Course guides provide detailed information on the curriculum including course descriptions, unit summaries, lesson objectives, activities, and assessment types. Course guides include information on:

- Planned instruction (provided in the unit summary of each unit within individual Course Guides)
- Course objectives (provided in the unit and lesson objectives within individual Course Guides)
- Activities (provided in the unit summary and lesson objectives of each unit within individual Course Guides)

Language Arts K

Language Arts K A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In this course, the student will learn, practice, and apply the fundamental skills and strategies that will provide the foundation to grow into a strong, fluent reader, writer, and communicator. Reading, writing, and language instruction are presented in close alignment with the Common Core State Standards (CCSS). Early in the semester students review the names of the letters of the alphabet. Daily instruction in phonics and spelling as well as high frequency words serves as a building block that enables the student to emerge as a reader. Core reading instruction gives the student the opportunity to listen to, read together, and read independently texts in a variety of literary and nonfiction genres. The instruction is presented in a Peer Model mode, in which the student views a video of a peer learning how to use and apply the target core reading skill. The focus of core reading instruction is to develop the ability to comprehend and analyze texts. Instruction in the mechanics of writing serves as a building block that allows the student to emerge as a writer. Writing instruction guides the student through the process of dictating and writing narrative and informational texts. Speaking and Listening instruction is presented in a 21st Century mode, in which the student gains proficiency in the skills, knowledge, and expertise they must master to succeed in life and eventually the workplace. Together, the course elements ensure that the student grows as a reader, writer, and communicator.

Semester A Outline

1. **Course Overview**

1. ELA Semester A Course Overview

2. **Different Kinds of Family**

1. Different Kinds of Families: Genre

- In this section, you will predict what a story will be about using details in the pictures.
- In this section, you will say if the words you hear have the same ending sounds.
- In this section, you will repeat the high-frequency word **a**.
- In this section, you will name the capital and lowercase letters **Aa** and **Bb**.

2. Different Kinds of Families: Comprehension

- In this section, you will use details to answer questions about a story.
- In this section, you will say words that rhyme.
- In this section, you will identify the high-frequency word **a**.
- In this section, you will name the capital and lowercase letters **Cc** and **Dd**.

3. Different Kinds of Families: Speak/Listen

- In this section, you will tell what a story is.
- In this section, you will sort words that rhyme.
- In this section, you will match the high-frequency words **at** and **a**.

- In this section, you will practice tracing straight lines.
 - In this section, you will name the capital and lowercase letters **Ee** and **Ff**.
4. Different Kinds of Families: Fluency
 - In this section, you will identify characters in a story.
 - In this section, you will match letters A–F and a–f.
 - In this section, you will use letters to build the words **at** and **a**.
 - In this section, you will name the capital and lowercase letters **Gg**, **Hh**, and **Ii**.
 5. Different Kinds of Families: Synthesize
 - In this section, you will identify settings in a story.
 - In this section, you will follow rules for taking turns when speaking.
 - In this section, you will read the word **A** in a book.
3. **Outside in Any Weather**
 1. Outside in Any Weather: Genre
 - In this section, you will use details to predict what a story will be about.
 - In this section, you will say sounds at the beginning of a word and in the rest of the word.
 - In this section, you will repeat the high-frequency word **I**.
 - In this section, you will name the capital and lowercase letters **Jj** and **Kk**.
 2. Outside in Any Weather: Comprehension
 - In this section, you will use details to answer questions about a story.
 - In this section, you will put sounds together to say words.
 - In this section, you will identify the high-frequency word **I**.
 - In this section, you will name the capital and lowercase letters **Ll** and **Mm**.
 3. Outside in Any Weather: Speak/Listen
 - In this section, you will identify events in a story.
 - In this section, you will make new words by changing the beginning sound or ending sounds.
 - In this section, you will match high-frequency words **a** and **I**.
 - In this section, you will practice tracing slanted lines.
 - In this section, you will name the capital and lowercase letters **Nn** and **Oo**.
 4. Outside in Any Weather: Fluency
 - In this section, you will ask questions about characters in a story.
 - In this section, you will tell how story characters are the same and different.
 - In this section, you will use letters to build the words **a** and **I**.
 - In this section, you will name the capital and lowercase letters **Pp** and **Qq**.
 5. Outside in Any Weather: Synthesize
 - In this section, you will ask questions about the setting of a story.
 - In this section, you will listen carefully so that you understand what others say.
 - In this section, you will read the word **I** in a book.
4. **Fun for Everyone**
 1. Fun for Everyone: Genre
 - In this section, you will predict what a story will be about by using details in the pictures.
 - In this section, you will follow words from left to right.
 - In this section, you will repeat the high-frequency word **look**.

- In this section, you will name the capital and lowercase letters **Rr** and **Ss**.
2. Fun for Everyone: Comprehension
 - In this section, you will answer questions about the details in a story.
 - In this section, you will follow words from the top to the bottom and from one page to the next.
 - In this section, you will identify the high-frequency word **look**.
 - In this section, you will name the capital and lowercase letters **Tt** and **Uu**.
 3. Fun for Everyone: Speak/Listen
 - In this section, you will use details to answer questions about words in a story.
 - In this section, you will tell how letters in a certain order make up a word.
 - In this section, you will match the high-frequency words **I** and **look**.
 - In this section, you will practice tracing curved lines.
 - In this section, you will name the capital and lowercase letters **Vv** and **Ww**.
 4. Fun for Everyone: Fluency
 - In this section, you will ask questions about words in a story.
 - In this section, you will recognize various letters of the alphabet.
 - In this section, you will use letters to build the words **I** and **look**.
 - In this section, you will name the capital and lowercase letters **Xx**, **Yy**, and **Zz**.
 5. Fun for Everyone: Synthesize
 - In this section, you will use words and pictures to learn new words.
 - In this section, you will have a conversation with others by talking and listening.
 - In this section, you will read the word **Look** in a book.

5. No Place Like Home

1. No Place Like Home: Genre
 - In this section, you will predict what a story will be about by using details in the pictures.
 - In this section, you will look for spaces that are between words.
 - In this section, you will repeat the high-frequency word **is**.
2. No Place Like Home: Comprehension
 - In this section, you will use details to answer questions about a story.
 - In this section, you will tell if words make a sentence.
 - In this section, you will identify the high-frequency word **is**.
 - In this section, you will say the sound you hear at the beginning and end of words.
 - In this section, you will practice writing capital **M** and lowercase **m**.
3. No Place Like Home: Speak/Listen
 - In this section, you will identify details on the front cover and the title page of a book.
 - In this section, you will count the number of parts in a word.
 - In this section, you will match high-frequency words **look** and **is**.
 - In this section, you will name the sound for the letter **m**.
4. No Place Like Home: Fluency
 - In this section, you will tell how an author and an illustrator work together to tell a story.

- In this section, you will read high-frequency words **A, a, At, at, I, Is, is, Look, and look.**
 - In this section, you will use letters to build the words **look** and **is.**
 - In this section, you will say the sound you hear at the beginning and end of words.
 - In this section, you will practice writing capital **S** and lowercase **s.**
5. No Place Like Home: Synthesize
- In this section, you will read the word **is** in a book.
 - In this section, you will name the sound for the letter **s.**
6. Fun With Family Unit Test

6. What a Surprise

1. What a Surprise!: Genre
- In this section, you will predict what a story will be about using details in the pictures.
 - In this section, you will identify naming words, or nouns.
 - In this section, you will repeat the high-frequency word **you.**
 - In this section, you will identify that a story tells about something that happens
2. What a Surprise!: Comprehension
- In this section, you will use details to answer questions about a story. In this section, you will identify the high-frequency word **you.**
 - In this section, you will say the sound you hear at the beginning and end of words.
 - In this section, you will practice writing capital **T** and lowercase **t.**
 - In this section, you will identify how the beginning of a story tells who the story is about and where it happens.
3. What a Surprise!: Speak/Listen
- In this section, you will use details to answer questions about pictures in a story.
 - In this section, you will identify plural nouns.
 - In this section, you will match high-frequency words **is** and **you.**
 - In this section, you will say the sound you hear at the beginning and end of words.
 - In this section, you will identify how the middle of a story tells what happens.
4. What a Surprise!: Fluency
- In this section, you will ask questions about major events in the story.
 - In this section, you will practice writing capital **P** and lowercase **p.**
 - In this section, you will use letters to build the words **is** and **you.**
 - In this section, you will name the sound for the letter **t** and the sound for the letter **p.**
 - In this section, you will tell what happens at the end of a story.
5. What a Surprise!: Synthesize
- In this section, you will tell how details in pictures help tell a story.
 - In this section, you will tell about what you learn in a clear way.
 - In this section, you will read the word **You** in a book.
 - In this section, you will identify the first, next, and last events in a story.

7. Friends Help Each Other

1. Friends Help Each Other: Genre
 - In this section, you will predict what a story will be about using details in the pictures.
 - In this section, you will identify action words, or verbs.
 - In this section, you will repeat the high-frequency word **We**.
 - In this section, you will plan a story by telling who and what it will be about.
2. Friends Help Each Other: Comprehension
 - In this section, you will use details to answer questions about a story.
 - In this section, you will identify the high-frequency word **we**.
 - In this section, you will say the sound you hear at the beginning and in the middle of words.
 - In this section, you will practice writing capital **A** and lowercase **a**.
 - In this section, you will write the end of a story by telling how the people in the story feel about what happens.
3. Friends Help Each Other: Speak/Listen
 - In this section, you will use details to answer questions about the beginning of a story.
 - In this section, you will identify the two parts of a sentence.
 - In this section, you will match high-frequency words **you** and **we**.
 - In this section, you will name the short sound for the letter **a**.
 - In this section, you will write the events that happen in the beginning and middle of a story.
4. Friends Help Each Other: Fluency
 - In this section, you will use details to answer questions about the middle of a story.
 - In this section, you will identify verbs in sentences.
 - In this section, you will use letters to build the words **you** and **we**.
 - In this section, you will blend sounds to read words with short **a**.
 - In this section, you will add details to your story.
5. Friends Help Each Other: Write
 - In this section, you will use details to answer questions about the ending of a story.
 - In this section, you will ask a question to get help doing something.
 - In this section, you will read the word **We** in a book.
 - In this section, you will share your story.

8. Friends are Kind

1. Friends are Kind: Genre
 - In this section, you will predict what a story will be about using details in the pictures.
 - In this section, you will say each word part in a word.
 - In this section, you will repeat the high-frequency word **the**.
 - In this section, you will identify what a telling sentence does.
2. Friends are Kind: Comprehension
 - In this section, you will use key details to answer questions about a story.
 - In this section, you will tell how to begin and end a telling sentence.
 - In this section, you will identify the high-frequency word **the**.

- In this section, you will say the sound you hear at the beginning and end of words.
 - In this section, you will practice writing capital **N** and lowercase **n**.
3. Friends are Kind: Speak/Listen
- In this section, you will tell what happens at the beginning and middle of a story.
 - In this section, you will identify what an asking sentence does.
 - In this section, you will match high-frequency words **we** and **the**.
 - In this section, you will name the sound for the letter **n**.
4. Friends are Kind: Fluency
- In this section, you will tell what happens at the end of a story.
 - In this section, you will read high-frequency words and sentences with high-frequency words.
 - In this section, you will use letters to build the words **the** and **we**.
 - In this section, you will say the sound you hear at the beginning of words.
 - In this section, you will practice writing capital **C** and lowercase **c**.
 - In this section, you will select a book to read on your own.
5. Friends are Kind: Synthesize
- In this section, you will retell a story using pictures or illustrations.
 - In this section, you will answer a question to get the help you need.
 - In this section, you will read the word **The** in a book.
 - In this section, you will name one sound for the letter **c**.

9. What a Friend Needs

1. What a Friend Needs: Genre
- In this section, you will predict what a story will be about using details in the pictures.
 - In this section, you will blend word parts together to make words.
 - In this section, you will tell what question words mean.
 - In this section, you will repeat the high-frequency word **who**.
2. What a Friend Needs: Comprehension
- In this section, you will use details to ask and answer questions about a story.
 - In this section, you will identify the high-frequency word **Who**.
 - In this section, you will say the sound you hear at the beginning and in the middle of words.
 - In this section, you will practice writing capital **O** and lowercase **o**.
 - In this section, you will identify that a book review tells how a writer feels and why they feel that way.
3. What a Friend Needs: Speak/Listen
- In this section, you will use details to identify a problem in the story.
 - In this section, you will tell how to begin and end an asking sentence.
 - In this section, you will match high-frequency words **the** and **Who**.
 - In this section, you will name the short sound for the letter **o**.
 - In this section, you will write about why you like a story you read.
4. What a Friend Needs: Fluency
- In this section, you will identify details that tell how the problem in a story is solved.
 - In this section, you will use letters to build the words **the** and **Who**.

- In this section, you will blend sounds to read words with short **o**.
- In this section, you will add a detail to your book review.

5. What a Friend Needs: Synthesize

- In this section, you will read the word **Who** in a book.
- In this section, you will build words with short **o** and **a**.

6. Good Friends Unit Test

10. Animals Learn and Grow

1. Animals Learn and Grow: Genre

- In this section, you will predict what an information text will be about using details in the pictures.
- In this section, you will break words into word parts.
- In this section, you will repeat the high-frequency word **he**.
- In this section, you will tell what an exclamation does.

2. Animals Learn and Grow: Comprehension

- In this section, you will answer questions about the details in a text.
- In this section, you will tell how to begin and end an exclamation.
- In this section, you will identify the high-frequency word **he**.
- In this section, you will say the sound you hear at the beginning and end of words.
- In this section, you will practice writing capital **D** and lowercase **d**.

3. Animals Learn and Grow: Speak/Listen

- In this section, you will identify an information text.
- In this section, you will use a capital letter to write the word *I*.
- In this section, you will match high-frequency words **who** and **he**.
- In this section, you will name the sound for the letter **d**.

4. Animals Learn and Grow: Fluency

- In this section, you will identify details in an informational text.
- In this section, you will add describing words that tell about size, shape, and feel.
- In this section, you will use letters to build the words **who** and **he**.
- In this section, you will say the sound you hear at the beginning and end of words.
- In this section, you will practice writing capital **B** and lowercase **b**.
- In this section, you will select a book to read on your own.

5. Animals Learn and Grow: Synthesize

- In this section, you will identify the topic in an informational text.
- In this section, you will ask questions to help you understand a text you have listened to.
- In this section, you will read the word **He** in a book.
- In this section, you will name the sound for the letter **b**.

11. Ways Animals are Different

1. Ways Animals are Different: Genre

- In this section, you will predict what a book will be about using details in the pictures.
- In this section, you will say the beginning sounds in words.
- In this section, you will repeat the high-frequency word **she**.
- In this section, you will define describing words, or adjectives.

2. Ways Animals are Different: Comprehension

- In this section, you will use details to answer questions about a book.
 - In this section, you will identify describing words, or adjectives, that tell how many.
 - In this section, you will identify the high-frequency word **she**. In this section, you will say the sound you hear at the beginning and in the middle of words.
 - In this section, you will practice writing capital **I** and lowercase **i**.
3. Ways Animals are Different: Speak/Listen
- In this section, you will use details to answer questions about a book.
 - In this section, you will identify describing words, or adjectives, that tell what color.
 - In this section, you will match high-frequency words **he** and **she**.
 - In this section, you will name the short sound for the letter **i**.
4. Ways Animals are Different: Fluency
- In this section, you will ask questions to find out the topic of an information text.
 - In this section, you will tell how details give information about a topic.
 - In this section, you will use letters to build the words **he** and **she**.
 - In this section, you will blend sounds to read words with short **i**.
 - In this section, you will select a book to read on your own.
5. Ways Animals are Different: Synthesize
- In this section, you will retell details of an information text.
 - In this section, you will answer questions to help you understand a text you have listened to.
 - In this section, you will read the word **She** in a book.
 - In this section, you will build words with short **i**, **a**, and **o**.

12. Animal Parents and Babies

1. Animal Parents and Babies: Genre
- In this section, you will predict what a text will be about using details in the pictures.
 - In this section, you will change the beginning sound in a word to make a new word.
 - In this section, you will repeat the high-frequency word **one**.
 - In this section, you will identify describing words, or adjectives, that tell about size.
2. Animal Parents and Babies: Comprehension
- In this section, you will use details to answer questions about a text.
 - In this section, you will identify describing words, or adjectives, that tell about shape.
 - In this section, you will identify the high-frequency word **one**.
 - In this section, you will say the sound you hear at the beginning and end of words.
 - In this section, you will practice writing capital **F** and lowercase **f**.
3. Animal Parents and Babies: Speak/Listen
- In this section, you will describe how two events in a text are connected.
 - In this section, you will identify describing words, or adjectives, that tell how things feel.
 - In this section, you will match high-frequency words **she** and **one**.

- In this section, you will name the sound for the letter **f**.
4. Animal Parents and Babies: Fluency
 - In this section, you will describe how two ideas are connected.
 - In this section, you will add describing words that tell about size, shape, and feel.
 - In this section, you will select a book to read on your own.
 - In this section, you will use letters to build the words **she** and **one**.
 - In this section, you will say the sound you hear at the beginning and end of words.
 - In this section, you will practice writing capital **G** and lowercase **g**.
 5. Animal Parents and Babies: Synthesize
 - In this section, you will describe how two pieces of information in a text connect.
 - In this section, you will tell about people you know.
 - In this section, you will read the word **One** in a book.
 - In this section, you will name the sound for the letter **g**.

13. Animals Working Together

1. Animals Working Together: Genre
 - In this section, you will predict what a text will be about using details in the pictures.
 - In this section, you will say the ending sound in a word.
 - In this section, you will repeat the high-frequency word **can**.
 - In this section, you will identify words that go together in the same group.
2. Animals Working Together: Comprehension
 - In this section, you will use details to answer questions about a text.
 - In this section, you will sort words that go together.
 - In this section, you will identify the high-frequency word **can**.
 - In this section, you will say the sound you hear at the beginning and in the middle of words.
 - In this section, you will practice writing capital **E** and lowercase **e**.
3. Animals Working Together: Speak/Listen
 - In this section, you will answer questions about new words in a text.
 - In this section, you will identify words that name categories.
 - In this section, you will match high-frequency words **one** and **can**.
 - In this section, you will name the short sound for the letter **e**.
4. Animals Working Together: Fluency
 - In this section, you will find the meaning of new words in an information text.
 - In this section, you will think aloud to ask and answer questions about new words in a text.
 - In this section, you will select a book to read on your own.
 - In this section, you will use letters to build the words **one** and **can**.
 - In this section, you will blend sounds to read words with short **e**.
5. Animals Working Together: Synthesize
 - In this section, you will read the word **can** in a book.
 - In this section, you will build words with short **e, a, i, and o**.
6. Animals, Animals Unit Test

14. Feeling Angry

1. Feeling Angry: Genre
 - In this section, you will predict what a text will be about using details in the pictures.
 - In this section, you will define prepositions.
 - In this section, you will repeat the high-frequency word **what**.
 - In this section, you will say the sound you hear at the beginnings of words.
 - In this section, you will identify that an information text gives facts about something.
2. Feeling Angry: Comprehension
 - In this section, you will answer questions about the details in a text.
 - In this section, you will identify the high-frequency word **What**.
 - In this section, you will name the sound for the letter **h**.
 - In this section, you will practice writing capital **H** and lowercase **h**.
 - In this section, you will identify the topic in the beginning of an information text.
3. Feeling Angry: Speak/Listen
 - In this section, you will identify the front cover, title page, and back cover of a book.
 - In this section, you will use prepositions in sentences.
 - In this section, you will match high-frequency words **Can, can, What** and **what**.
 - In this section, you will say the sound you hear at the beginning and end of words.
 - In this section, you will identify facts in the middle of an information text.
4. Feeling Angry: Fluency
 - In this section, you will identify details in a book by using the table of contents.
 - In this section, you will use letters to build the words **can** and **what**.
 - In this section, you will name the sound for the letter **L, l**.
 - In this section, you will practice writing capital **L** and lowercase **l**.
 - In this section, you will identify the topic at the end of an information text.
5. Feeling Angry: Synthesize
 - In this section, you will tell how an author and an illustrator work together to give information.
 - In this section, you will tell about places you know.
 - In this section, you will read the word **What** in a book.
 - In this section, you will tell how writers pick a topic for an information text.

15. Feeling Happy

1. Feeling Happy: Genre
 - In this section, you will predict what a text will be about using details in the pictures.
 - In this section, you will identify new meanings for words you already know.
 - In this section, you will repeat the high-frequency words **Do** and **do**.
 - In this section, you will say the sound you hear at the beginning and in the middle of words.
 - In this section, you will plan an information text by picking a topic.
2. Feeling Happy: Comprehension
 - In this section, you will use details to answer questions about a text.

- In this section, you will identify the high-frequency words **Do** and **do**.
 - In this section, you will name the short sound for the letter **u**.
 - In this section, you will practice writing capital **U** and lowercase **u**.
 - In this section, you will write the beginning of an information text.
3. Feeling Happy: Speak/Listen
- In this section, you will ask questions about details in a text.
 - In this section, you will use words with more than one meaning.
 - In this section, you will match high-frequency words **what** and **do**.
 - In this section, you will blend sounds to read words with short **u**.
 - In this section, you will write the middle and ending of an information text.
4. Feeling Happy: Fluency
- In this section, you will use details to find the topic of a text.
 - In this section, you will use letters to build the words **what** and **do**.
 - In this section, you will build words with the short vowels **a, e, i, o,** and **u**.
 - In this section, you will add details to your information text.
5. Feeling Happy: Write
- In this section, you will retell details of an information text.
 - In this section, you will tell facts you have learned in a loud, clear voice.
 - In this section, you will read the words **Do** and **do** in a book.
 - In this section, you will share your information text.

16. Feeling Sad

1. Feeling Sad: Genre
- In this section, you will predict what a book will be about using details in the pictures.
 - In this section, you will change the ending sound in a word to make a new word.
 - In this section, you will repeat the high-frequency words **Are** and **are**.
 - In this section, you will tell what it means when words are antonyms, or have opposite meanings.
2. Feeling Sad: Comprehension
- In this section, you will use details to answer questions about a book.
 - In this section, you will identify action words, or verbs, with antonyms.
 - In this section, you will identify the high-frequency words **Are** and **are**.
 - In this section, you will build words with **m, s,** and **t**.
3. Feeling Sad: Speak/Listen
- In this section, you will identify details about people in the pictures of an information text.
 - In this section, you will identify describing words, or adjectives, that have antonyms.
 - In this section, you will match high-frequency words **do** and **are**.
 - In this section, you will build words with **p, n,** and **d**.
 - In this section, you will practice writing **Mm, Pp,** and **Ss**.
4. Feeling Sad: Fluency
- In this section, you will identify details of places in pictures in an information text.
 - In this section, you will read a text aloud.
 - In this section, you will select a book to read on your own.
 - In this section, you will use letters to build the words **do** and **are**.

- In this section, you will build words with **b, c,** and **f.**
5. Feeling Sad: Synthesize
- In this section, you will identify details about things in an information text.
 - In this section, you will draw pictures to tell more about something.
 - In this section, you will read the words **Are** and **are** in a book.
 - In this section, you will build words with **g, h,** and **l.**

17. Feeling Scared

1. Feeling Scared: Genre
- In this section, you will predict what a book will be about using details in pictures.
 - In this section, you will tell how the meanings of action words, or verbs, are alike.
 - In this section, you will repeat the high-frequency words **They** and **they.**
 - In this section, you will build words with short **a.**
2. Feeling Scared: Comprehension
- In this section, you will use details to answer questions about an information text.
 - In this section, you will identify the high-frequency words **They** and **they.**
 - In this section, you will build words with short **e.**
 - In this section, you will practice writing **Aa, Ee,** and **Ii.**
 - In this section, you will find details that will help you answer a question.
3. Feeling Scared: Speak/Listen
- In this section, you will identify details that tell about an author’s feelings about a topic.
 - In this section, you will name verbs with meanings that are alike.
 - In this section, you will match high-frequency words **are** and **they.**
 - In this section, you will build words with short **i.**
 - In this section, you will write sentences to tell why you think the way you do.
4. Feeling Scared: Fluency
- In this section, you will look for details that give reasons that tell why an author feels a certain way about a topic.
 - In this section, you will use letters to build the words **are** and **they.**
 - In this section, you will build words with short **o.**
 - In this section, you will draw a picture of a detail in your sentences.
5. Feeling Scared: Synthesize
- In this section, you will read the word **they** in a book.
 - In this section, you will build words with short **u.**
6. We Have Feelings Unit Test

Semester B Summary:

In this course, the student will learn, practice, and apply the fundamental skills and strategies that will provide the foundation to grow into a strong, fluent reader, writer, and communicator. Reading, writing, and language instruction are presented in close alignment with the Common Core State Standards (CCSS). Daily instruction in phonics and spelling as well as high frequency words serves as a building block that enables the student to emerge as a reader. Core reading instruction gives the student the opportunity to listen to, read together, and read independently texts in a variety of literary and nonfiction genres. The instruction is presented in a Peer Model

mode, in which the student views a video of a peer learning how to use and apply the target core reading skill. The focus of core reading instruction is to develop the ability to comprehend and analyze texts. Instruction in the mechanics of writing serves as a building block that allows the student to emerge as a writer. Writing instruction guides the student through the process of dictating and writing narrative and informational texts. Speaking and Listening instruction is presented in a 21st Century mode, in which the student gains proficiency in the skills, knowledge, and expertise they must master to succeed in life and eventually the workplace. Together, the course elements ensure that the student grows as a reader, writer, and communicator.

Semester B Outline

1. Course Overview

1. ELA Semester B Course Overview

2. We Learn About the World

1. We Learn About the World: Genre

- In this section, you will predict what a story will be about using details in the pictures.
- In this section, you will identify how sounds and letters in some words are the same.
- In this section, you will repeat the high-frequency word **have**.
- In this section, you will identify naming words, or nouns.

2. We Learn About the World: Comprehension

- In this section, you will use details to answer questions about a story.
- In this section, you will identify the high-frequency word **have**.
- In this section, you will form plural nouns.
- In this section, you will say the sound you hear at the beginning of words.

3. We Learn About the World: Speak/Listen

- In this section, you will use details to answer questions about characters in the story.
- In this section, you will match high-frequency words **they** and **have**.
- In this section, you will identify common and proper nouns.
- In this section, you will say the sound you hear at the beginning of words.
- In this section, you will practice writing capital and lowercase **Rr** and **Vv**.

4. We Learn About the World: Fluency

- In this section, you will use details to answer questions about the settings of a story.
- In this section, you will read high-frequency words and sentences with high-frequency words.
- In this section, you will use letters to build the words **they** and **have**.
- In this section, you will name the sound for the letter **r** and the sound for the letter **v**.
- In this section, you will select a book to read on your own.

5. We Learn About the World: Synthesize

- In this section, you will use details to answer questions about events in a story.
- In this section, you will tell about things you know.
- In this section, you will read the word **have** in a book.

3. Now I Can Do It

1. Now I Can Do It: Genre
 - In this section, you will predict what a story will be about using details in the pictures.
 - In this section, you will learn how to use a book.
 - In this section, you will repeat the high-frequency word **went**.
 - In this section, you will identify verbs that tell actions.
 2. Now I Can Do It: Comprehension
 - In this section, you will use details to answer questions about a story.
 - In this section, you will identify the high-frequency word **went**.
 - In this section, you will identify how the verbs **is** and **are** help tell what people, animals, and things are like.
 - In this section, you will say the sound you hear at the beginning of words.
 3. Now I Can Do It: Speak/Listen
 - In this section, you will describe characters in the story.
 - In this section, you will match high-frequency words **have** and **went**.
 - In this section, you will identify that a sentence is complete when it has two parts.
 - In this section, you will practice writing capital and lowercase **Kk** and **Jj**.
 - In this section, you will say the sound you hear at the beginning and end of words.
 4. Now I Can Do It: Fluency
 - In this section, you will describe what a character does.
 - In this section, you will find details that describe characters in a story.
 - In this section, you will use letters to build the words **have** and **went**.
 - In this section, you will name the sound for the letter **j** and the sound for the letter **k**.
 - In this section, you will select a book to read on your own.
 5. Now I Can Do It: Synthesize
 - In this section, you will use details to draw conclusions about a story.
 - In this section, you will tell about events you have seen or been to.
 - In this section, you will read the word **went** in a book.
4. **Say Goodbye to Fear!**
1. Say Goodbye to Fear!: Genre
 - In this section, you will predict what a story will be about using details in the pictures.
 - In this section, you will name the sounds that are different in words that are spelled in almost the same way.
 - In this section, you will repeat the high-frequency word **like**.
 - In this section, you will add **-ed** to verbs to tell about actions in the past.
 2. Say Goodbye to Fear!: Comprehension
 - In this section, you will learn words with more than one meaning in a story.
 - In this section, you will identify the high-frequency word **like**.
 - In this section, you will add **-ing** to verbs to tell about actions that happen now.
 - In this section, you will say the sound you hear at the beginning of words.
 3. Say Goodbye to Fear!: Speak/Listen
 - In this section, you will identify a character's problem in a story.

- In this section, you will match high-frequency words **went** and **like**.
 - In this section, you will use verbs to tell when an action happens.
 - In this section, you will practice writing capital and lowercase **Ww** and **Yy**.
 - In this section, you will say the sound you hear at the beginning of words.
4. Say Goodbye to Fear!: Fluency
 - In this section, you will use details to identify how a character solves a problem.
 - In this section, you will add endings to verbs to show when actions happen.
 - In this section, you will use letters to build the words **went** and **like**.
 - In this section, you will name the sound for the letter **w** and the sound for the letter **y**.
 5. Say Goodbye to Fear!: Synthesize
 - In this section, you will retell how a character solves a problem.
 - In this section, you will ask questions about what you hear.
 - In this section, you will read the word **like** in a book.
- 5. On Our Own**
1. On Our Own: Genre
 - In this section, you will predict what a poem will be about using details in the pictures.
 - In this section, you will change sounds in words to make new words.
 - In this section, you will repeat the high-frequency word **to**.
 - In this section, you will use verbs in sentences.
 2. On Our Own: Comprehension
 - In this section, you will use details to answer questions about a poem.
 - In this section, you will tell how to begin and end a telling sentence.
 - In this section, you will identify the high-frequency word **to**.
 - In this section, you will say the sound of short **a** and short **e** in the middle of words.
 - In this section, you will practice writing lowercase **a** and **e**.
 3. On Our Own: Speak/Listen
 - In this section, you will ask questions about details to add missing information and make an inference.
 - In this section, you will match the high-frequency words **like** and **to**.
 - In this section, you will tell how to begin and end an asking sentence.
 - In this section, you will name words with short **a** and short **e**.
 4. On Our Own: Fluency
 - In this section, you will think about what you know about details to draw a conclusion.
 - In this section, you will read words with short **a** and short **e**.
 - In this section, you will use letters to build the words **like** and **to**.
 - In this section, you will blend sounds to read words with short **a** and short **e**.
 - In this section, you will select a book to read on your own.
 5. On Our Own: Synthesize
 - In this section, you will read the word **to** in a book.
 - In this section, you will build words with short **a** and short **e**.
 6. Learning and Growing Unit Test
- 6. Help Can Be a Surprise**
1. Help Can Be a Surprise: Genre

- In this section, you will predict what a story will be about by using details in the pictures.
 - In this section, you will repeat the high-frequency word **my**.
 - In this section, you will begin questions with **who, what, and where**.
 - In this section, you will tell about things you like and do not like.
2. Help Can Be a Surprise: Comprehension
- In this section, you will answer questions about the details in a story.
 - In this section, you will identify the high-frequency word **my**.
 - In this section, you will say the sound of short **i**, short **o**, and short **u** in the middle of words.
 - In this section, you will practice writing lowercase **i, o, and u**.
 - In this section, you will learn words that help you talk about your opinion.
3. Help Can Be a Surprise: Speak/Listen
- In this section, you will compare two different characters.
 - In this section, you will match high-frequency words **to** and **my**.
 - In this section, you will begin questions with **when, why, and how**.
 - In this section, you will name words with short **i**, short **o**, and short **u**.
 - In this section, you will ask questions to help you understand other people's opinions.
4. Help Can Be a Surprise: Fluency
- In this section, you will contrast characters in a story.
 - In this section, you will practice writing capital **I, O, and U**.
 - In this section, you will use letters to build the words **to** and **my**.
 - In this section, you will build words with short **i**, short **o**, and short **u**.
 - In this section, you will look for an opinion in a story.
5. Help Can Be a Surprise: Synthesize
- In this section, you will contrast different events in a story.
 - In this section, you will clearly say what you mean.
 - In this section, you will read the word **my** in a book.
 - In this section, you will draw a picture that shows your opinion about something.

7. Help Can Be Anywhere

1. Help Can Be Anywhere: Genre
- In this section, you will use details to predict what a story will be about.
 - In this section, you will repeat the high-frequency word **go**.
 - In this section, you will identify telling, asking, and exclamation sentences.
 - In this section, you will tell how you feel about a topic you have chosen.
2. Help Can Be Anywhere: Comprehension
- In this section, you will use key details to answer questions about a story.
 - In this section, you will identify the high-frequency word **go**.
 - In this section, you will say the sound you hear at the beginning and at the ending of words.
 - In this section, you will practice writing capital and lowercase **Zz** and **Qq**.
 - In this section, you will tell your opinion about a topic.
3. Help Can Be Anywhere: Speak/Listen
- In this section, you will identify what a fairy tale is.
 - In this section, you will match high-frequency words **my** and **go**.
 - In this section, you will write different kinds of sentences.

- In this section, you will say the sound you hear at the beginning of words.
 - In this section, you will write sentences that explain your opinion.
4. Help Can Be Anywhere: Fluency
- In this section, you will tell what happens at the beginning, middle, and end of a fairy tale.
 - In this section, you will use letters to build the words **my** and **go**.
 - In this section, you will use correct letters and end marks to begin and end different kinds of sentences.
 - In this section, you will name words with the sound for the letter **z** and the sound for the letters **qu**.
 - In this section, you will add details to your opinion.
5. Help Can Be Anywhere: Write
- In this section, you will retell a fairy tale using pictures or illustrations.
 - In this section, you will speak in a “just-right” voice that others can understand.
 - In this section, you will read the word **go** in a book.
 - In this section, you will share your opinion writing.

8. Small Helpers

1. Small Helpers: Genre
- In this section, you will predict what a story will be about using details in the pictures.
 - In this section, you will repeat the high-frequency word **me**.
 - In this section, you will identify describing words in sentences.
 - In this section, you will change sounds and letters to make new words.
2. Small Helpers: Comprehension
- In this section, you will use details to answer questions about a story.
 - In this section, you will identify the high-frequency word **me**.
 - In this section, you will use words ending with **-er** and **-est** to show comparisons.
 - In this section, you will say the sound you hear at the beginning and in the middle of words.
 - In this section, you will practice tracing circle strokes.
 - In this section, you will plan a story.
3. Small Helpers: Speak/Listen
- In this section, you will identify a fable.
 - In this section, you will match the high-frequency words **go** and **me**.
 - In this section, you will add describing words to sentences.
 - In this section, you will name words with the long-**a** sound.
 - In this section, you will write a story.
4. Small Helpers: Fluency
- In this section, you will tell how a character in a fable solves a problem.
 - In this section, you will name the problem in a fable.
 - In this section, you will use letters to build the words **go** and **me**.
 - In this section, you will build words with the long **a** vowel sound.
 - In this section, you will practice writing **Cc**, **Dd**, and **Oo**.
 - In this section, you will select a book to read on your own.
 - In this section, you will add details to your story.
5. Small Helpers: Synthesize

- In this section, you will retell a fable using key details.
- In this section, you will speak at a speed that is not too fast or too slow.
- In this section, you will read the word **me** in a book.

9. Ways We Help

1. Ways We Help: Genre

- In this section, you will predict what poems will be about using details in the pictures.
- In this section, you will repeat the high-frequency word **said**.
- In this section, you will add **re-** to change the meaning of a verb.
- In this section, you will recognize rhyming words and say words that rhyme.

2. Ways We Help: Comprehension

- In this section, you will tell what a poem is.
- In this section, you will identify the high-frequency word **said**.
- In this section, you will say the sound of short **a** and long **a** in the middle of words.
- In this section, you will practice writing capital **X** and lowercase **x**.
- In this section, you will tell about the parts of a poem.

3. Ways We Help: Speak/Listen

- In this section, you will identify rhyme and rhythm in a poem.
- In this section, you will match high-frequency words **me** and **said**.
- In this section, you will add **un-** to change the meaning of a verb.
- In this section, you will name words with the short-**a** and long-**a** vowel sounds.
- In this section, you will pick rhyming words to use in a poem.

4. Ways We Help: Fluency

- In this section, you will use details to answer questions about poems.
- In this section, you will use letters to build the words **me** and **said**.
- In this section, you will say the sounds you hear at the ends of words.
- In this section, you will use rhyming words to write a poem.

5. Ways We Help: Synthesize

- In this section, you will read the word **said** in a book.
- In this section, you will name words with the sound for the letter **x**.

6. Helping Hands Unit Test

10. Where the Wind Blows

1. Where the Wind Blows: Genre

- In this section, you will use details to predict what an information text will be about using details in the pictures.
- In this section, you will repeat the high-frequency word **am**.
- In this section, you will identify a syllable by its vowel sound.
- In this section, you will use action words that are antonyms.

2. Where the Wind Blows: Comprehension

- In this section, you will answer questions about what happens in a text.
- In this section, you will use describing words that are antonyms.
- In this section, you will identify the high-frequency word **am**.
- In this section, you will say the sound you hear in the beginning and middle of words.
- In this section, you will practice writing **Ii**, **Ff**, and **Tt**.

3. Where the Wind Blows: Speak/Listen
 - In this section, you will ask **who** and **when** questions to add missing information or make an inference.
 - In this section, you will match high-frequency words **said** and **am**.
 - In this section, you will tell about a book.
 - In this section, you will name words with the short **i** and long **i** vowel sounds.
4. Where the Wind Blows: Fluency
 - In this section, you will answer **when** and **what** questions to add missing information or make an inference.
 - In this section, you will use words that tell how you feel, what you learned, and what you think about a book.
 - In this section, you will use letters to build the words **said** and **am**.
 - In this section, you will build words with the short **i** and long **i** vowel sounds
 - In this section, you will select a book to read on your own.
5. Where the Wind Blows: Synthesize
 - In this section, you will answer questions about details so you can add information, or draw a conclusion.
 - In this section, you will ask questions about something you don't understand
 - In this section, you will read the word **am** in a book.

11. Ready for the Rain

1. Ready for the Rain: Genre
 - In this section, you will use details to predict what an informational text will be about using details in the pictures.
 - In this section, you will repeat the high-frequency word **and**.
 - In this section, you will add sounds to words to make new words.
 - In this section, you will identify words that tell where.
2. Ready for the Rain: Comprehension
 - In this section, you will use details to answer questions about a text.
 - In this section, you will identify the high-frequency word **and**.
 - In this section, you will use words that tell where in sentences.
 - In this section, you will say the sound you hear in the middle of words.
 - In this section, you will practice writing numbers **1, 2, 3, 4, and 5**.
3. Ready for the Rain: Speak/Listen
 - In this section, you will make connections among people in a text.
 - In this section, you will match high-frequency words **am** and **and**.
 - In this section, you will use words to describe things you know.
 - In this section, you will name words with the long-**o** sound.
4. Ready for the Rain: Fluency
 - In this section, you will tell how two informational texts are alike.
 - In this section, you will read words with long **o**.
 - In this section, you will use letters to build the words **am** and **and**.
 - In this section, you will build words with long **o**.
 - In this section, you will select a book to read on your own.
5. Ready for the Rain: Synthesize
 - In this section, you will tell how information texts are different.

- In this section, you will answer questions to help you understand something.
- In this section, you will read the word **and** in a book.

12. Snowy Days

1. Snowy Days: Genre
 - In this section, you will predict what a text will be about using details in the pictures.
 - In this section, you will repeat the high-frequency word **so**.
 - In this section, you will read simple words.
 - In this section, you will define a pronoun.
2. Snowy Days: Comprehension
 - In this section, you will use details to answer questions about a book
 - In this section, you will identify pronouns and the nouns they stand for.
 - In this section, you will identify the high-frequency word **so**.
 - In this section, you will say the sounds of short **o** and long **o** in the middle of words.
 - In this section, you will practice writing numbers **6, 7, 8, 9, and 10**.
3. Snowy Days: Speak/Listen
 - In this section, you will identify key details about the topic of the book.
 - In this section, you will match high-frequency words **and** and **so**.
 - In this section, you will use the pronoun **I**.
 - In this section, you will name words with the short **o** and long **o** vowel sounds.
4. Snowy Days: Fluency
 - In this section, you will use a table of contents to find facts and details in a book.
 - In this section, you will read high-frequency words and sentences with high-frequency words.
 - In this section, you will use letters to build the words **and** and **so**.
 - In this section, you will select a book to read on your own.
 - In this section, you will build words with the short **o** and long **o** vowel sounds.
 - In this section, you will practice writing number words for **1, 2, 3, 4, and 5**.
5. Snowy Days: Synthesize
 - In this section, you will identify details in pictures about a topic.
 - In this section, you will follow directions that someone tells you.
 - In this section, you will read the word **So** in a book.

13. All About Fog

1. All About Fog: Genre
 - In this section, you will use the details in pictures to predict what a book will be about.
 - In this section, you will repeat the high-frequency word **it**.
 - In this section, you will explain where to find words in a dictionary.
 - In this section, you will define joining words, or conjunctions.
2. All About Fog: Comprehension
 - In this section, you will use details to answer questions about a text.
 - In this section, you will identify the high-frequency word **it**.

- In this section, you will identify joining words in sentences.
 - In this section, you will say the sound you hear in the middle and at the end of words.
 - In this section, you will practice writing number words for **6, 7, 8, 9, and 10**.
3. All About Fog: Speak/Listen
- In this section, you will tell what the topic of an informational text is.
 - In this section, you will match high-frequency words **so** and **it**.
 - In this section, you will use joining words to put sentences together.
 - In this section, you will name words with the long **e** sound.
4. All About Fog: Fluency
- In this section, you will find details about the topic of an information text.
 - In this section, you will tell the topic of an information text.
 - In this section, you will use letters to build the words **so** and **it**.
 - In this section, you will blend sounds to read words with long **e**.
 - In this section, you will select a book to read on your own.
5. All About Fog: Synthesize
- In this section, you will read the word **it** in a book.
 - In this section, you will build words with long **e**.
6. Whatever the Weather Unit Test

14. **Good Food for You**

1. Good Food for You: Genre
- In this section, you will predict what a book will be about using details in the pictures.
 - In this section, you will repeat the high-frequency word **was**.
 - In this section, you will identify how **-ful** changes the meaning of a word.
 - In this section, you will tell what how-to books do.
2. Good Food for You: Comprehension
- In this section, you will use key details to answer questions about a text.
 - In this section, you will identify the high-frequency word **was**.
 - In this section, you will say the sound of short **e** and long **e** in the middle of words.
 - In this section, you will practice writing capital letters **A** to **M**.
 - In this section, you will tell what the topic of a how-to book is.
3. Good Food for You: Speak/Listen
- In this section, you will use headings to find key details.
 - In this section, you will match high-frequency words **it** and **was**.
 - In this section, you will identify how **-less** changes the meaning of a word.
 - In this section, you will name words with the short **e** and long **e** vowel sounds.
 - In this section, you will tell how pictures and words help writers tell how to do a step in a how-to book.
4. Good Food for You: Fluency
- In this section, you will answer questions about key details in a diagram.
 - In this section, you will use letters to build the words **it** and **was**.
 - In this section, you will build words with the short **e** and long **e** vowel sounds.
 - In this section, you will practice writing capital letters **N** to **Z**.

- In this section, you will pick a topic for your how-to book.
5. Good Food for You: Synthesize
- In this section, you will retell about details in a diagram.
 - In this section, you will repeat directions that have two steps to show you understand them.
 - In this section, you will read the word **was** in a book.
 - In this section, you will write the steps for your how-to book.

15.A World of Healthy Food

1. A World of Healthy Food: Genre
- In this section, you will predict what a text will be about using details in the pictures.
 - In this section, you will identify how **pre-** changes the meaning of a word.
 - In this section, you will repeat the high-frequency word **up**.
 - In this section, you will draw pictures that show how to do the steps in your how-to book.
2. A World of Healthy Food: Comprehension
- In this section, you will use details to answer questions about a text.
 - In this section, you will identify the high-frequency word **up**.
 - In this section, you will say the sound you hear in the middle of words.
 - In this section, you will practice writing a favorite word.
 - In this section, you will ask your Learning Coach questions about your how-to book.
3. A World of Healthy Food: Speak/Listen
- In this section, you will identify an author's purpose for writing a text.
 - In this section, you will match high-frequency words **was** and **up**.
 - In this section, you will use words with **-ful**, **-less**, and **pre-**.
 - In this section, you will name words with the long **u** sound.
 - In this section, you will answer questions to make your how-to book better.
4. A World of Healthy Food: Fluency
- In this section, you will retell details in a picture to tell what happens first, next, then, and last.
 - In this section, you will use letters to build the words **was** and **up**.
 - In this section, you will build words with long **u**.
 - In this section, you will make your writing better by adding a beginning, an ending, and describing words.
5. A World of Healthy Food: Synthesize
- In this section, you will tell how a picture gives information about a topic.
 - In this section, you will follow directions that have two steps.
 - In this section, you will read the word **up** in a book.
 - In this section, you will add details that make the order of the steps clear.

16.Many Ways to Eat a Food

1. Many Ways to Eat a Food: Genre
- In this section, you will predict what a book will be about using details in the pictures.
 - In this section, you will repeat the high-frequency word **at**.
 - In this section, you will tell which groups of words begin with the same sound.
 - In this section, you will identify words that have more than one meaning.

2. Many Ways to Eat a Food: Comprehension
 - In this section, you will use details to answer questions about a text.
 - In this section, you will identify the high-frequency word **at**.
 - In this section, you will identify new meanings for words you already know.
 - In this section, you will say the sound of short **u** and long **u** in the middle of words.
3. Many Ways to Eat a Food: Speak/Listen
 - In this section, you will find bold words in an informational text.
 - In this section, you will match high-frequency words **up** and **at**.
 - In this section, you will identify the best word to use when the words mean almost the same thing.
 - In this section, you will name words with the short **u** and long **u** vowel sounds.
 - In this section, you will practice writing lowercase letters **a** to **m**.
4. Many Ways to Eat a Food: Fluency
 - In this section, you will find the meanings of words with more than one meaning.
 - In this section, you will choose the right meaning of a word with more than one meaning.
 - In this section, you will use letters to build the words **up** and **at**.
 - In this section, you will build words with the short **u** and long **u** vowel sounds.
 - In this section, you will select a book to read on your own.
5. Many Ways to Eat a Food: Synthesize
 - In this section, you will find the meanings of words in a glossary.
 - In this section, you will give directions that have two steps.
 - In this section, you will read the word **at** in a book.

17. Chefs Cook

1. Chefs Cook: Genre
 - In this section, you will predict what a text will be about using details in the pictures.
 - In this section, you will make changes to your how-to book to make it better.
 - In this section, you will repeat the high-frequency word **in**.
 - In this section, you will name numbers **0** to **100**.
2. Chefs Cook: Comprehension
 - In this section, you will use details to answer questions about a text.
 - In this section, you will identify the high-frequency word **in**.
 - In this section, you will spell words with short **a** vowel sounds.
 - In this section, you will practice writing lowercase letters **n** to **z**.
 - In this section, you will fix mistakes in your how-to book.
3. Chefs Cook: Speak/Listen
 - In this section, you will find text evidence to answer a question.
 - In this section, you will add words to sentences that tell how many.
 - In this section, you will match high-frequency words **at** and **in**.
 - In this section, you will spell words with the short **e** vowel sound.
 - In this section, you will finish writing your how-to book.
4. Chefs Cook: Write

- In this section, you will use text evidence to answer a question about the topic of an information text.
 - In this section, you will use letters to build the words **at** and **in**.
 - In this section, you will spell words with the short **i** vowel sound.
 - In this section, you will share your finished how-to book with others.
5. Chefs Cook: Synthesize
- In this section, you will read the word **in** in a book.
 - In this section, you will spell words with the short **o** and short **u** vowel sounds.
6. Everybody Eats! Unit Test

Language Arts 1

Language Arts 1 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Throughout the this course, the student will master key foundational skills such as phonemic awareness, letter-sound correspondence, basic features of print, and decoding one and two-syllable, frequently-occurring words, both regularly and irregularly spelled. Through frequent practice, including Reading Writing Workshop, Literature Anthology, Leveled Readers, and Decodable Readers, the student will gain fluency in reading connected texts.

Stories are organized into themes such as "Getting to Know Us" and "Our Community." Examining literature through themes helps the student to make connections between texts and to connect reading topics to personal knowledge and interests. The student will explore varied literary genres including fiction, realistic fiction, nonfiction, biography, poetry, fantasy, and drama.

The student will respond to writing prompts on a variety of texts. As the student practices close-reading by reading and rereading a text, he will take notes and cite text evidence. After reading, the student will write briefly on what he recalls about the text in order to build writing fluency. Through the scaffolded instruction in writing about text in Shared Writing, the student will respond to a writing prompt, using sentence frames as needed. In Interactive Writing, the student analyzes a model response that includes the weekly writing trait before responding to a new prompt together. In Independent Writing, the student writes independently, applying close-reading skills and traits to his own writing.

Course Outline

Language Arts 1 A

1. Course Overview

1. Lesson 1

2. Getting to Know Us

1. At School Day 1

- Identify and demonstrate the correct way to hold a book and where to find the title, author, and illustrator
- Use pictures and words in a story to identify key details

- Identify and spell words with short a
- Identify rhyming words
- Recognize the correct way to hold a pencil when writing
- Recognize that a sentence is a complete thought
- Discuss what makes you special and what you do at school

At School Day 2

- Identify characteristics of realistic fiction
- Find key details in a story
- Read words with short a and read high-frequency words does, not, school, and what
- Identify and mark on handwriting lines the top, middle, and bottom lines
- Write a response using words from the story
- Distinguish between a phrase and a complete sentence
- Discuss the Independent Reading selection

At School Day 3

- Identify key ideas and details about the story
- Use the pictures of the story to apply the visualization strategy
- Demonstrate blending of words with short a
- Demonstrate pausing at punctuation marks
- Identify and trace vertical, horizontal, and curved lines
- Write a response using words from the story
- Demonstrate correct use of capital letters to start sentences

At School Day 4

- Categorize spelling words by ending spelling pattern
- Identify key ideas and details about the story
- Use the illustrations of the story to visualize
- Build words with short a
- Use inflectional ending -s
- Distinguish between a phrase and a complete sentence

At School Day 5

- Blend and build words with short a
- Define oral vocabulary
- Read high frequency words does, not, school, and what
- Make connections to a topic
- Complete sentences using key details from the story (integrate ideas)
- Demonstrate correct use of capital letters to start sentences
- Use speaking and listening strategies

Where I Live

Where I Live Day 1

- Demonstrate concepts of print, including the correct way to hold a book, where to find the title, author, and illustrator, and reading from left to right
- Use pictures and words in a story to identify key details
- Identify and spell words with short i
- Write a response using words from the story
- Use words in order when speaking
- Discuss what it's like where you live
- Find new words in the independent reading selection

Where I Live Day 2

- Identify characteristics of fantasy
- Identify key ideas and details the story
- Read words with short i
- Read high-frequency words: down, out, up, and very
- Identify and practice writing capital I and lowercase i
- Write a response using describing details
- Use words in order when speaking

Where I Live Day 3

- Identify key ideas and details about the story
- Use the words of the story to visualize
- Blend words with short i
- Demonstrate reading with emphasis of important words
- Identify and practice writing capital L and lowercase l
- Write a response using describing details
- Demonstrate correctly ending sentences with a period

Where I Live Day 4

- Categorize spelling words by ending spelling pattern
- Identify key ideas and details about a story
- Use the words of the story to visualize
- Build words with short i
- Isolate and pronounce final sounds of double consonants
- Use words in order when speaking

Where I Live Day 5

- Blend and build words with short i
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words: down, out, up, and very
- Make connections to a topic
- Complete sentences using key details from the text
- Demonstrate correctly ending sentences with a period
- Use speaking and listening strategies

Our Pets

Our Pets Day 1

- Demonstrate how to track words as you read
- Use pictures and words in a story to identify key details
- Identify and spell words with l-blends
- Summarize the independent reading selection
- Write a narrative using a sequence of events
- Explain that a statement tells an idea
- Make connections to what was learned about pets

Our Pets Day 2

- Identify key ideas and details about the topic
- Identify characteristics of fantasy
- Read words with l-blends and read high-frequency words: be, come, good, and pull
- Identify and practice writing capital T and lowercase t
- Write a narrative using a sequence of events

- Explain that a statement tells an idea
- Make connections to what was learned about pets.

Our Pets Day 3

- Identify key ideas and details about a story
- Use the words and pictures to visualize what is happening in the story
- Blend words with I-blends
- Demonstrate pausing at punctuation marks
- Identify and practice writing capital T and lowercase t
- Write a narrative using a sequence of events
- Use capital letters to begin sentences and punctuation to end sentences

Our Pets Day 4

- Categorize spelling words by ending spelling pattern
- Read the story and make connections to a topic
- Use the words and pictures to visualize what is happening in the story
- Build words with I-blends
- Explain that a statement tells an idea
- Identify and differentiate between singular and plural nouns

Our Pets Day 5

- Blend and build words with I-blends
- Define oral vocabulary
- Read high-frequency words: be, come, good, and pull
- Make connections to a topic
- Complete sentences using key details from the text
- Demonstrate correct use of capital letters to begin sentences and punctuation to end sentences
- Use Speaking and Listening strategies

Let's Be Friends

Let's Be Friends Day 1

- Explain the purpose of labels in books
- Ask and answer questions while listening to and reading a story
- Identify and spell words with short o
- Identify and practice writing capital F and lowercase f
- Write about what children can do together
- Distinguish between questions and exclamations
- Make connections to what friends do together

Let's Be Friends Day 2

- Identify characteristics of nonfiction texts
- Identify key ideas and details about the topic
- Read words with short o and read high-frequency words: fun, make, they, and too
- Identify and practice writing capital F and lowercase f
- Write about the different things that children do to have fun
- Distinguish between questions and exclamations
- Ask and answer questions about the text and images

Let's Be Friends Day 3

- Identify key ideas and details about the topic
- Use details to understand the nonfiction genre

- Blend words with short o
- Demonstrate how to read repeated words
- Use text evidence to ask and answer questions
- Write about the different things that children do to have fun
- Write questions and exclamation sentences

Let's Be Friends Day 4

- Categorize spelling words by ending spelling patterns
- Identify key ideas and details about what friends do together
- Use photographs to understand the text
- Build words with short o
- Distinguish between questions and exclamations
- List words in alphabetical order

Let's Be Friends Day 5

- Blend and build words with short o
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words: be, come, good, and pull
- Make connections to a topic
- Complete sentences using key details from "Friends"
- Write questions and exclamation sentences
- Use Speaking and Listening strategies

Let's Move!

Let's Move! Day 1

- Ask and answer questions while listening to and reading a story
- Use special text features to locate information in a text
- Identify key ideas and details
- Identify and spell words with r- and s-blends
- Write about how kids move
- Distinguish between a phrase and a complete sentence
- Discuss how your body moves and what it can do

Let's Move! Day 2

- Identify characteristics of nonfiction
- Reread to learn about informational text
- Read words with r- and s-blends
- Read high-frequency words: jump, move, run, and two
- Identify and practice writing end marks
- Use the words first, next, and last to describe steps
- Ask and answer questions about the text and images

Let's Move! Day 3

- Use the story words and photos to learn key details
- Use text evidence to ask and answer questions
- Blend words with r- and s-blends
- Demonstrate pausing at punctuation marks
- Identify and practice writing end marks
- Use the words first, next, and last to describe steps
- Review sentence capitalization and punctuation

Let's Move Day 4

- Categorize spelling words by ending spelling pattern
- Define oral vocabulary
- Use diagrams to understand text
- Use text evidence to ask and answer questions
- Build and blend words with r- and s-blends
- Use possessive nouns correctly
- Select phrases to complete sentences

Let's Move Day 5

- Categorize spelling words by ending spelling pattern
- Use diagrams to understand text
- Use text evidence to ask and answer questions
- Build words with r- and s-blends
- Review writing complete sentences
- Use Speaking and Listening strategies

Getting to Know Us: Unit Review

- Identify the sound spelling patterns of words with short vowel sounds (a and i) and beginning blends (l blends, o blends, and beginning r blends.)
- Predict, define, and accurately use academic vocabulary words using inflectional ending -s, double final consonants, plural nouns, alphabetical order, and possessives. Accurately identify and use high-frequency words and oral vocabulary
- Use the words and pictures in a nonfiction text to identify key details; Use the words and pictures in a story to identify key details about its characters, setting, and plot
- Use the words and pictures to visualize what is happening in a story; Reread to understand key details in a nonfiction text
- Identify and analyze features of realistic fiction, fantasy, and nonfiction texts
- Identify and use sentences, word order, statements, question and exclamation marks, and writing sentences
- Identify and apply correct sentence capitalization and punctuation and use of question and exclamation marks

Getting to Know Us: Unit Test

Jobs Around Town

Jobs Around Town Day 1

- Recognize ellipses and dashes in print and demonstrate long pauses while reading
- Use words and pictures to make and confirm predictions
- Identify and spell words with short e
- Identify and practice writing li, Ll, Tt, and Ff
- Explain that a noun names a person, place, or thing
- Discuss how jobs help the community

Jobs Around Town Day 2

- Identify key characteristics of realistic fiction
- Read words with short e
- Read high-frequency words: again, help, new, there, use
- Describe character, setting and events in a story, using key details
- Identify and practice writing li, Ll, Tt, and Ff
- Write a topic sentence
- Identify nouns in sentences

Jobs Around Town Day 3

- Describe character, setting and events in a story, using key details
- Use details to understand characteristics of realistic fiction
- Blend words with short e
- Demonstrate intonation when reading exclamations and questions
- Identify and practice writing circles and part circles
- Write about a job that you would like to have
- Use commas in a series of three or more nouns

Jobs Around Town Day 4

- Categorize spelling words by ending spelling pattern
- Describe character, setting, and events in a story using key details
- Use details to understand characteristics of realistic fiction
- Build words with short e
- Identify words ending in -ed as past-tense words
- Identify and replace nouns in sentences

Jobs Around Town Day 5

- Blend and build words with short e
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words: again, help, new, there, use
- Make connections to a topic
- Using evidence in the text, explain how the author used the character, setting, and events to tell the story
- Use commas in a series of three or more nouns
- Use Speaking and Listening strategies

Buildings All Around

Buildings All Around Day 1

- Recognize that quotation marks set off words that characters say
- Use the words and pictures to make and confirm predictions
- Find new words in the independent reading selection
- Identify and spell words with short u
- Write a response using words from the story and the order words first, next, and last
- Distinguish between singular and plural nouns
- Discuss buildings and what they are made of

Buildings All Around Day 2

- Identify characteristics of fantasy
- Describe character, setting, and events in a story using key details
- Read words with short u and read high-frequency words could, live, one, then, three
- Identify and practice writing circle strokes in letters
- Write a response using details from the story and a beginning sentence
- Create sentences with singular and plural nouns orally and in writing
- Discuss buildings and what they are made of

Buildings All Around Day 3

- Describe character, setting, and events in a story using key details
- Blend words with short u
- Demonstrate expression when reading words set in quotation marks
- Write a response using details from the story and a beginning sentence

- Explain that an apostrophe takes the place of the letter or letters left out when two words form a contraction

Buildings All Around Day 4

- Describe character, setting, and events in a story using key details
- Sort spelling words by ending spelling pattern
- Identify captions and explain why they are important
- Build words with short u
- Explain and apply knowledge of contractions
- Distinguish between singular and plural nouns

Buildings All Around Day 5

- Blend and build words with short u
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words could, live, one, then, three
- Make connections to a topic by comparing stories
- Using evidence in the text, explain how the author used the character, setting, and events to tell the story
- Form contractions with apostrophe s ('s)
- Use Speaking and Listening strategies

A Community in Nature

A Community in Nature Day 1

- Recognize that sentences begin with a capital letter and end with a punctuation mark
- Reread to understand the story
- Identify and spell words with consonant blends
- Summarize the independent reading selection
- Write a response using details from the story and a beginning sentence
- Explain that a possessive noun shows that someone or something belongs to it
- Discuss different places that animals live

A Community in Nature Day 2

- Identify characteristics of nonfiction
- Identify the main topic and key details of the story
- Read words with consonant blends and read high-frequency words eat, no, of, under, and who
- Write a response using details from the story and a main idea
- Identify and practice writing capital O and lowercase o
- Recognize that an apostrophe -s ('s) is needed for possessive nouns
- Discuss how animals live together in a desert habitat

A Community in Nature Day 3

- Identify the main topic and key details of the story
- Blend words with consonant blends
- Demonstrate reading repeated words with rhythm
- Identify and practice writing capital O and lowercase o
- Begin the writing process by reviewing notes and planning to write
- Explain that a possessive noun has an apostrophe s ('s)

A Community in Nature Day 4

- Sort spelling words by ending spelling pattern
- Build words with consonant blends

- Reread to understand key details
- Explain that words that end in -ing show something happening right now
- Begin the draft of independent writing
- Identify possessive nouns and describe how they are used

A Community in Nature Day 5

- Blend and build words with consonant blends
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words eat, no, of, under, and who
- Make connections to a topic by comparing two stories
- Continue working on the independent writing draft
- Apply correct use of apostrophe -s for possessive nouns
- Use Speaking and Listening strategies

Let's Help

Let's Help Day 1

- Identify colored text in print and show that some sentences continue on to the next page
- Reread to understand the story
- Identify and spell words with consonants th, sh, -ng
- Find an important part of the independent reading selection
- Revise the draft of independent writing
- Identify common and proper nouns
- Discuss how people help out in the community

Let's Help Day 2

- Identify characteristics of fantasy
- Describe character, setting, and events in a story using key details
- Read words with consonants th, sh, and -ng
- Read the high-frequency words all, call, day, her, and want
- Identify and practice writing capital C and lowercase c
- Edit the draft of independent writing
- Describe the difference between common and proper nouns

Let's Help Day 3

- Describe character, setting, and events in a story using key details
- Blend words with consonants th, sh, and -ng
- Demonstrate reading important words with emphasis
- Reread to understand the story
- Identify and practice writing capital C and lowercase c
- Recognize that proper nouns begin with capital letters
- Present and publish independent writing

Let's Help Day 4

- Sort spelling words by consonant spelling patterns
- Describe character, setting, and events in a story using key details
- Build words with consonants th, sh, and -ng
- Demonstrate knowledge that closed syllables mean the vowel sound is usually short
- Reread to understand key details
- Distinguish between common and proper nouns

Let's Help Day 5

- Blend and build words with consonants th, sh, and -ng
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words all, call, day, her, want
- Make connections to a topic by comparing stories
- Demonstrate capitalization of proper nouns
- Provide text evidence to support your opinion
- Use Speaking and Listening strategies

Follow the Map

Follow the Map Day 1

- Demonstrate reading sentences across pages in a book
- Reread to understand the story
- Identify and spell words with consonants ch, -tch, wh, and ph
- Make connections between your experiences and the people and events in your independent reading selection
- Write a response using details from the story and a beginning sentence
- Recognize irregular plural nouns
- Discuss how you find your way around

Follow the Map Day 2

- Identify characteristics of nonfiction
- Define the main topic as what the selection is about and find the main topic and key details
- Read words with consonants ch, -tch, wh, and ph
- Read the high-frequency words around, by, many, place, and walk
- Identify and practice writing capital D and lowercase d
- Reread notes and respond to the prompt with details from the story, using maps and photographs
- Identify and read irregular plural nouns

Follow the Map Day 3

- Define the main topic as what the selection is about and find the main topic and key details
- Blend words with consonants ch, -tch, wh, and ph
- Demonstrate reading repeated words with rhythm
- Reread to understand the text
- Identify and practice writing capital E and lowercase e
- Reread notes and respond to the prompt with details from the story, using maps and photographs
- Identify statements as beginning with a capital letter and ending with a period

Follow the Map Day 4

- Use text features to find key details in a text
- Build words with consonants ch, -tch, wh, and ph
- Read words with inflectional ending -es and explain that it means more than one
- Connect to Essential Question: How can you find your way around?
- Distinguish between regular plural nouns and irregular plural nouns
- Demonstrate knowledge of oral vocabulary

Follow the Map Day 5

- Blend and build words with consonants ch, -tch, wh, and ph

- Read high-frequency words around, by, many, place, and walk
- Identify the details the author gives us about the main topic
- Make connections to a topic by comparing texts
- Write responses to what and how questions, using details from the story
- Demonstrate correct use of statements with beginning capital letter and ending with a period
- Demonstrate knowledge of oral vocabulary

Our Community: Unit Review

- Identify the sound spelling patterns of words with short vowel sounds (e and u), end blends (st, nk, nd, nt, sk, mp), consonant blends (th, sh, -ng), and consonant digraphs (ch, -tch, wh, ph)
- Predict, define, and accurately use academic vocabulary words; Accurately identify and use high-frequency words, oral vocabulary, and Words to Know
- Read and write the following types of words: words with inflectional ending -ed, contractions with 's, inflectional ending -ing, closed syllables, and inflectional ending -es
- Use the words and pictures to identify main topic and key details, to identify key details about a story's characters, setting, and plot, to make and confirm predictions
- Identify and analyze features of realistic fiction, fantasy, and nonfiction texts
- Identify and use statements and questions, commands and exclamations, subjects, predicates, and expanding and combining sentences and apply correct use of conventions of standard English grammar and usage
- Demonstrate fluency by reading a passage with accuracy and expression

Our Community: Unit Test

What Time Is It?

What Time Is It? Day 1

- Recognize that in poems, the first word in a line is capitalized even if it is not the beginning of a sentence
- Use the words and pictures to make and confirm predictions
- Identify and spell words with long a
- Identify and practice writing capital E and lowercase e
- Write a letter using correct punctuation
- Explain that an action word is called a verb
- Discuss how we measure time

What Time Is It? Day 2

- Identify characteristics of fantasy
- Define character, setting, and plot
- Read words with long a and read high-frequency words away, now, some, today, way, why
- Identify and practice writing Oo, Cc, Dd, Ee
- Write two more pages explaining what Nate does to get ready
- Identify verbs in sentences
- Discuss how we measure time, and discuss the independent reading selection

What Time Is It? Day 3

- Record what happens in the story at the beginning, middle, and the end (plot)
- Use the words and pictures to make and confirm predictions
- Blend words with long a

- Demonstrate rising the voice when reading a question
- Write two more pages explaining what Nate does to get ready
- Use commas in a series of three or more nouns

What Time Is It? Day 4

- Sort spelling words by the ending spelling pattern
- Use the text to find details about the characters, the setting, and the plot
- Connect to Essential Question: How do we measure time?
- Build words with long a
- Read words with contractions with not
- Define verbs and explain how they are used in sentences

What Time Is It? Day 5

- Blend and build words with long a
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words away, now, some, today, way, and why
- Make connections to a topic by comparing stories
- Analyze text evidence by asking why and what questions about character, setting, and plot
- Use commas in a series of three or more nouns
- Use speaking and listening strategies

Watch It Grow!

Watch It Grow! Day 1

- Recognize that ellipses and commas mean the reader should pause when reading
- Use the words and pictures to make and confirm predictions
- Identify and spell words with long i
- Write a new page for the play
- Identify and practice writing letters previously learned
- Recognize that present-tense verbs tell about an action happening now
- Discuss how plants change as they grow

Watch It Grow! Day 2

- Identify characteristics of a play
- Define sequence
- Read words with long i and read high-frequency words green, grow, pretty, should, together, water
- Write more lines to the end of the play
- Identify and trace slanted lines
- Use present-tense verbs in sentences
- Discuss how plants change as they grow

Watch It Grow! Day 3

- Describe what happens in the story at the beginning, middle, and end (sequence)
- Use the words and pictures to make and confirm predictions
- Blend words with long i
- Demonstrate pausing when encountering a comma while reading
- Identify words and phrases that bring out feelings or draw on the senses
- Write more lines to the end of the play
- Recognize that titles of plays are underlined and all important words are capitalized

Watch It Grow! Day 4

- Record what happens in the story at the beginning, middle, and end (sequence)
- Use the words and pictures to understand key details in a story
- Build words with long i
- Reread to better understand the story
- Recognize that adding -s to a noun makes it a plural noun
- Sort spelling words by the ending spelling pattern
- Use present-tense verbs in sentences

Watch It Grow! Day 5

- Blend and build words with long i
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words green, grow, pretty, should, together, and water
- Make connections to a topic by comparing two stories
- Analyze text evidence by asking how the author used the sequence of events to tell the plot of the story
- Demonstrate that titles of plays are underlined and all important words are capitalized
- Use speaking and listening strategies

Tales Over Time

Tales Over Time Day 1

- Recognize that quotation marks set off words that characters say in a story
- Use the words and pictures to make and confirm predictions
- Identify and spell words with soft c, soft g, and dge
- Summarize the independent reading selection
- Rewrite the ending of a story
- Define past- and future-tense verbs
- Discuss folktales

Tales Over Time Day 2

- Identify characteristics of folktale
- Define cause and effect
- Read words with soft c, soft g, and dge and read high frequency words: any, from, happy, once, so, upon
- Identify and practice writing capital A and lowercase a
- Rewrite the ending of a story
- Use past and future-tense verbs in sentences
- Discuss what a folktale is

Tales Over Time Day 3

- Predict what will happen as you read the story using words and pictures
- Identify causes and effects
- Blend words with soft c, soft g, and dge
- Demonstrate reading important words with emphasis
- Identify and practice writing capital V and lowercase v
- Begin the writing process by reviewing notes and planning to write (“The Gingerbread Man”)
- Use commas in a series of three or more nouns

Tales Over Time Day 4

- Compare poems by identifying rhyme and repetition
- Identify rhyme and repetition in the poem

- Identify words and phrases that bring rhythm and meaning in a poem
- Build words with soft c, soft g, and dge
- Demonstrate dropping the e and adding -ed and -ing to verbs
- Begin the draft of independent writing
- Use past- and future-tense verbs in sentences

Tales Over Time Day 5

- Blend and build words with soft c, soft g, and dge
- Read high-frequency words: any, from, happy, once, so, and upon
- Make connections to a topic by analyzing text
- Continue working on the independent writing draft
- Use commas in a series of three or more nouns
- Demonstrate knowledge of oral vocabulary
- Use speaking and listening strategies

Now and Then

Now and Then Day 1

- Read sentences across pages
- Reread to understand events and details in the story
- Identify and spell words with long o, long u, and long e
- Find an important part of the independent reading selection
- Revise the draft of independent writing
- Use verbs to express the present and past using is and are
- Discuss what life was like years ago

Now and Then Day 2

- Identify characteristics of nonfiction
- Use the text to compare and contrast the facts and details
- Read words with long o, long u, and long e, and read high-frequency words ago, boy, girl, now, old, and people
- Identify and practice writing capital Y and lowercase y
- Edit the draft of independent writing
- Identify is and are as verbs and use them correctly in sentences
- Discuss what was learned about life in the past

Now and Then Day 3

- Recognize connections between details in the text
- Reread to understand events and details in the story
- Blend words with long o, long u, and long e
- Demonstrate pausing when encountering commas, periods, and ellipses while reading
- Identify and practice writing capital Y and lowercase y
- Present and publish independent writing
- Demonstrate using commas in dates

Now and Then Day 4

- Recognize connections between details in the text
- Reread to understand events and details in the story
- Build words with long o, long u, and long e
- Explain the purpose of captions in books
- Demonstrate splitting words into discreet syllables
- Identify is and are as verbs and use them correctly in sentences

What Can Happen Over Time?

- Blend and build words with long o, long e, and long u
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words: ago, boy, girl, now, old, and people
- Make connections to a topic by comparing similarities and differences in two texts
- Analyze text evidence by asking "why" and "what" questions about how ideas and events in the text are alike and different
- Demonstrate using commas in dates
- Use Speaking and Listening strategies

From Farm to Table

From Farm to Table Day 1

- Recognize that words with different colors, boldface, or different sizes are important words
- Reread to understand events and details in the story
- Identify and spell words with the /û/ sound
- Make connections between experiences and the people and events in an independent reading selection
- Write a response to the text using evidence from the story
- Read contractions with not
- Discuss the food we eat and where it comes from

From Farm to Table Day 2

- Identify characteristics of nonfiction
- Use the text to make connections between two pieces of information
- Read words with the /û/ sound and read high-frequency words: after, buy, done, every, soon, work
- Identify and practice writing capital W and lowercase w
- Use evidence from the text to support opinion writing
- Identify parts of contractions with not
- Discuss what was learned about where food comes from in the selection

From Farm to Table Day 3

- Reread to understand text
- Identify what happens first, next, then, and last
- Blend words with the /û/ sound
- Demonstrate reading with emphasis of important words
- Identify and practice writing capital N and lowercase n
- Use evidence from the text to support opinion writing
- Identify where the apostrophe should go in a contraction with not

From Farm to Table Day 4

- Reread to understand text and information in the chart
- Identify the title and headings of the chart
- Demonstrate knowledge of oral vocabulary
- Build words with /û/
- Demonstrate adding -ed and -ing to words
- Connect to the Essential Question: How do we get our food?
- Demonstrate correct use of contractions with not

From Farm to Table Day 5

- Blend and build words with /û/
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words : after, buy, done, every, soon, work
- Make connections to a topic by comparing texts
- Analyze connections and use of sequence in text
- Identify where the apostrophe should go in a contraction with not
- Use Speaking and Listening strategies

Changes Over Time: Unit Review

- Identify the sound-spelling patterns of words with long vowel sounds (a, i, o, and u), soft c, g, and dge, and the medial u sound (/u/oo, uo)
- Predict, define, and accurately use academic vocabulary words; Accurately identify and use high-frequency words and oral vocabulary; Read and write the following types of words: contractions with not, plurals, inflectional endings -ed and- ing, and CVCe
- Use the words and pictures in a story to identify key details about its characters, setting, and plot; Describe what happens in the story at the beginning, middle, and end; Identify causes and effects; Use the text to compare and contrast the facts
- Use the words and pictures to make and confirm predictions about a story; Reread to understand key details in a story and a nonfiction text
- Identify and analyze features of fantasy, play, folktale, and nonfiction texts
- Identify and use verbs, present-tense verbs, past- and future- tense verbs, is and are, and contractions with not
- Identify and apply correct use of commas in a series, capitalization and underlining titles of plays, commas in dates, and apostrophes in contractions

Change Over Time: Unit Test

Language Arts 1 B

Course Summary: Throughout the this course, the student will master key foundational skills such as phonemic awareness, letter-sound correspondence, basic features of print, and decoding one and two-syllable, frequently-occurring words, both regularly and irregularly spelled. Through frequent practice, including Reading Writing Workshop, Literature Anthology, Leveled Readers, and Decodable Readers, the student will gain fluency in reading connected texts.

Stories are organized into themes such as "Getting to Know Us" and "Our Community." Examining literature through themes helps the student to make connections between texts and to connect reading topics to personal knowledge and interests. The student will explore varied literary genres including fiction, realistic fiction, nonfiction, biography, poetry, fantasy, and drama.

The student will respond to writing prompts on a variety of texts. As the student practices close-reading by reading and rereading a text, he will take notes and cite text evidence. After reading, the student will write briefly on what he recalls about the text in order to build writing fluency. Through the scaffolded instruction in writing about text in Shared Writing, the student will respond to a writing prompt, using sentence frames as needed. In Interactive Writing, the student analyzes a model response that includes the weekly writing trait before responding to a new prompt together. In Independent Writing, the student writes independently, applying close-reading skills and traits to his own writing.

1. Language Arts Course Overview

1. Get Ready for Language Arts!

2. Animal Features

1. Animal Features Day 1

- Ask and answer questions about a folktale while listening to and reading a story
- Identify and create rhyming long a words
- Identify and spell words with long a
- Identify whether was or were should be used to complete sentences
- Identify and practice writing capital N and lowercase n
- Discuss how animals' bodies help them

Animal Features Day 2

- Identify characteristics of folktale
- Reread to find information about the characters and major events in a story
- Define sequence and describe the events of the story
- Read words with long a and high-frequency words about, animal, carry, eight, give, our
- Explain when to use was and were in sentences
- Identify and practice writing Aa, Vv, Yy, Ww, and Nn
- Use pictures to retell the story in your own words

Animal Features Day 3

- Ask and answer questions while reading to understand text
- Identify and blend words with long a
- Find and speak first, middle, and final sounds in spoken words
- Demonstrate raising the voice when reading a question
- Identify and practice writing Aa, Vv, Yy, Ww, and Nn
- Write what happened using words showing order of events
- Identify where the apostrophe should go in a contraction

Animal Features Day 4

- Sort spelling words by long a spelling pattern
- Reread to find information about the characters and major events in a story
- Ask and answer questions while reading to understand text
- Use text evidence to identify causes and effects
- Build words with long a
- Practice putting words in alphabetical order
- Create sentences using was and were

Animal Features Day 5

- Blend and build words with long a
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words about, animal, carry, eight, give, and our
- Make connections to a topic by comparing stories
- Analyze text evidence by asking how, why, and what questions about the story
- Identify where the apostrophe should go in a contraction
- Use speaking and listening strategies

Animals Together

Animals Together Day 1

- Ask and answer questions while listening to and reading a story
- Find new words in the independent reading selection
- Identify and spell words with long e
- Respond to the prompt: Why do fish swim in schools?
- Identify and practice writing time-order words: first, next, last
- Identify whether has or have should be used to complete sentences
- Discuss how different animals work together

Animals Together Day 2

- Identify characteristics of nonfiction
- Identify the main topic and key details of the story
- Read words with long e
- Read high-frequency words: because, blue, into, or, other, small
- Respond to the prompt: in your opinion, what are some good and bad things about being a little fish?
- Identify and practice writing time-order words: first, next, last
- Explain when to use has and have in sentences

Animals Together Day 3

- Use text evidence to compare and contrast ideas to understand the story
- Identify key ideas and details about how animals help each other
- Blend words with long e
- Demonstrate pausing when encountering commas and periods while reading
- Respond to the prompt: in your opinion, what are some good and bad things about being a little fish?
- Practice writing with spacing between letters and words
- Demonstrate correct capitalization of sentence beginnings and proper nouns and correct end punctuation

Animals Together Day 4

- Sort spelling words by long e spelling pattern
- Ask and answer questions while reading to understand text
- Identify key ideas and details about how animals help each other
- Build words with long e
- Identify prefixes re-, un-, and pre- in words, using the words in sentences
- Create sentences using has and have

Animals Together Day 5

- Blend and build words with long e
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words: because, blue, into, or, other, small

- Make connections to a topic
- Analyze the text evidence by asking How and Why questions about the main idea and details
- Demonstrate correct capitalization of sentence beginnings and proper nouns and correct end punctuation
- Use Speaking and Listening strategies

In the Wild

In the Wild Day 1

- Ask and answer questions while listening to and reading a story
- Summarize the independent reading selection
- Identify and spell words with long o
- Respond to prompt: What do the animals eat?
- Identify and practice writing capital G and lowercase g
- Identify whether go, went, do, or did should be used to complete sentences
- Discuss what animals need to survive in the wild

In the Wild Day 2

- Identify characteristics of nonfiction
- Define main idea and key details
- Read words with long o and read high-frequency words: find, food, more, over, start, and warm
- Respond to the prompt: How do animals use their body parts to help them find food?
- Identify and practice writing capital G and lowercase g
- Explain when to use go and do in sentences
- Discuss responses to questions about "Animals in Winter"

In the Wild Day 3

- Ask and answer questions while listening to and reading a story
- Identify key ideas and details about how animals survive in nature
- Blend words with long o
- Demonstrate emphasis of patterns when encountering similar sentences while reading
- Identify and practice writing capital P and lowercase p
- Demonstrate capitalizing proper nouns

In the Wild Day 4

- Identify main idea and key details while reading
- Reread to find main idea and key details
- Identify sensory words in the poem
- Demonstrate where to divide open syllables
- Build and sort words with long o
- Define words by category
- Create sentences using go and do

In the Wild Day 5

- Blend and build words with long o
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words: find, food, more, over, start, and warm
- Make connections to a topic by comparing stories
- Analyze the text evidence by asking How and Why questions about the main idea and details

- Demonstrate capitalizing proper nouns
- Use speaking and listening strategies

Insects!

Insects! Day 1

- Visualize while listening to and reading a story
- Identify and spell words with long i
- Find an important part of the independent reading selection
- Respond to the prompt: Why didn't the bugs recognize Caterpillar? How do you know?
- Identify and practice writing capital P and lowercase p
- Define the words see and saw (present and past) and use them in sentences
- Discuss what insects you know about. How are they alike and different?

Insects! Day 2

- Identify characteristics of fantasy
- Define point of view
- Read words with long i and read high-frequency words: caught, flew, know, laugh, listen, and were
- Respond to the prompt: How do Caterpillar's feelings change from the beginning to the end of the story?
- Identify and practice writing capital S and lowercase s
- Use see and saw in sentences
- Discuss what insects you know about. How are they alike and different?

Insects! Day 3

- Visualize while reading to understand the text
- Use what characters say to understand point of view
- Blend words with long i
- Demonstrate pausing when encountering commas while reading
- Respond to the prompt: How do Caterpillar's feelings change from the beginning to the end of the story?
- Identify titles of books

Insects! Day 4

- Identify key ideas and details about how insects are alike and different
- Identify causes and effects using text evidence
- Visualize while reading to understand the text
- Blend words with long i
- Practice changing y to -ies, -ied and adding -ing to words that end in -y
- Distinguish when to use see or saw in sentences
- Use context clues to determine the meaning of new words

Insects! Day 5

- Blend and build words with long i
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words: caught, flew, know, laugh, listen, and were
- Make connections to a topic
- Analyze text evidence by asking questions about the characters, setting, and point of view
- Demonstrate underlining titles of books
- Use speaking and listening strategies

Working with Animals

Working with Animals Day 1

- Visualize while listening to and reading a story
- Identify and spell words with y and ey
- Identify key ideas and details about a story
- Make connections between your experiences and the people and events in your independent reading selection
- Respond to the prompt: How do guide dogs help people?
- Identify adverbs in sentences that tell when
- Discuss different ways people work with animals

Working with Animals Day 2

- Identify characteristics of nonfiction
- Use the illustrations and details in the text to identify key ideas
- Read words with y and ey, and read high-frequency words: found, hard, near, woman, would, and write
- Use text evidence to respond to the prompt: What should a guide dog do well after being trained?
- Identify and practice writing capital M and lowercase m
- Identify adverbs that tell when in sentences
- Discuss responses to questions about “Ming’s Teacher”

Working with Animals Day 3

- Identify the main topic and retell key details of a text
- Identify the time order, or sequence of events, in the story
- Blend words with y and ey
- Demonstrate moving your voice up and down while reading
- Use text evidence to respond to the prompt: What should a guide dog do well after being trained?
- Identify and practice writing capital H and lowercase h
- Use commas in a series of three or more words

Working with Animals Day 4

- Sort spelling words by long e spelling pattern
- Identify the main topic and retell key details of a text
- Build words with y and ey
- Define compound words as a word made up of two smaller words
- Orally generate sentences with adverbs that tell when

Working with Animals Day 5

- Blend and build words with y and ey
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words: found, hard, near, woman, would, and write
- Using the evidence in the text, make connections by thinking about how the author used sequence to write about the topic
- Use commas in a series of three or more words
- Use Speaking and Listening strategies

Animals Everywhere: Unit Review

- Identify the sound-spelling patterns of words with long vowels a, e, i, o, and final long e spelled y and ey

- Predict, define, and accurately use academic vocabulary words using prefixes, context clues, word categories, compound words, inflectional endings, and open syllables; Accurately identify and use high-frequency words and oral vocabulary
- Use the words and pictures in a nonfiction text to identify key details; Use the words and pictures in a story to identify key details about its characters, setting, and plot
- Identify main ideas and key details as well as sequence in nonfiction text; Identify point of view and find the sequence of a story
- Identify and analyze features of nonfiction, fantasy, folktales, and poetry
- Identify and use irregular verbs (was, were, has, have, go, do, see, saw) and adverbs that tell when in sentences
- Identify and apply correct capitalization, punctuation, use of apostrophes, and use of commas in a series; Identify and apply correct capitalization in book titles

Animals Everywhere: Unit Test

See It, Sort It

See It, Sort It Day 1

- Build background by talking about what you hear and see every day
- Use the words and pictures to make and confirm predictions
- Identify and spell words with ar
- Find the meaning of unknown words using context clues
- Identify and practice writing capital H and lowercase h
- Read sentences and identify the conjunctions
- Discuss how we classify and categorize things

See It, Sort It Day 2

- Identify characteristics of fantasy
- Identify point of view by using the text and illustrations to understand how a character thinks and feels
- Read words with ar and read high frequency words: four, large, none, only, put, round
- Use text evidence to respond to the prompt: Did each of the animals choose the right hat?
- Identify and practice writing capital K and lowercase k
- Use conjunctions and, but, and or to join sentences
- Discuss responses to questions about "Goldilocks" and discuss the independent reading selection.

See It, Sort It Day 3

- Conclude that what characters say helps show their point of view
- Identify key ideas and details about how we see and sort things
- Blend words with ar
- Demonstrate pausing when encountering commas while reading
- Use text evidence to respond to the prompt: Did each of the animals choose the right hat?
- Identify and practice writing capital K and lowercase k
- Define and identify proper nouns

See It, Sort It Day 4

- Sort spelling words by ending spelling pattern -art, -arn, and -arm
- Identify key ideas and details about a topic
- Complete a point of view chart using text evidence

- Build words with ar
- Make and confirm predictions while reading to understand the text
- Match singular words with their plurals (irregular plurals)
- Create sentences using conjunctions

See It, Sort It Day 5

- Blend and build words with ar
- Demonstrate knowledge of oral vocabulary
- Read high frequency words: four, large, none, only, put, round
- Make connections to a topic
- Analyze text evidence by asking what clues told the point of view of each character
- Demonstrate capitalizing proper nouns
- Use Speaking and Listening strategies

Up in the Sky

Up in the Sky Day 1

- Use the words and pictures to make and confirm predictions
- Identify and spell words with er, ir, ur, and or
- Identify key ideas and details
- Find new words in the independent reading selection
- Using the text and illustrations, respond to the prompt: What did Fern do in “A Bird Named Fern”?
- Explain that an adjective is a word that describes a noun
- Discuss different objects seen in the sky, from birds to stars

Up in the Sky Day 2

- Identify characteristics of fantasy
- Define sequence and describe the events of the story
- Read words with er, ir, ur, and or, and read high-frequency words another, climb, full, great, poor, and through
- Using text evidence and making inferences, respond to the prompt: How does the author show that Fern is curious?
- Identify and practice writing capital R and lowercase r
- Identify adjectives in sentences
- Discuss responses to questions about “Why the Sun and Moon Are In the Sky”

Up in the Sky Day 3

- Identify causes and effects using text evidence
- Blend words with er, ir, ur, and or
- Demonstrate reading sentences with exclamation marks with enthusiasm
- Using text evidence and making inferences, respond to the prompt: How does the author show that Fern is curious?
- Identify and practice writing Gg, Pp, Ss, Mm, Hh, Kk, Rr
- Discuss responses to questions about “Kitten’s First Full Moon”
- Use capitalization and end punctuation in sentences

Up in the Sky Day 4

- Sort spelling words by ending spelling patterns er, ir, ur, or no /er/ pattern
- Build words with er, ir, ur, and or
- Make and confirm predictions while reading to understand the text
- Identify causes and effects using text evidence

- Demonstrate adding -er to nouns to make new words
- Create sentences using adjectives

Up in the Sky Day 5

- Blend and build words with er, ir, ur, and or
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words another, climb, full, great, poor, and through
- Make connections to a topic
- Analyze text evidence by asking How and Why questions about cause and effect
- Use capitalization and end punctuation in sentences
- Use speaking and listening strategies

Great Inventions

Great Inventions Day 1

- Ask and answer questions while listening to and reading a story
- Summarize the independent reading selection
- Identify and spell words with or, ore, and oar
- Respond to the prompt: What does Tomotaka Takahshi do?
- Identify and practice writing Gg, Pp, Ss, Mm, Hh, Kk, and Rr
- Explain that we add -er and -est to most adjectives to compare people, places, or things
- Discuss inventors and the inventions they made

Great Inventions Day 2

- Reread to find a problem in the story and identify the solution
- Define problem and solution
- Read words with or, ore, and oar, and read high-frequency words began, better, guess, learn, right, and sure
- Identify characteristics of a biography
- Use text evidence to respond to the prompt: What can you tell about what makes a good inventor?
- Practice tracing and writing sentences
- Identify adjectives in sentences

Great Inventions Day 3

- Reread to identify the sequence of events using text evidence
- Ask and answer questions to understand the text
- Blend words with or, ore, and oar
- Demonstrate pausing when encountering commas and periods while reading
- Begin the writing process by reviewing notes and planning to write
- Practice writing with spacing between letters and words
- Demonstrate capitalizing days of the week, holidays, and months

Great Inventions Day 4

- Sort spelling words by ending spelling pattern or, ore, and oar pattern
- With guidance, read, and reread a poem
- Define alliteration
- Build words with or, ore, and oar
- Write title and place names using abbreviations
- Begin the draft of independent writing
- Choose correct adjectives in sentences

Great Inventions Day 5

- Blend and build words with or, ore, and oar
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words began, better, guess, learn, right, and sure
- Make connections to a topic by comparing stories
- Continue working on the independent writing draft
- Demonstrate capitalizing days of the week, holidays and months
- Analyze the text evidence by asking What and How questions about the problem and solution

Sounds All Around

Sounds All Around Day 1

- Ask and answer questions while listening to and reading a story
- Identify and spell words with ou and ow
- Edit the independent writing draft
- Identify and practice writing capital X and lowercase x
- Identify a and an as special adjectives called articles
- Discuss different sounds around and how they are made

Sounds All Around Day 2

- Reread to find a problem in the story and identify the solution
- Ask and answer questions to understand the text
- Read words with ou and ow, and read high-frequency words color, early, instead, nothing, oh, and though
- Identify characteristics of realistic fiction
- Edit the draft of independent writing
- Identify and practice writing capital X and lowercase x
- Identify this and that as special adjectives and when to use them

Sounds All Around Day 3

- Use the text and illustrations to understand how the characters think and feel about the story event
- Ask and answer questions to understand the text
- Blend words with ou and ow
- Demonstrate reading repeated phrases with emphasis while reading
- Present independent writing
- Demonstrate capitalizing important words in a book title and underlining the title
- Use Speaking and Listening strategies

Sounds All Around Day 4

- Sort spelling words by spelling patterns ou, ow, or no /ou/ pattern
- Identify the problem the main character faces
- Understand how point of view can help you know the characters
- Build words with ou and ow
- Construct comparing words ending with -er and -est and write one sentence for each word
- Complete sentences using a, an, this, and that

Sounds All Around Day 5

- Blend and build words with ou and ow
- Demonstrate knowledge of oral vocabulary
- Read high frequency words: color, early, instead, nothing, oh, and though

- Make connections to a topic by comparing texts
- Demonstrate capitalizing important words in a book title and underlining the title
- Analyze the text evidence by asking how the author used problem and solution in the story
- Use Speaking and Listening strategies

Build It!

Build It! Day 1

- Ask and answer questions while listening to and reading a story
- Identify and spell words with oi and oy
- Respond to the prompt: What steps does it take to build a ship?
- Identify and practice writing capital U and lowercase u
- Define prepositions
- Find the meaning of unknown words
- Discuss different structures and how they are built

Build It! Day 2

- Identify cause and effect while reading
- Ask and answer questions to understand the text
- Read words with oi and oy and read high-frequency words above, build, fall, knew, money, and toward
- Identify characteristics of nonfiction
- Respond to the prompt: What do you think is the least important step in building a ship? Why?
- Identify and practice writing capital Q and lowercase q
- Identify prepositions and prepositional phrases in sentences

Build It! Day 3

- Use the text and photographs to identify the main idea and details to understand the text
- Ask and answer questions to understand the text
- Blend words with oi and oy
- Demonstrate pausing when encountering commas and raising your voice when encountering exclamation marks while reading
- Identify and practice writing capital Q and lowercase q
- Explain that name titles are abbreviations
- Use speaking and listening strategies

Build It! Day 4

- Sort spelling words by spelling pattern oi and oy
- Demonstrate knowledge of oral vocabulary
- Identify captions and what they tell
- Identify the key details of the text
- Build words with oi and oy
- Demonstrate dividing two-syllable words
- Identify prepositions and prepositional phrases in sentences

Build It! Day 5

- Sort spelling words by spelling pattern oi, oy, or no /oy/ pattern
- Identify the key details of the text
- Blend and build words with oi and oy

- Make connections to a topic
- Identify name title abbreviations
- Use speaking and listening strategies
- Analyze the text evidence by asking how and why questions about the main idea and details

Figure It Out: Unit Review

- Identify the sound spelling patterns of words with r-controlled vowels, and diphthongs (ou, ow, oi and oy)
- Predict, define, and accurately use academic vocabulary words using context clues, inflectional endings (-er and -est), irregular plurals, and abbreviations; Accurately identify and use high-frequency words and oral vocabulary
- Use the words and pictures in a nonfiction text to identify key details; Use the words and pictures in a story to identify key details about its characters, setting, and plot
- Identify cause and effect as well as problem and solution in nonfiction text; Identify cause and effect as well as problem and solution and point of view in a story
- Identify and analyze features of nonfiction, biographies, fantasy, realistic fiction, and poetry
- Identify and use words that join, adjectives, adjectives that compare, and prepositions and prepositional phrases in sentences
- Identify and apply correct capitalization and punctuation; Identify and apply correct capitalization and punctuation in book titles and name titles

Figure It Out: Unit Test

Taking Action

Taking Action Day 1

- Reread to understand events and details in the story
- Identify and spell words with digraphs with the /oo/ sound
- Identify and practice writing capital Q and lowercase q
- Recognize that pronouns stand for a person, place, thing, or idea
- Find the meaning of unknown words
- Discuss ways people can work together to make things better
- Ask questions to find answers about topic being discussed

Taking Action Day 2

- Identify the characteristics of fantasy
- Define theme
- Read words with digraphs with the /oo/ sound and read high-frequency words answer, brought, busy, door, enough, and eyes
- Respond to the prompt: How did the writing tools persuade Lucy to use them again?
- Identify and practice writing number words and numerals for 1–5
- Demonstrate selecting the correct pronouns in sentences
- Discuss responses to questions about “The Cat’s Bell”

Taking Action Day 3

- Reread to understand events and details in the story
- Identify what the characters say and do to find the theme
- Blend words with digraphs with the /oo/ sound
- Demonstrate reading dialogue with expression to show how characters feel

- Respond to the prompt: Write a letter from the writing tools to Lucy explaining in words what they explained to her in the drawing
- Identify and practice writing number words and numerals for 6–10
- Demonstrate using capital I when writing

Taking Action Day 4

- Sort spelling words by sound spelling (oo, u_e, ew, ue, ui, and ou)
- Reread to understand events and details in the story
- Analyze text evidence and illustrations to discover the theme of the story
- Build words with digraphs with the /oo/ sound
- Use synonyms to replace words in sentences
- Demonstrate adding suffixes -less and -ful to words
- Complete sentences choosing the correct pronouns

Taking Action Day 5

- Blend and build words with digraphs with the /oo/ sound
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words answer, brought, busy, door, enough, and eyes
- Make connections to a topic by comparing stories
- Analyze text evidence by asking how and why questions about theme
- Demonstrate using capital I when writing
- Use speaking and listening strategies

My Team

My Team Day 1

- Reread to understand events and details in the story
- Identify and spell words with digraphs: a, aw, au, augh, and al
- As you read the story, identify key ideas and details about people who help
- Respond to the prompt: What are some different kinds of helpers?
- Identify and practice writing number words and numerals 1–10
- Identify these possessive pronouns: mine, yours, hers, ours, and theirs
- Discuss the people in your life that help you

My Team Day 2

- Identify characteristics of nonfiction
- Define author's purpose
- Read words with digraphs: a, aw, au, augh, and al, and read high-frequency words: brother, father, friend, love, mother, and picture
- Respond to the prompt: Write about a group of helpers in your community
- Identify and practice writing number words and numerals 1–10
- Use possessive pronouns
- Use Speaking and Listening strategies

My Team Day 3

- Using text evidence, identify a problem and the solution in the story
- Reread to understand events and details in the story
- Blend words with digraphs: a, aw, au, augh, and al
- Demonstrate raising the voice when reading a question
- Find the meaning of unknown words while reading
- Recognize that months, days, and holidays are proper nouns and should be capitalized
- Identify and practice writing Xx, Uu, and Qq

My Team Day 4

- Sort spelling words by spellings au and aw
- Reread to understand events and details in the story
- Identify details that tell the author's purpose
- Build words with digraphs: a, aw, au, augh, and al
- Decode two-syllable words by breaking them into syllables
- Create sentences using your, its, our, their, and mine

My Team Day 5

- Blend and build words with au and aw
- Demonstrate knowledge of oral vocabulary
- Read high-frequency words: brother, father, friend, love, mother, and picture
- Make connections to a topic by comparing stories
- Analyze the text evidence by asking What and How questions about author's purpose
- Demonstrate capitalization of months, days, and holidays
- Use Speaking and Listening strategies

Weather Together

Weather Together Day 1

- Visualize while listening to and reading a story
- Identify and spell words with wr, kn, and gn
- Recognize and read regularly and irregularly spelled words in a story
- Respond to the prompt: What happened in "Wrapped in Ice"?
- Identify and practice writing Xx, Uu, and Qq
- Explain what the pronouns anyone and everyone stand for
- Discuss different kinds of weather and how it affects our lives

Weather Together Day 2

- Define and identify cause and effect
- Read words with wr, kn, and gn and read high-frequency words been, children, month, question, their, and year
- Identify characteristics of realistic fiction
- Respond to the prompt: How do the people in the town react to the weather in "Wrapped in Ice"?
- Identify and practice tracing and writing sentences in a story
- Explain what the pronouns nobody, somebody, and anybody stand for
- Ask and answer question about key details in a text read aloud

Weather Together Day 3

- Blend words with wr, kn, and gn
- Visualize while reading to understand the story
- Use text evidence to identify causes and effects
- Demonstrate reading sentences with exclamation marks with enthusiasm
- Begin the writing process by reviewing notes and planning to write
- Identify correct writing and evaluate one's own writing
- Use commas in dates and in letter writing

Weather Together Day 4

- Sort spelling words by the silent letter pattern
- Reread and visualize using the words and pictures
- Explain the purpose of headings in nonfiction texts

- Build words with wr, kn, and gn
- Define compound words
- Begin the draft of independent writing
- Write sentences using anyone, nothing, and anybody

Weather Together Day 5

- Blend and build words with wr, kn, and gn
- Demonstrate knowledge of oral vocabulary
- Read the high-frequency words been, children, month, question, their, and year
- Make connections to a topic
- Continue working on the independent writing draft
- Use commas in dates and in letter writing
- Use speaking and listening strategies

Sharing Traditions

Sharing Traditions Day 1

- Use pictures and words to find details while listening to a story
- Identify and spell words with three-letter blends: scr, spl, spr, str, thr, and shr
- Edit the independent writing draft
- Identify and practice writing capital B and lowercase b
- Identify when to use I and me in sentences
- Discuss traditions that people follow and pass down

Sharing Traditions Day 2

- Define theme
- Read words with three-letter blends: scr, spl, spr, thr, and shr, and read high frequency words: before, front, heard, push, tomorrow, and your
- Identify characteristics of realistic fiction
- Edit the draft of independent writing
- Identify and practice writing capital Z and lowercase z
- Complete sentences with the correct pronouns, I or me
- Discuss traditions that people follow and pass down

Sharing Traditions Day 3

- Blend words with three-letter blends: scr, spl, spr, thr, and shr
- Use pictures and words while reading to understand the story
- Use text evidence to identify clues to determine theme
- Demonstrate pausing when encountering commas while reading
- Present independent writing
- Identify and practice writing capital J and lowercase j
- Use commas in dates and after the greeting and closing in a letter

Sharing Traditions Day 4

- Sort spelling words by the three-letter-blend spelling pattern
- Reread and apply the strategy visualize using the words and pictures
- Read words with inflectional endings
- Build words with str, spr, spl, scr, and thr
- Use what you know about the meaning of words to predict the meaning of compound words
- Complete sentences with the correct pronouns, I or me

Sharing Traditions Day 5

- Blend and build words with three-letter-blends: scr, spl, spr, thr and shr
- Demonstrate knowledge of oral vocabulary
- Read high frequency words: before, front, heard, push, tomorrow, and your
- Make connections to a topic by comparing texts
- Use commas in dates and after the greeting and closing in a letter
- Use speaking and listening strategies
- Analyze the text evidence by asking how the author used theme in the story

Celebrate America!

Celebrate America Day 1

- Reread to understand events and details in the story
- Identify and spell words with air, are, and ear
- Respond to the prompt: What are the different ways the harvest is celebrated?
- Identify and practice writing Bb, Zz, and Jj
- Explain the purpose of an adverb in a sentence
- Discuss holidays and how we celebrate them

Celebrate America Day 2

- Define author's purpose
- Read words with air, are, and ear and read high frequency words: favorite, few, gone, surprise, wonder, and young
- Identify characteristics of nonfiction
- Respond to the prompt: Do you think it is important or not important to give thanks for a harvest? Why?
- Select and write favorite words
- Identify adverbs in sentences
- Discuss responses to questions about "Celebrate the Flag"

Celebrate America Day 3

- Use text evidence to identify causes and effects in the story
- Reread to understand events and details in the story
- Blend words with air, are, and ear
- Demonstrate pausing when encountering commas and periods while reading
- Respond to the prompt: Do you think it is important or not important to give thanks for a harvest? Why?
- Select and write favorite words
- Demonstrate using name title abbreviations (Mr., Mrs., Ms., Dr.)

Celebrate America Day 4

- Sort spelling words by the ending spelling pattern
- Analyze key details to answer questions about what our nation was like then and now
- Build words with air, are, and ear
- Find the meaning of metaphors in sentences
- Analyze the maps to find differences
- Decode two-syllable words by breaking them into syllables
- Create sentences using adverbs

Celebrate America Day 5

- Blend and build words with air, are, and ear
- Demonstrate knowledge of oral vocabulary
- Read high frequency words: favorite, few, gone, surprise, wonder, and young

- Make connections to a topic by comparing stories
- Analyze text evidence by asking "why" and "what" questions about the author's purpose
- Demonstrate using name title abbreviations (Mr., Mrs., Ms., Dr.)
- Use Speaking and Listening strategies

Together We Can! Unit Review

- Identify the sound-spelling patterns of words with silent letters (wr, kn, and gn), three-letter consonant blends, r-controlled vowels (are, ear and air), and variant vowels
- Predict, define, and accurately use academic vocabulary words using synonyms, antonyms, similes, and metaphors; Analyze words using suffixes, syllables, compound words, and inflectional endings; Accurately identify and use high-frequency words
- Use the words and pictures in a nonfiction text to identify key details; Use the words and pictures in a story to identify key details about its characters, setting, and plot
- Identify author's purpose in nonfiction text; Identify the causes and effects and theme of a story
- Identify and analyze features of fantasy, nonfiction, realistic fiction, how-to, and poetry
- Identify and use pronouns, possessive pronouns, special pronouns, and adverbs that tell how in sentences
- Identify and apply correct capitalization; Identify and apply correct capitalization and punctuation in name titles, dates, and letters

Together We Can! Unit Test

Language Arts 2

Language Arts 2 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In this course, the student will develop reading, writing, listening, and speaking skills essential for future success. The student will become an accomplished reader by engaging in daily phonics and spelling practice. The student will also expand his vocabulary as he learns to use an array of strategies and skills including main idea, problem and solution, and author's purpose to comprehend complex texts. The texts the student will examine include a variety of fiction and nonfiction stories presented in McGraw Hill's Wonders. The stories are organized into relevant themes such as friends and family, live and learn, and our life, our world. As the student explores each theme, he will discover connections to familiar subjects, including science and social studies. He will also enjoy daily independent reading routines.

In addition to becoming a competent reader, the student will also become a skilled writer. Throughout the course, the student will use the writing process to produce various compositions including narrative texts, informative texts, and opinion texts. Reading/writing workshop activities will teach the student how to use text evidence and apply key writing traits. The student will also exhibit mastery of standard language conventions through daily grammar and mechanics practice.

Engaging activities will help the student become a proficient listener and speaker. Regular conversation and discourse centered on essential questions will teach the student to thoughtfully contribute to discussions. Interactive read-alouds will facilitate the development of a rich oral vocabulary, and the student will learn a variety of listening strategies to aid comprehension.

