties
Taxes		
5.3.8.I. Describe various types of projects and services provided through local, state, and national taxes.	The Early Republic	<ul style="list-style-type: none"> Washington's Presidency
	Building on Economics Basics	<ul style="list-style-type: none"> Government's Role in the Economy
Systems of Government		
5.3.8.J. Compare democracy to totalitarianism.	Civics	<ul style="list-style-type: none"> Civics, Politics, and Government
5.4. How International Relationships Function		

Pennsylvania Academic Standards (2009) Social Studies: Grade 8	Social Studies 8 A/B	
	Unit Name	Lesson Name
Countries and Conflicts		
5.4.8.A. Describe how national interests lead to agreements and conflicts between and among countries.	The Revolutionary Era	<ul style="list-style-type: none"> • The French and Indian War • Tensions with Britain • Declaring Independence • Winning Independence
	Civics	<ul style="list-style-type: none"> • The United States and the World
	The Early Republic	<ul style="list-style-type: none"> • Washington's Presidency • The Origin of Political Parties • Madison and the War of 1812 • Monroe's Presidency
	The Civil War	<ul style="list-style-type: none"> • Emancipation and Life in Wartime
	Economics Basics	<ul style="list-style-type: none"> • Trade
Tools of Foreign Policy		
5.4.8.B. Describe the foreign policy tools of diplomacy, economic aid, military aid, sanctions, and treaties.	The Revolutionary Era	<ul style="list-style-type: none"> • Taking Up Arms • Declaring Independence • Winning Independence
	Civics	<ul style="list-style-type: none"> • The United States and the World
	The Early Republic	<ul style="list-style-type: none"> • Washington's Presidency • The Origin of Political Parties • John Adams's Presidency • Jefferson's Presidency • Madison and the War of 1812 • Monroe's Presidency
	The Civil War	<ul style="list-style-type: none"> • Emancipation and Life in Wartime
	Economics Basics	<ul style="list-style-type: none"> • Trade
International Organizations		
5.4.8.C. Explain how common problems (e.g., natural disasters, ethnic conflict, environmental concerns) are addressed by organizations and governments.	The Revolutionary Era	<ul style="list-style-type: none"> • The French and Indian War
	Civics	<ul style="list-style-type: none"> • The United States and the World
	The Age of Jackson and Westward Expansion	<ul style="list-style-type: none"> • Political Conflict and Economic Crisis • Native Americans on the Frontier
	Reconstruction and Economic Growth	<ul style="list-style-type: none"> • Reconstruction and Southern Society
	The Progressive Era	<ul style="list-style-type: none"> • A New Wave of Immigration • Progress and Setbacks for Social Justice • A Changing American Culture
Media and its Influence		
5.4.8.D. Describe how mass media influences our view of international events.	Civics	<ul style="list-style-type: none"> • Public Opinion in a Democratic Society
How Foreign Policy is Influenced		
5.4.8.E. Intentionally Blank		
Economics		
6.1. Scarcity and Choice		
Scarcity and Choice		

Pennsylvania Academic Standards (2009) Social Studies: Grade 8	Social Studies 8 A/B	
	Unit Name	Lesson Name
6.1.8.A. Explain how limited resources and unlimited wants cause scarcity.	Society and Culture Before the Civil War	<ul style="list-style-type: none"> • The Industrial Revolution and Life in the North
	Economics Basics	<ul style="list-style-type: none"> • Scarcity and Choice • Market and Prices
Limited Resources		
6.1.8.B Compare decisions made because of limited resources and unlimited wants.	Economics Basics	<ul style="list-style-type: none"> • Scarcity and Choice
6.1.8.B Analyze the resources that are combined to create goods and services.	Economics Basics	<ul style="list-style-type: none"> • Distributing Goods and Services Extend the lesson to analyze the resources that are combined to create goods and services.
Opportunity Costs		
6.1.8.C. Compare choices to determine the best action.	Economics Basics	<ul style="list-style-type: none"> • Economic Decision Making • Incentives • Market and Prices
Incentives and Choice		
6.1.8.D. Compare the effect of incentives on personal decisions.	Economics Basics	<ul style="list-style-type: none"> • Economic Decision Making • Incentives
6.2. Markets and Economic Systems		
Goods and Services		
6.2.8.A. Describe the interaction of consumers and producers of goods and services in the state and national economy.	Economics Basics	<ul style="list-style-type: none"> • Trade • Specialization • Competition in Markets Extend the lessons to describe the interaction of consumers and producers of goods and services in the state and national economy.
Market Competition		
6.2.8.B. Identify positive and negative effects of market competition.	Economics Basics	<ul style="list-style-type: none"> • Trade • Market and Prices • Competition in Markets
Advertising and Media		
6.2.8.C. Explain how advertising influences economic decisions.	Economics Basics	<ul style="list-style-type: none"> • Incentives Extend the lesson to explain how advertising influences economic decisions.
Price Determination		
6.2.8.D. Explain the effects that changes in price have on buyers and sellers.	Society and Culture Before the Civil War	<ul style="list-style-type: none"> • The Industrial Revolution and Life in the North
	Economics Basics	<ul style="list-style-type: none"> • Distributing Goods and Services • Incentives • Market and Prices • Role of Prices
Economic Health		

Pennsylvania Academic Standards (2009) Social Studies: Grade 8	Social Studies 8 A/B	
	Unit Name	Lesson Name
6.2.8.E. Compare the state of the current economy with the economy in a different time or place.	Building on Economics Basics	<ul style="list-style-type: none"> Economic Changes Unemployment and Inflation Incorporate and assign an activity to the lessons to compare the state of the current economy with the economy in a different time or place.
Private Economic Institutions		
6.2.8.F. Analyze the functions of private economic institutions in the national economy.	The Age of Jackson and Westward Expansion	<ul style="list-style-type: none"> Political Conflict and Economic Crisis
	Reconstruction and Economic Growth	<ul style="list-style-type: none"> Industry and Corporations
	Economics Basics	<ul style="list-style-type: none"> Economic Institutions
	Building on Economics Basics	<ul style="list-style-type: none"> Personal Finance
Economic Systems		
6.2.8.G. Examine how various economic systems address the three basic questions.	Economics Basics	<ul style="list-style-type: none"> Distributing Goods and Services Extend the lesson to examine how various economic systems address the three basic questions: What to produce? How? For whom?
<ul style="list-style-type: none"> What to produce? How? For whom? 		
6.3. Functions of Government		
Goods and Services		
6.3.8.A. Assess the value of public goods and services.	Building on Economics Basics	<ul style="list-style-type: none"> Government's Role in the Economy Extend the lesson to assess the value of public goods and services.
Government Involvement in the Economy		
6.3.8.B. Predict how changes to government involvement at the state and national levels may affect the economy.	The Age of Jackson and Westward Expansion	<ul style="list-style-type: none"> Political Conflict and Economic Crisis Extend the lesson to predict how changes to government involvement at the state and national levels may affect the economy.
	Reconstruction and Economic Growth	<ul style="list-style-type: none"> Reconstruction and Southern Society The Aftermath of the Reconstruction Mining, Railroads, and the Economy Western Agriculture Hardship for Native Americans Industry and Corporations The Labor Movement New Technologies
	Economics Basics	<ul style="list-style-type: none"> Distributing Goods and Services Trade Specialization Market and Prices Role of Prices Competition in Markets Economic Institutions
	Building on Economics Basics	<ul style="list-style-type: none"> Government's Role in the Economy

Pennsylvania Academic Standards (2009) Social Studies: Grade 8	Social Studies 8 A/B	
	Unit Name	Lesson Name
Taxation		
6.3.8.C. Compare and contrast the effects of different taxation policies.	Reconstruction and Economic Growth	<ul style="list-style-type: none"> • Reconstruction and Southern Society
	Building on Economics Basics	<ul style="list-style-type: none"> • Government's Role in the Economy Extend the lesson to compare and contrast the effects of different taxation policies.
Government's Role in International Trade		
6.3.8.D. Explain how government actions may affect international trade.	A Constitution for the United States	<ul style="list-style-type: none"> • A Weak Confederation
	Civics	<ul style="list-style-type: none"> • The United States and the World
	The Early Republic	<ul style="list-style-type: none"> • Washington's Presidency • Jefferson's Presidency • Madison and the War of 1812 • Monroe's Presidency
	Reconstruction and Economic Growth	<ul style="list-style-type: none"> • Mining, Railroads, and the Economy • Western Agriculture • Hardship for Native Americans • Industry and Corporations • The Labor Movement • New Technologies
	Economics Basics	<ul style="list-style-type: none"> • Trade • Specialization • Role of Prices • Competition in Markets • Economic Institutions
	Building on Economics Basics	<ul style="list-style-type: none"> • Government's Role in the Economy • Economic Changes
6.4. Economic Interdependence		
Specialization		
6.4.8.A. Explain how specialization contributes to economic interdependence on a national level.	Economics Basics	<ul style="list-style-type: none"> • Specialization
	Building on Economics Basics	<ul style="list-style-type: none"> • Economic Changes
Trade		
6.4.8.B. Compare the standard of living in different times and places.	Building on Economics Basics	<ul style="list-style-type: none"> • Unemployment and Inflation
Multinational and Non-Governmental Organizations		
6.4.8.C. Explain the influence of multinational corporations and other non-government organizations.	Reconstruction and Economic Growth	<ul style="list-style-type: none"> • Industry and Corporations
	Economics Basics	<ul style="list-style-type: none"> • Economic Institutions
	Building on Economics Basics	<ul style="list-style-type: none"> • Government's Role in the Economy • Business and Investing
Factors Contributing to Economic Interdependence		
	Civics	<ul style="list-style-type: none"> • The United States and the World

Pennsylvania Academic Standards (2009) Social Studies: Grade 8	Social Studies 8 A/B	
	Unit Name	Lesson Name
6.4.8.D. Explain how the level of transportation, communication networks, and technology affect economic interdependence.	The Age of Jackson and Westward Expansion	<ul style="list-style-type: none"> • Political Conflict and Economic Crisis • Native Americans on the Frontier • Westward Movement • Manifest Destiny in California and the Southwest
	Reconstruction and Economic Growth	<ul style="list-style-type: none"> • The Aftermath of Reconstruction • Mining, Railroads, and the Economy • Western Agriculture • Hardship for Native Americans • Industry and Corporations • The Labor Movement • New Technologies
	The Progressive Era	<ul style="list-style-type: none"> • Urbanization
	Economics Basics	<ul style="list-style-type: none"> • Trade • Specialization • Market and Prices • Role of Prices • Competition in Markets • Economic Institutions
	Building on Economics Basics	<ul style="list-style-type: none"> • Government's Role in the Economy • Economic Changes
6.5. Income, Profit, and Wealth		
Factors Influencing Wages		
6.5.8.A. Examine the compensation of workers who produce different goods and provide different services.	Building on Economics Basics	<ul style="list-style-type: none"> • Income
Labor Productivity		
6.5.8.B. Compare the characteristics of productive workers with less productive workers.	Building on Economics Basics	<ul style="list-style-type: none"> • Productivity and Growth Extend the lesson to compare the characteristics of productive workers with less productive workers.
Types of Businesses		
6.5.8.C. Explain the organization of different types of businesses.	Incorporate and assign an activity to explain the organization of different types of businesses.	
Profits and Losses		
6.5.8.D. Compare the risks and rewards of specific business actions.	Economics Basics	<ul style="list-style-type: none"> • Competition in Markets • Economic Institutions
	Building on Economics Basics	<ul style="list-style-type: none"> • Entrepreneurship
Distribution of Wealth		
6.5.8.E. Identify wealth within and among political divisions in Pennsylvania.	Incorporate and assign an activity to identify wealth within and among political divisions in Pennsylvania.	
Entrepreneurship		
6.5.8.F. Explain the role of entrepreneurship across the nation	Building on Economics Basics	<ul style="list-style-type: none"> • Entrepreneurship
Costs and Benefits of Saving		
6.5.8.G.	Economics Basics	<ul style="list-style-type: none"> • Economic Decision Making

Pennsylvania Academic Standards (2009) Social Studies: Grade 8	Social Studies 8 A/B	
	Unit Name	Lesson Name
6.5.8.G Identify the costs and benefits of various financial tools available to savers.	Building on Economics Basics	<ul style="list-style-type: none"> • Interest Rates • Personal Finance
Interest Rates		
6.5.8.H. Identify the effect of higher and lower interest rates.	Building on Economics Basics	<ul style="list-style-type: none"> • Interest Rates
Geography		
7.1. Basic Geographic Literacy		
Geographic Tools		
7.1.8.A. Explain and illustrate how geographic tools are used to organize and interpret information about people, places, and environments.	The Early Republic	<ul style="list-style-type: none"> • Jefferson's Presidency • Madison and the War of 1812
	The Age of Jackson and Westward Expansion	<ul style="list-style-type: none"> • Native Americans and the Frontier

<ul style="list-style-type: none"> • United States Constitution • Bill of Rights • Pennsylvania Constitution 	The Judicial Branch	<ul style="list-style-type: none"> • The Judicial Branch - An Overview • Supreme Court's Protections • Supreme Court on Religious Freedom • Supreme Court on Speech and Press • Supreme Court on Petition and Assembly
	The Constitution and Civil Liberties	<ul style="list-style-type: none"> • Rationale of the Constitutional Structure • The Unalienable Rights • The Supreme Court and Competing Rights • Freedom of Petition and Assembly • Comparing States and US Constitutions
Individual Rights		
5.1.C.E. Analyze and assess the rights of people as written in the PA Constitution and the US Constitution.	The Judicial Branch	<ul style="list-style-type: none"> • Supreme Court's Protections • A Judicial Opinion
	The Constitution and Civil Liberties	<ul style="list-style-type: none"> • Rationale of the Constitutional Structure • The Unalienable Rights • Freedom of Speech • Freedom of Religion • Freedom of the Press • Freedom of Petition and Assembly • Due Process of Law • Rights of Accused • Comparing States and US Constitutions
	Civil Rights and Citizenship	<ul style="list-style-type: none"> • Racial Discrimination • Segregation and Jim Crow Laws • Federal Civil Rights Laws
Symbols		
5.1.C.F. Analyze the role political symbols play in civil disobedience and patriotic activities.	Foundations of American Government	<ul style="list-style-type: none"> • The Road to Revolution
	The Judicial Branch	<ul style="list-style-type: none"> • Supreme Court on Speech and Press • Supreme Court on Petition and Assembly
	Civil Rights and Citizenship	<ul style="list-style-type: none"> • Racial Discrimination • Segregation and Jim Crow Laws • Federal Civil Rights Laws
	State and Local Governments	<ul style="list-style-type: none"> • The 50 States - Sovereignty and Culture
5.2. Rights and Responsibilities of Citizenship		
Civics Rights and Responsibilities		
	Foundations of American Government	<ul style="list-style-type: none"> • More Than a Label - American Citizenship • Citizenship and the Constitution
	The Legislative Branch	<ul style="list-style-type: none"> • Taking Civic Action
	The Judicial Branch	<ul style="list-style-type: none"> • Supreme Court's Protections • Supreme Court on Speech and Press • Supreme Court on Petition and Assembly

Pennsylvania Academic Standards (2009) Social Studies: Civics and Government	American Government A/B	
	Unit Name	Lesson Name
5.2.C.A. Contrast the rights and responsibilities of a citizen in a democracy with a citizen in an authoritarian system.	The Constitution and Civil Liberties	<ul style="list-style-type: none"> • The Unalienable Rights • The Supreme Court and Competing Rights • The Supreme Court and Competing Rights • Freedom of Speech • Freedom of Religion • Freedom of the Press • Freedom of Petition and Assembly • Due Process of Law • Rights of Accused
	Civil Rights and Citizenship	<ul style="list-style-type: none"> • American Citizenship
Conflict and Resolution		
5.2.C.B. Analyze strategies used to resolve conflicts in society and government.	The Judicial Branch	<ul style="list-style-type: none"> • The Supreme Court • Supreme Court's Protections • Supreme Court on Speech and Press • Supreme Court on Petition and Assembly
	Comparative Government and Economic Systems	<ul style="list-style-type: none"> • Governmental Systems • US Foreign Policy Goals
	The Constitution and Civil Liberties	<ul style="list-style-type: none"> • The Need for Constitution • Rationale of the Constitutional Structure • The Six Organizing Principles of the Constitution • The Amendment Process
Leadership and Public Service		
5.2.C.C. Evaluate political leadership and public service in a republican form of government.	Civil Rights and Citizenship	<ul style="list-style-type: none"> • Good Citizenship
Competent and Responsible Citizens		
5.2.C.D. Evaluate and demonstrate what makes competent and responsible citizens.	Foundations of American Government	<ul style="list-style-type: none"> • Citizenship and the Constitution
	Civil Rights and Citizenship	<ul style="list-style-type: none"> • American Citizenship • Good Citizenship
5.3. How Government Works		
Branches of Government		
5.3.C.A. Examine the process of checks and balances among the three branches of government	The Legislative Branch	<ul style="list-style-type: none"> • Powers of Congress - An Overview • Expressed Powers - Money and Commerce • Expressed Powers - Foreign and Domestic Affairs • Nonlegislative Powers of Congress
	The Executive Branch	<ul style="list-style-type: none"> • The Executive Branch - An Overview • The American Presidency • Executive Powers

Pennsylvania Academic Standards (2009) Social Studies: Civics and Government	American Government A/B	
	Unit Name	Lesson Name
Examine the process of checks and balances among the three branches of government, including the creation of law.	The Judicial Branch	<ul style="list-style-type: none"> • The Judicial Branch - An Overview • The Federal Court System • The Supreme Court • Supreme Court's Protections • A Judicial Opinion
	The Constitution and Civil Liberties	<ul style="list-style-type: none"> • The Six Organizing Principles of the Constitution • The Supreme Court and Competing Rights
Structure, Organization, and Operation of Governments		
5.3.C.B. Analyze the roles of local, state, and national governments in policy-making.	Foundations of American Government	<ul style="list-style-type: none"> • The Executive Branch - An Overview • The American Presidency
	The Legislative Branch	<ul style="list-style-type: none"> • The Legislative Branch - An Overview
	The Executive Branch	<ul style="list-style-type: none"> • The Executive Branch - An Overview • The American Presidency • Executive Powers • The Executive Office of the President • Executive Departments
	The Judicial Branch	<ul style="list-style-type: none"> • The Judicial Branch - An Overview • Supreme Court's Protections • Supreme Court on Religious Freedom • Supreme Court on Speech and Press • Supreme Court on Petition and Assembly • A Judicial Opinion
	State and Local Governments	<ul style="list-style-type: none"> • States' Rights • State Constitutions • State Legislatures • The Governor and State Administration • The State Judiciary • State Courts and Judges • Counties, Towns, and Townships • Cities and Metropolitan Areas • Education and Public Welfare • Public Safety, Highways, and Other Services • Sound Taxation • Financing State and Local Government • Create an Action Plan
Government Services		

Pennsylvania Academic Standards (2009) Social Studies: Civics and Government	American Government A/B	
	Unit Name	Lesson Name
5.3.C.C. Explain how government agencies create, amend, and enforce policies in local, state, and national governments.	The Legislative Branch	<ul style="list-style-type: none"> • Expressed Powers - Money and Commerce • Expressed Powers - Foreign and Domestic Affairs • The Implied Powers
	The Executive Branch	<ul style="list-style-type: none"> • The Executive Branch - An Overview • Executive Powers • The Executive Office of the President • Executive Departments • National Security and Defense
	The Judicial Branch	<ul style="list-style-type: none"> • Supreme Court's Protections • Supreme Court on Religious Freedom • Supreme Court on Speech and Press • Supreme Court on Petition and Assembly
	State and Local Governments	<ul style="list-style-type: none"> • States' Rights • State Constitutions • State Legislatures • The Governor and State Administration • The State Judiciary • State Courts and Judges • Counties, Towns, and Townships • Cities and Metropolitan Areas • Education and Public Welfare • Public Safety, Highways, and Other Services • Sound Taxation • Financing State and Local Government
Leadership and Political Elections		
5.3.C.D. Evaluate the roles of political parties, interest groups, and mass media in politics and public policy.	The Executive Branch	<ul style="list-style-type: none"> • Choosing a Side - The Political Machine
	The Judicial Branch	<ul style="list-style-type: none"> • Supreme Court on Speech and Press
	The Constitution and Civil Liberties	<ul style="list-style-type: none"> • Freedom of Speech • Freedom of the Press
	Civil Rights and Citizenship	<ul style="list-style-type: none"> • Good Citizenship • Collective Action and Interest Groups • Political Party Influence • The Power of Media
Elements of the Election Process		
	The Legislative Branch	<ul style="list-style-type: none"> • The House of Representatives - The Lower Chamber • The Senate - The Upper Chamber Extend the lessons to compare and contrast the different election processes for national offices.
	The Executive Branch	<ul style="list-style-type: none"> • Choosing a Side - The Political Machine

Pennsylvania Academic Standards (2009) Social Studies: Civics and Government	American Government A/B	
	Unit Name	Lesson Name
5.3.C.E. Compare and contrast the different election processes for local, state, and national offices.	The Judicial Branch	<ul style="list-style-type: none"> • The Federal Court System
	Civil Rights and Citizenship	<ul style="list-style-type: none"> • Collective Action and Interest Groups • Political Party Influence
	State and Local Governments	<ul style="list-style-type: none"> • State Legislatures • The State Judiciary • State Courts and Judges <p>Extend the lesson State Legislatures to compare and contrast the different election processes for local and state offices.</p>
Conflict and the Court System		
5.3.C.F. Explain the Supreme Court’s role in interpreting the U.S. Constitution. <ul style="list-style-type: none"> • Individual rights • States’ rights • Civil rights 	The Legislative Branch	<ul style="list-style-type: none"> • The Implied Powers of Congress
	The Judicial Branch	<ul style="list-style-type: none"> • The Judicial Branch - An Overview • The Federal Court System • The Supreme Court • Supreme Court’s Protections • Supreme Court on Religious Freedom • Supreme Court on Speech and Press • Supreme Court on Petition and Assembly • A Judicial Opinion
	The Constitution and Civil Liberties	<ul style="list-style-type: none"> • The Unalienable Rights • The Supreme Court and Competing Rights • Freedom of Speech • Freedom of Religion • Freedom of the Press • Freedom of Petition and Assembly • Due Process of Law • Rights of Accused
	Civil Rights and Citizenship	<ul style="list-style-type: none"> • American Diversity • Racial Discrimination • Discrimination Against Women • Equal Protection Under the Law • Segregation and the Jim Crow Laws • Federal Civil Rights Laws • American Citizenship • A Nation of Immigrants

Pennsylvania Academic Standards (2009) Social Studies: Civics and Government	American Government A/B	
	Unit Name	Lesson Name
	State and Local Governments	<ul style="list-style-type: none"> • States' Rights • State Constitutions • State Legislatures • The Governor and State Administration • The State Judiciary • State Courts and Judges • Counties, Towns, and Townships • Cities and Metropolitan Areas • Education and Public Welfare • Public Safety, Highways, and Other Services • Sound Taxation • Financing State and Local Government • Create an Action Plan
Interest Groups		
5.3.C.G. Analyze the influence of interest groups in the political process.	The Legislative Branch	• Nonlegislative Powers of Congress
	Civil Rights and Citizenship	• Good Citizenship • Collective Action and Interest Groups
Media Influences		
5.3.C.H. Evaluate the role of mass media in setting public agenda and influencing political life.	The Judicial Branch	• Supreme Court on Speech and Press
	The Constitution and Civil Liberties	• Freedom of Speech • Freedom of the Press
	Civil Rights and Citizenship	• The Power of Media Extend the lesson to evaluate the role of mass media in setting public agenda and influencing political life.
Taxes		
5.3.C.I. Explain various types of taxes and their purposes.	State and Local Governments	• Sound Taxation • Financing State and Local Government Extend the lesson Sound Taxation to explain various types of taxes and their purpose.
Systems of Government		
5.3.C.J. Intentionally Blank		
5.4. How International Relationships Function		
Countries and Conflicts		
5.4.C.A.	The Executive Branch	• American Foreign Policy • National Security and Defense • Diplomacy and the State Department

Pennsylvania Academic Standards (2009) Social Studies: Civics and Government	American Government A/B	
	Unit Name	Lesson Name
Explain how United States foreign policy is developed.	Comparative Government and Economic Systems	<ul style="list-style-type: none"> • US Global Economy and Trade • Governmental Systems • US Foreign Policy Goals
Tools of Foreign Policy		
5.4.C.B. Explain why and how different foreign policy tools are used to advance a nation’s self interest (e.g., diplomacy, economic aid, military aid, sanctions, treaties).	The Executive Branch	<ul style="list-style-type: none"> • The Executive Office of the President • American Foreign Policy • National Security and Defense • Diplomacy and the State Department
	Comparative Government and Economic Systems	<ul style="list-style-type: none"> • US Global Economy and Trade • Governmental Systems • United Kingdom - History and Government • United Kingdom - Comparison to the United States • Russia - History and Government • Russia - Comparison to the United States • China - History and Government • China - Comparison to the United State • US Foreign Policy Goals
International Organizations

Media and its Influence		
5.4.W.D. Intentionally Blank		
How Foreign Policy is Influenced		
5.4.W.E. Intentionally Blank		
Economics		
6.1. Scarcity and Choice		
Scarcity and Choice		
6.1.W.A. Analyze how choices are made because of scarcity.	The World Today Part II	• Globalization and Trade
Limited Resources		
	Ancient Greece	<ul style="list-style-type: none"> • Early Greece • The Greek City-States • Greek Thinkers, Artists, Writers, and Leaders

Pennsylvania Academic Standards (2009) Social Studies: World History 1450-Present	World History A/B	
	Unit Name	Lesson Name
6.1.W.B. Analyze how conflict and cooperation among groups and organizations have impacted the control of limited resources in the world.	Ancient Rome	<ul style="list-style-type: none"> • The Roman Republic • The Roman Empire: Rise and Fall • The Legacy of Rome • The Origins of Christianity
	New Global Connections	<ul style="list-style-type: none"> • Europeans Explore Overseas • Europeans Gain Footholds in Asia • European Conquests and Colonies • The Slave Trade and Its Impact on Africa • Effects of Global Contact
	The Age of Imperialism	<ul style="list-style-type: none"> • The New Imperialism • European Colonies in Africa • The Americas in the Age of Imperialism
	The World Between Wars	<ul style="list-style-type: none"> • Latin America, Africa, and the Middle East • India Seeks Self-Rule • New Forces in China and Japan • The West After World War I • Dictators in Italy and the Soviet Union • The Rise of Nazi Germany
	World War II	<ul style="list-style-type: none"> • Aggression, Appeasement, and War • Axis Powers Advance • The Holocaust • The Allies Turn the Tide • Victory for the Allies
	New Nations Emerge	<ul style="list-style-type: none"> • The Modern Middle East Takes Shape
Opportunity Costs		
6.1.W.C. Analyze the opportunity cost of decisions made by individuals, businesses, communities, and nations.	Incorporate and assign an activity to analyze the opportunity cost of decisions made by individuals, businesses, communities, and nations.	
Incentives and Choice		
6.1.W.D. Intentionally Blank		
6.2. Markets and Economic Systems		
Goods and Services		
6.2.W.A. Evaluate the flow of goods and services in an international economy.	New Global Connections	<ul style="list-style-type: none"> • Europeans Explore Overseas • Europeans Gain Footholds in Asia • European Conquests and Colonies • The Slave Trade and Its Impact on Africa • Effects of Global Contact
	New Nations Emerge	<ul style="list-style-type: none"> • The Modern Middle East Takes Shape
	The World Today Part I	<ul style="list-style-type: none"> • Challenges of Development • Rapid Development in China and India • Latin American Nations Move Toward Democracy • The Industrialized World

Pennsylvania Academic Standards (2009) Social Studies: World History 1450-Present	World History A/B	
	Unit Name	Lesson Name
	The World Today Part II	<ul style="list-style-type: none"> • Globalization and Trade • Modern Issues in International Society • Advances in Science and Technology
Market Competition		
6.2.W.B. Intentionally Blank		
Advertising and Media		
6.2.W.C. Evaluate the impact of advertising and media on individual and group behavior throughout world history.	World War I	<ul style="list-style-type: none"> • World War I Ends
	The World Between the Wars	<ul style="list-style-type: none"> • Dictators in Italy and the Soviet Union • The Rise of Nazi Germany
Price Determination		
6.2.W.D. Explain how the laws of supply and demand impacted individuals and groups behavior over time.	Medieval Christian Europe, Part II	<ul style="list-style-type: none"> • The Late Middle Ages: A Time of Upheaval
	New Global Connections	<ul style="list-style-type: none"> • Europeans Explore Overseas • Europeans Gain Footholds in Asia • European Conquests and Colonies • The Slave Trade and Its Impact on Africa • Effects of Global Contact
	The Industrial Revolution	<ul style="list-style-type: none"> • The First Industrial Revolution • The Second Industrial Revolution • The Changing Ways of Life and Thought
	New Nations Emerge	<ul style="list-style-type: none"> • New Nations in South Asia and Southeast Asia
Economic Health		
6.2.W.E. Analyze the impact of the business cycle on individual and group behavior over time.	Incorporate and assign an activity to analyze the impact of the business cycle on individual and group behavior over time.	
6.2.W.E. Analyze the characteristics of economic expansion, recession, and depression.	Ancient Rome	<ul style="list-style-type: none"> • The Roman Empire: Rise and Fall
	The World Between Wars	<ul style="list-style-type: none"> • The West After World War I • Dictators in Italy and the Soviet Union
	The Cold War Era	<ul style="list-style-type: none"> • The Western Democracies and Japan Extend the lesson to analyze the characteristics of economic recession.
Private Economic Institutions		
6.2.W.F. Analyze the impact of private economic institutions on individuals and groups over time.	Incorporate and assign an activity to analyze the impact of private economic institutions on individuals and groups over time.	
Economic Systems		
6.2.W.G.	Medieval Christian Europe, Part I	<ul style="list-style-type: none"> • The Early Middle Ages • Feudalism and the Manor Economy • The Medieval Christian Church and Crusades • The Feudal Monarchs and the Church
	New Global Connections	<ul style="list-style-type: none"> • Europeans Explore Overseas • Europeans Gain Footholds in Asia • European Conquests and Colonies • The Slave Trade and Its Impact on Africa • Effects of Global Contact

Pennsylvania Academic Standards (2009) Social Studies: World History 1450-Present	World History A/B	
	Unit Name	Lesson Name
6.2.W.C. Compare and contrast various economic systems.	Absolutism and Revolution	<ul style="list-style-type: none"> • Triumph in England and the Enlightenment
	The Industrial Revolution	<ul style="list-style-type: none"> • The First Industrial Revolution • The Second Industrial Revolution • The Changing Ways of Life and Thought

NCAA INFORMATION

This appendix includes the following:

- NCAA Approved Course List

NCAA Approved Course List

FOR 2022-23

The following courses, organized by subject area, have been approved by the NCAA Eligibility Center for use toward initial eligibility when delivered by Pearson Virtual School teachers using Pearson's EMS platform. Pennwood Cyber Charter School (Pennwood) will be included in the Pearson-affiliated school "district" for NCAA purposes, which will entitle students to receive access to high school courses that meet the NCAA Eligibility as long as Pennwood meets the Pearson NCAA criteria and delivers courses and instruction in compliance with the NCAA Guidelines for Pearson-affiliated Schools (both criteria and Guidelines found here: <https://www.connexus.com/library/launch.aspx?id=80237>).

Note that not all courses may be available at all locations, and there may be slight variations between your state's course naming convention and the name of the course listed on the [NCAA Eligibility Center High School Portal](#).

DRAFT SPECIAL EDUCATION PROCEDURES, POLICIES, AND PROSPECTIVE PROVIDERS

This appendix includes the following:

- Draft Special Education Procedures
- Draft Special Education Policies
- Prospective Providers

These are draft policies provided to the Board of Trustees by Board Counsel and our partner, Pearson. These will be used as the basis of school policies and are subject to modification by the Board of Trustees.

If the charter application is approved, these will be modified to reflect Pennwood Cyber Charter School's mission and vision and compliance with all Pennsylvania laws and regulations.

To the extent that anything in these policies could be construed to conflict with state and/or federal law, the applicable state and/or federal laws control. These policies are not intended to conflict with charter requirements.

Introduction

Pennwood Cyber Charter School (Pennwood) is committed to creating an environment of learning while remaining compliant with Federal and Pennsylvania state special education procedures. As such, Pennwood has aligned the school's Special Education Procedures with Title 22 Pa. Code *Chapter 711: Charter School and Cyber Charter School Services and Programs for Children with Disabilities* and the Individuals with Disabilities Education Act. Some language in this document is taken directly from Chapter 711.

Chapter 711

§ 711.2. Purposes and Intent

Pennwood will meet its obligation to ensure the school complies with IDEA and its implementing regulations in 34 CFR Part 300 (relating to assistance to states for the education of children with disabilities), and Section 504 and its implementing regulations in 34 CFR Part 104 (relating to nondiscrimination on the basis of handicap in programs and activities receiving federal financial assistance). This chapter does not prevent Pennwood and a school district from entering into agreements regarding the provision of services and programs to comply with this chapter, whether or not the agreements involve payment for the services and programs by the cyber charter school. Pennwood is exempt from Chapter 14 (relating to special education services and programs). Children with disabilities will have access to the general curriculum, and participate in State and local assessments as established and described in Chapter 4 (relating to academic standards and assessment) at Pennwood. Pennwood will utilize prereferral intervention strategies, in accordance with 34 CFR 300.226 (relating to early intervening services) and as outlined in § 711.23(c) (relating to screening) to promote students' success in the general education environment.

§ 711.3. Incorporation of Federal Regulations

Pennwood will assume the duty to ensure that a free and public education (FAPE) is available to a child with a disability in compliance with IDEA and its implementing regulations in 34 CFR Part 300 (relating to assistance to states for the education of children with disabilities) and section 504 and its implementing regulations in 34 CFR Part 104 (relating to nondiscrimination on the basis of handicap in programs and activities receiving federal financial assistance). The requirements of 34 CFR Part 300 as published at 71 FR 46540—46845 (August 14, 2006), amended at 73 FR 73006—73029 (December 1, 2008) are incorporated by reference, as follows:

- (1) 34 CFR 300.4—300.8(a) and (c) (relating to act; assistive technology device; assistive technology service; charter school; and child with a disability).
- (2) 34 CFR 300.9—300.15 (relating to consent; core academic subjects; day; business day; school day; educational service agency; elementary school; equipment; and evaluation).
- (3) 34 CFR 300.17—300.19 (relating to free appropriate public education; highly qualified special education teachers; and homeless children).
- (4) 34 CFR 300.22 and 300.23 (relating to individualized education program; and individualized education program team).
- (5) 34 CFR 300.27—300.30 (relating to limited English proficient; local educational agency; native language; and parent).

- (6) 34 CFR 300.32—300.37 (relating to personally identifiable; public agency; related services; scientifically based research; and secondary school).
- (7) 34 CFR 300.39 (relating to special education).
- (8) 34 CFR 300.41—300.45 (relating to State educational agency; supplementary aids and services; transition services; universal design; and ward of the state).
- (9) 34 CFR 300.101 and 34 CFR 300.102 (relating to free appropriate public education (FAPE); and limitation—exception to FAPE for certain ages).
- (10) 34 CFR 300.104—300.108 (relating to residential placement; assistive technology; extended school year services; nonacademic services; and physical education).
- (11) 34 CFR 300.113 and 300.114(a)(2) (relating to routine checking of hearing aids and external components of surgically implanted medical devices; and LRE requirements).
- (12) 34 CFR 300.115—300.117 (relating to continuum of alternative placements; placements; and nonacademic settings).
- (13) 34 CFR 300.122 (relating to evaluation).
- (14) 34 CFR 300.148 (relating to placement of children by parents when FAPE is at issue).
- (15) 34 CFR 300.160 (relating to participation in assessments).
- (16) 34 CFR 300.172 (relating to access to instructional materials).
- (17) 34 CFR 300.174 (relating to prohibition on mandatory medication).
- (18) 34 CFR 300.207 (relating to personnel development).
- (19) 34 CFR 300.210—300.213 (relating to purchase of instructional materials; information for SEA; public information; and records regarding migratory children with disabilities).
- (20) 34 CFR 300.226 (relating to early intervening services).
- (21) 34 CFR 300.300 and 300.301 (relating to parental consent; and initial evaluations).
- (22) 34 CFR 300.302—300.307(a)(1)(2) and (b) (relating to screening for instructional purposes is not evaluation; reevaluations; evaluation procedures; additional requirements for evaluations and reevaluations; determination of eligibility; and specific learning disabilities).
- (23) 34 CFR 300.308—300.311 (relating to additional group members; determining the existence of a specific learning disability; observation; and specific documentation for the eligibility determination).
- (24) 34 CFR 300.320—300.325 (relating to definition of individualized education program; IEP Team; parent participation; when IEPs must be in effect; development, review, and revision of IEP; and private school placement by public agencies).
- (25) 34 CFR 300.327 and 300.328 (relating to educational placements; and alternative means of meeting participation).
- (26) 34 CFR 300.501—300.508 (relating to opportunity to examine records; parent participation in meetings; independent education evaluation; prior notice by the public agency, content of notice; procedural safeguards notice; electronic mail; mediation; filing a due process complaint; and due process complaint).

- (27) 34 CFR 300.510—300.516 (relating to resolution process; impartial due process hearing; hearing rights; hearing decisions; finality of decision; appeal; partial review; timelines and convenience of hearings and reviews; and civil action).
 - (28) 34 CFR 300.518(a), (b) and (d) and 300.519 (relating to child’s status during proceedings; and surrogate parents).
 - (29) 34 CFR 300.530—300.537 (relating to authority of school personnel; determination of setting; appeal; placement during appeals; protections for children not determined eligible for special education and related services; referral to and action by law enforcement and judicial authorities; change of placement because of disciplinary removals; and state enforcement mechanisms).
 - (30) 34 CFR 300.610—300.625 (relating to confidentiality; definitions; notice to parents; access rights; record of access; records on more than one child; list of types and locations of information; fees; amendment of records at parent request; opportunity for a hearing; result of hearing; hearing procedures; consent; safeguards; destruction of information; and children’s rights).
- (c) The requirements of 34 CFR Part 104 are incorporated by reference as follows:
- (1) 104.3(f), (h)—(j), (k)(2) and (1) (relating to definitions).
 - (2) 104.4—104.8, regarding discrimination prohibited; assurances required; remedial action; designation of responsible employee; and notice.
 - (3) 104.10 (relating to effect of state or local law or other requirements and effect of employment opportunities).
 - (4) 104.11 and 104.12 (relating to discrimination prohibited; and reasonable accommodation).
 - (5) 104.21—104.37, regarding accessibility.

§ 711.4. Supervision

Pennwood will provide general supervision of special education services and programs to ensure compliance with § 711.3 (relating to incorporation of Federal regulations). Pennwood will comply with IDEA in accordance with the policies and procedures in the Department’s IDEA grant application under 34 CFR 300.100 (relating to eligibility for assistance) and as approved by the United States Department of Education. Pennwood will:

- (1) Comply with the Department’s compliance monitoring requirements.
- (2) Provide the information requested by the Department.
- (3) Complete the corrective action required by the Department.

§ 711.5. Personnel

Pennwood will ensure the following appropriate certifications are required:

- Persons who provide special education or related services to children with disabilities at Pennwood will have appropriate certification, notwithstanding section 1724-A of the act (24 P. S. § 17-1724-A).

Educational Interpreters

An educational interpreter is an individual who provides students who are deaf or hard of hearing with interpreting or transliterating services in an educational setting. To serve as an educational interpreter at Pennwood, consistent with the Sign Language Interpreter/Transliterators State Registration Act (63 P. S. §

§ 1725.1—1725.12), an individual will meet the following qualifications:

- Achieve and provide evidence of a score of 3.5 on the Educational Interpreter Performance Assessment (EIPA) for the appropriate grade level to which the person has been assigned.
- Be a qualified sign language interpreter or qualified transliterator under the Sign Language Interpreter or Transliterators State Registration Act and its implementing regulations.
- Provide evidence of a minimum of 20 hours of staff development activities relating to interpreting or transliterating services annually.

(c) *Review of EIPA score.* The Department, in consultation with the State Board of Education will review the EIPA score requirement every two years.

Paraprofessionals

(1) An instructional paraprofessional employed by Pennwood will be a school employee who works under the direction of a certificated staff member to support and assist in providing instructional programs and services to students with disabilities. This support and assistance includes one-on-one or group review of material taught by certificated staff, classroom management and implementation of positive behavior support plans. Services may be provided in a special education class, regular education class or other instructional setting as provided in the student's IEP. Special education instructional paraprofessionals will meet one of the following qualifications:

- Have completed at least 2 years of postsecondary study.
- Possess an associate degree or higher.
- Meet a rigorous standard of quality as demonstrated through a State or local assessment.

(2) Nothing in subsection (a) should be construed to supersede the terms of a collective bargaining agreement in effect on July 1, 2008.

(3) Each school year, instructional paraprofessionals will provide evidence of 20 hours of staff development activities related to their assignment.

(4) A personal care assistant provides one-to-one support and assistance to a student, including support and assistance in the use of medical equipment (for example, augmentative communication devices; activities of daily living; and monitoring health and behavior). A personal care assistant may provide support to more than one student, but not at the same time. Personal care assistants will provide evidence of 20 hours of staff development activities related to their assignment each school year. The 20 hours of training may include training required by the school-based access program.

§ 711.6. Annual Report

Data Collection and Reporting for Special Education

Pennwood will follow the Pennsylvania Information Management System (PIMS) requirements and specifications and comply with Special Education Data Collection protocol. Templates will be submitted in the Special Education Domain as students enrolled in charter schools are reported by the charter school. The December Special Education Submission (Student template and special education snapshot) will include all special education students with a valid IEP as of 12/1 of the school year. The July Special Education submission (Student template and special education snapshot) will include all students that received special education services from July 1 through June 30 who exited at any time during the current school year.

The annual report required under section 1728-A(b) of the act (24 P. S. § 17-1728-A(b)) will include:

- The number of children with disabilities in special education.
- The services, programs, and resources being implemented by Pennwood.
- The services and programs utilized by Pennwood through contracting with another public agency, other organizations or individuals.
- The services and programs utilized by Pennwood through the assistance of an intermediate unit as prescribed under sections 1725-A(a)(4) and 1744-A(3) of the act (24 P. S. § § 17-1725-A(a)(4) and 1744-A(3)).
- Staff training in special education utilized by Pennwood through the PDE's training and technical assistance network and intermediate unit.

The annual report must include an assurance that Pennwood is in compliance with Federal laws and regulations governing children with disabilities and the requirements of this chapter.

The annual report must include the age and type of exceptionality for each enrolled child with a disability; the level of intervention provided to each child with a disability; certification of staff providing services to each child with a disability; and programs and services available to children with a disability.

§ 711.7. Enrollment

Pennwood will have an open enrollment policy: any eligible public school student in the Commonwealth of Pennsylvania can attend. The school will not discriminate in its admissions policies or practices on the basis of geography, intellectual or athletic ability, measures of achievement or aptitude, status as a student with a disability, test scores, disabilities, etc.

Pennwood will not deny enrollment or otherwise discriminate in its admission policies or practices on the basis of a child's disability or the child's need for special education or supplementary aids or services.

Pennwood will not discriminate in its admission policies or practices on the basis of intellectual ability. Admission criteria may not include measures of achievement or aptitude.

§ 711.8. Education Records

Confidentiality-The Family Educational Rights and Privacy Act (FERPA)

Pennwood recognizes the need to protect the confidentiality of personally identifiable information in the education records of children. Pennwood is prepared to ensure the privacy rights of eligible children in the collection, maintenance, release, and destruction of records. Pennwood will follow the provisions of the Regulations of the State Board of Education on Pupil Records (PA Code 22, Ch.12), the Family Educational Rights and Privacy Act of 1974 (FERPA), the Confidentiality Section of IDEA, and the Confidentiality Section of Pennsylvania Special Education Regulations and Standards.

Requests to View Files

A parent/guardian has the right to review the files of their child. The parent may also request and receive the following:

- An explanation of information in the student's education records.
- A copy of all or part of the student's education record (the cost of which will not exceed the costs of duplication).
- A list of the types and location of the student's education record collected, maintained, or utilized by the LEA.

Student Access Rights

When a student is 18 years of age or attending a postsecondary education institution, the right accorded to and consent required of a student's parent/guardian by law will only be accorded to and required of the student to the extent consistent with applicable federal and state laws and regulations.

Parent Access Rights

Surrogate Parent

As part of the IEP process, Pennwood recognizes a qualified adult must participate as the "parent" (34 CFR 300.30) for the student. A surrogate parent is someone who acts on the child's behalf in matters relating to the identification, evaluation, educational placement, and provision of FAPE to the child. A surrogate will be appointed and trained on how to participate and make decisions on the child's behalf in the following situations: a biological, adoptive, foster, parent, or guardian are not available; a grandparent or step parent with whom the child lives or a person who is legally responsible for the child is not available; the child is an unaccompanied homeless youth. See Surrogate Parent Board Policy.

Pennwood has a method in place to secure a surrogate when needed. When it is determined that a student is in need of a surrogate parent, the surrogate will be appointed within 30 calendar days. Pennwood will maintain a pool of trained parent surrogates and may collaborate with Intermediate Units (IUs) when additional surrogates are needed.

Pennwood will not allow the following persons to be appointed as a surrogate parent: employees of an agency already involved in the care or education of the student; school employees; persons with a potential conflict of interest.

A parent/guardian, eligible student, or designated representative will have access to the student's education records within 45 days of receipt of written request in order to inspect, review or copy education records. A parent/guardian also has the right to request and receive the following:

- An explanation of information in the student's education records.
- A copy of all or part of the student's education record. If copies are to be released to anyone other than the parent/guardian, the Consent to Release Information form must be completed by the parent/guardian.
- A list of the types and location of the student's education record collected, maintained, or utilized by the LEA.

Accessing Records

Pennwood will maintain a record indicating the names of those persons who have obtained access, the date of access, and the purpose of access. Administrators, teachers, instructional aides and the administrative assistant are authorized to have access to personally identifiable information.

The parent/guardian has the right to inspect the access record of their child's records.

Maintenance Records

The Director of Special Education will be responsible for ensuring that the education records, confidentiality rules, and education records policy for eligible children are enforced and administered. This official will:

- Annually notify parents/guardians and eligible students of this policy, its procedures, and their rights. The notification will be in their primary language unless it is not feasible to do so.
- Develop system of safeguards which will protect the confidentiality of personally identifiable information at the point of collection, storage, release and destruction.
- Be responsible for ensuring that all Pennwood faculty and subcontracted agency employees, who collect or use personally identifiable information, receive in-service training regarding the implementation of this policy. In-servicing will consist of providing, at the least, yearly presentation of the information to staff and subcontractors.

Third Party Access to Student Information

FERPA provisions allow the school to disclose certain student information to third parties, such as other schools, *without the prior written consent of the parent/legal guardian or Eligible Student*. This occurs in two situations: Directory Information and situations in which FERPA permits the school to release educational records without consent. All other disclosure of student information to third parties requires the written consent of the Caretaker or Eligible Student.

Release of Educational Records without Consent: Directory Information

The school may release Directory Information (defined by Pennwood as *student name, student WebMail address, state of residence, student telephone number, and student grade level*) to third parties as permitted by FERPA.

If the Caretaker or Eligible Student does **not** wish to have Directory Information released to third parties, s/he may prevent the release of this information by indicating so in the FERPA Directory Information section of the Student Information Form. If families do not make a selection, then the school may, without additional permission, disclose the Directory Information to third parties as permitted by FERPA.

Release of Educational records without Consent: Legitimate Educational Interest

Pennwood may provide a student's educational records to third parties in certain situations listed under FERPA. Examples include the transfer of educational records to the student's new school upon request from the new school, and the provision of educational records to school officials who possess a 'legitimate educational interest' in the student's records, and the provision of educational records to contracted parties providing special education related services.

Release of Student Records with Consent

With the exception of that information which FERPA and/or applicable state law or court order allows the school to release without consent, as noted above, Pennwood will obtain written consent from the Caretaker or Eligible Student prior to releasing any educational record or personally identifiable information to any third party. Consent to release this information must be made in writing, be signed by the Caretaker or Eligible Student, and include the following information:

- A specific description of the information or record(s) to be released.
- The party or agency to which the information will be released and their address.
- The signature of the requestor, and the date of the request.

When the educational records for a child with a disability are transferred from a public agency, private school, approved private school or private agency, to a charter school or cyber charter school, the public agency, private school, approved private school or private agency from which the child transferred will forward all of the child's educational records, including the most recent IEP, within 10 days after the public agency, private school, approved private school or private agency is notified in writing that the child is enrolled in Pennwood.

When the educational records for a child with a disability are transferred to a public agency, private school, approved private school or private agency from Pennwood, the school will forward the child's educational records, including the most recent IEP, within 10 school days after Pennwood is notified in writing that the child is enrolled at another public agency, private school, approved private school or private agency.

Pennwood will maintain educational records for children with disabilities consistent with the regulations for FERPA (20 U.S.C.A. § § 1221 note and 1232g) in 34 CFR Part 99 (relating to family educational rights and privacy).

§ 711.9. Payments

As a public school, Pennwood will comply with 22 PA. Code Chapter 711-Charter School and Cyber Charter School Services and Programs for Children with Disabilities and with the Individuals with Disabilities Education Improvement Act (IDEA), 20 U.S.C.A. §§ 1400 et.seq. and implementing regulations, including Section 300.209 of Title 34 of the Code of Federal Regulations, and Section 504 of the Rehabilitation Act of 1973, 29 U.S.C. 794 (sec. 504). Pennwood will provide a free appropriate public education (FAPE) to children with disabilities, including, but not limited to, identifying, evaluating, and planning educational

programs, and implementing placements in accordance with those Acts. Pennwood is prepared to serve as a Local Education Agency (LEA).

The child's school district of residence will provide the special education payments required by section 1725-A(a)(3) of the act (24 P. S. § 17-1725-A(a)(3)) to Pennwood either when:

- (1) A child with an IEP begins attending Pennwood.
- (2) Pennwood has identified an enrolled child as a child with a disability under IDEA, has developed an IEP for the child and notifies the district of residence of the identification.

When a child for whom Pennwood received the special education payment required under section 1725- A(a)(3) of the act enrolls in another public agency, private school or private agency, Pennwood will immediately inform the child's school district of residence that its payment responsibilities to Pennwood under section 1725-A(a)(3) of the act have ceased.

§ 711.10. Complaint Procedure

Procedural Safeguards Notice

Parents of children who receive or who may be eligible for special education services have rights under the IDEA. The Procedural Safeguards Notice provides a detailed explanation of those rights. Pennwood Cyber Charter School will give parents a copy of the Procedural Safeguards Notice and the explanatory Procedural Safeguards Letter at least once each school year. Parents can also obtain a copy of the Procedural Safeguards Notice from Pennwood Cyber Charter School at any time. An additional document is available to help parents to better understand the Notice document, *The Parents' Rights: Understanding the Procedural Safeguards Notice* provides a summary of those rights. Parents will also receive the Parents' Rights documents upon initial referral or upon the parents request for an evaluation and in accordance with discipline procedures when a change in placement occurs.

Pennwood Cyber Charter School will establish a complaint procedure consistent with 34 CFR 300.151—300.153 (relating to adoption of State complaint procedures; minimum State complaint procedures; and filing a complaint) and disseminate notice of that procedure.

IDENTIFICATION AND EVALUATION

§ 711.21. Child Find

Identifying Students and Child Find

As a cyber school in Pennsylvania, Pennwood is bound by the Child Find requirements of Chapter 711 of the Pennsylvania School Code, "Charter School and Cyber Charter School Services and Programs for Children with Disabilities," as well as the requirements of the Individuals with Disabilities Education Improvement Act (IDEA 2004), Section 504 of the Rehabilitation Act of 1973, and the Family Educational Rights and Privacy Act (FERPA). Pennwood's Director of Special Education will serve as the Child Find Coordinator and provide Child Find information to school staff, parents, and state and local organizations and agencies. These efforts will include compliance with the special education referral process, providing professional development to Pennwood staff and Student Support Team (SST), participating in the Multi-Tiered Systems of Support/Response to Intervention (MTSS/RTI) process, including universal screening procedures, creating and maintaining written policies, and procedures related to Child Find, and involvement in public awareness activities related to Child Find of implementation of students enrolled in Pennwood. See Child Find Board Policy.

School Professional Development Related to Child Find

The Director of Special Education and Student Support Team leader will provide the entire Pennwood staff with Child Find training and compliance progress updates. At the start of the school year, the staff will be provided information on documenting information received by parents regarding special education evaluation requests, including timelines and the importance of timeliness in responding and alerting the Pennwood special education team. Subsequent professional development for school staff will include how to interpret universal screening results, intervention processes and results, as well as measures of compliance with Pennsylvania Special Education Evaluation Timelines.

Written Policies and Public Awareness Related to Child Find

Pennwood's statement about Child Find will be accessible to the general public can be located on the general school public website as well as through banner messages on Caretaker homepages within Connexus. In addition, all families enrolled in Pennwood will receive Child Find information within the school newsletter, published on a semester basis. A link to the *Pennsylvania Parent Guide to Special Education for School-Age Children* will also be provided in all locations.

To enable the Commonwealth to meet its obligations under 34 CFR 300.111 (relating to child find), Pennwood will establish written policies and procedures to ensure that all children with disabilities who are enrolled in Pennwood, and who are in need of special education and related services, are identified, located and evaluated. Pennwood's written policy will include:

- (1) Public awareness activities sufficient to inform parents of children applying to or enrolled in the charter school or cyber charter school of available special education services and programs and how to request those services and programs. Written information will be published in the Pennwood handbook and web site.
- (2) Systematic screening activities that lead to the identification, location and evaluation of children with disabilities enrolled in Pennwood.

§ 711.22. Reevaluation

Reevaluation

Pennwood will remain in full compliance with regulations requiring triennial special education reevaluations to determine continued eligibility and need for special education services. Prior to conducting the reevaluation, the Pennwood IEP Team and other qualified professionals, as appropriate, will meet to discuss the need for reevaluation, review existing data, and determine additional data needed to best meet the needs of the student. The review of existing data will be documented in the Reevaluation Report (RR) form. If the team agrees that a reevaluation is needed, the school will then issue a Permission to Reevaluate-Consent (PTR-Consent) form to obtain signed parental consent for reevaluation. Pennwood will obtain parental consent to proceed with the reevaluation. Multiple attempts using varied communication methods will be used to receive parental consent.

Pennwood will complete all reevaluations within the 60 days of the receipt of signed parental consent, as required by Pennsylvania statute. Reevaluations will be conducted by a qualified examiner at a location proximate to the child. All evaluations conducted by Pennwood will take a child's English Language ability and disability into consideration. Once the evaluation is complete, Pennwood will provide parents with a copy of the report. A multidisciplinary team will then review the report to determine continued eligibility. Once a child is found to continue to need special education services, and the RR form is completed and provided to parents, an IEP team meeting is scheduled to develop the IEP.

If the team, including the parent, agrees that reevaluation is not necessary, the school provides the *Agreement to Waive Reevaluation* form to the parents, with reasons the reevaluation was waived. Parents must sign this form as an agreement to waive the evaluation. If parents disagree, the reevaluation must proceed. If at any time, the parent or school believes they need an assessment to benefit the child, the team can convene to discuss conducting a reevaluation. The only exception to the three-year reevaluation requirement involves students that have been identified as intellectually disabled, who must be reevaluated every two years.

If at any time, a parent believes that Pennwood's evaluation was not conducted properly, the parent has the right to request an Independent Education Evaluation (IEE). Pennwood will provide the IEE by an approved evaluator to the parent at Pennwood's expense. The IEE results will be taken into consideration when considering eligibility for special education. See Evaluation and Reevaluation Board Policy and IEE Board Policy and IEE Administrative Procedures.

Students who Enroll in Pennwood with an IEP

During enrollment families will be asked if their child has an IEP or 504 plan. Student enrollment will not be delayed during this inquiry. Parents may, but are not required to as a condition of enrollment, provide a copy of the documents or Pennwood will obtain the documents from the student's prior school. Pennwood will conduct IEP meetings within 30 days of enrollment for all new students to adopt the IEP, amend the IEP, or conduct an annual review. In addition to being active participants in the IEP team meetings, parents will be provided with Prior Written Notice detailing the decisions of the IEP team. See IEP Board Policy and Section 504 Board Policy.

The parent or teacher of a child with a disability has the right under 34 CFR Part 300.303(b) (relating to reevaluations) to request a reevaluation annually. More frequent reevaluations may only occur if the parent and Pennwood agree. In addition to the requirements incorporated by reference in 34 CFR 300.303 (relating to reevaluation), reevaluation time line will be 60 calendar days, except that the calendar days from the day after the last day of the spring school term up to and including the day before the first day of the subsequent fall school term will not be counted. Pennwood will reevaluate students with disabilities at least once every three years. Children with disabilities who are identified as intellectually disabled will be reevaluated at least once every two years.

§ 711.23. Screening

Participation in the Multi-Tiered Systems of Support/Response to Intervention (MTSS/RTI) Team

Special education will be represented in Pennwood's MTSS/RTI process, providing guidance to the team on specific instructional and behavioral approaches for students. The special education team will ensure that students are referred for special education in a timely manner, engaging parents in the process. The team will verify that the struggling student has received appropriate instruction and that the student's difficulties are not related to Limited English Proficiency. Data related to academic achievement, behavior concerns, intervention results, and academic progress will also be reviewed.

Universal Screening

Pennwood will administer universal screening instruments that include the Pennsylvania Classroom Diagnostic Tools (CDT), which are online assessments designed to provide teachers with valuable diagnostic information to guide and differentiate instruction. The CDT reports provide a snapshot of how students are performing in relation to the Standards Aligned System (SAS) and help identify student academic strengths and areas in need of improvement. Educators receive links to curricular resources and materials that align to the Learning Progression Map. Data yielded from the Universal Screenings will inform academic methodology and pedagogy (or instructional practices) in conjunction with

relevant behavioral, attendance (or participation), and course performance data. Collected data will support all students, especially our most vulnerable students. Universal Screening data is factored into MTSS/RTI and supports identification of students in need of instructional interventions and, potentially, special education evaluation.

Pre-referral/Referral/Initial Evaluation

Students may be referred for special education evaluation by their parents, teacher, or the SST. The SST, consisting of general education teachers, intervention specialists, and school administrators will regularly review struggling students. The SST will consult with the parents and address struggling students' needs through the MTSS/RTI process. With parental consent, the teacher will implement and document interventions and the student's response to interventions. The students' response to MTSS/RTI efforts are used as one data metric in the determination of special education eligibility. These interventions will not be used to delay or deny a parent-requested special education evaluation.

Pennwood will establish a system of screening which may include prereferral intervention services to accomplish the following:

- (1) Identification and provision of initial screening for students prior to referral for a special education evaluation, including those services outlined in subsection (c).
- (2) Provision of peer support for teachers and other staff members to assist them in working effectively with students in the general education curriculum.
- (3) Identification of students who may need special education services and programs.

The screening process must include:

- (1) Hearing and vision screening in accordance with section 1402 of the Public School Code of 1949 (24 P. S. § 14-1402) for the purpose of identifying students with hearing or vision difficulty so that they can be referred for assistance or recommended for evaluation for special education.
- (2) Screening at reasonable intervals to determine whether all students are performing based on grade-appropriate standards in core academic subjects.

Pennwood will develop a program of prereferral intervention services. In the case of Pennwood meeting the criteria in 34 CFR 300.646(b)(2) (relating to disproportionality), as established by the PDE, the services are required and include:

- (1) A verification that the student was provided with appropriate instruction in reading, including the essential components of reading instruction (as defined in section 1208(3) of the Elementary and Secondary Education Act (ESEA) (20 U.S.C.A. § 6368(3)), and appropriate instruction in math.
- (2) For students with academic concerns, an assessment of the student's performance in relation to State-approved grade level standards.
- (3) For students with behavioral concerns, a systematic observation of the student's behavior in the school environment where the student is displaying difficulty.
- (4) A research-based intervention to increase the student's rate of learning or behavior change based on the results of the assessments under paragraph (2) or (3), or both.
- (5) Repeated assessments of achievement or behavior, or both, conducted at reasonable intervals, reflecting formal monitoring of student progress during the interventions.
- (6) A determination as to whether the student's assessed difficulties are the result of a lack of instruction or limited English proficiency.