Course Outline

Language Arts 2 A

1. Course Overview

1. Get Ready for Language Arts!

2. Friends Help Friends

1. Friends Help Friends Day 1

- Sort, recognize, and blend words with short a and short i sound-spellings
- Identify best handwriting practices
- Identify examples of how key words are used in real life
- Use pictures and words in a story to identify key details

- Identify complete sentences and statements
 - Discuss how friends depend on each other
2. Friends Help Friends Day 2
 - Sort, recognize, and blend words with short a and short i sound-spellings
 - Identify the letters used to write your name
 - Identify and apply singular and plural forms of key words by adding –es and –s
 - Use the pictures in a story to identify key details
 - Identify and retell key details in a story
 - Differentiate between questions and statements
 3. Friends Help Friends Day 3
 - Segment, blend, and sort words with short a and short i sound-spellings
 - Read a text with expression
 - Identify and apply understanding of high frequency words by reading, spelling, and writing each word
 - Use the pictures identify key details
 - Identify elements of fantasy and key details in a story
 - Identify and apply correct capitalization and punctuation for statements and questions
 - Analyze text evidence to prewrite a short explanatory response
 4. Friends Help Friends Day 4
 - Segment, blend, and build words with short a and short i sound-spellings
 - Read a text with expression
 - Use the pictures and words in a story to identify key details
 - Use root words to determine the meaning of new words
 - Identify plural nouns that end with -s and -es
 - Identify and apply correct capitalization and punctuation for statements and questions
 - Write a short explanatory response using text evidence
 5. Friends Help Friends Day 5
 - Blend, build, and spell words with short a and short i sound-spellings
 - Apply understanding of high frequency words and words to know
 - Compare and contrast two texts with the same topic
 - Answer questions about a text using text evidence
 - Identify and apply correct use, capitalization, and punctuation for statements and questions
 - Discuss how friends depend on each other using key words and examples from multiple texts
 - Discuss how friends depend on each other using key words and examples from this week's texts

3. Families Around the World

1. Families Around the World Day 1
 - Recognize rhyming words
 - Use context clues to determine the meaning of new words
 - Identify and write vertical and horizontal lines
 - Recognize words spelled with short e
 - Identify commands and exclamations
 - Discuss how families around the world are alike and different
2. Families Around the World Day 2

- Use the pictures and words in a story to understand its characters, setting, and events
 - Describe how characters in a story react to important events
 - Identify and write circular and slant lines
 - Spell words with short e, o, and u
 - Identify exclamations
 - Retell key details from a text read aloud
 - Identify the plural form of words
3. Families Around the World Day 3
- Identify irregularly spelled words
 - Read a text with expression
 - Describe the features of realistic fiction
 - Describe the beginning, middle, and end of a story
 - Analyze text evidence
 - Sort words spelled with short e, o, and u
 - Write exclamations that begin with a capital letter and end with an exclamation point
4. Families Around the World Day 4
- Read, spell, and write words with short e, o, and u
 - Read plural nouns that end in -s and -es
 - Use the pictures and words in a story to understand its characters, setting, and events
 - Describe how characters in a story react to important events
 - Use text evidence to write an informative text with a clear beginning
 - Use root words to determine the meaning of new words
 - Write commands and exclamations with correct capitalization and punctuation
5. Families Around the World Day 5
- Read, spell, and write words with short e, o, and u
 - Identify and read irregularly spelled words
 - Identify the meaning of key words
 - Compare and contrast two texts with the same topic
 - Answer questions about a text using text evidence
 - Write commands and exclamations with correct capitalization and punctuation
 - Discuss families around the world using key words and examples from the texts
4. **Pets are Our Friends**
1. Pets are Our Friends Day 1
- Sort words by vowel sounds
 - Use context clues to determine the meaning of new words
 - Identify and write capital O and lowercase o
 - Recognize words spelled with two-letter blends
 - Give examples of how key words are used in real life
 - Identify the subject of a sentence
 - Discuss how pets can be important friends
2. Pets are Our Friends Day 2
- Identify key details in a story by asking and answering questions
 - Describe how characters in a story respond to problems
 - Use the pictures and words in a story to understand its characters, setting, and events
 - Identify and write letters Cc and Dd
 - Spell words with two-letter blends

- Make complete sentences by adding subjects
 - Retell key details from a text read aloud
3. Pets are Our Friends Day 3
 - Read a text with proper intonation
 - Identify irregularly spelled words
 - Identify the features of fiction stories
 - Describe how characters in a story respond to problems
 - Write a short informative text using text evidence
 - Sort words spelled with two-letter blends
 - Identify how commas are used in the greeting and closing of a letter
 4. Pets are Our Friends Day 4
 - Read, spell, and write words with two-letter blends
 - Recognize words with closed syllables and words that end in -ed and -ing
 - Identify key details in a story by asking and answering questions
 - Compare and contrast different texts
 - Analyze text evidence from two stories
 - Use sentence context clues to determine the meaning of new words
 - Write the greeting and closing of a letter with correct capitalization and punctuation
 5. Pets are Our Friends Day 5
 - Read, spell, and write words with two-letter blends
 - Identify a story's characters, setting, and events by asking and answering questions
 - Compare and contrast different texts
 - Write a short story with text evidence from two sources
 - Make complete sentences by adding subjects
 - Write the greeting and closing of a letter with correct capitalization and punctuation
 - Discuss how pets can be important friends using key words and examples from this week's texts

5. **Animals Need Our Care**

1. Animals Need Our Care Day 1
 - Use context clues to determine the meaning of new words
 - Identify and write the letters Ff
 - Differentiate between words spelled with short a and long a
 - Identify the predicate of a sentence
 - Give examples of how key words are used in real life
 - Discuss how people care for animals
2. Animals Need Our Care Day 2
 - Identify key details in an informative text by asking and answering questions
 - Use pictures and captions in a text to understand key details
 - Identify and write the letters Ee and Hh
 - Spell words with short a and long a
 - Make complete sentences by adding predicates
 - Retell key details from a text read aloud
3. Animals Need Our Care Day 3
 - Identify irregularly spelled words
 - Read a text with proper intonation
 - Describe the features of narrative nonfiction texts

- Use pictures and captions in informative texts to identify key details
 - Analyze text evidence
 - Sort words spelled with short a and long a
 - Describe how sequence words and commas are used in sentences
4. Animals Need Our Care Day 4
- Read, spell, and write words with short a and long a
 - Read words that end in -ed and -ing
 - Read a text with proper intonation
 - Identify key details in an informative text by asking and answering questions
 - Use pictures and captions in informative texts to identify key details
 - Write an informative text using text evidence
 - Use sequence words and commas in sentences
5. Animals Need Our Care Day 5
- Read, spell, and write words with short a and long a
 - Identify and read irregularly spelled words
 - Compare and contrast two texts with the same topic
 - Answer questions about a text using text evidence
 - Make complete sentences by adding predicates
 - Use sequence words and commas in sentences
 - Discuss how people care for animals using key words and examples from this week's texts

6. Families Working Together

1. Families Working Together Day 1
- Use context clues to determine the meaning of new words
 - Identify and write letters Oo
 - Identify words spelled with short i and long i
 - Give examples of how key words are used in real life
 - Expand simple sentences by adding details
 - Discuss what happens when families work together
2. Families Working Together Day 2
- Ask and answer questions to understand an expository text
 - Use key details in a text to identify the main topic
 - Identify and write letters Cc and Dd
 - Spell words with short i and long i
 - Combine sentences that have the same subject or predicate
 - Retell key details from a text read aloud
3. Families Working Together Day 3
- Identify irregularly spelled words
 - Read a text with proper phrasing
 - Identify the features of expository texts
 - Use pictures and charts to understand expository texts
 - Use text evidence to write a short informative text
 - Sort words spelled with long i and short i
 - Identify how quotation marks are used in sentences
4. Families Working Together Day 4
- Read, spell, and write words with short i and words with long i

- Read a text with proper phrasing
 - Use the main idea and key details to summarize a text
 - Compare and contrast different texts
 - Analyze text evidence from two sources
 - Identify possessive nouns
 - Use quotation marks in sentences
5. Families Working Together Day 5
- Read, spell, and write words with short i and long i
 - Compare and contrast different texts
 - Write an informative text with evidence from two sources
 - Expand sentences by adding details
 - Combine sentences that have the same subject or predicate
 - Use quotation marks in sentences
 - Discuss what happens when families work together using key words and examples from this week's texts
6. Friends and Family: Unit Review
- Identify the sound spelling patterns of words with short vowels (a, e, i, o, and u), long vowels, (a and i), and two-letter blends
 - Predict, define, and accurately use academic vocabulary words using inflectional endings, context clues, and root words; Accurately identify and use high-frequency words, and Words to Know
 - Use the pictures in a story to identify key details; Ask and answer questions about a nonfiction text to identify key details
 - Identify the key details in a story, including the characters, setting, and events; Use the pictures and captions in a nonfiction text to identify key details
 - Identify and analyze features of fantasy, realistic fiction, fiction, narrative nonfiction, and expository texts
 - Identify and produce complete statements, questions, commands, and exclamations; Make complete sentences by adding a subject or predicate; Combine sentences that have the same subject or predicate
 - Identify and apply correct capitalization, punctuation, and use of quotation marks to statements, questions, commands, exclamations; Identify and apply correct capitalization and punctuation to the greeting and closing of a letter; Identify how to use com
7. Friends and Family: Unit Test
- 7. Animals and Nature**
1. Animals and Nature Day 1
- Use context clues to determine the meaning of new words
 - Identify and write the letter Qq
 - Describe the features of how-to texts
 - Recognize words spelled with short o and long o
 - Give examples of how key words are used in real life
 - Discuss how animals survive
2. Animals and Nature Day 2
- Use the words and pictures in a story to make, change, and confirm predictions
 - Identify the plot of a story by describing the beginning, middle, and end

- Identify and write letters Pp and Uu
 - Spell words with short o and long o
 - Identify nouns
 - Retell key details from a text read aloud
3. Animals and Nature Day 3
- Identify irregularly spelled words
 - Read a text with proper phrasing
 - Describe the features of realistic fiction
 - Use the words and pictures in a story to make, change, and confirm predictions
 - Analyze text evidence
 - Sort words spelled with short o and long o
 - Identify how commas are used in a series
4. Animals and Nature Day 4
- Read, spell, and write words with short o and long o
 - Read a text with proper phrasing
 - Describe how characters in a story respond to problems
 - Prewrite a how-to text
 - Make new words by changing the endings to -ed or -ing
 - Determine the meanings of words with the prefixes re-, un-, and dis-
 - Write sentences with commas in a series
5. Animals and Nature Day 5
- Read, spell, and write words with short o and long o
 - Identify the meaning of key words
 - Compare and contrast two texts with the same topic
 - Answer questions about a text using text evidence
 - Identify nouns
 - Write sentences with commas in a series
 - Discuss how animals survive using key words and examples from this week's texts

8. Animals in Stories

1. Animals in Stories Day 1
- Discuss animal stories and the lessons they teach
 - Blend and segment words with short u and long u sound-spellings
 - Identify examples of how key words are used in real life
 - Make, confirm, and revise predictions about a story
 - Identify the features of how-to texts
 - Identify and write capital and lowercase b
 - Identify singular and plural nouns
2. Animals in Stories Day 2
- Blend and segment words with short u and long u sound-spellings
 - Identify and apply past- and present-tense forms of key words by adding -ed and -ing
 - Identify and retell key details from a text read aloud
 - Identify the problem and solution of a story
 - Form plural nouns by adding the endings -s or -es
 - Identify and write letters Jj and Gg
 - Identify how time-order words are used in a how-to text to show sequence
3. Animals in Stories Day 3

- Segment and sort words with short u and long u sound-spellings
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a story with expression
 - Make, confirm, and revise predictions about a story
 - Identify the elements of a fable, including the problem and solution
 - Write the draft of a how-to text
 - Identify and apply how to use commas in a series
4. Animals in Stories Day 4
- Delete sounds in words with short u and long u sound-spellings
 - Identify words with final e syllables
 - Determine the meanings of words with suffixes -ly and -ful
 - Read a story with expression
 - Use the pictures of a story to identify how characters respond to important events
 - Identify and apply how to use commas in a series
 - Write the draft of a how-to text
5. Animals in Stories Day 5
- Discuss animal stories using key words and examples from this week's texts
 - Blend and build words with short u and long u sound-spellings
 - Apply understanding of high frequency words and Words to Know
 - Identify, form, and use plural nouns ending in -s and -es
 - Identify and apply how to use commas in a series
 - Compare and contrast two versions of the same story
 - Use text evidence to answer questions about a text

9. Animal Habitats

1. Animal Habitats Day 1
- Discuss the features of animal habitats
 - Blend and separate sounds in words with soft c and soft g sound-spellings
 - Identify examples of how key words are used in real life
 - Make, confirm, and revise predictions about a nonfiction text
 - Identify common and proper nouns
 - Identify and write letter uppercase R and lowercase r
2. Animal Habitats Day 2
- Substitute sounds in words with soft c and soft g sound-spellings
 - Blend words with soft c and soft g sound-spellings
 - Identify and apply plural forms of key words by adding -s
 - Make, confirm, and revise predictions about a nonfiction text
 - Identify the main topic and key details of a nonfiction text, retelling them to confirm understanding
 - Identify and write uppercase S and lowercase s
 - Identify collective nouns
3. Animal Habitats Day 3
- Substitute sounds in words with soft c and soft g sound-spellings
 - Sort words with soft c and soft g sound-spellings
 - Identify and apply understanding of high-frequency words by reading, spelling, and writing each word

- Read a text with proper phrasing
 - Identify the elements of a narrative nonfiction text, including the main topic and key details
 - Write a short informative response using text evidence
 - Apply correct capitalization to proper nouns
4. Animal Habitats Day 4
- Blend words with soft c and soft g sound-spellings
 - Determine the meanings of words with prefixes re-, un-, and dis-, and suffixes -ly and -ful
 - Read a text with proper phrasing
 - Identify the main topic and key details of a text
 - Compare and contrast two texts with the same topic
 - Analyze text evidence from two sources
 - Apply correct capitalization to proper nouns
5. Animal Habitats Day 5
- Discuss animal habitats using key words and examples from this week's texts
 - Blend, build, and spell words with soft c and soft g sound-spellings
 - Apply understanding of high frequency words and Words to Know
 - Identify common, proper, and collective nouns
 - Identify and apply correct capitalization to proper nouns
 - Compare and contrast two texts with the same topic
 - Write an informative text with evidence from two sources

10. Baby Animals

1. Baby Animals Day 1
- Discuss how baby animals are like their parents
 - Identify rhyme and blend words with consonant digraphs
 - Identify examples of how key words are used in real life
 - Apply the reread strategy to identify key details
 - Identify irregular plural nouns
 - Identify and write letter Aa
 - Identify how to revise a how-to text
2. Baby Animals Day 2
- Sort and blend words with consonant digraphs
 - Identify and apply the present- and past-tense forms of key words by adding -s and -ed
 - Apply the reread strategy to identify and retell key details from an expository text
 - Identify the main topic and key details of an expository text
 - Identify and form irregular plural nouns
 - Identify and write letters Vv and Nn
 - Revise a how-to text
3. Baby Animals Day 3
- Segment and sort words with consonant digraphs
 - Identify and apply understanding of high frequency words by reading, spelling, and writing each word
 - Read a text with correct pronunciation
 - Use diagrams and labels and apply the reread strategy to identify details in an expository text

- Identify the elements of an expository text, including the main topic and key details
 - Apply correct capitalization and punctuation to abbreviations
 - Identify how to edit a how-to text
4. Baby Animals Day 4
- Blend and spell words with consonant digraphs
 - Determine the meanings of words that end with suffixes -ful and -less
 - Use sentence context clues to determine the meaning of new words
 - Read a text with correct pronunciation
 - Apply the reread strategy to identify the main topic and key details of a text
 - Apply correct capitalization and punctuation to abbreviations
 - Edit and publish a how to-text, using a dictionary to check correct spellings
5. Baby Animals Day 5
- Discuss baby animals and their parents using key words and examples from this week's texts
 - Blend, build, and spell words with consonant digraphs
 - Apply understanding of high frequency words and Words to Know
 - Identify, form, and use irregular plural nouns
 - Apply correct capitalization and punctuation to abbreviations
 - Compare and contrast two texts with the same topic
 - Edit and publish a how to-text, using a dictionary to check correct spellings

11. Animals in Poems

1. Animals in Poems Day 1
- Discuss what people like about animals
 - Identify and produce rhyming words
 - Blend words with three-letter blends
 - Identify examples of how key words are used in real life
 - Apply the reread strategy to identify key details in a poem
 - Identify singular possessive nouns
 - Identify and write uppercase K and lowercase k
2. Animals in Poems Day 2
- Substitute sounds in words with three-letter blends
 - Blend words with three-letter blends
 - Identify and apply the present- and past-tense form of key words by adding -s and -ed
 - Apply the reread strategy to identify and retell key details in a poem
 - Identify the elements of rhyming poems
 - Identify and form plural possessive nouns
 - Identify and write letters Xx and Ww
3. Animals in Poems Day 3
- Substitute sounds in words with three-letter blends
 - Sort words with three-letter blends
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a poem with proper phrasing
 - Identify the rhythm and key details of a poem
 - Write a short informative response using text evidence
 - Identify and apply how to use apostrophes to form possessive nouns

4. Animals in Poems Day 4
 - Blend and build words with three-letter blends
 - Identify the meaning of compound words
 - Use sentence context clues to determine the meaning of multiple-meaning words
 - Read a poem with proper phrasing
 - Apply the reread strategy to compare and contrast poems and identify key details, including rhyme and rhythm
 - Analyze text evidence from two poems
 - Identify and apply how to use apostrophes to form possessive nouns
5. Animals in Poems Day 5
 - Discuss why people like animals using key words and examples from this week's texts
 - Blend, build, and spell words with three-letter blends
 - Apply understanding of high frequency words and words to know
 - Identify and use singular and plural possessive nouns
 - Identify and apply how to use apostrophes to form possessive nouns
 - Compare and contrast poems about animals
 - Write an animal poem using two sources
6. Animal Discoveries: Unit Review
 - Identify the sound spelling patterns of words with short vowels (o, u), long vowels (o, u), soft c and soft g, consonant digraphs, and three-letter blends (scr, spr, str, thr, spl, shr)
 - Predict, define, and accurately use academic vocabulary words using prefixes (re-, un-, dis-), suffixes (-ly, -full, -less), multiple-meaning words, and compound words; Accurately identify and use high-frequency words and Words to Know
 - Make, confirm, and revise predictions about stories and fables; Make, confirm, and revise predictions about nonfiction texts; Use context to identify key details in poetry, rereading as necessary
 - Identify the characters, setting, and plot of a story; Identify the problem and solution of a fable; Identify the main topic and key details of a nonfiction text; Identify the key details of a poem
 - Identify and analyze features of realistic fiction, fables, narrative nonfiction, expository texts, and rhyming poems
 - Identify, form, and use common, proper, and collective nouns, regular and irregular plural nouns, and singular and plural possessive nouns
 - Identify and apply correct capitalization and punctuation when using commas in a series, proper nouns, abbreviations, and possessive nouns
7. Animals Discoveries: Unit Test

12. The Earth's Forces

1. The Earth's Forces Day 1
 - Discuss the earth's forces
 - Identify rhymes and blend words with long a sound-spellings
 - Identify examples of how key words are used in real life
 - Apply the reread strategy to identify key details in an expository text
 - Identify the features of an opinion letter
 - Identify action verbs
 - Identify and write uppercase M and lowercase m
2. The Earth's Forces Day 2

- Sort and blend sounds in words with long a sound-spellings
 - Identify and apply the past-tense forms of key words by adding –ed
 - Apply the reread strategy to identify and retell key details in an expository text
 - Identify the author’s purpose of expository texts and opinion letters
 - Identify and write letters Yy and Zz
 - Retell key details from a text read aloud
 - Identify action verbs
3. The Earth’s Forces Day 3
- Sort words with short a sound-spellings
 - Identify and apply understanding of high-frequency words by reading, spelling, and writing each word
 - Read a text with proper intonation
 - Apply the reread strategy to identify the elements and author’s purpose of an expository text
 - Analyze text evidence
 - Identify and apply correct capitalization and punctuation to abbreviations
 - Identify how to use supporting reasons in an opinion letter
4. The Earth’s Forces Day 4
- Blend and build words with short a sound-spellings
 - Identify and apply how to use apostrophes to form contractions
 - Identify similes and determine their meaning
 - Read a text with proper intonation
 - Apply the reread strategy to identify how an author uses text and pictures to explain ideas
 - Identify and apply correct capitalization and punctuation to abbreviations
 - Prewrite an opinion letter
5. The Earth’s Forces Day 5
- Discuss the earth’s forces using key words and examples from this week’s texts
 - Blend, build, and spell words with long a sound-spellings
 - Apply understanding of high-frequency words and Words to Know
 - Compare and contrast texts with the same topic
 - Identify, form, and use action verbs to make complete sentences
 - Identify and apply correct capitalization and punctuation to abbreviations
 - Answer questions about a text using text evidence

13. Look at the Sky

1. Look at the Sky Day 1
- Discuss things that are in the sky
 - Sort and blend words with long i sound-spellings
 - Identify examples of how key words are used in real life
 - Apply the reread strategy to identify key details in a story
 - Identify present-tense verbs
 - Identify and write numbers 1–4
 - Identify the features of an opinion letter
2. Look at the Sky Day 2
- Blend and isolate sounds in words with long i sound-spellings
 - Identify and apply present-tense forms of key words by adding -s and -ing

- Apply the reread strategy to identify and retell key details of a story
 - Identify the sequence of events in a story
 - Identify and apply subject-verb agreement
 - Identify and write numbers 5–8
 - Identify how to write a conclusion for an opinion letter
3. Look at the Sky Day 3
- Blend, sort, and substitute sounds in words with long i sound-spellings
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a text with proper intonation
 - Apply the reread strategy to identify the elements of fiction, including the sequence of events.
 - Identify and apply how to use commas in a series
 - Write the draft of an opinion letter
4. Look at the Sky Day 4
- Blend and build words with long i sound-spellings
 - Identify and build words with open syllables
 - Identify the meaning of compound words
 - Read a text with proper intonation
 - Apply the reread strategy to identify key details in a story, including how characters respond to important events
 - Identify and apply how to use commas in a series
 - Write the draft of an opinion letter
5. Look at the Sky Day 5
- Discuss things in the sky using key words and examples from this week’s texts
 - Blend, build, and spell words with short i sound-spellings
 - Apply understanding of high frequency words and Words to Know
 - Identify and produce sentences with subject-verb agreement
 - Identify and apply how to use commas un a series
 - Compare and contrast texts with the same topic
 - Answer questions about a text using text evidence

14. Ways People Help

1. Ways People Help Day 1
- Discuss how people help their communities
 - Add sounds to words with long o sound-spellings
 - Blend sounds in words with long o sound-spellings
 - Identify examples of how key words are used in real life
 - Ask and answer questions to identify key details in a nonfiction text
 - Identify and form past-tense verbs
 - Identify and write numbers 9 and 10
2. Ways People Help Day 2
- Delete sounds in words with long o sound-spellings
 - Blend sounds in words with long o sound-spellings
 - Identify and apply present- and past-tense forms of key words by adding -ing and -ed
 - Ask and answer questions about a text to identify and retell key details
 - Identify the author’s purpose of a nonfiction text

- Identify, form, and use past- and future-tense verbs
 - Identify and write punctuation marks
3. Ways People Help Day 3
 - Substitute sounds in words with long o sound-spellings
 - Blend and sort words with long o sound-spellings
 - Identify and apply understanding of high-frequency words by reading, spelling, and writing each word
 - Read a text with expression
 - Identify the elements of narrative nonfiction, including author’s purpose
 - Write a short informative response using text evidence
 - Identify and apply correct capitalization and punctuation to the greeting and closing of a letter
 4. Ways People Help Day 4
 - Substitute sounds in words with long o sound-spellings
 - Identify , form, and use contractions with the word not
 - Identify and use synonyms to determine the meaning of new words
 - Read a text with expression
 - Compare and contrast key details of different texts, including author’s purpose
 - Analyze text evidence from two stories
 - Identify and apply correct capitalization and punctuation to the greeting and closing of a letter
 5. Ways People Help Day 5
 - Discuss how people help their communities using key words and examples from this week’s texts
 - Blend and build words with long o sound-spellings
 - Apply understanding of high frequency words and Words to Know
 - Compare and contrast different texts
 - Write a short opinion text using evidence from two sources
 - Identify, form, and use past- and future-tense verbs
 - Identify and apply correct capitalization and punctuation to the greeting and closing of a letter

15. Weather Alert!

1. Weather Alert! Day 1
 - Discuss how the weather affects people
 - Blend and identify the number of syllables in words with long e sound-spellings
 - Identify examples of how key words are used in real life
 - Ask and answer questions to identify key details in a text
 - Identify, form, and use the present-tense forms of the verb have
 - Write sentences using proper spacing between words
 - Identify how to revise an opinion letter
2. Weather Alert! Day 2
 - Blend and identify the number of syllables in words with long e sound-spellings
 - Identify and apply the present-tense forms of key words by adding -s
 - Ask and answer questions to identify and retell key details in an expository text
 - Identify the main idea of an expository text
 - Identify, form, and use present- and past-tense forms of the verb have

- Revise an opinion letter
- 3. Weather Alert! Day 3
 - Blend and sort words with long e sound-spellings
 - Identify and apply understanding of high frequency words by reading, spelling, and writing each word
 - Read a text with proper phrasing
 - Ask and answer questions to identify the main idea and key details of an expository text
 - Identify the elements of expository texts
 - Apply correct capitalization and punctuation to book titles
 - Identify how to edit an opinion letter
- 4. Weather Alert! Day 4
 - Blend and build words with long e sound-spellings
 - Identify, form, and use plural nouns that end with -s and -es
 - Identify antonyms
 - Read a text with proper phrasing
 - Use pictures and text features to identify the main idea and key details of a text
 - Apply correct capitalization and punctuation to book titles
 - Edit and publish an opinion letter, using a dictionary to check correct spellings
- 5. Weather Alert! Day 5
 - Discuss how weather affects people using key words and examples from this week's texts
 - Blend, build, and spell words with long e sound-spellings
 - Apply understanding of high-frequency words and Words to Know
 - Identify, form, and use the present- and past-tense forms of the verb have
 - Apply correct capitalization and punctuation to book titles
 - Compare and contrast texts with the same topic
 - Edit and publish an opinion letter, using a dictionary to check correct spellings

16. Express Yourself

1. Express Yourself Day 1
 - Discuss how you like to express yourself
 - Add and delete sounds in words with long u sound-spellings
 - Blend sounds in words with long u sound-spellings
 - Identify examples of how key words are used in real life
 - Ask and answer questions to identify key details in an expository text
 - Identify how to combine simple sentences
 - Use proper handwriting technique to fill out a form
2. Express Yourself Day 2
 - Identify and produce alliteration
 - Blend words with long u sound-spellings
 - Identify and apply the present-tense form of key words by adding -s
 - Ask and answer questions to identify and retell key details in an expository text
 - Identify the main idea of a text
 - Rearrange the words in a sentence to produce a new sentence
3. Express Yourself Day 3
 - Blend and sort words with long u sound-spellings

- Identify and apply understanding of high-frequency words by reading, spelling, and writing each word
 - Read a text with correct pronunciation
 - Identify the elements of expository texts
 - Ask and answer questions to identify the main idea and key details of a text
 - Write a short informative response using text evidence
 - Apply correct capitalization and punctuation to different kinds of sentences
4. Express Yourself Day 4
- Blend and build words with long u sound-spellings
 - Identify, form, and use comparative adjectives by adding -er and -est
 - Use prefixes to determine the meaning of new words
 - Read a text with correct pronunciation
 - Ask and answer questions to identify the main ideas and key details in an expository text
 - Write different types of sentences with correct punctuation
 - Compare and contrast, and analyze text evidence from two texts
5. Express Yourself Day 5
- Discuss how you like to express yourself using key words and examples from this week's texts
 - Blend, build, and spell words with the long u sound
 - Apply understanding of high frequency words and words to know
 - Combine and rearrange sentences to make them more interesting
 - Apply correct capitalization and punctuation to different kinds of sentences
 - Compare and contrast different texts
 - Write a short informative response with evidence from two sources
6. Live and Learn: Unit Review
- Identify the sound spelling patterns of words with long vowels (a, e, i, o, u)
 - Predict, define, and accurately use academic vocabulary words using similes, compound words, synonyms, antonyms, and prefixes; Accurately identify and use high-frequency words and Words to Know
 - Apply the rereading strategy, and ask and answer questions to identify key details in nonfiction texts; apply the rereading strategy to identify key details in stories.
 - Identify the sequence of events in a story; Identify the author's purpose, and main idea and key details of nonfiction texts
 - Identify and analyze the features of expository texts, fiction, and narrative nonfiction
 - Identify, form, and use past-, present-, and future-tense verbs; Combine and rearrange sentences to make them more interesting
 - Identify and apply correct capitalization and punctuation to abbreviations, commas in a series, the greeting and closing of a letter, book titles, and different types of sentences
7. Live and Learn: Unit Test

Language Arts 2 B

1. **Course Overview**
 1. Get Ready for Language Arts!
2. **Different Places**
 1. Different Places Day 1

- Discuss different parts of the world
 - Identify long vowel sounds
 - Blend words with silent letters
 - Identify examples of how key words are used in real life
 - Apply the reread strategy to identify key details in an expository text
 - Identify linking verbs
2. Different Places Day 2
- Sort and blend sounds in words with silent letters
 - Identify and apply different forms of key words by adding the suffix -ly
 - Apply the reread strategy to identify and retell key details in a text
 - Compare and contrast key ideas in a text
 - Identify, form, and use linking verbs
3. Different Places Day 3
- Sort and blend sounds in words with silent letters
 - Identify and apply understanding of high-frequency words by reading, spelling, and writing each word
 - Read a text with correct pronunciation
 - Identify the elements of expository texts
 - Compare and contrast key ideas in a text
 - Identify and apply correct capitalization to proper nouns
 - Analyze text evidence
4. Different Places Day 4
- Blend and build words with silent letters
 - Use prefixes and suffixes to determine the meaning of new words
 - Identify the meaning of compound words
 - Read a text with correct pronunciation
 - Use diagrams and pictures to understand key details in an expository text
 - Write an informative text using text evidence
 - Identify and apply correct capitalization to proper nouns
5. Different Places Day 5
- Read, spell, and write words with silent letters
 - Identify and read irregularly spelled words
 - Compare and contrast two texts with the same topic
 - Answer questions about a text using text evidence
 - Use linking verbs in sentences
 - Capitalize proper nouns
 - Discuss different parts of the world using key words and examples from this week's texts

3. Earth Changes

1. Earth Changes Day 1
- Discuss how the earth changes
 - Segment and blend words with r-controlled vowels er, ir, ur, and or
 - Identify examples of how key words are used in real life
 - Apply the reread strategy to identify key details in an expository text
 - Identify helping verbs that tell about actions that happened in the past
2. Earth Changes Day 2
- Segment and blend words with r-controlled vowels er, ir, ur, and or

- Identify and apply present-tense forms of key words by adding -ing
 - Apply the reread strategy to identify and retell key details in an expository text
 - Identify the causes and effects in an expository text
 - Identify, form, and use past- and present-tense helping verbs
3. Earth Changes Day 3
- Substitute sounds in words with r-controlled vowels er, ir, ur, and or
 - Identify and apply understanding of high-frequency words by reading, spelling, and writing each word
 - Read a text with proper phrasing
 - Apply the reread strategy to identify key details in an expository text
 - Identify the elements of expository texts, including causes and effects
 - Analyze text evidence
 - Identify and apply correct capitalization and punctuation when using quotation marks to show dialogue
4. Earth Changes Day 4
- Blend and build words with r-controlled vowels er, ir, ur, and or
 - Identify and form words with inflectional endings -s, -es, -ed, and -ing
 - Use sentence context clues to determine the meaning of new words
 - Read a text with proper phrasing
 - Apply the reread strategy to identify key details in an expository text
 - Write a short informative response using text evidence
 - Identify and apply correct capitalization and punctuation when using quotation marks to show dialogue
5. Earth Changes Day 5
- Discuss how the earth changes using key words and examples from this week's texts
 - Blend, build, and spell words with r-controlled vowels er, ir, ur, and or
 - Apply understanding of high-frequency words and Words to Know
 - Compare and contrast two texts with the same topic
 - Answer questions about a text using text evidence
 - Identify, form, and use present- and past-tense helping verbs
 - Identify and apply correct capitalization and punctuation when using quotation marks to show dialogue
- 4. Our Culture Makes Us Special**
1. Our Culture Makes Us Special Day 1
- Discuss kids around the world
 - Identify and produce rhyming words with r-controlled vowel sounds or, ore, oar, and ar
 - Blend words with r-controlled vowel sounds or, ore, oar, and ar
 - Identify examples of how key words are used in real life
 - Use the pictures in a story to identify key details
 - Identify, form, and use the past-tense forms of irregular verbs
2. Our Culture Makes Us Special- Day 2
- Substitute sounds in words with r-controlled vowel sounds or, ore, oar, and ar
 - Blend words with r-controlled vowel sounds or, ore, oar, and ar
 - Identify and apply the present-tense forms of key words by adding -ing
 - Use the pictures in a story to identify and retell key details
 - Compare and contrast the events in a story

- Identify, form, and use the past-tense forms of irregular verbs
3. Our Culture Makes Us Special- Day 3
 - Blend and sort as well as substitute sounds in words with r-controlled vowel sounds or, ore, oar, and ar
 - Identify and apply understanding of high-frequency words by reading, spelling and writing each word
 - Read a text with expression
 - Identify the elements of realistic fiction
 - Use the pictures in a story to compare and contrast key events
 - Write a short informative response using text evidence
 - Identify and apply correct capitalization and punctuation to book titles
 4. Our Culture Makes Us Special- Day 4
 - Blend and build words with r-controlled vowel sounds or, ore, oar, and ar
 - Identify, form, and use irregular plural nouns
 - Identify the meanings of similes to understand a text
 - Read a text with expression
 - Use pictures and text features to compare and contrast different texts
 - Analyze text evidence from two stories
 - Identify and apply correct capitalization and punctuation to book titles
 5. Our Culture Makes Us Special Day 5
 - Discuss kids around the world using key words and examples from this week's texts
 - Blend and build words with r-controlled vowel sounds or, ore, oar, and ar
 - Apply understanding of high-frequency words and Words to Know
 - Identify, form, and use the past-tense forms of irregular verbs
 - Identify and apply correct capitalization and punctuation to book titles
 - Write a short narrative letter using evidence from two sources
- 5. Folktales about Nature**
1. Folktales about Nature Day 1
 - Discuss nature
 - Identify the number of syllables in words with r-Controlled vowel sounds eer, ere, and ear
 - Blend sounds in words with r-Controlled vowel sounds eer, ere, and ear
 - Identify examples of how key words are used in real life
 - Use pictures to identify key details in a drama
 - Identify, form, and use the past-tense forms of irregular verbs
 2. Folktales about Nature Day 2
 - Identify the number of syllables in words with r-controlled vowel sounds eer, ere, and ear
 - Blend sounds in words with r-controlled vowel sounds eer, ere, and ear
 - Identify and apply the past- and present-tense forms of key words by adding -ed and -es
 - Use the pictures in a drama to identify and retell key details
 - Identify the theme of a drama
 - Identify, form, and use the past-tense forms of irregular verbs
 3. Folktales about Nature Day 3
 - Segment, blend, and sort words with r-controlled vowel sounds eer, ere, and ear

- Identify and apply understanding of high-frequency words by reading, spelling, and writing each word
 - Read a text with expression
 - Use the pictures in a drama to identify key details
 - Identify the elements of dramas and folktales, including theme
 - Analyze text evidence
 - Identify and apply correct capitalization and punctuation to the greeting and closing of a letter
4. Folktales about Nature Day 4
- Blend and build words with r-controlled vowel sounds eer, ere, and ear
 - Identify and apply correct capitalization and punctuation to abbreviations
 - Identify and use root words to determine the meaning of new words
 - Read a text with expression
 - Use the pictures and dialogue in a drama to identify key details
 - Write a short informative text using text evidence
 - Identify and apply correct capitalization and punctuation to the greeting and closing of a letter
5. Folktales about Nature Day 5
- Discuss nature using key words and examples from the texts
 - Blend, build, and spell words with r-controlled vowel sounds eer, ere, and ear
 - Apply understanding of high-frequency words and Words to Know
 - Identify, form, and use the past-tense forms of irregular verbs
 - Identify and apply correct capitalization and punctuation to the greeting and closing of a letter
 - Compare and contrast two texts with the same topic
 - Answer questions about a text using text evidence
- 6. Poems About Nature**
1. Poems about Nature Day 1
- Discuss what is exciting about nature
 - Identify the number of syllables in a word with r-controlled vowel sounds are, air, ear, and ere
 - Blend sounds in words with r-controlled vowel sounds are, air, ear, and ere
 - Identify examples of how key words are used in real life
 - Use the pictures in poems to identify key details
 - Identify, form, and use contractions
2. Poems about Nature Day 2
- Sort and blend sounds in words with r-Controlled vowel sounds are, air, ear, and ere
 - Identify and apply the plural forms of key words by adding -s
 - Use the pictures in a poem to identify and retell key details
 - Identify the elements of a free verse poem
 - Retell key details from poems read aloud
 - Identify the theme of a poem
 - Identify, form, and use contractions
3. Poems about Nature Day 3
- Blend and sort words with r-Controlled vowel sounds are, air, ear, and ere

- Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a poem with proper phrasing
 - Identify repetition in poems
 - Use pictures and key details to identify the theme of a poem
 - Write a short informative response using text evidence
 - Identify and apply how to use apostrophes to form contractions
4. Poems About Nature Day 4
- Blend and build words with r-Controlled vowel sounds are, air, ear, and ere
 - Identify the number of syllables in words with r-Controlled vowel sounds are, air, ear, and ere
 - Identify the meaning of similes to understand a poem
 - Read a poem with proper phrasing
 - Compare and contrast different poems
 - Analyze text evidence from different poems
 - Identify and apply how to use apostrophes to form contractions
5. Poems about Nature Day 5
- Discuss what is exciting about nature using key words and examples from this week's texts
 - Blend, build, and spell words with r-Controlled vowel sounds are, air, ear, and ere
 - Apply understanding of high frequency words and Words to Know
 - Identify, form, and use contractions
 - Identify and apply how to use apostrophes to form contractions
 - Compare and contrast different poems
 - Write a short opinion text with evidence from two sources
6. Our Life, Our World: Unit Review
- Identify the sound spelling patterns of words with silent letters (wr, kn, gm, mb, and sc), r-controlled vowels (er, ir, ur, or, ore, oar, ar, eer, ere, ear, are, and air), and plural endings (-s and -es)
 - Predict, define, and accurately use academic vocabulary words using prefixes, context clues, similes, and root words; Accurately identify and use high-frequency words, oral vocabulary, and Words to Know
 - Apply the reread strategy to identify key details in nonfiction texts; use the pictures in stories, dramas, folktales, and poetry to identify key details
 - Compare and contrast key ideas, and identify cause and effect in nonfiction text; Compare and contrast the events and identify the theme of a story; Identify the theme of a poem
 - Identify and analyze features of expository texts, realistic fiction, dramas and folktales, and poetry
 - Identify and use linking verbs, helping verbs, irregular verbs (go, do, come, run, hide), plural nouns, and contractions in sentences
 - Identify and apply correct capitalization, punctuation, use of quotation marks, and use of contractions to combine words; Identify and apply correct capitalization and punctuation in book titles and letters
7. Our Life, Our World: Unit Test
- 7. Being a Good Citizen**

1. Being a Good Citizen Day 1
 - Discuss how to be a good citizen
 - Reverse and blend sounds in words with diphthongs ou and ow
 - Give examples of how key words are used in real life
 - Summarize the key ideas in a story
 - Identify the features of a compare/contrast paragraph
 - Identify, form, and use pronouns
2. Being a Good Citizen Day 2
 - Summarize a story
 - Identify different points of view in a story
 - Identify the purpose and audience of a compare/contrast paragraph
 - Spell words with ou and ow
 - Use pronouns in sentences
 - Retell key details from a text read aloud
3. Being a Good Citizen Day 3
 - Blend, sort, and substitute sounds in words with diphthongs ou and ow
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a story with proper intonation
 - Summarize and identify the elements of realistic fiction, including different points of view
 - Analyze text evidence
 - Identify and apply correct capitalization and punctuation when using quotation marks to show dialogue
 - Identify how to develop ideas in a compare/contrast paragraph
4. Being a Good Citizen Day 4
 - Build and substitute sounds in words with diphthongs ou and ow
 - Identify and use irregular plural nouns
 - Use suffixes to determine the meaning of new words
 - Read a story with proper intonation
 - Summarize and identify the different points of view in a story
 - Prewrite a compare/contrast paragraph
 - Identify and apply correct capitalization and punctuation when using quotation marks to show dialogue
5. Being a Good Citizen Day 5
 - Discuss how to be a good citizen using key words and examples from this week's texts
 - Blend and build words with diphthongs ou and ow
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Identify, form, and use pronouns
 - Identify and apply correct capitalization and punctuation when using quotation marks to show dialogue
 - Compare and contrast two stories
 - Answer questions about a text using text evidence

8. Cooperation Works!

1. Cooperation Works! Day 1

- Discuss how people cooperate
 - Segment and blend sounds in words with oy and oi sound-spellings
 - Identify examples of how key words are used in real life
 - Summarize the key ideas in a story
 - Identify the features of a compare/contrast paragraph
 - Identify subject and predicate pronouns
2. Cooperation Works! Day 2
- Segment and blend sounds in words with oy and oi sound-spellings
 - Identify and apply the present- and past-tense forms of key words by adding -ing and -ed
 - Summarize and retell key ideas in a story
 - Identify different points of view in a story
 - Identify the structure of a compare/contrast paragraph
 - Identify, form, and use subject and predicate pronouns
3. Cooperation Works! Day 3
- Blend, sort, and substitute sounds in words with oy and oi sound-spellings
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a story with expression
 - Identify the elements of fiction, including different points of view
 - Identify and apply correct capitalization when using the pronoun I
 - Write the draft of a compare/contrast paragraph
4. Cooperation Works! Day 4
- Build and delete sounds in words with oy and oi sound-spellings
 - Identify the number of syllables in words with consonant + le (el, al) syllables
 - Identify and determine the meanings of idioms
 - Read a story with expression
 - Use the pictures in a story to identify key details about characters, including their points of view
 - Identify and apply correct capitalization when using the pronoun I
 - Write the draft of a compare/contrast paragraph
5. Cooperation Works! Day 5
- Discuss how people cooperate using key words and examples from this week's texts
 - Blend, build, and spell words with oy and oi sound-spellings
 - Apply understanding of high frequency words and Words to Know
 - Identify, form, and use, subject and predicate pronouns
 - Identify and apply correct capitalization when using the pronoun I
 - Compare and contrast two stories
 - Answer questions about a text using text evidence

9. Our Heroes

1. Our Heroes Day 1

- Discuss heroes
- Identify the number of syllables in words
- Blend words with variant u sound-spellings
- Identify examples of how key words are used in real life
- Summarize key details in a biography

- Identify possessive pronouns
- 2. Our Heroes Day 2
 - Sort and blend sounds in words with variant u sound-spellings
 - Identify and apply the present-tense forms of key words by adding -ing
 - Summarize and retell key details from a biography
 - Identify the sequence of events in a biography
 - Identify, form, and use possessive pronouns
- 3. Our Heroes- Day 3
 - Blend and sort words with variant u sound-spellings
 - Identify and apply understanding of high-frequency words by reading, spelling and writing each word
 - Read a text with proper phrasing
 - Identify the elements of a biography, including sequence of events
 - Summarize key details in a biography
 - Write a short informative response using text evidence
 - Identify and apply correct capitalization to proper nouns
- 4. Our Heroes- Day 4
 - Build words with variant u sound-spellings
 - Identify and form contractions that use the word not
 - Identify synonyms to determine the meaning of new words
 - Read a text with proper phrasing
 - Compare and contrast two biographies
 - Analyze text evidence from two sources
 - Identify and apply correct capitalization to proper nouns
- 5. Our Heroes- Day 5
 - Discuss heroes using key words and examples from this week's texts
 - Separate, build, and spell words with variant u sound-spellings
 - Apply understanding of high-frequency words and Words to Know
 - Identify, form, and use possessive pronouns
 - Identify and apply correct capitalization to proper nouns
 - Compare and contrast two biographies
 - Write a short informative text using evidence from two sources

10. Preserving Our Earth

1. Preserving Our Earth- Day 1
 - Discuss how we can protect the earth
 - Identify the number of syllables in a word
 - Blend words with variant vowel sounds-spellings
 - Identify examples of how key words are used in real life
 - Make, confirm, and revise predictions about a story
 - Identify contractions made with possessive pronouns
 - Identify how to revise a compare/contrast paragraph
2. Preserving Our Earth- Day 2
 - Blend and delete sounds in words with variant vowel sound-spellings
 - Identify and apply different forms of key words by adding the suffix -ly
 - Make, confirm, and revise predictions about a story
 - Identify and retell key details in story, include the problem and solution

- Identify, form, and use contractions made with possessive pronouns
 - Revise a compare/contrast paragraph
3. Preserving Our Earth- Day 3
 - Blend and sort words with variant vowel sound-spellings
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a text with proper intonation
 - Identify the elements of fiction, including problem and solution
 - Make, confirm, and change predictions about a story
 - Differentiate between contractions and possessive pronouns and apply correct capitalization and punctuation
 - Identify how to edit a compare/contrast paragraph
 4. Preserving Our Earth- Day 4
 - Build and delete sounds in words with variant vowel sound-spellings
 - Identify the number of syllables in words that have vowel teams
 - Identify and determine the meaning of homophones
 - Read a text with proper intonation
 - Use the dialogue in a story to identify how characters respond to problems and solutions
 - Edit and publish a compare/contrast paragraph, using a dictionary to check spelling
 - Differentiate between contractions and possessive pronouns and apply correct capitalization and punctuation
 5. Preserving Our Earth- Day 5
 - Discuss how we can protect the earth using key words and examples from this week's texts
 - Build, spell, and add sounds to words with variant vowel sound-spellings
 - Apply understanding of high frequency words and Words to Know
 - Identify, form, and use contractions made with possessive pronouns
 - Differentiate between contractions and possessive pronouns and apply correct capitalization and punctuation
 - Compare and contrast two texts with the same topic
 - Edit and publish a compare/contrast paragraph, using a dictionary to check spelling

11. Rights and Rules

1. Rights and Rules Day 1
 - Discuss why rules are important
 - Delete sounds in words to make new words
 - Blend sounds in words with short vowel sound-spellings
 - Identify examples of how key words are used in real life
 - Make, confirm, and change predictions about an expository text
 - Identify and apply correct pronoun-verb agreement
2. Rights and Rules Day 2
 - Segment and blend sounds in words with short vowel sound-spellings
 - Identify and apply the past-tense forms of key words by adding -ed
 - Identify and retell key details in an expository text
 - Make, confirm, and change predictions about an expository text
 - Identify the causes and effects in an expository text

- Identify and apply correct pronoun-verb agreement
3. Rights and Rules Day 3
 - Blend, sort, and reverse sounds in words with short vowel sound-spellings
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a text with correct pronunciation
 - Identify the elements of expository texts, including causes and effects
 - Use text features to make, change, and confirm predictions about expository texts
 - Write a short informative response using text evidence
 - Identify and apply correct capitalization and punctuation to book titles
 4. Rights and Rules Day 4
 - Segment and build words with short vowel sound-spellings
 - Sequence words into alphabetical order
 - Use sentence context clues to determine the meaning of multiple-meaning words
 - Read a text with correct pronunciation
 - Compare and contrast expository texts
 - Analyze text evidence from two sources
 - Identify and apply correct capitalization and punctuation to book titles
 5. Rights and Rules Day 5
 - Discuss why rules are important using key words and examples from this week's texts
 - Blend and build words with short vowel sound-spellings
 - Apply understanding of high frequency words and Words to Know
 - Identify and apply correct pronoun-verb agreement
 - Identify and apply correct capitalization and punctuation to book titles
 - Compare and contrast expository texts
 - Write a short informative response with evidence from two sources
 6. Let's Make a Difference: Unit Review
 - Identify the sound spelling patterns of words with diphthongs (ou, ow, oy and oi), variant vowels (u and o), and short vowel digraphs (ea, ou, and y)
 - Predict, define, and accurately use academic vocabulary words, including multiple-meaning words, suffixes, idioms, synonyms, homophones; Accurately identify and use high-frequency words and Words to Know
 - Summarize key ideas and make, confirm, and revise predictions in a nonfiction text; Summarize key ideas and make, confirm, and revise predictions in fiction texts
 - Identify the author's point of view and sequence of events in a story, identify the problem and solution, and identify cause and effect in a nonfiction text.
 - Identify and analyze features of fiction, biographies, and expository texts.
 - Identify, form, and use pronouns, possessive pronouns, and contractions; Produce sentences with pronoun-verb agreement
 - Identify and apply correct capitalization, punctuation, use of quotation marks, and use of contractions to combine words; Identify and apply correct capitalization and punctuation in book titles and letters
 7. Let's Make a Difference: Unit Test

12. Plant Myths and Facts

1. Plant Myths and Facts Day 1
 - Discuss myths and plants

- Identify rhyme and blend sounds in words with open and closed syllables
 - Identify examples of how key words are used in real life
 - Apply the reread strategy to identify key details in a myth
 - Identify adjectives that describe what kind
 - Identify cursive handwriting
 - Identify the features of a research report
2. Plant Myths and Facts Day 2
- Blend and add sounds to words with open and closed syllables
 - Identify and apply present- and past-tense forms of key words by adding -ing and -ed.
 - Apply the reread strategy to identify and retell key details in a myth
 - Identify the theme of a story
 - Identify adjectives that describe how many
 - Identify how to join cursive letters together
 - Identify the purpose and audience of a research report
3. Plant Myths and Facts Day 3
- Blend, sort, and delete sounds in words with open and closed syllables
 - Identify and apply understanding of high-frequency words by reading, spelling, and writing each word
 - Read a text with expression
 - Identify the elements of a myth, including the theme
 - Apply the reread strategy to identify key details in a myth
 - Analyze text evidence
 - Identify and apply how to use commas to separate items in a series
4. Plant Myths and Facts Day 4
- Blend and build words with open and closed syllables
 - Identify and determine the meaning of compound words
 - Use sentence context clues to determine the meaning of new words
 - Read a text with expression
 - Use the pictures in a story to identify, compare, and contrast key details
 - Prewrite a research a report
 - Identify and apply how to use commas to separate items in a series
5. Plant Myths and Facts Day 5
- Discuss myths and plants using key words and examples from this week’s texts
 - Blend and add sounds to words with open and closed syllables
 - Apply understanding of high-frequency words and Words to Know
 - Identify, form, and use adjectives that describe what kind and how many
 - Identify and apply how to use commas to separate items in a series
 - Compare and contrast two myths
 - Answer questions about a text using text evidence

13. We Need Energy

1. We Need Energy Day 1
- Discuss how people use energy
 - Blend and add sounds to words with consonant-vowel-e syllables
 - Identify how key words are used in real life
 - Apply the reread strategy to identify key details in an expository text
 - Identify articles a, an, and the

- Identify the features of a research report
 - Identify and write cursive letter e
2. We Need Energy Day 2
 - Separate and blend sounds in words with consonant-vowel-e syllables
 - Identify and apply the present-tense forms of key words by adding -ing
 - Apply the reread strategy to identify and retell key details in an expository text
 - Identify the author's purpose of an expository text
 - Identify and use special adjectives this, these, that, and those
 - Identify and write cursive letter l
 - Identify how to write a strong opening for a research report
 3. We Need Energy Day 3
 - Blend, sort, and substitute sounds in words with consonant-vowel-e syllables
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a text with proper intonation
 - Identify the features of an expository text, including the author's purpose
 - Apply the reread strategy to identify key details in an expository text
 - Apply correct capitalization and punctuation to special names and titles
 - Write the draft of a research report
 4. We Need Energy Day 4
 - Blend, sort, and separate sounds in words with consonant-vowel-e syllables
 - Use prefixes and suffixes to determine the meaning of new words
 - Use paragraph clues to determine the meaning of new words
 - Read a text with proper intonation
 - Identify key details in an expository text, including how repetition adds meaning
 - Write the draft of a research report
 - Apply correct capitalization and punctuation to special names and titles
 5. We Need Energy Day 5
 - Discuss how people use energy using key words and examples from this week's texts
 - Blend and build words with consonant-vowel-e syllables
 - Apply understanding of high frequency words and Words to Know
 - Identify, form, and use articles and adjectives
 - Apply correct capitalization and punctuation to special names and titles
 - Compare and contrast two expository texts
 - Use text evidence to answer questions about a text

14. Team Up to Explore

1. Team Up to Explore Day 1
 - Discuss the importance of teamwork
 - Identify the number of syllables in words with consonant + le syllables
 - Blend sounds in words with consonant + le syllables
 - Identify how key words are used in real life
 - Summarize key details in an expository text
 - Identify and use adjectives that compare
 - Identify and write cursive letter i
2. Team Up to Explore Day 2
 - Segment and blend sounds in words with consonant + le syllables

- Identify and apply the present-tense forms of key words by adding -ing
 - Summarize and retell key details in an expository text
 - Identify the main idea and key details of an expository text
 - Identify and use adjectives that compare
 - Identify and write cursive letter t
3. Team Up to Explore Day 3
- Blend, sort, and add and delete sounds in words with consonant + le syllables
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a text with correct pronunciation
 - Identify the elements of expository texts, including the main idea and key details
 - Summarize the key details in an expository text
 - Write a short informative response using text evidence
 - Identify and apply how to use apostrophes in singular possessive nouns
4. Team Up to Explore Day 4
- Build and add and delete sounds in words with consonant + le syllables
 - Differentiate between contractions and possessive nouns
 - Use Greek and Latin roots to determine the meaning of new words
 - Read a text with correct pronunciation
 - Summarize and compare expository texts
 - Analyze text evidence from two sources
 - Identify and apply how to use apostrophes in plural possessive nouns
5. Team Up to Explore Day 5
- Discuss the importance of teamwork using key words and examples from this week's texts
 - Segment, blend, and build words with consonant + le syllables
 - Apply understanding of high frequency words and Words to Know
 - Identify, form, and use adjectives that compare
 - Identify and apply how to use apostrophes to form singular and plural possessive nouns
 - Compare and contrast two expository texts
 - Write a short informative response with evidence from two sources

15. Money Matters

1. Money Matters Day 1
- Discuss how people use money
 - Separate and blend sounds in words with vowel team syllables
 - Identify how key words are used in real life
 - Summarize key details in an expository text
 - Identify adverbs and prepositional phrases
 - Identify and write cursive letter o
 - Identify how to revise a research report
2. Money Matters Day 2
- Blend and substitute sounds in words with vowel team syllables
 - Identify and apply present-tense forms of key words by adding -s or -es
 - Summarize and retell key ideas in an expository text
 - Identify the problem and solution of an expository text
 - Revise a research report

- Identify adverbs and prepositional phrases
 - Identify and write cursive letter a
3. Money Matters Day 3
 - Blend, sort, and substitute sounds in words with vowel team syllables
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a text with proper intonation
 - Identify the elements of an expository text, including the problem and solution
 - Summarize key ideas in an expository text
 - Apply correct capitalization and punctuation to proper nouns and the word I
 - Identify how to edit a research report
 4. Money Matters Day 4
 - Build and reverse sounds in words with vowel team syllables
 - Identify and use adjectives that compare
 - Use paragraph clues to determine the meaning of new words
 - Read a text with proper intonation
 - Identify key details in an expository text, including how the author gets the reader's attention
 - Edit and publish a research report, using a dictionary to check spelling
 - Apply correct capitalization and punctuation to proper nouns and the word I
 5. Money Matters Day 5
 - Discuss how people use money using key words and examples from this week's texts
 - Blend and build words with vowel team syllables
 - Apply understanding of high frequency words and Words to Know
 - Identify adverbs and prepositional phrases
 - Identify and apply correct capitalization to proper nouns and the word I
 - Compare and contrast two texts with the same topic
 - Edit and publish a research report, using a dictionary to check spelling

16. The World of Ideas

1. The World of Ideas Day 1
 - Discuss imagination
 - Identify the number of syllables in words with r-controlled vowel syllables
 - Blend sounds in words with r-controlled vowel syllables
 - Identify how key words are used in real life
 - Summarize key details in a poem
 - Identify adjectives and adverbs
 - Identify and write cursive letter c
2. The World of Ideas Day 2
 - Blend and substitute sounds in words with r-controlled vowel syllables
 - Identify and apply the past-tense forms of key words by adding -ed
 - Identify and retell key details in a poem
 - Identify the features of rhyming poems
 - Identify the point of view of a poem
 - Identify and use adjectives and adverbs
 - Identify and write cursive letter d
3. The World of Ideas Day 3

- Blend, sort, and substitute sounds in words with r-controlled vowel syllables
 - Identify and apply understanding of high frequency words by reading, spelling and writing each word
 - Read a text with expression
 - Identify key details in a poem, including the point of view and rhyming words
 - Write a short informative response using text evidence
 - Identify and apply correct capitalization and punctuation to different kinds of sentences
4. The World of Ideas Day 4
- Build and add sounds to words with r-controlled vowel syllables
 - Identify the number of syllables in a word
 - Identify the meaning of metaphors
 - Read a text with expression
 - Compare and contrast poems
 - Analyze text evidence from two poems
 - Identify and apply correct capitalization and punctuation to different kinds of sentences
5. The World of Ideas Day 5
- Discuss imagination using key words and examples from this week's texts
 - Build and add sounds to words with r-controlled vowel syllables
 - Apply understanding of high frequency words and Words to Know
 - Identify and use adjectives and adverbs
 - Identify and apply correct capitalization and punctuation to different kinds of sentences
 - Compare and contrast poems
 - Write a rhyming poem using evidence from two sources
6. How on Earth?: Unit Review
- Identify the sound spelling patterns of words with open and closed syllables, consonant-vowel-e syllables, consonant +le syllables, vowel team syllables, and r-controlled vowel syllables.
 - Predict, define, and accurately use academic vocabulary words using context clues, paragraph clues, Greek and Latin Roots, and metaphors; Accurately identify and use high-frequency words and Words to Know
 - Summarize and apply the reread strategy to identify key details in nonfiction texts; summarize and apply the reread strategy to identify key details in stories and poems
 - Identify the theme of a myth; identify the author's purpose, main idea and key details, and problem and solution of nonfiction texts; identify the point of view of a poem
 - Identify and analyze features of myths, expository texts, and poetry
 - Identify and use adjectives, articles and this, that, these, and those, adjectives that compare, adverbs and prepositional phrases, adjectives and adverbs in sentences.
 - Identify and apply commas in a series, correct capitalization in names and titles, apostrophes with possessive nouns, capitalization (proper nouns and I), and use correct sentence punctuation in sentences
7. How on Earth?: Unit Test

Accelerated Literature Study 2

Accelerated Literature Study 2

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

The Junior Great Books® program involves a student in reading engaging literature and participating in rich discussion. The literature included in the Junior Great Books program is chosen to spark a high level of thinking and expose the student to rich language and vocabulary. The teacher and Learning Coach use the Shared Inquiry™ method to help a student acquire the qualities and strategies of effective readers and thinkers. The student learns to read actively, noticing thoughts and questions that come to mind during the act of reading. They also learn to use the text, their own experiences, prior knowledge, and critical and creative thinking to participate in discussions about the text. These discussions help the student answer their own questions, satisfy their curiosity, and think more deeply about the content and process of his reading.

The student reads and rereads each Junior Great Books selection. Through modeling and direct instruction, they learn to note questions and reactions to text information during these readings. These questions and reactions form the foundation for the Shared Inquiry discussion. The student also chooses writing projects as another way to understand and extend what they have read.

Course Outline

1. The Happy Lion

1. The Happy Lion: Lesson 1

- Recall prior knowledge about concepts in the story
- Ask questions to clarify understanding of the story
- Discuss character traits
- Reread with a purpose
- Discuss ideas about the story

2. The Happy Lion: Lesson 2

- Use ideas from the story to produce original writing
- Use resources to connect a concept or theme from the story to a self-selected follow-up project
- Discuss ideas about the story and/or a selected project

2. Miss Maggie

1. Miss Maggie: Lesson 1

- With support, read "Miss Maggie"
- Ask questions to demonstrate understanding of a literary text, referring explicitly to the text as the basis for the answers

- Draw inferences about a character's motivation in a story
2. Miss Maggie: Lesson 2
 - Review the central message of the story
 - Explain how a character's actions contribute to the sequence of events in a literary text
3. **Anancy and Dog and Puss and Friendship**
 1. Anancy and Dog and Puss and Friendship: Lesson 1
 - Recall prior knowledge about concepts in the story
 - Ask questions to clarify understanding of the story
 - Discuss character traits and emotions
 - Reread with a purpose
 - Evaluate the behaviors of characters
 - Discuss ideas about the story
 2. Anancy and Dog and Puss and Friendship: Lesson 2
 - Use ideas from the story to produce original writing
 - Use resources to connect a concept or theme from the story to a self-selected follow-up project
 - Discuss ideas about the story and/or a selected project
4. **Catalog Cats/ Our Garden**
 1. Catalog Cats/ Our Garden: Lesson 1
 - With support, read "Catalog Cats/Our Garden"
 - Ask questions to demonstrate understanding of a literary text, referring explicitly to the text as the basis for the answers
 - Draw inferences about a character's motivation in a story
 2. Catalog Cats/ Our Garden: Lesson 2
 - Review the central message of the story
 - Explain how a character's actions contribute to the sequence of events in a literary text
5. **Carlos and the Cornfield**
 1. Carlos and the Cornfield: Lesson 1
 - Connect story characters and events with personal experiences
 - Ask questions to clarify understanding of the story
 - Discuss character traits
 - Reread with a purpose
 - Discuss ideas about the story
 2. Carlos and the Cornfield: Lesson 2
 - Use ideas from the story to produce original writing
 - Use resources to connect a concept or theme from the story to a self-selected follow-up project
 - Discuss ideas about the story and/or a selected project
6. **The Wedding Basket**
 1. The Wedding Basket: Lesson 1
 - Connect story characters and events with a previously read story
 - Ask questions to clarify understanding of the story
 - Discuss character emotions
 - Reread with a purpose
 - Discuss ideas about the story
 2. The Wedding Basket: Lesson 2

- Use ideas from the story to produce original writing
- Use resources to connect a concept or theme from the story to a self-selected follow-up project
- Discuss ideas about the story and/or a selected project

Language Arts 3

Language Arts 3 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is then presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing a personal narrative and an explanatory text. The focus on reading and writing is supplemented with instruction in grammar, phonics, spelling, handwriting, and reading foundations—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester A Outline

1. Adventure Stories

1. Adventure Stories: Genre
 - In this lesson, you will describe how to keep distractions away.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify word parts, including affixes and roots.
 - In this lesson, you will read spelling words that have the short vowels e, o, and u.
 - In this lesson, you will explain the meaning of prefixes in words.
2. Adventure Stories: Comprehension
 - In this lesson, you will locate information in a story in response to questions.
 - In this lesson, you will locate information in a story in response to questions.
 - In this lesson, you will use word parts (such as affixes and root words) to understand the meaning of a word.
 - In this lesson, you will practice writing all capital letters.
 - In this lesson, you will read words with short vowels e, o, and u.
3. Adventure Stories: Speak and Listen
 - In this lesson, you will find text evidence in a story to answer questions.
 - In this lesson, you will use communication strategies during a question-and-answer session.
 - In this lesson, you will use root words you know to figure out the meaning of

- a word you do not know.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice writing all lowercase letters.
4. Adventure Stories: Fluency
 - In this lesson, you will answer questions about a story.
 - In this lesson, you will use your voice to express feeling while reading aloud.
 - In this lesson, you will spell words with short vowels e, o, and u.
 - In this lesson, you will review the process of choosing a book to read.
 5. Adventure Stories: Synthesize
 - In this lesson, you will answer questions about a story.
 - In this lesson, you will make judgments about a story.
 - In this lesson, you will answer framing questions in a story.
 - In this lesson, you will read a book of your choice.

2. Better Together

1. Better Together: Genre
 - In this lesson, you will brainstorm ways you can contribute to your community.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify differences between spoken and written language.
 - In this lesson, you will spell words that end with silent e.
 - In this lesson, you will identify common suffixes.
2. Better Together: Comprehension
 - In this lesson, you will identify events in the beginning, the middle, and end of a story using a think-aloud strategy.
 - In this lesson, you will identify the sequence of events in a story using a think-aloud strategy.
 - In this lesson, you will explain what common suffixes mean.
 - In this lesson, you will practice cursive with lines, such as slant and straight lines.
 - In this lesson, you will read words that end with silent e.
3. Better Together: Speak and Listen
 - In this lesson, you will explain how transition words show the sequence of events in a story.
 - In this lesson, you will use transition words to make the sequence of events clear.
 - In this lesson, you will use glossaries to understand the meaning of words and phrases.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice cursive with curved lines, such as circles and part circles.
4. Better Together: Fluency
 - In this lesson, you will use signal words to accurately show the sequence of events in a story.
 - In this lesson, you will use signal words to show how a character's feelings are connected to story events.
 - In this lesson, you will spell words that end with silent e.
 - In this lesson, you will review the use of words that show the order of events

in a story.

5. Better Together: Synthesize

- In this lesson, you will predict the sequence of events in a story.
- In this lesson, you will find the sequence of story events using your predictions.
- In this lesson, you will read a book of your choice.

3. Adventures on Water

1. Adventures on Water: Genre

- In this lesson, you will describe how practice can help you get better at a new skill.
- In this lesson, you will listen to identify if the story you hear is realistic.
- In this lesson, you will use dictionaries to check the spelling of words.
- In this lesson, you will identify long a spelling patterns.
- In this lesson, you will identify words with Latin suffixes.

2. Adventures on Water: Comprehension

- In this lesson, you will describe a story character's traits.
- In this lesson, you will draw conclusions about story characters using graphic organizers.
- In this lesson, you will discover the meaning of words with Latin suffixes.
- In this lesson, you will practice staying on the lines when you write.
- In this lesson, you will read words with long a spelling patterns.

3. Adventures on Water: Speak and Listen

- In this lesson, you will draw inferences about a character's motivation in a story.
- In this lesson, you will use formal language to share details with an audience.
- In this lesson, you will use dictionaries to correct spelling.
- In this lesson, you will read a book of your choice.
- In this lesson, you will write lowercase i and lowercase t in cursive.

4. Adventures on Water: Fluency

- In this lesson, you will describe a character's feelings in a story.
- In this lesson, you will communicate with expression to entertain.
- In this lesson, you will spell words with the long a spelling patterns.
- In this lesson, you will draw inferences about characters.

5. Adventures on Water: Synthesize

- In this lesson, you will draw inferences about how characters feel and act.
- In this lesson, you will make connections between characters and events in a story.
- In this lesson, you will learn when to speak and when to listen.
- In this lesson, you will read a book of your choice.

4. Adventures Near and Far

1. Adventures Near and Far: Genre

- In this lesson, you will describe situations that trigger different emotions.
- In this lesson, you will identify the genre of a text.
- In this lesson, you will explain the difference between synonyms and antonyms.
- In this lesson, you will identify words with long o and long i spelling patterns.
- In this lesson, you will practice reading out loud smoothly and easily.

2. Adventures Near and Far: Comprehension

- In this lesson, you will retell a story to make sure you comprehend what you have read.
 - In this lesson, you will retell a story that you have read.
 - In this lesson, you will retell tall tales using features such as exaggerations and funny details.
 - In this lesson, you will determine the meaning of words using a thesaurus.
 - In this lesson, you will write lowercase e and lowercase l in cursive.
 - In this lesson, you will read words with long o or long i spelling patterns.
3. Adventures Near and Far: Speak and Listen
 - In this lesson, you will paraphrase part of a story.
 - In this lesson, you will retell stories that teach morals.
 - In this lesson, you will draw conclusions about a fable.
 - In this lesson, you will determine the meaning of words in sentences using a thesaurus.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice writing lowercase o and lowercase a in cursive.
 4. Adventures Near and Far: Fluency
 - In this lesson, you will retell a myth using your own predictions.
 - In this lesson, you will use appropriate phrasing while reading a myth aloud.
 - In this lesson, you will use your own words to restate what you hear in a text.
 - In this lesson, you will spell words with long vowel o and long vowel i spelling patterns.
 - In this lesson, you will review retelling a story.
 5. Adventures Near and Far: Read
 - In this lesson, you will read a book of your choice.
 6. Off on Adventures Unit Test

5. Discovering Folktales

1. Discovering Folktales: Genre
 - In this lesson, you will list ideas to show appreciation to someone who has helped you.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will learn how to use quotation marks in writing dialogue.
 - In this lesson, you will identify words with the correct long u spellings.
 - In this lesson, you will analyze the parts of a personal narrative.
2. Discovering Folktales: Comprehension
 - In this lesson, you will make predictions about what will happen in a story.
 - In this lesson, you will find the central message in a story.
 - In this lesson, you will use the setting of a story to better understand the story.
 - In this lesson, you will identify correct use of quotation marks in dialogue.
 - In this lesson, you will read words with the correct long u spellings.
 - In this lesson, you will describe how personal narratives tell about events in the order that they happen.
3. Discovering Folktales: Speak and Listen
 - In this lesson, you will restate the lesson in a story.
 - In this lesson, you will determine the lesson in a folktale or fable.

- In this lesson, you will write dialogue with punctuation.
 - In this lesson, you will plan the beginning of a personal narrative.
4. Discovering Folktales: Fluency
 - In this lesson, you will find the central message in a myth.
 - In this lesson, you will set a goal to improve your reading speed.
 - In this lesson, you will spell words with the correct long u spellings.
 - In this lesson, you will use what you know about the kinds of syllables to read words.
 - In this lesson, you will write a draft of the introduction to your personal narrative.
 5. Discovering Folktales: Synthesize
 - In this lesson, you will find details that support the central message of a story.
 - In this lesson, you will explore different interpretations of a story's message.
 - In this lesson, you will explain how heritage language affects English.
 - In this lesson, you will give examples of how authors plan the events they include in the beginning, middle, and end of a story.

6. Characters Who Change

1. Characters Who Change: Genre
 - In this lesson, you will describe the effects of dishonest behavior.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain how nouns are used.
 - In this lesson, you will identify words with the correct long e spellings.
 - In this lesson, you will explain how temporal words help writers show when events happen.
2. Characters Who Change: Comprehension
 - In this lesson, you will explain the difference between first-person and third-person point of view.
 - In this lesson, you will explain the difference between first-person and third-person point of view.
 - In this lesson, you will explain the difference between formal and informal language.
 - In this lesson, you will explain how nouns are used in sentences.
 - In this lesson, you will read words with the correct long e spellings.
 - In this lesson, you will explain how dialogue helps writers develop characters and plot.
3. Characters Who Change: Speak and Listen
 - In this lesson, you will identify the perspective of the narrator in a story.
 - In this lesson, you will identify the perspective of a narrator.
 - In this lesson, you will explain how pronouns are used in sentences.
 - In this lesson, you will identify descriptive words in personal narratives.
4. Characters Who Change: Fluency
 - In this lesson, you will identify the perspectives of characters in a story.
 - In this lesson, you will identify the perspectives of characters in a story.
 - In this lesson, you will spell words with the correct long e spellings.
 - In this lesson, you will plan your personal narrative.
5. Characters Who Change: Synthesize
 - In this lesson, you will compare perspective between self and character or

- narrator in a story.
- In this lesson, you will compare perspective between self and character or narrator in a story.
- In this lesson, you will write a draft of your personal narrative.

7. Clever Characters

1. Clever Characters: Genre
 - In this lesson, you will describe how it feels to be left out of an activity or group.
 - In this lesson, you will identify and spell words that begin with silent letters (wr, kn).
 - In this lesson, you will explain how verbs are used.
 - In this lesson, you will spell words that begin with silent letters (wr, kn).
 - In this lesson, you will explain the differences among the kinds of syllables.
2. Clever Characters: Comprehension
 - In this lesson, you will discuss the parts of a story.
 - In this lesson, you will use a story's details to talk about a story's parts.
 - In this lesson, you will explain how adjectives are used.
 - In this lesson, you will read words with silent letters wr and kn.
 - In this lesson, you will practice writing lowercase n and lowercase m in cursive.
3. Clever Characters: Speak and Listen
 - In this lesson, you will explain the purpose of different story parts.
 - In this lesson, you will use digital tools to record yourself reading part of a story.
 - In this lesson, you will explain how to use adverbs.
 - In this lesson, you will practice writing lowercase c and lowercase d in cursive.
 - In this lesson, you will read a book of your choice.
4. Clever Characters: Fluency
 - In this lesson, you will describe how parts of a story build on each other.
 - In this lesson, you will analyze the connections between parts of a story and read text aloud with accuracy.
 - In this lesson, you will spell words with silent letters.
 - In this lesson, you will review the parts of a story.
5. Clever Characters: Synthesize
 - In this lesson, you will tell how each part adds to a story.
 - In this lesson, you will make personal connections to a story.
 - In this lesson, you will read a book of your choice.

8. Acting Out Folktales

1. Acting Out Folktales: Genre
 - In this lesson, you will describe how friends can support each other.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will form regular plural nouns.
 - In this lesson, you will spell words that begin with the three-letter blends thr, spr, scr, and str.
 - In this lesson, you will identify kinds of syllables to help you read words in a sentence.
2. Acting Out Folktales: Comprehension

- In this lesson, you will identify parts of a play.
 - In this lesson, you will use plural nouns correctly when speaking.
 - In this lesson, you will read words with the three-letter blends thr, spr, scr, and str.
 - In this lesson, you will revise your personal narrative.
3. Acting Out Folktales: Speak and Listen
 - In this lesson, you will identify the purpose of parts of a play.
 - In this lesson, you will identify and spell words that begin with the three-letter blends thr, spr, scr, and str.
 - In this lesson, you will use plural nouns correctly when writing.
 - In this lesson, you will revise your personal narrative.
 4. Acting Out Folktales: Fluency
 - In this lesson, you will describe how each scene in a play builds on the previous scenes.
 - In this lesson, you will read aloud with expression.
 - In this lesson, you will spell words with the three-letter blends thr, spr, scr, and str.
 - In this lesson, you will edit your personal narrative.
 5. Acting Out Folktales: Write
 - In this lesson, you will publish your personal narrative.
 6. Fun with Folktales Unit Test

9. Amazing Animals

1. Amazing Animals: Genre
 - In this lesson, you will tell how practicing deep breathing can calm yourself.
 - In this lesson, you will check your writing again and revise words and sentences.
 - In this lesson, you will form plural nouns that do not follow the -s and -es rule.
 - In this lesson, you will identify words with the vowel digraphs oo, ew, ue, ui.
 - In this lesson, you will read words with more than one syllable.
2. Amazing Animals: Comprehension
 - In this lesson, you will explain how facts and opinions are different.
 - In this lesson, you will use facts to look at the solution to a problem.
 - In this lesson, you will practice using irregular plural nouns correctly when you write.
 - In this lesson, you will practice joining letters in cursive.
 - In this lesson, you will read words with the vowel digraphs oo, ew, ue, ui.
3. Amazing Animals: Speak and Listen
 - In this lesson, you will determine whether a sentence is a fact or an opinion in a nonfiction text.
 - In this lesson, you will explain attitudes using opinions.
 - In this lesson, you will practice using irregular plural nouns correctly when you speak.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write lowercase u and lowercase w in cursive.
4. Amazing Animals: Fluency
 - In this lesson, you will separate facts from opinions in a nonfiction text.
 - In this lesson, you will use feedback to improve your oral reading.

- In this lesson, you will spell words with oo, ew, ue, and ui.
 - In this lesson, you will review how to separate facts from opinions.
5. Amazing Animals: Synthesize
- In this lesson, you will explain how an author supports ideas using facts and reasons.
 - In this lesson, you will judge texts on how well the author uses supporting facts.
 - In this lesson, you will read a book of your choice.

10. Animals and Their Habitats

1. Animal Habitats: Genre
- In this lesson, you will identify feelings that tell you if you are in danger.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify abstract nouns.
 - In this lesson, you will identify words with r-controlled vowels ar, or, and ore.
 - In this lesson, you will practice reading words with more than one syllable.
2. Animal Habitats: Comprehension
- In this lesson, you will use illustrations to make predictions about what you will read.
 - In this lesson, you will confirm predictions using illustrations.
 - In this lesson, you will use abstract nouns correctly when writing.
 - In this lesson, you will write lowercase b and f in cursive.
 - In this lesson, you will read words with r-controlled vowels ar, or, and ore.
3. Animal Habitats: Speak and Listen
- In this lesson, you will describe the purpose of illustrations in an informational book.
 - In this lesson, you will discuss the purpose of illustrations.
 - In this lesson, you will use abstract nouns correctly when speaking.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write lowercase h and lowercase k in cursive.
4. Animal Habitats: Fluency
- In this lesson, you will explain how illustrations help you understand what you read.
 - In this lesson, you will explain how illustrations help you understand what you read.
 - In this lesson, you will spell words with r-controlled vowels ar, or, and ore.
 - In this lesson, you will review ways that illustrations add information to texts.
5. Animal Habitats: Synthesize
- In this lesson, you will use illustrations and words to understand what you read.
 - In this lesson, you will use information from illustrations and words to understand what you read.
 - In this lesson, you will read a book of your choice.

11. Animal Behaviors

1. Animal Behaviors: Genre
- In this lesson, you will explain some ways to ask for help when you need it.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will form regular verbs.
 - In this lesson, you will identify words with r-controlled vowels er, ir, ur, and

- or.
- In this lesson, you will use a dictionary to find the language an English word comes from.
- 2. Animal Behaviors: Comprehension
 - In this lesson, you will identify text features while reading nonfiction.
 - In this lesson, you will identify text features.
 - In this lesson, you will write using regular verbs.
 - In this lesson, you will write lowercase g and lowercase q in cursive.
 - In this lesson, you will read words with r-controlled vowels er, ir, ur, and or.
- 3. Animal Behaviors: Speak and Listen
 - In this lesson, you will explain how to use text features to find information.
 - In this lesson, you will participate in a discussion.
 - In this lesson, you will use regular verbs correctly when you speak.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write lowercase j and lowercase p in cursive.
- 4. Animal Behaviors: Fluency
 - In this lesson, you will use tools to find information about a topic.
 - In this lesson, you will use tools to expand your knowledge about a topic.
 - In this lesson, you will spell words with r-controlled vowels er, ir, ur, and or.
 - In this lesson, you will review how text features can give information in texts.
- 5. Animal Behaviors: Synthesize
 - In this lesson, you will use text features to find information.
 - In this lesson, you will organize information quickly.
 - In this lesson, you will prepare for a discussion about a text.

12. Animal Features

1. Animal Features: Genre
 - In this lesson, you will demonstrate how to cooperate in a group.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will form irregular verbs.
 - In this lesson, you will identify words with r-controlled vowels: air, are, and ear.
 - In this lesson, you will practice reading a poem fluently.
2. Animal Features: Comprehension
 - In this lesson, you will identify problems and solutions in a text.
 - In this lesson, you will identify problems, solutions, and chronological order.
 - In this lesson, you will write using irregular verbs.
 - In this lesson, you will write lowercase r and lowercase s in cursive.
 - In this lesson, you will read words with r-controlled vowels: air, are, and ear.
3. Animal Features: Speak and Listen
 - In this lesson, you will explain chronological order in an informational text.
 - In this lesson, you will explain chronological order in an informational text.
 - In this lesson, you will speak using irregular verbs.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice writing lowercase y and lowercase z in cursive.
4. Animal Features: Fluency
 - In this lesson, you will explain how to identify problems and solutions.
 - In this lesson, you will practice reading aloud with accuracy.

- In this lesson, you will spell words with r-controlled vowels air, are, and ear.
 - In this lesson, you will participate in a group discussion about a text.
5. Animal Features: Fluency Discussion
 6. Animal Features: Read
 - In this lesson, you will read a book of your choice.
 7. Captivating Critters Unit Test

13. Learning New Things

1. Learning New Things: Genre
 - In this lesson, you will explain how to show interest in another person’s point of view.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will form simple verb tenses.
 - In this lesson, you will identify words with the prefixes pre-, dis-, and mis-.
 - In this lesson, you will explain how writers of explanatory texts organize information.
2. Learning New Things: Comprehension
 - In this lesson, you will state aloud the key details that support the main idea.
 - In this lesson, you will find text details about historical figures.
 - In this lesson, you will form the past tense of some irregular verbs.
 - In this lesson, you will read words with the prefixes pre-, dis-, and mis-.
 - In this lesson, you will explain how writers of explanatory texts develop a topic with details like facts, definitions, and illustrations.
3. Learning New Things: Speak and Listen
 - In this lesson, you will explain how key details support a main idea.
 - In this lesson, you will listen for the details that support the main idea in a text.
 - In this lesson, you will use verb tenses correctly when writing.
 - In this lesson, you will choose a topic and find information about it.
 - In this lesson, you will find information about a topic of your choice.
4. Learning New Things: Fluency
 - In this lesson, you will find the main ideas of paragraphs in a text.
 - In this lesson, you will learn how to skim text to find main ideas quickly.
 - In this lesson, you will spell words with the prefixes pre-, dis-, and mis-.
 - In this lesson, you will write an introduction to your explanatory text.
5. Learning New Things: Synthesize
 - In this lesson, you will find details that support a main idea.
 - In this lesson, you will find the parts of a paragraph that make up a whole.
 - In this lesson, you will review the supporting details of the main idea in paragraphs.

14. Learning Starts with Questions

1. Question to Learn: Genre
 - In this lesson, you will explain what good learners do to be successful.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will read words that do not follow regular spelling patterns.
 - In this lesson, you will identify words with diphthongs oi and oy.
 - In this lesson, you will connect ideas using language such as linking words and phrases.

2. Question to Learn: Comprehension
 - In this lesson, you will make inferences about the topic of what you read.
 - In this lesson, you will find clues in what you read to make inferences.
 - In this lesson, you will form prepositional phrases.
 - In this lesson, you will read words with diphthongs oi and oy.
 - In this lesson, you will identify features of strong concluding statements.
3. Question to Learn: Speak and Listen
 - In this lesson, you will identify details that support the main idea of a text.
 - In this lesson, you will evaluate evidence that supports a main idea.
 - In this lesson, you will use prepositional phrases when you communicate.
 - In this lesson, you will use your plan to write the body of your explanatory text.
4. Question to Learn: Fluency
 - In this lesson, you will determine the main idea and supporting details in an informational text.
 - In this lesson, you will use details to determine the main idea in a text that gives information.
 - In this lesson, you will spell words with diphthongs oi and oy.
 - In this lesson, you will use a plan to draft the conclusion to your explanatory text.
5. Question to Learn: Synthesize
 - In this lesson, you will follow three-step directions.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will review inferring main ideas from supporting details in texts.

15. Learning from Science

1. Learning from Science: Genre
 - In this lesson, you will explain how feelings can affect the decisions you make.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain what context clues are.
 - In this lesson, you will identify words with the vowel pairs ai, ay, ee, and ea.
 - In this lesson, you will read more words that do not follow regular spelling patterns.
2. Learning from Science: Comprehension
 - In this lesson, you will find key words about time in a text.
 - In this lesson, you will explain an author's purpose and use of time words.
 - In this lesson, you will use context clues to determine the meaning of words and phrases.
 - In this lesson, you will read words with vowel pairs ai, ay, ee, ea.
 - In this lesson, you will practice writing lowercase v in cursive.
3. Learning from Science: Speak and Listen
 - In this lesson, you will find words that show a sequence.
 - In this lesson, you will tell about an experience.
 - In this lesson, you will explain the context clues you used to find the meaning of a word.
 - In this lesson, you will practice writing lowercase x in cursive.
 - In this lesson, you will read a book of your choice.

4. Learning from Science: Fluency
 - In this lesson, you will find cause-and-effect in a nonfiction text.
 - In this lesson, you will match examples to conclusions.
 - In this lesson, you will spell words with vowel pairs ai, ay, ee, and ea.
 - In this lesson, you will review signal words and cause-and-effect relationships.
5. Learning from Science: Synthesize
 - In this lesson, you will find words that show cause-and-effect.
 - In this lesson, you will recall a learning experience to make connections between ideas.
 - In this lesson, you will read a book of your choice.

16. Exploring the World

1. Exploring the World: Genre
 - In this lesson, you will show the steps in making a decision.
 - In this lesson, you will use cause and effect to create new ideas.
 - In this lesson, you will identify abbreviations.
 - In this lesson, you will identify words with plural endings -s, -es, -ies.
 - In this lesson, you will revise your explanatory text.
2. Exploring the World: Comprehension
 - In this lesson, you will use dates, signal words, and cause/effect to describe historical events.
 - In this lesson, you will create new ideas using cause-and-effect.
 - In this lesson, you will explain the meaning of some abbreviations.
 - In this lesson, you will read words with plural endings -s, -es, and -ies.
 - In this lesson, you will revise your writing.
3. Exploring the World: Speak and Listen
 - In this lesson you will identify words that connect scientific ideas, including time, sequence, and cause/effect signal words.
 - In this lesson, you will report on the steps in a process.
 - In this lesson, you will use abbreviations correctly.
 - In this lesson, you will edit your explanatory text.
4. Exploring the World: Fluency
 - In this lesson, you will describe a series of steps using signal words.
 - In this lesson, you will read a text with accuracy.
 - In this lesson, you will spell words with the plural endings -s, -es, -ies.
 - In this lesson, you will publish your revised explanatory text.
5. Exploring the World: Write
 - In this lesson, you will listen to decide whether what you hear is a story or whether it gives information.
6. Learning Experiences Unit Test

Semester B Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st

Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing an opinion text and generating a research report from topical investigation. The focus on reading and writing is supplemented with instruction in grammar, phonics, spelling, handwriting, and reading foundations—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester B Outline

1. Use Your Imagination

1. Use Your Imagination: Genre
 - In this lesson, you will explain how short- and long-term goals are different.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain the difference between literal and nonliteral meanings of words and phrases.
 - In this lesson, you will identify words with the vowel sound spelled aw, au, al, all, a, and o.
 - In this lesson, you will form contractions.
2. Use Your Imagination: Comprehension
 - In this lesson, you will identify similies in a story.
 - In this lesson, you will use similes to talk about feelings.
 - In this lesson, you will tell the difference between literal and nonliteral meanings of words in a literary text.
 - In this lesson, you will write uppercase A and O in cursive.
 - In this lesson, you will read words with the vowel sound spelled aw, au, al, all, a, and o.
3. Use Your Imagination: Speak/Listen
 - In this lesson, you will determine the meanings of some similes.
 - In this lesson, you will discuss ways to reduce stress.
 - In this lesson, you will discuss the use of voice in a story.
 - In this lesson, you will make connections between words and their use.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase C and E in cursive.
4. Use Your Imagination: Fluency
 - In this lesson, you will tell what metaphors are and find metaphors in a poem.
 - In this lesson, you will read aloud to someone.
 - In this lesson, you will spell words with the vowel sound spelled aw, au, al, all, a, and o.
 - In this lesson, you will identify similes and metaphors.
5. Use Your Imagination: Synthesize
 - In this lesson, you will determine the meanings of metaphors.
 - In this lesson, you will determine new uses for ordinary objects.
 - In this lesson, you will determine the meanings of metaphors.
 - In this lesson, you will read a book of your choice.

2. Family First

1. Family First: Genre

- In this lesson, you will identify how your feelings change.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify examples of homographs.
 - In this lesson, you will identify homophones.
 - In this lesson, you will form irregular contractions.
2. Family First: Comprehension
 - In this section, you will identify examples of personification.
 - In this section, you will explain what examples of personification mean.
 - In this section, you will explain how authors use personification in a story.
 - In this lesson, you will identify homonyms.
 - In this lesson, you will write uppercase L and uppercase D in cursive.
 - In this lesson, you will read homophones.
 3. Family First: Speak/Listen
 - In this section, you will tell what personification means in a story. You will tell how personification shapes the story.
 - In this section, you will provide responses to questions about personification while using complete sentences.
 - In this lesson, you will use homonyms and homophones correctly in text.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase B and R in cursive.
 4. Family First: Fluency
 - In this section, you will explain what the idioms in a story mean.
 - In this section, you will identify how punctuation helps in reading with expression.
 - In this lesson, you will spell homophones.
 - In this lesson, you will identify personification and idioms.
 5. Family First: Synthesize
 - In this section, you will use context clues to understand the meaning of idioms. You also will explain how an idiom shapes a story.
 - In this section, you will explain how the meaning of idioms shapes a story.
 - In this section, you will draw conclusions about a story.
 - In this lesson, you will read a book of your choice.

3. Think Creatively

1. Think Creatively: Genre
 - In this lesson, you will describe what you have done to reach a goal.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify subject-verb agreement.
 - In this lesson, you will identify words with soft c and soft g.
 - In this lesson, you will practice fluently reading a fable with expression.
2. Think Creatively: Comprehension
 - In this lesson, you will identify a theme in a story.
 - In this lesson, you will use the theme of a story to identify how people from different backgrounds can work together.
 - In this lesson, you will use subject-verb agreement in writing.
 - In this lesson, you will write uppercase T and F in cursive.
 - In this lesson, you will read words with soft c and soft g.
3. Think Creatively: Speak/Listen
 - In this lesson, you will use clues to find the setting in a story.

- In this lesson, you will locate information in a story to respond to questions.
 - In this lesson, you will explain how the characters in a series move the story forward in similar and different ways.
 - In this lesson, you will use subject-verb agreement when speaking.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase S and G in cursive.
4. Think Creatively: Fluency
 - In this lesson, you will explain how the themes in two stories by the same author are the same and different.
 - In this lesson, you will determine how characters in stories deal with setbacks.
 - In this lesson, you will spell words with soft c and soft g.
 - In this lesson, you will identify theme and setting in a story.
 5. Think Creatively: Synthesize
 - In this lesson, you will explain how the settings in two stories are the same and different.
 - In this lesson, you will identify solutions for unusual problems.
 - In this lesson, you will read a book of your choice.

4. Conflicts Help Us Grow

1. Conflicts Help Us Grow: Genre
 - In this lesson, you will draw a picture of something you like to do with your family.
 - In this lesson, you will identify something you like to do with your family and draw a picture of it.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify pronouns and antecedents in writing.
 - In this lesson, you will identify words in which the letter y changes to i when an ending is added.
 - In this lesson, you will practice reading a text with accuracy.
2. Conflicts Help Us Grow: Comprehension
 - In this lesson, you will use pronouns and antecedents correctly when writing.
 - In this lesson, you will make connections between events in a story.
 - In this lesson, you will use pronouns and their antecedents correctly when writing.
 - In this lesson, you will write uppercase I in cursive.
 - In this lesson, you will read words in which the letter y changes to i when an ending is added.
3. Conflicts Help Us Grow: Speak/Listen
 - In this lesson, you will determine similarities and differences in the plots of two stories.
 - In this lesson, you will draw conclusions about the same character in different stories.
 - In this lesson, you will use pronouns and their antecedents correctly when speaking.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase J in cursive.
4. Conflicts Help Us Grow: Fluency
 - In this lesson, you will determine genres by comparing and contrasting details.

- In this lesson, you will read aloud with expression to communicate characters' words.
 - In this lesson, you will spell words in which the letter y changes to i when an ending is added to a base word.
 - In this lesson, you will identify the plot and genre of a text.
5. Conflicts Help Us Grow: Read
- In this lesson, you will read a book of your choice.
6. Growing and Overcoming Unit Test

5. Getting to Know You

1. Getting to Know You: Genre
 - In this lesson, you will keep track of your emotions during the day.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain how to use comparative and superlative adjectives.
 - In this lesson, you will identify words with the endings -er and -est.
 - In this lesson, you will identify how a writer tells readers their opinion on a topic.
2. Getting to Know You: Comprehension
 - In this lesson, you will provide responses to questions about characters.
 - In this lesson, you will respond to key questions.
 - In this lesson, you will identify comparative and superlative adjectives in writing.
 - In this lesson, you will read words with the endings -er and -est.
 - In this lesson, you will identify how writers group an opinion and reasons in a text.
3. Getting to Know You: Speak/Listen
 - In this lesson, you will provide responses to questions about setting.
 - In this lesson, you will provide responses to questions after listening to a story.
 - In this lesson, you will identify the correct comparative or superlative adjective when writing or speaking.
 - In this lesson, you will explain your opinion on a topic in your introduction.
4. Getting to Know You: Fluency
 - In this lesson, you will answer questions about plot.
 - In this lesson, you will read with expression.
 - In this lesson, you will spell words with the endings -er and -est.
 - In this lesson, you will explain reasons for your opinion in a concept web.
5. Getting to Know You: Synthesize
 - In this lesson, you will answer questions about the sequence of events in a story.
 - In this lesson, you will analyze two stories for similarities and differences.
 - In this lesson, you will answer questions about plot and sequence.

6. Surprising Characters

1. Surprising Characters: Genre
 - In this lesson, you will describe ways that you can help out at home.
 - In this lesson, you will identify linking words and phrases and tell how writers use them to connect opinions, reasons, and details.
 - In this lesson, you will describe comparative adverbs and superlative adverbs.
 - In this lesson, you will identify compound words.

- In this lesson, you will explain how writers use linking words and phrases to connect opinions, reasons, and details.
2. Surprising Characters: Comprehension
 - In this lesson, you will use the names for parts of poems when talking and speaking about a poem.
 - In this lesson, you will use details to describe differences in cultures after reading a poem.
 - In this lesson, you will explain the rhyme scheme in a poem.
 - In this lesson, you will identify comparative adverbs and superlative adverbs in writing.
 - In this lesson, you will read compound words.
 - In this lesson, you will identify features of strong conclusions.
 3. Surprising Characters: Speak/Listen
 - In this lesson, you will identify parts of a poem.
 - In this lesson, you will think about your healthy habits and plan to make changes.
 - In this lesson, you will explain how sound devices are used in a poem.
 - In this lesson, you will determine the correct use of comparative and superlative adverbs.
 - In this lesson, you will explain the reasons for your opinion.
 4. Surprising Characters: Fluency
 - In this lesson, you will explain the meaning of lines and stanzas.
 - In this lesson, you will read a poem with expression.
 - In this lesson, you will identify the structure of poems.
 - In this lesson, you will spell compound words.
 - In this lesson, you will write a draft of the conclusion to your opinion text.
 5. Surprising Characters: Synthesize
 - In this lesson, you will explain how details build a poem.
 - In this lesson, you will analyze how people interpret messages differently.
 - In this lesson, you will explain the meaning of parts of a poem.

7. Keeping an Open Mind

1. Keeping an Open Mind: Genre
 - In this lesson, you will explain how solving a problem you have with a friend can help your friendship grow.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain how to use singular possessive nouns.
 - In this lesson, you will identify singular possessive words.
 - In this lesson, you will read a text at a proper rate.
2. Keeping an Open Mind: Comprehension
 - In this lesson, you will connect story events to feelings and experiences in your own life.
 - In this lesson, you will identify connections made between characters' experiences and in your own life.
 - In this lesson, you will identify singular possessive nouns in writing.
 - In this lesson, you will read singular possessive words.
 - In this lesson, you will practice writing in cursive with proper spacing between letters.
3. Keeping an Open Mind: Speak/Listen

- In this lesson, you will identify connections between different story events and experiences in your own life.
 - In this lesson, you will identify connections between different texts.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice writing in cursive with proper spacing between words.
 - In this lesson, you will read a book of your choice.
4. Keeping an Open Mind: Fluency
 - In this lesson, you will compare a story to your own life.
 - In this lesson, you will demonstrate fluent reading in a recording after learning about careers that require that skill.
 - In this lesson, you will spell singular possessive words.
 - In this lesson, you will connect a text to your life and to other texts.
 5. Keeping an Open Mind: Synthesize
 - In this lesson, you will use your own knowledge and experiences to make comparisons between texts.
 - In this lesson, you will compare how builders and readers reflect on experiences to make connections.
 - In this lesson, you will read a book of your choice.

8. Asking for Help

1. Asking for Help: Genre
 - In this lesson, you will listen to a text, show you understand it, and tell what type of writing it is.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain how plural possessives are used.
 - In this lesson, you will identify plural possessive words.
 - In this lesson, you will revise your opinion text.
2. Asking for Help: Comprehension
 - In this lesson, you will explain how a story's illustrations help create a mood.
 - In this lesson, you will explain how a story's illustrations help create a mood.
 - In this lesson, you will identify plural possessive nouns in writing.
 - In this lesson, you will read plural possessive words.
 - In this lesson, you will check your writing again for further revisions.
3. Asking for Help: Speak/Listen
 - In this lesson, you will explain how a story's illustrations help you understand a character.
 - In this lesson, you will discuss people's feelings after listening to understand.
 - In this lesson, you will form and use plural possessive nouns when writing.
 - In this lesson, you will edit your opinion text.
4. Asking for Help: Fluency
 - In this section, you will describe a story's setting, including how illustrations help you understand it.
 - In this lesson, you will get your opinion text ready to share with readers.
 - In this lesson, you will spell plural possessive words.
 - In this lesson, you will prepare your opinion text for readers.
5. Asking for Help: Write
 - In this lesson, you will present your opinion text to your Learning Coach.
6. First Impressions Unit Test

9. Out in Space

1. Out in Space: Genre

- In this lesson, you will describe ways to help keep yourself and others safe.
- In this lesson, you will identify the genre of a text.
- In this lesson, you will identify coordinating and subordinating conjunctions in writing.
- In this lesson, you will identify words with the suffixes -ful, -less, and -ly.
- In this lesson, you will practice reading aloud with expression.

2. Out in Space: Comprehension

- In this lesson, you will locate information in a text in response to questions.
- In this lesson, you will locate answers in a text in response to questions.
- In this lesson, you will use coordinating conjunctions correctly in writing and speaking.
- In this lesson, you will write uppercase M and N in cursive.
- In this lesson, you will read words with the suffixes -ful, -less, and -ly.

3. Out in Space: Speak/Listen

- In this lesson, you will find text evidence to answer questions.
- In this lesson, you will use coordinating or subordinating conjunctions depending on the meaning of a sentence.
- In this lesson, you will use subordinating conjunctions correctly in writing and speaking.
- In this lesson, you will find text evidence and answer questions about an informational text.
- In this lesson, you will read a book of your choice.
- In this lesson, you will write uppercase H and K in cursive.

4. Out in Space: Fluency

- In this lesson, you will answer questions about an informational text.
- In this lesson, you will use ideas from reading to do creative work.
- In this lesson, you will spell words with suffixes -ful, -less, and -ly.
- In this lesson, you will answer questions about an informational text using text evidence.

5. Out in Space: Synthesize

- In this lesson, you will answer questions about an informational text.
- In this lesson, you will tell how your social groups are similar and different.
- In this lesson, you will read a book of your choice.

10. Creatures of the Night

1. Creatures of the Night: Genre

- In this lesson, you will compare and contrast your social groups.
- In this lesson, you will identify the genre of a text.
- In this lesson, you will use commas in addresses.
- In this lesson, you will identify words with closed syllables.
- In this lesson, you will practice reading a poem aloud without making mistakes.

2. Creatures of the Night: Comprehension

- In this section, you will explain how the ideas are organized in an informational text.
- In this section, you will explain how rereading helps you understand text structure.
- In this lesson, you will use commas when writing about locations.

- In this lesson, you will write uppercase P and Q in cursive.
 - In this lesson, you will read words with closed syllables.
3. Creatures of the Night: Speak/Listen
 - In this section, you will identify comparison in an informational text.
 - In this section, you will use a diagram to make comparisons.
 - In this lesson, you will use commas with coordinating adjectives.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase V and U in cursive.
 4. Creatures of the Night: Fluency
 - In this lesson, you will explain how and why authors use comparison or cause and effect to organize ideas.
 - In this lesson, you will read new words with accuracy.
 - In this lesson, you will spell words with closed syllables.
 - In this lesson, you will use signal words to find causes and effects in an informational text.
 5. Creatures of the Night: Synthesize
 - In this lesson, you will explain how authors use comparison or cause-and-effect to organize ideas.
 - In this lesson, you will identify correct cause-and-effect connections.
 - In this lesson, you will read a book of your choice.

11. **It Happens at Night!**

1. It Happens at Night!: Genre
 - In this lesson, you will explain how to take care of other people's things.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will use commas with a series of words.
 - In this lesson, you will identify words with open syllables.
 - In this lesson, you will use context to determine the meaning of a word.
2. It Happens at Night!: Comprehension
 - In this lesson, you will determine why authors put events in a sequence.
 - In this lesson, you will identify the most important ideas in a text.
 - In this lesson, you will use a comma before a coordinating conjunction in a compound sentence.
 - In this lesson, you will write uppercase W and X in cursive.
 - In this lesson, you will read words with open syllables.
3. It Happens at Night!: Speak/Listen
 - In this lesson, you will identify an author's use of sequencing in an informational text.
 - In this lesson, you will describe how people plan and use their time well to do a task or series of steps in a task.
 - In this lesson, you will capitalize the names of geographical places.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase Y and Z in cursive.
4. It Happens at Night!: Fluency
 - In this lesson, you will describe how ideas in sentences are connected.
 - In this lesson, you will describe how people plan for and complete a task or steps in a task.
 - In this lesson, you will spell words with open syllables.

- In this lesson, you will describe how authors use sequence, comparison, or cause and effect to organize ideas.

5. It Happens at Night!: Synthesize

- In this lesson, you will explain how the ideas in different paragraphs are connected.
- In this lesson, you will demonstrate thinking like a scientist.
- In this lesson, you will identify problems and solutions in informational texts.
- In this lesson, you will identify some roles for taking part in a group discussion.

12. **Changes in the Night Sky**

1. Changes in the Night Sky: Genre

- In this lesson, you will describe how you can give someone a compliment by saying something nice.
- In this lesson, you will practice reading a poem at a proper rate.
- In this lesson, you will capitalize words in titles and titles of respect when writing.
- In this lesson, you will capitalize number words that begin a sentence.
- In this lesson, you will identify words with prefixes un-, re-, pre-, and dis-.
- In this lesson, you will read a poem aloud at a proper rate.

2. Changes in the Night Sky: Comprehension

- In this lesson, you will learn how to ask questions to identify causes and effects.
- In this lesson, identify causes and effects by asking questions.
- In this lesson, you will capitalize historical periods and special events.
- In this lesson, you will capitalize the names of places and holidays.
- In this lesson, you will write a sentence in cursive on two lines.
- In this lesson, you will identify words with prefixes un-, pre-, re-, and dis-.

3. Changes in the Night Sky: Speak/Listen

- In this lesson, you will use signal words to identify causes and effects.
- In this lesson, you will use signal words to make connections.
- In this lesson, you will capitalize company and product names.
- In this lesson, you will read a book of your choice.
- In this lesson, you will write sentences in cursive on two lines.

4. Changes in the Night Sky: Fluency

- In this lesson, you will identify compare/contrast relationships.
- In this lesson, you will use comprehension strategies while reading an informational text.
- In this lesson, you will spell words with prefixes un-, pre-, re-, and dis-.
- In this lesson, you will list ways you can build better relationships with others.

5. Changes in the Night Sky: Fluency Discussion

6. Changes in the Night Sky: Read

- In this lesson, you will read a book of your choice.

7. Out at Night Unit Test

13. **Sea Creatures**

1. Sea Creatures: Genre

- In this lesson, you will identify ways you can build better relationships with others.
- In this lesson, you will identify the genre of a text.
- In this lesson, you will tell how primary and secondary sources are different.
- In this lesson, you will identify words that end with a consonant followed by -le.

- In this lesson, you will identify parts of a research report.
2. Sea Creatures: Comprehension
 - In this lesson, you will explain how primary and secondary sources are different.
 - In this lesson, you will explain the solution to a problem.
 - In this lesson, you will expand simple sentences and compound sentences.
 - In this lesson, you will read words that end with a consonant followed by -le.
 - In this lesson, you will explain how writers introduce a topic in the introduction of a research report.
 3. Sea Creatures: Speak/Listen
 - In this lesson, you will identify examples of primary and secondary sources.
 - In this lesson, you will give a report about a topic.
 - In this lesson, you will rearrange simple sentences and compound sentences.
 - In this lesson, you will vary sentence beginnings to improve fluency.
 - In this lesson, you will plan the introduction of your research report based on your research.
 4. Sea Creatures: Fluency
 - In this lesson, you will explain why some sources may be more reliable than others.
 - In this lesson, you will make a research plan that includes primary and secondary sources.
 - In this lesson, you will explain what a text is about by skimming it.
 - In this lesson, you will spell words that end with a consonant followed by -le.
 - In this lesson, you will write a draft of the introduction of your research report.
 5. Sea Creatures: Synthesize
 - In this lesson, you will explain how to use paraphrasing to avoid plagiarism.
 - In this lesson, you will find the answers to questions in a text.
 - In this lesson, you will paraphrase main ideas and details in a text.
 - In this lesson, you will plan the body paragraphs of your research report.

14. **The Importance of Oceans**

1. The Importance of Oceans: Genre
 - In this lesson, you will explain how to use I-statements to tell someone how you feel.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will think aloud to identify important points and key details in an informational text.
 - In this lesson, you will identify words with ough, augh, and old.
 - In this lesson, you will identify how facts, definitions, details, and visuals are used in a research report.
2. The Importance of Oceans: Comprehension
 - In this lesson, you will identify important points and key details in an informational text.
 - In this lesson, you will use idea-generating techniques.
 - In this lesson, you will identify information that supports a topic.
 - In this lesson, you will use complex sentences in writing.
 - In this lesson, you will create sentence fluency by using long and short sentences.
 - In this lesson, you will read words with ough, augh, and old.
 - In this lesson, you will identify how skilled writers end their research reports.

3. The Importance of Oceans: Speak/Listen
 - In this lesson, you will make comparisons and contrasts between two texts about the same topic.
 - In this lesson, you will use effective speaking tips while giving a speech.
 - In this lesson, you will use complex sentences when writing and speaking.
 - In this lesson, you will create a draft of the body paragraphs in your research report.
4. The Importance of Oceans: Fluency
 - In this lesson, you will compare how ideas are shared in different media.
 - In this lesson, you will compare different types of media.
 - In this lesson, you will spell words with ough, augh, and old.
 - In this lesson, you will write a conclusion for your research report.
5. The Importance of Oceans: Synthesize
 - In this lesson, you will explain how annotations help you to find and take notes about a source.
 - In this lesson, you will analyze texts to compare and contrast important points.
 - In this lesson, you will analyze texts to compare and contrast important points as they relate to science.
 - In this lesson, you will use signal words to find causes and effects in an informational text.

15. Ocean Journeys

1. Ocean Journeys: Genre
 - In this lesson, you will show that you know how to help others.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will define shades of meaning among words that are related.
 - In this lesson, you will identify words that are part of the -ind, -ost, and -ild word families.
 - In this lesson, you will read poetry aloud in an interesting way.
2. Ocean Journeys: Comprehension
 - In this lesson, you will read compound words.
 - In this lesson, you will identify the author's point of view in an informational text.
 - In this lesson, you will identify problems and their solutions.
 - In this lesson, you will tell the differences among the meaning of words that describe states of mind.
 - In this lesson, you will distinguish differences among the meaning of words that describe states of mind.
 - In this lesson, you will read words that are part of the -ind, -ost, and -ild word families.
 - In this lesson, you will write words, thoughts, and answers in cursive.
3. Ocean Journeys: Speak/Listen
 - In this lesson, you will determine an author's point of view using evidence in an informational text.
 - In this lesson, you will identify the main idea and supporting details in a text that is read aloud.
 - In this lesson, you will distinguish among the meanings that describe degrees of certainty.
 - In this lesson, you will use indentation when you write a paragraph in cursive.

- In this lesson, you will read a book of your choice.
4. Ocean Journeys: Fluency
 - In this lesson, you will describe how to separate your point of view from an author's point of view.
 - In this lesson, you will read a text aloud with accuracy and the right rate.
 - In this lesson, you will spell words that are part of the -ind, -ost, and -ild word families.
 - In this lesson, you will explain how an author's point of view differs from your point of view.
 5. Ocean Journeys: Synthesize
 - In this lesson, you will determine the meanings of new words that relate to the topic of an informational text.
 - In this lesson, you will compare texts in order to develop a point of view about how people can protect our oceans.
 - In this lesson, you will choose and read a book.

16. Dangers to Our Oceans

1. Dangers in Our Oceans: Genre
 - In this lesson, you will identify something you would like to be able to do better.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify how similes and metaphors add effect to writing.
 - In this lesson, you will identify contractions.
 - In this lesson, you will create a works cited page for your research report.
2. Dangers in Our Oceans: Comprehension
 - In this lesson, you will use text features to learn the meaning of unfamiliar words.
 - In this lesson, you will use text features to learn the meaning of unfamiliar words.
 - In this lesson, you will identify texts with an inanimate voice.
 - In this lesson, you will identify the effect of similes and metaphors in writing.
 - In this lesson, you will read contractions.
 - In this lesson, you will revise your research report.
3. Dangers in Our Oceans: Speak/Listen
 - In this lesson, you will use context clues to learn the meaning of academic words.
 - In this lesson, you will report clearly on a topic.
 - In this lesson, you will add onomatopoeia, similes, and metaphors to revise sentences for effect.
 - In this lesson, you will edit your research report.
4. Dangers in Our Oceans: Fluency
 - In this lesson, you will use context clues to learn the meaning of domain-specific words.
 - In this lesson, you will set a goal to improve the time you can read aloud with accuracy.
 - In this lesson, you will explain examples of hyperbole in a text.
 - In this lesson, you will spell contractions.
 - In this lesson, you will add a visual to your research report before sharing it with readers.
5. Dangers in Our Oceans: Write

- In this lesson, you will present your research report.
6. The Deep Blue Sea Unit Test

Language Arts 3 Accelerated

Accelerated Language Arts 3

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with grade three English/language arts expectations as defined by the South Carolina College and Career-Ready Standards for English Language Arts. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas. In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is then presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing a personal narrative and an explanatory text. The focus on reading and writing is supplemented with instruction in grammar, phonics, spelling, handwriting, and reading foundations—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester A Outline

1. Adventure Stories

1. Adventure Stories: Genre
 - In this lesson, you will describe how to keep distractions away.
 - In this lesson, you will assess the process of an inquiry.
 - In this lesson, you will identify word parts, including affixes and roots.
 - In this lesson, you will read spelling words that have the short vowels e, o, and u.
 - In this lesson, you will explain the meaning of prefixes in words.
2. Adventure Stories: Comprehension
 - In this lesson, you will use your past and present learning to guide inquiry.
 - In this lesson, you will use word parts (such as affixes and root words) to understand the meaning of a word.
 - In this lesson, you will practice writing all capital letters.
 - In this lesson, you will read words with short vowels e, o, and u.
3. Adventure Stories: Speak/Listen
 - In this lesson, you will draw logical conclusions from relationships and patterns discovered during the inquiry process.

- In this lesson, you will use root words you know to figure out the meaning of a word you do not know.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice writing all lowercase letters.
4. Adventure Stories: Fluency
 - In this lesson, you will determine strategies to revise an inquiry plan.
 - In this lesson, you will spell words with short vowels e, o, and u.
 - In this lesson, you will review the process of choosing a book to read.
 5. Adventure Stories: Synthesize
 - In this lesson, you will report relevant findings when engaged in the inquiry process.
 - In this lesson, you will answer framing questions in a story.
 - In this lesson, you will read a book of your choice.

2. Better Together

1. Better Together: Genre
 - In this lesson, you will brainstorm ways you can contribute to your community.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify differences between spoken and written language.
 - In this lesson, you will spell words that end with silent e.
 - In this lesson, you will identify common suffixes.
2. Better Together: Comprehension
 - In this lesson, you will identify events in the beginning, the middle, and end of a story using a think-aloud strategy.
 - In this lesson, you will identify the sequence of events in a story using a think-aloud strategy.
 - In this lesson, you will explain what common suffixes mean.
 - In this lesson, you will practice cursive with lines, such as slant and straight lines.
 - In this lesson, you will read words that end with silent e.
3. Better Together: Speak/Listen
 - In this lesson, you will explain how transition words show the sequence of events in a story.
 - In this lesson, you will use transition words to make the sequence of events clear.
 - In this lesson, you will use glossaries to understand the meaning of words and phrases.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice cursive with curved lines, such as circles and part circles.
4. Better Together: Fluency
 - In this lesson, you will use signal words to accurately show the sequence of events in a story.
 - In this lesson, you will use signal words to show how a character's feelings are connected to story events.
 - In this lesson, you will spell words that end with silent e.
 - In this lesson, you will review the use of words that show the order of events in a story.
5. Better Together: Synthesize

- In this lesson, you will predict the sequence of events in a story.
- In this lesson, you will find the sequence of story events using your predictions.
- In this lesson, you will read a book of your choice.

3. Adventures on Water

1. Adventures on Water: Genre

- In this lesson, you will describe how practice can help you get better at a new skill.
- In this lesson, you will explain how an author's word choice emphasizes aspects of a character.
- In this lesson, you will use dictionaries to check the spelling of words.
- In this lesson, you will identify long a spelling patterns.
- In this lesson, you will identify words with Latin suffixes.

2. Adventures on Water: Comprehension

- In this lesson, you will explain how an author's choice of words emphasizes aspects of the setting in a literary text.
- In this lesson, you will discover the meaning of words with Latin suffixes.
- In this lesson, you will practice staying on the lines when you write
- In this lesson, you will read words with long a spelling patterns.

3. Adventures on Water: Speak/Listen

- In this lesson, you will explain how an author's choice of illustrations emphasizes aspects of a character or a setting.
- In this lesson, you will use formal language to share details with an audience.
- In this lesson, you will use dictionaries to correct spelling.
- In this lesson, you will read a book of your choice.
- In this lesson, you will write lowercase i and lowercase t in cursive.

4. Adventures on Water: Fluency

- In this lesson, you will explain how an author's choice of conventions emphasizes aspects of a character and setting in a literary text.
- In this lesson, you will spell words with the long a spelling patterns.

5. Adventures on Water: Synthesize

- In this lesson, you will explain how words, illustrations, and conventions combine to emphasize the characters and setting in a story.
- In this lesson, you will read a book of your choice.

4. Adventures Near and Far

1. Adventures Near/Far: Genre

- In this lesson, you will describe situations that trigger different emotions.
- In this lesson, you will identify the genre of a text.
- In this lesson, you will explain the difference between synonyms and antonyms.
- In this lesson, you will identify words with long o and long i spelling patterns.
- In this lesson, you will practice reading out loud smoothly and easily.

2. Adventures Near/Far: Comprehension

- In this lesson, you will retell a story to make sure you comprehend what you have read.
- In this lesson, you will retell a story that you have read.
- In this lesson, you will retell tall tales using features such as exaggerations and funny details.
- In this lesson, you will determine the meaning of words using a thesaurus.

- In this lesson, you will write lowercase e and lowercase l in cursive.
 - In this lesson, you will read words with long o or long i spelling patterns.
3. Adventures Near/Far: Speak/Listen
 - In this lesson, you will paraphrase part of a story.
 - In this lesson, you will retell stories that teach morals.
 - In this lesson, you will draw conclusions about a fable.
 - In this lesson, you will determine the meaning of words in sentences using a thesaurus.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice writing lowercase o and lowercase a in cursive.
 4. Adventures Near/Far: Fluency
 - In this lesson, you will retell a myth using your own predictions.
 - In this lesson, you will use appropriate phrasing while reading a myth aloud.
 - In this lesson, you will use your own words to restate what you hear in a text.
 - In this lesson, you will spell words with long vowel o and long vowel i spelling patterns.
 - In this lesson, you will review retelling a story.
 5. Adventures Near/Far: Read
 - In this lesson, you will read a book of your choice.
 6. Off on Adventures Unit Test

5. Discovering Folktales

1. Discovering Folktales: Genre
 - In this lesson, you will list ideas to show appreciation to someone who has helped you.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will learn how to use quotation marks in writing dialogue.
 - In this lesson, you will identify words with the correct long u spellings.
 - In this lesson, you will analyze the parts of a personal narrative.
2. Discovering Folktales: Comprehension
 - In this lesson, you will make predictions about what will happen in a story.
 - In this lesson, you will find the central message in a story.
 - In this lesson, you will learn facts about the setting of a story and use the setting to better understand the story.
 - In this lesson, you will identify correct use of quotation marks in dialogue.
 - In this lesson, you will read words with the correct long u spellings.
 - In this lesson, you will describe how personal narratives tell about events in the order that they happen.
3. Discovering Folktales: Speak/Listen
 - In this lesson, you will restate the lesson in a story.
 - In this lesson, you will restate the lesson in a story.
 - In this lesson, you will write dialogue with punctuation.
 - In this lesson, you will plan the beginning of a personal narrative.
4. Discovering Folktales: Fluency
 - In this lesson, you will find the central message in a myth.
 - In this lesson, you will set a goal to improve your reading speed.
 - In this lesson, you will spell words with the correct long u spellings.
 - In this lesson, you will use what you know about the kinds of syllables to

read words.