- (7) A determination as to whether the student's needs exceed the functional ability of the regular education program to maintain the student at an appropriate instructional level.
- (8) Documentation that information about the student's progress as identified in paragraph (5) was periodically provided to the student's parents.
- (9) Screening or prereferral intervention activities may not serve as a bar to the right of a parent to request an evaluation, at any time, including prior to or during the conduct of screening or prereferral intervention activities.

§ 711.24. Evaluation

Initial Evaluation

Students may be referred for special education evaluation by their parents, teacher, or the SST. The SST, consisting of general education teachers, intervention specialists, and school administrators will regularly review struggling students. When a parent requests a special education evaluation, the process occurs *concurrently* with the MTSS/RTI process if the student is in need of academic intervention. Pennwood will respond to the parent within 10 days with the Permission to Evaluate-Request (PTE-Request) form and send Permission to Evaluate-Consent (PTE-Consent) form to gain the parent's permission to evaluate. This form outlines the reason for the special education evaluation referral and lists the assessments that will be used. Parental input and any outside evaluations will also be collected during the evaluation process. Parental rights will also be provided during this process by providing the parents with *Parents' Rights: Understanding the Procedural Safeguards Notice, the Procedural Safeguards Notice* and the explanatory *Procedural Safeguards Letter*.

The special education evaluation will be coordinated with the parent and an evaluator in close proximity to the student and completed within 60 days of Pennwood's receipt of signed PTE-Consent form. Once the evaluation is complete, the parents will join an interdisciplinary team meeting to review the assessment results and determine the student's eligibility for special education, completing an Evaluation Report (ER). If the student is found eligible for special education, Pennwood will convene the IEP meeting within 30 days after the completion of an *Evaluation Report (ER)*.

Allowing for Differences in English Language Skills and Ethnic Background

Evaluations must take into account the child's English language skills and ethnic background to ensure that the testing and evaluation will not be unfair for children of any race or culture. Tests must be given in the native language or mode of communication that is most likely to give accurate information on what the child knows and can do academically, developmentally, and functionally, unless it is clearly not feasible. Evaluations also must take into account the child's disability to make certain the test measures what it is supposed to measure. For example, a child with a severe visual impairment should be provided with appropriately sized testing materials to accommodate for his disability.

The group of qualified professionals, which reviews the evaluation materials to determine whether the child is a child with a disability under 34 CFR 300.306 (relating to determination of eligibility), will include a certified school psychologist when evaluating a child for autism, emotional disturbance, intellectual disability, multiple disabilities, other health impairments, specific learning disability or traumatic brain injury. In addition to the requirements incorporated by reference in 34 CFR 300.301 (relating to initial evaluations), the initial evaluation will be completed and a copy of the evaluation report presented to the parents no later than 60 calendar days after the agency receives written parental consent for evaluation, except that the calendar days from the day of the last day of the spring school term up to

and including the day before the first day of the subsequent fall school term will not be counted. Parents may request an evaluation at any time, and the request must be in writing. Pennwood will make the permission to evaluate form readily available for that purpose. If a request is made orally to any professional employee or administrator of Pennwood, that individual will provide a copy of the permission to evaluate form to the parents within 10 calendar days of the oral request. Copies of the evaluation report will be disseminated to the parents at least 10 school days prior to the meeting of the IEP team unless this requirement is waived by a parent in writing.

Disproportionality

Pennwood will collect and examine data regularly to ensure disproportionality is not evident in the areas of identification, academic settings and placements, and disciplinary measures. In addition to cultural sensitivity and awareness training, the following practices will be implemented to ensure students are found eligible for special education services without unjust bias:

- Evaluations will be administered by trained and licensed personnel
- More than one single measure or assessment will be used to determine a disability
- Evaluations that are not discriminatory or racially/culturally biased
- Evaluations will take into consideration the child's English language skills, including ethnic background
- Evaluations will be administered in the child's native language, or mode of communication

If there is any evidence of disproportionality, the school will review, and revise if needed, all procedures and policies that may be contributing.

§ 711.25. Criteria for the Determination of Specific Learning Disabilities

Following are State-level criteria for determining the existence of a specific learning disability. Pennwood will develop procedures for the determination of specific learning disabilities that conform to criteria in this section. These procedures will be included in the school's charter application and annual report. To determine that a child has a specific learning disability, Pennwood will:

- (1) Address whether the child does not achieve adequately for the child's age or meet State-approved grade-level standards in one or more of the following areas, when provided with learning experiences and scientifically based instruction appropriate for the child's age or State-approved grade-level standards:
 - a. Oral expression.
 - b. Listening comprehension.
 - c. Written expression.
 - d. Basic reading skill.
 - e. Reading fluency skills.
 - f. Reading comprehension.
 - g. Mathematics calculation.
 - h. Mathematics problem solving.

- (2) Use one of the following procedures:
 - a. A process based on the child's response to scientific, research-based intervention, which includes documentation that:
 - i. The student received high quality instruction in the general education setting.
 - ii. Research-based interventions were provided to the student.
 - iii. Student progress was regularly monitored.
 - b. A process that examines whether a child exhibits a pattern of strengths and weaknesses, relative to intellectual ability as defined by a severe discrepancy between intellectual ability and achievement, or relative to age or grade.
- (3) Have determined that its findings under this section are not primarily the result of any of the following:
 - a. A visual, hearing or orthopedic disability.
 - b. Intellectual Disability.
 - c. Emotional disturbance.
 - d. Cultural factors.
 - e. Environmental or economic disadvantage.
 - f. Limited English proficiency.
- (4) Ensure that underachievement in a child suspected of having a specific learning disability is not due to lack of appropriate instruction in reading or mathematics by considering documentation that:
 - a. Prior to, or as a part of, the referral process, the child was provided scientifically-based instruction in regular education settings, delivered by qualified personnel, as indicated by observations of routine classroom instruction.
 - b. Repeated assessments of achievement were conducted at reasonable intervals, reflecting formal assessment of student progress during instruction, which was provided to the child's parents. See Students with Specific Learning Disabilities Board Policy.

Acceleration and Enrichment

Pennwood will provide opportunities for acceleration or enrichment to students consistent as appropriate consistent with 22 Pa Code § 4.28. Special education: (b) Students who are identified and referred shall be provided an education that enables them to participate in acceleration or enrichment, or both, as appropriate.

IEP

§ 711.41. IEP

IEP Team Process

Once the evaluation team has determined a child has a disability and requires special education and related services, an IEP is developed within 30 days of the eligibility determination. From that point on, the IEP will be reviewed yearly unless a meeting prior to the annual due date is necessary. The annual IEP will be implemented within 10 school days of the IEP meeting. Special Education reevaluations will be conducted every three years or more frequently if needed. An IEP meeting takes place within 30 days

of the completion of the reevaluation report. The report will be provided to the parent at least ten days prior to the reevaluation IEP meeting. If a student has an intellectual disability, the reevaluation will take place every two years or more frequently if needed. If a student comes from out of state, and the disability is not recognized in the state of Pennsylvania, the school will still provide FAPE and comparable services while offering to conduct a new evaluation. The IEP team will include all required members including the parents, a minimum of one general education teacher, a minimum of one special education teacher, any related service providers, a designated school representative knowledgeable about the special education programs, curriculum and resources (LEA), the student, if turning 14 years or older during the duration of the annual IEP (or if the parent wants the student to participate prior to age 14), a qualified person that can interpret the evaluation findings, and lastly, anyone else the parent would like present at the meeting that is familiar with the child and their education. Parents are IEP team members and Pennwood will take all steps needed to ensure that one or both of the parents are present at each IEP team.

The IEP developed will address any new evaluation reports, student strengths, parent input, both present level academic and functional performance, measurable yearly goals (and objectives if the student is alternatively assessed), how the disability affects progress in the general education curriculum, services and programs with dates (including transportation needs), progress reporting (at least quarterly during the school year) and how the progress will be evaluated, participation in general education classes (and other activities) with children without disabilities, accommodations (including supplementary aids and services), and participation in Pennsylvania statewide testing. The IEP team will also examine behaviors, including how they may interfere with learning (or that of peers) and if a behavioral management plan should be created. The team will take into account if the student has limited English proficiency, communication and assistive technology (AT) needs, as well as if eligibility for Extended School Year (ESY) services. If the student is transition age (14 years or older), transition assessments, annual goals, activities, and courses of study will be developed to support postsecondary goals.

In addition to evidence-based general education curricula, Pennwood will offer alternative supplemental and/or replacement curriculum and/or intervention programs, as applicable, for IDEA eligible students.

IEP Progress Reporting

Student progress on annual goals and objectives will be monitored regularly using a variety of tools. The data will be summarized and provided to the parents quarterly throughout the school year, unless the IEP team agrees upon more frequent updates. Data collection tools may include rubric scores, curriculum-based assessments, tests, portfolios or fluency probes. Data may also be accumulated during small group or one on one instruction. Teachers will chart the data collected and analyze the data points weekly to ensure the student is on track to meet the goal by the annual IEP due date. If the student is not making expected progress on the annual goals or objectives, instructional adjustments will be made accordingly in an effort to increase progress, such as increased repetition opportunities or the re-teaching of critical skills. Related service goals will also be regularly monitored, and a summary included in the quarterly report provided to parents.

Assistive Technology

Pennwood will provide students with Assistive Technology as defined by IDEA 2004, any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified or customized, that is used to increase, maintain, or improve the functional capabilities of a child with a disability. Consistent with Pennsylvania Chapter 711, IEP teams will consider assistive technology needs for every student with an IEP. Students attending schools supported by Pearson have ready access to closed captioning and American Sign Language interpreting. Students also have access to screen readers, text readers, dictation and word prediction software, large monitors, alternative keyboards and mice, and other AT as specified in the students' IEP. See Assistive Technology Board Policy.

Transition

Students turning age 14 or older (or younger if appropriate) during the duration of the annual IEP will have a transition plan developed by the IEP team. The transition plan will prepare the student to move from school to post-school activities including post-secondary education, vocational education or adult education independent or supported employment and, when appropriate, independent living skills or community participation. The student will be invited to join and participate in the IEP meeting. The transition plan developed will include the following: Present Level of Academic Achievement and Functional Performance, Courses of Study and Transition Activities, agency linkages, measurable annual goals/objectives, and services that the student needs to reach the goals listed in the transition plan.

The following steps will occur to engage students in the transition process:

- The IEP Team Meeting Invitation will be addressed to the student.
- The Present Level of Academic Achievement and Functional Performance will include formal and/or informal transition assessments. The assessments will be both age-appropriate and student-focused to determine the students' strengths, needs, goals and interests. The assessments selected may include, but are not limited to, the Casey Life Skills assessment, the Myers Briggs, Keys2Work, and/or PACareerzone.org.
- Courses of Study will be addressed by the IEP team to ensure the student is taking courses and making sufficient progress to meet their post-secondary goals by the time the student graduates or transitions to adult services.
- Transition activities will be tied to transition goals. Depending on the student's post-secondary goals, activities may include college visitations and participation in state-wide Career Days. A vast number of agencies are available to support a student's transition plan and activities throughout the Commonwealth.
- Goals and objectives will be developed as an IEP team and areas of focus will include education, employment, and independent living. Goals will be developed based on the transition assessment results.
- A transition specialist will monitor and support student internships and job shadow opportunities across the state by collaborating with local businesses, colleges and universities, and the PA Office of Vocational Rehabilitation (OVR). These opportunities will be based on the student's interests and transition plan. Monitoring will include observing the student in the vocational setting, providing ongoing and frequent feedback and support and, when needed, modeling skills.

For students who are graduating or reaching maximum age, a Summary of Performance (SOP) document will be created to ensure the student has personal summary information that includes all of the student's abilities and limitations summarized, recommendations for continued supports for a successful transition, and input from both the student and individuals supporting the student. See Transition Board Policy.

Interagency Collaboration

Pennwood will work with students' resident districts and intermediate units to benefit enrolled students with IEPs. Interagency collaboration is a critical element of Pennwood's continuum of special education services. This collaboration will be necessary when considering related services, mental health and welfare support, postsecondary transition planning, bridging to adult services, and placement

considerations. This system will not replace the Pennwood's responsibilities to serve enrolled students with IEPs; rather, this intensive interagency collaboration is designed to provide additional placement considerations to students' IEP teams when students need full-time support. Pennwood will contract with resident districts and intermediate units to establish these relationships. The interagency coordinator, a member of the Pennwood special education team, will serve as a resource for families and as the liaison between Pennwood and local districts and intermediate units. See Intensive Interagency Board Policy.

Related Services

Cyber schools offer a vast range of options for the delivery of related services. Pennwood will contract with Pearson to support the delivery of related services. Related services provided to students will include, but are not limited to:

- Speech-language services
- Occupational therapy
- Counseling services
- Social work services
- Behavior therapy
- Special transportation
- Physical therapy
- Audiology services
- Social Skills
- Autism support
- Parent training
- Orientation and mobility
- Closed-captioning
- American Sign Language

Related services will be equally accessible to all students in the Commonwealth and may include any combination of speech-language services, occupational therapy services, physical therapy, counseling services and other services as identified in the IDEA. As determined by the IEP team the student may receive these services in a cyber-setting and/or face to face. Students attending cyber schools in Pennsylvania have been receiving services in both settings for many years. When the IEP team determines that the services will be provided face to face, the services are provided at a mutually convenient location for both the family and the provider. Options for locations include: the student's home, the therapist's business location, libraries, community centers, etc. For services provided outside of the home, special transportation will be provided, or the parent may choose to receive mileage reimbursement from Pennwood for transporting their child. Pennwood provides related services by engaging IUs, private businesses, agencies, hospitals, adult service providers, etc. For each provider serving enrolled students, Pennwood maintains copies of licensure and certification, background checks, etc. consistent with Pennsylvania law. See Related Services Board Policy.

Least Restrictive Environment (LRE)

Pennwood provides special education and related services within the LRE for all students. This includes taking into consideration supplementary aids and services, accommodations, and ESY while ensuring the student is educated with nondisabled peers, to the maximum extent possible, and making expected gains on IEP goals. The Director of Special Education works closely with the general education teachers to ensure that every student receives accommodations, modifications, and all needed services to access and progress in the general education curriculum. Assistive technology may include collaboration with PaTTAN AT consultants and Intermediate Unit (IU) staff, collaboration with Pearson AT support staff, access to PaTTAN's short term AT loan library and AIM Center (Accessible Instructional Materials), closed captioning, speech to text, and text to speech. ESY will be considered by the IEP team, at each IEP meeting, determining if potential regression over school interruptions or other relevant factors may interfere with the student's access to FAPE. See Least Restrictive Environment Board Policy.

Continuum of Services and Placement

Pennwood will have a continuum of special education and alternative placements available to ensure FAPE is being provided in the LRE.

- Consultative support for the general education teachers to provide modifications and accommodations to the general education curriculum
- Itinerant, supplementary or full-time special education support will be provided via the telephone, Internet, LiveLesson sessions, as well as in person depending on the needs of the student
- Direct related service support (for example: speech-language, occupational, or physical therapy, psychological counseling,) provided face-to-face, via computer, in homes, community sites, and therapist offices
- Related services will include: parent training, autism support, parent groups, student support groups, and itinerant hearing or vision support consistent with the student's IEP
- Ongoing progress monitoring for every student: including frequent and thorough review of student performance, attendance or non-attendance, and participation data as reported to the student, parent and teacher through their respective home pages
- Specific tracking and reporting for providers of direct/related services, with close scrutiny by the special education staff of any missed appointments or incomplete services
- Intermediate Unit classrooms
- Private placements

Program for Alternately Assessed Students

Pennwood will provide a comprehensive program for students qualified to take Pennsylvania's alternative state assessment, PASA. To the greatest extent possible, these students will be included with their same age classmates so they may enjoy age-appropriate communication and socialization. Students participating in the alternative curriculum program may or may not have classes with their general

education peers. For example, some alternative curriculum students will participate in only alternative courses, while others may participate in electives with their general education peers, in addition to their alternative core coursework. The Least Restrictive Environment will differ for these two groups of students and is determined by each student's IEP team. The Alternative Education Program includes specially designed instruction to address each student's IEP goals as well as alternative curriculum resources. Pearson will provide support for teachers and special education leaders related to data analysis and related service provision for these students. See Alternate Assessments Board Policy.

Alternative Curriculum Resources

In addition to evidence-based general education curricula, Pennwood will offer alternative supplemental and/or replacement curriculum and/or intervention programs, as applicable, for IDEA eligible students, which will include, but will not be limited to the following:

N2Y is a third-party web-based curriculum that is offered to students identified for an alternative curriculum path. There are three components of N2Y: Unique Learning System, Symbolstix, and News2You. Unique Learning System is an online, dynamic, standards-based curriculum specifically designed for students with special needs. Pennwood special education teachers will download monthly instructional thematic units of study. Themes center on Science and Social Studies topics lessons cover all core content areas. Each unit contains 30 special education lesson plans and downloadable materials that teachers can readily implement into special education classroom learning activities. All materials are created using SymbolStix graphics. Each lesson plan defines three levels of differentiated tasks to accommodate the diversity of learners with significant disabilities. Lesson plans are organized by chronological grade band; the high school level grade band lesson plans include postsecondary transition activities. Symbolstix is a visual support program for students with communication challenges. It is a tool allowing teachers to create visual supports and communication boards and learning materials for students using templates. Finally, News2You is a weekly online newspaper, offering multiple differentiated levels enabling students access to information about current events.

Pennwood special education teachers will be supported by Pearson staff with the delivery of the alternative curriculum. This support will assist teachers in data analysis of student progress through the alternative curriculum as well as planning direct special education services to best meet students' needs. Pennwood special educators will also work closely with parents and Learning Coaches to design the best learning environment for alternatively assessed students and coordinate any related services provided virtually or in the community.

Independent Living and Life Skills

As part of Pennwood's postsecondary transition planning and alternative curriculum program, Pennwood will implement independent living and life skills programming for students with IEPs. Designed to provide life skills support, this program will provide the instruction necessary for students to function independently as adults to the fullest extent possible. Independent living and life skills will be addressed in students' IEPs with appropriate transition activities and goals clearly determined and outlined after conducting thorough transition interviews and assessments with the students and their families. All goals and associated activities will be directly aligned with students' present levels.

Activities may range from self-care to money management to community navigation. Frequent, regular progress monitoring and documentation of goal progress is an integral part of Pennwood's life skills and

independent living programming. As appropriate, the team may determine that intensive interagency collaboration is needed to best meet the independent living and life skills goals.

Pennwood will hold annual reviews of the IEP, including reviewing student progress within the existing IEP, reevaluating whether the student is benefitting from the program, creating new IEP goals. If the student is not benefitting from the program, a new IEP will be developed, and changes will be recommended regarding the student's placement.

§ 711.42. Transportation

For services provided outside of the home, special transportation will be provided, or the parent may choose to receive mileage reimbursement from Pennwood for transporting their child.

Students are not required to attend a specific facility to receive their educational services. The act does not require that a student's school district of residence provide transportation for Pennwood students. If transportation is required as a related service in the IEP of the student with disabilities, Pennwood will provide the required transportation. This chapter does not prohibit Pennwood and a school district from entering into agreements regarding the provision of transportation as a related service or accommodation to children with disabilities eligible under IDEA, or students eligible under Section 504.

§ 711.43. Educational Placement

When the IEP team at a charter school or cyber charter school places a child in another public agency, private school or private agency, and the parents choose to keep their child enrolled in the charter school or cyber charter school, the charter school or cyber charter school is obligated to pay for that placement.

Alternative placements will be considered when the virtual environment, including the use of supplementary aids and services, accommodations, and ESY are no longer meeting the needs of the student. Alternative placements include special classes, special schools, approved private placements and home and hospital instruction. Pearson has prior experience supporting cyber schools in facilitating placements in both IU schools and in private placements. Resources to support alternative placement options may include collaboration with the student's resident school district, IUs, private schools, and approved private schools (APS Directory 2022, Approved Private Schools, School Districts, PA IUs). A Prior Written Notice (PWN) and Procedural Safeguards will be issued to Parent to document the team decision after meeting held in accordance with Chapter 711.

§ 711.44. Extended School Year (ESY)

ESY will be considered by the IEP team, at each IEP meeting, determining if potential regression over school interruptions or other relevant factors may interfere with the student's access to FAPE. In addition to the requirements incorporated by reference in 34 CFR 300.106 (relating to extended school year services), Pennwood will use the following standards for determining whether a student with disabilities requires ESY as part of the student's program:

- (1) At each IEP meeting for a student with disabilities, Pennwood will determine whether the student is eligible for ESY services and if so, make subsequent determinations about the services to be provided.
- (2) In considering whether a student is eligible for ESY services, the IEP team will consider the following factors, however, no single factor will be considered determinative:
 - Whether the student reverts to a lower level of functioning as evidenced by a measurable decrease in skills or behaviors which occurs as a result of an interruption in educational programming (Regression).
 - Whether the student has the capacity to recover the skills or behavior patterns in

- which regression occurred to a level demonstrated prior to the interruption of educational programming (Recoupment).
 - Whether the student's difficulties with regression and recoupment make it unlikely that the student will maintain the skills and behaviors relevant to IEP goals and objectives.
 - The extent to which the student has mastered and consolidated an important skill or behavior at the point when educational programming would be interrupted.
 - The extent to which a skill or behavior is particularly crucial for the student to meet the IEP goals of self-sufficiency and independence from caretakers.
 - The extent to which successive interruptions in educational programming result in a student's withdrawal from the learning process.
 - Whether the student's disability is severe, such as autism/pervasive developmental disorder, serious emotional disturbance, intellectual disability, degenerative impairments with mental involvement and severe multiple disabilities.
- (3) Reliable sources of information regarding a student's educational needs, propensity to progress, recoupment potential and year to year progress may include the following:
- Progress on goals in consecutive IEPs.
 - Progress reports maintained by educators, therapists and others having direct contact with the student before and after interruptions in the education program.
 - Reports by parents of negative changes in adaptive behaviors or in other skill areas.
 - Medical or other agency reports indicating degenerative-type difficulties, which become exacerbated during breaks in educational services.
 - Observations and opinions by educators, parents and others.
 - Results of tests, including criterion-referenced tests, curriculum-based assessments, ecological life skills assessments and other equivalent measures.
- (4) The need for ESY services will not be based on any of the following:
- The desire or need for day care or respite care services.
 - The desire or need for a summer recreation program.
 - The desire or need for other programs or services that while they may provide educational benefit, are not required to ensure the provision of a FAPE.
- (5) Students with severe disabilities such as autism/pervasive developmental disorder, serious emotional disturbance; severe intellectual disability; degenerative impairments with mental involvement; and severe multiple disabilities require expeditious determinations of eligibility for ESY services to be provided as follows:
- Parents of students with severe disabilities will be notified by the charter school or cyber charter school of the annual review meeting to ensure their participation.
 - An IEP review meeting must occur no later than February 28 of each school year for students with severe disabilities.
 - The notice of recommended educational placement (NOREP) will be issued to the parent no later than March 31 of the school year for students with severe disabilities.

- If a student with a severe disability transfers into Pennwood after the dates in paragraphs (2) and (3), and the ESY eligibility decision has not been made, the eligibility and program content must be determined at the IEP meeting.
- Pennwood will consider the eligibility for ESY services of all students with disabilities at the IEP meeting. ESY determinations for students other than those described in subsection (d) are not subject to the time lines in subsection (d). However, these determinations will still be made in a timely manner. If the parents disagree with Pennwood's recommendation on ESY, the parents will be afforded an expedited due process hearing. See Extended School Year Board Policy.

§ 711.45. Access to Instructional Materials

National Instructional Materials Accessibility Standard (NIMAS)

Pennwood will ensure timely delivery of print instructional materials in accessible formats to blind or other enrolled students with print disabilities. Pennwood will work with Accessible Media Providers (AMPs), such as Bookshare, to provide eligible students files in the NIMAS standard. These files are based on the international DAISY (Digital Accessible Information System) standard, essentially the DAISY/NISO (National Information Standards Organization) Z39.86 2005 standard and is required by federal IDEA regulation. DAISY is an internationally recognized technical standard used to facilitate the creation of accessible content. These files are electronic documents created by textbook providers, submitted to AMPs, and then requested by public schools. These files will be provided to eligible students as part of its accessibility provision and assistive technology considerations of the students' IEP teams.

To ensure the timely provision of high quality, accessible instructional materials to children who are blind or other persons with print disabilities, Pennwood will adopt the National Instructional Materials Accessibility Standard (NIMAS). The NIMAS refers to a standard for source files of print instructional materials created by publishers that may be converted into accessible instructional materials.

Pennwood will, in a timely manner, provide print instructional materials in specialized, accessible formats (that is, Braille, audio, digital, large-print, and the like) to children who are blind or other persons with print disabilities, as defined in 2 U.S.C.A. § 135a regarding books and sound reproduction records for blind and other physically handicapped residents annual appropriations and purchases.

Pennwood will act in a timely manner in providing instructional materials under subsection (a) if they take all reasonable steps to ensure that children who are blind or other persons with print disabilities have access to their accessible format instructional materials at the same time that students without disabilities have access to instructional materials. Pennwood will not withhold instructional materials from other students until instructional materials in accessible formats are available.

Receipt of a portion of the instructional materials in alternate accessible or specialized format will be considered receipt in a timely manner if the material received covers the chapters that are currently being taught in the student's class.

If a child who is blind or other person with a print disability enrolls in school after the start of the school year, Pennwood will take all reasonable steps to ensure that the student has access to accessible format instructional materials within 10 school days from the time it is determined that the child requires printed instructional materials in an alternate accessible or specialized format.

Pennwood may coordinate with the National Instructional Materials Access Center (NIMAC) to facilitate the production of and delivery of accessible materials to children who are blind or other persons with print disabilities. The NIMAC refers to the central repository, established under section 674(e) of IDEA (20 U.S.C.A. § 1474(e)), which is responsible for processing, storing and distributing NIMAS files of textbooks and core instructional materials.

Pennwood coordinating with NIMAC will require textbook publishers to deliver the contents of print instructional materials to the NIMAC in NIMAS format files on or before delivery of the print instructional materials to the Pennwood may on occasion choose not to coordinate with NIMAC may require that publishers deliver the contents of print instructional materials to the NIMAC in NIMAS format files on or before delivery of the print instructional materials to the charter schools or cyber charter schools. See Access to Instructional Materials Board Policy.

§ 711.46. Positive Behavior Support

Positive Behavior Interventions and Support

Pennwood believes that every student must be treated with respect and will implement an evidenced-based, data-driven, school wide program of positive behavioral supports to improve the academic and social outcomes of all students. This framework of positive behavior interventions and supports (PBIS) includes a variety of school wide as well as individual strategies focused on teaching and reinforcing positive school engagement and behaviors. Every student will receive positive reinforcement through frequent teacher feedback and interaction.

Components of Pennwood's PBIS program include all-staff professional development related to understanding students' interfering behaviors and their antecedents as well as how to use preventative measures to promote appropriate behavior. When a behavioral concern arises, trained personnel will conduct a Functional Behavior Assessment. This process will include direct observations conducted in the virtual classroom and at the home, if necessary. It will also include indirect observation methods, such as interviews with family and staff, a review of disciplinary, academic, and attendance records, and review of outside evaluation reports, if applicable. Data is analyzed to determine the hypothesized function of behavior and a summary of the findings and recommendations are provided to the Student Support Team.

If it is determined that a student's behavior is impacting their learning and the student would benefit from behavior interventions, the IEP team will create a positive behavior support plan. The plan will include a summary of findings from the Functional Behavior Assessment, behavioral goals and instructional strategies for teaching and reinforcing replacement behaviors. In the event that interfering behavior occurs, the plan will outline de-escalation strategies for addressing the behavior. Teachers and Learning Coaches will work together to implement the plan to reduce the occurrence of interfering behavior, and promote engagement in appropriate behaviors.

Pennwood's PBIS framework will also include efforts related to dropout prevention. School general and special education staff will work collaboratively to monitor students at risk for dropout. These students will be targeted for additional intervention, IEPs may be updated, and families will be engaged. Of particular focus will be engagement with the Pennwood community, the local neighborhood, and opportunities for service learning. Pennwood will have staff members dedicated to facilitating service-learning, aligning efforts with students' transition plans and postsecondary goals.

The family is a critical part of Pennwood's PBIS framework. As part of Pennwood's Learning Coach Instructional Support Initiatives, all parents and Learning Coaches will receive support and training on creating a positive learning environment to minimize interfering behaviors and reinforcing positive behaviors. Pennwood's PBIS framework is a tiered system. Therefore, when tiered interventions have been attempted for a period of time, and data reveals that behaviors have not improved, upon agreement of the parent, the student is referred to the Special Education Team for evaluation that may include a Functional Behavior Assessment and a Behavior Support Plan.

Use of Seclusion or Restraint

Pennwood does not have physical contact with students on a regular basis; however, it will maintain Student's IEP which may include a Seclusion and Restraint plan to implement if necessary during occasions when staff has contact with students during field trips, state testing, or visits to the school offices. A copy of the IEP will be available to students and their families in the school handbook.

Every effort will be made to avoid the need for the use of restraint or seclusion of a student. Physical seclusion or restraint will not be used except when used as a last resort and only when:

- the student's behavior poses imminent risk of injury to self or others; and,
- other less restrictive interventions are ineffective.

A student will never be secluded or physically restrained by a school employee who has not received extensive training by the school in the use of seclusion and restraint procedures. These strategies may be used in rare and clearly unavoidable emergency circumstances when fully trained school personnel are not immediately available. Untrained staff will request assistance from trained staff as soon as possible.

Physical restraint or seclusion of a student may only be used for a short period of time and will be ended as soon as the imminent risk of injury to self or others has dissipated, usually a matter of minutes. The use of any drug, medication, or other chemical to control behavior or restrict freedom of movement (except as authorized by a licensed physician or other qualified health care professional) is prohibited. An Pennwood employee will never give a student any drug or medication that is not a standard treatment or dosage, or both, for the student's medical or psychiatric condition unless otherwise prescribed by a physician.

Every instance in which seclusion or restraint is used will be carefully, continuously, and visually monitored to ensure the safety of the student, other students and school employees. Immediately after the imminent risk of injury to self or others has ended, the student should no longer be physically restrained or secluded and a school employee, not involved with the seclusion or restraint, will examine the student to ascertain if any injury has been sustained during the seclusion or restraint of the student.

After each incident a debriefing procedure is followed, and the incident is documented. Pennwood will annually review this seclusion and restraint policy. Regular professional development and training on these procedures will be provided to school staff.

When Seclusion and Restraint Procedures Will Not Be Employed

Physical restraint and seclusion will not be used unless the student's behavior poses imminent risk of injury to self or others and other less restrictive interventions are ineffective. A verbal threat or verbally aggressive behavior does not itself indicate an imminent risk of injury, and will not result in seclusion or restraint. Unless a student's destruction or damage to property creates an imminent risk of injury to the student or others, the destruction or damage of property does not itself indicate an imminent risk of injury and will not be the justification for seclusion or restraint of a student.

Time-Out

Time-out is a behavior reduction procedure in which access to reinforcement is withdrawn for a certain period of time. Time-out occurs when the ability of a student to receive normal reinforcement in the school environment is restricted. Short time-out sessions will be both developmentally and behaviorally appropriate.

Debriefing

As soon as practical and after every instance in which seclusion or restraint is used on a student, the school administrator or designee will do the following:

- meet with at least one school employee who participated in the implementation, monitoring, and supervision of the seclusion or restraint to discuss whether proper seclusion or restraint procedures were followed, including the use of proper procedures to prevent the need for restraint or seclusion;
- direct a staff person, who was not part of the seclusion or restraint of the student, to debrief the incident with the student in a manner appropriate to the student's age and developmental ability and to discuss the behavior(s), if any, that precipitated the use of restraint or seclusion; and,
- provide a copy of an incident report to the parent(s) or guardian(s) and offer the opportunity to request a meeting regarding the incident of restraint or seclusion.

Incident Documentation and Reporting

Every instance in which seclusion or restraint is used on a student will be documented in order to memorialize the events that led up to the use of either seclusion or restraint. Documentation must be made on the form prescribed by the school and will include the following:

- The student's name;
- The date and time of the incident;
- The duration of any seclusion or restraint or the beginning and ending times of the restraint or seclusion, or both;
- A description of any relevant events leading up to the incident;
- A description of the incident or student behavior that resulted in implementation of seclusion or restraint including a description of the danger of injury which resulted in the seclusion or restraint;
- A description of relevant interventions used immediately prior to the implementation of seclusion or restraint;
- A summary of the student's behavior during seclusion or restraint, including a description of the restraint technique or techniques used and any other interaction between the student and staff;
- A description of any injuries to students, staff, or others or property damage;
- A list of school employees who participated in the implementation, monitoring and supervision of the seclusion or restraint; and,

- If applicable, a statement that intervention used was consistent with the student's most current behavioral intervention plan or IEP.

The Principal or designee will attempt to verbally report every instance in which seclusion or restraint is used on a student to the student's parent or guardian no later than the end of the school day or as soon as practical. The building administrator or designee will also send written notification, as soon as practical, to the student's parent or guardian after every instance in which seclusion or restraint is used on a student.

Administration will comply with PDE guidelines regarding the reporting of the use of restraints. Specifically, any restraint that results in an injury to a student and/or staff person must be reported to the Principal or designee who will comply with any requirement to report the injury to the PDE Bureau of Special Education and any other reporting requirements.

Training

Pennwood will provide all school employees with training on:

- Appropriate use of effective alternatives to physical seclusion and restraint,
- Conflict de-escalation procedures,
- Positive supports and behavioral interventions techniques,
- The dangers of seclusion and restraint,
- Procedures for contacting fully trained and certified staff when behavioral crises occur
- The safe use of seclusion and restraint.
- Steps to avoid the use of seclusion or restraint.
- Debriefing practices and procedures.

This training will be recurrent and will be provided to new school employees.

A core group of appropriate personnel will be trained in each building in crisis intervention techniques, which will include the use of seclusion and restraint procedures. Any member of the core group, trained in crisis intervention techniques, including the safe use of seclusion or restraint procedures, may provide training to other school employees under this plan.

Recurrent training will be provided to school employees on a regular basis at least annually.

Annual Review, Planning Process, and Oversight

The Principal will be designated as the coordinator of data, planning and oversight of the use of seclusion or restraint procedures. Pennwood will establish a team to conduct an annual review of all individual and program-wide data associated with this policy. The Committee will review the following components related to the use of restraint:

- incident reports;
- procedures used during restraint, including the proper administration of specific Pennwood- approved restraint techniques;
- preventative measures or alternatives tried, techniques or accommodations used to avoid or eliminate the need of the future use of restraint;
- documentation and follow up of procedural adjustments made to eliminate the need for

- future use of restraint
- injuries incurred during a restraint;
- notification procedures;
- staff training needs;
- specific patterns related to staff or student incidents;
- environmental considerations, including physical space, student seating arrangements, and noise levels.

Upon review of the data, the Committee will identify any issues and/or practices that require further attention and provide written recommendations to the Superintendent of Schools for changes in policies or practices. The Committee may recommend review of the training program to ensure the most current knowledge and techniques are reflected in Pennwood training curriculum.

Positive rather than negative measures will form the basis of positive behavior support programs to ensure that all students will be free from demeaning treatment, the use of aversive techniques and the unreasonable use of restraints. Behavior support programs must include research based practices and techniques to develop and maintain skills that will enhance an individual student's opportunity for learning and self-fulfillment. Behavior support programs and plans will be based on a functional assessment of behavior and utilize positive behavior techniques. When an intervention is needed to address problem behavior, the types of intervention chosen for a particular student must be the least intrusive necessary. The use of restraints is considered a measure of last resort, only to be used after other less restrictive measures, including deescalation techniques in accordance with subsection (c)(2). Notwithstanding the requirements incorporated by reference in 34 CFR 300.34, 300.324, 300.530 (relating to related services; development, review, and revision of IEP; and authority of school personnel), with regard to a child's behavior, the following words and terms, when used in this section, have the following meanings, unless the context clearly indicates otherwise:

Aversive techniques—Deliberate activities designed to establish a negative association with a specific behavior.

Positive behavior support plan—A plan for students with disabilities who require specific intervention to address behavior that interferes with learning. A positive behavior support plan will be developed by the IEP team, be based on a functional behavior assessment and become part of the student's IEP. These plans include methods that utilize positive reinforcement and other positive techniques to shape a student's behavior, ranging from the use of positive verbal statements as a reward for good behavior to specific tangible rewards.

Restraints:

- The application of physical force, with or without the use of a device, for the purpose of restraining the free movement of a student's body. The term does not include briefly holding, without force, a student to calm or comfort him, guiding a student to an appropriate activity, or holding a student's hand to safely escort him from one area to another.
- Excluded from this definition are hand-over-hand assistance with feeding or task completion and techniques prescribed by a qualified medical professional for reasons of safety or for therapeutic or medical treatment, as agreed to by the student's parents and specified in the

IEP. Devices used for physical or occupational therapy, seatbelts in wheel chairs or on toilets used for balance and safety, safety harnesses in buses, and functional positioning devices are examples of mechanical restraints which are excluded from this definition, and governed by subsection (d).

- Restraints to control acute or episodic aggressive or self-injurious behavior may be used only when the student is acting in a manner as to be a clear and present danger to himself, to other students or to employees, and only when less restrictive measures and techniques have proven to be or are less effective.
- The use of restraints to control the aggressive behavior of an individual student will cause the charter school or cyber charter school to notify the parent of the use of restraint and will cause a meeting of the IEP team within 10 school days of the inappropriate behavior causing the use of restraints, unless the parent, after written notice, agrees in writing to waive the meeting. At this meeting, the IEP team will consider whether the student needs a functional behavioral assessment, reevaluation, a new or revised positive behavior support plan or a change of placement to address the inappropriate behavior.
- The use of restraints may only be included in a student's IEP when:
 - Utilized with specific component elements of positive behavior support.
 - Used in conjunction with the teaching of socially acceptable alternative skills to replace problem behavior.
 - Staff are authorized to use the procedure and have received the staff training required.
 - There is a plan in place for eliminating the use of restraint through the application of positive behavior support.
- The use of prone restraints is prohibited in educational programs. Prone restraints are those in which a student is held face down on the floor.
- The use of restraints may not be included in the IEP for the convenience of staff, as a substitute for an educational program or employed as punishment.
- Pennwood will maintain and report data on the use of restraints as prescribed by the Secretary. The report will be reviewed during cyclical compliance monitoring conducted by the PDE.
- Mechanical restraints, which are used to control involuntary movement or lack of muscular control of students when due to organic causes or conditions, may be employed only when specified by an IEP and as determined by a medical professional qualified to make the determination, and as agreed to by the student's parents. Mechanical restraints must prevent a student from injuring himself or others or promote normative body positioning and physical functioning.

The following aversive techniques of handling behavior are considered inappropriate and will not be used by Pennwood in educational programs:

- Corporal punishment.
- Punishment for a manifestation of a student's disability.

- Locked rooms, locked boxes or other locked structures or spaces from which the student cannot readily exit.
- Noxious substances.
- Deprivation of basic human rights, such as withholding meals, water or fresh air.
- Suspensions constituting a pattern.
- Treatment of a demeaning nature.
- Electric shock.

CEO or designee will have the primary responsibility for ensuring that behavior support programs are in accordance with this chapter, including the training of personnel for the use of specific procedures, methods and techniques, and for having a written policy and procedures on the use of behavior support techniques and obtaining parental consent prior to the use of restrictive or intrusive procedures or restraints.

CEO or designee may convene a review, including the use of human rights committees, to oversee the use of restrictive or intrusive procedures or restraints.

Subsequent to a referral to law enforcement, for a student with a disability who has a positive behavior support plan, an updated functional behavior assessment and positive behavior support plan will be required. For a student with a disability who does not have a positive behavior support plan, subsequent to notification to law enforcement, Pennwood shall convene the student's IEP Team to consider whether a behavior support plan should be developed to address the student's behavior, in accordance with law, regulations and Board policy. See Positive Behavior Support Plan Board Policy.

PROCEDURAL SAFEGUARDS

§ 711.61. Suspension and Expulsion

Discipline Procedures for Students with Disabilities (Suspension and Expulsion)

Reflected in the Pennwood handbook is careful protection of the rights of disabled students through the fair application of due process. Given the nature of the cyber school and limited face to face contacts with students, suspensions and expulsions are extremely rare.

Pennwood staff may order the removal of a student from school for disciplinary reasons to the extent the removal is applied to non-disabled students, as long as the removals do not constitute a change of placement. A change in placement occurs if the student is removed from school for disciplinary reasons for more than ten consecutive school days or if the student is subjected to a series of removals (15 cumulative school days in a school year) that constitute a pattern of removal.

If a student with a disability is removed from his/her current placement for more than ten days during a school year, the school staff will provide services to the student to the extent necessary for the student to appropriately progress in the general curriculum and appropriately Pennwood toward achieving the goals in his/her IEP. School staff may order a change of placement to an appropriate alternative setting for no more than 45 days. The extent of the student's removal for disciplinary reasons is applied to non-disabled students if a student carries a weapon to a school function, knowingly possesses or uses illegal drugs, sells or solicits the sale of a controlled substance, or causes serious bodily injury to another person while at a school function. The interim alternative setting must enable the student to continue to progress in the general curriculum and to receive those services and modifications to enable the student to progress on the goals set out in his/her IEP.

If the school staff is considering a disciplinary action that involves changing a student's placement, a manifestation determination must be completed within ten school days of any decision to change the placement of the child with a disability. The parent and relevant members of the child's IEP team must review all relevant information, including the IEP, teacher observations, information provided by the parent to determine if the behavior in question was a result of or had a direct substantial relationship to the child's disability or failure to implement the IEP. If the result of the IEP team is that the behavior was not a manifestation of the student's disability, the relevant disciplinary procedures applicable to students without disabilities may be applied to the student in the same manner in which they would be applied to students without disabilities. However, Pennwood will provide services to the extent necessary to enable the student to appropriately progress in the general curriculum and appropriately Pennwood toward achieving the goals set out in his/her IEP.

After changing a student's placement for disciplinary reasons, school staff will conduct a functional behavioral assessment and convene the IEP team to develop a behavioral support plan; or if a behavior plan was in place it must be reviewed and modified as necessary by the IEP team.

Pennwood will comply with Chapter 12 (relating to students) and 34 CFR 300.530—300.537, regarding discipline procedures. Any removal from the current educational placement is a change of placement for a student who is identified with intellectual disability. When a child with a disability has been expelled from Pennwood, the school will provide the child with a disability with the education required pursuant to the IDEA, 22 Pa Code §711 and §12.6, until Pennwood is notified in writing that the child is enrolled in another public agency, private school, approved private school or private agency. Notwithstanding the requirements incorporated by reference in 34 CFR 300.530(b) and 300.536 (relating to authority of school personnel; and change of placement because of disciplinary removals), a disciplinary exclusion of a student with a disability for more than 15 cumulative school days in a school year will be considered a pattern so as to be deemed a change in educational placement. See Disciplinary Exclusions for Special Educational Students Board Policy.

§ 711.62. Procedural Safeguards

Procedural Safeguards Notice

Parents of children who receive or who may be eligible for special education services have rights under the IDEA. The Procedural Safeguards Notice provides a detailed explanation of those rights. Pennwood will give parents a copy of the Procedural Safeguards Notice and the explanatory Procedural Safeguards Letter at least once each school year. Parents can also obtain a copy of the Procedural Safeguards Notice from Pennwood at any time. An additional document is available to help parents to better understand the Notice document, *The Parents' Rights: Understanding the Procedural Safeguards Notice* provides a summary of those rights. Parents will also receive the Parents' Rights documents upon initial referral or upon the parents request for an evaluation and in accordance with discipline procedures when a change in placement occurs.

Pennwood will ensure that procedures are established and implemented to allow parties to disputes regarding any matter described in 34 CFR 300.503(a)(1) (relating to prior notice by the public agency, content of notice), to resolve the dispute through a mediation process that, at a minimum, must be available whenever a hearing is requested under 34 CFR 300.507 (relating to filing a due process complaint) or 34 CFR 300.530—300.537, regarding discipline procedures. The following apply to coordination services for special education and Section 504 hearings and to hearing officers:

- The Secretary may contract for coordination services in support of hearings conducted by Pennwood. The coordination services will be provided on behalf of charter schools or cyber charter schools and may include arrangements for stenographic services, arrangements for hearing officer services, scheduling of hearings and other functions in support of procedural consistency and the rights of the parties to hearings.
- A hearing officer may not be an employee or agent of Pennwood which is responsible for the education of the student, or of the school district in which the parents or student reside or of any other agency which is responsible for the education or care of the student. A hearing officer will promptly inform the parties of a personal or professional relationship the officer has or has had with any of the parties.
- Pennwood may request a hearing to proceed with an initial evaluation or a reevaluation when a parent fails to respond to Pennwood's evaluation or reevaluation. When a parent rejects Pennwood's proposed identification of a child, proposed evaluation, proposed provision of a FAPE or proposed educational placement, other than the initial placement, Pennwood may request an impartial due process hearing. If the parent fails to respond or refuses to consent to the initial provision of special education services, neither due process nor mediation may be used to obtain agreement or a ruling that the services may be provided.

The following time line applies to due process hearings:

- A hearing will be held after the conclusion of the resolution session under 34 CFR 300.510 (relating to resolution process) or after one of the parties withdraws from mediation or the parties agree to waive or end the resolution session.
- The hearing officer's decision will be issued within 45 days after the resolution or mediation session ends without resolution or agreement date.

Except as provided by 34 CFR 300.533 (relating to placement during appeals), during the pendency of any mediation proceeding conducted in accordance with 34 CFR 300.506 (relating to mediation), unless Pennwood and the parents of the child agree otherwise, the child that is the subject of the mediation will remain in the child's then current education placement until the mediation process is concluded.

The resolution session required by 34 CFR 300.510 will be available to parents of both school age and eligible young children with disabilities. Parent advocates may attend the sessions.

DRAFT SPECIAL EDUCATION POLICIES

These are draft policies provided to the Board of Trustees by Board Counsel. These will be used as the basis of school policies and are subject to modification by the Board of Trustees.

If the charter application is approved, these will be modified to reflect Pennwood Cyber Charter School's mission and vision and compliance with all Pennsylvania laws and regulations.

To the extent that anything in these policies could be construed to conflict with state and/or federal law, the applicable state and/or federal laws control. These policies are not intended to conflict with charter requirements.

Pennwood Cyber Charter

School Board of Trustees

Policy

Access to Instructional Materials Policy

The Pennsylvania State Board of Education adopted the National Instructional Materials Accessibility Standard (NIMAS) as defined in the Education of Individuals with Disabilities Education Improvement Act of 2004 (“IDEA”), for the purpose of providing print instructional materials in alternate accessible formats or specialized formats to blind persons or other persons with print disabilities in a timely manner. Pursuant to the state regulations which incorporate the IDEA, Pennwood Cyber Charter School (“Charter School”) will adopt NIMAS to ensure the timely provision of high quality, accessible instructional materials to children who are blind or other persons with print disabilities. The NIMAS refers to a standard for source files of print instructional materials created by publishers that may be converted into accessible instructional materials.

In accordance with 22 Pa. Code §711.45, the Charter School, shall, in a timely manner, provide print instructional materials in specialized, accessible formats (that is, Braille, audio, digital, large-print, and the like) to children who are blind or other persons with print disabilities, as defined in 2 U.S.C.A. § 135a (regarding books and sound-reproduction records for blind and other physically handicapped residents; annual appropriations; and purchases).

The Charter School, shall, in a timely manner, provide instructional materials required under 22 Pa. Code §711.45(a), if they take steps to ensure that children who are blind or other persons with print disabilities have access to their accessible format instructional materials at the same time that students without disabilities have access to instructional materials. The Charter School will not withhold instructional materials from other students until instructional materials in accessible formats are available.

Receipt of a portion of the instructional materials in alternate accessible or specialized format will be considered receipt in a timely manner if the material received covers the chapters that are currently being taught in the student’s class.

If a child who is blind or other person with a print disability enrolls in the Charter School after the start of the school year, Charter School shall take steps to ensure that the student has access to accessible format instructional materials within 10 school days from the time it is determined that the child requires printed instructional materials in an alternate accessible or specialized format.

The Charter School may coordinate with the National Instructional Materials Access Center (NIMAC) to facilitate the production of and delivery of accessible materials to children who are blind or other persons with print disabilities. The NIMAC refers to the central repository, established under section 674(e) of the Education of Individuals with Disabilities Education Act, which is responsible for processing, storing and distributing NIMAS files of textbooks and core instructional materials.

Schools coordinating with NIMAC shall require textbook publishers to deliver the contents of print instructional materials to the NIMAC in NIMAS format files on or before delivery of the print instructional materials to the School. Schools that choose not to coordinate with NIMAC may require that publishers deliver the contents of print instructional materials to the NIMAC in NIMAS format files on or before delivery of the print instructional materials to the School.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

DRAFT

Pennwood Cyber Charter School

Board of Trustees Policy

Alternate Assessment of Students Policy

The Board of Trustees of the Charter School (“Charter School”) approves that the CEO or their designee shall ensure that all children with disabilities are included in all general state and district-wide assessment programs, including the Pennsylvania System of School Assessment (“PSSA”), with appropriate accommodations or alternate assessments where necessary and as indicated in their respective IEPs.

An assessment is a valid and reliable measurement of a student’s performance on a set of academic standards in a subject area that captures the students understanding of the set as a whole and the central concepts, knowledge and skills of each content area. As part of the new regulations in place since March 1, 2014, Pennsylvania’s Core Standards offer a set of rigorous, high-quality academic expectations in English Language Arts and Mathematics that all students should master by the end of each grade level.

In compliance with Chapter 4 (22 Pa Code §4.11), the PA Core State Standards are a set of identified learning skills in English Language Arts and Mathematics written by Pennsylvania educators to meet the needs of Pennsylvania’s students. They set the benchmarks and guidelines for what a student should learn and master at the end of each grade level. The PA Core Standards are similar to the Common Core State Standards (CCSS). Students in grades 3 through 8 will continue to be assessed through the PSSA, which will include material aligned to the PA Core Standards only as of 2015.

The Keystone Exams are given in Algebra 1, Literature and Biology and replace the grade 11 PSSA for accountability purposes. The Keystones have also been aligned to the PA Core Standards. Therefore, all students with disabilities, except those students taking the PASA, are required to take the Keystone Exams no later than 11th grade. Pennsylvania has developed an alternative means for some students to demonstrate proficiency on the PA Core Standards, if needed.

The Pennsylvania Alternate System of Assessment (PASA) is a statewide alternate assessment designed for students with the most significant cognitive disabilities. Specifically, it is intended for those who are unable to participate meaningfully in the PSSA even with accommodations. By administering the PASA to students with severe disabilities, schools achieve compliance with federal laws and the Pennsylvania School Code that require that all students participate in the statewide accountability system.

Students who meet the eligibility criteria for the alternate assessment as determined annually by the IEP team take PASA in grades 3, 4, 5, 6, 7, 8, and 11. The PASA is an individually administered test given each spring to students by their teacher or another certified Test Administrator who knows the student well. Test administration can be adapted so that even students with the most severe disabilities can participate in the assessment and receive a score. Like the PSSA, the PASA is designed to take a snapshot of student's typical performance on a small sample of academic skills derived from the PA Core Standards.

The PASA will only include items related to the Alternate Eligible Content. The educational decisions about content rests with the Charter School IEP team and the decisions are based on individual educational needs and involvement and progress in the general education curriculum. The Alternate Eligible Content is located on the PaTTAN website under Initiatives – Students with Significant Cognitive Disabilities.

Pennwood Cyber Charter School (“Charter School”) must maintain information regarding the number of children who: participate in regular assessments; were provided accommodations in order to participate in those assessments; and participate in alternate assessments.

The CEO or their designee is directed to develop procedures to ensure that students with disabilities participate in the PSSA or PASA and the Keystone Exam to the extent consistent with applicable law.

The CEO or their designee is directed to monitor student participation in statewide assessment to foster participation.

The CEO or their designee is directed to provide training opportunities to personnel regarding statewide assessment participation and PSSA and PASA and the Keystone Exam requirements.

The CEO or their or her designee is directed to make Pennsylvania’s guidelines regarding statewide assessments available to personnel.

The CEO or their designee is directed to develop procedures to prepare students in test-taking techniques prior to test administration.

The CEO/ or their designee is directed to review assessment data and use data to drive any needed program changes. The CEO or their designee is directed to report to the Board what changes are recommended and needed.

The CEO/ or their designee must maintain information regarding the performance of children with disabilities on regular assessments and on alternate assessments.

IEPs must include a description of benchmarks or short-term objectives for children who take alternate assessments aligned to alternate achievement standards. IEPs must, if the IEP team determines that the child shall take an alternate assessment on a particular statewide or school-wide assessment of student achievement, provide a statement of why the child cannot participate in the regular assessment, and why the particular alternate assessment selected is appropriate for the child.

IEPs must include a statement of any accommodations that are necessary to measure the academic achievement and functional performance of the child on statewide and district-wide assessments consistent with law. Under Chapter 4, IEP Teams will determine successful completion of graduation requirements for students with disabilities. Students with disabilities may attain the academic standards by completion of their IEPs under the IDEA and/or Chapter 4.

IEPs must, if the IEP team determines that the child shall take an alternate assessment on a particular statewide or school-wide assessment of student achievement, provide a statement of why the child cannot participate in the regular assessment, and why the particular alternate assessment selected is appropriate for the child.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

DRAFT

Pennwood Cyber Charter School

2023-2024 School Year

***Annual Public Notice of Special Education Services and Programs and
Rights for Students with Disabilities
And
Notification of Rights under the Family Educational Rights and Privacy Act***

All children with disabilities residing in the Commonwealth, regardless of the severity of their disabilities, and who are in need of special education and related services, are to be located, identified and evaluated. This responsibility is required by a federal law called the Individuals with Disabilities Education Improvement Act of 2004, 20 U.S.C. 1200 *et. seq.* (“IDEA 2004”).

Chapter 711 of Title 22 of the Pennsylvania Code requires the publication of a notice to parents regarding public awareness activities sufficient to inform parents of Pennwood Cyber Charter School (“Charter School”) children of available special education services and programs and how to request those services and programs, and of systematic screening activities that lead to the identification, location and evaluation of children with disabilities enrolled in Charter School.

In addition, the federal Family Educational Rights and Privacy Act of 1974 (“FERPA”), which protects confidentiality, requires educational agencies to notify parents annually of their confidentiality rights.

Charter School fulfills its duties with this Annual Notice and has incorporated several sections of the PaTTAN Procedural Safeguards Notice and other applicable guidelines from the Pennsylvania Department of Education into the Board-approved Child Find Notice and Policies and Procedures described below.

The Charter School also directs parents to the procedural safeguards notice from PaTTAN available at the School’s main office for additional information regarding rights and services.

Parents may contact Charter School’s **Chief Executive Officer or their designee or the Director of Special Education** at any time to request a copy of the Procedural Safeguards Notice or with any other questions about special education services, screenings, policies, or procedures. The Procedural Safeguards Notice is provided to parents of special education students by Charter School once per school year or: (1) upon initial referral or parent request for evaluation; (2) upon filing by parents of their first State complaint under 34 CFR §§300.151 through 300.153 and upon filing by parents of their first due process complaint under §300.507 in a school year; (3) when a decision is made to take a disciplinary action that constitutes a change of placement of a child with a disability because of a violation of a code of student conduct; and (4) upon parent request. [34 CFR §300.504(a)].

The purpose of this Annual Notice is to comply with Charter School’s obligations under Chapter 711 of Title 22 of the Pennsylvania Code and to describe: (1) the types of disabilities that might qualify the child for special education; (2) the special education programs and related services that are available; (3) the process by which Charter School screens and evaluates such students to determine eligibility; (4) the special rights that pertain to such children and their parents or legal guardians; and (5) the confidentiality rights that pertain to student information.

A copy of this Annual Notice is also available on the School’s website at:
<https://www.connectionsacademy.com/pennwood-cyber-charter-school/>

Qualifying for special education and related services

Under the federal Individuals with Disabilities Education Improvement Act of 2004, or “IDEA 2004,” children qualify for special education and related services if they have one or more of the following disabilities and, as a result, need special education and related services: intellectual disability; hearing impairment, including deafness; speech or language impairment; visual impairment, including blindness; emotional disturbance; orthopedic impairment; autism; traumatic brain injury; other health impairment; specific learning disability; deaf-blindness; or multiple disabilities. To the extent applicable in a Local Education Agency (“LEA”), children from 3 years through school age can receive early intervention services if: the student has a developmental delay or disability as defined by the IDEA; and, because of this delay/disability, the student requires special education. Developmental delays can include one or more of the areas of cognitive, physical, communication, social, emotional, or adaptive development. For more information about early intervention and special education services, parents should contact the school.

IDEA 2004 provides legal definitions of the disabilities that qualify a student for special education and related services, which may differ from those terms used in medical or clinical practice or common usage.

Section 504 Services

Under Section 504 of the federal Rehabilitation Act of 1973, some school-age children with disabilities who do not meet the eligibility criteria outlined above might be eligible for special protections and for adaptations and accommodations in instruction, facilities, and activities. Children are entitled to such protections, adaptations, and accommodations if they have a mental or physical disability that substantially limits or prohibits participation in or access to an aspect of the school program and otherwise qualify under the applicable state and federal laws, including Chapter 711 of Title 22 of the Pennsylvania Code and Section 504.

The Charter School must ensure that qualified handicapped students have equal opportunity to participate in the School program and activities to the maximum extent appropriate for each individual student. In compliance with applicable state and federal laws, Charter School provides to each qualifying protected handicapped student without discrimination or cost to the student or family, those related aids, services or accommodations which are needed to provide equal opportunity to participate in and obtain the benefits of the school program and activities to the maximum extent appropriate to the student’s abilities and to the extent required by the laws.

These services and protections for “protected handicapped students” may be distinct from those applicable to eligible or thought-to-be eligible students. Charter School or the parent may initiate an evaluation if they believe a student is a protected handicapped student. For further information on the evaluation procedures and provision of services to protected handicapped students, parents should contact the school.

Least Restrictive Environment (“LRE”)

The Charter School ensures that children with disabilities are educated to the maximum extent possible in the regular education environment or “least restrictive environment”. To the maximum extent appropriate, students with disabilities are educated with students who are not disabled. Special classes, separate schooling, or other removal of students with disabilities from the general educational environment occurs only when the nature or severity of the disability is such that education in general education classes, even with the use of supplementary aids and services, cannot be achieved satisfactorily. Programs and services available to students with disabilities might include: (1) regular class placement with supplementary aides and services provided as needed in that environment; (2)

regular class placement for most of the school day with itinerant services by a special education teacher either in or out of the regular classroom; (3) regular class placement for most of the school day with instruction provided by a special education teacher in a resource classroom; (4) part time special education class placement in a regular public school or alternative setting; and (5) special education class placement or special education services provided outside the regular class for most or all of the school day, either in a regular public school or alternative setting. This is a team decision which includes the Charter School and Parents.

Depending on the nature and severity of the disability and least restrictive environment consideration, Charter School could provide special education programs and services as determined appropriate by the IEP team, in locations such as: (1) the classroom/building the child would attend if not disabled; (2) an alternative regular class either in or outside the school; (3) a special education center operated by an Intermediate Unit; (4) an approved private school or other private facility licensed to serve children with disabilities; (5) a residential school; (6) approved out-of-state program; or (7) the home. This is a team decision which includes the Charter School and the Parents.

Special education services are provided according to the educational needs of the child, not the category of disability. Types of services that may be available, depending upon the child's disability and needs might include, but are not limited to: (1) learning support; (2) life skills support; (3) emotional support; (4) deaf or hearing-impaired support; (5) blind or visually-impaired support; (6) physical support; (7) autistic support; (8) multiple disabilities support; (9) speech and language support; (10) extended school year support; and (11) vision support. This is a team decision which includes the Charter School and the Parents.