- In this lesson, you will write a draft of the introduction to your personal narrative.

5. Discovering Folktales: Synthesize

- In this lesson, you will find details that support the central message of a story.
- In this lesson, you will explore different interpretations of a story's message.
- In this lesson, you will explain how heritage language affects English.
- In this lesson, you will give examples of how authors plan the events they include in the beginning, middle, and end of a story.

6. Characters Who Change

1. Characters Who Change: Genre

- In this lesson, you will describe the effects of dishonest behavior.
- In this lesson, you will identify the genre of a text.
- In this lesson, you will explain how nouns are used.
- In this lesson, you will identify words with the correct long e spellings.
- In this lesson, you will explain how temporal words help writers show when events happen.

2. Characters Who Change: Comprehension

- In this lesson, you will explain how temporal words help writers show when events happen.
- In this lesson, you will explain the difference between first-person and third-person point of view.
- In this lesson, you will explain the difference between formal and informal language.
- In this lesson, you will explain how nouns are used in sentences.
- In this lesson, you will read words with the correct long e spellings.
- In this lesson, you will explain how dialogue helps writers develop characters and plot.

3. Characters Who Change: Speak/Listen

- In this lesson, you will identify the perspective of the narrator in a story.
- In this lesson, you will identify the perspective of a narrator.
- In this lesson, you will explain how pronouns are used in sentences.
- In this lesson, you will identify descriptive words in personal narratives.

4. Characters Who Change: Fluency

- In this lesson, you will identify the perspectives of characters in a story.
- In this lesson, you will identify the perspectives of characters in a story.
- In this lesson, you will spell words with the correct long e spellings.
- In this lesson, you will plan your personal narrative.

5. Characters Who Change: Synthesize

- In this lesson, you will identify your own perspective in a story. You also will tell how it is different from the perspective of characters or a narrator.
- In this lesson, you will compare perspective between self and character or narrator in a story.
- In this lesson, you will write a draft of your personal narrative.

7. Clever Characters

1. Clever Characters: Genre

- In this lesson, you will describe how it feels to be left out of an activity or

- group.
 - In this lesson, you will identify and spell words that begin with silent letters (wr, kn).
 - In this lesson, you will explain how verbs are used.
 - In this lesson, you will spell words that begin with silent letters (wr, kn).
 - In this lesson, you will explain the differences among the kinds of syllables.
2. Clever Characters: Comprehension
 - In this lesson, you will discuss the parts of a story.
 - In this lesson, you will use a story's details to talk about a story's parts.
 - In this lesson, you will explain how adjectives are used.
 - In this lesson, you will read words with silent letters wr and kn.
 - In this lesson, you will practice writing lowercase n and lowercase m in cursive.
 3. Clever Characters: Speak/Listen
 - In this lesson, you will explain the purpose of different story parts.
 - In this lesson, you will use digital tools to record yourself reading part of a story.
 - In this lesson, you will explain how to use adverbs.
 - In this lesson, you will practice writing lowercase c and lowercase d in cursive.
 - In this lesson, you will read a book of your choice.
 4. Clever Characters: Fluency
 - In this lesson, you will describe how parts of a story build on each other.
 - In this lesson, you will analyze the connections between parts of a story and read text aloud with accuracy.
 - In this lesson, you will spell words with silent letters.
 - In this lesson, you will review the parts of a story.
 5. Clever Characters: Synthesize
 - In this lesson, you will tell how each part adds to a story.
 - In this lesson, you will make personal connections to a story.
 - In this lesson, you will read a book of your choice.

8. Acting Out Folktales

1. Acting Out Folktales: Genre
 - In this lesson, you will describe how friends can support each other.
 - In this lesson, you will explain how illustrations help create the mood of a story.
 - In this lesson, you will describe the use of imagery.
 - In this lesson, you will spell words that begin with the three-letter blends thr, spr, scr, and str.
 - In this lesson, you will identify kinds of syllables to help you read words in a sentence.
2. Acting Out Folktales: Comprehension
 - In this lesson, you will explain how illustrations add meaning to literary texts.
 - In this lesson, you will use sensory details when writing.
 - In this lesson, you will read words with the three-letter blends thr, spr, scr, and str.
 - In this lesson, you will revise your personal narrative.
3. Acting Out Folktales: Speak/Listen
 - In this lesson, you will explain how an author's choice of words and conventions

- of grammar create mood and add to meaning.
 - In this lesson, you will use imagery to develop characters and convey experiences when writing a narrative.
 - In this lesson, you will revise your personal narrative.
4. Acting Out Folktales: Fluency
 - In this lesson, you will explain how word choice, illustrations, and grammar influence mood and meaning in a story or play.
 - In this lesson, you will spell words with the three-letter blends thr, spr, scr, and str.
 - In this lesson, you will edit your personal narrative.
 5. Acting Out Folktales: Write
 - In this lesson, you will publish your personal narrative.
 6. Fun with Folktales Unit Test

9. Amazing Animals

1. Amazing Animals: Genre
 - In this lesson, you will tell how practicing deep breathing can calm yourself.
 - In this lesson, you will check your writing again and revise words and sentences.
 - In this lesson, you will form plural nouns that do not follow the -s and -es rule.
 - In this lesson, you will identify words with the vowel digraphs oo, ew, ue, ui.
 - In this lesson, you will read words with more than one syllable.
2. Amazing Animals: Comprehension
 - In this lesson, you will explain how authors use words and phrases to inform their audience.
 - In this lesson, you will practice using irregular plural nouns correctly when you write.
 - In this lesson, you will practice joining letters in cursive.
 - In this lesson, you will read words with the vowel digraphs oo, ew, ue, ui.
3. Amazing Animals: Speak/Listen
 - In this lesson, you will identify facts and opinions in a nonfiction text.
 - In this lesson, you will practice using irregular plural nouns correctly when you speak.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write lowercase u and lowercase w in cursive.
4. Amazing Animals: Fluency
 - In this lesson, you will explain how an author uses words and phrases in an informational text.
 - In this lesson, you will spell words with oo, ew, ue, and ui.
5. Amazing Animals: Synthesize
 - In this lesson, you will explain how an author supports ideas using facts and reasons.
 - In this lesson, you will judge texts on how well the author uses supporting facts.
 - In this lesson, you will read a book of your choice.

10. Animals and Their Habitats

1. Animal Habitats: Genre
 - In this lesson, you will identify feelings that tell you if you are in danger.
 - In this lesson, you will identify the genre of a text.

- In this lesson, you will identify abstract nouns.
 - In this lesson, you will identify words with r-controlled vowels ar, or, and ore.
 - In this lesson, you will practice reading words with more than one syllable.
2. Animal Habitats: Comprehension
 - In this lesson, you will use illustrations to make predictions about what you will read.
 - In this lesson, you will confirm predictions using illustrations.
 - In this lesson, you will use abstract nouns correctly when writing.
 - In this lesson, you will write lowercase b and f in cursive.
 - In this lesson, you will read words with r-controlled vowels ar, or, and ore.
 3. Animal Habitats: Speak/Listen
 - In this lesson, you will describe the purpose of illustrations in an informational book.
 - In this lesson, you will discuss the purpose of illustrations.
 - In this lesson, you will use abstract nouns correctly when speaking.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write lowercase h and lowercase k in cursive.
 4. Animal Habitats: Fluency
 - In this lesson, you will explain how illustrations help you understand what you read.
 - In this lesson, you will explain how illustrations help you understand what you read.
 - In this lesson, you will spell words with r-controlled vowels ar, or, and ore.
 - In this lesson, you will review ways that illustrations add information to texts.
 5. Animal Habitats: Synthesize
 - In this lesson, you will use illustrations and words to understand what you read.
 - In this lesson, you will use information from illustrations and words to understand what you read.
 - In this lesson, you will read a book of your choice.

11. Animal Behaviors

1. Animal Behaviors: Genre
 - In this lesson, you will explain some ways to ask for help when you need it.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will form regular verbs.
 - In this lesson, you will identify words with r-controlled vowels er, ir, ur, and or.
 - In this lesson, you will use a dictionary to find the language an English word comes from.
2. Animal Behaviors: Comprehension
 - In this lesson, you will identify text features while reading nonfiction.
 - In this lesson, you will identify text features.
 - In this lesson, you will write using regular verbs.
 - In this lesson, you will write lowercase g and lowercase q in cursive.
 - In this lesson, you will read words with r-controlled vowels er, ir, ur, and or.
3. Animal Behaviors: Speak/Listen
 - In this lesson, you will explain how to use text features to find information.
 - In this lesson, you will participate in a discussion.
 - In this lesson, you will use regular verbs correctly when you speak.
 - In this lesson, you will read a book of your choice.

- In this lesson, you will write lowercase j and lowercase p in cursive.
4. Animal Behaviors: Fluency
 - In this lesson, you will use tools to find information about a topic.
 - In this lesson, you will use tools to expand your knowledge about a topic.
 - In this lesson, you will spell words with r-controlled vowels er, ir, ur, and or.
 - In this lesson, you will review how text features can give information in texts.
 5. Animal Behaviors: Synthesize
 - In this lesson, you will use text features to find information.
 - In this lesson, you will organize information quickly.
 - In this lesson, you will prepare for a discussion about a text.

12. Animal Features

1. Animal Features: Genre
 - In this lesson, you will demonstrate how to cooperate in a group.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will form irregular verbs.
 - In this lesson, you will identify words with r-controlled vowels: air, are, and ear.
 - In this lesson, you will practice reading a poem fluently.
2. Animal Features: Comprehension
 - In this lesson, you will identify problems and solutions in a text.
 - In this lesson, you will identify problems, solutions, and chronological order.
 - In this lesson, you will write using irregular verbs.
 - In this lesson, you will write lowercase r and lowercase s in cursive.
 - In this lesson, you will read words with r-controlled vowels: air, are, and ear.
3. Animal Features: Speak/Listen
 - In this lesson, you will explain chronological order in an informational text.
 - In this lesson, you will speak using irregular verbs.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice writing lowercase y and lowercase z in cursive.
4. Animal Features: Fluency
 - In this lesson, you will explain how to identify problems and solutions.
 - In this lesson, you will practice reading aloud with accuracy.
 - In this lesson, you will spell words with r-controlled vowels air, are, and ear.
 - In this lesson, you will participate in a group discussion about a text.
5. Animal Features Apply Discussion
6. Animal Features: Read
 - In this lesson, you will read a book of your choice.
7. Captivating Critters Unit Test

13. Learning New Things

1. Learning New Things: Genre
 - In this lesson, you will explain how to show interest in another person's point of view.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will form simple verb tenses.
 - In this lesson, you will identify words with the prefixes pre-, dis-, and mis-.
 - In this lesson, you will explain how writers of explanatory texts organize

information.

2. Learning New Things: Comprehension

- In this lesson, you will think aloud about key details and main ideas.
- In this lesson, you will find text details about historical figures.
- In this lesson, you will form the past tense of some irregular verbs.
- In this lesson, you will read words with the prefixes pre-, dis-, and mis-.
- In this lesson, you will explain how writers of explanatory texts develop a topic with details like facts, definitions, and illustrations.

3. Learning New Things: Speak/Listen

- In this lesson, you will explain how key details support a main idea.
- In this lesson, you will listen for the details that support the main idea in a text.
- In this lesson, you will use verb tenses correctly when writing.
- In this lesson, you will choose a topic and find information about it.
- In this lesson, you will choose a topic and find information about it.

4. Learning New Things: Fluency

- In this lesson, you will review the supporting details of the main idea in paragraphs.
- In this lesson, you will learn how to skim text to find main ideas quickly.
- In this lesson, you will spell words with the prefixes pre-, dis-, and mis-.
- In this lesson, you will plan and write an introduction to your explanatory text.

5. Learning New Things: Synthesize

- In this lesson, you will find details that support a main idea.
- In this lesson, you will find the parts of a paragraph that make up a whole.
- In this lesson, you will review the supporting details of the main idea in paragraphs.

14. Learning Starts with Questions

1. Question to Learn: Genre

- In this lesson, you will explain what good learners do to be successful.
- In this lesson, you will identify the genre of a text.
- In this lesson, you will read words that do not follow regular spelling patterns.
- In this lesson, you will identify words with diphthongs oi and oy.
- In this lesson, you will connect ideas using language such as linking words and phrases.

2. Question to Learn: Comprehension

- In this lesson, you will make inferences about the topic of what you read.
- In this lesson, you will find clues in what you read to make inferences.
- In this lesson, you will form prepositional phrases.
- In this lesson, you will read words with diphthongs oi and oy.
- In this lesson, you will identify features of strong concluding statements.

3. Question to Learn: Speak/Listen

- In this lesson, you will identify details that support the main idea of a text.
- In this lesson, you will evaluate evidence that supports a main idea.
- In this lesson, you will use prepositional phrases when you communicate.
- In this lesson, you will use your plan to write the body of your explanatory text.

4. Question to Learn: Fluency
 - In this lesson, you will determine the main idea and supporting details in an informational text.
 - In this lesson, you will use details to determine the main idea in a text that gives information.
 - In this lesson, you will spell words with diphthongs oi and oy.
 - In this lesson, you will use a plan to draft the conclusion to your explanatory text.
5. Question to Learn: Synthesize
 - In this lesson, you will use a plan to draft the conclusion to your explanatory text.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will review inferring main ideas from supporting details in texts.

15. Learning from Science

1. Learning from Science: Genre
 - In this lesson, you will explain how feelings can affect the decisions you make.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain what context clues are.
 - In this lesson, you will identify words with the vowel pairs ai, ay, ee, and ea.
 - In this lesson, you will read more words that do not follow regular spelling patterns.
2. Learning from Science: Comprehension
 - In this lesson, you will find key words about time in a text.
 - In this lesson, you will think about author's purpose and time words.
 - In this lesson, you will use context clues to determine the meaning of words and phrases.
 - In this lesson, you will read words with vowel pairs ai, ay, ee, ea.
 - In this lesson, you will practice writing lowercase v in cursive.
3. Learning from Science: Speak/Listen
 - In this lesson, you will find words that show a sequence.
 - In this lesson, you will tell about an experience.
 - In this lesson, you will explain the context clues you used to find the meaning of a word.
 - In this lesson, you will practice writing lowercase x in cursive.
 - In this lesson, you will read a book of your choice.
4. Learning from Science: Fluency
 - In this lesson, you will find cause-and-effect in a nonfiction text.
 - In this lesson, you will match examples to conclusions.
 - In this lesson, you will spell words with vowel pairs ai, ay, ee, and ea.
 - In this lesson, you will review signal words and cause-and-effect relationships.
5. Learning from Science: Synthesize
 - In this lesson, you will review signal words and cause-and-effect relationships.
 - In this lesson, you will recall a learning experience to make connections between ideas.

- In this lesson, you will read a book of your choice.
- 16. Exploring the World**
1. Exploring the World: Genre
 - In this lesson, you will show the steps in making a decision.
 - In this lesson, you will identify characteristics of problem-and-solution text structures.
 - In this lesson, you will explain the use of sensory details.
 - In this lesson, you will identify words with plural endings -s, -es, -ies.
 - In this lesson, you will revise your explanatory text.
 2. Exploring the World: Comprehension
 - In this lesson, you will use the problem-and-solution text structure to locate information in informational texts.
 - In this lesson, identify sensory details in literary texts.
 - In this lesson, you will read words with plural endings -s, -es, and -ies.
 - In this lesson, you will revise your writing.
 3. Exploring the World: Speak/Listen
 - In this lesson, you will explain the characteristics of a descriptive text structure.
 - In this lesson, you will use sensory details to develop characters and convey experiences when writing a narrative.
 - In this lesson, you will edit your explanatory text.
 4. Exploring the World: Fluency
 - In this lesson, you will draw out information and meaning from descriptive texts.
 - In this lesson, you will describe the text structures an author uses in an informational text.
 - In this lesson, you will spell words with the plural endings -s, -es, -ies.
 - In this lesson, you will publish your revised explanatory text.
 5. Exploring the World: Write
 - In this lesson, you will listen to decide whether what you hear is a story or whether it gives information.
 6. Learning Experiences Unit Test

Semester B Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas. In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking

activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing an opinion text and generating a research report from topical investigation. The focus on reading and writing is supplemented with instruction in grammar, phonics, spelling, handwriting, and reading foundations—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester B Outline

1. Use Your Imagination

1. Use Your Imagination: Genre
 - In this lesson, you will explain how short- and long-term goals are different.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain the difference between literal and nonliteral meanings of words and phrases.
 - In this lesson, you will identify words with the vowel sound spelled aw, au, al, all, a, and o.
 - In this lesson, you will form contractions.
2. Use Your Imagination: Comprehension
 - In this lesson, you will identify similes in a story.
 - In this lesson, you will use similes to talk about feelings.
 - In this lesson, you will tell the difference between literal and nonliteral meanings of words in a literary text.
 - In this lesson, you will write uppercase A and O in cursive.
 - In this lesson, you will read words with the vowel sound spelled aw, au, al, all, a, and o.
3. Use Your Imagination: Speak/Listen
 - In this lesson, you will tell what metaphors are and find metaphors in a poem.
 - In this lesson, you will discuss ways to reduce stress.
 - In this lesson, you will discuss the use of voice in a story.
 - In this lesson, you will make connections between words and their use.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase C and E in cursive.
4. Use Your Imagination: Fluency
 - In this lesson, you will explain the metaphors in a poem.
 - In this lesson, you will read aloud to someone.
 - In this lesson, you will spell words with the vowel sound spelled aw, au, al, all, a, and o.
 - In this lesson, you will identify similes and metaphors.
5. Use Your Imagination: Synthesize
 - In this lesson, you will determine the meanings of metaphors.
 - In this lesson, you will determine new uses for ordinary objects.
 - In this lesson, you will determine the meanings of metaphors.

- In this lesson, you will read a book of your choice.

2. Family First

1. Family First: Genre

- In this lesson, you will identify how your feelings change.
- In this lesson, you will identify the genre of a text.
- In this lesson, you will identify examples of homographs.
- In this lesson, you will identify homophones.
- In this lesson, you will form irregular contractions.

2. Family First: Comprehension

- In this section, you will identify examples of personification.
- In this section, you will explain what examples of personification mean.
- In this section, you will explain how authors use personification in a story.
- In this lesson, you will identify homonyms.
- In this lesson, you will write uppercase L and uppercase D in cursive.
- In this lesson, you will read homophones.

3. Family First: Speak/Listen

- In this section, you will tell what personification means in a story. You will tell how personification shapes the story.
- In this section, you will provide responses to questions about personification while using complete sentences.
- In this lesson, you will use homonyms and homophones correctly in text.
- In this lesson, you will read a book of your choice.
- In this lesson, you will write uppercase B and R in cursive.

4. Family First: Fluency

- In this section, you will explain what the idioms in a story mean.
- In this section, you will identify how punctuation helps in reading with expression.
- In this lesson, you will spell homophones.
- In this lesson, you will identify personification and idioms.

5. Family First: Synthesize

- In this section, you will use context clues to understand the meaning of idioms. You also will explain how an idiom shapes a story.
- In this section, you will explain how the meaning of idioms shapes a story.
- In this section, you will draw conclusions about a story.
- In this lesson, you will read a book of your choice.

3. Think Creatively

1. Think Creatively: Genre

- In this lesson, you will describe what you have done to reach a goal.
- In this lesson, you will identify the genre of a text.
- In this lesson, you will identify subject-verb agreement.
- In this lesson, you will identify words with soft c and soft g.
- In this lesson, you will practice fluently reading a fable with expression.

2. Think Creatively: Comprehension

- In this lesson, you will identify a theme in a story.
- In this lesson, you will use the theme of a story to identify how people from different backgrounds can work together.
- In this lesson, you will use subject-verb agreement in writing.
- In this lesson, you will write uppercase T and F in cursive.

- In this lesson, you will read words with soft c and soft g.
3. Think Creatively: Speak/Listen
 - In this lesson, you will use clues to find the setting in a story.
 - In this lesson, you will locate information in a story to respond to questions.
 - In this lesson, you will explain how the characters in a series move the story forward in similar and different ways.
 - In this lesson, you will use subject-verb agreement when speaking.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase S and G in cursive.
 4. Think Creatively: Fluency
 - In this lesson, you will explain how the themes in two stories by the same author are the same and different.
 - In this lesson, you will determine how characters in stories deal with setbacks.
 - In this lesson, you will spell words with soft c and soft g.
 - In this lesson, you will identify theme and setting in a story.
 5. Think Creatively: Synthesize
 - In this lesson, you will explain how the settings in two stories are the same and different.
 - In this lesson, you will identify solutions for unusual problems.
 - In this lesson, you will read a book of your choice.

4. Conflicts Help Us Grow

1. Conflicts Help Us Grow: Genre
 - In this lesson, you will draw a picture of something you like to do with your family.
 - In this lesson, you will identify something you like to do with your family and draw a picture of it.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify pronouns and antecedents in writing.
 - In this lesson, you will identify words in which the letter y changes to i when an ending is added.
 - In this lesson, you will practice reading a text with accuracy.
2. Conflicts Help Us Grow: Comprehension
 - In this lesson, you will use pronouns and antecedents correctly when writing.
 - In this lesson, you will make connections between events in a story.
 - In this lesson, you will use pronouns and their antecedents correctly when writing.
 - In this lesson, you will write uppercase I in cursive.
 - In this lesson, you will read words in which the letter y changes to i when an ending is added.
3. Conflicts Help Us Grow: Speak/Listen
 - In this lesson, you will determine similarities and differences in the plots of two stories.
 - In this lesson, you will draw conclusions about the same character in different stories.
 - In this lesson, you will use pronouns and their antecedents correctly when speaking.
 - In this lesson, you will read a book of your choice.

- In this lesson, you will write uppercase J in cursive.
- 4. Conflicts Help Us Grow: Fluency
 - In this lesson, you will determine genres by comparing and contrasting details.
 - In this lesson, you will read aloud with expression to communicate characters' words.
 - In this lesson, you will spell words in which the letter y changes to i when an ending is added to a base word.
 - In this lesson, you will identify the plot and genre of a text.
- 5. Conflicts Help Us Grow: Read
 - In this lesson, you will identify the plot and genre of a text.
- 6. Growing and Overcoming Unit Test

5. Getting to Know You

1. Getting to Know You: Genre
 - In this lesson, you will identify the plot and genre of a text.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain how to use comparative and superlative adjectives.
 - In this lesson, you will identify words with the endings -er and -est.
 - In this lesson, you will identify how a writer tells readers their opinion on a topic.
2. Getting to Know You: Comprehension
 - In this lesson, you will provide responses to questions about characters.
 - In this lesson, you will respond to key questions.
 - In this lesson, you will identify comparative and superlative adjectives in writing.
 - In this lesson, you will read words with the endings -er and -est.
 - In this lesson, you will identify how writers group an opinion and reasons in a text.
3. Getting to Know You: Speak/Listen
 - In this lesson, you will provide responses to questions about setting.
 - In this lesson, you will provide responses to questions after listening to a story.
 - In this lesson, you will identify the correct comparative or superlative adjective when writing or speaking.
 - In this lesson, you will explain your opinion on a topic in your introduction.
4. Getting to Know You: Fluency
 - In this lesson, you will answer questions about plot.
 - In this lesson, you will read with expression.
 - In this lesson, you will spell words with the endings -er and -est.
 - In this lesson, you will explain reasons for your opinion in a concept web.
5. Getting to Know You: Synthesize
 - In this lesson, you will answer questions about the sequence of events in a story.
 - In this lesson, you will analyze two stories for similarities and differences.
 - In this lesson, you will listen to a text and answer questions to show you understand it, and tell the genre.

6. Surprising Characters

1. Surprising Characters: Genre
 - In this lesson, you will listen to a text and answer questions to show you understand it, and tell the genre.
 - In this lesson, you will identify linking words and phrases and tell how writers use them to connect opinions, reasons, and details.
 - In this lesson, you will describe comparative adverbs and superlative adverbs.
 - In this lesson, you will identify compound words.
 - In this lesson, you will use the names for parts of poems when talking and speaking about a poem.
2. Surprising Characters: Comprehension
 - In this lesson, you will use the names for parts of poems when talking and speaking about a poem.
 - In this lesson, you will use details to describe differences in cultures after reading a poem.
 - In this lesson, you will explain the rhyme scheme in a poem.
 - In this lesson, you will identify comparative adverbs and superlative adverbs in writing.
 - In this lesson, you will read compound words.
 - In this lesson, you will identify features of strong conclusions.
3. Surprising Characters: Speak/Listen
 - In this lesson, you will identify parts of a poem.
 - In this lesson, you will think about your healthy habits and plan to make changes.
 - In this lesson, you will explain how sound devices are used in a poem.
 - In this lesson, you will determine the correct use of comparative and superlative adverbs.
 - In this lesson, you will explain the reasons for your opinion.
4. Surprising Characters: Fluency
 - In this lesson, you will explain the meaning of lines and stanzas.
 - In this lesson, you will read a poem with expression.
 - In this lesson, you will identify the structure of poems.
 - In this lesson, you will spell compound words.
 - In this lesson, you will write a draft of the conclusion to your opinion text.
5. Surprising Characters: Synthesize
 - In this lesson, you will explain how details build a poem.
 - In this lesson, you will analyze how people interpret messages differently.
 - In this lesson, you will explain the meaning of parts of a poem.

7. Keeping an Open Mind

1. Keeping an Open Mind: Genre
 - In this lesson, you will explain how solving a problem you have with a friend can help your friendship grow.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain how to use singular possessive nouns.
 - In this lesson, you will identify singular possessive words.
 - In this lesson, you will read a text at a proper rate.
2. Keeping an Open Mind: Comprehension

- In this lesson, you will connect story events to feelings and experiences in your own life.
 - In this lesson, you will identify connections made between characters' experiences and in your own life.
 - In this lesson, you will identify singular possessive nouns in writing.
 - In this lesson, you will read singular possessive words.
 - In this lesson, you will practice writing in cursive with proper spacing between letters.
3. Keeping an Open Mind: Speak/Listen
 - In this lesson, you will identify connections between different story events and experiences in your own life.
 - In this lesson, you will identify connections between different texts.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will practice writing in cursive with proper spacing between words.
 - In this lesson, you will read a book of your choice.
 4. Keeping an Open Mind: Fluency
 - In this lesson, you will compare a story to your own life.
 - In this lesson, you will demonstrate fluent reading in a recording after learning about careers that require that skill.
 - In this lesson, you will spell singular possessive words.
 - In this lesson, you will connect a text to your life and to other texts.
 5. Keeping an Open Mind: Synthesize
 - In this lesson, you will use your own knowledge and experiences to make comparisons between texts.
 - In this lesson, you will compare how builders and readers reflect on experiences to make connections.
 - In this lesson, you will read a book of your choice.

8. Asking for Help

1. Asking for Help: Genre
 - In this lesson, you will listen to a text, show you understand it, and tell what type of writing it is.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will explain how plural possessives are used.
 - In this lesson, you will identify plural possessive words.
 - In this lesson, you will revise your opinion text.
2. Asking for Help: Comprehension
 - In this lesson, you will explain how a story's illustrations help create a mood.
 - Think about the story. Look again at the illustrations. What is the mood of the whole story? Write about it in your own words.
 - In this lesson, you will explain how a story's illustrations help create a mood.
 - In this lesson, you will identify plural possessive nouns in writing.
 - In this lesson, you will read plural possessive words.
 - In this lesson, you will check your writing again for further revisions.
3. Asking for Help: Speak/Listen
 - In this lesson, you will explain how a story's illustrations help you understand a character.
 - In this lesson, you will discuss people's feelings after listening to understand.

- In this lesson, you will form and use plural possessive nouns when writing.
 - In this lesson, you will edit your opinion text.
4. Asking for Help: Fluency
 - In this section, you will describe a story’s setting, including how illustrations help you understand it.
 - In this lesson, you will get your opinion text ready to share with readers.
 - In this lesson, you will spell plural possessive words.
 - In this lesson, you will prepare your opinion text for readers.
 5. Asking for Help: Write
 - In this lesson, you will present your opinion text to your Learning Coach.
 6. First Impressions Unit Test

9. Out in Space

1. Out in Space: Genre
 - In this lesson, you will describe ways to help keep yourself and others safe.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify coordinating and subordinating conjunctions in writing.
 - In this lesson, you will identify words with the suffixes -ful, -less, and -ly.
 - In this lesson, you will practice reading aloud with expression.
2. Out in Space: Comprehension
 - In this lesson, you will locate information in a text in response to questions.
 - In this lesson, you will locate answers in a text in response to questions.
 - In this lesson, you will use coordinating conjunctions correctly in writing and speaking.
 - In this lesson, you will write uppercase M and N in cursive.
 - In this lesson, you will read words with the suffixes -ful, -less, and -ly.
3. Out in Space: Speak/Listen
 - In this lesson, you will find text evidence to answer questions.
 - In this lesson, you will use coordinating or subordinating conjunctions depending on the meaning of a sentence.
 - In this lesson, you will use subordinating conjunctions correctly in writing and speaking.
 - In this lesson, you will find text evidence and answer questions about an informational text.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase H and K in cursive.
4. Out in Space: Fluency
 - In this lesson, you will answer questions about an informational text.
 - In this lesson, you will use ideas from reading to do creative work.
 - In this lesson, you will spell words with suffixes -ful, -less, and -ly.
 - In this lesson, you will answer questions about an informational text using text evidence.
5. Out in Space: Synthesize
 - In this lesson, you will answer questions about an informational text.
 - In this lesson, you will tell how your social groups are similar and different.
 - In this lesson, you will read a book of your choice.

10. Creatures of the Night

1. Creatures of the Night: Genre

- In this lesson, you will compare and contrast your social groups.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify words with closed syllables.
 - In this lesson, you will practice reading a poem aloud without making mistakes.
2. Creatures of the Night: Comprehension
 - In this section, you will explain how the ideas are organized in an informational text.
 - In this section, you will explain how rereading helps you understand text structure.
 - In this lesson, you will use commas when writing about locations.
 - In this lesson, you will write uppercase P and Q in cursive.
 - In this lesson, you will read words with closed syllables.
 3. Creatures of the Night: Speak/Listen
 - In this lesson, you will identify comparison in an informational text.
 - In this lesson, you will use a diagram to make comparisons.
 - In this lesson, you will use commas with coordinating adjectives.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase V and U in cursive.
 4. Creatures of the Night: Fluency
 - In this lesson, you will learn why it is important for authors to put events in the order in which they happened.
 - In this lesson, you will read new words with accuracy.
 - In this lesson, you will spell words with closed syllables.
 - In this lesson, you will explain how and why authors use comparison or cause and effect to organize ideas.
 5. Creatures of the Night: Synthesize
 - In this lesson, you will use signal words to find causes and effects in an informational text.
 - In this lesson, you will identify cause/effect connections and make sure that they are correct.
 - In this lesson, you will read a book of your choice.

11. It Happens at Night!

1. It Happens at Night!: Genre
 - In this lesson, you will explain how to take care of other people's things.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will use commas with a series of words.
 - In this lesson, you will identify words with open syllables.
 - In this lesson, you will use context to determine the meaning of a word.
2. It Happens at Night!: Comprehension
 - In this lesson, you will determine why authors put events in a sequence.
 - In this lesson, you will find places where sequencing is used to organize ideas in an informational text.
 - In this lesson, you will use a comma before a coordinating conjunction in a compound sentence.
 - In this lesson, you will write uppercase W and X in cursive.
 - In this lesson, you will read words with open syllables.
3. It Happens at Night!: Speak/Listen

- In this lesson, you will take part in a discussion and express your ideas clearly.
 - In this lesson, you will participate in a discussion.
 - In this lesson, you will capitalize the names of geographical places.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write uppercase Y and Z in cursive.
4. It Happens at Night!: Fluency
 - In this lesson, you will describe how ideas in sentences are connected.
 - In this lesson, you will learn how to think like a scientist.
 - In this lesson, you will spell words with open syllables.
 - In this lesson, you will spell words with open syllables.
 1. It Happens at Night!: Synthesize
 - In this lesson, you will explain how the ideas in different paragraphs are connected.
 - In this lesson, you will use signal words to identify causes and effects.
 - In this lesson, you will identify problems and solutions in informational texts.
 - In this lesson, you will identify some roles for taking part in a group discussion.

12. Changes in the Night Sky

2. Changes in the Night Sky: Genre
 - In this lesson, you will describe how you can give someone a compliment by saying something nice.
 - In this lesson, you will practice reading a poem at a proper rate.
 - In this lesson, you will capitalize words in titles and titles of respect when writing.
 - In this lesson, you will capitalize number words that begin a sentence.
 - In this lesson, you will identify words with prefixes un-, re-, pre-, and dis-.
 - In this lesson, you will read a poem aloud at a proper rate.
3. Changes in the Night Sky: Comprehension
 - In this lesson, you will learn how to ask questions to identify causes and effects.
 - In this lesson, identify causes and effects by asking questions.
 - In this lesson, identify causes and effects by asking questions.
 - In this lesson, you will capitalize the names of places and holidays.
 - In this lesson, you will write a sentence in cursive on two lines.
 - In this lesson, you will identify words with prefixes un-, pre-, re-, and dis-.
4. Changes in the Night Sky: Speak/Listen
 - In this lesson, you will learn how to identify compare/contrast relationships.
 - In this lesson, you will use signal words to make connections.
 - In this lesson, you will capitalize company and product names.
 - In this lesson, you will read a book of your choice.
 - In this lesson, you will write sentences in cursive on two lines.
5. Changes in the Night Sky: Fluency
 - In this lesson, you will identify compare/contrast relationships.
 - In this lesson, you will use comprehension strategies while reading an informational text.
 - In this lesson, you will spell words with prefixes un-, pre-, re-, and dis-.

- In this lesson, you will list ways you can build better relationships with others.
6. Changes in the Night Sky: Fluency Discussion
 7. Changes in the Night Sky: Read
 - In this lesson, you will read a book of your choice.
 8. Out at Night Unit Test
- 13. Sea Creatures**
1. Sea Creatures: Genre
 - In this lesson, you will identify ways you can build better relationships with others.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will tell how primary and secondary sources are different.
 - In this lesson, you will identify words that end with a consonant followed by -le.
 - In this lesson, you will identify parts of a research report.
 2. Sea Creatures: Comprehension
 - In this lesson, you will explain how primary and secondary sources are different.
 - In this lesson, you will explain the solution to a problem.
 - In this lesson, you will expand simple sentences and compound sentences.
 - In this lesson, you will read words that end with a consonant followed by -le.
 - In this lesson, you will explain how writers introduce a topic in the introduction of a research report.
 3. Sea Creatures: Speak/Listen
 - In this lesson, you will identify examples of primary and secondary sources.
 - In this lesson, you will give a report about a topic.
 - In this lesson, you will rearrange simple sentences and compound sentences.
 - In this lesson, you will vary sentence beginnings to improve fluency.
 - In this lesson, you will plan the introduction of your research report based on your research.
 4. Sea Creatures: Fluency
 - In this lesson, you will explain why some sources may be more reliable than others.
 - In this lesson, you will make a research plan that includes primary and secondary sources.
 - In this lesson, you will explain what a text is about by skimming it.
 - In this lesson, you will spell words that end with a consonant followed by -le.
 - In this lesson, you will write a draft of the introduction of your research report.
 5. Sea Creatures: Synthesize
 - In this lesson, you will explain how to use paraphrasing to avoid plagiarism.
 - In this lesson, you will find the answers to questions in a text.
 - In this lesson, you will paraphrase main ideas and details in a text.
 - In this lesson, you will plan the body paragraphs of your research report.
- 14. The Importance of Oceans**
1. The Importance of Oceans: Genre
 - In this lesson, you will explain how to use I-statements to tell someone how you feel.

- In this lesson, you will identify the genre of a text.
 - In this lesson, you will think aloud to identify important points and key details in an informational text.
 - In this lesson, you will identify words with ough, augh, and old.
 - In this lesson, you will identify how facts, definitions, details, and visuals are used in a research report.
2. The Importance of Oceans: Comprehension
 - In this lesson, you will identify important points and key details in an informational text.
 - In this lesson, you will use idea-generating techniques.
 - In this lesson, you will identify information that supports a topic.
 - In this lesson, you will use complex sentences in writing.
 - In this lesson, you will create sentence fluency by using long and short sentences.
 - In this lesson, you will read words with ough, augh, and old.
 - In this lesson, you will identify how skilled writers end their research reports.
 3. The Importance of Oceans: Speak/Listen
 - In this lesson, you will make comparisons and contrasts between two texts about the same topic.
 - In this lesson, you will use effective speaking tips while giving a speech.
 - In this lesson, you will use complex sentences when writing and speaking.
 - In this lesson, you will create a draft of the body paragraphs in your research report.
 4. The Importance of Oceans: Fluency
 - In this lesson, you will create a draft of the body paragraphs in your research report.
 - In this lesson, you will compare different types of media.
 - In this lesson, you will spell words with ough, augh, and old.
 - In this lesson, you will write a conclusion for your research report.
 5. The Importance of Oceans: Synthesize
 - In this lesson, you will explain how annotations help you to find and take notes about a source.
 - In this lesson, you will analyze texts to compare and contrast important points.
 - In this lesson, you will analyze texts to compare and contrast important points as they relate to science.
 - In this lesson, you will use signal words to find causes and effects in an informational text.

15. Ocean Journeys

1. Ocean Journeys: Genre
 - In this lesson, you will show that you know how to help others.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will define shades of meaning among words that are related.
 - In this lesson, you will identify words that are part of the -ind, -ost, and -ild word families.
 - In this lesson, you will read poetry aloud in an interesting way.
2. Ocean Journeys: Comprehension

- In this lesson, you will read compound words.
 - In this lesson, you will identify the author’s point of view in an informational text.
 - In this lesson, you will identify problems and their solutions.
 - In this lesson, you will tell the differences among the meaning of words that describe states of mind.
 - In this lesson, you will distinguish differences among the meaning of words that describe states of mind.
 - In this lesson, you will read words that are part of the -ind, -ost, and -ild word families.
 - In this lesson, you will write words, thoughts, and answers in cursive.
3. Ocean Journeys: Speak/Listen
 - In this lesson, you will determine an author's point of view using evidence in an informational text.
 - In this lesson, you will identify the main idea and supporting details in a text that is read aloud.
 - In this lesson, you will distinguish among the meanings that describe degrees of certainty.
 - In this lesson, you will use indentation when you write a paragraph in cursive.
 - In this lesson, you will read a book of your choice.
 4. Ocean Journeys: Fluency
 - In this lesson, you will explain how an author's point of view differs from your point of view.
 - In this lesson, you will read a text aloud with accuracy and the right rate.
 - In this lesson, you will spell words that are part of the -ind, -ost, and -ild word families.
 - In this lesson, you will explain how an author's point of view differs from your point of view.
 5. Ocean Journeys: Synthesize
 - In this lesson, you will determine the meanings of new words that relate to the topic of an informational text.
 - In this lesson, you will compare texts in order to develop a point of view about how people can protect our oceans.
 - In this lesson, you will choose and read a book.

16. Dangers to Our Ocean

1. Dangers in Our Oceans: Genre
 - In this lesson, you will identify something you would like to be able to do better.
 - In this lesson, you will identify the genre of a text.
 - In this lesson, you will identify how similes and metaphors add effect to writing.
 - In this lesson, you will identify contractions.
 - In this lesson, you will create a works cited page for your research report.
2. Dangers in Our Oceans: Comprehension
 - In this lesson, you will use text features to learn the meaning of unfamiliar words.
 - In this lesson, you will identify texts with an inanimate voice.

- In this lesson, you will identify the effect of similes and metaphors in writing.
 - In this lesson, you will read contractions.
 - In this lesson, you will revise your research report.
3. Dangers in Our Oceans: Speak/Listen
 - In this lesson, you will use context clues to learn the meaning of academic words.
 - In this lesson, you will report clearly on a topic.
 - In this lesson, you will add onomatopoeia, similes, and metaphors to revise sentences for effect.
 - In this lesson, you will edit your research report.
 4. Dangers in Our Oceans: Fluency
 - In this lesson, you will use context clues to learn the meaning of domain-specific words.
 - In this lesson, you will set a goal to improve the time you can read aloud with accuracy.
 - In this lesson, you will explain examples of hyperbole in a text.
 - In this lesson, you will spell contractions.
 - In this lesson, you will add a visual to your research report before sharing it with readers.
 5. Dangers in Our Oceans: Write
 - In this lesson, you will add a visual to your research report before sharing it with readers.
 6. The Deep Blue Sea Unit Test

Language Arts 4

Language Arts 4

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas. In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing narrative and explanatory texts. The focus on reading and writing is supplemented with instruction in grammar, spelling, and handwriting—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester A Outline

1. Actions Speak Louder than Words

1. Actions and Words: Genre

- In this lesson, you will describe how people overcome obstacles to achieve a goal.
- In this lesson, you will identify the topic of a text after listening to a text.
- In this lesson, you will use complete simple sentences.
- In this lesson, you will identify words with the short a, e, i, o, and u sounds.
- In this lesson, you will practice writing print uppercase and lowercase letters, punctuation marks, and the numbers 0–10.

2. Actions and Words: Comprehension

- In this lesson, you will use context clues in the text to help you determine word meanings.
- In this lesson, you will learn how to prioritize responsibilities.
- In this lesson, you will find and correct sentence fragments.
- In this lesson, you will write sentences using correct spacing.
- In this lesson, you will pronounce words with the short a, e, i, o, and u sounds.

3. Actions and Words: Speak/Listen
 - In this lesson, you will paraphrase a text that is read aloud.
 - In this lesson, you will decide what information is important to paraphrase.
 - In this lesson, you will correct run-on sentences.
 - In this lesson, you will choose a book to read.
4. Actions and Words: Fluency
 - In this lesson, you will identify the central idea and supporting details of a story to help summarize.
 - In this lesson, you will provide a summary of a literary text.
 - In this lesson, you will use context clues to summarize a story.
 - In this lesson, you will spell words with the short a, e, i, o, and u sounds.
 - In this lesson, you will choose a book to read.

2. Kindness Goes a Long Way

1. Kindness Goes a Long Way: Genre
 - In this lesson, you will explain how to use the internet safely.
 - In this lesson, you will identify descriptions in a story that is read aloud.
 - In this lesson, you will correctly capitalize proper nouns.
 - In this lesson, you will identify words with the long a vowel sound.
 - In this lesson, you will read uppercase and lowercase cursive writing.
2. Kindness Goes a Long Way: Comprehension
 - In this lesson, you will use story details to describe a character.
 - In this lesson, you will analyze a character in a story.
 - In this lesson, you will use capitalization in sentences.
 - In this lesson, you will write the numbers 0–10 and punctuation marks in cursive.
 - In this lesson, you will pronounce words with the long a vowel sound.
3. Kindness Goes a Long Way: Speak/Listen
 - In this lesson, you will use story details to describe an event.
 - In this lesson, you will use details to orally describe an event in a story.
 - In this lesson, you will correct capitalization errors in sentences.
 - In this lesson, you will choose a book to read.
4. Kindness Goes a Long Way: Fluency
 - In this lesson, you will use story details to describe a setting.
 - In this lesson, you will use expression to effectively describe a setting.
 - In this lesson, you will identify events and settings in a story.
 - In this lesson, you will spell words with the long a sound.
5. Kindness Goes a Long Way: Synthesize
 - In this lesson, you will use details to describe a character, setting, or event in a story.
 - In this lesson, you will explain how details in a story are alike or different.
 - In this lesson, you will choose to read a book.

3. Lessons in Kindness

1. Lessons in Kindness: Genre
 - In this lesson, you will practice listening in a way that shows you are paying attention.
 - In this lesson, you will retell a story that you have heard.
 - In this lesson, you will use punctuation to complete sentences.
 - In this lesson, you will identify words with the long e spelling pattern.

- In this lesson, you will write lowercase i and l in cursive.
2. Lessons in Kindness: Comprehension
 - In this lesson, you will explain what a story is about by summarizing.
 - In this lesson, you will use a summarizing strategy to learn about a culture.
 - In this lesson, you will correct punctuation errors in sentences.
 - In this lesson, you will write lowercase e and t in cursive.
 - In this lesson, you will pronounce words with the long e spelling pattern.
 3. Lessons in Kindness: Speak/Listen
 - In this lesson, you will clearly recount stories by setting the scene, sequencing details, and giving a closing sentence.
 - In this lesson, you will speak clearly when recounting a story or experience.
 - In this lesson, you will choose punctuation for effect when writing.
 - In this lesson, you will choose a book to read.
 4. Lessons in Kindness: Fluency
 - In this lesson, you will identify details that support the moral in a folktale.
 - In this lesson, you will show a readiness to improve reading a folktale with expression.
 - In this lesson, you will prepare for a discussion by asking and answering some questions about a text.
 - In this lesson, you will spell words with the long e spelling pattern.
 5. Lessons in Kindness: Synthesize
 - In this lesson, you will locate details in a story to respond to questions.
 - In this lesson, you will ask questions to better understand a story.
 - In this lesson, you will choose a book to read.

4. A Boost in Kindness

1. A Boost in Kindness: Genre
 - In this lesson, you will use “I-Statements” to express emotions.
 - In this lesson, you will listen to explain the central message of a story.
 - In this lesson, you will correct comma use errors in complex sentences.
 - In this lesson, you will identify words with the long i and long o vowel sounds.
 - In this lesson, you will write lowercase o and a in cursive.
2. A Boost in Kindness: Comprehension
 - In this lesson, you will ask questions to help you understand a story.
 - In this lesson, you will ask questions to help you understand a text.
 - In this lesson, you will correct comma and quotation mark errors in direct speech.
 - In this lesson, you will write lowercase c and d in cursive.
 - In this lesson, you will pronounce words with the long i and long o sounds.
3. A Boost in Kindness: Speak/Listen
 - In this lesson, you will find text evidence to answer questions.
 - In this lesson, you will find text evidence to answer questions.
 - In this lesson, you will correctly use commas and quotation marks to mark quotations from texts.
 - In this lesson, you will choose a book to read.
4. A Boost in Kindness: Fluency
 - In this lesson, you will use text evidence to make inferences.
 - In this lesson, you will use your voice to express feeling while reading aloud.

- In this lesson, you will spell words with the long i and long o sounds.
 - In this lesson, you will participate in a group discussion about a text.
5. A Boost in Kindness: Fluency Discussion
 6. A Boost in Kindness: Read
 - In this lesson, you will choose a book to read.
 7. The Importance of Being Kind Unit Test

5. Watching Animals

1. Watching Animals: Genre
 - In this lesson, you will explain how to plan healthy meals.
 - In this lesson, you will identify the narrator of a text.
 - In this lesson, you will explain how relative pronouns are used.
 - In this lesson, you will identify an author's purpose in narrative writing.
2. Watching Animals: Comprehension
 - In this lesson, you will identify first-person point of view and narration in a literary text.
 - In this lesson, you will identify first-person point of view and narration in media.
 - In this lesson, you will identify relative pronouns in writing.
 - In this lesson, you will plan the beginning of your story.
3. Watching Animals: Speak/Listen
 - In this lesson, you will identify third-person point of view and narration in a literary text.
 - In this lesson, you will take turns speaking and listening as you discuss third-person point of view.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will plan the middle of your story.
4. Watching Animals: Fluency
 - In this lesson, you will describe how point of view shapes a reader's ideas about characters, settings, and events.
 - In this lesson, you will express ideas about characters orally and in writing.
 - In this lesson, you will use relative pronouns.
 - In this lesson, you will use words and phrases to write about events in an exact way.
5. Watching Animals: Synthesize
 - In this lesson, you will compare and contrast first-person and third-person narrations in stories.
 - In this lesson, you will evaluate first-person and third-person points of view to determine which one to use and when.
 - In this lesson, you will write the beginning of your story.

6. Understanding Animals

1. Understanding Animals: Genre
 - In this lesson, you will explain how to stay safe when doing activities.
 - In this lesson, you will identify the story's central idea after listening to a story.
 - In this lesson, you will explain how relative adverbs are used.
2. Understanding Animals: Comprehension
 - In this lesson, you will examine how authors use sensory details to help readers imagine events and experiences.

- In this lesson, you will use context clues to determine the meanings of words and phrases.
 - In this lesson, you will use context clues to interpret the meanings of words.
 - In this lesson, you will identify relative adverbs in writing.
 - In this lesson, you will use description and dialogue to tell about what happens in your story.
3. Understanding Animals: Speak/Listen
 - In this lesson, you will identify the difference between a story's theme and its central idea.
 - In this lesson, you will make decisions about a story's central idea and theme.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use description and dialogue to show how characters respond to what happens in your story.
 4. Understanding Animals: Fluency
 - In this lesson, you will use details in a story to determine the story's theme.
 - In this lesson, you will explain how expression helps support your ideas about a story's theme.
 - In this lesson, you will use relative adverbs.
 - In this lesson, you will write a conclusion to your narrative.
 5. Understanding Animals: Synthesize
 - In this lesson, you will describe how theme influences a character, a setting, or an event in a story.
 - In this lesson, you will ask questions to reflect on the influence of theme in a story.
 - In this lesson, you will identify how an author's style impacts writing as you finish a rough draft of your story.

7. A Bird's Eye View

1. A Bird's Eye View: Genre
 - In this lesson, you will explain how people, events, and things help you reach your goals.
 - In this lesson, you will identify the theme in a story.
 - In this lesson, you will explain how progressive verb tenses are used.
 - In this lesson, you will identify words with consonant digraphs.
 - In this lesson, you will write cursive lowercase letters while joining letters in a series.
2. A Bird's Eye View: Comprehension
 - In this lesson, you will connect a story to your own life, experiences, and feelings.
 - In this lesson, you will connect past experiences with what you have read.
 - In this lesson, you will identify progressive verb tenses in writing.
 - In this lesson, you will write words legibly to join letters in cursive.
 - In this lesson, you will pronounce words with consonant digraphs.
3. A Bird's Eye View: Speak/Listen
 - In this lesson, you will use relevant details to support main ideas and themes in myths.
 - In this lesson, you will paraphrase parts of a text using relevant details to support main ideas and themes.

- In this lesson, you will identify progressive verb tenses in speech.
 - In this lesson, you will choose a book to read.
4. A Bird's Eye View: Fluency
 - In this lesson, you will compare and contrast themes in traditional stories.
 - In this lesson, you will practice reading at a good rate.
 - In this lesson, you will write an essay using knowledge of comparing and contrasting themes.
 - In this lesson, you will spell words with consonant digraphs.
 5. A Bird's Eye View: Synthesize
 - In this lesson, you will compare and contrast patterns of events in traditional stories.
 - In this lesson, you will compare and contrast the patterns of events of two traditional tales.
 - In this lesson, you will choose a book to read.

8. People Need Animals

1. People Need Animals: Genre
 - In this lesson, you will tell the differences among mild, medium, and high levels of emotions.
 - In this lesson, you will draw a picture of a scene from a story as you listen to the story.
 - In this lesson, you will form progressive verb tenses in writing.
 - In this lesson, you will revise your narrative by adding sensory details.
2. People Need Animals: Comprehension
 - In this lesson, you will use paraphrasing to help yourself understand a text.
 - In this lesson, you will ask questions based on observations.
 - In this lesson, you will use progressive verb tenses in writing.
 - In this lesson, you will revise your draft by adding transitions to your narrative.
3. People Need Animals: Speak/Listen
 - In this lesson, you will make connections between two versions of a story.
 - In this lesson, you will paraphrase a text after listening.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will make final revisions to the draft of your narrative.
4. People Need Animals: Fluency
 - In this lesson, you will make connections after reading and listening to a story.
 - In this lesson, you will analyze how compromise works.
 - In this lesson, you will use progressive verb tenses in speech.
 - In this lesson, you will use a computer to edit your narrative.
5. People Need Animals: Write
 - In this lesson, you will publish your narrative.
6. Animal Teachers Unit Test

9. Mighty Medicines

1. Mighty Medicines: Genre
 - In this lesson, you will identify people in your community who provide help and support.
 - In this lesson, you will identify a message in an informational text.
 - In this lesson, you will explain how helping verbs are used.

- In this lesson, you will identify words with three-letter blends.
 - In this lesson, you will write lowercase n and m in cursive.
2. Mighty Medicines: Comprehension
 - In this lesson, you will use context clues to understand academic words.
 - In this lesson, you will use context in a text about the environment to show your understanding of academic vocabulary and main idea.
 - In this lesson, you will identify helping verbs in writing.
 - In this lesson, you will write lowercase u and w in cursive.
 - In this lesson, you will pronounce words with three-letter blends.
 3. Mighty Medicines: Speak/Listen
 - In this lesson, you will use text evidence to explain what the text says.
 - In this lesson, you will use details to identify what is said explicitly.
 - In this lesson, you will use helping verbs in writing to show conditions.
 - In this lesson, you will choose a book to read.
 4. Mighty Medicines: Fluency
 - In this lesson, you will identify a text's main idea and supporting details.
 - In this lesson, you will identify main idea and key details in different types of writing.
 - In this lesson, you will explain how to revise a text for different audiences using knowledge of main ideas and details.
 - In this lesson, you will spell words with three-letter blends.
 5. Might Medicines: Synthesize
 - In this lesson, you will provide a summary of an informational text.
 - In this lesson, you will summarize your school year to help you plan for future success.
 - In this lesson, you will choose a book to read.

10. Nature's Medicines

1. Nature's Medicines: Genre
 - In this lesson, you will measure your progress toward a goal you set for yourself.
 - In this lesson, you will explain why a text is a historical text.
 - In this lesson, you will identify helping verbs in informational texts.
 - In this lesson, you will identify words with the r-controlled vowels ar, or, and ore.
 - In this lesson, you will write lowercase b and f in cursive.
2. Nature's Medicines: Comprehension
 - In this lesson, you will explain events in a historical text.
 - In this lesson, you will make connections between events in a historical text.
 - In this lesson, you will correct helping verbs errors in writing.
 - In this lesson, you will write lowercase h and k in cursive.
 - In this lesson, you will pronounce words with r-controlled vowels ar, or, ore.
3. Nature's Medicines: Speak/Listen
 - In this lesson, you will synthesize details in a historical text to draw inferences.
 - In this lesson, you will interpret information from a historical text.
 - In this lesson, you will use helping verbs to express certain conditions when speaking.
 - In this lesson, you will choose a book to read.

4. Nature's Medicines: Fluency
 - In this lesson, you will explain events in a scientific text.
 - In this lesson, you will read ideas in a scientific text with accuracy.
 - In this lesson, you will explain inferences from an informational text.
 - In this lesson, you will spell words with the r-controlled vowels ar, or, ore.
5. Nature's Medicines: Synthesize
 - In this lesson, you will explain procedures in a technical text.
 - In this lesson, you will learn how to provide clear instruction about technical procedures.
 - In this lesson, you will choose a book to read.

11. The Science of Sickness

1. The Science of Sickness: Genre
 - In this lesson, you will explain what you find the most challenging about school.
 - In this lesson, you will summarize details.
 - In this lesson, you will explain the proper order of adjectives.
 - In this lesson, you will identify words with r-controlled vowels er, ir, and ur.
 - In this lesson, you will write lowercase g and q in cursive.
2. The Science of Sickness: Comprehension
 - In this lesson, you will use context clues to identify the meaning of words read in an informational text.
 - In this lesson, you will use context clues to judge if you have understood a new word in an informational text.
 - In this lesson, you will identify examples of the proper order of adjectives.
 - In this lesson, you will fluently write lowercase j and p in cursive.
 - In this lesson, you will pronounce words with r-controlled vowels er, ir, and ur.
3. The Science of Sickness: Speak/Listen
 - In this lesson, you will integrate ideas using key details from two texts on the same topic.
 - In this lesson, you will communicate with purpose.
 - In this lesson, you will put adjectives in the proper order in sentences.
 - In this lesson, you will choose a book to read.
4. The Science of Sickness: Fluency
 - In this lesson, you will integrate main ideas and supporting details to support a conclusion.
 - In this lesson, you will explain how to manage information from multiple texts.
 - In this lesson, you will integrate ideas across texts to draw a conclusion.
 - In this lesson, you will spell words with r-controlled vowels er, ir, and ur.
5. The Science of Sickness: Synthesize
 - In this lesson, you will integrate information from multiple texts to determine the central idea.
 - In this lesson, you will identify national and international public health issues.
 - In this lesson, you will choose a book to read.

12. Finding the Cure

1. Finding the Cure: Genre

- In this lesson, you will explain how community workers help people stay safe and healthy.
 - In this lesson, you will explain the information in a text.
 - In this lesson, you will identify the proper order of adjectives in informational texts.
 - In this lesson, you will identify words with r-controlled vowel sounds spelled are, air, ear.
 - In this lesson, you will write lowercase r and s in cursive.
2. Finding the Cure: Comprehension
 - In this lesson, you will identify an informational text’s purpose, message, and audience.
 - In this lesson, you will explain purpose, audience, and message in texts.
 - In this lesson, you will correct the order of adjectives in sentences.
 - In this lesson, you will write lowercase y and z in cursive.
 - In this lesson, you will pronounce words with r-controlled vowel sounds spelled are, air, ear.
 3. Finding the Cure: Speak/Listen
 - In this lesson, you will explain information given in a visual way.
 - In this lesson, you will explain visual information.
 - In this lesson, you will speak using the correct order of adjectives.
 - In this lesson, you will choose a book to read.
 4. Finding the Cure: Fluency
 - In this lesson, you will explain visual information.
 - In this lesson, you will explain information given in a visual way.
 - In this lesson, you will spell words with r-controlled vowel sounds.
 - In this lesson, you will discuss purpose, audience, and message in texts.
 5. Finding the Cure: Fluency Discussion
 6. Finding the Cure: Read
 - In this lesson, you will choose a book to read.

13. Holding Onto History

1. Holding Onto History: Genre
 - In this lesson, you will identify spoken and unspoken ways people share information.
 - In this lesson, you will identify features of different text structures.
 - In this lesson, you will identify prepositions in sentences.
 - In this lesson, you will introduce a topic in an explanatory text.
2. Holding Onto History: Comprehension
 - In this lesson, you will describe the features of chronology text structure.
 - In this lesson, you will use a computer to research information.
 - In this lesson, you will identify prepositions and prepositional phrases in informational text.
 - In this lesson, you will explain how authors use concrete details to develop an explanatory topic.
3. Holding Onto History: Speak/Listen
 - In this lesson, you will describe the features of comparison text.
 - In this lesson, you will paraphrase a text as you notice comparisons.
 - In this lesson, you will choose a book to read.

- In this lesson, you will use quotations in a text to develop the topic of your explanatory text.
4. Holding Onto History: Fluency
 - In this lesson, you will describe the features of cause/effect text structure.
 - In this lesson, you will set goals to help you think about cause and effect.
 - In this lesson, you will use prepositions in sentences.
 - In this lesson, you will use facts and definitions to develop the topic of your explanatory text.
 5. Holding Onto History: Synthesize
 - In this lesson, you will describe the features of problem/solution text structure.
 - In this lesson, you will provide solutions to different problems.
 - In this lesson, you will use examples to develop the topic of your explanatory text.

14. Keeping Promises

1. Keeping Promises: Genre
 - In this lesson, you will identify emotions you might feel in different situations.
 - In this lesson, you will identify a point that the author makes in an informational text.
 - In this lesson, you will use prepositional phrases when you write.
 - In this lesson, you will classify ideas for explanatory writing.
2. Keeping Promises: Comprehension
 - In this lesson, you will ask questions to identify points in an informational text.
 - In this lesson, you will reflect on an informational text to identify an author's points.
 - In this lesson, you will correct errors with prepositions and prepositional phrases in writing.
 - In this lesson, you will use linking words and phrases to connect ideas in your explanatory text.
3. Keeping Promises: Speak/Listen
 - In this lesson, you will identify the evidence an author uses to support points in an informational text.
 - In this lesson, you will tell the difference between situations in which formal English or informal English is appropriate.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use domain-specific vocabulary when writing your explanatory essay.
4. Keeping Promises: Fluency
 - In this lesson, you will explain how an author's reasons support points in an informational text.
 - In this lesson, you will read an informational text with accuracy.
 - In this lesson, you will use prepositional phrases in speech.
 - In this lesson, you will draft the conclusion to your explanatory text.
5. Keeping Promises: Synthesize
 - In this lesson, you will explain how an author's evidence supports reasons in an informational text.

- In this lesson, you will evaluate evidence in an informational text.
- In this lesson, you will identify final changes to make to the rough draft of your essay.

15. Protecting Everyone's Environment

1. Protecting Environment: Genre
 - In this lesson, you will use the arts to show different feelings.
 - In this lesson, you will listen to identify the narrator in a firsthand account.
 - In this lesson, you will use complete complex sentences when speaking and writing.
 - In this lesson, you will identify words with soft g and soft c.
 - In this lesson, you will write lowercase v and x in cursive.
2. Protecting Environment: Comprehension
 - In this lesson, you will define firsthand and secondhand accounts. Then, you will use a chart to compare them.
 - In this lesson, you will use kinds of media to compare firsthand and secondhand accounts.
 - In this lesson, you will correct sentence fragments and run-on sentences.
 - In this lesson, you will write words with cursive lowercase letters fluently.
 - In this lesson, you will pronounce words with soft g and soft c.
3. Protecting Environment: Speak/Listen
 - In this lesson, you will compare accounts about the same topic.
 - In this lesson, you will compare perspectives from different texts about the same topic.
 - In this lesson, you will correct sentence fragments and run-on sentences when speaking.
 - In this lesson, you will choose a book to read.
4. Protecting Environment: Fluency
 - In this lesson, you will compare the focus of accounts on the same topic.
 - In this lesson, you will communicate the purpose of text.
 - In this lesson, you will compare firsthand and secondhand accounts.
 - In this lesson, you will spell words with soft g and soft c.
5. Protecting Environment: Synthesize
 - In this lesson, you will describe the differences in the information from firsthand and secondhand accounts about the same topic.
 - In this lesson, you will describe a problem using a firsthand account and a secondhand account.
 - In this lesson, you will choose a book to read.

16. Objects Tell Stories

1. Objects Tell Stories: Genre
 - In this lesson, you will examine different ways of handling upsetting situations.
 - In this lesson, you will compare parts of two texts.
 - In this lesson, you will use context clues to figure out the meanings of words and phrases in an informational text.
 - In this lesson, you will revise your explanatory essay.
2. Objects Tell Stories: Comprehension
 - In this lesson, you will summarize information about a topic from more than one source.

- In this lesson, you will summarize information about a topic from different media sources.
 - In this lesson, you will use context clues to figure out the meanings of words and phrases in an informational text.
 - In this lesson, you will edit your explanatory text.
3. Objects Tell Stories: Speak/Listen
 - In this lesson, you will locate information in print, nonprint, and digital sources.
 - In this lesson, you will use information in print, nonprint, and digital sources.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will add multimedia elements to your explanatory text.
 4. Objects Tell Stories: Fluency
 - In this lesson, you will compare the information to check if it is true.
 - In this lesson, you will locate information about a topic in print and non-print sources. You will compare the information about a topic in print and non-print sources to check if it is true.
 - In this lesson, you will use reference materials to find the pronunciation of words.
 - In this lesson, you will explain how to avoid plagiarism in an explanatory text.
 5. Objects Tell Stories: Write
 - In this lesson, you will publish your explanatory essay.
 6. Indigenous Rights Unit Test

Semester B Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas. In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing narrative and explanatory texts. The focus on reading and writing is supplemented with instruction in grammar, spelling, and handwriting—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester B Outline

1. Seriously Funny

1. Seriously Funny: Genre

- In this lesson, you will retell what another person has said in your own words.
 - In this lesson, you will make inferences using details in a poem.
 - In this lesson, you will identify similes and metaphors.
 - In this lesson, you will identify words with the prefixes mis-, re-, pre-, dis-, and un-.
 - In this lesson, you will write uppercase A and O in cursive.
2. Seriously Funny: Comprehension
 - In this lesson, you will use context clues to determine the meanings of unknown words and phrases.
 - In this lesson, you will explain the importance of being able to adapt to change.
 - In this lesson, you will explain how similes and metaphors are used.
 - In this lesson, you will write uppercase C and E in cursive.
 - In this lesson, you will pronounce words with the prefixes mis-, re-, pre-, dis-, and un-.
 3. Seriously Funny: Speak/Listen
 - In this lesson, you will identify structural elements of poetry.
 - In this lesson, you will identify structural elements after listening to poetry.
 - In this lesson, you will determine the meanings of similes and metaphors in context.
 - In this lesson, you will choose a book to read.
 4. Seriously Funny: Fluency
 - In this lesson, you will determine a theme of a poem from details in the text.
 - In this lesson, you will determine how teamwork can help you understand diversity.
 - In this lesson, you will read poems to determine elements and themes.
 - In this lesson, you will spell words with the prefixes mis-, re-, pre-, dis-, and un-.
 5. Seriously Funny: Synthesize
 - In this lesson, you will describe how structural elements affect a poem's meaning.
 - In this lesson, you will explain how innovation is used in poetry.
 - In this lesson, you will choose a book to read.

2. Acting Out History

1. Acting Out History: Genre
 - In this lesson, you will describe how getting to know people of different cultures makes your life better.
 - In this lesson, you will identify the theme of a drama.
 - In this lesson, you will explain the meanings of idioms.
 - In this lesson, you will identify words with suffixes.
 - In this lesson, you will write uppercase L and D in cursive.
2. Acting Out History: Comprehension
 - In this lesson, you will use text details to describe the characters in a drama.
 - In this lesson, you will use details in a drama to analyze the points of view of characters.
 - In this lesson, you will explain the meanings of common adages.
 - In this lesson, you will write uppercase B and R in cursive.

- In this lesson, you will pronounce words with suffixes.
3. Acting Out History: Speak/Listen
 - In this lesson, you will identify the structural elements in a drama.
 - In this lesson, you will paraphrase portions of a drama.
 - In this lesson, you will explain the meanings of common proverbs.
 - In this lesson, you will choose a book to read.
 4. Acting Out History: Fluency
 - In this lesson, you will use text details to describe an event and a setting in a drama.
 - In this lesson, you will use expression as you read aloud about events and as you describe events and settings in a drama.
 - In this lesson, you will summarize a drama.
 - In this lesson, you will review elements of a drama and how they work together.
 - In this lesson, you will spell words with suffixes.

3. A World of Gods and Heroes

1. A World of Gods and Heroes: Genre
 - In this lesson, you will explain how to respond to a compliment.
 - In this lesson, you will identify the central idea of a myth.
 - In this lesson, you will identify examples of personification in literary text.
 - In this lesson, you will identify words with Greek roots.
 - In this lesson, you will write uppercase T and F in cursive.
2. A World of Gods and Heroes: Comprehension
 - In this lesson, you will determine the meaning of words and phrases as they are used in a myth.
 - In this lesson, you will use online tools to research words from myths to determine their meaning.
 - In this lesson, you will identify examples of hyperbole in literary text.
 - In this lesson, you will write uppercase S and G in cursive.
 - In this lesson, you will pronounce words with Greek roots.
3. A World of Gods and Heroes: Speak/Listen
 - In this lesson, you will restate myths in your own words.
 - In this lesson, you will use paraphrasing to clearly communicate the key ideas of similar myths.
 - In this lesson, you will find examples of onomatopoeia in literary text.
 - In this lesson, you will choose a book to read.
4. A World of Gods and Heroes: Fluency
 - In this lesson, you will use details from the text to make inferences.
 - In this lesson, you will use details from illustrations to make inferences.
 - In this lesson, you will paraphrase sections of myths using certain kinds of figurative language.
 - In this lesson, you will spell words with Greek roots.
5. A World of Gods and Heroes: Synthesize
 - In this lesson, you will describe key characteristics that define myths.
 - In this lesson, you will analyze characteristics of other cultures through myths.
 - In this lesson, you will choose a book to read.

4. Explaining the Natural World

1. Explaining the Natural World: Genre
 - In this lesson, you will monitor your progress toward a goal.
 - In this lesson, you will compare the structural elements of two poems.
 - In this lesson, you will identify examples of antonyms in literary text.
 - In this lesson, you will identify words with Latin roots.
 - In this lesson, you will write uppercase I and J in cursive.
2. Explaining the Natural World: Comprehension
 - In this lesson, you will make connections between two texts to determine the meaning of an unfamiliar word.
 - In this lesson, you will make connections between texts to reason effectively.
 - In this lesson, you will identify examples of synonyms in literary text.
 - In this lesson, you will write uppercase M and N in cursive.
 - In this lesson, you will pronounce words with Latin roots.
3. Explaining the Natural World: Speak/Listen
 - In this lesson, you will compare and contrast themes in different myths.
 - In this lesson, you will recognize ways to take part in a group discussion.
 - In this lesson, you will determine meanings of words by relating them to their synonyms and antonyms.
 - In this lesson, you will choose a book to read.
4. Explaining the Natural World: Fluency
 - In this lesson, you will identify the parts of a drama.
 - In this lesson, you will read a drama with expression.
 - In this lesson, you will spell words with Latin roots.
 - In this lesson, you will discuss similarities and differences in three poems.
5. Explaining the Natural World: Fluency Discussion
6. Explaining the Natural World: Read
 - In this lesson, you will choose a book to read.
7. How I See It Unit Test

5. A Fresh Point of View

1. A Fresh Point of View: Genre
 - In this lesson, you will determine whether people's words match the unspoken ways they express their meaning.
 - In this lesson, you compare first-person and third-person points of view in literary texts.
 - In this lesson, you will use commas and quotation marks to mark direct speech when writing.
 - In this lesson, you will read an opinion text and think about how the writer grouped ideas within each paragraph.
2. A Fresh Point of View: Comprehension
 - In this lesson, you will ask questions to tell the difference between point of view and perspective.
 - In this lesson, you will analyze how to work with others who have different perspectives.
 - In this lesson, you will use commas before coordinating conjunctions in compound sentences.
 - In this lesson, you will analyze how grouping ideas in each part of an opinion text helps a writer persuade readers.
3. A Fresh Point of View: Speak/Listen

- In this lesson, you will explain how point of view affects central idea and theme in a literary text.
 - In this lesson, you will use listening skills to determine point of view, central idea, and theme of a story.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will choose a topic for your opinion essay.
4. A Fresh Point of View: Fluency
- In this lesson, you will read to improve accuracy, rate, and expression.
 - In this lesson, you will improve reading fluency as you learn about global awareness.
 - In this lesson, you will decide when formal or informal English is appropriate when writing an opinion.
 - In this lesson, you will create reasons for your opinion by thinking about your topic in different ways.
5. A Fresh Point of View: Synthesize
- In this lesson, you will compare and contrast differing points of view in literary texts.
 - In this lesson, you will explain how different points of view affect problem-solving.
 - In this lesson, you will write a draft of the introduction to your opinion text.

6. You Can Make a Difference

1. You Can Make a Difference: Genre
- In this lesson, you will look at how you can respond when someone angers you.
 - In this lesson, you will identify the author's purpose for writing a text.
 - In this lesson, you will choose words and phrases to express opinions clearly.
 - In this lesson, you will examine how an opinion, reasons, and details are connected in an opinion text.
2. You Can Make a Difference: Comprehension
- In this lesson, you will explain how the feelings that words convey can help to make a text persuasive.
 - In this lesson, you will explain how language in an opinion piece helps to persuade readers.
 - In this lesson, you will choose words and phrases that express an appropriate tone in an opinion piece.
 - In this lesson, you will analyze how purpose and audience shape an opinion writer's message.
3. You Can Make a Difference: Speak/Listen
- In this lesson, you will use details in a text to tell whether it is told from a first-person or a third-person point of view.
 - In this lesson, you will draw conclusions about a narrator to infer a story's point of view.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will begin to draft the body paragraphs of your opinion text.
4. You Can Make a Difference: Fluency
- In this lesson, you will read aloud an opinion piece with accuracy.

- In this lesson, you will work with your Learning Coach to read aloud with accuracy.
 - In this lesson, you will choose words and phrases that link opinions, reasons, and evidence in writing.
 - In this lesson, you will write a conclusion to your opinion text.
5. You Can Make a Difference: Synthesize
- In this lesson, you will analyze the relationship between point of view, word choice, and tone in a story.
 - In this lesson, you will determine an author’s tone by interpreting word choices.
 - In this lesson, you will identify final changes to make to the rough draft of your essay.

7. Animal Power

1. Animal Power: Genre
 - In this lesson, you will explain how your behavior affects other people.
 - In this lesson, you will listen compare traditional folktale themes to popular themes in folktales.
 - In this lesson, you will identify common homophones.
 - In this lesson, you will recognize misspellings of homophones.
 - In this lesson, you will write uppercase H and K in cursive.
2. Animal Power: Comprehension
 - In this lesson, you will identify and compare the hero’s quest, or a particular pattern of events, in two traditional stories.
 - In this lesson, you will use charts to compare the pattern of events in a hero’s quest.
 - In this lesson, you will use commonly confused words correctly in writing.
 - In this lesson, you will write uppercase P and Q in cursive.
 - In this lesson, you will identify examples of frequently misspelled words.
3. Animal Power: Speak/Listen
 - In this lesson, you will compare themes in plays.
 - In this lesson, you will identify reasons for supporting a theme.
 - In this lesson, you will use less common homophones correctly in writing.
 - In this lesson, you will choose a book to read.
4. Animal Power: Fluency
 - In this lesson, you will compare patterns of events in plays.
 - In this lesson, you will compare how the hero character reacts to events in the beginning of a quest to how they act at its end.
 - In this lesson, you will review comparing and contrasting themes and patterns of events.
 - In this lesson, you will spell homophones and other frequently misspelled words correctly.
5. Animal Power: Synthesize
 - In this lesson, you will paraphrase two stories in order to help you compare their pattern of events.
 - In this lesson, you will decide which details are most important when paraphrasing a text.
 - In this lesson, you will choose a book to read.

8. It Takes Teamwork

1. It Takes Teamwork: Genre
 - In this lesson, you will recognize similarities among people who belong to different groups.
 - In this lesson, you will make connections between different versions of a text.
 - In this lesson, you will identify how punctuation affects the tone of literary text.
 - In this lesson, you will revise your opinion text to address task, purpose, and audience.
2. It Takes Teamwork: Comprehension
 - In this lesson, you will analyze quotes from the text to help explain a theme.
 - In this lesson, you will analyze a text to look for quotations that support a theme.
 - In this lesson, you will identify how punctuation affects mood in literary text.
 - In this lesson, you will make final revisions to strengthen your opinion text.
3. It Takes Teamwork: Speak/Listen
 - In this lesson, you will paraphrase information from different story formats.
 - In this lesson, you will paraphrase portions of a text read aloud.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will edit your opinion text.
4. It Takes Teamwork: Fluency
 - In this lesson, you will make connections between stage directions and tone in the text.
 - In this lesson, you will evaluate the information you find in stage directions.
 - In this lesson, you will use punctuation for effect when writing.
 - In this lesson, you will publish your opinion text.
5. It Takes Teamwork: Write
 - In this lesson, you will present your opinion text.
6. Not Alone Unit Test

9. Clues from Long Ago

1. Clues from Long Ago: Genre
 - In this lesson, you will act out the thoughts and feelings of characters in a story.
 - In this lesson, you will listen to summarize what a text says explicitly.
 - In this lesson, you will analyze word choice for precise meaning in sentences.
 - In this lesson, you will identify compound words.
 - In this lesson, you will write uppercase V and U in cursive.
2. Clues from Long Ago: Comprehension
 - In this lesson, you will summarize a text's main idea and details.
 - In this lesson, you will research to summarize a main idea and key details on an environmental topic.
 - In this lesson, you will analyze word choice in informational texts.
 - In this lesson, you will write uppercase W and X in cursive.
 - In this lesson, you will pronounce compound words.
3. Clues from Long Ago: Speak/Listen
 - In this lesson, you will identify a text's main idea and key details to help summarize a section of text.

- In this lesson, you will summarize main ideas and key details from sections of text read aloud.
 - In this lesson, you will make word choices to create specific meanings in sentences.
 - In this lesson, you will choose a book to read.
4. Clues from Long Ago: Fluency
 - In this lesson, you will identify features of expository text.
 - In this lesson, you will write an expository paragraph.
 - In this lesson, you will review identifying key details and main idea to summarize part of an informational text.
 - In this lesson, you will spell compound words.
 5. Clues from Long Ago: Synthesize
 - In this lesson, you will summarize the main idea, key details, and author's perspective.
 - In this lesson, you will independently write a main idea and key details.
 - In this lesson, you will choose a book to read.

10. Unearthing the Past

1. Unearthing the Past: Genre
 - In this lesson, you will use decision-making to solve problems you may have with other people.
 - In this lesson, you will identify what kind of informational text it is.
 - In this lesson, you will read unfamiliar words accurately in context.
 - In this lesson, you will identify plural words.
 - In this lesson, you will write uppercase Y in cursive.
2. Unearthing the Past: Comprehension
 - In this lesson, you will explain ideas in a historical text.
 - In this lesson, you will make judgments about people discussed in a historical text.
 - In this lesson, you will make strong word choices when speaking.
 - In this lesson, you will write uppercase Z in cursive.
 - In this lesson, you will pronounce plural words.
3. Unearthing the Past: Speak/Listen
 - In this lesson, you will explain a procedure in a scientific text.
 - In this lesson, you will learn how to provide clear instruction in procedures.
 - In this lesson, you will make appropriate word choices to convey precise ideas in informational text.
 - In this lesson, you will choose a book to read.
4. Unearthing the Past: Fluency
 - In this lesson, you will summarize the events in a technical text.
 - In this lesson, you will read a technical text with accuracy.
 - In this lesson, you will summarize procedures in a scientific text.
 - In this lesson, you will spell words with r-controlled vowels.
5. Unearthing the Past: Synthesize
 - In this lesson, you will explain a concept in a scientific text.
 - In this lesson, you will show that you know how to use visual aids to help explain concepts in a scientific text.
 - In this lesson, you will choose a book to read.

11. Trial, Error, and--Oops

1. Trial, Error, and--Oops: Genre
 - Explain why characters in stories feel different ways.
 - In this lesson, you will find the central idea and supporting details in a text.
 - In this lesson, you will correct capitalization errors with proper nouns.
 - In this lesson, you will identify words with an open syllable.
 - In this lesson, you will write numbers 0, 1, and 2 in cursive.
2. Trial, Error, and--Oops: Comprehension
 - In this lesson, you will use a Venn diagram to compare and contrast two texts on the same topic.
 - In this lesson, you will use a T-chart to compare and contrast two texts on the same topic.
 - In this lesson, you will correct capitalization errors.
 - In this lesson, you will write numbers 3, 4, and 5 in cursive.
 - In this lesson, you will pronounce words with open syllables.
3. Trial, Error, and--Oops: Speak/Listen
 - In this lesson, you will compare and contrast two informational texts on the same topic.
 - In this lesson, you will learn strategies to successfully share a summary of a topic.
 - In this lesson, you will correctly apply punctuation and capitalization in sentences.
 - In this lesson, you will choose a book to read.
4. Trial, Error, and--Oops: Fluency
 - In this lesson, you will integrate information from two texts on the same topic.
 - In this lesson, you will draw conclusions about the big ideas from a set of paired texts.
 - In this lesson, you will review using multiple texts to integrate information.
 - In this lesson, you will spell words with open syllables.
5. Trial, Error, and--Oops: Synthesize
 - In this lesson, you will speak knowledgeably on a science topic.
 - In this lesson, you will create a video about information from two texts on the same topic.
 - In this lesson, you will choose a book to read.

12. Creature Features

1. Creature Features: Genre
 - In this lesson, you will compare and contrast groups from many cultures.
 - In this lesson, you will identify how visuals could add meaning to a text.
 - In this lesson, you will use idioms to express your ideas precisely.
 - In this lesson, you will identify words with closed syllables.
 - In this lesson, you will write numbers 6, 7, and 8 in cursive.
2. Creature Features: Comprehension
 - In this lesson, you will think aloud to explain how information presented visually helps readers understand an informational text.
 - In this lesson, you will create your own visual feature to help you get tasks done.
 - In this lesson, you will use adages to express your ideas precisely.
 - In this lesson, you will write numbers 9 and 10 in cursive.

- In this lesson, you will pronounce words with closed syllables.
3. Creature Features: Speak/Listen
 - In this lesson, you will explain how information presented orally helps readers understand an informational text.
 - In this lesson, you will practice your listening, writing, and speaking communication skills.
 - In this lesson, you will use proverbs to express your ideas precisely.
 - In this lesson, you will choose a book to read.
 4. Creature Features: Fluency
 - In this lesson, you will explain how information presented quantitatively helps readers understand an informational text.
 - In this lesson, you will use technology to research and write.
 - In this lesson, you will spell words with closed syllables.
 - In this lesson, you will paraphrase information from diverse media.
 5. Creature Features: Fluency Discussion
 6. Creature Features: Read
 - In this lesson, you will choose a book to read.
 7. A Blast from the Past Unit Test

13. All Fired Up

1. All Fired Up: Genre
 - In this lesson, you will identify different ways to solve a problem.
 - In this lesson, you will listen to identify the structure of an informational text.
 - In this lesson, you will analyze academic and domain-specific words and phrases.
 - In this lesson, you will identify the purpose of a research report.
2. All Fired Up: Comprehension
 - In this lesson, you will determine the importance of text features in an informational text.
 - In this lesson, you will study how text features help you understand informational text about a global problem.
 - In this lesson, you will accurately use academic and domain-specific words and phrases.
 - In this lesson, you will identify the topic of your research report.
3. All Fired Up: Speak/Listen
 - In this lesson, you will discuss the features of the different types of text structure.
 - In this lesson, you will focus on text structure in audio and visual presentations.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will compare and contrast primary and secondary sources of information.
4. All Fired Up: Fluency
 - In this lesson, you will compare and contrast text structures to understand a topic covered in two texts.
 - In this lesson, you will compare two texts to help you make judgments.
 - In this lesson, you will use academic and domain-specific words and phrases that relate to a topic.
 - In this lesson, you will research information about your topic by taking notes.

5. All Fired Up: Synthesize
 - In this lesson, you will describe the structure of events in an informational text.
 - In this lesson, you will examine structure across media advertisements.
 - In this lesson, you will identify the main ideas and details that support your research topic.

14. We Need Trees

1. We Need Trees: Genre
 - In this lesson, you will consider the unique contributions of people in nonfiction and fiction texts.
 - In this lesson, you will identify the evidence that support particular points in an informational text.
 - In this lesson, you will analyze formal and informal language in informational text.
 - In this lesson, you will evaluate sources to determine if they are based on facts rather than opinions.
2. We Need Trees: Comprehension
 - In this lesson, you will use a graphic organizer to identify the evidence that an author uses to support points in an informational text.
 - In this lesson, you will analyze the solutions offered in a text about environmental issues.
 - In this lesson, you will recognize when the context calls for formal or informal language when writing.
 - In this lesson, you will draft the introduction and first body paragraph of your report using the research you have collected.
3. We Need Trees: Speak/Listen
 - In this lesson, you will determine whether to use formal or informal English for a given task.
 - In this lesson, you will tell the difference between situations in which formal or informal English is better to use in speech.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will recall information from your experiences to help you better support the main ideas in your report.
4. We Need Trees: Fluency
 - In this lesson, you will judge a message in a text.
 - In this lesson, you will identify clues that help you know how to read a text aloud.
 - In this lesson, you will recognize when the situation calls for formal or informal language when speaking.
 - In this lesson, you conclude your research report by drafting a conclusion.
5. We Need Trees: Synthesize
 - In this lesson, you will identify the audience, claim, and evidence in an argumentative text.
 - In this lesson, you will evaluate the evidence used to support a claim in an argumentative text.
 - In this lesson, you will compile your rough draft.

15. Controlling Fire

1. Controlling Fire: Genre

- In this lesson, you will predict how people respond to different feelings.
 - In this lesson, you will listen to identify if a text is a firsthand or secondhand account.
 - In this lesson, you will identify words with Greek and Latin affixes and roots.
 - In this lesson, you will identify words with vowel teams.
 - In this lesson, you will write the uppercase alphabet and your first and last name in cursive.
2. Controlling Fire: Comprehension
 - In this lesson, you will explain the differences between primary and secondary sources.
 - In this lesson, you will explain primary and secondary sources.
 - In this lesson, you will use Greek and Latin affixes as clues to the meanings of words.
 - In this lesson, you will use the appropriate spacing and indents writing in cursive.
 - In this lesson, you will pronounce words with vowel teams.
 3. Controlling Fire: Speak/Listen
 - In this lesson, you will identify primary and secondary sources when researching a topic.
 - In this lesson, you will explain how to respectfully interview a primary source for research.
 - In this lesson, you will use Greek and Latin roots as clues to the meanings of words.
 - In this lesson, you will choose a book to read.
 4. Controlling Fire: Fluency
 - In this lesson, you will compare and contrast concepts in primary and secondary sources.
 - In this lesson, you will compare and contrast how primary sources and secondary sources consider concepts.
 - In this lesson, you will compare and contrast primary and secondary sources.
 - In this lesson, you will spell words with vowel teams.
 5. Controlling Fire: Synthesize
 - In this lesson, you will compare and contrast ideas in primary and secondary sources.
 - In this lesson, you will evaluate how ideas in a primary source might differ from ideas in a secondary source.
 - In this lesson, you will choose a book to read.

16. Humans Help Out

1. Humans Help Out: Genre
 - In this lesson, you will read stories and talk about how people are different.
 - In this lesson, you will identify the perspective of each author after listening to two texts on the same topic.
 - In this lesson, you will identify key words and phrases in an informational text.
 - In this lesson, you will revise your research report to strengthen your writing.
2. Humans Help Out: Comprehension
 - In this lesson, you will add an audio recording to a presentation of your report.

- In this lesson, you will use a chart to manage information from multiple sources.
 - In this lesson, you will use context clues to determine the meanings of key words and phrases in an informational text.
 - In this lesson, you will edit your research report and identify an audio recording that can be added to a presentation of your report.
3. Humans Help Out: Speak/Listen
- In this lesson, you will find information from a variety of print and non-print sources.
 - In this lesson, you will use print or non-print sources in your research.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will add visuals to the presentation of your research report.
4. Humans Help Out: Fluency
- In this lesson, you will answer literal questions to integrate new information from print and non-print sources.
 - In this lesson, you will ask literal questions about print and non-print sources to integrate new information.
 - In this lesson, you will use reference materials to determine the spellings, pronunciations, and meanings of key words and phrases in an informational text.
 - In this lesson, you will present the information you have learned from research.
5. Humans Help Out: Write
- In this lesson, you will publish your research report.
6. Help the Planet Unit Test

Language Arts 4 Accelerated

Accelerated Language Arts 4

Semester A Outline

1. Actions Speak Louder than Words

1. Actions and Words: Genre

- In this lesson, you will describe how people overcome obstacles to achieve a goal.
- In this lesson, you will identify the topic of a text after listening to a text.
- In this lesson, you will use complete simple sentences.
- In this lesson, you will identify words with the short a, e, i, o, and u sounds.
- In this lesson, you will practice writing print uppercase and lowercase letters, punctuation marks, and the numbers 0–10.

2. Actions and Words: Comprehension

- In this lesson, you will use context clues in the text to help you determine word meanings.
- In this lesson, you will learn how to prioritize responsibilities.

- In this lesson, you will correct sentence fragments.
 - In this lesson, you will write sentences using correct spacing.
 - In this lesson, you will pronounce words with the short a, e, i, o, and u sounds.
3. Actions and Words: Speak/Listen
 - In this lesson, you will paraphrase a text that is read aloud.
 - In this lesson, you will decide what information is important to paraphrase.
 - In this lesson, you will correct run-on sentences.
 - In this lesson, you will choose a book to read.
 4. Actions and Words: Fluency
 - In this lesson, you will identify the central idea and supporting details of a story to help summarize.
 - In this lesson, you will provide a summary of a literary text.
 - In this lesson, you will use context clues to summarize a story.
 - In this lesson, you will spell words with the short a, e, i, o, and u sounds.
 - In this lesson, you will choose a book to read.

2. Kindness Goes a Long Way

1. Kindness Goes a Long Way: Genre
 - In this lesson, you will explain how to use the internet safely.
 - In this lesson, you will identify descriptions in a story that is read aloud.
 - In this lesson, you will correctly capitalize proper nouns.
 - In this lesson, you will identify words with the long a vowel sound.
 - In this lesson, you will read uppercase and lowercase cursive writing.
2. Kindness Goes a Long Way: Comprehension
 - In this lesson, you will use story details to describe a character.
 - In this lesson, you will analyze a character in a story.
 - In this lesson, you will use capitalization in sentences.
 - In this lesson, you will write the numbers 0–10 and punctuation marks in cursive.
 - In this lesson, you will pronounce words with the long a vowel sound.
3. Kindness Goes a Long Way: Speak/Listen
 - In this lesson, you will use story details to describe an event.
 - In this lesson, you will use details to orally describe an event in a story.
 - In this lesson, you will correct capitalization errors in sentences.
 - In this lesson, you will choose a book to read.
4. Kindness Goes a Long Way: Fluency
 - In this lesson, you will use story details to describe a setting.
 - In this lesson, you will use expression to effectively describe a setting.
 - In this lesson, you will identify events and settings in a story.
 - In this lesson, you will spell words with the long a sound.
5. Kindness Goes a Long Way: Synthesize
 - In this lesson, you will use details to describe a character, setting, or event in a story.
 - In this lesson, you will explain how details in a story are alike or different.
 - In this lesson, you will choose to read a book.

3. Lessons in Kindness

1. Lessons in Kindness: Genre

- In this lesson, you will practice listening in a way that shows you are paying attention.
 - In this lesson, you will retell a story that you have heard.
 - In this lesson, you will use punctuation to complete sentences.
 - In this lesson, you will identify words with the long e spelling pattern.
 - In this lesson, you will write lowercase i and l in cursive.
2. Lessons in Kindness: Comprehension
 - In this lesson, you will explain what a story is about by summarizing.
 - In this lesson, you will use a summarizing strategy to learn about a culture.
 - In this lesson, you will correct punctuation errors in sentences.
 - In this lesson, you will write lowercase e and t in cursive.
 - In this lesson, you will pronounce words with the long e spelling pattern.
 3. Lessons in Kindness: Speak/Listen
 - In this lesson, you will clearly recount stories by setting the scene, sequencing details, and giving a closing sentence.
 - In this lesson, you will speak clearly when recounting a story or experience.
 - In this lesson, you will choose punctuation for effect when writing.
 - In this lesson, you will choose a book to read.
 4. Lessons in Kindness: Fluency
 - In this lesson, you will identify details that support the moral in a folktale.
 - In this lesson, you will show a readiness to improve reading a folktale with expression.
 - In this lesson, you will prepare for a discussion by asking and answering some questions about a text.
 - In this lesson, you will spell words with the long e spelling pattern.
 5. Lessons in Kindness: Synthesize
 - In this lesson, you will locate details in a story to respond to questions.
 - In this lesson, you will ask questions to better understand a story.
 - In this lesson, you will choose a book to read.

4. A Boost in Kindness

1. A Boost in Kindness: Genre
 - In this lesson, you will use “I-Statements” to express emotions.
 - In this lesson, you will listen to explain the central message of a story.
 - In this lesson, you will correct comma use errors in complex sentences.
 - In this lesson, you will identify words with the long i and long o vowel sounds.
 - In this lesson, you will write lowercase o and a in cursive.
2. A Boost in Kindness: Comprehension
 - In this lesson, you will ask questions to help you understand a story.
 - In this lesson, you will ask questions to help you understand a text.
 - In this lesson, you will correct comma and quotation mark errors in direct speech.
 - In this lesson, you will write lowercase c and d in cursive.
 - In this lesson, you will pronounce words with the long i and long o sounds.
3. A Boost in Kindness: Speak/Listen
 - In this lesson, you will find text evidence to answer questions.
 - In this lesson, you will find text evidence to answer questions.

- In this lesson, you will correctly use commas and quotation marks to mark quotations from texts.
 - In this lesson, you will choose a book to read.
4. A Boost in Kindness: Fluency
 - In this lesson, you will use text evidence to make inferences.
 - In this lesson, you will use your voice to express feeling while reading aloud.
 - In this lesson, you will spell words with the long i and long o sounds.
 - In this lesson, you will participate in a group discussion about a text.
 5. A Boost in Kindness: Fluency Discussion
 6. A Boost in Kindness: Read
 - In this lesson, you will choose a book to read.
 7. The Importance of Being Kind Unit Test

5. Watching Animals

1. Watching Animals: Genre
 - In this lesson, you will explain how to plan healthy meals.
 - In this lesson, you will identify the narrator of a text.
 - In this lesson, you will explain how relative pronouns are used.
 - In this lesson, you will identify an author's purpose in narrative writing.
2. Watching Animals: Comprehension
 - In this lesson, you will identify first-person point of view and narration in a literary text.
 - In this lesson, you will identify first-person point of view and narration in media.
 - In this lesson, you will identify relative pronouns in writing.
 - In this lesson, you will plan the beginning of your story.
3. Watching Animals: Speak/Listen
 - In this lesson, you will identify third-person point of view and narration in a literary text.
 - In this lesson, you will take turns speaking and listening as you discuss third-person point of view.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will plan the middle of your story.
4. Watching Animals: Fluency
 - In this lesson, you will describe how point of view shapes a reader's ideas about characters, settings, and events.
 - In this lesson, you will express ideas about characters orally and in writing.
 - In this lesson, you will use relative pronouns.
 - In this lesson, you will use words and phrases to write about events in an exact way.
5. Watching Animals: Synthesize
 - In this lesson, you will compare and contrast first-person and third-person narrations in stories.
 - In this lesson, you will evaluate first-person and third-person points of view to determine which one to use and when.
 - In this lesson, you will write the beginning of your story.

6. Understanding Animals

1. Understanding Animals: Genre
 - In this lesson, you will explain how to stay safe when doing activities.

- In this lesson, you will identify the story’s central idea after listening to a story.
 - In this lesson, you will explain how relative adverbs are used.
2. Understanding Animals: Comprehension
 - In this lesson, you will examine how authors use sensory details to help readers imagine events and experiences.
 - In this lesson, you will use context clues to determine the meanings of words and phrases.
 - In this lesson, you will use context clues to interpret the meanings of words.
 - In this lesson, you will identify relative adverbs in writing.
 - In this lesson, you will use description and dialogue to tell about what happens in your story.
 3. Understanding Animals: Speak/Listen
 - In this lesson, you will identify the difference between a story’s theme and its central idea.
 - In this lesson, you will make decisions about a story’s central idea and theme.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use description and dialogue to show how characters respond to what happens in your story.
 4. Understanding Animals: Fluency
 - In this lesson, you will use details in a story to determine the story’s theme.
 - In this lesson, you will explain how expression helps support your ideas about a story’s theme.
 - In this lesson, you will use relative adverbs.
 - In this lesson, you will write a conclusion to your narrative.
 5. Understanding Animals: Synthesize
 - In this lesson, you will describe how theme influences a character, a setting, or an event in a story.
 - In this lesson, you will ask questions to reflect on the influence of theme in a story.
 - In this lesson, you will identify how an author’s style impacts writing as you finish a rough draft of your story.

7. A Bird's Eye View

1. A Bird's Eye View: Genre
 - In this lesson, you will explain how people, events, and things help you reach your goals.
 - In this lesson, you will identify the theme in a story.
 - In this lesson, you will explain how progressive verb tenses are used.
 - In this lesson, you will identify words with consonant digraphs.
 - In this lesson, you will write cursive lowercase letters while joining letters in a series.
2. A Bird's Eye View: Comprehension
 - In this lesson, you will connect a story to your own life, experiences, and feelings.
 - In this lesson, you will connect past experiences with what you have read.
 - In this lesson, you will identify progressive verb tenses in writing.
 - In this lesson, you will write words legibly to join letters in cursive.

- In this lesson, you will pronounce words with consonant digraphs.
- 3. A Bird's Eye View: Speak/Listen
 - In this lesson, you will use relevant details to support main ideas and themes in myths.
 - In this lesson, you will paraphrase parts of a text using relevant details to support main ideas and themes.
 - In this lesson, you will identify progressive verb tenses in speech.
 - In this lesson, you will choose a book to read.
- 4. A Bird's Eye View: Fluency
 - In this lesson, you will compare and contrast themes in traditional stories.
 - In this lesson, you will practice reading at a good rate.
 - In this lesson, you will write an essay using knowledge of comparing and contrasting themes.
 - In this lesson, you will spell words with consonant digraphs.
- 5. A Bird's Eye View: Synthesize
 - In this lesson, you will compare and contrast patterns of events in traditional stories.
 - In this lesson, you will compare and contrast the patterns of events of two traditional tales.
 - In this lesson, you will choose a book to read.

8. People Need Animals

1. People Need Animals: Genre
 - In this lesson, you will tell the differences among mild, medium, and high levels of emotions.
 - In this lesson, you will draw a picture of a scene from a story as you listen to the story.
 - In this lesson, you will form progressive verb tenses in writing.
 - In this lesson, you will revise your narrative by adding sensory details.
2. People Need Animals: Comprehension
 - In this lesson, you will use paraphrasing to help yourself understand a text.
 - In this lesson, you will ask questions based on observations.
 - In this lesson, you will use progressive verb tenses in writing.
 - In this lesson, you will revise your draft by adding transitions to your narrative.
3. People Need Animals: Speak/Listen
 - In this lesson, you will make connections between two versions of a story.
 - In this lesson, you will paraphrase a text after listening.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will make final revisions to the draft of your narrative.
4. People Need Animals: Fluency
 - In this lesson, you will make connections after reading and listening to a story.
 - In this lesson, you will analyze how compromise works.
 - In this lesson, you will use progressive verb tenses in speech.
 - In this lesson, you will use a computer to edit your narrative.
5. People Need Animals: Write
 - In this lesson, you will publish your narrative.
6. Animal Teachers Unit Test

9. Mighty Medicines

1. Mighty Medicines: Genre
 - In this lesson, you will identify people in your community who provide help and support.
 - In this lesson, you will identify a message in an informational text.
 - In this lesson, you will explain how helping verbs are used.
 - In this lesson, you will identify words with three-letter blends.
 - In this lesson, you will write lowercase n and m in cursive.
2. Mighty Medicines: Comprehension
 - In this lesson, you will use context clues to understand academic words.
 - In this lesson, you will use context in a text about the environment to show your understanding of academic vocabulary and main idea.
 - In this lesson, you will identify helping verbs in writing.
 - In this lesson, you will write lowercase u and w in cursive.
 - In this lesson, you will pronounce words with three-letter blends.
3. Mighty Medicines: Speak/Listen
 - In this lesson, you will use text evidence to explain what the text says.
 - In this lesson, you will use details to identify what is said explicitly.
 - In this lesson, you will use helping verbs in writing to show conditions.
 - In this lesson, you will choose a book to read.
4. Mighty Medicines: Fluency
 - In this lesson, you will identify a text's main idea and supporting details.
 - In this lesson, you will identify main idea and key details in different types of writing.
 - In this lesson, you will explain how to revise a text for different audiences using knowledge of main ideas and details.
 - In this lesson, you will spell words with three-letter blends.
5. Might Medicines: Synthesize
 - In this lesson, you will provide a summary of an informational text.
 - In this lesson, you will summarize your school year to help you plan for future success.
 - In this lesson, you will choose a book to read.

10. Nature's Medicines

1. Nature's Medicines: Genre
 - In this lesson, you will measure your progress toward a goal you set for yourself.
 - In this lesson, you will explain why a text is a historical text.
 - In this lesson, you will identify helping verbs in informational texts.
 - In this lesson, you will identify words with the r-controlled vowels ar, or, and ore.
 - In this lesson, you will write lowercase b and f in cursive.
2. Nature's Medicines: Comprehension
 - In this lesson, you will explain events in a historical text.
 - In this lesson, you will make connections between events in a historical text.
 - In this lesson, you will correct helping verbs errors in writing.
 - In this lesson, you will write lowercase h and k in cursive.
 - In this lesson, you will pronounce words with r-controlled vowels ar, or, ore.
3. Nature's Medicines: Speak/Listen

- In this lesson, you will synthesize details in a historical text to draw inferences.
 - In this lesson, you will interpret information from a historical text.
 - In this lesson, you will use helping verbs to express certain conditions when speaking.
 - In this lesson, you will choose a book to read.
4. Nature's Medicines: Fluency
 - In this lesson, you will explain events in a scientific text.
 - In this lesson, you will read ideas in a scientific text with accuracy.
 - In this lesson, you will explain inferences from an informational text.
 - In this lesson, you will spell words with the r-controlled vowels ar, or, ore.
 5. Nature's Medicines: Synthesize
 - In this lesson, you will explain procedures in a technical text.
 - In this lesson, you will learn how to provide clear instruction about technical procedures.
 - In this lesson, you will choose a book to read.

11. The Science of Sickness

1. The Science of Sickness: Genre
 - In this lesson, you will explain what you find the most challenging about school.
 - In this lesson, you will summarize details.
 - In this lesson, you will explain the proper order of adjectives.
 - In this lesson, you will identify words with r-controlled vowels er, ir, and ur.
 - In this lesson, you will write lowercase g and q in cursive.
2. The Science of Sickness: Comprehension
 - In this lesson, you will use context clues to identify the meaning of words read in an informational text.
 - In this lesson, you will use context clues to judge if you have understood a new word in an informational text.
 - In this lesson, you will identify examples of the proper order of adjectives.
 - In this lesson, you will fluently write lowercase j and p in cursive.
 - In this lesson, you will pronounce words with r-controlled vowels er, ir, and ur.
3. The Science of Sickness: Speak/Listen
 - In this lesson, you will integrate ideas using key details from two texts on the same topic.
 - In this lesson, you will communicate with purpose.
 - In this lesson, you will put adjectives in the proper order in sentences.
 - In this lesson, you will choose a book to read.
4. The Science of Sickness: Fluency
 - In this lesson, you will integrate main ideas and supporting details to support a conclusion.
 - In this lesson, you will explain how to manage information from multiple texts.
 - In this lesson, you will integrate ideas across texts to draw a conclusion.
 - In this lesson, you will spell words with r-controlled vowels er, ir, and ur.
5. The Science of Sickness: Synthesize

- In this lesson, you will integrate information from multiple texts to determine the central idea.
- In this lesson, you will identify national and international public health issues.
- In this lesson, you will choose a book to read.

12. Finding the Cure

1. Finding the Cure: Genre

- In this lesson, you will explain how community workers help people stay safe and healthy.
- In this lesson, you will explain the information in a text.
- In this lesson, you will identify the proper order of adjectives in informational texts.
- In this lesson, you will identify words with r-controlled vowel sounds spelled are, air, ear.
- In this lesson, you will write lowercase r and s in cursive.

2. Finding the Cure: Comprehension

- In this lesson, you will identify an informational text's purpose, message, and audience.
- In this lesson, you will explain purpose, audience, and message in texts.
- In this lesson, you will correct the order of adjectives in sentences.
- In this lesson, you will write lowercase y and z in cursive.
- In this lesson, you will pronounce words with r-controlled vowel sounds spelled are, air, ear.

3. Finding the Cure: Speak/Listen

- In this lesson, you will explain information given in a visual way.
- In this lesson, you will explain visual information.
- In this lesson, you will speak using the correct order of adjectives.
- In this lesson, you will choose a book to read.

4. Finding the Cure: Fluency

- In this lesson, you will explain visual information.
- In this lesson, you will explain information given in a visual way.
- In this lesson, you will spell words with r-controlled vowel sounds.
- In this lesson, you will discuss purpose, audience, and message in texts.

5. Finding the Cure: Fluency Discussion

6. Finding the Cure: Read

- In this lesson, you will choose a book to read.

7. Feel Better! Unit Test

13. Holding Onto History

1. Holding Onto History: Genre

- In this lesson, you will identify spoken and unspoken ways people share information.
- In this lesson, you will identify features of different text structures.
- In this lesson, you will identify prepositions in sentences.
- In this lesson, you will introduce a topic in an explanatory text.

2. Holding Onto History: Comprehension

- In this lesson, you will describe the features of chronology text structure.
- In this lesson, you will use a computer to research information.
- In this lesson, you will identify prepositions and prepositional phrases in informational text.

- In this lesson, you will explain how authors use concrete details to develop an explanatory topic.
- 3. Holding Onto History: Speak/Listen
 - In this lesson, you will describe the features of comparison text.
 - In this lesson, you will paraphrase a text as you notice comparisons.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use quotations in a text to develop the topic of your explanatory text.
- 4. Holding Onto History: Fluency
 - In this lesson, you will describe the features of cause/effect text structure.
 - In this lesson, you will set goals to help you think about cause and effect.
 - In this lesson, you will use prepositions in sentences.
 - In this lesson, you will use facts and definitions to develop the topic of your explanatory text.
- 5. Holding Onto History: Synthesize
 - In this lesson, you will describe the features of problem/solution text structure.
 - In this lesson, you will provide solutions to different problems.
 - In this lesson, you will use examples to develop the topic of your explanatory text.

14. Keeping Promises

1. Keeping Promises: Genre
 - In this lesson, you will identify emotions you might feel in different situations.
 - In this lesson, you will identify a point that the author makes in an informational text.
 - In this lesson, you will use prepositional phrases when you write.
 - In this lesson, you will classify ideas for explanatory writing.
2. Keeping Promises: Comprehension
 - In this lesson, you will ask questions to identify points in an informational text.
 - In this lesson, you will reflect on an informational text to identify an author's points.
 - In this lesson, you will correct errors with prepositions and prepositional phrases in writing.
 - In this lesson, you will use linking words and phrases to connect ideas in your explanatory text.
3. Keeping Promises: Speak/Listen
 - In this lesson, you will identify the evidence an author uses to support points in an informational text.
 - In this lesson, you will tell the difference between situations in which formal English or informal English is appropriate.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use domain-specific vocabulary when writing your explanatory essay.
4. Keeping Promises: Fluency
 - In this lesson, you will explain how an author's reasons support points in an informational text.

- In this lesson, you will read an informational text with accuracy.
 - In this lesson, you will use prepositional phrases in speech.
 - In this lesson, you will draft the conclusion to your explanatory text.
5. Keeping Promises: Synthesize
- In this lesson, you will explain how an author’s evidence supports reasons in an informational text.
 - In this lesson, you will evaluate evidence in an informational text.
 - In this lesson, you will identify final changes to make to the rough draft of your essay.

15. Protecting Everyone's Environment

1. Protecting Environment: Genre
- In this lesson, you will use the arts to show different feelings.
 - In this lesson, you will listen to identify the narrator in a firsthand account.
 - In this lesson, you will use complete complex sentences when speaking and writing.
 - In this lesson, you will identify words with soft g and soft c.
 - In this lesson, you will write lowercase v and x in cursive.
2. Protecting Environment: Comprehension
- In this lesson, you will define firsthand and secondhand accounts. Then, you will use a chart to compare them.
 - In this lesson, you will use kinds of media to compare firsthand and secondhand accounts.
 - In this lesson, you will correct sentence fragments and run-on sentences.
 - In this lesson, you will write words with cursive lowercase letters fluently.
 - In this lesson, you will pronounce words with soft g and soft c.
3. Protecting Environment: Speak/Listen
- In this lesson, you will compare accounts about the same topic.
 - In this lesson, you will compare perspectives from different texts about the same topic.
 - In this lesson, you will correct sentence fragments and run-on sentences when speaking.
 - In this lesson, you will choose a book to read.
4. Protecting Environment: Fluency
- In this lesson, you will compare the focus of accounts on the same topic.
 - In this lesson, you will communicate the purpose of text.
 - In this lesson, you will compare firsthand and secondhand accounts.
 - In this lesson, you will spell words with soft g and soft c.
5. Protecting Environment: Synthesize
- In this lesson, you will describe the differences in the information from firsthand and secondhand accounts about the same topic.
 - In this lesson, you will describe a problem using a firsthand account and a secondhand account.
 - In this lesson, you will choose a book to read.

16. Objects Tell Stories

1. Objects Tell Stories: Genre
- In this lesson, you will examine different ways of handling upsetting situations.
 - In this lesson, you will compare parts of two texts.

- In this lesson, you will use context clues to figure out the meanings of words and phrases in an informational text.
 - In this lesson, you will revise your explanatory essay.
2. Objects Tell Stories: Comprehension
 - In this lesson, you will summarize information about a topic from more than one source.
 - In this lesson, you will summarize information about a topic from different media sources.
 - In this lesson, you will use context clues to figure out the meanings of words and phrases in an informational text.
 - In this lesson, you will edit your explanatory text.
 3. Objects Tell Stories: Speak/Listen
 - In this lesson, you will locate information in print, nonprint, and digital sources.
 - In this lesson, you will use information in print, nonprint, and digital sources.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will add multimedia elements to your explanatory text.
 4. Objects Tell Stories: Fluency
 - In this lesson, you will compare the information to check if it is true.
 - In this lesson, you will locate information about a topic in print and non-print sources. You will compare the information about a topic in print and non-print sources to check if it is true.
 - In this lesson, you will use reference materials to find the pronunciation of words.
 - In this lesson, you will explain how to avoid plagiarism in an explanatory text.
 5. Objects Tell Stories: Write
 - In this lesson, you will publish your explanatory essay.
 6. Indigenous Rights Unit Test

Semester B Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas. In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough

understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing narrative and explanatory texts. The focus on reading and writing is supplemented with instruction in grammar, spelling, and handwriting—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester B Outline

1. Seriously Funny

1. Seriously Funny: Genre

- In this lesson, you will retell what another person has said in your own words.
- In this lesson, you will make inferences using details in a poem.
- In this lesson, you will identify similes and metaphors.
- In this lesson, you will identify words with the prefixes mis-, re-, pre-, dis-, and un-.
- In this lesson, you will write uppercase A and O in cursive.

2. Seriously Funny: Comprehension

- In this lesson, you will use context clues to determine the meanings of unknown words and phrases.
- In this lesson, you will explain the importance of being able to adapt to change.
- In this lesson, you will explain how similes and metaphors are used.
- In this lesson, you will write uppercase C and E in cursive.
- In this lesson, you will pronounce words with the prefixes mis-, re-, pre-, dis-, and un-.

3. Seriously Funny: Speak/Listen

- In this lesson, you will identify structural elements of poetry.
- In this lesson, you will identify structural elements after listening to poetry.
- In this lesson, you will determine the meanings of similes and metaphors in context.
- In this lesson, you will choose a book to read.