Related services are designed to enable the child to participate in or access his or her program of special education. Examples of related services that a child may require include, but are not limited to: speech and language therapy; transportation; occupational therapy; physical therapy; school nursing services; audiology counseling services; parent counseling or training; certain medical services for diagnostic or evaluation purposes; social work; recreation; and transition. Some students may also be eligible for extended school year services if determined needed by their IEP teams in accordance with Chapter 711 regulations.

The Charter School, in conjunction with parents, determines the type and intensity of special education and related services that a particular child needs based on the unique program of special education and related services that the School develops for that child. The child's program is described in writing in an individualized education program, or "IEP," which is developed by an IEP team. The participants in the IEP team are dictated by IDEA 2004. The parents of the child have the right to be notified of and to be offered participation in all meetings of their child's IEP team. The IEP is revised as often as circumstances warrant, but reviewed at least annually. The law requires that the program and placement of the child, as described in the IEP, be reasonably calculated to ensure meaningful educational benefit to the student. In accordance with IDEA 2004, there may be situations in which a Charter School may hold an IEP team meeting if the parents refuse or fail to attend the IEP team meeting.

IEPs generally contain: (1) a statement of the student's present levels; (2) a statement of measurable annual goals established for the child; (3) a statement of how the child's progress toward meeting the annual goals will be measured and when periodic reports will be provided; (4) a statement of the special education and related services and supplementary aids and services, and a statement of the program modifications or supports for School personnel that will be provided, if any; (5) an explanation of the extent, if any, to which the child will not participate with nondisabled children in the regular class and in activities; (6) a statement of any individual appropriate accommodations that are necessary to measure the performance of the child on State and School assessments; and (7) the projected date for the beginning of the services and modifications, and the anticipated frequency,

location, and duration of those services or modifications.

Beginning not later than the first IEP to be in effect when the child turns 14, or younger if determined appropriate by the IEP Team, and updated annually, thereafter, the IEP must include appropriate measurable postsecondary goals and transition services needed to assist in reaching those goals. Charter School must invite the child to the IEP team meeting at which the transition plan is developed.

Beginning no later than one year before the child reaches the age of majority under State law, the IEP must include a statement that the child has been informed of the child's rights, if any, that will transfer to the child on reaching the age of majority.

Screening and Evaluation Procedures for Children to Determine Eligibility

Screening

Charter School has established a system of screening which may include pre-referral intervention services to accomplish the following:

- (1) Identification and provision of initial screening for students prior to referral for a special education evaluation.
- (2) Provision of peer support for teachers and other staff members to assist them in working effectively with students in the general education curriculum and special education curriculum.
- (3) Identification of students who may need special education services and programs.

The screening process includes:

Hearing and vision screening in accordance with Section 1402 of the Public School Code of 1949 (24 P. S. § 14-1402) for the purpose of identifying students with hearing or vision difficulty so that they can be referred for assistance or recommended for evaluation for special education.

Screening at reasonable intervals to determine whether all students are performing based on grade-appropriate standards in core academic subjects.

The Charter School has established and implements procedures to locate, identify, and evaluate children suspected of being eligible for special education. These procedures involve screening activities which may also include, but are not limited to: review of data and student records; motor screening; and speech and language screening. The School assesses the current achievement and performance of the child, designs school-based interventions, and assesses the effectiveness of interventions. If the concern can be addressed without special education services, or is the result of limited English proficiency or appropriate instruction, a recommendation may be made for interventions other than a multidisciplinary team evaluation.

Except as indicated above or otherwise announced publicly, screening activities take place on-going at periods throughout the school year. Screening is conducted at Charter School, unless other arrangements are necessary or arranged.

The screening of a student by a teacher or specialist to determine appropriate instructional strategies for curriculum implementation is not to be considered an evaluation for eligibility for special education and related services. Parents have the right to request a multidisciplinary team evaluation at any time, regardless of the outcome of the screening process.

If parents need additional information regarding the purpose, time, and location of screening activities, they should call or write the Director of Special Education of Charter School at:

Pennwood Cyber Charter School
555 Ryan Run Road
York, PA 17404¹

Screening or pre-referral intervention activities may not serve as a bar to the right of a parent to request an evaluation, at any time, including prior to or during the conduct of screening or pre-referral intervention activities.

Disproportionality

In accordance with Chapter 711, in the event that Charter School would ever meet the criteria in 34 CFR § 300.646 (relating to disproportionality), as established by the State Department of Education, the services that would be required would then include:

(1) A verification that the student was provided with appropriate instruction in reading, including the essential components of reading instruction (as defined in section 1208(3) of the Elementary and Secondary Education Act (ESEA) (20 U.S.C.A. § 6368(3)), and appropriate instruction in math.

(2) For students with academic concerns, an assessment of the student's performance in relation to State-approved grade-level standards.

(3) For students with behavioral concerns, a systematic observation of the student's behavior in the school environment where the student is displaying difficulty.

(4) A research-based intervention to increase the student's rate of learning or behavior change based on the results of the assessments under paragraph (2) or (3), or both.

(5) Repeated assessments of achievement or behavior, or both, conducted at reasonable intervals, reflecting formal monitoring of student progress during the interventions.

(6) A determination as to whether the student's assessed difficulties are the result of a lack of instruction or limited English proficiency.

(7) A determination as to whether the student's needs exceed the functional ability of the regular education program to maintain the student at an appropriate instructional level.

(8) Documentation that information about the student's progress as identified in paragraph (5) was periodically provided to the student's parents.

Evaluation

An evaluation under IDEA 2004 involves the use of a variety of assessment tools and strategies to gather relevant functional, developmental, and academic information about the child, including information provided by the parent that may assist in determining whether the child is a child with a disability and the content of the child's IEP. Charter School does not use any single measure or assessment as a sole criterion for determining whether a child is a child with a disability and for determining an appropriate educational program for the child. Technically sound instruments are used to assess the relative contribution of cognitive and behavioral factors in addition to physical or developmental factors.

Parental consent must be obtained by Charter School prior to conducting an initial evaluation to determine if the child qualifies as a child with a disability, and before providing special education and related services to the child. Parental consent for an evaluation shall not be construed as consent for

¹ School office phone number will be provided upon authorization of charter and administrative facility.

their child to receive special education and related services. The screening of a child by a teacher or specialist to determine appropriate instructional strategies for curriculum implementation is not considered to be an evaluation for eligibility for special education and related services; therefore, parental consent is not required in this instance.

The law contains additional provisions and due process protections regarding situations in which parental consent for an initial evaluation is absent or refused discussed more fully below and in the PaTTAN Procedural Safeguards Notice. If you have any questions about where to obtain a copy of the PaTTAN Procedural Safeguards Notice, kindly contact the **Director of Special Education, at 555 Ryan Run Road, York, PA 17404²**.

The evaluation process is conducted by a Multi-Disciplinary Team (“MDT”), which includes a teacher, other qualified professionals who work with the child, the parents and other members as required by law. The Multi-Disciplinary Evaluation (“MDE”) process must be conducted in accordance with specific timelines and must include protective procedures. For example, tests and procedures used as part of the Multi-Disciplinary Evaluation may not be racially or culturally biased.

The MDE process culminates with a written report called an Evaluation Report (“ER”). This report makes recommendations about a student’s eligibility for special education based on the presence of a disability and the need for specially designed instruction.

Parents who think their child is eligible for special education may request, at any time, that Charter School conduct a Multi-Disciplinary Evaluation. **Requests for a Multi-Disciplinary Evaluation must be made in writing to the Director of Special Education, at 555 Ryan Run Road, York, PA 17404.**

If a parent makes an oral request for a Multi-Disciplinary Evaluation, Charter School shall provide the parent with a form(s) for that purpose. If the public school denies the parents’ request for an evaluation, the parents have the right to challenge the denial through an impartial hearing or through voluntary alternative dispute resolution such as mediation.

Reevaluations are conducted if Charter School determines that the educational or related services needs, including improved academic achievement and functional performance, of the child warrant a reevaluation; or if the child’s parent or teacher requests a reevaluation. A reevaluation may occur not more than once a year, unless the parent and Charter School agree; and must occur once every 3 years, unless the parent and Charter School agree that a reevaluation is unnecessary. Students with intellectual disability must be reevaluated every two years under State law.

Educational Placement

The determination of whether a student is eligible for special education is made by an Individualized Education Program (IEP) team. The IEP team includes: the parents of a child with a disability; not less than one regular education teacher, if the child is, or may be, participating in the regular education environment; not less than one special education teacher, or when appropriate, not less than one special education provider; a representative of the School who is qualified to provide or supervise the provision of specially designed instruction to meet the unique needs of children with disabilities, is knowledgeable about the general education curriculum, and is knowledgeable about the availability of resources of Charter School; an individual who can interpret the instructional implications of evaluation results, who may be a member of the team described above; other individuals, at the discretion of the parent or the agency, who have knowledge or special expertise regarding the child, including related services personnel as appropriate; and whenever appropriate, a child with a

² School office phone number will be provided upon authorization of charter and administrative facility.

disability. IEP team participation is directly addressed by the regulations. Additionally, the Charter School must invite the child with a disability to attend the child's IEP Team meeting if a purpose of the meeting includes the consideration of the postsecondary goals for the child and the transition services needed to assist the child in reaching those goals. If the child does not attend the IEP Team meeting, the Charter School must take other steps to ensure that the child's preferences and interests are considered. IEP team participation is directly addressed by IDEA regulations.

If the student is determined to be eligible for special education, the IEP team develops a written education plan called an IEP. The IEP shall be based in part on the results of the Multi-Disciplinary Evaluation. When the IEP team decides that a student is not eligible for special education, recommendations for educational programming in regular education may be developed from the Evaluation Report (ER).

Placement must be made in the "least restrictive environment", as described more fully above, in which the student's needs can be met with special education and related services. All students with disabilities must be educated to the maximum extent appropriate with children who are not disabled.

Parents and Surrogate Parents

For purposes of this Notice, Charter School considers parents to be biological or adoptive parents of a child; a foster parent; a guardian generally authorized to act as the child's parent, or authorized to make educational decisions for the child; an individual acting in the place of a biological or adoptive parent (including a grandparent, stepparent, or other relative) with whom the child lives, or an individual who is legally responsible for the child's welfare; or a surrogate parent.

A surrogate parent must be appointed when no parent can be identified; a public agency, after reasonable efforts, cannot locate a parent; the child is a ward of the State under the laws of Pennsylvania, or the child is an unaccompanied homeless youth as defined by the McKinney-Vento Homeless Assistance Act, 42 U.S.C. Sec. 11434a(6). A person selected as a surrogate parent must not be an employee of the SEA, Charter School, or any other agency that is involved in the education or care of the child; has no personal or professional interest that conflicts with the interest of the child the surrogate parent represents; and has knowledge and skills that ensure adequate representation of the child. The surrogate parent may represent the child in all matters relating to the identification, evaluation, and educational placement of the child and the provision of FAPE to the child. Reasonable efforts must be made to ensure the assignment of a surrogate parent not more than 30 days after it is determined that the child needs a surrogate parent.

Prior Written Notice

The Charter School will notify the parent within a reasonable time before the Charter School before the Charter School takes the following action(s), pursuant to the Notice of Recommended Educational Placement/Prior Written Notice ("NOREP/PWN") regarding the child's educational program. For more information, see the annotated NOREP/PWN on the PaTTAN website or available at the Charter School office.

- a. Proposes to initiate or to change the identification, evaluation, or educational placement of the child, or the provision of a free appropriate public education ("FAPE") to the child; or
- b. Refuses to initiate or to change the identification, evaluation, or educational placement of your child, or the provision of FAPE to the child.
- c. Change of placement for disciplinary reasons. (Must issue *Procedural Safeguards Notice*)
- d. Due process hearing, or an expedited due process hearing, initiated by Charter School.
- e. Refusal of Charter School to agree to an independent educational evaluation ("IEE")

- at public expense.
- f. Propose initial provision of special education and related services (For this action, the school may not proceed without your written consent in Section 8 of this document)
- g. Graduation from high school
- h. Exiting special education
- i. Exiting high school due to exceeding the age eligibility for a free appropriate public education (FAPE)
- j. Extended School Year (ESY) services
- k. Other [to be determined by the IEP Team]

In Pennsylvania, prior written notice is provided by means of a Prior Written Notice Form/Notice of Recommended Educational Placement (“NOREP”). You should be given reasonable notice of this proposal or refusal so that if you do not agree with Charter School you may take appropriate action. Reasonable Notice means ten (10) days.

The prior written notice must:

Describe the action that Charter School proposes or refuses to take:

1. Describe the action that the Charter School proposes or refuses to take;
2. Explain why Charter School is proposing or refusing to take the action;
3. Describe each evaluation procedure, assessment, record, or report Charter School used in deciding to propose or refuse the action;
4. Include a statement that you have protections under the procedural safeguards provisions in Part B of IDEA;
5. Tell how you can obtain a description of the procedural safeguards if the action that Charter School is proposing or refusing is not an initial referral for evaluation;
6. Include resources for you to contact for help in understanding Part B of the IDEA;
7. Describe any other choices that your child’s IEP Team considered and the reasons why those choices were rejected; and
8. Provide a description of other reasons why Charter School proposed or refused the action.

The notice must be:

- 1) Written in language understandable to the general public; and
- 2) Provided in your native language or other mode of communication you use, unless it is clearly not feasible to do so.
- 3) If your native language or other mode of communication is not a written language, Charter School will ensure that:
 - a) The notice is translated for you orally or by other means in your native language or other mode of communication;
 - b) You understand the content of the notice; and
 - c) There is written evidence that 1 and 2 have been met.

Native language, when used with an individual who has limited English proficiency, means the following:

1. The language normally used by that person, or, in the case of a child, the language normally used by the child's parents;
2. In all direct contact with a child (including evaluation of a child), the language normally used by the child in the home or learning environment.

For a person with deafness or blindness, or for a person with no written language, the mode of communication is what the person normally uses (such as sign language, Braille, or oral communication).

Parental Consent

Consent means (34 CFR §300.9):

- A) The parent has been fully informed of all information relevant to the activity for which consent is sought, in his or her native language, or through another mode of communication;
- B) The parent understands and agrees, in writing, to the carrying out of the activity for which his or her consent is sought, and the consent describes that activity and lists the record (if any) that will be released and to whom; and
- C) The parent understands that the granting of consent is voluntary on the part of the parent and may be revoked at any time.

If a parent revokes consent, that revocation is not retroactive (i.e., it does **not** negate an action that has occurred after the consent was given and before the consent was revoked).

If the parent revokes consent in writing for their child's receipt of special education services after the child is initially provided special education and related services, the Charter School is **not** required to amend the child's education records to remove any references to the child's receipt of special education and related services because of the revocation of consent.

WHEN IS PARENTAL CONSENT NEEDED?

Parental consent is needed in the following instances:

1. When the Charter School proposes to initiate the provision of special education services to the child; and,
2. When the Charter School seeks to evaluate or re-evaluate the child.

Initial Evaluations (34 CFR §300.300)

The Charter School cannot conduct an initial evaluation of your child to determine whether your child is eligible under Part B of the IDEA to receive special education and related services without first providing you with prior written notice of the proposed action and without obtaining your consent as described under the heading Parental Consent.

The Charter School make reasonable efforts to obtain your informed consent for an initial evaluation to decide whether your child is a child with a disability. Your consent for initial evaluation does not mean that you have also given your consent to start providing special education and related services to your child. If you have refused to provide consent or failed to respond to a request to provide

consent for an initial evaluation, the Charter School may, but are not required to, seek to conduct an initial evaluation of your child by utilizing mediation or due process complaint, resolution meeting, and impartial due process hearing procedures. The Charter School will not violate obligations to locate, identify and evaluate your child if we do not pursue an evaluation of your child in these circumstances.

Special rules for initial evaluation of wards of the State

Under Pennsylvania law, if a child is designated a ward of the state, the whereabouts of the parent are not known or the rights of the parent have been terminated in accordance with State law. Therefore, someone other than the parent has been designated to make educational decisions for the child.

For initial evaluations only, if the child is a ward of the State and is not residing with the child's parent, the public agency is not required to obtain informed consent from the parent for an initial evaluation to determine whether the child is a child with a disability if:

1. Despite reasonable efforts to do so, the public agency cannot discover the whereabouts of the parent of the child;
2. The rights of the parents of the child have been terminated in accordance with State law; or
3. The rights of the parent to make educational decisions have been subrogated by a judge in accordance with State law and consent for an initial evaluation has been given by an individual appointed by the judge to represent the child.

Consent for an initial evaluation should, therefore, be obtained from the individual so designated to make educational decisions for the child.

Ward of the State, as used in the IDEA, encompasses two other categories, so as to include a child who is:

1. A foster child who does not have a foster parent;
2. Considered a ward of the State under State law; or
3. In the custody of a public child welfare agency.

Consent for Initial Placement in Special Education (34 CFR §300.300)

We must obtain your informed consent before providing special education and related services to your child for the first time. We must make reasonable efforts to obtain your informed consent before providing special education and related services to your child for the first time.

If you do not respond to a request to provide your consent for your child to receive special education and related services for the first time, or if you refuse to give such consent, we may not use the procedural safeguards (i.e. mediation, due process complaint, resolution meeting, or an impartial due process hearing) in order to obtain agreement or a ruling that the special education and related services as recommended by your child's IEP Team may be provided to your child without your consent.

If you refuse to give your consent for your child to start receiving special education and related services, or if you do not respond to a request to provide such consent and we do not provide your child with the special education and related services for which consent is sought, Charter School:

1. Is not in violation of the requirement to make FAPE available to your child for its failure to provide those services to your child; and
2. Is not required to have an IEP meeting or develop an IEP for your child for the special

education and related services for which your consent was requested.

Consent for Reevaluations (34 CFR §300.300)

The Charter School must obtain informed parental consent before a child is reevaluated, unless:

- A) The Charter School took reasonable steps to obtain parental consent of a child's reevaluation; and
- B) Parent did not respond.

Parental consent is not required before:

- A) Reviewing existing data as part of an evaluation or a reevaluation; or
- B) Administering a test or other evaluation that is administered to all children unless, before administration of that test or evaluation, consent is required of parents of all children.

If parents refuse to consent to their child's reevaluation, the Charter School may, but is not required to, pursue the child's reevaluation by using the mediation, due process complaint, resolution meeting, and impartial due process hearing procedures to seek to override parental refusal to consent to a child's reevaluation. As with initial evaluations, the Charter School will not violate obligations under Part B of the IDEA if it declines to pursue the reevaluation in this manner.

The Charter School may not use parental refusal to consent to one service or activity in order to deny parents or their children any other service, benefit, or activity.

What is Documentation of Reasonable Efforts to Obtain Parental Consent? (34 CFR §300.300, §300.322)

The Charter School will take steps to ensure that one or both of the parents of a child with a disability are present at each IEP Team meeting or are afforded the opportunity to participate, including:

- A) Notifying parents of the meeting early enough to ensure that they will have the opportunity to attend; and
- B) Scheduling the meeting at a mutually agreed upon time and place.

If the Charter School is unable to convince parents to attend an IEP Team meeting, the meeting may still be conducted; however, the Charter School must maintain documentation of reasonable efforts to obtain parental consent for initial evaluations, to provide special education and related services for the first time, for reevaluation and to locate parents of wards of the State for initial evaluations. The documentation will include a record of attempts in these areas, such as:

- A) Detailed records of telephone calls made or attempted and the results of those calls;
- B) Copies of correspondence sent to the parents and any responses received; and
- C) Detailed records of visits made to the parent's home or place of employment and the results of those visits.

When is Consent Not Required Related to Evaluate?

1. Review existing data as part of your child's evaluation or a reevaluation; or
2. Give your child a test or other evaluation that is given to all children unless, before that test or evaluation, consent is required from all parents of all children.

When there is Refusal to Consent to a Reevaluation?

If you refuse to consent to your child's reevaluation, we may, but are not required to, pursue your child's reevaluation by using the mediation, due process complaint, resolution meeting, and impartial due process hearing procedures to seek to override your refusal to consent to your child's reevaluation. As with initial evaluations, we do not violate obligations under Part B of the IDEA if we decline to pursue the reevaluation in this manner.

We may not use your refusal to consent to one service or activity to deny you or your child any other service, benefit, or activity.

Disagreements with an Evaluation

a. Independent Educational Evaluations (34 CFR §300.502)

1) General

As described below, you have the right to obtain an independent educational evaluation (IEE) of your child if you disagree with the evaluation of your child that was obtained by Charter School. If you request an IEE, Charter School must provide you with information about where you may obtain an IEE and about Charter School's criteria that apply to IEEs.

2) Definitions

- a) *Independent educational evaluation* means an evaluation conducted by a qualified examiner who is not employed by Charter School and responsible for the education of your child.
- b) *Public expense* means that Charter School either pays for the full cost of the evaluation or ensures that the evaluation is otherwise provided at no cost to you, consistent with the provisions of Part B of the IDEA, which allow each State to use whatever State, local, Federal and private sources of support are available in the State to meet the requirements of Part B of the Act.

3) Parent right to evaluation at public expense

You have the right to one IEE of your child at public expense if you disagree with an evaluation of your child obtained by Charter School, subject to the following conditions:

- a) If you request an IEE of your child at public expense, Charter School must, without unnecessary delay, either: (a) File a due process complaint to request a hearing to show that its evaluation of your child is appropriate; or (b) Provide an IEE at public expense, unless Charter School demonstrates in a hearing that the evaluation of your child that you obtained did not meet Charter School's criteria.
- b) If Charter School requests a hearing and the final decision is that Charter School's evaluation of your child is appropriate, you still have the right to an IEE, but not at public expense.
- c) If you request an IEE of your child, Charter School may ask why you object to the evaluation of your child obtained by Charter School. However, Charter School may not require an explanation and may not unreasonably delay either providing the IEE of your child at public expense or filing a due process complaint to request a due process hearing to defend Charter School's evaluation of your child.

- d) You are entitled to only one IEE of your child at public expense each time Charter School conducts an evaluation of your child with which you disagree.

Charter School criteria

If an IEE is at public expense, the criteria under which the evaluation is obtained, including the location of the evaluation and the qualifications of the examiner, must be the same as the criteria that Charter School uses when it initiates an evaluation (to the extent those criteria are consistent with your right to an IEE).

Except for the criteria described above, Charter School may not impose conditions or timelines related to obtaining an IEE at public expense.

b. Parent-initiated evaluations

If you obtain an IEE of your child at public expense or you share with Charter School an evaluation of your child that you obtained at private expense:

- 1) Charter School must consider the results of the evaluation of your child, if it meets Charter School's criteria for IEEs, in any decision made with respect to the provision of FAPE to your child; **and**
- 2) You or Charter School may present the evaluation as evidence at a due process hearing regarding your child.

c. Requests for evaluations by hearing officers

If a hearing officer requests an IEE of your child as part of a due process hearing, the cost of the evaluation must be at public expense.

ANNUAL NOTICE OF RIGHTS REGARDING STUDENT RECORDS: CONSENT FOR DISCLOSURE OF PERSONALLY IDENTIFIABLE INFORMATION (34 CFR §300.622)

Unless the information is contained in education records, and the disclosure is authorized without parental consent under FERPA, your consent must be obtained before personally identifiable information is disclosed to parties other than officials of participating agencies. Except under the circumstances specified below, your consent is not required before personally identifiable information is released to officials of participating agencies for purposes of meeting a requirement of Part B of the IDEA.

Parent consent consent, or consent of an eligible child who has reached the age of majority under State law, must be obtained before personally identifiable information is released to officials of participating agencies providing or paying for transition services.

ACCESS TO CONFIDENTIAL INFORMATION RELATED TO STUDENT (34 CFR §300.611)

1. Related to the confidentiality of information, the following definitions apply:

- a. *Destruction* means physical destruction or removal of personal identifiers from information so that the information is no longer personally identifiable.
- b. *Education records* means the type of records covered under the definition of "education records" in 34 CFR Part 99 (the regulations implementing the Family Educational Rights and Privacy Act of 1974, 20 U.S.C. 1232g (FERPA)).
- c. *Participating agency* means any Charter School, agency or institution that collects, maintains, or uses personally identifiable information, or from which information is obtained, under Part B of the IDEA.

d. **Personally identifiable (34 CFR § 300.32)** means information that has:

- 1) Your child's name, your name as the parent, or the name of another family member;
- 2) Your child's address;
- 3) A personal identifier, such as your child's social security number or student number;
- or**
- 4) A list of personal characteristics or other information that would make it possible to identify your child with reasonable certainty.

2. Access Rights (34 CFR §300.613)

a. Parent Access

Charter School must permit you to inspect and review any education records relating to your child that are collected, maintained, or used by Charter School under Part B of the IDEA. Charter School must comply with your request to inspect and review any education records on your child without unnecessary delay and before any meeting regarding an IEP, or any impartial due process hearing (including a resolution meeting or a hearing regarding discipline), and in no case more than 45 calendar days after you have made a request.

- 1) Your right to inspect and review education records includes:
- 2) Your right to a response from Charter School to your reasonable requests for explanations and interpretations of the records;
- 3) Your right to request that Charter School provide copies of the records if you cannot effectively inspect and review the records unless you receive those copies;
- and**
- 4) Your right to have your representative inspect and review the records.
 - a) Charter School may presume that you have authority to inspect and review records relating to your child unless advised that you do not have the authority under applicable State law governing such matters as guardianship, or separation and divorce.
 - b) If any education record includes information on more than one child, the parents of those children have the right to inspect and review only the information relating to their child or to be informed of that specific information.
 - c) On request, each Charter School must provide you with a list of the types and locations of education records collected, maintained, or used by Charter School.

b. Other Authorized Access (34 CFR §300.614)

Charter School must keep a record of parties obtaining access to education records collected, maintained, or used under Part B of the IDEA (except access by parents and authorized employees of the participating agency), including the name of the party, the date access was given, and the purpose for which the party is authorized to use the records.

2. Fees

Charter School may charge a fee or copies of records (34 CFR §300.617) that are made for you under Part B of the IDEA, if the fee does not effectively prevent you from exercising your right to inspect and review those records. Charter School may not charge a fee to search for or to retrieve information under Part B of the IDEA.

3. Amendment of Records at Parent's Request (34 CFR §300.618)

If you believe that information in the education records regarding your child collected, maintained, or used under Part B of the IDEA is inaccurate, misleading, or violates the privacy or other rights of your child, you may request Charter School to change the information. Charter School must decide whether

to change the information in accordance with your request within a reasonable period of time of receipt of your request. If Charter School refuses to change the information in accordance with your request, it must inform you of the refusal and advise you of the right to a hearing for this purpose.

4. Opportunity for a Records Hearing (34 CFR §300.619)

Charter School must, on request, provide you an opportunity for a hearing to challenge information in education records regarding your child to ensure that it is not inaccurate, misleading, or otherwise in violation of the privacy or other rights of your child.

a. Hearing Procedures (34 CFR §300.621)

A hearing to challenge information in education records must be conducted according to the following procedures for such hearings under the Family Educational Rights and Privacy Act of 1974, 20 U.S.C. Section 1233g ("FERPA"), 34 CFR § 99.22:

- 1) The educational agency or institution shall hold the hearing within a reasonable time after it has received the request for the hearing from the parent or eligible student.
- 2) The educational agency or institution shall give the parent or eligible student notice of the date, time, and place, reasonably in Pennwood of the hearing.
- 3) The hearing may be conducted by any individual, including an official of the educational agency or institution, who does not have a direct interest in the outcome of the hearing.
- 4) The educational agency or institution shall give the parent or eligible student a full and fair opportunity to present evidence to challenge the content of the student's education records on the grounds that the information contained in the education records is inaccurate, misleading, or in violation of the privacy rights of the student. The parent or eligible student may, at their own expense, be assisted or represented by one or more individuals of his or her own choice, including an attorney.
- 5) The educational agency or institution shall make its decision in writing within a reasonable period of time after the hearing.
- 6) The decision must be based solely on the evidence presented at the hearing, and must include a summary of the evidence and the reasons for the decision.

b. Result of Hearing (34 CFR §300.620)

If, as a result of the hearing, Charter School decides that the information is inaccurate, misleading, or otherwise in violation of the privacy or other rights of the child, it must amend the information accordingly and inform you in writing. If, as a result of the hearing, Charter School decides that the information is not inaccurate, misleading, or otherwise in violation of the privacy or other rights of your child, Charter School must inform you of the right to place in the records that Charter School maintains on your child a statement commenting on the information or providing any reasons you disagree with the decision of the participating agency.

Such an explanation placed in the records of your child must:

1. Be maintained by Charter School as part of the records of your child as long as the record or contested portion is maintained by Charter School; **and**
2. If Charter School discloses the records of your child or the challenged portion to any party, the explanation must also be disclosed to that party.

c. Safeguards (34 CFR §300.623)

Charter School must protect the confidentiality of personally identifiable information at collection, storage, disclosure, and destruction stages.

One official at Charter School must assume responsibility for ensuring the confidentiality of any personally identifiable information.

All persons collecting or using personally identifiable information must receive training or instruction regarding State policies and procedures regarding confidentiality under Part B of the IDEA and

FERPA.

Charter School must maintain, for public inspection, a current listing of the names and positions of those employees within Charter School who have access to personally identifiable information.

5. Destruction of Information (34 CFR §300.624)

Charter School must inform you when personally identifiable information collected, maintained, or used is no longer needed to provide educational services to your child, and the information must be destroyed at your request.

However, a permanent record of your child's name, address, and phone number, his or her grades, attendance record, classes attended, grade level completed, and year completed may be maintained without time limitation.

PROCEDURES FOR DISCIPLINARY EXCLUSION OF CHILDREN WITH DISABILITIES.

There are special rules in Pennsylvania for excluding children with disabilities for disciplinary reasons:

AUTHORITY OF SCHOOL PERSONNEL (34 CFR §300.530)

1. Case-by-case determination

School personnel may consider any unique circumstances on a case-by-case basis, when determining whether a change of placement, made in accordance with the following requirements related to discipline, is appropriate for a child with a disability who violates a school code of student conduct.

2. General

To the extent that they also take such action for children without disabilities, school personnel may, for not more than **10 consecutive school days**, remove a child with a disability (other than a child with intellectual disability) who violates a code of student conduct from his or her current placement to an appropriate interim alternative educational setting, another setting, or suspension. School personnel may also impose additional removals of the child of not more than **10 consecutive school days** in that same school year for separate incidents of misconduct, as long as those removals do not constitute a change of placement (see *Change of Placement Because of Disciplinary Removals* for the definition, below) or **exceed 10 cumulative school days in a school year**. Once a child with a disability has been removed from his or her current placement for a total of **10 school days** in the same school year, Charter School must, during any subsequent days of removal in that school year, provide services to the extent required below under the sub-heading *Services*.

3. Additional authority

If the behavior that violated the student code of conduct was not a manifestation of the child's disability (see *Manifestation determination*, below) and the disciplinary change of placement would exceed **10 consecutive school days**, Charter School may apply the disciplinary procedures to that child with a disability in the same manner and for the same duration as it would to children without disabilities, except that the school must provide services to that child as described below under *Services*. The child's IEP Team determines the interim alternative educational setting for such services. Under PA special education regulations, a disciplinary exclusion of a student with a disability for **more than 10 cumulative school days** in a school year can be considered a pattern so as to be deemed a change in educational placement (explained under *Change of Placement Because of Disciplinary Removals*). Charter School is required to issue a NOREP/Prior Written Notice to parents prior to a removal that constitutes a change in placement (removal for more than 10 consecutive days or more than 10 cumulative days).

4. Services

The services that must be provided to a child with a disability who has been removed from the child's current placement may be provided to an interim alternative educational setting. A Charter School is only required to provide services to a child with a disability who has been removed from his or her current placement for **10 school days or less** in that school year, if it provides services to a child without disabilities who has been similarly removed. Students may have the responsibility to make up exams and work missed while being disciplined by suspension and may be permitted to complete these assignments within guidelines established by their Charter School.

A child with a disability who is removed from the child's current placement for **more than 10 consecutive school days** must:

- a. Continue to receive educational services, so as to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP; **and**
- b. Receive, as appropriate, a functional behavioral assessment, and behavioral intervention services and modifications that are designed to address the behavior violation so that it does not happen again.

After a child with a disability has been removed from his or her current placement for **more than 10 school days** during one school year, or **if** current removal is for **10 consecutive school days** or less, **and** if the removal is not a change of placement (see definition below), **then** school personnel, in consultation with at least one of the child's teachers, determine the extent to which services are needed to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP.

If the removal is a change of placement (see definition below), the child's IEP Team determines the appropriate services to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP.

5. Manifestation Determination

Within 10 school days of any decision to change the placement of a child with a disability because of a violation of a code of student conduct, Charter School, the parent, and relevant members of the IEP Team (as determined by the parent and Charter School) must review all relevant information in the student's file, including the child's IEP, any teacher observations, and any relevant information provided by the parents to determine:

- a. If the conduct in question was caused by, or had a direct and substantial relationship to, the child's disability; **or**
- b. If the conduct in question was the direct result of Charter School's failure to implement the child's IEP.

If Charter School, the parent, and relevant members of the child's IEP Team determine that either of those conditions was met, the conduct must be determined to be a manifestation of the child's disability.

If Charter School, the parent, and relevant members of the child's IEP Team determine that the conduct in question was the direct result of Charter School's failure to implement the IEP, Charter School must take immediate action to remedy those deficiencies.

6. Determination that behavior was a manifestation of the child's disability

If Charter School, the parent, and relevant members of the IEP Team determine that the conduct was a manifestation of the child's disability, the IEP Team must either:

- a. Conduct a functional behavioral assessment, unless Charter School had conducted a functional behavioral assessment before the behavior that resulted in the change of placement occurred, and implement a behavioral intervention plan for the child; **or**
- b. If a behavioral intervention plan already has been developed, review the

behavioral intervention plan, and modify it, as necessary, to address the behavior.

Except as described below under the sub-heading **Special circumstances**, Charter School must return the child to the placement from which the child was removed, unless the parent and Charter School agree to a change of placement as part of the modification of the behavioral intervention plan.

7. Special circumstances

Whether or not the behavior was a manifestation of the child's disability, School personnel may remove a student to an interim alternative educational setting (determined by the child's IEP Team) for up to 45 school days, if the child:

- a. Carries a weapon (see the **Definitions** below) to school or has a weapon at school, on school premises, or at a school function under the jurisdiction of Charter School;
- b. Knowingly has or uses illegal drugs (see the **Definitions** below), or sells or solicits the sale of a controlled substance, (see the **Definitions** below), while at school, on school premises, or at a school function under the jurisdiction of Charter School; **or**
- c. Has inflicted serious bodily injury (see the **Definitions** below) upon another person while at school, on school premises, or at a school function under the jurisdiction of Charter School.

8. Definitions

- a. *Controlled substance* means a drug or other substance identified under schedules I, II, III, IV, or V in section 202 (c) of the Controlled Substances Act (21 U.S.C. 812(c)).
- b. *Illegal drug* means a controlled substance; but does not include a controlled substance that is legally possessed or used under the supervision of a licensed health-care professional or that is legally possessed or used under any other authority under that Act or under any other provision of Federal law.
- c. *Serious bodily injury* has the meaning given the term "serious bodily injury" under paragraph (3) of subsection (h) of section 1365 of title 18, United States Code.
- d. *Weapon* has the meaning given the term "dangerous weapon" under paragraph (2) of the first subsection (g) of section 930 of title 18, United States Code.

9. Notification

On the date it makes the decision to make a removal that is a change of placement of the child with a disability because of a violation of a code of student conduct, Charter School must notify the parents of that decision, and provide the parents with a Procedural Safeguards Notice.

Change Of Placement Because Of Disciplinary Removals (34 CFR §300.536)

A removal of a child with a disability from the child's current educational placement is a **change of placement** requiring a NOREP/prior written notice if:

1. The removal is for more than 10 consecutive school days; **or**
2. The removal is for more than 15 cumulative school days; **or**
3. The child has been subjected to a series of removals that constitute a pattern because:
 - a. The series of removals total more than 10 school days in a school year;
 - b. The child's behavior is substantially similar to the child's behavior in previous incidents that resulted in a series of removals; **and**
 - c. Because of such additional factors as the length of each removal, the total amount of time the child has been removed, and the proximity of the removals to one another.

Whether a pattern of removals constitutes a change of placement is determined on a case-by-case basis by Charter School and, if challenged, is subject to review through due process and judicial proceedings.

Determination of Setting (34 CFR §300.531)

The IEP must determine the interim alternative educational setting for removals that are **changes of placement**, and removals under the headings *Special circumstances*, above.

Appeal (34 CFR §300.532)

1.

The parent of a child with a disability may file a due process complaint (see above) to request a due process hearing if he or she disagrees with:

- a. Any decision regarding placement made under these discipline provisions; **or**
- b. The manifestation determination described above.

Charter School may file a due process complaint (see above) to request a due process hearing if it believes that maintaining the current placement of the child is substantially likely to result in injury to the child or to others.

2. Authority of hearing officer

A hearing officer that meets the requirements described under the sub-heading *Impartial Hearing Officer*

must conduct the due process hearing and make a decision. The hearing officer may:

- a. Return the child with a disability to the placement from which the child was removed if the hearing officer determines that the removal was a violation of the requirements described under the heading Authority of School Personnel, or that the child's behavior was a manifestation of the child's disability; or
- b. Order a change of placement of the child with a disability to an appropriate interim alternative educational setting for not more than 45 school days if the hearing officer determines that maintaining the current placement of the child is substantially likely to result in injury to the child or to others.

These hearing procedures may be repeated, if Charter School believes that returning the child to the original placement is substantially likely to result in injury to the child or to others.

Whenever a parent or a Charter School files a due process complaint to request such a hearing, a hearing must be held in accordance with the following:

1. Charter School must arrange for an expedited due process hearing, which must occur within **20** school days of the date the hearing is filed and must result in a determination within **10** school days after the hearing.
2. Unless the parents and Charter School agree in writing to waive the resolution meeting, or agree to use mediation, a resolution meeting must occur within **7** calendar days of receiving notice of the due process complaint. The hearing may proceed unless the matter has been resolved to the satisfaction of both parties within **15** calendar days of receipt of the due process complaint.

A party may appeal the decision in an expedited due process hearing in the same way as they may for decisions in other due process hearings.

Placement During Appeals (34 CFR §300.533)

When the parent or Charter School has filed a due process complaint related to disciplinary matters, the child must (unless the parent and Charter School agree otherwise) remain in the interim alternative educational setting pending the decision of the hearing officer, or until the expiration of the time period specified in 34 CFR §300.530(c) or (g) 1, whichever occurs first, unless the parent and the Charter School agree otherwise.

Special Rules for Students with an Intellectual Disability

The disciplinary removal of a child with an intellectual disability attending either a Charter School for any amount of time is considered a change in placement and requires NOREP/prior written notice (if the disciplinary event does not involve drugs, weapons and/or serious bodily injury). A removal from school is not a change in placement for a child who is identified with an intellectual disability when the disciplinary event involves weapons, drugs, and/or serious bodily injury.

According to certain assurances the Commonwealth entered into related to the PARC consent decree, a Charter School may suspend on a limited basis a student with an intellectual disability who presents a danger to himself or others upon application and approval by the Bureau of Special Education and only to the extent that a student with a disability other than an intellectual disability could be suspended.

Protections For Children Not Yet Eligible For Special Education and Related Services (34 CFR §300.534)

If a child has not been determined eligible for special education and related services and violates a code of student conduct, but Charter School had knowledge (as determined below) before the behavior that brought about the disciplinary action occurred, that the child was a child with a disability, then the child may assert any of the protections described in this notice.

1. Basis of knowledge for disciplinary matters

Charter School must be deemed to have knowledge that a child is a child with a disability if, before the behavior that brought about the disciplinary action occurred:

- a. The parent of the child expressed concern in writing that the child is in need of special education and related services to supervisory or administrative personnel of Charter School, or a teacher of the child;
- b. The parent requested an evaluation related to eligibility for special education and related services under Part B of the IDEA; **or**
- c. The child's teacher, or other Charter School personnel expressed specific concerns about a pattern of behavior demonstrated by the child directly to Charter School's Director of Special Education or to other supervisory personnel of Charter School.

2. Exception

A Charter School would not be deemed to have such knowledge if:

- a. The child's parent has not allowed an evaluation of the child or refused special education services; **or**
- b. The child has been evaluated and determined to not be a child with a disability under Part B of the IDEA.

3. Conditions that apply if there is no basis of knowledge

If prior to taking disciplinary measures against the child, Charter School does not have knowledge that a child is a child with a disability, as described above under the sub-headings *Basis of knowledge for disciplinary matters* and *Exception*, the child may be subjected to the disciplinary measures that are applied to children without disabilities who engaged in comparable behaviors. However, if a request is made for an evaluation of a child during the time period in which the child is subjected to disciplinary measures, the evaluation must be conducted in an expedited manner. Until the evaluation is completed, the child remains in the educational placement determined by School authorities, which can include suspension or expulsion without educational services. If the child is determined to be a child with a disability, taking into consideration information from the evaluation conducted by Charter School and information provided by the parents, Charter School must provide special education and related services in accordance with Part B of the IDEA, including the disciplinary requirements described above.

REFERRAL TO AND ACTION BY LAW ENFORCEMENT AND JUDICIAL AUTHORITIES (34 CFR §300.535)

- 1. The state and federal regulations do not:**
 - a. Prohibit an agency from reporting a crime committed by a child with a disability to appropriate authorities; **or**
 - b. Prevent State law enforcement and judicial authorities from exercising their responsibilities with regard to the application of Federal and State law to crimes committed by a child with a disability.
- 2. Transmittal of records**

If Charter School reports a crime committed by a child with a disability, Charter School must ensure that copies of the child's special education and disciplinary records are transmitted for consideration by the authorities to whom Charter School reports the crime and may transmit copies of the child's special education and disciplinary records only to the extent permitted by FERPA.

THIS ANNUAL NOTICE AND STATEMENT OF POLICY AND PROCEDURES HAS BEEN WRITTEN IN ACCORDANCE WITH CHAPTER 711 OF TITLE 22 OF THE PA CODE AND INCORPORATED INFORMATION FROM APPLICABLE PDE AND STATE FORMS AND SOURCES INCLUDING THE PATTAN PROCEDURAL SAFEGUARDS NOTICE.

THE CONTENT OF THIS NOTICE HAS BEEN WRITTEN IN STRAIGHTFORWARD, SIMPLE ENGLISH LANGUAGE. IF A PERSON DOES NOT UNDERSTAND ANY OF THIS NOTICE, HE OR SHE SHOULD ASK THE DIRECTOR OF SPECIAL EDUCATION OF CHARTER SCHOOL FOR AN EXPLANATION. CHARTER SCHOOL WILL ARRANGE FOR AN INTERPRETER FOR PARENTS WITH LIMITED ENGLISH PROFICIENCY. IF A PARENT IS DEAF OR BLIND OR HAS NO WRITTEN LANGUAGE, THE SCHOOL WILL ARRANGE FOR COMMUNICATION OF THIS NOTICE IN THE MODE NORMALLY USED BY THE PARENT (E.G., SIGN LANGUAGE, BRAILLE, OR ORAL COMMUNICATION).

THIS NOTICE IS ONLY A SUMMARY OF THE SPECIAL EDUCATION SERVICES, EVALUATION AND SCREENING ACTIVITIES, AND RIGHTS AND PROTECTIONS PERTAINING TO CHILDREN WITH DISABILITIES, CHILDREN THOUGHT TO BE DISABLED, AND THEIR PARENTS AND IS ONLY A SUMMARY OF THE CONFIDENTIALITY RIGHTS REGARDING STUDENT INFORMATION.

FOR MORE INFORMATION OR TO REQUEST EVALUATION OR SCREENING OF A CHARTER SCHOOL STUDENT CONTACT DIRECTOR OF SPECIAL EDUCATION OF CHARTER SCHOOL AT PENNWOOD CYBER CHARTER SCHOOL, 555 Ryan Run Road, York, PA 17404.³

NOTHING IN THIS NOTICE IS INTENDED TO CONFLICT WITH OR SUPPLANT THE INFORMATION CONTAINED IN THE PENNSYLVANIA DEPARTMENT OF EDUCATION'S CURRENT "PROCEDURAL SAFEGUARDS NOTICE" WHICH IS AVAILABLE THROUGH THE SCHOOL FOR YOUR REVIEW OR WITH APPLICABLE STATE AND/OR FEDERAL LAWS.

³ School office phone number will be provided upon authorization of charter and administrative facility.

Pennwood Cyber Charter School

Board of Trustees Policy

ANTI-BULLYING & ANTI-HAZING POLICY

The Board of Trustees (“Board”) of the Pennwood Cyber Charter School (“Charter School”) recognizes the importance of providing all students and employees with a safe school and learning environment in order to promote the educational process. The Board has determined that a safe and civil environment in school is necessary for students to learn and achieve high academic standards as well as to promote positive interaction among students through participation in Charter School sponsored groups or organizations. Bullying, cyberbullying and hazing like other disruptive or violent behaviors, is conduct that disrupts both a student’s ability to learn and participate in the School community and the Charter School’s ability to educate its students in a safe environment. Therefore, in order to ensure and promote a safe learning environment, it shall be the policy of the Charter School to maintain an educational environment that is intolerant of bullying, cyberbullying or hazing in any form.

Since students learn by example, school administrators, faculty, staff and volunteers are directed to demonstrate appropriate behavior, treat others with civility and respect and to refuse to tolerate bullying, cyberbullying or hazing. This policy pertains to all students and staff, regardless of their status. This policy also applies to all students and staff whose conduct out of school materially and substantially interferes with the educational process at the Charter School.

Teachers should discuss this policy with their students in age-appropriate ways and should assure them that they need not endure any form of bullying. Students who bully are in violation of this policy and are subject to disciplinary action up to and including expulsion. Training will be provided to teachers, administrators, and staff on a quarterly basis. Trainings will be conducted by the building designee “bullying response specialist” as well as outside providers to address needs communicated by the school around this issue.

Definitions

Bullying and **Cyber-bullying** are defined as an intentional electronic, written, verbal or physical act, or a series of acts:

1. directed at another student or students;
2. which occurs in a “school setting”, or occurs outside of school and the Charter School reasonably forecasted that the outside-of-school conduct would materially interfere with or substantially disrupt the educational process or program in the school, and the outside-of-school conduct does in fact materially interfere with or substantially disrupt the educational process or program in the school;
3. that is severe, persistent or pervasive; and

4. that has the effect of doing any of the following:
 - substantially interfering with a student's education;
 - creating a threatening environment; or
 - substantially disrupting the orderly operation of the school.

Bullying and cyber-bullying shall encompass acts that occur outside a school setting if those acts meet the requirements found in (1), (3) and (4) listed above.

School Setting shall mean in the Charter School, on Charter School grounds, on Charter School property, using Charter School equipment and technology, on a Charter School server or electronic, web-based, Internet or online programs, in Charter School vehicles, at designated bus stops or at any activity sponsored, supervised or sanctioned by the Charter School and any time spent necessarily traveling to and from these locations. Additionally, any student whose out of school conduct materially interferes with or substantially disrupts the educational process in the school is also subject to this policy.

Cyberbullying

Cyber-bullying is often seen by sending harmful or cruel material, text messages and/or images or engaging in other forms of social aggression and bullying using the Internet, cell phones, personal digital assistants ("PDAs") or other technology resources.

All students, staff, volunteers and contractors shall comply with the Charter School's Acceptable Use and Internet Safety Policy, which is required under the Children's Internet Protection Act ("CIPA"), and review the Charter School's Social Media and Networking Guidelines Policy when using any technology resources.

Cyber-bullying via the Internet is seen through the use of any one or more of a number of methods, including, but not limited to:

- Email sent to the intended victim;
- Blog entries regarding the intended victim;
- Posts on social networking websites;
- Posting victim's pictures on the Internet or networking websites with derogatory phrases or questions attached to them;
- Using instant messaging tools to harass victims;
- Creating an Internet parody of the intended victim;
- Creating fake Internet profiles for the victim on a public website;
- Creating or accessing an unauthorized website which harasses or bullies the victim;
- Using camera phones and/or digital cameras to take embarrassing photographs of students and/or staff and posting them online;
- Excluding others from an online group by falsely reporting them for inappropriate language to Internet service providers.

Cell phones are also often used for cyber-bullying for things such as calling or text messaging the victim and/or using a victims' cell phone to text or call another victim using harassing language.

The use of the Internet or Charter School email does not necessarily have to involve the creation of the offensive materials. Rather, the person creating the offensive material may do it on a

home computer and then use the Charter School's computers to take such actions as accessing it, viewing it, displaying it for others to see, disseminating copies of it to others or otherwise publicizing the contents.

Hazing

Title 18 - Chapter 28 was added October 19, 2018, P.L.535, No.80, also known as the "Timothy J. Piazza Antihazing Law." Chapter 28 defines the following:

- **§ 2802. Hazing.**
 - (a) Offense defined.--**A person commits the offense of hazing if the person intentionally, knowingly or recklessly, for the purpose of initiating, admitting or affiliating a minor or student into or with an organization, or for the purpose of continuing or enhancing a minor or student's membership or status in an organization, causes, coerces or forces a minor or student to do any of the following:
 - (1) Violate Federal or State criminal law.
 - (2) Consume any food, liquid, alcoholic liquid, drug or other substance which subjects the minor or student to a risk of emotional or physical harm.
 - (3) Endure brutality of a physical nature, including whipping, beating, branding, calisthenics or exposure to the elements.
 - (4) Endure brutality of a mental nature, including activity adversely affecting the mental health or dignity of the individual, sleep deprivation, exclusion from social contact or conduct that could result in extreme embarrassment.
 - (5) Endure brutality of a sexual nature.
 - (6) Endure any other activity that creates a reasonable likelihood of bodily injury to the minor or student.
 - (b) Grading.--**
 - (1) Except as provided under paragraph (2), hazing is a summary offense.
 - (2) Hazing shall be a misdemeanor of the third degree if it results in or creates a reasonable likelihood of bodily injury to the minor or student.
 - (c) Limitation.--**Hazing shall not include reasonable and customary athletic, law enforcement or military training, contests, competitions or events.

- **Secondary school:** Any public or private school within this Commonwealth providing instruction in grades 7 through 12 or any combination of those grades.

The CEO or designee shall ensure that students are informed of the secondary school's policy, including the secondary school's rules, penalties and program of enforcement. This policy must be posted on the Charter School's publicly accessible Internet website.

The CEO or designee will provide a program for the enforcement of this policy required under 18 Pa. C.S.A. 2801 *et seq.* and shall adopt appropriate penalties for violations of the policy to be administered by the Charter School's Principals or their designees responsible for the sanctioning or recognition of the organizations covered by this policy.

Guidelines

Students shall conduct themselves in a manner in keeping with their levels of development, maturity, and demonstrated capabilities with a proper regard for the rights and welfare of other students, school staff, volunteers, and contractors.

The Board believes that standards for student behavior must be set cooperatively through interaction among the students, parents and guardians, staff, and community members of the Charter School, producing an atmosphere that encourages students to grow in self-discipline. The development of this atmosphere requires respect for self and others, as well as for school and community property on the part of students, staff, and community members.

Since bystander support of bullying, cyberbullying and hazing can bolster these types of behaviors, the Charter School prohibits both active and passive support for acts of bullying, cyberbullying and hazing. The staff should encourage all students to refuse to engage in these acts and to report them immediately to the CEO of the Charter School.

Reporting Procedures

Any student who feels he or she has been bullied or cyber-bullied shall have the right to file a complaint of such bullying. Complaints should be reported to the school principal. Complaints may also be reported directly to a teacher, guidance counselor, or other administrator who shall immediately report the incident to the school principal in order to protect the alleged victim and for prompt investigation.

Any staff member who sees any incidents of bullying or cyber-bullying must immediately report the incident(s) to the school principal. All other members of the school community, including students, parents, volunteers, and visitors, are encouraged to report any act that may be a violation of this policy. It shall be the responsibility of the school principal or his/her designee to investigate promptly and thoroughly any and all bullying and cyber-bullying complaints received or referred by other individuals and to make recommendations based upon the investigation. The investigation is to be commenced within three (3) school days after a report of any bullying is received.

The Board of Trustees requires the school principal to be responsible for determining whether an alleged act constitutes a violation of this policy. In determining whether alleged conduct constitutes bullying or cyber-bullying, the totality of circumstances, nature of the conduct, and context in which the alleged conduct occurred shall be investigated. If the investigation results in a substantiated charge of the bullying, the Charter School shall take prompt corrective action to ensure the bullying and/or cyber-bullying ceases and will not reoccur.

Reports to the school principal may be made anonymously, but formal disciplinary action *may not* be based solely on the basis of an anonymous report.

The school principal or his/her designee shall immediately notify the parent or guardian of the perpetrator of the bullying and the parent or guardian of the victim of the bullying of the alleged incident.

Consequences for Violations

Consequences and appropriate remedial actions for a student or staff member who commits one or more acts of bullying or cyber-bullying may range from positive behavioral interventions up to and including in school or out of school suspension from the Charter School or expulsion or other disciplinary removal from the Charter School, in the case of a student, or suspension or termination in the case of an employee, as set forth in the Charter School's student Code of Conduct or Employee Handbook.

In some cases, bullying and/or cyber-bullying may constitute criminal activity and the Police Department will be notified. This may lead to a criminal investigation and criminal charges against the student or staff.

Consequences for a student who commits an act of bullying and/or cyber-bullying shall be unique to the individual incident and will vary in method and severity according to the nature of the behavior, the developmental age of the student, and the student's history of problem behaviors and performance, and must be consistent with the Charter School's student code of conduct. Remedial measures shall be designed to: correct the problem behavior; prevent another occurrence of the behavior; and protect the victim of the act.

The following intervention strategies for protecting victims may be followed as needed:

- Supervise and discipline offending students fairly and consistently;
- Provide adult supervision at Charter School testing sites or other sites used by the Charter School, at any activity sponsored, supervised or sanctioned by the Charter School during any breaks, lunch times, bathroom breaks and in the hallways during times of transition;
- Maintain contact with parents and guardians of all involved parties;
- Provide counseling for the victim if assessed that it is needed;
- Inform school personnel of the incident and instruct them to monitor the victim and the offending party for indications of harassing, intimidating and bullying and/or cyber-bullying behavior. Personnel are to intervene when prohibited behaviors are witnessed; and
- Check with the victim daily to ensure that there have been no incidents of retaliation from the offender or other parties.

Retaliation Prohibited

The Board of Trustees strictly prohibits retaliation or reprisal against any person who reports bullying and/or cyber-bullying incidents. Retaliation includes, but it is not limited to, any form of intimidation, reprisal or harassment used against a person who reports, in good faith, incident(s) of bullying and/or cyber-bullying. Disciplinary action against any person who retaliates or engages in reprisals for reporting such behavior(s) may include sanctions up to and including expulsion or suspension for students and termination for staff engaging in such prohibited conduct. The consequences and appropriate remedial action shall be determined after consideration of the nature, severity, and circumstances of the act.

False Accusations

The Board of Trustees prohibits any person from falsely accusing another of bullying and/or cyber-bullying. The consequences and appropriate remedial action for a student found to have

falsely accused another of bullying and/or cyber-bullying may range from positive behavioral interventions up to and including suspension or expulsion. Consequences and appropriate remedial action for an employee found to have falsely accused another of bullying and/or cyber-bullying shall be disciplined in accordance with Charter School policies, procedures, and agreements.

Disabled Students

For those students who meet the disability definitions of IDEA and/or Section 504, both Section 504 and Title II protect these disabled students from bullying or hazing by teachers, other school employees, and third parties. Such prohibited behavior can trigger a school's obligation to address disability-based harassment, remedy a denial of a free and appropriate public education ("FAPE"), or both. The U.S. Department of Education's Office of Civil Rights ("OCR") would find a disability-based harassment violation under Section 504 and Title II when: (1) a student is bullied or hazed based on a disability; (2) the bullying or hazing is sufficiently serious to create a hostile environment; (3) school officials know or should know about the bullying or hazing; and (4) the school does not respond appropriately.

Annual Distribution of Information

The Board requires Charter School officials to annually disseminate the policy to all school staff, students, volunteers, independent contractors and parents along with a statement explaining that it applies to all applicable acts of bullying and cyberbullying and hazing that occur in the Charter School, on Charter School grounds, on Charter School property, using Charter School equipment and/or technology, on Charter School servers or Charter School electronic, web-based, Internet or online programs, in Charter School vehicles, at designated bus stops or at any activity or organization sponsored, supervised or sanctioned by the Charter School and any time spent necessarily traveling to and from these locations. Additionally, any student or staff's out of school conduct that materially and substantially interferes with the educational process in the Charter School is also subject to this policy.

The Charter School is required to post this policy on its website and make the policy available in every classroom. This policy shall also be posted at a prominent location within every Charter School building where such notices are usually posted. The Charter School shall ensure this policy and its procedures for reporting bullying, cyberbullying and hazing incidents are reviewed with students and staff within ninety (90) days after its adoption and, thereafter, a minimum of one (1) time per school year.

Compliance

As required by the Federal Broadband Data Improvement Act of 2008, the Charter School shall educate elementary and secondary school aged students with computer access to the Internet about appropriate online behavior, including online interaction with other individuals on social networking websites, and in chat rooms and educate them regarding cyberbullying awareness and response.

The Board of Trustees directs the Administration to develop any procedures necessary to implement this policy and to develop appropriate prevention, intervention and education strategies related to bullying and cyberbullying.

Acts of bullying and cyberbullying are prohibited by and a violation of the Charter School's Acceptable Use and Internet Safety Policy and its Child Internet Protection Act (CIPA) Policy.

The Charter School will comply with all applicable federal and state laws relating to bullying and cyberbullying and hazing, including, but not limited to, the requirements delineated in the Pennsylvania Charter School Law, 24 P.S. § 1701-A, *et seq.*, the Federal Children's Internet Protection Act (CIPA), 47 U.S.C. § 254(h) and (l), and the Neighborhood Children's Internet Protection Act (N-CIPA) and any applicable implementing regulations and the PA Anti-Hazing Law (P.L. 1595, No.175).

The Charter School will also comply with Chapter 711 of Title 22 of the Pennsylvania Code, the Public School Code, the applicable House Bill 1067 Public School Code amendments relating to safe schools and bullying, and applicable provisions of the Individuals with Disabilities Education Improvement Act of 2004 (IDEA 2004) and its applicable implementing regulations regarding the discipline of special education students and thought-to-be eligible students who engage in an act of bullying.

Specifically, with regard to the PA Safe Schools Act, Charter School administration shall annually provide the following information with the Safe School Report

1. Board's Anti-Bullying Policy.
2. Report of bullying incidents.
3. Information on the development and implementation of any bullying prevention, intervention or education programs.

Training

To ensure bullying does not occur on school campuses, the Charter School will provide staff development training in bullying prevention and cultivate acceptance and understanding in all students and staff to build each school's capacity to maintain a safe and healthy learning environment.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Assistive Technology (AT) Policy and Procedures

The Board of Trustees of Charter School (“Charter School”) recognizes that Assistive Technology devices and/or services may be essential factors in meeting the educational needs of children with disabilities.

Both federal and state special education laws explicitly define Assistive Technology to include both Assistive Technology devices and/or services, the purpose of which are to improve the functional capabilities of a student with a disability. Such Assistive Technology must be provided for a child with a disability, at no cost to parents, if determined by the IEP team to be necessary for the student to receive a free appropriate public education (FAPE). Such services may be required as part of special education, related services, or supplementary aids and services required to enable a child to be educated in the least restrictive environment.

As defined in federal and state law, **assistive technology device** means any item, piece of equipment, or product system, whether acquired commercially off the shelf, modified, or customized, that is used to increase, maintain, or improve the functional capabilities of children with disabilities. Assistive technology devices range from a simple switch for a child with particular physical limitations to a sophisticated vocal output augmentative communication device for a child with severe speech impairment.