4. Seriously Funny: Fluency

- In this lesson, you will determine a theme of a poem from details in the text.
- In this lesson, you will determine how teamwork can help you understand diversity.
- In this lesson, you will read poems to determine elements and themes.
- In this lesson, you will spell words with the prefixes mis-, re-, pre-, dis-, and un-.

5. Seriously Funny: Synthesize

- In this lesson, you will describe how structural elements affect a poem’s meaning.
- In this lesson, you will explain how innovation is used in poetry.
- In this lesson, you will choose a book to read.

2. Acting Out History

1. Acting Out History: Genre

- In this lesson, you will describe how getting to know people of different cultures makes your life better.
 - In this lesson, you will identify the theme of a drama.
 - In this lesson, you will explain the meanings of idioms.
 - In this lesson, you will identify words with suffixes.
 - In this lesson, you will write uppercase L and D in cursive.
2. Acting Out History: Comprehension
 - In this lesson, you will use text details to describe the characters in a drama.
 - In this lesson, you will use details in a drama to analyze the points of view of characters.
 - In this lesson, you will explain the meanings of common adages.
 - In this lesson, you will write uppercase B and R in cursive.
 - In this lesson, you will pronounce words with suffixes.
 3. Acting Out History: Speak/Listen
 - In this lesson, you will identify the structural elements in a drama.
 - In this lesson, you will paraphrase portions of a drama.
 - In this lesson, you will explain the meanings of common proverbs.
 - In this lesson, you will choose a book to read.
 4. Acting Out History: Fluency
 - In this lesson, you will use text details to describe an event and a setting in a drama.
 - In this lesson, you will use expression as you read aloud about events and as you describe events and settings in a drama.
 - In this lesson, you will summarize a drama.
 - In this lesson, you will review elements of a drama and how they work together.
 - In this lesson, you will spell words with suffixes.

3. A World of Gods and Heroes

1. A World of Gods and Heroes: Genre
 - In this lesson, you will explain how to respond to a compliment.
 - In this lesson, you will identify the central idea of a myth.
 - In this lesson, you will identify examples of personification in literary text.
 - In this lesson, you will identify words with Greek roots.
 - In this lesson, you will write uppercase T and F in cursive.
2. A World of Gods and Heroes: Comprehension
 - In this lesson, you will determine the meaning of words and phrases as they are used in a myth.
 - In this lesson, you will use online tools to research words from myths to determine their meaning.
 - In this lesson, you will identify examples of hyperbole in literary text.
 - In this lesson, you will write uppercase S and G in cursive.
 - In this lesson, you will pronounce words with Greek roots.
3. A World of Gods and Heroes: Speak/Listen
 - In this lesson, you will restate myths in your own words.
 - In this lesson, you will use paraphrasing to clearly communicate the key ideas of similar myths.
 - In this lesson, you will find examples of onomatopoeia in literary text.
 - In this lesson, you will choose a book to read.

4. A World of Gods and Heroes: Fluency
 - In this lesson, you will use details from the text to make inferences.
 - In this lesson, you will use details from illustrations to make inferences.
 - In this lesson, you will paraphrase sections of myths using certain kinds of figurative language.
 - In this lesson, you will spell words with Greek roots.
5. A World of Gods and Heroes: Synthesize
 - In this lesson, you will describe key characteristics that define myths.
 - In this lesson, you will analyze characteristics of other cultures through myths.
 - In this lesson, you will choose a book to read.

4. Explaining the Natural World

1. Explaining the Natural World: Genre
 - In this lesson, you will monitor your progress toward a goal.
 - In this lesson, you will compare the structural elements of two poems.
 - In this lesson, you will identify examples of antonyms in literary text.
 - In this lesson, you will identify words with Latin roots.
 - In this lesson, you will write uppercase I and J in cursive.
2. Explaining the Natural World: Comprehension
 - In this lesson, you will make connections between two texts to determine the meaning of an unfamiliar word.
 - In this lesson, you will make connections between texts to reason effectively.
 - In this lesson, you will identify examples of synonyms in literary text.
 - In this lesson, you will write uppercase M and N in cursive.
 - In this lesson, you will pronounce words with Latin roots.
3. Explaining the Natural World: Speak/Listen
 - In this lesson, you will compare and contrast themes in different myths.
 - In this lesson, you will recognize ways to take part in a group discussion.
 - In this lesson, you will determine meanings of words by relating them to their synonyms and antonyms.
 - In this lesson, you will choose a book to read.
4. Explaining the Natural World: Fluency
 - In this lesson, you will identify the parts of a drama.
 - In this lesson, you will read a drama with expression.
 - In this lesson, you will spell words with Latin roots.
 - In this lesson, you will discuss similarities and differences in three poems.
5. Explaining the Natural World: Fluency Discussion
6. Explaining the Natural World: Read
 - In this lesson, you will choose a book to read.
7. How I See It Unit Test

5. A Fresh Point of View

1. A Fresh Point of View: Genre
 - In this lesson, you will determine whether people's words match the unspoken ways they express their meaning.
 - In this lesson, you compare first-person and third-person points of view in literary texts.
 - In this lesson, you will use commas and quotation marks to mark direct speech when writing.

- In this lesson, you will read an opinion text and think about how the writer grouped ideas within each paragraph.
2. A Fresh Point of View: Comprehension
 - In this lesson, you will ask questions to tell the difference between point of view and perspective.
 - In this lesson, you will analyze how to work with others who have different perspectives.
 - In this lesson, you will use commas before coordinating conjunctions in compound sentences.
 - In this lesson, you will analyze how grouping ideas in each part of an opinion text helps a writer persuade readers.
 3. A Fresh Point of View: Speak/Listen
 - In this lesson, you will explain how point of view affects central idea and theme in a literary text.
 - In this lesson, you will use listening skills to determine point of view, central idea, and theme of a story.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will choose a topic for your opinion essay.
 4. A Fresh Point of View: Fluency
 - In this lesson, you will read to improve accuracy, rate, and expression.
 - In this lesson, you will improve reading fluency as you learn about global awareness.
 - In this lesson, you will decide when formal or informal English is appropriate when writing an opinion.
 - In this lesson, you will create reasons for your opinion by thinking about your topic in different ways.
 5. A Fresh Point of View: Synthesize
 - In this lesson, you will compare and contrast differing points of view in literary texts.
 - In this lesson, you will explain how different points of view affect problem-solving.
 - In this lesson, you will write a draft of the introduction to your opinion text.

6. You Can Make a Difference

1. You Can Make a Difference: Genre
 - In this lesson, you will look at how you can respond when someone angers you.
 - In this lesson, you will identify the author's purpose for writing a text.
 - In this lesson, you will choose words and phrases to express opinions clearly.
 - In this lesson, you will examine how an opinion, reasons, and details are connected in an opinion text.
2. You Can Make a Difference: Comprehension
 - In this lesson, you will explain how the feelings that words convey can help to make a text persuasive.
 - In this lesson, you will explain how language in an opinion piece helps to persuade readers.
 - In this lesson, you will choose words and phrases that express an appropriate tone in an opinion piece.

- In this lesson, you will analyze how purpose and audience shape an opinion writer's message.
3. You Can Make a Difference: Speak/Listen
 - In this lesson, you will use details in a text to tell whether it is told from a first-person or a third-person point of view.
 - In this lesson, you will draw conclusions about a narrator to infer a story's point of view.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will begin to draft the body paragraphs of your opinion text.
 4. You Can Make a Difference: Fluency
 - In this lesson, you will read aloud an opinion piece with accuracy.
 - In this lesson, you will work with your Learning Coach to read aloud with accuracy.
 - In this lesson, you will choose words and phrases that link opinions, reasons, and evidence in writing.
 - In this lesson, you will write a conclusion to your opinion text.
 5. You Can Make a Difference: Synthesize
 - In this lesson, you will analyze the relationship between point of view, word choice, and tone in a story.
 - In this lesson, you will determine an author's tone by interpreting word choices.
 - In this lesson, you will identify final changes to make to the rough draft of your essay.

7. Animal Power

1. Animal Power: Genre
 - In this lesson, you will explain how your behavior affects other people.
 - In this lesson, you will listen compare traditional folktale themes to popular themes in folktales.
 - In this lesson, you will identify common homophones.
 - In this lesson, you will recognize misspellings of homophones.
 - In this lesson, you will write uppercase H and K in cursive.
2. Animal Power: Comprehension
 - In this lesson, you will identify and compare the hero's quest, or a particular pattern of events, in two traditional stories.
 - In this lesson, you will use charts to compare the pattern of events in a hero's quest.
 - In this lesson, you will use commonly confused words correctly in writing.
 - In this lesson, you will write uppercase P and Q in cursive.
 - In this lesson, you will identify examples of frequently misspelled words.
3. Animal Power: Speak/Listen
 - In this lesson, you will compare themes in plays.
 - In this lesson, you will identify reasons for supporting a theme.
 - In this lesson, you will use less common homophones correctly in writing.
 - In this lesson, you will choose a book to read.
4. Animal Power: Fluency
 - In this lesson, you will compare patterns of events in plays.

- In this lesson, you will compare how the hero character reacts to events in the beginning of a quest to how they act at its end.
 - In this lesson, you will review comparing and contrasting themes and patterns of events.
 - In this lesson, you will spell homophones and other frequently misspelled words correctly.
5. Animal Power: Synthesize
- In this lesson, you will paraphrase two stories in order to help you compare their pattern of events.
 - In this lesson, you will decide which details are most important when paraphrasing a text.
 - In this lesson, you will choose a book to read.

8. It Takes Teamwork

1. It Takes Teamwork: Genre
- In this lesson, you will recognize similarities among people who belong to different groups.
 - In this lesson, you will make connections between different versions of a text.
 - In this lesson, you will identify how punctuation affects the tone of literary text.
 - In this lesson, you will revise your opinion text to address task, purpose, and audience.
2. It Takes Teamwork: Comprehension
- In this lesson, you will analyze quotes from the text to help explain a theme.
 - In this lesson, you will analyze a text to look for quotations that support a theme.
 - In this lesson, you will identify how punctuation affects mood in literary text.
 - In this lesson, you will make final revisions to strengthen your opinion text.
3. It Takes Teamwork: Speak/Listen
- In this lesson, you will paraphrase information from different story formats.
 - In this lesson, you will paraphrase portions of a text read aloud.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will edit your opinion text.
4. It Takes Teamwork: Fluency
- In this lesson, you will make connections between stage directions and tone in the text.
 - In this lesson, you will evaluate the information you find in stage directions.
 - In this lesson, you will use punctuation for effect when writing.
 - In this lesson, you will publish your opinion text.
5. It Takes Teamwork: Write
- In this lesson, you will present your opinion text.
6. Not Alone Unit Test

9. Clues from Long Ago

1. Clues from Long Ago: Genre
- In this lesson, you will act out the thoughts and feelings of characters in a story.
 - In this lesson, you will listen to summarize what a text says explicitly.
 - In this lesson, you will analyze word choice for precise meaning in sentences.

- In this lesson, you will identify compound words.
 - In this lesson, you will write uppercase V and U in cursive.
2. Clues from Long Ago: Comprehension
 - In this lesson, you will summarize a text’s main idea and details.
 - In this lesson, you will research to summarize a main idea and key details on an environmental topic.
 - In this lesson, you will analyze word choice in informational texts.
 - In this lesson, you will write uppercase W and X in cursive.
 - In this lesson, you will pronounce compound words.
 3. Clues from Long Ago: Speak/Listen
 - In this lesson, you will identify a text’s main idea and key details to help summarize a section of text.
 - In this lesson, you will summarize main ideas and key details from sections of text read aloud.
 - In this lesson, you will make word choices to create specific meanings in sentences.
 - In this lesson, you will choose a book to read.
 4. Clues from Long Ago: Fluency
 - In this lesson, you will identify features of expository text.
 - In this lesson, you will write an expository paragraph.
 - In this lesson, you will review identifying key details and main idea to summarize part of an informational text.
 - In this lesson, you will spell compound words.
 5. Clues from Long Ago: Synthesize
 - In this lesson, you will summarize the main idea, key details, and author’s perspective.
 - In this lesson, you will independently write a main idea and key details.
 - In this lesson, you will choose a book to read.

10. Unearthing the Past

1. Unearthing the Past: Genre
 - In this lesson, you will use decision-making to solve problems you may have with other people.
 - In this lesson, you will identify what kind of informational text it is.
 - In this lesson, you will read unfamiliar words accurately in context.
 - In this lesson, you will identify plural words.
 - In this lesson, you will write uppercase Y in cursive.
2. Unearthing the Past: Comprehension
 - In this lesson, you will explain ideas in a historical text.
 - In this lesson, you will make judgments about people discussed in a historical text.
 - In this lesson, you will make strong word choices when speaking.
 - In this lesson, you will write uppercase Z in cursive.
 - In this lesson, you will pronounce plural words.
3. Unearthing the Past: Speak/Listen
 - In this lesson, you will explain a procedure in a scientific text.
 - In this lesson, you will learn how to provide clear instruction in procedures.
 - In this lesson, you will make appropriate word choices to convey precise ideas in informational text.

- In this lesson, you will choose a book to read.
4. Unearthing the Past: Fluency
 - In this lesson, you will summarize the events in a technical text.
 - In this lesson, you will read a technical text with accuracy.
 - In this lesson, you will summarize procedures in a scientific text.
 - In this lesson, you will spell words with r-controlled vowels.
 5. Unearthing the Past: Synthesize
 - In this lesson, you will explain a concept in a scientific text.
 - In this lesson, you will show that you know how to use visual aids to help explain concepts in a scientific text.
 - In this lesson, you will choose a book to read.

11. Trial, Error, and--Oops

1. Trial, Error, and--Oops: Genre
 - Explain why characters in stories feel different ways.
 - In this lesson, you will find the central idea and supporting details in a text.
 - In this lesson, you will correct capitalization errors with proper nouns.
 - In this lesson, you will identify words with an open syllable.
 - In this lesson, you will write numbers 0, 1, and 2 in cursive.
2. Trial, Error, and--Oops: Comprehension
 - In this lesson, you will use a Venn diagram to compare and contrast two texts on the same topic.
 - In this lesson, you will use a T-chart to compare and contrast two texts on the same topic.
 - In this lesson, you will correct capitalization errors.
 - In this lesson, you will write numbers 3, 4, and 5 in cursive.
 - In this lesson, you will pronounce words with open syllables.
3. Trial, Error, and--Oops: Speak/Listen
 - In this lesson, you will compare and contrast two informational texts on the same topic.
 - In this lesson, you will learn strategies to successfully share a summary of a topic.
 - In this lesson, you will correctly apply punctuation and capitalization in sentences.
 - In this lesson, you will choose a book to read.
4. Trial, Error, and--Oops: Fluency
 - In this lesson, you will integrate information from two texts on the same topic.
 - In this lesson, you will draw conclusions about the big ideas from a set of paired texts.
 - In this lesson, you will review using multiple texts to integrate information.
 - In this lesson, you will spell words with open syllables.
5. Trial, Error, and--Oops: Synthesize
 - In this lesson, you will speak knowledgeably on a science topic.
 - In this lesson, you will create a video about information from two texts on the same topic.
 - In this lesson, you will choose a book to read.

12. Creature Features

1. Creature Features: Genre

- In this lesson, you will compare and contrast groups from many cultures.
 - In this lesson, you will identify how visuals could add meaning to a text.
 - In this lesson, you will use idioms to express your ideas precisely.
 - In this lesson, you will identify words with closed syllables.
 - In this lesson, you will write numbers 6, 7, and 8 in cursive.
2. Creature Features: Comprehension
 - In this lesson, you will think aloud to explain how information presented visually helps readers understand an informational text.
 - In this lesson, you will create your own visual feature to help you get tasks done.
 - In this lesson, you will use adages to express your ideas precisely.
 - In this lesson, you will write numbers 9 and 10 in cursive.
 - In this lesson, you will pronounce words with closed syllables.
 3. Creature Features: Speak/Listen
 - In this lesson, you will explain how information presented orally helps readers understand an informational text.
 - In this lesson, you will practice your listening, writing, and speaking communication skills.
 - In this lesson, you will use proverbs to express your ideas precisely.
 - In this lesson, you will choose a book to read.
 4. Creature Features: Fluency
 - In this lesson, you will explain how information presented quantitatively helps readers understand an informational text.
 - In this lesson, you will use technology to research and write.
 - In this lesson, you will spell words with closed syllables.
 - In this lesson, you will paraphrase information from diverse media.
 5. Creature Features: Fluency Discussion
 6. Creature Features: Read
 - In this lesson, you will choose a book to read.
 7. A Blast from the Past Unit Test

13. All Fired Up

1. All Fired Up: Genre
 - In this lesson, you will identify different ways to solve a problem.
 - In this lesson, you will listen to identify the structure of an informational text.
 - In this lesson, you will analyze academic and domain-specific words and phrases.
 - In this lesson, you will identify the purpose of a research report.
2. All Fired Up: Comprehension
 - In this lesson, you will determine the importance of text features in an informational text.
 - In this lesson, you will study how text features help you understand informational text about a global problem.
 - In this lesson, you will accurately use academic and domain-specific words and phrases.
 - In this lesson, you will identify the topic of your research report.
3. All Fired Up: Speak/Listen
 - In this lesson, you will discuss the features of the different types of text structure.

- In this lesson, you will focus on text structure in audio and visual presentations.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will compare and contrast primary and secondary sources of information.
4. All Fired Up: Fluency
 - In this lesson, you will compare and contrast text structures to understand a topic covered in two texts.
 - In this lesson, you will compare two texts to help you make judgments.
 - In this lesson, you will use academic and domain-specific words and phrases that relate to a topic.
 - In this lesson, you will research information about your topic by taking notes.
 5. All Fired Up: Synthesize
 - In this lesson, you will describe the structure of events in an informational text.
 - In this lesson, you will examine structure across media advertisements.
 - In this lesson, you will identify the main ideas and details that support your research topic.

14. We Need Trees

1. We Need Trees: Genre
 - In this lesson, you will consider the unique contributions of people in nonfiction and fiction texts.
 - In this lesson, you will identify the evidence that support particular points in an informational text.
 - In this lesson, you will analyze formal and informal language in informational text.
 - In this lesson, you will evaluate sources to determine if they are based on facts rather than opinions.
2. We Need Trees: Comprehension
 - In this lesson, you will use a graphic organizer to identify the evidence that an author uses to support points in an informational text.
 - In this lesson, you will analyze the solutions offered in a text about environmental issues.
 - In this lesson, you will recognize when the context calls for formal or informal language when writing.
 - In this lesson, you will draft the introduction and first body paragraph of your report using the research you have collected.
3. We Need Trees: Speak/Listen
 - In this lesson, you will determine whether to use formal or informal English for a given task.
 - In this lesson, you will tell the difference between situations in which formal or informal English is better to use in speech.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will recall information from your experiences to help you better support the main ideas in your report.
4. We Need Trees: Fluency
 - In this lesson, you will judge a message in a text.

- In this lesson, you will identify clues that help you know how to read a text aloud.
 - In this lesson, you will recognize when the situation calls for formal or informal language when speaking.
 - In this lesson, you conclude your research report by drafting a conclusion.
5. We Need Trees: Synthesize
- In this lesson, you will identify the audience, claim, and evidence in an argumentative text.
 - In this lesson, you will evaluate the evidence used to support a claim in an argumentative text.
 - In this lesson, you will compile your rough draft.

15. Controlling Fire

1. Controlling Fire: Genre
 - In this lesson, you will predict how people respond to different feelings.
 - In this lesson, you will listen to identify if a text is a firsthand or secondhand account.
 - In this lesson, you will identify words with Greek and Latin affixes and roots.
 - In this lesson, you will identify words with vowel teams.
 - In this lesson, you will write the uppercase alphabet and your first and last name in cursive.
2. Controlling Fire: Comprehension
 - In this lesson, you will explain the differences between primary and secondary sources.
 - In this lesson, you will explain primary and secondary sources.
 - In this lesson, you will use Greek and Latin affixes as clues to the meanings of words.
 - In this lesson, you will use the appropriate spacing and indents writing in cursive.
 - In this lesson, you will pronounce words with vowel teams.
3. Controlling Fire: Speak/Listen
 - In this lesson, you will identify primary and secondary sources when researching a topic.
 - In this lesson, you will explain how to respectfully interview a primary source for research.
 - In this lesson, you will use Greek and Latin roots as clues to the meanings of words.
 - In this lesson, you will choose a book to read.
4. Controlling Fire: Fluency
 - In this lesson, you will compare and contrast concepts in primary and secondary sources.
 - In this lesson, you will compare and contrast how primary sources and secondary sources consider concepts.
 - In this lesson, you will compare and contrast primary and secondary sources.
 - In this lesson, you will spell words with vowel teams.
5. Controlling Fire: Synthesize
 - In this lesson, you will compare and contrast ideas in primary and secondary sources.

- In this lesson, you will evaluate how ideas in a primary source might differ from ideas in a secondary source.
- In this lesson, you will choose a book to read.

16. Humans Help Out

1. Humans Help Out: Genre
 - In this lesson, you will read stories and talk about how people are different.
 - In this lesson, you will identify the perspective of each author after listening to two texts on the same topic.
 - In this lesson, you will identify key words and phrases in an informational text.
 - In this lesson, you will revise your research report to strengthen your writing.
2. Humans Help Out: Comprehension
 - In this lesson, you will add an audio recording to a presentation of your report.
 - In this lesson, you will use a chart to manage information from multiple sources.
 - In this lesson, you will use context clues to determine the meanings of key words and phrases in an informational text.
 - In this lesson, you will edit your research report and identify an audio recording that can be added to a presentation of your report.
3. Humans Help Out: Speak/Listen
 - In this lesson, you will find information from a variety of print and non-print sources.
 - In this lesson, you will use print or non-print sources in your research.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will add visuals to the presentation of your research report.
4. Humans Help Out: Fluency
 - In this lesson, you will answer literal questions to integrate new information from print and non-print sources.
 - In this lesson, you will ask literal questions about print and non-print sources to integrate new information.
 - In this lesson, you will use reference materials to determine the spellings, pronunciations, and meanings of key words and phrases in an informational text.
 - In this lesson, you will present the information you have learned from research.
5. Humans Help Out: Write
 - In this lesson, you will publish your research report.
6. Help the Planet Unit Test

Language Arts 5

Language Arts 5 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing narrative and explanatory texts. The focus on reading and writing is supplemented with instruction in grammar, spelling, and handwriting—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester A Outline

1. Shared Interests

1. Shared Interests: Genre

- In this lesson, you will explain how to deal with some upsetting emotions.
- In this lesson, you will identify details about characters, setting, and sequence of events in a story.
- In this lesson, you will identify parts of speech in sentences, including nouns, verbs, and adjectives.
- In this lesson, you will identify words with the short a, e, i, o, and u vowel patterns.
- In this lesson, you will practice writing print uppercase and lowercase letters, punctuation marks, and the numbers 0–10.

2. Shared Interests: Comprehension

- In this lesson, you will predict the plot of a story.
- In this lesson, you will read a story for the purpose of understanding other cultures.
- In this lesson, you will identify parts of speech in sentences, including pronouns, adverbs, and prepositions.
- In this lesson, you will fluently print sentences using correct spacing.
- In this lesson, you will pronounce words with the short a, e, i, o, and u sounds.

3. Shared Interests: Speak/Listen

- In this lesson, you will analyze relationships and conflicts between characters in a story.
- In this lesson, you will express values and attitudes.

- In this lesson, you will identify the differences between declarative, interrogative, imperative, and exclamatory sentences.
 - In this lesson, you will choose a book to read.
4. Shared Interests: Fluency
 - In this lesson, you will use a chart to identify causes and effects in a story.
 - In this lesson, you will identify the theme of a story.
 - In this lesson, you will explain the process of choosing a book to read.
 - In this lesson, you will spell words with the short a, e, i, o, and u vowel patterns.
 - In this lesson, you will choose a book to read.
 5. Shared Interests: Synthesize
 - In this lesson, you will identify the theme of a story.
 - In this lesson, you will explain the theme of learning from failure.
 - In this lesson, you will choose a book to read.

2. Family Relationships

1. Family Relationships: Genre
 - In this lesson, you will recognize the factors that contribute to mood changes.
 - In this lesson, you will identify the plot events after listening to a story.
 - In this lesson, you will use context clues to find the meanings of words.
 - In this lesson, you will identify words with long a, e, i, o, and u vowel patterns.
 - In this lesson, you will read uppercase and lowercase cursive writing.
2. Family Relationships: Comprehension
 - In this lesson, you will compare and contrast story characters.
 - In this lesson, you will identify inferences about story characters.
 - In this lesson, you will use context clues to find the meanings of multiple-meaning words.
 - In this lesson, you will write the numbers 0–10 and punctuation marks in cursive.
 - In this lesson, you will pronounce words with long a, e, i, o, and u vowel patterns.
3. Family Relationships: Speak/Listen
 - In this lesson, you will summarize the information in story visuals.
 - In this lesson, you will use visuals that support text to better understand a story.
 - In this lesson, you will use context clues to find the meanings of academic vocabulary.
 - In this lesson, you will choose a book to read.
4. Family Relationships: Fluency
 - In this lesson, you will compare and contrast story events.
 - In this lesson, you will use expression to perform a retelling of a story.
 - In this lesson, you will compare events in a story.
 - In this lesson, you will spell words with long a, e, i, o, and u vowel patterns.
5. Family Relationships: Synthesize
 - In this lesson, you will compare and contrast story settings.
 - In this lesson, you will use reflection to discover meaning in a story.
 - In this lesson, you will choose and read a book.

3. Open Minds

1. Open Minds: Genre
 - In this lesson, you will describe ways that people can resolve a conflict.
 - In this lesson, you will identify key events in a story.
 - In this lesson, you will identify how verb tenses show time and sequence.

- In this lesson, you will identify words with the long u vowel sound, the long oo vowel sound, and the short oo vowel sound.
 - In this lesson, you will practice writing lowercase i and l in cursive.
2. Open Minds: Comprehension
 - In this lesson, you will visualize story details and events in your mind to find the story's main idea.
 - In this lesson, you will learn how to learn from people from different backgrounds.
 - In this lesson, you will identify how verb tenses show states and conditions.
 - In this lesson, you will practice writing lowercase e and t in cursive.
 - In this lesson, you will pronounce words with the long u vowel sound, the long oo vowel sound, and the short oo vowel sound.
 3. Open Minds: Speak/Listen
 - In this lesson, you will summarize a text you heard read aloud.
 - In this lesson, you will manage your study time well by summarizing the stories you read.
 - In this lesson, you will identify shifts in verb tense.
 - In this lesson, you will choose a book to read.
 4. Open Minds: Fluency
 - In this lesson, you will summarize the key details in a story to identify the main idea.
 - In this lesson, you will reflect on your oral reading skills.
 - In this lesson, you will use your own words to summarize a story.
 - In this lesson, you will spell words with the long u vowel sound, the long oo vowel sound, and the short oo vowel sound.
 5. Open Minds: Synthesize
 - In this lesson, you will differentiate how summaries and paraphrases are similar and different.
 - In this lesson, you will determine how to deal positively with setbacks.
 - In this lesson, you will choose and a book to read.

4. Good Leaders

1. Good Leaders: Genre
 - In this lesson, you will identify the steps needed to perform a routine task.
 - In this lesson, you will explain what a story says explicitly.
 - In this lesson, you will use perfect verb tenses.
 - In this lesson, you will identify words with the r-controlled vowel sounds *ar*, *air*, *ur*, and *or* spelled in various ways.
 - In this lesson, you will practice writing lowercase o and a in cursive.
2. Good Leaders: Comprehension
 - In this lesson, you will infer meaning to understand a message of a text.
 - In this lesson, you will use reasoning to infer meaning.
 - In this lesson, you will use perfect verb tenses correctly when speaking.
 - In this lesson, you will practice writing lowercase c and d in cursive.
 - In this lesson, you will pronounce words with the *ar*, *air*, *ur*, and *or* vowel sounds.
3. Good Leaders: Speak/Listen
 - In this lesson, you will identify explicit and implicit text evidence in a story.
 - In this lesson, you will identify explicit and implicit ideas in a story.
 - In this lesson, you will write using perfect verb tenses correctly.
 - In this lesson, you will choose a book to read.

4. Good Leaders: Fluency
 - In this lesson, you will quote accurately when you explain what a text says.
 - In this lesson, you will read unfamiliar words accurately by breaking them into patterns.
 - In this lesson, you will spell words with the *ar*, *air*, *ur*, and *or* vowel sounds.
 - In this lesson, you will participate in a group discussion about a text.
5. Good Leaders: Fluency Discussion
6. Good Leaders: Read
 - In this lesson, you will choose a book to read.
7. Relationships Matter Unit Test

5. Characters Who Are Kind

1. Kind Characters: Genre
 - In this lesson, you will identify the ways to behave in a cooperative group.
 - In this lesson, you will identify the descriptive language in a story.
 - In this lesson, you will interpret similes in context.
 - In this lesson, you will determine how a writer begins a narrative.
2. Kind Characters: Comprehension
 - In this lesson, you will determine the meanings of words and phrases by rereading parts of a story.
 - In this lesson, you will determine language that is appropriate for different purposes and audiences.
 - In this lesson, you will interpret metaphors in context.
 - In this lesson, you will plan the characters, setting, and major events of your narrative.
3. Kind Characters: Speak/Listen
 - In this lesson, you will contrast literal and figurative language.
 - In this lesson, you will summarize ideas for a younger audience.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will write a draft of the beginning of your story.
4. Kind Characters: Fluency
 - In this lesson, you will identify similes and metaphors in a story.
 - In this lesson, you will read a scene with expression.
 - In this lesson, you will create similes and metaphors.
 - In this lesson, you will recognize how a writer uses pacing to develop parts of a narrative or characters.
5. Kind Characters: Synthesize
 - In this lesson, you will explain the meaning of figurative language in a story.
 - In this lesson, you will brainstorm a series of creative similes.
 - In this lesson, you will apply the elements of narrative writing you have learned as you write a draft of the events in the middle of your story.

6. Family Values

1. Family Values: Genre
 - In this lesson, you will list positive strategies for handling conflict.
 - In this lesson, you will listen to identify descriptive words in a story.
 - In this lesson, you will interpret hyperboles in context.
2. Family Values: Comprehension
 - In this lesson, you will describe ways a writer can adjust narrative pacing.
 - In this lesson, you will identify what is being compared in similes and metaphors.

- In this lesson, you will use creativity to convey your ideas.
 - In this lesson, you will explain the meaning of adages and puns.
 - In this lesson, you will use concrete words and sensory details to clearly describe experiences and events.
3. Family Values: Speak/Listen
 - In this lesson, you will identify how figurative language sets the tone in a story.
 - In this lesson, you will use tone and language to communicate with others.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use dialogue and description to tell about story events and experiences or show how characters act and react.
 4. Family Values: Fluency
 - In this lesson, you will examine an author's word choices.
 - In this lesson, you will explain how to give and receive feedback.
 - In this lesson, you will interpret personification.
 - In this lesson, you will write a conclusion to your narrative.
 5. Family Values: Synthesize
 - In this lesson, you will explain how and why authors use figurative language in stories.
 - In this lesson, you will make judgments about an author's word choices.
 - In this lesson, you will finalize the rough draft of your narrative by making last-minute tweaks and typing the story.

7. Characters and Their Values

1. Characters and Values: Genre
 - In this lesson, you will explain ways to practice progressive relaxation.
 - In this lesson, you will create a visual that represents the story after listening to a story.
 - In this lesson, you will explain the meaning of common idioms.
 - In this lesson, you will define homographs.
 - In this lesson, you will write cursive lowercase letters while joining the same and different letters in a series.
2. Characters and Values: Comprehension
 - In this lesson, you will visualize a story to understand its meaning and tone.
 - In this lesson, you will analyze the best ways to interact with others.
 - In this lesson, you will explain the meaning of common adages.
 - In this lesson, you will write words legibly while joining letters in cursive.
 - In this lesson, you will spell homographs in and out of context, using references as needed.
3. Characters and Values: Speak/Listen
 - In this lesson, you will explain how visuals and multimedia affect the mood of a story.
 - In this lesson, you will use visuals and multimedia to retell the story "Three Aunties."
 - In this lesson, you will explain the meaning of common proverbs.
 - In this lesson, you will choose a book to read.
4. Characters and Values: Fluency
 - In this lesson, you will tell how a story's visuals add to its tone, meaning, and beauty.
 - In this lesson, you will read with expression and accuracy after listening to a story.

- In this lesson, you will use homographs correctly in context.

8. Reactions Show Character

1. Reactions and Character: Genre

- In this lesson, you will describe how someone feels when they are bullied.
- In this lesson, you will summarize the plot of a story.
- In this lesson, you will identify examples of synonyms, antonyms, and homographs in writing.
- In this lesson, you will examine how other authors tell stories.

2. Reactions and Character: Comprehension

- In this lesson, you will support a theme with evidence from the text, using a graphic organizer.
- In this lesson, you will identify text details about another culture that supports the story's theme.
- In this lesson, you will explain the function of phrases and clauses.
- In this lesson, you will revise your narrative by adding transitions that help readers understand the sequence of events.

3. Reactions and Character: Speak/Listen

- In this lesson, you will determine the theme of a story based on the story's details.
- In this lesson, you will identify formal and informal ways of speaking.
- In this lesson, you will choose a book to read.
- In this lesson, you will use a checklist to revise your draft.

4. Reactions and Character: Fluency

- In this lesson, you will compare stories with similar themes.
- In this lesson, you will use expression to read a text aloud.
- In this lesson, you will use the relationships between words to better understand each of the words.
- In this lesson, you will proofread your narrative by making sure you have included descriptive details, a clear sequence of events, and correct spelling, grammar, and punctuation.

5. Reactions and Character: Write

- In this lesson, you will use technology to publish a final draft of your narrative.

6. Developing Character Unit Test

9. Stronger Together

1. Stronger Together: Genre

- In this lesson, you will explain how your present goals build on goals you have achieved in the past.
- In this lesson, you will identify key details in an informational text.
- In this lesson, you will identify when to underline titles of work.
- In this lesson, you will identify words with the vowel sound spelled *aw*, *au*, *al*, *all*, *a*, *o*, *ough*, and *ough*.
- In this lesson, you will fluently write lowercase n and m in cursive

2. Stronger Together: Comprehension

- In this lesson, you will use a graphic organizer to identify the main idea and details in a text.
- In this lesson, you will use inductive reasoning to conclude a main idea from details.
- In this lesson, you will identify when to italicize titles of work.
- In this lesson, you will fluently write lowercase u and w in cursive.

- In this lesson, you will pronounce words with the vowel sound spelled *aw, au, al, all, a, o, augh, and ough*.
3. Stronger Together: Speak/Listen
 - In this lesson, you will paraphrase details to find main ideas of a text.
 - In this lesson, you will recognize that people may interpret what they read and watch in different ways.
 - In this lesson, you will identify when to underline or italicize titles of work.
 - In this lesson, you will choose a book to read.
 4. Stronger Together: Fluency
 - In this lesson, you will use text features to gain meaning.
 - In this lesson, you will use text features to expand your knowledge of civics.
 - In this lesson, you will paraphrase the arguments presented in two videos.
 - In this lesson, you will spell words with the vowel sound spelled *aw, au, al, all, a, o, augh, and ough*.
 5. Stronger Together: Synthesize
 - In this lesson, you will evaluate supporting details in a text.
 - In this lesson, you will make judgments about the relevance and importance of details in a text.
 - In this lesson, you will choose a book to read.
- 10. Influencers Making a Difference**
1. Making a Difference: Genre
 - In this lesson, you will use I-statements to let others know that you have heard them.
 - In this lesson, you will summarize information after listening to an informational text.
 - In this lesson, you will identify when to use quotation marks to show titles of work.
 - In this lesson, you will identify words with a vowel team in a syllable.
 - In this lesson, you will fluently write lowercase b and f in cursive.
 2. Making a Difference: Comprehension
 - In this lesson, you will summarize a text by asking and answering questions about the main idea and key details.
 - In this lesson, you will identify details that support a main idea.
 - In this lesson, you will identify when to use quotation marks to indicate titles of work.
 - In this lesson, you will write lowercase h and k in cursive.
 - In this lesson, you will pronounce words with a vowel team syllable.
 3. Making a Difference: Speak/Listen
 - In this lesson, you will identify important details to summarize the main ideas in a text.
 - In this lesson, you will identify details in persuasive communication.
 - In this lesson, you will use underlining, italics, or quotation marks to show the titles of works.
 - In this lesson, you will choose a book to read.
 4. Making a Difference: Fluency
 - In this lesson, you will summarize a speaker's main points and the support for their claims.
 - In this lesson, you will evaluate a text.
 - In this lesson, you will review summarizing key ideas in speaking and writing.

- In this lesson, you will spell words with vowel teams in a syllable.

5. Making a Difference: Synthesize

- In this lesson, you will analyze media and determine how it relates to culture.
- In this lesson, you will create a piece of media for a text.
- In this lesson, you will choose a book to read.

11. Showing the World

1. Showing the World: Genre

- In this lesson, you will describe steps you can take to make a decision.
- In this lesson, you will identify a purpose for reading an informational text.
- In this lesson, you will identify when to use commas to separate items in a series.
- In this lesson, you will identify words with a consonant + /e syllable.
- In this lesson, you will fluently write lowercase g and q in cursive.

2. Showing the World: Comprehension

- In this lesson, you will use logical inferences about an informational text.
- In this lesson, you will describe strategies for being open to new ideas and perspectives.
- In this lesson, you will identify when to use semicolons to separate items in a series.
- In this lesson, you will fluently write lowercase j and p in cursive.
- In this lesson, you will pronounce words with a consonant + /e syllable.

3. Showing the World: Speak/Listen

- In this lesson, you will determine whether details in an informational text are explicit or inferred.
- In this lesson, you will explain what you learn about civic life to your Learning Coach.
- In this lesson, you will use commas and semicolons to separate items in a series.
- In this lesson, you will choose a book to read.

4. Showing the World: Fluency

- In this lesson, you will evaluate an inference you made by asking, "How accurate was my thinking?"
- In this lesson, you will ask questions to reflect on your reading comprehension.
- In this lesson, you will analyze inferences in informational text.
- In this lesson, you will spell words with a consonant + /e syllable.

5. Showing the World: Synthesize

- In this lesson, you will quote accurately from a text.
- In this lesson, you will think about how to use information accurately to solve a problem.
- In this lesson, you will choose a book to read.

12. Call to Action

1. Call to Action: Genre

- In this lesson, you will recognize when it is appropriate to give a compliment.
- In this lesson, you will draw conclusions about an informational text after listening to a text.
- In this lesson, you will use commas to separate introductions from the rest of the sentence.
- In this lesson, you will identify words with an r-controlled vowel syllable.
- In this lesson, you will fluently write lowercase r and s in cursive.

2. Call to Action: Comprehension

- In this lesson, you will ask questions about a text.
 - In this lesson, you will brainstorm ideas about issues.
 - In this lesson, you will use a commas correctly in sentences.
 - In this lesson, you will fluently write lowercase y and z in cursive.
 - In this lesson, you will pronounce words with an r-controlled vowel syllable.
3. Call to Action: Speak/Listen
 - In this lesson, you will evaluate a media message.
 - In this lesson, you will explain why city council should take action.
 - In this lesson, you will explain the meaning of direct address.
 - In this lesson, you will choose a book to read.
 4. Call to Action: Fluency
 - In this lesson, you will evaluate the way that you think about inference.
 - In this lesson, you will use feedback to improve your reading accuracy.
 - In this lesson, you will spell words with r-controlled vowels.
 - In this lesson, you will discuss a current issue.
 5. Call to Action: Fluency Discussion
 6. Call to Action: Read
 - In this lesson, you will choose a book to read.
 7. Get Involved Unit Test

13. What Makes You Unique?

1. What Makes You Unique?: Genre
 - In this lesson, you will identify others' feelings based on what they say and what their body language shows.
 - In this lesson, you will identify the key points an author makes in an informational text.
 - In this lesson, you will expand sentences to make their meaning clear.
 - In this lesson, you will use details to support the central idea of an explanatory text.
2. What Makes You Unique?: Comprehension
 - In this lesson, you will provide supporting reasons in an informational text.
 - In this lesson, you will analyze media to find reasons that support a choice.
 - In this lesson, you will expand sentences to make them more interesting to your audience.
 - In this lesson, you will use a web to collect evidence for your statement.
3. What Makes You Unique?: Speak/Listen
 - In this lesson, you will analyze points that support a claim.
 - In this lesson, you will use text to give reasons and examples to support a claim with an open mind.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use an outline to plan your essay.
4. What Makes You Unique?: Fluency
 - In this lesson, you will identify supporting reasons in an informational text.
 - In this lesson, you will learn about some legal issues related to technology.
 - In this lesson, you will expand sentences for style.
 - In this lesson, you will select language that describes concepts related to your topic in a clear and precise way.
5. What Makes You Unique?: Synthesize
 - In this lesson, you will identify evidence in a text.

- In this lesson, you will evaluate arguments presented in a text.
- In this lesson, you will use a computer to type a rough draft of your introduction and body paragraphs for your explanatory essay

14. Protecting Data

1. Protecting the Data: Genre
 - In this lesson, you will identify factors that make a situation unsafe.
 - In this lesson, you will identify key points and the reasons that support them in a text.
 - In this lesson, you will combine sentences for meaning.
 - In this lesson, you will strengthen your essay by using words, phrases, and clauses to connect your ideas and evidence.
2. Protecting the Data: Comprehension
 - In this lesson, you will use a graphic organizer to list support for the author's ideas.
 - In this lesson, you will examine how to use the visuals in a text to better understand key ideas.
 - In this lesson, you will combine sentences to interest a reader or listener.
 - In this lesson, you will use information and examples to develop the topic of your explanatory essay.
3. Protecting the Data: Speak/Listen
 - In this lesson, you will identify support for its key points after listening to a text.
 - In this lesson, you will create an oral summary of a text.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will improve your explanatory rough draft to make sure it will be informative to a reader.
4. Protecting the Data: Fluency
 - In this lesson, you will identify reasons an author gives to support points in a text.
 - In this lesson, you will read actively and better understand texts.
 - In this lesson, you will combine sentences for style.
 - In this lesson, you will write a draft of the conclusion to your explanatory text.
5. Protecting the Data: Synthesize
 - In this lesson, you will identify evidence that supports key points in a text.
 - In this lesson, you will provide an explanation to an audience.
 - In this lesson, you will improve the rough draft of your explanatory essay.

15. Information in Social Media

1. Social Media: Genre
 - In this lesson, you will recall different ways to make sure you complete assignments on time.
 - In this lesson, you will compare two ideas and information from two informational texts.
 - In this lesson, you will improve sentences while keeping their meaning the same.
 - In this lesson, you will identify words with prefix patterns *dis-*, *mis-*, *in-*, *pre-*, *un-*, and *re-*.
 - In this lesson, you will write lowercase v and x in cursive.
2. Social Media: Comprehension
 - In this lesson, you will paraphrase two informational texts to compare and contrast the author's points of view.
 - In this lesson, you will analyze social media messages for their message, point of view, and impact.

- In this lesson, you will improve sentences to better keep the reader’s or listener’s interest.
 - In this lesson, you will write words with cursive lowercase letters fluently.
 - In this lesson, you will pronounce words with the prefix patterns *dis-*, *mis-*, *in-*, *pre-*, *un-*, and *re-*.
3. Social Media: Speak/Listen
 - In this lesson, you will compare and contrast the information in two texts by summarizing the main ideas and details.
 - In this lesson, you will read two informational texts about the same topic.
 - In this lesson, you will edit sentences to improve style.
 - In this lesson, you will choose a book to read.
 4. Social Media: Fluency
 - In this lesson, you will compare and contrast the overall structure of events in two informational texts.
 - In this lesson, you will evaluate the information you find in a text by asking questions and doing research.
 - In this lesson, you will compare and contrast the structure of texts.
 - In this lesson, you will spell words with the prefix patterns *dis-*, *mis-*, *in-*, *pre-*, *un-*, and *re-*.
 5. Social Media: Synthesize
 - In this lesson, you will compare and contrast the overall structure of ideas in two informational texts.
 - In this lesson, you will ask questions about the content of online messages.
 - In this lesson, you will choose a book to read.

16. Robot Helpers

1. Robot Helpers: Genre
 - In this lesson, you will tell why it is important to choose friends wisely.
 - In this lesson, you will identify facts and opinions in an informational text.
 - In this lesson, you will expand sentences to improve meaning, interest, and style.
 - In this lesson, you will revise your essay by using formatting to make it easier for a reader to understand.
2. Robot Helpers: Comprehension
 - In this lesson, you will use context clues to determine the meanings of words and phrases.
 - In this lesson, you will use technology to find details about the topic of a text.
 - In this lesson, you will modify sentences to improve meaning, interest, and style.
 - In this lesson, you will edit your essay.
3. Robot Helpers: Speak/Listen
 - In this lesson, you will use context clues to determine the meanings of science words and phrases.
 - In this lesson, you will create an entertaining video to explain a science topic in an informational text.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will implement feedback you have received on your explanatory essay.
4. Robot Helpers: Fluency
 - In this lesson, you will compare and contrast the structures of two informational texts.

- In this lesson, you will compare text structures so that you can use them to learn a new skill.
 - In this lesson, you will modify sentences to improve meaning, interest, and style.
 - In this lesson, you will add visual elements to your explanatory essay.
5. Robot Helpers: Write
 - In this lesson, you will use technology to publish a final draft of your explanatory essay.
 6. Tech Takes Unit Test

Semester B Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing an opinion text and generating a research report from topical investigation. The focus on reading and writing is supplemented with instruction in grammar, spelling, and handwriting—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester B Outline

1. Say it With Poetry

1. Say it With Poetry: Genre
 - In this lesson, you will describe how not being able to manage anger can make a conflict worse.
 - In this lesson, you will identify descriptive details in a poem.
 - In this lesson, you will use prefixes as clues to the meaning of words.
 - In this lesson, you will identify words with a connection to Greek or Roman mythology.
 - In this lesson, you will write uppercase A and O in cursive.
2. Say it With Poetry: Comprehension
 - In this lesson, you will apply what you know about theme to find theme in poetry.
 - In this lesson, you will examine a poem to connect it to an important American right.
 - In this lesson, you will use suffixes as clues to the meaning of words.
 - In this lesson, you will write uppercase C and E in cursive.
 - In this lesson, you will pronounce words with a connection to Greek or Roman mythology.
3. Say it With Poetry: Speak/Listen
 - In this lesson, you will use details to determine a theme of a story.

- In this lesson, you will use your understanding of theme to prepare a recording of a poem.
 - In this lesson, you will use affixes as clues to the meaning of words.
 - In this lesson, you will choose a book to read.
4. Say it With Poetry: Fluency
 - In this lesson, you will differentiate among types of poetry.
 - In this lesson, you will use details to determine a theme of a poem.
 - In this lesson, you will identify poetic forms and themes.
 - In this lesson, you will spell words with a connection to Greek or Roman mythology.
 - In this lesson, you will choose a book to read.
 5. Say it with Poetry: Synthesize
 - In this lesson, you will use details to determine a theme of a poem.
 - In this lesson, you will analyze how parts of a poem fit together to form a whole.
 - In this lesson, you will choose a book to read.

2. Funny and Inspiring

1. Funny and Inspiring: Genre
 - In this lesson, you will list ways families can support students in their learning.
 - In this lesson, you will identify a poem's speaker and their perspective.
 - In this lesson, you will identify roots in words.
 - In this lesson, you will identify words with the Latin roots: *port, tract, spec/spect,* and *miss/mit.*
 - In this lesson, you will write uppercase L and D in cursive.
2. Funny and Inspiring: Comprehension
 - In this lesson, you will compare the features of poems, dramas, and stories.
 - In this lesson, you will create a scene or short story based on a poem.
 - In this lesson, you will use vocabulary words with Greek roots.
 - In this lesson, you will write uppercase B and R in cursive.
 - In this lesson, you will pronounce words with the Latin roots *port, tract, spec/spect,* and *miss/mit.*
3. Funny and Inspiring: Speak/Listen
 - In this lesson, you will identify poetic devices.
 - In this lesson, you will create a literary review.
 - In this lesson, you will identify the meaning of vocabulary with Greek roots.
 - In this lesson, you will choose a book to read.
4. Funny and Inspiring: Fluency
 - In this lesson, you will analyze how the speakers in two poems connect to a topic.
 - In this lesson, you will read a poem aloud with meaning and expression.
 - In this lesson, you will review poetic devices and speakers in poetry.
 - In this lesson, you will spell words with the Latin roots *port, tract, spec/spect,* and *miss/mit.*
5. Funny and Inspiring: Synthesize
 - In this lesson, you will analyze the structure of a poem.
 - In this lesson, you will organize your ideas about two different texts.
 - In this lesson, you will choose a book to read.

3. Plays Can Tell a Message

1. Plays Can Tell a Message: Genre
 - In this lesson, you will discuss what you might have done differently to have better success in achieving a recent goal.

- In this lesson, you will explain the use of figurative language in a poem.
 - In this lesson, you will use Greek roots as clues to determine the meaning of a word.
 - In this lesson, you will identify words with Greek roots.
 - In this lesson, you will write uppercase T and F in cursive.
2. Plays Can Tell a Message: Comprehension
 - In this lesson, you will determine the meanings of similes, metaphors, and other figurative language in a poem.
 - In this lesson, you will use think-aloud strategies to understand a poem’s figurative language.
 - In this lesson, you will identify Latin roots to determine the meanings of words.
 - In this lesson, you will write uppercase S and G in cursive.
 - In this lesson, you will pronounce words with Greek roots.
 3. Plays Can Tell a Message: Speak/Listen
 - In this lesson, you will read aloud a prose passage with accuracy, expression, and at a suitable rate.
 - In this lesson, you will assess your oral reading skills after reading aloud a prose passage.
 - In this lesson, you will compare and contrast the varieties of English in poetry.
 - In this lesson, you will choose a book to read.
 4. Plays Can Tell a Message: Fluency
 - In this lesson, you will explain the meaning of adages and proverbs used in a play.
 - In this lesson, you will explain an adage or a proverb in a play.
 - In this lesson, you will identify figurative language in poetry and plays.
 - In this lesson, you will identify words with Greek roots.
 5. Plays Can Tell a Message: Synthesize
 - In this lesson, you will use details in a play to determine its theme.
 - In this lesson, you will explain how to give and receive feedback.
 - In this lesson, you will choose a book to read.

4. Unsung Heroes

1. Unsung Heroes: Genre
 - In this lesson, you will explain how you can care about the feelings of others.
 - In this lesson, you will identify the text as drama, poetry, or prose.
 - In this lesson, you will use Greek and Latin roots and context clues to understand unfamiliar words in a text.
 - In this lesson, you will identify words with the number prefixes *uni-*, *bi-*, *tri*, and *cent(i)-*.
 - In this lesson, you will write uppercase I and J in cursive.
2. Unsung Heroes: Comprehension
 - In this lesson, you will visualize a play and its elements.
 - In this lesson, you will use a concept web to record the facts and details you find about Native American culture.
 - In this lesson, you will use Greek and Latin roots as clues to determine the meaning of a word.
 - In this lesson, you will write uppercase M and N in cursive.
 - In this lesson, you will pronounce words with the number prefixes *uni-*, *bi-*, *tri*, *cent*, and *cent(i)*.
3. Unsung Heroes: Speak/Listen

- In this lesson, you will analyze elements of a drama.
- In this lesson, you will use correct verb tenses to talk about elements of a drama.
- In this lesson, you will compare and contrast the varieties of English in dramas.
- In this lesson, you will choose a book to read.

4. Unsung Heroes: Fluency

- In this lesson, you will explain how a series of scenes form the structure of a play.
- In this lesson, you will use expression to show how the feelings of characters change in a series of scenes.
- In this lesson, you will spell words with the number prefixes *uni-*, *bi-*, *tri-*, and *cent(i)-*.
- In this lesson, you will discuss a text in a group setting.

5. Unsung Heroes: Fluency Discussion

6. Unsung Heroes: Read

- In this lesson, you will choose a book to read.

7. Filling Your Heart Unit Test

5. Believe in Yourself

1. Believe in Yourself: Genre

- In this lesson, you will identify factors you cannot change that can keep you from reaching a goal.
- In this lesson, you will identify a narrator's or speaker's perspective in a literary text.
- In this lesson, you will explain the function of conjunctions.
- In this lesson, you will identify the features of an opinion text that help the writer convey their opinion to readers.

2. Believe in Yourself: Comprehension

- In this lesson, you will explain how an author uses words and phrases to show meaning.
- In this lesson, you will explain facts about languages other than English.
- In this lesson, you will explain the function of prepositions.
- In this lesson, you will identify how opinion writers introduce their topic in a clear, precise way.

3. Believe in Yourself: Speak/Listen

- In this lesson, you will differentiate between perspective and point of view in a story.
- In this lesson, you will discuss perspectives on an event in a story.
- In this lesson, you will choose a book to read.
- In this lesson, you will write an opinion statement for the introduction of your essay.

4. Believe in Yourself: Fluency

- In this lesson, you will identify an author's purpose and perspective.
- In this lesson, you will incorporate feedback while reading a story aloud.
- In this lesson, you will use conjunctions and prepositions in sentences.
- In this lesson, you will organize reasons for your opinion into paragraphs.

5. Believe in Yourself: Synthesize

- In this lesson, you will analyze perspectives in a story using examples and evidence.
- In this lesson, you will develop perspective on a topic using technology as a tool.
- In this lesson, you will write a draft of the introduction for your opinion text.

6. Dare to Dream

1. Dare to Dream: Genre
 - In this lesson, you will identify how bullying behavior affects people.
 - In this lesson, you will identify a poet's purpose and tone.
 - In this lesson, you will identify interjections.
 - In this lesson, you will evaluate your chosen reasons for your opinion essay.
2. Dare to Dream: Comprehension
 - In this lesson, you will analyze word choices and perspective in a poem.
 - In this lesson, you will make inferences about a poem.
 - In this lesson, you will explain the function of interjections.
 - In this lesson, you will support reasons with details as you begin to draft your body paragraphs.
3. Dare to Dream: Speak/Listen
 - In this lesson, you will analyze influences on perspective in literature.
 - In this lesson, you will create a story review.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use language to link your opinion and reasons within and across paragraphs of your opinion essay.
4. Dare to Dream: Fluency
 - In this lesson, you will analyze how the narrator's perspective affects how events are described in a story.
 - In this lesson, you will create a story scene from a different perspective.
 - In this lesson, you will explain the function of interjections in particular sentences.
 - In this lesson, you will draft a conclusion for your opinion essay.
5. Dare to Dream: Synthesize
 - In this lesson, you will analyze how the speaker's perspective affects how events are described in a poem.
 - In this lesson, you will analyze visuals in poems and stories.
 - In this lesson, you will write the rough draft of your opinion essay.

7. Don't Give Up!

1. Don't Give Up!: Genre
 - In this lesson, you will explain what happens when a conflict is not resolved.
 - In this lesson, you will identify similarities and differences in two passages from a story.
 - In this lesson, you will identify examples of correlative conjunctions in writing.
 - In this lesson, you will identify words that are contractions.
 - In this lesson, you will write uppercase H and K in cursive.
2. Don't Give Up!: Comprehension
 - In this lesson, you will compare and contrast details in stories from different genres.
 - In this lesson, you will compare and contrast the details to find the genres of the two stories.
 - In this lesson, you will identify the correct use of correlative conjunctions.
 - In this lesson, you will write uppercase P and Q in cursive.
 - In this lesson, you will pronounce words that are contractions.
3. Don't Give Up!: Speak/Listen
 - In this lesson, you will compare and contrast the ideas in two stories to find how they are the same and different.

- In this lesson, you will ask questions to build a discussion about how two stories are alike and different.
 - In this lesson, you will use correlative conjunctions correctly when writing.
 - In this lesson, you will choose a book to read.
4. Don't Give Up!: Fluency
- In this lesson, you will compare the text structures in two stories.
 - In this lesson, you will identify goals for reading.
 - In this lesson, you will compare and contrast genres of literary texts.
 - In this lesson, you will spell words that are contractions.

8. Follow Your Heart

1. Follow Your Heart: Genre
- In this lesson, you will analyze the consequences of lying.
 - In this lesson, you will identify the theme of a story.
 - In this lesson, you will use correlative conjunctions correctly when speaking.
 - In this lesson, you will revise your opinion essay to address task, purpose, and audience.
2. Follow Your Heart: Comprehension
- In this lesson, you will ask questions to identify ideas and the structure of a story.
 - In this lesson, you will ask questions to help you create an advertisement.
 - In this lesson, you will identify correlative conjunctions used when combining sentences.
 - In this lesson, you will edit your opinion essay.
3. Follow Your Heart: Speak/Listen
- In this lesson, you will compare and contrast two stories in the same genre.
 - In this lesson, you will compare two stories about the process of voting.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use feedback to improve your opinion essay work.
4. Follow Your Heart: Fluency
- In this lesson, you will compare and contrast pictures in two stories from the same genre.
 - In this lesson, you will compare how pictures and texts present ideas in a story.
 - In this lesson, you will compare and contrast the varieties of English in stories.
 - In this lesson, you will use your computer to type a final draft.
5. Follow Your Heart: Write
- In this lesson, you will use cursive writing to publish your opinion essay.
6. Being Your Best Unit Test

9. Starting a New Life

1. Starting a New Life: Genre
- In this lesson, you will describe some conflicts you have experienced.
 - In this lesson, you will identify individuals, ideas, and events in an informational text.
 - In this lesson, you will write sentences with correct subject–verb agreement.
 - In this lesson, you will identify words with a suffix pattern.
 - In this lesson, you will write uppercase V and U in cursive.
2. Starting a New Life: Comprehension
- In this lesson, you will explain how individuals, ideas, or events are connected in an informational text.

- In this lesson, you will identify some reasons for emigrating that connect immigrant groups.
 - In this lesson, you will write compound sentences with correct subject–verb agreement.
 - In this lesson, you will write uppercase W and X in cursive.
 - In this lesson, you will pronounce words with a suffix pattern.
3. Starting a New Life: Speak/Listen
 - In this lesson, you will explain how a writer introduces and develops details about individuals, ideas, and events.
 - In this lesson, you will determine how ideas connect based on questions from a citizenship test.
 - In this lesson, you will use pronoun–antecedent agreement.
 - In this lesson, you will choose a book to read.
 4. Starting a New Life: Fluency
 - In this lesson, you will identify the relationships and interactions between individuals in a text.
 - In this lesson, you will choose a verse to read aloud accurately.
 - In this lesson, you will determine the relationships between individuals in informational texts.
 - In this lesson, you will spell words with a suffix pattern.
 5. Starting a New Life: Synthesize
 - In this lesson, you will identify the relationships and interactions between events in a text.
 - In this lesson, you will create a timeline to show relationships among events.
 - In this lesson, you will choose a book to read.

10. Unearthing the Past

1. Unearthing the Past: Genre
 - In this lesson, you will identify the three conflict resolution behaviors.
 - In this lesson, you will identify the key ideas and concepts in an informational text.
 - In this lesson, you will use verb tenses to show various expressions of time when writing.
 - In this lesson, you will identify words with suffixes *-ence* or *-ance*.
 - In this lesson, you will write uppercase Y in cursive.
2. Unearthing the Past: Comprehension
 - In this lesson, you will use a graphic organizer to show how elements in an informational text are related.
 - In this lesson, you will make judgments about ideas in a text.
 - In this lesson, you will use verb tenses to show various expressions of time and sequences when writing.
 - In this lesson, you will write uppercase Z in cursive.
 - In this lesson, you will pronounce words with suffixes *-ance* or *-ence*.
3. Unearthing the Past: Speak/Listen
 - In this lesson, you will identify how text structures connect ideas and convey messages in informational text.
 - In this lesson, you will analyze how a speaker’s message is supported.
 - In this lesson, you will use verb tenses to show expressions of time and sequences when speaking.
 - In this lesson, you will choose a book to read.

4. Unearthing the Past: Fluency
 - In this lesson, you will explain relationships between key ideas in an informational text.
 - In this lesson you will summarize a text’s ideas.
 - In this lesson, you will determine text structures and relationships among ideas in informational texts.
 - In this lesson, you will spell words with suffixes *-ence* or *-ance*.
5. Unearthing the Past: Synthesize
 - In this lesson, you will explain relationships between concepts in an informational text.
 - In this lesson, you will synthesize to understand common ideas in themes in two texts.
 - In this lesson, you will choose a book to read.

11. Learning from Our Ancestors

1. Learning from Our Ancestors: Genre
 - In this lesson, you will identify what it means to take responsibility for your actions when it comes to schoolwork.
 - In this lesson, you will describe an event from an informational text in your own words.
 - In this lesson, you will use verb tenses to show various states when writing.
 - In this lesson, you will identify words with suffixes *-less* and *-ness*.
 - In this lesson, you will write numbers 0, 1, and 2 in cursive.
2. Learning from Our Ancestors: Comprehension
 - In this lesson, you will use a chart to collect information about primary and secondary sources.
 - In this lesson, you will evaluate a primary and secondary source to draw your own conclusion.
 - In this lesson, you will use verb tenses to express various conditions when writing.
 - In this lesson, you will write numbers 3, 4, and 5 in cursive.
 - In this lesson, you will pronounce words with suffixes *-less* and *-ness*.
3. Learning from Our Ancestors: Speak/Listen
 - In this lesson, you will compare and contrast information you learn about the same event from reading a primary source and a secondary source.
 - In this lesson, you will compare and contrast primary and secondary accounts.
 - In this lesson, you will use verb tenses to express various states and conditions when speaking.
 - In this lesson, you will choose a book to read.
4. Learning from Our Ancestors: Fluency
 - In this lesson, you will compare accounts of the same event.
 - In this lesson, you will compare accounts of the same event, interpret the information, and draw your own conclusion.
 - In this lesson, you will examine perspectives in multiple accounts of events.
 - In this lesson, you will spell words with suffixes *-less* and *-ness*.
5. Learning from Our Ancestors: Synthesize
 - In this lesson, you will identify the differences in the perspectives of the same event.
 - In this lesson, you will identify ways to understand different perspectives on the same event or issue.

- In this lesson, you will choose a book to read.

12. Immigrant Stories

1. Immigrant Stories: Genre

- In this lesson, you will apply a decision-making model to academic challenges.
- In this lesson, you will describe the topic and main ideas of an informational text.
- In this lesson, you will identify the appropriate shifts in verb tenses.
- In this lesson, you will identify words with the suffixes *-ion*, *-able*, and *-ible*.
- In this lesson, you will write numbers 6, 7, and 8 in cursive.

2. Immigrant Stories: Comprehension

- In this lesson, you will compare and contrast primary and secondary accounts of the same topic.
- In this lesson, you will compare and contrast primary and secondary accounts about a health topic.
- In this lesson, you will describe the appropriate shifts in verb tenses.
- In this lesson, you will write numbers 9 and 10 in cursive.
- In this lesson, you will pronounce words with the suffixes *-ion*, *-able*, and *-ible*.

3. Immigrant Stories: Speak/Listen

- In this lesson, you will ask questions about comparing perspectives to prepare for a discussion.
- In this lesson, you will show that you understand how to prepare for a discussion and listen well.
- In this lesson, you will identify ways to correct inappropriate shifts in verb tense.
- In this lesson, you will choose a book to read.

4. Immigrant Stories: Fluency

- In this lesson, you will evaluate sources of information to make sure that they are accurate and credible.
- In this lesson, you will evaluate the accuracy and credibility of information found in online sources.
- In this lesson, you will spell words with the suffixes *-ion*, *-able*, and *-ible*.
- In this lesson, you will discuss multiple accounts of a historical event.

5. Immigrant Stories: Fluency Discussion

6. Immigrant Stories: Read

- In this lesson, you will choose a book to read.

7. Coming to America Unit Test

13. Branches of Government

1. Branches of Government: Genre

- In this lesson, you will describe how to stop rumors.
- In this lesson, you will summarize key ideas in an informational text.
- In this lesson, you will use print reference materials to find the pronunciation of words.
- In this lesson, you will identify how writers of research reports use sources and their own knowledge to investigate a topic.

2. Branches of Government: Comprehension

- In this lesson, you will use context clues to understand words related to civics.
- In this lesson, you will use a chart to learn terms connected to governmental processes.
- In this lesson, you will use print reference materials to find the meanings of key words and phrases.

- In this lesson, you will do research to narrow your report topic.
3. Branches of Government: Speak/Listen
 - In this lesson, you will explain how visual or multimedia supports clarify information.
 - In this lesson, you will analyze the messages in political ads.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will examine how to categorize the information from multiple sources within your text.
 4. Branches of Government: Fluency
 - In this lesson, you will use multiple print sources to locate answers and solve problems.
 - In this lesson, you will record printed material to provide information for others.
 - In this lesson, you will use print reference materials to clarify the meanings of key words and phrases.
 - In this lesson, you will organize your ideas that support your purpose and audience.
 5. Branches of Government: Synthesize
 - In this lesson, you will write an effective research question by locating information from a variety of sources.
 - In this lesson, you will identify how to form significant questions for research investigations.
 - In this lesson, you will develop a thesis statement, add to your outline, and write an introduction for your research report.

14. Rights and Freedoms

1. Rights and Freedoms: Genre
 - In this lesson, you will list strategies to support those who are left out or bullied.
 - In this lesson, you will create a visual about a video selection.
 - In this lesson, you will use digital reference materials to find the pronunciation of words.
 - In this lesson, you will identify categories of information you can use to develop a topic of your research report.
2. Rights and Freedoms: Comprehension
 - In this lesson, you will use context to determine word meanings.
 - In this lesson, you will create a poster to teach others about a topic.
 - In this lesson, you will use digital reference materials to find the meanings of key words and phrases.
 - In this lesson, you will use words, phrases, and clauses to signal connections within and among ideas in your research report.
3. Rights and Freedoms: Speak/Listen
 - In this lesson, you will use text, visuals, and multimedia to draw conclusions.
 - In this lesson, you will use multimedia to enhance a presentation.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use precise language and domain-specific terms to accurately explain ideas in your research report.
4. Rights and Freedoms: Fluency
 - In this lesson, you will evaluate a text to gain a new understanding of its ideas.
 - In this lesson, you will analyze different viewpoints on the same issue or topic.
 - In this lesson, you will use print reference materials to clarify the precise meanings of key words and phrases.

- In this lesson, you will write the conclusion to your research report.
5. Rights and Freedoms: Synthesize
 - In this lesson, you will use active reading techniques to engage with a text.
 - In this lesson, you will learn to track and reflect on your reading.
 - In this lesson, you will write the rough draft of your research report, including a list of sources.

15. Get Ready to Vote

1. Get Ready to Vote: Genre
 - In this lesson, you will discuss the consequences of solutions.
 - In this lesson, you will summarize an informational text.
 - In this lesson, you will acquire general academic words and phrases from reading that signal contrast or addition.
 - In this lesson, you will identify words with plural spellings.
 - In this lesson, you will write the uppercase alphabet and your first and last name in cursive.
2. Get Ready to Vote: Comprehension
 - In this lesson, you will organize the information from two texts about the same topic in a chart.
 - In this lesson, you will use a graphic organizer to understand the information from two texts about a topic.
 - In this lesson, you will use general academic words and phrases that signal contrast.
 - In this lesson, you will use appropriate spacing and indents writing in cursive.
 - In this lesson, you will pronounce words with plural spellings.
3. Get Ready to Vote: Speak/Listen
 - In this lesson, you will compare and contrast two informational texts about the same topic.
 - In this lesson, you will summarize texts about the same topic.
 - In this lesson, you will use domain-specific words and words that signal contrast.
 - In this lesson, you will choose a book to read.
4. Get Ready to Vote: Fluency
 - In this lesson, you will collect relevant information about a topic that interests you from primary and secondary sources.
 - In this lesson, you will explain how to make a plan for keeping track of information from different sources.
 - In this lesson, you will integrate information from primary and secondary sources.
 - In this lesson, you will spell words with plural endings.
5. Get Ready to Vote: Synthesize
 - In this lesson, you will evaluate claims made in advertisements.
 - In this lesson, you will analyze media messages.
 - In this lesson, you will choose a book to read.

16. Justice for All

1. Justice for All: Genre
 - In this lesson, you will analyze how people of different groups can help one another and enjoy each other's company.
 - In this lesson, you will create a visual that shows two sources of information.
 - In this lesson, you will use academic and domain-specific words and phrases, including those that signal addition.

- In this lesson, you will revise your research report by adding formatting to make it more understandable.
2. Justice for All: Comprehension
 - In this lesson, you will clarify your understanding of an informational text by putting together information from different sources.
 - In this lesson, you will use information from different sources to learn about personal finances.
 - In this lesson, you will use academic and domain-specific words and phrases that signal logical connections.
 - In this lesson, you will choose images that help your readers understand your research.
 3. Justice for All: Speak/Listen
 - In this lesson, you will use information from various sources.
 - In this lesson, you will present your ideas on how to make your favorite meal healthier.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will select multimedia that helps your readers understand your research.
 4. Justice for All: Fluency
 - In this lesson, you will evaluate informational and social media sources.
 - In this lesson, you will find and use information from sources to make decisions.
 - In this lesson, you will use academic and domain-specific words and phrases, including those that signal contrast, addition, and other logical connections.
 - In this lesson, you will edit the final draft of your research report.
 5. Justice for All: Write
 - In this lesson, you will use technology to finalize and publish your research report.
 6. Civics Unit Test

Language Arts 5 Accelerated

Accelerated Language Arts 5

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing narrative and explanatory texts. The focus on reading and writing is supplemented with instruction in grammar, spelling, and handwriting—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester A Outline

1. Shared Interests

1. Shared Interests: Genre
 - In this lesson, you will explain how to deal with some upsetting emotions.
 - In this lesson, you will identify details about characters, setting, and sequence of events in a story.
 - In this lesson, you will identify parts of speech in sentences, including nouns, verbs, and adjectives.
 - In this lesson, you will identify words with the short a, e, i, o, and u vowel patterns.
 - In this lesson, you will practice writing print uppercase and lowercase letters, punctuation marks, and the numbers 0–10.
2. Shared Interests: Comprehension
 - In this lesson, you will predict the plot of a story.
 - In this lesson, you will read a story for the purpose of understanding other cultures.
 - In this lesson, you will identify parts of speech in sentences, including pronouns, adverbs, and prepositions.
 - In this lesson, you will fluently print sentences using correct spacing.
 - In this lesson, you will pronounce words with the short a, e, i, o, and u sounds.

3. Shared Interests: Speak/Listen
 - In this lesson, you will analyze relationships and conflicts between characters in a story.
 - In this lesson, you will express values and attitudes.
 - In this lesson, you will identify the differences between declarative, interrogative, imperative, and exclamatory sentences.
 - In this lesson, you will choose a book to read.
4. Shared Interests: Fluency
 - In this lesson, you will use a chart to identify causes and effects in a story.
 - In this lesson, you will identify the theme of a story.
 - In this lesson, you will explain the process of choosing a book to read.
 - In this lesson, you will spell words with the short a, e, i, o, and u vowel patterns.
 - In this lesson, you will choose a book to read.

2. Family Relationships

1. Family Relationships: Genre
 - In this lesson, you will recognize the factors that contribute to mood changes.
 - In this lesson, you will identify the plot events after listening to a story.
 - In this lesson, you will use context clues to find the meanings of words.
 - In this lesson, you will identify words with long a, e, i, o, and u vowel patterns.
 - In this lesson, you will read uppercase and lowercase cursive writing.
2. Family Relationships: Comprehension
 - In this lesson, you will compare and contrast story characters.
 - In this lesson, you will identify inferences about story characters.
 - In this lesson, you will use context clues to find the meanings of multiple-meaning words.
 - In this lesson, you will write the numbers 0–10 and punctuation marks in cursive.
 - In this lesson, you will pronounce words with long a, e, i, o, and u vowel patterns.
3. Family Relationships: Speak/Listen
 - In this lesson, you will summarize the information in story visuals.
 - In this lesson, you will use visuals that support text to better understand a story.
 - In this lesson, you will use context clues to find the meanings of academic vocabulary.
 - In this lesson, you will choose a book to read.
4. Family Relationships: Fluency
 - In this lesson, you will compare and contrast story events.
 - In this lesson, you will use expression to perform a retelling of a story.
 - In this lesson, you will compare events in a story.
 - In this lesson, you will spell words with long a, e, i, o, and u vowel patterns.
5. Family Relationships: Synthesize
 - In this lesson, you will compare and contrast story settings.
 - In this lesson, you will use reflection to discover meaning in a story.
 - In this lesson, you will choose and read a book.

3. Open Minds

1. Open Minds: Genre
 - In this lesson, you will describe ways that people can resolve a conflict.
 - In this lesson, you will identify key events in a story.
 - In this lesson, you will identify how verb tenses show time and sequence.
 - In this lesson, you will identify words with the long u vowel sound, the long oo vowel sound, and the short oo vowel sound.
 - In this lesson, you will practice writing lowercase i and l in cursive.
2. Open Minds: Comprehension
 - In this lesson, you will visualize story details and events in your mind to find the story's main idea.
 - In this lesson, you will learn how to learn from people from different backgrounds.
 - In this lesson, you will identify how verb tenses show states and conditions.
 - In this lesson, you will practice writing lowercase e and t in cursive.
 - In this lesson, you will pronounce words with the long u vowel sound, the long oo vowel sound, and the short oo vowel sound.
3. Open Minds: Speak/Listen
 - In this lesson, you will summarize a text you heard read aloud.
 - In this lesson, you will manage your study time well by summarizing the stories you read.
 - In this lesson, you will identify shifts in verb tense.
 - In this lesson, you will choose a book to read.
4. Open Minds: Fluency
 - In this lesson, you will summarize the key details in a story to identify the main idea.
 - In this lesson, you will reflect on your oral reading skills.
 - In this lesson, you will use your own words to summarize a story.
 - In this lesson, you will spell words with the long u vowel sound, the long oo vowel sound, and the short oo vowel sound.
5. Open Minds: Synthesize
 - In this lesson, you will differentiate how summaries and paraphrases are similar and different.
 - In this lesson, you will determine how to deal positively with setbacks.
 - In this lesson, you will choose and a book to read.

4. Good Leaders

1. Good Leaders: Genre
 - In this lesson, you will identify the steps needed to perform a routine task.
 - In this lesson, you will explain what a story says explicitly.
 - In this lesson, you will use perfect verb tenses.
 - In this lesson, you will identify words with the r-controlled vowel sounds *ar*, *air*, *ur*, and *or* spelled in various ways.
 - In this lesson, you will practice writing lowercase o and a in cursive.
2. Good Leaders: Comprehension
 - In this lesson, you will infer meaning to understand a message of a text.

- In this lesson, you will use reasoning to infer meaning.
 - In this lesson, you will use perfect verb tenses correctly when speaking.
 - In this lesson, you will practice writing lowercase c and d in cursive.
 - In this lesson, you will pronounce words with the *ar*, *air*, *ur*, and *or* vowel sounds.
3. Good Leaders: Speak/Listen
 - In this lesson, you will identify explicit and implicit text evidence in a story.
 - In this lesson, you will identify explicit and implicit ideas in a story.
 - In this lesson, you will write using perfect verb tenses correctly.
 - In this lesson, you will choose a book to read.
 4. Good Leaders: Fluency
 - In this lesson, you will quote accurately when you explain what a text says.
 - In this lesson, you will read unfamiliar words accurately by breaking them into patterns.
 - In this lesson, you will spell words with the *ar*, *air*, *ur*, and *or* vowel sounds.
 - In this lesson, you will participate in a group discussion about a text.
 5. Good Leaders: Fluency Discussion
 6. Good Leaders: Read
 - In this lesson, you will choose a book to read.
 7. Relationships Matter Unit Test

5. Characters Who Are Kind

1. Kind Characters: Genre
 - In this lesson, you will identify the ways to behave in a cooperative group.
 - In this lesson, you will identify the descriptive language in a story.
 - In this lesson, you will interpret similes in context.
 - In this lesson, you will determine how a writer begins a narrative.
2. Kind Characters: Comprehension
 - In this lesson, you will determine the meanings of words and phrases by rereading parts of a story.
 - In this lesson, you will determine language that is appropriate for different purposes and audiences.
 - In this lesson, you will interpret metaphors in context.
 - In this lesson, you will plan the characters, setting, and major events of your narrative.
3. Kind Characters: Speak/Listen
 - In this lesson, you will contrast literal and figurative language.
 - In this lesson, you will summarize ideas for a younger audience.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will write a draft of the beginning of your story.
4. Kind Characters: Fluency
 - In this lesson, you will identify similes and metaphors in a story.
 - In this lesson, you will read a scene with expression.
 - In this lesson, you will create similes and metaphors.
 - In this lesson, you will recognize how a writer uses pacing to develop parts of a narrative or characters.

5. Kind Characters: Synthesize
 - In this lesson, you will explain the meaning of figurative language in a story.
 - In this lesson, you will brainstorm a series of creative similes.
 - In this lesson, you will apply the elements of narrative writing you have learned as you write a draft of the events in the middle of your story.

6. Family Values

1. Family Values: Genre
 - In this lesson, you will list positive strategies for handling conflict.
 - In this lesson, you will listen to identify descriptive words in a story.
 - In this lesson, you will interpret hyperboles in context.
2. Family Values: Comprehension
 - In this lesson, you will describe ways a writer can adjust narrative pacing.
 - In this lesson, you will identify what is being compared in similes and metaphors.
 - In this lesson, you will use creativity to convey your ideas.
 - In this lesson, you will explain the meaning of adages and puns.
 - In this lesson, you will use concrete words and sensory details to clearly describe experiences and events.
3. Family Values: Speak/Listen
 - In this lesson, you will identify how figurative language sets the tone in a story.
 - In this lesson, you will use tone and language to communicate with others.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use dialogue and description to tell about story events and experiences or show how characters act and react.
4. Family Values: Fluency
 - In this lesson, you will examine an author's word choices.
 - In this lesson, you will explain how to give and receive feedback.
 - In this lesson, you will interpret personification.
 - In this lesson, you will write a conclusion to your narrative.
5. Family Values: Synthesize
 - In this lesson, you will explain how and why authors use figurative language in stories.
 - In this lesson, you will make judgments about an author's word choices.
 - In this lesson, you will finalize the rough draft of your narrative by making last-minute tweaks and typing the story.

7. Characters and Their Values

1. Characters and Values: Genre
 - In this lesson, you will explain ways to practice progressive relaxation.
 - In this lesson, you will create a visual that represents the story after listening to a story.
 - In this lesson, you will explain the meaning of common idioms.
 - In this lesson, you will define homographs.
 - In this lesson, you will write cursive lowercase letters while joining the same and different letters in a series.

2. Characters and Values: Comprehension
 - In this lesson, you will visualize a story to understand its meaning and tone.
 - In this lesson, you will analyze the best ways to interact with others.
 - In this lesson, you will explain the meaning of common adages.
 - In this lesson, you will write words legibly while joining letters in cursive.
 - In this lesson, you will spell homographs in and out of context, using references as needed.
3. Characters and Values: Speak/Listen
 - In this lesson, you will explain how visuals and multimedia affect the mood of a story.
 - In this lesson, you will use visuals and multimedia to retell the story "Three Aunties."
 - In this lesson, you will explain the meaning of common proverbs.
 - In this lesson, you will choose a book to read.
4. Characters and Values: Fluency
 - In this lesson, you will tell how a story's visuals add to its tone, meaning, and beauty.
 - In this lesson, you will read with expression and accuracy after listening to a story.
 - In this lesson, you will use homographs correctly in context.

8. Reactions Show Character

1. Reactions and Character: Genre
 - In this lesson, you will describe how someone feels when they are bullied.
 - In this lesson, you will summarize the plot of a story.
 - In this lesson, you will identify examples of synonyms, antonyms, and homographs in writing.
 - In this lesson, you will examine how other authors tell stories.
2. Reactions and Character: Comprehension
 - In this lesson, you will support a theme with evidence from the text, using a graphic organizer.
 - In this lesson, you will identify text details about another culture that supports the story's theme.
 - In this lesson, you will explain the function of phrases and clauses.
 - In this lesson, you will revise your narrative by adding transitions that help readers understand the sequence of events.
3. Reactions and Character: Speak/Listen
 - In this lesson, you will determine the theme of a story based on the story's details.
 - In this lesson, you will identify formal and informal ways of speaking.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use a checklist to revise your draft.
4. Reactions and Character: Fluency
 - In this lesson, you will compare stories with similar themes.
 - In this lesson, you will use expression to read a text aloud.

- In this lesson, you will use the relationships between words to better understand each of the words.
- In this lesson, you will proofread your narrative by making sure you have included descriptive details, a clear sequence of events, and correct spelling, grammar, and punctuation.

5. Reactions and Character: Write

- In this lesson, you will use technology to publish a final draft of your narrative.

6. Developing Character Unit Test

9. Stronger Together

1. Stronger Together: Genre

- In this lesson, you will explain how your present goals build on goals you have achieved in the past.
- In this lesson, you will identify key details in an informational text.
- In this lesson, you will identify when to underline titles of work.
- In this lesson, you will identify words with the vowel sound spelled *aw*, *au*, *al*, *all*, *a*, *o*, *augh*, and *ough*.
- In this lesson, you will fluently write lowercase n and m in cursive

2. Stronger Together: Comprehension

- In this lesson, you will use a graphic organizer to identify the main idea and details in a text.
- In this lesson, you will use inductive reasoning to conclude a main idea from details.
- In this lesson, you will identify when to italicize titles of work.
- In this lesson, you will fluently write lowercase u and w in cursive.
- In this lesson, you will pronounce words with the vowel sound spelled *aw*, *au*, *al*, *all*, *a*, *o*, *augh*, and *ough*.

3. Stronger Together: Speak/Listen

- In this lesson, you will paraphrase details to find main ideas of a text.
- In this lesson, you will recognize that people may interpret what they read and watch in different ways.
- In this lesson, you will identify when to underline or italicize titles of work.
- In this lesson, you will choose a book to read.

4. Stronger Together: Fluency

- In this lesson, you will use text features to gain meaning.
- In this lesson, you will use text features to expand your knowledge of civics.
- In this lesson, you will paraphrase the arguments presented in two videos.
- In this lesson, you will spell words with the vowel sound spelled *aw*, *au*, *al*, *all*, *a*, *o*, *augh*, and *ough*.

5. Stronger Together: Synthesize

- In this lesson, you will evaluate supporting details in a text.
- In this lesson, you will make judgments about the relevance and importance of details in a text.
- In this lesson, you will choose a book to read.

10. Influencers Making a Difference

1. Making a Difference: Genre
 - In this lesson, you will use I-statements to let others know that you have heard them.
 - In this lesson, you will summarize information after listening to an informational text.
 - In this lesson, you will identify when to use quotation marks to show titles of work.
 - In this lesson, you will identify words with a vowel team in a syllable.
 - In this lesson, you will fluently write lowercase b and f in cursive.
2. Making a Difference: Comprehension
 - In this lesson, you will summarize a text by asking and answering questions about the main idea and key details.
 - In this lesson, you will identify details that support a main idea.
 - In this lesson, you will identify when to use quotation marks to indicate titles of work.
 - In this lesson, you will write lowercase h and k in cursive.
 - In this lesson, you will pronounce words with a vowel team syllable.
3. Making a Difference: Speak/Listen
 - In this lesson, you will identify important details to summarize the main ideas in a text.
 - In this lesson, you will identify details in persuasive communication.
 - In this lesson, you will use underlining, italics, or quotation marks to show the titles of works.
 - In this lesson, you will choose a book to read.
4. Making a Difference: Fluency
 - In this lesson, you will summarize a speaker's main points and the support for their claims.
 - In this lesson, you will evaluate a text.
 - In this lesson, you will review summarizing key ideas in speaking and writing.
 - In this lesson, you will spell words with vowel teams in a syllable.
5. Making a Difference: Synthesize
 - In this lesson, you will analyze media and determine how it relates to culture.
 - In this lesson, you will create a piece of media for a text.
 - In this lesson, you will choose a book to read.

11. Showing the World

1. Showing the World: Genre
 - In this lesson, you will describe steps you can take to make a decision.
 - In this lesson, you will identify a purpose for reading an informational text.
 - In this lesson, you will identify when to use commas to separate items in a series.
 - In this lesson, you will identify words with a consonant + /e syllable.
 - In this lesson, you will fluently write lowercase g and q in cursive.
2. Showing the World: Comprehension
 - In this lesson, you will use logical inferences about an informational text.

- In this lesson, you will describe strategies for being open to new ideas and perspectives.
 - In this lesson, you will identify when to use semicolons to separate items in a series.
 - In this lesson, you will fluently write lowercase j and p in cursive.
 - In this lesson, you will pronounce words with a consonant + /e syllable.
3. Showing the World: Speak/Listen
 - In this lesson, you will determine whether details in an informational text are explicit or inferred.
 - In this lesson, you will explain what you learn about civic life to your Learning Coach.
 - In this lesson, you will use commas and semicolons to separate items in a series.
 - In this lesson, you will choose a book to read.
 4. Showing the World: Fluency
 - In this lesson, you will evaluate an inference you made by asking, “How accurate was my thinking?”
 - In this lesson, you will ask questions to reflect on your reading comprehension.
 - In this lesson, you will analyze inferences in informational text.
 - In this lesson, you will spell words with a consonant + /e syllable.
 5. Showing the World: Synthesize
 - In this lesson, you will quote accurately from a text.
 - In this lesson, you will think about how to use information accurately to solve a problem.
 - In this lesson, you will choose a book to read.

12. Call to Action

1. Call to Action: Genre
 - In this lesson, you will recognize when it is appropriate to give a compliment.
 - In this lesson, you will draw conclusions about an informational text after listening to a text.
 - In this lesson, you will use commas to separate introductions from the rest of the sentence.
 - In this lesson, you will identify words with an r-controlled vowel syllable.
 - In this lesson, you will fluently write lowercase r and s in cursive.
2. Call to Action: Comprehension
 - In this lesson, you will ask questions about a text.
 - In this lesson, you will brainstorm ideas about issues.
 - In this lesson, you will use a commas correctly in sentences.
 - In this lesson, you will fluently write lowercase y and z in cursive.
 - In this lesson, you will pronounce words with an r-controlled vowel syllable.
3. Call to Action: Speak/Listen
 - In this lesson, you will evaluate a media message.
 - In this lesson, you will explain why city council should take action.
 - In this lesson, you will explain the meaning of direct address.

- In this lesson, you will choose a book to read.
4. Call to Action: Fluency
 - In this lesson, you will evaluate the way that you think about inference.
 - In this lesson, you will use feedback to improve your reading accuracy.
 - In this lesson, you will spell words with r-controlled vowels.
 - In this lesson, you will discuss a current issue.
 5. Call to Action: Fluency Discussion
 6. Call to Action: Read
 - In this lesson, you will choose a book to read.
 7. Get Involved Unit Test
- 13. What Makes You Unique?**
1. What Makes You Unique?: Genre
 - In this lesson, you will identify others' feelings based on what they say and what their body language shows.
 - In this lesson, you will identify the key points an author makes in an informational text.
 - In this lesson, you will expand sentences to make their meaning clear.
 - In this lesson, you will use details to support the central idea of an explanatory text.
 2. What Makes You Unique?: Comprehension
 - In this lesson, you will provide supporting reasons in an informational text.
 - In this lesson, you will analyze media to find reasons that support a choice.
 - In this lesson, you will expand sentences to make them more interesting to your audience.
 - In this lesson, you will use a web to collect evidence for your statement.
 3. What Makes You Unique?: Speak/Listen
 - In this lesson, you will analyze points that support a claim.
 - In this lesson, you will use text to give reasons and examples to support a claim with an open mind.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use an outline to plan your essay.
 4. What Makes You Unique?: Fluency
 - In this lesson, you will identify supporting reasons in an informational text.
 - In this lesson, you will learn about some legal issues related to technology.
 - In this lesson, you will expand sentences for style.
 - In this lesson, you will select language that describes concepts related to your topic in a clear and precise way.
 5. What Makes You Unique?: Synthesize
 - In this lesson, you will identify evidence in a text.
 - In this lesson, you will evaluate arguments presented in a text.
 - In this lesson, you will use a computer to type a rough draft of your introduction and body paragraphs for your explanatory essay
- 14. Protecting Data**
1. Protecting the Data: Genre

- In this lesson, you will identify factors that make a situation unsafe.
 - In this lesson, you will identify key points and the reasons that support them in a text.
 - In this lesson, you will combine sentences for meaning.
 - In this lesson, you will strengthen your essay by using words, phrases, and clauses to connect your ideas and evidence.
2. Protecting the Data: Comprehension
 - In this lesson, you will use a graphic organizer to list support for the author’s ideas.
 - In this lesson, you will examine how to use the visuals in a text to better understand key ideas.
 - In this lesson, you will combine sentences to interest a reader or listener.
 - In this lesson, you will use information and examples to develop the topic of your explanatory essay.
 3. Protecting the Data: Speak/Listen
 - In this lesson, you will identify support for its key points after listening to a text.
 - In this lesson, you will create an oral summary of a text.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will improve your explanatory rough draft to make sure it will be informative to a reader.
 4. Protecting the Data: Fluency
 - In this lesson, you will identify reasons an author gives to support points in a text.
 - In this lesson, you will read actively and better understand texts.
 - In this lesson, you will combine sentences for style.
 - In this lesson, you will write a draft of the conclusion to your explanatory text.
 5. Protecting the Data: Synthesize
 - In this lesson, you will identify evidence that supports key points in a text.
 - In this lesson, you will provide an explanation to an audience.
 - In this lesson, you will improve the rough draft of your explanatory essay.
- 15. Information in Social Media**
1. Social Media: Genre
 - In this lesson, you will recall different ways to make sure you complete assignments on time.
 - In this lesson, you will compare two ideas and information from two informational texts.
 - In this lesson, you will improve sentences while keeping their meaning the same.
 - In this lesson, you will identify words with prefix patterns *dis-*, *mis-*, *in-*, *pre-*, *un-*, and *re-*.
 - In this lesson, you will write lowercase v and x in cursive.
 2. Social Media: Comprehension
 - In this lesson, you will paraphrase two informational texts to compare and contrast the author’s points of view.
 - In this lesson, you will analyze social media messages for their message, point of view, and impact.

- In this lesson, you will improve sentences to better keep the reader’s or listener’s interest.
 - In this lesson, you will write words with cursive lowercase letters fluently.
 - In this lesson, you will pronounce words with the prefix patterns *dis-*, *mis-*, *in-*, *pre-*, *un-*, and *re-*.
3. Social Media: Speak/Listen
 - In this lesson, you will compare and contrast the information in two texts by summarizing the main ideas and details.
 - In this lesson, you will read two informational texts about the same topic.
 - In this lesson, you will edit sentences to improve style.
 - In this lesson, you will choose a book to read.
 4. Social Media: Fluency
 - In this lesson, you will compare and contrast the overall structure of events in two informational texts.
 - In this lesson, you will evaluate the information you find in a text by asking questions and doing research.
 - In this lesson, you will compare and contrast the structure of texts.
 - In this lesson, you will spell words with the prefix patterns *dis-*, *mis-*, *in-*, *pre-*, *un-*, and *re-*.
 5. Social Media: Synthesize
 - In this lesson, you will compare and contrast the overall structure of ideas in two informational texts.
 - In this lesson, you will ask questions about the content of online messages.
 - In this lesson, you will choose a book to read.

16. Robot Helpers

1. Robot Helpers: Genre
 - In this lesson, you will tell why it is important to choose friends wisely.
 - In this lesson, you will identify facts and opinions in an informational text.
 - In this lesson, you will expand sentences to improve meaning, interest, and style.
 - In this lesson, you will revise your essay by using formatting to make it easier for a reader to understand.
2. Robot Helpers: Comprehension
 - In this lesson, you will use context clues to determine the meanings of words and phrases.
 - In this lesson, you will use technology to find details about the topic of a text.
 - In this lesson, you will modify sentences to improve meaning, interest, and style.
 - In this lesson, you will edit your essay.
3. Robot Helpers: Speak/Listen
 - In this lesson, you will use context clues to determine the meanings of science words and phrases.
 - In this lesson, you will create an entertaining video to explain a science topic in an informational text.
 - In this lesson, you will choose a book to read.

- In this lesson, you will implement feedback you have received on your explanatory essay.
4. Robot Helpers: Fluency
 - In this lesson, you will compare and contrast the structures of two informational texts.
 - In this lesson, you will compare text structures so that you can use them to learn a new skill.
 - In this lesson, you will modify sentences to improve meaning, interest, and style.
 - In this lesson, you will add visual elements to your explanatory essay.
 5. Robot Helpers: Write
 - In this lesson, you will use technology to publish a final draft of your explanatory essay.
 6. Tech Takes Unit Test

Semester B Summary:

In this course, the student will learn, practice, and apply the skills and strategies intrinsic to becoming a stronger, more fluent reader and writer. The course presents reading, writing, and language instruction in close alignment with the Common Core State Standards (CCSS). In daily core reading instruction, the student will have the opportunity to read texts in a variety of literary and nonfiction genres. Instruction is presented in two modes: Peer Model, in which the student will view a video of a peer learning how to use and apply the target skill, and 21st Century, in which the student will gain proficiency in the skills, knowledge, and expertise they must master to succeed in work and life. Throughout the core reading block, engaging and thought-provoking activities allow the student to master a variety of related disciplines, including fluency, vocabulary, and speaking and listening. The course also provides the student with a thorough understanding of the writing process, from planning to drafting to revision, editing, and publishing, and includes instruction in developing an opinion text and generating a research report from topical investigation. The focus on reading and writing is supplemented with instruction in grammar, spelling, and handwriting—skill areas vital to the student’s overall development as a reader, writer, and communicator.

Semester B Outline

1. Say it With Poetry

1. Say it With Poetry: Genre
 - In this lesson, you will describe how not being able to manage anger can make a conflict worse.
 - In this lesson, you will identify descriptive details in a poem.
 - In this lesson, you will use prefixes as clues to the meaning of words.
 - In this lesson, you will identify words with a connection to Greek or Roman mythology.

- In this lesson, you will write uppercase A and O in cursive.
2. Say it With Poetry: Comprehension
 - In this lesson, you will apply what you know about theme to find theme in poetry.
 - In this lesson, you will examine a poem to connect it to an important American right.
 - In this lesson, you will use suffixes as clues to the meaning of words.
 - In this lesson, you will write uppercase C and E in cursive.
 - In this lesson, you will pronounce words with a connection to Greek or Roman mythology.
 3. Say it With Poetry: Speak/Listen
 - In this lesson, you will use details to determine a theme of a story.
 - In this lesson, you will use your understanding of theme to prepare a recording of a poem.
 - In this lesson, you will use affixes as clues to the meaning of words.
 - In this lesson, you will choose a book to read.
 4. Say it With Poetry: Fluency
 - In this lesson, you will differentiate among types of poetry.
 - In this lesson, you will use details to determine a theme of a poem.
 - In this lesson, you will identify poetic forms and themes.
 - In this lesson, you will spell words with a connection to Greek or Roman mythology.
 - In this lesson, you will choose a book to read.
 5. Say it With Poetry: Synthesize
 - In this lesson, you will use details to determine a theme of a poem.
 - In this lesson, you will analyze how parts of a poem fit together to form a whole.
 - In this lesson, you will choose a book to read.

2. Funny and Inspiring

1. Funny and Inspiring: Genre
 - In this lesson, you will list ways families can support students in their learning.
 - In this lesson, you will identify a poem's speaker and their perspective.
 - In this lesson, you will identify roots in words.
 - In this lesson, you will identify words with the Latin roots: *port*, *tract*, *spec/spect*, and *miss/mit*.
 - In this lesson, you will write uppercase L and D in cursive.
2. Funny and Inspiring: Comprehension
 - In this lesson, you will compare the features of poems, dramas, and stories.
 - In this lesson, you will create a scene or short story based on a poem.
 - In this lesson, you will use vocabulary words with Greek roots.
 - In this lesson, you will write uppercase B and R in cursive.
 - In this lesson, you will pronounce words with the Latin roots *port*, *tract*, *spec/spect*, and *miss/mit*.
3. Funny and Inspiring: Speak/Listen
 - In this lesson, you will identify poetic devices.
 - In this lesson, you will create a literary review.

- In this lesson, you will identify the meaning of vocabulary with Greek roots.
- In this lesson, you will choose a book to read.

4. Funny and Inspiring: Fluency

- In this lesson, you will analyze how the speakers in two poems connect to a topic.
- In this lesson, you will read a poem aloud with meaning and expression.
- In this lesson, you will review poetic devices and speakers in poetry.
- In this lesson, you will spell words with the Latin roots *port*, *tract*, *spec/spect*, and *miss/mit*.

5. Funny and Inspiring: Synthesize

- In this lesson, you will analyze the structure of a poem.
- In this lesson, you will organize your ideas about two different texts.
- In this lesson, you will choose a book to read.

3. Plays Can Tell a Message

1. Plays Can Tell a Message: Genre

- In this lesson, you will discuss what you might have done differently to have better success in achieving a recent goal.
- In this lesson, you will explain the use of figurative language in a poem.
- In this lesson, you will use Greek roots as clues to determine the meaning of a word.
- In this lesson, you will identify words with Greek roots.
- In this lesson, you will write uppercase T and F in cursive.

2. Plays Can Tell a Message: Comprehension

- In this lesson, you will determine the meanings of similes, metaphors, and other figurative language in a poem.
- In this lesson, you will use think-aloud strategies to understand a poem's figurative language.
- In this lesson, you will identify Latin roots to determine the meanings of words.
- In this lesson, you will write uppercase S and G in cursive.
- In this lesson, you will pronounce words with Greek roots.

3. Plays Can Tell a Message: Speak/Listen

- In this lesson, you will read aloud a prose passage with accuracy, expression, and at a suitable rate.
- In this lesson, you will assess your oral reading skills after reading aloud a prose passage.
- In this lesson, you will compare and contrast the varieties of English in poetry.
- In this lesson, you will choose a book to read.

4. Plays Can Tell a Message: Fluency

- In this lesson, you will explain the meaning of adages and proverbs used in a play.
- In this lesson, you will explain an adage or a proverb in a play.
- In this lesson, you will identify figurative language in poetry and plays.
- In this lesson, you will identify words with Greek roots.

5. Plays Can Tell a Message: Synthesize

- In this lesson, you will use details in a play to determine its theme.
- In this lesson, you will explain how to give and receive feedback.
- In this lesson, you will choose a book to read.

4. Unsung Heroes

1. Unsung Heroes: Genre

- In this lesson, you will explain how you can care about the feelings of others.
- In this lesson, you will identify the text as drama, poetry, or prose.
- In this lesson, you will use Greek and Latin roots and context clues to understand unfamiliar words in a text.
- In this lesson, you will identify words with the number prefixes *uni-*, *bi-*, *tri-*, and *cent(i)-*.
- In this lesson, you will write uppercase I and J in cursive.

2. Unsung Heroes: Comprehension

- In this lesson, you will visualize a play and its elements.
- In this lesson, you will use a concept web to record the facts and details you find about Native American culture.
- In this lesson, you will use Greek and Latin roots as clues to determine the meaning of a word.
- In this lesson, you will write uppercase M and N in cursive.
- In this lesson, you will pronounce words with the number prefixes *uni-*, *bi-*, *tri-*, *cent*, and *cent(i)*.

3. Unsung Heroes: Speak/Listen

- In this lesson, you will analyze elements of a drama.
- In this lesson, you will use correct verb tenses to talk about elements of a drama.
- In this lesson, you will compare and contrast the varieties of English in dramas.
- In this lesson, you will choose a book to read.

4. Unsung Heroes: Fluency

- In this lesson, you will explain how a series of scenes form the structure of a play.
- In this lesson, you will use expression to show how the feelings of characters change in a series of scenes.
- In this lesson, you will spell words with the number prefixes *uni-*, *bi-*, *tri-*, and *cent(i)-*.
- In this lesson, you will discuss a text in a group setting.

5. Unsung Heroes: Fluency Discussion

6. Unsung Heroes: Read

- In this lesson, you will choose a book to read.

7. Filling Your Heart Unit Test

5. Believe in Yourself

1. Believe in Yourself: Genre

- In this lesson, you will identify factors you cannot change that can keep you from reaching a goal.

- In this lesson, you will identify a narrator’s or speaker’s perspective in a literary text.
 - In this lesson, you will explain the function of conjunctions.
 - In this lesson, you will identify the features of an opinion text that help the writer convey their opinion to readers.
2. Believe in Yourself: Comprehension
 - In this lesson, you will explain how an author uses words and phrases to show meaning.
 - In this lesson, you will explain facts about languages other than English.
 - In this lesson, you will explain the function of prepositions.
 - In this lesson, you will identify how opinion writers introduce their topic in a clear, precise way.
 3. Believe in Yourself: Speak/Listen
 - In this lesson, you will differentiate between perspective and point of view in a story.
 - In this lesson, you will discuss perspectives on an event in a story.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will write an opinion statement for the introduction of your essay.
 4. Believe in Yourself: Fluency
 - In this lesson, you will identify an author’s purpose and perspective.
 - In this lesson, you will incorporate feedback while reading a story aloud.
 - In this lesson, you will use conjunctions and prepositions in sentences.
 - In this lesson, you will organize reasons for your opinion into paragraphs.
 5. Believe in Yourself: Synthesize
 - In this lesson, you will analyze perspectives in a story using examples and evidence.
 - In this lesson, you will develop perspective on a topic using technology as a tool.
 - In this lesson, you will write a draft of the introduction for your opinion text.

6. Dare to Dream

1. Dare to Dream: Genre
 - In this lesson, you will identify how bullying behavior affects people.
 - In this lesson, you will identify a poet’s purpose and tone.
 - In this lesson, you will identify interjections.
 - In this lesson, you will evaluate your chosen reasons for your opinion essay.
2. Dare to Dream: Comprehension
 - In this lesson, you will analyze word choices and perspective in a poem.
 - In this lesson, you will make inferences about a poem.
 - In this lesson, you will explain the function of interjections.
 - In this lesson, you will support reasons with details as you begin to draft your body paragraphs.
3. Dare to Dream: Speak/Listen

- In this lesson, you will analyze influences on perspective in literature.
- In this lesson, you will create a story review.
- In this lesson, you will choose a book to read.
- In this lesson, you will use language to link your opinion and reasons within and across paragraphs of your opinion essay.

4. Dare to Dream: Fluency

- In this lesson, you will analyze how the narrator's perspective affects how events are described in a story.
- In this lesson, you will create a story scene from a different perspective.
- In this lesson, you will explain the function of interjections in particular sentences.
- In this lesson, you will draft a conclusion for your opinion essay.

5. Dare to Dream: Synthesize

- In this lesson, you will analyze how the speaker's perspective affects how events are described in a poem.
- In this lesson, you will analyze visuals in poems and stories.
- In this lesson, you will write the rough draft of your opinion essay.

7. Don't Give Up!

1. Don't Give Up!: Genre

- In this lesson, you will explain what happens when a conflict is not resolved.
- In this lesson, you will identify similarities and differences in two passages from a story.
- In this lesson, you will identify examples of correlative conjunctions in writing.
- In this lesson, you will identify words that are contractions.
- In this lesson, you will write uppercase H and K in cursive.

2. Don't Give Up!: Comprehension

- In this lesson, you will compare and contrast details in stories from different genres.
- In this lesson, you will compare and contrast the details to find the genres of the two stories.
- In this lesson, you will identify the correct use of correlative conjunctions.
- In this lesson, you will write uppercase P and Q in cursive.
- In this lesson, you will pronounce words that are contractions.

3. Don't Give Up!: Speak/Listen

- In this lesson, you will compare and contrast the ideas in two stories to find how they are the same and different.
- In this lesson, you will ask questions to build a discussion about how two stories are alike and different.
- In this lesson, you will use correlative conjunctions correctly when writing.
- In this lesson, you will choose a book to read.

4. Don't Give Up!: Fluency

- In this lesson, you will compare the text structures in two stories.
- In this lesson, you will identify goals for reading.

- In this lesson, you will compare and contrast genres of literary texts.
- In this lesson, you will spell words that are contractions.

8. Follow Your Heart

1. Follow Your Heart: Genre

- In this lesson, you will analyze the consequences of lying.
- In this lesson, you will identify the theme of a story.
- In this lesson, you will use correlative conjunctions correctly when speaking.
- In this lesson, you will revise your opinion essay to address task, purpose, and audience.

2. Follow Your Heart: Comprehension

- In this lesson, you will ask questions to identify ideas and the structure of a story.
- In this lesson, you will ask questions to help you create an advertisement.
- In this lesson, you will identify correlative conjunctions used when combining sentences.
- In this lesson, you will edit your opinion essay.

3. Follow Your Heart: Speak/Listen

- In this lesson, you will compare and contrast two stories in the same genre.
- In this lesson, you will compare two stories about the process of voting.
- In this lesson, you will choose a book to read.
- In this lesson, you will use feedback to improve your opinion essay work.

4. Follow Your Heart: Fluency

- In this lesson, you will compare and contrast pictures in two stories from the same genre.
- In this lesson, you will compare how pictures and texts present ideas in a story.
- In this lesson, you will compare and contrast the varieties of English in stories.
- In this lesson, you will use your computer to type a final draft.

5. Follow Your Heart: Write

- In this lesson, you will use cursive writing to publish your opinion essay.

6. Being Your Best Unit Test

9. Starting a New Life

1. Starting a New Life: Genre

- In this lesson, you will describe some conflicts you have experienced.
- In this lesson, you will identify individuals, ideas, and events in an informational text.
- In this lesson, you will write sentences with correct subject–verb agreement.
- In this lesson, you will identify words with a suffix pattern.
- In this lesson, you will write uppercase V and U in cursive.

2. Starting a New Life: Comprehension

- In this lesson, you will explain how individuals, ideas, or events are connected in an informational text.
- In this lesson, you will identify some reasons for emigrating that connect immigrant groups.

- In this lesson, you will write compound sentences with correct subject–verb agreement.
 - In this lesson, you will write uppercase W and X in cursive.
 - In this lesson, you will pronounce words with a suffix pattern.
3. Starting a New Life: Speak/Listen
 - In this lesson, you will explain how a writer introduces and develops details about individuals, ideas, and events.
 - In this lesson, you will determine how ideas connect based on questions from a citizenship test.
 - In this lesson, you will use pronoun–antecedent agreement.
 - In this lesson, you will choose a book to read.
 4. Starting a New Life: Fluency
 - In this lesson, you will identify the relationships and interactions between individuals in a text.
 - In this lesson, you will choose a verse to read aloud accurately.
 - In this lesson, you will determine the relationships between individuals in informational texts.
 - In this lesson, you will spell words with a suffix pattern.
 5. Starting a New Life: Synthesize
 - In this lesson, you will identify the relationships and interactions between events in a text.
 - In this lesson, you will create a timeline to show relationships among events.
 - In this lesson, you will choose a book to read.

10. Unearthing the Past

1. Unearthing the Past: Genre
 - In this lesson, you will identify the three conflict resolution behaviors.
 - In this lesson, you will identify the key ideas and concepts in an informational text.
 - In this lesson, you will use verb tenses to show various expressions of time when writing.
 - In this lesson, you will identify words with suffixes *-ence* or *-ance*.
 - In this lesson, you will write uppercase Y in cursive.
2. Unearthing the Past: Comprehension
 - In this lesson, you will use a graphic organizer to show how elements in an informational text are related.
 - In this lesson, you will make judgments about ideas in a text.
 - In this lesson, you will use verb tenses to show various expressions of time and sequences when writing.
 - In this lesson, you will write uppercase Z in cursive.
 - In this lesson, you will pronounce words with suffixes *-ance* or *-ence*.
3. Unearthing the Past: Speak/Listen
 - In this lesson, you will identify how text structures connect ideas and convey messages in informational text.

- In this lesson, you will analyze how a speaker’s message is supported.
 - In this lesson, you will use verb tenses to show expressions of time and sequences when speaking.
 - In this lesson, you will choose a book to read.
4. Unearthing the Past: Fluency
 - In this lesson, you will explain relationships between key ideas in an informational text.
 - In this lesson you will summarize a text’s ideas.
 - In this lesson, you will determine text structures and relationships among ideas in informational texts.
 - In this lesson, you will spell words with suffixes *-ence* or *-ance*.
 5. Unearthing the Past: Synthesize
 - In this lesson, you will explain relationships between concepts in an informational text.
 - In this lesson, you will synthesize to understand common ideas in themes in two texts.
 - In this lesson, you will choose a book to read.

11. Learning from Our Ancestors

1. Learning from Our Ancestors: Genre
 - In this lesson, you will identify what it means to take responsibility for your actions when it comes to schoolwork.
 - In this lesson, you will describe an event from an informational text in your own words.
 - In this lesson, you will use verb tenses to show various states when writing.
 - In this lesson, you will identify words with suffixes *-less* and *-ness*.
 - In this lesson, you will write numbers 0, 1, and 2 in cursive.
2. Learning from Our Ancestors: Comprehension
 - In this lesson, you will use a chart to collect information about primary and secondary sources.
 - In this lesson, you will evaluate a primary and secondary source to draw your own conclusion.
 - In this lesson, you will use verb tenses to express various conditions when writing.
 - In this lesson, you will write numbers 3, 4, and 5 in cursive.
 - In this lesson, you will pronounce words with suffixes *-less* and *-ness*.
3. Learning from Our Ancestors: Speak/Listen
 - In this lesson, you will compare and contrast information you learn about the same event from reading a primary source and a secondary source.
 - In this lesson, you will compare and contrast primary and secondary accounts.
 - In this lesson, you will use verb tenses to express various states and conditions when speaking.
 - In this lesson, you will choose a book to read.
4. Learning from Our Ancestors: Fluency

- In this lesson, you will compare accounts of the same event.
 - In this lesson, you will compare accounts of the same event, interpret the information, and draw your own conclusion.
 - In this lesson, you will examine perspectives in multiple accounts of events.
 - In this lesson, you will spell words with suffixes *-less* and *-ness*.
5. Learning from Our Ancestors: Synthesize
- In this lesson, you will identify the differences in the perspectives of the same event.
 - In this lesson, you will identify ways to understand different perspectives on the same event or issue.
 - In this lesson, you will choose a book to read.