Assistive technology service means any service that directly assists a child with a disability in the selection, acquisition, or use of an assistive technology device. Assistive technology services are those that are necessary to enable the student and/or IEP Team to use any Assistive Technology services specified in the IEP. Such Services may include:

- A) The evaluation of the needs of a child with a disability, including a functional evaluation of the child in the child’s customary environment;
- B) Purchasing, leasing, or otherwise providing for the acquisition of Assistive Technology devices by children with disabilities;
- C) Selecting, designing, fitting, customizing, adapting, applying, maintaining, repairing, or replacing Assistive Technology devices;
- D) Coordinating and using other therapies, interventions, or services with Assistive Technology devices, such as those associated with existing education and rehabilitation plans and programs;
- E) Training or technical assistance for a child with a disability or, if appropriate, that child’s family;
- F) Training or technical assistance for professionals (including individuals providing education or rehabilitation services), employers, or other individuals who provide services to, employ, or are otherwise involved in the major life functions of that child.

By virtue of these expansive definitions, an exhaustive yet specific list of what constitutes assistive technology devices and/or services would be impossible to create.

By way of example:

Hearing aids worn in school by children with hearing impairments, including deafness, must be functioning properly.

External components of surgically implanted medical devices must be functioning properly.

Guidelines

Consideration of Assistive Technology, in the context of IEP development, review or revision, is intended to be a collaborative process in which team members determine whether AT devices or services are needed for the student to access the general education curriculum or meet IEP goals. Consideration may necessitate that the IEP team include (or have access to) someone who has knowledge about Assistive Technology or who can guide the Team in considering Assistive Technology in the context of what they know about the student. Team members who are considering Assistive Technology should examine available data and observations about the student and ask whether the student may need Assistive Technology:

- A) To be in the LRE;
- B) To meaningfully participate in the general education curriculum;
- C) To participate in activities;
- D) To access educational/print materials, including textbooks;
- E) To access auditory information;
- F) For written communication/computer access;
- G) For augmentative communication;
- H) To participate in state and local assessments.

The Board recognizes that assistive technology devices and/or services may be essential factors in meeting the educational needs of children with disabilities. Both federal and state special education laws explicitly include assistive technology devices and/or services among those services which must be provided for a child with a disability, at no cost to parents, if determined by the Individualized Education Program (IEP) team to be necessary for the student to receive a free appropriate public education (FAPE). Such services may be required as part of special education, related services, or supplementary aids and services required to enable a child to be educated in the least restrictive environment.

The Board further recognizes that, as with every other special education service, the IEP team is responsible for determining if an assistive technology device and/or service is necessary for a child with a disability to receive FAPE. It is important to remember that assistive technology devices and/or services are not ends in themselves. The IEP team should focus on whether or not assistive technology devices and/or services are necessary for the eligible child to meet educational demands and therefore receive FAPE.

THEREFORE

To the extent that assistive technology devices and/or services may be required as part of special education, related services, or supplementary aids or services, a child's IEP must include a statement describing the full extent of devices (e.g., no, low, and high technology and back-up strategies) and service(s) as well as the amount of such service(s). The provision of assistive technology devices and/or services may not be made conditional on

subsequent approval by entities outside the IEP process (i.e., IU availability, Medical Access Reimbursement, etc.).

All procedural safeguards and time lines set forth in federal and state laws for completing multidisciplinary evaluations, reevaluations, and developing and implementing IEPs are fully applicable to assistive technology devices and/or services when they are necessary to ensure eligible children receive FAPE. Assistive technology devices should be secured on loan or leased if manufacturer delay is anticipated.

It is the charter school's responsibility to provide assistive technology devices and services when included as part of a student's IEP. State and federal law do **not** require that the Charter School purchase Assistive Technology as needed in the IEP. However, it is appropriate for the Charter School to purchase, rent or borrow Assistive Technology or utilize Assistive Technology that is acquired through the student's insurance. The Charter School may not require the family to utilize insurance or any other funding source. The Charter School remains responsible for any costs related to repair, maintenance, or replacement of required Assistive Technology that is specified in the IEP.

The Chief Executive Officer ("CEO")/Principal or their designee is directed to seek any necessary assistance from the Commonwealth regarding the purchase and payment for Assistive Technology. According to PDE, the CEO/Principal or their designee should inform the family not to assume the device will be billed to Medical Assistance (MA), even if a child's MA number is provided on an equipment acquisition form. If the device is billed to MA, the CEO/Principal or their designee will notify the parents by sending a transfer of ownership letter. When the parents are in receipt of the transfer of ownership letter, the billing process has begun. If the billing is ultimately rejected by MA, the parents will be informed by letter. The CEO/Principal or their designee may not delay or deny a student's receipt of assistive technology while it attempts to secure MA funding and is directed to comply with any applicable procedures as modified by PDE.

The CEO or their designee is charged with implementing procedures to ensure that devices are properly maintained and functioning, including hearing aids and external components of surgically implanted medical devices.

Routine checks and tests of those devices will be administered and results logged or otherwise noted when necessary. The CEO or their designee is directed to implement a process to address: the need for AT, effective maintenance of all AT devices, the selection of age and developmentally appropriate AT devices, review of recommendations from qualified personnel including speech language pathologists regarding AT, and the maintenance of AT by the Charter School. All AT devices are to be maintained in a manner deemed appropriate for their intended use and purpose as directed by the manufacturer to the maximum extent possible.

Hearing Aids/External Components of Surgically Implanted Medical Devices:

Pennwood will adhere to Section 300.113 of IDEA Part B, Subpart B – State Eligibility. The CEO/Principal or their designee is directed to implement a process to address: the need for AT, effective maintenance of all AT devices, the selection of age and developmentally appropriate AT devices, review of recommendations from qualified personnel including speech language pathologists regarding AT, and the maintenance of AT by the charter school. All AT devices are to be maintained in a manner deemed appropriate for their intended use and purpose as directed by the manufacturer to the maximum extent possible.

The need for AT services and devices are to be identified with specificity in students' IEPs and AT services and devices are to be reviewed at least annually in the course of an IEP team meeting, or as requested by the IEP team and/or parent.

The CEO/Principal or their designee is directed to have AT devices promptly repaired when needed and in the interim a device or back up plan is to be in place while the device is being repaired/maintained.

The CEO/Principal or their designee is further directed to have a plan in place to provide AT services without interruption.

The CEO/Principal or their designee is charged with making personnel aware of the availability of AT resources.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

DRAFT

Pennwood Cyber Charter School

Board of Trustees Policy

Child Find Policy and Public Outreach Awareness System

In accordance with Chapter 711 of Title 22 of the Pennsylvania Code, the CEO/CAO/Principal or their designee shall ensure that children with disabilities, regardless of the severity of their disabilities, and who are enrolled at the charter school and are in need of special education and related services, are identified, located, and evaluated and a practical method is developed and implemented to determine which children with disabilities are currently receiving needed special education and related services.

Child Find includes children who are suspected of having a disability under Section 300.8 of the federal regulations that implement IDEA 2004 and in need of special education, even though they are advancing from grade to grade; and highly mobile children, including migrant children and homeless youth, as appropriate.

Public Awareness

The CEO/CAO/Principal or their designee shall ensure that the following public awareness activities occur concerning programs and services for children with disabilities who are enrolled at the Pennwood Cyber Charter School ("Charter School").

Charter School shall publish annually a written notice (attached hereto), in means accessible to the Charter School families. Such notice must be included in the Charter School's Handbook and on the Charter School's website. The Notice may also be made available in means accessible to the public, such as: at the Charter School's main office, in the Charter School's special education office, through local Intermediate Units and/or through other generally accessible print and electronic media deemed appropriate, and with the Board meeting minutes a description of: child identification activities, of the Charter School's special education services and programs, of the manner in which to request services and programs, and of the procedures followed by the Charter School to ensure the confidentiality of student information pertaining to students with disabilities pursuant to state and federal law.

Outreach Activities

The CEO/CAO/Principal or their designee shall ensure that the following outreach activities occur concerning programs and services for children with disabilities who attend the Charter School:

- Offer parents and family (including foster and surrogate parents) information regarding training activities and publicize the availability of such activities to all parents (trainings in the areas of behavior support, response to intervention, inclusive practices, transition, assistive technology, autism, and interagency coordination are important and parents may also be directed to PaTTAN training opportunities). Parent input is to be sought to determine what parent trainings are needed/desired;
- Provide to interested health and mental health professionals, daycare providers, county agency personnel and other interested professionals, including: professionals and

agencies who work with homeless and migrant or other highly mobile youth, wards of the state, as well as to students attending private schools (where applicable), information concerning the types of special education programs and services available in and through the Charter School and information regarding the manner in which parents can request and access those services.

- Provide or obtain periodic training for the Charter School's regular education staff and special education staff concerning the identification and evaluation of, and provision of special education programs and services to students with disabilities.
- The public outreach awareness system utilized by the Charter School shall include methods for reaching homeless children, wards of the state, and highly mobile children, including migrant children.
- The Charter School shall conduct child find activities to inform the public of its special education services and programs and the manner in which to request them.
- The Charter School's child find effort must include information regarding potential signs of developmental delays and other risk factors that could indicate disabilities.
- Efforts must be made to identify enrolled students who have a native language other than English and to ensure that notices and other outreach efforts are available to them in their native language as required by law and unless it is clearly and absolutely not feasible to do so.

Screening

The CEO/CAO or their designee shall establish a system of screening in order to:

- Identify and provide screening for students prior to referral for an initial special education multidisciplinary team evaluation;
- Provide peer support for teachers and other staff members to assist them in working effectively with students in the general education curriculum;
- Conduct hearing and vision screening in accordance with the Public School Code of 1949 for the purpose of identifying students with hearing or vision difficulty so that they can be referred for assistance or recommended for evaluation for special education if necessary;
- Identify students who may need special education services and programs.
- Maintain the confidentiality of information in accordance with applicable state and federal regulations.

Pre-Evaluation Screening

The pre-evaluation screening process shall include:

- For students with academic concerns, an assessment of the student's functioning in the curriculum including curriculum-based or performance-based assessments;

- For students with behavioral concerns, a systematic observation of the student's behavior in the classroom or area in which the student is displaying difficulty ("FBA" or functional behavior assessment);
- An intervention based on the results of the assessments conducted;
- An assessment of the student's response to the intervention, if applicable;
- A determination of whether or not the assessed difficulties of the student are the result of a lack of instruction or limited English proficiency;
- A determination of whether or not the student's needs exceed the functional capacity of the regular education program, without special education programs and services, to maintain the student at an instructional level appropriate to the level and pace of instruction provided in that program;
- Activities designed to gain the participation of parents;
- Controls to ensure that if screening activities have produced little or no improvement within the specified timeframe after initiation, the student shall be referred for a multidisciplinary team evaluation.

The screening activities shall not serve as a bar to the right of a parent to request a multidisciplinary team evaluation at any time. When the completion of screening activities prior to referral for a multidisciplinary team evaluation will result in serious mental or physical harm, or significant educational regression, to the student or others, the Charter School may initiate a multidisciplinary team reevaluation without completion of the screening process in accordance with Chapter 711. Whenever an evaluation is conducted without a pre-evaluation screening, the activities described shall be completed as part of that evaluation whenever possible.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

CHILD FIND NOTICE PHILADELPHIA

Services for School-Age Students with Disabilities

Pennwood Cyber Charter School (“Charter School”) provides a free, appropriate, public education (“FAPE”) to eligible students. To qualify as an eligible student, the child must be of school age, in need of specially designed instruction, and meet eligibility criteria for one or more physical or mental disabilities as set forth in the federal Individuals with Disabilities Education Act (“IDEA”) and Chapter 711 of the Pennsylvania State Regulations.

The Charter School uses identification procedures to determine eligibility of students and provide an appropriate educational program consisting of special education and related services, individualized to meet student needs at no cost to the parents. To identify students who may be eligible for special education, various screening activities are conducted on an on-going basis. These screening activities include: review of group-based data (cumulative records, enrollment records, health records, report cards, ability, and achievement test scores); hearing, vision, physical, and speech/language screening; and review of data by applicable Charter School Teams. When screening results suggest that the student may be eligible for special education services, the Charter School seeks written parental consent to conduct a multidisciplinary evaluation because the Charter School cannot conduct an evaluation or provide an initial provision of special education services without this written permission. For additional information related to consent, please refer the Procedural Safeguards Notice which can be found at the PaTTAN website, www.Pattan.net.

However, Parents who suspect that their child is eligible for special education services may request a multidisciplinary evaluation at any time through a written request to the Principal or Special Education Coordinator. If the parent disagrees with the Evaluation Report, the parent can request an independent education evaluation at public expense.

Once the evaluation process determines eligibility, an IEP Team of Charter School professionals and Parents meet to discuss and determine services to meet the needs of the student and include the annual development of an Individualized Education Program (IEP), bi-annual or tri-annual multidisciplinary re-evaluation, and a full continuum of services, which include Itinerant, Supplemental, or Full-Time Levels of Intervention. The extent of special education services and the location for the delivery of such services are determined by the IEP team and are based on the student’s identified needs and abilities, chronological age, and the level of intensity of the specified intervention. The Charter School also provides related services, such as transportation, speech and language therapy, physical therapy, and occupational therapy, required for the student to benefit from the special education program.

Services for Protected Handicapped Students

In compliance with the state and federal law, namely Section 504 of the Rehabilitation Act of 1973, the Charter School will provide to protected handicapped students services or accommodations that are needed to provide equal opportunity to participate in and obtain the benefits of the school program and

extra-curricular activities to the maximum extent appropriate to the student's abilities. These related services or accommodations are provided without discrimination or cost to the student or family. In order to qualify as a protected handicapped student, the child must be of school age with a physical or mental disability, which substantially limits or prohibits participation in or access to an aspect of the school program. Services and safeguards for protected handicapped students are distinct from those applicable to exceptional students enrolled or seeking enrollment in special education programs.

Confidentiality of Student Records

The Charter School protects the confidentiality of personally identifiable information for all students in accordance with the Family Educational Rights and Privacy Act ("FERPA"), state law and the Charter School's student records policy.

Contacts

For additional information regarding any special education or Section 504 issues, please contact the Coordinator of Special Education or CEO/Principal at:

Pennwood Cyber Charter School
555 Ryan Run Road
York, PA 17404⁴

Other

For preschool age children, information, screenings and evaluations requested, contact Elwyn SEEDS at (215) 222-8054.

⁴ School office phone number will be provided upon authorization of charter and administrative facility.

PENNWOOD CYBER CHARTER SCHOOL ADDRESS

Board of Trustees Policy

Homebound Instruction Cyber Charter Policy

In accordance with 22 Pa Code § 11.25, the Board of Trustees of Pennwood Cyber Charter School ("Charter School"), sets forth the following policy:

"(a) A school district, area vocational technical school, charter school, independent school, private school or non-public school may temporarily excuse a student from compulsory attendance on account of illness or other urgent reasons and provide that student homebound instruction while he or she is excused from school. Regulations require that the term "urgent reasons" be strictly construed not to permit irregular attendance at school."

(b) A school district, area vocational technical school, charter or independent school may provide students temporarily excused under this section with homebound instruction for a period not to exceed 3 months. A school district, area vocational technical school, charter or independent school may request approval from the Department to extend the provision of homebound instruction, which shall be reevaluated every 3 months. When a student receives homebound instruction, the student may be counted for attendance purposes as if in school. A school district shall be reimbursed for homebound instruction provided to a student under section 2510.1 of the Public School Code of 1949 (24 P. S. § 25-2510.1).

(c) A school district shall adopt policies that describe the instructional services that are available to students who have been excused under this section. The policies must include statements that define the responsibilities of both the district and the student with regard to these instructional services."

While the nature of cyber charter school education and the Charter School's educational delivery model, does not present the usual logistical issues around the method of instruction to the Student, homebound instruction is still applicable with regard to the compulsory attendance component. The cyber Charter School student continues to be able to access teachers, lessons, and all course work from their homes prior to homebound instruction being approved but once on homebound instruction, compulsory attendance is not required for the

length of time that student is permitted to be on homebound instruction.

Purpose of Homebound Instruction

The purpose of homebound instruction is to keep students on track academically while the student is temporarily out of school. Homebound instruction is defined in the PDE Basic Education Circular ("BEC") as school-supplied one-to-one tutoring for a limited time. However, because all of the Charter School's students already have full online access to the curriculum, teachers and all other aspects of the school's educational programming, including one to one time with instructors during virtual office hours, the BEC must be viewed differently by way of guidance than for brick and mortar charter schools. Regardless, the Charter School students are counted in both the school membership* and school attendance**. See *22 Pa Code § 11.25(b)*.

Certification of Teachers Providing Homebound Instruction

Teachers employed for delivering homebound instruction are governed by the same certification regulations as all other teachers. Refer to Certification Staffing and Policy Guidelines (CSPG) #1, Appropriate Certification in Pennsylvania, Statement 7:

A "homebound instruction" teacher is governed by the same certification regulations as all other teachers. When regularly employed professional staff cannot be assigned to homebound instructions, persons on the substitute roster holding appropriate certification may be used. If no certified person is available, an emergency certificate may be issued to qualify a person to teach homebound students.

Documentation for Homebound Instruction Request

Since the goal is to rehabilitate a student so that they can return to school, the Charter School may define what is acceptable as an appropriately licensed professional for a specific type of excusal. Accordingly, the Charter School requires written documentation from a physical or mental health provider at the doctoral level or above, who is licensed to practice in Pennsylvania and who is actively treating the student for the medical condition at issue for homebound instruction. PDE's guidance states that a doctor does not "order" homebound instruction but rather provides the diagnosis to enable the school district/charter school to make an informed decision on how to best provide for the student's education. Furthermore, PDE guidance allows the Charter School to require frequent updates on the student's progress, from this appropriately licensed professional, as a condition of continued excusal.

A Charter School may provide homebound instruction for an initial total of three months without consulting or notifying PDE.

Extension: After expiration of the initial three month period of homebound instruction, it is not necessary for the Charter School to send to PDE the licensed professional's documentation with the extension request; rather, the Charter School must ensure the excuse is reasonable for absence from school and that the student is being treated actively for the condition necessitating the absence.

NOTE: If the need for homebound instruction goes beyond the initial three months, the Charter School should determine whether the student should be evaluated or considered for either an IEP or a 504 Service Agreement.

Pregnant and Parenting Students

Becoming pregnant or being a parent does not, in itself, necessitate that a student receive homebound instruction. Certification of a physician is required for any students, including pregnant or parenting students, who are requesting homebound instruction because of an illness or other urgent reason.

Attendance

A student receiving homebound instruction is counted in both membership and attendance. If a student does not receive homebound instruction during the first three months of a school year, then the student is counted in membership but not in attendance.

PDE defines the following terms:

- **Membership:** student is on the attendance roles, whether or not he or she physically is present on any given day.
- **Attendance:** days when a "member" student is counted as present in school.
- **Inactive Roll:** student is not counted in either membership or attendance.

PDE's Child Accounting counts an hour of weekly instruction as equivalent to a day of school attendance. Therefore, five hours of weekly instruction are equivalent to five days of school attendance.

However, for every hour less than the total of five hours of homebound instruction provided (or 2.5 hours for half-day attendees), the student is marked as absent – one day for each hour missed. Hours are counted on a weekly basis; a student cannot be counted as present by combining hours from consecutive weeks. For example, three hours of homebound instruction one week and seven hours the next week cannot count as fulltime for the two weeks.

The Charter School may, at their discretion, provide more than five hours of instruction per week without requesting special permission from PDE.

Part-time Attendance

A Charter School may structure homebound instruction for a student such that the student attends school part-time, as his or her condition allows; homebound instruction requests need not be restricted to students who are unable to attend school at all. If it is agreed by the Charter School that a student attends school for partial days, than homebound instruction would be prorated. For example, if a student attends school half-days, only 2.5 hours of homebound instruction is required for the equivalent of five days of instruction

PSSA Testing

A homebound student is required to participate in the Pennsylvania System of School Assessment (PSSA). If the student is incapable of participating at the school, the individual who is providing the homebound instruction should be trained to administer the assessment and then administer the test to the student in his/her home.

PDE Reporting

A charter school may provide homebound instruction for the initial three months of excusal without consulting Pennsylvania Department of Education ("PDE"). Following the initial three months, the charter school must obtain the approval of PDE to extend homebound instruction. Any excusal from compulsory attendance must be reevaluated, at minimum, every three months. The Charter School may have a policy that requires more frequent evaluations.

It is not necessary for the Charter School to send to PDE the licensed professional's documentation with the extension request; the Charter School simply must ensure the excuse is reasonable for absence from school and that the student is being treated actively for the condition necessitating the absence.

Non-attendance without the provision of homebound instruction

If a condition exists which prevents a child from the ability to benefit from study, the student may be entered into the inactive roll with the PDE's approval until such a time as the student may benefit from study. (22 Pa Code § 11.34.)

School Initiated. A Charter School may excuse a school age child from compulsory school attendance upon recommendation of the school physician and a psychiatrist or public school psychologist, or both, and with the approval of PDE. Prior to seeking excusal and approval, the Charter School must provide the child's parents with written notice of both the proposed excusal, including the reasons for the excusal, and an opportunity to be heard. See 22 Pa Code § 11.34 and 24 P.S. § 13-1330(2). Children so excused are entered on the inactive roll.

Other in-home instruction that is not designated as homebound instruction

There are a number of educational options that sometimes are referred to as "homebound instruction" although they do not fit the legal definition of homebound instruction. The following are NOT categorized as "homebound instruction" pursuant to the PDE BEC:

- **Instruction Conducted in the Home:** for special education students for whom an Individualized Educational Plan (IEP) team determines that the instruction of the student is to be conducted in the home; students are counted in both the school membership and school attendance; this is not homebound instruction. (See "Special Education Policy – Instruction in the Home").
- **Home Education Program (Homeschooling):** usually taught at home by a parent (referred to as the home education supervisor); students are not counted in either the membership or school attendance; this is not homebound instruction. Students enrolled in the Charter School cannot be simultaneously home-schooled as they would be in their school district of residence.

- **Home Study:** for expelled students or students awaiting placement; students are counted in the membership but not the school attendance; this is not homebound instruction.

Audits

As the Charter School may be audited for their provision of homebound instruction, the following information will be maintained and made available for such an audit:

- The documentation from the appropriately licensed practitioner substantiating the need for homebound instruction.
- The listing of the students on homebound instruction and the total amount of time for each student in homebound instruction.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Disciplinary Exclusions of Special Education Students Policy

There are special rules in Pennsylvania for excluding children with disabilities for disciplinary reasons as set forth in Chapter 711 of Title 22 of the Pennsylvania Code as well as the Procedural Safeguards Notice available through PaTTAN. The Board of Trustees directs compliance with these requirements and directs the Chief Executive Officer/Principal or their designee to implement procedures necessary to effectuate the following:

AUTHORITY OF SCHOOL PERSONNEL (34 CFR §300.530)

1. Case-by-case determination

Pennwood Cyber Charter School (“Charter School”) personnel may consider any unique circumstances on a case-by-case basis, when determining whether a change of placement, made in accordance with the following requirements related to discipline, is appropriate for a child with a disability who violates a school code of student conduct.

2. General

To the extent that they also take such action for children without disabilities, school personnel may, for not more than 10 consecutive school days, remove a child with a disability (other than a child with an intellectual disability) who violates a code of student conduct from his or her current placement to an appropriate interim alternative educational setting, another setting, or suspension. School personnel may also impose additional removals of the child of not more than 10 consecutive school days in that same school year for separate incidents of misconduct, as long as those removals do not constitute a change of placement (see **Change of Placement Because of Disciplinary Removals** for the definition, below) or exceed 15 cumulative school days in a school year. Once a child with a disability has been removed from his or her current placement for a total of 10 school days in the same school year, Charter School must, during any subsequent days of removal in that school year, provide services to the extent required below under the sub-heading **Services**.

3. Additional authority

If the behavior that violated the student code of conduct was not a manifestation of the child’s disability (see **Manifestation determination**, below) and the disciplinary change of placement would exceed 10 consecutive school days, school personnel may apply the disciplinary procedures to that child with a disability in the same manner and for the same duration as it would to children without disabilities, except that the school must provide services to that child as described below under **Services**. The child’s IEP Team determines the interim alternative educational setting for such services. Under PA special education regulations, a disciplinary exclusion of a student with a disability for more than 15 cumulative school days in a school year will be considered a pattern so as to be deemed a change in educational placement (explained under **Change of Placement Because of Disciplinary Removals**). Charter School is required to issue a NOREP/Prior Written Notice to parents prior to a removal that constitutes a change in placement (removal for more than 10 consecutive days or 15 cumulative days).

4. Services

The services that must be provided to a child with a disability who has been removed from the child's current placement may be provided in an interim alternative educational setting. A charter school is only required to provide services to a child with a disability who has been removed from his or her current placement for 10 school days or less in that school year, if it provides services to a child without disabilities who has been similarly removed. Students may have the responsibility to make up exams and work missed while being disciplined by suspension and may be permitted to complete these assignments within guidelines established by their charter school.

A child with a disability who is removed from the child's current placement for more than 10 consecutive school days must:

- a. Continue to receive educational services, so as to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP; and
- b. Receive, as appropriate, a functional behavioral assessment, and behavioral intervention services and modifications that are designed to address the behavior violation so that it does not happen again.

After a child with a disability has been removed from his or her current placement for 10 school days during one school year, or if current removal is for 10 consecutive school days or less, and if the removal is not a change of placement (see definition below), then school personnel, in consultation with at least one of the child's teachers, determine the extent to which services are needed to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP.

If the removal is a change of placement (see definition below), the child's IEP Team determines the appropriate services to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP.

5. Manifestation determination

Within 10 school days of any decision to change the placement of a child with a disability because of a violation of a code of student conduct (except for a removal that does not constitute a change in educational placement i.e., is for 10 consecutive school days or less and not a change of placement), Charter School, the parent, and relevant members of the IEP Team (as determined by the parent and Charter School) must review all relevant information in the student's file, including the child's IEP, any teacher observations, and any relevant information provided by the parents to determine:

- a. If the conduct in question was caused by, or had a direct and substantial relationship to, the child's disability; or
- b. If the conduct in question was the direct result of Charter School's failure to implement the child's IEP.

If Charter School, the parent, and relevant members of the child's IEP Team determine that either of those conditions were met, the conduct must be determined to be a manifestation of the child's disability.

If Charter School, the parent, and relevant members of the child's IEP Team determine that the conduct in question was the direct result of Charter School's failure to implement the IEP, Charter School must take immediate action to remedy those

deficiencies.

6. Determination that behavior was a manifestation of the child's disability

If Charter School, the parent, and relevant members of the IEP Team determine that the conduct was a manifestation of the child's disability, the IEP Team must either:

- a. Conduct a functional behavioral assessment, unless Charter School had conducted a functional behavioral assessment before the behavior that resulted in the change of placement occurred, and implement a behavioral intervention plan for the child; or
- b. If a behavioral intervention plan already has been developed, review the behavioral intervention plan, and modify it, as necessary, to address the behavior.

Except as described below under the sub-heading Special circumstances, the Charter School must return the child to the placement from which the child was removed, unless the parent and Charter School agree to a change of placement as part of the modification of the behavioral intervention plan.

7. Special circumstances

Whether or not the behavior was a manifestation of the child's disability, school personnel may remove a student to an interim alternative educational setting (determined by the child's IEP Team) for up to 45 school days, if the child:

- a. Carries a weapon (see the Definitions below) to school or has a weapon at school, on school premises, or at a school function under the jurisdiction of Charter School;
- b. Knowingly has or uses illegal drugs (see the **Definitions** below), or sells or solicits the sale of a controlled substance, (see the **Definitions** below), while at school, on school premises, or at a school function under the jurisdiction of Charter School; or
- c. Has inflicted serious bodily injury (see the **Definitions** below) upon another person while at school, on school premises, or at a school function under the jurisdiction of the State Educational Agency or a charter school.

8. Definitions

- a. *Controlled substance* means a drug or other substance identified under schedules I, II, III, IV, or V in section 202 (c) of the Controlled Substances Act (21 U.S.C. 812(c)).
- b. *Illegal drug* means a controlled substance; but does not include a controlled substance that is legally possessed or used under the supervision of a licensed health-care professional or that is legally possessed or used under any other authority under that Act or under any other provision of Federal law.
- c. *Serious bodily injury* has the meaning given the term "serious bodily injury" under paragraph (3) of subsection (h) of section 1365 of title 18, United States Code.
- d. *Weapon* has the meaning given the term "dangerous weapon" under paragraph (2) of the first subsection (g) of section 930 of title 18, United States Code.

9. Notification

On the date it makes the decision to make a removal that is a change of placement of the child because of a violation of a code of student conduct, Charter School must notify the parents of that decision, and provide the parents with a procedural safeguards notice.

Change Of Placement Because Of Disciplinary Removals

A removal of a child with a disability from the child's current educational placement is a change of placement requiring a NOREP/prior written notice if:

1. The removal is for more than 10 consecutive school days; or
2. The removal is for 15 cumulative school days total in any one school year;
3. The child has been subjected to a series of removals that constitute a pattern because:
 - a. The series of removals total more than 10 school days in a school year;
 - b. The child's behavior is substantially similar to the child's behavior in previous incidents that resulted in a series of removals;
 - c. Of such additional factors as the length of each removal, the total amount of time the child has been removed, and the proximity of the removals to one another; and

Whether a pattern of removals constitutes a change of placement is determined on a case-by-case basis by Charter School and, if challenged, is subject to review through due process and judicial proceedings.

Determination of Setting

The IEP team must determine the interim alternative educational setting for removals that are **changes of placement**, and removals under the headings *Additional authority* and *Special circumstances*, above.

1. General

The parent of a child with a disability may file a due process complaint (see above) to request a due process hearing if he or she disagrees with:

- a. Any decision regarding placement made under these discipline provisions; or
- b. The manifestation determination described above.

Charter School may file a due process complaint (see above) to request a due process hearing if it believes that maintaining the current placement of the child is substantially likely to result in injury to the child or to others.

2. Authority of hearing officer

A hearing officer that meets the requirements described under the sub-heading Impartial Hearing Officer must conduct the due process hearing and make a decision. The hearing officer may:

- a. Return the child with a disability to the placement from which the child was removed if the hearing officer determines that the removal was a violation of the requirements described under the heading Authority of School Personnel, or that the child's behavior was a manifestation of the child's disability; or
- b. Order a change of placement of the child with a disability to an appropriate interim alternative educational setting for not more than 45 school days if the hearing officer determines that maintaining the current placement of the child is substantially likely to result in injury to the child or to others.

These hearing procedures may be repeated, if Charter School believes that returning the child to the original placement is substantially likely to result in injury to the child or to others.

Whenever a parent or charter school files a due process complaint to request such a hearing, a hearing must be held that meets the requirements described under the

headings **Due Process Complaint Procedures, Hearings on Due Process Complaints**, except as follows:

1. The LEA must arrange for an expedited due process hearing, which must occur within 20 school days of the date the hearing is filed and must result in a determination within 10 school days after the hearing.
2. Unless the parents and the Charter School agree in writing to waive the meeting, or agree to use mediation, a resolution meeting must occur within 7 calendar days of receiving notice of the due process complaint. The hearing may proceed unless the matter has been resolved to the satisfaction of both parties within 15 calendar days of receipt of the due process complaint.

A party may appeal the decision in an expedited due process hearing in the same way as they may for decisions in other due process hearings.

When, as described above, the parent or Charter School has filed a due process complaint related to disciplinary matters, the child must (unless the parent and the State Educational Agency or Charter School agree otherwise) remain in the interim alternative educational setting pending the decision of the hearing officer, or until the expiration of the time period of removal as provided for and described under the heading **Authority of School Personnel**, whichever occurs first.

Special Rules for Students with an Intellectual Disability

The disciplinary removal of a child with an intellectual disability attending a charter school for any amount of time is considered a change in placement and requires a NOREP/prior written notice (if the disciplinary event does not involve drugs, weapons and/or serious bodily injury). A removal from school is not a change in placement for a child who is identified with an intellectual disability when the disciplinary event involves weapons, drugs, and/or serious bodily injury.

According to certain assurances the Commonwealth entered into related to the PARC consent decree, a charter school may suspend on a limited basis a student with an intellectual disability who presents a danger to himself or others upon application and approval by the Bureau of Special Education and only to the extent that a student with a disability other than an intellectual disability could be suspended.

Protections For Children Not Yet Eligible For Special Education and Related Services

1. General

If a child has not been determined eligible for special education and related services and violates a code of student conduct, but Charter School had knowledge (as determined below) before the behavior that brought about the disciplinary action occurred, that the child was a child with a disability, then the child may assert any of the protections described in this notice.

2. Basis of knowledge for disciplinary matters

A charter school must be deemed to have knowledge that a child is a child with a disability if, before the behavior that brought about the disciplinary action occurred:

- a. The parent of the child expressed concern in writing that the child is in need of special education and related services to supervisory or administrative personnel, or a teacher of the child;
- b. The parent requested an evaluation related to eligibility for special education

and related services under Part B of the IDEA; or

- c. The child's teacher, or other Charter School personnel expressed specific concerns about a pattern of behavior demonstrated by the child directly to Charter School's director of special education or to other supervisory personnel of the Charter School.

3. Exception

A charter school would not be deemed to have such knowledge if:

- a. The child's parent has not allowed an evaluation of the child or refused special education services; or
- b. The child has been evaluated and determined to not be a child with a disability under Part B of the IDEA.

4. Conditions that apply if there is no basis of knowledge

If prior to taking disciplinary measures against the child, a charter school does not have knowledge that a child is a child with a disability, as described above under the sub-headings **Basis of knowledge for disciplinary matters** and **Exception**, the child may be subjected to the disciplinary measures that are applied to children without disabilities who engaged in comparable behaviors.

However, if a request is made for an evaluation of a child during the time period in which the child is subjected to disciplinary measures, the evaluation must be conducted in an expedited manner.

Until the evaluation is completed, the child remains in the educational placement determined by school authorities, which can include suspension or expulsion without educational services. If the child is determined to be a child with a disability, taking into consideration information from the evaluation conducted by Charter School, and information provided by the parents, Charter School must provide special education and related services in accordance with Part B of the IDEA, including the disciplinary requirements described above.

B. REFERRAL TO AND ACTION BY LAW ENFORCEMENT AND JUDICIAL AUTHORITIES

1. The state and federal regulations do not:

- a. Prohibit an agency from reporting a crime committed by a child with a disability to appropriate authorities; or
- b. Prevent State law enforcement and judicial authorities from exercising their responsibilities with regard to the application of Federal and State law to crimes committed by a child with a disability.

Subsequent to a referral to law enforcement, an updated functional behavior assessment and positive behavior support plan are required.

2. Transmittal of records

If a charter school reports a crime committed by a child with a disability, the charter school: must ensure that copies of the child's special education and disciplinary records are transmitted for consideration by the authorities to whom the agency reports the crime; and may transmit copies of the child's special education and disciplinary records **only** to the extent permitted by FERPA.

NON-DISCRIMINATION

Charter School shall not discriminate in its discipline policies or practices on the basis of intellectual ability, status as a person with a disability, proficiency in the English language or any other basis that would be illegal under applicable state and/or federal laws.

The CEO/Principal or their designee is directed to develop procedures and practices related to the use of positive behavioral interventions and supports, and procedural safeguards and to ensure that those policies and procedures are implemented.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

DRAFT

Pennwood Cyber Charter School

Board of Trustees Policy

Dispute Resolution and Alternative Dispute Resolution Policy

It is the policy of Pennwood Cyber Charter School (“Charter School”) to ensure that disputes between parents and Charter School regarding the identification, evaluation, programming and services available to eligible students are addressed effectively and in accordance with applicable state and federal laws.

Every effort should be made to address and resolve disputes at the building/IEP team level if possible. The Chief Executive Officer (“CEO”)/Principal or their designee is directed to be aware of alternative dispute resolution procedures and programs, including facilitated IEP team meetings and mediation, and utilize those programs when deemed appropriate.

The CEO/Principal or their designee is responsible for ensuring that any agreements entered into as a result of a mediation session are implemented in accordance with the state regulations and is directed to maintain evidence of implementation.

When alternative dispute resolution is not practical or otherwise appropriate, or when a due process complaint is filed, the CEO/Principal or their designee is directed to follow applicable state procedures regarding the filing and answering of a due process complaint, including requirements relating to dissemination of procedural safeguards.

The CEO/Principal or their designee is responsible for ensuring that due process decisions are implemented in accordance with the state regulations and is directed to maintain evidence of implementation.

Included in such resources for the CEO, the Charter School Team and Parents, is the PA Office of Dispute Resolution for information on the following:

ConsultLine at 800-879-2301 (Toll-free in Pennsylvania) or 717-901-2145, is a statewide toll-free help line:

- Serving families, advocates, and agencies that have questions about special education for students and young children with disabilities.
- Providing information about special education laws, parents’ rights, the formal complaint process, and other dispute resolution options to address concerns so that children with disabilities receive a free and appropriate public education (FAPE).

Individualized Education Program (IEP) Facilitation

This is a voluntary option that is available when both the Charter School and Parent(s) agree to have a neutral person – the IEP Facilitator – at the IEP meeting to assist in discussing concerns regarding the development of the IEP.

The IEP Facilitator:

- Is not a member of the IEP team, but assists the IEP team to resolve conflicts and disagreements that arise during the meeting.
- Helps to maintain open communication among all IEP team members, maintains impartiality, and does not write the IEP.
- Builds and improves relationships among the IEP team members, and provides opportunities to resolve conflicts as they arise.

IEP Facilitation is more cost-efficient and less stressful than due process.

Mediation

If both parties agree to mediation, the Office for Dispute Resolution will arrange for a neutral, specially-trained mediator to meet with them at a mutually convenient location. The following guidelines apply:

- ODR provides independently contracted mediators to families and school districts.
- The mediator will meet with both parties together (and separately if necessary) to listen to both points of view, in order to understand each side's position.
- Mediation can take place at any time before or during the due process cycle.
- Mediation is not a required process and may not delay or deny a parent the right to a due process hearing.

Neither school officials nor parents may include an attorney at the mediation session.

Resolution Meeting Facilitation

When a parent requests due process, the school and parents must hold a Resolution Meeting within 15 days unless both sides agree to waive the meeting or try mediation instead. If both parties agree to have a neutral person at the resolution meeting, ODR will send a facilitator to assist the parties in reaching agreement.

Benefits of Resolution Meeting Facilitation:

- Builds and improves relationships between parents and schools;
- Encourages parties to identify new options to address unresolved issues;
- Could be less stressful and less expensive than a due process hearing;
- If agreement is reached, the due process hearing might not be needed.

The CEO or designee is responsible for ensuring that any agreements entered into as a result of a Mediation or Resolution Session are implemented in accordance with the state regulations and is directed to maintain evidence of implementation.

Office of Dispute Resolution Hearing Officer Settlement Conference Program

A hearing officer settlement conference (HOSC) is a service from PDE's Office of Dispute Resolution where parties who are close to a resolution, but have identifiable sticking points or roadblocks, can work with a sitting hearing officer to see if those sticking points/roadblocks can be overcome so that the parties can avoid a hearing and can move to finalizing the resolution.

If both parties agree to participate in a HOSC, the ODR case manager will assign a settlement hearing officer who is an active hearing officer, but who is not the presiding hearing officer in the case, to assist the parties through a HOSC. There is no cost to either party and it is non-binding but provides a substantive opportunity for the parties to obtain valuable input from a hearing officer as to potential liability and valuation.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Extended School Year Services ("ESY ") Policy

The Board of Trustees directs that the Pennwood Cyber Charter School ("Charter School") comply with the requirements incorporated by reference in 34 CFR §300.106 (relating to extended school year services). The Charter School must ensure that ESY services are available as necessary to provide FAPE.

ESY Services means special education and related services that are provided to a child with a disability, beyond the normal school year, in accordance with the child's IEP, and at no cost to the parents of the child.

The CEO/CAO/Principal or their designee is directed to ensure that the Charter School uses the following standards for determining whether a student with disabilities requires ESY as part of the student's program:

(1) At each IEP meeting for a student with disabilities, the charter school shall determine whether the student is eligible for ESY services and if so, make subsequent determinations about the services to be provided.

(2) In considering whether a student is eligible for ESY services, the IEP team shall consider the following factors, however, no single factor will be considered determinative:

(i) Whether the student reverts to a lower level of functioning as evidenced by a measurable decrease in skills or behaviors which occurs as a result of an interruption in educational programming (Regression).

(ii) Whether the student has the capacity to recover the skills or behavior patterns in which regression occurred to a level demonstrated prior to the interruption of educational programming (Recoupment).

(iii) Whether the student's difficulties with regression and recoupment make it unlikely that the student will maintain the skills and behaviors relevant to IEP goals and objectives.

(iv) The extent to which the student has mastered and consolidated an important skill or behavior at the point when educational programming would be interrupted.

(v) The extent to which a skill or behavior is particularly crucial for the student to meet the IEP goals of self-sufficiency and independence from caretakers.

(vi) The extent to which successive interruptions in educational programming result in a student's withdrawal from the learning process.

(vii) Whether the student's disability is severe, such as autism/pervasive developmental disorder, serious emotional disturbance, severe intellectual disability, degenerative impairments with mental involvement and severe multiple disabilities.

Reliable sources of information regarding a student's educational needs, propensity to

progress, recoupment potential and year to year progress may include the following:

- (1) Progress on goals in consecutive IEPs.
- (2) Progress reports maintained by educators, therapists and others having direct contact with the student before and after interruptions in the education program.
- (3) Reports by parents of negative changes in adaptive behaviors or in other skill areas.
- (4) Medical or other agency reports indicating degenerative-type difficulties, which become exacerbated during breaks in educational services.
- (5) Observations and opinions by educators, parents and others.
- (6) Results of tests, including criterion-referenced tests, curriculum-based assessments, ecological life skills assessments and other equivalent measures.

The Charter School will not limit ESY services to particular categories of disability or unilaterally limit the type, amount, or duration of those services

The need for ESY services will not be based on any of the following:

- (1) The desire or need for day care or respite care services.
- (2) The desire or need for a summer recreation program.
- (3) The desire or need for other programs or services that while they may provide educational benefit, are not required to ensure the provision of a FAPE.

Students with severe disabilities such as autism/pervasive developmental disorder, serious emotional disturbance; severe intellectual disability; degenerative impairments with mental involvement; and severe multiple disabilities require expeditious determinations of eligibility for ESY services to be provided as follows:

- (1) Parents of students with severe disabilities shall be notified by Charter School of the annual review meeting to ensure their participation.
- (2) An IEP review meeting must occur no later than **February 28** of each school year for students with severe disabilities.
- (3) The notice of recommended educational placement (NOREP) shall be issued to the parent no later than **March 31** of the school year for students with severe disabilities.
- (4) If a student with a severe disability transfers into Charter School after the dates in paragraphs (2) and (3), and the ESY eligibility decision has not been made, the eligibility and program content must be determined at the IEP meeting.

The eligibility for ESY services of all students with disabilities shall be considered at the IEP meeting. ESY determinations for students other than those described above as having severe disabilities are not subject to the timelines for students with the severe disabilities described above. However, determinations for those other students shall still be made in a timely manner.

If the parents disagree with Charter School's recommendation on ESY, the parents will be afforded an expedited due process hearing in accordance with applicable laws. Parents are to be provided with the required procedural safeguards notice.

ESY programs are to be individualized with regard to the amount of services and

individually appropriate goals and related services.

In cases where ESY is denied, evidence to support the denial is to be made part of the student's file.

The CEO/CAO/Principal or their designee is directed to develop procedures consistent with this policy and applicable laws.

TIMELINES CONTAINED IN THIS POLICY MAY BE CHANGED BY THE PENNSYLVANIA DEPARTMENT OF EDUCATION AND THE SCHOOL MUST FOLLOW.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Exceptional Student Records Confidentiality Policy

The Pennwood Cyber Charter School ("Charter School") recognizes the need to protect the privacy rights of Charter School's exceptional students and their parents. The classification, collection, use, maintenance and dissemination of any information about a student or his or her family raises issues regarding the privacy of that information. Thus, Charter School shall adhere to the provisions of federal and state laws pertaining to those privacy rights, including but not limited to the Family Educational Rights and Privacy Act of 1974 ("FERPA"), as amended, and its accompanying regulations; the applicable provisions of the Individuals with Disabilities Education Improvement Act (2004) ("IDEA"), as amended, and its implementing regulations; the applicable provisions of the Pennsylvania Public School Code of 1949, and the applicable provisions of Chapters 12 and 711 of the Pennsylvania Administrative Code containing the regulations of the Pennsylvania State Board of Education and other provisions applicable to charter schools. The Chief Executive Officer ("CEO")/Principal or their designee is designated as the administrator responsible for the maintenance, access, use and release of exceptional student records. This policy is to be used in combination with Charter School's Student Records Policy.

The CEO/Principal or their designee shall be responsible for the implementation of this policy.

CONSENT FOR DISCLOSURE OF PERSONALLY IDENTIFIABLE INFORMATION (34 CFR §300.622)

Unless the information is contained in education records, and the disclosure is authorized without parental/legal guardian consent under FERPA, the student's parent's/legal guardian's consent (or student's consent if the student has reached the age of majority and is otherwise eligible to have record rights transferred to him or her) must be obtained before personally identifiable information about that student is disclosed to parties other than officials of Charter School. Except under the circumstances specified below, parental consent is not required before personally identifiable information is released to officials of Charter School for purposes of meeting a requirement of Part B of IDEA 2004.

A parent's (legal guardian's) consent, or consent of an eligible child who has reached the age of majority under State law, must be obtained before personally identifiable information is released to officials of participating agencies providing or paying for transition services.

ACCESS TO CONFIDENTIAL INFORMATION RELATED TO STUDENT (34 CFR §300.611)

- 1. Related to the confidentiality of information, the following definitions apply:**
 - a. *Destruction* means physical destruction or removal of personal identifiers from information so that the information is no longer personally identifiable.
 - b. *Education records* means the type of records covered under the definition of "education records" in 34 CFR Part 99 (the regulations implementing the Family

Educational Rights and Privacy Act of 1974, 20 U.S.C. §1232g (FERPA)).

- c. **Participating agency** means any charter school, agency or institution that collects, maintains, or uses personally identifiable information, or from which information is obtained, under Part B of the IDEA.
- d. **Personally identifiable (34 CFR §300.32)** means information that has:
 - 1) A child's name, a parent's name, or the name of another family member;
 - 2) A child's address;
 - 3) A personal identifier, such as a child's social security number or student number; **or**
 - 4) A list of personal characteristics or other information that would make it possible to identify a child with reasonable certainty.

2. Access Rights (34 CFR §300.613)

a. Parent Access

Charter School must permit a parent to inspect and review any education records relating to the parent's child that are collected, maintained, or used by the charter school under Part B of the IDEA. The charter school must comply with a parent's request to inspect and review any education records on the parent's child without unnecessary delay or before any meeting regarding an IEP, or any impartial due process hearing (including a resolution meeting or a hearing regarding discipline), and in no case more than 45 calendar days after the parent has made a request.

A Parent's right to inspect and review education records includes:

- 1) A parent's right to a response from Charter School to reasonable requests for explanations and interpretations of the records;
- 2) A parent's right to request that Charter School provide copies of the records if the parent cannot effectively inspect and review the records unless the parent receives those copies; **and**
- 3) A parent's right to have a representative inspect and review the records.
 - a) Charter School may presume that a parent has authority to inspect and review records relating to the parent's child unless advised that the parent does not have the authority under applicable State law governing such matters as guardianship, or separation and divorce.
 - b) If any education record includes information on more than one child, the parents of those children have the right to inspect and review only the information relating to their child or to be informed of that specific information.
 - c) On request, each charter school must provide the parent with a list of the types and locations of education records collected, maintained, or used by Charter School.

b. Other Authorized Access (34 CFR §300.614)

Charter School must keep a record of parties obtaining access to education records collected, maintained, or used under Part B of the IDEA 2004 (except access by parents and authorized employees of the participating agency), including the name of the party, the date access was given, and the purpose for which the party is authorized to use the records.

2. Fees

Charter School may charge a fee for copies of records (34 CFR §300.617) that are made

for a parent under Part B of the IDEA, if the fee does not effectively prevent the parent from exercising the right to inspect and review those records.

Charter School may not charge a fee to search for or to retrieve information under Part B of IDEA 2004.

3. Amendment of Records at Parent's Request (34 CFR §300.618)

If a parent believes that information in the education records regarding the parent's child collected, maintained, or used under Part B of IDEA 2004 is inaccurate, misleading, or violates the privacy or other rights of the child, the parent may request the charter school that maintains the information to change the information.

Charter School must decide whether to change the information in accordance with the parent's request within a reasonable period of time of receipt of the parent's request.

If Charter School refuses to change the information in accordance with the parent's request, it must inform the parent of the refusal and advise the parent of the right to a hearing for this purpose.

4. Opportunity for a Records Hearing (34 CFR §300.619)

Charter School must, on request, provide the parent an opportunity for a hearing to challenge information in education records regarding the parent's child to ensure that it is not inaccurate, misleading, or otherwise in violation of the privacy or other rights of the child.

a. Hearing Procedures (34 CFR §300.621)

A hearing to challenge information in education records must be conducted according to the following procedures for such hearings under the Family Educational Rights and Privacy Act of 1974, 20 U.S.C. Section 1233g (FERPA):

- 1) The educational agency or institution shall hold the hearing within a reasonable time after it has received the request for the hearing from the parent or eligible student.
- 2) The educational agency or institution shall give the parent or eligible student notice of the date, time, and place, reasonably in Pennwood of the hearing.
- 3) The hearing may be conducted by any individual, including an official of the educational agency or institution who does not have a direct interest in the outcome of the hearing.
- 4) The educational agency or institution shall give the parent or eligible student a full and fair opportunity to present evidence to challenge the content of the student's education records on the grounds that the information contained in the education records is inaccurate, misleading, or in violation of the privacy rights of the student. The parent or eligible student may, at their own expense, be assisted or represented by one or more individuals of his or her own choice, including an attorney.
- 5) The educational agency or institution shall make its decision in writing within a reasonable period of time after the hearing.
- 6) The decision must be based solely on the evidence presented at the hearing, and must include a summary of the evidence and the reasons for the decision.

b. Result of Hearing (34 CFR §300.620)

If, as a result of the hearing, Charter School decides that the information is

inaccurate, misleading, or otherwise in violation of the privacy or other rights of the child, it must change the information accordingly and inform the parent in writing. If, as a result of the hearing, the Charter School decides that the information is not inaccurate, misleading, or otherwise in violation of the privacy or other rights of the parent's child, the parent may place in the records that it maintains on the parent's child a statement commenting on the information or providing any reasons the parent disagrees with the decision of the participating agency. Such an explanation placed in the records of the parent's child must:

1. Be maintained by Charter School as part of the records of the child as long as the record or contested portion is maintained by Charter School; **and**
2. If Charter School discloses the records of the child or the challenged portion to any party, the explanation must also be disclosed to that party.

c. Safeguards (34 CFR §300.623)

Each charter school must protect the confidentiality of personally identifiable information at collection, storage, disclosure, and destruction stages.

The CEO/Principal or their designee must assume responsibility for ensuring the confidentiality of any personally identifiable information.

All persons collecting or using personally identifiable information must receive training or instruction regarding Pennsylvania's policies and procedures regarding confidentiality under Part B of IDEA 2004 and FERPA.

Each charter school must maintain, for public inspection, a current listing of the names and positions of those employees within the agency who have access to personally identifiable information.

Persons who have access to personally identifiable information at the charter school will include members of the child's IEP team, Charter School's records custodian and the CEO/Principal or their designee. Any individual accessing a student's personally identifiable information must sign a sheet evidencing review of the records. The sheet will be maintained with the student records.

5. Destruction of Information (34 CFR §300.624)

Charter School must inform the parent when personally identifiable information collected, maintained, or used is no longer needed to provide educational services to the parent's child, and the information must be destroyed at the parent's request.

However, a permanent record of the child's name, address, and phone number, his or her grades, attendance record, classes attended, grade level completed, and year completed may be maintained without time limitation.

Charter School must comply with record maintenance requirements in accordance with FERPA and Chapters 711 and 12 of Title 22 of the Pennsylvania Code, together with directives of PDE

with regard to record maintenance. Special Education records must also be maintained in accordance with PDE 6-year cyclical monitoring period guidelines established by PDE.

TRANSFER OF RECORDS BETWEEN SCHOOLS

When the education records for a child with a disability are transferred from a public agency, private school, approved private school or private agency, to a charter school, the public agency, private school, approved private school or private agency from which the child transferred shall forward all of the child's educational records, including the most recent IEP, within 10 days after the public agency, private school, approved private school or private agency is notified in writing that the child is enrolled in a charter school.

When the educational records for a child with a disability are transferred to a public agency, private school approved private school or private agency from a charter school, the charter school shall forward the child's educational records, including the most recent IEP, within 10 school days after the charter school is notified in writing that the child is enrolled at another public agency, private school, approved private school or private agency.

REFERRAL TO AND ACTION BY LAW ENFORCEMENT AND JUDICIAL AUTHORITIES AND RECORD TRANSMITTAL

Charter School reporting a crime committed by a child with a disability must ensure that copies of the special education and disciplinary records of the child are transmitted for consideration by the appropriate authorities to whom the crime is reported. A charter school reporting a crime may transmit copies of the child's special education and disciplinary records only to the extent that the transmission is permitted by FERPA.

ELECTRONIC TRANSMISSIONS

Charter School will ensure that any records kept or transmitted electronically are subject to high standards of electronic security. Charter School uses electronic firewalls and encryption systems, and monitors and tests the system regularly to ensure its stability and integrity. All the Charter School electronic mail correspondence shall include the following:

CONFIDENTIALITY NOTICE

The information in this transmission is intended only for the individual or entity named above. It may be legally privileged and confidential. If you have received this information in error, notify us immediately by calling Charter School at PHONE NUMBER. Send the original transmission to us by mail. Return postage is guaranteed. If the reader of this message is not the intended recipient, you are hereby notified that any disclosure, dissemination, distribution or copying of this communication or its contents is strictly prohibited.

ADMINISTRATIVE PROCEDURES:

The CEO/Principal or their designee shall be responsible for ensuring that the education records, confidentiality policies and procedures established under IDEA

2004 (relating to confidentiality of education records of exceptional students) are enforced and administered. This official shall:

Notify parents on an annual basis of the policies and procedures regarding exceptional student education records and the rights of parents under both Federal and State Law concerning the confidentiality of education records of exceptional students;

Develop a system of safeguards which will protect the confidentiality of personally identifiable information at the point of collection, storage, use, maintenance, release and destruction;

Provide training and instruction in the implementation of records policy requirements for all educational agency personnel who collect or use exceptional student personally identifiable information; and

Maintain a current listing of the names and positions of those agents and employees of Charter School who are authorized by the school to have access to personally identifiable information of exceptional students.

An education record shall not be destroyed by Charter School if there is an outstanding request to inspect and review it by the parent or eligible student. Charter School will inform the parents of an exceptional student when personally identifiable information collected, maintained, or used in the records of the exceptional student is no longer needed to provide educational services to the exceptional student. (See Student Educational Records Policy for more information).

Upon request of the parents, information no longer relevant to and necessary for the provision of educational services to the exceptional student must be destroyed by Charter School. . However, a written record of an exceptional student's name, address, phone numbers, grades, attendance records, classes attended, grade level completed, and year completed will be maintained for six (6) years beyond the school year during which the student to whom such data pertains attains age twenty-one (21). Prior to the destruction of the information referred to in the above paragraph, Charter School shall send written notification to the parents which shall inform the parents of their right to receive a copy of the material to be destroyed.(See Student Educational Records Policy for more information).

Charter School shall not destroy education records containing information necessary for the education of an exceptional student who is enrolled or has been enrolled in an education program operated by the school.

Except as is stated in the above paragraph of this subsection, nothing in this section shall be construed to mean that Charter School is required to destroy education records and the Charter School Administration is directed to implement any procedures necessary to maintain student records consistent with this policy and applicable state and federal laws and regulations.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

EVALUATION AND REEVALUATION POLICY

In accordance with applicable state and federal regulations, the Board of Trustees of the Pennwood Cyber Charter School ("Charter School") recognizes that in order to properly identify a student as eligible for special education and related services, the Charter School must have a process and procedures in place and, therefore, directs as follows the Evaluation and Reevaluation Policy. The Charter School adopts this policy which sets forth the procedural requirements for Evaluations and Reevaluations pursuant to the IDEA and Chapter 711 concerning Charter Schools.

Child with a disability means a child evaluated in accordance with §§300.304 through 300.311 as having an intellectual disability, a hearing impairment (including deafness), a speech or language impairment, a visual impairment (including blindness), a serious emotional disturbance (referred to in this part as "emotional disturbance"), an orthopedic impairment, autism, traumatic brain injury, an "other health impairment," a specific learning disability, deaf-blindness, or multiple disabilities, and who, by reason thereof, needs special education and related services. (Sec. 300.8 Child with a disability). For children aged three through nine experiencing developmental delays, see §300.8(b) and for definitions of disability terms noted herein, see §300.8(c). Determinations for identification of students with a specific learning disability are subject to sec. 300.309(a).

Initial evaluations

Initial evaluations are conducted pursuant to Sec. 300.301 (Initial evaluations):

- A. General. Each public agency must conduct a full and individual initial evaluation, in accordance with §§300.304 through 300.306, before the initial provision of special education and related services to a child with a disability under this part.
- B. Request for initial evaluation. Consistent with the consent requirements in §300.300, either a parent of a child or a public agency may initiate a request for an initial evaluation to determine if the child is a child with a disability.
- C. Procedures for initial evaluation.
 - a. The initial evaluation –
 - i. Must be conducted within 60 days of receiving parental consent for the evaluation; or
 - ii. If the State establishes a timeframe within which the evaluation must be conducted, within that timeframe; and
 - b. Must consist of procedures –
 - i. To determine if the child is a child with a disability under §300.8; and
 - ii. To determine the educational needs of the child.
- D. Exception. The timeframe described in paragraph (c)(1) of this section does not apply to a public agency if –
 - a. The parent of a child repeatedly fails or refuses to produce the child for the evaluation; or
 - b. A child enrolls in a school of another public agency after the relevant timeframe in paragraph (c)(1) of this section has begun, and prior to a determination by the child's previous public agency as to whether the child is a child with a disability under §300.8.
 - c. The exception in paragraph (d)(2) of this section applies only if the subsequent public agency is making sufficient progress to ensure a prompt completion of the evaluation, and the parent and subsequent public agency agree to a specific time when the evaluation will be completed.

A variety of assessment tools and strategies are used to gather relevant functional, developmental, and academic information about the child, including information provided by the parent, that may assist in determining (i) Whether the child is a child with a disability under §300.8; and (ii) The content of the child's Individualized Education Program ("IEP"), including information related to enabling the child to be involved in and progress in the general education curriculum (or for a preschool child, to participate in appropriate activities), citing Sec. 300.304(b)I1). The Charter School must (a) Not use any single measure or assessment as the sole criterion for determining whether a child is a child with a disability and for determining an appropriate educational program for the child; and (b) Use technically sound instruments that may assess the relative contribution of cognitive and behavioral factors, in addition to physical or developmental factors, citing Sec. 300.304(b)(2) and (3).

The child is assessed in all areas related to the suspected disability, including, if appropriate, health, vision, hearing, social and emotional status, general intelligence, academic performance, communicative status, and motor abilities, citing Sec. 300.304(c)(4).

Reevaluations

Pursuant to Sec. 300.303, the Charter School must ensure that a reevaluation of each child with a disability is conducted in accordance with §§300.304 through 300.311 –

- (1) If the public agency determines that the educational or related services needs, including improved academic achievement and functional performance, of the child warrant a reevaluation; or
- (2) If the child's parent or teacher requests a reevaluation.

Pursuant to the limitation under Section (b), a reevaluation conducted under paragraph (a) of this section –

- (1) May occur not more than once a year, unless the parent and the public agency agree otherwise; and
- (2) Must occur at least once every 3 years, unless the parent and the public agency agree that a reevaluation is unnecessary.

If a child has been diagnosed with an intellectual disability, a reevaluation is required every two years in Pennsylvania and cannot be waived. There are no exceptions, under the PARC Consent Decree, to waiver of the reevaluation of a student diagnosed with an intellectual disability, as defined in Section 300.8€(6). Intellectual disability means significantly subaverage general intellectual functioning, existing concurrently with deficits in adaptive behavior and manifested during the developmental period, that adversely affects a child's educational performance. The term "intellectual disability" was formerly termed "mental retardation." See PaTTAN.net. The Special Education Evaluation/IEP Process LEA initiated request and Parent initiated request flowchart.

Additional requirements for evaluations and reevaluations

Pursuant to Sec. 300.305(a), As part of an initial evaluation (if appropriate) and as part of any reevaluation under this part, the IEP Team and other qualified professionals, as appropriate, must (1) Review existing evaluation data on the child, including –

- (iv) Evaluations and information provided by the parents of the child;
- (ii) Current classroom-based, local, or State assessments, and classroom-based observations; and
- (iii) Observations by teachers and related services providers; and

(2) On the basis of that review, and input from the child’s parents, identify what additional data, if any, are needed to determine –

- (i)(A) Whether the child is a child with a disability, as defined in §300.8, and the educational needs of the child; or (B) In case of a reevaluation of a child, whether the child continues to have such a disability, and the educational needs of the child;
- (ii) The present levels of academic achievement and related developmental needs of the child;
- (iii)(A) Whether the child needs special education and related services; or (B) In the case of a reevaluation of a child, whether the child continues to need special education and related services; and
- (iv) Whether any additions or modifications to the special education and related services are needed to enable the child to meet the measurable annual goals set out in the IEP of the child and to participate, as appropriate, in the general education curriculum.

The Charter School’s requirements if additional data are not needed are subject to section (d) and evaluations before change in eligibility are subject to section € , §300.305. The Charter School’s evaluation and re-evaluation process is conducted by a Multi-Disciplinary Team (“MDT”). The Multi-Disciplinary Team is formed based on the student’s needs and includes a teacher and other qualified professionals who work with the child. In addition, the Parents are an integral part of the Team under the IDEA, as are other members, as required by law.

The Multi-Disciplinary Evaluation Process

The Multi-Disciplinary Evaluation (“MDE”) process must be conducted in accordance with specific timelines and must include protective procedures. The evaluation and reevaluation processes and procedures used as part of the Multi-Disciplinary Evaluation may not be racially or culturally biased.

The MDE process culminates with a written report called an Evaluation Report (“ER”) or a Reevaluation Report (“RR”) for the respective evaluation and reevaluation processes noted. These reports outline recommendations concerning a student’s eligibility for special education based on the presence of a disability and the need for specially designed instruction (“SDI”). Parents who think their child is eligible for special education may request, at any time, that the Charter School conduct a Multi-Disciplinary Evaluation. Requests for a Multi-Disciplinary Evaluations and for Reevaluations must be made in writing to the CEO or their designee, or the Charter School Special Education Director. If a Parent makes an oral request for a Multi-Disciplinary Evaluation or Reevaluation, the Charter School shall provide a Parent with a form for the evaluation or reevaluation. If the Charter School denies the Parents’ request for an initial evaluation and/or for a reevaluation, the Parents have the right to challenge the denial through the processes offered by the Office for Dispute Resolution (“ODR”), such as

with an impartial hearing or mediation.

If a Parent makes a request orally to any professional employee or administrator of the Charter School for an evaluation or a re-evaluation, that individual shall provide the Parent with a copy of the Permission to Evaluate ("PTE") or the Permission to Reevaluate ("PTRE") form within ten (10) calendar days of the oral request.

Copies of the Evaluation Report and/or the Reevaluation Report shall be disseminated to the Parents at least ten (10) school days prior to the meeting of the IEP Team, unless this requirement is waived by a Parent in writing.

If the Charter School determines that additional data is needed to complete a Reevaluation and has made "reasonable attempts" to get permission and has failed to get a response, it may proceed with the Reevaluation. Examples of reasonable attempts to contact Parents include documented telephone calls, registered (return receipt required) and other First Class Mail, and visits to the residence or Parents' place of business. As part of the provision to provide a Free Appropriate Public Education ("FAPE") to students with disabilities, all evaluations (whether an initial evaluation or a reevaluation) needed to determine a child's eligibility for special education services must be provided by the Charter School at no charge to the Parents. If a child needs special education, including specially designed instruction and related services, defined under the IDEA, the special programs and related services as determined by the IEP Team will be provided free by the Charter School.

For a copy of the Procedural Safeguards Notice, contact the Charter School CEO or designee, or the Charter School Director of Special Education. For questions about the evaluation/reevaluation process, including forms for the Permission to Evaluate ("PTE") and Reevaluate ("PTRE"), and for the Parents Procedural Safeguards regarding consent for the evaluation and reevaluation processes, or for any matters concerning the IEP process and special education, contact the Charter School CEO, or designee, or the Director of Special Education. The CEO or designee is directed to implement all procedures in accordance with this policy.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board Of Trustees Policy

Free Appropriate Public Education (FAPE) Policy

The Board of Trustees of the Pennwood Cyber Charter School (“Charter School”) must ensure that FAPE is available to any individual child with a disability who needs special education and related services, even though the child has not failed or been retained in a course or grade, and is advancing from grade to grade.

The determination that a child described above is eligible, must be made on an individual basis by the group responsible within the Charter School for making eligibility determinations.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL’S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

2023-2024 School Year

Annual Notification of Rights under Family Educational Rights and Privacy Act (FERPA) for the 2023-2024 School Year/Notice to Parents and Guardians Regarding the Disclosure of Student "Directory Information"

The Family Educational Rights and Privacy Act (FERPA), a federal law, affords parents, legally emancipated students, and students over eighteen (18) years of age ("eligible students") certain rights with respect to the student's educational records.

These rights are briefly summarized below and are explained more fully in the Board's Student Records Policy, which is on file at the School and is available upon request:

1. The right to inspect and review the student's educational records within forty-five (45) days of the day Pennwood Cyber Charter School ("Charter School") receives a request for access. Parents or eligible students should submit to Charter School's CEO/Principal a written request that identifies the record(s) they wish to inspect. The Charter School official will make arrangements for access and notify the parent or eligible student of the time and place where the record(s) may be inspected.
2. The right to request the amendment of the student's educational record(s) the parent or eligible student believes is inaccurate or misleading. Parents or eligible students may ask the Charter School to amend a record that they believe is inaccurate or misleading. Parents or eligible students should write to Charter School's Principal, clearly identifying the part of the record(s) they want amended, and specify why the record(s) is inaccurate or misleading. If the Charter School decides not to amend the record(s) as requested by the parent or eligible student, the Charter School will notify the parent or eligible student of the decision in writing and advise of the right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the parent or eligible student when notified of the right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's educational record(s) except to the extent that FERPA authorizes disclosure without consent, as discussed below.
4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the Charter School to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

**Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue SW
Washington, D.C. 20202-8520**

Release of Records Without Consent

Generally, the Charter School must have written permission from parents or eligible students in order to release any information from a student's education records. However, FERPA allows the Charter School to disclose that information without consent, to the following parties or under the following conditions:

- School officials with legitimate educational interests. A School Official may include a person employed by the school as an administrator, supervisor, instructor, or support staff member (including health or medical staff and law unit personnel); a person serving on the Board; a person or company with whom the Charter School has contracted to perform a special task (such as an attorney, auditor, medical consultant, or therapist); contractors, consultants, volunteers, and other outside service providers used by the Charter School; or a parent or student serving on official committee, such as a disciplinary or grievance committee, or assisting another Charter School official in performing their tasks. A School Official has a legitimate educational interest if the official needs to review an educational record(s) in order to fulfill his or her professional responsibility;
- Other schools, school systems, or institutions of postsecondary education to which a student is transferring;
- Authorized representatives of the U.S. Comptroller General, U.S. Attorney General, U.S. Secretary of Education, or State and local educational authorities. Disclosures may be made in connection with an audit or evaluation of Federal or State supported education programs, or for the enforcement of or compliance with Federal legal requirements that relate to those programs. The entities and officials identified here may re-disclose student information to outside entities and/or individuals that are designated as "authorized representatives" to conduct an audit or evaluation, or enforcement or compliance activity on their behalf. A designation of an "authorized representative," other than an employee, shall be memorialized in a written agreement. The same agreement shall contain provisions intended to guard the privacy of student information. Student records for children seven (7) years or older is exempt from the use of authorized representatives for agencies running programs to improve social, emotional and physical development;

- Appropriate parties in connection with financial aid for which a student has applied or has received, if the information is necessary to determine eligibility for aid, determine the amount of aid, determine the conditions of aid, or enforce the terms and conditions of aid;
- Organizations conducting certain studies for or on behalf of the school, to develop, validate or administer predictive tests; administer student aid programs; or improve instruction. The U.S. Comptroller General, U.S. Attorney General, U.S. Secretary of Education, or State and local educational authorities may re-disclose student information to organizations conducting studies identified here. Any re-disclosure of student information, whether by schools or the entities and officials identified here, requires a written agreement. The written agreement shall contain provisions intended to guard the privacy of student information;
- Accrediting organizations;
- To parents of dependent students for IRS tax purposes;
- To comply with a judicial order or lawfully issued subpoena;
- Appropriate officials in cases of health and safety emergencies; and
- State and local authorities within a juvenile justice system, pursuant to specific State law.

The Uninterrupted Scholars Act (USA) (Public Law 112-278), which was signed into law on January 14, 2013, amends FERPA in the following two ways:

1) Educational agencies and institutions are permitted to disclose a student's education records, without parental consent, to a caseworker or other representative of a State or local child welfare agency or tribal organization authorized to access a student's case plan "when such agency or organization is legally responsible, in accordance with State or tribal law, for the care and protection of the student."

2) Educational agencies and institutions are permitted to disclose a student's education records pursuant to a judicial order without requiring additional notice to the Parent by the educational agency or institution in specified types of judicial proceedings in which a parent is involved. The theory behind this change is that the Parent has already been informed by being involved in the child abuse, neglect, or dependency proceeding.

The child welfare agency can then disclose (or re-disclose) the records to "an individual or entity engaged in addressing the student's education needs." This individual or entity must be authorized to receive the records and the disclosure (or re-disclosure) must be consistent with State confidentiality law.

These changes to FERPA (and, consequently, to the confidentiality provisions applicable

to Parts B and C of the IDEA), help in improving educational and developmental outcomes for children in foster care by providing those agencies that are legally responsible for such children access to specific information that is maintained by those agencies that provide early intervention or educational services to such children. More specifically, child welfare agency workers must develop a written case plan for each child in foster care, which includes the education records of the child, including the most recent information regarding:

- The names and addresses of the child's education providers;
- The child's grade level performance;
- The child's school record;
- Any other relevant education information the child welfare agency determines to be appropriate.

As part of the Student's Educational Stability Plan, which is revised when placing a child in foster care, or, when a child is changing foster care placements, the agency must consider the appropriateness of the child's current school and the proximity of that school to the foster care placement; and coordinate with the local educational agency to ensure the child can stay enrolled in his or her school of origin despite the foster care placement. However, if the child welfare agency determines it isn't in the child's best interests to stay in the same school, the agency must ensure that the child is immediately enrolled in a new school, and all the child's education records are provided to that new school.

Child welfare agencies must assure that each child receiving a Federal foster care payment is a full-time elementary or secondary school student (or is incapable of attending school due to a medical condition). Federal child welfare guidance encourages child welfare agencies to ensure that children are not only enrolled, but are actually attending school.

The Charter School must maintain records of each request for access and disclosure of information from a student's education record(s), except for disclosures to school officials with legitimate educational interests, disclosures to parties with written consent from parents or eligible students, disclosures of Directory Information (discussed below), disclosures under select judicial orders or lawfully issued subpoenas, and disclosures to parents or eligible students. Parents and eligible students have a right to inspect and review the records of requests for access and disclosures.

Release of Directory Information

Directory Information includes information contained in the educational record(s) of a student, which is not considered harmful or an invasion of privacy if disclosed, so that it may be disclosed without prior parental consent, unless parents or eligible students have advised the Charter School to the contrary in accordance with Charter School procedures. The primary purpose of Directory Information is to allow the Charter School to include this type of information from the student's educational records in certain school-related publications or notices.

As part of the Charter School's annual notification under FERPA, Charter School designates for the 2023-24 School Year the following types or categories of information as "Directory Information":

- Student Name
- Participation in officially recognized activities, clubs, and sports
- Naming of student to the Honor Roll, National Honor Society or as Valedictorian
- Address
- Telephone listing
- Weight and height of members of athletic teams
- Electronic Mail Address
- Photograph
- Degrees, honors, awards received
- Date and place of birth
- Major field of study
- Dates of attendance
- Grade level
- The most recent educational agency or institution attended

"Directory Information" for the 2023-24 School Year also includes:

- Except for social security number, a student ID number, user ID, or other unique personal identifier used by a student for purposes of accessing or communicating in electronic systems, but only if the identifier cannot be used to gain access to education records except when used with one or more factors, such as a personal identification number (PIN), password or other factor known or possessed only by the authorized user; and
- Except for social security number, a student ID number or other unique personal identifier that is displayed on a student ID badge, but only if the identifier cannot be used to gain access to education records except when used with one or more factors, such as a PIN, password, or other factor known or possessed only by the authorized user.

Examples of how and where the Charter School may disclose Directory Information include:

- Newsletters
- A playbill showing student's role in a drama production
- The annual yearbook
- Honor Roll or other recognition lists
- Graduation programs
- Sports activity sheets, such as for wrestling: showing weight and height of team members
- Companies or outside organizations that manufacture class rings or yearbooks
- Newspapers or other news sources

- Class Lists
- Staff and/or Student Directories and/or listings
- Charter School Website
- Charter School Bulletin Boards
- Institutions of Higher Learning requesting Directory information

These examples are for illustration only and are not an exclusive list of the manner in which Directory Information may be disclosed. This Notice provides parents and eligible students with an opportunity to object in writing to any or all of those types of information that the Charter School has designated as Directory Information. Parents and eligible students have the right to refuse to permit the release by notifying the Charter School in writing that they do not want any or all of those types of information to be designated as Directory Information.

Please note that an opt out of Directory Information disclosures does not prevent the Charter School from identifying a student by name or from disclosing a student's name, identifier or institutional e-mail address in class in which the student is enrolled. The right to opt out of Directory Information disclosures does not include a right to remain anonymous in class, and may not be used to impede routine classroom communications and interactions, whether class is held in a specified physical location or on-line through electronic communications. Likewise, an opt out of Directory Information disclosures does not prevent the Charter School from requiring a student to wear, to display publicly, or to disclose a student ID card or badge that exhibits information that the Charter School designated as "Directory Information" for the 2023-24 School Year above.

YOUR ACTION IS REQUIRED IF YOU WISH "DIRECTORY INFORMATION" NOT TO BE PUBLISHED. Please submit any refusal with the types of information you wish removed from the list of Directory Information and mail your written objections on or before **September 29, 2023**, to the CEO/Principal of the Charter School at:

**Pennwood Cyber Charter School
555 Ryan Run Road
York, PA 17404**

If you have any questions regarding this Notice, please call or write the CEO/Principal at Charter School at [phone number].⁵ **If you do not submit a written refusal on or before September 29, 2023 then the Charter School may disclose directory information without your prior consent.**

THE CONTENT OF THIS NOTICE HAS BEEN WRITTEN IN STRAIGHTFORWARD, SIMPLE ENGLISH. IF A PERSON DOES NOT UNDERSTAND ANY OF THIS NOTICE, HE OR SHE SHOULD ASK THE PRINCIPAL OF CHARTER SCHOOL FOR AN EXPLANATION. THE CHARTER SCHOOL WILL ARRANGE FOR AN INTERPRETER FOR PARENTS WITH LIMITED ENGLISH PROFICIENCY. IF A PARENT IS DEAF OR BLIND OR HAS NO WRITTEN LANGUAGE, THE CHARTER SCHOOL WILL ARRANGE FOR COMMUNICATION OF THIS NOTICE IN THE MODE NORMALLY USED BY THE PARENT (E.G., SIGN LANGUAGE, BRAILLE, OR ORAL COMMUNICATION). IF A STUDENT HAS A DISABILITY, ADDITIONAL INFORMATION IS AVAILABLE IN THE CHARTER SCHOOL'S ANNUAL

⁵ School office phone number will be provided upon authorization of charter and administrative facility.

PUBLIC NOTICE OF SPECIAL EDUCATION SERVICES AND PROGRAMS AND RIGHTS FOR STUDENTS WITH DISABILITIES.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

DRAFT

Pennwood Cyber Charter School

Board of Trustees Policy

IEP DEVELOPMENT FOR STUDENTS AGE 17 OR OLDER AND VOTER REGISTRATION TO ADULT LIFE POLICY

When an IEP team meets for the purpose of reviewing or developing an IEP for a student who is 17 years of age or older, the IEP team shall discuss whether voter registration is an appropriate community living/citizenship training goal to be included in the IEP, and if so, when and how voter registration should be accomplished. The parents (and student, if present) shall be informed that voter registration can be accomplished at Pennwood Cyber Charter School ("Charter School"), that designated Charter School officials will be made available during the school day to assist the student in filling out voter registration forms, and that Charter School officials will transmit completed voter registration forms to the appropriate county voter registration commission's offices at no cost to the student or parents.

The parents (and student, if present) shall also be informed that Charter School-based voter registration or assistance in registering are not mandatory and may be declined at their option, and that they and the student are free instead to make other arrangements for the student to register to vote outside the Charter School setting (for example, in conjunction with driver licensing, or during orientation or other visits to human services offices or other agencies where voter registration forms and/or assistance is available, etc.), or to decline voter registration altogether. Because voter registration may need to be renewed or changed because of changes of residence or other reasons, this discussion shall take place at least annually at an IEP team meeting for a student age 17 or older, whether or not registration has previously been accomplished or offered.

Maintaining Records

Beyond an introduction such as that set forth above, Charter School personnel should not further pursue the topic of voter registration during an IEP meeting if the parents indicate that further discussion is not appropriate or is unwanted. Voter registration will not be included in IEP goals without parental consent. Nevertheless, voter registration information or assistance may not be denied to any IEP student who independently requests it, whether or not the topic is addressed in the student's agreed IEP, and will be provided upon such request to the same extent as would be available pursuant to an IEP.

Although Charter School personnel may answer questions about available Charter School-based assistance or other non-Charter School registration opportunities, Charter School personnel are not permitted to influence in any way the parents' and student's decision about whether or how to register, and may not participate in or influence any discussion regarding choice of political party affiliation. Discussion of political party affiliation should not take place during the IEP team meeting or other meeting at which Charter School officials are present, and party affiliation information will not be included in the IEP or other LEA-maintained records.

If the parents agree that voter registration is an appropriate transition goal to be included in the IEP, the time and manner for accomplishing registration will be included in the written IEP and implemented in accordance with it. If the manner of registration chosen by the parents and student does not contemplate use of Charter School-based assistance (e.g., in conjunction with driver licensing or other opportunities), no further action on the part of Charter School personnel is required, unless the student or parents later request Charter School-based assistance. However, even in the absence of such a request, the subject of voter registration will be discussed again in accordance with the above procedure, at least annually, when the IEP team meets to further develop, review or update the IEP.

Registration forms will be provided to the parents or student at any time upon request of the parent or student, whether or not further Charter School-based assistance is desired or voter registration is addressed in the IEP. Forms completed outside the Charter School setting, even if not originally obtained through the Charter School, may be submitted to the Charter School for transmission to the appropriate county voter registration commission as provided below.

Program Modifications in the IEP for Voter Registration

If the parents and student choose to make use of Charter School-based assistance in accomplishing voter registration as set forth below, the IEP will:

- Specify the time frame in which this will occur (e.g., within 30 days of the student's eighteenth birthday, and no later than 30 days prior to the next election).
- Identify the Charter School contact person responsible for implementing this aspect of the IEP.
- Ensure that the student is provided with a voter registration form and one-on-one assistance in filling it out (unless declined by the student). Such assistance may be provided by a regular or special classroom teacher, guidance counselor, principal or other Charter School personnel, including Charter School office personnel with appropriate knowledge or training in these procedures. The assistance opportunity may be provided by special arrangement for the particular student, or by means of referral to a point of contact for a Charter School-wide procedure under which all students can obtain voter registration forms and assistance upon request, if such a process exists.
- If referral to a general Charter School-wide location or procedure (see below) is the method provided for in the IEP, the Charter School must ensure that the student receives any necessary assistance in appearing at the proper location at a time when assistance with voter registration forms is available, and that one-on-one assistance in filling out the form is offered and actually provided (unless declined by the student), even if such assistance is not otherwise provided to the general student population.
- The student may decline to register at any time. A voter registration program modification in an IEP will be considered to have been fulfilled when a voter registration opportunity and assistance have been afforded or offered at the time or in the manner set forth in the IEP, even though the student may have declined and registration did not actually occur. Whether or not registration actually occurs, the fact that the opportunity was afforded at the time and in the manner specified in the IEP will be reported to and noted for record by the lead Charter School official on the IEP team, although the

student's records should not reflect whether or not registration was declined or actually accomplished at that time.

- The Charter School implementing the portion of the IEP providing for school-based voter registration is responsible for transmitting the completed voter registration form to the appropriate county voter registration commission, at no cost to the student or parents, within ten days after Charter School officials have received the completed form from a student eligible for special education or the parents, whether or not the form was completed within the Charter School setting or with assistance of Charter School personnel. This may be accomplished by first class mail or other reliable means of delivery. At no time are voter registration forms to be regarded as student or Charter School records, but all voter registration forms shall be treated as confidential information and safeguarded from unauthorized access or disclosure.

Charter School Responsibilities – Coding Forms and Contacts Persons

The Pennsylvania Department of State has designed coding information for voter registration forms that will identify forms submitted in connection with Charter School-based registration, for purposes of measuring the frequency of Charter School-based registration. Unless blank form supplies provided to the Charter School are pre-marked, the Charter School is responsible for marking with the proper code (e.g., by marking boxes indicating some alphanumeric combination, etc.) upon any registration form it transmits to county voter registration commissions resulting from Charter School-based registration information or assistance as described in this policy.

Forms provided by Charter School personnel are to be coded when first provided to a student or parents of a student for the student, even where it is anticipated the form will be completed outside the Charter School setting and submitted via other avenues. Forms obtained outside the Charter School setting but submitted to Charter School personnel for transmittal also will be marked with the Charter School-based code at the time they are received for transmittal.

The Charter School is required to designate a contact person responsible for implementation of these procedures within the Charter School, to whom the Pennsylvania Department of Education and the Department of State may direct further information and guidance about these procedures, and from whom information about that the Charter School's compliance with these requirements may be obtained. The Charter School must furnish the name, voice and fax telephone numbers and mailing address of the contact person to the Bureau of Special Education no later than thirty days after the date of this policy, and within thirty days after any subsequent change in the foregoing information.

Information, training and assistance for Charter School officials providing Charter School-based registration opportunities, including help in coding voter registration forms, is available from the Pennsylvania Department of State, Bureau of Commissions, Elections and Legislation, telephone (717) 787-5280. The Bureau will inform the Charter School of the proper form code when that has been established or if it is later changed. The Bureau's existing program of voter registration training for local agency staffs will be expanded to include voter registration training programs for Charter School personnel in selected locations throughout the Commonwealth.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS CONTROL. THIS POLICY IS NOT INTENDED TO CONFLICT WITH CHARTER REQUIREMENTS.

DRAFT

Pennwood Cyber Charter School

Board of Trustees Policy

Independent Evaluations Policy

The Board of Trustees recognizes that in accordance with applicable state and federal laws, including Chapter 711 of Title 22 of the Pennsylvania Code, a parent has the right to obtain an independent educational evaluation (“IEE”) of his or her child if the parent disagrees with an evaluation by Pennwood Cyber Charter School (“Charter School”) to the extent permitted by law, including the right of Charter School, to file a due process complaint to show that its evaluation is appropriate and to contest the need for an independent evaluation.

If a parent requests an IEE, the CEO/CAO/Principal or their designee is directed to provide the parent with information about where the parent may obtain an IEE and about Charter School’s criteria that apply to IEEs. As this policy contains information about Charter School’s criteria, this policy should be provided to parents upon request.

An Independent Educational Evaluation or IEE is defined under applicable requirements as an evaluation conducted by a qualified examiner who is not employed by Charter School.

Public expense is defined as follows: Charter School either pays for the full cost of the evaluation or ensures that the evaluation is otherwise provided at no cost to the parent, consistent with the provisions of Part B of IDEA 2004.

A parent has the right to an IEE of his or her child at public expense if the parent disagrees with an evaluation of the child obtained by Charter School, SUBJECT TO THE FOLLOWING CONDITIONS:

If a parent requests an IEE at public expense, Charter School must, without unnecessary delay, either: (1) File a due process complaint to request a hearing to show that its evaluation of the child is appropriate; or (2) Provide an IEE at public expense, unless Charter School demonstrates in a hearing that the evaluation obtained did not meet Charter School’s criteria.

The CEO/CAO/Principal or their designee is directed to notify parents when declining the parent’s request for an IEE at public expense and the reason for denial of the IEE via a written PWN/NOREP accompanied by a Procedural Safeguards Notice.

The CEO/CAO/Principal or their designee must not unreasonably delay either providing the IEE at public expense or initiating due process to defend the Charter School’s Evaluation Report.

The CEO/CAO/Principal or their designee is directed to ensure that the IEP team considers a valid IEE.

The CEO/CAO/Principal or their designee is directed to maintain a list of qualified independent evaluators in each of the various disciplines commonly relied upon to provide education-related evaluations and assessments and shall make that list reasonably available to any parent who requests it.

If Charter School initiates a hearing and the final decision is that Charter School’s evaluation is appropriate, the parent still has the right to an independent evaluation, but not at public expense and therefore the Charter School is not responsible for the cost nor any other

public source.

If a parent requests an evaluation at public expense, Charter School shall ask in writing for the parent's reason why he or she objects to the public evaluation. However, it must be made clear that the explanation by the parent may not be required and the School may not unreasonably delay either providing the independent evaluation at public expense or initiating a hearing to defend its evaluation.

A parent is entitled to only one independent educational evaluation at public expense each time the public agency conducts an evaluation with which the parent disagrees.

If a parent obtains an independent evaluation at private expense the results of the evaluation must be considered by Charter School, if it meets Charter School's criteria, in any decision made with respect to a determination of eligibility, and/or bases of eligibility pursuant to IDEA and Chapter 711 and the provision of FAPE to the child. The IEE Report may be presented as evidence at a hearing relating to the child.

If an independent evaluation is at public expense, the criteria under which the evaluation is obtained including, but not limited to the location of the evaluation and qualifications of the examiner, must be the same as the criteria that the Charter School uses when it initiates an evaluation to the extent that those criteria are consistent with the parents' right to an independent evaluation. These criteria must be made known to the parent. Such criteria are determined by the mandates of PA Charter School Law for charter renewal and the Governmental Accounting Standards Board, as per the required annual audit of the Charter School's finances, and are also set forth in the IEE Administrative Procedures and include:

- Production of required current state and federal child abuse and criminal clearances;
- Confirmation and production, of required licensure/certification to perform the independent evaluation;
- Agreement to comply with FERPA given review and use of Student's Personally Protected Information in evaluation process;
- Production of professional liability and workers compensation insurance as evaluator is an independent evaluator and not an employee of the Charter School;
- Email of the IEE report to Parent(s) and Charter School simultaneously;
- Compliance with federal, state and local health directives given the continuing COVID pandemic.

Charter School may not impose conditions or timelines related to obtaining an evaluation at public expense.

All evaluations performed must take into account the child's English language skills and ethnicity to ensure that the testing and evaluation will not be unfair or discriminatory. Tests must be given in the child's native language or mode of communication (such as Braille or sign language) of the child, unless it is clearly not feasible to do so.

Evaluations must also take into account the child's disability to be sure the test measures what it is supposed to measure.

The specific tests used in the evaluation process depend upon the problems the child is experiencing. In most cases, the child will be given several tests to help find strengths and needs. The Charter School teacher(s) and other School IEP team member input must be considered. Information that parents provide must also be included in the evaluation.

Evaluators must be properly certified and qualified to administer the tests, assessments and evaluation techniques used. Such certification and qualification requirements must meet those mandated in Pennsylvania.

Evaluation techniques must be consistent with the most up to date techniques commonly practiced in the evaluator's field.

Evaluations must not be racially, culturally or otherwise biased or discriminatory.

Recommendations must be based upon the child and must not be generalized.

A complete copy of the independent evaluation report must be made available to the IEP team.

Parents are to be given a release of records so that information from Charter School (including records, observations and other information gathered regarding the child) about the child may be disclosed to the independent evaluator and that Parents agree to release of information to the Charter School as obtained by the independent evaluator during course of independent evaluation.

Charter School will comply with and monitor changes in all state and federal time lines, procedures and due process requirements throughout the entire independent evaluation process. In the event that there are changes in state or federal law with regard to any part of this policy, Charter School will comply with state and federal law.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

INDEPENDENT EDUCATION EVALUATIONS (IEE) ADMINISTRATIVE POLICY

A parent who disagrees with an evaluation performed or obtained by Pennwood Cyber Charter School ("Charter School") may request an independent educational evaluation (IEE) at public expense to the extent allowed by applicable state and federal regulations. If the request is received verbally, the staff member who receives the IEE request shall inform the parent that the staff member is forwarding the request to the CEO/CAO/Principal. The staff member is to forward the request to the CEO/CAO/Principal without delay.

The CEO/CAO/Principal or their designee shall take the following steps to the extent that they remain consistent with applicable state and federal regulations regarding IEEs:

The CEO/CAO/Principal may, upon receipt of the request for an IEE, request that the parent state her reasons for disagreement with the evaluation conducted or proposed by the Charter School. The CEO/CAO/Principal shall not require the parents to do so, however, and shall not delay the process for providing or disputing an IEE.

Within ten school days of receipt of a request for an IEE in writing from a parent, the CEO/CAO/Principal of Charter School shall issue a NOREP and Procedural Safeguards Notice to the Parent in which the CEO either approves or denies the request for the IEE.

If the parent refuses to consent to the decision not to provide an IEE, the CEO or their designee must file a Due Process Hearing Request with the Office for Dispute Resolution and notify the parent in writing that Charter School has done so. The parent must be copied on the Due Process Hearing Request in the same manner as it is sent to the Office for Dispute Resolution. The parent must be provided with a copy of the Procedural Safeguards Notice upon filing of a Due Process Hearing Request.

If the CEO or designee consents to provide an IEE, the parent must receive written documentation from the CEO or designee with a Permission to Re-evaluate which should state what the Charter School is proposing by way of testing to serve as prior written notice to Parent of the Charter School's intent, and also a Procedural Safeguards Notice. If the situation is one where, in addition to the request for an IEE, Parent has already disagreed with a NOREP as to all or part of the proposed programming by the Charter School, then another NOREP should also be issued to establish that Student's IEP programming will continue, in accordance with the prior IEP, if Parent has not filed for due process or with the currently recommended NOREP, if Parent has disagreed but not filed for due process. The written documentation must also include the following

(1) Charter School will pay for an IEE provided the IEE meets all of the requirements of an appropriate evaluation as defined in the enclosed Charter School IEE policy. (The IEE policy will also be included with the written documentation).

(2) The CEO/CAO/Principal shall provide a list of qualified independent evaluators to the parent in the discipline requested.

(3) Charter School will not pay for the IEE until the CEO/CAO/Principal receives from the evaluator a complete copy of a report of that evaluation and determines that the evaluation meets all of the requirements of Charter School's policy.

(4) A request that the parents consider accessing reimbursement for all or part of the evaluation from public or private sources of insurance or reimbursement, together with a clear

assurance that the parent is not required to do so and that Charter School would pay any cost not covered by such sources;

(5) DA request that Parents sign a Release of Records to allow the Charter School to send student records to the Independent Evaluator and for the Independent Evaluator to be allowed to release all information obtained from Parents during course of independent evaluation to the Charter School.

(6) . The criteria used by the Charter School for their own evaluations, which are applied to independent evaluators, as set forth in the IEE Board Policy, include:

- Production of required current state and federal child abuse and criminal clearances;
- Confirmation and production, of required licensure/certification to perform the independent evaluation;
- Agreement to comply with FERPA given review and use of Student's Personally Protected Information in evaluation process;
- Production of professional liability and workers compensation insurance as evaluator is an independent evaluator and not an employee of the Charter School;
- Email of the IEE report to Parent(s) and Charter School simultaneously;
- Compliance with federal, state and local health directives given the continuing COVID pandemic.

(7) The IEE shall be reviewed by the student's Multi-Disciplinary IEP Team and considered with respect to the provision of FAPE to the student. Where necessary and/or warranted as required by law, a Team Meeting shall be convened to discuss the results of the IEE and/or any Reevaluation Report performed by Multi-Disciplinary IEP School Team after review of the IEE report. A Meeting may also include discussion and offering of changes in the provision of FAPE proposed as a result of the IEE and/or the Reevaluation Report.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Individualized Education Program Policy (IEP)

The Board of Trustees of Pennwood Cyber Charter School (“Charter School”) recognizes and directs that in addition to the federal requirements incorporated by reference, the state regulations require that the IEP of each student with a disability must include when appropriate:

(1) A description of the type or types of support as defined in this paragraph that the student will receive, the determination of which may not be based on the categories of the child’s disability alone. Students may receive more than one type of support as appropriate and as outlined in the IEP and in accordance with this chapter. Special education supports and services may be delivered in the regular classroom setting and other settings as determined by the IEP team. In determining the educational placement, the IEP team must first consider the regular classroom with the provision of supplementary aids and services before considering the provision of services in other settings.

(i) Autistic support. Services for students with the disability of autism who require services to address needs primarily in the areas of communication, social skills or behaviors consistent with those of autism spectrum disorders. The IEP for these students must address needs as identified by the team which may include, as appropriate, the verbal and nonverbal communication needs of the child; social interaction skills and proficiencies; the child’s response to sensory experiences and changes in the environment, daily routine and schedules; and, the need for positive behavior supports or behavioral interventions.

(ii) Blind-visually impaired support. Services for students with the disability of visual impairment including blindness, who require services to address needs primarily in the areas of accessing print and other visually-presented materials, orientation and mobility, accessing public and private accommodations, or use of assistive technologies designed for individuals with visual impairments or blindness. For students who are blind or visually impaired, the IEP must include a description of the instruction in Braille and the use of Braille unless the IEP team determines, after the evaluation of the child’s reading and writing needs, and appropriate reading and writing media, the extent to which Braille will be taught and used for the student’s learning materials.

(iii) Deaf and hard of hearing support. Services for students with the disability of deafness or hearing impairment, who require services to address needs primarily in the area of reading, communication, accessing public and private accommodations or use of assistive technologies designed for individuals with deafness or hearing impairment. For these students, the IEP must include a communication plan to address the language and communication needs, opportunities for direct communications with peers and professional personnel in the child’s language and communication mode, academic level, and full range of needs, including opportunities for direct instruction in the child’s language and communication mode; and assistive technology devices and services.

(iv) Emotional support. Services for students with a disability who require services primarily in the areas of social or emotional skills development or functional behavior.

(v) Learning support. Services for students with a disability who require services primarily in the areas of reading, writing, mathematics, or speaking or listening skills related to academic performance.

(vi) Life skills support. Services for students with a disability who require services primarily in the areas of academic, functional or vocational skills necessary for independent living.

(vii) Multiple disabilities support. Services for students with more than one disability the result of which is severe impairment requiring services primarily in the areas of academic, functional or vocational skills necessary for independent living.

(viii) Physical support. Services for students with a physical disability who require services primarily in the areas of functional motor skill development, including adaptive physical education or use of assistive technologies designed to provide or facilitate the development of functional motor capacity or skills.

(ix) Speech and language support. Services for students with speech and language impairments who require services primarily in the areas of communication or use of assistive technologies designed to provide or facilitate the development of communication capacity or skills.

(2) Supplementary aids and services

(3) A description of the type or types of personnel support.

(4) The location where the student attends school and whether this is the school the student would attend if the student did not have an IEP.

(5) For students who are 14 years of age or older, a transition plan that includes appropriate measurable postsecondary goals related to training, education, employment and, when appropriate, independent living skills.

(6) The IEP of each student shall be implemented as soon as possible, but no later than 10 school days after its completion.

(7) Every student receiving special education and related services provided for in an IEP shall receive the special education and related services under that IEP, subject to the terms, limitations and conditions set forth in law.

(b) In addition to the requirements incorporated by reference with regard to development, review, and revision of IEP, the Charter School shall designate persons responsible to coordinate transition activities.

The CEO/CAO/Principal or their designee is directed to implement all procedures in accordance with this policy.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Inclusion Policy

In accordance with applicable state and federal regulations regarding students with disabilities, the Board of Trustees of the Pennwood Cyber Charter School ("Charter School") recognizes and directs as follows:

To the maximum extent appropriate, children with disabilities, are educated with children who are nondisabled; and special classes, separate schooling, or other removal of children with disabilities from the regular educational environment occurs only if the nature or severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily.

A continuum of alternative placements must be available to meet the needs of children with disabilities for special education and related services. The continuum must include alternative placements (including, but not limited to: instruction in, regular classes, supplementary aids and services, instruction in special classes, instruction in alternative schools, home instruction, and instruction in hospitals and institutions to the extent required by applicable laws and regulations).

Administration is further directed to make provision for supplementary services (such as resource room or itinerant instruction) to be provided in conjunction with regular class placement to the extent required by law and to inform the Board when supplementary aids and services must be procured and/or approved by the Board.

In determining the educational placement of a child with a disability, Administration is directed to ensure that the placement decision is made by a group of persons, including the parents, and other persons knowledgeable about: the child, the meaning of the evaluation data, and the placement options. Such decision must be made in conformity with the LRE provisions of the federal regulations.

The child's placement must be determined at least annually; be based on the child's IEP; and must be as close as possible to the child's home to the extent required by applicable law. Unless the IEP of a child with a disability requires some other arrangement, the child is educated in the school that he or she would attend if nondisabled.

In selecting the LRE, Administration is directed to give consideration to any potential harmful effect on the child or on the quality of services that he or she needs.

A child with a disability is not to be removed from education in age appropriate regular classrooms solely because of needed modifications in the general education curriculum.

In providing or arranging for the provision of nonacademic and extracurricular services and activities, including meals, recess periods, and the services and activities set forth in the applicable state and federal regulations, Administration is directed to ensure that each child with a disability participates with nondisabled children in the extracurricular services and

activities to the maximum extent appropriate to the needs of that child.

Administration is directed to ensure that each child with a disability has the supplementary aids and services determined by the child's IEP Team to be appropriate and necessary for the child to participate in nonacademic settings.

Administration shall ensure that the IEP team making educational placement decisions understands and adheres to the following guiding principles from the Pennsylvania Department of Education to the extent that they are consistent with applicable federal and state regulations:

1. A Free and Appropriate Public Education (FAPE) must be provided to every student with an IEP; moreover, FAPE must be delivered in the LRE as per the IEP team.
2. Students will not be removed from regular education classrooms merely because of the severity of their disabilities;
3. When students with disabilities, including students with significant cognitive disabilities, need specially designed instruction or other supplementary aids and services to benefit from participating in regular education classrooms, as required in their IEP, the team is obliged to ensure that those services are
Provided to the extent required by applicable state and federal regulations and laws;
4. IEP teams must determine whether the goals in the student's IEP can be implemented in regular education classrooms with supplementary aids and services before considering removal from the regular education classroom;
5. The team will consider the full range of supplementary aids and services in regular education classrooms, based on peer-reviewed research to the extent practicable, including modification of curriculum content, before contemplating placement in a more restrictive setting.

To determine whether a child with disabilities can be educated satisfactorily in a regular education classroom with supplementary aids and services, the following factors provided by the Pennsylvania Department of Education shall be considered and addressed:

1. What efforts have been made to accommodate the child in the regular classroom and with what outcome(s);
2. What additional efforts (i.e. supplementary aids and services) in the regular classroom are possible;
3. What are the educational benefits available to the child in the regular classroom, with the use of appropriate supplementary aids and services;
and
4. Are there possible significant and negative effects of the child's inclusion on the other students in the class?

Per the Pennsylvania Department of Education, the presumption is that IEP teams begin placement discussions with a consideration of the regular education classroom and the supplementary aids and services that are needed to enable a student with a disability to benefit from educational services. Benefit from educational services is measured by progress toward the goals and objectives of the student's IEP, not by mastery of the general education curriculum, and is not limited to academic progress alone; therefore, Administration is directed

to ensure that special education placement in a more restrictive environment is not justified solely on the basis that the child might make greater academic progress outside the regular education environment.

The law and the Pennsylvania Department of Education policy favor education with non-disabled peers; however, inclusion or education with non-disabled peers is not a foregone conclusion; such a decision remains exclusively with the IEP team as they consider FAPE. An IEP team may choose a more specialized setting if:

1. The student will receive greater benefit from education in a specialized setting than in a regular class.
2. He or she is so disruptive as to significantly impair the education of other students in the class; or
3. The cost of implementing a given student's IEP in the regular classroom will significantly affect other children in the LEA.

If, after considering these factors, an IEP team determines that the student needs to be educated in a more specialized setting, the school is required to include the child in school programs with non-disabled children to the maximum extent appropriate. These may include but are not limited to extracurricular activities, assembly programs, recess, lunch, homeroom, etc. Note that a student is not required to "try out" each level of LRE and "fail" before the student moves to a more specialized setting.

Administration is further directed to provide opportunities for teachers to participate in professional development and to become aware of peer-reviewed and research-based practices that can be used to support students in regular classroom settings. In consideration of Pennsylvania Department of Education guidance, Administration is directed to ensure that:

- . Program and placement decisions are based on student strengths, potential and needs;
- . IEP teams consider the regular classroom with supplementary aids and services before considering a more restrictive environment;
- . Staff is aware of this policy on inclusion.
- . Supportive team structures are in place to enable general education teachers to effectively educate students with IEPs in their regular classroom as appropriate;
- . IEP teams use the most current IEP format;
- . Educational placement decisions are made in the proper IEP sequence, which is:
 1. Initial eligibility decision;
 2. Determine FAPE and design the program (i.e. IEP);
 3. Determine whether FAPE can be delivered in the regular classroom with the use of supplementary aids and services;
 4. If the answer to step #3 is "no," then, move to the next step along the continuum of placement options to determine where FAPE can be delivered; and
 5. Correct LRE data is entered.

Administration, teachers and Staff shall be required to adhere to the following:

- . Be familiar with a wide array of supplementary aids and services.
- . Know the proper IEP decision making sequence.
- . Consider the whole range of supplementary aids and services when

- making placement decisions.
- . Understand that modifications to the regular curriculum may be an appropriate means of delivering educational benefit within the regular classroom.
- . Address services needed for a student in a single plan.
- . Be clear about the supports you need in order to implement any given student's IEP within your regular classroom.
- . Be familiar with the continuum of placement options.

Additionally, pursuant to 22 Pa. Code §4.51, relating to the State Assessment System:

"Children with disabilities and children with limited English proficiency shall be included in the State assessment system as required by Federal law, with appropriate accommodations when necessary. As appropriate, the Commonwealth will develop guidelines for the participation of children with disabilities in alternate assessments for those children who cannot participate in the PSSA or Keystone Exams as determined by each child's individualized education program team under the Individuals with Disabilities Education Act and this part."

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

INSTRUCTION IN THE HOME POLICY

The Board of Trustees directs the CEO or their designee of Pennwood Cyber Charter School ("Charter School") to implement procedures needed to comply with applicable state and federal requirements, including the following guidelines in the Pennsylvania Department of Education ("PDE") Basic Education Circular:

INSTRUCTION CONDUCTED IN THE HOME

Instruction conducted in the home is included in the definition of special education in the federal regulations and is recognized as a placement option on the continuum of alternative placements for students with disabilities. It is highly restrictive and should only be considered when less restrictive placements are not appropriate in accordance with applicable state and federal laws.

The use of instruction conducted in the home is typically restricted to students whose needs require full-time special education services and programs outside the school setting for the entire day.

Although a student placed by his or her Individualized Education Program ("IEP") team on instruction conducted in the home does not receive his or her program in the school setting, he or she remains entitled to a free and appropriate public education equal to his or her non-disabled peers, unless this amount of instruction would jeopardize the child's health or welfare. In such cases, the IEP team can agree on fewer hours of instruction so long as the student still receives a free and appropriate public education pursuant to their IEP.

For students placed on Instruction Conducted in the Home, IEP Teams may consider technological options such as web conferencing, distance learning, video conferencing, and virtual classrooms to connect students to the classroom and schools, when appropriate, to provide access to teachers, peers, and to provide additional participation and learning opportunities.

In all circumstances involving the placement of a student on instruction conducted in the home, the Charter School must file any report or other documentation promulgated by the PDE within 5 days of the placement or as required by PDE. Charter School must supply the PDE with information about the student that is required (his or her disability, and the anticipated length and reason for the placement). In addition, Charter School must provide information regarding the person in Charter School whom PDE can contact to discuss the placement if necessary. The web-based reporting system, Special Education Students at Home Reporting System (email at SES@Home) must be used for such reporting. (Charter Schools should use their Administrative Unit Number (AUN) as the user name to log into the reporting system. The password is identical to the one used to log into the Cyclical Compliance Monitoring System. For assistance identifying a user name and password, the school districts and charter schools may contact the Bureau of Special Education by phone at 717-783-6134.)

Instruction conducted in the home is not an appropriate option if the IEP team is experiencing difficulty in arranging the program or placement that a student requires. In such cases, the Charter School should continue to serve the student in accordance with his or her IEP while taking steps to promptly arrange for the services that the student requires. These steps may include seeking assistance from the PDE or from other agencies involved with the student. (See Intensive Interagency Support Policy for guidance, in circumstances involving the identification of children who are experiencing placement delays or who are at-risk for placement delays.)

Although instruction conducted in the home is not ordinarily permitted when the student has no condition preventing him or her from leaving the home, there are occasional, exceptional cases in which

the parents and school agree to instruction conducted in the home as a short-term option. In these cases, the school must immediately file a report with the PDE utilizing the form required by PDE. As indicated on the form, the Charter School is also responsible for informing the PDE when the short-term placement has concluded. (The Charter School must report not less than weekly to PDE utilizing the web-based reporting system. As indicated on the SES@Home website, the charter school is also responsible for informing PDE when the short-term placement has concluded.)

"Instruction conducted in the home," which is listed in the continuum of special education alternative placements in federal regulations, should not be confused with "homebound instruction," which describes the instruction a charter school may provide when a student has been excused from compulsory attendance under 22 Pa. Code §11.25, due to temporary mental or physical illness or other urgent reasons.

Even though homebound instruction is not a special education placement option for students with disabilities, there are occasions when a student with a disability may receive homebound instruction due to a temporary excusal from compulsory attendance in the same manner as the student's non-disabled peers. The Charter School must also report to PDE for students with disabilities for whom homebound instruction is approved and must also file a follow up report when the temporary placement has concluded and the student has returned to school. In addition, the Charter School must document the physician's recommendation for homebound instruction.

If the temporary condition that precipitated the excusal from attendance for a student with disabilities results in a change in the student's need for specially designed instruction, the Charter School may need to reevaluate the student. The Charter School may also need to reconvene the student's IEP team to determine whether it is necessary to revise the IEP and change the student's placement to instruction conducted in the home.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Intensive Interagency Policy

The Board of Trustees of the Charter School (“Charter School”) recognizes the duty of the CEO or designee to identify, issue reports as to and provide a free and appropriate public education (“FAPE”) for all students with disabilities including those students needing intensive interagency approaches. FAPE must also be available to all children, including children with disabilities who have been suspended or expelled from the Charter School.

Intensive interagency coordination to students with disabilities occurs when the Charter School has determined that the student cannot be appropriately educated in a public educational setting and have waited more than 30 days for the provision of an appropriate educational placement. This system is also aimed at providing assistance to students who are at substantial risk of waiting more than 30 days for an appropriate educational placement.

The system of intensive interagency coordination is not intended to replace the local interagency process. In the vast majority of situations requiring interagency efforts, local IEP and Interagency teams do not require additional assistance to assure the provision of appropriate educational programs and placements for the students they serve. Intensive interagency coordination is designed for the rare situations when the local teams are not able to arrange for the placements of students in the public educational setting and the students have waited or are at risk of waiting more than 30 days for an appropriate educational placement.

Local educational agencies, such as Charter Schools, have a crucial role in identifying which students require intensive interagency coordination, since these are students whom the Charter School has determined cannot currently be served in the public educational setting.

The Charter School shall ensure that, to the maximum extent appropriate, children with disabilities, including children in public or private institutions or other care facilities, are educated with children who are nondisabled; and that special classes, separate schooling or other removal of children with disabilities from the regular education environment occurs only if the nature or severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily.

If there is a dispute about the appropriateness of the student’s program or placement, this dispute must be resolved through mediation and/or due process hearing procedures. Program and/or placement disputes cannot be resolved through intensive interagency coordination.

The Charter School must identify any students currently on instruction conducted in the home or students with disabilities on homebound instruction and comply with PA Department of Education reporting requirements so that the Department can determine whether these students require intensive interagency coordination..

Charter School must identify any students currently on instruction conducted in the home or students with disabilities on homebound instruction and comply with PA Department of education reporting requirement so that the Department can determine whether these students require intensive interagency coordination.

The CEO/Principal or their designee shall have procedures to ensure that services are located for difficult to place students.

The CEO/Principal or their designee shall utilize the Regional Interagency Coordinators to assist in interagency planning and to mitigate and/or eliminate barriers to placement.

The CEO/Principal or their designee shall ensure that training is provided regarding interagency approaches.

Where appropriate, other child serving systems, such as mental health, intellectual disability, child protective services, juvenile probation, and drug-alcohol treatment services are used for difficult to place students.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Least Restrictive Environment

The Board of Trustees of the Pennwood Cyber Charter School ("Charter School") directs the Chief Executive Officer ("CEO")/Principal or their designee to ensure that, in accordance with applicable state and federal laws and regulations, to the maximum extent appropriate, children with disabilities are educated with children who are nondisabled and that special classes, separate schooling, or other removal of children with disabilities from the regular education environment occurs only if the nature or severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily.

Least Restrictive Environment ("LRE") means that, to the maximum extent appropriate, a Charter School must educate students with disabilities in the regular classroom with appropriate aids and supports, referred to as "supplementary aids and services," along with their nondisabled peers in the school they would attend if not disabled, unless a student's IEP requires some other arrangement. This requires an individualized inquiry into the unique educational needs of each disabled student in determining the possible range of aids and supports that are needed to facilitate the student's placement in the regular educational environment before a more restrictive placement is considered.

The CEO/Principal or their designee is directed to ensure that a continuum of alternative placements is available to meet the needs of children with disabilities for special education and related services. The continuum of alternative placements may include but is not limited to: instruction in regular classes with or without supplementary aids and services, special classes, special schools, approved private schools, home instruction and instruction in hospitals and institutions to the extent the IEP team determines such placements are appropriate.

These options must be available to the extent necessary to implement the IEP of each disabled student. The placement team must select the option on the continuum in which it determines that the student's IEP can be implemented. Any alternative placement selected for the student outside of the regular educational environment must maximize opportunities for the student to interact with nondisabled peers, to the extent appropriate to the needs of the student. Pursuant to IDEA, parents must be given written prior notice by the Charter School that meets the requirements of the IDEA federal regulations at 34 C.F.R. §300.505, as to a reasonable time before a public agency implements a proposal or refusal to initiate or change the identification, evaluation, or educational placement of the child, or the provision of FAPE to the child. Consistent with this notice requirement, parents of disabled students must be informed that the public agency is required to have a full continuum of placement options, as well as about the placement options that were actually considered and the reasons why those options were rejected. 34 CFR §§300.504-300.505.

The CEO/Principal or their designee is directed to provide training opportunities for school personnel regarding inclusion.

The CEO/Principal or their designee is directed to make opportunities available for students to interact with nondisabled peers when they need to be removed for any amount of time from the regular education environment.

The CEO/Principal or their designee is directed to support participation of students with disabilities in nonacademic and extracurricular activities where appropriate (including transportation).

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

DRAFT

Pennwood Cyber Charter School

Board of Trustees Policy

Nonacademic Services and Settings Policy

In accordance with applicable state and federal regulations regarding students with disabilities, the Board of Trustees of Pennwood Cyber Charter School ("Charter School") recognizes and directs as follows:

- (a) The Charter School must take steps, including the provision of supplementary aids and services determined appropriate and necessary by the child's IEP and/or Section 504 Team, to provide nonacademic and extracurricular services and activities in the manner necessary to afford children with disabilities an equal opportunity for participation in those services and activities as their nondisabled peers. Children with disabilities shall participate with nondisabled children in those services and activities to the extent appropriate under applicable state and federal laws and regulations.
- (b) Nonacademic and extracurricular services and activities may include counseling services, athletics, transportation, health services, recreational activities, special interest groups or clubs sponsored by the Charter School.
- (c) The Charter School must ensure that each child with a disability has the supplementary aids and services determined by the child's IEP Team to be appropriate and necessary for the child to participate in nonacademic settings when same are required to afford a student with equal opportunity or are otherwise required under IDEA 2004 and/or Section 504.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Physical Education Policy

Physical education services, specially designed if necessary, must be made available to every child with a disability receiving FAPE, unless the charter school enrolls children without disabilities and does not provide physical education to children without disabilities in the same grades to the extent allowed by applicable laws and regulations.

Each child with a disability must be afforded the opportunity to participate in the regular physical education program available to nondisabled children unless the child is enrolled full time in a separate facility; or the child needs specially designed physical education, as prescribed in the child's IEP.

If specially designed physical education is prescribed in a child's IEP, the Pennwood Cyber Charter School must provide the services directly or make arrangements for those services to be provided through other public or private programs.

The child with a disability who is enrolled in a separate facility must receive appropriate physical education services.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Positive Behavioral Support Policy and Procedures

In accordance with applicable state regulations, including Title 22 Pa. Code Chapter 711.46, Pennwood Cyber Charter School's ("Charter School") Board of Trustees has established this policy to effectuate a program of positive behavior support at Charter School. Some procedures have been included.

DEFINITIONS:

Aversive techniques--Deliberate activities designed to establish a negative association with a specific behavior.

Crisis Plan - A crisis plan is an action plan that is needed for times when a student may be at risk of harm to self or others and is part of a student's Positive Behavioral Support Plan in the IEP. It should be developed by individuals knowledgeable about the child and include someone trained in mental health crisis response. A crisis plan defines what a specific student's crisis looks like in the charter school setting and includes steps the charter school will take to support the student. These steps will include who to contact for assistance, how to work together with the student during the crisis, and how to know when the crisis is over. A crisis plan also identifies when parents should be notified

Positive behavior support plan--A plan for students with disabilities who require specific intervention to address behavior that interferes with learning. A positive behavior support plan shall be developed by the IEP team, be based on a functional behavior assessment and become part of the student's IEP. These plans include methods that utilize positive reinforcement and other positive techniques to shape a student's behavior, ranging from the use of positive verbal statements as a reward for good behavior to specific tangible rewards.

Restraints –

(i) The application of physical force, with or without the use of a device, for the purpose of restraining the free movement of a student's body. The term does not include briefly holding, without force, a student to calm or comfort him, guiding a student to an appropriate activity, or holding a student's hand to safely escort him from one area to another.

(ii) Excluded from this definition are hand-over-hand assistance with feeding or task completion and techniques prescribed by a qualified medical professional for reasons of safety or for therapeutic or medical treatment, as agreed to by the student's parents and specified in the IEP. Devices used for physical or occupational therapy, seatbelts in wheel chairs or on toilets used for balance and safety, safety harnesses in buses, and functional positioning devices are examples of mechanical restraints which are excluded from this definition.

Seclusion - refers to the involuntary confinement of a child alone in a room or isolated area from which the child is prevented from leaving. Seclusion may include having a door locked or physically blocked or held shut with the child being alone, or having a child placed away from peers and caregivers for a

period of time with no access to social interaction; the child also may have limited contact with a caregiver. Seclusion can be confused with “time out” which is a behavior management technique that is part of an approved program, involves the monitored separation of the student in a non-locked setting, with removal or limiting of the amount of reinforcement or attention that is available to a child for a brief period of time and is implemented for the purpose of calming. Time out does not require or imply seclusion.

The U.S. Department of Education states that every instance in which restraint or seclusion is used should be carefully and continuously and visually monitored to ensure the appropriateness of its use and safety of the child, other children, teachers, and other personnel. Only school personnel who have received the required training on the use of restraint and seclusion should be engaged in observing and monitoring these children. Monitoring should include a procedural checklist and recordkeeping procedures. School staff engaged in monitoring should be knowledgeable regarding (1) restraint and seclusion procedures and effective alternatives; (2) emergency and crisis procedures; (3) strategies to guide and prompt staff members engaged in restraint or seclusion procedures; and (4) procedures and processes for working as a team to implement, monitor, and debrief uses of restraint or seclusion. Monitoring staff should receive training to ensure that the use of physical restraint or seclusion does not harm the child or others, and that procedures are implemented as planned.

Trained school staff should also inspect and prepare the seclusion area before a child is placed in seclusion. For example, the area should be free of any objects a child could use to injure him- or herself or others. School staff should either be inside the area or outside by a window or another adjacent location where staff can continuously observe the child and confirm that the child is not engaging in self-injurious behavior

POSITIVE BEHAVIOR SUPPORT:

Positive rather than negative measures shall form the basis of positive behavior support programs to ensure that all of Charter School’s students shall be free from demeaning treatment, the use of aversive techniques and the unreasonable use of restraints.

Positive techniques required for the development, change and maintenance of behavior shall be the least intrusive necessary.

RESEARCH-BASED PRACTICES:

Behavior support programs are informed by the results of the Functional Behavior Assessment and the strategies must be guided by the function of the interfering behavior. Behavior support plans must include behavioral goals, research-based practices and techniques to be used to decrease interfering behaviors and increase appropriate student engagement in the educational environment.

Antecedent Based Interventions – refers to the use of environmental modifications implemented to elicit appropriate behavior, and to minimize the likelihood of interfering behaviors to occur. Commonly used strategies include the presentation of a high interest activity, offering choices, providing a quiet location to work, utilizing a visual schedule, and use of transition warnings before the termination of an activity.

Reinforcement – refers to the relationship between behavior and the consequence following the interfering behavior. If the consequence increases the likelihood of the behavior to occur again in the future, it is considered to be positively reinforcing. Behavior support

plans must include information specific to reinforcement as it pertains to the interfering behavior and its function.

Consequence Interventions – refers to the actions that are taken following the occurrence of an interfering behavior. These de-escalation strategies may include implementing strategies in a crisis plan or withholding positive reinforcement for interfering behavior.

FUNCTIONAL BEHAVIOR ASSESSMENT:

Behavior support programs and plans shall be based on a functional assessment of behavior (“FBA”) and utilize positive behavior techniques. When an intervention is needed to address problem behavior, the types of intervention chosen for a particular student must be the least intrusive necessary.

The IDEA does not provide specific guidelines and recommendations concerning how to conduct an FBA. However, the Charter School follows, among other things, guidelines from PaTTAN regarding the FBA process which “is frequently used to determine the nature and extent of the special education and related services that the child needs, including the need for a positive behavior support plan. As with other individualized evaluation procedures, and consistent with 34 CFR §300.300 (a) and (c), parental consent is required for an FBA to be conducted as part of the initial evaluation or a reevaluation.”

RESTRAINTS:

The use of restraints is considered a measure of last resort, only to be used after other less restrictive measures, including de-escalation techniques.

Restraints to control acute or episodic aggressive or self-injurious behavior may be used only when the student is acting in a manner as to be a clear and present danger to himself, to other students or to employees, and only when less restrictive measures and techniques have proven to be or are less effective.

In the event that the need to use restraint cannot be reasonably anticipated for a particular student, or the parents/guardians refuse to provide consent therefore, appropriately trained staff may use such restraint when the student is acting in a manner that constitutes a clear and present danger to him/herself, to other students, or to employees.

NOTIFICATION OF USE OF RESTRAINT AND PROCEDURES:

The use of restraints or seclusion to control the aggressive behavior of an individual student shall cause the Charter School to notify the parent of the use of restraint, as soon as practical and shall cause a meeting of the IEP Team within 10 school days of the inappropriate behavior causing the use of restraints or seclusion in order to review the effectiveness and appropriateness of the current IEP. At this meeting, the IEP team shall consider whether the student needs a functional behavioral assessment, reevaluation, a new or revised positive behavior support plan or a change of placement to address the inappropriate behavior.