12. Immigrant Stories

1. Immigrant Stories: Genre
- In this lesson, you will apply a decision-making model to academic challenges.
 - In this lesson, you will describe the topic and main ideas of an informational text.
 - In this lesson, you will identify the appropriate shifts in verb tenses.
 - In this lesson, you will identify words with the suffixes *-ion*, *-able*, and *-ible*.
 - In this lesson, you will write numbers 6, 7, and 8 in cursive.
2. Immigrant Stories: Comprehension
- In this lesson, you will compare and contrast primary and secondary accounts of the same topic.
 - In this lesson, you will compare and contrast primary and secondary accounts about a health topic.
 - In this lesson, you will describe the appropriate shifts in verb tenses.
 - In this lesson, you will write numbers 9 and 10 in cursive.
 - In this lesson, you will pronounce words with the suffixes *-ion*, *-able*, and *-ible*.
3. Immigrant Stories: Speak/Listen
- In this lesson, you will ask questions about comparing perspectives to prepare for a discussion.
 - In this lesson, you will show that you understand how to prepare for a discussion and listen well.
 - In this lesson, you will identify ways to correct inappropriate shifts in verb tense.
 - In this lesson, you will choose a book to read.
4. Immigrant Stories: Fluency
- In this lesson, you will evaluate sources of information to make sure that they are accurate and credible.
 - In this lesson, you will evaluate the accuracy and credibility of information found in online sources.
 - In this lesson, you will spell words with the suffixes *-ion*, *-able*, and *-ible*.
 - In this lesson, you will discuss multiple accounts of a historical event.
5. Immigrant Stories: Fluency Discussion
6. Immigrant Stories: Read

- In this lesson, you will choose a book to read.

7. Coming to America Unit Test

13. **Branches of Government**

1. Branches of Government: Genre

- In this lesson, you will describe how to stop rumors.
- In this lesson, you will summarize key ideas in an informational text.
- In this lesson, you will use print reference materials to find the pronunciation of words.
- In this lesson, you will identify how writers of research reports use sources and their own knowledge to investigate a topic.

2. Branches of Government: Comprehension

- In this lesson, you will use context clues to understand words related to civics.
- In this lesson, you will use a chart to learn terms connected to governmental processes.
- In this lesson, you will use print reference materials to find the meanings of key words and phrases.
- In this lesson, you will do research to narrow your report topic.

3. Branches of Government: Speak/Listen

- In this lesson, you will explain how visual or multimedia supports clarify information.
- In this lesson, you will analyze the messages in political ads.
- In this lesson, you will choose a book to read.
- In this lesson, you will examine how to categorize the information from multiple sources within your text.

4. Branches of Government: Fluency

- In this lesson, you will use multiple print sources to locate answers and solve problems.
- In this lesson, you will record printed material to provide information for others.
- In this lesson, you will use print reference materials to clarify the meanings of key words and phrases.
- In this lesson, you will organize your ideas that support your purpose and audience.

5. Branches of Government: Synthesize

- In this lesson, you will write an effective research question by locating information from a variety of sources.
- In this lesson, you will identify how to form significant questions for research investigations.
- In this lesson, you will develop a thesis statement, add to your outline, and write an introduction for your research report.

14. **Rights and Freedoms**

1. Rights and Freedoms: Genre

- In this lesson, you will list strategies to support those who are left out or bullied.
- In this lesson, you will create a visual about a video selection.

- In this lesson, you will use digital reference materials to find the pronunciation of words.
 - In this lesson, you will identify categories of information you can use to develop a topic of your research report.
2. Rights and Freedoms: Comprehension
 - In this lesson, you will use context to determine word meanings.
 - In this lesson, you will create a poster to teach others about a topic.
 - In this lesson, you will use digital reference materials to find the meanings of key words and phrases.
 - In this lesson, you will use words, phrases, and clauses to signal connections within and among ideas in your research report.
 3. Rights and Freedoms: Speak/Listen
 - In this lesson, you will use text, visuals, and multimedia to draw conclusions.
 - In this lesson, you will use multimedia to enhance a presentation.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will use precise language and domain-specific terms to accurately explain ideas in your research report.
 4. Rights and Freedoms: Fluency
 - In this lesson, you will evaluate a text to gain a new understanding of its ideas.
 - In this lesson, you will analyze different viewpoints on the same issue or topic.
 - In this lesson, you will use print reference materials to clarify the precise meanings of key words and phrases.
 - In this lesson, you will write the conclusion to your research report.
 5. Rights and Freedoms: Synthesize
 - In this lesson, you will use active reading techniques to engage with a text.
 - In this lesson, you will learn to track and reflect on your reading.
 - In this lesson, you will write the rough draft of your research report, including a list of sources.

15. Get Ready to Vote

1. Get Ready to Vote: Genre
 - In this lesson, you will discuss the consequences of solutions.
 - In this lesson, you will summarize an informational text.
 - In this lesson, you will acquire general academic words and phrases from reading that signal contrast or addition.
 - In this lesson, you will identify words with plural spellings.
 - In this lesson, you will write the uppercase alphabet and your first and last name in cursive.
2. Get Ready to Vote: Comprehension
 - In this lesson, you will organize the information from two texts about the same topic in a chart.
 - In this lesson, you will use a graphic organizer to understand the information from two texts about a topic.

- In this lesson, you will use general academic words and phrases that signal contrast.
 - In this lesson, you will use appropriate spacing and indents writing in cursive.
 - In this lesson, you will pronounce words with plural spellings.
3. Get Ready to Vote: Speak/Listen
 - In this lesson, you will compare and contrast two informational texts about the same topic.
 - In this lesson, you will summarize texts about the same topic.
 - In this lesson, you will use domain-specific words and words that signal contrast.
 - In this lesson, you will choose a book to read.
 4. Get Ready to Vote: Fluency
 - In this lesson, you will collect relevant information about a topic that interests you from primary and secondary sources.
 - In this lesson, you will explain how to make a plan for keeping track of information from different sources.
 - In this lesson, you will integrate information from primary and secondary sources.
 - In this lesson, you will spell words with plural endings.
 5. Get Ready to Vote: Synthesize
 - In this lesson, you will evaluate claims made in advertisements.
 - In this lesson, you will analyze media messages.
 - In this lesson, you will choose a book to read.

16. Justice for All

1. Justice for All: Genre
 - In this lesson, you will analyze how people of different groups can help one another and enjoy each other's company.
 - In this lesson, you will create a visual that shows two sources of information.
 - In this lesson, you will use academic and domain-specific words and phrases, including those that signal addition.
 - In this lesson, you will revise your research report by adding formatting to make it more understandable.
2. Justice for All: Comprehension
 - In this lesson, you will clarify your understanding of an informational text by putting together information from different sources.
 - In this lesson, you will use information from different sources to learn about personal finances.
 - In this lesson, you will use academic and domain-specific words and phrases that signal logical connections.
 - In this lesson, you will choose images that help your readers understand your research.
3. Justice for All: Speak/Listen
 - In this lesson, you will use information from various sources.

- In this lesson, you will present your ideas on how to make your favorite meal healthier.
 - In this lesson, you will choose a book to read.
 - In this lesson, you will select multimedia that helps your readers understand your research.
4. Justice for All: Fluency
- In this lesson, you will evaluate informational and social media sources.
 - In this lesson, you will find and use information from sources to make decisions.
 - In this lesson, you will use academic and domain-specific words and phrases, including those that signal contrast, addition, and other logical connections.
 - In this lesson, you will edit the final draft of your research report.
5. Justice for All: Write
- In this lesson, you will use technology to finalize and publish your research report.
6. Civics Unit Test

Language Arts 6

Language Arts 6 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In this course, students will sharpen and strengthen their skills in reading, writing, listening, and speaking. The student is exposed to a wide variety of writing styles to create a sense of curiosity and excitement.

During this course, the student will learn to make connections between readings, podcasts, radio clips, videos, and the world. The student will also expand an academic vocabulary and build confidence through independent reading, peer model videos, and practice opportunities. The student will write expository and creative compositions and employ test-taking strategies that are effective for different types of learners.

Semester A Outline

1. Literary Analysis

1. Literary Context Clues

- In this section, you will explain how clues in nearby words and phrases (context clues) help you figure out the meaning of an unfamiliar word or phrase.

2. Poetry

- In this section, you will discuss rhythm in poetry. You will also determine the actual or figurative meanings of words and phrases in poetry and the feelings or ideas that they suggest (connotations).

3. Literary Analysis

- In this section, you will identify poetic elements in odes, ballads, epic poetry, and science fiction.

In this section, you will identify differences among odes, ballads, epic poetry, and science fiction.

- In this section, you will evaluate literary devices, such as similes and metaphors, and find textual evidence as you analyze and interpret literary texts.

4. Figures of Speech

- In this section, you will use clues in nearby words and phrases (context clues) to interpret figures of speech.

5. Making Inferences

- In this section, you will identify evidence that supports implied ideas (inferences) in a literary text, including ideas about the author's purpose for writing.

6. Analyzing Theme

- In this section, you will explain the theme or central idea of a literary text. You will also identify text details that point to that theme or central idea.

7. Summarizing

- In this section, you will summarize a literary text without including your opinion of the text.

8. Character's Responses
 - In this section, you will describe how characters in a story or drama react to plot events.
9. Point of View
 - In this section, you will explain how an author creates and uses a narrator's point of view in a story or poem.
10. Versions
 - In this section, you will compare and contrast reading a literary text to watching or listening to an audio, video, or live version of the text.
11. Genres
 - In this section, you will identify the main features of various kinds (genres) of literary texts.
12. Comparing Genres
 - In this section, you will compare and contrast ways in which various kinds (genres) of literary texts treat similar themes or topics.
13. Narrative Introductions
 - In this section, you will discuss how well a narrative's introduction attracts the reader, introduces the narrator and/or characters, and sets the scene for further reading.
14. Dialogue and Descriptions
 - In this section, you will evaluate how well the dialogue and descriptions in a narrative develop experiences and plot events, and keep characters clear and interesting.
15. Organizing a Narrative
 - In this section, you will create a natural, logical order of plot events for a narrative.
16. Portfolio: Introducing A Narrative
 - In this section, you will write a narrative introduction that attracts the reader, introduces the narrator and/or characters, and sets the scene for further reading.
 - In this section, you will create a narrative outline that presents a natural, logical order of plot events.
 - In this section, you will use dialogue, pacing, and description to develop a narrative's experiences, events, and/or characters.
17. Literary Analysis: Apply
 - In this section, you will analyze a short narrative text.
18. Literary Analysis Review
19. Literary Analysis Unit Test

2. Informational Text Analysis

1. Relationships Between Words
 - In this section, you will use the relationship between words in an informational text to help your understanding of the text.
2. Learning New Words
 - In this section you will identify general and specialized meanings in informational text.
3. Technical Definitions and Reading Fluency
 - In this section, you will define words and phrases with literal and technical meanings in an informational text.
 - In this section, you will read high-frequency words and words with irregular spellings.

- In this section, you will read a text out loud at an appropriate rate with accuracy and expression.
4. Figurative and Connotative Meanings
 - In this section, you will interpret figurative words and phrases in an informational text. You will also determine the feelings or ideas (connotations) suggested by words or phrases in the text.
 5. Explicit Details and Inferences
 - In this section, you will identify explicit details and inferences.
 6. Identifying Central Ideas
 - In this section, you will identify central ideas in informational text.
 7. Effective Summaries
 - In this section, you will summarize informational text.
 - In this section, you will identify the parts of an effective summary.
 8. Author's Purpose
 - In this section, you will identify the author's point of view.
 9. Text Structure
 - In this section, you will explain how specific parts of an informational text relate to the text's structure and presentation of ideas.
 10. Analyzing Details
 - In this section, you will explain how an important person, event, or idea is presented in an informational text.
 11. Varying Media/Formats
 - In this section, you will identify media and formats in informational text.
 12. Comparing Texts
 - In this section, you will compare and contrast two authors' presentations on the same topic.
 13. Portfolio: Informational Text Analysis
 - In this section, you will identify and analyze the central ideas in informational texts.
 14. Portfolio: Informational Text Analysis 2
 - In this section, you will analyze the structure of informational texts.
 - In this section, you will determine authors' purposes for writing informational texts.
 15. Portfolio: Informational Text Analysis 3
 - In this section, you will identify an author's point of view in an informational text. You also will explain how the point of view is conveyed.
 - In this section, you will analyze point of view in informational texts.
 16. Informational Text Analysis Review
 17. Informational Text Analysis Unit Test

3. Standard English

1. Subject-Verb Agreement
 - In this section, you will analyze meter and structural elements, such as line breaks, in poetry.
 - In this section, you will use subject and verb agreement when a prepositional phrase is between the subject and the verb in a sentence.
 - In this section, you will use subject and verb agreement when the verb comes before the subject in a sentence.
 - In this section, you will use subject and verb agreement when an indefinite pronoun, such as *everyone*, is the subject of a sentence.
 - In this section, you will identify subject and verb agreement in sentences.
2. Verb Tense

- In this section, you will identify verb tenses that show different times, sequences, states, and conditions in a text.
 - In this section, you will use a consistent verb tense in sentences and correct errors in sentences with shifts in verb tense.
 - In this section, you will identify verb tense in speech and correct shifts in verb tense.
 - In this section, you will form and use the perfect verb tense in sentences.
3. Sentence Structure
- In this section, you will identify and correct sentence fragments when writing.
 - In this section, you will identify and correct run-on sentences when writing.
- In this section, you will write complex sentences with a variety of dependent clauses.
4. Phrases and Clauses
- In this section, you will identify phrases and clauses in sentences. You will also explain the function of phrases and clauses and describe how they are different.
 - In this section, you will explain how phrases and clauses are used to express a specific meaning in a sentence.
- In this section, you will correctly place and rearrange phrases and clauses in sentences. You will also correct misplaced phrases and clauses in sentences.
- In this section, you will use correct punctuation when writing.
5. Types of Sentences
- In this section, you will define, identify, and use simple sentences.
 - In this section, you will define, identify, and use compound sentences.
 - In this section, you will define, identify, and use complex sentences.
- In this section, you will identify simple and compound sentences that show different relationships among ideas.
6. Pronouns
- In this section, you will identify subjective, objective, and possessive pronouns and the words to which they refer (their antecedents) in sentences. You will also use those pronouns correctly.
7. Intensive Pronouns
- In this section, you will identify and use pronouns that add emphasis to a sentence (intensive pronouns).
8. Correct Spelling
- In this section, you will correct spelling errors.
9. Spelling Patterns
- In this section, you will identify word elements (morphemes) in spelling.
 - In this section, you will identify patterns in the spelling of words.
- In this section, you will use spelling patterns as clues to the meaning of a word or phrase.
10. Using References
- In this section, you will identify a word's pronunciation, part of speech, and precise meaning.
11. Parenthetical Elements
- In this section, you will compose sentences with correct comma usage.
12. Affixes and Roots
- In this section, you will differentiate roots, prefixes, and suffixes.
13. Context Confirmed
- In this section, you will use clues in nearby words and phrases (context clues) and a dictionary to confirm the meaning of a word or phrase.

14. Pronoun Number and Vague Pronouns
 - In this section, you will use pronouns that change when the words to which they refer (their antecedents) change. You will also identify and correct changes that make pronouns no longer match the words to which they refer.
 - In this section, you will identify and correct pronouns that are unclear and confusing.
15. Using Standard English
 - In this section, you will differentiate standard and nonstandard English.
16. Word Relationships
 - In this section, you will explain relationships between certain words.
17. Word Connotations
 - In this section, you will determine how words with similar meanings (denotations) suggest different feelings or ideas (connotations).
18. Standard English Apply
19. Standard English Review
20. Standard English Unit Test

4. Informative Writing

1. Organizational Strategies
 - In this section, you will identify characteristics of various ways to organize an informative or explanatory text.
2. Effective Organization
 - In this section, you will explain effective organizational strategies.
3. Effective Text
 - In this section, you will compose the body paragraph of an informational text.
4. Choosing Vocabulary
 - In this section, you will contrast general and domain-specific vocabulary.
5. Using Transitions
 - In this section, you will use transitions to show how ideas about a topic are related.
6. Evaluating Formal Writing
 - In this section, you will evaluate formal writing rules.
7. Concluding a Text
 - In this section, you will compose a logical conclusion based on an informative passage.
8. Portfolio: Informative Essay I
 - In this section, you will identify and use strategies for spelling correctly when writing an informative essay.
 - In this section, you will use technology and work with others to plan an informative essay.
9. Portfolio: Informative Essay II
 - In this section, you will write an informative essay using effective organization, development, and style. You will also demonstrate your skill at keyboarding as you type your essay.
 - In this section, you will revise your informative essay.
10. Portfolio: Informative Essay III
 - In this section, you will use technology and peer review to revise and edit your informative essay.
 - In this section, you will use technology to publish the final version of your informative essay.
11. Informative Writing: Apply

- In this section, you will create an informational presentation on your favorite topic.
12. Informative Writing Review
 13. Informative Writing Unit Test

5. Writing a Narrative

1. Narrative Context Clues
 - In this section, you will use context clues to figure out the meanings of unfamiliar words and phrases.
2. Connotative Meanings
 - In this section, you will interpret figurative words and phrases in a literary text. You will also describe the feelings or ideas (connotations) suggested by words or phrases in the text.
3. Word Choice
 - In this section, you will discuss how certain word choices affect the meaning and tone of a literary text.
4. Transition Words
 - In this section, you will use transitions to show the order of plot events and changes of time or place in a narrative.
5. Details
 - In this section, you will use precise words and phrases, and effective description to present experiences and events in a narrative.
6. Sensory Language
 - In this section, you will use language that appeals to the senses (sensory language) to develop experiences, events, and characters in a narrative.
7. Pacing
 - In this section, you will use pacing to develop experiences, events, and characters in a narrative.
8. Purpose and Audience
 - In this section, you will write in a clear, well-connected (coherent) way. You will also write in a way that shows effective organization, development, and style and that meets a given task, purpose, and audience.
9. Writing Process
 - In this section, you will use planning, peer review, editing, and rewriting (including trying a new approach) to develop and strengthen your writing.
10. Concluding a Story
 - In this section, you will create a narrative conclusion that follows logically from the narrative's experiences and events.
11. Portfolio: Writing a Narrative I
 - In this section, you will identify and use strategies for spelling correctly when writing a narrative.
 - In this section, you will use technology and work with others to plan a narrative essay.
12. Portfolio: Writing a Narrative II
 - In this section, you will write a clear, effective narrative essay for a given task, purpose, and audience. You will also demonstrate your skill at keyboarding as you type your essay.
 - In this section, you will assess and revise your writing by trying a new approach.
13. Portfolio: Writing a Narrative III
 - In this section, you will use technology and peer review to help you revise and edit your narrative essay.

- In this section, you will use technology to publish the final version of your narrative essay.
14. Writing a Narrative: Apply
 - In this section, you will create your own narrative story, which will include all elements of the plot, dialogue, detailed descriptions, and transition words.
 15. Writing a Narrative Review
 16. Writing A Narrative Unit Test

Semester B Summary:

In this course, students will sharpen and strengthen their skills in reading, writing, listening, and speaking. The student is exposed to a wide variety of writing styles to create a sense of curiosity and excitement.

During this course, the student will learn how to identify credible sources as well as compose argumentative and narrative essays using formal writing techniques. Students will also compare different types of media used to tell stories. These methods include textual, audio, and visual media types.

Semester B Outline

1. Course Overview

1. Language Arts 6 B Course Overview

2. Novel Study Introduction

1. Novel Lesson: Introduction
 - In this section, you will review character, setting, and plot in a novel.

3. Argument Analysis

1. Argument Analysis Introduction
2. Identifying a Claim
 - In this section, you will differentiate a claim, reason, and evidence.
3. Table and a Text
 - In this section, you will deduce the meaning of text through media formats.
4. Evaluating Claims
 - In this section, you will identify claims in arguments.
5. Reviewing Argument
 - In this section, you will identify evidence to support a claim.
6. Audio Argument Summaries
 - In this section, you will outline a speaker's argument. You will also discuss the speaker's claims and the way in which they are or are not supported by reasons and evidence.
7. Introducing a Claim
 - In this section, you will identify evidence to support a claim.
8. Clear Organization
 - In this section, you will identify the components of an essay.
9. Formal vs. Informal
 - In this section, you will evaluate whether formal English is appropriate in various speaking situations.
10. Portfolio: Present a Claim
 - In this section, you will record facts to support a claim.
 - In this section, you will organize descriptions, details and facts to support a claim.

- In this section, you will present your claim.
11. Presenting Claims
 - In this section, you will present claims and findings in a class debate. You will also present your ideas in a logical order, provide facts and details to emphasize main ideas and themes, and make eye contact and speak clearly while presenting.
 12. Presenting Claims Discussion
 13. Portfolio: Debate and Reflection
 - In this section, you will determine key ideas of a debate. You will also paraphrase (restate in your own words) claims, counterclaims, and evidence presented in the debate.
 14. Argumentative Analysis: Apply
 - In this section, you will create an argumentative paragraph that includes a claim, reasons, and evidence.
 15. Argument Analysis Review
 16. Argument Analysis Unit Test

4. Argumentative Essay

1. Argumentative Essay Introduction
2. Counter Claims
 - In this section, you will evaluate the claims and evidence in an argument. You will also discuss counterclaims in an argument.
3. Portfolio: Argument Plan
 - In this section, you will create the claim for an argument. You will also present reasons and evidence to develop the claim.
4. Credible Sources
 - In this section, you will identify sources that are credible and effective in supporting claims in arguments.
5. Relationships
 - In this section, you will determine how claims and reasons in an argument are related. You will also use words, phrases, and clauses that make the relationships clear.
6. Formal Writing
 - In this section, you will identify and evaluate a formal style for an argument.
7. Concluding Statement
 - In this section, you will write a concluding statement for an argument.
8. Portfolio: Argument Essay I
 - In this section, you will correct spelling in an argumentative essay.
 - In this section, you will use technology and work with others to develop and strengthen your writing as you plan your argumentative essay.
9. Portfolio: Argument Essay II
 - In this section, you will write a clear and coherent argumentative essay. You will also use keyboarding skills to type your essay.
 - In this section, you will try a new approach as you write an argumentative essay to develop and strengthen your writing.
10. Portfolio: Argument Essay III
 - In this section, you will use technology and peer reviews to revise and edit an argumentative essay.
 - In this section, you will use technology to write and publish a final version of an argumentative essay.
11. Argumentative Essay: Apply

- In this section, you will create an argument to present to members of a town council to convince them to build a park at an abandoned gas station.

12. Argumentative Essay Review

13. Argumentative Essay Unit Test

5. Research and Present

1. Research and Present Introduction

2. Parentheses and Dashes

- In this section, you will compose sentences with proper punctuation including, commas, parentheses, and dashes.

3. Credibility of Sources

- In this section, you will explain what describing a source as credible means. You will also assess the credibility of various sources.

4. Quoting and Paraphrasing

- In this section, you will identify the difference between quoting and paraphrasing. You will also quote or paraphrase a source without plagiarizing.

5. Understanding a Topic

- In this section, you will gather information using media formats.

6. Source Effectiveness

- In this section, you will evaluate the effectiveness of research sources.

7. Using Sources

- In this section, you will classify research questions.

8. Bibliographic Information

- In this section, you will define bibliographies.

9. Interpreting Information

- In this section, you will interpret information presented in various media and explain how it adds to the study of a topic, text, or issue.

10. Evaluating Visuals

- In this section, you will discuss how well examples of multimedia and visuals make a topic clear.

11. English to Context

- In this section, you will adjust your manner of speaking to various situations, including using formal English when appropriate.

12. Portfolio: Research and Present

- In this section, you will research several sources to learn about a topic or issue. You will also create and present an informative research project, using the sources and creating a bibliography of them.
- In this section, you will research at least three print and digital sources to learn about a topic or issue.

13. Research and Present: Apply

- In this section, you will research a topic of your choosing.

14. Research and Present Review

15. Research and Present Unit Test

6. Comparisons

1. Comparisons Introduction

2. Style and Tone

- In this section, you will evaluate the language, style, and tone in a variety of texts.

3. Point of View in a Story

- In this section, you will evaluate how an author develops the narrator's point of view in a story.
4. Portfolio: Comparing Texts 1
 - In this section, you will compare the style and tone of stories.
 - In this section, you will compare the plot structure of stories.
 5. Portfolio: Comparing Texts 2
 - In this section, you will compare the development of characters in stories.
 6. Point of View in a Poem
 - In this section, you will evaluate how an author develops a speaker's point of view in a poem.
 7. Informative Point of View
 - In this section, you will determine an author's point of view or purpose in an informational text and explain how it is communicated in the text.
 8. Different Forms: Informative
 - In this section, you will compare and contrast information presented in different media and formats.
 9. Comparing Informational Texts
 - In this section, you will compare and contrast how different authors present events in their writing.
 10. Compare Video and Text
 - In this section, you will identify how reading a story is similar to and different from watching a video of the story.
 11. Compare Media
 - In this section, you will identify similarities and differences in reading a story, listening to an audio version of the story, or watching a video of the story.
 12. Comparisons: Apply
 13. Comparisons Review
 14. Comparisons Unit Test

7. Debate

1. Debate Introduction
2. Collegial Discussion
 - In this section, you will identify goals, deadlines, roles, and rules for group discussions.
3. Active Listening
 - In this section, you will listen actively and speak clearly during a discussion.
4. Active Listening Discussion
5. Language in Speeches
 - In this section, you will evaluate the language, style, and tone of speeches.
6. Collaborative Discussion
 - In this section, you will prepare for and participate in a collaborative group discussion by referring to evidence from the reading.
7. Collaborative Discussion Discussion
8. Portfolio: Discussion Reflection
 - In this section, you will identify the key ideas of a group discussion. You will also paraphrase (restate in your own words) details of the discussion and provide a reflection to show your understanding of other people's views and ideas.
9. Standard English Debate

- In this section, you will recognize differences between standard and nonstandard English in speech. You will also identify ways to add expression in the language you use as you speak.

10. Discussion Strategies

- In this section, you will prepare for and participate in a group discussion by asking and answering questions, making comments that add to the topic of discussion, and referring to evidence from the reading.

11. Discussion Strategies Discussion

12. Portfolio: Reflecting on Debate

- In this section, you will identify the key ideas in a group discussion. You will also paraphrase (restate in your own words) details of the discussion and provide a reflection to show your understanding of other people's views and ideas.

13. Speaker's Claims and Reasons

- In this section, you will identify a speaker's argument and claims. You will also determine which claims are supported by reasons and evidence.

14. Interpret and Clarify a Speaker's Message

- In this section, you will actively listen to a speaker and interpret the speaker's messages. You will also ask questions to clarify the speaker's purpose and perspective on a topic.

15. Interpret and Clarify a Speaker's Message Discuss

16. Debate: Apply and Review

- In this section, you will develop an argument about a topic that you would want to debate with someone.

17. Debate Unit Test

8. Novel Study

1. Narration and Point of View

- In this section, you will identify and describe the narrator and point of view of a novel.

9. Novel Study

1. Setting and Plot

- In this section, you will decide how scenes from the text develop the novel's setting.
- In this section, you will decide how parts of the text help to develop the novel's plot.

10. Novel Study

1. Theme

- In this section, you will determine the theme of a novel.
- In this section, you will decide how a sentence, chapter, or scene develops a novel's theme.

11. Novel Study

1. Compare and Contrast Genres

- In this section, you will compare and contrast texts in different genres.
- In this section, you will identify evidence of literary devices, such as similes and metaphors, to support your interpretation of literary texts.

12. Novel Study

1. Summarize a Novel

- In this section, you will learn how to summarize a text.

2. Portfolio: Evaluate a Novel

- In this section, you will write an evaluation of a novel.

Language Arts 6 Accelerated

Accelerated Language Arts 6 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, students will sharpen and strengthen their skills in reading, writing, listening, and speaking. The student is exposed to a wide variety of writing styles to create a sense of curiosity and excitement.

During this course, the student will learn to make connections between readings, podcasts, radio clips, videos, and the world. The student will also expand an academic vocabulary and build confidence through independent reading, peer model videos, and practice opportunities. The student will write expository and creative compositions and employ test-taking strategies that are effective for different types of learners.

Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester A Outline

1. Unit 1: Unit Title

1. Language Arts 6 A Course Overview

2. Standard English

1. Standard English Introduction

2. Subject-Verb Agreement

- In this section, you will use subject and verb agreement when a prepositional phrase is between the subject and the verb in a sentence.
- In this section, you will use subject and verb agreement when the verb comes before the subject in a sentence.
- In this section, you will use subject and verb agreement when an indefinite pronoun, such as *everyone*, is the subject of a sentence.

3. Verb Tense

- In this section, you will identify verb tenses that show different times, sequences, states, and conditions in a text.
- In this section, you will use a consistent verb tense in sentences and correct errors in sentences with shifts in verb tense.
- In this section, you will identify verb tense in speech and correct shifts in verb tense.
In this section, you will form and use the perfect verb tense in sentences.

4. Sentence Structure

- In this section, you will identify and correct sentence fragments when writing.

- In this section, you will identify and correct run-on sentences when writing.
 - In this section, you will write complex sentences with a variety of dependent clauses.
5. Phrases and Clauses
- In this section, you will identify phrases and clauses in sentences. You will also explain the function of phrases and clauses and describe how they are different.
 - In this section, you will explain how phrases and clauses are used to express a specific meaning in a sentence.
 - In this section, you will correctly place and rearrange phrases and clauses in sentences. You will also correct misplaced phrases and clauses in sentences.
 - In this section, you will use correct punctuation when writing.
6. Types of Sentences
- In this section, you will define, identify, and use simple sentences.
 - In this section, you will define, identify, and use compound sentences.
 - In this section, you will define, identify, and use complex sentences.
 - In this section, you will identify simple and compound sentences that show different relationships among ideas.
7. Pronouns
- In this section, you will identify subjective, objective, and possessive pronouns and the words to which they refer (their antecedents) in sentences. You will also use those pronouns correctly.
 - In this section, you will use the proper case of subjective, objective, and possessive pronouns when writing.
8. Intensive Pronouns
- In this section, you will identify and use pronouns that add emphasis to a sentence (intensive pronouns).
9. Correct Spelling
- In this section, you will correct spelling errors.
 - In this section, you will correct spelling errors when reading and spell words correctly when writing.
10. Spelling Patterns
- In this section, you will identify word elements (morphemes) in spelling.
 - In this section, you will identify patterns in the spelling of words.
 - In this section, you will use spelling patterns as clues to the meaning of a word or phrase.
11. Using References
- In this section, you will identify a word's pronunciation, part of speech, and precise meaning.
12. Parenthetical Elements
- In this section, you will compose sentences with correct comma usage.
 - In this section, you will explain the functions of commas, parentheses, and dashes and use them correctly in sentences.
13. Affixes and Roots
- In this section, you will differentiate roots, prefixes, and suffixes.
14. Context Confirmed
- In this section, you will use clues in nearby words and phrases (context clues) and a dictionary to confirm the meaning of a word or phrase.
15. Pronoun Number

- In this section, you will use pronouns that change when the words to which they refer (their antecedents) change. You will also identify and correct changes that make pronouns no longer match the words to which they refer.

16. Vague Pronouns

- In this section, you will identify and correct pronouns that are unclear and confusing.

17. Using Standard English

- In this section, you will differentiate standard and nonstandard English.

18. Word Relationships

- In this section, you will explain relationships between certain words.

19. Word Connotations

- In this section, you will determine how words with similar meanings (denotations) suggest different feelings or ideas (connotations).

20. Standard English Apply

21. Standard English Review

22. Standard English Unit Test

3. Informational Text Analysis

1. Informational Text Analysis Intro

2. Relationships Between Words

- In this section, you will use the relationship between words in an informational text to help your understanding of the text.

3. Learning New Words

- In this section you will identify general and specialized meanings in informational text.

4. Technical Definitions

- In this section, you will define words and phrases with literal and technical meanings in an informational text.

5. Reading Fluency

6. Figurative and Connotative Meanings

- In this section, you will interpret figurative words and phrases in an informational text. You will also determine the feelings or ideas (connotations) suggested by words or phrases in the text.

7. Explicit Details and Inferences

- In this section, you will identify explicit details and inferences.

8. Identifying Central Ideas

- In this section, you will identify central ideas in informational text.

9. Effective Summaries

- In this section, you will summarize informational text.
- In this section, you will identify the parts of an effective summary.

10. Author's Purpose

- In this section, you will identify the author's point of view.

11. Text Structure

- In this section, you will explain how specific parts of an informational text relate to the text's structure and presentation of ideas.

12. Analyzing Details

- In this section, you will explain how an important person, event, or idea is presented in an informational text.

13. Varying Media/Formats

- In this section, you will identify media and formats in informational text.

14. Comparing Texts

- In this section, you will compare and contrast two authors' presentations on the same topic.
15. Portfolio: Informational Text Analysis 1
 - In this section, you will identify and analyze the central ideas in informational texts.
 16. Portfolio: Informational Text Analysis 2
 - In this section, you will analyze the structure of informational texts.
 - In this section, you will determine authors' purposes for writing informational texts.
 17. Portfolio: Informational Text Analysis 3
 - In this section, you will identify an author's point of view in an informational text. You also will explain how the point of view is conveyed.
 - In this section, you will analyze point of view in informational texts.
 18. Informational Text Analysis Review
 19. Informational Text Analysis Unit Test

4. Informative Writing

1. Informative Writing Introduction
2. Organizational Strategies
 - In this section, you will identify characteristics of various ways to organize an informative or explanatory text.
3. Effective Organization
 - In this section, you will explain effective organizational strategies.
4. Effective Text
 - In this section, you will compose the body paragraph of an informational text.
5. Choosing Vocabulary
 - In this section, you will contrast general and domain-specific vocabulary.
6. Using Transitions
 - In this section, you will use transitions to show how ideas about a topic are related.
7. Evaluating Formal Writing
 - In this section, you will evaluate formal writing rules.
8. Concluding a Text
 - In this section, you will compose a logical conclusion based on an informative passage.
9. Portfolio: Informative Essay I
 - In this section, you will identify and use strategies for spelling correctly when writing an informative essay.
 - In this section, you will use technology and work with others to plan an informative essay.
10. Portfolio: Informative Essay II
 - In this section, you will write an informative essay using effective organization, development, and style. You will also demonstrate your skill at keyboarding as you type your essay.
 - In this section, you will revise your informative essay.
11. Portfolio: Informative Essay III
 - In this section, you will use technology and peer review to revise and edit your informative essay.
 - In this section, you will use technology to publish the final version of your informative essay.
12. Informative Writing: Apply
 - In this section, you will create an informational presentation on your favorite topic.
13. Informative Writing Review
14. Informative Writing Unit Test

5. Research and Present

1. Research and Present Introduction
2. Parentheses and Dashes
 - In this section, you will compose sentences with proper punctuation including, commas, parentheses, and dashes.
3. Credibility of Sources
 - In this section, you will explain what describing a source as credible means. You will also assess the credibility of various sources.
4. Quoting and Paraphrasing
 - In this section, you will identify the difference between quoting and paraphrasing. You will also quote or paraphrase a source without plagiarizing.
5. Understanding a Topic
 - In this section, you will gather information using media formats.
6. Source Effectiveness
 - In this section, you will evaluate the effectiveness of research sources.
7. Using Sources
 - In this section, you will classify research questions.
8. Bibliographic Information
 - In this section, you will define bibliographies.
9. Interpreting Information
 - In this section, you will interpret information presented in various media and explain how it adds to the study of a topic, text, or issue.
10. Evaluating Visuals
 - In this section, you will discuss how well examples of multimedia and visuals make a topic clear.
11. English to Context
 - In this section, you will adjust your manner of speaking to various situations, including using formal English when appropriate.
12. Portfolio: Research and Present
 - In this section, you will research several sources to learn about a topic or issue. You will also create and present an informative research project, using the sources and creating a bibliography of them.
 - In this section, you will research at least three print and digital sources to learn about a topic or issue.
13. Research and Present: Apply
 - In this section, you will research a topic of your choosing.
14. Research and Present Review
15. Research and Present Unit Test

6. Argument Analysis

1. Argument Analysis Introduction
2. Identifying a Claim
 - In this section, you will differentiate a claim, reason, and evidence.
3. Table and a Text
 - In this section, you will deduce the meaning of text through media formats.
4. Evaluating Claims
 - In this section, you will identify claims in arguments.
5. Reviewing Argument
 - In this section, you will identify evidence to support a claim.
6. Audio Argument Summaries

- In this section, you will outline a speaker's argument. You will also discuss the speaker's claims and the way in which they are or are not supported by reasons and evidence.
7. Introducing a Claim
 - In this section, you will identify evidence to support a claim.
 8. Clear Organization
 - In this section, you will identify the components of an essay.
 9. Formal vs. Informal
 - In this section, you will evaluate whether formal English is appropriate in various speaking situations.
 10. Portfolio: Present a Claim
 - In this section, you will record facts to support a claim.
 - In this section, you will organize descriptions, details and facts to support a claim.
 - In this section, you will present your claim.
 11. Presenting Claims
 - In this section, you will present claims and findings in a class debate. You will also present your ideas in a logical order, provide facts and details to emphasize main ideas and themes, and make eye contact and speak clearly while presenting.
 12. Presenting Claims Discussion
 13. Portfolio: Debate and Reflection
 - In this section, you will determine key ideas of a debate. You will also paraphrase (restate in your own words) claims, counterclaims, and evidence presented in the debate.
 14. Argumentative Analysis: Apply
 - In this section, you will create an argumentative paragraph that includes a claim, reasons, and evidence.
 15. Argument Analysis Review
 16. Argument Analysis Unit Test

Semester B Summary: In this course, students will sharpen and strengthen their skills in reading, writing, listening, and speaking. The student is exposed to a wide variety of writing styles to create a sense of curiosity and excitement. During this course, the student will learn how to identify credible sources as well as compose argumentative and narrative essays using formal writing techniques. Students will also compare different types of media used to tell stories. These methods include textual, audio, and visual media types.

Semester B Outline

1. Course Overview

1. Language Arts 6 B Course Overview

2. Novel Study Introduction

1. Novel Lesson Introduction

- In this section, you will review character, setting, and plot in a novel.

3. Argumentative Essay

1. Argumentative Essay Introduction
2. Counter Claims

- In this section, you will evaluate the claims and evidence in an argument. You will also discuss counterclaims in an argument.

3. Portfolio: Planning an Argument
 - In this section, you will create the claim for an argument. You will also present reasons and evidence to develop the claim.
4. Credible Sources
 - In this section, you will identify sources that are credible and effective in supporting claims in arguments.
5. Relationships
 - In this section, you will determine how claims and reasons in an argument are related. You will also use words, phrases, and clauses that make the relationships clear.
6. Formal Writing
 - In this section, you will identify and evaluate a formal style for an argument.
7. Concluding Statement
 - In this section, you will write a concluding statement for an argument.
8. Portfolio: Argument Essay I
 - In this section, you will correct spelling in an argumentative essay.
 - In this section, you will use technology and work with others to develop and strengthen your writing as you plan your argumentative essay.
9. Portfolio: Argument Essay II
 - In this section, you will write a clear and coherent argumentative essay. You will also use keyboarding skills to type your essay.
 - In this section, you will try a new approach as you write an argumentative essay to develop and strengthen your writing.
10. Portfolio: Argument Essay III
 - In this section, you will use technology and peer reviews to revise and edit an argumentative essay.
 - In this section, you will use technology to write and publish a final version of an argumentative essay.
11. Argumentative Essay: Apply
 - In this section, you will create an argument to present to members of a town council to convince them to build a park at an abandoned gas station.
12. Argumentative Essay Review
13. Argumentative Essay Unit Test

4. Novel Study

1. Narration and Point of View
 - In this section, you will identify and describe the narrator and point of view of a novel.

5. Literary Analysis

1. Literary Analysis Introduction
2. Literary Context Clues
 - In this section, you will explain how clues in nearby words and phrases (context clues) help you figure out the meaning of an unfamiliar word or phrase.
3. Poetry
 - In this section, you will discuss rhythm in poetry. You will also determine the actual or figurative meanings of words and phrases in poetry and the feelings or ideas that they suggest (connotations).
4. Literary Analysis
 - In this section, you will identify poetic elements in odes, ballads, epic poetry, and science fiction.

- In this section, you will identify differences among odes, ballads, epic poetry, and science fiction.
In this section, you will evaluate literary devices, such as similes and metaphors, and find textual evidence as you analyze and interpret literary texts.
5. Figures of Speech
 - In this section, you will use clues in nearby words and phrases (context clues) to interpret figures of speech.
 6. Making Inferences
 - In this section, you will identify evidence that supports implied ideas (inferences) in a literary text, including ideas about the author's purpose for writing.
 7. Analyzing Theme
 - In this section, you will explain the theme or central idea of a literary text. You will also identify text details that point to that theme or central idea.
 8. Summarizing
 - In this section, you will summarize a literary text without including your opinion of the text.
 9. Character's Responses
 - In this section, you will describe how characters in a story or drama react to plot events.
 10. Point of View
 - In this section, you will explain how an author creates and uses a narrator's point of view in a story or poem.
 11. Versions
 - In this section, you will compare and contrast reading a literary text to watching or listening to an audio, video, or live version of the text.
 12. Genres
 - In this section, you will identify the main features of various kinds (genres) of literary texts.
 13. Comparing Genres
 - In this section, you will compare and contrast ways in which various kinds (genres) of literary texts treat similar themes or topics.
 14. Narrative Introductions
 - In this section, you will discuss how well a narrative's introduction attracts the reader, introduces the narrator and/or characters, and sets the scene for further reading.
 15. Dialogue and Descriptions
 - In this section, you will evaluate how well the dialogue and descriptions in a narrative develop experiences and plot events, and keep characters clear and interesting.
 16. Organizing a Narrative
 - In this section, you will create a natural, logical order of plot events for a narrative.
 17. Portfolio: Introducing A Narrative
 - In this section, you will write a narrative introduction that attracts the reader, introduces the narrator and/or characters, and sets the scene for further reading.
 - In this section, you will create a narrative outline that presents a natural, logical order of plot events.
 - In this section, you will use dialogue, pacing, and description to develop a narrative's experiences, events, and/or characters.
 18. Literary Analysis: Apply
 - In this section, you will analyze a short narrative text.

19. Literary Analysis Review
20. Literary Analysis Unit Test

6. Novel Study

1. Setting and Plot
 - In this section, you will decide how scenes from the text develop the novel's setting.
 - In this section, you will decide how parts of the text help to develop the novel's plot.

7. Writing a Narrative

1. Writing a Narrative Introduction
2. Narrative Context Clues
 - In this section, you will use context clues to figure out the meanings of unfamiliar words and phrases.
3. Connotative Meanings
 - In this section, you will interpret figurative words and phrases in a literary text. You will also describe the feelings or ideas (connotations) suggested by words or phrases in the text.
4. Word Choice
 - In this section, you will discuss how certain word choices affect the meaning and tone of a literary text.
5. Transition Words
 - In this section, you will use transitions to show the order of plot events and changes of time or place in a narrative.
6. Details
 - In this section, you will use precise words and phrases, and effective description to present experiences and events in a narrative.
7. Sensory Language
 - In this section, you will use language that appeals to the senses (sensory language) to develop experiences, events, and characters in a narrative.
8. Pacing
 - In this section, you will use pacing to develop experiences, events, and characters in a narrative.
9. Purpose and Audience
 - In this section, you will write in a clear, well-connected (coherent) way. You will also write in a way that shows effective organization, development, and style and that meets a given task, purpose, and audience.
10. Writing Process
 - In this section, you will use planning, peer review, editing, and rewriting (including trying a new approach) to develop and strengthen your writing.
11. Concluding a Story
 - In this section, you will create a narrative conclusion that follows logically from the narrative's experiences and events.
12. Portfolio: Writing a Narrative I
 - In this section, you will identify and use strategies for spelling correctly when writing a narrative.
 - In this section, you will use technology and work with others to plan a narrative essay.
13. Portfolio: Writing a Narrative II

- In this section, you will write a clear, effective narrative essay for a given task, purpose, and audience. You will also demonstrate your skill at keyboarding as you type your essay.
 - In this section, you will assess and revise your writing by trying a new approach.
14. Portfolio: Writing a Narrative III
- In this section, you will use technology and peer review to help you revise and edit your narrative essay.
 - In this section, you will use technology to publish the final version of your narrative essay.
15. Writing a Narrative: Apply
- In this section, you will create your own narrative story, which will include all elements of the plot, dialogue, detailed descriptions, and transition words.
16. Writing a Narrative Review
17. Writing A Narrative Unit Test

8. Novel Study

1. Theme

- In this section, you will determine the theme of a novel.
- In this section, you will decide how a sentence, chapter, or scene develops a novel's theme.

9. Comparisons

1. Comparisons Introduction

2. Style and Tone

- In this section, you will evaluate the language, style, and tone in a variety of texts.

3. Point of View in a Story

- In this section, you will evaluate how an author develops the narrator's point of view in a story.

4. Portfolio: Comparing Texts 1

- In this section, you will compare the style and tone of stories.
- In this section, you will compare the plot structure of stories.

5. Portfolio: Comparing Texts 2

- In this section, you will compare the development of characters in stories.

6. Point of View in a Poem

- In this section, you will evaluate how an author develops a speaker's point of view in a poem.

7. Informative Point of View

- In this section, you will determine an author's point of view or purpose in an informational text and explain how it is communicated in the text.

8. Different Forms: Informative

- In this section, you will compare and contrast information presented in different media and formats.

9. Comparing Informational Texts

- In this section, you will compare and contrast how different authors present events in their writing.

10. Compare Video and Text

- In this section, you will identify how reading a story is similar to and different from watching a video of the story.

11. Compare Media

- In this section, you will identify similarities and differences in reading a story, listening to an audio version of the story, or watching a video of the story.

12. Comparisons: Apply

13. Comparisons Review
14. Comparisons Unit Test

10. Novel Study

1. Compare and Contrast Genres
 - In this section, you will compare and contrast texts in different genres.

11. Debate

1. Debate Introduction
2. Collegial Discussion
 - In this section, you will identify goals, deadlines, roles, and rules for group discussions.
3. Active Listening
 - In this section, you will listen actively and speak clearly during a discussion.
4. Active Listening Discussion
5. Language in Speeches
 - In this section, you will evaluate the language, style, and tone of speeches.
6. Collaborative Discussion
 - In this section, you will prepare for and participate in a collaborative group discussion by referring to evidence from the reading.
7. Collaborative Discussion Discussion
8. Portfolio: Discussion Reflection
 - In this section, you will identify the key ideas of a group discussion. You will also paraphrase (restate in your own words) details of the discussion and provide a reflection to show your understanding of other people's views and ideas.
9. Standard English Debate
 - In this section, you will recognize differences between standard and nonstandard English in speech. You will also identify ways to add expression in the language you use as you speak.
10. Discussion Strategies
 - In this section, you will prepare for and participate in a group discussion by asking and answering questions, making comments that add to the topic of discussion, and referring to evidence from the reading.
11. Discussion Strategies Discussion
12. Portfolio: Reflecting on Debate
 - In this section, you will identify the key ideas in a group discussion. You will also paraphrase (restate in your own words) details of the discussion and provide a reflection to show your understanding of other people's views and ideas.
13. Speaker's Claims and Reasons
 - In this section, you will identify a speaker's argument and claims. You will also determine which claims are supported by reasons and evidence.
14. Interpret and Clarify a Speaker's Message
 - In this section, you will actively listen to a speaker and interpret the speaker's messages. You will also ask questions to clarify the speaker's purpose and perspective on a topic.
15. Interpret and Clarify a Speaker's Message Discuss
16. Debate: Apply
 - In this section, you will develop an argument about a topic that you would want to debate with someone.
17. Debate Review
18. Debate Unit Test

12. Novel Study

1. Summarize a Novel

- In this section, you will learn how to summarize a text.

Accelerated Literature Study 6

Accelerated Literature Study 6

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

The Junior Great Books® program involves a student in reading engaging literature and participating in rich discussion. The literature included in the Junior Great Books program is chosen to spark a high level of thinking and expose the student to rich language and vocabulary. The teacher and Learning Coach use the Shared Inquiry™ method to help a student acquire the qualities and strategies of effective readers and thinkers. The student learns to read actively, noticing thoughts and questions that come to mind during the act of reading. They will also learn to use the text, their own experiences, prior knowledge, and critical and creative thinking to participate in discussions about the text. These discussions help the student answer their own questions, satisfy their curiosity, and think more deeply about the content and process of his reading.

The student reads and rereads each Junior Great Books selection. Through modeling and direct instruction, they learn to note questions and reactions to text information during these readings. These questions and reactions form the foundation for the Shared Inquiry discussion. The student also chooses writing projects as another way to understand and extend what they have read.

Course Outline

1. The Scholarship Jacket

1. The Scholarship Jacket: Lesson 1

- Provide cited textual evidence to support analysis of inferences drawn from a literary text, including the author's purpose and how it is conveyed.
- Determine and analyze the theme or central idea of a literary text to describe how it is conveyed through particular details.

2. The Scholarship Jacket: Lesson 2

- Describe how characters respond as a story's or drama's plot moves toward a resolution.
- Evaluate how an author develops the point of view of the narrator of a story.

2. Repulsive Dinners: A Memoir

1. Repulsive Dinners: A Memoir: Lesson 1

- Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
- Determine a central idea of a text and how it is conveyed through particular details.

2. Repulsive Dinners: A Memoir: Lesson 2

- Analyze in detail how a key individual, event, or idea is introduced, illustrated, and elaborated in a text (e.g., through examples or anecdotes).
- Determine an author’s point of view or purpose in a text.

3. **Eating Poetry**

1. Eating Poetry: Lesson 1

- Provide cited textual evidence to support analysis of inferences drawn from a literary text, including the author's purpose and how it is conveyed.
- Analyze the theme or central idea of a literary text to describe how it is conveyed through particular details.

2. Eating Poetry: Lesson 2

- Evaluate poetry for rhythm to determine the literal, figurative, and connotative meanings of words and phrases as they are used in a poem.
- Provide an explanation of how an author develops the point of view of the narrator of a story or a poem.

4. **The Hero of the Story**

1. The Hero of the Story : Lesson 1

- Provide cited textual evidence to support analysis of inferences drawn from a literary text, including the author's purpose and how it is conveyed.
- Determine the theme or central idea of a literary text to describe how it is conveyed through particular details.

2. The Hero of the Story: Lesson 2

- Describe how characters respond as a story's or drama's plot moves toward a resolution.
- Evaluate how an author develops the point of view of the narrator of a story.

5. **SWISH: A Basketball Story**

1. SWISH: A Basketball Story: Lesson 1

- Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
- Determine a central idea of a text and how it is conveyed through particular details; provide a summary of the text distinct from personal opinions or judgments.

2. SWISH: A Basketball Story: Lesson 2

- Analyze in detail how a key individual, event, or idea is introduced, illustrated, and elaborated in a text (e.g., through examples or anecdotes).
- Analyze how a particular sentence, paragraph, chapter, or section fits into the overall structure of a text and contributes to the development of the ideas.

6. **Mother Nature's Youngest Daughter**

1. Mother Nature's Youngest Daughter: Lesson 1

- Provide cited textual evidence to support analysis of inferences drawn from a literary text, including the author's purpose and how it is conveyed.
- Analyze the theme or central idea of a literary text to describe how it is conveyed through particular details.

2. Mother Nature's Youngest Daughter: Lesson 2

- Describe how characters respond as a story's or drama's plot moves toward a resolution.
- Evaluate how an author develops the point of view of the narrator of a story.

7. **What Do Fish Have to Do with Anything?**

1. What Do Fish Have to Do with Anything?: Lesson 1
 - Provide cited textual evidence to support analysis of inferences drawn from a literary text, including the author's purpose and how it is conveyed.
 - Determine the theme or central idea of a literary text to describe how it is conveyed through particular details.
2. What Do Fish Have to Do with Anything?: Lesson 2
 - Describe how characters respond as a story's or drama's plot moves toward a resolution.
 - Analyze how a particular sentence, chapter, scene, or stanza fits into the overall structure of a text and contributes to the development of the setting.

8. \in-glish\

1. \in-glish\ Lesson 1
 - Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
 - Determine a central idea of a text and how it is conveyed through particular details.
2. \in-glish\ Lesson 2
 - Analyze in detail how a key individual, event, or idea is introduced, illustrated, and elaborated in a text (e.g., through examples or anecdotes).
 - Determine an author's point of view or purpose in a text to explain how it is conveyed in the text.

9. Amicae Aeternum

1. Amicae Aeternum
 - Provide cited textual evidence to support analysis of inferences drawn from a literary text, including the author's purpose and how it is conveyed.
 - Analyze the theme or central idea of a literary text to describe how it is conveyed through particular details.
2. Amicae Aeternum
 - Describe how characters respond as a story's or drama's plot moves toward a resolution.
 - Evaluate how an author develops the point of view of the narrator of a story.

10. At work with my father

1. At work with my father: Lesson 1
 - Provide cited textual evidence to support analysis of inferences drawn from a literary text, including the author's purpose and how it is conveyed.
 - Analyze the theme or central idea of a literary text to describe how it is conveyed through particular details.
2. At work with my father: Lesson 2
 - Determine the literal, figurative, and connotative meanings of words and phrases as they are used in a poem.
 - Provide an explanation of how an author develops the point of view of the narrator of a story or a poem.

11. Miss Awful

1. Miss Awful: Lesson 1
 - Provide cited textual evidence to support analysis of inferences drawn from a literary text, including the author's purpose and how it is conveyed.
 - Determine the theme or central idea of a literary text to describe how it is conveyed through particular details.

2. Miss Awful: Lesson 2

- Describe how characters respond as a story's or drama's plot moves toward a resolution.
- Evaluate how an author develops the point of view of the narrator of a story.

12.All-Ball

1. All-Ball: Lesson 1

- Cite textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.
- Provide a summary of the text distinct from personal opinions or judgments.

2. All-Ball: Lesson 2

- Analyze in detail how a key individual, event, or idea is introduced, illustrated, and elaborated in a text (e.g., through examples or anecdotes).
- Determine an author's point of view or purpose in a text and explain how it is conveyed in the text.

Language Arts 7

Language Arts 7 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, the student will focus on reading, writing, and analyzing informational and narrative texts, as well as developing their vocabulary and grammatical knowledge. The student will read poetry by Lewis Carroll and Daniel Beatty, short stories, and informational texts on Rose Parks and Army Code.

Semester A Outline

1. Course Overview

1. ELA 7 A Course Overview

2. Speaking and Listening

1. Discussion Evidence

- In this section, you will collaborate using technology.
- In this section, you will identify ways to prepare for a discussion.
- In this section, you will defend your ideas and opinions in a discussion.

2. Discussion Protocols

- In this section, you will identify rules for discussion.
- In this section, you will identify questions that clarify comments made in a discussion.
- In this section, you will explain how to effectively respond to questions and comments during a discussion.

3. Speaking and Listening Apply

- In this section, you will formulate an opinion about how an 1865 news account of the assassination of President Lincoln might be presented in today's 24-hour news cycle and discuss it with your peers.

4. Speaking and Listening Apply Discussion

-

3. Reading Informational Text

1. Reading Informational Text Introduction

2. Two or More Central Ideas

- In this section, you will identify two or more central ideas in a text.

3. Analyzing Central Ideas

- In this section, you will explain how authors use evidence to develop two or more central ideas in a text.

4. Determining Genre

- In this section, you will identify a variety of informational/nonfiction genres, and then analyze details of a text to identify its genre.

5. Summarizing Text

- In this section, you will summarize the facts in a text, without including your opinion.

6. Analyzing Interactions

- In this section, you will discuss cause and effect relationships between people, events, and ideas in an informational text.

7. Meaning and Word Choice

- In this section, you will define words and phrases in an informational text using context clues.
- In this section, you will explain the effect of word choices defined through the use of context clues.

8. Identifying Evidence

- In this section, you will locate evidence to support an analysis in an informational text.
- In this section, you will select evidence to support an analysis of an informational paragraph.
- In this section, you will identify evidence to support a contradictory analysis.

9. Providing Evidence

- In this section, you will identify evidence that supports a statement in an informational text.

10. Supporting Inferences

- In this section, you will identify evidence that supports an implied idea (an inference) in an informational text.

11. Reading Informational Text Apply

- In this section, you will analyze an informational article about Jackie Robinson.

12. Reading Informational Review/Reflect

13. Reading Informational Text Unit Test

4. Grammar and Punctuation

1. Grammar and Punctuation Introduction

2. Subject and Verb Agreement

- In this section, you will identify subject-verb agreement when a prepositional phrase comes between the subject and the verb.
- In this section, you will identify subject-verb agreement when the subject follows the verb (inverted word order) and when the subject is an indefinite pronoun.
- In this section, you will identify subject-verb agreement when the subject names a group of people or things (a collective noun).

3. Adjectives and Adverbs

- In this section, you will construct compound adjectives.
- In this section, you will select adverbs that modify adjectives.

4. Using Pronouns

- In this section, you will identify pronouns that agree with their antecedents in number and person.
- In this section, you will compose sentences with the relative pronouns whose, who, and whom correctly.
- In this section, you will compose sentences with the relative pronouns which and that correctly.

5. Direct and Indirect Objects

- In this section, you will identify and use indirect and direct objects.

6. Using Correct Punctuation

- In this section, you will demonstrate correct comma usage in sentence writing.
- In this section, you will demonstrate correct apostrophe usage in contractions to show ownership when writing sentences.
- In this section, you will use quotation marks correctly in sentences to identify titles

and spoken words.

7. Using a Comma

- In this section, you will select correct comma usage when separating coordinate adjectives.

8. Using Semicolons

- In this section, you will write sentences, replacing commas with semicolons in a series.
- In this section, you will compose sentences with colons and semicolons.

9. Grammar and Punctuation Apply

- In this section, you will compose a funny paragraph about grammar and punctuation that includes specific types of sentences.

10. Grammar and Punctuation Review

11. Grammar and Punctuation Unit Test

5. Writing Informative Text

1. Writing Informative Text Introduction

2. Writing an Introduction

- In this section, you will write an interesting introduction that follows a model.

3. Organizing Informational Text

- In this section, you will identify four ways of organizing an informative or explanatory text.
- In this section, you will compose a paragraph using time order structure.

4. Adding Graphics and Multimedia

- In this section, you will select graphics or multimedia elements to improve an informative or explanatory text.

5. Developing a Topic

- In this section, you will select definitions or facts to develop a topic for an informative or explanatory text.

6. Using Transitions

- In this section, you will select transitions to connect ideas in an informative or explanatory text.
- In this section, you will identify how transitions change the meaning of a sentence.

7. Using Precise and Formal Language

- In this section, you will compose sentences with precise, formal language.

8. Writing an Effective Conclusion

- In this section, you will compose a conclusion to an informative or explanatory text using a model.

9. Writing Informative Text Portfolio 1

- In this section, you will create a writing plan for an informative or explanatory essay of your own.
- In this section, you will rewrite a paragraph so that the writing is concise.

10. Writing Informative Text Portfolio 2

- In this section, you will select words that express your ideas concisely and precisely.
- In this section, you will correct your draft using a revising and editing checklist.
- In this section, you will correct misspelled words when editing your draft.

11. Writing Informative Text Portfolio 3

- In this section, you will create a bibliography of online sources for your essay.
- In this section, you will assess how well your essay fulfills its purpose and meets the needs of your audience.

12. Writing Informative Text Text Review

13. Writing Informative Text Unit Test

6. **Building Vocabulary**

1. Building Vocabulary Introduction

2. Understanding Context Clues

- In this section, you will identify the meaning of an unfamiliar word using context clues.
- In this section, you will interpret context clues to determine the meaning of an unfamiliar word.

3. Using Context Clues

- In this section, you will identify the meaning of an unfamiliar word using context clues, including synonyms.

4. Using Affixes and Roots

- In this section, you will identify the meaning of roots, prefixes, and suffixes.
- In this section, you will identify the meaning of words using prefixes and suffixes.
- In this section, you will identify the meaning of words using roots and affixes.

5. Purpose of Reference Materials

- In this section, you will explain the purpose of dictionaries, glossaries, and thesauruses.
- In this section, you will select the appropriate reference material to complete a task.

6. Using Reference Materials

- In this section, you will identify syllabication, parts of speech, and pronunciation with reference materials.
- In this section, you will determine the translation and pronunciation of a word using an online dictionary.

7. Etymological Spelling Patterns

- In this section, you will apply Greek and Latin etymologies to determine the meaning of words.

8. Building Vocabulary Apply

- In this section, you will determine the meaning of an unfamiliar word or phrase using a variety of strategies.

9. Building Vocabulary Review and Reflect

10. Building Vocabulary Unit Test

7. **Analyzing Informational Text**

1. Analyzing Informational Text Introduction

2. Analyzing Info Text Portfolio 1

- In this section, you will analyze the organizational structure an author uses in an informational text, including how the major sections of an informational text contribute to the development of ideas in the text, and contribute to the whole.

3. Analyzing Info Text Portfolio 2

- In this section, you will determine an author's purpose and point of view in an informational text.

4. Analyzing Info Text Portfolio 3

- In this section, you will analyze how an author distinguishes his or her position from that of others in an informational text.

5. Comparing Print and Media

- In this section, you will compare a printed informational text to an audio or video version of the text.

6. Tracing an Argument

- In this section, you will identify the author's claim, reasons, and evidence in an

informational text.

7. Assessing Reasoning

- In this section, you will assess the effectiveness of an author’s reasoning in an informational text.

8. Evaluating Evidence

- In this section, you will assess whether the supporting evidence in an argument is logical and sufficient.

9. Emphasizing Different Evidence

- In this section, you will compare the ways in which different authors present evidence in an informational text.

10. Interpreting Facts

- In this section, you will interpret facts in an informational presentation.

11. Analyzing Informational Text Apply

- In this section, you will contrast the positions, claims, and evidence in two informational texts.

12. Analyzing Informational Text Review

13. Analyzing Informational Text Unit Test

8. Writing an Argument

1. Writing an Argument Introduction

2. Developing Claims

- In this section, you will write supported claims.

3. Opposing Claims

- In this section, you will create an opposing claim.
- In this section, you will create two opposing claims.

4. Organizing Reasons and Evidence

- In this section, you will identify evidence that supports a reason. You also will write organized reasons to support a claim.

5. Identifying Credible Sources

- In this section, you will evaluate credibility of a source using the CUES system.

6. Claims, Reasons and Evidence

- In this section, you will differentiate between claims, reasons, and evidence.
- In this section, you will explain how a claim, reasons, and evidence in an argument are related.

7. Cohesion

- In this section, you will write a paragraph with clarifying words that connect ideas.

8. Concluding an Argument

- In this section, you will compose a strong conclusion.

9. Writing an Argument: Portfolio 1

- In this section, you will create a writing plan for an argument of your own.
- In this section, you will revise a paragraph to combine or vary sentences.

10. Writing an Argument: Portfolio 2

- In this section, you will use language that expresses the ideas in your argument concisely and precisely. You also will recognize other points of view.
- In this section, you will identify revisions and edits in an argument.
- In this section, you will correct spelling mistakes in a draft using reference materials as needed.

11. Writing an Argument: Portfolio 3

- In this section, you will write a works cited list of online sources.
- In this section, you will assess how well your argument fulfills its purpose and meets the needs of your audience.

12. Writing an Argument Review
13. Writing an Argument Unit Test

9. Cultural Literacy

1. Cultural Literacy Introduction
2. Understanding Oral Tradition
 - In this section, you will identify features in an oral tradition tale told by one culture.
 - In this section, you will explain how the theme, plot, and characters in a literary tale reflect a culture's customs and attitudes.
3. Structure of Cultural Literature
 - In this section, you will explain how the structure of a literary tale presents a problem and a solution that affects the culture in some way.
 - In this section, you will identify heritage language and its effects on English speech patterns.
4. Recognizing Heritage
 - In this section, you will explain how a folktale reflects a culture's heritage or attitudes.
 - In this section, you will explain how a literary tale reflects a culture's values.
5. Comparing Events and Texts
 - In this section, you will identify how different accounts of the same event are similar and how they are different.
 - In this section, you will compare and contrast different people's accounts of the same text.
6. Cultural Literacy Apply
 - In this section, you will analyze a cultural work of literature.
7. Cultural Literacy Review and Reflect
8. Cultural Literacy Unit Test

Semester B Summary: In this course, the student will focus on reading, writing, and analyzing informational and narrative texts, as well as developing their vocabulary and grammatical knowledge. The student will read classics including Great Expectations and Peter Pan, as well as non-fiction historical texts.

Semester B Outline

1. Course Overview

1. Language Arts 7 B Course Overview

2. Speaking and Listening

1. Discussion Evidence
 - In this section, you will collaborate using technology.
 - In this section, you will identify ways to prepare for a discussion.
 - In this section, you will defend your ideas and opinions in a discussion.
2. Discussion Protocols
 - In this section, you will identify rules for discussion.
 - In this section, you will identify questions that clarify comments made in a discussion.
 - In this section, you will explain how to effectively respond to questions and comments during a discussion.
3. Speaking and Listening Apply
 - In this section, you will interpret how hype or propaganda may bias reporting today, based on analyzing a 1912 article about the Titanic and media bias.
4. Semester B: Speaking and Listening Apply

3. Novel Study Introduction

1. Elements of Fiction

- In this section, you will identify ways in which an author develops characters in a novel.
- In this section, you will describe the basic elements that give structure to the plot of a literary text (a novel).
- In this section, you will describe details of time and place that provide the setting for a literary text (a novel).

2. Choosing a Novel

- In this section, you will identify strategies for choosing a novel appropriate to your reading level.
- In this section, you will identify information learned about a book by previewing the front matter.
- In this section, you will predict the central idea of the novel before reading it.

4. Reading Literary Text

1. Reading Literary Text Introduction

2. Determining Genre

- In this section, you will identify a variety of literary genres using characteristics.
- In this section, you will create a story that contains characteristics of a specific literary genre.

3. Inferential and Explicit Evidence

- In this section, you will identify explicit and implicit details using text evidence.

4. Central Idea or Theme

- In this section, you will locate text evidence to determine the central idea of a text.
- In this section, you will explain how details of character, plot, setting, and symbol develop the theme or central idea of a literary text.

5. Summarizing Literary Text

- In this section, you will summarize the main points of a literary text, without including your opinion.

6. Interaction of Story Elements

- In this section, you will explain how the plot, characters, and setting in a story or drama affect each other.

7. Figurative and Connotative Meaning

- In this section, you will determine the meaning of figurative language and the feelings or ideas suggested by a word or phrase (connotations).

8. Rhyme and Alliteration

- In this section, you will explain how rhyme and repeated sounds affect meaning in a literary text.

9. Reading Literary Text Apply

- In this section, you will compose an analytical paragraph that identifies a theme of a short story.

10. Reading Literary Text Review

11. Reading Literary Text Unit Test

5. Novel Study 2

1. Novel Study 2

- In this section, you will analyze story elements to determine the central idea of a novel.
- In this section, you will explain how an author develops a novel's central idea.
- In this section, you will summarize a chapter of a novel.

6. Language and Style

1. Language and Style Introduction
2. Allusions and Figures of Speech
 - In this section, you will identify allusions and other figures of speech.
3. Synonyms and Antonyms
 - In this section, you will identify the relationship between words, such as synonyms and antonyms, to better understand their meanings.
4. Analogies
 - In this section, you will recognize that the relationship between words in an analogy helps you understand their meanings.
5. Connotations vs. Denotations
 - In this section, you will distinguish between the emotional and literal meanings of similar words.
6. Stylistic Techniques
 - In this section, you will identify stylistic techniques in a poem that add interest and meaning.
 - In this section, you will identify figurative language, such as similes, metaphors, and personification.
7. Language and Style Apply
 - In this section, you will write a descriptive paragraph about a favorite person, place, or possession.
8. Language and Style Review and Reflect
9. Language and Style Unit Test

7. Novel Study 3

1. Novel Study 3
 - In this section, you will use text details to identify and describe the narrator of a novel.
 - In this section, you will use text details to identify and describe main characters (protagonists) and characters who oppose them (antagonists) in a novel.
 - In this section, you will compare and contrast the points of view of characters in a novel.

8. Writing a Narrative

1. Writing a Narrative Introduction
2. Introducing a Narrative
 - In this section, you will analyze the introductions of stories and then write an engaging introduction of your own.
3. Sequencing and Transitions
 - In this section, you will organize a logical sequence of events in a story.
 - In this section, you will use transition words, phrases, and clauses to show a sequence of events and shifts in setting and time as you write a story.
4. Using Dialogue
 - In this section, you will write dialogue to develop the characters and events in a story.
5. Pacing and Description
 - In this section, you will write descriptions and use pacing to develop the characters and events in a story.
6. Description and Sensory Language
 - In this section, you will use precise sensory language to describe actions and events as you write a story.
7. Language and Style

- In this section, you will use figurative language, such as similes, metaphors, and personification, in your writing.
- In this section, you will identify and analyze ways that writers use language to add interest in and meaning to their writing, and use these stylistic techniques in your writing.

8. Writing a Conclusion

- In this section, you will write an effective conclusion to a narrative.

9. Writing a Narrative Portfolio 1

- In this section, you will analyze a sample writing plan and then complete a writing plan to develop your ideas for a story.
- In this section, you will identify and remove wordiness and repeated details in your writing.

10. Writing a Narrative Portfolio 2

- In this section, you will refine your word choices to express the ideas in your writing more precisely.
- In this section, you will correct spelling errors in your writing.
- In this section, you will revise and edit your story to improve your writing.

11. Writing a Narrative Portfolio 3

- In this section, you will use technology to create a final copy of your story.
- In this section, you will assess how well your writing addresses its purpose and audience.

12. Writing a Narrative Review and Reflect

13. Writing a Narrative Unit Test

9. **Novel Study 4**

1. Novel Study 4

- In this section, you will explain how details of setting affect the characters and plot of a novel.
- In this section, you will explain how characters' traits and actions affect the plot and theme of a novel.
- In this section, you will explain how plot events affect the characters and theme of a novel.

10. **Analyzing Literary Text**

1. Analyzing Literary Text Introduction

2. Drama Form and Structure

- In this section, you will analyze how the structure of a drama affects its meaning.

3. Poem Form and Structure

- In this section, you will analyze how the form of a poem affects its meaning.

4. Analyzing Literary Text Portfolio 1

- In this section, you will analyze how an author develops and contrasts the points of view of different characters in a text.
- In this section, you will analyze the points of view of different characters in stories.

5. Analyzing Literary Text Portfolio 2

- In this section, you will identify plot elements, such as conflict and climax, in stories.
- In this section, you will identify how conflict, characters, and setting affect the plots of stories.
- In this section, you will evaluate figurative language in stories.

6. Analyzing Literary Text Portfolio 3

- In this section, you will evaluate the use of literary devices to support your interpretations of stories.

- In this section, you will analyze the effects of repeated images in stories.
- In this section, you will write a story from two different points of view.

7. Comparing Text and Media

- In this section, you will analyze how the experience of reading a poem is similar to and different from the experience of listening to an audio version of the poem.

8. Analyzing Literary Text Apply

- In this section, you will summarize a short story, drama, or narrative poem and identify its main characters, setting, and plot.

9. Analyzing Literary Text Review

10. Analyzing Literary Text Unit Test

11. **Novel Study 5**

1. Novel Study 5

- In this section, you will compare and contrast fictional and historical portrayals of the same time period.
- In this section, you will compare and contrast the fictional description of a place with historical information about the same place.
- In this section, you will compare and contrast the fictional portrayal of a character with historical information about the same character.

12. **Grammar and Punctuation II**

1. Grammar and Punctuation II Introduction

2. Phrases and Clauses

- In this section, you will identify and explain the function of phrases and clauses in sentences.

3. Simple, Compound, Complex Sentences

- In this section, you will identify simple, compound, complex, and compound-complex sentences.

4. Sentence Structure Signals

- In this section, you will explain how sentence structures show relationships between ideas.

5. Choosing Sentence Structure

- In this section, you will choose sentence structures that best express specific relationships between ideas.

6. More Phrases and Clauses

- In this section, you will use modifiers, such as descriptive phrases and clauses, correctly within a sentence. You will also identify and correct modifiers and pronouns that are not used correctly in sentences.
- In this section, you will use commas correctly in sentences with dependent/subordinate clauses.
- In this section, you will explain how changing the placement of a phrase or clause can affect the meaning of a sentence and add variety to your writing.

7. Grammar and Punctuation II Apply

- In this section, you will write a paragraph about your favorite free-time activity.

8. Grammar and Punctuation II Review

9. Grammar and Punctuation II Unit Test

13. **Novel Study 6**

1. Novel Study 6

- In this section, you will identify and use ways to determine the theme of a novel.
- In this section, you will explain how plot events, details of setting, and characters' experiences help to shape a novel's theme.

- In this section, you will write a literary analysis of a novel, focusing on the novel's plot, characters, and setting, and theme.

14. **Research and Presentation**

1. Research and Presentation Introduction

2. Conducting Research

- In this section, you will conduct a research project to answer a question and gather information from several sources.

3. Search Terms

- In this section, you will create and use search terms to find information on the internet.

4. Research Sources

- In this section, you will gather information from at least three sources. You will also assess sources of information and provide citations for the sources of information that you use in your writing.

5. Avoiding Plagiarism

- In this section, you will provide citations to avoid plagiarism when quoting and paraphrasing information in your writing.

6. Clarifying the Topic

- In this section, you will explain how ideas presented in different media and formats can help you better understand a topic.

7. Sound Reasoning

- In this section, you will identify the intended audience of a speaker's argument.
- In this section, you will evaluate the reasoning that a speaker uses to support an argument.

8. Evidence

- In this section, you will evaluate the evidence that a speaker uses to support claims in an argument.

9. Research and Presentation Portfolio 1

- In this section, you will identify a claim for a research project and create an outline for a presentation of your claim and research findings.
- In this section, you will create an outline for a presentation based on your claim and research findings.
- In this section, you will use facts, details, and examples to support and emphasize claims in a presentation.
- In this section, you will identify ways to change and improve your presentation based on its purpose, context, and audience.

10. Research and Presentation Portfolio 2

- In this section, you will identify and remove wordiness and repeated details to improve a presentation.
- In this section, you will evaluate the language in a presentation and improve the presentation by using a thesaurus to replace imprecise words and phrases.
- In this section, you will add a multimedia component, such as a video, to support the claims and findings in your presentation.
- In this section, you will add visuals, such as photographs or charts, to clarify the claims in your presentation.

11. Research and Presentation Portfolio 3

- In this section, you will make eye contact, speak loudly, and pronounce words clearly as you deliver a presentation.
- In this section, you will identify examples of informal and formal language and make revisions to use formal English in your presentation.

12. Research and Presentation Review
13. Research and Presentation Unit Test

15. **Media Literacy**

1. Media Literacy Introduction
2. Mass Media
 - In this section, you will define mass media and explain the purposes of different types of media.
 - In this section, you will evaluate information presented in different types of mass media.
 - In this section, you will evaluate the purpose of different types of mass media and the messages they provide.
3. Propaganda and Bias
 - In this section, you will identify techniques that are used by the media to influence people's opinions and behaviors
 - In this section, you will define bias and stereotyping and describe how the media uses bias and stereotyping to influence people's opinions and behaviors.
4. Point of View
 - In this section, you will analyze the messages and points of view expressed in advertising.
 - In this section, you will analyze the messages and points of view expressed in news programs and documentaries.
 - In this section, you will analyze the messages and points of view expressed in websites, video games, and blogs.
5. Safe Practices, Ethics, and Fair Use
 - In this section, you will identify ethical standards and explain why they are important to people who use social media.
 - In this section, you will identify ways to stay safe when using social media sites.
 - In this section, you will explain the principles of fair use and identify factors that affect how people can use a copyrighted work.
6. Citations and Attributions
 - In this section, you will define *copyright* and *attribution* and identify when you should use an attribution to give credit to an author or source of information.
 - In this section, you will provide citations when using information from sources in your writing.
 - In this section, you will describe the types of licenses that Creative Commons provides and how the licenses affect how materials can be used.
7. Media Literacy: Apply
 - In this section, you will explain how to identify, evaluate, and use information from media sources.
8. Media Literacy Review and Reflect
9. Media Literacy Unit Test

Language Arts 7 Accelerated

Accelerated Language Arts 7 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, the student will focus on reading, writing, and analyzing informational and narrative texts, as well as developing their vocabulary and grammatical knowledge. The student will read poetry by Lewis Carroll and Daniel Beatty, short stories, and informational texts on Rosa Parks and Army Code. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester A Outline

1. Course Overview

1. ELA 7 A Course Overview

2. Speaking and Listening

1. Discussion Evidence
 - In this section, you will collaborate using technology.
 - In this section, you will identify ways to prepare for a discussion.
 - In this section, you will defend your ideas and opinions in a discussion.
2. Discussion Protocols
 - In this section, you will identify rules for discussion.
 - In this section, you will identify questions that clarify comments made in a discussion.
 - In this section, you will explain how to effectively respond to questions and comments during a discussion.
3. Speaking and Listening Apply
 - In this section, you will formulate an opinion about how an 1865 news account of the assassination of President Lincoln might be presented in today's 24-hour news cycle and discuss it with your peers.
4. Speaking and Listening Apply Discussion

3. Reading Informational Text

1. Reading Informational Text Introduction
2. Two or More Central Ideas
 - In this section, you will identify two or more central ideas in a text.
3. Analyzing Central Ideas
 - In this section, you will explain how authors use evidence to develop two or more central ideas in a text.
4. Determining Genre
 - In this section, you will identify a variety of informational/nonfiction genres, and

then analyze details of a text to identify its genre.

5. Summarizing Text

- In this section, you will summarize the facts in a text, without including your opinion.

6. Analyzing Interactions

- In this section, you will discuss cause and effect relationships between people, events, and ideas in an informational text.

7. Meaning and Word Choice

- In this section, you will define words and phrases in an informational text using context clues.
- In this section, you will explain the effect of word choices defined through the use of context clues.

8. Identifying Evidence

- In this section, you will locate evidence to support an analysis in an informational text.
- In this section, you will select evidence to support an analysis of an informational paragraph.
- In this section, you will identify evidence to support a contradictory analysis.

9. Providing Evidence

- In this section, you will identify evidence that supports a statement in an informational text.

10. Supporting Inferences

- In this section, you will identify evidence that supports an implied idea (an inference) in an informational text.

11. Reading Informational Text Apply

- In this section, you will analyze an informational article about Jackie Robinson.

12. Reading Informational Review/Reflect

13. Reading Informational Text Unit Test

4. Grammar and Punctuation

1. Grammar and Punctuation Introduction

2. Subject and Verb Agreement

- In this section, you will identify subject-verb agreement when a prepositional phrase comes between the subject and the verb.
- In this section, you will identify subject-verb agreement when the subject follows the verb (inverted word order) and when the subject is an indefinite pronoun.
- In this section, you will identify subject-verb agreement when the subject names a group of people or things (a collective noun).

3. Adjectives and Adverbs

- In this section, you will construct compound adjectives.
- In this section, you will select adverbs that modify adjectives.

4. Using Pronouns

- In this section, you will identify pronouns that agree with their antecedents in number and person.
- In this section, you will compose sentences with the relative pronouns whose, who, and whom correctly.
- In this section, you will compose sentences with the relative pronouns which and that correctly.

5. Direct and Indirect Objects

- In this section, you will identify and use indirect and direct objects.

6. Using Correct Punctuation
 - In this section, you will demonstrate correct comma usage in sentence writing.
 - In this section, you will demonstrate correct apostrophe usage in contractions to show ownership when writing sentences.
 - In this section, you will use quotation marks correctly in sentences to identify titles and spoken words.
7. Using a Comma
 - In this section, you will select correct comma usage when separating coordinate adjectives.
8. Using Semicolons
 - In this section, you will write sentences, replacing commas with semicolons in a series.
 - In this section, you will compose sentences with colons and semicolons.
9. Grammar and Punctuation Apply
 - In this section, you will compose a funny paragraph about grammar and punctuation that includes specific types of sentences.
10. Grammar and Punctuation Review
11. Grammar and Punctuation Unit Test

5. Writing Informative Text

1. Writing Informative Text Introduction
2. Writing an Introduction
 - In this section, you will write an interesting introduction that follows a model.
3. Organizing Informational Text
 - In this section, you will identify four ways of organizing an informative or explanatory text.
 - In this section, you will compose a paragraph using time order structure.
4. Adding Graphics and Multimedia
 - In this section, you will select graphics or multimedia elements to improve an informative or explanatory text.
5. Developing a Topic
 - In this section, you will select definitions or facts to develop a topic for an informative or explanatory text.
6. Using Transitions
 - In this section, you will select transitions to connect ideas in an informative or explanatory text.
 - In this section, you will identify how transitions change the meaning of a sentence.
7. Using Precise and Formal Language
 - In this section, you will compose sentences with precise, formal language.
8. Writing an Effective Conclusion
 - In this section, you will compose a conclusion to an informative or explanatory text using a model.
9. Writing Informative Text Portfolio 1
 - In this section, you will create a writing plan for an informative or explanatory essay of your own.
 - In this section, you will rewrite a paragraph so that the writing is concise.
10. Writing Informative Text Portfolio 2
 - In this section, you will select words that express your ideas concisely and precisely.
 - In this section, you will correct your draft using a revising and editing checklist.

- In this section, you will correct misspelled words when editing your draft.
11. Writing Informative Text Portfolio 3
 - In this section, you will create a bibliography of online sources for your essay.
 - In this section, you will assess how well your essay fulfills its purpose and meets the needs of your audience.
 12. Writing Informative Text Text Review
 13. Writing Informative Text Unit Test

6. Building Vocabulary

1. Building Vocabulary Introduction
2. Understanding Context Clues
 - In this section, you will identify the meaning of an unfamiliar word using context clues.
 - In this section, you will interpret context clues to determine the meaning of an unfamiliar word.
3. Using Context Clues
 - In this section, you will identify the meaning of an unfamiliar word using context clues, including synonyms.
4. Using Affixes and Roots
 - In this section, you will identify the meaning of roots, prefixes, and suffixes.
 - In this section, you will identify the meaning of words using prefixes and suffixes.
 - In this section, you will identify the meaning of words using roots and affixes.
5. Purpose of Reference Materials
 - In this section, you will explain the purpose of dictionaries, glossaries, and thesauruses.
 - In this section, you will select the appropriate reference material to complete a task.
6. Using Reference Materials
 - In this section, you will identify syllabication, parts of speech, and pronunciation with reference materials.
 - In this section, you will determine the translation and pronunciation of a word using an online dictionary.
7. Etymological Spelling Patterns
 - In this section, you will apply Greek and Latin etymologies to determine the meaning of words.
8. Building Vocabulary Apply
 - In this section, you will determine the meaning of an unfamiliar word or phrase using a variety of strategies.
9. Building Vocabulary Review and Reflect
10. Building Vocabulary Unit Test

7. Analyzing Informational Text

1. Analyzing Informational Text Introduction
2. Analyzing Info Text Portfolio 1
 - In this section, you will analyze the organizational structure an author uses in an informational text, including how the major sections of an informational text contribute to the development of ideas in the text, and contribute to the whole.
3. Analyzing Info Text Portfolio 2
 - In this section, you will determine an author's purpose and point of view in an informational text.

4. Analyzing Info Text Portfolio 3
 - In this section, you will analyze how an author distinguishes his or her position from that of others in an informational text.
5. Comparing Print and Media
 - In this section, you will compare a printed informational text to an audio or video version of the text.
6. Tracing an Argument
 - In this section, you will identify the author's claim, reasons, and evidence in an informational text.
7. Assessing Reasoning
 - In this section, you will assess the effectiveness of an author's reasoning in an informational text.
8. Evaluating Evidence
 - In this section, you will assess whether the supporting evidence in an argument is logical and sufficient.
9. Emphasizing Different Evidence
 - In this section, you will compare the ways in which different authors present evidence in an informational text.
10. Interpreting Facts
 - In this section, you will interpret facts in an informational presentation.
11. Analyzing Informational Text Apply
 - In this section, you will contrast the positions, claims, and evidence in two informational texts.
12. Analyzing Informational Text Review
13. Analyzing Informational Text Unit Test

8. Writing an Argument

1. Writing an Argument Introduction
2. Developing Claims
 - In this section, you will write supported claims.
3. Opposing Claims
 - In this section, you will create an opposing claim.
 - In this section, you will create two opposing claims.
4. Organizing Reasons and Evidence
 - In this section, you will identify evidence that supports a reason. You also will write organized reasons to support a claim.
5. Identifying Credible Sources
 - In this section, you will evaluate credibility of a source using the CUES system.
6. Claims, Reasons and Evidence
 - In this section, you will differentiate between claims, reasons, and evidence.
 - In this section, you will explain how a claim, reasons, and evidence in an argument are related.
7. Cohesion
 - In this section, you will write a paragraph with clarifying words that connect ideas.
8. Concluding an Argument
 - In this section, you will compose a strong conclusion.
9. Writing an Argument: Portfolio 1
 - In this section, you will create a writing plan for an argument of your own.
 - In this section, you will revise a paragraph to combine or vary sentences.
10. Writing an Argument: Portfolio 2

- In this section, you will use language that expresses the ideas in your argument concisely and precisely. You also will recognize other points of view.
- In this section, you will identify revisions and edits in an argument.
- In this section, you will correct spelling mistakes in a draft using reference materials as needed.

11. Writing an Argument: Portfolio 3

- In this section, you will write a works cited list of online sources.
- In this section, you will assess how well your argument fulfills its purpose and meets the needs of your audience.

12. Writing an Argument Review

13. Writing an Argument Unit Test

9. Cultural Literacy

1. Cultural Literacy Introduction

2. Understanding Oral Tradition

- In this section, you will identify features in an oral tradition tale told by one culture.
- In this section, you will explain how the theme, plot, and characters in a literary tale reflect a culture's customs and attitudes.

3. Structure of Cultural Literature

- In this section, you will explain how the structure of a literary tale presents a problem and a solution that affects the culture in some way.
- In this section, you will identify heritage language and its effects on English speech patterns.

4. Recognizing Heritage

- In this section, you will explain how a folktale reflects a culture's heritage or attitudes.
- In this section, you will explain how a literary tale reflects a culture's values.

5. Comparing Events and Texts

- In this section, you will identify how different accounts of the same event are similar and how they are different.
- In this section, you will compare and contrast different people's accounts of the same text.

6. Cultural Literacy Apply

- In this section, you will analyze a cultural work of literature.

7. Cultural Literacy Review and Reflect

8. Cultural Literacy Unit Test

Semester B Summary: In this course, the student will focus on reading, writing, and analyzing informational and narrative texts, as well as developing their vocabulary and grammatical knowledge. The student will read classics including *Great Expectations* and *Peter Pan*, as well as non-fiction historical texts. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester B Outline

1. Course Overview

1. Language Arts 7 B Course Overview

2. Speaking and Listening

1. Discussion Evidence

- In this section, you will collaborate using technology.

- In this section, you will identify ways to prepare for a discussion.
 - In this section, you will defend your ideas and opinions in a discussion.
2. Discussion Protocols
 - In this section, you will identify rules for discussion.
 - In this section, you will identify questions that clarify comments made in a discussion.
 - In this section, you will explain how to effectively respond to questions and comments during a discussion.
 3. Speaking and Listening Apply
 - In this section, you will interpret how hype or propaganda may bias reporting today, based on analyzing a 1912 article about the Titanic and media bias.
 4. Speaking and Listening Apply Discussion

3. Novel Study Introduction

1. Elements of Fiction
 - In this section, you will identify ways in which an author develops characters in a novel.
 - In this section, you will describe the basic elements that give structure to the plot of a literary text (a novel).
 - In this section, you will describe details of time and place that provide the setting for a literary text (a novel).
2. Choosing a Novel
 - In this section, you will identify strategies for choosing a novel appropriate to your reading level.
 - In this section, you will identify information learned about a book by previewing the front matter.
 - In this section, you will predict the central idea of the novel before reading it.

4. Reading Literary Text

1. Reading Literary Text Introduction
2. Determining Genre
 - In this section, you will identify a variety of literary genres using characteristics.
 - In this section, you will create a story that contains characteristics of a specific literary genre.
3. Inferential and Explicit Evidence
 - In this section, you will identify explicit and implicit details using text evidence.
4. Central Idea or Theme
 - In this section, you will locate text evidence to determine the central idea of a text.
 - In this section, you will explain how details of character, plot, setting, and symbol develop the theme or central idea of a literary text.
5. Summarizing Literary Text
 - In this section, you will summarize the main points of a literary text, without including your opinion.
6. Interaction of Story Elements
 - In this section, you will explain how the plot, characters, and setting in a story or drama affect each other.
7. Figurative and Connotative Meaning
 - In this section, you will determine the meaning of figurative language and the feelings or ideas suggested by a word or phrase (connotations).
8. Rhyme and Alliteration

- In this section, you will explain how rhyme and repeated sounds affect meaning in a literary text.
9. Reading Literary Text Apply
 - In this section, you will compose an analytical paragraph that identifies a theme of a short story.
 10. Reading Literary Text Review
 11. Reading Literary Text Unit Test

5. Novel Study 2

1. Novel Study 2
 - In this section, you will analyze story elements to determine the central idea of a novel.
 - In this section, you will explain how an author develops a novel's central idea.
 - In this section, you will summarize a chapter of a novel.

6. Language and Style

1. Language and Style Introduction
2. Allusions and Figures of Speech
 - In this section, you will identify allusions and other figures of speech.
3. Synonyms and Antonyms
 - In this section, you will identify the relationship between words, such as synonyms and antonyms, to better understand their meanings.
4. Analogies
 - In this section, you will recognize that the relationship between words in an analogy helps you understand their meanings.
5. Connotations vs. Denotations
 - In this section, you will distinguish between the emotional and literal meanings of similar words.
6. Stylistic Techniques
 - In this section, you will identify stylistic techniques in a poem that add interest and meaning.
 - In this section, you will identify figurative language, such as similes, metaphors, and personification.
7. Language and Style Apply
 - In this section, you will write a descriptive paragraph about a favorite person, place, or possession.
8. Language and Style Review and Reflect
9. Language and Style Unit Test

7. Novel Study 3

1. Novel Study 3
 - In this section, you will use text details to identify and describe the narrator of a novel.
 - In this section, you will use text details to identify and describe main characters (protagonists) and characters who oppose them (antagonists) in a novel.
 - In this section, you will compare and contrast the points of view of characters in a novel.

8. Writing a Narrative

1. Writing a Narrative Introduction
2. Introducing a Narrative

- In this section, you will analyze the introductions of stories and then write an engaging introduction of your own.

3. Sequencing and Transitions

- In this section, you will organize a logical sequence of events in a story.
- In this section, you will use transition words, phrases, and clauses to show a sequence of events and shifts in setting and time as you write a story.

4. Using Dialogue

- In this section, you will write dialogue to develop the characters and events in a story.

5. Pacing and Description

- In this section, you will write descriptions and use pacing to develop the characters and events in a story.

6. Description and Sensory Language

- In this section, you will use precise sensory language to describe actions and events as you write a story.

7. Language and Style

- In this section, you will use figurative language, such as similes, metaphors, and personification, in your writing.
- In this section, you will identify and analyze ways that writers use language to add interest in and meaning to their writing, and use these stylistic techniques in your writing.

8. Writing a Conclusion

- In this section, you will write an effective conclusion to a narrative.

9. Writing a Narrative Portfolio 1

- In this section, you will analyze a sample writing plan and then complete a writing plan to develop your ideas for a story.
- In this section, you will identify and remove wordiness and repeated details in your writing.

10. Writing a Narrative Portfolio 2

- In this section, you will refine your word choices to express the ideas in your writing more precisely.
- In this section, you will correct spelling errors in your writing.
- In this section, you will revise and edit your story to improve your writing.

11. Writing a Narrative Portfolio 3

- In this section, you will use technology to create a final copy of your story.
- In this section, you will assess how well your writing addresses its purpose and audience.

12. Writing a Narrative Review and Reflect

13. Writing a Narrative Unit Test

9. Novel Study 4

1. Novel Study 4

- In this section, you will explain how details of setting affect the characters and plot of a novel.
- In this section, you will explain how characters' traits and actions affect the plot and theme of a novel.
- In this section, you will explain how plot events affect the characters and theme of a novel.

10. Analyzing Literary Text

1. Analyzing Literary Text Introduction

2. Drama Form and Structure

- In this section, you will analyze how the structure of a drama affects its meaning.
3. Poem Form and Structure
 - In this section, you will analyze how the form of a poem affects its meaning.
 4. Analyzing Literary Text Portfolio 1
 - In this section, you will analyze how an author develops and contrasts the points of view of different characters in a text.
 - In this section, you will analyze the points of view of different characters in stories.
 5. Analyzing Literary Text Portfolio 2
 - In this section, you will identify plot elements, such as conflict and climax, in stories.
 - In this section, you will identify how conflict, characters, and setting affect the plots of stories.
 - In this section, you will evaluate figurative language in stories.
 6. Analyzing Literary Text Portfolio 3
 - In this section, you will evaluate the use of literary devices to support your interpretations of stories.
 - In this section, you will analyze the effects of repeated images in stories.
 - In this section, you will write a story from two different points of view.
 7. Comparing Text and Media
 - In this section, you will analyze how the experience of reading a poem is similar to and different from the experience of listening to an audio version of the poem.
 8. Analyzing Literary Text Apply
 - In this section, you will summarize a short story, drama, or narrative poem and identify its main characters, setting, and plot.
 9. Analyzing Literary Text Review
 10. Analyzing Literary Text Unit Test
- 11. Novel Study 5**
1. Novel Study 5
 - In this section, you will compare and contrast fictional and historical portrayals of the same time period.
 - In this section, you will compare and contrast the fictional description of a place with historical information about the same place.
 - In this section, you will compare and contrast the fictional portrayal of a character with historical information about the same character.
- 12. Grammar and Punctuation II**
1. Grammar and Punctuation II Introduction
 2. Phrases and Clauses
 - In this section, you will identify and explain the function of phrases and clauses in sentences.
 3. Simple, Compound, Complex Sentences
 - In this section, you will identify simple, compound, complex, and compound-complex sentences.
 4. Sentence Structure Signals
 - In this section, you will explain how sentence structures show relationships between ideas.
 5. Choosing Sentence Structure
 - In this section, you will choose sentence structures that best express specific relationships between ideas.
 6. More Phrases and Clauses

- In this section, you will use modifiers, such as descriptive phrases and clauses, correctly within a sentence. You will also identify and correct modifiers and pronouns that are not used correctly in sentences.
 - In this section, you will use commas correctly in sentences with dependent/subordinate clauses.
 - In this section, you will explain how changing the placement of a phrase or clause can affect the meaning of a sentence and add variety to your writing.
7. Grammar and Punctuation II Apply
 - In this section, you will write a paragraph about your favorite free-time activity.
 8. Grammar and Punctuation II Review
 9. Grammar and Punctuation II Unit Test

13. **Novel Study 6**

1. Novel Study 6
 - In this section, you will identify and use ways to determine the theme of a novel.
 - In this section, you will explain how plot events, details of setting, and characters' experiences help to shape a novel's theme.
 - In this section, you will write a literary analysis of a novel, focusing on the novel's plot, characters, and setting, and theme.

14. **Research and Presentation**

1. Research and Presentation Introduction
2. Conducting Research
 - In this section, you will conduct a research project to answer a question and gather information from several sources.
3. Search Terms
 - In this section, you will create and use search terms to find information on the internet.
4. Research Sources
 - In this section, you will gather information from at least three sources. You will also assess sources of information and provide citations for the sources of information that you use in your writing.
5. Avoiding Plagiarism
 - In this section, you will provide citations to avoid plagiarism when quoting and paraphrasing information in your writing.
6. Clarifying the Topic
 - In this section, you will explain how ideas presented in different media and formats can help you better understand a topic.
7. Sound Reasoning
 - In this section, you will identify the intended audience of a speaker's argument.
 - In this section, you will evaluate the reasoning that a speaker uses to support an argument.
8. Evidence
 - In this section, you will evaluate the evidence that a speaker uses to support claims in an argument.
9. Research and Presentation Portfolio 1
 - In this section, you will identify a claim for a research project and create an outline for a presentation of your claim and research findings.
 - In this section, you will create an outline for a presentation based on your claim and research findings.

- In this section, you will use facts, details, and examples to support and emphasize claims in a presentation.
- In this section, you will identify ways to change and improve your presentation based on its purpose, context, and audience.

10. Research and Presentation Portfolio 2

- In this section, you will identify and remove wordiness and repeated details to improve a presentation.
- In this section, you will evaluate the language in a presentation and improve the presentation by using a thesaurus to replace imprecise words and phrases.
- In this section, you will add a multimedia component, such as a video, to support the claims and findings in your presentation.
- In this section, you will add visuals, such as photographs or charts, to clarify the claims in your presentation.

11. Research and Presentation Portfolio 3

- In this section, you will make eye contact, speak loudly, and pronounce words clearly as you deliver a presentation.
- In this section, you will identify examples of informal and formal language and make revisions to use formal English in your presentation.

12. Research and Presentation Review

13. Research and Presentation Unit Test

15. Media Literacy

1. Media Literacy Introduction

2. Mass Media

- In this section, you will define mass media and explain the purposes of different types of media.
- In this section, you will evaluate information presented in different types of mass media.
- In this section, you will evaluate the purpose of different types of mass media and the messages they provide.

3. Propaganda and Bias

- In this section, you will identify techniques that are used by the media to influence people's opinions and behaviors
- In this section, you will define bias and stereotyping and describe how the media uses bias and stereotyping to influence people's opinions and behaviors.

4. Point of View

- In this section, you will analyze the messages and points of view expressed in advertising.
- In this section, you will analyze the messages and points of view expressed in news programs and documentaries.
- In this section, you will analyze the messages and points of view expressed in websites, video games, and blogs.

5. Safe Practices, Ethics, and Fair Use

- In this section, you will identify ethical standards and explain why they are important to people who use social media.
- In this section, you will identify ways to stay safe when using social media sites.
- In this section, you will explain the principles of fair use and identify factors that affect how people can use a copyrighted work.

6. Citations and Attributions

- In this section, you will define *copyright* and *attribution* and identify when you should use an attribution to give credit to an author or source of information.

- In this section, you will provide citations when using information from sources in your writing.
- In this section, you will describe the types of licenses that Creative Commons provides and how the licenses affect how materials can be used.

7. Media Literacy: Apply

- In this section, you will explain how to identify, evaluate, and use information from media sources.

8. Media Literacy Review and Reflect

9. Media Literacy Unit Test

Accelerated Literature Study 7

Accelerated Literature Study 7

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

The Junior Great Books® program involves a student in reading engaging literature and participating in rich discussion. The literature included in the Junior Great Books program is chosen to spark a high level of thinking and expose the student to rich language and vocabulary. The teacher and Learning Coach use the Shared Inquiry™ method to help a student acquire the qualities and strategies of effective readers and thinkers. The student learns to read actively, noticing thoughts and questions that come to mind during the act of reading. They will also learn to use the text, their own experiences, prior knowledge, and critical and creative thinking to participate in discussions about the text. These discussions help the student answer their own questions, satisfy their curiosity, and think more deeply about the content and process of his reading.

The student reads and rereads each Junior Great Books selection. Through modeling and direct instruction, they learn to note questions and reactions to text information during these readings. These questions and reactions form the foundation for the Shared Inquiry discussion. The student also chooses writing projects as another way to understand and extend what they have read.

Course Outline

1. The Friday Everything Changed

1. The Friday Everything Changed: Lesson 1
 - Provide several pieces of textual evidence to support analysis of what the text says explicitly and of inferences drawn from a literary text.
 - Determine a central idea and a theme of a literary text.
2. The Friday Everything Changed: Lesson 2
 - Analyze how particular elements of a story or drama interact.
 - Analyze how an author develops and contrasts the points of view of different characters in a text.

2. The Secret Life of Bees

1. The Secret Life of Bees: Lesson 1
 - Provide specific textual evidence to support analysis of what the text says explicitly in an informational text.
 - Determine an author's point of view or purpose in a text.
2. The Secret Life of Bees: Lesson 2
 - Determine the meaning of words and phrases, and analyze the impact of specific word choice as they are used in an informational text.

- Analyze the organizational structure an author uses in an informational text including how the major sections of an informational text contribute to the development of ideas in the text, and contribute to the whole.
3. **My Grandmother Washes Her Feet in the Sink...**
 1. My Grandmother Washes Her Feet...: Lesson 1
 - Provide several pieces of textual evidence to support analysis of what the text says explicitly and of inferences drawn from a literary text.
 - Determine a central idea and a theme of a literary text.
 2. My Grandmother Washes Her Feet...: Lesson 2
 - Determine the figurative and connotative meanings of words and phrases in a literary text.
 - Analyze how a poem's form or structure contributes to its meaning.
 4. **The Monsters Are Due on Maple Street**
 1. The Monsters Are Due on Maple Street: Lesson 1
 - Provide several pieces of textual evidence to support analysis of what the text says explicitly and of inferences drawn from a literary text.
 - Determine a central idea and a theme of a literary text.
 2. The Monsters Are Due on Maple Street: Lesson 2
 - Analyze how particular elements of a story or drama interact.
 - Determine the figurative and connotative meanings of words and phrases in a literary text.
 5. **I Am Malala**
 1. I Am Malala: Lesson 1
 - Provide specific textual evidence to support analysis of inferences drawn from an informational text.
 - Analyze the interactions between individuals, events and/or ideas in an informational text.
 2. I Am Malala: Lesson 2
 - Analyze the organizational structure an author uses in an informational text including how the major sections of an informational text contribute to the development of ideas in the text, and contribute to the whole.
 - Determine an author's purpose and point of view in an informational text.
 6. **I Go Along**
 1. I Go Along: Lesson 1
 - Provide several pieces of textual evidence to support analysis of what the text says explicitly and of inferences drawn from a literary text.
 - Determine a central idea and a theme of a literary text.
 2. I Go Along: Lesson 2
 - Analyze how particular elements of a story or drama interact.
 - Analyze how an author develops and contrasts the points of view of different characters in a text.
 7. **The Necklace**
 1. The Necklace: Lesson 1
 - Provide several pieces of textual evidence to support analysis of what the text says explicitly and of inferences drawn from a literary text.
 - Determine a central idea and a theme of a literary text.
 2. The Necklace: Lesson 2
 - Analyze how particular elements of a story or drama interact.

- Analyze how an author develops and contrasts the points of view of different characters in a text.

8. **The Matthew Effect**

1. The Matthew Effect: Lesson 1
 - Provide specific textual evidence to support analysis of what the text says explicitly in an informational text.
 - Determine an author’s point of view or purpose in a text.
2. The Matthew Effect: Lesson 2
 - Determine the meaning of words and phrases, and analyze the impact of specific word choice as they are used in an informational text.
 - Analyze the organizational structure an author uses in an informational text including how the major sections of an informational text contribute to the development of ideas in the text, and contribute to the whole.

9. **How to Transform an Everyday, Ordinary Hoop Court**

1. How to Transform an Everyday, Ordinary Hoop Court.
 - Provide several pieces of textual evidence to support analysis of what the text says explicitly and of inferences drawn from a literary text.
 - Determine a central idea and a theme of a literary text.
2. How to Transform an Everyday, Ordinary Hoop Court.
 - Analyze how particular elements of a story or drama interact.
 - Determine the figurative and connotative meanings of words and phrases in a literary text.

10. **Boy at the Window**

1. Boy at the Window: Lesson 1
 - Provide several pieces of textual evidence to support analysis of what the text says explicitly and of inferences drawn from a literary text.
 - Determine a central idea and a theme of a literary text.
2. Boy at the Window: Lesson 2
 - Determine the figurative and connotative meanings of words and phrases in a literary text.
 - Analyze how a poem’s form or structure (e.g., soliloquy, sonnet) contributes to its meaning.

11. **The Lie**

1. The Lie: Lesson 1
 - Provide several pieces of textual evidence to support analysis of what the text says explicitly and of inferences drawn from a literary text.
 - Determine a central idea and a theme of a literary text.
2. The Lie: Lesson 2
 - Analyze how particular elements of a story or drama interact.
 - Analyze how an author develops and contrasts the points of view of different characters in a text.

12. **Texts from Strangers**

1. Texts from Strangers: Lesson 1
 - Provide specific textual evidence to support analysis of inferences drawn from an informational text.
 - Analyze the interactions between individuals, events and/or ideas in an informational text.
2. Texts from Strangers: Lesson 2

- Analyze the organizational structure an author uses in an informational text including how the major sections of an informational text contribute to the development of ideas in the text, and contribute to the whole.
- Determine an author's purpose and point of view in an informational text.

Language Arts 8 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, the student studies and analyzes explanatory, informational, and argumentative texts. Throughout the course curiosity and critical thinking are encouraged as the student practices reading comprehension through analogy and allusion in works by O. Henry and Roald Dahl. The student will learn to make connections between reading and the world around them as they read interesting texts about Female WWII Pilots and the Invention of the Popsicle. Their academic vocabulary will be expanded as they explore word choice and meaning to refine communication skills in reading, writing, listening, and speaking. This course presents strategies to strengthen writing skills through grammar, punctuation, and sentence and paragraph structure. The student will refine, reinforce and apply these skills through their own explanatory and persuasive compositions.

Semester A Outline

1. Course Overview

1. Course Overview
2. Student Course Introduction Quick Check

2. Speaking and Listening

1. Discussion Evidence
 - In this section, you will learn to use technology, including the internet, to collaborate with others.
 - In this section, you will use technology, including the internet, to collaborate with others.
 - In this section, you will prepare for a discussion by referring to evidence from required reading or outside research.
 - In this section, you will refer to text evidence to deeply discuss a topic or idea.
2. Discussion Evidence Quick Check
3. Discussion Protocols
 - In this section, you will follow rules for collegial discussions, including setting goals, deadlines.
 - In this section, you will ask questions that prompt elaboration about a topic under discussion.
 - In this section, you will respond to questions and comments with observations and ideas that are relevant to the topic under discussion.
 - In this section, you will acknowledge new information expressed by others and determine how new information expressed by others affects one's own views modifying one's own views when appropriate.
3. Discussion Protocols Quick Check
4. Speaking and Listening Apply

5. Speaking and Listening: Apply Discussion Base A

3. Reading Informational Text

1. Reading Informational Text Introduction
2. Genres
 - In this section, you will identify elements of genre and determine the patterns of various genres of nonfiction texts.
3. Genres Quick Check
4. Central Ideas
 - In this section, you will determine the main idea of an informational text. You will also analyze details that support the main idea.
5. Central Ideas Quick Check
6. Summarizing
 - In this section, you will identify the most effective summary from a selection of choices.
 - In this section, you will summarize the important points in an informational text.
 - In this section, you will summarize important points in an informational text using a graphic organizer.
7. Summarizing Quick Check
8. Analyzing Connections
 - In this section, you will analyze cause-and-effect connections between events and ideas in an informational text.
9. Analyzing Connections Quick Check
10. Determining Word Meaning
 - In this section, you will identify the meaning of unfamiliar words and phrases using context clues.
11. Determining Word Meaning Quick Check
12. Analogies
 - In this section, you will identify the meaning of analogies in an informational text.
13. Analogies Quick Check
14. Allusions
 - In this section, you will identify the meaning of an allusion in an informational text.
15. Allusion Quick Check
16. Word Choice
 - In this section, you will analyze how word choice affects meaning in an informational text.
17. Word Choice Quick Check
18. Providing Evidence
 - In this section, you will infer using explicit information in an informational text.
19. Providing Evidence Quick Check
20. Comparing Authors
 - In this section you will compare how authors use different methods to achieve different or similar purposes.
21. Comparing Authors Quick Check
22. Reading Informational Text Apply
23. Reading Informational Text Online Practice
24. Reading Informational Text Review
25. Reading Informational Sample Work
26. Reading Informational Text Unit Test

4. Grammar

1. Grammar Introduction
2. Subject-Verb Agreement
 - In this section, you will identify the correct form of a verb in subject-verb agreement.
 - In this section, you will compose sentences with correct subject-verb agreement.
 - In this section, you will identify errors in subject-verb agreement in sentences with prepositions and prepositional phrases.
 - In this section, you will identify the correct form of the verb in subject-verb agreement with collective nouns.
3. Subject-Verb Agreement Quick Check
4. Gerunds
 - In this section, you will find gerunds and explain how they are used in a sentence.
5. Gerunds Quick Check
6. Participles
 - In this section, you will find participles and explain how they are used in a sentence.
7. Participles Quick Check
8. Phrases and Clauses
 - In this section, you will identify different types of clauses and phrases.
 - In this section, you will correct misplaced and dangling modifiers.
 - In this section, you will write simple and compound sentences with phrases, using proper pronoun-antecedent agreement.
 - In this section, you will write complex and compound-complex sentences with phrases, using proper pronoun-antecedent agreement.
9. Phrases and Clauses Quick Check
10. Identifying Passive and Active Voice
 - In this section, you will identify passive and active voice.
11. Identifying Passive and Active Voice Quick Check
12. Using Passive and Active Voice
 - In this section, you will write verbs in the active voice or passive voice.
 - In this section, you will write a paragraph in the active voice.
13. Using Passive and Active Voice Quick Check
14. Grammar Apply
15. Grammar Online Practice
16. Grammar Review
17. Grammar Sample Work
18. Grammar Unit Test

5. Writing Explanatory Text

1. Writing Explanatory Text Introduction
2. Introducing a Topic
 - In this section, you will write a statement or paragraph that clearly introduces the topic of your informative or explanatory writing. The introduction will give your readers an idea about the main points you will address in your writing.
3. Introducing a Topic Quick Check
4. Organizing Ideas
 - In this section, you will identify organization techniques used in informative or explanatory writing.
 - In this section, you will organize information under headings in informative or

- explanatory writing.
 - In this section, you will select an organizational structure for informative or explanatory writing.
5. Organizing Ideas Quick Check
 6. Providing Graphics
 - In this section, you will select graphics and media to enhance writing.
 - In this section, you will explain the relevance of a Venn diagram in your informative or explanatory writing.
 - In this section, you will select graphics to enhance writing.
 7. Providing Graphics Quick Check
 8. Using Relevant Details
 - In this section, you will defend a central idea with relevant details and quotations.
 9. Using Relevant Details Quick Check
 10. Using Transitions
 - In this section, you will select appropriate transitions to connect cause and effect, sequence, and contrast relationships in an informative or explanatory text.
 11. Using Transitions Quick Check
 12. Using Precise Language
 - In this section, you will select precise vocabulary in your informative or explanatory writing.
 13. Using Precise Language Quick Check
 14. Conclusions
 - In this section, you will write a final statement or section that sums up and supports the information in the informative or explanatory text.
 15. Conclusions Quick Check
 16. Writing Explanatory Text Portfolio 1
 - In this section, you will organize your ideas before writing.
 - In this section, you will revise a paragraph for active voice.
 17. Writing Explanatory Text Portfolio 2
 - In this section, you will write an informative essay with appropriate mood.
 - In this section, you will revise an informative essay.
 - In this section, you will check that your spelling is correct.
 18. Writing Explanatory Text Portfolio 3
 - In this section, you will create a works cited list of online sources.
 - In this section, you will evaluate how well you addressed your purpose and audience throughout your writing.
 19. Explanatory Text Portfolio
 20. Explanatory Text Online Practice
 21. Writing Explanatory Text Review
 22. Writing Explanatory Sample Work
 23. Writing Explanatory Text Unit Test

6. Building Vocabulary

1. Building Vocabulary Introduction
2. Using Context Clues
 - In this section, you will identify the meaning of a word or phrase using context clues.
3. Using Context Clues Quick Check
4. Roots and Affixes
 - In this section, you will identify the meaning of a word using Greek or Latin roots

and affixes.