Restraints or use of seclusion that result in injury to the student must be reported to the parent/guardian per 22 PA Code §10.25:

(a) A school entity shall immediately notify, as soon as practicable, the parent or guardian of a victim or suspect directly involved in an incident listed in section 1303-A(b)(4.1) or (4.2) of the Safe Schools Act (24 P.S. § 13-1303-A(b)(4.1) and (4.2)). In making the notification, the school entity shall inform the parent or guardian as to whether the local police department having jurisdiction over property of the school entity has been, or may be, notified of the incident.

(b) A school entity shall document attempts made to reach the parent or guardian of a victim or suspect directly involved in an incident listed in section 1303-A(b)(4.1) or (4.2) of the Safe Schools Act.

Administration is directed to write internal procedures that detail who is responsible for reporting restraints and use of seclusion, who is responsible for notifying key administrators regarding the use of a restraint or seclusion, and who is responsible for entering restraints or seclusion in any PDE system to reporting on the use of restraints and seclusion. Administration is further directed to comply with PDE guidelines regarding the reporting of the use of restraints and seclusion. Staff trained and/or certified in a program of positive behavioral supports and de-escalation techniques, and safe physical management techniques will be designated as the individuals to intervene in crisis management situations that might require restraint or seclusion of a student. Physical interventions or secluding a student should only be undertaken by staff persons who have successfully completed a comprehensive crisis management course that covers: crisis definition and theory; the use of de-escalation techniques; crisis communication; anger management; passive physical intervention techniques; the legal, ethical, and policy aspects of physical intervention use; decision making related to physical interventions and debriefing strategies.

INCLUSION OF USE OF RESTRAINTS IN A STUDENT'S IEP:

The use of restraints may only be included in a student's IEP when:

- (i) Utilized with specific component elements of positive behavior support.
- (ii) Used in conjunction with the teaching of socially acceptable alternative skills to replace problem behavior.
- (iii) Staff are authorized to use the procedure and have received the staff training required.
- (iv) There is a plan in place for eliminating the use of restraint through application of positive behavior support.

The use of restraints may not be included in the IEP for the convenience of staff, as a substitute for an educational program or employed as punishment.

PROHIBITION AGAINST PRONE RESTRAINTS:

The use of prone restraints is **prohibited** in educational programs. Prone restraints are those in which a student is held face down on the floor.

RESTRAINT REPORTING AND PROCEDURES:

The Charter School shall maintain and report data on the use of restraints as prescribed by the Secretary of the Department of Education. The report is subject to review during cyclical compliance monitoring conducted by the Department. A physical restraint as defined above must be reported regardless of the length of time used, the role of the adult performing the restraint, or the employer of that adult. The LEA must report the use of restraints within 30 days to PDE's Bureau of Special Education through the Restraint Information System of

Collection (RISC), a secure website. PDE recommends that all LEAs designate a person who will be responsible for reporting restraints to the RISC website in a timely manner. If the restraint results in serious injury to a student, staff person or both, a report shall be made via email to the RISC coordinator within 48 hours.

Additionally, a restraint or use of seclusion that results in any injury to a student, staff person or both shall be reported to the CEO who shall comply with any requirement to report the injury as a Mandated Reporter, and in accordance with the School's MOU with law enforcement, as well as PDE's Educator Misconduct Act and any other applicable state and federal reporting requirements.

MECHANICAL RESTRAINTS:

Mechanical restraints, which are used to control involuntary movement or lack of muscular control of students when due to organic causes or conditions, may be employed. The use of mechanical restraints must be recommended by a qualified medical professional, agreed to by the parent(s), and specified in the IEP. This type of restraint must be applied as recommended by qualified medical personnel. Mechanical restraints must prevent a student from injuring himself or others or promote normative body positioning and physical functioning. Charter School staff must be trained in use of mechanical restraints.

PROHIBITION AGAINST AVERSIVE TECHNIQUES:

The following aversive techniques of handling behavior are considered inappropriate and **shall not** be used in educational programs:

- (1) Corporal punishment.
- (2) Punishment for a manifestation of a student's disability.
- (3) Locked rooms, locked boxes or other locked structures or spaces from
which the student cannot readily exit.
- (4) Noxious substances.
- (5) Deprivation of basic human rights, such as withholding meals, water or fresh air.
- (6) Suspensions constituting a pattern.
- (7) Treatment of a demeaning nature.
- (8) Electric shock.

TRAINING OF PERSONNEL

The Board of Trustees hereby directs that school personnel be trained each school year on the general use of positive behavior support, de-escalation techniques, and emergency responses.

In addition to general positive behavior support training, when students are identified as in need of these supports, individual teachers and teacher groups are notified and trained accordingly so that they can act in accordance with the student's specific Positive Behavior Support Plan and de-escalation techniques, and respond appropriately in emergencies.

Per guidance from the Pennsylvania Department of Education, the core training components, the positive support plan and de-escalation (restraint reduction) staff trainings

should include:

- The growing concern and potential legal issues surrounding physical restraints;
- How to create a commitment to the reduction of the use of physical restraints;
- Creating a safe environment where positive rather than negative measures form the basis of behavior management programs;
- How staff can avoid taking conflict personally; avoiding power struggles;
- Prevention of problem behaviors through a system of recognition of signs of anxiety and distress in students and staff;
- Identification of the phases of crisis events and matching behaviors to interventions;
- Demonstration and modeling of the de-escalation techniques and other alternatives to physical restraint;
- Effective positive behavior support plans that include methods of utilizing positive reinforcement and other positive techniques to shape replacement behavior(s);
- Research-based practices that develop and maintain replacement behaviors that enhance student learning and skills for life;
- Risks associated with the use of physical interventions including the signs of physical distress, positional asphyxiation, and the psychological effects of restraint;
- Safe techniques for the use of physical restraints (prone restraints prohibited);
- Documentation of the incident and compliance with notification procedures;
and
- Post intervention debriefing with student and staff.

REPORTING

Administration is directed to write internal procedures that detail who is responsible for reporting restraints, who is responsible for notifying key administrators regarding the use of a restraint, and who is responsible for entering restraints in any PDE system to reporting on the use of restraints. Administration is further directed to comply with PDE guidelines regarding the reporting of the use of restraints.

Staff trained and/or certified in a program of positive behavioral supports and de-escalation techniques, and safe physical management techniques will be designated as the individuals to intervene in crisis management situations that might require restraint of a student. Physical interventions should only be undertaken by staff who have successfully completed a comprehensive crisis management course that covers: crisis definition and theory;

the use of de-escalation techniques; crisis communication; anger management; passive physical intervention techniques; the legal, ethical, and policy aspects of physical intervention use; decision making related to physical interventions and debriefing strategies.

Parental notification should occur within one school day of a restraint incident unless other procedures are written in the student's IEP.

Any restraint that results in an injury to a student and/or staff person must be reported to the CEO who will comply with any requirement to report the injury to the Bureau of Special Education.

ADDITIONAL REQUIREMENTS AND ADMINISTRATIVE PROCEDURES

The CEO or their designee is directed to ensure that behavior support programs administered at Charter School are in accordance with Title 22 Pa. Code Chapter 711, including the training of personnel for the use of specific procedures, methods and techniques, and for having written procedures on the use of behavior support techniques and obtaining parental consent prior to the use of restrictive or intrusive procedures or restraints.

The CEO or their designee is further directed to make professional development opportunities provided by the Bureau of Special Education available to train staff regarding Positive Behavior Support.

The CEO or their designee is charged with using the most updated forms available through the Bureau of Special Education related to positive behavior support, including the use of any forms promulgated for functional behavior assessments and behavior support plans.

REFERRALS TO LAW ENFORCEMENT

An updated functional behavior assessment and positive behavior support plan shall be required subsequent to a referral to law enforcement including revisions to the IEP, for a student with a disability who has a positive behavior support plan.

For a student with a disability who does not have a positive behavior support plan, subsequent to notification to law enforcement, the Charter School shall convene the student's IEP Team to consider whether a behavior support plan should be developed to address the student's behavior, in accordance with law, regulations and Board policy

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Program Options Policy

In accordance with applicable state and federal regulations regarding students with disabilities, the Board of Trustees of the Pennwood Cyber Charter School (“Charter School”) recognizes and directs as follows:

It is the Charter School’s policy that children with disabilities have available to them the variety of educational programs and services available to nondisabled children.

The Chief Executive Officer/Principal or their designee is directed to implement all procedures in accordance with this policy.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL’S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

DRAFT

Pennwood Cyber Charter School

Board of Trustees Policy

Psychological Services

The Board of Trustees (“Board”) of the Pennwood Cyber Charter School (“Charter School”) directs that the Chief Executive Officer (“CEO”)/Principal or their designee ensure that psychological services be made available to eligible students in accordance with Chapter 711 of Title 22 of the Pennsylvania Code as follows:

Psychological services may include:

- (1) Administering psychological and educational testing, and other assessment procedures;
- (2) Interpreting assessment results;
- (3) Consulting with other staff members in planning school programs to meet the special educational needs of children as indicated by psychological tests, interviews, direct observation, and behavioral evaluations;
- (4) Planning and managing a program of psychological services;
- (5) Obtaining, integrating and interpreting information about child behavior and conditions related to learning; and
- (6) Assisting in developing positive behavioral intervention strategies.

The CEO/Principal or their designee is directed to maintain a listing of what services are available both within the school setting and of school-funded services obtained from outside agencies.

Parents are not to be charged for psychological services that students require as a related service in accordance with applicable laws.

The CEO/Principal or their designee is directed to advise the Board regarding psychological service needs of the school’s students as well as related services needs, such as transportation.

Administration is directed to ensure appropriate psychological services are obtained for students in accordance with applicable state and federal laws and regulations.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL’S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

RELATED SERVICES

The Board of Trustees of Pennwood Cyber Charter School ("Charter School") recognizes that charter schools must comply with Chapter 711 of Title 22 of the Pennsylvania Code regarding the provision of related services which incorporate the federal regulations at 34 C.F.R. §300.1 et. seq., which implement the Individuals with Disabilities Education Improvement Act 2004, ("IDEA").

It is the intent of the Board of Trustees to ensure that all students with disabilities have available to them a free appropriate public education that emphasizes special education and related services designed to meet their unique needs and to prepare them for further education, employment, and independent living.

Pursuant to 34 CFR § 300.34, related services are transportation and those developmental, corrective and other supportive services that are required to assist a child with a disability to benefit from special education. Such services may include (depending upon the child's need and applicable state regulations):

- (1) speech-language pathology and audiology services,
- (2) interpreting services,
- (3) psychological services,
- (4) physical and occupational therapy,
- (5) recreation, including therapeutic recreation,
- (6) early identification and assessment of disabilities in children,
- (7) counseling services, including rehabilitation counseling,
- (8) orientation and mobility services, and
- (9) medical services for diagnostic or evaluation purposes.

Related services may also include school health services and school nurse services, social work services in schools, and parent counseling and training.

Related services do not include a medical device that is surgically implanted, the optimization of that device's functioning (e.g., mapping), maintenance of that device, or the replacement of that device. However, nothing:

(i) Limits the right of a child with a surgically implanted device (e.g., cochlear implant) to receive related services that are determined by the IEP Team to be necessary for the child to receive FAPE.

(ii) Limits the responsibility to appropriately monitor and maintain medical devices that are needed to maintain the health and safety of the child, including breathing, nutrition, or operation of other bodily functions, while the child is transported to and from school or is at school; or

(iii) Prevents the routine checking of an external component of a surgically implanted device to make sure it is functioning properly, as required in Sec. 300.113(b) of Title 34 CFR.

Charter School will provide related services to include those services which the IEP team determines are necessary for a student after a comprehensive evaluation and the development of an IEP.

The types of services provided by Charter School include, but are not limited to the following types of services:

- (1) Audiology includes:
 - (i) Identification of children with hearing loss;
 - (ii) Determination of the range, nature, and degree of hearing loss, including referral for medical or other professional attention for the habilitation of hearing;
 - (iii) Provision of habilitative activities, such as language habilitation, auditory training, speech reading (lip-reading), hearing evaluation, and speech conservation;
 - (iv) Creation and administration of programs for prevention of hearing loss;
 - (v) Counseling and guidance of children, parents, and teachers regarding hearing loss; and
 - (vi) Determination of children's needs for group and individual amplification, selecting and fitting an appropriate aid, and evaluating the effectiveness of amplification.
- (2) Counseling services mean services provided by qualified social workers, psychologists, guidance counselors, or other qualified personnel.
- (3) Early identification and assessment of disabilities in children means the implementation of a formal plan for identifying a disability as early as possible in a child's life.
- (4) Interpreting services include—
 - (i) The following, when used with respect to children who are deaf or hard of hearing: Oral transliteration services, cued language transliteration services, sign language transliteration and interpreting services, and transcription services, such as communication access real-time translation (CART), C-Print, and TypeWell; and
 - (ii) Special interpreting services for children who are deaf-blind.
- (5) Medical services means services provided by a licensed physician to determine a child's medically related disability that results in the child's need for special education and related services.

- (6) Occupational therapy –
 - (i) Means services provided by a qualified occupational therapist; and
 - (ii) Includes –
 - (A) Improving, developing, or restoring functions impaired or lost through illness, injury, or deprivation;
 - (B) Improving ability to perform tasks for independent functioning if functions are impaired or lost; and
 - (C) Preventing, through early intervention, initial or further impairment or loss of function.
- (7) Orientation and mobility services –
 - (i) Means services provided to blind or visually impaired children by qualified personnel to enable those students to attain systematic orientation to and safe movement within their environments in school, home, and community; and
 - (ii) Includes teaching children the following, as appropriate:
 - (A) Spatial and environmental concepts and use of information received by the senses (such as sound, temperature and vibrations) to establish, maintain, or regain orientation and line of travel (e.g., using sound at a traffic light to cross the street);
 - (B) To use the long cane or a service animal to supplement visual travel skills or as a tool for safely negotiating the environment for children with no available travel vision;
 - (C) To understand and use remaining vision and distance low vision aids; and
 - (D) Other concepts, techniques, and tools.
- (8)
 - (i) Parent counseling and training means assisting parents in understanding the special needs of their child;
 - (ii) Providing parents with information about child development; and
 - (iii) Helping parents to acquire the necessary skills that will allow them to support the implementation of their child's IEP or IFSP.
- (9) Physical therapy means services provided by a qualified physical therapist.
- (10) Psychological services include –

- (i) Administering psychological and educational tests, and other assessment procedures;
 - (ii) Interpreting assessment results;
 - (iii) Obtaining, integrating, and interpreting information about child behavior and conditions relating to learning;
 - (iv) Consulting with other staff members in planning school programs to meet the special educational needs of children as indicated by psychological tests, interviews, direct observation, and behavioral evaluations;
 - (v) Planning and managing a program of psychological services, including psychological counseling for children and parents; and
 - (vi) Assisting in developing positive behavioral intervention strategies.
- (11) Recreation includes –
- (i) Assessment of leisure function;
 - (ii) Therapeutic recreation services;
 - (iii) Recreation programs in schools and community agencies; and
 - (iv) Leisure education.
- (12) Rehabilitation counseling services mean services provided by qualified personnel in individual or group sessions that focus specifically on career development, employment preparation, achieving independence, and integration in the workplace and community of a student with a disability. The term also includes vocational rehabilitation services provided to a student with a disability by vocational rehabilitation programs funded under the Rehabilitation Act.
- (13) School health services and school nurse services mean health services that are designed to enable a child with a disability to receive FAPE as described in the child's IEP. School nurse services are services provided by a qualified school nurse. School health services are services that may be provided by either a qualified school nurse or other qualified person.
- (14) Social work services in schools include –
- (i) Preparing a social or developmental history on a child with a disability;
 - (ii) Group and individual counseling with the child and family;
 - (iii) Working in partnership with parents and others on those problems in a child's living situation (home, school, and community) that affect the child's adjustment in school;

(iv) Mobilizing school and community resources to enable the child to learn as effectively as possible in his or her educational program; and

(v) Assisting in developing positive behavioral intervention strategies.

(15) Speech-language pathology services include—

(i) Identification of children with speech or language impairments;

(ii) Diagnosis and appraisal of specific speech or language impairments;

(iii) Referral for medical or other professional attention necessary for the habilitation of speech or language impairments;

(iv) Provision of speech and language services for the habilitation or prevention of communicative impairments; and

(v) Counseling and guidance of parents, children, and teachers regarding speech and language impairments.

(16) Transportation includes—

(i) Travel to and from school and between schools;

(ii) Travel in and around school buildings; and

(iii) Specialized equipment (such as special or adapted buses, lifts, and ramps), if required to provide special transportation for a child with a disability.

Related services are provided to students during normal school hours during the Charter School's regular school year as dictated by the student's IEP or during times and hours as otherwise agreed upon by the student's IEP team and written in the IEP. Related services are provided during the extended school year to the extent extended school year services are applicable for a particular student pursuant to state regulations and the student's IEP. The Charter School may provide related services in the home for students who require related services in the home as part of their IEP. When related services are not provided in the Charter School setting, the Charter School arranges transportation to and from the location of related services in accordance with applicable state and federal regulations.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Section 504 Policy

The Board of Trustees recognizes that all qualified persons with disabilities in the Pennwood Cyber Charter School ("Charter School") are entitled to a free and appropriate public education under Section 504 of the Rehabilitation Act of 1973 ("Section 504"). Section 504 is a civil rights statute that prohibits discrimination against individuals with disabilities. Section 504 is applicable to charter schools that receive Federal financial assistance from the U.S. Department of Education for programs and activities

The Charter School is under an affirmative duty to locate all students who are eligible for Section 504 accommodations pursuant to its Child Find duties. (34 C.F.R. §104.32(a)).

The Section 504 regulations define a person with a disability as any person who (i) has a physical or mental impairment which substantially limits one or more major life activities, (ii) has a record of such an impairment, or (iii) is regarded as having such an impairment.

A "physical or mental impairment" may include:

(A) Any physiological disorder or condition, cosmetic disfigurement, or anatomical loss affecting one or more of the following body systems: neurological; musculoskeletal; special sense organs; respiratory; including speech organs; cardiovascular; reproductive; digestive; genito-urinary; hemic and lymphatic; skin; and endocrine; or (B) any mental or psychological disorder, such as intellectual disability, organic brain syndrome, emotional or mental illness, and specific learning disabilities.

An impairment in and of itself is not a disability. Per the Office for Civil Rights (OCR) guidance regarding "Protecting Students with Disabilities", the regulations "do not set forth an exhaustive list of specific diseases and conditions that may constitute physical or mental impairments."

"Major life activity" may include: functions such as caring for one's self, performing manual tasks, walking, seeing, hearing, speaking, breathing, learning and working. According to the OCR, this list is also not exhaustive.

A student is not "regarded as" an individual with a disability if the impairment is transitory and minor. A transitory impairment is an impairment with an actual or expected duration of 6 months or less. However, an impairment that is episodic or in remission is a disability if it would substantially limit a major life activity when active. A student with such an impairment is entitled to a free appropriate public education under Section 504.

A qualified person with a disability is a person with a disability who is of an age during which it is mandatory under state law to provide such services to persons with disabilities; of an age during which persons without disabilities are provided such services; or a person for whom a state is required to provide a free appropriate public education under IDEA 2004.

All school-age children who are individuals with disabilities as defined by Section 504 are entitled to a free and appropriate public education ("FAPE").

According to the OCR, an appropriate education includes: education services designed to meet the individual education needs of students with disabilities as adequately as the needs of nondisabled students are met; the education of each student with a disability with nondisabled students, to the maximum extent appropriate to the needs of the student with a disability; evaluation and placement procedures established to guard against misclassification or inappropriate placement of students, and a periodic reevaluation of students who have been provided special education or related services; and establishment of due process procedures that enable parents and guardians to receive required notices, review their child's records, and challenge identification, evaluation and placement decisions, and that provide for an impartial hearing with the opportunity for participation by parents and representation by counsel, and a review procedure.

To be appropriate, education programs for students with disabilities must be designed to meet their individual needs to the same extent that the needs of nondisabled students are met. An appropriate education may include regular or special education and related aids and services to accommodate the needs of individuals with disabilities.

The quality of education services provided to students with disabilities must equal the quality of services provided to nondisabled students. Teachers of students with disabilities must be trained in the instruction of individuals with disabilities. Facilities and classrooms must be comparable, and appropriate materials and equipment must be available.

Students with disabilities may not be excluded from participating in nonacademic services and extracurricular activities on the basis of disability. Persons with disabilities must be provided an opportunity to participate in nonacademic services that is equal to that provided to persons without disabilities. These services may include physical education and recreational athletics, transportation, health services, recreational activities, special interest groups or clubs sponsored by the school, and referrals to agencies that provide assistance to persons with disabilities and employment of students.

Students with disabilities and students without disabilities must be placed in the same setting, to the maximum extent appropriate to the education needs of students with disabilities.

A person with a disability must be placed in the regular education environment, unless it is demonstrated that the student's needs cannot be met satisfactorily with the use of supplementary aids and services. Students with disabilities must participate with nondisabled students in both academic and nonacademic services to the maximum extent appropriate to their individual needs.

As necessary, specific related aids and services must be provided for students with disabilities to ensure an appropriate education setting. Supplementary aids may include interpreters for students who are deaf, readers for students who are blind, and equipment to make physical accommodations for students with mobility impairments to the extent required in a cyber setting.

Section 504 requires the use of evaluation and placement procedures.

An individual evaluation must be conducted before any action is taken with respect to the initial placement of a child who has a disability, or before any significant change in that placement.

The CEO/CAO/Principal or their designee must establish standards and procedures for initial

and continuing evaluations and placement decisions regarding persons who, because of a disability, need or are believed to need special education or related services. Procedures must ensure that tests and other evaluation materials: have been validated for the specific purpose for which they are used, and are administered by trained personnel in conformance with the instructions provided by their producer; are tailored to assess specific areas of education need and are not designed merely to provide a single general intelligence quotient; and are selected and administered so as best to ensure that, when a test is administered to a student with impaired sensory, manual, or speaking skills, the test results accurately reflect the student's aptitude or achievement level or whatever other factor the test purports to measure, rather than reflecting the student's impaired sensory, manual, or speaking skills (except where those skills are the factors that the test purports to measure).

The CEO/CAO/Principal or their designee is directed to draw upon a variety of sources in the evaluation and placement process so that the possibility of error is minimized. All significant factors related to the learning process must be considered. These sources and factors include aptitude and achievement tests, teacher recommendations, physical condition, social and cultural background, and adaptive behavior.

Information from all sources must be documented and considered by a group of knowledgeable persons, and procedures must ensure that the student is placed with nondisabled students to the greatest extent appropriate.

Periodic reevaluation is required.

The CEO/CAO/Principal or their designee must have in effect procedural safeguards regarding the identification, evaluation, or educational placement of persons who, because of disability, need or are believed to need special instruction or related services. Parents must be told about these procedures. In addition, parents or guardians must be notified of any evaluation or placement actions, and must be allowed to examine the student's records. The due process procedures must allow the parents or guardians of students to challenge evaluation and placement procedures and decisions.

If parents or guardians disagree with the school's decisions, they must be afforded an impartial hearing. A review procedure also must be available to parents or guardians who disagree with the hearing decision. . Section 504 neither prohibits nor requires the Charter School to initiate a due process hearing to override a parental refusal to consent with respect to the initial provision of special education and related services. Nonetheless, the Charter School should consider that IDEA no longer permits schools to initiate a due process hearing to override a parental refusal to consent to the initial provision of services.

It is the policy of the Board to provide a free and appropriate public education to each qualified disabled student within the Charter School, regardless of the nature or severity of the disability. Consequently, it is the intent of the Board to ensure that students who are disabled within the definition of Section 504 are identified, evaluated and provided with appropriate educational services.

PROCEDURES

Students who are in need or are believed to be in need of services under Section 504 may be referred for evaluation by a parent/guardian, teacher, or other certified school employee. Requests should be directed to Charter School's CEO at: 555 Ryan Run Road, York, PA 17404.

Charter School will consider the referral, and based upon a review of the student's records,

including academic, social, testing, and behavioral records, determine whether an evaluation is appropriate. Any student, who, because of a disability, needs or is believed to need special services, will be referred for evaluation. If a request for evaluation is denied, Charter School will inform the parents or guardian of this decision and of their procedural rights. . Section 504 requires informed parental permission for initial evaluations. If a parent refuses consent for an initial evaluation and the Charter School suspects a student has a disability, the IDEA and Section 504 provide that the Charter School may use due process hearing procedures to seek to override the parents' denial of consent.

EVALUATION

The purpose of a student evaluation shall be to determine eligibility for accommodations as a disabled person under Section 504. School districts may use the same process to evaluate the needs of students under Section 504 as they use to evaluate the needs of students under IDEA.

The Charter School's multi-disciplinary committee should include persons knowledgeable about the student, the meaning of the evaluation data, and the placement options. The committee members must determine if they have enough information to make a knowledgeable decision as to whether or not the student has a disability. Charter School's Section 504 evaluation procedures must ensure that:

Evaluation materials have been validated for the specific purpose for which they are used and are interpreted and/or administered by trained personnel in conformance with the instructions provided by their producer.

Tests and the evaluation materials include those tailored to assess specific areas of educational need and not merely those which are designed to provide a single general intelligence quotient.

The information obtained from all such sources must be documented and all significant factors related to the student's learning process must be considered. These sources and factors may include student records, aptitude and achievement tests, teacher recommendations/input, nurse and/or counselor input, physical condition, social and cultural background, and adaptive behavior. In evaluating a student suspected of having a disability, it is unacceptable to rely on presumptions and stereotypes regarding persons with disabilities or classes of such persons.

The eligibility determining team will take into account all records, test results, evaluations, teacher input, counselor input and consider the following when discussing eligibility and possible accommodations:

1. Determine if there are reasonable accommodations that can enable the student to participate in learning in the school environment.
2. Do not provide different or separate aid unless it is necessary to make benefits or services as effective as those being provided to all other students in the class.
3. Do not require the identical result or level of achievement as other students; rather, provide equal opportunity.
4. If the education of a person, in a regular environment with the use of reasonable supplementary aids, cannot be achieved satisfactorily, then the implementation of an IEP may be considered.
5. Other students' educational rights may not be significantly impaired by the accommodations.

6. The accommodations must be reasonable, must not fundamentally alter the school program, or present undue burden to the school.

7. The accommodations being considered are for the child's current placement only.

No final determination of whether the student is a disabled individual within the meaning of Section 504 will be made without informing the parent or guardian of the student concerning the determination. With regard to a student who is determined to be disabled under Section 504 of the Rehabilitation Act of 1973, but who is not determined to be disabled under IDEA, Charter School shall periodically conduct a reevaluation of the student as required by law. The CEO/CAO/Principal or their designee is directed to develop procedures necessary to implement this policy in a school setting.

- The Charter School must provide each identified protected handicapped student enrolled in the Charter School, those related aids, services, or accommodations needed to afford the student the equal opportunity he/she requires to participate in and obtain the benefits of the school program and extracurricular activities without discrimination. This is accomplished without cost to the student or their family, through the creation of a Chapter 15 Service Agreement. It is advisable to discuss with Parent/Guardian, during the meeting to determine Section 504 eligibility, what will be in the Service Agreement and when and where the services, aids and/or accommodations are provided.

- Whether done at a meeting or not, it is advisable to have Parent/Guardian sign a written Service Agreement before implementing it; and, the Agreement must contain:

- o Brief description of disability and resulting needs of Student;
- o Specific related aids, services curriculum modifications or accommodations that are being proposed;
- o Date services to begin and end or specific commitment to continue services for an indefinite period;
- o If appropriate, procedures to follow in a medical emergency;

- It is advisable that the 504 Team, including Parent/Guardian, meet periodically, and no less than an annual basis, to review Student progress or to meet within the School year if Student not demonstrating progress per teacher observation/assessments;

Note: With regard to a student who is determined to be disabled under Section 504 of the Rehabilitation Act of 1973, but who is not determined to be disabled under IDEA, the Charter School shall periodically conduct a reevaluation of the student as required by law.

The CEO and/or Section 504 Coordinator is directed to develop procedures necessary to implement this policy in a school setting.

DISCIPLINE

As part of the protections of not being subjected to discrimination or denied benefits of Charter School programs, the Student is afforded protections applicable to eligible special education students pertaining to exclusionary discipline. Such protections include holding a Manifestation Determination to decide if the misconduct is related to the disability, and Informal and Formal Hearings, with the latter having all due process protections pursuant to 22 Pa. Code §12.6.

FOR Students Eligible Under Section 504 WHEN NO SERVICE AGREEMENT IS Necessary

Such students may not require a 504 Service Agreement because:

- No accommodations needed in classroom or by School Nurse; or

- As result of mitigation measures, do not require accommodations with such measures including, but not limited to:
 - o Medication, medical equipment, hearing aids, low vision devices but NOT eyeglasses or contacts, Assistive Technology, auxiliary aids or services (interpreters, taped texts, and other means of delivery of aural or visual material) or learned behavioral or adaptive neurological modifications.

Grievance Procedure

If a Parent/Guardian believes that the school or any of its staff or schools have inadequately applied the regulations of Section 504, he/she may initiate a grievance with the school's CEO, Section 504 Coordinator or person designated per School Complaint Policy or in Parent/Student Handbook. The grievance procedures must explicitly state and make clear to the individual(s) involved that a complaint can be made to the regional office of U. S. Department of Education's Office for Civil Rights ("OCR") without going through the school's grievance procedures. However, the 504 Coordinator should attempt to resolve the matter initially through the Charter School in accordance with the Charter School's Parent/Student Complaint process and it is advisable for Charter School to convene a conference with Parent/Guardian within ten (10) days of receipt of complaint

PORTIONS OF THIS POLICY HAVE BEEN EXCERPTED FROM OCR'S WEB GUIDANCE ON SECTION 504 STUDENTS. TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

SERVICE ANIMALS IN SCHOOL POLICY

The Board of Trustees ("Board") of the Pennwood Cyber Charter School ("Charter School") adopts this Policy regarding Service Animals in School in accordance with applicable provisions of: Title II of the Americans with Disabilities Act (ADA), 42 U.S.C. § 12101, and its implementing regulations at Section 28 C.F.R. Part 35. Additionally, this Policy addresses requirements and considerations regarding service animals under applicable provisions and implementing regulations of Section 504 of the Rehabilitation Act (Section 504), 29 U.S.C. § 794; and applicable provisions and implementing regulations of the Individuals with Disabilities Education Improvement Act of 2004 (IDEA), 20 U.S.C. § 1400.

The Board adopts this policy to ensure that individuals with disabilities are permitted to participate in and benefit from Charter School programs, activities and services, and to ensure that the Charter School does not discriminate on the basis of disability.

Service Animals Defined under the ADA:

Pursuant to Section 28 C.F.R. § 35.104, a Service Animal is defined as: any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. Other species of animals, whether wild or domestic, trained or untrained, are not service animals for the purposes of this definition. The work or tasks performed by a service animal must be directly related to the handler's disability. Examples of work or tasks include, but are not limited to:

- assisting individuals who are blind or have low vision with navigation and other tasks,
- alerting individuals who are deaf or hard of hearing to the presence of people or sounds,
- providing non-violent protection or rescue work,
- pulling a wheelchair,
- assisting an individual during a seizure,
- alerting individuals to the presence of allergens,
- retrieving items such as medicine or the telephone,
- providing physical support and assistance with balance and stability to individuals with mobility disabilities, and
- helping persons with psychiatric and neurological disabilities by preventing or interrupting impulsive or destructive behaviors.

The crime deterrent effects of an animal's presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purposes of this definition.

Emotional Support/Therapy/Comfort Animals:

Emotional support, therapy, comfort, or companion animals are NOT considered service animals under the ADA. Rather these terms are used to describe animals that provide comfort just by being with a person. Because they have not been trained to perform a specific job or task, they do not qualify as service animals under the ADA.

However, the use of an emotional support animal, sometimes referred to as a comfort animal, may be considered a request for a reasonable accommodation under the ADA. Such a request for the use of an emotional support animal must be supported by recent, reliable, objective, medical documentation. Documentation regarding an emotional support animal may be required to address legitimate safety requirements necessary for the safe operation of Charter school programs, services, or activities.

The ADA requires that a service animal be individually trained to do work or perform tasks for the benefit of an individual with a disability “, which means that the animal must be trained to take a specific action when needed to assist the person with a disability. For example, a person with diabetes may have a dog that is trained to alert him/her when his/her blood sugar reaches high or low levels. A person with depression may have a dog that is trained to remind him/her to take his/her medication. Alternatively, a person who has epilepsy may have a dog that is trained to detect the onset of a seizure and then help the person remain safe during the seizure.

The provision of emotional support, well-being, comfort, or companionship does not constitute work or tasks for the purpose of this definition.

The ADA makes a distinction between psychiatric service animals and emotional support animals. If the animal has been trained to sense that an anxiety attack is about to happen and take a specific action to help avoid the attack or lessen its impact, that would qualify as a service animal. However, if the animal's mere presence provides comfort, that would not be considered a service animal under the ADA. More specifically, while emotional support animals provide comfort or companionship, psychiatric service animals may perform tasks such as reminding an individual with a disability to take medication, performing safety checks or room searches for individuals with PTSD, interrupting self-mutilation, and removing disoriented individuals from dangerous situations.

The Department of Justice has stated that other federal or state laws may permit an emotional support animal to qualify as a reasonable accommodation if necessary for a student's receipt of FAPE, even though it would not meet the definition of a service animal under Title II. Such requests by students or their parents will be reviewed on a case-by-case basis consistent with applicable federal and state laws and regulations. Only domesticated animals will be considered as a support animal. If a student or parent of a student requests that a student be permitted to use an emotional support animal, comfort animal or therapy dog, the school shall request the following documentation:

- 1) Signed medical release allowing the school to review any and all records pertaining to reasons for which the student requests the support animal.
- 2) Any training/certifications that the animal has received in respect to the functions it will carry out for the student.
- 3) Proof of current vaccinations and immunizations of the service animal.

All sections of this policy governing the use/duties/safety requirements of service animals and vaccinations/immunizations/licensing apply to support animals on school grounds, transport or school sponsored activities or testing sites.

If, at time of request to have a support animal at school, a student already has a Section 504 Plan or IEP, a meeting of the requisite Team, including Parent(s) and Student, will be convened to consider information and documentation supplied to the School by Parent(s) and Student to determine if the support animal is necessary to provide FAPE to the Student.

At the Meeting, the School shall request the following documentation:

- 1) Signed medical release allowing the school to review any and all records pertaining to reasons for which the student requests the support animal.
- 2) Any training/certifications that the animal has received in respect to the functions it will carry out for the student.
- 3) Any information regarding the type of animal/breed.
- 4) Proof of current vaccinations and immunizations of the animal.

Service Animals in School:

Parents/Guardians of students with disabilities who believe the student needs to bring a service animal to school in order to receive a free and appropriate public education shall notify the CEO or designee. In accordance with the Charter School's Childfind duties under the Individuals with Disabilities in Education Act (IDEA), the appropriate School Team shall evaluate the request to use the service animal in school, gather necessary information and determine when the student requires the service animal, during the school day and/or at school activities. This may include a request for parental permission to formally evaluate the student's education-based needs to determine if an Individualized Educational Plan (IEP) is necessary. Any service animal accompanying a student with a disability to school or school activities shall be handled and cared for in a manner detailed in the student's IEP or Section 504 Service Agreement.

Pursuant to Section 28 C.F.R. § 35.106: a public entity shall make information regarding services, programs or activities applicable to applicants, participants, beneficiaries and other interested persons, in such a manner as to apprise such persons of the protections against discrimination assured them.

Generally, the Charter School will modify its policies, practices, or procedures to permit the use of a service animal by an individual with a disability. The term "disability" is defined under Section 28 C.F.R. § 35.104.

If the Charter School properly excludes a service animal under § 35.136(b), the CEO shall give the individual with a disability the opportunity to obtain services and accommodations without having the service animal on the premises. 28 C.F.R. § 35.136(c).

A service animal **must** be under the control of its handler. A service animal shall have a harness, leash, or other tether, unless either the handler is unable because of a disability to use a harness, leash, or other tether, or the use of a harness, leash, or other tether would interfere with the service animal's safe, effective performance of work or tasks, in which case the service animal **must be otherwise under the handler's control** (e.g., voice control, signals, or other effective means). 28 C.F.R. § 35.136(d).

The Charter School is not responsible for the care or supervision of a service animal. 28 C.F.R. § 35.136(e).

The Charter School shall not ask about the nature or extent of a person's disability, but may require the following information in order to determine whether an animal qualifies as a service animal and before a service animal shall be allowed in a Charter School building, or on Charter School property or vehicles. The owner or handler of the animal shall submit to the CEO or designee a written request and the following documentation from a certified professional:

- (1) Verification of the need for a service animal.
- (2) What work or task the animal has been trained to perform in relation to the individual's disability.
- (3) Proof of current vaccinations and immunizations of the service animal.

Generally, the Charter School may not make these inquiries about a service animal when it is readily apparent that an animal is trained to do work or perform tasks for an individual with a disability (e.g., the dog is observed guiding an individual who is blind or has low vision, pulling a person's wheelchair, or providing assistance with stability or balance to an individual with an observable mobility disability). 28 C.F.R. § 35.136(f).

Direct and Immediate Threats:

The Charter School reserves the right to exclude an individual if that individual presents a direct and immediate threat to others in the building or school. 28 C.F.R. § 35.139(a). To make this determination, the Charter School will make an individualized assessment, based on reasonable judgment that relies on current medical knowledge or on the best available objective evidence, to ascertain: the nature, duration, and severity of the risk; the probability that the potential injury will actually occur; and whether reasonable modifications of policies, practices, or procedures or the provision of auxiliary aids or services will mitigate the risk. 28 C.F.R. § 35.139(b). The Charter School will not rely solely on speculation, stereotypes or generalizations about individuals with disabilities. 28 C.F.R. § 35.130(h).

The Charter School may exclude a service animal from District buildings, property and vehicles under the following circumstances:

- Presence of the animal poses a direct threat to the health and safety of others.

- Owner or handler is unable to control the animal.
- Presence of the animal would require a fundamental alteration to the program.
- Animal is not housebroken. 28 C.F.R. § 35.136(b).

Access to Charter School areas/ Admission Of Service Animals To Public Events:

Individuals with disabilities shall be permitted to be accompanied by their service animals in all areas of a place of public accommodation where members of the public, program participants, clients, customers, patrons, or invitees, as relevant, are allowed to go. 28 C.F.R. § 35.136(g). This right of access does not extend to the schools generally or to other activities that are not open to the general public.

The Charter School shall not ask or require an individual with a disability to pay a surcharge, even if people accompanied by pets are required to pay fees, or to comply with other requirements generally not applicable to people without pets. If the Charter School normally charges individuals for the damage they cause, an individual with a disability may be charged for damage caused by his or her service animal. 28 C.F.R. § 35.136(h).

Delegation of Responsibility

The owner or handler of a service animal shall be solely responsible for:

1. Supervision and care of the animal, including any feeding, exercising, clean up and stain removal.
2. Control of the animal at all times through the use of a harness, leash, tether or by other effective means.
3. Damages to Charter School buildings, property and vehicles caused by the animal.
4. Injuries to students, employees, volunteers and visitors caused by the animal.
5. Annual submission of documentation of vaccinations and immunizations.

Miniature horses:

The Charter School shall make reasonable modifications in policies, practices, or procedures to permit the use of a miniature horse by an individual with a disability only if the miniature horse has been individually trained to do work or perform tasks for the benefit of the individual with a disability.

In determining whether reasonable modifications in policies, practices, or procedures can be made to allow a miniature horse into a specific facility, the Charter School shall consider--

- (A) The type, size, and weight of the miniature horse and whether the facility can accommodate these features;
- (B) Whether the handler has sufficient control of the miniature horse;
- (C) Whether the miniature horse is housebroken; and
- (D) Whether the miniature horse's presence in a specific facility compromises legitimate safety and/or health requirements that are necessary for safe operation.

Other requirements which apply to service animals pursuant to this policy and applicable federal regulations shall also apply to miniature horses. 28 C.F.R. § 35.136(i).

The CEO or designee is directed to inform the Board of any new requirements regarding service animals and to develop and implement any procedures that may be necessary to effectuate this policy.

The CEO will seek and obtain any necessary or required trainings relative to effectuating this policy and that address issues with regard to service animals and safety including any training regarding the proper way to interact with service animal in the school setting.

Students with Disabilities:

In addition to the requirements and parameters regarding service animals above, the decision as to whether to allow an animal in school for a student with a disability under Section 504 or IDEA, even if that animal does not meet the definition of a "service animal" shall be made on a case by case basis in accordance with applicable state and/or federal laws and regulations, including applicable sections of Section 504 and/or IDEA and ADA.

The parent or guardian of a student with a disability, who believes that an animal is necessary to ensure a free and appropriate public education to the student, is directed to notify the CEO or the Student's IEP team or Section 504 team in accordance with applicable state and federal laws and regulations and in accordance with this policy.

Such a request for an animal in school shall be evaluated and made in accordance with applicable state and federal laws and regulations, including: ADA, Section 504, IDEA and/or Chapter 711 of Title 22 of the Pennsylvania Code.

In an effort to fully understand the scope of the request and need, the Charter School reserves all rights applicable under Section 504 and/or IDEA to request documentation and/or relevant information regarding such requests, to the extent those rights are not specifically precluded by other applicable regulations.

Notice and Appeal

The designated Administrator shall ensure that all individuals involved in a situation where a service animal will regularly accompany an owner or handler in Charter School buildings or vehicles or at School-sponsored events or test sites are informed of the Board Policy and any procedures governing this issue. Involved individuals can include administrators, appropriate employees, student and parent/guardian.

Any individual with a service animal who is aggrieved by a decision to exclude, limit or remove a service animal may appeal the decision in accordance with applicable Student Complaint Policy.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Students with Specific Learning Disabilities Policy

The Board of Trustees directs the Chief Executive Officer (“CEO/Principal”) or their designee to develop procedures for the determination of specific learning disabilities that conform to the criteria in Section 711.25 of Title 22 of the Pennsylvania Code. These procedures are to be included in the school's annual report and any charter renewal application to the extent that a charter renewal application is required to be submitted:

To determine that a child has a specific learning disability, the Pennwood Cyber Charter School (“Charter School”) shall:

(1) Address whether the child does not achieve adequately for the child's age or meet State-approved grade-level standards in one or more of the following areas, when provided with learning experiences and scientifically based instruction appropriate for the child's age or State-approved grade-level standards:

- (i) Oral expression.
- (ii) Listening comprehension.
- (iii) Written expression.
- (iv) Basic reading skill.
- (v) Reading fluency skills.
- (vi) Reading comprehension.
- (vii) Mathematics calculation.
- (viii) Mathematics problem solving.

(2) Use one of the following procedures:

(i) A process based on the child's response to scientific, research-based intervention, which includes documentation that:

- (A) The student received high quality instruction in the general education setting.
- (B) Research-based interventions were provided to the student.
- (C) Student progress was regularly monitored.

(ii) A process that examines whether a child exhibits a pattern of strengths and weaknesses, relative to intellectual ability as defined by a severe discrepancy between intellectual ability and achievement, or relative to age or grade.

(3) Have determined that its findings are not primarily the result of any of the following:

- (i) A visual, hearing or orthopedic disability.
- (ii) Intellectual Disability.
- (iii) Emotional disturbance.
- (iv) Cultural factors.
- (v) Environmental or economic disadvantage.
- (vi) Limited English proficiency.

(4) Ensure that underachievement in a child suspected of having a specific learning disability is not due to lack of appropriate instruction in reading or mathematics by considering documentation that:

(i) Prior to, or as a part of, the referral process, the child was provided scientifically-based instruction in regular education settings, delivered by qualified personnel, as indicated by observations of routine classroom instruction.

(ii) Repeated assessments of achievement were conducted at reasonable intervals, reflecting formal assessment of student progress during instruction, which was provided to the child's parents.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Special Education Student Enrollment

The Board of Trustees of the Charter School (“Charter School”) recognizes that the Charter School must not deny enrollment or otherwise discriminate in admission practices on the basis of a child’s need for special education or supplementary aids or services.

The Charter School shall comply with the Board of Trustees’ approved Student Admissions Policy. The Charter School is further directed to make the Student Admissions Policy available for inspection by auditors from the Pennsylvania Department of Education during any special education cyclical monitoring audit.

The Charter School shall comply with Section 24 P.S. 17-1723-A of the PA Charter School Law regarding enrollment and shall not discriminate in its admission policies or practices on the basis of intellectual ability (except to the extent specifically allowed by law), or athletic ability, measures of achievement or aptitude, status as a person with a disability, proficiency in the English language or immigration status or any other basis that would be illegal under applicable state and/or federal laws or regulations.

Guidelines

Entitlement to Education

Every child of school age who is a resident of a Pennsylvania school district is entitled to a public school education. Resident students include those residing with their parent(s) and non-resident students living with a Pennsylvania school district resident who is supporting the child gratis and seeking enrollment. Once the required enrollment documentation described below is provided, the Charter School must enroll non-resident children and permit them to attend school. A child should be permitted to attend school on the next school day after the day on which the child is presented for enrollment, and in all cases within five (5) business days of the Charter School’s receipt of the required documents, if a space exists pursuant to the Charter School’s Admission/Lottery Policy.

Required Enrollment Documentation

Except when a child is homeless, whenever a child of school age is presented for enrollment by a parent(s), a Pennsylvania school district resident, or any other person having charge or care of the child, the Charter School shall require that the following information be documented before enrolling the child and allowing the child to attend school:

1. Proof of the child's age

Any one of the following constitutes acceptable documentation: birth certificate; notarized copy of birth certificate; baptismal certificate; copy of the record of baptism – notarized or duly certified and showing the date of birth; notarized statement from the parents or another relative indicating the date of birth; a valid passport; a prior school record indicating the date of birth.

2. Immunizations required by law

Acceptable documentation includes: either the child’s immunization record, a written

statement from the former school district or from a medical office that the required immunizations have been administered, or that a required series is in progress, or verbal assurances from the former school district or a medical office that the required immunizations have been completed, with records to follow.

3. Proof of residency

Acceptable documentation includes: a deed, a lease, current utility bill, current credit card bill, property tax bill, vehicle registration, driver's license, or Department of Transportation identification card. While more than one form of residency confirmation may be required, the Charter School should be flexible in verifying residency, and should consider what information is reasonable in light of the family's situation. See the paragraph on Homeless Students for guidance in that situation. (Also see attached Residency Affidavit.)

4. Parent Registration Statement

A sworn statement attesting to whether the student has been or is suspended or expelled for offenses involving drugs, alcohol, weapons, infliction of injury or violence on school property must be provided for a student to be admitted to any school entity. The Charter School may not deny or delay a child's school enrollment based on the information contained in a disciplinary record or sworn statement. However, the Charter School may wait to enroll a student until a current period of expulsion has expired.

5. Home Language Survey

All students seeking first time enrollment in a school shall be given a home language survey in accordance with requirements of the U.S. Department of Education's Office for Civil Rights. Enrollment of the student may not be delayed in order to administer the Home Language Survey.

Documents which May be Requested but Not as a Condition of Enrollment

Although the Charter School may ask for any of the information below, the Charter School may not require it as a condition of enrolling or admitting a child and a child's enrollment or attendance may not be delayed until these documents are provided. Among the documents that the Charter School may request are: picture identification, health or physical examination records, academic records, attendance records, Individualized Education Program, and other special education records. In addition, the Charter School may not require that a physical examination be conducted as a condition of enrollment.

Registration Form

A registration form, filled out by families for student enrollment, may include the following: name, address, telephone number, name of parent(s) or guardian(s) or resident adult(s) with whom the student is living, emergency contact information, former school information, and other locally required information. Failure to complete this form will not be made a condition of the student's enrollment.

Documentation Required From Other Sources

The Charter School is also entitled by law to receive information on an enrolling student from the previous school, public, charter, nonpublic or private, which the student attended. However, the provision of this information rests with the educational entity and not the family, and so, the Charter School, as the receiving local educational agency, will not require this information as a precondition to enrollment and will not delay a student's admission for lack of this information.

Student Education Records

Upon enrollment, the Charter School contacts the student's former school for a copy of the student's education records. The former school district or charter school, if within this Commonwealth, is required to respond by forwarding the records within 10 business days of the date upon which a student's records are requested by the Charter School. The Charter School shall enroll students within 5 business days regardless of receipt of records from the previous districts.

Disciplinary Records

Whenever a pupil transfers to another Pennsylvania school entity or nonpublic school, a certified copy of the student's disciplinary record shall be transmitted to the school entity or nonpublic school to which the pupil has transferred. The school entity or nonpublic school to which the student has transferred should request the record. The sending school entity or nonpublic school shall have 10 days from receipt of the request to supply a certified copy of the student's disciplinary record. Failure to receive the student's discipline record cannot be used to deny or delay the student's enrollment or school attendance. A school district may not deny or delay a child's school enrollment based on the information contained in a disciplinary record or sworn statement.

Prohibited Requests - Items Which May Not Be Requested

For both enrollment and also for residency determinations, the Charter School will not request or require any of the following: a social security number; the reason for a child's placement if not living with natural parents; a child's or parent's visa; agency records; or, except in the limited circumstances described in the next section, a court order or records relating to a dependency proceeding. A child's right to be admitted to school may not be conditioned on the child's immigration status. The Charter School will not inquire as to the immigration status of a student as part of the admissions process.

Student Classifications for Education Entitlement

Resident Students and Court Orders or Custody Agreements

The Charter School may require a parent/guardian to provide a custody or dependency order when the child is being enrolled at the Charter School pursuant to parent relying on court order or custody agreement as the basis for enrollment. The Charter School will not require a custody order or agreement as a condition of enrollment in any circumstances other than the circumstance specified above. (See attached Affidavit of Custody).

Students Living With a Resident Adult other than a Parent

When a child is living with an adult other than a parent, who is supporting the child without personal compensation, (*gratis*) the child may attend the public schools of that adult's school district, provided that resident makes application and supplies the required enrollment information noted in the section entitled Required Enrollment Documentation. In addition, before accepting the child as a student, the Charter School shall require the resident to file only one of the following:

1. A sworn and notarized statement from the resident of the school district indicating that the signer is a resident of the school district, is supporting the child without receiving personal compensation, that the child is living with the resident continuously and not just for the school year, and that the resident will accept all responsibilities relating to the child's schooling (See Attachment B for a model statement), or

2. Appropriate legal documentation to show dependency or guardianship, which may include a custody order. The Charter School may require other information to be submitted by the resident to substantiate the sworn statement. The natural parent(s) or former guardian(s) of the student may not be required to provide information. Once the requested information is

provided, the Charter School will enroll the child and permit him or her to begin to attend school without delay, but in no case more than 5 days. (See attached Affidavit of Support), if a space exists pursuant to the school's Admission/Lottery Policy.

A resident's receipt of payments, such as Supplemental Security Income (SSI), Transitional Assistance for Needy Families (TANF), pre-adoptive or adoptive support, maintenance on public or private health insurance, support from the military or military personnel or other payments for or on account of the child such as child support, shall not be deemed to be personal compensation or gain.

Foster Children

While the Public School Code provisions governing nonresident children placed in foster care are not applicable to charter schools pursuant to the Pennsylvania Charter School Law, the Charter School will use such Public School Code provisions for guidance in such situations in conjunction with consultation with the Charter School's legal counsel.

Nonresident Children Living in Facilities or Institutions

A child living in a district in which there is located a licensed shelter, group home, maternity home, residence, facility, orphanage or other institution for the care or training of children or adolescents, shall be admitted to that district's schools if living at or assigned to the facility or institution. If the school district of residence of a child living at or assigned to a facility or institution cannot be determined, but the child is determined to be a resident of the Commonwealth, the child shall be permitted to attend the public schools of the district. This includes a child placed by the child's resident parents or guardians at a facility or institution and subsequently abandoned or deserted.

If Student has been placed by person or entity other than the cyber charter school at a facility or institution which meets criteria for institutionalization pursuant to 13-1306 of the Public School Code, then the Charter School cannot enroll student or if already enrolled and Student is subsequently determined to be institutionalized, the Charter School must disenroll Student who will return to school district of residence as payor to host district of institution.

Emancipated Minors

An emancipated minor is a student under the age of 21 who has established a domicile apart from the continued control and support of parents or guardians or who is living with a spouse. The school district in which this student is living is his or her resident school district and the student may enroll at the Charter School without any additional assistance from an adult.

Homeless Students

The Charter School will ensure that each child of a homeless individual and each homeless youth have equal access to the same free, appropriate public education, including a public preschool education, as provided to other children and youth. Homeless students may reside in shelters, hotels, motels, cars, tents or be temporarily doubled-up with a resident family because of lack of housing. In the case of homeless students, traditional concepts of "residence" and "domicile" do not apply. Homeless children and youth lack a fixed, regular, and adequate nighttime residence. Included within the definition of homeless children and youth are those who are "awaiting foster care placement" and "unaccompanied homeless youth."

Unaccompanied homeless youth may enroll without documents and without the help of an adult. Unaccompanied homeless youth includes any child who is "not in the physical custody of a parent or guardian." Falling within this definition are students who have run away

from home, been thrown out of their home, or been abandoned or separated from their parents or guardians.

Youth awaiting foster care placement include those who are placed in emergency, interim or respite foster care; kinship care; evaluation or diagnostic centers or placements for the sole purpose of evaluation. When necessary, Charter School administration will consult with the respective county children and youth agencies to determine if a child meets the definition of "awaiting foster care placement", including, on a case-by-case basis, whether a child who does not clearly fall into one of these categories is nevertheless a child "awaiting foster care placement."

Homeless youth are entitled to immediate enrollments, if a space exists pursuant to the Admissions/Lottery Policy and their families are not required to prove residency regarding school enrollment. These students are considered residents of the district where they are presently residing, or continue their education in the district of prior attendance.

Pre-Adoptive and Adoptive Students

The Federal Adoption Assistance Program, among other things, provides for adoption assistance payments to encourage the placement of certain hard-to-place children with adoptive parents. Pennsylvania has adopted companion legislation, known as the Adoption Opportunities Act. Children living with pre-adoptive parents who are receiving adoption assistance subsidies, pre-adoptive foster payments, or other payments such as Supplemental Security Income (SSI) or Transitional Assistance for Needy Families (TANF), are entitled to attend school in the school district in which the pre-adoptive parents reside. Notwithstanding receipt of any of the above payments, children living in pre-adoptive situations are considered residents of the school district in which their pre-adoptive parents reside. Children living with adoptive parents are entitled to all free school privileges accorded to resident school children of the respective school district.

School-Age Children of Military Personnel

When Pennsylvania residents who are military personnel are deployed and their school age children are living with relatives or family friends in a school district for that period of time, the students are entitled to attend school in the school district in which they are residing.

Other Issues Related To Enrollment

Address Confidentiality Program (ACP)

Some families may enroll a student using an ACP card that lists a post office box as their address. This is their legal address and the Charter School will not require additional information about their residence. School records from the student's former school will be forwarded through the ACP.

Age

Children are considered school age from the time they are admitted to the public school educational program until graduation from high school or the age of 21 if identified pursuant to the Individuals with Disabilities Education Act of 2004. The Charter School will not refuse admission to a child who meets the age requirement. Students who turn 21 during the school term are entitled to finish that school term. If a student is under age 21 and has a Graduation Equivalency Diploma ("GED"), the student can enroll in school and work towards a diploma. For subsidy purposes, students who reach age 21 after the school term begins are eligible to be counted for the entire school term. The Department of Education will accept requests to allow students to be counted in membership for subsidy purposes for an extended school program beyond age 21 if the request includes a hearing officer decision or court order.

Children and Families with Limited English Proficiency

Children and families with limited English proficiency will be provided translation and interpretation services to the extent needed to help the family understand the enrollment process and enroll the student in school promptly per applicable federal law.

Twins and Multiple Siblings

While the Public School Code provision governing twins and multiple siblings is not applicable to charter schools pursuant to the Pennsylvania Charter School Law, the Charter School will use the Public School Code provision for guidance in such situations in conjunction with consultation with the Charter School's legal counsel.

Submitting Enrollment Complaints to the Department Of Education

When a dispute arises regarding enrollment of a student, the person attempting to enroll the child or the Charter School may bring the dispute to the attention of the Department's School Services Unit. A complaint may be filed by mail, email or by phone with written follow up. After receipt of a complaint, a Department representative will contact the Charter School, family or other involved parties to determine the facts, whether the child is entitled to enrollment at the Charter School and to try to resolve the problem. These contacts, whenever possible, will occur within five (5) days of receipt of the complaint. If the complaint is not amicably resolved, a written determination will be made and sent to the Charter School and the individual who filed the complaint.

If the Charter School does not enroll the student within five (5) school days after receiving the written determination and space exists pursuant to the school's Admissions/Lottery Policy, the Department will issue a letter to the Charter School requesting its position on the situation. The Charter School will have five (5) school days to respond to the request. If the Charter School refuses to enroll the student or does not respond, the matter will be forwarded to the Department's Office of Chief Counsel (OCC). The OCC and the Deputy Secretary for Elementary/Secondary Education will determine if the Charter School's response is valid to deny enrollment. If not, the Deputy Secretary will determine what additional measures may be necessary to assure enrollment.

Written Policies

The Charter School's written policy on student admission is a public record and will be posted to the school's website.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Summary of Academic Achievement and Functional Performance/Procedural Safeguard Requirements for Graduation Policy

The Board of Trustees of the Pennwood Cyber Charter School (“Charter School”) recognizes that federal and state law requires an evaluation of a student with a disability in accordance with 34 CFR 300.304 through 34 CFR 300.311 before determining the student is no longer a student with a disability. For a student whose eligibility terminates based on graduation from high school, the Charter School must provide the student with a summary of the student’s academic achievement and functional performance, including recommendations on how to assist the student in meeting the student’s post-secondary goals. A transition plan, including the student’s appropriate measurable post-secondary goals related to training, education, employment, and when appropriate, independent living skills should be addressed in the student’s IEP.

Graduation from high school with a regular high school diploma constitutes a change in placement. Therefore, the Charter School must provide a Prior Written Notice/Notice of Recommended Educational Placement for student’s graduation so as to provide student with procedural due process safeguard in the event that Parent(s) disagree with the Charter School IEP Team’s recommendation.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL’S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Surrogate Parent Policy

Pennwood Cyber Charter School (“Charter School”) must ensure that an individual is assigned to act as a surrogate of a child when no parent or person acting as the parent can be identified, or Charter School, after reasonable efforts, cannot locate the parent, or the child is an unaccompanied homeless youth as defined in the McKinney-Vento Homeless Assistance Act, 42 U.S.C. Sec. 11434 a(6).

20 U.S.C. § 1401 Definitions:

The term “Parent” means –

- a) a natural, adoptive, or foster parent of a child (unless a foster parent is prohibited by state law from serving as a parent);
- b) a guardian (but not the State if the child is a ward of the State);
- c) an individual acting in the place of a natural or adoptive parent (including a grandparent, stepparent, or other relative) with whom the child lives, or an individual who is legally responsible for the child’s welfare; or
- d) except as used in sections 1415(b)(2) and 1439(a)(5) of this title, an individual assigned under either of those sections to be a surrogate parent.

42 U.S.C. § 11434A McKinney-Vento Homeless Assistance Act, Education for Homeless Children and Youths – Definitions:

The term “homeless children and youths” means –

- a) individuals who lack a fixed, regular, and adequate nighttime residence (within the meaning of section 11302(a)(1) of this title); and
- b) includes:
 - i. children and youths who are sharing the housing of other persons due to loss of housing, economic hardship, or a similar reason; are living in motels, hotels, trailer parks, or camping grounds due to the lack of alternative adequate accommodations; are living in emergency or transitional shelters; are abandoned in hospitals; or, are awaiting foster care placement;
 - ii. children and youths who have a primary nighttime residence that is a public or private place not designated for or ordinarily used as a regular sleeping accommodation for human beings (within the meaning of section 11302(a)(2)(C) of this title);
 - iii. children and youths who are living in cars, parks, public spaces, abandoned buildings, sub-standard housing, bus or train stations, or similar settings; and,
 - iv. migratory children (as such term is defined in section 6399 of title 20) who qualify as homeless for the purposes of this part because the children are living in circumstances described in clauses (i) through (iii).