5. Roots and Affixes Quick Check
6. Using Reference Materials
 - In this section, you will locate a word's definition in a dictionary.
7. Using Reference Materials Quick Check
8. Verifying Word Meanings
 - In this section, you will infer the meaning of a word from context clues.
9. Verifying Word Meanings Quick Check
10. Word Meaning
 - In this section, you will define words using roots, affixes, and base words.
 - In this section, you will define words using roots.
 - In this section, you will explain how technical terms affect the tone of a paragraph.
11. Word Meaning Quick Check
12. Building Vocabulary Apply
13. Building Vocabulary Online Practice
14. Building Vocabulary Review
15. Building Vocabulary Sample Work
16. Building Vocabulary Unit Test

7. Analyze Informational Text

1. Analyze Informational Text Introduction
2. Paragraph Structure
 - In this section, you will analyze a paragraph's structure, including the role of particular sentences in adding to and clarifying a key concept.
3. Paragraph Structure Quick Check
4. Author's Purpose
 - In this section, you will identify the author's purpose with evidence.
5. Author's Purpose Quick Check
6. Delineating an Argument
 - In this section, you will analyze the author's argument, including opposing claims, in an informational text.
7. Delineating an Argument Quick Check
8. Evaluating Reasoning
 - In this section, you will evaluate whether an argument's reasoning provides relevant facts and evidence to support the author's claim in an informational text.
9. Evaluating Reasoning Quick Check
10. Evaluating Evidence
 - In this section, you will evaluate whether enough relevant evidence is provided to support the claims in an informational text. You will also identify when irrelevant information is introduced.
11. Evaluating Evidence Quick Check
12. Analyzing Texts Portfolio 1
 - In this section, you will interpret reliability and contradictory information in two or more informational texts.
13. Analyzing Texts Portfolio 2
 - In this section, you will identify points of disagreement between two informational texts.
14. Analyzing Texts Portfolio 3
 - In this section, you will focus on how authors use information to persuade their readers.

15. Analyzing Text Portfolio
16. Using different Mediums
 - In this section, you will select appropriate media to accompany text.
17. Using different Mediums Quick Check
18. Analyze Informational Text Apply
19. Analyze Informational Text Online Practice
20. Analyze Informational Text Review
21. Analyze Informational Sample Work
22. Analyze Informational Text Unit Test

8. Writing an Argument

1. Writing an Argument Introduction
2. Develop Claims
 - In this section, you will write an introduction of an argument including claims.
 - In this section, you will identify ways to support your claims in an argument.
3. Develop Claims Quick Check
4. Opposing Claims
 - In this section, you will identify different claims and counterclaims when writing an argument.
 - In this section, you will write a counterargument.
5. Opposing Claims Quick Check
6. Organize Arguments
 - In this section, you will organize reasons and evidence in a way that makes sense when writing an argument.
7. Organize Arguments Quick Check
8. Using Credible Sources
 - In this section, you will select evidence from credible sources when writing an argument.
9. Using Credible Sources Quick Check
10. Claims and Evidence
 - In this section, you will determine the relationships among claims, reasons, and evidence when writing an argument.
11. Claims and Evidence Quick Check
12. Cohesion
 - In this section, you will define cohesion. You will then use words, phrases, and clauses to make your ideas stick together when writing an argument.
13. Cohesion Quick Check
14. Writing a Conclusion
 - In this section, you will write a conclusion that sums up and supports your argument and keeps your audience in mind.
 - In this section, you will identify what information is required for a conclusion of an argument.
15. Writing a Conclusion Quick Check
16. Writing An Argument Portfolio 1
 - In this section, you will organize, plan, and write an argumentative essay.
17. Writing An Argument Portfolio 2
 - In this section, you will revise your argument for verb mood.
18. Writing An Argument Portfolio 3
 - In this section, you will use technology, including the internet, to produce writing to link to and cite sources.

19. Writing An Argument Portfolio
20. Writing an Argument Online Practice
21. Writing an Argument Review
22. Writing an Argument Sample Work
23. Writing an Argument Unit Test

9. Punctuation

1. Punctuation Introduction
2. Indicating a Pause
 - In this section, you will use punctuation – including commas, ellipses, dashes – to show a pause or break.
3. Indicating a Pause Quick Check
4. Ellipses
 - In this section, you will identify where ellipses are used to show that something has been left out.
5. Ellipses Quick Check
6. Punctuation Marks
 - In this section, you will correct sentences for punctuation.
7. Punctuation Marks Quick Check
8. Colons and Semi-Colons
 - In this section, you will correct colons and semicolons in sentences.
 - In this section, you will revise sentences for punctuation.
9. Colons and Semi-Colons Quick Check
10. Punctuation Apply
11. Punctuation Online Practice
12. Punctuation Review
13. Punctuation Sample Work
14. Punctuation Unit Test

Semester B Summary: In this course, the student is exposed to a wide variety of writing styles that create a sense of curiosity and excitement. Throughout the course the student will explore and analyze several literary genres including narrative, poetry, suspense, and humor. The student will also explore character development and dramatic irony as they participate in fictional novel study. Then, they will sharpen their writing skills as they create their own narrative story. Additionally, this course provides the opportunity for the student to exercise curiosity and inquiry skills through short and long-term research as they conduct and present observations and conclusions from their own research project.

Semester B Outline

1. Course Overview

1. Course Overview
2. Student Course Introduction Quick Check

2. Speaking and Listening

1. Discussion Evidence
 - In this section, you will learn to use technology, including the internet, to collaborate effectively with others.
 - In this section, you will use technology, including the internet, to collaborate with others.

- In this section, you will prepare for a discussion by referring to evidence from required reading or outside research.
 - In this section, you will refer to text evidence to deeply discuss a topic or idea.
2. Discussion Evidence Quick Check
 3. Discussion Protocols
 - In this section, you will follow rules for collegial discussions, including setting goals, deadlines.
 - In this section, you will ask questions that prompt elaboration about a topic under discussion.
 - In this section, you will respond to questions and comments with observations and ideas that are relevant to the topic under discussion.
 - In this section, you will acknowledge new information expressed by others and determine how new information expressed by others affects one's own views modifying one's own views when appropriate.
 4. Discussion Protocols Quick Check
 5. Speaking and Listening Apply
 - In this section, you will predict a different outcome of a historic event based on a reading.
 6. Speaking and Listening: Apply Discussion Base B

3. Novel Study Introduction

1. Elements of Fiction
 - In this section, you will explain how a writer uses details to develop a character in a novel.
 - In this section, you will describe the elements of plot in a story.
 - In this section, you will describe where and when a story takes place.
2. Choosing a Novel
 - In this section, you will explain your novel choice.
 - In this section, you will record information learned about a novel by using the front matter of the book.
 - In this section, you will predict the author's purpose and central idea based on skimming the text and reviewing front matter.

4. Reading Literary Text

1. Reading Literary Text Introduction
 - In this section, you will determine a central idea and a theme of a literary text.
2. Textual Evidence
 - In this section, you will analyze what the text says directly and your inferences using evidence from a literary text.
3. Textual Evidence Quick Check
4. Central Idea and Theme
 - In this section, you will determine the main idea and message of a literary text.
5. Central Idea and Theme Quick Check
6. Development of Theme
 - In this section, you will analyze how character, setting, and plot help to develop a theme or central idea in a literary text.
7. Development of Theme Quick Check
8. Summarizing Literature
 - In this section, you will summarize the important characters and events in the story.

9. Summarizing Literature Quick Check
10. Plot Development
 - In this section, you will analyze how a character's words or specific events in a story move the plot forward and give more information about a character.
11. Plot Development Quick Check
12. Figurative and Connotative Meaning
 - In this section, you will determine the literal and nonliteral meanings of words and phrases in a literary text.
13. Figurative and Connotative Meaning Quick Check
14. Analyzing Word Choice
 - In this section, you will analyze the effect that an author's choice of words has on the meaning and attitude of an informational text.
15. Analyzing Word Choice Quick Check
16. Reading Literary Text Apply
17. Reading Literary Text Online Practice
18. Reading Literary Text Review
19. Reading Literary Text Sample Work
20. Reading Literary Text Unit Test

5. Novel Study

1. Theme and Summary
 - In this section, you will identify the main idea of a story.
 - In this section, you will analyze details as you read that develop the main idea.
 - In this section, you will summarize important characters and events in the novel.

6. Language and Style

1. Language and Style Introduction
2. Irony
 - In this section, you will define verbal irony and find examples in writing.
3. Irony Quick Check
4. Puns
 - In this section, you will define puns and find examples in writing.
5. Puns Quick Check
6. Figures of Speech
 - In this section, you will find the meanings of figures of speech in context.
7. Figures of Speech Quick Check
8. Comparative Word Meaning
 - In this section, you will look at the relationship between words to help you understand each word.
9. Comparative Word Meaning Quick Check
10. Connotations and Denotations
 - In this section, you will find the differences between the connotations of words whose denotations are alike.
11. Connotations and Denotations Quick Check
12. Language and Style Apply
13. Language and Style Online Practice
14. Language and Style Review
15. Language and Style Sample Work
16. Language and Style Unit Test

7. Novel Study

1. Characters and Dramatic Irony
 - In this section, you will identify and describe the different ways that the narrator and characters see events in the story unfold.
 - In this section, you will explain what dramatic irony is in a novel.
 - In this section, you will analyze how dramatic irony can create both tension and humor in a novel.

8. Writing a Narrative

1. Writing a Narrative Introduction
2. Writing an Introduction
 - In this section, you will write an engaging introduction for a narrative that introduces characters and establishes a context and point of view.
3. Writing an Introduction Quick Check
4. Organizing Events
 - In this section, you will organize the events in your narrative in a sequence that unfolds logically.
5. Organizing Events Quick Check
6. Using Dialogue
 - In this section, you will use dialogue to develop the experiences, events, and characters in your narrative.
7. Using Dialogue Quick Check
8. Developing Narratives
 - In this section, you will use pacing, description, and reflection to develop your narrative.
9. Developing Narratives Quick Check
10. Using Transitions
 - In this section, you will use a variety of transition words and phrases to show sequence of events, to move from one setting to another, or to move from one time frame to another.
11. Using Transitions Quick Check
12. Precise Language
 - In this section, you will use precise words and phrases, descriptive details, and sensory language to capture the action and develop your narrative.
13. Precise Language Quick Check
14. Figurative Language
 - In this section, you will use alliteration and onomatopoeia to express the voice in your narrative.
 - In this section, you will use figurative language and graphic elements to express the voice in your narrative.
15. Figurative Language Quick Check
16. Writing a Conclusion
 - In this section, you will write a conclusion that follows from and reflects on the experiences and events in your narrative.
17. Writing a Conclusion Quick Check
18. Writing a Narrative Portfolio 1
 - In this section, you will organize your narrative using a chart.
 - In this section, you will use planning techniques to develop your ideas for writing
 - In this section, you will use verbs in active and passive voices for different purposes.
19. Writing a Narrative Portfolio 2

- In this section, you will use indicative, imperative, interrogative, conditional, and subjunctive verbs for different purposes.
 - In this section, you will strengthen your narrative by revising and editing.
 - In this section, you will strengthen your narrative by making sure all your spelling is correct.
20. Writing a Narrative Portfolio 3
 - In this section, you will use technology, including the internet, to produce your narrative.
 - In this section, you will decide how well your purpose and audience have been addressed in your narrative.
 21. Writing a Narrative Portfolio
 22. Writing a Narrative Online Practice
 23. Writing a Narrative Review
 24. Writing a Narrative Sample Work
 25. Writing a Narrative Unit Test

9. Novel Study

1. Analyzing Character and Plot
 - In this section, you will analyze how a character's words or specific events in a story can move the action forward.
 - In this section, you will analyze how a character's words or specific events in a story can tell readers more about a character.
 - In this section, you will analyze parts of the plot, including the conflict, rising action, and the turning point of the plot.

10. Analyzing Literary Text

1. Analyzing Literary Text Introduction
2. Analyzing Structure
 - In this section, you will show how the different structures of literary texts affect their style and meaning.
3. Analyzing Structure Quick Check
4. Dramatic Irony
 - In this section, you will define and locate examples of dramatic irony in a literary text.
5. Dramatic Irony Quick Check
6. Suspense and Humor
 - In this section, you will find examples of suspense and humor in a literary text.
7. Suspense and Humor Quick Check
8. Character Point of View
 - In this section, you will look at how the different points of view of the characters in a story, along with the point of view of the reader, can create effects like suspense or humor.
9. Character Point of View Quick Check
10. Director's or Actor's Choices
 - In this section, you will examine the choices made by directors or actors in a play or film production of a story.
11. Director's or Actor's Choices Quick Check
12. Analyzing Literary Text Portfolio 1
 - For this lesson, you will compare and contrast the structure of two or more literary texts.

13. Analyzing Literary Text Portfolio 2
 - In this section, you will read *Message in a Bottle* and analyze how it uses and updates character types and story patterns from older, traditional stories.
14. Analyzing Literary Text Portfolio 3
 - In this section, you will analyze the universal themes in the stories *The Invisible Red String* and *Message in a Bottle*. You will consider whether the universal theme is made new in the modern stories.
15. Analyzing Literary Text Portfolio
16. Analyzing Literary Text Apply
17. Analyzing Literary Text Online Practice
18. Analyze Literature Review
19. Analyze Literature Sample Work
20. Analyzing Literary Text Unit Test

11. Novel Study

1. Allusion and Themes
 - In this section, you will analyze how modern stories use events in myths, traditional stories, and religious texts.
 - In this section, you will identify traditional character archetypes in modern stories.
 - In this section, you will identify traditional themes in modern stories.

12. Verb Mood and Voice

1. Verb Mood and Voice Introduction
2. Identifying Moods
 - In this section, you will define and find examples of verbs in the indicative, imperative, and interrogative mood.
3. Identifying Moods Quick Check
4. Conditional Mood
 - In this section, you will define and find examples of verbs in the conditional mood.
5. Conditional Mood Quick Check
6. Subjunctive Mood
 - In this section, you will define and locate examples of verbs in the subjunctive mood.
7. Subjunctive Mood Quick Check
8. Various Moods
 - In this section, you will form and use verbs in the indicative, imperative, interrogative, conditional, and subjunctive moods.
9. Various Moods Quick Check
10. Shifts in Verb Mood and Voice
 - In this section, you will locate and fix incorrect shifts in verb mood and voice.
11. Shifts in Verb Mood and Voice Quick Check
12. Verb Mood and Voice Apply
 - In this section, you will use a variety of verb moods and two voices to express your attitude about a place of your choosing.
13. Verb Mood and Voice Online Practice
14. Verb Mood and Voice Review
15. Verb Mood and Voice Sample Work
16. Verb Mood and Voice Unit Test

13. Novel Study

1. Thematic Development
 - In this section, you will determine the main message or lesson of the novel.
 - In this section, you will analyze how plot, setting, and character help to develop the main message or lesson of a novel.
 - In this section, you will evaluate the characters, plot, and setting of a novel.
2. Evaluating a Novel Portfolio

14. **Research and Present**

1. Research and Present Introduction
2. Conducting Research
 - In this section, you will conduct a short research project to answer a question, using several sources.
3. Conducting Research Quick Check
4. Search Terms
 - In this section, you will decide how to create and use effective search terms.
5. Search Terms Quick Check
6. Gathering Information
 - In this section, you will gather information from at least three sources, determining the credibility and correctly citing each source.
7. Gathering Information Quick Check
8. Avoiding Plagiarism
 - In this section, you will learn how to avoid plagiarism when quoting or paraphrasing the ideas of others.
9. Avoiding Plagiarism Quick Check
10. Diverse Media Formats
 - In this section, you will explain how the ideas presented in different formats or media can help you understand a topic.
11. Diverse Media Formats Quick Check
12. Speaker's Effectiveness
 - In this section, you will decide how effectively a speaker uses chronological, cause/effect, problem/solution, and compare/contrast relationships to help the audience understand the message.
13. Speaker's Effectiveness Quick Check
14. Soundness of Reasoning
 - In this section, you will judge the reasoning a speaker uses to support claims made in an argument.
15. Soundness of Reasoning Quick Check
16. Sufficiency of Evidence
 - In this section, you will judge the evidence a speaker presents in order to support claims in an argument.
17. Sufficiency of Evidence Quick Check
18. Research and Present Portfolio 1
 - In this section, you will present claims and findings in a focused, coherent manner.
 - In this section, you will organize a claim that is logical.
 - In this section, you will select important details to support your claim.
19. Research and Present Portfolio 2
 - In this section, you will revise the verb mood and voice in your claim.
 - In this section, you will select concise language using reference materials.
 - In this section, you will select multimedia and/or visual displays to clarify your claim.

20. Research and Present Portfolio 3

- In this section, you will modify your speech for different contexts, tasks, and audiences.
- In this section, you will respond orally with appropriate register, vocabulary, tone, and voice.

21. Research and Present Portfolio

22. Research and Present Online Practice

23. Research and Present Review

24. Research and Present Sample Work

25. Research and Presentation Unit Test

Language Arts 8 Accelerated

Accelerated Language Arts 8 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, the student studies and analyzes examples of explanatory, informational, and argumentative texts. Throughout the course curiosity, interpretation, and reflection are encouraged as the student practices reading comprehension through analogy and allusion in works by O. Henry and Roald Dahl. The student will learn to make connections between reading and the world around them as they read interesting texts about Female WWII Pilots and the Invention of the Popsicle. Their academic vocabulary and communication skills will be expanded through the exploration of word choice and meaning. This course presents strategies to strengthen writing skills through grammar, punctuation, and sentence and paragraph structure. The student will refine, reinforce and apply these skills through their own explanatory and persuasive compositions. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester A Outline

1. Course Overview

1. Course Overview
2. Student Course Introduction Quick Check

2. Speaking and Listening

1. Discussion Evidence
 - In this section, you will learn to use technology, including the internet, to collaborate with others.
 - In this section, you will use technology, including the internet, to collaborate with others.
 - In this section, you will prepare for a discussion by referring to evidence from required reading or outside research.
 - In this section, you will refer to text evidence to deeply discuss a topic or idea.
2. Discussion Evidence Quick Check
3. Discussion Protocols
 - In this section, you will follow rules for collegial discussions, including setting goals, deadlines.
 - In this section, you will ask questions that prompt elaboration about a topic under discussion.
 - In this section, you will respond to questions and comments with observations and ideas that are relevant to the topic under discussion.

- In this section, you will acknowledge new information expressed by others and determine how new information expressed by others affects one's own views modifying one's own views when appropriate.
3. Discussion Protocols Quick Check
 4. Speaking and Listening Apply
 5. Speaking and Listening: Apply Discussion Base A

3. Reading Informational Text

1. Reading Informational Text Introduction
2. Genres
 - In this section, you will identify elements of genre and determine the patterns of various genres of nonfiction texts.
3. Genres Quick Check
4. Central Ideas
 - In this section, you will determine the main idea of an informational text. You will also analyze details that support the main idea.
5. Central Ideas Quick Check
6. Summarizing
 - In this section, you will identify the most effective summary from a selection of choices.
 - In this section, you will summarize the important points in an informational text.
 - In this section, you will summarize important points in an informational text using a graphic organizer.
7. Summarizing Quick Check
8. Analyzing Connections
 - In this section, you will analyze cause-and-effect connections between events and ideas in an informational text.
9. Analyzing Connections Quick Check
10. Determining Word Meaning
 - In this section, you will identify the meaning of unfamiliar words and phrases using context clues.
11. Determining Word Meaning Quick Check
12. Analogies
 - In this section, you will identify the meaning of analogies in an informational text.
13. Analogies Quick Check
14. Allusions
 - In this section, you will identify the meaning of an allusion in an informational text.
15. Allusion Quick Check
16. Word Choice
 - In this section, you will analyze how word choice affects meaning in an informational text.
17. Word Choice Quick Check
18. Providing Evidence
 - In this section, you will infer using explicit information in an informational text.
19. Providing Evidence Quick Check
20. Comparing Authors
 - In this section you will compare how authors use different methods to achieve different or similar purposes.
21. Comparing Authors Quick Check
22. Reading Informational Text Apply

23. Reading Informational Text Online Practice
24. Reading Informational Text Review
25. Reading Informational Sample Work
26. Reading Informational Text Unit Test

4. Grammar

1. Grammar Introduction
2. Subject-Verb Agreement
 - In this section, you will identify the correct form of a verb in subject-verb agreement.
 - In this section, you will compose sentences with correct subject-verb agreement.
 - In this section, you will identify errors in subject-verb agreement in sentences with prepositions and prepositional phrases.
 - In this section, you will identify the correct form of the verb in subject-verb agreement with collective nouns.
3. Subject-Verb Agreement Quick Check
4. Gerunds
 - In this section, you will find gerunds and explain how they are used in a sentence.
5. Gerunds Quick Check
6. Participles
 - In this section, you will find participles and explain how they are used in a sentence.
7. Participles Quick Check
8. Phrases and Clauses
 - In this section, you will identify different types of clauses and phrases.
 - In this section, you will correct misplaced and dangling modifiers.
 - In this section, you will write simple and compound sentences with phrases, using proper pronoun-antecedent agreement.
 - In this section, you will write complex and compound-complex sentences with phrases, using proper pronoun-antecedent agreement.
9. Phrases and Clauses Quick Check
10. Identifying Passive and Active Voice
 - In this section, you will identify passive and active voice.
11. Identifying Passive and Active Voice Quick Check
12. Using Passive and Active Voice
 - In this section, you will write verbs in the active voice or passive voice.
 - In this section, you will write a paragraph in the active voice.
13. Using Passive and Active Voice Quick Check
14. Grammar Apply
15. Grammar Online Practice
16. Grammar Review
17. Grammar Sample Work
18. Grammar Unit Test

5. Writing Explanatory Text

1. Writing Explanatory Text Introduction
2. Introducing a Topic
 - In this section, you will write a statement or paragraph that clearly introduces the topic of your informative or explanatory writing. The introduction will give your readers an idea about the main points you will address in your writing.

3. Introducing a Topic Quick Check
4. Organizing Ideas
 - In this section, you will identify organization techniques used in informative or explanatory writing.
 - In this section, you will organize information under headings in informative or explanatory writing.
 - In this section, you will select an organizational structure for informative or explanatory writing.
5. Organizing Ideas Quick Check
6. Providing Graphics
 - In this section, you will select graphics and media to enhance writing.
 - In this section, you will explain the relevance of a Venn diagram in your informative or explanatory writing.
 - In this section, you will select graphics to enhance writing.
7. Providing Graphics Quick Check
8. Using Relevant Details
 - In this section, you will defend a central idea with relevant details and quotations.
9. Using Relevant Details Quick Check
10. Using Transitions
 - In this section, you will select appropriate transitions to connect cause and effect, sequence, and contrast relationships in an informative or explanatory text.
11. Using Transitions Quick Check
12. Using Precise Language
 - In this section, you will select precise vocabulary in your informative or explanatory writing.
13. Using Precise Language Quick Check
14. Conclusions
 - In this section, you will write a final statement or section that sums up and supports the information in the informative or explanatory text.
15. Conclusions Quick Check
16. Writing Explanatory Text Portfolio 1
 - In this section, you will organize your ideas before writing.
 - In this section, you will revise a paragraph for active voice.
17. Writing Explanatory Text Portfolio 2
 - In this section, you will write an informative essay with appropriate mood.
 - In this section, you will revise an informative essay.
 - In this section, you will check that your spelling is correct.
18. Writing Explanatory Text Portfolio 3
 - In this section, you will create a works cited list of online sources.
 - In this section, you will evaluate how well you addressed your purpose and audience throughout your writing.
19. Explanatory Text Portfolio
20. Explanatory Text Online Practice
21. Writing Explanatory Text Review
22. Writing Explanatory Sample Work
23. Writing Explanatory Text Unit Test

6. Building Vocabulary

1. Building Vocabulary Introduction
2. Using Context Clues

- In this section, you will identify the meaning of a word or phrase using context clues.
- 3. Using Context Clues Quick Check
- 4. Roots and Affixes
 - In this section, you will identify the meaning of a word using Greek or Latin roots and affixes.
- 5. Roots and Affixes Quick Check
- 6. Using Reference Materials
 - In this section, you will locate a word's definition in a dictionary.
- 7. Using Reference Materials Quick Check
- 8. Verifying Word Meanings
 - In this section, you will infer the meaning of a word from context clues.
- 9. Verifying Word Meanings Quick Check
- 10. Word Meaning
 - In this section, you will define words using roots, affixes, and base words.
 - In this section, you will define words using roots.
 - In this section, you will explain how technical terms affect the tone of a paragraph.
- 11. Word Meaning Quick Check
- 12. Building Vocabulary Apply
- 13. Building Vocabulary Online Practice
- 14. Building Vocabulary Review
- 15. Building Vocabulary Sample Work
- 16. Building Vocabulary Unit Test

7. Analyze Informational Text

1. Analyze Informational Text Introduction
2. Paragraph Structure
 - In this section, you will analyze a paragraph's structure, including the role of particular sentences in adding to and clarifying a key concept.
3. Paragraph Structure Quick Check
4. Author's Purpose
 - In this section, you will identify the author's purpose with evidence.
5. Author's Purpose Quick Check
6. Delineating an Argument
 - In this section, you will analyze the author's argument, including opposing claims, in an informational text.
7. Delineating an Argument Quick Check
8. Evaluating Reasoning
 - In this section, you will evaluate whether an argument's reasoning provides relevant facts and evidence to support the author's claim in an informational text.
9. Evaluating Reasoning Quick Check
10. Evaluating Evidence
 - In this section, you will evaluate whether enough relevant evidence is provided to support the claims in an informational text. You will also identify when irrelevant information is introduced.
11. Evaluating Evidence Quick Check
12. Analyzing Texts Portfolio 1
 - In this section, you will interpret reliability and contradictory information in two or more informational texts.
13. Analyzing Texts Portfolio 2

- In this section, you will identify points of disagreement between two informational texts.
14. Analyzing Texts Portfolio 3
 - In this section, you will focus on how authors use information to persuade their readers.
 15. Analyzing Text Portfolio
 16. Using different Mediums
 - In this section, you will select appropriate media to accompany text.
 17. Using different Mediums Quick Check
 18. Analyze Informational Text Apply
 19. Analyze Informational Text Online Practice
 20. Analyze Informational Text Review
 21. Analyze Informational Sample Work
 22. Analyze Informational Text Unit Test

8. Writing an Argument

1. Writing an Argument Introduction
2. Develop Claims
 - In this section, you will write an introduction of an argument including claims.
 - In this section, you will identify ways to support your claims in an argument.
3. Develop Claims Quick Check
4. Opposing Claims
 - In this section, you will identify different claims and counterclaims when writing an argument.
 - In this section, you will write a counterargument.
5. Opposing Claims Quick Check
6. Organize Arguments
 - In this section, you will organize reasons and evidence in a way that makes sense when writing an argument.
7. Organize Arguments Quick Check
8. Using Credible Sources
 - In this section, you will select evidence from credible sources when writing an argument.
9. Using Credible Sources Quick Check
10. Claims and Evidence
 - In this section, you will determine the relationships among claims, reasons, and evidence when writing an argument.
11. Claims and Evidence Quick Check
12. Cohesion
 - In this section, you will define cohesion. You will then use words, phrases, and clauses to make your ideas stick together when writing an argument.
13. Cohesion Quick Check
14. Writing a Conclusion
 - In this section, you will write a conclusion that sums up and supports your argument and keeps your audience in mind.
 - In this section, you will identify what information is required for a conclusion of an argument.
15. Writing a Conclusion Quick Check
16. Writing An Argument Portfolio 1
 - In this section, you will organize, plan, and write an argumentative essay.

17. Writing An Argument Portfolio 2
 - In this section, you will revise your argument for verb mood.
18. Writing An Argument Portfolio 3
 - In this section, you will use technology, including the internet, to produce writing to link to and cite sources.
19. Writing An Argument Portfolio
20. Writing an Argument Online Practice
21. Writing an Argument Review
22. Writing an Argument Sample Work
23. Writing an Argument Unit Test

9. Punctuation

1. Punctuation Introduction
2. Indicating a Pause
 - In this section, you will use punctuation – including commas, ellipses, dashes – to show a pause or break.
3. Indicating a Pause Quick Check
4. Ellipses
 - In this section, you will identify where ellipses are used to show that something has been left out.
5. Ellipses Quick Check
6. Punctuation Marks
 - In this section, you will correct sentences for punctuation.
7. Punctuation Marks Quick Check
8. Colons and Semi-Colons
 - In this section, you will correct colons and semicolons in sentences.
 - In this section, you will revise sentences for punctuation.
9. Colons and Semi-Colons Quick Check
10. Punctuation Apply
11. Punctuation Online Practice
12. Punctuation Review
13. Punctuation Sample Work
14. Punctuation Unit Test

Semester B Summary: In this course, the student is exposed to a wide variety of writing styles that create a sense of curiosity and excitement. Throughout the course the student will explore and analyze several literary genres. They will read narrative works about the building of Manhattan and the evolution of the grocery bag and be enthralled by the suspense, and humor of Victor Hugo through the Hunchback of Notre Dame. The student will also explore character development and dramatic irony as they participate in fictional novel study. Then, they will sharpen their writing skills as they create their own narrative story. Additionally, this course provides the opportunity for the student to exercise curiosity and inquiry skills through short and long-term research as they conduct and present observations and conclusions from their own research project. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester B Outline

1. Course Overview

1. Course Overview
2. Student Course Introduction Quick Check

2. Speaking and Listening

1. Discussion Evidence
 - In this section, you will learn to use technology, including the internet, to collaborate effectively with others.
 - In this section, you will use technology, including the internet, to collaborate with others.
 - In this section, you will prepare for a discussion by referring to evidence from required reading or outside research.
 - In this section, you will refer to text evidence to deeply discuss a topic or idea.
2. Discussion Evidence Quick Check
3. Discussion Protocols
 - In this section, you will follow rules for collegial discussions, including setting goals, deadlines.
 - In this section, you will ask questions that prompt elaboration about a topic under discussion.
 - In this section, you will respond to questions and comments with observations and ideas that are relevant to the topic under discussion.
 - In this section, you will acknowledge new information expressed by others and determine how new information expressed by others affects one's own views modifying one's own views when appropriate.
4. Discussion Protocols Quick Check
5. Speaking and Listening Apply
 - In this section, you will predict a different outcome of a historic event based on a reading.
6. Speaking and Listening: Apply Discussion Base B

3. Novel Study Introduction

1. Elements of Fiction
 - In this section, you will explain how a writer uses details to develop a character in a novel.
 - In this section, you will describe the elements of plot in a story.
 - In this section, you will describe where and when a story takes place.
2. Choosing a Novel
 - In this section, you will explain your novel choice.
 - In this section, you will record information learned about a novel by using the front matter of the book.
 - In this section, you will predict the author's purpose and central idea based on skimming the text and reviewing front matter.

4. Reading Literary Text

1. Reading Literary Text Introduction
 - In this section, you will determine a central idea and a theme of a literary text.
2. Textual Evidence
 - In this section, you will analyze what the text says directly and your inferences using evidence from a literary text.
3. Textual Evidence Quick Check

4. Central Idea and Theme
 - In this section, you will determine the main idea and message of a literary text.
5. Central Idea and Theme Quick Check
6. Development of Theme
 - In this section, you will analyze how character, setting, and plot help to develop a theme or central idea in a literary text.
7. Development of Theme Quick Check
8. Summarizing Literature
 - In this section, you will summarize the important characters and events in the story.
9. Summarizing Literature Quick Check
10. Plot Development
 - In this section, you will analyze how a character's words or specific events in a story move the plot forward and give more information about a character.
11. Plot Development Quick Check
12. Figurative and Connotative Meaning
 - In this section, you will determine the literal and nonliteral meanings of words and phrases in a literary text.
13. Figurative and Connotative Meaning Quick Check
14. Analyzing Word Choice
 - In this section, you will analyze the effect that an author's choice of words has on the meaning and attitude of an informational text.
15. Analyzing Word Choice Quick Check
16. Reading Literary Text Apply
17. Reading Literary Text Online Practice
18. Reading Literary Text Review
19. Reading Literary Text Sample Work
20. Reading Literary Text Unit Test

5. Novel Study

1. Theme and Summary
 - In this section, you will identify the main idea of a story.
 - In this section, you will analyze details as you read that develop the main idea.
 - In this section, you will summarize important characters and events in the novel.

6. Language and Style

1. Language and Style Introduction
2. Irony
 - In this section, you will define verbal irony and find examples in writing.
3. Irony Quick Check
4. Puns
 - In this section, you will define puns and find examples in writing.
5. Puns Quick Check
6. Figures of Speech
 - In this section, you will find the meanings of figures of speech in context.
7. Figures of Speech Quick Check
8. Comparative Word Meaning
 - In this section, you will look at the relationship between words to help you understand each word.
9. Comparative Word Meaning Quick Check
10. Connotations and Denotations

- In this section, you will find the differences between the connotations of words whose denotations are alike.
11. Connotations and Denotations Quick Check
 12. Language and Style Apply
 13. Language and Style Online Practice
 14. Language and Style Review
 15. Language and Style Sample Work
 16. Language and Style Unit Test

7. Novel Study

1. Characters and Dramatic Irony
 - In this section, you will identify and describe the different ways that the narrator and characters see events in the story unfold.
 - In this section, you will explain what dramatic irony is in a novel.
 - In this section, you will analyze how dramatic irony can create both tension and humor in a novel.

8. Writing a Narrative

1. Writing a Narrative Introduction
2. Writing an Introduction
 - In this section, you will write an engaging introduction for a narrative that introduces characters and establishes a context and point of view.
3. Writing an Introduction Quick Check
4. Organizing Events
 - In this section, you will organize the events in your narrative in a sequence that unfolds logically.
5. Organizing Events Quick Check
6. Using Dialogue
 - In this section, you will use dialogue to develop the experiences, events, and characters in your narrative.
7. Using Dialogue Quick Check
8. Developing Narratives
 - In this section, you will use pacing, description, and reflection to develop your narrative.
9. Developing Narratives Quick Check
10. Using Transitions
 - In this section, you will use a variety of transition words and phrases to show sequence of events, to move from one setting to another, or to move from one time frame to another.
11. Using Transitions Quick Check
12. Precise Language
 - In this section, you will use precise words and phrases, descriptive details, and sensory language to capture the action and develop your narrative.
13. Precise Language Quick Check
14. Figurative Language
 - In this section, you will use alliteration and onomatopoeia to express the voice in your narrative.
 - In this section, you will use figurative language and graphic elements to express the voice in your narrative.
15. Figurative Language Quick Check
16. Writing a Conclusion

- In this section, you will write a conclusion that follows from and reflects on the experiences and events in your narrative.
17. Writing a Conclusion Quick Check
 18. Writing a Narrative Portfolio 1
 - In this section, you will organize your narrative using a chart.
 - In this section, you will use planning techniques to develop your ideas for writing
 - In this section, you will use verbs in active and passive voices for different purposes.
 19. Writing a Narrative Portfolio 2
 - In this section, you will use indicative, imperative, interrogative, conditional, and subjunctive verbs for different purposes.
 - In this section, you will strengthen your narrative by revising and editing.
 - In this section, you will strengthen your narrative by making sure all your spelling is correct.
 20. Writing a Narrative Portfolio 3
 - In this section, you will use technology, including the internet, to produce your narrative.
 - In this section, you will decide how well your purpose and audience have been addressed in your narrative.
 21. Writing a Narrative Portfolio
 22. Writing a Narrative Online Practice
 23. Writing a Narrative Review
 24. Writing a Narrative Sample Work
 25. Writing a Narrative Unit Test

9. Novel Study

1. Analyzing Character and Plot
 - In this section, you will analyze how a character's words or specific events in a story can move the action forward.
 - In this section, you will analyze how a character's words or specific events in a story can tell readers more about a character.
 - In this section, you will analyze parts of the plot, including the conflict, rising action, and the turning point of the plot.

10. Analyzing Literary Text

1. Analyzing Literary Text Introduction
2. Analyzing Structure
 - In this section, you will show how the different structures of literary texts affect their style and meaning.
3. Analyzing Structure Quick Check
4. Dramatic Irony
 - In this section, you will define and locate examples of dramatic irony in a literary text.
5. Dramatic Irony Quick Check
6. Suspense and Humor
 - In this section, you will find examples of suspense and humor in a literary text.
7. Suspense and Humor Quick Check
8. Character Point of View

- In this section, you will look at how the different points of view of the characters in a story, along with the point of view of the reader, can create effects like suspense or humor.

9. Character Point of View Quick Check

10. Director's or Actor's Choices

- In this section, you will examine the choices made by directors or actors in a play or film production of a story.

11. Director's or Actor's Choices Quick Check

12. Analyzing Literary Text Portfolio 1

- For this lesson, you will compare and contrast the structure of two or more literary texts.

13. Analyzing Literary Text Portfolio 2

- In this section, you will read *Message in a Bottle* and analyze how it uses and updates character types and story patterns from older, traditional stories.

14. Analyzing Literary Text Portfolio 3

- In this section, you will analyze the universal themes in the stories *The Invisible Red String* and *Message in a Bottle*. You will consider whether the universal theme is made new in the modern stories.

15. Analyzing Literary Text Portfolio

16. Analyzing Literary Text Apply

17. Analyzing Literary Text Online Practice

18. Analyze Literature Review

19. Analyze Literature Sample Work

20. Analyzing Literary Text Unit Test

11. Novel Study

1. Allusion and Themes

- In this section, you will analyze how modern stories use events in myths, traditional stories, and religious texts.
- In this section, you will identify traditional character archetypes in modern stories.
- In this section, you will identify traditional themes in modern stories.

12. Verb Mood and Voice

1. Verb Mood and Voice Introduction

2. Identifying Moods

- In this section, you will define and find examples of verbs in the indicative, imperative, and interrogative mood.

3. Identifying Moods Quick Check

4. Conditional Mood

- In this section, you will define and find examples of verbs in the conditional mood.

5. Conditional Mood Quick Check

6. Subjunctive Mood

- In this section, you will define and locate examples of verbs in the subjunctive mood.

7. Subjunctive Mood Quick Check

8. Various Moods

- In this section, you will form and use verbs in the indicative, imperative, interrogative, conditional, and subjunctive moods.

9. Various Moods Quick Check

10. Shifts in Verb Mood and Voice

- In this section, you will locate and fix incorrect shifts in verb mood and voice.
11. Shifts in Verb Mood and Voice Quick Check
 12. Verb Mood and Voice Apply
 - In this section, you will use a variety of verb moods and two voices to express your attitude about a place of your choosing.
 13. Verb Mood and Voice Online Practice
 14. Verb Mood and Voice Review
 15. Verb Mood and Voice Sample Work
 16. Verb Mood and Voice Unit Test

13. **Novel Study**

1. Thematic Development
 - In this section, you will determine the main message or lesson of the novel.
 - In this section, you will analyze how plot, setting, and character help to develop the main message or lesson of a novel.
 - In this section, you will evaluate the characters, plot, and setting of a novel.
2. Evaluating a Novel Portfolio

14. **Research and Present**

1. Research and Present Introduction
2. Conducting Research
 - In this section, you will conduct a short research project to answer a question, using several sources.
3. Conducting Research Quick Check
4. Search Terms
 - In this section, you will decide how to create and use effective search terms.
5. Search Terms Quick Check
6. Gathering Information
 - In this section, you will gather information from at least three sources, determining the credibility and correctly citing each source.
7. Gathering Information Quick Check
8. Avoiding Plagiarism
 - In this section, you will learn how to avoid plagiarism when quoting or paraphrasing the ideas of others.
9. Avoiding Plagiarism Quick Check
10. Diverse Media Formats
 - In this section, you will explain how the ideas presented in different formats or media can help you understand a topic.
11. Diverse Media Formats Quick Check
12. Speaker's Effectiveness
 - In this section, you will decide how effectively a speaker uses chronological, cause/effect, problem/solution, and compare/contrast relationships to help the audience understand the message.
13. Speaker's Effectiveness Quick Check
14. Soundness of Reasoning
 - In this section, you will judge the reasoning a speaker uses to support claims made in an argument.
15. Soundness of Reasoning Quick Check
16. Sufficiency of Evidence

- In this section, you will judge the evidence a speaker presents in order to support claims in an argument.
17. Sufficiency of Evidence Quick Check
 18. Research and Present Portfolio 1
 - In this section, you will present claims and findings in a focused, coherent manner.
 - In this section, you will organize a claim that is logical.
 - In this section, you will select important details to support your claim.
 19. Research and Present Portfolio 2
 - In this section, you will revise the verb mood and voice in your claim.
 - In this section, you will select concise language using reference materials.
 - In this section, you will select multimedia and/or visual displays to clarify your claim.
 20. Research and Present Portfolio 3
 - In this section, you will modify your speech for different contexts, tasks, and audiences.
 - In this section, you will respond orally with appropriate register, vocabulary, tone, and voice.
 21. Research and Present Portfolio
 22. Research and Present Online Practice
 23. Research and Present Review
 24. Research and Present Sample Work
 25. Research and Presentation Unit Test

Accelerated Literature Study 8

Accelerated Literature Study 8

Course Instructional Time: 85 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

The Junior Great Books® program involves a student in reading engaging literature and participating in rich discussion. The literature included in the Junior Great Books program is chosen to spark a high level of thinking and expose the student to rich language and vocabulary. The teacher and Learning Coach use the Shared Inquiry™ method to help a student acquire the qualities and strategies of effective readers and thinkers. The student learns to read actively, noticing thoughts and questions that come to mind during the act of reading. They will also learn to use the text, their own experiences, prior knowledge, and critical and creative thinking to participate in discussions about the text. These discussions help the student answer their own questions, satisfy their curiosity, and think more deeply about the content and process of his reading.

The student reads and rereads each Junior Great Books selection. Through modeling and direct instruction, they learn to note questions and reactions to text information during these readings. These questions and reactions form the foundation for the Shared Inquiry discussion. The student also chooses writing projects as another way to understand and extend what they have read.

Course Outline

1. The Other Side of the Reservoir

1. The Other Side of the Reservoir: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from a literary text.
 - Determine a central idea or a theme of a literary text.
2. The Other Side of the Reservoir: Lesson 2
 - Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of character, or provoke a decision.
 - Analyze how differences in the points of view of the characters and the audience/reader create such effects as suspense or humor.

2. Why Mathematics is a Language

1. Why Mathematics is a Language: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from an informational text.
 - Analyze the development of a central ideas over the course of an informational text, including its relationship to supporting ideas.
2. Why Mathematics is a Language: Lesson 2

- Determine the meaning of words and phrases as they are used in an informational text.
 - Analyze the structure of a specific paragraph, including the role of particular sentences in developing and refining a key concept.
- 3. Oh, oh, you will be sorry for that word!**
1. Oh, oh, you will be sorry for that word!: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from a literary text.
 - Determine a central idea or a theme of a literary text.
 2. Oh, oh, you will be sorry for that word!: Lesson 2
 - Determine the figurative and connotative meanings of words and phrases in a literary text.
 - Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of character, or provoke a decision.
- 4. You**
1. You: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from a literary text.
 - Determine a central idea or a theme of a literary text.
 2. You: Lesson 2
 - Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of character, or provoke a decision.
 - Determine the figurative and connotative meanings of words and phrases in a literary text.
- 5. The Test**
1. The Test: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from an informational text.
 - Analyze how a text makes connections among and distinctions between individuals, between events and between ideas in an informational text.
 2. The Test: Lesson 2
 - Analyze the structure of a specific paragraph, including the role of particular sentences in developing and refining a key concept.
 - Determine an author's purpose and point of view in an informational text.
- 6. The Doll's House**
1. The Doll's House: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from a literary text.
 - Determine a central idea or a theme of a literary text.
 2. The Doll's House: Lesson 2
 - Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of character, or provoke a decision.
 - Analyze how differences in the points of view of the characters and the audience/reader create such effects as suspense or humor.
- 7. The Veteran**
1. The Veteran: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from a literary text.

- Determine a central idea or a theme of a literary text.
2. The Veteran: Lesson 2
 - Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of character, or provoke a decision.
 - Analyze how differences in the points of view of the characters and the audience/reader create such effects as suspense or humor.

8. **Starvation Under the Orange Trees**

1. Starvation Under the Orange Trees: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from an informational text
 - Provide an objective summary of the text.
2. Starvation Under the Orange Trees: Lesson 2
 - Determine the meaning of words and phrases as they are used in an informational text.
 - Analyze the structure of a specific paragraph, including the role of particular sentences in developing and refining a key concept.

9. **The Pose**

1. The Pose: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from a literary text.
 - Determine a central idea or a theme of a literary text.
2. The Pose: Lesson 2
 - Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of character, or provoke a decision.
 - Determine the figurative and connotative meanings of words and phrases in a literary text.

10. **Catalog Army**

1. Catalog Army: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from a literary text.
 - Determine a central idea or a theme of a literary text.
2. Catalog Army: Lesson 2
 - Determine the figurative and connotative meanings of words and phrases in a literary text.
 - Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of character, or provoke a decision.

11. **A Hundred Hundred Daisies**

1. A Hundred Hundred Daisies: Lesson 1
 - Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from a literary text.
 - Determine a central idea or a theme of a literary text.
2. A Hundred Hundred Daisies: Lesson 2
 - Analyze how particular lines of dialogue or incidents in a story or drama propel the action, reveal aspects of character, or provoke a decision.
 - Analyze how differences in the points of view of the characters and the audience/reader create such effects as suspense or humor.

12. **Why We Forget Most of the Books We Read**

1. Why We Forget Most of the Books We Read: Lesson 1

- Provide the textual evidence that most strongly supports an analysis of what the text explicitly says and of inferences drawn from an informational text.
 - Analyze how a text makes connections among and distinctions between individuals, between events and between ideas in an informational text.
2. Why We Forget Most of the Books We Read: Lesson 2
- Analyze the structure of a specific paragraph, including the role of particular sentences in developing and refining a key concept.
 - Determine an author's purpose and point of view in an informational text.

English 9

English 9

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise English 9. In this course, the student will take an in-depth look at a variety of literature selections. In reading and responding to these diverse selections, the student will gain a thorough understanding of fiction and nonfiction genres, including short stories, essays, poetry, and drama. The student will also read Jack London's *The Call of the Wild*. This selection enables the student to explore universal themes and make connections between the characters' experiences and his own. Harper Lee's *To Kill a Mockingbird* may be read instead of *The Call of the Wild*. Writing instruction focuses on analytical and expository writing but also provides opportunities for the student to write creatively.

Semester A Outline

1. Growing Up

1. Growing Up: Unit Introduction
 - Become familiar with the structure of the English 9 course
 - Identify major genres, structural components, and literary devices in different types of literature
 - Review the stages of the writing process
 - Review strategies for learning new vocabulary
 - Review the parts of speech
2. The Bass, the River, and Sheila Mant: Wetherell
 - Understand the characteristics of the first-person point of view
 - Evaluate the effect of using first-person narration
 - Understand and apply active reading strategies
 - Use prewriting strategies to begin generating ideas for a narrative
 - Understand and apply strategies for understanding new vocabulary
 - Use nouns and pronouns correctly in writing
3. I Know Why the Caged Bird Sings: Angelou
 - Understand the importance of setting in a narrative

- Understand and apply active reading strategies
 - Use prewriting strategies to develop ideas for a narrative
 - Learn common suffixes as a strategy for understanding new vocabulary
 - Use nouns and pronouns correctly in writing
4. Poems of Passage: Booth, Collins, Lorde
 - Understand the role of the speaker in poetry
 - Understand and apply active reading strategies
 - Use prewriting strategies to organize ideas for a narrative
 - Learn Greek word roots as a strategy for understanding new vocabulary
 - Understand characteristics of action verbs
 5. My Forbidden Face: Latifa
 - Understand the use of metaphor in prose
 - Understand and apply active reading strategies
 - Use drafting strategies to begin writing a narrative
 - Learn suffixes as a strategy for understanding new vocabulary
 - Understand characteristics of linking verbs
 6. Writing Workshop: Family Narrative
 - Use drafting strategies to compose a personal narrative
 - Use vocabulary words correctly in writing
 - Use specific nouns and verbs in writing
 7. The Scarlet Ibis: Hurst
 - Understand the use of symbols in a story
 - Make inferences while reading
 - Use suffixes to understand new vocabulary
 - Understand the characteristics of adjectives and adverbs
 8. My Brother's Keeper: Bennett
 - Make connections between texts
 - Use suffixes to understand new vocabulary
 - Understand the characteristics of prepositions and conjunctions
 - Understand techniques an author uses to develop characters in a story
 9. Language Focus: Word Choice and Voice
 - Understand the relationship between word choice and voice in writing
 - Begin revising a narrative to improve voice
 - Use parts of speech correctly in writing
 10. Growing Up: Unit Review
 - Review major genres, structural components, and literary devices in different types of literature
 - Review the elements of narrative
 - Review strategies for learning new vocabulary
 - Review the parts of speech
 11. Growing Up: Unit Test
 12. Writing Workshop: Family Narrative
 - Use revising and editing strategies to compose the final draft of a personal narrative
 - Use vocabulary words correctly in writing
 - Use the parts of speech correctly in writing

2. The Dark Side

1. The Dark Side: Unit Introduction
 - Understand characteristics of the literary genres of suspense and horror
 - Review strategies for learning new vocabulary
 - Review rules for subject-verb agreement
2. The Most Dangerous Game: Connell

- Understand an author's use of foreshadowing to create suspense in a story
 - Understand the connotative and denotative meanings of new vocabulary
 - Understand and apply writing conventions for subject-verb agreement
3. The Cask of Amontillado: Poe
 - Understand the characteristics of an unreliable narrator
 - Analyze how an author uses an unreliable narrator for effect in a short story
 - Understand the connotative and denotative meanings of new vocabulary
 - Understand and apply writing conventions for subject/verb agreement
 4. Poems of Darkness: Poe
 - Understand the use of poetic devices such as assonance, consonance, and repetition
 - Analyze how an author uses poetic devices for effect
 - Understand the connotative and denotative meanings of new vocabulary
 - Understand and apply writing conventions for modifiers that compare
 5. The Lottery: Jackson
 - Understand the characteristics of archetypes and stock characters
 - Analyze the use of archetypes and stock characters in a short story
 - Understand the connotative and denotative meanings of new vocabulary
 - Understand and apply writing conventions for modifiers that compare
 6. Writers on Writing: Jackson
 - Understand the effect of a writer's tone in a personal essay
 - Make connections between two related texts
 - Understand and apply writing conventions for modifiers that compare
 7. The Dark Side: Unit Review
 - Review characteristics of the literary genres of suspense and horror
 - Review literary devices used for effect in fiction and poetry
 - Review writing conventions for subject-verb agreement and modifiers that compare
 8. The Dark Side: Unit Test
3. **The Call of the Wild**
 1. The Call of the Wild: Unit Introduction
 - Examine the historical background of the novel
 - Connect the author's life to the novel's setting and plot
 - Identify geographical landmarks specific to the novel
 2. Chapter 1: Into the Primitive
 - Identify point of view and types of narration
 - Develop and apply effective comprehension strategies
 - Define new vocabulary and identify words in context
 3. Chapter 2: The Law of Club and Fang
 - Define and analyze different types of conflict
 - Identify dialect and its purpose
 - Analyze relationships between and among characters, setting, and plot
 - Define new vocabulary and identify words in context
 4. Chapter 3: The Dominant Primordial Beast
 - Analyze how conflicts in the novel develop the plot
 - Define new vocabulary and identify words in context
 5. Chapter 4: Who Has Won to Mastership
 - Define theme
 - Analyze themes in the novel
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 6. Chapter 5: The Toil of Trace and Trail

- Define and analyze setting
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Enrich reading by visualizing
7. Chapter 6: For the Love of a Man
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Describe how an author develops a character
 8. Chapter 7: The Sounding of the Call
 - Identify and evaluate themes in the novel
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 9. Writing Workshop: The Call of the Wild
 - Analyze a narrative essay or story
 - Utilize dialogue
 - Employ setting, plot, and characterization in a narrative essay
 - Revise and edit for content, grammar, spelling, and formatting
 10. The Call of the Wild: Unit Review
 - Study vocabulary and review previous lesson goals
 - Prepare for unit test
 11. The Call of the Wild: Unit Test
 - Assess reading comprehension and literary analysis through a unit test
4. **The Forces of Nature**
1. The Forces of Nature: Unit Introduction
 - Review strategies for active reading
 - Begin generating ideas for a description
 - Review strategies for learning new vocabulary
 - Review the components of a sentence
 2. Of Wolves and Men: Lopez
 - Identify important details in a nonfiction selection
 - Use details to understand the narrator's point of view
 - Understand the characteristics of subjects and predicates
 - Generate ideas for a description
 3. Poems of Nature: Frost, Chiyo, Basho, Cummings
 - Analyze writers' use of imagery in poetry
 - Compare poems by different authors that address related themes
 - Use context clues to understand new vocabulary
 - Understand how to correct sentence fragments
 4. An Inconvenient Truth: Gore
 - Use text features to improve understanding of a nonfiction text
 - Analyze the use of graphics in a nonfiction informational text
 - Use context clues to understand new vocabulary
 - Understand and identify complements in a sentence
 5. Writing Workshop: Description
 - Use drafting strategies to compose a description
 - Use vocabulary words correctly in writing
 - Apply understanding of sentence variety in writing
 6. Tsunami 2004
 - Use text features to understand nonfiction articles
 - Compare how the same subject is treated in a news article and a feature article

- Use context clues to understand new vocabulary
 - Understand and identify complements in a sentence
 - 7. Language Focus: Sentence Fluency and Voice
 - Understand the relationship between sentence variety and voice in writing
 - Begin revising a description to improve sentence fluency
 - Use varied sentence types in writing
 - 8. The Forces of Nature: Unit Review
 - Review characteristics of expository nonfiction
 - Review strategies for understanding informational texts
 - Review strategies for learning new vocabulary
 - Review the parts of a sentence and different sentence types
 - 9. The Forces of Nature: Unit Test
 - 10. Writing Workshop: Description
 - Use revising and editing strategies to compose the final draft of a description
 - Use vocabulary words correctly in writing
 - Use varied sentence types in writing
- 5. What Has Value?**
1. What Has Value? Unit Introduction
 - Make personal connections with unit theme
 - Review strategies for learning new vocabulary
 - Review standard conventions for grammar, mechanics, and usage
 2. The Gift of the Magi: O. Henry
 - Analyze an author's tone in a short story
 - Understand how an author develops the theme of a short story
 - Understand the use of irony and allusion in a short story
 - Review strategies for learning new vocabulary
 - Review standard conventions for grammar, mechanics, and usage
 3. Fabric of Their Lives: Wallach
 - Understand how an author develops the theme of an article
 - Compare how different texts address similar themes
 - Review strategies for learning new vocabulary
 - Review standard conventions for grammar, mechanics, and usage
 4. Poems of Working People: Piercy, Whitman
 - Understand how an author uses repetition to develop a theme in poetry
 - Compare how different texts address similar themes
 - Review strategies for learning new vocabulary
 - Review standard conventions for grammar, mechanics, and usage
 5. The Necklace: de Maupassant
 - Understand how an author develops a theme in a short story
 - Differentiate between fact and opinion in a short story
 - Review strategies for learning new vocabulary
 - Review standard conventions for grammar, mechanics, and usage
 6. What Has Value? Review and Quiz
 - Analyze an author's tone in a short story
 - Understand the use of irony and allusion in a short story
 - Understand how an author develops the theme of an article or short story
 - Understand how an author uses repetition to develop a theme in poetry
 - Differentiate between fact and opinion in a short story
- 6. Semester Exam**
1. Semester Review

2. Semester Exam

Semester B Summary:

This is the second of two courses that comprise English 9. In this course, the student continues to explore a variety of literature selections from world literature, including well-known works. The student will learn strategies for reading epic poetry and study the characteristics of suspense stories. Also, the student will analyze the elements of drama as he reads William Shakespeare's *Romeo and Juliet*. George Orwell's *Animal Farm* may be read instead of *Romeo and Juliet*.

Writing instruction focuses on analytical and expository writing including in-depth instruction in the process of writing a research paper. This project teaches the student to critically analyze primary and secondary sources and to effectively support his ideas with information gathered from outside sources.

Semester B Outline

1. Echoes from the Past

1. Echoes from the Past: Unit Introduction
 - Understand characteristics of the epic poetry genre
 - Understand the elements of an effective summary
 - Review strategies for learning new vocabulary
 - Review characteristics of pronouns
2. The Odyssey, Part I
 - Analyze the use of similes in an epic poem
 - Apply reading strategies for understanding an epic poem
 - Review strategies for learning new vocabulary
 - Understand the three cases of personal pronouns and when to use each case
3. The Odyssey, Part II
 - Analyze the use of epic similes in an epic poem
 - Apply reading strategies for understanding an epic poem
 - Review strategies for learning new vocabulary
 - Avoid common pronoun usage errors
4. The Odyssey, Part III
 - Analyze the elements of poetry in an epic poem
 - Apply reading strategies for understanding an epic poem
 - Review strategies for learning new vocabulary
 - Understand conventions for pronoun-antecedent agreement
5. Orpheus and Eurydice
 - Understand the characteristics of myths
 - Understand the use of figurative language, such as hyperbole and metaphor, in prose
 - Review strategies for learning new vocabulary
 - Review rules for correct pronoun usage
6. Language Focus: Expressing Ideas Concisely
 - Understand techniques for improving conciseness in writing

- Use pronouns correctly in writing
- 7. Writing Workshop: Summary
 - Use drafting, revising, and editing strategies to compose a summary
 - Use vocabulary words correctly in writing
 - Use pronouns correctly in writing
- 8. Echoes from the Past: Unit Review
 - Review characteristics of epic poetry
 - Review poetic devices
 - Review the conventions of correct pronoun usage
- 9. Echoes from the Past: Unit Test
- 2. Romeo and Juliet**
 1. Romeo and Juliet: Unit Introduction
 - Learn about the author’s life
 - Learn about the historical background of the author’s life
 - Identify the elements of drama
 - Identify literary characteristics specific to the play
 2. Romeo and Juliet: Act I
 - Identify point of view and types of narration
 - Develop and apply effective comprehension strategies
 - Read and analyze the text, then respond to questions
 - Draw conclusions
 - Define new vocabulary and identify words in context
 3. Romeo and Juliet: Act I, continued
 - Read and analyze the text, then respond to questions
 - Analyze dialogue
 - Analyze the types of dramatic speech
 - Analyze relationships between and among characters, setting, and events
 - Define new vocabulary and identify words in context
 4. Romeo and Juliet: Act II
 - Identify the role of conflict in plot
 - Define the elements of plot
 - Analyze the structure of a five-act play
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 5. Romeo and Juliet: Act II, continued
 - Define theme
 - Analyze themes in the novel
 - Analyze tragedy
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 6. Romeo and Juliet: Act III
 - Define and analyze setting
 - Identify the elements of blank verse
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 7. Romeo and Juliet: Act III, continued
 - Describe how an author develops a character
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 8. Romeo and Juliet: Act IV

- Analyze comic relief as a dramatic element
 - Recognize the three types of irony
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
9. Romeo and Juliet: Act IV, continued
 - Identify and evaluate figurative language in the play
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 10. Romeo and Juliet: Act V
 - Analyze stage directions
 - Recognize the features of the Globe Theatre
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 11. Romeo and Juliet: Act V, continued
 - Identify and evaluate themes in the play
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 12. Writing Workshop: Persuasive Essay
 - Analyze the components of a persuasive essay
 - Write a persuasive essay
 - Revise and edit for content, grammar, spelling, and formatting
 13. Romeo and Juliet: Unit Review
 - Study vocabulary and review previous lesson goals
 14. Romeo and Juliet: Unit Test
3. **Other Worlds**
1. Other Worlds: Unit Introduction
 - Understand characteristics of science fiction
 - Identify strategies for evaluating a text
 - Review strategies for learning new vocabulary
 - Understand how to use end punctuation marks correctly
 2. A Sound of Thunder: Bradbury
 - Analyze an author's use of different techniques of characterization
 - Practice strategies for evaluating a text
 - Learn strategies for understanding scientific and technical vocabulary
 - Understand how to use commas to separate items in a series
 3. Nethergrave: Skurzynski
 - Analyze a character's motivation in a science fiction story
 - Practice strategies for evaluating a text
 - Learn strategies for understanding scientific and technical vocabulary
 - Compare texts within the same genre
 - Understand how to use commas correctly
 4. Writing Workshop: Critical Response
 - Use drafting strategies to compose a critical essay about a science fiction story
 - Use vocabulary words correctly in writing
 - Use commas correctly in writing
 5. Comparing Texts: Brown and Brautigan
 - Compare the ways in which works from different genres address similar themes
 - Understand how chronological order is used to organize events in a biography
 - Learn strategies for understanding scientific and technical vocabulary

- Understand how to use commas to set off nonessential information
- 6. The Secret Life of Walter Mitty: Thurber
 - Analyze the effect of multiple settings in a short story
 - Understand the use of characterization in a short story
 - Use italics and quotation marks correctly in writing titles
- 7. Language Focus: Writing Conventions
 - Understand the importance of following standard conventions in academic writing
 - Develop a personal editing checklist to improve adherence to standard writing conventions
 - Use end punctuation, commas, italics, and quotation marks correctly in writing
- 8. Other Worlds: Unit Review
 - Review characteristics of science fiction
 - Review strategies for comparing and evaluating texts
 - Review strategies for learning new vocabulary
 - Review conventions for end punctuation, commas, italics, and quotation marks
- 9. Other Worlds: Unit Test
- 10. Writing Workshop: Critical Response
 - Use revising and editing strategies to compose the final draft of a critical response essay
 - Use vocabulary words correctly in writing
 - Use end punctuation, commas, italics, and quotation marks correctly in writing
- 4. The Research Paper**
 1. Unit Introduction: The Research Paper
 - Generate a topic for an original research paper
 - Conduct preliminary research to identify potential areas of focus
 2. Prewriting: Forming Research Questions
 - Conduct preliminary research to identify potential areas of focus
 - Develop a list of major questions to guide research
 - Identify the differences between primary and secondary sources and examples of each source type
 - Understand writing conventions for capitalization
 3. Prewriting: Developing a Research Proposal
 - Draft a 1-page research proposal explaining topic, major research questions, and potential areas of focus
 - Identify the differences between primary and secondary sources and examples of each source type
 - Understand writing conventions for capitalization
 4. Prewriting: Gathering Information
 - Identify the differences between primary and secondary sources and examples of each source type
 - Understand writing conventions for capitalization
 5. Prewriting: Evaluating Information
 - Critically evaluate print and electronic informational resources
 - Understand writing conventions for using apostrophes
 6. Prewriting: Taking Notes
 - Practice effective note-taking strategies, including summarizing and paraphrasing
 - Use research questions to guide note-taking
 - Understand writing conventions for using semicolons
 7. Prewriting: Synthesizing Information
 - Synthesize ideas and details from multiple informational texts
 - Use information from a variety of sources to begin formulating answers to the research questions

- Understand writing conventions for using semicolons
- 8. Prewriting: Organizing Ideas
 - Craft a concise and effective thesis that states the controlling idea of the research paper
 - Develop an outline that identifies main ideas and supporting details
 - Understand writing conventions for using hyphens, dashes, and parentheses
- 9. Drafting: Getting Started
 - Write a clear and engaging introduction with an effective thesis statement
 - Use an outline to develop body paragraphs
 - Review conventions for capitalization and punctuation
- 10. Drafting: Integrating Ideas
 - Write body paragraphs with a clear organizational structure
 - Integrate original ideas with information from outside sources effectively
 - Understand and apply conventions for in-text citations using MLA style
- 11. Drafting: Wrapping It Up
 - Write a memorable conclusion that effectively summarizes the main ideas of the research paper
 - Review a peer's research paper and evaluate how well it fulfills the writing purpose
 - Understand and apply conventions for in-text citations using MLA style
- 12. Creating a Multimedia Presentation
 - Develop a multimedia presentation based on the research paper
- 13. Revising: Identifying Trouble Spots
 - Review key traits of effective writing (focus, organization, idea development, voice)
 - Identify possible areas for revision based on key writing traits
 - Begin revising the research paper to improve it in any of the following areas: focus, organization, voice, idea development
- 14. Revising: Working With Feedback
 - Use feedback to revise and edit a research paper
- 15. Editing: Citing Works Using MLA Format
 - Follow appropriate conventions for documenting information from primary and secondary sources
 - Create a Works Cited page using MLA format
- 16. Editing: Polishing, Proofreading, and Publishing
 - Edit, publish, and reflect on the final draft of a research paper
- 5. **Crossing Borders**
 1. Crossing Borders: Unit Introduction
 - Make personal connections with unit theme
 - Begin to generate topics for an informational essay
 - Review strategies for learning new vocabulary
 - Understand characteristics of prepositional and appositive phrases
 2. Borders: King
 - Analyze a character's motivation in a short story
 - Understand the use of chronological order, including flashbacks, in a short story
 - Understand the characteristics of different types of verbal phrases
 3. Delfino II: Diez in the Desert
 - Analyze how an author develops mood in an essay
 - Understand the use of imagery, details, and dialogue to create mood
 - Understand the difference between independent and subordinate clauses
 4. Writing Workshop: Informational Essay
 - Use drafting strategies to compose an informational essay
 - Use vocabulary words correctly in writing
 - Use phrases and clauses correctly in writing

5. Poems Across the Divide
 - Analyze how writers develop a theme in poetry
 - Compare the development of related themes in three poems
 - Understand the characteristics of adverb clauses
 6. Hip-Hop Planet: McBride
 - Understand how a writer's purpose and audience determine the content of an essay
 - Analyze how a writer uses similes for effect in an informational essay
 - Understand the four types of sentence structure
 7. Language Focus: Transitions and Organization
 - Understand the importance of organizing ideas clearly in writing
 - Use transitional phrases to improve organization in an essay
 - Use phrases and clauses correctly in writing
 - Understand how to correct common sentence errors: fragments and run-on sentences
 8. Crossing Borders: Unit Review
 - Review unit theme
 - Review strategies for comparing themes across texts
 - Review strategies for learning new vocabulary
 - Review phrases and clauses
 9. Crossing Borders: Unit Test
 10. Writing Workshop: Informational Essay
 - Use revising and editing strategies to compose the final draft of an informational essay
 - Use vocabulary words correctly in writing
 - Use phrases and clauses correctly in writing
 - Use transitional phrases to improve organization in an informational essay
- 6. Semester Exam**
1. Semester Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, keywords and vocabulary terms, and all important concepts that may be covered on this exam
 2. Semester Exam

English 9 Honors

English 9 Honors

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise Honors English 9. In this course, the student will take an in-depth look at a variety of literature selections. In reading these diverse selections, the student will gain a thorough understanding of fiction and nonfiction genres, including short stories, essays, poetry, and drama. The student will also read Stephen Crane's *The Red Badge of Courage*. This selection enables the student to explore universal themes and make connections between the characters' experiences and his own. Harper Lee's *To Kill a Mockingbird* may be read instead of *The Red Badge of Courage*. Writing instruction focuses on analytical and expository writing but also provides opportunities for the student to write creatively.

The Honors course includes more rigorous curriculum and provides greater opportunities for students to explore concepts, engage in independent research, and demonstrate critical thinking skills.

Semester A Outline

1. **Growing Up**

1. Growing Up: Unit Introduction
 - Become familiar with the structure of the English 9 course
 - Identify major genres, structural components, and literary devices in different types of literature
 - Review the stages of the writing process
 - Review strategies for learning new vocabulary
 - Review the parts of speech
2. The Bass, the River, and Sheila Mant: Wetherell

- Understand the characteristics of the first-person point of view
 - Evaluate the effect of using first-person narration
 - Understand and apply active reading strategies
 - Use prewriting strategies to begin generating ideas for a narrative
 - Understand and apply strategies for understanding new vocabulary
 - Use nouns and pronouns correctly in writing
3. I Know Why the Caged Bird Sings: Angelou
 - Understand the importance of setting in a narrative
 - Understand and apply active reading strategies
 - Use prewriting strategies to develop ideas for a narrative
 - Learn common suffixes as a strategy for understanding new vocabulary
 - Use nouns and pronouns correctly in writing
 4. Poems of Passage: Booth, Collins, Lorde
 - Understand the role of the speaker in poetry
 - Understand and apply active reading strategies
 - Use prewriting strategies to organize ideas for a narrative
 - Learn Greek word roots as a strategy for understanding new vocabulary
 - Understand characteristics of action verbs
 5. My Forbidden Face: Latifa
 - Understand the use of metaphor in prose
 - Understand and apply active reading strategies
 - Use drafting strategies to begin writing a narrative
 - Learn suffixes as a strategy for understanding new vocabulary
 - Understand characteristics of linking verbs
 6. Writing Workshop: Family Narrative
 - Use drafting strategies to compose a personal narrative
 - Use vocabulary words correctly in writing
 - Use specific nouns and verbs in writing
 7. Introduction to Shelf Life: Paulsen
 - Analyze the elements that create a writer's style
 - Use text features to understand an essay
 - Understand characteristics of adjectives
 8. The Scarlet Ibis: Hurst
 - Understand the use of symbols in a story
 - Make inferences while reading
 - Use suffixes to understand new vocabulary
 - Understand the characteristics of adverbs
 9. Poems of Mothers & Grandmothers: Clifton, et al
 - Understand the importance of diction in poetry
 - Make thematic connections among texts
 - Understand the characteristics of prepositions and conjunctions
 10. My Brother's Keeper: Bennett
 - Make connections between texts
 - Use suffixes to understand new vocabulary
 - Understand the characteristics of prepositions and conjunctions
 - Understand techniques an author uses to develop characters in a story
 11. Language Focus: Word Choice and Voice
 - Understand the relationship between word choice and voice in writing
 - Begin revising a narrative to improve voice
 - Use parts of speech correctly in writing

12. Growing Up: Unit Review
 - Review major genres, structural components, and literary devices in different types of literature
 - Review the elements of narrative
 - Review strategies for learning new vocabulary
 - Review the parts of speech
13. Growing Up: Unit Test
14. Writing Workshop: Family Narrative
 - Use revising and editing strategies to compose the final draft of a personal narrative
 - Use vocabulary words correctly in writing
 - Use the parts of speech correctly in writing

2. **The Dark Side**

1. The Dark Side: Unit Introduction
 - Understand characteristics of the literary genres of suspense and horror
 - Review strategies for learning new vocabulary
 - Review rules for subject-verb agreement
2. The Most Dangerous Game: Connell
 - Understand an author's use of foreshadowing to create suspense in a story
 - Understand the connotative and denotative meanings of new vocabulary
 - Understand and apply writing conventions for subject-verb agreement
3. The Cask of Amontillado: Poe
 - Understand the characteristics of an unreliable narrator
 - Analyze how an author uses an unreliable narrator for effect in a short story
 - Understand the connotative and denotative meanings of new vocabulary
 - Understand and apply writing conventions for subject/verb agreement
4. Poems of Darkness: Poe
 - Understand the use of poetic devices such as assonance, consonance, repetition, onomatopoeia, and internal rhyme
 - Analyze how an author uses poetic devices for effect
 - Understand the connotative and denotative meanings of new vocabulary
 - Understand and apply writing conventions for modifiers that compare
5. The Lottery: Jackson
 - Understand the characteristics of archetypes and stock characters
 - Analyze the use of archetypes and stock characters in a short story
 - Understand the connotative and denotative meanings of new vocabulary
 - Understand and apply writing conventions for modifiers that compare
6. Writers on Writing: Jackson
 - Understand the effect of a writer's tone in a personal essay
 - Make connections between two related texts
 - Understand and apply writing conventions for modifiers that compare
7. The Dark Side: Unit Review
 - Review characteristics of the literary genres of suspense and horror
 - Review literary devices used for effect in fiction and poetry
 - Review writing conventions for subject-verb agreement and modifiers that compare
8. The Dark Side: Unit Test

3. **The Red Badge of Courage**

1. The Red Badge of Courage: Unit Introduction
 - Understand the historical background of the novel
 - Learn about the author's life
 - Identify literary characteristics specific to the novel
2. The Red Badge of Courage: Chapter 1

- Identify point of view and types of narration
 - Develop and apply effective comprehension strategies
 - Draw conclusions about a text
 - Define new vocabulary and identify words in context
3. The Red Badge of Courage: Chapters 2–3
 - Analyze relationships between and among characters, setting, and events
 - Analyze conflict
 - Identify dialect
 - Define new vocabulary and identify words in context
 4. The Red Badge of Courage: Chapters 4–5
 - Define the elements of plot
 - Analyze how conflicts in the novel develop the plot
 - Define new vocabulary and identify words in context
 5. The Red Badge of Courage: Chapters 6–7
 - Define and analyze themes in the novel
 - Define new vocabulary and identify words in context
 6. The Red Badge of Courage: Chapters 8–10
 - Define and analyze setting
 - Enrich reading by visualizing
 - Define new vocabulary and identify words in context
 7. The Red Badge of Courage: Chapters 11–12
 - Describe how an author develops a character
 - Define new vocabulary and identify words in context
 8. The Red Badge of Courage: Chapters 13–15
 - Evaluate themes in the novel
 - Define new vocabulary and identify words in context
 9. The Red Badge of Courage: Chapters 16–18
 - Analyze Stephen Crane’s poetry
 - Identify and evaluate figurative language in the novel
 - Define new vocabulary and identify words in context
 10. The Red Badge of Courage: Chapters 19–20
 - Identify and evaluate symbols in the novel
 - Define new vocabulary and identify words in context
 11. The Red Badge of Courage: Chapters 21–24
 - Evaluate themes in the novel
 - Define new vocabulary and identify words in context
 12. The Red Badge of Courage: Writing Workshop
 - Analyze naturalism in the novel
 - Write a critical essay
 - Revise and edit for content, grammar, spelling, and formatting
 13. The Red Badge of Courage: Unit Review
 - Study vocabulary and review previous lesson goals
 14. The Red Badge of Courage: Unit Test
4. **The Forces of Nature**
 1. The Forces of Nature: Unit Introduction
 - Review strategies for active reading
 - Begin generating ideas for a description
 - Review strategies for learning new vocabulary
 - Review the components of a sentence
 2. The Interlopers: Saki

- Understand the use of irony in a short story
 - Practice breaking down long sentences to improve reading comprehension
 - Begin generating ideas for a description
 - Review sentence types
3. Of Wolves and Men: Lopez
 - Identify important details in a nonfiction selection
 - Use details to understand the narrator's point of view
 - Understand the characteristics of subjects and predicates
 - Generate ideas for a description
 4. Poems of Nature: Frost, Chiyo, Basho, Cummings
 - Analyze writers' use of imagery in poetry
 - Compare poems by different authors that address related themes
 - Use context clues to understand new vocabulary
 - Understand how to correct sentence fragments
 5. An Inconvenient Truth: Gore
 - Use text features to improve understanding of a nonfiction text
 - Analyze the use of graphics in a nonfiction informational text
 - Use context clues to understand new vocabulary
 - Understand and identify complements in a sentence
 6. Writing Workshop: Description
 - Use drafting strategies to compose a description
 - Use vocabulary words correctly in writing
 - Apply understanding of sentence variety in writing
 7. Tsunami 2004
 - Use text features to understand nonfiction articles
 - Compare how the same subject is treated in a news article and a feature article
 - Use context clues to understand new vocabulary
 - Understand and identify complements in a sentence
 8. The Birds: Du Maurier
 - Understand the use of symbols in an extended fictional narrative
 - Understand how a writer develops a theme in an extended fictional narrative
 - Use context clues to understand new vocabulary
 9. Language Focus: Sentence Fluency and Voice
 - Understand the relationship between sentence variety and voice in writing
 - Begin revising a description to improve sentence fluency
 - Use varied sentence types in writing
 10. The Forces of Nature: Unit Review
 - Review characteristics of expository nonfiction
 - Review strategies for understanding informational texts
 - Review strategies for learning new vocabulary
 - Review the parts of a sentence and different sentence types
 11. The Forces of Nature: Unit Test
 12. Writing Workshop: Description
 - Use revising and editing strategies to compose the final draft of a description
 - Use vocabulary words correctly in writing
 - Use varied sentence types in writing
- 5. What Has Value?**
1. What Has Value? Unit Introduction
 - Make personal connections with unit theme
 - Review strategies for learning new vocabulary

- Review standard conventions for grammar, mechanics, and usage
 - 2. The Gift of the Magi: O. Henry
 - Analyze an author's tone in a short story
 - Understand how an author develops the theme of a short story
 - Understand the use of irony and allusion in a short story
 - Review strategies for learning new vocabulary
 - Review standard conventions for grammar, mechanics, and usage
 - 3. Fabric of Their Lives: Wallach
 - Understand how an author develops the theme of an article
 - Compare how different texts address similar themes
 - Review strategies for learning new vocabulary
 - Review standard conventions for grammar, mechanics, and usage
 - 4. Poems of Working People: Piercy, Whitman
 - Understand how an author uses repetition to develop a theme in poetry
 - Compare how different texts address similar themes
 - Review strategies for learning new vocabulary
 - Review standard conventions for grammar, mechanics, and usage
 - 5. The Necklace: Maupassant
 - Understand how an author develops a theme in a short story
 - Differentiate between fact and opinion in a short story
 - Review strategies for learning new vocabulary
 - Review standard conventions for grammar, mechanics, and usage
 - Compare and contrast themes in two different short stories
 - 6. What Has Value? Review and Quiz
 - Analyze an author's tone in a short story
 - Understand the use of irony and allusion in a short story
 - Understand how an author develops the theme of an article or short story
 - Understand how an author uses repetition to develop a theme in poetry
 - Differentiate between fact and opinion in a short story
6. Semester Exam
1. Semester Exam Review
 2. Semester Exam

Semester B Summary:

This is the second of two courses that comprise Honors English 9. In this course, the student continues to explore a variety of literature selections from world literature. The student will learn strategies for reading epic poetry and study the characteristics of suspense stories. Also, the student will analyze the elements of drama as he reads William Shakespeare's *Romeo and Juliet*. George Orwell's *Animal Farm* may be read instead of *Romeo and Juliet*.

Writing instruction focuses on analytical and expository writing, including in-depth instruction in the process of writing a research paper. This project teaches the student to critically analyze primary and secondary sources and to effectively support his ideas with information gathered from outside sources.

The Honors course includes more rigorous curriculum and provides greater opportunities for students to explore concepts, engage in independent research, and demonstrate critical thinking skills.

Semester B Outline

1. **Echoes from the Past**

1. Echoes from the Past: Unit Introduction
 - Understand characteristics of the epic poetry genre
 - Understand the elements of an effective summary
 - Review strategies for learning new vocabulary
 - Review characteristics of pronouns
2. The Odyssey, Part I
 - Analyze the use of similes in an epic poem
 - Apply reading strategies for understanding an epic poem
 - Review strategies for learning new vocabulary
 - Understand the three cases of personal pronouns and when to use each case
3. The Odyssey, Part II
 - Analyze the use of epic similes in an epic poem
 - Apply reading strategies for understanding an epic poem
 - Review strategies for learning new vocabulary
 - Avoid common pronoun usage errors
 - Analyze Odysseus's character in The Odyssey to identify characteristics of the epic hero and archetypes
4. The Odyssey, Part III
 - Analyze the elements of poetry in an epic poem
 - Apply reading strategies for understanding an epic poem
 - Review strategies for learning new vocabulary
 - Understand conventions for pronoun-antecedent agreement
5. Orpheus and Eurydice
 - Understand the characteristics of myths
 - Understand the use of figurative language, such as hyperbole and metaphor, in prose
 - Review strategies for learning new vocabulary
 - Review rules for correct pronoun usage
6. The Penelopiad
 - Understand a writer's use of characterization and tone in a modern retelling of a myth
 - Review strategies for learning new vocabulary
 - Review rules for correct pronoun usage
7. Language Focus: Expressing Ideas Concisely
 - Understand techniques for improving conciseness in writing
 - Use pronouns correctly in writing
8. Writing Workshop: Summary
 - Use drafting, revising, and editing strategies to compose a summary
 - Use vocabulary words correctly in writing
 - Use pronouns correctly in writing
9. Echoes from the Past: Unit Review
 - Review characteristics of epic poetry
 - Review poetic devices
 - Review the conventions of correct pronoun usage
10. Echoes from the Past: Unit Test

2. **Romeo and Juliet**

1. Romeo and Juliet: Unit Introduction

- Learn about the author's life
 - Learn about the historical background of the author's life
 - Identify the elements of drama
 - Identify literary characteristics specific to the play
2. Romeo and Juliet: Act I
 - Identify point of view and types of narration
 - Develop and apply effective comprehension strategies
 - Read and analyze the text, then respond to questions
 - Draw conclusions
 - Define new vocabulary and identify words in context
 3. Romeo and Juliet: Act I, continued
 - Read and analyze the text, then respond to questions
 - Analyze dialogue
 - Analyze the types of dramatic speech
 - Analyze relationships between and among characters, setting, and events
 - Define new vocabulary and identify words in context
 4. Romeo and Juliet: Act II
 - Identify the role of conflict in plot
 - Define the elements of plot
 - Analyze the structure of a five-act play
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 5. Romeo and Juliet: Act II, continued
 - Define theme
 - Analyze themes in the novel
 - Analyze tragedy
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 6. Romeo and Juliet: Act III
 - Define and analyze setting
 - Identify the elements of blank verse
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 7. Romeo and Juliet: Act III, continued
 - Describe how an author develops a character
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 8. Romeo and Juliet: Act IV
 - Analyze comic relief as a dramatic element
 - Recognize the three types of irony
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 9. Romeo and Juliet: Act IV, continued
 - Identify and evaluate figurative language in the play
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 10. Romeo and Juliet: Act V
 - Analyze stage directions
 - Recognize the features of the Globe Theatre
 - Read and analyze the text, then respond to questions

- Define new vocabulary and identify words in context
- 11. Romeo and Juliet: Act V, continued
 - Identify and evaluate themes in the play
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
- 12. Writing Workshop: Persuasive Essay
 - Analyze the components of a persuasive essay
 - Write a persuasive essay
 - Revise and edit for content, grammar, spelling, and formatting
- 13. Romeo and Juliet: Unit Review
 - Study vocabulary and review previous lesson goals
- 14. Romeo and Juliet: Unit Test

3. Other Worlds

1. Other Worlds: Unit Introduction
 - Understand characteristics of science fiction
 - Identify strategies for evaluating a text
 - Review strategies for learning new vocabulary
 - Understand how to use end punctuation marks correctly
2. A Sound of Thunder: Bradbury
 - Analyze an author's use of different techniques of characterization
 - Practice strategies for evaluating a text
 - Learn strategies for understanding scientific and technical vocabulary
 - Understand how to use commas to separate items in a series
3. Nethergrave: Skurzynski
 - Analyze a character's motivation in a science fiction story
 - Practice strategies for evaluating a text
 - Learn strategies for understanding scientific and technical vocabulary
 - Compare texts within the same genre
 - Understand how to use commas correctly
4. Writing Workshop: Critical Response
 - Use drafting strategies to compose a critical essay about a science fiction story
 - Use vocabulary words correctly in writing
 - Use commas correctly in writing
5. Comparing Texts: Brown and Brautigan
 - Compare the ways in which works from different genres address similar themes
 - Understand how chronological order is used to organize events in a biography
 - Learn strategies for understanding scientific and technical vocabulary
 - Understand how to use commas to set off nonessential information
6. The Handsomest Drowned Man in the World: Marquez
 - Understand characteristics of the genre of magical realism
 - Understand how point of view is used for effect in a short story
 - Use italics and quotation marks correctly in writing titles
7. Language Focus: Writing Conventions
 - Understand the importance of following standard conventions in academic writing
 - Develop a personal editing checklist to improve adherence to standard writing conventions
 - Use end punctuation, commas, italics, and quotation marks correctly in writing
8. Other Worlds: Unit Review
 - Review characteristics of science fiction
 - Review strategies for comparing and evaluating texts
 - Review strategies for learning new vocabulary

- Review conventions for end punctuation, commas, italics, and quotation marks
9. Other Worlds: Unit Test
 10. Writing Workshop: Critical Response
 - Use revising and editing strategies to compose the final draft of a critical response essay
 - Use vocabulary words correctly in writing
 - Use end punctuation, commas, italics, and quotation marks correctly in writing
- 4. The Research Paper**
1. Unit Introduction: The Research Paper
 - Generate a topic for an original research paper
 - Conduct preliminary research to identify potential areas of focus
 2. Prewriting: Forming Research Questions
 - Conduct preliminary research to identify potential areas of focus
 - Develop a list of major questions to guide research
 - Identify the differences between primary and secondary sources and examples of each source type
 - Understand writing conventions for capitalization
 3. Prewriting: Developing a Research Proposal
 - Draft a 1-page research proposal explaining topic, major research questions, and potential areas of focus
 - Identify the differences between primary and secondary sources and examples of each source type
 - Understand writing conventions for capitalization
 4. Prewriting: Gathering Information
 - Learn strategies for evaluating Web sites
 - Identify the differences between primary and secondary sources and examples of each source type
 - Understand writing conventions for capitalization
 5. Prewriting: Evaluating Information
 - Critically evaluate print and electronic informational resources
 - Understand writing conventions for using apostrophes
 6. Prewriting: Taking Notes
 - Practice effective note-taking strategies, including summarizing and paraphrasing
 - Use research questions to guide note-taking
 - Understand writing conventions for using semicolons
 7. Prewriting: Synthesizing Information
 - Synthesize ideas and details from multiple informational texts
 - Use information from a variety of sources to begin formulating answers to the research questions
 - Understand writing conventions for using semicolons
 8. Prewriting: Organizing Ideas
 - Craft a concise and effective thesis that states the controlling idea of the research paper
 - Develop an outline that identifies main ideas and supporting details
 - Understand writing conventions for using hyphens, dashes, and parentheses
 9. Drafting: Getting Started
 - Write a clear and engaging introduction with an effective thesis statement
 - Use an outline to develop body paragraphs
 - Review conventions for capitalization and punctuation
 10. Drafting: Integrating Ideas
 - Write body paragraphs with a clear organizational structure
 - Integrate original ideas with information from outside sources effectively

- Understand and apply conventions for in-text citations using MLA style
- 11. Drafting: Wrapping It Up
 - Write a memorable conclusion that effectively summarizes the main ideas of the research paper
 - Review a peer's research paper and evaluate how well it fulfills the writing purpose
 - Understand and apply conventions for in-text citations using MLA style
- 12. Creating a Multimedia Presentation
 - Develop a multimedia presentation based on the research paper
- 13. Revising: Identifying Trouble Spots
 - Review key traits of effective writing (focus, organization, idea development, voice)
 - Identify possible areas for revision based on key writing traits
 - Begin revising the research paper to improve it in any of the following areas: focus, organization, voice, idea development
- 14. Revising: Working with Feedback
 - Use feedback to revise and edit a research paper
- 15. Editing: Citing Works Using MLA Format
 - Follow appropriate conventions for documenting information from primary and secondary sources
 - Create a Works Cited page using MLA format
- 16. Editing: Polishing, Proofreading, and Publishing
 - Edit, publish, and reflect on the final draft of a research paper

5. Crossing Borders

1. Crossing Borders: Unit Introduction
 - Make personal connections with unit theme
 - Begin to generate topics for an informational essay
 - Review strategies for learning new vocabulary
 - Understand characteristics of prepositional and appositive phrases
2. Borders: King
 - Analyze a character's motivation in a short story
 - Understand the use of chronological order, including flashbacks, in a short story
 - Understand the characteristics of different types of verbal phrases
3. Delfino II: Diez in the Desert
 - Analyze how an author develops mood in an essay
 - Understand the use of imagery, details, and dialogue to create mood
 - Understand the difference between independent and subordinate clauses
4. Writing Workshop: Informational Essay
 - Use drafting strategies to compose an informational essay
 - Use vocabulary words correctly in writing
 - Use phrases and clauses correctly in writing
5. Poems Across the Divide
 - Analyze how writers develop a theme in poetry
 - Compare the development of related themes in three poems
 - Understand the characteristics of adverb clauses
6. Hip-Hop Planet: McBride
 - Understand how a writer's purpose and audience determine the content of an essay
 - Analyze how a writer uses similes for effect in an informational essay
 - Understand the four types of sentence structure
7. Blues Ain't No Mockin Bird: Bambara
 - Analyze the effect of dialect in a story
 - Understand the four types of sentence structure
8. Language Focus: Transitions and Organization

- Understand the importance of organizing ideas clearly in writing
 - Use transitional phrases to improve organization in an essay
 - Use phrases and clauses correctly in writing
 - Understand how to correct common sentence errors: fragments and run-on sentences
9. Crossing Borders: Unit Review
- Review unit theme
 - Review strategies for comparing themes across texts
 - Review strategies for learning new vocabulary
 - Review phrases and clauses
10. Crossing Borders: Unit Test
11. Writing Workshop: Informational Essay
- Use revising and editing strategies to compose the final draft of an informational essay
 - Use vocabulary words correctly in writing
 - Use phrases and clauses correctly in writing
 - Use transitional phrases to improve organization in an informational essay
6. **Semester Exam**
1. Semester Review
- Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, keywords and vocabulary terms, and all important concepts that may be covered on this exam
2. Semester Exam

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Reading for Understanding

Lesson	Description	Time (min)	Objective(s)
 Main Ideas and Supporting Details	This lesson teaches students to locate the main idea topic sentences and supporting details in a passage of text. Students also learn to identify the main idea and supporting details in a variety of sources.	45	<ul style="list-style-type: none">• Identify main ideas• Identify a topic sentence• Identify supporting details
 Quiz: Main Ideas and Supporting Details			
 Summarizing Reading Passages	This lesson teaches students how to summarize informational text.	45	<ul style="list-style-type: none">• Use four steps to produce good summaries• Summarize informational passages
 Quiz: Summarizing Reading Passages			

Lesson	Description	Time (min)	Objective(s)
 Drawing Conclusions	This lesson teaches students how to draw conclusions using supporting details.	45	<ul style="list-style-type: none"> • Identify different types of supporting details in a passage • Use supporting details to determine meaning • Use supporting details to draw conclusions
 Quiz: Drawing Conclusions			
 Context Clues	This lesson teaches students how to understand and use context clues to determine the meaning of unfamiliar words.	45	<ul style="list-style-type: none"> • Understand and use context clues to determine meanings of unfamiliar words
 Quiz: Context Clues			
 Posttest 1			

Module 2: Narrative

Lesson	Description	Time (min)	Objective(s)
 Plot	This lesson teaches students the basic structure of plot in narrative: conflict rising action climax and resolution.	45	<ul style="list-style-type: none"> • Define a narrative plot structure • Track the conflict in a narrative plot
 Quiz: Plot			
 Character I	This lesson teaches students how to recognize the major minor round flat dynamic or static characters as well as the protagonist and antagonist in a piece of fiction.	45	<ul style="list-style-type: none"> • Identify the protagonist and antagonist in a story • Recognize dynamic and static characters • Distinguish between round and flat characters • Identify major and minor characters
 Quiz: Character I			

Lesson	Description	Time (min)	Objective(s)
 Character II	This lesson teaches students the definition for direct and indirect characterization and the process for understanding character traits: identifying character type identifying technique used using context clues and drawing conclusions.	45	<ul style="list-style-type: none"> • Define and identify direct and indirect characterization • Recognize the author's techniques for revealing character traits • Draw conclusions about characters based on context clues
 Quiz: Character II			
 Theme and Symbolism	This lesson teaches students to understand and analyze theme and symbolism in narrative using main idea supporting details and summary.	45	<ul style="list-style-type: none"> • Define theme and symbolism • Recognize theme and symbolism • Know objects, people, and animals as symbols
 Quiz: Theme and Symbolism			
 Point of View	This lesson teaches students how to distinguish among first third limited and omniscient points of view within reading passages.	45	<ul style="list-style-type: none"> • Define narrator, point of view, and persona • Identify point of view in a narrative • Define first- and third-person points of view • Identify stream of consciousness • Identify the limited an omniscient third-person narrative
 Quiz: Point of View			
 Tone and Setting	This lesson teaches students to know and recognize different settings and types of tone. Students will recognize optimistic, pessimistic, angry, humorous, and satirical tones in different passages.	45	<ul style="list-style-type: none"> • Define tone and setting • Identify different types of tone in reading passages • Locate setting within reading passages
 Quiz: Tone and Setting			

Lesson	Description	Time (min)	Objective(s)
★ Posttest 2			

Module 3: Exposition

Lesson	Description	Time (min)	Objective(s)
 Purpose and Audience	This lesson teaches students to be aware of the function of audience and purpose in writing. Students will learn the process of determining audience and purpose and to evaluate different reading passages for audience and purpose.	45	<ul style="list-style-type: none"> • Identify the audience and purpose of a work you are reading or writing • Understand the relationship between audience and purpose and its effect on the writing • Choose the proper form of language to be used when writing for an audience
 Quiz: Purpose and Audience			
 Types of Expository Essays	This lesson introduces students to exposition and the distinguishing features of the different types of expository essays: the cause-and-effect essay the problem-and-solution essay and the comparison-and-contrast essay.	45	<ul style="list-style-type: none"> • Understand the meaning of exposition and expository nonfiction writing • Identify the three types of expository essays • cause and effect, problem and solution, and compare and contrast • Understand the structure of expository essays
 Quiz: Types of Expository Essays			
 Persuasion	This lesson teaches students about persuasive language techniques used in the persuasive essay and in advertisements.	45	<ul style="list-style-type: none"> • Understand the purpose of persuasive writing • Identify the methods used for persuasive appeal • Identify the persuasive techniques of advertising
 Quiz: Persuasion			
★ Posttest 3			

Module 4: Genres

Lesson	Description	Time (min)	Objective(s)
 Sound Devices in Lyric Poetry	This lesson teaches students to recognize understand and analyze sound devices in lyric poetry. Students analyze the refrain, rhyme, rhythm, repetition, and alliteration in lyric poetry.	45	<ul style="list-style-type: none"> • Understand the basic characteristics of the lyric poem • Identify the functions of refrain, rhyme, rhythm, repetition, and alliteration in lyric poetry • Analyze lyric poetry selections for refrain, rhyme, rhythm, repetition, and alliteration
 Quiz: Sound Devices in Lyric Poetry			
 Biography and Autobiography	This lesson teaches students the different characteristics of biographies and autobiographies and how to distinguish between them.	45	<ul style="list-style-type: none"> • Understand the characteristics of biographical writing • Distinguish between biography and autobiography
 Quiz: Biography and Autobiography			
 Journalism	This lesson teaches students about journalism and where it can be found. Students will learn about three main types of news stories: news articles, features, and editorials. They will also learn to distinguish between objectivity and bias in news stories.	45	<ul style="list-style-type: none"> • Understand what journalism is and where news stories can be found • Recognize the characteristics of three different types of journalistic stories: news articles, features, and editorials • Know the reporter's formula: who, what, where, when and why • Understand the differences between bias and objectivity • Understand the different kinds of newspapers and their structure
 Quiz: Journalism			

Lesson	Description	Time (min)	Objective(s)
 Characteristics of Drama	This lesson will teach students about the different types of plays; the format of plays including acts scenes and dialogue and the other characteristics of plays such as characters stage directions and setting.	45	<ul style="list-style-type: none"> • Understand the characteristics of a dramatic play • Identify the format of dramatic scripts • Understand characteristics of comedy and tragedy • Understand the function of dialogue and stage directions
 Quiz: Characteristics of Drama			
 Political Speeches	This lesson teaches students the characteristics and purposes of a political speech. Students learn to understand the organizational structure of persuasive speeches and learn the rhetorical devices used to make the speech memorable.	45	<ul style="list-style-type: none"> • Identify the purposes and characteristics of a political speech • Understand the organizational structure of a political speech • Understand the rhetorical devices used in a political speech
 Quiz: Political Speeches			
★ Posttest 4			

Module 5: The Writing Process

Lesson	Description	Time (min)	Objective(s)
 Writing Process: Prewriting	This lesson teaches students the five steps of the writing process. Students also learn two prewriting strategies: choosing a topic through brainstorming and narrowing a topic using the web graphic organizer.	45	<ul style="list-style-type: none"> • Identify the parts of the writing process • Explain the importance of prewriting • Explain the importance of brainstorming and graphic organizers in the prewriting process
 Quiz: Writing Process: Prewriting			

Lesson	Description	Time (min)	Objective(s)
 Writing Process: Outlines	This lesson teaches students the characteristics of outlines and the use of outlines to help with drafting a piece of writing. Students distinguish among three types of outlines for term papers: topic, sentence, and paragraph outlines.	45	<ul style="list-style-type: none"> • Identify the importance of an outline in the writing process • Identify the basic structure of an outline or essay • Organize ideas to form an outline • Identify the three basic types of outlines
 Quiz: Writing Process: Outlines			
 Writing Process: Drafts	This lesson teaches students how to use the process for creating the rough draft of an essay. Students learn how to structure essays and how to develop the introduction body and conclusion.	45	<ul style="list-style-type: none"> • Understand how a rough draft of an essay is written
 Quiz: Writing Process: Drafts			
 Writing Process: Editing	This lesson teaches students the basic steps for revising editing and proofreading their drafts. Students practice editing a paragraph and learn five common proofreading symbols.	45	<ul style="list-style-type: none"> • Revise a paper • Edit and proofread a paper • Use proofreading marks
 Quiz: Writing Process: Editing			
 Writing Process: Rubrics	This lesson teaches students the definition and purpose of rubrics. Students learn about the differences between general and specific rubrics. Students apply what they have learned about general rubrics to a passage.	45	<ul style="list-style-type: none"> • Define rubric • Understand the difference between a general and a specific rubric • Use a general rubric
 Quiz: Writing Process: Rubrics			

Lesson	Description	Time (min)	Objective(s)
★ Posttest 5			

Module 6: Academic and Workplace Skills

Lesson	Description	Time (min)	Objective(s)
 Speaking Skills	This lesson teaches students about the different types of speeches and the process for giving a speech: choosing a topic determining the purpose gathering materials organizing the speech using speaking strategies and evaluating speeches.	45	<ul style="list-style-type: none"> • Select a topic for a speech • Identify the four different types of speeches and their purposes • Gather and organize materials for a speech • Use different strategies for speaking • Evaluate a speech
 Quiz: Speaking Skills			
 Listening Skills	This lesson teaches students how and when to use critical empathic appreciative and reflective listening skills and how to prepare for listen to and evaluate a speaker and the speakers message.	45	<ul style="list-style-type: none"> • Distinguish between different types of listening • Prepare before listening to a speaker • Distinguish between verbal and nonverbal communication • Evaluate a speech
 Quiz: Listening Skills			
 Group Discussion and Peer Review	This lesson teaches students how to participate effectively in group discussions. They will learn group procedure group roles and tips for effective participation. They will also learn how to give and take feedback effectively in peer reviews.	45	<ul style="list-style-type: none"> • Understand different types of discussion groups and the procedure for conducting a discussion • Participate effectively in groups • Define peer review and how to give effective feedback • Ask open-ended and follow-up questions
 Quiz: Group Discussion and Peer Review			

Lesson	Description	Time (min)	Objective(s)
 Viewing Skills	This lesson teaches students how to apply viewing skills to print and nonprint sources. They will learn to interpret maps illustrations and graphs in informational text and to view fine art critically by understanding its aesthetic elements.	45	<ul style="list-style-type: none"> • Read and interpret maps • Read and interpret bar and line graphs as well as pie charts • Apply aesthetic elements to a piece of art to make evaluations
 Quiz: Viewing Skills			
 Business Letters	This lesson teaches students about the different types of writing that may be encountered in the workplace. Students will learn about the format of a business letter and learn how to address an envelope.	45	<ul style="list-style-type: none"> • Identify the types of business writing and its language and formats • Identify the parts of a business letter • Address a business envelope
 Quiz: Business Letters			
 Workplace Skills	This lesson teaches students how to follow instructions within business documents formatted as paragraphs if-then tables lists flowcharts and diagrams. Students also learn to use questioning as a prereading strategy and scan business documents for information.	45	<ul style="list-style-type: none"> • Identify the different instruction formats that appear in business documents • Understand and follow instructions for competing tasks in the workplace • Scan business documents in order to quickly identify their content
 Quiz: Workplace Skills

 Quiz: Commas, Semicolons, and Colons			
 Using Apostrophes	This lesson teaches students how to use apostrophes with possessive nouns and pronouns. Students also use apostrophes with contractions and to show ownership.	45	<ul style="list-style-type: none"> • Use apostrophes with possessive nouns and pronouns • Use apostrophes to show individual and joint ownership • Use apostrophes with contractions

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Using Apostrophes			
📁 Quotation Marks	This lesson teaches students how to recognize direct and indirect quotations in sentences. Students also learn the rules for punctuating quotations and practice punctuating direct quotations.	45	<ul style="list-style-type: none"> • Identify direct and indirect quotations • Punctuate direct quotations
🔍 Quiz: Quotation Marks			
📁 Combining Sentences for Variety	This lesson teaches students to improve their writing by knowing how to combine sentences using compounds, to combine sentences using clauses and phrases, and to vary sentences by length sentence beginnings and subject-verb order.	45	<ul style="list-style-type: none"> • Combine sentences using compound subjects, verbs, and objects • Use a semicolon or comma and a coordinating conjunction to combine sentences • Combine sentences using phrases and clauses • Revise sentences by varying sentence beginnings and length and by inverting the subject-verb order
🔍 Quiz: Combining Sentences for Variety			
★ Posttest 4			

Module 5: Word Usage and Spelling

Lesson	Description	Time (min)	Objective(s)
📁 Figurative Language	This lesson teaches students how to identify similes, metaphors, personification, alliteration, and onomatopoeia within the context of a poem.	45	<ul style="list-style-type: none"> • Define figurative language • Identify simile and metaphor in a poem • Identify personification in a poem • Identify alliteration and onomatopoeia in a poem

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Figurative Language			
📁 Synonyms, Antonyms, Homophones	This lesson teaches students to identify and distinguish between synonyms, antonyms, and homophones.	45	<ul style="list-style-type: none"> Define and identify synonyms, antonyms, and homophones Tell the difference between synonyms, antonyms, and homophones
🔍 Quiz: Synonyms, Antonyms, Homophones			
📁 Double Negatives	This lesson teaches students how to recognize and correct double negatives in sentences.	45	<ul style="list-style-type: none"> Recognize double negatives in sentences Correct sentences that have double negatives
🔍 Quiz: Double Negatives			
📁 Spelling I	This lesson teaches students to know the difference between singular and plural nouns and pronouns as well as to understand and use the common spelling rules for plurals and possessives.	45	<ul style="list-style-type: none"> Differentiate between singular and plural nouns Use the spelling rules for plural and possessive noun forms Correctly spell irregular plural nouns Use apostrophes
🔍 Quiz: Spelling I			
📁 Spelling II	This lesson teaches students how to modify word endings when adding suffixes by changing the final vowels e and y as well as doubling the final consonant.	45	<ul style="list-style-type: none"> Spell words when adding suffixes Spell words ending in e and y when adding certain suffixes Use double consonants before adding certain suffixes
🔍 Quiz: Spelling II			
★ Posttest 5			

Module 6: Vocabulary

Lesson	Description	Time (min)	Objective(s)
 Prefixes I	This lesson teaches students the strategy of using prefixes to decode the meaning of words when encountering unfamiliar vocabulary in reading passages.	45	<ul style="list-style-type: none"> • Define these word parts: prefix, root, and suffix • Use word parts as a reading strategy • Define these five prefixes: de-, dis-, re-, sub-, and un- • Use these prefixes to guess the meaning of unfamiliar words • Understand these prefixes in the context of a reading passage
 Quiz: Prefixes I			
 Prefixes II	This lesson introduces students to the concept of word parts (prefixes, suffixes, roots). Students learn a set of prefixes and use them in the context of reading passages.	45	<ul style="list-style-type: none"> • Define these word parts: prefix, root, and suffix • Use word parts as a reading strategy • Define these five prefixes: de-, dis-, re-, sub-, and un- • Use these prefixes to guess the meaning of unfamiliar words • Understand these prefixes in the context of a reading passage
 Quiz: Prefixes II			
 Roots I	This lesson teaches students the strategy of using roots to decode the meaning of words when encountering unfamiliar vocabulary in reading passages.	45	<ul style="list-style-type: none"> • Define root • Use word parts as a reading strategy • Define five roots: duct, graph, spect, ven, vert • Use these roots to find the meaning of unfamiliar words • Understand these roots in a reading passage
 Quiz: Roots I			

Lesson	Description	Time (min)	Objective(s)
 Roots II	<p>This lesson teaches students the concept of root words. Students use these words in the context of reading passages.</p>	45	<ul style="list-style-type: none"> • Define these word parts: prefix, root, and suffix • Use word parts as a reading strategy • Define these five roots: mit, pon, puls, scrib, ten • Use these roots to guess the meaning of unfamiliar words • Understand these roots in the context of a reading passage
 Quiz: Roots II			
 Suffixes	<p>This lesson on vocabulary teaches students the strategy of using suffixes to decode the meaning of words when encountering unfamiliar vocabulary in reading passages.</p>	45	<ul style="list-style-type: none"> • Define these word parts: prefix, root, and suffix • Use word parts as a reading strategy • Define five suffixes: -ate, -ful, -less, -ly, and -logy • Use these suffixes to guess the meaning of unfamiliar words • Understand these suffixes in the context of a reading passage
 Quiz: Suffixes			
 Word Origins	<p>This lesson teaches word origins specifically as they relate to Greek mythology. The student will learn about Greek mythology become familiar with a few myths and understand the relationship between myths and some words in contemporary English to better understand the definition for those modern words.</p>	45	<ul style="list-style-type: none"> • Understand that some words have their origins in Greek mythology • Understand the meaning and origin of the words Promethean and narcissistic • Understand the meaning and origin of the words odyssey, siren, and herculean
 Quiz: Word Origins			

Lesson	Description	Time (min)	Objective(s)
 Analogies	This lesson teaches students how sets of words can share a specific relationship. Students learn to decode the structure of analogies understand common analogy types and use their knowledge of word parts to solve analogies containing unfamiliar vocabulary.	45	<ul style="list-style-type: none"> • Understand what an analogy is and how it is solved • Determine the relationship between pairs of words • Make an educated guess about the relationship of words based on an understanding of word parts
 Quiz: Analogies			
★ Posttest 6			

Module 7: Research Skills

Lesson	Description	Time (min)	Objective(s)
 Introduction to the Dictionary	This lesson teaches students to understand word entries in dictionaries including word definitions, pronunciations, syllables, stresses, and word etymologies.	45	<ul style="list-style-type: none"> • Identify the different types of dictionaries • Look up words in a dictionary • Understand a word's pronunciation based on its dictionary entry • Divide a word into syllables based on its dictionary entry • Correctly stress a word's syllables based on its dictionary entry • Determine the etymology of a word based on its dictionary entry
 Quiz: Introduction to the Dictionary			

Lesson	Description	Time (min)	Objective(s)
📖 Introduction to Research Papers	This lesson teaches students about research reports and introduces students to all aspects of the research paper from writing a thesis statement to gathering information organizing information and referencing sources.	45	<ul style="list-style-type: none"> • Determine research needs • Choose a research topic • Narrow a research topic • Track and quote sources
📖 Quiz: Introduction to Research Papers			
📖 Using the Internet for Research	This lesson teaches students how useful the Internet can be as a research tool. Students learn how to conduct searches on the Internet and how to evaluate the reliability of Internet resources.	45	<ul style="list-style-type: none"> • Define Internet-related terms • Research topics on the Internet • Determine if Internet resources are valid
📖 Quiz: Using the Internet for Research			
★ Posttest 7			

Review Test

Lesson	Description	Time (min)	Objective(s)
☆ Review Test			

English 10

English 10

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise English 10. In this course, the student will explore the timeless themes of world literature, including works from the Americas, Europe, and Africa. In reading these diverse selections, the student will gain a thorough understanding of fiction genres, including classics, contemporary fiction, poetry, and drama. The student will also read Mark Twain's *Adventures of Huckleberry Finn*. John Steinbeck's novella *Of Mice and Men* may be read instead of *Adventures of Huckleberry Finn*. In reading these American literature selections and creating a multimedia presentation, the student will understand longer works of literature in their historical and literary context. Writing instruction guides the student through the process of composing expository and analytical essays. It also provides opportunities for the student to write creatively; the student will compose a short story and poem.

Throughout the course, the student expands his vocabulary in context. The mastery of both critical vocabulary and grammar skills helps the student become a more thoughtful and effective reader and writer.

Semester A Outline

1. The Literature of the Americas

1. Course Introduction

- Recognize the connection between archetypes and themes in literature
- Differentiate between paraphrasing and summarizing
- Identify the main idea in a nonfiction literary work
- Identify various parts of speech
- Use academic vocabulary to identify literary concepts

2. Aztec Creation Story

- Analyze characters in a myth
- Name the elements of a creation story
- Identify and use nouns correctly

3. Emancipation

- Analyze historically significant documents
 - Determine the author's/speaker's purpose for writing/speaking
 - Compare themes in literature
 - Identify and use pronouns correctly
4. At The Tourist Center in Boston
 - Examine how diction affects tone
 - Identify tone in a poetic work
 - Identify and use verbs correctly
 5. Day of the Butterfly
 - Analyze theme in a literary work
 - Identify and use adjectives correctly
 6. No Dogs Bark
 - Analyze symbolism in a short story
 - Compare themes across texts
 - Examine images that contribute to mood
 - Identify and use adverbs
 7. Crossroads: A Sad Vaudeville
 - Analyze characters in a dramatic work
 - Identify and explain dramatic irony in a play
 - Identify prepositions, conjunctions, and interjections in writing
 8. The Literature of the Americas Unit Review
 - Review concepts and skills from previous lessons to prepare for a test
 9. The Literature of the Americas Unit Test
 - Demonstrate mastery of skills and comprehension of material taught

2. The Literature of the Americas II

1. Love after Love
 - Identify a paradox and analyze its meaning in a literary work
 - Identify common sentence errors
 - Identify components of a sentence
2. When Greek Meets Greek
 - Identify how dialogue reveals information about a character
 - Define idioms, colloquialisms, slang, and jargon
 - Identify and use simple and complete subjects correctly
3. Girls Can We Educate We Dads? and In Trying Times
 - Analyze the effect of diction in a poem
 - Analyze the impact repetition has on a poem
 - Identify thematic connections across texts
 - Identify and use complete and simple predicates correctly
4. The Youngest Doll
 - Identify the elements of magic realism in a literary work
 - Determine the central idea of a literary work
 - Compare cultural experiences reflected in works of literature from outside the United States
 - Identify and use compound subjects and verbs correctly

 - Revise an essay for varied sentence length
 - Identify and use direct and indirect objects correctly
- 8. The Censors
 - Analyze irony in a literary work
 - Examine how characters' actions serve to advance the plot
 - Identify and use predicate nominatives and predicate adjectives correctly
- 9. Tonight I Can Write and Serenity
 - Identify personification in a literary work
 - Analyze tone in a literary work
 - Use inference to determine poetic meaning
 - Correctly identify sentence patterns
- 10. And of Clay Are We Created
 - Analyze tone in a literary work
 - Examine how an author develops a character
- 11. The Literature of the Americas II Review
 - Implement review strategies to prepare for a test
- 12. The Literature of the Americas II Test
 - Demonstrate mastery of skills and comprehension of material learned
- 13. Writing Workshop: Compare and Contrast Essay
 - Edit an essay to produce a final draft
 - Use a rubric to evaluate an essay

3. Europe I

1. The Divine Comedy
 - Identify the rhyme scheme in a poem
 - Analyze the effect of rhyme scheme on a poem's meaning
 - Use inference to determine poetic meaning
 - Identify and use phrases correctly
2. First Confession
 - Identify and examine the types of literary characters in a work of fiction
 - Determine how language choices help to evoke a sense of time and place
 - Analyze the use of humor in a work of fiction
 - Identify and use prepositional phrases correctly
3. Poems on Life and Death
 - Identify the differences between the sonnet and villanelle poetic forms
 - Analyze voice in a poetic work
 - Organize an expository essay
 - Identify and use appositives and appositive phrases correctly

4. Writing Workshop
 - Write a rough draft of an expository essay
5. The Love Song of J. Alfred Prufrock
 - Identify and interpret allusions in a poetic work
 - Analyze sensory details and images in poetry
 - Review an essay for unity and coherence
 - Identify and use verbals and verbal phrases correctly
6. The Destructors Part 1
 - Demonstrate understanding of characters and plot events in a narrative
 - Analyze how an author's language choices evoke a sense of time and place
 - Identify and use gerund and gerund phrases correctly
7. The Destructors Part 2
 - Analyze the elements that contribute to an author's style
 - Analyze the interaction between and among characters in a narrative
 - Use context clues to determine the meaning of words
 - Identify and use infinitives and infinitive phrases correctly
8. The Guitar and Poor Fish
 - Identify and analyze the themes of a literary work
 - Use inference to analyze meaning in a narrative
 - Identify and explain external and internal conflict in a narrative
 - Identify misplaced modifiers, dangling modifiers, and phrase fragments
9. Unit Review
 - Implement review strategies to prepare for a test
10. Europe 1 Unit Test
 - Demonstrate mastery of skills and comprehension of material studied
11. Writing Workshop Expository Essay
 - Edit an essay to produce a final draft
 - Publish a final draft

4. Europe II

1. The Black Sheep; The Balek Scales
 - Analyze point of view in a short story
 - Analyze an author's use of satire in a short story
 - Identify and explain the elements of allegory
 - Examine the literary elements that contribute to theme
 - Use context to determine the meaning of unknown words
2. The Last Judgment: Capek
 - Analyze the use of dialogue in character development
 - Demonstrate comprehension of narrative text
 - Identify subordinate clauses correctly
3. A Contribution to Statistics; And Yet the Books
 - Interpret an author's purpose and message
 - Identify relevant details that contribute to an author's purpose and message
 - Identify adverbial clauses and subordinating conjunctions correctly
4. Writing Workshop: Personal Narrative
 - Write a rough draft of your personal narrative

5. The Rhinoceros: Part 1
 - Demonstrate comprehension of a narrative text
 - Analyze an author's use of a motif in narrative text
 - Identify adjectival clauses and the function of a relative pronoun
6. The Rhinoceros: Part 2
 - Examine how historical background contributes to a literary work
 - Identify examples of Theater of the Absurd
 - Identify misplaced modifiers and noun clauses
7. Alone; The Nobel Prize; First Frost
 - Identify and analyze imagery that supports a theme
 - Identify various kinds of sentence structures
 - Demonstrate understanding of the structural elements of poetic texts
8. Forbidden Fruit
 - Analyze an author's use of hyperbole in a narrative text
 - Identify and examine ideas that support the development of the theme in a narrative text
 - Identify clause fragments and run-on sentences
9. Europe II Review
 - Implement review strategies to prepare for the unit test
10. Europe II Unit Test
 - Demonstrate mastery of skills and comprehension of material studied
11. Writing Workshop Personal Narrative
 - Edit an essay to produce a final draft
 - Publish a final draft

5. **Adventures of Huckleberry Finn**

1. Adventures of Huckleberry Finn: Lesson 1
 - Describe Samuel Clemens's background and how it affected his writing
 - Define vocabulary words
 - Identify point of view in the novel
2. Adventures of Huckleberry Finn: Lesson 2
 - Apply the definitions of Regionalism, Realism, and Naturalism to the novel
 - Define vocabulary words
 - Analyze the use of dialect in the novel
3. Adventures of Huckleberry Finn: Lesson 3
 - Analyze dialogue and characterizations of Jim from the novel
 - Define vocabulary words
 - Generate ideas for character analysis project
4. Adventures of Huckleberry Finn: Lesson 4
 - Describe the requirements of the character analysis project
 - Compose a rough draft of the character analysis project
5. Adventures of Huckleberry Finn: Lesson 5
 - Define satire
 - Identify use of satirical techniques in the novel
 - Define vocabulary words
 - Analyze passages from the novel to gain character insights

6. Adventures of Huckleberry Finn: Lesson 6
 - Evaluate the significance of Huck's moral crisis
 - Define vocabulary words
 - Identify the use of metaphors in the novel
7. Adventures of Huckleberry Finn: Lesson 7
 - Analyze the attitudes on race prevalent when the novel was published
 - Define vocabulary words
 - Debate whether challenges to the novel are valid
8. Adventures of Huckleberry Finn: Lesson 8
 - Identify themes in the novel
 - Analyze social commentary in the novel
 - Define vocabulary words
 - Compose the final draft of the character analysis project

6. Africa

1. Sunjata Part 1
 - Identify characteristics of an epic poem
 - Analyze the elements of a narrative in an epic poem
 - Demonstrate understanding of events in an epic poem
2. Sunjata Part 2 and Africa
 - Demonstrate understanding of plot events in an epic poem
 - Analyze the elements of an epic poem
 - Identify and analyze examples of personification in a poem
 - Identify and use the principal parts of verbs correctly
3. Black Girl Part 1
 - Analyze the effect of setting on narrative elements
 - Analyze the effect of an author's manipulation of time in a narrative text
 - Identify and use the principal parts of verbs correctly
4. Black Girl Part 2
 - Demonstrate understanding of the interaction of narrative elements in a literary work
 - Identify and use problem verbs correctly
5. Three Pieces: Senghor, Soyinka, Achebe
 - Analyze diction and the use of figurative language in text
 - Draw conclusions using textual support
 - Identify and use various verb tenses correctly
6. Writing Workshop: Poem
 - Compose a draft of a poem
7. In the Shadow of War
 - Identify and analyze the plot of a short story
 - Analyze how the plot and characters of a short story reflect an author's perspective
 - Identify and use progressive and emphatic verb forms correctly
8. Loyalties and A Meeting in the Dark Part 1
 - Identify and analyze different types of humor in narrative text
 - Use context clues to determine the meaning of unknown words/phrases
 - Identify and correct unnecessary shifts in verb tense
9. A Meeting in the Dark Part 2

- Identify and analyze how the characters and plot serve to advance the theme of a work of fiction
 - Identify active and passive voice correctly
10. The Pig
- Analyze diction that contributes to tone in a literary work
 - Identify and use verb forms correctly
11. No Witchcraft for Sale
- Determine the most important ideas to include in a summary of a narrative text
 - Use context to determine understanding of unknown words or phrases
12. The Moment Before the Gun Went Off
- Analyze the use of irony in a short story
 - Apply knowledge of strong verbs
 - Use context to determine the meaning of unknown words and phrases
13. The Prisoner Who Wore Glasses
- Analyze character development in a narrative text
14. The Literature of Africa Unit Review
- Implement review strategies to prepare for a test
15. The Literature of Africa Unit Test
- Demonstrate mastery of skills and comprehension of material studied
16. Writing Workshop: Poem
- Compose a final version of a poem
7. **Semester Review and Exam**
1. English 10 A Semester Review
 - Review major concepts and strategies from the English 10 A course in preparation for the semester exam
 2. English 10 A Semester Exam

Semester B Summary:

This is the second of two courses that comprise English 10. In this course, the student will continue to explore the timeless themes of world literature, including works from Europe, the Middle East, Asia, and the Pacific Rim. In reading these diverse selections, the student will gain a thorough understanding of fiction genres, including classics, contemporary fiction, poetry, and drama. The student will also read Oscar Wilde's play *The Importance of Being Earnest*. George Bernard Shaw's play *Pygmalion* may be read instead of *The Importance of Being Earnest*. In reading these British plays and composing a dramatic scene, the student will understand drama in its historical and literary context.

Writing instruction guides the student through the process of composing a descriptive portrait, a research paper, and a persuasive speech. Throughout the course, the student expands his vocabulary in context. The mastery of both critical vocabulary and grammar skills helps the student become a more thoughtful and effective reader and writer.

Semester B Outline

1. **Nonfiction: Persuasion**

1. Prewriting: Persuasive Writing
 - Distinguish between fact and opinion
 - Analyze the elements of persuasive writing
 - Demonstrate knowledge of capitalization
2. Preparation: Choose a Topic and Develop a Thesis
 - Identify the elements of an effective thesis statement
 - Demonstrate understanding of counterarguments in persuasive writing
 - Demonstrate knowledge of capitalization
3. Preparation: Develop Arguments
 - Identify and differentiate between the persuasive appeals: ethos, pathos, and logos
 - Develop arguments in a persuasive speech using persuasive appeals
4. Writing Workshop: Persuasive Speech: Outline
 - Compose the draft of a persuasive speech based on reasoned arguments
5. Revising Your Speech
 - Revise a persuasive speech by checking for logical fallacies
 - Compare and contrast two speeches to determine a speaker's purpose
6. Public Speaking
 - Identify organizational strategies to prepare ideas when presenting a speech
 - Determine appropriate audiovisual aids to support ideas in a speech
 - Demonstrate knowledge of comma usage
7. Presentation
 - Demonstrate understanding of the technical aspects of preparing for and presenting a speech
 - Analyze diction and persuasive techniques in a variety of informational texts
 - Demonstrate knowledge of comma usage in introductory elements
8. Critical Listening Skills
 - Determine critical listening skills for a variety of purposes and/or situations
 - Identify the appropriate skills necessary for participating in a group discussion
 - Identify and practice the correct usage of commas that enclose
9. Nonfiction: Persuasion Unit Review
 - Apply study skills to prepare for a test
10. Nonfiction: Persuasion Unit Test
11. Writing Workshop: Persuasive Speech Final
 - Analyze elements of a speech using specified criteria in a rubric
 - Evaluate and incorporate feedback to edit a speech
 - Prepare an audio recording of a persuasive speech

2. **Middle East and South Asia I**

1. Introduction to Indian Literature
 - Clarify knowledge about India, its geography, culture and people, and Indian literature
2. India: The Ramayana
 - Analyze elements of descriptive writing

- Analyze how an author develops a character
 - Identify and use the nominative case of personal pronouns
3. Algeria: "My Father Writes to My Mother"
 - Analyze the influence of setting on narrative elements
 - Identify and use the objective case of personal pronouns
 4. Egypt: "Another Evening at the Club"
 - Interpret imagery and symbolism in a literary work
 - Identify and use the possessive case correctly
 - Correctly apply the word "who" in various situations
 5. Writing Workshop: Descriptive Portrait
 - Apply knowledge of descriptive writing
 6. Egypt: "The Happy Man"
 - Analyze how an author uses dark humor to convey thematic ideas
 - Identify and correctly use pronouns in elliptical clauses and appositives
 7. Israeli and Palestinian Literature
 - Analyze the use of cultural symbols in a poem
 - Interpret the meaning of a poem
 - Identify and practice the correct use of pronouns and antecedents
 8. "The Swimming Contest"
 - Use context clues to discover word meanings
 - Explain the use of foreshadowing in a literary work
 - Identify unclear, missing, or confusing antecedents
 9. Syria: "The Women's Baths"
 - Use word parts to interpret new vocabulary
 - Identify and analyze sensory details in a literary work
 - Apply knowledge of pronoun use
 10. Middle East and South Asia I Unit Review
 - Implement review strategies to prepare for a test
 11. Middle East and South Asia I Unit Test
 12. Writing Workshop
 - Edit and publish a descriptive portrait
- 3. Middle East and South Asia II**
1. "Wanted: A Town Without a Crazy": Izgu
 - Identify and explain the purpose of exaggeration in a literary work
 - Identify and practice the correct use of subject and verb agreement
 2. Literature of Armenia and Iraq
 - Develop and prepare a research proposal investigating a cultural aspect related to a country of literary study
 - Participate effectively in an online discussion by posting and responding to questions related to the research proposal
 3. "Five Hours to Simla"
 - Examine techniques used to create mood in a literary work
 - Identify and practice the correct use of subject and verb agreement
 4. "The Cabuliwallah"
 - Locate, evaluate, and document sources related to a topic of research

- Draft and submit a research proposal, including a topic, questions, and multiple sources
5. Narayan and Ondaatje
 - Identify details that support the main idea in a literary work
 - Analyze and infer meaning within and across texts
 - Use context clues to determine the meaning of unknown words or phrases
 - Demonstrate understanding of subject and verb agreement
 6. Online Communications
 - Identify the rules for safe and appropriate online communications
 - Recognize and demonstrate understanding of plagiarism
 - Identify and practice the correct use of subject and verb agreement
 7. Middle East and South Asia II Unit Review
 - Prepare for a test
 8. Middle East and South Asia II Unit Test
 - Demonstrate mastery of skills and comprehension of material learned
 9. Writing Workshop: Research Proposal: Final Draft
 - Write annotations to each source
 - Edit a research proposal for a final draft copy
- 4. East Asia and the Pacific Rim**
1. The Three Kingdoms: Guanzhong
 - Identify literary works for close analysis
 - Review the structure of literary analysis in order to prepare for a book discussion
 - Participate effectively in an online collaborative discussion
 2. From Emperor to Citizen: P'u Yi
 - Analyze diction to determine the author's tone in literary non-fiction
 - Draw inferences based on information and ideas provided in the text
 - Correctly use italics and quotation marks
 - Use context clues to determine the meaning of unknown words
 3. The Tall Woman and Her Short Husband: Jicai
 - Analyze the interaction between characters in a literary work
 - Demonstrate understanding of characters and plot events in a narrative
 - Use quotation marks correctly
 4. Saboteur: Jin
 - Identify and analyze examples of foreshadowing in literary text
 - Demonstrate understanding of plot events in a narrative
 - Use quotation marks correctly
 5. Cranes: Sun-won
 - Examine an author's use of flashbacks and foreshadowing in a literary work
 - Demonstrate understanding of plot events in a narrative
 - Demonstrate knowledge of other punctuation marks
 - Use context clues to determine the meaning of unknown words
 6. Thoughts of Hanoi: Thi Vinh
 - Analyze the importance of setting in a literary work and its contribution to mood
 - Evaluate an author's perspective and tone as communicated through literary text
 - Demonstrate correct use of apostrophes
 7. Writing Workshop: Literary Analysis Rough Draft

- Compose an essay of literary analysis
8. Tokyo: Hayashi
 - Demonstrate understanding of plot events in a narrative by identifying relevant details
 - Use context clues to determine the meaning of unknown words
 - Demonstrate correct use of apostrophes and semicolons
 9. Eve to Her Daughters: Wright
 - Analyze how an author controls voice and tone to transform familiar literary text
 - Cite evidence to support analysis of text
 - Demonstrate correct use of colons and hyphens
 10. A Way of Talking: Grace
 - Analyze an author's use of perspective to communicate perspective
 - Demonstrate understanding of plot events in a narrative
 - Demonstrate correct use of dashes, parentheses, brackets, and ellipses
 11. East Asia and the Pacific Rim Unit Review
 - Implement study strategies to prepare for a unit test
 12. East Asia and the Pacific Rim Unit Test
 - Apply knowledge from Unit 6 on a unit test
 13. Writing Workshop: Literary Analysis Final Draft
 - Incorporate feedback to edit an essay
 - Use a rubric to edit an essay
 - Publish the final draft of a literary analysis essay
- 5. The Importance of Being Earnest**
1. The Playwright Oscar Wilde
 - Identify strategies for reading dramatic dialogue
 - Summarize Oscar Wilde's philosophy and goals for writing the play
 2. Act I, First Half
 - Synthesize research on Victorian England
 - Define vocabulary words
 - Apply the characteristics of Victorian culture to the play
 3. Act I, Second Half
 - Synthesize research on Victorian art and literature
 - Define vocabulary words
 - Apply the characteristics of Restoration comedy to the play
 4. Act II, First Half
 - Analyze dialogue between characters in the play
 - Define vocabulary words
 - Describe the conflict in the play
 5. Act II, Second Half
 - Analyze symbolism and irony in the play
 - Define vocabulary words
 6. Act III
 - Evaluate Jack's use of the word absurd to assess what is happening around him
 - Define vocabulary words
 - Analyze the last line and title of the play
 7. The Importance of Being Earnest Unit Review

- Prepare for unit test
8. The Importance of Being Earnest Unit Test
- 6. The Research Paper**
1. Prewriting: Researching and Taking Notes
 - Identify and evaluate online and print sources to support research
 - Summarize research in note form
 2. Prewriting: Synthesizing Information and Thesis
 - Synthesize information for a research paper
 - Construct a thesis for a research paper
 - Use adjectives and adverbs correctly
 3. Prewriting: Organizing and Outlining
 - Organize information for a research paper
 - Compose an outline for a research paper
 - Use adjectives and adverbs correctly
 4. Drafting: Refining the Thesis and Introduction
 - Compose an introduction for a research paper
 - Analyze informational text to identify areas for development and refinement of claims and ideas
 - Refine the thesis of a research paper
 - Use adjectives and adverbs correctly
 5. Drafting: Body & Conclusion
 - Compose a draft of the body and conclusion of a research paper
 6. Revising Strategies: Focus
 - Identify the trouble spots within the rough draft of a research paper in order to revise it for focus
 - Assess knowledge of usage
 - Participate effectively in an online discussion to provide and receive feedback about the rough draft of a research paper
 7. Revising Strategies: Organization, Support, Voice
 - Revise a research paper
 - Determine the appropriate transitions to improve writing
 - Demonstrate knowledge of usage
 8. Revising: Following a Style Guide
 - Identify and explain the purpose of different style guides
 - Use the correct format to cite sources accurately
 - Demonstrate knowledge of usage
 9. Revising: Works Cited Page
 - Cite research sources using MLA format
 - Demonstrate understanding of editorial choices that conform to MLA format
 10. Editing: Incorporating Feedback
 - Incorporate feedback into editing
 - Use capitalization rules correctly
 11. Editing: Polishing and Publishing
 - Edit writing for grammar, conventions, and final publication
- 7. Semester Exam**

1. English 10B Semester Review
 - Prepare for semester exam
 - Assess understanding of literature, grammar, and writing concepts explored in Semester B
2. English 10B Semester Exam

English 10 Honors

English 10 Honors

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise English 10 Honors. In this course, the student will study the literature of the Americas, Europe, and Africa. In reading and responding to these selections, the student will gain an understanding of and appreciation for both the unique experiences of people from other cultures and the common themes that run through the human experience regardless of culture. Writing instruction focuses on analysis, exposition, and narrative writing with expanded opportunities for creative and fiction writing. An increased focus on higher-order thinking, literary analysis, and vocabulary studies differentiates this course from its standard-level equivalent.

Semester A Outline

1. The Literature of the Americas

1. Introduction to World Literature
 - Discuss personal feelings about world literature themes
 - Explain the challenges and rewards of translating literature
 - Compose an expository paragraph
 - Identify various parts of speech
2. An American Classic: Aztec Creation Story
 - Read and analyze an influential literary classic
 - Name elements of a creation story
 - Define word parts to interpret meaning
 - Identify and use nouns correctly
3. Mexico: "No Dogs Bark"
 - Analyze symbolism in a short story
 - Identify sentence fragments
 - Identify and use adverbs
4. Mexico: "Two Bodies"
 - Identify figurative language
 - Identify and interpret imagery
 - Identify and correct sentence fragments

5. Mexico: "Crossroads: A Sad Vaudeville"
 - Analyze elements of drama, including stage directions
 - Analyze characters in a dramatic work
 - Identify and explain dramatic irony in a play
 - Identify word parts to interpret meaning
 - Identify and correct phrase fragments
6. Canada: "At the Tourist Centre in Boston"
 - Identify tone in a poetic work
 - Explain how diction affects tone
 - Identify and correct clause fragments
7. Canada: "Day of the Butterfly"
 - Analyze characters' motivations and actions
 - Analyze theme in a short story
 - Identify word parts to interpret meaning
 - Review how to correct sentence, phrase, and clause fragments
8. United States of America: Gettysburg Address
 - Analyze historically significant documents
 - Analyze organizational patterns
 - Identify rhetorical devices
 - Identify and correct sentence fragments
9. Playing with Point of View
 - Analyze point of view
 - Identify word parts to interpret meaning
10. The Literature of the Americas Review
 - Review unit essential questions
 - Prepare for unit test
11. The Literature of the Americas Unit Test
 - Demonstrate mastery of skills and comprehension of material learned

2. **The Literature of the Americas II**

1. "Love after Love"
 - Identify and analyze a paradox
 - Analyze theme in a literary work
 - Identify types of complements
2. "When Greek Meets Greek"
 - Analyze the development of a character in a literary work
 - Analyze theme in a literary work
 - Identify how dialogue reveals information about a character
 - Identify idioms, colloquialisms, slang, and jargon
 - Identify predicate nominatives
3. "Girls Can We Educate We Dads?"; "In Trying Times"
 - Analyze the effect of diction in a poem
 - Analyze the effect dialect has on a poem
 - Analyze the effect of repetition in a poem
 - Differentiate between denotation and connotation
 - Identify sentence patterns
4. "The Youngest Doll"

- Identify the elements of magic realism in a literary work
- Identify the central idea of a literary work
- Apply knowledge of complements
- 5. Writing Workshop: Compare and Contrast Essay
 - Write the draft of a compare and contrast essay
- 6. "The Third Bank of the River"
 - Analyze how an author develops complex characters in a literary work
 - Analyze the use of symbolism in a literary work
 - Make generalizations from a literary work
 - Identify types of phrases
- 7. "The Book of Sand"
 - Identify the elements that contribute to a literary work's mood
 - Revise an essay for varied sentence length
 - Identify appositives and appositive phrases
- 8. "The Censors"
 - Analyze irony in a literary work
 - Identify verbals and verbal phrases
- 9. "Tonight I Can Write" and "Serenity"
 - Identify personification in a literary work
 - Analyze tone in a literary work
 - Identify the functions of gerund phrases
- 10. "And of Clay Are We Created"
 - Analyze tone in a literary work
 - Analyze how an author develops a character
 - Identify the functions of infinitives
- 11. The Literature of the Americas II Review
 - Implement review strategies to prepare for a test
- 12. The Literature of the Americas II Unit Test
 - Demonstrate mastery of skills and comprehension of material learned
- 13. Writing Workshop: Compare and Contrast Essay
 - Edit an essay to produce a final draft
 - Use a rubric to evaluate an essay

3. Europe I

1. "The Divine Comedy"
 - Identify and analyze rhyme scheme in a poem
 - Use inferences to determine poetic meaning
 - Identify and use phrases correctly
2. "First Confession"
 - Identify and analyze types of literary characters in a work of fiction
 - Analyze the use of humor in a work of fiction
 - Identify phrase fragments
3. Poems on Life and Death
 - Identify differences between the sonnet and the villanelle forms
 - Analyze voice in a poetic work
 - Review phrases
4. Writing Workshop

- Write a rough draft of an expository essay
- 5. "The Love Song of J. Alfred Prufrock"; "Ten Songs"
 - Identify and interpret allusions in a poetic work
 - Analyze sensory details and images in poetry
 - Identify verbals and verbal phrases
- 6. "The Destroyers," Part 1
 - Demonstrate understanding of characters and plot events in a narrative
 - Analyze how an author's language choices evoke a sense of time and place
 - Review phrases
- 7. "The Destroyers," Part 2
 - Analyze the elements that contribute to an author's style
 - Analyze the interaction between and among characters in a narrative
 - Self-assess knowledge of phrases
- 8. "The Guitar" and "Poor Fish"
 - Identify and analyze the themes of a literary work
 - Use inferences to analyze meaning in a narrative
 - Identify and explain external and internal conflict in a plot
 - Identify subordinate clauses
- 9. Unit Review
 - Implement review strategies to prepare for a test
- 10. Europe I Unit Test
 - Demonstrate mastery of skills and comprehension of material studied
- 11. Writing Workshop Expository Essay
 - Edit an essay to produce a final draft
 - Publish a final draft

4. Europe II

1. "The Black Sheep" and "The Balek Scales"
 - Analyze point of view in a short story
 - Identify and analyze satire
 - Identify and analyze elements of allegory
 - Analyze theme in a short story
2. "The Last Judgment"
 - Analyze the use of dialogue in character development
 - Identify subordinate and independent clauses correctly
3. "A Contribution to Statistics"/"And Yet the Books"
 - Interpret an author's purpose and message
 - Identify relevant details that contribute to an author's purpose and message
 - Identify misplaced modifiers and noun clauses correctly
4. Writing Workshop: Personal Narrative
 - Write a rough draft of your personal narrative
5. "Rhinoceros," Part 1
 - Analyze an author's use of a motif in a narrative text
 - Apply knowledge of foreshadowing to make predictions about a story
 - Identify various sentence structures
6. "Rhinoceros," Part 2
 - Analyze how historical background contributes to a literary work

- Identify elements of Theater of the Absurd
 - Identify clause fragments and run-on sentences
 - 7. "Alone," "The Nobel Prize," and "First Frost"
 - Identify and analyze imagery that supports a theme
 - Demonstrate understanding of the structural elements of poetic texts
 - Demonstrate understanding of diagramming to sentence structures
 - 8. "Forbidden Fruit"
 - Analyze an author's use of hyperbole in a narrative text
 - Identify and examine ideas that support the development of the theme in a narrative text
 - Apply understanding of various kinds of clauses
 - 9. Unit Review
 - 10. Unit Test
 - Demonstrate mastery of skills and comprehension of material studied
 - 11. Writing Workshop Personal Narrative
 - Edit an essay to produce a final draft
 - Publish a final draft
- 5. Adventures of Huckleberry Finn**
1. Adventures of Huckleberry Finn: Lesson 1
 - Describe Samuel Clemens's background and how it affected his writing
 - Define vocabulary words
 - Identify point of view in the novel
 2. Adventures of Huckleberry Finn: Lesson 2
 - Apply the definitions of Regionalism, Realism, and Naturalism to the novel
 - Define vocabulary words
 - Analyze the use of dialect in the novel
 3. Adventures of Huckleberry Finn: Lesson 3
 - Analyze dialogue and characterizations of Jim from the novel
 - Define vocabulary words
 - Generate ideas for character analysis project
 4. Adventures of Huckleberry Finn: Lesson 4
 - Describe the requirements of the character analysis project
 - Compose a rough draft of the character analysis project
 5. Adventures of Huckleberry Finn: Lesson 5
 - Define satire
 - Identify use of satirical techniques in the novel
 - Define vocabulary words
 - Analyze passages from the novel to gain character insights
 6. Adventures of Huckleberry Finn: Lesson 6
 - Evaluate the significance of Huck's moral crisis
 - Define vocabulary words
 - Identify the use of metaphors in the novel
 7. Adventures of Huckleberry Finn: Lesson 7
 - Analyze the attitudes on race prevalent when the novel was published
 - Define vocabulary words
 - Debate whether challenges to the novel are valid

8. Adventures of Huckleberry Finn: Lesson 8
 - Identify themes in the novel
 - Analyze social commentary in the novel
 - Define vocabulary words
 - Compose the final draft of the character analysis project

6. Africa

1. "Sunjata," Part 1
 - Analyze the elements of a narrative in an epic poem
 - Identify characteristics of an epic poem
 - Identify and use verbs correctly in a sentence
2. "Sunjata," Part 2 and "Africa"
 - Demonstrate understanding of plot events in an epic poem
 - Analyze the elements of an epic poem
 - Identify and analyze examples of personification in a poem
 - Identify and use the principal parts of verbs correctly
3. "Black Girl," Part 1
 - Analyze the effect of setting on narrative elements
 - Analyze the effect of an author's manipulation of time in a narrative text
 - Identify and use the principal parts of verbs correctly
4. "Black Girl," Part 2
 - Demonstrate understanding of the interaction of narrative elements in a literary work
 - Identify and use problem verbs correctly
5. Three Pieces: Senghor, Soyinka, Achebe
 - Analyze diction and the use of figurative language in a literary work
 - Draw conclusions using textual support
 - Identify and use various verb tenses correctly
6. Writing Workshop: Poem
 - Write a rough draft of a poem
7. "In the Shadow of War"
 - Identify and analyze the plot of a short story
 - Analyze how the plot and characters of a short story reflect an author's perspective
 - Identify and use progressive and emphatic verb forms correctly
8. "Loyalties" and "A Meeting in the Dark," Part 1
 - Identify and analyze different types of humor in a narrative text
 - Use context clues to determine the meaning of unknown words/phrases
 - Identify and correct unnecessary shifts in verb tense
9. "A Meeting in the Dark," Part 2
 - Identify and analyze how the characters and plot serve to advance the theme of a work of fiction
 - Identify active and passive voice correctly
10. "The Pig"
 - Analyze diction that contributes to tone in a literary work
 - Identify and use verb moods correctly
11. "No Witchcraft for Sale"
 - Determine the most important ideas to include in a summary of a narrative text
 - Use context to determine the meaning of unknown words or phrases

- Review verb forms
- 12. "The Moment Before the Gun Went Off"
 - Analyze the use of irony in a short story
 - Use context to determine the meaning of unknown words and phrases
 - Apply knowledge of strong verbs
- 13. "The Prisoner Who Wore Glasses"
 - Analyze an author's character development in a narrative text
- 14. The Literature of Africa Unit Review
 - Implement review strategies to prepare for a test
- 15. The Literature of Africa Unit Test
 - Demonstrate mastery of skills and comprehension of material studied
- 16. Writing Workshop: Poem
 - Compose a final version of a poem
- 7. **Honors English 10A Semester Review and Exam**
 1. Honors English 10A Semester Review
 - Review major concepts and strategies from the English 10 A course in preparation for the semester exam
 2. Honors English 10A Semester Exam

Semester B Summary:

This is the second of two courses that comprise English 10 Honors. In this course, the student will study the literature of the Middle East, South Asia, East Asia, and the Pacific Rim. In reading and responding to these selections, the student will gain an understanding of and appreciation for both the unique experiences of people from other cultures and the common themes that run through the human experience regardless of culture. Writing instruction focuses on description, exposition, research, persuasion, and literary analysis. An increased focus on higher-order thinking, literary analysis, and vocabulary studies differentiates this course from its standard-level equivalent.

Semester B Outline

1. **Nonfiction: Persuasion**
 1. Persuasive Writing
 - Distinguish between fact and opinion
 - Analyze the elements of persuasive writing
 - Demonstrate knowledge of capitalization
 2. Topic and Thesis
 - Identify the elements of an effective thesis statement
 - Demonstrate understanding of counter-arguments in persuasive writing
 - Demonstrate knowledge of capitalization
 3. Strengthening Arguments
 - Identify and differentiate between the persuasive appeals: ethos, pathos, and logos
 - Demonstrate knowledge of correct use of commas and end marks
 4. Writing Workshop: Persuasive Speech: Outline
 - Compose an outline of a persuasive speech based on reasoned arguments

 - Demonstrate understanding of the technical aspects of preparing for and presenting a speech
 - Analyze diction and persuasive techniques in a variety of informational texts
 - Demonstrate knowledge of comma usage in introductory elements
8. Critical Listening Skills
 - Determine critical listening skills for a variety of purposes and/or situations
 - Identify the necessary skills for participating in a group discussion
 - Identify and practice the correct usage of commas that enclose
9. Nonfiction: Persuasion Unit Review
 - Apply study skills to prepare for a test
10. Nonfiction: Persuasion Unit Test
11. Writing Workshop: Persuasive Speech Final
 - Incorporate feedback to edit a speech
 - Use a rubric to polish a speech
 - Make an audio recording of an oral presentation

2. Middle East and South Asia I

1. Introduction to Indian Literature
 - Clarify prior knowledge about India, its geography, culture, and people, and Indian literature
2. India: The Ramayana
 - Analyze elements of descriptive writing
 - Analyze how an author develops a character
 - Apply the possessive case of pronouns
3. Algeria: "My Father Writes to My Mother"
 - Analyze the influence of setting on narrative elements
 - Differentiate between uses of "who" and "whom"
4. Egypt: "Another Evening at the Club"
 - Interpret imagery and symbolism in a literary work
 - Cite textual evidence to support analysis of imagery and symbolism in a literary work
 - Correctly apply the word "who" in various situations
5. Writing Workshop: Descriptive Portrait
 - Apply knowledge of descriptive writing
6. Egypt: "The Happy Man"
 - Analyze how an author uses dark humor to convey thematic ideas
 - Identify and correctly use pronouns in elliptical clauses and appositives
7. Israeli and Palestinian Literature
 - Analyze the use of cultural symbols in a poem
 - Interpret the meaning of a poem
 - Identify and practice the correct use of pronouns and antecedents

8. "The Swimming Contest"
 - Use context clues to discover word meanings
 - Explain the use of foreshadowing in a literary work
 - Eliminate ambiguity in writing by identifying unclear, confusing, or missing antecedents
 9. Syria: "The Women's Baths"
 - Use word parts to interpret new vocabulary
 - Identify and analyze sensory details in a literary work
 - Apply knowledge of pronoun use
 10. Literature of Middle East & South Asia Unit Review
 - Implement review strategies to prepare for a test
 11. Literature of Middle East & South Asia Unit Test
 12. Writing Workshop
 - Edit and finalize a descriptive portrait
- 3. Middle East and South Asia II**
1. Wanted: A Town Without a Crazy: Izgu
 - Identify and explain the purpose of exaggeration in a literary work
 - Use context clues to determine the meanings of unfamiliar words
 2. Literature of Armenia and Iraq
 - Develop and prepare a research proposal investigating a cultural aspect related to a country of literary study
 - Participate effectively in an online discussion by posing and responding to questions related to the research proposal
 3. "Five Hours to Simla"
 - Examine techniques used to create mood in a literary work
 - Identify and practice the correct use of subject and verb agreement
 - Use context clues to determine the meanings of unfamiliar words
 4. The Cabuliwallah
 - Locate, evaluate, and document sources related to a topic of research
 - Draft and submit a research proposal, including a topic, questions, and multiple sources
 5. Narayan and Ondaatje
 - Identify details that support the main idea in a literary work
 - Analyze and infer meaning within and across texts
 - Use context clues to determine the meanings of unknown words or phrases
 - Identify and practice the correct use of solving common agreement problems
 6. Online Communications
 - Identify the rules for safe and appropriate online communications
 - Recognize and demonstrate understanding of plagiarism
 - Identify and practice the correct use of subject and verb agreement
 7. Middle East and South Asia II: Unit Review
 - Review unit concepts
 - Review unit grammar concepts
 - Prepare for a test
 8. Middle East and South Asia II Unit Test
 - Demonstrate mastery of skills and comprehension of material learned
 9. Writing Workshop: Research Proposal: Final Draft
 - Construct a research proposal

4. East Asia and the Pacific Rim

1. The Three Kingdoms: Guanzhong
 - Identify literary works for close analysis
 - Review the structure of literary analysis in order to prepare for a book discussion
 - Participate effectively in an online collaborative discussion
2. From Emperor to Citizen: P'u Yi
 - Analyze diction to determine the author's tone in literary nonfiction
 - Draw inferences based on information and ideas provided in the text
 - Correctly use italics and quotation marks
 - Use context clues to determine the meanings of unknown words
3. The Tall Woman and Her Short Husband: Jicai
 - Analyze the interaction between characters in a literary work
 - Demonstrate understanding of characters and plot events in a narrative
 - Use quotation marks correctly
4. Saboteur: Jin
 - Identify and analyze examples of foreshadowing in literary text
 - Demonstrate understanding of plot events in a narrative
 - Use quotation marks correctly
5. Cranes: Sun-won
 - Examine an author's use of flashbacks and foreshadowing in a literary work
 - Demonstrate understanding of plot events in a narrative
 - Demonstrate knowledge of other punctuation marks
 - Use context clues to determine the meanings of unknown words
6. Thoughts of Hanoi: Thi Vinh
 - Analyze the importance of setting in a literary work and its contribution to mood
 - Evaluate an author's perspective and tone as communicated through literary text
 - Demonstrate correct use of apostrophes
7. Writing Workshop: Literary Analysis Rough Draft
 - Compose an essay of literary analysis
8. Tokyo: Hayashi
 - Demonstrate understanding of plot events in a narrative by identifying relevant details
 - Use context clues to determine the meanings of unknown words
 - Demonstrate correct use of apostrophes and semicolons
9. Eve to Her Daughters: Wright
 - Analyze how an author controls voice and tone to transform familiar literary text
 - Cite evidence to support analysis of text
 - Demonstrate correct use of the colon and hyphens
10. A Way of Talking: Grace
 - Analyze an author's use of dialect to communicate perspective in a story
 - Demonstrate understanding of how characters are related to plot events in a narrative
 - Cite textual evidence to support analysis of a text
 - Demonstrate correct use of dashes, parentheses, brackets, and ellipses
11. East Asia and the Pacific Rim Unit Review
 - Implement study strategies to prepare for a unit test
12. East Asia and the Pacific Rim Unit Test
 - Apply knowledge from Unit 6 on a unit test

13. Writing Workshop: Literary Analysis Final Draft

- Incorporate feedback to edit an essay
- Use a rubric to edit an essay
- Publish the final draft of a literary analysis essay

5. The Importance of Being Earnest

1. The Playwright Oscar Wilde

- Identify strategies for reading dramatic dialogue
- Summarize Oscar Wilde's philosophy and goals for writing the play

2. Act I, First Half

- Synthesize research on Victorian England
- Define vocabulary words
- Apply the characteristics of Victorian culture to the play

3. Act I, Second Half

- Synthesize research on Victorian art and literature
- Define vocabulary words
- Apply the characteristics of Restoration comedy to the play

4. Act II, First Half

- Analyze dialogue between characters in the play
- Define vocabulary words
- Describe the conflict in the play

5. Act II, Second Half

- Analyze symbolism and irony in the play
- Define vocabulary words

6. Act III

- Evaluate Jack's use of the word absurd to assess what is happening around him
- Define vocabulary words
- Analyze the last line and title of the play

7. The Importance of Being Earnest Unit Review

- Prepare for unit test

8. The Importance of Being Earnest Unit Test

6. The Research Paper

1. Prewriting: Researching and Taking Notes

- Identify and evaluate online and print sources to support research
- Summarize research in note form

2. Prewriting: Synthesizing Information & Thesis

- Outline the process for synthesizing information for a research project
- Identify the characteristics of a strong thesis statement
- Apply knowledge of adjectives and adverbs

3. Prewriting: Organizing and Outlining

- Describe the structure of an outline for a research paper
- Apply knowledge of adjectives and adverbs

4. Drafting: Refining the Thesis & Introduction

- Describe the process for developing and refining the thesis of a research paper
- Apply understanding of comparative forms of adjectives and adverbs

5. Drafting: Body & Conclusion

- Compose a draft of the body and conclusion of a research paper

- Assess knowledge of adverbs and adjectives
- 6. Revising Strategies: Focus
 - Identify the trouble-spots within the rough draft of a research paper in order to revise it for focus
 - Participate effectively in an online discussion to provide and receive feedback about the rough draft of a research paper
- 7. Revising Strategies: Organization, Support, Voice
 - Describe the process for revising a research paper
 - Demonstrate knowledge of usage
- 8. Revising: Following a Style Guide
 - Identify and explain the purpose of different style guides
 - Use the correct format to cite sources accurately
 - Demonstrate knowledge of usage
- 9. Revising: Works Cited Page
 - Cite research sources using MLA format
 - Demonstrate understanding of editorial choices that conform to MLA format
- 10. Editing: Incorporating Feedback
 - Identify strategies for editing
 - Apply knowledge of capitalization rules
- 11. Editing: Polishing & Publishing
 - Edit writing for grammar, conventions, and final production
- 7. **Semester Exam**
 1. Semester Review
 - Prepare for the semester exam
 - Assess understanding of literature, grammar, and writing concepts explored in Semester B
 2. Semester Exam

English 10 Prescriptive

English 2A Syllabus

English 11

English 11

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

In Semester A of this course, the student will focus on the literary movements that comprise American literature and trace the chronology of national literature from the early American and colonial period through the periods of Realism and Regionalism. In reading these diverse selections, the student will gain a thorough understanding of fiction, including short stories, poetry and drama; as well as nonfiction genres, including the oral tradition, seminal historical documents, and speeches. The student will also read Jerome Lawrence and Robert E. Lee's play *The Night Thoreau Spent in Jail*. Arthur Miller's play *The Crucible* may be read instead of *The Night Thoreau Spent in Jail*. In reading these American plays and composing a dramatic scene, the student will understand drama in its historical and literary context.

Writing instruction guides the student through the process of composing a descriptive essay and modeling the style of an American author. Throughout the course, the student expands his vocabulary in context. The mastery of both critical vocabulary and grammar skills helps the student become a more thoughtful and effective reader and writer.

In Semester B of this course, the student will focus on the literary movements that comprise American literature and trace the chronology of national literature from the Modernist through the Contemporary period. In reading and responding to these diverse literature selections, the student will gain a thorough understanding of a myriad of fiction and nonfiction genres, including short stories, essays, poetry, drama, memoirs, and autobiographies. The student will also read F. Scott Fitzgerald's novel *The Great Gatsby*. Ernest Hemingway's novella *The Old Man and the Sea* may be read instead of *The Great Gatsby*. In reading these American literature selections, the student will understand longer works of literature in their historical and literary context.

Writing instruction guides the student through the process of composing a literary analysis and a research paper. Throughout the course, the student expands his vocabulary in context. The mastery of both critical vocabulary and grammar skills helps the student become a more thoughtful and effective reader and writer.

Semester A Outline

1. Early American and Colonial Literature

1. American Literature: Our Nation's Voice

- Describe how a national literature develops
 - Assess three methods of note taking
 - Define vocabulary words using context clues
 - Describe the literature of early and colonial America

 - Identify evidence of the Puritan legacy in American literature
 3. Contemporary Voice: Fred Veilleux
 - Describe persuasive techniques
 - Define vocabulary words in order to understand a persuasive argument
 - Analyze persuasive arguments in an essay
 4. Earliest Voices: Anne Bradstreet, Phillis Wheatley
 - Define poetic elements
 - Analyze the poetry of early American women poets
 - Determine the best definitions of words with multiple meanings in context
 5. Earliest Voice: Jonathan Edwards
 - Summarize the Great Awakening
 - Describe the life of John Edwards
 - Read, analyze, and interpret a sermon
 6. Earliest Voices: Olaudah Equiano
 - Differentiate between denotation and connotation
 - Define the connotative meaning of vocabulary words
 - Read and analyze a slave narrative
 - Read, analyze, and interpret an autobiographical account of the slave trade
 7. Earliest Voices: Thomas Paine
 - Describe how Thomas Paine helped to fuel the American Revolution
 - Read and analyze excerpts from Thomas Paine’s Common Sense
 - Define the denotative and connotative meanings of vocabulary words
 - Read, analyze, and interpret excerpts from Thomas Paine’s Common Sense
 - Analyze the audience of a persuasive essay
 8. Earliest Voices: The Founding Fathers
 - Analyze the Declaration of Independence
 - Compare denotative and connotative meanings of words
 - Assess knowledge of early American literature
 9. Author's Purpose
 - Define purposes for writing
 - Review authors and compositions from the early American and Colonial period to identify purpose
 10. Timed Writing Assessments
 - Identify and assess strategies for timed writing
 - Outline a model essay test answer
 - Compose a timed writing response
 11. Early American and Colonial Literature Review
 - Review unit essential questions
 - Practice test-taking strategies
 - Create a multimedia presentation
 12. Early American and Colonial Literature Test
2. **American Romanticism**

1. American Romanticism
 - Define genre and subgenre
 - Identify the characteristics of American Romanticism
 - Name American Romantic authors
 - Correctly capitalize words in sentences
2. Nathaniel Hawthorne
 - Read and analyze an American Romantic short story
 - Evaluate the role setting plays in literature
 - Paraphrase a variety of texts
 - Define and determine the connotations of vocabulary words
3. Contemporary Literary Criticism
 - Read and analyze literary criticism
 - Interpret symbolism and imagery in "Young Goodman Brown"
 - Review eight parts of speech and types of nouns
4. Edgar Allan Poe
 - Read and analyze Poe's letters and short stories
 - Describe how setting contributes to Poe's intended effect
 - Evaluate Poe's writing using his own criteria
 - Define and determine the connotations of vocabulary words
5. Ralph Waldo Emerson
6. Henry David Thoreau
 - Examine Transcendentalist views of God and nature
 - Analyze Henry David Thoreau's descriptive writing style
 - Identify pronouns and their antecedents
 - Select a topic and audience for a descriptive essay
 - Assess knowledge of American Romanticism
7. Descriptive Essay: Rough Draft
 - Practice strategies for developing a description
 - Compose and submit a descriptive essay rough draft
 - Match appositives to the nouns they modify
 - Evaluate denotative and connotative meanings in descriptive writing
8. Walt Whitman
 - Analyze images and poetry of Walt Whitman
 - Compare and contrast Romantic and Early American and Colonial poetry
 - Analyze literary criticism of Walt Whitman's poetry
9. American Romanticism Review
 - Prepare for the unit test
 - Apply strategies for answering reading comprehension questions
10. American Romanticism Test
11. Descriptive Essay: Final Draft
 - Review comments on descriptive writing rough draft
 - Revise, edit, and submit descriptive essay
 - Identify commonly confused homophones
3. **The Night Thoreau Spent in Jail**
 1. Obedience Versus Nonconformity
 - Explain Henry David Thoreau's willingness to be jailed
 - Define vocabulary words
 - Assess Henry's approach to and philosophy of teaching
 - Analyze the setting and structure of the play
 2. Transcendentalism: Progress or Threat?

- Describe how the play illustrates the philosophy of transcendentalism
 - Identify the central conflict of the play
 - Define vocabulary words
 - Evaluate the use of stage directions in the play
3. Opposing the War
 - Evaluate arguments for and against the Mexican American War to determine whether it was justified
 - Define vocabulary words
 - Generate ideas for a dramatic scene
 4. Crafting a Scene
 - Describe elements of drama, including plot, characters, communication, and dramatic conventions
 - Compose the rough draft of a scene
 5. A Solitary Man
 - Analyze the use of figures of speech in the play
 - Define vocabulary words
 - Evaluate how Henry's commitment to transcendentalism affects his human connections
 6. Doing the Impossible
 - Compare and contrast protest in the play with protest during the Vietnam War
 - Define vocabulary words
 - Analyze Henry's and Waldo's approaches to politics
 7. One of the Crowd
 - Analyze Henry's non-conformist attitude in relation to theme
 - Define vocabulary words
 - Describe the significance of the "unseen Congressman"
 - Analyze the play's arguments about transcendentalism
 8. The Play's the Thing
 - Evaluate the use of dialogue in the dramatic scene
 - Propose staging for the play that serves its themes
 - Incorporate meaningful stage directions into the dramatic scene
 - Revise the dramatic scene

4. Realism and Regionalism

1. Realism
 - Identify characteristics of realism
 - Describe the historical context of Realism
 - Correctly use apostrophes to show possession
2. Emily Dickinson
 - Describe the life of Emily Dickinson
 - Read, analyze, and interpret Emily Dickinson's poetry
 - Identify proper use of the apostrophe
 - Correctly use possessive pronouns
3. Sarah Orne Jewett
 - Define dialect and types of language associated with the use of dialect
 - Describe the life and influences of Sarah Orne Jewett
 - Read, analyze, and interpret a passage from Jewett's *The Country of the Pointed Firs*
 - Define vocabulary words to enhance understanding of literature
 - Correctly use apostrophes to convey ownership
4. Mark Twain
 - Define Regionalism
 - Read, analyze, and interpret the short story, "The Celebrated Jumping Frog of Calaveras County"

- Define vocabulary words to enhance understanding of a short story
 - Correctly use apostrophes to create contractions
5. Ambrose Bierce
 - Describe Ambrose Bierce’s life and writing style
 - Read, analyze, and interpret the short story “An Occurrence at Owl Creek Bridge”
 - Define foreshadowing and flashback
 - Define vocabulary words to enhance understanding of a short story
 6. Kate Chopin
 - Identify the important elements of a short story
 - Generate ideas for an alternate ending to a short story
 - Identify characteristics of Kate Chopin’s writing
 - Define vocabulary words to enhance understanding of a short story
 - Read, analyze, and interpret the short story, “A Pair of Silk Stockings”
 7. Alternate Ending: Rough Draft
 - Identify stylistic devices of a Romantic or Realist author
 - Compose an alternate ending to a Romantic or Realist story
 8. Charles Waddell Chesnutt
 - Read, analyze, and interpret the short story, “The Wife of His Youth”
 - Assess the impact complex characters have on a story
 - Define vocabulary words to enhance understanding of a short story
 9. Contemporary Connection: Cedric Yamanaka
 - Read, analyze, and interpret the short story, “The Lemon Tree Billiards House”
 - Define hyperbole, simile, and metaphor
 10. Realism and Regionalism Review
 - Prepare for unit test
 - Apply strategies for answering standard written English test items
 11. Realism and Regionalism Unit Test
 12. Alternate Ending: Final Draft
 - Compose an alternate ending to a Romantic or Realist story
 - Assess the alternate ending using teacher feedback and an evaluation checklist
5. **Semester Review and Exam**
 1. Semester Review
 - Prepare for semester exam
 - Assess understanding of literature, vocabulary, grammar, and writing in Semester A
 2. Semester Exam

Semester B Summary:

This is the second of two courses that comprise English 11. In this course, the student will focus on the literary movements that comprise American literature, and trace the chronology of national literature from the Modernist through the Contemporary period. In reading and responding to these diverse literature selections, the student will gain a thorough understanding of a myriad of fiction and nonfiction genres, including short stories, essays, poetry, drama, memoirs, and autobiographies. The student will also read F. Scott Fitzgerald’s novel *The Great Gatsby*. Ernest Hemingway’s novella *The Old Man and the Sea* may be read instead of *The Great Gatsby*. In reading these American literature selections, the student will understand longer works of literature in their historical and literary context.

Writing instruction guides the student through the process of composing a literary analysis and a research paper. Throughout the course, the student expands his vocabulary in context. The mastery of both critical vocabulary and grammar skills helps the student become a more thoughtful and effective reader and writer.

Semester B Outline

1. **Voices of Modernism (1920s–1940s)**

1. Introduction to Modernism
 - Define modernism
 - Describe the events and circumstances that influenced modernism
 - Describe the unique writing styles of modernist writers
 - Identify participles and participial phrases and the words they modify
2. Hemingway
 - Identify the mood and tone of Hemingway’s writing
 - Describe the major influences on Hemingway’s writing
 - Read, analyze, and interpret the short story “In Another Country”
 - Analyze setting and imagery in “In Another Country”
 - Correctly punctuate participial phrases
3. Steinbeck
 - Define symbolism
 - Describe how John Steinbeck was influenced by the California town of Pacific Grove
 - Define vocabulary words to enhance understanding of John Steinbeck’s writing
 - Read, analyze, and interpret the short story, “The Chrysanthemums”
 - Correctly identify gerunds and gerund phrases
4. Harlem Renaissance
 - Practice using effective strategies for reading poetry
 - Describe the rise of the Harlem Renaissance
 - Read, analyze, and interpret poems of the Harlem Renaissance
 - Correctly identify infinitives and infinitive phrases
5. Ellison
 - Define diction and pathos
 - Describe the cultural contributions of African American literary and visual artists
 - Read, analyze, and interpret the short story, “The Black Ball”
 - Compare and contrast pathos, ethos, and logos
 - Revise sentences to correct misplaced and dangling modifiers
6. Hughes
 - Compare and contrast internal and external motivation
 - Analyze the distinctive voices in the poetry of Langston Hughes
 - Analyze character motivation in “Why, You Reckon?”
7. Frost
 - Identify characteristics of Robert Frost’s poetry
 - Define aphorism and metaphor to better understand Frost’s poems
 - Read, analyze, and interpret the poem, “Mending Wall”
 - Differentiate between independent and subordinate clauses
8. Writing Workshop: Literary Analysis Rough Draft
 - Identify prewriting strategies and techniques for literary analysis
 - Define vocabulary words associated with literary analysis
 - Compose an outline based on a working thesis

- Compose the first and second drafts of a literary analysis
 - Identify adverbial clauses and the words they modify
9. Fitzgerald
 - Define allegory and in medias res
 - Create and analyze a time line of F. Scott Fitzgerald’s life
 - Define vocabulary words to enhance understanding of the short story, “Babylon Revisited”
 - Read, analyze, and interpret the short story, “Babylon Revisited”
 - Complete elliptical clauses to understand their meaning
 10. Porter
 - Compare and contrast internal and external conflict
 - Define different types of literary characters
 - Read, analyze, and interpret the short story, “He”
 - Correctly punctuate adverbial clauses
 11. Voices of Modernism (1920s–1940s) Unit Review
 - Develop strategies for deriving the meanings of unfamiliar words
 - Prepare for the unit test
 12. Voices of Modernism (1920s–1940s) Unit Test
 13. Writing Workshop: Literary Analysis Final Draft
 - Revise and proofread to develop the final draft of the literary analysis
2. **Post War Voices Emerge (1950s–1960s)**
 1. Genres and Literary Movements
 - Review basic genres of literature
 - Define the prefixes sub- and ob- in order to understand the terms subjective and objective
 - Identify characteristics of postmodern literature
 2. Vonnegut
 - Define satire
 - Identify adjectival clauses and the words they modify
 - Read, analyze, and interpret the short story, "Harrison Bergeron"
 3. Updike
 - Define conflict
 - Define point of view
 - Read, analyze, and interpret the short story, "A&P"
 - Identify relative pronouns in adjectival clauses
 4. Compare and Contrast
 - Describe the requirements for the compare-and-contrast essay portfolio assignment
 - Understand how to develop, organize, and write a compare-and-contrast text
 - Read, analyze, and interpret the selection, “A Double Impulse”
 - Correctly punctuate adjectival clauses
 5. Speeches
 - Identify elements of persuasion
 - Read, analyze, and interpret the speech, "I Have a Dream"
 - Identify and correct misplaced modifiers
 6. The Rough Draft
 - Use quotations correctly and effectively
 - Document quotations correctly
 - Compose a rough draft of the compare-and-contrast essay
 7. Beat Generation
 - Identify characteristics of the poetry of the Beat Generations
 - Read, analyze, and interpret poetry of the Beat Generation
 - Compare and contrast the poetry of the Romantics with that of the Beat Generation

8. Unit Review
 - Identify elements of a successful and effective group discussion
 - Prepare for the unit test
 9. Postwar and Postmodern Unit Exam
 10. The Final Draft
 - Incorporate unique voice into a compare-and-contrast essay
 - Revise and finalize the compare-and-contrast essay
- 3. The Research Paper**
1. Introduction to Research Writing
 - Describe how to begin a research report
 - Read and analyze a model research report
 - Edit sentences to correct errors associated with standard usage
 2. Choosing a Subject
 - Choose a subject for the research report
 - Develop research questions
 - Properly cite sources in MLA format
 3. Introduction to Research
 - Gather information and evaluate sources for the research report
 4. Gathering Information
 - Compare and contrast print and Internet research sources
 - Describe how to successfully use the Internet for research
 5. Using Quotations
 - Organize notes effectively
 - Avoid plagiarism by creating source cards
 6. Synthesizing and Organizing
 - Synthesize information from different sources
 - Compose a working thesis for the research report
 7. Documenting
 - Document all sources used in research report
 - Create a works cited page
 8. Outlining
 - Organize supporting details
 - Develop an outline
 9. Drafting
 - Identify the characteristics of a successful introduction
 - Understand and implement strategies for achieving coherence
 - Compose a first draft of a research report
 10. Nonfiction Writing I
 - Understand nonfiction text structures
 - Correctly identify progressive and emphatic verb forms
 - Read, analyze, and interpret the essays, "Familiar Strangers" and "Melting Pot"
 11. Nonfiction Writing II
 - Read, analyze, and interpret a selection from "Life on the Color Lines"
 - Analyze problems with verb tenses according to the meanings of sentences
 12. Evaluating Research
 - Develop strategies for addressing "trouble spots" in the research report
 - Evaluate the research report using a checklist
 13. Revising, Editing, and Publishing
 - Revise the a research report using an evaluation checklist for revising
 - Edit a report for grammar, usage, mechanics, and spelling

- Publish the final draft of a research report

4. **The Great Gatsby**

1. The Great Gatsby: The Jazz Age
 - Describe the attitudes, fashion, and lifestyle of the 1920s
 - Compare and contrast youth culture in the 1920s with that in the present
 - Define vocabulary words in order to further understanding of the novel
 - Define direct and indirect characterization
 - Describe the central characters of The Great Gatsby
2. The Great Gatsby: F. Scott Fitzgerald
 - Describe the life of F. Scott Fitzgerald and the inspiration behind The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Connect the novel with F. Scott Fitzgerald's life
3. The Great Gatsby: Tone and Point of View
 - Define tone
 - Compare and contrast different types of point of view
 - Analyze point of view in The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
4. The Great Gatsby: Social Groups and Class
 - Analyze social groups and class as they apply to The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
5. The Great Gatsby: Significance of Time
 - Analyze the significance of time in The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Predict the fate of Gatsby and Daisy
6. The Great Gatsby: The Dilemmas of Nick Carraway
 - Analyze guidance for good living from American authors
 - Describe the requirements of the self-improvement plan portfolio assignment
 - Compose the rough draft of a self-improvement plan for Nick Carraway
7. The Great Gatsby: The American Dream
 - Apply the concepts of materialism and the American dream to The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Analyze the degree to which the characters in The Great Gatsby are able to achieve the American dream
8. The Great Gatsby: Symbols and Allusions
 - Define symbol and allusion
 - Analyze the use of allusions in The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Review for the quiz
9. The Great Gatsby: A Timeless Tragedy
 - Describe why The Great Gatsby has stood the test of time
 - Use vocabulary words to write a personal reaction to the novel
 - Evaluate how Nick changes over the course of the novel
 - Demonstrate knowledge of the novel on a quiz
10. The Great Gatsby: Loss of Innocence
 - Describe Nick's loss of innocence and what he has learned
 - Practice linking modifiers for clarity
 - Compose the final draft of a self-improvement plan for Nick Carraway

5. **Contemporary Postmodernism**

1. Contemporary Literature
 - Identify the characteristics of the movement called contemporary postmodernism

- Identify the principal parts of irregular verbs
 - Describe the categories of poetry associated with contemporary postmodernism
2. Charming Billy
 - Describe ways in which the Vietnam War affected society
 - Identify the six verb tenses
 - Define vocabulary words to increase understanding of a short story
 - Read, analyze, and interpret the short story, "Where Have You Gone, Charming Billy?"
 3. Mortals
 - Read, analyze, and interpret the short story, "Mortals"
 - Define vocabulary words to increase understanding of a short story
 - Correctly express time using verb tenses
 4. Multicultural Meter: Many New Voices in the Mix
 - Read, analyze, and interpret several examples of poetry by American contemporary poets
 - Define the poetic elements of meter, rhythm, and rhyme
 - Distinguish between active and passive voice
 5. Personal Narrative: Rough Draft
 - Analyze a model personal narrative
 - Compose the first draft of a memoir
 6. Memoirs
 - Read, analyze, and interpret the memoir, "About Russell"
 - Identify characteristics of reflective writing
 - Correctly use the indicative, imperative, and subjunctive moods of verbs
 - Define vocabulary words to better understand a memoir
 7. American Beauty
 - Read, analyze, and interpret the memoirs, "I Want to Be Miss America" and "The Struggle to Be an All-American Girl"
 - Describe how stereotypes affect social interactions
 - Define vocabulary to better understand memoirs
 - Use the correct verb forms in sentences
 8. Contemporary Postmodernism Unit Review
 - Recognize errors in grammar, usage, and mechanics
 - Prepare for the unit test
 9. Contemporary Postmodernism Unit Test
 10. Personal Narrative: Final Draft
 - Revise a memoir using an evaluation checklist
 - Finalize and publish a memoir
- 6. Semester Review and Exam**
1. English 11 B Semester Review
 - Prepare for semester exam
 - Assess understanding of literature, vocabulary, grammar, and writing in Semester B
 2. English 11 B Semester Exam

English 11 Honors

English 11 Honors

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

In Semester A of this course, the student will focus on the literary movements that comprise American literature, and trace the chronology of national literature from the early American and colonial period through the periods of Realism and Regionalism. In reading these diverse selections, the student will gain a thorough understanding of fiction, including short stories, poetry and drama; as well as nonfiction genres, including the oral tradition, seminal historical documents, and speeches. The student will also read Jerome Lawrence and Robert E. Lee's play *The Night Thoreau Spent in Jail*. Arthur Miller's play *The Crucible* may be read instead of *The Night Thoreau Spent in Jail*. In reading these American plays and composing a dramatic scene, the student will understand drama in its historical and literary context.

Writing instruction guides the student through the process of composing a descriptive essay and modeling the style of an American author. Throughout the course, the student expands his vocabulary in context. The mastery of both critical vocabulary and grammar skills helps the student become a more thoughtful and effective reader and writer. The Honors course includes more rigorous curriculum and provides greater opportunities for the student to explore concepts, engage in independent research, and demonstrate critical thinking skills.

Semester A

1. New World, New Voices

1. American Literature: Our Nation's Voice
 - Describe how a national literature develops
 - Assess three methods of note taking
 - Define vocabulary words using context clues
 - Describe the literature of early and Colonial America
2. Earliest Voices: William Bradford
 - Describe the concerns and ideas of early American people and writers
 - Compare early American English to contemporary American English
 - Read, analyze, and interpret excerpts from *Of Plymouth Plantation*
 - Identify evidence of the Puritan legacy in American literature
3. Contemporary Voice: Fred Veilleux
 - Describe persuasive techniques

- Define vocabulary words in order to understand a persuasive argument
- Analyze persuasive arguments in an essay
- 4. Earliest Voices: Anne Bradstreet, Phillis Wheatley
 - Define poetic elements
 - Read, analyze, and interpret the poetry of early American women poets
 - Determine the best definitions of words with multiple meanings in context
- 5. Earliest Voice: Jonathan Edwards
 - Summarize the Great Awakening
 - Describe the life of John Edwards
 - Read, analyze, and interpret a sermon
- 6. Earliest Voices: Olaudah Equiano
 - Review the definition of autobiography
 - Read and analyze a slave narrative
- 7. Earliest Voices: Thomas Paine
 - Describe how Thomas Paine helped to fuel the American Revolution
 - Define the denotative and connotative meanings of vocabulary words
 - Read, analyze, and interpret excerpts from Thomas Paine's Common Sense
 - Analyze the audience of a persuasive essay
- 8. Earliest Voices: The Founding Fathers
 - Analyze the Declaration of Independence
 - Compare denotative and connotative meanings of words
 - Assess knowledge of early American literature
- 9. Author's Purpose
 - Define purposes for writing
 - Review authors and compositions from the early American and Colonial period to identify purpose
- 10. Timed Writing Assessments
 - Identify and assess strategies for timed writing
 - Outline a model essay test answer
 - Compose a timed writing response
- 11. New World, New Voices Review
 - Review unit essential questions
 - Practice test-taking strategies
- 12. New World, New Voices Unit Test
- 2. **American Romanticism (1820s–1850s)**
 1. American Romanticism
 - Define genre and subgenre
 - Identify the characteristics of American romanticism
 - Name American romantic authors
 - Correctly capitalize words in sentences
 2. Nathaniel Hawthorne
 - Read and analyze an American romantic short story
 - Evaluate the role setting plays in literature
 - Paraphrase a variety of texts
 - Define and determine the connotations of vocabulary words
 3. Contemporary Literary Criticism
 - Read and analyze literary criticism
 - Interpret symbolism and imagery in "Young Goodman Brown"
 - Review eight parts of speech and types of nouns
 4. Edgar Allan Poe

- Read and analyze Poe's letters and short stories
 - Describe how setting contributes to Poe's intended effect
 - Evaluate Poe's writing using his own criteria
 - Define and determine the connotations of vocabulary words
5. Transcendentalism: Ralph Waldo Emerson
 - Examine transcendentalist views of God and nature
 - Analyze Ralph Waldo Emerson's writing style
 6. Transcendentalism: Henry David Thoreau
 - Examine transcendentalist views of God and nature
 - Analyze Henry David Thoreau's descriptive style of writing
 - Identify pronouns and their antecedents
 - Select a topic and audience for a descriptive essay
 - Assess knowledge of American romanticism
 7. Descriptive Essay: Rough Draft
 - Practice strategies for developing a description
 - Compose and submit a descriptive essay rough draft
 - Match appositives to the nouns they modify
 - Evaluate denotative and connotative meanings in descriptive writing

 - Analyze images and poetry of Walt Whitman
 - Compare and contrast romantic and early American and colonial poetry
 - Analyze literary criticism of Walt Whitman's poetry
 9. American Romanticism Unit Review
 - Prepare for the unit test
 - Apply strategies for answering reading comprehension questions
 10. American Romanticism Unit Test
 11. Descriptive Essay: Final Draft
 - Review comments on descriptive writing rough draft
 - Revise and edit rough draft
 - Submit descriptive essay final draft
 - Identify commonly confused homophones
 - Compose the final draft of the descriptive essay
3. **The Night Thoreau Spent in Jail**
 1. Obedience Versus Nonconformity
 - Explain Henry David Thoreau's willingness to be jailed
 - Define vocabulary words
 - Assess Henry's approach to and philosophy of teaching
 - Analyze the setting and structure of the play
 2. Transcendentalism: Progress or Threat?
 - Describe how the play illustrates the philosophy of transcendentalism
 - Identify the central conflict of the play
 - Define vocabulary words
 - Evaluate the use of stage directions in the play
 3. Opposing the War
 - Evaluate arguments for and against the Mexican American War to determine whether it was justified
 - Define vocabulary words
 - Generate ideas for a dramatic scene
 4. Crafting a Scene

- Describe elements of drama, including plot, characters, communication, and dramatic conventions
 - Compose the rough draft of a scene
5. A Solitary Man
 - Analyze the use of figures of speech in the play
 - Define vocabulary words
 - Evaluate how Henry's commitment to transcendentalism affects his human connections
 6. Doing the Impossible
 - Compare and contrast protest in the play with protest during the Vietnam War
 - Define vocabulary words
 - Analyze Henry's and Waldo's approaches to politics
 7. One of the Crowd
 - Analyze Henry's non-conformist attitude in relation to theme
 - Define vocabulary words
 - Describe the significance of the "unseen Congressman"
 - Analyze the play's arguments about transcendentalism
 8. The Play's the Thing
 - Evaluate the use of dialogue in the dramatic scene
 - Propose staging for the play that serves its themes
 - Incorporate meaningful stage directions into the dramatic scene
 - Revise the dramatic scene
4. **Realism and Regionalism**
1. Realism
 - Identify characteristics of Realism
 - Describe the historical context of Realism
 - Correctly use apostrophes to show possession
 2. Emily Dickinson
 - Describe the life of Emily Dickinson
 - Read, analyze, and interpret Emily Dickinson's poetry
 - Identify proper use of the apostrophe
 - Correctly use possessive pronouns
 3. Sarah Orne Jewett
 - Define dialect and types of language associated with the use of dialect
 - Describe the life and influences of Sarah Orne Jewett
 - Read, analyze, and interpret a passage from Jewett's *The Country of the Pointed Firs*
 - Define vocabulary words to enhance understanding of literature
 - Correctly use apostrophes to convey ownership
 4. Mark Twain
 - Define Regionalism
 - Read, analyze, and interpret the short story, "The Celebrated Jumping Frog of Calaveras County"
 - Define vocabulary words to enhance understanding of a short story
 - Correctly use apostrophes to create contractions
 5. Ambrose Bierce
 - Describe Ambrose Bierce's life and writing style
 - Read, analyze, and interpret the short story, "An Occurrence at Owl Creek Bridge"
 - Define foreshadowing and flashback
 - Define vocabulary words to enhance understanding of a short story
 6. Kate Chopin
 - Identify the important elements of a short story
 - Generate ideas for an alternate ending to a short story

- Identify characteristics of Kate Chopin's writing
 - 7. Alternate Ending: Rough Draft
 - Identify stylistic devices of a romantic or realist author
 - Compose an alternate ending to a romantic or realist story
 - Follow guidelines for ending a story and improving style
 - 8. Charles Waddell Chesnutt
 - Read, analyze, and interpret the short story, "The Wife of His Youth"
 - Assess the impact complex characters have on a story
 - Define vocabulary words to enhance understanding of a short story
 - 9. Contemporary Connection: Cedric Yamanaka
 - Read, analyze, and interpret the short story, "The Lemon Tree Billiards House"
 - Define hyperbole, simile, and metaphor
 - 10. Realism and Regionalism Review
 - Prepare for unit test
 - Apply strategies for answering standard written English test items
 - 11. Realism and Regionalism Unit Test
 - 12. Alternate Ending: Final Draft
 - Compose an alternate ending to a romantic or realist story
 - Complete an evaluation checklist for revising
 - Identify options for publishing creative writing
- 5. Semester Review and Exam**
1. Semester Review
 - Prepare for semester exam
 - Assess understanding of literature, vocabulary, grammar, and writing in Semester A
 2. Semester Exam

Semester B

- 1. Voices of Modernism (1920s to 1940s)**
 1. Introduction to Modernism
 - Define modernism
 - Describe the events and circumstances that influenced modernism
 - Describe the unique writing styles of modernist writers
 - Identify participles, participial phrases, and the words they modify
 2. Hemingway
 - Identify the mood and tone of Hemingway's writing
 - Describe the major influences on Hemingway's writing style
 - Read, analyze, and interpret the short story "In Another Country"
 - Analyze setting and imagery in "In Another Country"
 - Correctly punctuate participial phrases
 3. Steinbeck
 - Define symbolism
 - Describe how John Steinbeck was influenced by the California town of Pacific Grove
 - Define vocabulary words to enhance understanding of John Steinbeck's writing
 - Read, analyze, and interpret the short story, "The Chrysanthemums"
 - Correctly identify gerunds and gerund phrases
 4. Harlem Renaissance
 - Practice using effective strategies for reading poetry
 - Describe the rise of the Harlem Renaissance
 - Read, analyze, and interpret poems of the Harlem Renaissance

- Correctly identify infinitives and infinitive phrases
- 5. Ellison
 - Define diction and pathos
 - Describe the cultural contributions of African American literary and visual artists
 - Read, analyze, and interpret the short story, "The Black Ball"
 - Compare and contrast pathos, ethos, and logos
 - Revise sentences to correct misplaced and dangling modifiers

 - Compare and contrast internal and external motivation
 - Analyze the distinctive voices in the poetry of Langston Hughes
 - Analyze character motivation in "Why, You Reckin?"
- 7. Frost
 - Identify characteristics of Robert Frost's poetry
 - Define aphorism and metaphor to better understand Frost's poems
 - Read, analyze, and interpret the poem, "Mending Wall"
 - Differentiate between independent and subordinate clauses
- 8. Literary Analysis: Prewriting and Outline
 - Identify prewriting strategies and techniques for literary analysis
 - Define vocabulary words associated with literary analysis
 - Compose an outline based on a working thesis
 - Compose the first and second drafts of a literary analysis
 - Identify adverbial clauses and the words they modify
- 9. Fitzgerald
 - Define allegory and in medias res
 - Create and analyze a time line of F. Scott Fitzgerald's life
 - Define vocabulary words to enhance understanding of the short story, "Babylon Revisited"
 - Read, analyze, and interpret the short story, "Babylon Revisited"
 - Complete elliptical clauses to understand their meaning
- 10. Porter
 - Compare and contrast internal and external conflict
 - Define different types of literary characters
 - Read, analyze, and interpret the short story, "He"
 - Correctly punctuate adverbial clauses
- 11. Voices of Modernism (1920s to 1940s) Unit Review
 - Develop strategies for deriving the meaning of unfamiliar words
 - Prepare for the unit test
- 12. Voices of Modernism (1920s to 1940s) Unit Test
- 13. Literary Analysis: Final Draft
 - Revise and proofread to develop the final draft of the literary analysis
- 2. **Post-War Voices Emerge (1950s–1960s)**
 1. Genres and Literary Movements
 - Review basic genres of literature
 - Define the prefixes sub- and ob- in order to understand the terms subjective and objective
 - Identify characteristics of postmodern literature
 2. Vonnegut
 - Define satire
 - Identify adjectival clauses and the words they modify
 - Read, analyze, and interpret the short story, "Harrison Bergeron"
 3. Updike
 - Define conflict

- Define point of view
 - Read, analyze, and interpret the short story, "A&P"
 - Identify relative pronouns in adjectival clauses
4. Compare and Contrast
 - Describe the requirements for the compare-and-contrast essay portfolio assignment
 - Understand how to develop, organize, and write a compare-and-contrast text
 - Read, analyze, and interpret the selection, "A Double Impulse"
 - Correctly punctuate adjectival clauses
 5. Speeches
 - Identify elements of persuasion
 - Read, analyze, and interpret the speech, "I Have a Dream"
 - Identify and correct misplaced modifiers
 6. The Rough Draft
 - Use quotations correctly and effectively
 - Document quotations correctly
 - Compose a rough draft of the compare-and-contrast essay
 7. Beat Generation
 - Identify characteristics of the poetry of the Beat Generations
 - Read, analyze, and interpret poetry of the Beat Generation
 - Compare and contrast the poetry of the Romantics with that of the Beat Generation
 8. Post-War Voices Emerge (1950s–1960s) Unit Review
 - Identify elements of a successful and effective group discussion
 - Prepare for the unit test
 9. Post-War Voices Emerge (1950s–1960s) Unit Test
 10. The Final Draft
 - Incorporate unique voice into a compare-and-contrast essay
 - Revise and finalize the compare-and-contrast essay
3. **The Research Paper**
 1. Introduction to Research Writing
 - Describe how to begin a research report
 - Read and analyze a model research report
 - Edit sentences to correct errors associated with standard usage
 2. Choosing a Subject
 - Choose a subject for the research report
 - Develop research questions
 - Properly cite sources in MLA format
 3. Introduction to Research
 - Gather information and evaluate sources for the research report
 4. Gathering Information
 - Compare and contrast print and Internet research sources
 - Describe how to successfully use the Internet for research
 5. Using Quotations
 - Organize notes effectively
 - Avoid plagiarism by creating source cards
 6. Synthesizing and Organizing
 - Synthesize information from different sources
 - Compose a working thesis for the research report
 7. Documenting
 - Document all sources used in research report
 - Create a works cited page

8. Outlining
 - Organize supporting details
 - Develop an outline
9. Drafting
 - Identify the characteristics of a successful introduction
 - Understand and implement strategies for achieving coherence
 - Compose a first draft of a research report
10. Nonfiction Writing I
 - Understand nonfiction text structures
 - Correctly identify progressive and emphatic verb forms
 - Read, analyze, and interpret the essays, "Familiar Strangers" and "Melting Pot"
11. Nonfiction Writing II
 - Read, analyze, and interpret a selection from "Life on the Color Lines"
 - Analyze problems with verb tenses according to the meanings of sentences
12. Evaluating Research
 - Develop strategies for addressing "trouble spots" in the research report
 - Evaluate the research report using a checklist
13. Revising, Editing, and Publishing
 - Revise a research report using an evaluation checklist for revising
 - Edit a report for grammar, usage, mechanics, and spelling
 - Publish the final draft of a research report

4. **The Great Gatsby**

1. The Great Gatsby: The Jazz Age
 - Describe the attitudes, fashion, and lifestyle of the 1920s
 - Compare and contrast youth culture in the 1920s with that in the present
 - Define vocabulary words in order to further understanding of the novel
 - Define direct and indirect characterization
 - Describe the central characters of The Great Gatsby
2. The Great Gatsby: F. Scott Fitzgerald
 - Describe the life of F. Scott Fitzgerald and the inspiration behind The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Connect the novel with F. Scott Fitzgerald's life
3. The Great Gatsby: Tone and Point of View
 - Define tone
 - Compare and contrast different types of point of view
 - Analyze point of view in The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
4. The Great Gatsby: Social Groups and Class
 - Analyze social groups and class as they apply to The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
5. The Great Gatsby: Significance of Time
 - Analyze the significance of time in The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Predict the fate of Gatsby and Daisy
6. The Great Gatsby: The Dilemmas of Nick Carraway
 - Analyze guidance for good living from American authors
 - Describe the requirements of the self-improvement plan portfolio assignment
 - Compose the rough draft of a self-improvement plan for Nick Carraway
7. The Great Gatsby: The American Dream
 - Apply the concepts of materialism and the American dream to The Great Gatsby

- Define vocabulary words in order to further understanding of the novel
 - Analyze the degree to which the characters in *The Great Gatsby* are able to achieve the American dream
8. **The Great Gatsby: Symbols and Allusions**
 - Define symbol and allusion
 - Analyze the use of allusions in *The Great Gatsby*
 - Define vocabulary words in order to further understanding of the novel
 - Review for the quiz
 9. **The Great Gatsby: A Timeless Tragedy**
 - Describe why *The Great Gatsby* has stood the test of time
 - Use vocabulary words to write a personal reaction to the novel
 - Evaluate how Nick changes over the course of the novel
 - Demonstrate knowledge of the novel on a quiz
 10. **The Great Gatsby: Loss of Innocence**
 - Describe Nick's loss of innocence and what he has learned
 - Practice linking modifiers for clarity
 - Compose the final draft of a self-improvement plan for Nick Carraway
5. **Contemporary Postmodernism**
 1. **Contemporary Literature**
 - Identify the characteristics of the movement called contemporary postmodernism
 - Identify the principal parts of irregular verbs
 - Describe the categories of poetry associated with contemporary postmodernism
 2. **Charming Billy**
 - Describe ways in which the Vietnam War affected society
 - Identify the six tenses of verbs
 - Define vocabulary words to increase understanding of a short story
 - Read, analyze, and interpret the short story, "Where Have You Gone Charming Billy"
 3. **Mortals**
 - Describe the characteristics of morality plays
 - Correctly express time using verb tenses
 - Define vocabulary words to increase understanding of a short story
 - Read, analyze, and interpret the short story, "Mortals"

 - Define the poetic elements of meter, rhythm, and rhyme
 - Distinguish between active and passive voice
 - Read, analyze, and interpret several examples of poetry by American contemporary poets
 5. **Personal Narrative: Rough Draft**
 - Analyze a model personal narrative
 - Compose the first draft of a personal narrative
 6. **Memoirs**
 - Identify characteristics of reflective writing
 - Correctly use the indicative, imperative, and subjunctive moods of verbs
 - Define vocabulary words to better understand a memoir
 - Read, analyze, and interpret the memoir, "About Russell"
 7. **American Beauty**
 - Describe how stereotypes affect social interactions
 - Define vocabulary to better understand memoirs
 - Read, analyze, and interpret the memoirs, "I Want to Be Miss America" and "The Struggle to Be an All-American Girl"
 - Use correct verb forms in sentences

8. Contemporary Postmodernism Unit Review
 - Recognize errors of grammar, usage, and mechanics
 - Prepare for the unit test
 9. Contemporary Postmodernism Unit Test
 10. Personal Narrative: Final Draft
 - Distinguish and correct problems with pronouns
 - Identify and correct problems with misused expressions
 - Revise a personal narrative using an evaluation checklist
 - Compose the final draft of a personal narrative
- 6. Semester Review and Exam**
1. Semester Review
 - Prepare for semester exam
 - Assess understanding of literature, vocabulary, grammar, and writing in Semester B
 2. Semester Exam

In Semester B of this course, the student will focus on the literary movements in American literature, and trace the chronology of national literature from the modernist through the contemporary period. In reading and responding to these diverse literature selections, the student will gain a thorough understanding of a myriad of fiction and nonfiction genres, including short stories, essays, poetry, drama, memoirs, and autobiographies. The student will also read F. Scott Fitzgerald's novel *The Great Gatsby*. Ernest Hemingway's novella *The Old Man and the Sea* may be read instead of *The Great Gatsby*. In reading these American literature selections, the student will understand longer works of literature in their historical and literary context.

Writing instruction guides the students through the process of composing a literary analysis and a research paper. Throughout the course, the student expands his vocabulary in context. The mastery of both critical vocabulary and grammar skills helps the student become a more thoughtful and effective reader and writer. The Honors course includes more rigorous curriculum and provides greater opportunities for students to explore concepts, engage in independent research, and demonstrate critical thinking skills.

6. Voices of Modernism (1920s to 1940s)

1. Introduction to Modernism
 - Define modernism
 - Describe the events and circumstances that influenced modernism
 - Describe the unique writing styles of modernist writers
 - Identify participles, participial phrases, and the words they modify
2. Hemingway
 - Identify the mood and tone of Hemingway's writing
 - Describe the major influences on Hemingway's writing style
 - Read, analyze, and interpret the short story "In Another Country"
 - Analyze setting and imagery in "In Another Country"
 - Correctly punctuate participial phrases
3. Steinbeck
 - Define symbolism
 - Describe how John Steinbeck was influenced by the California town of Pacific Grove

- Define vocabulary words to enhance understanding of John Steinbeck's writing
 - Read, analyze, and interpret the short story, "The Chrysanthemums"
 - Correctly identify gerunds and gerund phrases
4. Harlem Renaissance
 - Practice using effective strategies for reading poetry
 - Describe the rise of the Harlem Renaissance
 - Read, analyze, and interpret poems of the Harlem Renaissance
 - Correctly identify infinitives and infinitive phrases
 5. Ellison
 - Define diction and pathos
 - Describe the cultural contributions of African American literary and visual artists
 - Read, analyze, and interpret the short story, "The Black Ball"
 - Compare and contrast pathos, ethos, and logos
 - Revise sentences to correct misplaced and dangling modifiers
 6. Hughes
 - Compare and contrast internal and external motivation
 - Analyze the distinctive voices in the poetry of Langston Hughes
 - Analyze character motivation in "Why, You Reckin?"
 7. Frost
 - Identify characteristics of Robert Frost's poetry
 - Define aphorism and metaphor to better understand Frost's poems
 - Read, analyze, and interpret the poem, "Mending Wall"
 - Differentiate between independent and subordinate clauses
 8. Literary Analysis: Prewriting and Outline
 - Identify prewriting strategies and techniques for literary analysis
 - Define vocabulary words associated with literary analysis
 - Compose an outline based on a working thesis
 - Compose the first and second drafts of a literary analysis
 - Identify adverbial clauses and the words they modify
 9. Fitzgerald
 - Define allegory and in medias res
 - Create and analyze a time line of F. Scott Fitzgerald's life
 - Define vocabulary words to enhance understanding of the short story, "Babylon Revisited"
 - Read, analyze, and interpret the short story, "Babylon Revisited"
 - Complete elliptical clauses to understand their meaning
 10. Porter
 - Compare and contrast internal and external conflict
 - Define different types of literary characters
 - Read, analyze, and interpret the short story, "He"
 - Correctly punctuate adverbial clauses
 11. Voices of Modernism (1920s to 1940s) Unit Review
 - Develop strategies for deriving the meaning of unfamiliar words
 - Prepare for the unit test
 12. Voices of Modernism (1920s to 1940s) Unit Test

- *There are no objectives for this lesson.*

13. Literary Analysis: Final Draft

- Revise and proofread to develop the final draft of the literary analysis

7. The Research Paper

1. Introduction to Research Writing

- Describe how to begin a research report
- Read and analyze a model research report
- Edit sentences to correct errors associated with standard usage

2. Choosing a Subject

- Choose a subject for the research report
- Develop research questions
- Properly cite sources in MLA format

3. Introduction to Research

- Gather information and evaluate sources for the research report

4. Gathering Information

- Compare and contrast print and Internet research sources
- Describe how to successfully use the Internet for research

5. Using Quotations

- Organize notes effectively
- Avoid plagiarism by creating source cards

6. Synthesizing and Organizing

- Synthesize information from different sources
- Compose a working thesis for the research report

7. Documenting

- Document all sources used in research report
- Create a works cited page

8. Outlining

- Organize supporting details
- Develop an outline

9. Drafting

- Identify the characteristics of a successful introduction
- Understand and implement strategies for achieving coherence
- Compose a first draft of a research report

10. Nonfiction Writing I

- Understand nonfiction text structures
- Correctly identify progressive and emphatic verb forms
- Read, analyze, and interpret the essays, "Familiar Strangers" and "Melting Pot"

11. Nonfiction Writing II

- Read, analyze, and interpret a selection from "Life on the Color Lines"
- Analyze problems with verb tenses according to the meanings of sentences

12. Evaluating Research

- Develop strategies for addressing "trouble spots" in the research report
- Evaluate the research report using a checklist

13. Revising, Editing, and Publishing

- Revise a research report using an evaluation checklist for revising
- Edit a report for grammar, usage, mechanics, and spelling
- Publish the final draft of a research report

8. Post-War Voices Emerge (1950s–1960s)

1. Genres and Literary Movements

- Review basic genres of literature
- Define the prefixes sub- and ob- in order to understand the terms subjective and objective
- Identify characteristics of postmodern literature

2. Vonnegut

- Define satire
- Identify adjectival clauses and the words they modify
- Read, analyze, and interpret the short story, "Harrison Bergeron"

3. Updike

- Define conflict
- Define point of view
- Read, analyze, and interpret the short story, "A&P"
- Identify relative pronouns in adjectival clauses

4. Compare and Contrast

- Describe the requirements for the compare-and-contrast essay portfolio assignment
- Understand how to develop, organize, and write a compare-and-contrast text
- Read, analyze, and interpret the selection, "A Double Impulse"
- Correctly punctuate adjectival clauses

5. Speeches

- Identify elements of persuasion
- Read, analyze, and interpret the speech, "I Have a Dream"
- Identify and correct misplaced modifiers

6. The Rough Draft

- Use quotations correctly and effectively
- Document quotations correctly
- Compose a rough draft of the compare-and-contrast essay

7. Beat Generation

- Identify characteristics of the poetry of the Beat Generations
- Read, analyze, and interpret poetry of the Beat Generation
- Compare and contrast the poetry of the Romantics with that of the Beat Generation

8. Post-War Voices Emerge (1950s–1960s) Unit Review

- Identify elements of a successful and effective group discussion
- Prepare for the unit test

9. Post-War Voices Emerge (1950s–1960s) Unit Test

- *There are no objectives for this lesson.*

10. The Final Draft

- Incorporate unique voice into a compare-and-contrast essay
- Revise and finalize the compare-and-contrast essay

9. The Great Gatsby

1. The Great Gatsby: The Jazz Age
 - Describe the attitudes, fashion, and lifestyle of the 1920s
 - Compare and contrast youth culture in the 1920s with that in the present
 - Define vocabulary words in order to further understanding of the novel
 - Define direct and indirect characterization
 - Describe the central characters of The Great Gatsby
2. The Great Gatsby: F. Scott Fitzgerald
 - Describe the life of F. Scott Fitzgerald and the inspiration behind The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Connect the novel with F. Scott Fitzgerald's life
3. The Great Gatsby: Tone and Point of View
 - Define tone
 - Compare and contrast different types of point of view
 - Analyze point of view in The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
4. The Great Gatsby: Social Groups and Class
 - Analyze social groups and class as they apply to The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
5. The Great Gatsby: Significance of Time
 - Analyze the significance of time in The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Predict the fate of Gatsby and Daisy
6. The Great Gatsby: The Dilemmas of Nick Carraway
 - Analyze guidance for good living from American authors
 - Describe the requirements of the self-improvement plan portfolio assignment
 - Compose the rough draft of a self-improvement plan for Nick Carraway
7. The Great Gatsby: The American Dream
 - Apply the concepts of materialism and the American dream to The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Analyze the degree to which the characters in The Great Gatsby are able to achieve the American dream
8. The Great Gatsby: Symbols and Allusions
 - Define symbol and allusion
 - Analyze the use of allusions in The Great Gatsby
 - Define vocabulary words in order to further understanding of the novel
 - Review for the quiz
9. The Great Gatsby: A Timeless Tragedy
 - Describe why The Great Gatsby has stood the test of time
 - Use vocabulary words to write a personal reaction to the novel
 - Evaluate how Nick changes over the course of the novel
 - Demonstrate knowledge of the novel on a quiz
10. The Great Gatsby: Loss of Innocence
 - Describe Nick's loss of innocence and what he has learned

- Practice linking modifiers for clarity
- Compose the final draft of a self-improvement plan for Nick Carraway

10. Contemporary Postmodernism

1. Contemporary Literature
 - Identify the characteristics of the movement called contemporary postmodernism
 - Identify the principal parts of irregular verbs
 - Describe the categories of poetry associated with contemporary postmodernism
2. Charming Billy
 - Describe ways in which the Vietnam War affected society
 - Identify the six tenses of verbs
 - Define vocabulary words to increase understanding of a short story
 - Read, analyze, and interpret the short story, "Where Have You Gone Charming Billy"
3. Mortals
 - Describe the characteristics of morality plays
 - Correctly express time using verb tenses
 - Define vocabulary words to increase understanding of a short story
 - Read, analyze, and interpret the short story, "Mortals"
4. Multicultural Poetry
 - Define the poetic elements of meter, rhythm, and rhyme
 - Distinguish between active and passive voice
 - Read, analyze, and interpret several examples of poetry by American contemporary poets
5. Personal Narrative: Rough Draft
 - Analyze a model personal narrative
 - Compose the first draft of a personal narrative
6. Memoirs
 - Identify characteristics of reflective writing
 - Correctly use the indicative, imperative, and subjunctive moods of verbs
 - Define vocabulary words to better understand a memoir
 - Read, analyze, and interpret the memoir, "About Russell"
7. American Beauty
 - Describe how stereotypes affect social interactions
 - Define vocabulary to better understand memoirs
 - Read, analyze, and interpret the memoirs, "I Want to Be Miss America" and "The Struggle to Be an All-American Girl"
 - Use correct verb forms in sentences
8. Contemporary Postmodernism Unit Review
 - Recognize errors of grammar, usage, and mechanics
 - Prepare for the unit test
9. Contemporary Postmodernism Unit Test
 - *There are no objectives for this lesson.*
10. Personal Narrative: Final Draft
 - Distinguish and correct problems with pronouns
 - Identify and correct problems with misused expressions

- Revise a personal narrative using an evaluation checklist
- Compose the final draft of a personal narrative

11. Semester Review and Exam

1. Semester Review
 - Prepare for semester exam
 - Assess understanding of literature, vocabulary, grammar, and writing in Semester B
2. Semester Exam
 - *There are no objectives for this lesson.*

☆ Review Test			

English 12

English 12

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary

This is the first of two courses that comprise English 12. In this course, the student will take an in-depth look at early British literature from 449 to 1798 and will examine literary forms including the epic, poetry, drama, and the essay. The student will also read longer selections of literature that are representative of the historical setting, including Shakespeare's *Macbeth*. The student will read to gain an understanding and appreciation of the historical context from which the literature arose. Vocabulary development and mastery of critical grammar and communication skills prepare the student for writing creative narratives, and expository and persuasive essays.

Semester A Outline

1. The Anglo-Saxon Period: 449–1066

1. Unit Introduction
 - Preview the structure of the English 12 course
 - Read, analyze, and interpret selections from the Anglo-Saxon period
 - Compare and contrast elements of Anglo-Saxon literature
 - Analyze a descriptive writing model
 - Review the eight parts of speech
2. Grendel, The Coming of Beowulf, The Battle

- Read, analyze, and interpret elements of epic poetry
 - Compare and contrast elements of character
 - Define suffixes to interpret word meanings
 - Apply prewriting strategies for descriptive writing
 - Identify intransitive and transitive verbs, verb phrases, and linking verbs
3. Grendel's Mother, The Battle with Grendel's Mother
 - Read, analyze, and interpret elements of the elegy, including poetic devices
 - Identify alliteration, rhythm, and repetition
 - Compare and contrast epic and elegy
 - Apply prewriting strategies to develop description
 - Identify adjectives and their function in a sentence
 4. The Battle with the Dragon, The Death of Beowulf
 - Define and analyze protagonist and antagonist in fictional writing
 - Define prefixes to interpret word meanings
 - Complete prewriting strategies and identify a scene for description
 - Identify adverbs and their function in a sentence
 5. Writing Workshop: Description (First Draft)
 - Draft a descriptive essay incorporating sensory details
 - Identify prepositions and their function in a sentence
 6. Lyric Poetry: The Exeter Book
 - Read, analyze, and interpret elegy, elegiac verse, and descriptive details
 - Identify mood and the poet's attitude
 - Define denotation and connotation to interpret word meanings
 - Identify conjunctions and interjections and their function in a sentence
 7. Language Focus: Style and Voice 449 - 1066
 - Choose vivid words in writing
 - Assess understanding of the unit vocabulary and parts of speech
 8. Unit Review
 - Review the historical, social, and cultural context of the Anglo-Saxon time period
 - Review characteristics of the epic and elegy
 - Review parts of the speech and their functions in a sentence
 9. Unit Test
 - *There are no objectives for this lesson.*
 10. Writing Workshop: Description (Final Draft)
 - Edit, proofread, and publish a description

2. The Middle Ages: 1066–1485

1. The Middle Ages: Unit Introduction
 - Read, analyze, and interpret selections from the Medieval period
 - Identify elements of medieval poetry, including narrative poems and epic tales
 - Identify causes and effects in the historical and cultural context of the Middle Ages
 - Review the sentence base
2. The Canterbury Tales: "The Prologue"
 - Analyze elements of characterization
 - Identify cause-and-effect relationships
 - Compare and contrast varieties of English
 - Identify Latin roots
 - Identify subjects and predicates
3. The Canterbury Tales: "The Prologue"
 - Identify and analyze tone
 - Identify cause-and-effect relationships
 - Identify and analyze denotation and connotation
 - Identify and correct sentence fragments

4. The Canterbury Tales: "The Prologue"
 - Identify and analyze irony
 - Identify cause-and-effect relationships
 - Use figurative language to improve style and voice
 - Recognize complements
5. The Canterbury Tales: "The Pardoner's Tale"
 - Identify and understand characteristics of a frame story
 - Analyze character
 - Use a dictionary
6. The Canterbury Tales: "The Wife of Bath's Tale"
 - Identify and analyze narrator, voice, and perspective
 - Compare and contrast characters
 - Interpret word meanings through context clues
 - Create an outline for creative writing
 - Identify prepositional phrases and their function in a sentence
7. Writing Workshop: Allegory (First Draft)
 - Draft a modern allegory containing literary devices and a moral message
 - Identify verbals and verbal phrases
8. Medieval Romance: Sir Gawain and the Green Knight
 - Read, analyze, and interpret romances
 - Identify and analyze poetic devices such as alliteration
 - Define suffixes to interpret word meanings
 - Recognize and correct misplaced and dangling modifiers and sentence fragments
9. Writing/Language Focus: Style and Voice
 - Revise for sentence variety
 - Combine sentences by coordinating and subordinating
 - Apply knowledge of phrases to creative writing assessment
10. The Middle Ages: 1066–1485: Unit Review
 - Review the historical, social, and cultural context of the Middle Ages
 - Review characteristics of the narrative poem
 - Review characteristics of medieval romance
 - Review the sentence base
 - Review phrases
11. The Middle Ages: 1066–1485: Unit Test
 - *There are no objectives for this lesson.*
12. Writing Workshop: Allegory (Final Draft)
 - Edit, proofread, and publish an allegory

3. Macbeth

1. History and Heroes; Witches and Warriors
 - Explore how Shakespeare incorporated some historical characters and altered others and why
 - Discover James I's fascination with witches and regicide
 - Define tragedy, tragic hero, and tragic flaw
2. Act I, Scenes I–II
 - Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Examine how setting influences a scene's mood
 - Define paradox and its influence on theme and character
 - Examine the differences between direct and indirect characterization
3. Act I, Scenes III–V
 - Read and analyze the text thoughtfully
 - Define new vocabulary and use in illustrative sentences
 - Make predictions

- Define the three types of irony
 - Identify examples of dramatic irony
 - Define, distinguish, and identify soliloquies and asides
4. Act I, Scenes VI–VII
 - Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Examine how analogies are used to persuade
 - Re-examine the elements of the tragic hero as it applies to all of Act I
 - Define exposition and inciting incident and apply to Act I
 5. Act II, Scenes I–II
 - Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Define and identify imagery
 - Define foreshadowing and make connections to clues in Act I
 6. Act II, Scenes III–IV
 - Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Define and identify comic relief
 - Define a pun and explore its use in the porter’s speech
 - Explore the notion of the Great Chain of Being and its application to these two scenes
 - Select a topic and develop a rough draft of a persuasive essay on the play
 7. Act III, Scenes I–III
 - Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Make predictions
 - Assess the dramatic structure, determining which past events constitute the rising action
 - Analyze sleep as an extended metaphor
 8. Act III, Scenes IV–VI
 - Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Make predictions
 - Assess the dramatic structure and identify the play’s climax
 - Review the device of indirect characterization and apply it to Lady Macbeth in the banquet scene
 - Analyze the role of conflict—both internal and external—to drive the play’s action
 9. Act IV, Scenes I–III
 - Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Make predictions about the witches’ prophecies
 - Define and identify rhyming couplets and create your own
 - Define blank verse, and explore the reasons Shakespeare used it so frequently
 - Define and identify alliteration
 10. Act V, Scenes I–VIII
 - Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Examine the remaining dramatic structure and identify the falling action and resolution
 - Define and apply connotation to the “tomorrow and tomorrow and tomorrow” soliloquy
 - Re-examine dramatic irony in light of the fulfillment of the prophecies
11. The Art of Persuasion

- Revise and edit the final draft of a persuasive essay
- Proofread a final draft
- Maintain parallelism and agreement
- Complete an evaluation checklist for revising
- Review a rubric and provide self-assessment

4. The Renaissance: 1485–1660

1. The Renaissance: 1485–1660: Unit Introduction
 - Read and analyze selections from the Renaissance period
 - Identify elements of lyric poetry, pastoral, and sonnet in Renaissance literature
 - Read a time line
 - Make generalization about the historical, social, and literary context of the Renaissance
 - Review clauses
2. Sonnets: Wyatt and Spenser
 - Analyze sonnets
 - Identify Petrarchan conceits
 - Research etymology
 - Recognize independent and subordinate clauses
3. Pastoral Poetry: Marlowe and Raleigh
 - Analyze elements of lyric poetry and pastorals
 - Recognize adverbial clauses
4. Sonnets: Shakespeare
 - Analyze Shakespearean sonnets
 - Identify and analyze simile and metaphor
 - Recognize adjectival clauses
 - Recognize noun clauses
5. Writing Workshop: Expository Writing (First Draft)
 - Draft an expository essay incorporating a strong thesis statement and coherent ideas
 - Apply appropriate transitions to writing
6. Metaphysical Poetry: Donne
 - Understand and analyze metaphysical poetry
 - Identify paradoxes
 - Use synonyms
 - Paraphrase poetry
 - Understand sentence structure
7. Epigrams and Songs: Jonson
 - Identify characteristics of an epigram
 - Identify and analyze tone
 - Make inferences about author
 - Identify clause fragments
8. John Milton: Paradise Lost
 - Identify and analyze elements of the epic
 - Identify and analyze allusion
 - Define archaic language to interpret word meaning
 - Identify run-on sentences
9. Writing/Language Focus: Style and Voice
 - Identify and correct rambling sentences
 - Avoid wordiness in writing
10. The Renaissance: 1485–1660: Unit Review
 - Review the historical, social, and cultural context of the Renaissance
 - Review characteristics of poetic forms
 - Review figures of speech

- Review clauses
- 11. The Renaissance: 1485–1660: Unit Test
 - *There are no objectives for this lesson.*
- 12. Writing Workshop: Expository Writing (Final Draft)
 - Edit, proofread, and publish an expository essay
 - Review clauses

5. Writing a Research Paper

1. Writing a Research Paper
 - Comprehend the basic elements of a research paper
 - Generate a topic for a research paper
 - Conduct preliminary research to identify potential areas of focus
 - Review capitalization of first words and the pronoun I
2. Gathering Information
 - Learn strategies to select and evaluate print and online resources
 - Create outline for multimedia presentation
 - Review capitalization of nouns
3. Taking Notes
 - Practice effective note-taking strategies
 - Understand the use of note cards
 - Review capitalization of nouns
4. Organizing a Paper
 - Synthesize ideas and details from multiple informational texts
 - Draft a working thesis statement
 - Create an outline for a research paper
 - Review capitalization of nouns
5. Drafting the Introduction and Refining the Thesis
 - Draft the introduction
 - Refine the thesis
 - Review capitalization of proper adjectives
6. Drafting the Body and Conclusion
 - Draft the body paragraphs and conclusion
7. Revising for Clarity, Coherence, and Unity
 - Revise draft for clarity, coherence, and unity
 - Understand and implement comments and feedback
 - Review capitalization of titles
8. Revising at the Sentence Level
 - Revise draft at the sentence level
 - Understand and implement comments and feedback
9. Citations and Works Cited Page
 - Cite sources correctly
 - Compile a works cited page
10. Editing, Proofreading, and Publishing
 - Edit, publish, and reflect on the final draft of a research paper

6. Semester Exam

1. Semester Review
 - Review major works of British literature from the Anglo-Saxon period through the eighteenth century

- Review effective comprehension strategies for reading these selections
 - Review literary elements
 - Review elements of grammar, usage, and style
2. Semester Exam
- *There are no objectives for this lesson.*

Semester B Summary:

This is the second of two courses that comprise English 12. In this course, the student continues to explore a variety of literature selections from British literature, including well-known works. The student will learn strategies for reading lyric poetry and study the characteristics of reflective essays. The student will analyze poetry, short stories, and essays from the Romantic Period, Victorian Age, and Modern Era and will determine how the historical context affected the thematic material and writing style from each era.

Writing instruction focuses on literary analysis, including in-depth instruction in the process of writing a research paper. This project teaches the student to critically analyze primary and secondary sources and to effectively support his ideas with information gathered from outside sources.

Semester B Outline

1. The Restoration and the Enlightenment: 1660–1798

1. Lesson 1: Unit Introduction
 - Read and analyze selections from the Restoration and the Enlightenment period
 - Identify elements of diary, essay, satire, biography, and poetry
 - Read a time line
 - Read about historical and cultural context
 - Review verbs
2. Lesson 2: Diaries: Pepys
 - Identify characteristics of diary
 - Identify and analyze first-person point of view
 - Identify the principal parts of verbs
3. Lesson 3: Satire in Poetry: Pope
 - Identify and analyze element of parody
 - Analyze mock epics
 - Identify and analyze heroic couplet
 - Recognize verb tense
4. Lesson 4: The Satirical Essay: Swift
 - Identify and analyze irony and satire
 - Identify and analyze roots
 - Identify active and passive voice
5. Lesson 5: Elegy: Gray

- Identify and analyze element of the elegy
 - Analyze imagery
 - Review active and passive verbs
 - Review mood of verbs
6. Lesson 6: Writing Workshop: Creative Writing
 - Organize details for writing a poem
 - Draft a poem using a specific form
 - Use appropriate tone in writing
 - Identify active and passive voice
 7. Lesson 7: Unit Review
 - Review the historical, social, and cultural context of the Restoration and the Enlightenment
 - Review characteristics of diary, mock epic, satirical essay, and elegy
 - Review verbs
 8. Lesson 8: Unit Test
 - *There are no objectives for this lesson.*
 9. Lesson 9: Writing Workshop: Creative Writing
 - Revise, proofread, and publish a creative writing assignment
 - review verbs

2. The Romantic Period (1798–1832)

1. Unit Introduction
 - Read and analyze selections from the romantic period
 - Identify and analyze poetic elements
 - Read a time line
 - Read about historical and cultural context
 - Review pronouns in the nominative case
2. Dialect: Robert Burns
 - Identify and analyze speaker and theme
 - Review pronouns in the objective case
 - Analyze dialect poetry
3. Romantic Poetry: Blake
 - Identify and analyze symbols and tone
 - Identify Greek etymology
 - Review pronouns in the possessive case
4. Lyric Poetry: Wordsworth
 - Identify and analyze elements of lyric poetry and sonnet
 - Draw conclusions about the romantic period
 - Determine the meaning of multiple-meaning words
 - Review relative pronouns
5. Lyric Poetry: Coleridge
 - Identify and analyze sound devices in poetry
 - Analyze elements of narrative poetry
 - Identify connotation and denotation
 - Review pronouns in comparison
6. Byron
 - Identify and analyze meter
 - Identify elements of poetic structure
 - Review reflexive and intensive pronouns
7. Shelley

- Identify and analyze apostrophes, personification, and terza rima
 - Identify and understand symbols
 - Review pronouns and their antecedents
8. Keats
- Analyze odes
 - Identify and analyze simile and metaphor
 - Review pronouns and their antecedents
9. The Romantic Period (1798–1832) Unit Review
- Review dialectal poetry and forms of lyrical poetry such as odes
 - Review elements of poetry
 - Review figurative language
 - Review pronouns
10. The Romantic Period (1798–1832) Unit Test
- *There are no objectives for this lesson.*

3. Frankenstein

1. Frankenstein
- Recognize differences between popular depictions of Frankenstein's monster and the monster's portrayal in Mary Shelley's original novel
 - Learn about the author's inspiration for writing the novel
 - Understand a variety of scientific discoveries and experiments having to do with creation
 - Read and analyze the text, then respond to questions
2. Frankenstein
- Draw connections between self and text
 - Develop and apply effective comprehension strategies
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Describe the Romantic Era
3. Frankenstein
- Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Understand relationships between the novel Frankenstein and Greek mythology
4. Frankenstein
- Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Review literary elements, including setting and point of view, and analyze their role in the novel Frankenstein
5. Frankenstein
- Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Understand the relationship between the novel Frankenstein and the epic poem Paradise Lost
6. Frankenstein
- Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Review the four types of conflict and identify conflicts in the novel Frankenstein

7. Frankenstein
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Analyze techniques by which the author creates suspense in the novel, such as foreshadowing
8. Frankenstein
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Analyze the effect of the setting in the final chapters of the novel
9. Frankenstein Unit Review
 - Study vocabulary and review previous lesson goals
10. Frankenstein Unit Test
 - *There are no objectives for this lesson.*

4. The Victorian Age (1832–1901)

1. Unit Introduction
 - Read and analyze selections from the Victorian period
 - Identify elements of poetry
 - Read a time line
 - Read about historical and cultural context
2. Tennyson
 - Identify and analyze mood
 - Review agreement of subjects and verbs
3. Robert and Elizabeth Browning
 - Identify and analyze elements of dramatic monologue
 - Analyze a sonnet
 - Identify an unreliable narrator
 - Review the agreement of subjects and verbs
4. Hopkins
 - Identify instances of sprung rhythm
 - Analyze poetry
 - Review the agreement of subjects and verbs
5. Arnold
 - Identify and analyze theme
 - Identify and analyze tone
 - Review the agreement of subjects and verbs
6. Hardy
 - Identify and analyze imagery and irony
 - Review the agreement of subjects and verbs
7. The Victorian Age (1832–1901) Unit Review
 - Review poetic elements and devices in Victorian literature
 - Review the agreement of subjects and verbs
8. The Victorian Age (1832–1901) Unit Test
 - *There are no objectives for this lesson.*

5. The Modern Era (1901–Present)

1. Unit Introduction: A New Era
 - Read and analyze selections from the modern era

- Identify elements of poetry, short stories, and essays in modern literature
 - Evaluate the modern era of British literature
 - Read a time line
 - Read about historical and cultural context
2. William Butler Yeats
 - Identify and analyze symbols and imagery
 - Define suffixes to interpret word meanings
 - Practice response to literature
 - Review commas
 3. James Joyce
 - Identify and analyze epiphany
 - Identify and analyze setting
 - Apply prewriting strategies to develop a literary analysis
 - Define suffixes to interpret word meanings
 - Review commas
 4. Virginia Woolf
 - Analyze an essay
 - Identify and comprehend allusion
 - Define synonyms to interpret word meanings
 - Review commas
 5. T. S. Eliot
 - Identify and interpret free verse
 - Identify and analyze mood
 - Define antonyms to interpret word meanings
 - Review apostrophes
 6. Writing Workshop: Literary Analysis Rough Draft
 - Draft a literary analysis incorporating direct quotations
 - Improve stylistic and rhetorical techniques in writing
 - Implement feedback
 - Review apostrophes
 7. Dylan Thomas
 - Identify and interpret half rhyme and internal rhyme
 - Identify characteristics of a villanelle
 - Define suffixes to interpret word meanings
 - Review semicolons
 8. Graham Greene
 - Identify and interpret humor and pathos
 - Evaluate aspects of modernism
 - Review plurals
 - Review colons
 9. Owen, Brooke, Sassoon
 - Identify and analyze tone
 - Identify repetition and parallelism
 - Use context clues to interpret word meanings
 - Review italics
 10. George Orwell

- Analyze elements of a reflective essay
 - Identify and analyze irony and understatement
 - Define denotation and connotation to interpret word meanings
 - Review quotation marks
11. Stevie Smith
- Analyze voice and diction in poetry
 - Review ellipses
12. Doris Lessing
- Analyze setting and character development
 - Identify instances of kinesthetic imagery
 - Review hyphens
13. Anita Desai
- Analyze character motivation
 - Identify and analyze irony
 - Review dashes, parentheses, and brackets
14. Writing/Language Focus: Unity and Coherence
- Revise literary analysis for coherence, unity, and emphasis
 - Use parallelism to strengthen meaning
15. The Modern Era (1901–Present) Unit Review
- Review elements of modern poetry, essays, and short stories
 - Review punctuation
16. The Modern Era (1901–Present) Unit Test
- *There are no objectives for this lesson.*
17. Writing Workshop: Literary Analysis Final Draft
- Edit, proofread, and publish a literary analysis
 - Edit for sentence fragments in formal writing

6. Semester Review and Exam

1. Semester Review
 - Prepare for semester exam
 - Assess understanding of literature, vocabulary, grammar, and writing in Semester B
2. Semester Exam
 - *There are no objectives for this lesson.*

English 12 Honors

English 12 Honors

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise English 12A Honors. In this course, the student will take an in-depth look at a variety of types of English Literature that span from the Anglo-Saxon and Medieval Periods through the Restoration and the Enlightenment. In reading and responding to these selections, the student will gain an understanding of fiction and nonfiction genres including poetry, short stories, essays, and drama through examining their historical and cultural contexts, as well as specific literary elements. The student will also read Shakespeare's *Macbeth*, exploring elements of drama and common themes of the Renaissance. Writing instruction will focus on expository and creative writing, but also provides opportunities for the student to write personal responses to literature. Grammar instruction will focus on verbs and pronouns, as well as clauses and sentence structure.