Charter School must have a method of determining whether or not a child needs a surrogate parent, and for assigning a surrogate parent to the child as well as ensuring that surrogates are trained and have adequate knowledge to serve in this capacity.

Charter School may select a surrogate parent in any way permitted under State law, but must ensure that a person selected as a surrogate is not an employee of the State Educational Agency (“SEA”), Charter School or any other agency that is involved in the education or care of the child, such as the child welfare agency, adoption agency, etc. This means that a “house

parent," or other employee of a public child welfare agency or private child welfare provider agency, school district, charter school, state educational agency, or a facility where the child lives is not eligible. Whenever possible, a surrogate parent should be someone who already knows and has a trusting relationship with the youth and must have knowledge and skills that ensure that he or she will adequately represent the child..

For a child who is a ward of the State, a surrogate may be appointed by a judge overseeing the child's care or by Charter School. The surrogate must have no personal or professional interest that conflicts with the interest of the child the surrogate parent represents. The surrogate parent must have knowledge and skills that ensure adequate representation of the child. The surrogate parent may represent the child in all matters relating to the identification, evaluation, educational placement and provisions of FAPE to the child.

When Does the Charter School need to appoint a surrogate?

- 1) No parent, guardian, current foster parent, or relative caregiver (relative acting in place of the parents with whom the child lives) can be located
- 2) Parent's right to make educational decisions for the child have been terminated by the court, and no guardian, current foster parent, or relative caregiver (relative with whom the child lives) can be located and the child does not have a court-appointed education decision maker or surrogate parent.
- 3) The child is an unaccompanied homeless youth under 42 U.S.C. § 11434A.

If a child is or may be eligible for special education or early intervention services, the IDEA requires the child's school district, charter school, cyber charter school or early intervention agency to ensure that the child has an active birth or adoptive parent or other person authorized by the IDEA or a court to make decisions for him or her. The person who is designated to act as the "parent" under the IDEA is entitled to participate in all of the meetings and make all relevant decisions. If the charter school cannot locate a biological or adoptive parent or other IDEA Parent from the list below, then it must appoint a "surrogate parent" within 30 calendar days. In some cases, a child may appear to have more than one IDEA parent from the list below and the Charter School will need to determine which person is the legally-authorized decision maker.

Under the IDEA, potential IDEA Parents include:

- A biological or adoptive parent;
- A foster parent;
- An individual who has the authority to act as the child's parent or who has the authority to make education decisions for the child (such as an Educational Decision Maker "EDM");
- A family member with whom the child lives who is acting as a parent (such as a grandparent or stepparent);
- A guardian who is legally responsible for the child's welfare (but not any employee of a child welfare agency); or
- A surrogate parent assigned by the local educational agency (such as the school district or charter school).

If a court has not limited the biological/adoptive parent's authority to make education decisions, the Charter School must recognize that parent as the person authorized to make education decisions for the child so long as he or she is "attempting to act as the parent." If the parent is not "attempting to act as the parent" (for example, is not responding to notices or attending meetings), and the child has a foster parent or one of the other potential "IDEA parents" listed above, the Charter School must then treat that person as the child's IDEA Parent and allow that person to participate in meetings, give or deny consent, and make early intervention or special education decisions for the child. The "IDEA

Parent” can challenge the Charter School’s proposals through the mediation and due process hearing procedures.

If the child has a “parent” under the IDEA (see list above), the Charter School does not need to “appoint” that person as the child’s surrogate parent. Unlike a juvenile court judge, who can appoint another person as EDM to act in the best interest of the child even if the child has a parent, a Charter School cannot appoint another person to make decisions for the child if the child has a “parent.” If, however, a court has appointed an EDM, the EDM makes educational decisions for the child regardless of whether the biological/adoptive parent wants to serve in that role or whether there are other potential “parents” under the IDEA who are ready to serve that role. *If a court has appointed an EDM, that person trumps all other potential “parents” under the IDEA.*

The Charter School must take steps to ensure that the child’s rights are protected if:

- 1) The Charter School does not know who the parent is;
- 2) The Charter School cannot locate the parent after making reasonable efforts to get in touch with them, such as calling and sending letters on multiple occasions;
- 3) The child has no “parent” under the IDEA (see above); or
- 4) The child is an “unaccompanied homeless youth” as defined by 42 U.S.C. § 11434A

Once a Charter school has determined that an enrolled child needs a surrogate parent, it must assign a surrogate parent within 30 calendar days. To meet its 30-day obligation, a Charter School should try to maintain a pool of trained surrogate parents who are available for children in need. Charter Schools may enter into interagency agreements with its local child welfare agency to identify children in need of surrogate parents and potential candidates to fill this role.

Exceptions to General Rule Prohibiting Caseworker/Employee of Agency to be Surrogate:

There are two exceptions to the general rule that an EDM or surrogate parent cannot be an employee of an agency involved in the care or education of the child for children aged 3 or older:

- 1) A caseworker or other agency employee can consent to an initial evaluation in very limited circumstances. Written consent of a parent is required before a child can first be evaluated to determine eligibility for special education services. However, the IDEA permits a school to start the initial evaluation without obtaining parent permission if the child is in the custody of the child welfare agency, is not living with the parent or with a foster parent, and one of the following applies:
 - The school documents that it has made repeated attempts but cannot locate the parents;
 - The parents’ rights have been terminated; or
 - The birth parents’ rights to make education decisions have been suspended by a judge and the judge has appointed an individual to consent to the initial evaluation.

NOTE: In this limited circumstance only, the judge can appoint a person to give this consent who is an employee of an agency involved in the education or care of the child, such as the county or a private provider child welfare agency. However, if the child is ultimately determined to be eligible, that person cannot consent to starting special education services. Therefore the Charter School or the court must immediately begin the process of appointing an EDM or surrogate parent who can consent to the provision of special education services while determining if the child is eligible.

- 2) A temporary surrogate parent can be appointed for an “unaccompanied homeless youth.” These are youth who are not in the physical custody of a parent or guardian and who do not have a fixed, regular, and adequate nighttime residence. For such youth, the staff of an emergency shelter, transitional shelter, independent living program, or street outreach program may be appointed as a “temporary surrogate parent” (even if that person is an employee of an agency involved in the care or education of the youth) *until such time as a surrogate parent who meets the usual requirements can be*

appointed.

Who can be a Surrogate Parent?

- 1) A person of good character;
- 2) a person at least 18 years of age;
- 3) a person who possesses reasonable abilities to make decisions regarding a student's educational needs;
- 4) a person committed to acquainting themselves with a student's educational needs, the student's rights under the Individuals with Disabilities Education Act, and the Pennsylvania educational system;
- 5) a person committed to advocating a free appropriate public education for the child in the least restrictive environment and agree to fulfill the responsibilities listed below;
- 6) a person who has no vested interest that would conflict with the interests of the student;
- 7) a person is not an employee of any agency responsible for the education of care of the child; and
- 8) a person who lives within geographic proximity to the student, which will enable that person to discharge their obligations as a surrogate parent.

Responsibilities of a Surrogate Parent:

- 1) Participate in the surrogate training session(s);
- 2) Request and participate in all applicable meetings relating to the provision of services and educational placement of the child (including individualized education program (IEP) meetings, evaluation reviews and manifestation determinations, etc.);
- 3) Approve or disapprove of the student's IEP;
- 4) Engage in ongoing communication, verbally or in writing with the student, the student's teacher and the student's school;
- 5) Assert student's rights to due process and to compliance with the IEP as appropriate;
- 6) Contact the surrogate parent trainer if further assistance is required or if surrogate parent no longer wishes to assume the educational responsibility for the child;
- 7) Ensure the child receives a free appropriate public education in the least restrictive environment.

The CEO/Principal or their designee is directed to develop procedures that may be necessary to implement this policy.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Special Education Training Policy

Personnel

The Chief Executive Officer (“CEO/Principal”) or their designee shall ensure that in-service training appropriately and adequately prepares and trains personnel to address the special knowledge, skills and abilities to serve the unique needs of children with disabilities in the school, including those with low incidence disabilities.

Personnel must be fully informed about their responsibilities for implementing applicable state and federal special education laws in the school environment and are provided with technical assistance and training necessary to assist them in this effort.

Training must be a part of Pennwood Cyber Charter School (“Charter School”) Professional Development Plan and Act 48 credits are to be made available.

Trainings are to be administered in areas including but not limited to: behavior support, reading, FAPE in the LRE, Transition, and At/Low Incidence, confidentiality, FBAs/Manifestation Determinations, use of positive behavior support, de-escalation techniques and emergency responses.

Appropriate instructional changes must take place as a result of the trainings.

Personnel should be asked about their training needs on a regular basis.

Pursuant to 22 Pa Code §711.5, instructional paraprofessionals are to receive 20 hours of staff development activities related to their assignment each year. An instructional paraprofessional is a charter school or cyber charter school employee who works under the direction of a certificated staff member to support and assist in providing instructional programs and services to students with disabilities. This support and assistance includes one-on-one or group review of material taught by certificated staff, classroom management and implementation of positive behavior support plans. Services may be provided in a special education class, regular education class or other instructional setting as provided in the student’s IEP.

Pursuant to 22 Pa Code §711.5, personal care assistants are to receive 20 hours of staff development activities related to their assignment each school year (the 20 hours of training may include training required by any school-based ACCESS program, if applicable). A personal care assistant provides one-to-one support and assistance to a student, including support and assistance in the use of medical equipment (for example, augmentative communication devices; activities of daily living; and monitoring health and behavior). A personal care assistant may provide support to more than one student, but not at the same time. Personal care assistants shall provide evidence of 20 hours of staff development activities related to their assignment each school year. The 20 hours of training may include training required by the school-based access program.

Pursuant to 22 Pa Code §711.5, educational interpreters are to receive 20 hours of staff development activities relating to interpreting or transliterating services annually. An educational interpreter is an individual who provides students who are deaf or hard of hearing with interpreting or transliterating services in an educational setting. To serve as an educational interpreter at a charter school or cyber charter school, consistent with the Sign Language Interpreter/Transliterator State Registration Act.

The CEO/Principal or their designee is directed to implement procedures necessary to ensure:

- (1) Personnel training needs are addressed.
- (2) General education and special education personnel receive training and professional development.
- (3) Personnel are to have the skills and knowledge necessary to meet the needs of students with disabilities.
- (4) Educational research, materials and technology are to be acquired and disseminated to teachers, administrators, and related services personnel as needed.

Parent Training: Administration is further directed to make training opportunities available to parents or students who require same as part of any IEP and to the extent appropriate under applicable state and federal laws and regulations.

Administration is directed to maintain appropriate documentation of trainings offered and attendance.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

Transition Services Policy

For students who are 14 years of age or older, Pennwood Cyber Charter School (“Charter School”) shall include a transition plan in the student’s IEP, which includes appropriate measurable postsecondary goals related to training, education, employment and, when appropriate, independent living skills.

If determined appropriate by the IEP team, transition planning may begin prior to 14 years of age.

The student must be invited to the IEP team meeting where transition planning is being considered.

If the student does not attend the IEP meeting, the school must take other steps to ensure that the student’s preferences and interests are considered.

Transition services are a coordinated set of activities for a student with a disability designed to be within a results oriented process, that is focused on improving the academic and functional achievement of the student with a disability to facilitate the student’s movement from school to post school activities, including postsecondary education, vocational education, integrated employment (including supported employment), continuing and adult education, adult services, independent living, or community participation that is based on the individual student’s needs taking into account the student’s strengths, preferences, and interests as well as the fact that the student has been educated in a school setting. . Curriculum-based instruction or any instruction occurring outside the classroom in the school or community where interaction occurs with persons without disabilities, and includes nondisabled peers and community members, is counted as a general education classroom and is included in the calculation for Least Restrictive Environment.

Based on age-appropriate assessment, the student’s IEP team is to define and project the appropriate measurable postsecondary goals that address education and training, employment, and as needed, independent living. Such postsecondary goals or goals covering education, training, employment or independent living, will be updated annually. . All three goal areas shall be addressed by the IEP team and summarized in the present educational levels secondary transition section of the IEP. Federal law requires that students have “appropriate, measurable post-secondary goals based upon age appropriate transition assessments related to training, education, employment and, where appropriate, independent living skills” §300.320(b)(1). If a post-secondary goal area is not needed, the reason it is not needed must be documented in the Present Levels of Academic Achievement and Functional Performance portion of a student’s IEP. The services/activities and courses of study that support that goal are to be included in student IEPs. For each service/activity, the location, frequency, projected beginning date, anticipated duration, and person/agency responsible are also to be included.

The specific courses of study which facilitate the student’s successful move from school to the student’s expressed post-school goal must be included in the IEP. If specific transition services are required, based upon the student’s skill deficit area(s), to assist the student in realizing their goal(s), these must be set forth in the IEP. Each post-school goal should contain information as

to the instruction, related service(s), community experience and if appropriate, acquisition of daily living skills that are necessary for meeting the post-school goal(s).

Overall, for each post-school goal, there must be at least one annual goal included in the IEP which contains the student's name, clearly defined behavior and performance criteria. Lastly, there should be means by which to measure progress towards the post-school goal(s) and indication of adjustment to the transition plan if the progress monitoring data does not support achievement of the goal and/or positive movement towards achievement of same.

Assistance in Obtaining Accommodations in College/University

Charter School high school IEP Transition Teams should include in the Transition Plan goals and steps to assist students with how to request and secure postsecondary accommodations if they plan to attend college after high school graduation. This assistance includes:

Help students submit appropriate documentation: Post-secondary institutions such as colleges and universities are not required to accept IEPs but are mandated to provide accommodations in accordance with American with Disabilities Act ("ADA"). Therefore, development of a Section 504 Plan for a student is one way that permits a student to educate the post-secondary institution about the accommodations student will require in this environment. If Student requires an IEP through to high school graduation, Guidance counselors and IEP School Transition Team members should advise students to send neuropsychological or psychoeducational tests instead of IEPs to the chosen colleges. Or for some disabilities, many colleges will request a signed letter from a doctor or neurologist. As part of the Transition Plan in the IEP, the School Team should help students to ensure these letters are written on the doctor's letterhead and include the doctor's license number and either a DSM-4 or DSM-5 diagnosis as well as the evaluator's or doctor's recommendations.

The School Team should advise students to call the admissions office of colleges and ask whether they should submit their testing results together with the application or wait until after they have been accepted, as colleges vary.

Provide up-to-date evaluations: Neuropsychological and psychoeducational testing should be conducted no more than three to five years before the student applies to college and requests accommodations. If a student's tests are out of date, have the student check with the college to see if an update may be obtained, which is a scaled down version of the original test instead of a whole new battery.

Help students discern accommodations from modifications: Accommodations are what happen in college while modifications *and* accommodations happen in K-12. Colleges are not required to grant modifications, such as altering the curriculum, assignments, or degree requirements, as these could lower students' production level or quality of work. Accommodations though must be provided to college students under the ADA if deemed reasonable which means that the requested accommodation will not be burdensome financially or resource-wise for the university.

Students should be made aware also that colleges do not have to provide the exact accommodations the student requests, but they do have to grant similar status. For example, if a student requests a personal scribe to help take notes, a college might opt to provide assistive technology, as it is a less burdensome option financially.

Students must also be advised that they must inform their professors of their accommodations, as the ADA officers cannot legally inform professors of accommodations on the students' behalf.

Support students' self-advocacy: The School's Transition Team must start working with students to help them understand what their disability is, how it affects them in an academic setting, and what they need in order to be accommodated in that setting.

The Chief Executive Officer ("CEO")/Principal or their designee is directed to inform the Board of any new requirements regarding Transition Planning and any need to obtain additional services, training and/or assessment tools related to Transition Planning.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

DRAFT

Pennwood cyber charter school

Board of Trustees Policy

Special Education Policy

The Board of Trustees of the Pennwood Cyber Charter School ("Charter School") recognizes that charter schools must comply with Chapter 711 of Title 22 of the Pennsylvania Code, Charter School Services and Programs for Children with Disabilities.

The Board of Trustees of Charter School also recognizes that charter schools are not exempt from federal special education laws or regulations included in Chapter 711. These include but are not limited to enumerated provisions of the Individuals with Disabilities Education Improvement Act (2004) ("IDEA") and Section 504 of the Rehabilitation Act of 1973. ("IDEA"), for school-age children with disabilities who do not meet the eligibility criteria outlined under the IDEA, but who might be eligible for special protections and for adaptations and accommodations in instruction, facilities, and activities. Section 504 protects children who have a mental or physical disability that substantially limits or prohibits participation in or access to an aspect of the school program and otherwise qualify under the applicable state and federal laws, including Chapter 711 and Section 504. Pursuant to 22 Pa. Code §711.3:

"Charter schools and cyber charter schools assume the duty to ensure that a [free and appropriate public education], FAPE, is available to a child with a disability in compliance with IDEA and its implementing regulations in 34 CFR Part 300 (relating to assistance to states for the education of children with disabilities) and section 504 and its implementing regulations in 34 CFR Part 104 (relating to nondiscrimination on the basis of handicap in programs and activities receiving federal financial assistance)."

The Charter School's special education program includes the supports and services needed for students who require specially designed instruction and other services, including related services, with all services provided at no cost to the student or parents and guardians. Programs are developed by qualified Charter School staff to meet the needs of all students. Individual Education Programs are developed on an individual basis by the IEP Team, pursuant to Sec. 300.321, and implemented in the Least Restrictive Environment, pursuant to Sec. 300.114. The term individualized education program or IEP means a written statement for each child with a disability that is developed, reviewed, and revised in a meeting in accordance with §§300.320 through 300.324, pursuant to Sec. 300.320.

Charter School shall ensure that all children with disabilities enrolled in the charter school, regardless of the severity of their disabilities, and who are in need of special education and related services, are identified, located, and evaluated and a practical method is developed and implemented to determine which children with disabilities are currently receiving needed special education and related services

Charter School must be able to document that children with disabilities, who are in need of special education programs and services, are identified and evaluated through child find activities. Child find includes public awareness activities that are sufficient to inform parents of the special education programs and services that are available and how to request those services.

Charter School must conduct systematic screening activities that lead to the identification and evaluation of children with disabilities. Basic screening procedures might include but are not limited to hearing and

vision tests as well as grade level tests of academic performance. The Charter School must be able to document that children with disabilities, who are in need of special education programs and services, are identified and evaluated through published Child Find activities in accordance with 22 Pa. Code §711.21, a pertinent portion of which is set forth below:

Each charter school's or cyber charter school's written policy must include:

- (1) Public awareness activities sufficient to inform parents of children applying to or enrolled in the charter school or cyber charter school of available special education services and programs and how to request those services and programs. Written information shall be published in the charter school or cyber charter school handbook and web site.
- (2) Systematic screening activities that lead to the identification, location and evaluation of children with disabilities enrolled in the charter school or cyber charter school.

Basic screening procedures might include, but are not limited to, hearing and vision tests as well as grade level tests of academic performance.

Please see the Charter School's Child Find Child Find Policy and Notice.

The Charter School also complies with the Family Educational Rights and Privacy Act (20 U.S.C. §1232g; 34 CFR Part 99) ("FERPA"), which is a Federal law that protects the privacy of student education records, which includes special education records. Parental consent must be obtained before personally identifiable information is disclosed to parties, other than officials of participating agencies in accordance with Sec. 300.622(b)(1) of the IDEA, unless the information is contained in education records, and the disclosure is authorized without parental consent under 34 CFR part 99, in accordance with §300.622(a).

Charter School must also have a system to evaluate the overall success and effectiveness of public awareness and child find activities.

Charter School recognizes that:

- Children with disabilities must be admitted on the same basis as children without disabilities.
- Upon admitting a child with a disability, the school must provide services to address the child's specific needs
- When a student with a disability transfers to the school, the school is responsible for ensuring that the student receives services that are described in an Individualized Education Program (IEP), either by adopting the old IEP or by developing a new IEP.
- Charter School will use the most current and appropriate versions of Special Education Formats.
- To meet the requirements of federal law, Charter School may provide the services itself, or contract with another entity, such as an intermediate unit or school district, to provide the services, respecting the least restrictive environment requirements.

Contact the Charter School CEO, or designee, or the Director of Special Education for questions about the Charter School Special Education program, the evaluation/reevaluation process, including forms for the Permission to Evaluate ("PTE") and Reevaluate ("PTRE"), and for the Parents Procedural Safeguards regarding consent for the evaluation and reevaluation processes, or for any matters concerning the IEP process and special education,. For a copy of the Procedural Safeguards Notice, contact the Charter

School CEO or designee, or the Charter School Director of Special Education. The CEO or designee is directed to implement all procedures in accordance with this policy.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Pennwood Cyber Charter School

Board of Trustees Policy

TRANSITION FROM PRESCHOOL EARLY INTERVENTION PROGRAMS TO CHARTER SCHOOL KINDERGARTEN OR FIRST GRADE PROGRAMS

The Board of Trustees of the Pennwood Cyber Charter School ("Charter School"), recognizes that Act 212 of 1990, the Early Intervention Systems Act, established Early Intervention services in Pennsylvania for eligible children from age three to the "age of beginners". Age of beginners is defined as the minimum age established by each school district's board of directors for admission to the school district's first grade under 22 Pa. Code 14 §14.101. A transition, without interruption in program, and with appropriate procedural protections, is required under 20 U.S.C. §1419 (IDEA).

To assist in this transition process, the Pennsylvania Department of Education ("PDE") Bureau of Special Education ("BSE") and the Bureau of Early Intervention Services ("BEIS") have developed standardized procedures and forms to be utilized by the Preschool Early Intervention programs, school districts and charter schools throughout the process. If Parents choose to enroll their child in the Charter School or complete the Intent to Register and select the Charter School, then the Charter School must fulfill the following responsibilities for a successful transition for the new school year.

By February 1st of each year, preschool Early Intervention programs must identify the children in their programs who are approaching the age for kindergarten or first grade. During the transition meetings in February, if parents intend to register their child with the Charter School, the following options should be considered by parents and the Charter School team:

(1) Parents and the Charter School can agree to adopt and implement the child's preschool Early Intervention Individualized Education Program for the new school year and, if so, the Charter School would then issue the Notice of Recommended Educational Placement/Prior Written Notice ("NOREP/PWN"), indicating this recommendation. However, the NOREP/PWN should indicate that the IFSP, as adopted, will serve as interim supports for the student, for a period of time of a maximum of sixty (60) days, while the Charter School, as the new LEA, decides on whether to accept, in part or whole, the entire recommended special education program in the IFSP. The Charter School will then determine, through a review of Early Intervention records, if school-age instruments were used to develop the IFSP and if not, then issue a PTE to conduct an evaluation using necessary school-age instruments.

(2) Parents and the Charter School can decide to adopt the preschool Early Intervention Individualized Education Program with revisions. The Charter School and parents would discuss the proposed revisions. The Charter School would then issue the revised Individualized Education Program and Notice of Recommended Educational

Placement/Prior Written Notice indicating this recommendation.

(3) Parents and the Charter School will decide if a reevaluation is necessary. The Charter School may conduct a reevaluation consisting of a review of existing data and information prior to the development of an Individualized Education Program. The Charter School is not required to issue the Prior Written Notice and Request for Consent for Reevaluate form to obtain parental consent prior to a reevaluation limited to a review of existing data. The Charter School will notify the parents in writing within a reasonable amount of time after receipt of the Intent to Register form. Charter schools may conduct a reevaluation and develop Individualized Education Programs in accordance with the timelines mandated in 22 Pa. Code Chapter 711. The Charter School and the parents may agree to waive a required reevaluation that is allowed under 34 CFR §300.303(b)(2), or may agree to implement the existing evaluation or Individualized Education Program.

(4) The Charter School may notify parents using a letter/notice developed by the Charter School. If the team is meeting to review existing evaluation data, the Invitation to Participate in the Individualized Education Program Team Meeting or Other Meeting notice can be used, noting that the meeting is to review data as part of a reevaluation. This review of existing data should commence within a reasonable amount of time after receipt of the Intent to Register.

The Reevaluation Report will summarize the data reviewed during reevaluation, the decision about whether additional evaluation data are needed, and a determination about the child's continued eligibility for special education services. If, through the review of existing evaluation data the Individualized Education Program team as described above determines that additional data are needed, the Charter School will issue the Prior Written Notice and Request for Consent to Reevaluate Form to obtain parental consent to collect the additional data. Within 60 days of the date the Charter School receives parental consent (not including summer days) to collect additional data, the parents will receive a copy of the Reevaluation Report.

(5) Waiving the reevaluation is not part of the reevaluation process. Waiving the reevaluation is recommended by the Charter School, not the Individualized Education Program team. The parents must be in agreement with the determination to waive the reevaluation. Parent signature is required on the Agreement to Waive Reevaluation form.

Within a reasonable period of time from the receipt of the signed Intent to Register form but no later than April 15th, the Charter School will notify parents in writing and initiate one of the options as noted above. Regardless which option is chosen, an Individualized Education Program will be implemented no later than 10 school days after its completion, in order to ensure that the special education programs of young children with disabilities are not interrupted when they transition from preschool Early Intervention programs to school-age programs.

All children currently eligible for special education in preschool Early Intervention and registered with the Charter School will remain eligible for special education in the Charter School unless the Charter School or preschool Early Intervention program completes a

reevaluation that determines the child is no longer eligible for special education. If no longer eligible for special education services, the Charter School or preschool Early Intervention program must issue a Notice of Recommended Educational Placement/Prior Written Notice. If parents disagree with the Individualized Education Program offered by the Charter School and initiate a due process hearing or both parties agree to mediation, children who will transition into kindergarten or school age programs must continue to receive the services described in their preschool Individualized Education Program (ensuring "status quo") pending completion of dispute resolution options of mediations or due process hearings.

It is recommended that the records of children who will be transitioning to the Charter School be requested by the Charter School for transfer from the preschool Early Intervention program in time for the transition meeting. If a transition meeting is not held, the records will be transferred upon the child being registered with the Charter School or when the child is no longer receiving preschool Early Intervention services.

The CEO shall ensure that this transition process is carried out through the Director of Student Services/Special Education Coordinator and any questions should be directed to this latter person.

TO THE EXTENT THAT ANYTHING IN THIS POLICY COULD BE CONSTRUED TO CONFLICT WITH THE SCHOOL'S CHARTER OR APPLICABLE STATE AND/OR FEDERAL LAWS, THE APPLICABLE STATE AND/OR FEDERAL LAWS AND/OR CHARTER CONTROL.

Recommended Minimum EL Service Plan aligned with the Pearson English Learning System {PELS}.

HOME LANGUAGE SURVEY

ALL newly registering students regardless of race, nationality, or language origin MUST complete this form. Federal law requires that all Local Education Agencies (LEAs) utilize a non-biased procedure for identifying which students are potential English Learners (ELs) in order to provide appropriate language instruction educational programs and services. Given this responsibility, LEAs have the right to ask for the information contained on this and other forms associated with the identification process.

Student Information (Parents/Guardians should complete this section):

Child's first name: _____

Child's family name: _____

Child's Date of Birth: _____

(Month/Day/Year)

Questions for Parents or Guardians

1. Is a language other than English spoken in the child's home? No Yes (language) _____

2. Does your child communicate in a language other than English? No Yes (language) _____

3. What is the language that your child first learned to speak? _____

Parent/Guardian Signature: _____

Date: _____

Interpreter Provided No Yes

¹ The local education agency (LEA) has the responsibility under the federal law to serve students who are limited English proficient and need English instructional services. Given this responsibility, the LEA has the right to ask for the information it needs to identify English Language Learners (ELs). As part of the responsibility to locate and identify ELs, the LEA may conduct screenings or ask for related information about students who are already enrolled in the school as well as from students who enroll in the LEA in the future.

Protocol for Review of
Instructional Materials for ELs

WIDA PRIME Correlation

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

Introduction

The Protocol for Review of Instructional Materials for ELs (PRIME) has been developed by World-Class Instructional Design and Assessment (WIDA) to assist publishers and educators in examining the representation of key elements of the WIDA English language proficiency standards in their materials.

The intent of this review is to identify the ways in which elements of the *WIDA English Language Proficiency Standards, 2007 Edition, PreKindergarten through Grade 12* are represented in the published materials. These materials vary from core or supplemental texts to DVDs to software programs; however, it is assumed that they all seek to provide teachers with standards-based references to use with English language learners in diverse settings across the United States.

The **Protocol for Review of Instructional Materials for ELs (PRIME)** is **not** an evaluative tool aimed to judge the effectiveness of published materials using the WIDA English Language Proficiency (ELP) Standards. The goal of the Protocol for Review of Instructional Materials for ELs (PRIME) is twofold:

- To assist educators in making informed decisions in selecting instructional materials for programs serving English language learners and
- To aid publishers and correlators in developing materials and communicating how their materials address key elements of the WIDA English Language Proficiency Standards

WIDA welcomes the opportunity to work with both publishers and educators. WIDA realizes that it has a unique perspective on the conceptualization of language proficiency standards and how it envisions their use. It is our hope that by using this inventory, publishers will gain a keener understanding of some of the facets involved in the language development of English language learners as they pertain to their products.

Organization

The Protocol for Review of Instructional Materials for ELs (PRIME) is organized into two parts that, as a whole, are intended to provide information about instructional materials in each of 14 criteria. **Part 1** contains information about the materials that are to be reviewed. **Part 2** is the protocol used for the review of instructional materials and includes space for publishers to explain the answers to the questions. An Appendix at the end of the document provides definitions of the categories included in the PRIME correlation.

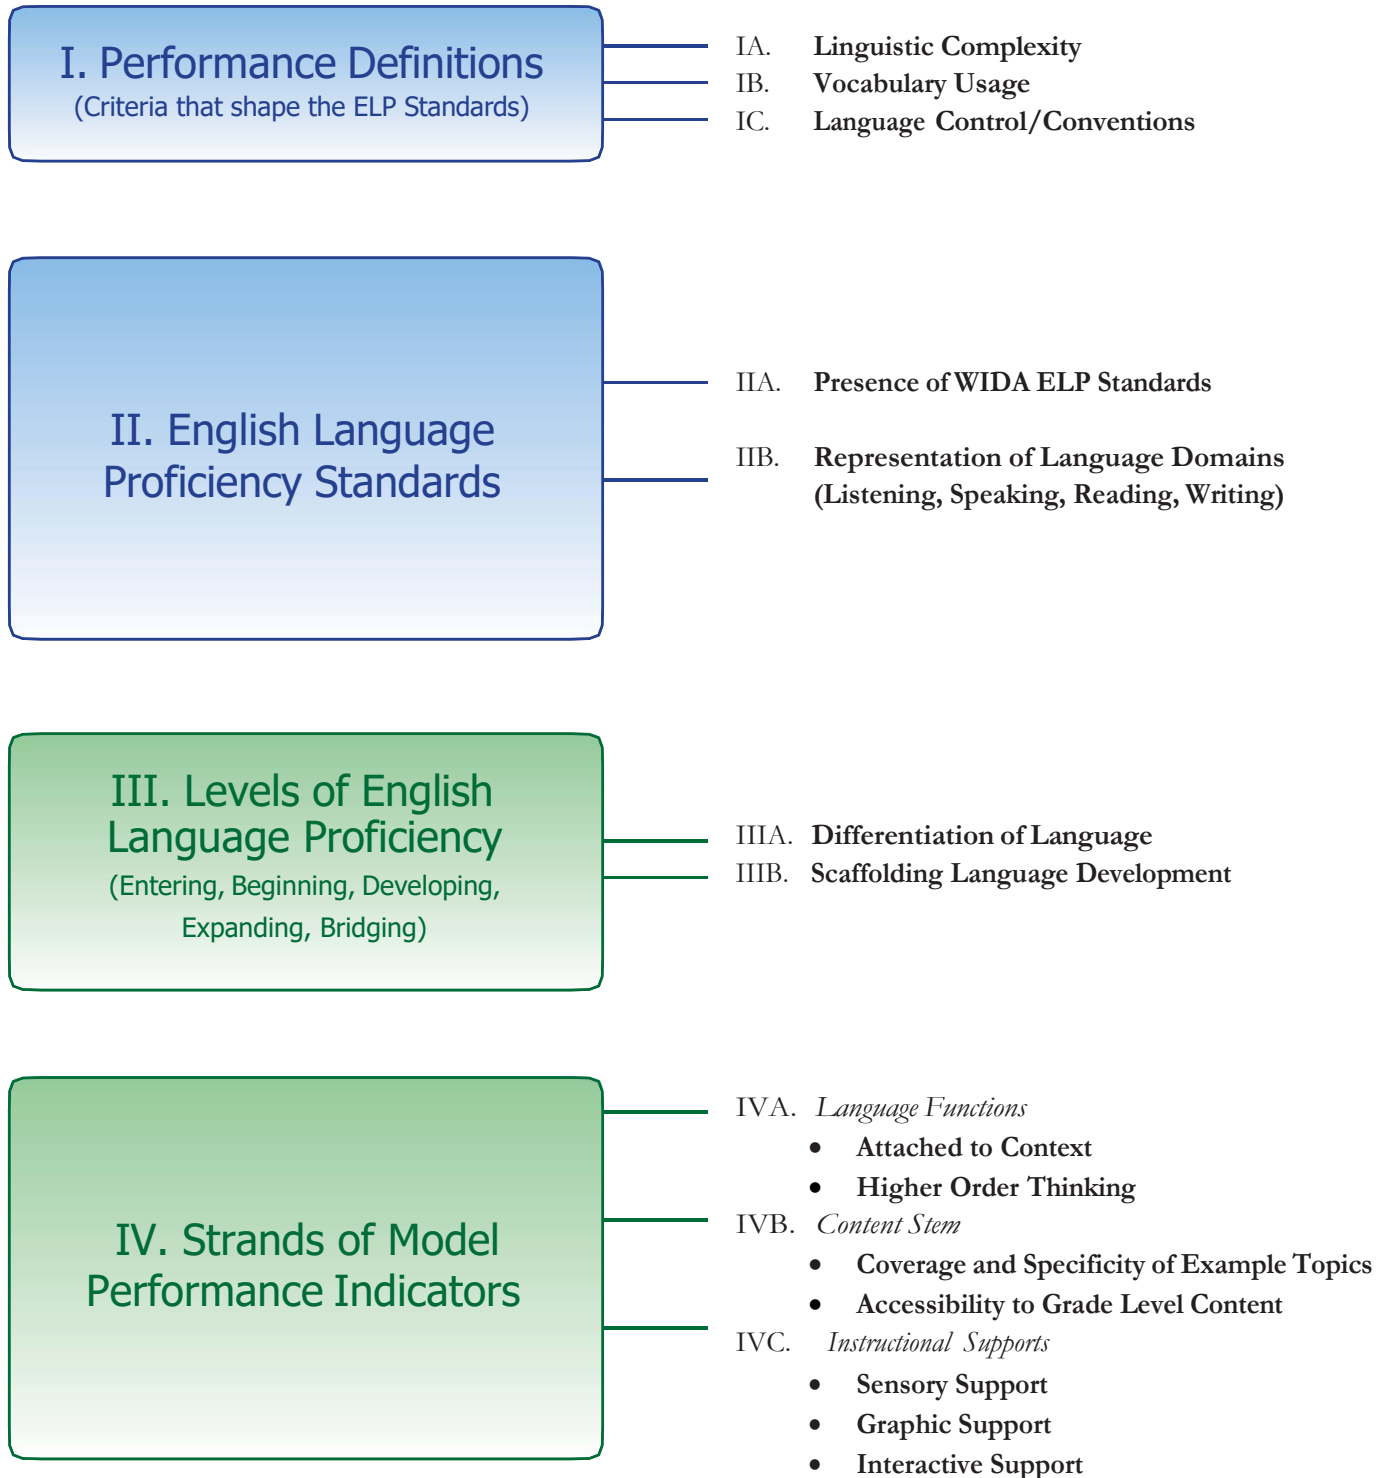

Directions for completing the Protocol for Review of Instructional Materials for ELs (PRIME) inventory:

- STEP 1:** Complete information about materials being reviewed.
- STEP 2:** Respond to the “Yes/No” questions about the presence of the criteria in the materials.
- STEP 3:** Provide justification to support your “Yes” responses. (Note: If additional explanation for “No” answers is relevant to readers’ understanding of the materials, this may also be included.)

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

Organization of the WIDA English Language Proficiency Standards In Relation to the Protocol for Review of Instructional Materials for ELs

The 14 PRIME criteria are in **BOLD** below.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

Part 1: Information About Materials

Publication Title(s): Cornerstone

Publisher: Longman Pearson

Materials/ Program to be Reviewed: Cornerstone (multi-level program for English learners); specific examples in this correlation are drawn from Cornerstone A

Tools of Instruction included in this review: SE, TE, Practice Book, Assessment Book, Technology Suite

Intended Teacher Audiences: Classroom Teachers, Content Specialists, Language Teachers, Resource Teachers, and Paraprofessionals

Intended Student Audiences: Grades K-5

WIDA Framework(s) considered: Summative and Formative

Language domains addressed in material: Listening, Speaking, Reading, and Writing

WIDA English Language Proficiency Standards addressed: Social and Instructional Language, The Language of Language Arts, Science, Social Studies, and Math

WIDA language proficiency levels included: Levels 1-5 (Entering, Beginning, Developing, Expanding, and Bridging)

Most Recently Published Edition or Website: www.longmankeystone.com

In the space below explain the focus or intended use of the materials.

Longman Cornerstone is a six-level program designed for elementary English learners and struggling readers whose academic achievement is two or more years below grade level. Levels K, 1, and 2 are designed for the lower elementary grades, and levels A-C for the upper elementary grades. Through explicit, intensive, and focused instruction accelerates students' language acquisition, reading comprehension, vocabulary and oral and written communication skills. Cornerstone blends rigorous, research-based reading and language skills instruction together with a balance of content-area readings and age-appropriate, high-interest stories. In addition, this series incorporates the focused and purposeful instructional principles of Understanding by Design, which allow students to demonstrate their understanding and mastery of skills through multiple formal and informal assessment opportunities. Through this process, students will be equipped with the key transferable academic skills necessary for lifelong success.

Cornerstone level K, for Kindergarten, builds fundamental literacy skills such as sight vocabulary and is rich in oral language use. Levels 1 and 2 are for lower elementary grades, and present material which bridge language and literacy development. Levels A, B, and C, designed for upper elementary grades, provide a flexible program which accelerates students' academic achievement.

Part 2: PRIME Correlation Tool

I. PERFORMANCE DEFINITIONS

IA. Linguistic Complexity (the amount and quality of speech or writing)

YES NO

- A. Do the instructional materials take into account linguistic complexity for language learners?
- B. Do the instructional materials address linguistic complexity for all of the targeted proficiency levels?
- C. Is linguistic complexity systematically addressed, in multiple lessons, chapters, or units, in the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

- A. Longman Cornerstone is a six-level program intended for grades K-5 English language learners and other struggling readers. It is designed to accelerate language acquisition, reading comprehension, increase vocabulary, and strengthen both oral and written communication skills. Linguistic complexity is represented in all lessons and practice activities, through the use of a consistent and growing vocabulary, and using expressive language. Six units are included in each level, and are thematically organized, beginning with ‘The Big Question.’ This allows students to start a discussion about the unit theme and guides them through the readings and lessons that follow. Background information and students’ prior knowledge are explored through discussion and writing activities, such as ‘Quick Write,’ and ‘What about you?’ Vocabulary is practiced and applied with strategies, such as class discussion, partner activities, and individual writing assignments. Three readings in each unit include content-area reading and literary genres. Each reading concludes with a review and practice, which includes oral and written lessons found in such sections as: ‘Word Analysis/Phonics, and Fluency,’ ‘Comprehension,’ and ‘Grammar and Writing.’ Summative assessment allows students to respond using written and oral approaches and concludes with a reflective oral or written assessment. The TE includes multiple oral and written extension activities such as ‘Sharing Language and Culture.’ In addition, all lessons are supported by Practice Book activities, and a DVD and CD’s are provided for multi-sensory understanding of material.

- B. Cornerstone addresses linguistic complexity at all proficiency levels. Supported by multiple images and graphic illustrations, course content is accessible and consistent. Writing lessons are supported with ‘Writing Check Lists,’ and ‘Spelling Tips,’ to help students become more proficient in their writing skills. Language frames are used to allow students to practice and apply new content in complex sentences. On most right-hand pages of the TE, a sidebar, ‘Differentiated Instruction,’ provides creative strategies for customizing lessons to meet a variety of student needs. Potential problem areas of language development are addressed in ‘Accelerate Language Development,’ and ‘Linguistic Note,’ sidebars, which provide remediation strategies. Linguistic Complexity is noted in the TE by the icon, “CRI” to indicate a teaching strategy which is culturally and linguistically responsive to students’ background and cultural experiences (See level A, TE pp. T33, T55, T59.)
- C. Linguistic complexity is systematically addressed in all lessons, readings, and units in the Cornerstone materials. See Cornerstone A, Unit 1 for representative examples of linguistic complexity:
- ‘Quick Write’ p. 3: Visual literacy and theme related writing.
 - ‘What about you?’ p. 7: Oral and written personal response questions.
 - ‘Make connections’ p. 9: Writing fluency exercises using key words.
 - ‘Think it over’ p. 13: Flexible, grouping, comprehension questions.
 - ‘Grammar and Writing’ pp. 18-19: ‘Nouns and Write a Description.’
 - ‘Unit 1 Wrap Up’ pp. 52-53: Multi-level assessment and ‘Self-Evaluation Questions.’
 - ‘Accelerate Language Development’ and ‘Linguistic Notes’ TE pp. T45, T47: Built in remediation.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

IB. Vocabulary Usage (specificity of words, from general to specific to technical)

YES NO

- A. Is vocabulary usage represented as words, phrases, and expressions in context?
- B. Is vocabulary usage addressed in the materials for all of the targeted levels of proficiency?
- C. Are general, specific, and technical language usage systematically presented throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Vocabulary usage is presented as words, phrases, and expressions in context with visual support. At the beginning of each unit, vocabulary related to the theme is visually presented and practiced in context. Students are provided with graphic prompts in the form of language frames, as a means of applying vocabulary by using expressions and sentences, either with a partner and in whole class discussion, or through writing exercises. Both sight (high frequency) and story words are presented in simple sentences. Vocabulary is then modeled using multiple strategies, such as ‘Your Turn,’ practice exercises. ‘Words in Context’ teaches content related key words linked with real world examples. The same key words are used again in the next reading to build vocabulary through practice. ‘Make Connections,’ concludes these pre-reading vocabulary lessons with a writing activity. Students are asked to use key words in a personal response related to the subject matter. Academic words are explicitly taught with multiple opportunities available for practice. These are the words that travel across the content areas (ex. theorize, create, process,) and are critical for student understanding of content area readings. Words and phrases are highlighted and defined throughout the readings. Teacher instruction is included to pre-teach highlighted words and phrases in context. The Practice Book provides further support for all vocabulary lessons.

B. Vocabulary usage is addressed at all targeted levels of proficiency. Vocabulary is supported with colorful illustrations and photos. ‘Visual Literacy,’ lessons expand vocabulary instruction to other academic subject areas using real world connections. Four proficiency levels of differentiated instruction for each vocabulary lesson are noted in the TE. Additional support included in the Cornerstone program includes audio recordings, picture cards, CD-ROM and Practice Book activities.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

- C. General, content specific, academic and technical language are systematically presented throughout the materials. To view vocabulary presented in levels 1-C, see the 'Scope and Sequence,' located in the TE on pages 16-19.

Representative examples of vocabulary instruction: Level A, Unit 1:

- 'What Do You Know About Communities?' pp. 4-5: Unit terms introduced using language frames to help structure communication.
- 'Vocabulary' pp. 8-9: Words in Context and Academic Words taught in context with expressive use.
- 'A Closer Look at...' pp. 42-43: This lesson is found in each unit. It builds additional background knowledge and vocabulary, as well as including extension activities.
- 'Vocabulary Definitions' TE p. T51: Specific and technical vocabulary related to reading is pre-taught.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

IC. Language Control/Conventions (comprehensibility of language)

YES NO

- A. Are opportunities to demonstrate language control presented in the materials?
- B. Do opportunities to demonstrate language control correspond to all targeted levels of language proficiency?
- C. Are opportunities to demonstrate language control systematically presented in the materials in multiple chapters, lessons, or units?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

- A. Opportunities to demonstrate language control are varied and frequent in the Cornerstone series. Skills are introduced, taught, practiced and applied using a variety of instructional strategies, which encourage language development, such as: partner and whole class discussions, social conversation, and collaborative assignments. Fluency, phonics, grammar and semantic choice are practiced in each unit, to develop language control. At higher levels, each reading is followed by a fluency lesson. Students choose from 3 leveled reading excerpts to practice pacing, intonation, and expression. Phonics is taught at all levels. The TE integrates phonics throughout the lessons and clearly identified phonics lessons appear in the SE. Grammar is connected directly to writing, and follows each reading lesson with the section, ‘Grammar and Writing,’ which supports retention of material and accelerates language control. Additional activities are included in the Practice Book, Assessment Book, and on the CD ROM.
- B. Opportunities to demonstrate language are appropriate to targeted language proficiency levels. Differentiated instruction for language control activities is included in the TE. As stated above in A, leveled fluency practice and assessments are found after each reading for higher levels. Opportunities to practice reading fluency and language development activities are abundant at all levels. These include teacher modeling, choral and partner reading, and direct reading by the teacher.
- C. Opportunities to demonstrate language control are carefully structured in each lesson and unit. See the ‘Scope and Sequence,’ on pages 16-19 to view ‘Listening/Speaking,’ ‘Grammar,’ ‘Phonics,’ and ‘Writing,’ activities.

Level A, Unit 2:

- 'What about you?' p. 59: Discussion connected to theme.
- 'Think it Over' pp. 67, 79: After reading questions there are opportunities for group or individual response.
- 'Fluency' p. 31, 45, 69: Multi-level fluency practice.
- 'Comprehension' pp. 46-47, 70-71: Retell, Practice, and Extension exercises practice oral and written skills.
- 'Grammar and Writing' pp. 72-73: 'The Verb Have,' and 'Write a Problem and Solution Story.'

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

II. ENGLISH LANGUAGE PROFICIENCY (ELP) STANDARDS

IIA. Presence of WIDA English Language Proficiency Standards

YES NO

- A. Are social and instructional language and one or more of the remaining WIDA Standards (the language of Language Arts, of Mathematics, of Science, and of Social Studies) present in the materials?
- B. Do the materials systematically integrate Social and Instructional Language and the language of the targeted content area(s)?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. All WIDA English Language Proficiency Standards (Social and Instructional language, the language of Language Arts, Mathematics, Science, and Social Studies) are present in the Cornerstone series. Each level has a balance of literary and subject based texts and includes a variety of genres. Genre and subject area are clearly marked in the Table of Contents, Scope and Sequence, and again within the text. Academic vocabulary, such as context, method, or identify are taught at the beginning of each reading and appear across all content areas. In the TE, lessons connect content to subject areas and are noted by a ‘Link to...’ lesson, wherever appropriate (See level A pp. T58, T78, T86.) These lesson extensions develop student understanding of subject matter, and build learning skills, activities include using timelines, researching science terms, and dramatically acting out literature (level A TE pp. T78, T83, T86.) Social and instructional language is used in the practice and application of skills such as identifying classroom routines, reading strategies, information gathering, and personal information or experience responses. In addition, personal communication is addressed in writing activities like ‘Formal Letter’ p. 273 or ‘Write Directions’ p. 287 in level A. The Practice Book, Assessment book, and CD ROM provide further practice in the five ELP standards. See the ‘Scope and Sequence,’ on pages 16-19 to view content related to the ELP standards.

B. Cornerstone systematically integrates Social and Instructional Language with the Languages of Math, Language Arts, Social Studies, and Science. Pre-reading and post-reading lessons are structured in the same manner for all content, whether literary or subject-area based. These lessons include practice exercises using social and instructional language related to writing, reading, speaking, and listening.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

The following examples found in Cornerstone A, Unit 3 shows how a science reading is integrated with Social Instructional Language:

- 'Unit 3 Planner' TE pp. T106A-T107A: View the 'Reading 1' column to see all lessons cross referenced with the science area reading.
- 'Your Stories about Animals at Home' pp. 110-111: Short readings to connect theme and create background knowledge through reading, discussion, and writing.
- 'Vocabulary' pp. 112-113: Words in context and academic words taught prior to reading.
- 'Reading Strategy' pp. 114, 117, 120: An exercise which leads learners through the reading; students also summarize text in the 'Comprehension,' section.
- 'Think it over' p. 117: Asks students to compare and contrast, and then make conclusions.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

IIB. Representation of Language Domains

YES NO

- A. Are the language domains (listening, speaking, reading, and writing) targeted in the materials?
- B. Are the targeted language domains presented within the context of language proficiency levels?
- C. Are the targeted language domains systematically integrated throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Each unit in the Cornerstone series is built around the language domains of listening, speaking, reading, and writing to accelerate language development. In higher levels, units typically include three readings, a literary or informational text, a ‘Picture Walk’ and a third ‘Bonus Reading.’ Additional, level appropriate books related to the theme are listed at the end of each unit in ‘Further Reading.’ Each reading is preceded by the exploration of background knowledge and vocabulary using reading, listening/ speaking and writing activities. Strategies for comprehension include questions for discussion and writing exercises. Listening and speaking are taught as interdependent processes with partners, in small group cooperative activities and through discussion. After completing the reading for the higher levels, lessons follow in ‘Phonics and Fluency,’ ‘Comprehension,’ and ‘Grammar and Writing.’ Writing lessons build in complexity through the units and vary in genre and structure (examples in level A include: ‘Write a Paragraph,’ p. 49, ‘Write a Family Story,’ p. 199, or ‘Write a Report,’ p. 223.) All lessons are supported in the Practice Book with written skills practice. See the ‘Unit Planners,’ found before each unit in the TE (level A, Unit 2 example pp. T54-T55) to view language domains connected to the unit readings.

B. The Cornerstone series presents many opportunities for students to practice and apply skills appropriate to their language proficiency level through listening, speaking, reading, and writing lessons and activities. Higher levels are designed for flexible use; a placement test guarantees that students are working at their correct level. ‘Unit Wrap Up,’ provides differentiated assessment opportunities of the unit objectives using written, oral or visual projects. This allows teachers to match students with a suitable assessment to their proficiency level. Levels of differentiated instruction are noted in the TE; this provides strategies for customizing instruction for a variety learner needs in all subject area domains.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

C. As referenced above in A, Cornerstone integrates all language domains into each lesson and unit in the series. The following examples are typical of the types of activities found throughout the series:

See Cornerstone A, Unit 2:

- ‘Unit 2: Meeting Challenges’ pp. 54-55: Introduces reading, listening and speaking, and writing lessons in the unit plus an additional ‘Quick Write’ exercise.
- ‘What about you?’ p. 59: Comprehension and connection oral response activity.
- ‘Make Connections’ p. 61: Discussion and written response.
- “Birds in the Garden” pp. 62-67: Short Story.
- ‘Phonics and Fluency’ pp. 68-69: Read aloud and partner practice.
- ‘Grammar and Writing’ pp. 72-73: ‘The Verb Have,’ and ‘Write a Problem and Solution Story.’
- ‘Unit 2 Wrap Up’ p. 104: Written, oral, or visual unit assessment ‘Further Reading’ TE p. T151: Optional reading extension assignment which lists level appropriate books related to theme.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

III. LEVELS OF LANGUAGE PROFICIENCY

IIIA. Differentiation of Language (for ELP levels)

YES NO

- A. Do the materials differentiate between the language proficiency levels?
- B. Is differentiation of language proficiency developmentally and linguistically appropriate for the designated language levels?
- C. Is differentiation of language systematically addressed throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. The Cornerstone program is a six level, grade K-5 program. Content within each level is appropriate for the targeted proficiency and grade levels. Scaffolding exercises and lesson extensions are included throughout the text to ensure access to all learners working above or below level. A brief placement test locates students at the correct program level. Standards-based assessments are available for every reading selection, unit, midterm, and at the conclusion of each level. These assessments measure progress throughout the year and ensure students are mastering standards and learning transferable skills. An exit exam determines whether a student is either ready for mainstream coursework or should continue to the next level of the program.

B. Differentiation of language proficiency is linguistically and developmentally appropriate at each Cornerstone level. A variety of linguistic supports are incorporated into each level including teacher modeling, repeated reading, discussions, and student presentations. Fluency lessons in higher levels practice pacing, intonation, and expression. These lessons give students a choice of 3 leveled reading passages: 1-easy, 2-intermediate, 3-more difficult. Differentiated assessment for the unit objectives is found at the end of each unit, and is built into the TE, providing strategies for customizing instruction for a variety of learner needs. Further support in the Teacher’s Resource book includes summaries of all readings in six common first languages. An ‘Introduction to Linguistics,’ located on pages 26-41 in the TE supplies background linguistic knowledge and comparisons of English sounds to other languages.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

- C. Cornerstone is a carefully structured program that provides a complete instructional plan across various proficiency levels. As stated in A and B above, differentiation is systematically addressed in skills taught in the lessons, across the units, and specifically noted in sidebars included in the TE.

See Cornerstone A, Unit 3 for examples typical for the series:

- ‘Differentiated Language’ TE pp. T107, T109, T113, T115, T117: Strategies and techniques for leveled instruction.
- ‘Linguistic Note’ pp. T119, T133 and ‘Accelerate Language Development’ pp. T121, T133: Highlighting linguistic and cultural nuances in content appropriate language.
- ‘Extension’ pp. 121, 133, 145: Multi-sensory extension activities located included after every reading.
- ‘Fluency’ pp. 119, 131, 143: Leveled oral reading options.
- ‘Unit 3 Wrap Up’ p. 150: End of unit assessment provides an end of unit evaluation which allows teachers to evaluate student grade level progress.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

IIIB. Scaffolding Language Development (from ELP level to ELP level)

YES NO

- A. Do the materials provide scaffolding supports for students to advance within a proficiency level?
- B. Do the materials provide scaffolding supports for students to progress from one proficiency level to the next?
- C. Are scaffolding supports presented systematically throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. The Cornerstone series offers a guided transition by providing scaffolding supports for students to advance within each proficiency level. Texts have built in scaffolding, and the TE includes more scaffolding activities which can be used as needed. Thematic units and ‘The Big Question,’ introduce and connect the student to reading in the content areas. Each reading begins with an exploration of content background and students’ prior knowledge. Other scaffolding support found in lessons and throughout the units include examples of teacher modeling, visual and graphic support, cooperative learning, hands on learning, reading strategies, and comprehension checks. In higher levels, writing activities contain a ‘Writing Checklist,’ and ‘Spelling Tips,’ for immediate writing guidance, as well as a model for students to use as an example of language control. Academic vocabulary is vital to the progression of the EL learner; thus, academic vocabulary is introduced and practiced with every reading. The ‘Skills Handbook,’ found at the end of levels, features easy to use student supports, which are critical to academic skills like grammar, writing, and study skills. In addition, the Teacher’s Resource Book contains summaries for all readings in six languages to help simplify language and create a bridge to understanding.

B. Skills built throughout the readings and units assist students as they advance from one proficiency level to the next with scaffolded assistance described above in part A. The TE provides step-by step lesson plans, which are supported with instructional cues, to help teachers introduce concepts, teach, and assess effectively. Assessment resources monitor student progress and evaluate student progression through each level. See the ‘Scope and Sequence,’ located on pages 16-19 of the TE for an overview of skill advancement through each level.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

- C. As stated above in A and B, Cornerstone systematically builds upon prior knowledge and explicitly scaffolds learning, as a means to progressing students from one level to the next. Examples from Cornerstone A, Unit 3 are representative of the types of scaffolding found throughout the series:
- ‘Words to Know’ pp. 108-109: Introduction to unit terms with the use of graphic supports.
 - ‘Your Stories about Animals at Home’ pp. 110-11: Uses short readings to connect students to theme and readings in the unit.
 - ‘More About the Big Question’ TE pp. T114, T126, T18: TE features easy to use step-by- step instruction. The Big Question introduces readings, and a graphic organizer is used to scaffold understanding of the reading strategy.
 - ‘Reading Strategy’ pp. 114, 126, 138: Guides reading.
 - ‘Fluency’ pp. 119, 131, 143: Partner work and leveled oral reading lessons.
 - ‘Writing’ pp. 123, 135, 147: Includes student model of the writing activity.
 - ‘Spelling Tip’ and ‘Writing Checklist’ pp. 123, 135, 147: A scaffolding activity found in each writing activity.
 - ‘Think it Over’ pp. 117, 127: Comprehension questions answered in class discussion, partner activity, or individual writing assignment.
 - ‘Unit 3 Wrap Up’ p. 150: Written, oral, or visual/active end of unit assessment.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

IV. STRANDS OF MODEL PERFORMANCE INDICATORS

IVA. Language Functions

YES NO Context

- A. Do the materials include a range of language functions?
- B. Do the language functions attach to a context (i.e., are they incorporated into a communicative goal or activity)?
- C. Are language functions presented comprehensively to support the progression of language development?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. A range of language functions are used in the instructional language of Cornerstone, both within lessons and in practice activities. After students are taught a new skill, they practice and apply the skill using a variety of language functions. For example, as students respond to comprehension questions, or use reading strategies, they compare, identify, answer, find, describe, and retell. Academic words taught in higher levels include language functions such as: theorize respond, or conclude, to expand students’ knowledge of such universal terms found in multiple content areas. See Level A ‘Scope and Sequence,’ located on pages 16-19 of the TE to view the multiple uses of language functions in the curriculum.

B. The language functions are attached to the practice activities, and all activities are connected to expanding student understanding of lessons, readings, and thematic units. In addition, the TE uses language functions in the step-by-step instructions of each lesson (ex. ‘Step 2: Practice’ or ‘Step 3: Expand’.)

C. The progression of language development is supported by the comprehensive use of language functions throughout Cornerstone. As student skills progress in each unit, language functions are used to support the communicative needs of the developing learner. Examples found in level A, Unit 4 show the comprehensive use of language functions in the curriculum:

- ‘Quick Write’ p. 153: Describe and create. ‘Academic Vocabulary’ pp. 175, 189: Conclude, theory, respond.
- ‘Reading Strategy’ pp. 165, 176: Students identify important concepts within the text to build understanding.
- ‘Use a T-Chart’ p. 171: List, solve, present.
- ‘Phonics and Fluency: Practice’ p. 182: Sort words.
- ‘Step 2: Practice’ TE p. T185: Language function in the step-by-step instructions of each lesson.
- ‘Unit 4 Wrap Up’ p. 202: Each end of unit assessment uses language functions in each category.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

- YES NO **Higher Order Thinking**
- D. Are opportunities to engage in higher order thinking present for students of various levels of English language proficiency?
- E. Are opportunities for engaging in higher order thinking systematically addressed in the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Opportunities for students to engage in higher order thinking are present at all ELP levels in each unit and across all levels of the Cornerstone series. ‘The Big Question,’ begins each unit, and ties together all readings. This creates an opportunity for students to discuss content relative to the universal and reflective questions. Every unit includes ‘Think it Over,’ questions that involve complex judgment skills and require students to analyze the reading and come to conclusions. Extension lessons are included throughout the TE and in comprehension sections of the SE. These lessons promote creative thinking while applying previously taught skills. Student research activities are used to evaluate the theme and cultivate connections between subject areas. In higher levels, extension lessons often include a ‘Share with Partner,’ exercise where students react to a partners work by asking questions. ‘Self-Evaluation Questions,’ found at the end of the unit encourage students to reflect on what they have learned in the subject unit as well as recognize what they have accomplished.

B. Opportunities to engage in higher order thinking are systematically presented in Cornerstone. See the following examples found in Level A, Unit 4:

- ‘The Big Question’ pp. 153, 160, 176, 202: Thematic questions guide readers through unit and require students to speculate and evaluate content.
- ‘Self-Evaluation Questions’ p. 203: Reflection on the unit. Students reflect on what they have learned in the unit, as well as recognize they have accomplished.
- ‘Extension’ pp. 171, 185, 197: Projects which use creative thinking and require student presentations and feedback.
- ‘Think it Over’ pp. 165, 181, 193: Comprehension questions that promote an analysis of the reading.
- ‘Technology’ TE p. T157: Research and share activity.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

IVB. Content Stem

YES NO **Coverage and Specificity of Example Content Topics**

- A. Do examples cover a wide range of topics typically found in state and local academic content standards?
- B. Are example topics accessible to English language learners of the targeted level(s) of English language proficiency?
- C. Are example topics systematically presented throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Cornerstone is a curriculum aligned to state and national academic content standards, covers a wide range of subject matter topics, and is grade level appropriate. In the TE, TESOL standards are referenced on even pages of each two-page spread for every assignment. The curriculum emphasizes language arts, as well as including significant content area readings and lessons in social studies, math, and science. Examples in level A include “Earth and Beyond,” p. 212 or “Scientists and Crows,” p. 176. Each unit contains lessons aligned to the standards in vocabulary, grammar, phonics, word analysis, fluency, and writing. The ‘Learning Checklist,’ concludes each unit and lists all skills taught in unit.
WIDA ELP standards and example topics are abundantly incorporated in lessons such as, level A p. 242, “The Phases of the Moon” (WIDA Language of Science, ELP Standard 5, Grades 3-5, Example Topic: Nature.) In addition, the student assessment book provides questions which are aligned to standards and introduce students to question types found on state exams. See www.pearsonlongman.com for a list of correlations to state and national standards.

B. All topics covered in the Cornerstone series are accessible to English language learners of the targeted levels of English language proficiency. Each lesson has built-in differentiated instruction and is further supported by a wide variety of teaching resources and technology for comprehensive reinforcement of instruction.

C. Standard aligned content and topics are systematically presented throughout the Cornerstone series. See the Table of Contents, in the introductory pages of each level to view unit structure and the variety of subject area content. See examples found in Level A, Unit 5:

- 'TESOL Standards' TE pp. T204, T206, T208, T210: TESOL standards listed on even pages throughout TE, these correlate to lessons found on representative pages.
- 'Learning Checklist' p. 255: End of unit list of skills and standards met.
- 'Reading 1: Informational Text/Science', 'Reading 2: Informational Text/Biography', 'Reading 3: Literature/Myths', and 'Bonus Reading: Informational Text/Science' pp. 212, 226, 242, 252: Readings cover a variety of content areas and genres.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

- | | | |
|-------------------------------------|--------------------------|--|
| YES | NO | Accessibility to Grade Level Content |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | D. Is linguistically and developmentally appropriate grade level content present in the materials? |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | E. Is grade level content accessible for the targeted levels of language proficiency? |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | F. Is the grade level content systematically presented throughout the materials? |

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Linguistically and developmentally appropriate content are present in the materials, which address state standards for the targeted grade levels and include WIDA example topics and standards. The first three levels, K, 1, and 2, are grade specific. Levels A–C are a flexible program with grade level content suitable for grades 3-5. Unit themes and ‘The Big Question,’ guide students through lessons anchored by subject area content. Curriculum is designed around high-interest readings, which are supported by grade appropriate images and graphics. Cornerstone curriculum provides rigorous instruction in vocabulary, grammar, phonics, fluency, and writing with the goal of improving academic performance and developing transferable skills. Within the Cornerstone program a wide variety of linguistic supports are incorporated, and include teacher modeling, listening to CD’s, repeated readings, discussions, presentations, and dramatic reading. See the ‘Scope and Sequence,’ located on pages 16-19 of the TE to view grade level content at each level.

B. Cornerstone uses a curriculum design approach called ‘Understanding by Design’ and differentiated instruction is built into each lesson. These multiple approaches make content accessible for each language proficiency level. Students advance through levels of Cornerstone curriculum and eventually progress to mastering mainstream coursework.

C. As stated above in A through D, Cornerstone content was selected based on grade level appropriate state and national standards. This content is systematically presented throughout the material. See ‘Scope and Sequence,’ in the introductory pages of all levels to corroborate this well-articulated structuring of the program. See Level A, Unit 5 for representative examples of Cornerstone content:

- Reading 1: “Earth and Beyond” p. 212: Science/Informational Text.
- Reading 2: “Franklin’s Dream” p. 226: Biography/Informational Text.
- Reading 3: “One Moon, Many Myths” p. 242: Myths/Literature.
- Bonus Reading: “The Phases of the Moon” p. 252: Science/Informational Text.
- Writing: ‘Write a Report’ p. 223, ‘Write an Autobiography’ p. 239, ‘Write a Myth’ p. 251.
- Grammar: ‘Present Tense Verbs’ p. 222, ‘Past Tense Verbs’ p. 238, ‘Future Tense Verbs’ p. 250.
- ‘Learning Checklist’ p. 255: Lists skills taught in Unit 5.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

IVC. INSTRUCTIONAL SUPPORTS

YES NO **Sensory Support**

- A. Are sensory supports, which may include visual supports, present and varied in the materials?
- B. Are sensory supports relevant to concept attainment and presented in a manner that reinforces communicative goals for the targeted levels of proficiency?
- C. Are sensory supports systematically presented throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Sensory supports are present and varied throughout the Cornerstone program. All units are strongly supported with a range of dynamic visual supports, including computer graphics, artist’s illustrations, and photographs to enhance student understanding of content. Visual literacy is explicitly taught in the unit opener, allowing students to investigate images related to the theme, and discussion prompts are noted throughout the TE (level A pp. 256-258, 275, 279.) Included in each unit is a photo essay labeled ‘Picture Walk,’ which builds visual literacy and background knowledge. Content area lessons include supporting graphics, like diagrams, which illustrate cause and effect (Level A pp. 112, 115-117, photos of artifacts pp. 191-193, and models pp. 211, 216 .) Multi-sensory lessons activities specific to the targeted proficiency level are also included. For example, students sing songs related to vocabulary, teachers use puppets in instruction, students play physical learning games, or draw pictures. ‘Unit Wrap-Up,’ which includes assessments is found at the end of each unit, and gives students and teachers choices of oral, written, or visual/active activities, as well as acknowledging a diversity in learning styles. A video DVD available with this curriculum features background information on the unit themes, and audio CD’s are included to model oral reading fluency. A list of available teaching resources is included with every lesson in the TE.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

- B. Sensory supports relevant to concept attainment are presented in a manner that reinforces communication goals for each targeted level. Vocabulary and practice activities are supported throughout the levels with illustrations and photographs, furthering the understanding of instruction and teaching background knowledge of subject. As stated above in A, the 'Unit Wrap Up,' is an oral, written, or visual/active assessments enabling teachers to match students with an appropriate activity based on proficiency level. Extension activities also offer hands-on projects and include creating collages, writing captions, and drawing.
- C. Sensory supports are systematically presented throughout all units and levels in the Cornerstone series. See examples found in level A, Unit 6:
- 'Unit 6: Arts Festivals' pp. 256-257: Unit opener visually introduces theme, Big Question, readings and unit objectives.
 - 'Visual Literacy' TE p. T256: Students study the photographs and make inferences.
 - 'What Do You Know about Arts Festivals?' pp. 258-259 and 'Vocabulary' pp. 262- 263: Vocabulary instruction is supported visually.
 - "How to Make Puppets" p. 278: Informational text supported by appropriate visuals.
 - 'Picture Walk' pp. 280-281: Photo essay develops background info and visual literacy.
 - 'Extension' p. 297: Students create and perform a dance.
 - 'Unit 6 Wrap Up' p. 302: Written, oral, visual/active unit assessments.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

YES NO **Graphic Support**

- D. Are graphic supports present and varied in the materials?
- E. Are graphic supports relevant to concept attainment and presented in a manner that reinforces communicative goals for the targeted proficiency levels?
- F. Are graphic supports systematically presented throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. All lessons, at every level of Cornerstone are comprehensively supported with a variety of graphic material appropriate to the proficiency level. At the very beginning of each unit, graphics introduce a theme and bridge student comprehension with activities that build background knowledge. Visual supports are used in vocabulary, phonics, reading, and writing lessons. Images like sequence illustrations are used in informational texts to bridge understanding of content (ex. visual science sequence of a tadpole developing into a frog.) In addition, graphic organizers are used in practice activities to organize information for writing lessons. In each reading, graphic organizers like main idea or cause and effect charts are used to teach reading strategy. ‘Comprehension,’ lessons found after each reading, feature a graphic organizer specific to the reading strategy. The same graphic organizer is then typically used in the accompanying pre-writing activity. Practice Books that accompanies materials use similar vocabulary, phonics, and comprehension graphic supports as the textbook.

B. Graphic supports used in Cornerstone are always relevant to concept attainment and presented in a manner, which reinforce communicative goals for the proficiency level. Specific graphic supports such as language starters are used to create sentences and visual vocabulary scaffolds language development. Throughout the TE, ‘Visual Literacy,’ expands the meaning of graphics to promote further understanding content. ‘Differentiated Instruction,’ often uses content graphics and graphic organizers to scaffold and extend lessons.

C. As stated in A and B above, graphics supports are systematically presented throughout the materials. Examples found in Cornerstone level A, Unit 6 are characteristic of supports found throughout all levels:

- ‘Words to Know’ pp. 258-259: Uses visual language frames to scaffold sentence creation.
- ‘Introduce’ TE: pp. T264, T276, T290: 5W Chart, Sequence Chart, Venn Diagrams.
- ‘Comprehension’ pp. 271, 285, 297: T-Chart, Sequence Chart, 5 W Charts.
- ‘Author’s Purpose’ p. 270: Uses cause and effect chart in instruction.
- ‘Fluency’ pp. 269, 283, 295: Instruction supported with sequence boxes.
- “How to Make Puppets” p. 278: Graphics supports are used in Informational text.
- ‘Write a Newspaper Article’ p. 299: Pre-writing exercise using K W Chart.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

YES NO **Interactive Support**

- G. Are interactive supports present and varied in the materials?
- H. Are interactive supports present and relevant to concept attainment for the targeted proficiency levels?
- I. Are interactive supports varied and systematically presented in the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Interactive support is varied and relevant to concept attainment in the Cornerstone program. Opportunities to discuss and confirm both background and prior knowledge begin each unit and reading. Partner, small and whole group discussions, and practice activities are interactive strategies which can be used in every unit to facilitate comprehension of content and promote meaningful communication. Extension projects and unit assessments often use cooperative group structures. The internet is used to research specific topics, and information is shared and discussed with a partner or in groups. Native language support is noted throughout the TE in lessons like ‘Linguistic Note,’ ‘Sharing Language and Culture,’ and with the ‘CRI’ icon. These lessons are culturally and linguistically responsive and incorporate the diversity of student’s background and cultures into the curriculum. The Teacher’s Resource book contains summaries of all readings in six common first languages. In addition, the CD-ROM includes additional interactive activities and the www.pearsonlongman.com website contains a student area with games and practice.

B. All interactive supports are relevant to concept attainment for the targeted proficiency level. Interactive supports described above in A and referenced in C are explicitly used to scaffold lessons so that learners of all levels gain access to meaning in multiple modalities.

C. Interactive supports are varied and systematically presented throughout the Cornerstone material. Examples found in Level A, Unit 6 are representative of lessons found in all levels:

1. ‘What about you?’ p. 261: Small groups share personal stories that connect to theme.
2. ‘Think it Over’ p. 267: Comprehension questions answered with a partner, in whole class discussion or individual writing.
3. ‘Phonics and Fluency’ pp. 268-269: Practice exercises include cooperative activities.
4. ‘Sharing Language and Culture’ TE pp. T261, T285: Students have an opportunity to exchange cultural information in extension lessons included throughout the TE.
5. ‘CRI’ pp. T259, T269, T275, T277, T281: Icon signals interactive lessons that are culturally responsive.
6. ‘Unit 6 Wrap Up’ p. 302: Assessments include interactive supports.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

Appendix

I. Performance Definitions – the criteria (linguistic complexity, vocabulary usage, and language control) that shape each of the six levels of English language proficiency that frame the English language proficiency standards.

IA. Linguistic Complexity – the amount and quality of speech or writing for a given situation

IB. Vocabulary Usage – the specificity of words (from general to technical) or phrases for a given context

IC. Language Control/Conventions – the comprehensibility and understandability of the communication for a given context

II. English Language Proficiency Standards – the language expectations of English language learners at the end of their English language acquisition journey across the language domains, the four main subdivisions of language.

IIA. Five WIDA ELP Standards:

1. English language learners **communicate** for **Social** and **Instructional** purposes within the school setting.
2. English language learners **communicate** information, ideas, and concepts necessary for academic success in the content area of **Language Arts**.
3. English language learners **communicate** information, ideas, and concepts necessary for academic success in the content area of **Mathematics**.
4. English language learners **communicate** information, ideas, and concepts necessary for academic success in the content area of **Science**.
5. English language learners **communicate** information, ideas, and concepts necessary for academic success in the content area of **Social Studies**.

IIB. Domains:

- t **Listening** – process, understand, interpret, and evaluate spoken language in a variety of situations
- t **Speaking** – engage in oral communication in a variety of situations for a variety of audiences
- t **Reading** – process, understand, interpret, and evaluate written language, symbols and text with understanding and fluency
- t **Writing** – engage in written communication in a variety of situations for a variety of audiences

III. Levels of English Language Proficiency - The five language proficiency levels (1-Entering, 2-Beginning, 3-Developing, 4-Expanding, 5- Bridging) outline the progression of language development in the acquisition of English. The organization of the standards into strands of Model Performance Indicators (MPIs) illustrates the continuum of language development.

IIIA. Differentiation – providing instruction in a variety of ways to meet the educational needs of students at different proficiency levels

IIIB. Scaffolding – building on already acquired skills and knowledge from level to level of language proficiency based on increased linguistic complexity, vocabulary usage, and language control through the use of supports.

WIDA Protocol for Review of Instructional Materials for ELs WIDA
PRIME Correlation

IV. Strands of Model Performance Indicators – examples that describe a specific level of English language proficiency for a language domain. Each Model Performance Indicator has three elements: Language Function, Content Stem, and Support

IVA. Language Functions – the first of the three elements in model performance indicators indicates how ELs are to process and use language to demonstrate their English language proficiency.

- Context – the extent to which language functions are presented comprehensively, socially and academically in materials
- Higher Order Thinking – cognitive processing that involves learning complex skills such as critical thinking and problem solving.

IVB. Content Stem – the second element relates the context or backdrop for language interaction within the classroom. The language focus for the content may be social, instructional or academic depending on the standard.

IVC. Instructional Support – instructional strategies or tools used to assist students in accessing content necessary for classroom understanding or communication and to help construct meaning from oral or written language. Three categories of instructional supports include sensory, graphic and interactive supports.

- Sensory support – A type of scaffold that facilitates students’ deeper understanding of language or access to meaning through the visual or other senses.
- Graphic support – Type of scaffold to help students demonstrate their understanding of ideas and concepts without having to depend on or produce complex and sustained discourse.
- Interactive support – A type of scaffold to help students communicate and facilitate their access to content, such as working in pairs or groups to confirm prior knowledge, using their native language to clarify, or incorporating technology into classroom activities.

Protocol for Review of
Instructional Materials for ELs

WIDA PRIME Correlation

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

Introduction

The Protocol for Review of Instructional Materials for ELs (PRIME) has been developed by World-Class Instructional Design and Assessment (WIDA) to assist educators and publishers in examining the representation of key elements of the WIDA English language proficiency standards in their materials.

The intent of this review is for users to identify the ways in which elements of the *WIDA English Language Proficiency Standards, 2007 Edition, PreKindergarten through Grade 12* are represented in instructional materials. These materials vary from core or supplemental texts to DVDs to software programs; however, it is assumed that they all seek to provide teachers with standards-based references to use with English language learners in diverse settings across the United States.

The **Protocol for Review of Instructional Materials for ELs (PRIME)** is **not** an evaluative tool aimed to judge the effectiveness of published materials using the WIDA English Language Proficiency (ELP) Standards. The goal of the Protocol for Review of Instructional Materials for ELs (PRIME) is twofold:

- To assist educators in making informed decisions in selecting instructional materials for programs serving English language learners and
- To aid publishers and correlators in developing materials and communicating how their materials address key elements of the WIDA English Language Proficiency Standards

Organization

The Protocol for Review of Instructional Materials for ELs (PRIME) is organized into two parts that together are intended to provide information about instructional materials in each of 14 criteria. **Part 1** contains information about the materials that are to be reviewed. **Part 2** is the protocol used for the review of instructional materials and includes space for page number examples and responses to the questions. An Appendix at the end of the document provides definitions of the categories included in the PRIME correlation.

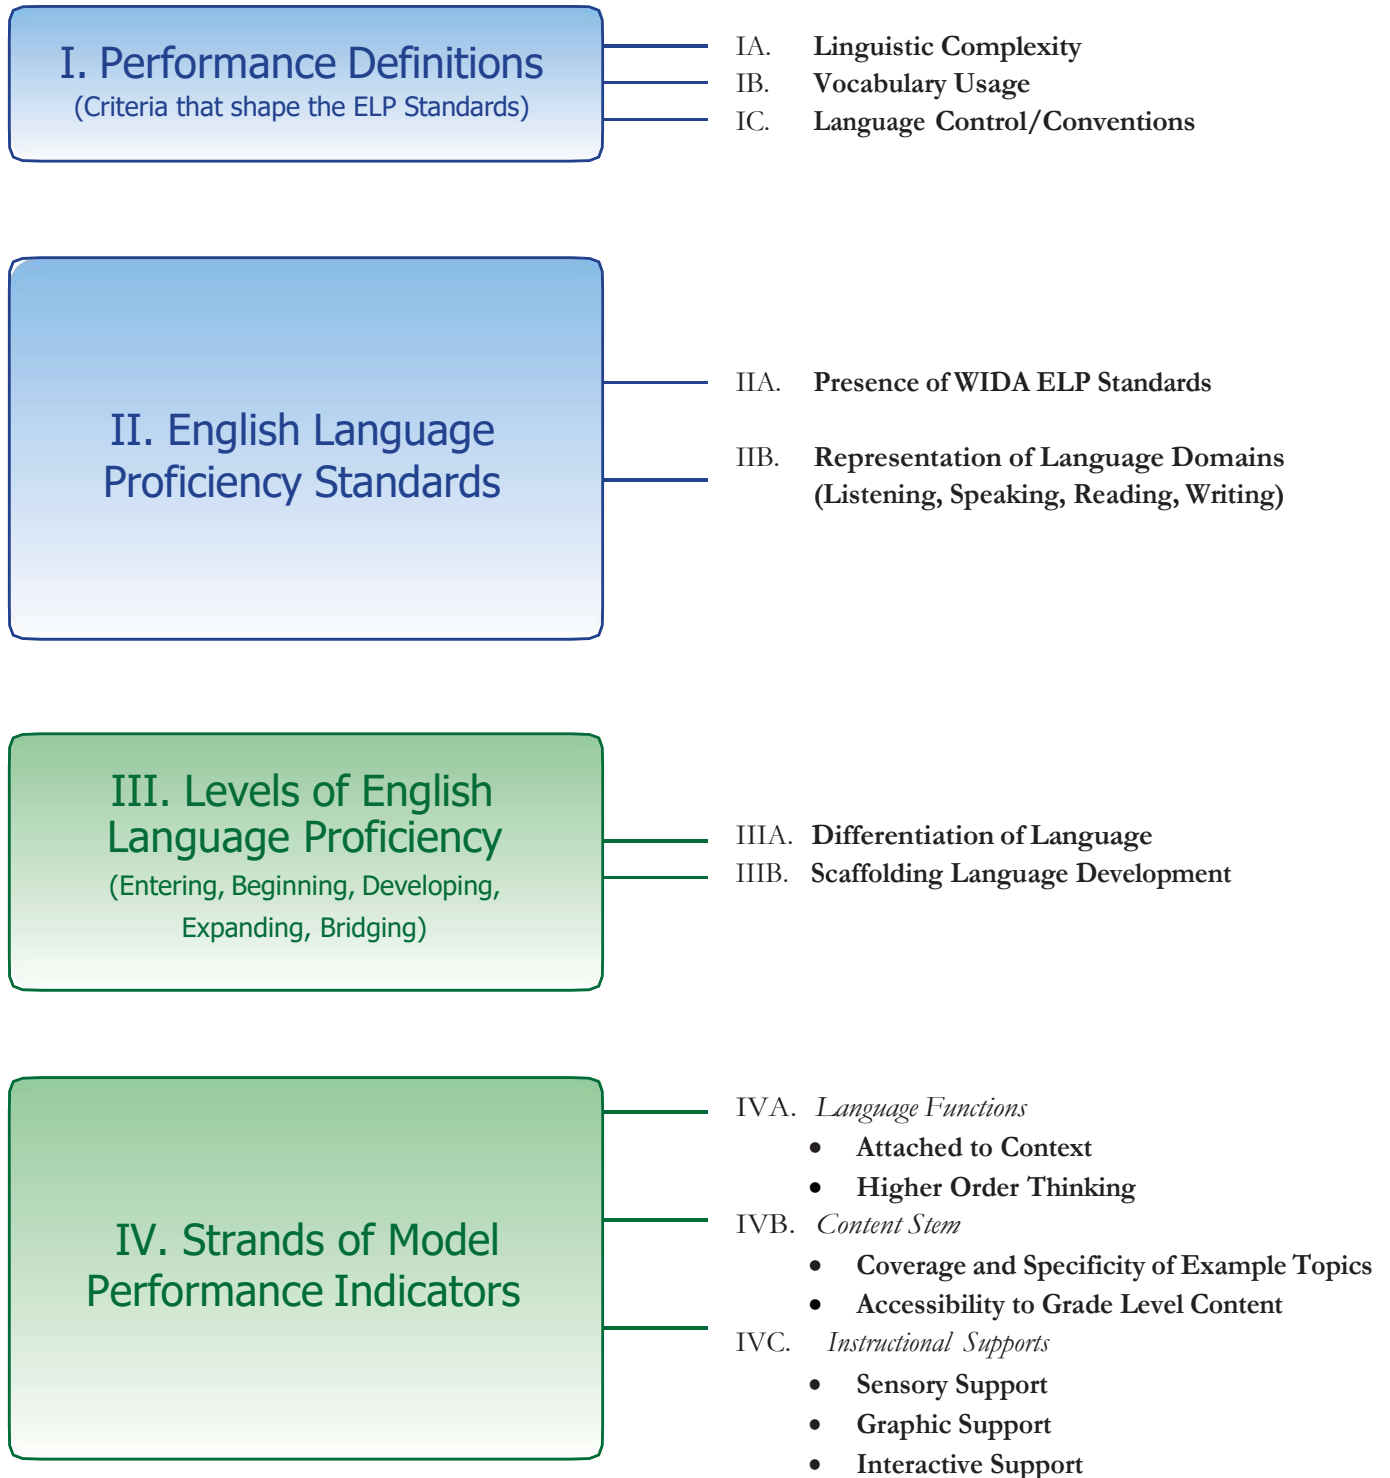

Please note that the questions contained in this form are identical to those in the completed correlations on our website.

Directions for completing the Protocol for Review of Instructional Materials for ELs (PRIME) inventory:

- STEP 1:** Complete information about materials being reviewed.
- STEP 2:** Respond to the “Yes/No” questions about the presence of the criteria in the materials.
- STEP 3:** Provide justification to support your “Yes” responses. (Note: If additional explanation for “No” answers is relevant to readers’ understanding of the materials, this may also be included.)

Organization of the WIDA English Language Proficiency Standards in Relation to the Protocol for Review of Instructional Materials for ELs

The 14 PRIME criteria are in **BOLD** below.

Part 1: Information About Materials

Publication Title(s): Pearson Longman Keystone, copyright 2020

Publisher: Pearson Longman

Materials/ Program to be Reviewed: Keystone (multilevel program for English learners); specific examples in this correlation are drawn from Keystone A

Tools of Instruction included in this review: Student Edition, Teacher's Edition, Workbooks, Assessments, Reading Guides, Technology Suite; References drawn

Intended Teacher Audiences: Classroom Teachers, Content Specialists, Language Teachers, Resource Teachers, and Paraprofessionals

Intended Student Audiences: Grades 6-12

WIDA Framework(s) considered: Formative and Summative

Language domains addressed in material: Listening, Speaking, Reading, and Writing

WIDA English Language Proficiency Standards addressed: Social and Instructional Language, The Language of Language Arts, Science, Social Studies, and Math

WIDA language proficiency levels included: Levels 1-5 (Entering, Beginning, Developing, Expanding, and Bridging)

Most Recently Published Edition or Website: Copyright 2020; www.pearsonschool.com

In the space below explain the focus or intended use of the materials.

Pearson Longman Keystone is a multilevel program specially designed to help English learners acquire English language proficiency while mastering rigorous academic standards in Grades 6-12. Keystone A, B, and C levels are for the lower secondary grades and Keystone Building Bridges, D, E, and F are used for the higher grades. A supplementary level, Keys to Learning, is appropriate for beginning language learners and teaches foundational language and literacy skills suitable for all grades, 6-12. Through explicit, intensive, and focused instruction that accelerates students' language acquisition, reading comprehension, vocabulary, and oral and written communication skills, students will quickly begin achieving greater academic success in their coursework across the curriculum.

Part 2: PRIME Correlation Tool

I. PERFORMANCE DEFINITIONS

IA. Linguistic Complexity (the amount and quality of speech or writing)

YES NO

- A. Do the instructional materials take into account linguistic complexity for language learners?
- B. Do the instructional materials address linguistic complexity for all of the targeted proficiency levels?
- C. Is linguistic complexity systematically addressed, in multiple lessons, chapters, or units, in the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Pearson Longman Keystone is an eight-level accelerated reading and language arts program developed specifically for students in Grades 6-12. The flexibility of the Keystone series allows students of all proficiency levels, from Entering through Bridging, to practice language in social situations and academic settings. Differentiated instruction (Leveled Support) for students is noted throughout the texts. Teachers are guided to accelerate language development through exercises which teach grammar, linguistics, pronunciation and spelling in a consistently recognizable manner. Each unit begins with a Big Question that is used as a guide for discussion, writing exercises, and exploration of background knowledge and themes. This approach scaffolds student learning as they progress through the unit and guides a final spoken and written literary response. All lessons have a variety of listening, speaking, reading, and writing activities that vary in complexity and cumulate with Workshops. These final activities use all the skills introduced in the unit.

B. Keystone addresses linguistic complexity for all targeted levels. Beginning course levels are heavily supported by visual vocabulary and instruction, while advanced level lessons require more sophisticated oral and written discourse. Leveled Support is built into each lesson. End of unit projects give students options for a differentiated demonstration of concepts according to learners' abilities. The Teacher's Resource Book provides reading summaries in six languages, allowing students to preview the lesson reading in their home language. Additional linguistic exercises are located in the Workbook and Assessment book.

C. Linguistic complexity is systematically addressed throughout the entire Keystone program. Every unit of the program contains similar types of lessons. See examples found in Keystone A Teacher's Edition, Unit 1, Reading 1 pp. 2-19:

- The Big Question pp. 2-4: Introduces theme and lessons in the unit using discussion and writing activities.
- Prepare to Read pp. 4-5: Builds background knowledge and teaches vocabulary through cooperative learning and a graphic organizer.
- Leveled Support pp. T4, T8, T14: Lists scaffolds for the different proficiency levels.
- Writing: Quick Write p. 3, Practice p. 5, Writing pp. 18-19, On Your Own pp. 9, 11, 13.
- Listening and Speaking: The Big Question pp. 2, 4; Discussion p. 15; Before You Go On pp. 9, 11, 13; Set a Purpose for Reading p. 8.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

IB. Vocabulary Usage (specificity of words, from general to specific to technical)

YES NO

- A. Is vocabulary usage represented as words, phrases, and expressions in context?
- B. Is vocabulary usage addressed in the materials for all of the targeted levels of proficiency?
- C. Are general, specific, and technical language usage systematically presented throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Through carefully sequenced instruction and practice, Keystone accelerates vocabulary acquisition to ensure academic success. Before each reading selection, vocabulary is introduced and practiced in the Student Edition and Workbook through three key lessons: First, Key Words for content area vocabulary and literary terms are presented, defined, and practiced. Secondly, Academic Words from the Academic Word List that appear across all content areas are introduced and practiced. Word Study finishes the prereading vocabulary lessons with instruction in skills and strategies to help students decode unfamiliar words to derive meaning. Words and phrases are highlighted and defined throughout the readings. Teachers are able to preteach these highlighted words and phrases to develop context and meaning. Phrases and expressions are taught with vocabulary and practiced in conversation and through writing activities.

B. Vocabulary usage is addressed for all the targeted levels of proficiency. All levels of language learners are provided with abundant support (including audio) and practice opportunities are available throughout the lessons in student texts and workbooks. Vocabulary is supported in the lower levels of the series with colorful illustrations and photos. Specific and technical vocabulary is introduced in context with content area readings. Leveled Support is found throughout the Teacher's Edition for teachers to use as needed in the classroom.

C. General, specific, and technical language is systematically presented throughout Keystone. Sequenced vocabulary instruction and practice is found before each reading selection. Lesson sequence follows a systematic pattern before and after each reading. See the Scope and Sequence on Teacher's Edition pages 36-39 in Keystone A for vocabulary taught in each unit. The examples given for Keystone A, Unit 1, Reading 1 are indicative of the structure for all readings:

- Listening and Speaking: Key Words p. 5: Key words are taught and practiced in context.
- Vocabulary Teacher's Edition p. T5: Students listen to CD and repeat words.
- Listening and Speaking: Academic Words p. 6: Words used in all content areas are presented and practiced in context with a partner.
- Word Study p. 7: Spelling words with ar, er, and or, are presented with a spell aloud partner practice.
- Fact or Fiction? pp. 8-13: Words are highlighted and defined throughout reading.
- Preteaching Boldfaced Words pp. T8, T10, T12: Teachers help students preview, discuss, and model using the words in context.
- Review and Practice pp. 26-27: Includes the lesson Read for Fluency to review difficult words in the reading; In Your Own Words uses reading vocabulary to retell or summarize.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

IC. Language Control/Conventions (comprehensibility of language)

YES NO

- A. Are opportunities to demonstrate language control presented in the materials?
- B. Do opportunities to demonstrate language control correspond to all targeted levels of language proficiency?
- C. Are opportunities to demonstrate language control systematically presented in the materials in multiple chapters, lessons, or units?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Oral and written discourse is abundantly present throughout Keystone, consequently learners have numerous opportunities to demonstrate and practice language control. Each skill is introduced, taught, and practiced in a wide variety of activities to encourage language control and development. These activities include, but are not limited to, collaborative writing assignments, cooperative presentations, discussions, literary responses, and social conversations. Fluency is specifically addressed in lessons such as Read for Fluency and Reader's Theater. These exercises practice pace, intonation, and expression. Grammar, usage, and mechanics are taught after each reading and applied in the connected writing lesson. Writing Checklists accompany each lesson to develop skills of structuring and revising written text. Highly scaffolded Workshops at the end of each unit present learners with the opportunities to develop and present a final polished project infused with the skills taught throughout the unit. Additional opportunities to demonstrate language control are included in the Workbook, Reader's Companion, and Assessment book for each level. See Scope and Sequence on Teacher's Edition pages 36-39 to view the listening and speaking, grammar, and writing activities included to develop language control.

B. The methods used in oral and writing activities include many ways to assist all levels of learners and are used at every level in the series. Leveled Support is built into lessons to provide strategies for customized instruction to students with a variety of learning levels. Opportunities to demonstrate language control are present throughout each unit and level. These range in difficulty from short response oral and writing activities to engaged content area discussion and opportunities for thoughtful reflection. Listening Skill and Speaking Skill notes are included throughout the text to assist students in Listening and Speaking situations such as conversational opportunities or appropriate expression of classroom etiquette. Each unit culminates with a final opportunity to demonstrate language control using project-based learning. Language control is monitored, and assessments are found in all units and in the Assessment book.

C. In each carefully structured lesson and unit, opportunities to demonstrate language control are presented in the Keystone series.
For examples of language control activities in a typical unit see Keystone A, Unit 1:

- Discussion pp. 15, 31, 45, 59: Paired, small group, or whole class discussions.
- Grammar pp. 16-17, 32-33, 46-47, 60-61 and Writing pp. 18-19, 34-35, 48-49, 62-63: Grammar and Writing are taught after each reading.
- Fluency Check, Read for Fluency, and Reader's Theater pp. 15, 30, 45, 58: Fluency activities included after each reading.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

II. ENGLISH LANGUAGE PROFICIENCY (ELP) STANDARDS

IIA. Presence of WIDA English Language Proficiency Standards

YES NO

- A. Are social and instructional language and one or more of the remaining WIDA Standards (the language of Language Arts, of Mathematics, of Science, and of Social Studies) present in the materials?
- B. Do the materials systematically integrate Social and Instructional Language and the language of the targeted content area(s)?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Keystone, a language acquisition program, relies primarily on a Language Arts curriculum that uses social and instructional language and the language of Mathematics, Science, and Social Studies systematically throughout the series. Each unit contains four high-interest readings, which are a balanced blend of subject-based informational text and classic and contemporary literature. An additional Art History lesson, written by educators at the Smithsonian American Art Museum, concludes each unit. Prereading lessons introduce background knowledge and academic vocabulary that extend student knowledge of content area language. Academic vocabulary are terms commonly used in all content areas to promote transferable academic language development. Social and instructional language is used in the practice and application of all skill and content area standards taught by the program. For example, students research and gather information, use reading and study strategies, and develop sophisticated compositions and student presentations. The program components provide further practice in the five ELP standards.

B. Systematic academic skill development through the teaching of Common Core State Standards is clearly identified within each unit and level of the Keystone series. Prereading and postreading lessons are structured in the same manner for every reading and include practice exercises using social and instructional language related to listening, speaking, reading, and writing. The following examples found in Keystone A, Unit 2 show how a Social Studies informational reading is integrated with Social Instructional Language:

Before Reading:

- The Big Question p. 76: Students brainstorm and share ideas relating to unit theme.
- Build Background p. 78: Prereading history lesson introduces reading content.
- Vocabulary pp. 79-81: Key and academic words are taught and practiced in context and include social studies terms specific to reading, such as ancient, ceremony, and classical.
- Reading Strategy p. 81: Compare and contrast Greek, Roman, and Maya cultures to understand the reading.

Reading 1:

- "Ancient Kids" pp. 82-87: Social Studies informational text with comprehension questions located on pp. 83, 85, 87.
- Set a Purpose for Reading p. 82: Students use reading strategy to set the purpose.
- Comprehension p. 88: Recall, Comprehend, Analyze, and Connect types of questions.
- In Your Own Words p. 88: Students use reading vocabulary to summarize text.
- Extension p. 89: Students pick a culture presented in the reading to research.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

IIB. Representation of Language Domains

YES NO

- A. Are the language domains (listening, speaking, reading, and writing) targeted in the materials?
- B. Are the targeted language domains presented within the context of language proficiency levels?
- C. Are the targeted language domains systematically integrated throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Each lesson in the Keystone series is built around the language domains of listening, speaking, reading, and writing. The end of unit lessons Listening and Speaking Workshop and Writing Workshop target and expand specific domain skills developed throughout the unit. A typical unit includes four lessons that are thematically linked and centered on an informational or literary reading. Preceding each reading, vocabulary and word study are taught and practiced using listening, speaking, and writing activities. These activities can include listening to vocabulary on a CD, partner and group discussions, or writing about background knowledge. Readings have built-in comprehension questions to guide written and discussion responses, and as a means of practicing writing vocabulary with subject content areas. After the reading, students complete Review and Practice activities. These typically include comprehension checks, a discussion, a response to literature or reading for fluency, and working on an extension activity such as researching an original question. Grammar and Writing exercises complete the lessons. All lessons are supported with further practice in the student Workbook, Reader's Companion, and Assessment book.

B. Listening, speaking, reading, and writing are presented and practiced in all levels of proficiency in the Keystone series. Domain instruction is always age and proficiency level appropriate, making use of visual and textual scaffolds throughout each unit. Listening Skills and Speaking Skills are attached to exercises with helpful tips to improve communication (see Level A pp. 15, 31, 45, 59). Differentiated instruction in the Teacher's Edition provides strategies in customizing all domain instruction for a variety of proficiency levels.

C. Each unit and lesson contains systematic representation of the language domains as explained in section A for all levels. See the Scope and Sequence in Keystone A Teacher's Edition pages 36-39 for a comprehensive listing of listening, speaking, reading, and writing activities. See the following representative examples in Keystone A, Unit 2:

- The Big Question pp. 76-77: Introduces unit, theme, and background information and highlights with the related content domain found in the unit.
- Prereading Lessons pp. 94-97: Introduces literary and academic words for the lesson. Word study lesson teaches suffixes. Practice includes cooperative and written response.
- "Becoming Naomi Leon" by Pam Munoz Ryan pp. 98-103: Novel excerpt and audio CD for read along activity.
- Before You Go On and On Your Own pp. T99, T101, T103: Comprehension questions require both written and oral response.
- Review and Practice pp. 104-105: Includes Reader's Theater, Comprehension, Discussion, and Response to Literature lessons covering all domains of instruction.
- Grammar pp. 106-107 and Writing pp. 108-109: Write about a character and setting using sensory details.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

III. LEVELS OF LANGUAGE PROFICIENCY

IIIA. Differentiation of Language (for ELP levels)

YES NO

- A. Do the materials differentiate between the language proficiency levels?
- B. Is differentiation of language proficiency developmentally and linguistically appropriate for the designated language levels?
- C. Is differentiation of language systematically addressed throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Pearson Longman Keystone is a proficiency based, accelerated reading and language arts program for Grades 6-12. Keystone levels A, B, and C are designed for the lower secondary grades, and Building Bridges, Keystone D, E, and F for the upper grades. A newcomer level, Keys to Learning, is appropriate for beginning language learners and teaches foundational language and literacy skills, at all Grades 6-12. Standards-based assessments for every reading selection, unit, midterm, and end of level test measure progress throughout the year and ensure students are mastering the standards and developing transferable skills. Leveled Support for differentiated instruction is built into every lesson in the Teacher's Edition and provides strategies for customizing all domain instruction for varying levels of learners. An exit exam determines if a student continues to the next level of the program or is ready for mainstream coursework. Additional resources provide further assistance to language learners at all levels.

B. Differentiation is linguistically and developmentally appropriate for each targeted proficiency level. Within Keystone a wide variety of learning supports are incorporated, including examples of teacher modeling, listening to CDs to accompany repeated reading, and partnered or whole class discussions. Fluency is practiced in postreading lessons such as Read for Fluency and Reader's Theater. These lessons practice reading skills such as pace, intonation, and expressive/dramatic use of language. For further student support, the Teacher's Resource Book contains summaries of all readings in six common first languages. An Introduction to Linguistics on Teacher's Edition pages 40-55 supplies background linguistic knowledge, and comparisons of English intonation and sounds to other languages.

C. Keystone is a carefully structured program that provides a complete instructional plan across proficiency levels. Differentiation is systematically addressed in the skills taught in the lessons, across the units, and through the levels. See Keystone A, Unit 3 for examples that are reflective of the entire series:

- Leveled Support Teacher's Edition pp. T154, T158, T164: Strategies and techniques for leveled instruction.
- Linguistic Note Teacher's Edition pp. T156, T172 and Accelerate Language Development Teacher's Edition pp. T166, T168, T180, T182: Provides teachers with assistance in understanding linguistic and cultural nuances in language appropriate to teaching the lesson.
- Media Literacy and Projects p. 215: Leveled and multisensory projects.
- Reader's Theater pp. 164, 194; Read for Fluency pp. 179, 209: Fluency practice and assessments found after each reading and unit.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

IIIB. Scaffolding Language Development (from ELP level to ELP level)

YES NO

- A. Do the materials provide scaffolding supports for students to advance within a proficiency level?
- B. Do the materials provide scaffolding supports for students to progress from one proficiency level to the next?
- C. Are scaffolding supports presented systematically throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. The Keystone series provides scaffolding supports for students to advance within each proficiency level. Scaffolding is designed into the curriculum and also represented in the Teacher's Edition with extra exercises. This allows the teacher to respond to the flow of the lesson and scaffold when student need arises. Thematic units and The Big Question introduce and connect the student to reading in content areas. Explorations of background and students' boxes attached to speaking, listening, and writing lessons contain tips and checklists, providing helpful guidance within the lessons. Writing lessons also contain models for student use and demonstrate structure and language control. Typical scaffolding supports found in Keystone lessons include teacher modeling, visuals and graphics, cooperative learning, hands-on learning, dramatic activities, reading strategies, and comprehension checks. Academic vocabulary is vital to the progression of the EL learner; consequently, academic vocabulary is introduced and practiced with every reading. At the conclusion of each level, a Skills Handbook features easy to use support material critical to further academic skills. In addition, the Teacher's Resource Book contains summaries for all readings in six languages to simplify the reading and create a bridge to understanding.

B. With the assistance of the scaffolding described above in A, transferrable skills are developed throughout each unit to assist students as they advance from one proficiency level to the next. Assessment resources monitor student progress and evaluate student progression throughout each unit and level. See the Scope and Sequence located on Teacher's Edition pages 36-39 for an overview of skill advancement through each level.

C. The Keystone program systematically builds upon prior knowledge and explicitly scaffolds within each lesson as a means of progressing student proficiency from one level to the next. The following is a sampling of scaffolding exercises from Keystone A, Unit 3:

- Build Background p. 154: A background lesson connects students to reading content.
- Scaffolding: Listen and Read pp. T158, T174, T188, T204: Read along with the audio CD.
- Listening Skill pp. 165, 179, 195; Speaking Skill pp. 164, 178, 194: Helpful advice specific to content.
- Writing Workshop pp. 218-222: Includes student writing models in the prewriting, revision, and final draft phase for complete lesson support.
- Writing Checklist pp. 169, 183, 199, 213, 219: Writing guidelines provided in a checklist for guided revision.
- Before You Go On pp. 159, 161, 163: Comprehension questions answered in class discussion, partner activity, or individual writing assignment.
- Discussion pp. 165, 179, 195, 209: Teacher models discussion as students work in pairs or small groups.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

IV. STRANDS OF MODEL PERFORMANCE INDICATORS

IVA. Language Functions

YES NO Context

- A. Do the materials include a range of language functions?
- B. Do the language functions attach to a context (i.e., are they incorporated into a communicative goal or activity)?
- C. Are language functions presented comprehensively to support the progression of language development?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. In the Keystone series all activities provide practice using a range of language functions. Language functions found in Keystone include retelling, defining, describing, identifying, sequencing, explaining, discussing, evaluating, comparing, analyzing, and responding. These functions are used in the instructional language and found throughout all levels. Academic vocabulary includes language functions such as theorize, identify, illustrate, and create, providing additional student exposure to terms that transfer to other content areas. See the level A Scope and Sequence located on Teacher's Edition pages 36-39 to view the widespread uses of language functions in the curriculum.

B. Language functions are attached to practice activities, and all activities are connected to expanding understanding of the lessons and thematic units. After students are taught a skill, they practice and apply the skill using a variety of language functions in context. The Teacher's Edition uses language functions in the step-by-step instruction, for example Step 2: Practice or Step 3: Extend.

C. The progression of language development is supported by the comprehensive use of language functions throughout Keystone. As skills progress through the units, language functions are used to support the communicative needs of the developing learners. Examples found in Keystone A, Unit 4 show the comprehensive use of language functions in the curriculum:

- In Your Own Words p. 252: Identify the main idea.
- Response to Literature p. 239: Describe and respond to reading.
- Discussion p. 239: Discuss in pairs or small groups.
- Practice p. 259: Discuss and describe proverbs.
- Reading Strategy p. 261: Identify Author's Purpose.
- Word Study: Homophones p. 247: Define each pair of homophones.
- Link the Readings p. 286: Discuss and compare the unit readings.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

YES NO **Higher Order Thinking**

- D. Are opportunities to engage in higher order thinking present for students of various levels of English language proficiency?
- E. Are opportunities for engaging in higher order thinking systematically addressed in the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Opportunities to engage in higher order thinking are present for all ELP levels in each unit, and across the Keystone series. In the On Your Own section, reading comprehension questions involve complex judgmental skills involving analysis, evaluation, and synthesis. Every unit concludes with exercises such as Media Literacy and Projects, Writing Workshop, and Listening and Speaking Workshop. These activities require research, analysis, and creativity while applying skills taught consistently throughout the lesson format. After the four readings in each unit of Building Bridges and Keystone levels A-F, a Link the Readings lesson uses critical thinking to compare and contrast the readings and link them to the unit theme. In addition, the final lesson in Keystone levels A-F, Smithsonian American Art Museum: The Language of Art, develops students' cultural and visual literacy by analyzing and evaluating pieces of American art. This is a final exploration of the Big Question. Students explore the connection of the artwork to the unit theme and answer questions such as "What would you show in a painting to illustrate the ideas of winning and losing?" (Level A, Unit 4, p. 297)

B. Opportunities to engage in higher order thinking are systematically addressed in Keystone. As stated in D above, skills and strategies are included in each lesson and unit. See representative examples in Keystone A, Unit 4:

- On Your Own pp. 249, 251: Found in every reading are questions that require complex judgment skills.
- Link the Readings p. 286: Critical thinking exercise links content in unit readings.
- Media Literacy and Projects p. 287: Creative, leveled, multisensory extension projects.
- Listening and Speaking Workshop pp. 288-289: Students research, organize, present, and evaluate in these extensive lessons.
- Writing Workshop pp. 290-294: Expository essay lesson that requires organization, evaluation, and publication of personal writing.
- Smithsonian American Art Museum: The Language of Art pp. 296-297: Students evaluate and analyze American art and as it relates to the Big Question and theme of each unit.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

IVB. Content Stem

YES NO **Coverage and Specificity of Example Content Topics**

- A. Do examples cover a wide range of topics typically found in state and local academic content standards?
- B. Are example topics accessible to English language learners of the targeted level(s) of English language proficiency?
- C. Are example topics systematically presented throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Keystone is a standard-aligned curriculum covering a wide range of subject matter topics found in state, local, and national academic content standards. Grade appropriate standards were used to design the Keystone curriculum. Common Core State Standards are listed on the pages of the Teacher's Edition as an easy-to-use reference for all lessons. Each reading chapter contains vocabulary, morphology, grammar usage and mechanics, listening, speaking, reading, and writing lessons. The language arts dominated curriculum also integrates social studies, math, science, and art history lessons clearly labeled throughout the units. WIDA ELP standards and topic examples are abundantly represented in each unit. In addition, the student assessment book provides standard-aligned tests that introduce students to the types of questions found on state exams. See www.pearsonschool.com for a comprehensive list of correlations to state and national standards.

B. All topics covered in the Keystone series are accessible to English language learners of the targeted levels of English language proficiency. Each lesson has built-in differentiated and scaffolded instruction and is further supported by a variety of teaching resources and technology for comprehensive instructional reinforcement.

C. Example topics are systematically presented throughout the units in the Keystone series. See the Table of Contents in the introductory pages to view the structure of the units and variety of content found in each level. The Scope and Sequence found on Teacher's Edition pages 36-39 lists all vocabulary, word study, grammar, and writing structures and modes in each level. See examples found in Keystone A, Unit 5:

- Common Core State Standards in the Teacher's Edition pp. T300, T304, T312, T318, T322, T326: Standards listed throughout the Teacher's Edition that correlate to lessons found on representative pages.
- Reading 1: Literature/Play p. 304; Reading 2: Informational Text/Science p. 322; Reading 3: Literature/Novel Excerpt p. 336; Reading 4: Informational Text/Social Studies p. 354; and Smithsonian American Art Museum: The Language of Art p. 374: Readings in every unit cover a variety of content areas and genres.
- What You Will Learn? pp. 300, 318, 332, 350: Prior to each reading chapter, this text box lists content of reading, grammar, and writing lessons.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

YES NO **Accessibility to Grade Level Content**

- D. Is linguistically and developmentally appropriate grade level content present in the materials?
- E. Is grade level content accessible for the targeted levels of language proficiency?
- F. Is the grade level content systematically presented throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. All content in Keystone is linguistically and developmentally appropriate for the targeted grade levels. Keystone content is standard-aligned and includes grade level appropriate WIDA example topics. Repeated exposure to vocabulary and morphology, which is both academic and content oriented, increases student ability to comprehend grade level content. High interest readings of varied genres are supported with appropriate scaffolds, graphics, and practice activities that stimulate learning and develop transferable skills. Linguistic supports are incorporated into each reading chapter along with opportunities to practice language control. In addition, projects and workshops use cumulative skills taught in the unit to develop polished presentations and publications. See the Scope and Sequence located on Teacher's Edition pages 36-39 to view grade level content in each level.

B. In the eight level Keystone series, grade level content is accessible to all targeted levels of language proficiency. Leveled support for differentiated instruction is built into each lesson, making content accessible to all language proficiency levels. Assessments can be customized using ExamView, an electronic test generator, to tailor instruction to individual learners' needs.

C. Keystone presents grade level appropriate content in a structured systematic manner, which allows students to build progressive skills. Grade level content is aligned to the state and national standards. See the Scope and Sequence on Teacher's Edition pages 36-39 to corroborate the careful structuring of the program. See examples in Keystone A, Unit 5:

- Table of Contents Teacher's Edition pp. 22-33: Content is clearly labeled.
- Reading 1: Literature/Play p. 304; Reading 2: Informational Text/Science p. 322; Reading 3: Literature/Novel Excerpt p. 336; Reading 4: Informational Text/Social Studies p. 354; and Smithsonian American Art Museum: The Language of Art p. 374: High interest readings of varied genres are found in every unit.
- Writing: Write a Formal E-mail p. 316; Write How-to Instructions p. 330; Write a Plot Summary p. 348; Write a Paragraph That Classifies p. 362; Expository Essay pp. 368-372.
- Grammar: Verbs pp. 314-315; Imperatives pp. 328-329; Reported Speech pp. 346-347; Active Voice and Passive Voice pp. 360-361.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

IVC. INSTRUCTIONAL SUPPORTS

YES NO **Sensory Support**

- A. Are sensory supports, which may include visual supports, present and varied in the materials?
- B. Are sensory supports relevant to concept attainment and presented in a manner that reinforces communicative goals for the targeted levels of proficiency?
- C. Are sensory supports systematically presented throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Sensory supports are present and varied throughout the Pearson Longman Keystone program. All units are strongly supported with a range of dynamic visual supports that introduce the unit themes, enhance the readings, and assist understanding of lessons. Visual supports are specific to content and include maps, photographs, scientific illustrations of processes and cycles, sequence blocks, and pictures of artifacts. Images found within each unit are analyzed and discussed in Visual literacy, activities designed for students to skim the unit images and predict reading content. The end of the unit lesson, Smithsonian American Art Museum: The Language of Art, uses American art and artists to further express the theme and to develop cultural and visual literacy. Extension lessons and Media Literacy and Projects are hands-on, sensory rich activities, such as creating a DNA model, illustrating the setting of a written work through art, recording sounds, or creating a skit with costumes and music. A DVD is available with this curriculum and features background information on the unit themes, and audio CD's are included to model oral reading fluency. A list of available Teaching Resources is included with every lesson in the Teacher's Edition.

B. All sensory supports are relevant to concept attainment and are presented in such a manner that reinforces communication goals for the targeted level. Vocabulary and related concepts are supported throughout the levels with illustrations and photographs. Practice activities are visually supported in a fashion that supports a deeper understanding of instruction and background knowledge. Listening and Speaking Skill notes are included to support practice exercises and model ideal classroom communication. In addition, multisensory Media Literacy and Projects provide the option of differentiated instruction allowing students to apply what they have learned in each unit at their level.

C. Sensory supports are presented systematically throughout the Keystone eight level series. Supports are integrated into each lesson and are connected contextually. See representative example found in Level A, Unit 6:

- Unit 6 What is your vision of life in the future? pp. 376-377: Unit opener visually introduces theme, Big Question, readings, and unit objectives.
- Preview the Unit: Visual Literacy Teacher's Edition p. T376: Students study unit images and predict reading content.
- Teaching Resources Teacher's Edition pp. T376, T378, T380, T382: References resources.
- Vocabulary pp. 379-381: Images support comprehension of vocabulary.
- Extension p. 389: Students write about possible future events.
- Media Literacy and Projects p. 443: Students choose from multisensory projects to apply unit skills.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

YES NO **Graphic Support**

- D. Are graphic supports present and varied in the materials?
- E. Are graphic supports relevant to concept attainment and presented in a manner that reinforces communicative goals for the targeted proficiency levels?
- F. Are graphic supports systematically presented throughout the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. In every level of Keystone, graphics support lesson content with a variety of graphic material appropriate to the proficiency level. Visual supports are used in all domain instruction. Examples include the use of images to explore unit theme, understand vocabulary, and ascertain complex ideas presented in the readings. The most common graphic support are organizers such as semantic maps, Venn diagrams, and T-charts. These are found throughout the entire series as a useful tool for students to understand concepts and to organize ideas. Graphic organizers are modeled by teachers and systematically used in every prewriting exercise. Writing Workshops demonstrate the writing process with a sample of student writing by modeling processes such as revision. Charts are commonly used throughout the readings to convey information and in practice exercises such as Grammar and Link the Readings. The Workbook supports each lesson in the text and relies heavily on the use of graphic organizers in practice exercises.

B. All graphic supports are relevant to concept attainment and reinforce communicative goals for the targeted proficiency level. Graphic organizers are teacher modeled and practiced through multiple use, which include prewriting activities and whole class discussions. Throughout the Teacher's Edition, Visual Literacy expands the meaning of graphics to promote further understanding content. Leveled Support often uses content graphics and graphic organizers to scaffold and extend lessons.

C. Examples of graphic supports presented above in D and E are used systematically throughout the entire Keystone series. In addition, support materials such as the Workbook and Reader's Companion that accompany each level offer structured graphic support for all lessons. See representative examples found in Level A, Unit 6:

- Visual Literacy Teacher's Edition p. T376: Expands student understanding of unit graphics.
- In Your Own Words p. 388: Chart used to organize main idea and details to create a reading summary.
- Writing pp. 392-393, 410-411, 426-427, 440-441: Prewriting activities use graphic organizers.
- Response to Literature p. 407: Student Edition writing activity uses a semantic web; Response to Literature p. T407: Teacher's Edition lesson uses the web to guide a whole class discussion of reading material.
- Learn Key Words, Listening and Speaking: Academic Words, and Word Study pp. 429-431: Uses charts in vocabulary instruction.
- Link the Readings p. 442: Uses a chart to compare and contrast unit readings.
- Writing Workshop pp. 446-452: Student models are used to represent stages of the writing process from prewriting to the final draft.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

YES NO **Interactive Support**

- G. Are interactive supports present and varied in the materials?
- H. Are interactive supports present and relevant to concept attainment for the targeted proficiency levels?
- I. Are interactive supports varied and systematically presented in the materials?

Justification: In the box below provide examples from materials as evidence to support each “yes” response for this section. Provide descriptions, not just page numbers.

A. Every lesson in Keystone has interactive supports that are varied throughout the series. To promote comprehension and expose students to a variety of communication styles, students work in paired, small group, and whole group situations to practice and apply skills, dramatize readings, or discuss background knowledge material. Larger cooperative projects are integrated into the curriculum in lessons, such as Media Literacy and Projects or Listening and Speaking Workshops, where students create, practice, and present as a group. The Internet is used to research specific topics, and information is shared and discussed with a partner or in groups. Interactive native language support is included throughout the Teacher's Edition in the Linguistic Notes and with the CRI icon. These lessons are culturally and linguistically responsive and incorporate the diversity of students' background and culture into the curriculum. The Teacher's Resource Book contains summaries of all readings in six common first languages. In addition, the CD-ROM includes additional interactive activities and the www.pearsonschool.com website contains a student area with games and practice.

B. The interactive supports found in all levels of the Keystone series are relevant to concept attainment for all targeted proficiency levels. Interactive supports described in part A are explicitly used to scaffold lessons so that learners of all levels gain access to meaning in multiple modalities.

C. Interactive supports are systematically presented and varied throughout the Keystone series. See representative examples found in Level A, Unit 6:

- Research Report p. 446: Students use the Internet, magazines, books, or encyclopedias to gather information on chosen topic.
- Teaching Resources Teacher's Edition pp. T376, T378, T380, T382: The text box lists resources such as the CD-ROM/e-book.
- CRI Teacher's Edition pp. T389, T407, T423, T437: Icon signals interactive lessons that are culturally responsive.
- Linguistic Note Teacher's Edition pp. T380, T396, T414, T430: Provides linguistic support specific to lesson.
- Discussion pp. 389, 407, 423, 437: Paired and small group discussion of reading comprehension questions.
- Dramatic Reading p. 406: Reread, discuss, interpret, memorize, and perform a poem in a group.
- Listening and Speaking Workshop pp. 444-445: Small group brainstorming activity helps students choose a topic to research, prepare, and present a speech to the class.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

Appendix

- I. Performance Definitions** – the criteria (linguistic complexity, vocabulary usage, and language control) that shape each of the six levels of English language proficiency that frame the English language proficiency standards.
- IA. Linguistic Complexity** – the amount and quality of speech or writing for a given situation
 - IB. Vocabulary Usage** – the specificity of words (from general to technical) or phrases for a given context
 - IC. Language Control/Conventions** – the comprehensibility and understandability of the communication for a given context
- II. English Language Proficiency Standards** – the language expectations of English language learners at the end of their English language acquisition journey across the language domains, the four main subdivisions of language.
- IIA. Five WIDA ELP Standards:**
1. English language learners **communicate** for **Social** and **Instructional** purposes within the school setting.
 2. English language learners **communicate** information, ideas, and concepts necessary for academic success in the content area of **Language Arts**.
 3. English language learners **communicate** information, ideas, and concepts necessary for academic success in the content area of **Mathematics**.
 4. English language learners **communicate** information, ideas, and concepts necessary for academic success in the content area of **Science**.
 5. English language learners **communicate** information, ideas, and concepts necessary for academic success in the content area of **Social Studies**.
- IIB. Domains:**
- t **Listening** – process, understand, interpret, and evaluate spoken language in a variety of situations
 - t **Speaking** – engage in oral communication in a variety of situations for a variety of audiences
 - t **Reading** – process, understand, interpret, and evaluate written language, symbols and text with understanding and fluency
 - t **Writing** – engage in written communication in a variety of situations for a variety of audiences
- III. Levels of English Language Proficiency** - The five language proficiency levels (1-Entering, 2-Beginning, 3-Developing, 4-Expanding, 5- Bridging) outline the progression of language development in the acquisition of English. The organization of the standards into strands of Model Performance Indicators (MPIs) illustrates the continuum of language development.
- IIIA. Differentiation** – providing instruction in a variety of ways to meet the educational needs of students at different proficiency levels
 - IIIB. Scaffolding** – building on already acquired skills and knowledge from level to level of language proficiency based on increased linguistic complexity, vocabulary usage, and language control through the use of supports.

WIDA Protocol for Review of Instructional Materials for ELs
WIDA PRIME Correlation Form for Educators

IV. Strands of Model Performance Indicators – examples that describe a specific level of English language proficiency for a language domain. Each Model Performance Indicator has three elements: Language Function, Content Stem, and Support

IVA. Language Functions – the first of the three elements in model performance indicators indicates how ELs are to process and use language to demonstrate their English language proficiency.

- Context – the extent to which language functions are presented comprehensively, socially and academically in materials
- Higher Order Thinking – cognitive processing that involves learning complex skills such as critical thinking and problem solving.

IVB. Content Stem – the second element relates the context or backdrop for language interaction within the classroom. The language focus for the content may be social, instructional or academic depending on the standard.

IVC. Instructional Support – instructional strategies or tools used to assist students in accessing content necessary for classroom understanding or communication and to help construct meaning from oral or written language. Three categories of instructional supports include sensory, graphic and interactive supports.

- Sensory support – A type of scaffold that facilitates students' deeper understanding of language or access to meaning through the visual or other senses.
- Graphic support – Type of scaffold to help students demonstrate their understanding of ideas and concepts without having to depend on or produce complex and sustained discourse.
- Interactive support – A type of scaffold to help students communicate and facilitate their access to content, such as working in pairs or groups to confirm prior knowledge, using their native language to clarify, or incorporating technology into classroom activities.