Semester A Outline

1. The Anglo-Saxon Period: 449–1066

1. The Anglo-Saxon Period: 449–1066: Unit Introduction
 - Preview the structure of the English 12 course
 - Read, analyze, and interpret selections from the Anglo-Saxon period
 - Compare and contrast elements of Anglo-Saxon literature
 - Analyze a descriptive writing model
 - Review the eight parts of speech
2. Epic Poetry: *Beowulf*
 - Read, analyze, and interpret elements of epic poetry
 - Compare and contrast elements of character
 - Define suffixes to interpret word meanings
 - Apply prewriting strategies to develop descriptive writing
 - Identify intransitive and transitive verbs, verb phrases, and linking verbs
3. Epic Poetry: *Beowulf*

- Read, analyze, and interpret elements of the elegy, including poetic devices
 - Identify alliteration, rhythm, and repetition
 - Compare and contrast epic and elegy
 - Apply prewriting strategies to develop description
 - Identify adjectives and their function in a sentence
4. Epic Poetry: Beowulf
 - Define and analyze protagonist and antagonist in fictional writing
 - Define prefixes to interpret word meanings
 - Complete prewriting strategies and identify a scene for description
 - Identify adverbs and their function in a sentence
 5. Writing Workshop: Description (First Draft)
 - Draft a descriptive essay incorporating sensory details and figurative language
 - Identify prepositions and their functions in a sentence
 6. Lyric Poetry: The Exeter Book
 - Read, analyze, and interpret elegy, elegiac verse, and descriptive details
 - Identify mood and poet's attitude
 - Define denotation and connotation to interpret word meanings
 - Identify conjunctions and interjections and their function in a sentence
 7. Language Focus: Style and Voice
 - Choose vivid words in writing
 - Assess understanding of vocabulary and parts of speech
 8. The Anglo-Saxon Period: 449–1066: Unit Review
 - Review the historical, social, and cultural context of the Anglo-Saxon time period
 - Review characteristics of the epic and elegy
 - Review parts of speech and their functions in a sentence
 9. The Anglo-Saxon Period: 449–1066: Unit Test
 10. Writing Workshop: Description
 - Edit, proofread, and publish a description
2. **The Middle Ages: 1066–1485**
 1. The Middle Ages: Unit Introduction
 - Identify elements of medieval poetry, including narrative poems and epic tales
 - Identify causes and effects in the historical and cultural context of the Middle Ages
 - Review the sentence base
 2. The Canterbury Tales: The Prologue
 - Analyze elements of characterization
 - Identify cause-and-effect relationships
 - Interpret denotative and connotative word meanings
 - Identify subjects and predicates and their function within a sentence
 3. The Canterbury Tales: The Prologue
 - Analyze and interpret tone
 - Identify cause-and-effect relationships
 - Identify and correct sentence fragments
 4. The Canterbury Tales: The Prologue
 - Identify and analyze irony
 - Improve style and voice through figurative language
 - Recognize complements and their function in a sentence
 - Participate in an online discussion
 - Use figurative language to improve style and voice
 5. The Canterbury Tales: The Pardoner's Tale
 - Identify and understand characteristics of a frame story

- Analyze character
 - Identify and analyze sentence patterns
 - Determine the correct definition of a word with multiple meanings
6. The Canterbury Tales: The Wife of Bath's Tale
 - Identify and analyze narrator
 - Identify voice and perspective
 - Compare and contrast characters
 - Interpret word meanings through context clues
 - Create an outline for creative writing
 - Identify prepositional phrases, appositives, and appositive phrases
 7. Writing Workshop: Allegory (First Draft)
 - Draft a modern allegory containing literary devices and a moral message
 - Identify verbals and verbal phrases
 8. Medieval Romance: Sir Gawain and the Green Knight
 - Read and analyze romances
 - Identify and analyze poetic devices such as alliteration
 - Define suffixes to interpret word meanings
 - Recognize and correct misplaced and dangling modifiers and phrase fragments
 9. Writing/Language Focus: Style and Voice
 - Review vocabulary
 - Recognize elements of sentence structure
 10. The Middle Ages: 1066–1485: Unit Review
 - Review the historical, social, and cultural context of the Middle Ages
 - Review characteristics of the narrative poem
 - Review characteristic of medieval romance
 - Review the sentence base
 - Review phrases
 - Complete a timed writing assignment
 11. The Middle Ages: 1066–1485: Unit Test
 12. Writing Workshop: Allegory (Final Draft)
 - Edit, proofread, and publish an allegory

3. Macbeth

1. History and Heroes; Witches and Warriors
 - Explore how Shakespeare incorporated some historical characters and altered others and why
 - Discover James I's fascination with witches and regicide
 - Define tragedy, tragic hero, and tragic flaw
2. Act I, Scenes I–II
 - Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Examine how setting influences a scene's mood
 - Define paradox and its influence on theme and character
 - Examine the differences between direct and indirect characterization
3. Act I, Scenes III–V
 - Read and analyze the text thoughtfully
 - Define new vocabulary and use in illustrative sentences
 - Make predictions
 - Define the three types of irony
 - Identify examples of dramatic irony
 - Define, distinguish, and identify soliloquies and asides
4. Act I, Scenes VI–VII

- Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Examine how analogies are used to persuade
 - Re-examine the elements of the tragic hero as it applies to all of Act I
 - Define exposition and inciting incident and apply to Act I
5. Act II, Scenes I–II
- Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Define and identify imagery
 - Define foreshadowing and make connections to clues in Act I
6. Act II, Scenes III–IV
- Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Define and identify comic relief
 - Define a pun and explore its use in the porter’s speech
 - Explore the notion of the Great Chain of Being and its application to these two scenes
 - Select a topic and develop a rough draft of a persuasive essay on the play
7. Act III, Scenes I–III
- Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Make predictions
 - Assess the dramatic structure, determining which past events constitute the rising action
 - Analyze sleep as an extended metaphor
8. Act III, Scenes IV–VI
- Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Make predictions
 - Assess the dramatic structure and identify the play’s climax
 - Review the device of indirect characterization and apply it to Lady Macbeth in the banquet scene
 - Analyze the role of conflict—both internal and external—to drive the play’s action
9. Act IV, Scenes I–III
- Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Make predictions about the witches’ prophecies
 - Define and identify rhyming couplets and create your own
 - Define blank verse, and explore the reasons Shakespeare used it so frequently
 - Define and identify alliteration
10. Act V, Scenes I–VIII
- Read and analyze the text thoroughly
 - Define new vocabulary and use in illustrative sentences
 - Examine the remaining dramatic structure and identify the falling action and resolution
 - Define and apply connotation to the “tomorrow and tomorrow and tomorrow” soliloquy
 - Re-examine dramatic irony in light of the fulfillment of the prophecies
11. The Art of Persuasion
- Revise and edit the final draft of a persuasive essay
 - Proofread a final draft
 - Maintain parallelism and agreement
 - Complete an evaluation checklist for revising
 - Review a rubric and provide self-assessment

4. The Renaissance: 1485–1660

1. The Renaissance: 1485–1660: Unit Introduction
 - Read and analyze selections from the Renaissance period
 - Identify elements of lyric and pastoral poetry as well as the sonnet form in Renaissance literature
 - Make generalizations about the historical, social, and literary context of the Renaissance
 - Review clauses
2. Sonnets: Wyatt and Spenser
 - Analyze sonnets
 - Identify Petrarchan conceits
 - Research etymology
 - Recognize independent and subordinate clauses
3. Pastoral Poetry: Marlowe and Raleigh
 - Analyze elements of lyric poetry and pastorals
 - Recognize adverbial clauses
4. Sonnets: Shakespeare
 - Analyze Shakespearean sonnets
 - Identify and analyze simile and metaphor
 - Use a thesaurus
 - Recognize adjectival clauses
 - Recognize noun clauses
5. Expository Writing: Selecting/Researching a Topic
 - Choose and limit a subject for an expository essay based on a topic from the Renaissance
 - Gather information to support ideas in the essay, using online resources
 - Develop a working thesis statement
 - Create an outline to organize details for an expository essay
6. Writing Workshop: Expository Writing (First Draft)
 - Draft an expository essay incorporating a strong thesis statement and coherent ideas
 - Apply appropriate transitions to writing
7. Metaphysical Poetry: Donne
 - Understand and analyze metaphysical poetry
 - Identify paradoxes
 - Use synonyms
 - Paraphrase poetry
 - Understand sentence structure
8. Epigrams and Songs: Jonson
 - Identify characteristics of an epigram
 - Identify and analyze tone
 - Make inferences about author
 - Identify clause fragments
9. John Milton: Paradise Lost
 - Identify and analyze elements of the epic
 - Identify and analyze allusion
 - Define archaic language to interpret word meaning
 - Identify run-on sentences
10. Writing/Language Focus: Style and Voice
 - Identify and correct rambling sentences
 - Avoid wordiness in writing
11. The Renaissance: 1485–1660: Unit Review
 - Review the historical, social, and cultural context of the Renaissance

- Review characteristics of poetic forms
 - Review figures of speech
 - Review clauses
12. The Renaissance: 1485–1660: Unit Test
13. Writing Workshop: Expository Writing (Final Draft)
- Edit, proofread, and publish an expository essay
 - Review clauses
5. **Writing a Research Paper**
1. Writing a Research Paper
 - Comprehend the basic elements of a research paper
 - Generate a topic for a research paper
 - Conduct preliminary research to identify potential areas of focus
 - Review capitalization of first words and the pronoun I
 2. Gathering Information
 - Learn strategies to select and evaluate print and online resources
 - Create an outline for a multimedia presentation
 - Review capitalization of nouns
 3. Taking Notes
 - Practice effective note-taking strategies
 - Understand the use of note cards
 - Review capitalization of nouns
 4. Organizing a Paper
 - Synthesize ideas and details from multiple informational texts
 - Draft a working thesis statement
 - Create an outline for a research paper
 - Review capitalization of nouns
 5. Drafting the Introduction and Refining the Thesis
 - Draft the research paper
 - Create a coherent draft
 - Cite sources
 - Review capitalization of proper adjectives
 6. Drafting the Body and Conclusion
 - Strengthen the body paragraphs
 - Compose an effective conclusion
 7. Revising for Clarity, Coherence, and Unity
 - Revise draft for clarity, coherence, and unity
 - Understand and implement comments and feedback
 - Review capitalization of titles
 8. Revising at the Sentence Level
 - Revise draft at the sentence level
 - Understand and implement comments and feedback
 9. Citations and Works Cited Page
 - Cite sources correctly
 - Compile a works cited page
 10. Editing, Proofreading, and Publishing
 - Edit, publish, and reflect on the final draft of a research paper
6. **Semester Exam**
1. Semester Review
 - Review major works of English literature from the Anglo-Saxon period through the eighteenth century

- Review effective comprehension strategies for reading these selections
 - Review literary elements
 - Review elements of grammar, usage, and style
2. Semester Exam

Semester B Summary:

This is the second of two courses that comprise English 12B Honors. In this course, students will continue to study English Literature of various genres, from the Romantic Period to the Modern Era. Through reading and responding to these selections, the student will gain further understanding of fiction and nonfiction including short stories, essays, and poetry. Students will have the opportunity to analyze the literature and its elements, as well as participate in discussions with their peers. Writing instruction will focus on the writing of a research paper and a poem based on characteristics of the Romantic Era. Grammar instruction will focus on pronouns and their antecedents.

Semester B Outline

1. The Restoration and the Enlightenment: 1660–1798

1. Unit Introduction
 - Read and analyze selections from the Restoration and the Enlightenment period
 - Preview the historical, social, and cultural context of the Restoration and the Enlightenment
 - Review verbs and their function in a sentence
2. Diaries: Pepys
 - Read, analyze, and interpret a primary source document
 - Identify defining characteristics of a diary
 - Identify the principal parts of verbs
3. Satire in Poetry: Pope
 - Read, analyze, and interpret mock epics
 - Identify and analyze elements of parody and heroic couplet
 - Identify verb tenses using the principal parts of verbs
4. The Satirical Essay: Swift
 - Identify and analyze irony and satire
 - Identify and analyze roots
 - Distinguish the progressive verb tense from the emphatic verb tense
5. Elegy: Gray
 - Read, analyze, and interpret elements of the elegy
 - Identify the indicative, imperative, and subjunctive moods of verbs
6. Writing Workshop
 - Organize details for writing a poem
 - Draft a poem using a specific form
 - Distinguish active voice from passive voice
7. The Restoration and Enlightenment: Unit Review
 - Review the historical, social, and cultural context of the Restoration and the Enlightenment

- Review characteristics of diary, mock epic, satirical essay, and elegy
 - Review verbs
8. The Restoration and Enlightenment: Unit Test
 9. Writing Workshop: Creative Writing
 - Revise, proofread, and publish a creative writing assessment
 - Review verbs
2. **The Romantic Period: 1798–1832**
1. Unit Introduction
 - Define the historical and cultural context of Romanticism
 - Identify elements of Romantic poetry
 - Review pronouns in the nominative case
 2. Dialect: Robert Burns
 - Read, analyze, and interpret Romantic poetry
 - Define prefixes to interpret word meanings
 - Review pronouns in the objective case
 3. Romantic Poetry: Blake
 - Read, analyze, and interpret Romantic poetry
 - Analyze poetic devices, including symbolism
 - Interpret word meanings using Greek etymology
 - Review pronouns in the possessive case
 4. Lyric Poetry: Wordsworth
 - Read, analyze, and interpret elements of lyric poetry and sonnets
 - Draw conclusions about the Romantic Period
 - Determine the meaning of multiple-meaning words
 - Review relative pronouns
 5. Lyric Poetry: Coleridge
 - Identify and analyze sound devices in poetry
 - Analyze elements of narrative poetry
 - Interpret the connotative meaning of words
 - Review pronouns in comparison
 6. Byron
 - Read, analyze, and interpret elements of poetic structure
 - Define meter and generalize how it influences poetry
 - Review reflexive and intensive pronouns
 7. Shelley
 - Identify apostrophes, personification, and terza rima in poetry
 - Determine the meaning of archaic language using context clues
 - Interpret symbolism in Romantic poetry
 - Review pronouns and their antecedents
 8. Keats
 - Read, analyze, and interpret odes
 - Distinguish between simile and metaphor
 - Review pronouns and their antecedents
 9. Unit Review
 - Review dialectal poetry and forms of lyrical poetry such as odes
 - Review elements of poetry
 - Review figurative language
 - Review pronouns
 10. Unit Test
3. **Frankenstein**

1. Frankenstein
 - Recognize differences between popular depictions of Frankenstein's monster and the monster's portrayal in Mary Shelley's original novel
 - Learn about the author's inspiration for writing the novel
 - Understand a variety of scientific discoveries and experiments having to do with creation
 - Read and analyze the text, then respond to questions
2. Frankenstein
 - Draw connections between self and text
 - Develop and apply effective comprehension strategies
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Describe the Romantic Era
3. Frankenstein
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Understand relationships between the novel Frankenstein and Greek mythology
4. Frankenstein
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Review literary elements, including setting and point of view, and analyze their role in the novel Frankenstein
5. Frankenstein
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Understand the relationship between the novel Frankenstein and the epic poem Paradise Lost
6. Frankenstein
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Review the four types of conflict and identify conflicts in the novel Frankenstein
7. Frankenstein
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Analyze techniques by which the author creates suspense in the novel, such as foreshadowing
8. Frankenstein
 - Read and analyze the text, then respond to questions
 - Define new vocabulary and identify words in context
 - Analyze the effect of the setting in the final chapters of the novel
9. Unit Review
 - Study vocabulary and review previous lesson goals
10. Unit Test
4. **The Victorian Age (1832–1901)**
 1. Unit Introduction
 - Read and interpret selections from the Victorian period
 - Evaluate the historical and cultural context of the Victorian age
 2. Tennyson
 - Read, analyze, and interpret the poetry of Tennyson
 - Identify and analyze mood
 - Review agreement of subjects and verbs
 3. Robert and Elizabeth Barrett Browning
 - Identify and analyze elements of dramatic monologue

- Analyze a sonnet
 - Identify an unreliable narrator
 - Review common agreement problems
4. Hopkins
 - Identify instances of sprung rhythm
 - Analyze poetry
 - Review agreement problems
 5. Arnold
 - Identify and analyze theme
 - Identify and analyze tone
 - Review the use of doesn't and don't
 - Participate in a group discussion
 6. Hardy
 - Identify and analyze imagery and irony
 - Review the use of who, which, and that
 7. Unit Review
 - Review poetic elements and devices in Victorian literature
 - Review the agreement of subjects and verbs
 8. Unit Test
5. **The Modern Era (1901–Present)**
 1. Unit Introduction: A New Era
 - Identify elements of poetry, short stories, and essays in modern literature
 - Evaluate the historical and cultural context of the modern era of British literature
 2. William Butler Yeats
 - Identify and analyze symbols and imagery
 - Define suffixes to interpret word meanings
 - Review commas and their function in a sentence
 3. James Joyce
 - Identify and analyze epiphany and setting
 - Define suffixes to interpret word meanings
 - Use commas after introductory elements correctly
 4. Virginia Woolf
 - Analyze an essay
 - Identify and comprehend allusion
 - Define synonyms to interpret word meanings
 - Review commas that enclose
 5. T. S. Eliot
 - Identify and interpret free verse and mood
 - Define antonyms to interpret word meanings
 - Review apostrophes
 6. Writing Workshop: Literary Analysis Rough Draft
 - Draft a literary analysis incorporating direct quotations
 - Improve stylistic and rhetorical techniques in writing
 - Implement feedback
 - Review use of apostrophes
 7. Dylan Thomas
 - Identify and interpret half rhyme and internal rhyme
 - Identify characteristics of a villanelle
 - Define suffixes to interpret word meanings
 - Review semicolons

8. Graham Greene
 - Identify and interpret humor and pathos
 - Evaluate aspects of Modernism
 - Review plurals
 - Review colons
9. Owen, Brooke, and Sassoon
 - Identify and analyze tone
 - Identify repetition and parallelism
 - Review italics
10. George Orwell
 - Analyze elements of a reflective essay
 - Identify and analyze irony and understatement
 - Define denotation and connotation to interpret word meanings
 - Review quotation marks
11. Stevie Smith
 - Analyze voice and diction in poetry
 - Review ellipses
12. Doris Lessing
 - Analyze setting and character development
 - Identify instances of kinesthetic imagery
 - Identify adverbs
 - Review hyphens
13. Anita Desai
 - Analyze character motivation
 - Identify and analyze irony
 - Review dashes, parentheses, and brackets
14. Writing/Language Focus: Unity and Coherence
 - Revise literary analysis for coherence, unity, and emphasis
 - Use parallelism to strengthen meaning
15. The Modern Era (1901–Present) Unit Review
 - Review elements of modern poetry, essays, and short stories
16. The Modern Era (1901–Present) Unit Test
17. Writing Workshop: Literary Analysis Final Draft
 - Edit, proofread, and publish a literary analysis
 - Edit for sentence fragments in formal writing
6. **English 12 Semester Review and Exam**
 1. Semester Review
 - Prepare for semester exam
 - Assess understanding of literature, vocabulary, grammar, and writing in Semester B
 2. Semester Exam

English 12 Prescriptive

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Parts of Speech

Lesson	Description	Time (min)	Objective(s)
 Parts of Speech	This lesson contains an overview video and an interactive guide to themes and topics about the parts of speech.		
 Nouns and Pronouns	This lesson identifies and describes the various types of nouns and pronouns. It also examines how these word parts are used in sentences.	45	<ul style="list-style-type: none">• Identify and distinguish among various types of nouns and examine how they are used in sentences• Identify and distinguish among various types of pronouns and examine how they are used in sentences
 Quiz: Nouns and Pronouns			
 Verbs	This lesson identifies different kinds of verbs and explores how verb phrases are used in sentences.	45	<ul style="list-style-type: none">• Identify action and linking verbs• Identify transitive and intransitive verbs• Use verb phrases in a sentence
 Quiz: Verbs			

Lesson	Description	Time (min)	Objective(s)
 Adjectives and Adverbs	This lesson identifies adjectives and adverbs, and it shows students how to use them in sentences.	45	<ul style="list-style-type: none"> • Identify and use adjectives in sentences • Identify and use adverbs in sentences
 Quiz: Adjectives and Adverbs			
 Prepositions, Conjunctions, and Interjections	This lesson explains how to use prepositions, prepositional phrases, conjunctions, and interjections.	45	<ul style="list-style-type: none"> • Identify and distinguish among prepositional phrases • Identify and use conjunctions and interjections
 Quiz: Prepositions, Conjunctions, and Interjections			
★ Posttest 1			

Module 2: Sentence Parts, Phrases, and Clauses

Lesson	Description	Time (min)	Objective(s)
 Sentence Parts, Phrases, and Clauses	This lesson contains an overview video and an interactive guide to themes and topics about sentence parts, phrases, and clauses.		
 Subjects and Predicates	This lesson identifies complete and simple subjects and predicates. It also explains how to correct sentence fragments.	45	<ul style="list-style-type: none"> • Recognize complete and simple subjects and predicates • Correct sentence fragments
 Quiz: Subjects and Predicates			

Lesson	Description	Time (min)	Objective(s)
 Complements	This lesson describes how to identify and use direct objects, indirect objects, objective complements, and subject complements.	45	<ul style="list-style-type: none"> • Identify and use direct objects • Identify indirect objects • Identify objective and subject complements
 Quiz: Complements			
 Appositive Phrases	This lesson examines how to identify and use adjective and adverb prepositional phrases. It also demonstrates how to recognize and use appositives and appositive phrases.	45	<ul style="list-style-type: none"> • Recognize and use adjective and adverb prepositional phrases • Recognize and use appositives and appositive phrases
 Quiz: Appositive Phrases			
 Verbals and Verbal Phrases	This lesson discusses how to recognize and use participles and participial phrases. It also examines how to identify gerunds and infinitives, and it explores their use in phrases.	45	<ul style="list-style-type: none"> • Recognize and use participles and participial phrases • Identify gerunds and gerund phrases • Identify infinitives and infinitive phrases
 Quiz: Verbals and Verbal Phrases			
 Clauses	This lesson discusses adjective, adverb, and noun clauses.	45	<ul style="list-style-type: none"> • Identify adjective clauses • Identify adverb clauses • Identify noun clauses
 Quiz: Clauses			
 Posttest 2			

Module 3: Effective Sentences

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 Effective Sentences	This lesson contains an overview video and an interactive guide to themes and topics about effective sentences.		
 Sentence Combining and Sentence Variety	This lesson explains how to revise written passages by combining clauses and phrases. It also discusses how to improve passages by varying sentence length, beginnings, and word order.	45	<ul style="list-style-type: none"> • Revise written passages by combining clauses and phrases • Revise written passages by varying sentence length, beginnings, and word order
 Quiz: Sentence Combining and Sentence Variety			
 Fragments, Run-ons, and Modifiers	This lesson describes how to recognize and correct sentence fragments, run-on sentences, misplaced modifiers, and dangling modifiers.	45	<ul style="list-style-type: none"> • Recognize and correct sentence fragments • Recognize and correct run-on sentences • Identify and correct misplaced or dangling modifiers
 Quiz: Fragments, Run-ons, and Modifiers			
 Faulty Parallelism and Coordination	This lesson explains how to identify and correct faulty parallelism and coordination.	45	<ul style="list-style-type: none"> • Identify and correct faulty parallel structures • Identify and correct faulty coordination
 Quiz: Faulty Parallelism and Coordination			
★ Posttest 3			

Module 4: Usage

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 Usage	This lesson contains an overview video and an interactive guide to themes and topics about usage.		
 Verb Tenses	This lesson focuses on the identification and use of regular and irregular verbs, including the correct use of the four principal parts of verbs. The lesson also covers verb conjugation and the proper sequencing of tenses.	45	<ul style="list-style-type: none"> • Identify the six verb tenses • Identify and use the four principal parts of verbs, regular and irregular verbs, and verb conjugation • Identify and use the past, present, and future tenses • Use sequence of tenses correctly
 Quiz: Verb Tenses

It also critiques the use of literary elements and discusses the historical context from this act.	45	<ul style="list-style-type: none"> • Identify the main idea in Act V of The Tragedy of Macbeth by William Shakespeare • Critique the use of literary elements in selections from Act V of The Tragedy of Macbeth by William Shakespeare • Discuss the historical context in selections from Act V of The Tragedy of Macbeth by William Shakespeare
 Quiz: Elizabethan Drama			

Lesson	Description	Time (min)	Objective(s)
★ Posttest 5			

Module 6: Civil War and Revolutions

Lesson	Description	Time (min)	Objective(s)
 Civil War and Revolutions	This lesson contains an overview video comprised of essential questions about British literature. It also offers an interactive guide to background information about the Seventeenth and Eighteenth Centuries (1625–1798).		
 A Nation Divided I	This lesson instructs students to recognize the main idea in two sonnets by John Milton. Using these same sonnets, the lesson also analyzes the form and content of the Italian sonnet.	45	<ul style="list-style-type: none"> • Recognize the main idea in two sonnets by John Milton • Analyze the form and content of the Italian sonnet as used by John Milton
 Quiz: A Nation Divided I			
 A Nation Divided II	This lesson instructs students to identify the main idea and explain the use of epic elements in selections from Paradise Lost by John Milton.	45	<ul style="list-style-type: none"> • Identify the main idea in Paradise Lost by John Milton • Explain the use of epic elements found in selections from Paradise Lost by John Milton
 Quiz: A Nation Divided II			
 The Ties That Bind I	This lesson instructs students to identify the main idea and examine the use of literary devices in a selection from Gulliver's Travels by Jonathan Swift.	45	<ul style="list-style-type: none"> • Identify the main idea in a selection from Gulliver's Travels by Jonathan Swift • Examine the use of literary devices in satire

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: The Ties That Bind I			
📁 The Ties That Bind II	This lesson instructs students to identify the main idea in Thomas Gray's "Elegy Written in a Country Churchyard" and Anne Finch's "A Nocturnal Reverie." It also analyzes characteristics of pre-Romantic poetry and the use of paraphrase.	45	<ul style="list-style-type: none"> • Identify the main idea from Thomas Gray's "Elegy Written in a Country Churchyard" • Identify the main idea from Anne Finch's "A Nocturnal Reverie" • Analyze the characteristics of pre-Romantic poetry • Use the technique of paraphrasing to determine the central message of pre-Romantic poetry
🔍 Quiz: The Ties That Bind II			
★ Posttest 6			

Module 7: Romanticism

Lesson	Description	Time (min)	Objective(s)
📁 Romanticism	This lesson contains an overview video comprised of essential questions about British literature. It also offers an interactive guide to background information about the Romantic Period (1798–1832).		
📁 Fantasy and Reality I	This lesson instructs students to identify the main idea in selections of poetry by Robert Burns and Joanna Baillie. It also discusses the use of dialect in these selections.	45	<ul style="list-style-type: none"> • Identify the main idea in a selection of poetry by Robert Burns • Identify the main idea in "Woo'd and Married and A" by Joanna Baillie • Recognize the purposes for the use of dialect in poetry selections

Lesson	Description	Time (min)	Objective(s)
 Quiz: Fantasy and Reality I			
 Fantasy and Reality II	This lesson instructs students to identify the main idea and examine archetypes in selections of poetry by William Blake.	45	<ul style="list-style-type: none"> • Identify the main idea in selections of poetry by William Blake • Examine the use of archetypes in selections of poetry by William Blake
 Quiz: Fantasy and Reality II			
 Fantasy and Reality III	This lesson instructs students to identify the main idea found in an introduction to Mary Shelley's <i>Frankenstein</i> . It also discusses characteristics of Gothic literature that are part of the Romantic movement.	45	<ul style="list-style-type: none"> • Identify the main idea in the introduction to Mary Shelley's <i>Frankenstein</i> • Discuss characteristics of Gothic literature that are part of the Romantic movement
 Quiz: Fantasy and Reality III			
 Lyric Poetry I	This lesson instructs students to identify the main idea in selections of poetry by Samuel Taylor Coleridge. It also discusses the use of alliteration, consonance, assonance, and internal rhyme in these selections of narrative poetry.	45	<ul style="list-style-type: none"> • Identify the main idea in "The Rime of the Ancient Mariner" by Samuel Taylor Coleridge • Identify the main idea in "Kubla Khan" by Samuel Taylor Coleridge • Explain the use of alliteration and consonance in narrative poetry • Explain the use of assonance and internal rhyme in narrative poetry
 Quiz: Lyric Poetry I			

Lesson	Description	Time (min)	Objective(s)
 Lyric Poetry II	This lesson instructs students to identify the main idea in selections of odes written by John Keats. It also examines the form and content of these poetry selections.	45	<ul style="list-style-type: none"> • Recognize the main idea in "Ode to a Nightingale" by John Keats • Identify the main idea in "Ode on a Grecian Urn" by John Keats • Examine the form and content of odes written by John Keats
 Quiz: Lyric Poetry II			
 Reactions to Society's Ills	This lesson instructs students to identify the main idea and examine persuasive techniques in pieces of social commentary by Jane Austen and Mary Wollstonecraft.	45	<ul style="list-style-type: none"> • Identify the main idea in Jane Austen's "On Making an Agreeable Marriage" • Identify the main idea in Mary Wollstonecraft's A Vindication of the Rights of Women • Examine the use of persuasive techniques in social commentary
 Quiz: Reactions to Society's Ills			
 Posttest 7			

Module 8: Victorian Literature

Lesson	Description	Time (min)	Objective(s)
 Victorian Literature	This lesson contains an overview video comprised of essential questions about British literature. It also offers an interactive guide to background information about the Victorian Period (1833–1901).		

Lesson	Description	Time (min)	Objective(s)
 Relationships I	This lesson instructs students to identify the main idea, understand the use of speakers, and analyze philosophical assumptions in selections of poetry by Alfred, Lord Tennyson.	45	<ul style="list-style-type: none"> • Recognize the main idea in In Memoriam, A. H. H. by Alfred, Lord Tennyson • Identify the main idea in "The Lady of Shalott" by Alfred, Lord Tennyson • Understand the use of the speaker in selections of Victorian poetry • Analyze philosophical assumptions and beliefs in selections of Victorian poetry
 Quiz: Relationships I			
 Relationships II	This lesson instructs students to identify the main idea and examine dramatic monologue in selections of poetry by Robert Browning. It also compares and contrasts speakers in these selections.	45	<ul style="list-style-type: none"> • Identify the main idea in "My Last Duchess" by Robert Browning • Identify the main idea in "Life in a Love" by Robert Browning • Examine dramatic monologue in selections from "My Last Duchess" by Robert Browning • Compare and contrast speakers in two selections of poetry by Robert Browning
 Quiz: Relationships II			
 The Novel I	This lesson instructs students to identify the main idea and author's purpose in a selection from Hard Times by Charles Dickens. It also examines the ethical and social influences found in this selection.	45	<ul style="list-style-type: none"> • Identify the main idea in Hard Times by Charles Dickens • Examine the ethical and social influences in a selection from Hard Times by Charles Dickens • Analyze the author's purpose in a selection from Hard Times by Charles Dickens
 Quiz: The Novel I			

Lesson	Description	Time (min)	Objective(s)
 The Novel II	This lesson instructs students to identify the main idea and analyze the author's assumptions in a selection from <i>Jane Eyre</i> by Charlotte Brontë.	45	
 Quiz: The Novel II			
 The Empire and Its Discontents	This lesson instructs students to identify the main idea, examine the use of mood, and understand links to historical connections in poetry by Matthew Arnold and Rudyard Kipling.	45	<ul style="list-style-type: none"> • Identify the main idea in "Dover Beach" by Matthew Arnold • Recognize the main idea in "Recessional" by Rudyard Kipling • Examine the use of mood in selections of Victorian poetry • Make connections to historical periods in selections of Victorian poetry
 Quiz: The Empire and Its Discontents			
 Gloom and Glory	This lesson instructs students to identify the main ideas, analyze stanza structure, and examine the use of irony in poetry selections by Emily Brontë and Thomas Hardy.	45	<ul style="list-style-type: none"> • Identify the main idea in Emily Brontë's "Remembrance" • Identify the main idea in two poetry selections from Thomas Hardy • Analyze the impact that stanza structure has on the meaning in a selection of poetry • Examine the use of irony in selections of poetry
 Quiz: Gloom and Glory			
 Posttest 8			

Module 9: Modernism

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

Lesson	Description	Time (min)	Objective(s)
 Modernism	<p>This lesson contains an overview video comprised of essential questions about British literature. It also offers an interactive guide to background information about the Modern and Postmodern Periods (1901&#8211;Present).</p>		
 Forging Modernism	<p>This lesson instructs students to identify the main idea, the use of symbolism, and philosophical assumptions in selections of poetry by William Butler Yeats.</p>	45	<ul style="list-style-type: none"> • Identify the main idea in a selection of poetry by William Butler Yeats • Explain the use of symbolism in selections of poetry by William Butler Yeats • Understand philosophical assumptions in selections of poetry by William Butler Yeats
 Quiz: Forging Modernism			
 Modernism in Fiction	<p>This lesson instructs students to identify the main idea, examine the use of plot devices, and understand the cause-and-effect relationships found in selections from "The Lagoon" by Joseph Conrad.</p>	45	<ul style="list-style-type: none"> • Identify the main idea in "The Lagoon" by Joseph Conrad • Examine the use of plot devices in selections from "The Lagoon" by Joseph Conrad • Understand cause-and-effect relationships found in selections from "The Lagoon" by Joseph Conrad
 Quiz: Modernism in Fiction			

Lesson	Description	Time (min)	Objective(s)
 Conflicts at Home and Abroad	This lesson instructs students to identify the main idea in George Orwell's "Shooting an Elephant" and Doris Lessing's "No Witchcraft for Sale." It also asks students to evaluate cultural conflict and the use of irony in these selections.	45	<ul style="list-style-type: none"> • Recognize the main idea in George Orwell's "Shooting an Elephant" • Identify the main idea in Doris Lessing's "No Witchcraft for Sale" • Evaluate cultural conflict in selections from contemporary literature • Examine the use of irony in selections from contemporary literature

 Review Test			

Journalism

Journalism

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

This is the first of two courses that comprise Journalism. In this course, the student will have the opportunity to experience what it is like to work on an online news publication. In addition, he will learn about issues in journalism from early print editions to today's multi-media formats. In addition, lessons in "Introduction to Journalism" in the first semester and "Issues in Journalism" in the second semester will satisfy the objectives of a traditional high school journalism class.

SEMESTER B

This is the second of two courses that comprise Journalism. In this course, the student will have the opportunity to experience what it is like to work on an online news publication. In addition, he will learn about issues in journalism from early print editions to today's multi-media formats. In addition, lessons in "Introduction to Journalism" in the first semester and "Issues in Journalism" in the second semester will satisfy the objectives of a traditional high school journalism class.

Course Outline:

SEMESTER A

1. The Guidelines of Good Journalism

1. Using Guidelines and the Writing Process
 - Identify and explain the five steps of the news writing process
 - Write a time management plan for meeting deadlines
 - Identify passive verbs in sentences
 - Recommend revisions of those sentences using active verbs
 - Predict which guidelines will be the most challenging
2. Using Quotations
 - Learn how to paraphrase and summarize
 - Learn to attribute quotations accurately
 - Comprehend the seriousness of plagiarizing

3. Validating Sources and Copyrights

- Learn the most common reasons for litigation against reporters and publishers
- Evaluate the credibility of the web sites when reporting
- Understand the importance of documenting sources

2. Learning the Process

1. Brainstorming for Ideas and Sources

- Read four Internet articles providing story ideas and sources
- Compile a list of 10 story ideas that would be interesting to a teen audience
- For one of these ideas, brainstorm and create three sources

2. Observations, Interviews, and Surveys

- Make a list of interesting polls from the past and present
- Take an interactive quiz on public opinion and comment on the results
- Read about the design of surveys
- Set up your own survey using the first three of four required steps
- Identify observation skills for good journalism
- Read three Internet advice articles about interviewing and set up interview questions

3. Creating Innovative Beginnings

- Learn about different types of leads
- "Discover" leads of your own in online publications
- Classify those leads by type

3. News Writing

1. Evaluating the Criteria

- Examine the criteria for news writing
- Select a news story from an online publication
- Use the criteria to evaluate the story

2. Brainstorming Topics

- Brainstorm for story ideas and sources
- Select two story ideas
- Identify the story angle

3. Gathering/Organizing Notes

- Identify the sources for each of the previously selected story ideas
- Research your sources
- Organize notes and sources
- Record notes and sources

4. Writing the First Draft(s)

- Review the strategies and purposes for writing different types of leads
- Compose a lead for each of your stories
- Compose first drafts for each story using the inverted pyramid style

5. Practice in Copyediting

- Review language and style rules
- Sharpen understanding of pronoun agreement
- Complete remedial practice drills

6. News Writing: Rewriting the Final Draft

There are no objectives for this lesson.

4. Feature Writing

1. Evaluating the Criteria
 - Examine the criteria for feature writing
 - Select a feature story from an online publication
 - Use the criteria to evaluate the story
2. Brainstorming Topics
 - Brainstorm for story ideas and sources
 - Select two story ideas
 - Identify the story angle and sources for each
3. Gathering/Organizing Notes
 - Research your sources
 - Organize notes and sources
 - Record notes and sources
4. Writing the First Draft(s)
 - Review the strategies and purposes for writing different types of leads
 - Compose a lead for each of your stories
 - Compose first drafts for each story
 - Edit the first drafts for errors
5. Practice in Copyediting
 - Review language and style rules
 - Complete the enrichment activity
6. Feature Writing: Rewriting the Final Draft
 - Review feedback from instructors and editors
 - Prepare final rewrites of your two stories for publishing
 - Observe rules of copyediting and criteria of the feature story

5. Sports Writing

1. Evaluating the Criteria
 - Examine the criteria for sports writing
 - Select a sports story from an online publication
 - Use the criteria to evaluate the story for sports news or sports features
2. Brainstorming Topics
 - Brainstorm for story ideas and sources
 - Select two story ideas
 - Identify the story angle and sources for each
3. Gathering/Organizing Notes
 - Research your sources
 - Organize notes and sources
 - Record notes and sources
4. Writing the First Draft(s)
 - Review the strategies and purposes for writing different types of leads
 - Compose a lead for each of your stories
 - Compose first drafts for each story using the inverted pyramid style
5. Practice in Copyediting
 - Review language and style rules
 - Sharpen understanding of pronoun agreement
 - Complete remedial practice drills

6. Sports Writing: Rewriting the Final Draft
There are no objectives for this lesson.

6. Journalism A Review and Final Exam

1. Journalism A Final Review
 - Organize your notes in the order of the course outline and highlight the main ideas and concepts from each unit
 - Reread your notes and review important facts and concepts from each lesson
 - Revisit prior lessons (or Web sites that increased your comprehension of the material) as needed.
 - Be able to apply grammar rules
 - Identify vocabulary/keyword definitions
 - Review terms, rules of newspaper writing, and portfolio assignments you were assigned this semester.
2. Journalism A Final Exam
There are no objectives for this lesson.

SEMESTER B

1. Evolution in Journalism

1. Yellow Journalism
 - Understand the evolution of competitive journalism
 - Analyze the motives of William Randolph Hearst
 - Explain how yellow journalism shaped the Spanish-American War
2. Pulitzer Prize
 - Compare and contrast the methods of William Randolph Hearst and Joseph Pulitzer
 - Analyze the motives of Joseph Pulitzer
 - Identify the ways Joseph Pulitzer impacted journalism
3. Power of the Media
 - Define media
 - Identify ways media changed in the 20th Century
 - Explain how television affected the habits and opinions of the American family
 - Learn how new forms of media have changed journalism
 - Analyze how the Internet has impacted the power of media

2. Journalism in the World Today

1. Media and War
 - Compare and contrast effects of wartime press coverage
 - Evaluate whether particular wartime press coverage was positive or negative
2. Media and Politics
 - Complete a module organizer
 - Compare and contrast effects of political press coverage
 - Analyze whether press coverage was positive or negative
3. Freedom of the Press
 - Examine the right to freedom of the press ensured by the U.S. Constitution
 - Compare American press freedom to that of journalists in other countries
 - Compare and contrast the lack of human rights with the lack of freedom of the press in certain countries

- Complete a module organizer
- Write a short summary analyzing the absence of a free press on the human rights of citizens

3. Review Writing

1. Evaluating the Criteria
 - Examine the criteria for review writing
 - Select a review from an online publication
 - Evaluate the review using the criteria
2. Brainstorming Topics
 - Brainstorm for story ideas and sources
 - Narrow choices and select two story ideas
 - Identify the story angle, plus three primary and two secondary sources for each
 - Research sources
 - Organize notes and sources
 - Record notes and sources
3. Gathering/Organizing Notes

There are no objectives for this lesson.
4. Writing the First Draft(s)
 - Review the strategies and purposes for writing different types of leads
 - Compose the lead for each story
 - Write the first draft of a story using inverted pyramid technique
 - Revise the first draft for errors
5. Copyediting
 - Review language and style rules
 - Consider language and style concerns
 - Assess the relevance of rules of grammar and style
6. Review Writing: Rewriting the Final Draft
 - Analyze feedback from instructors and editors
 - Observe rules of copyediting
 - Develop final rewrites of two stories for publishing

4. Opinion Writing (Op-eds)

1. Evaluating the Criteria
 - Learn Aristotle's three fundamentals of persuasive speech
 - Analyze the criteria for opinion writing
 - Select an op-ed from an online publication
 - Evaluate the op-ed using the criteria
2. Brainstorming Topics
 - Assess a story for ideas and sources
 - Select two story ideas
 - Identify the story angle
3. Gathering/Organizing Notes
 - Recognize three primary and two secondary sources for each
 - Research sources
 - Organize and record notes and sources

4. Writing First Draft(s)
 - Review the strategies and purposes for writing different types of leads
 - Develop the lead for your op-ed piece
 - Compose the first draft of your op-ed piece using the criteria you have learned
 - Revise the first draft for errors
5. Copyediting
 - Review language and style rules
 - Consider language and style concerns
 - Assess the relevance of rules of most often confused word choices
 - Remember rules of copyediting and criteria of opinion writing
6. Opinion Writing: Rewriting the Final Draft

There are no objectives for this lesson.

5. Copy and Design

1. The Role of the Editor
 - Consider the role of the editor
 - Complete your own personal list of objectives and responsibilities of an editor
 - Select three publications to evaluate
 - Assess good and bad examples for each of the criteria
2. Planning the Issue
 - Assess planning an issue
 - Formulate ideas for focus, angles, possible themes, sources, and images
3. Media Design and Images
 - Consider media design and images
 - Assess a variety of "layers" that add interest and readability to a text
 - Create an organizer for your writers' stories
 - Review a storytelling form
4. Copyediting
 - Assess standard copy-editing notations
 - Learn more editing tools
5. Providing Feedback
 - Assess more writing tools
 - Practice editing skills
6. Setting Up the Paper
 - Learn the criteria for headlines and captions

6. Journalism B Final Exam and Review

1. Journalism B Final Exam Review

There are no objectives for this lesson.
2. Journalism B Final Exam

There are no objectives for this lesson.

Cyber Charter School Application for Pennwood Cyber Charter School

Binder #2: Appendix A.2.b and A.2.c (Math & Science Course Guides)

Submission Date: October 3, 2022

**APPENDIX A
CURRICULUM**

A.2 COURSE GUIDES

b. MATHEMATICS

This document is part of Appendix A: Curriculum.

It includes course guides for each Mathematics class for students in Kindergarten through Grade 12.

- Math K
- Math 1
- Math 2
- Math 3
- Math 3 Accelerated
- Math 4
- Math 4 Accelerated
- Math 5
- Math 5 Accelerated
- Math 6
- Math 6 Accelerated
- Math 7
- Algebra
- Algebra Readiness (Pre-Algebra)
- Pre-Algebra
- Algebra 1 A
- Algebra 1 B
- Algebra 1 Honors
- Algebra 1 Prescriptive
- Algebra 2
- Algebra 2 Honors
- Geometry
- Geometry Honors
- Geometry Prescriptive
- Pre-Calculus
- Pre-Calculus Honors
- Calculus
- Consumer Math
- Explorations in Mathematics
- Statistics

Course guides provide detailed information on the curriculum including course descriptions, unit summaries, lesson objectives, activities, and assessment types. Course guides include information on:

- Planned instruction (provided in the unit summary of each unit within individual Course Guides)
- Course objectives (provided in the unit and lesson objectives within individual Course Guides)
- Activities (provided in the unit summary and lesson objectives of each unit within individual Course Guides)

Math K

Math K A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

In this first semester course, mathematical thinking and problem solving are introduced. Students explore topics and apply mathematical practices outlined in the Common Core State Standards and other state standards. The first few units focus on counting and sorting. Then, lessons introduce addition and subtraction. Throughout the course, students engage in hands on and online activities to master basic skills.

SEMESTER B

In this second semester course, students continue to engage in mathematical thinking and problem solving. Students explore topics and apply mathematical practices outlined in the Common Core State Standards and other state standards. Students have opportunities to describe, sort, and compare objects and explore basic shapes. Stories and activities teach students about money, time, fractions, and measurement. Throughout the course, students engage in hands on and online activities to master basic skills.

Course Outline:

SEMESTER A

1. Let's Learn Math!

1. Learning Coach: Support Your Student in Math

There are no objectives for this lesson.

2. Welcome to Math!

There are no objectives for this lesson.

2. One to Five

1. Counting 1, 2, and 3

- Use objects to represent and count the quantities 1, 2, and 3

2. Counting 1, 2, and 3 in Different Arrangements

- Identify whether a particular set includes 1, 2, or 3 objects, regardless of how the objects are arranged

3. Reading and Writing 1, 2, and 3

- Recognize and write the numerals that describe the quantities 1, 2, and 3

4. Mid-Unit Review

- Represent and count the quantities 1 to 3

- Identify the total number of objects in a set
 - Identify the total number of objects in a set regardless of arrangement
 - Recognize and write the numerals 1 to 3
5. Counting 4 and 5
 - Use objects to represent and count the quantities 4 and 5
 6. Counting 4 and 5 in Different Arrangements
 - Identify whether a particular set includes 4 or 5 objects
 7. Reading and Writing 4 and 5
 - Recognize and write numerals that describe the quantities 4 and 5
 8. Problem Solving: Use Objects
 - Solve problems by using objects
 9. Math Project – Social Studies
 - Observe surroundings to create a number book
 10. One to Five Unit Test

There are no objectives for this lesson.

3. Comparing and Ordering 0 to 5

1. More, Fewer, and Same As
 - Use one-to-one correspondence to compare objects and decide whether one group has more, fewer, or the same number as the other group
2. 1 and 2 More
 - Recognize and identify a group of objects that has 1 more or 2 more than another group
3. 1 and 2 Fewer
 - Recognize and identify a group of objects that has 1 fewer or 2 fewer from another group
4. The Number 0
 - Understand that zero means none
5. Reading and Writing 0
 - Recognize and write the numeral that describes the quantity of 0
6. As Many, More, and Fewer
 - Use one-to-one correspondence to compare two groups and determine whether one group has more, fewer, or as many as the other group
7. Mid-Unit Review
 - Recognize and compare groups of objects to identify which group has more, fewer, or the same number
 - Use zero to represent a set of objects when there are none
 - Recognize and write the numeral 0
 - Recognize and compare two groups of objects to determine if the number of objects is as many, more, or fewer
8. Ordering Numbers 0 to 5
 - Use objects to order numbers 0 to 5 in sequence

9. Ordinal Numbers Through Fifth

- Use words first through fifth to identify ordinal positions

10. Problem Solving: Use Objects

- Use objects to show the number in each group, order the number of objects in each group, and identify the group that has the most or fewer number objects

11. Comparing and Ordering 0 to 5 Unit Test

There are no objectives for this lesson.

4. Six to Ten

1. Counting 6 and 7

- Use objects to represent and count the quantities of 6 and 7

2. Reading and Writing 6 and 7

- Recognize and write the numerals that describe the quantities 6 and 7

3. Counting 8 and 9

4. Use objects to represent and count the quantities of 8 and 9

5. Reading and Writing 8 and 9

- Recognize and write numerals that describe the quantities 8 and 9

6. Mid-Unit Review

- Represent and count the quantities 1 to 9
- Identify the total number of objects in a set regardless of arrangement
- Recognize and write the numerals 6 to 9

7. Counting 10

- Use objects to represent and count the quantity 10

8. Reading and Writing 10

- Recognize and write the numeral that describes the quantity of 10

9. Problem Solving: Looking for a Pattern

- Solve problems by identifying growing patterns and predicting what comes next

10. Math Project – Social Studies

- Observe surroundings to create a number book

11. Six to Ten Unit Test

There are no objectives for this lesson.

5. Comparing and Ordering Numbers 0 to 10

1. Comparing Numbers through 10

- Compare two numbers using sets of objects and one-to-one correspondence to determine which number is greater and which is less

2. Comparing Numbers to 5

- Given a number from 0–5, tell if the number is greater or less than 5

3. Comparing Numbers to 10

- Given a number or set from 0–12, decide if the number is greater or less than 10

4. 1 More

- Use counting to identify a number that is 1 more than another number
5. 1 Fewer
 - Use counting to identify a number that is 1 fewer than another number
 6. Mid-Unit Review
 - Analyze two different sets of objects to determine which set is greater and which set is less
 - Apply 1 to 1 correspondence to determine quantity of a set of objects
 - Analyze a number 0 to 12 and identify if a number between 0 and 12 is greater or less than 5
 - Identify if a number between 0 and 12 is greater or less than 10
 - Identify numbers that are 1 more or 1 fewer than other numbers
 7. 2 More
 - Use counting to identify a number that is 2 more than another number
 8. 2 Fewer
 - Use counting to identify a number that is 2 fewer than another number
 9. Ordering Numbers through 10
 - Order numbers from 0 through 10 in sequence
 10. Ordering Numbers on a Number Line
 - Use a number line to count numbers 0 to 10 in order
 11. Problem Solving: Use Objects
 - Solve problems by using counters to show 1 more and 2 more
 12. Comparing and Ordering Numbers 0 to 10 Unit Test

There are no objectives for this lesson.

6. Numbers to 20

1. Counting, Reading, and Writing 11 and 12
 - Recognize and write the numerals that describe the quantities 11 and 12
2. Counting, Reading, and Writing 13, 14, and 15
 - Recognize and write the numerals that describe the quantities 13 to 15
3. Mid-Unit Review
 - Recognize and represent with manipulatives the quantities 11 to 15
 - Recognize and write the numerals 11 to 15
4. Counting, Reading, and Writing 16 and 17
 - Recognize and write the numerals that describe the quantities 16 and 17
5. Counting, Reading, and Writing 18, 19, and 20
 - Recognize and write the numerals that describe the quantities 18, 19, and 20
6. Problem Solving: Use Logical Reasoning
 - Solve problems by applying logical reasoning to identify missing numbers in a number sequence
7. Numbers to 20 Unit Test

There are no objectives for this lesson.

7. Numbers to 100

1. Counting to 30
 - Count to 30 objects
2. About How Many?
 - Use benchmarks to estimate quantities of groups
3. Counting to 100
 - Count and write numbers to 100 on the hundred chart
4. Mid-Unit Review
 - Recognize, count, write, and represent with manipulatives the quantities to 100
 - Analyze groups of objects to estimate quantities
 - Evaluate groups of 10 to encourage counting up to 100
5. Counting Groups of Ten
 - Count groups of 10, up to 10 tens, and write how many
6. Patterns on a Hundred Chart
 - Use a hundred chart to recognize patterns when counting by 2s and 10s
7. Problem Solving: Look for a Pattern
 - Solve problems by looking for a pattern
8. Numbers to 100 Unit Test

There are no objectives for this lesson.

8. Understanding Addition

1. Stories About Joining
 - Act out numbers stories that involve joining two groups
2. More Joining
 - Interpret illustrations that show joining groups and write the corresponding numbers
3. Joining Groups
 - Determine how many there are altogether when two groups are joined
4. Using the Plus Sign
 - Use the plus sign (+) to represent joining groups when recording addition
5. Mid-Unit Review
 - Evaluate joining stories using manipulatives to help solve the problem
 - Evaluate and interpret images that depict joining stories
 - Write numbers that correspond to the joining stories
 - Apply the concept of altogether to joining stories
 - Recognize and use the plus sign when reading and recording joining stories
6. Finding Sums
 - Identify and use the equal sign (=); add and write the sum
7. Addition Sentences
 - Write and solve addition sentences to represent joining situations

8.
 - Solve problems by drawing pictures about joining two groups

9. Understanding Addition Unit Test

There are no objectives for this lesson.

9. **Understanding Subtraction**

1. Stories About Separating

- Act out number stories that involve separating two groups

2. Stories About Take Away

- Determine how many are left when some objects in a group are taken away

3. Stories About Comparing

- Compare two groups to find how many more or fewer

4. Using the Minus Sign

- Use the minus sign ($-$) to represent "take away" situations when recording subtraction

5. Mid-Unit Review

- Interpret stories about separating to determine the number left
- Evaluate separating stories using manipulatives to help solve the problem
- Compare two groups of objects and determine which one is more and which one is fewer and by how much
- Recognize and use the minus sign when reading and recording separating stories

6. Finding Differences

- Use the equal sign ($=$), subtract, and write the difference

7. Subtraction Sentences

- Write and solve subtraction sentences to represent take-away situations

8. Problem Solving: Use Objects

- Solve problems by choosing addition or subtraction

9. Understanding Subtraction Unit Test

There are no objectives for this lesson.

SEMESTER B

1. **Composing and Decomposing Numbers to 10**

1. Making 4 and 5

- Use objects to show 4 and 5 in two parts

2. Writing Number Sentences for 4 and 5

- Write number sentences to describe the decomposition of 4 or 5 into two parts

3. Making 6 and 7

- Use objects to show 6 and 7 in two parts

4. Writing Number Sentences for 6 and 7

- Write number sentences to describe the decomposition of 6 or 7 into two parts

5. Mid-Unit Review

- Compose and decompose numbers 0 to 7
 - Use objects to show numbers 4 to 7 in two parts
 - Write number sentences that add up to numbers 4 to 7
6. Making 8 and 9
 - Use objects to show 8 and 9 in two parts
 7. Writing Number Sentences for 8 and 9
 - Write number sentences that add up to 8 and 9
 8. Making 10
 - Use objects to show 10 in two parts
 9. Writing Number Sentences for 10
 - Write number sentences that show how two numbers can add to 10
 10. Problem Solving: Make a Graph
 - Construct graphs using real objects or pictures to answer questions
 11. Composing and Decomposing Numbers to 10 Unit Test
 - Compose and decompose numbers 0–10
 - Use objects to show numbers 4–10 in two parts
 - Write number sentences that add up to numbers 4–10
 - Construct a graph

2. **Composing Numbers 11 to 19**

1. Making 11, 12, and 13
 - Represent 11, 12, and 13 as the composition of 10 plus 1, 2, or 3
2. Making 14, 15, and 16
 - Represent 14, 15, and 16 as the composition of 10 plus 4, 5, and 6
3. Mid-Unit Review
 - Represent numbers 11 to 16 as the composition of 10 plus a number
4. Making 17, 18, and 19
 - Represent 17, 18, and 19 as the composition of 10 plus 7, 8, and 9
5. Look for a Pattern
 - Use drawings and number sentences to identify patterns on the first two rows of the hundreds chart
6. Review of Making 11-19
 - Compose numbers between 11 and 19
7. Composing Numbers 11–19 Unit Test

There are no objectives for this lesson.

3. **Decomposing Numbers 11 to 19**

1. Creating Sets to 19
 - Use objects to create sets to 19
2. Parts of 11, 12, and 13

- Represent the decomposition of 11, 12, and 13 as ten ones and additional ones
- 3. Parts of 14, 15, and 16
 - Represent the decomposition of 14, 15, and 16 as one ten and four, five, or six ones
- 4. Mid-Unit Review
 - Create sets of objects to 19
 - Represent the decomposition of 11 to 16 as ten ones and additional ones
- 5. Parts of 17, 18, and 19
 - Make drawings and write number sentences that represent the decomposition of 17, 18, and 19 into ten and 7, 8, or 9 ones
- 6. Problem Solving: Look for a Pattern
 - Identify patterns found in decomposing the teen numbers, including the constant of one ten and the variable number of ones
 - Make drawings and write number sentences for numbers 11 to 19
- 7. Decomposing Numbers 11–19 Unit Test

There are no objectives for this lesson.

4. Measurement

1. Describing Objects by More than One Attribute
 - Recognize and describe the measurable attributes of objects
2. Comparing by Length
 - Directly compare objects by length
3. More Comparing Objects by Length
 - Compare and order objects by length
4. Problem Solving: Try, Check, and Revise
 - Solve problems by comparing lengths and revising their answers
5. Mid-Unit Review
 - Describe an object by its attributes
 - Compare objects by their length
6. Comparing by Height
 - Compare objects by height
7. More Comparing Objects by Height
 - Compare and order objects by height
8. Comparing Capacities
 - Compare containers by their capacity
9. Comparing by Weight
 - Compare objects by weight
10. Social Studies Project
 - Evaluate the weight of objects
11. Measurement Unit Test

There are no objectives for this lesson.

5. **Sort, Classify, Count, and Categorize Data**

1. Same and Different
 - Identify same and different by the attributes of color, shape, size, and kind
2. Sorting by One Attribute
 - Sort objects by one attribute such as color, shape, size, or kind
3. Sorting the Same Set in Different Ways
 - Sort the same set in different ways
4. Mid-Unit Review
 - Sort objects based on their attributes
5. Sorting by More than One Attribute
 - Use more than one attribute to sort a set of objects
6. Problem Solving: Use Logical Reasoning
 - Solve problems by thinking logically
7. Real Graphs
 - Make and read a real graph
8. Picture Graphs
 - Make and read a picture graph
9. Sort, Classify, Count, and Categorize Data Test

There are no objectives for this lesson.

6. **Identifying and Describing Shapes**

1. Rectangles
 - Identify and describe rectangles
2. Squares
 - Identify and describe squares
3. Circles
 - Identify and describe circles
4. Triangles
 - Identify and describe triangles
5. Hexagons
 - Identify and describe hexagons
6. Mid-Unit Review
 - Correctly name shapes regardless of their orientation or overall size
7. Solid Figures
 - Identify cubes, cones, cylinders, and spheres and relate them to real-life objects
8. Flat Surfaces of Solid Figures
 - Identify three-dimensional figures and describe the shape of flat surfaces
9. Problem Solving: Use Objects
 - Solve problems by using objects

10. Math Project: Art

- Examine the attributes of real-world objects
- Identify and describe rectangles, squares, circles, triangles, and hexagons
- Use rectangles, squares, circles, triangles, and hexagons to create a model of a real-world object
- Describe measurable attributes of objects, such as length or height
- Sort a set of objects based on their attributes

11. Identifying and Describing Shapes Unit Test

There are no objectives for this lesson.

7. Position and Location of Shapes

1. Inside and Outside

- Describe an object as inside or outside a given place

2. Above, Below, and On

- Describe an object as above, below, or on another object

3. Mid-Unit Review

- Describe one object in relation to another

4. In Front of and Behind

- Describe an object as in front of or behind, next to or beside a given object

5. Left and Right

- Describe an object as left or right of a given object

6. Position and Location of Shapes Unit Test

There are no objectives for this lesson.

8. Geometry

1. Same Size, Same Shape

- Identify and draw figures that are the same size and the same shape

2. Making Shapes from Other Shapes

- Recognize that shapes can be combined to make other shapes

3. Comparing Solid Figures

- Identify solid figures that roll, stack, and/or slide on a flat surface

4. Mid-Unit Review

- Identify similarity in objects and use similar shapes to make other shapes
- Describe how a solid figure can move across a flat surface

5. Building with Solid Figures

- Make shapes by combining two solid figures

6. Problem Solving: Use Logical Reasoning

- Use logical reasoning to solve problems

7. Real-World Objects

- Examine the attributes of real-world objects

8. Geometry Unit Test

There are no objectives for this lesson.

Math 1

Math 1 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In Math 1 A, the student will learn mathematical concepts related to addition and subtraction, measuring lengths, time, and representing and interpreting data. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

In Math 1 B, the student will learn mathematical concepts related to counting, place value, comparing two-digit numbers, using models to add and subtract, reasoning with shapes, and parts of figures. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

Course Outline

Math 1 A

1. Welcome to Math 1

1. Get Ready to Learn Math
 - Meet Ladybug, your learning buddy for the course
 - Look at the types of lesson slides and activities you will see in the course

2. Addition and Subtraction Problems to 10

1. Add To
 - Solve addition problems involving situations of adding one part to another part
2. Put Together
 - Solve addition problems involving situations of putting two parts together
3. Solve Problems: Both Addends Unknown
 - Solve addition word problems by breaking apart a total number of objects
4. Solve Problems: Take From
 - Solve subtraction problems involving taking from a group
5. Solve Problems: Compare Situations
 - Solve subtraction problems that involve comparing to find how many more objects are in one group than another group

- Solve subtraction problems that involve comparing to find how many fewer objects are in one group than another group
 - 6. Practice Solving Problems: Add To
 - Solve addition problems by finding a missing addend.
 - 7. Solve Problems: Put Together and Take Apart
 - Solve problems involving putting together or taking apart
 - 8. Math Practices: Construct Arguments
 - Construct math arguments in order to solve addition and subtraction problems.
 - Construct viable arguments and critique the reasoning of others.
 - 9. Addition and Subtraction Problems to 10 Unit Test
- 3. Fluently Add and Subtract within 10**
- 1. Count on to Add
 - Add by counting on from a number
 - 2. Doubles
 - Use doubles to solve problems
 - 3. Near Doubles
 - Solve problems using near doubles facts
 - 4. Facts with 5 on the Ten-Frame
 - Use a ten-frame to solve addition facts with 5 and 10
 - 5. Add in Any Order
 - Use the same addends to write two different equations with the same sum
 - 6. Count Back to Subtract
 - Count back to solve subtraction problems
 - 7. Think Addition to Subtract
 - Use addition facts to 10 to solve subtraction problems
 - 8. Solve Word Problems with Facts to 10
 - Solve word problems by drawing pictures and writing equations
 - 9. Math Practices: Look for and Use Structure
 - Use structure and identify patterns in order to solve problems
 - 10. Fluently Add and Subtract within 10 Unit Test
- 4. Addition Facts to 20: Use Strategies**
- 1. Count On to Add
 - Count on to add using a number line
 - 2. Count On to Add Using an Open Number Line
 - Count on to add using an open number line
 - 3. Doubles
 - Memorize doubles facts
 - 4. Doubles Plus 1 and Doubles Plus 2

- Use doubles facts to solve doubles-plus-one facts
- Use doubles facts to solve doubles-plus-2 facts
- 5. Make 10 to Add
 - Make 10 to add numbers to 20
- 6. Explain Addition Strategies
 - Solve addition problems using different strategies
- 7. Solve Addition Word Problems with Facts to 20
 - Solve different types of addition word problems
- 8. Math Practices: Critique Reasoning
 - Critique the reasoning of others by using known information about addition and subtraction
- 9. Addition Facts to 20: Use Strategies Unit Test

5. **Subtraction Facts to 20: Use Strategies**

1. Count to Subtract
 - Use a number line to subtract by counting on or counting back
2. Make 10 to Subtract
 - Make subtraction easier by making 10 to subtract
3. Continue to Make 10 to Subtract
 - Count on to subtract using 10 as a landmark
4. Fact Families
 - Make addition and subtraction facts using the same three numbers
5. Use Addition to Subtract
 - Use addition facts to find subtraction facts
6. Explain Subtraction Strategies
 - Explain strategies to solve subtraction problems
7. Solve Word Problems with Facts to 20
 - Solve different types of addition and subtraction problems with unknowns in different positions
8. Math Practices: Reasoning
 - Use reasoning to write and solve number stories
9. Subtraction Facts to 20: Use Strategies Unit Test

6. **Work With Addition and Subtraction Equations**

1. Find the Unknown Numbers
 - Find the unknown number in an equation
2. True or False Equations
 - Determine if addition and subtraction equations are true or false
3. Make True Equations
 - Find the missing numbers in equations to make them true
4. Word Problems with Three Addends

- Use different strategies to solve word problems with 3 addends
- 5. Add Three Numbers
 - Use different strategies to add three numbers
- 6. Solve Addition and Subtraction Word Problems
 - Solve word problems involving comparisons
- 7. Math Practices: Precision
 - Use precision to determine the missing number or symbol in an equation
- 8. Addition and Subtraction Equations Unit Test

7. **Measure Lengths**

1. Compare and Order by Length
 - Order objects by length
2. Indirect Measurement
 - Indirectly compare objects by length
3. Use Units to Measure Length
 - Use objects to measure length
 - Use cubes and other units to compare lengths and heights of objects
4. Math Practices: Use Appropriate Tools
 - Choose an appropriate tool and use it to measure a given object
5. Measure Lengths Unit Test

8. **Time**

1. Understand the Hour and Minute Hands
 - Tell time to the hour
2. Tell and Write Time to the Hour
 - Tell time to the hour using analog and digital clocks
3. Tell and Write Time to the Half Hour
 - Tell time to the half hour
4. Math Practices: Reasoning
 - Use reasoning to tell and write time
5. Time Unit Test

9. **Represent and Interpret Data**

1. Organize Data Into Three Categories
 - Organize data into categories
2. Collect and Represent Data
 - Collect and organize information using a picture graph
3. Interpret Data
 - Interpret organized data
4. Continue to Interpret Data
 - Use a picture graph to interpret data

5. Math Practices: Make Sense and Persevere
 - Use perseverance to solve problems about sets of data
6. Represent and Interpret Data Unit Test

Math 1 B

1. Welcome to Math 1

1. Get Ready to Learn Math
 - Meet Ladybug, your learning buddy for the course
 - Look at the types of lesson slides and activities you will see in the course

2. Extend the Counting Sequence

1. Count by 10s to 120
 - Count by tens to 120
2. Count by 1s to 120
 - Count by 1s to 120
3. Count on a Number Chart to 120
 - Count on a number chart to 120
 - Find number patterns on a number chart
4. Count on an Open Number Line
 - Count to 120 using an open number line
5. Count and Write Numerals
 - Write numerals to show how many objects are in a group
6. Math Practices: Repeated Reasoning
 - Find better and faster ways to solve problems
7. Extend the Counting Sequence Unit Test

3. Understand Place Value

1. Make Numbers 11 to 19
 - Read and write numbers 11 to 19.
2. Numbers Made with Tens
 - Show groups of 10 with connecting cubes
3. Count with Groups of Tens and Leftovers
 - Group tens to solve problems.
4. Tens and Ones
 - Count tens and ones to find a two-digit number.
 - Use drawings to solve problems with tens and ones.
5. Math Practices: Look for and Use Structure
 - Use tens and ones to make numbers in different ways.
6. Understand Place Value Unit Test

4. Compare Two-Digit Numbers

1. 1 More, 1 Less; 10 More, 10 Less
 - Find numbers that are more or less than a given number
2. Make Numbers on Hundred Chart
 - Use a hundred chart to find 1 more, 1 less, and 10 more, 10 less
3. Compare Numbers
 - Use place-value blocks to compare 2 two-digit numbers
 - Compare two numbers using a greater than, a less than, or an equal to sign
4. Compare Numbers on a Number Line
 - Compare and write two-digit numbers that are greater than or less than other two-digit numbers
5. Math Practices: Make Sense and Persevere
 - Make sense of a problem and find the best way to solve it
6. Compare Two-Digit Numbers Unit Test

5. Use Models and Strategies to Add Tens and Ones

1. Add Tens Using Models
 - Add 2 multiples of 10
2. Mental Math: More Than a Number
 - Use mental math to add tens to two-digit numbers
3. Add Tens and Ones Using a Hundred Chart
 - Use a hundred chart to add tens and ones
4. Add Tens and Ones Using an Open Number Line
 - Use a number line to solve addition problems
5. Add Tens and Ones Using Models
 - Solve addition problems by using blocks or drawings
6. Make a Ten to Add
 - Make a ten to help solve addition problems
7. Add Using Place Value
 - Add 2 two-digit numbers
8. Practice Adding Using Strategies
 - Solve addition problems using different strategies
9. Math Practices: Model with Math
 - Model and solve problems by drawing a picture and writing an equation
10. Use Models to Add Tens and Ones Unit Test

6. Use Models to Subtract Tens

1. Subtract Tens Using Models
 - Use models to subtract tens
2. Subtract Tens Using a Hundred Chart

- Use a hundred chart to subtract a multiple of 10 from another multiple of 10
3. Subtract Tens Using an Open Number Line
 - Use an open number line to solve subtraction problems
 4. Use Addition to Subtract Tens
 - Use addition to subtract tens
 5. Mental Math: Ten Less Than a Number
 - Use mental math to subtract ten from a two-digit number
 6. Use Strategies to Practice Subtraction
 - Use different strategies to subtract
 7. Math Practices: Model with Math
 - Model thinking to solve problems
 8. Use Models to Subtract Tens Unit Test
- 7. Reason with Shapes and Their Attributes**
1. Use Attributes to Define Two-Dimensional Shapes
 - Use attributes to match shapes
 2. Defining and Non-Defining Attributes of 2D Shapes
 - Define 2-D shapes by their attributes
 3. Build and Draw 2D Shapes by Attributes
 - Use materials to build and draw 2-D shapes
 4. Compose 2D Shapes
 - Combine 2-D Shapes to Make Another 2-D Shape
 5. Use Attributes to Define 3D Shapes
 - Define 3-D shapes by their number of edges, vertices, and faces or flat surfaces.
 6. Defining and Non-Defining Attributes of 3D Shapes
 - Choose defining attributes of 3-D shapes
 7. Compose with 3D Shapes
 - Combine 3-D shapes to make another 3-D shape
 8. Math Practices: Make Sense and Persevere
 - Find differences among various shapes
 9. Reason with Shapes and their Attributes Unit Test
- 8. Equal Shares of Circles and Rectangles**
1. Make Equal Shares
 - Determine whether shapes are divided into equal shares
 2. Make Halves and Fourths of Rectangles and Circles
 - Divide shapes into 2 and 4 equal shares and use words to describe those shares
 3. Understand Halves and Fourths
 - Understand that more equal shares of the same whole create smaller shares
 4. Math Practices: Model with Math

- Make a drawing or diagram to show a problem about equal shares

5. Equal Shares of Circles Unit Test

9. **Step Up to Grade 2**

1. Even and Odd Numbers

- Tell if a group of objects is even or odd

2. Use Arrays to Find Totals

- Find the total number of objects in a set of rows and columns

3. Add on a Hundred Chart

- Add 2-digit numbers to 2-digit numbers using a hundred chart

4. Models to Add 2-Digit Numbers

- Use models to add 2-digit numbers and then explain

5. Subtraction on a Hundreds Chart

- Subtract 2-digit numbers from 2-digit numbers using a hundred chart

6. Models to Subtract 2- and 1-Digit Numbers

- Use a model to subtract a 1-digit number from a 2-digit number

7. Tell Time to Five Minutes

- Tell time to the nearest five minutes

8. Understand Hundreds

- Understand place value and count by hundreds to 1,000.

9. Counting Hundreds, Tens, and Ones

- Count different types of place-value blocks to determine the number being shown

10. Skip Count by 5, 10, and 100 to 1000

- Skip count by 5, 10, and 100 using a number line

Math 2

Math 2 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In Math 2 A, the student will learn mathematical concepts related to addition and subtraction, even and odd numbers, time, and money. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

In Math 2 B, the student will learn mathematical concepts related to measuring length, graphs and data, shapes and their attributes, and place value using models. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

Course Outline

Math 2 A

1. Welcome to Math 2

1. Get Ready to Learn Math
 - Meet Ladybug, your learning buddy for the course
 - Look at the types of lesson slides and activities you will see in the course

2. Fluently Add and Subtract within 20

1. Addition Fact Strategies
 - Use counting on to add numbers and add numbers in any order
2. Doubles and Near Doubles
 - Use doubles and near doubles to add quickly and accurately
3. Make a 10 to Add
 - Use the strategy of making a 10 to add quickly and accurately
4. Addition Fact Patterns
 - Use number patterns on an addition facts table to complete related addition equations that show basic facts
5. Count on and Count Back to Subtract
 - Count on and count back on a number line to subtract

6. Think Addition to Subtract

- Think addition to subtract quickly and accurately

7. Make a 10 to Subtract

- Make a 10 to subtract quickly and accurately

8. Practice Addition and Subtraction Facts

- Add and subtract quickly and accurately using mental math strategies

9. Solve Addition and Subtraction Word Problems

- Use addition and subtraction to solve word problems

10. Math Practices: Construct Arguments

- Use words, pictures, numbers, and symbols to construct viable math arguments

11. Fluently Add and Subtract within 20 Unit Test

3. Add within 100 Using Strategies

1. Add Tens and Ones on a Hundred Chart

- Add within 100 using place-value strategies and a hundred chart

2. Add Tens and Ones on an Open Number Line

- Add tens to two-digit numbers using an open number line
- Use an open number line to add tens and ones within 100

3. Break Apart Numbers to Add

- Add within 100 using place-value strategies
- Break apart numbers into tens and ones to find their sum

4. Add Using Compensation

- Break apart addends and combine them in different ways to make numbers that are easy to add mentally.

5. Practice Adding Using Strategies

- Choose and use any strategy to add two-digit numbers

6. Solve One-Step and Two-Step Problems

- Use drawings and equations to solve one-step and two-step problems

7. Math Practices: Use Appropriate Tools

- Choose an appropriate tool and use it to solve a math problem

8. Add Within 100 Using Strategies Unit Test

4. Fluently Add within 100

1. Add With Partial Sums

- Add using place value and partial sums
- Add using partial sums

2. Models to Add 2-Digit Numbers

- Use models to add 2-digit numbers and then explain the work

3. Add 2-Digit Numbers

- Add 2-digit numbers and then explain the work

4. Add More Than 2-Digit Numbers
 - Add three or four 2-digit numbers
5. Solve One-Step and Two-Step Problems
 - Use drawings, models, and equations to solve one- and two-step problems
6. Math Practices: Model With Math
 - Make models to help solve math problems
7. Fluently Add Within 100 Unit Test

5. Subtract within 100 Using Strategies

1. Subtract Tens and Ones on a Hundred Chart
 - Use a hundred chart to subtract tens and ones
2. Count Back to Subtract on an Open Number Line
 - Use an open number line to subtract tens
 - Use an open number line to subtract tens and ones
3. Add Up to Subtract Using an Open Number Line
 - Add up to subtract using an open number line
4. Break Apart Numbers to Subtract
 - Break apart 1-digit numbers to make it easier to subtract mentally
 - Break apart 2-digit numbers to make it easier to subtract
5. Subtract Using Compensation
 - Make numbers that are easier to subtract and use mental math to find the difference
6. Solve One-Step and Two-Step Problems
 - Solve one- and two-step problems using addition and subtraction
7. Math Practices: Critique Reasoning
 - Critique the thinking of others by using what is known about addition and subtraction
8. Subtract within 100 Using Strategies Unit Test

6. Fluently Subtract within 100

1. Regroup 1 Ten for 10 Ones
 - Exchange 1 ten for 10 ones
2. Use Place Value and Models to Subtract
 - Use place value and models to subtract two-digit and one-digit numbers
3. Subtract 2-Digit and 1-Digit Numbers
 - Use place value and regrouping to subtract
4. Models to Subtract 2-Digit Numbers
 - Use place value and models to subtract two-digit numbers
5. Use Addition to Check Subtraction
 - Add to check subtraction
6. Practice Subtracting
 - Subtract two-digit numbers and decide when to regroup and when not to regroup

7. Solve One-Step and Two-Step Problems
 - Use models and equations to solve word problems
8. Math Practices: Reasoning
 - Reason about word problems and use bar diagrams and equations to solve them
9. Fluently Subtract Within 100 Unit Test

7. Numbers to 1,000

1. Understand Hundreds
 - Understand place value and count by hundreds to 1,000.
2. Models and 3-Digit Numbers
 - Use place-value blocks and drawings to model and write 3-digit numbers
 - Name Place Values
 - Tell the value of a digit by where it is placed in a number
3. Read and Write 3-Digit Numbers
 - Read and write 3-digit numbers in expanded form, standard form, and word form
4. Different Ways to Name the Same Number
 - Make and name a number in different ways to show the same value
5. Place-Value Patterns with Numbers
 - Use place-value patterns to mentally count by 1s and 10s from a given number
6. Skip Count By Fives, Tens, and Hundreds to 1,000
 - Skip count by 5s, 10s, and 100s using a number line
7. Compare Numbers Using Place Value
 - Compare numbers using place value
8. Compare Numbers on the Number Line
 - Compare and write a three-digit number that is greater than or less than another three-digit number
9. Math Practices: Look for and Use Structure
 - Look for patterns to help when solving problems
10. Numbers to 1,000 Unit Test

8. Add using Models and Strategies

1. Add 10 and 100
 - Add 10 or 100 mentally using place value
2. Add on an Open Number Line
 - Use an open number line to add 3-digit numbers
3. Add Using Mental Math
 - Add 3-digit numbers using mental math strategies
4. Add Using Partial Sums
 - Add 3-digit numbers using partial sums
5. Use Models to Add

- Use models to add 3-digit numbers
- 6. Explain Addition Strategies
 - Use different addition strategies and explain why they work
- 7. Math Practices: Repeated Reasoning
 - Think about and check my work as I solve a problem
- 8. Add Using Models and Strategies Unit Test
- 9. Subtract using Models and Strategies**
 1. Subtract 10 and 100
 - Subtract 10 or 100 mentally using place-value strategies
 2. Count Back to Subtract on an Open Number Line
 - Use an open number line to count back to subtract 3-digit numbers
 3. Add Up To Subtract on an Open Number Line
 - Use an open number line to add up to subtract 3-digit numbers
 4. Subtract Using Mental Math
 - Use mental math to subtract
 5. Use Models to Subtract
 - Use models to subtract 3-digit numbers
 6. Explain Subtraction Strategies
 - Explain why subtraction strategies work using models, place value, and mental math
 7. Math Practices: Make Sense and Persevere
 - Solve problems that take more than one step
 8. Subtract Using Models and Strategies Unit Test
- 10. Solving with Addition and Subtraction**
 1. Represent Addition and Subtraction Problems
 - Model problems using equations with unknowns in any position
 2. Solve Addition and Subtraction Problems
 - Use drawings and equations to make sense of the words in problems
 3. Solve Two-Step Problems
 - Model and solve two-step problems using equations
 - Use different ways to solve two-step problems
 4. Math Practices: Reasoning
 - Use reasoning to write and solve number stories
 5. Solving with Addition and Subtraction Unit Test

Math 2 B

1. **Welcome to Math 2**
 1. Get Ready to Learn Math

- Meet Ladybug, your learning buddy for the course
- Look at the types of lesson slides and activities you will see in the course

2. **Work with Equal Groups**

1. Even and Odd Numbers
 - Tell if a group of objects is even or odd
 - Use different ways to tell if a group of objects shows an even or odd number
2. Use Arrays to Find Totals
 - Find the total number of objects in a set of rows and columns
3. Make Arrays to Find Totals
 - Make arrays with equal rows or equal columns to solve addition problems
4. Math Practices: Model with Math
 - Model problems using equations, drawings, arrays, and bar diagrams
5. Work With Equal Groups Unit Test

3. **Work with Time and Money**

1. Solve Problems with Coins
 - Solve problems with coins
2. Solve Problems with Dollar Bills
 - Solve problems with dollar bills and coins that model 100 cents
 - Solve problems with dollar bills
3. Tell Time to Five Minutes
 - Tell time to the nearest five minutes
4. Tell Time Before and After the Hour
 - Say the time in different ways
5. A.M. and P.M.
 - Tell time and use reasoning to state if the event is happening in the a.m. or p.m.
6. Math Practices: Reasoning
 - Reason about values of coins and dollar bills, and find different ways to make the same total value
7. Work with Time and Money Unit Test

4. **Measuring Length**

1. Estimating Length
 - Estimate the length of an object by relating the length of the object to a measurement I know
2. Measure with Inches
 - Estimate measures and use a ruler to measure length and height to the nearest inch
3. Inches, Feet, and Yards
 - Estimate measures and use tools to measure the length and height of objects to the nearest inch, foot, and yard
4. Measure Length Using Different Customary Units
 - Estimate and measure the length and height of objects in inches, feet, and yards

5. Measure with Centimeters and Meters
 - Estimate measures and use a ruler to measure length and height to the nearest centimeter
 - Estimate measures and use a ruler, meter stick, or tape measure to measure length and height to the nearest centimeter or meter
6. Measure Length Using Different Metric Units
 - Measure the length and height of objects using different metric units
7. Compare Lengths
 - Tell how much longer one object is than another
8. Math Practices: Precision
 - Choose tools, units, and methods that help me be precise when I measure
9. Measuring Length Unit Test

5. **More Addition, Subtraction, and Length**

1. Add and Subtract With Measurements
 - Solve problems by adding or subtracting length measurements
2. Find Unknown Measurements
 - Add or subtract to solve problems about measurements
 - Add and subtract to solve measurement problems by using drawings and equations
3. Add and Subtract on a Number Line
 - Add and subtract on a number line
4. Math Practices: Use Appropriate Tools
 - Choose the best tool to use to solve problems
5. More Addition, Subtraction, and Length Unit Test

6. **Graphs and Data**

1. Line Plots
 - Measure the lengths of objects and make a line plot to organize the data
2. Bar Graphs
 - Draw bar graphs and use them to solve problems
3. Picture Graphs
 - Draw picture graphs and use them to solve problems
4. Draw Conclusions From Graphs
 - Draw conclusions from graphs
5. Math Practices: Reasoning
 - Reason about data in bar graphs and picture graphs to write and solve problems
6. Graphs and Data Unit Test

7. **Shapes and Their Attributes**

1. Two-Dimensional Shapes
 - Recognize shapes by how they look
2. Polygons and Angles

- Describe plane shapes by how they look
- 3. Draw Two-Dimensional Shapes
 - Draw polygon shapes
- 4. Cubes
 - Draw cubes and describe how they look
- 5. Divide Rectangles Into Equal Squares
 - Divide rectangles into equal squares
- 6. Partition Shapes
 - Divide circles and rectangles into halves, thirds, and fourths
 - Equal Shares, Different Shapes
 - Make equal shares that do not have the same shape
- 7. Math Practices: Repeated Reasoning
 - Use repeated reasoning to divide rectangles into rows and columns and to create designs with equal shares
- 8. Shapes and Their Attributes Unit Test

8. Looking Ahead to Grade 3

1. Multiplication and Repeated Addition
 - Use repeated addition to show the relationship between multiplication and addition
2. Arrays and Multiplication
 - Use repeated addition to show the relationship between multiplication and division
3. Division as Sharing
4. Division as Repeated Subtraction
5. Add with Partial Sums
 - Add numbers using partial sums
6. Models for Adding 3-Digit Numbers
 - Add 3-digit numbers using models, drawings, and place value
7. Subtract with Partial Differences
 - Subtract numbers using partial differences
8. Models for Subtracting 3-Digit Numbers
 - Subtract 3-digit numbers using models, drawings, and place value
9. Divide Regions into Equal Parts
 - Read and write a unit fraction
10. Fractions and Regions
 - Show and name part of a region

Math 3

Math 3 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In Math 3 A, the student will learn mathematical concepts related to multiplication and division, patterns, rounding, and mental math. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

In Math 3 B, the student will learn mathematical concepts related to 2-D shapes, area, perimeter, fractions, interpreting data, time, mass, and capacity. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

Course Outline

Math 3 A

1. Welcome to Math 3

1. Welcome to Math 3
 - Meet Clara the cat, your learning buddy for the course
 - Describe the different parts of a lesson
 - Describe the different types of assessments
 - Locate and describe lesson icons and assets

2. Strategies to Add and Subtract

1. Addition Properties
 - Solve real-world problems using properties of addition
2. Algebra: Addition Patterns
 - Identify patterns in the addition table and explain them using algebraic thinking
3. Round Whole Numbers
 - Use place value and a number line to round numbers
4. Mental Math: Addition and Subtraction
 - Use mental math to add
 - Use mental math to subtract
5. Estimate Sums and Differences
 - Use rounding or compatible numbers to estimate a sum
 - Use rounding or compatible numbers to estimate a difference

6. Relate Addition and Subtraction
 - Solve one-step and multi-step problems using strategies based on the relationship between addition and subtraction
7. Math Practices: Model with Math
 - Solve one-step and multi-step problems by modeling with math
8. Strategies to Add and Subtract Unit Test

3. Fluently Add and Subtract within 1,000

1. Use Partial Sums to Add
 - Add two three-digit numbers by breaking apart problems into simpler problems
2. Add 3-Digit Numbers
 - Add three-digit numbers using the standard algorithm
3. Add 3 or More Numbers
 - Add three or more numbers using the standard algorithm
4. Use Partial Differences to Subtract
 - Subtract multi-digit numbers using the expanded algorithm
5. Subtract 3-Digit Numbers
 - Subtract three-digit numbers using the standard algorithm
6. Math Practices: Construct Arguments
 - Use addition and subtraction to justify a conjecture
7. Fluently Add and Subtract within 1,000 Unit Test

4. Whole Number Multiplication and Division

1. Multiplication as Repeated Addition
 - Use repeated addition to show the relationship between multiplication and addition
2. Multiplication on the Number Line
 - Use number lines to join equal groups
3. Arrays and Multiplication
 - Use arrays as one way to think about and understand multiplication
4. The Commutative Property
 - Understand and use the Commutative Property of Multiplication
5. Division as Sharing
 - Use sharing to separate equal groups and to think about division
6. Division as Repeated Subtraction
 - Use repeated subtraction to show the relationship between division and subtraction
7. Math Practices: Use Appropriate Tools
 - Think strategically about available tools that can be used to solve problems
8. Whole Number Multiplication and Division Unit Test

5. Multiplication Facts: Use Patterns

1. 2 and 5 as Factors
 - Gain fluency in multiplication when using 2 and 5 as factors
2. 9 as a Factor
 - Gain fluency in multiplication when using 9 as a factor
3. Apply Properties: Multiply by 0 and 1
 - Gain fluency in multiplication when multiplying by 0 or 1

4. Multiply by 10

- Gain fluency in multiplication when multiplying by 10

5. Multiplication Facts: 0, 1, 2, 5, 9, and 10

- Students will use number relationships and patterns to develop reasoning strategies to support their recall of the basic multiplication facts

6. Math Practices: Model with Math

- Use previously learned concepts and skills to represent and solve problems

7. Multiplication Facts: Use Patterns Unit Test

6. Apply Properties of Multiplication

1. The Distributive Property

- Use the Distributive Property to solve problems involving multiplication within 100

2. Apply Properties: 3 and 4 as Factors

- Use appropriate tools and the Distributive Property to break apart unknown facts with 3 as a factor
- Use the Distributive Property to break apart unknown facts with 4 as a factor

3. Apply Properties: 6 and 7 as Factors

- Use the Distributive Property to break apart unknown facts with 6 or 7 as a factor

4. Apply Properties: 8 as a Factor

- Use the Distributive Property and known facts to break apart unknown facts with 8 as a factor

5. Practice Multiplication Facts

- Use strategies such as bar diagrams and arrays with known facts to solve multiplication problems

6. The Associative Property: Multiply with 3 Factors

- Use the Associative Property of Multiplication to group 3 factors and multiply

7. Math Practices: Repeated Reasoning

- Use repeated reasoning with known facts to make generalizations when multiplying

8. Apply Properties of Multiplication Unit Test

7. Division Facts: Use Multiplication

1. Relate Multiplication and Division

- Use multiplication facts to divide

2. Use Multiplication to Divide With 2, 3, 4, and 5

- Use multiplication facts to find related division facts

3. Use Multiplication to Divide with 6 and 7

- Use multiplication facts to find related division facts

4. Use Multiplication to Divide with 8 and 9

- Use multiplication facts to find related division facts

5. Multiplication Patterns: Even and Odd Numbers

- Use knowledge of even and odd numbers to identify multiplication patterns

6. Division Involving 0 and 1

- Use properties to understand division involving 0 and 1
- 7. Practice Multiplication and Division Facts
 - Use patterns and known facts to find unknown multiplication facts
 - Use multiplication facts to find related division facts
- 8. Solve Multiplication and Division Equations
 - Use multiplication and division facts to find unknown values in equations
- 9. Math Practices: Make Sense and Persevere
 - Use previously learned concepts to find and answer hidden questions to solve problems
- 10. Division Facts: Use Multiplication Unit Test

8. Fluently Multiply and Divide Within 100

1. Patterns for Multiplication Facts
 - Use the multiplication table and Distributive Property to find patterns in factors and products
2. Use a Multiplication Table
 - Use the multiplication table to find the missing factor in a division problem
3. Find Missing Numbers in a Multiplication Table
 - Use number sense and reasoning while practicing multiplication and division basic facts
4. Use Strategies to Multiply
 - Use strategies such as skip counting and properties of operations to multiply
5. Word Problems: Multiplication and Division Facts
 - Solve multiplication and division problems that involve different strategies and representations
6. Write Math Stories: Multiplication and Division
 - Use multiplication to write and solve real-world problems involving equal groups
 - Use division to write and solve real-world problems involving equal groups
7. Math Practices: Look for and Use Structure
 - Use the structures of multiplication and division to compare expressions
8. Fluently Multiply and Divide within 100 Unit Test

9. Multiply by Multiples of 10

1. Use an Open Number Line to Multiply
 - Use an open number line to find products when one factor is a multiple of 10
2. Use Properties to Multiply
 - Use properties of multiplication to find products when one factor is a multiple of 10
3. Multiply by Multiples of 10
 - Use different strategies to find products when one factor is a multiple of 10
4. Math Practices: Look for and Use Structure
 - Use the structure of multiplication and place value to find products when one factor is a multiple of 10
5. Multiply by Multiples of 10 Unit Test

1. Welcome to Math 3

1. Welcome to Math 3
 - Meet Clara the cat, your learning buddy for the course
 - Describe the different parts of a lesson
 - Describe the different types of assessments
 - Locate and describe lesson icons and assets

2. Solve Problems with Whole Numbers

1. Two-Step Problems: Addition and Subtraction
 - Draw diagrams and write equations to solve two-step problems involving addition and subtraction of whole numbers
2. Two-Step Problems: Multiplication and Division
 - Draw diagrams and write equations to solve two-step problems involving multiplication and division of whole numbers
3. Two-Step Problems: All Operations
 - Examine relationships between quantities in a two-step word problem by writing equations
 - Choose and apply the operations needed to find the answer
4. Math Practices: Critique Reasoning
 - Critique the reasoning of others by asking questions, identifying mistakes, and providing suggestions for improvement
5. Solve Problems with Whole Numbers Unit Test

3. Understand Fractions as Numbers

1. Divide Regions into Equal Parts
 - Understand how to read and write unit fractions for equal-size parts of a region
2. Fractions and Regions
 - Use a fraction to represent multiple copies of a unit fraction
3. Understand the Whole
 - Determine and draw the whole (unit) given one part (unit fraction)
4. Number Line: Fractions Less Than 1
 - Represent fractions on a number line
5. Number Line: Fractions Greater Than 1
 - Represent fractions greater than 1 on a number line
6. Math Practices: Make Sense and Persevere
 - Determine when a problem has either extra or missing information
7. Understand Fractions as Numbers Unit Test

4. Fraction Equivalence and Comparison

1. Equivalent Fractions: Use Models
 - Find equivalent fractions that name the same part of the whole
2. Equivalent Fractions: Use the Number Line
 - Represent equivalent fractions on a number line
3. Use Models to Compare Fractions: Same Denominator
 - Use models such as fraction strips to compare fractions that refer to the same whole and have the same denominator
4. Use Models to Compare Fractions: Same Numerator
 - Use models such as fraction strips to compare fractions that refer to the same whole and have the same numerator
5. Compare Fractions: Use Benchmarks
 - Use benchmark numbers to compare fractions
6. Compare Fractions: Use the Number Line
 - Use a number line to compare fractions

7. Whole Numbers and Fractions
 - Use fraction names to represent whole numbers
8. Math Practices: Construct Arguments
 - Construct math arguments using fractions
9. Fraction Equivalence and Comparison Unit Test

5. Attributes of Two-Dimensional Shapes

1. Describe Quadrilaterals
 - Identify quadrilaterals and use attributes to describe them
2. Classify Shapes
 - Classify shapes according to their attributes
3. Analyze and Compare Quadrilaterals
 - Analyze and compare quadrilaterals and group them by their attributes
4. Math Practices: Precision
 - Solve math problems precisely, efficiently, and accurately by using appropriate tools and mathematics vocabulary
5. Attributes of Two-Dimensional Shapes Unit Test

6. Connect Area to Multiplication and Addition

1. Cover Regions
 - Use unit squares to find the area of a shape
2. Area: Nonstandard Units
 - Use unit squares to find the area of a figure
3. Area: Standard Units
 - Use standard units to measure the area of a shape
4. Area of Squares and Rectangles
 - Use unit squares and multiplication to find the areas of squares and rectangles
5. Area and the Distributive Property
 - Use areas of rectangles to model the Distributive Property of Multiplication
6. Apply Properties: Area of Irregular Shapes
 - Use areas of rectangles to find the area of irregular shapes
7. Math Practices: Look for and Use Structure
 - Solve problems by breaking apart or changing the problem into simpler problems
8. Understand Area of Shapes Unit Test

7. Solve Perimeter Problems

1. Understand Perimeter
 - Find the perimeter of different polygons
2. Perimeter of Common Shapes
 - Find the perimeter of different polygons with common shapes
3. Perimeter and Unknown Side Lengths
 - Use the given sides of a polygon and the known perimeter to find the unknown side length
4. Same Perimeter, Different Area

- Understand the relationship of shapes with the same perimeter and different areas

5. Same Area, Different Perimeter

- Understand the relationship of shapes with the same area and different perimeters

6. Math Practices: Reasoning

- Understand the relationship between numbers in order to simplify and solve problems involving perimeter

7. Solve Perimeter Problems Unit Test

8. Represent and Interpret Data

1. Line Plots and Length

- Measure length to the nearest fourth inch and show the data on a line plot
- Measure length to the nearest half inch and show the data on a line plot

2. Read Picture Graphs and Bar Graphs

- Use graphs to compare and interpret data

3. Make Picture Graphs

- Use frequency tables and picture graphs to compare and interpret data

4. Make Bar Graphs

- Use scaled bar graphs to represent data sets

5. Solve Word Problems with Information in Graphs

- Use graphs to solve problems

6. Math Practices: Precision

- Use words, symbols, and numbers to accurately and precisely solve math problems

7. Represent and Interpret Data Unit Test

9. Time, Mass, Capacity

1. Time to the Minute

- Show and tell time to the nearest minute using analog and digital clocks

2. Units of Time: Measure Elapsed Time

- Tell and write time to the nearest minute and measure time intervals in minutes

3. Units of Time: Solve Word Problems

- Solve word problems involving addition and subtraction to measure quantities of time

4. Liquid Volume

- Use standard units to estimate and measure liquid volume

5. Estimate Mass

- Use standard units to estimate the masses of solid objects

6. Measure Mass

- Use a pan balance with metric weights to measure the mass of objects in grams and kilograms

7. Mass and Liquid Volume: Solve Word Problems

- Use pictures to help solve problems about mass and volume

8. Math Practices: Reasoning

- Make sense of quantities and relationships in problems

9. Solve Time, Capacity, and Mass Problems Unit Test

10. Step Up to Grade 4

1. Place-Value Relationships

- Recognize the relationship between adjacent digits in a multi-digit number

2. Multiply by Multiples of 10, 100, and 1,000

- Multiply multiples of 10, 100, and 1,000 using mental math and place-value strategies
- Use place value understanding and properties of operations to perform multi-digit arithmetic

3. Mental Math: Multiply Multiples of 10

- Use mental math strategies to multiply 2-digit by 2-digit multiples of ten

4. Multiply 2-Digit Numbers by Multiples of 10

- Use models and properties of operations to multiply 2-digit numbers by multiples of ten

Math 3 Accelerated

Accelerated Math 3 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In Accelerated Math 3 A, the student will learn mathematical concepts related to multiplication and division, patterns, rounding, mental math, and representing and interpreting data on line plots.

Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

In Accelerated Math 3 B, the student will learn mathematical concepts related to fraction equivalence, adding, subtracting, and multiplying fractions, comparing decimals, using whole numbers to solve problems, area, and perimeter.

Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

Course Outline

Accelerated Math 3 A

1. Welcome to Accelerated Math 3

1. Welcome to Accelerated Math 3
 - Meet Clara the cat, your learning buddy for the course
 - Describe the different parts of a lesson
 - Describe the different types of assessments
 - Locate and describe lesson icons and assets
 - Describe the At Home with Math Project

2. Fluently Add and Subtract Within 1,000

1. Addition Properties
 - Solve real-world problems using properties of addition
2. Round Whole Numbers
 - Use place value and a number line to round numbers
3. Estimate Sums and Differences

- Use rounding or compatible numbers to estimate a sum
- Use rounding or compatible numbers to estimate a difference
- 4. Relate Addition and Subtraction
 - Solve one-step and multi-step problems using strategies based on the relationship between addition and subtraction
- 5. Add 3-Digit Numbers
 - Add three-digit numbers using the standard algorithm
- 6. Add 3 or More Numbers
 - Add three or more numbers using the standard algorithm
- 7. Subtract 3-Digit Numbers
 - Subtract three-digit numbers using the standard algorithm
- 8. Math Practices: Construct Arguments
 - Use addition and subtraction to justify a conjecture
- 9. Fluently Add and Subtract Within 1,000 Unit Test

3. Whole Number Multiplication and Division

1. Multiplication as Repeated Addition
 - Use repeated addition to show the relationship between multiplication and addition
2. Multiplication on the Number Line
 - Use number lines to join equal groups
3. Arrays and Multiplication
 - Use arrays as one way to think about and understand multiplication
4. The Commutative Property
 - Understand and use the Commutative Property of Multiplication
5. Division as Sharing
 - Use sharing to separate equal groups and to think about division
6. Division as Repeated Subtraction
 - Use repeated subtraction to show the relationship between division and subtraction
7. 2 and 5 as Factors
 - Gain fluency in multiplication when using 2 and 5 as factors
8. 9 as a Factor
 - Gain fluency in multiplication when using 9 as a factor
9. Apply Properties: Multiply by 0 and 1
 - Gain fluency in multiplication when multiplying by 0 or 1
10. Multiply by 10
 - Gain fluency in multiplication when multiplying by 10
11. Math Practices: Model with Math
 - Use previously learned concepts and skills to represent and solve problems
12. Whole Number Multiplication and Division Unit Test

4. **Apply Properties of Multiplication**

1. The Distributive Property
 - Use the Distributive Property to solve problems involving multiplication within 100
2. Apply Properties: 3 and 4 as Factors
 - Use appropriate tools and the Distributive Property to break apart unknown facts with 3 as a factor
 - Use the Distributive Property to break apart unknown facts with 4 as a factor
3. Apply Properties: 6 and 7 as Factors
 - Use the Distributive Property to break apart unknown facts with 6 or 7 as a factor
4. Apply Properties: 8 as a Factor
 - Use the Distributive Property and known facts to break apart unknown facts with 8 as a factor
5. Practice Multiplication Facts
 - Use strategies such as bar diagrams and arrays with known facts to solve multiplication problems
6. The Associative Property: Multiply with 3 Factors
 - Use the Associative Property of Multiplication to group 3 factors and multiply
7. Math Practices: Repeated Reasoning
 - Use repeated reasoning with known facts to make generalizations when multiplying
8. Apply Properties of Multiplication Unit Test

5. **Division Facts: Use Multiplication**

1. Relate Multiplication and Division
 - Use multiplication facts to divide
2. Use Multiplication to Divide With 2, 3, 4, and 5
 - Use multiplication facts to find related division facts
3. Use Multiplication to Divide With 6 and 7
 - Use multiplication facts to find related division facts
4. Use Multiplication to Divide with 8 and 9
 - Use multiplication facts to find related division facts
5. Multiplication Patterns: Even and Odd Numbers
 - Use knowledge of even and odd numbers to identify multiplication patterns
6. Division Involving 0 and 1
 - Use properties to understand division involving 0 and 1
7. Solve Multiplication and Division Equations
 - Use multiplication and division facts to find unknown values in equations
8. Math Practices: Make Sense and Persevere
 - Use previously learned concepts to find and answer hidden questions to solve problems
9. Division Facts: Use Multiplication Unit Test

6. **Multiply by 1-Digit Numbers**

1. Multiply by Multiples of 10, 100, and 1,000

- Multiply multiples of 10, 100, and 1,000 using mental math and place-value strategies
- 2. Round to Estimate products
 - Use rounding to estimate products and check if answers are reasonable
- 3. Use the Distributive Property
 - Use the Distributive Property to multiply larger numbers
- 4. Mental Math Strategies for Multiplication
 - Use place value and properties of operations to multiply mentally
- 5. Multiply 2- and 3-Digit Numbers by 1-Digit Numbers
 - Use place value and the standard algorithm to multiply 2- and 3-digit numbers by 1-digit numbers
- 6. Multiply 4-Digit by 1-Digit Numbers
 - Use the standard algorithm to multiply 4-digit numbers by 1-digit numbers
- 7. Math Practices: Model with Math
 - Use previously learned concepts and skills to represent and solve problems
- 8. Multiply by 1-Digit Numbers Unit Test

7. **Multiply by 2-Digit Numbers**

- 1. Mental Math: Multiply Multiples of 10
 - Use mental math strategies to multiply 2-digit by 2-digit multiples of ten
- 2. Estimate: Use Rounding
 - Estimate products for 2-digit by 2-digit multiplication by rounding the factors to multiples of ten
- 3. Multiply Using the Distributive Property
 - Use the Distributive Property and an area model to multiply two 2-digit numbers
- 4. Multiply by 2-Digit Numbers: Partial Products
 - Use place value and partial products to calculate products of 2-digit by 2-digit multiplication problems
- 5. Multiply 2-Digit Numbers by Multiples of 10
 - Use area models and place-value strategies to multiply 2-digit numbers by multiples of 10
- 6. Math Practices: Make Sense and Persevere
 - Make sense of problems and persevere in solving them
- 7. Multiply by 2-Digit Numbers Unit Test

8. **Divide by 1-Digit Numbers**

- 1. Mental Math: Find Quotients
 - Use mental-math and place-value strategies to divide multiples of 10 and 100 by 1-digit divisors
- 2. Mental Math: Estimate Quotients
 - Use compatible numbers to estimate quotients
- 3. Estimate Quotients for Greater Dividends
 - Use place-value patterns and division facts to estimate quotients for 4-digit dividends

4. Interpret Remainders
 - Solve division problems and interpret remainders
 5. Division as Sharing
 - Use place value and drawings to divide 2- and 3- digit numbers by 1-digit numbers
 6. Divide with 1-Digit Numbers
 - Divide 2- and 3-digit numbers by 1-digit numbers using the standard division algorithm
 - Divide 4-digit numbers by 1-digit numbers using the standard division algorithm
 7. Math Practices: Model with Math
 - Use previously-learned concepts and skills to model and solve problems
 8. Divide by 1-Digit Numbers Unit Test
- 9. Solve Problems with Whole Numbers**
1. Solve Comparison Situations
 - Interpret comparisons as multiplication or addition equations
 - Use multiplication and division to compare two quantities
 2. Solve Multi-Step Problems
 - Solve two-step problems by finding and solving the hidden question first
 3. Solve More Multi-Step Problems
 - Solve multi-step problems by finding and solving hidden questions first
 4. Math Practices: Make Sense and Persevere
 - Make sense of a multi-step problem and keep working until it is solved
 5. Solve Problems with Whole Numbers Unit Test
- 10. Algebra: Generate and Analyze Patterns**
1. Number Sequences
 - Create or extend a number sequence based on a rule
 - Identify features of the pattern in the sequence that are not described by the rule
 2. Patterns: Number Rules
 - Use a rule to extend a number pattern and solve a problem
 - Identify features of the pattern
 3. Patterns: Repeating Shapes
 - Generate a shape pattern that follows a given rule and predict a shape in the pattern
 4. Math Practices: Look For and Use Structure
 - Solve problems by using patterns
 5. Algebra: Generate and Analyze Patterns Unit Test

Accelerated Math 3 B

1. Welcome to Accelerated Math 3

1. Welcome to Accelerated Math 3
 - Meet Clara the cat, your learning buddy for the course

- Describe the different parts of a lesson
- Describe the different types of assessments
- Locate and describe lesson icons and assets
- Describe the At Home with Math Project

2. Understand Area of Shapes

1. Cover Regions
 - Use unit squares to find the area of a shape
2. Area: Standard Units
 - Use standard units to measure the area of a shape
3. Area of Squares and Rectangles
 - Use unit squares and multiplication to find the areas of squares and rectangles
4. Area and the Distributive Property
 - Use areas of rectangles to model the Distributive Property of Multiplication
5. Apply Properties: Area of Irregular Shapes
 - Use areas of rectangles to find the area of irregular shapes
6. Math Practices: Look For and Use Structure
 - Solve problems by breaking apart or changing the problem into simpler problems
7. Understand Area of Shapes Unit Test

3. Solve Perimeter Problems

1. Understand Perimeter
 - Find the perimeter of different polygons
2. Perimeter of Common Shapes
 - Find the perimeter of different polygons with common shapes
3. Perimeter and Unknown Side Lengths
 - Use the given sides of a polygon and the known perimeter to find the unknown side length
4. Same Perimeter, Different Area
 - Understand the relationship of shapes with the same perimeter and different areas
5. Same Area, Different Perimeter
 - Understand the relationship of shapes with the same area and different perimeters
6. Math Practices: Reasoning
 - Understand the relationship between numbers in order to simplify and solve problems involving perimeter
7. Solve Perimeter Problems Unit Test

4. Understand Fractions as Numbers

1. Divide Regions into Equal Parts
 - Understand how to read and write unit fractions for equal-size parts of a region
2. Fractions and Regions
 - Use a fraction to represent multiple copies of a unit fraction

3. Understand the Whole
 - Determine and draw the whole (unit) given one part (unit fraction)
4. Number Line: Fractions Less Than 1
 - Represent fractions on a number line
5. Number Line: Fractions Greater Than 1
 - Represent fractions greater than 1 on a number line
6. Math Practices: Make Sense and Persevere
 - Determine when a problem has either extra or missing information
7. Understand Fractions as Numbers Unit Test

5. **Fraction Equivalence and Ordering**

1. Equivalent Fractions: Area Models
 - Use area models to recognize and generate equivalent fractions
2. Equivalent Fractions: Number Lines
 - Use a number line to locate and identify equivalent fractions
3. Generate Equivalent Fractions: Multiplication
 - Use multiplication to find equivalent fractions
4. Generate Equivalent Fractions: Division
 - Use division to find equivalent fractions
5. Compare Fractions
 - Use benchmarks, area models, and number lines to compare fractions
 - Use models or rename fractions to compare
6. Math Practices: Construct Arguments
 - Construct arguments about fractions
7. Fraction Equivalence and Ordering Unit Test

6. **Addition and Subtraction of Fractions**

1. Model Addition of Fractions
 - Use fraction strips and number lines to add fractions
2. Decompose Fractions
 - Decompose a fraction or mixed number into a sum of fractions in more than one way
3. Add Fractions with Like Denominators
 - Solve problems involving joining parts of the same whole by adding fractions
4. Model Subtraction of Fractions
 - Use tools such as fraction strips, area models, and number lines to subtract fractions
5. Subtract Fractions with Like Denominators
 - Solve problems involving separating parts of the same whole by subtracting fractions
6. Add and Subtract Fractions with Like Denominators
 - Count forward or backward on a number line to add or subtract
7. Estimate Fraction Sums and Differences

- Use number lines and benchmark fractions to estimate fraction sums and differences
 - 8. Model Addition and Subtraction of Mixed Numbers
 - Use models and equivalent fractions to add and subtract mixed numbers
 - 9. Add Mixed Numbers
 - Use equivalent fractions and properties of operations to add mixed numbers with like denominators
 - 10. Subtract Mixed Numbers
 - Use equivalent fractions, properties of operations, and the relationship between addition and subtraction to subtract mixed numbers with like denominators
 - 11. Math Practices: Model with Math
 - Use previously learned concepts and skills to represent and solve problems
 - 12. Addition and Subtraction of Fractions Unit Test
- 7. Multiplication Concepts with Fractions**
1. Fractions as Multiples of Unit Fractions
 - Use a model to understand a fraction as a multiple of a unit fraction
 2. Multiply a Fraction by a Whole Number
 - Use models to multiply fractions by whole numbers
 - Use symbols and equations to multiply a fraction by a whole number
 3. Multiply a Whole Number and a Mixed Number
 - Use drawings and equations to represent and solve problems involving a whole number and a mixed number
 4. Solve Time Problems
 - Use the four operations to solve problems involving time
 5. Math Practices: Model with Math
 - Use previously learned concepts and skills to represent and solve problems
 6. Multiplication Concepts with Fractions Unit Test
- 8. Show and Interpret Data on Line Plots**
1. Read Line Plots
 - Read and interpret data using line plots
 2. Make Line Plots
 - Represent data using line plots and interpret data in line plots to solve problems
 3. Use Line Plots to Solve Problems
 - Solve problems involving line plots and fractions
 4. Math Practices: Critique Reasoning
 - Critique the reasoning of others using an understanding of line plots
 5. Show and Interpret Data on Line Plots Unit Test
- 9. Understand and Compare Decimals**
1. Fractions and Decimals
 - Relate fractions and decimals with denominators of 10 and 100

- Locate and describe fractions and decimals on number lines
- 2. Compare Decimals
 - Compare decimals by reasoning about their size
- 3. Add Fractions with Denominators of 10 and 100
 - Add fractions with denominators of 10 and 100 by using equivalent fractions
- 4. Solve Word Problems Involving Money
 - Use fractions or decimals to solve word problems involving money
- 5. Math Practices: Look For and Use Structure
 - Use the structure of the place-value system for decimals to solve problems
- 6. Understand and Compare Decimals Unit Test

10. Find Equivalence in Units of Measure

1. Equivalence with Customary Units of Length
 - Recognize the relative size of customary units of length and convert from a larger unit to a smaller unit
2. Equivalence with Customary Units of Capacity
 - Recognize the relative size of customary units of capacity and convert from a larger unit to a smaller unit
3. Equivalence with Customary Units of Weight
 - Recognize the relative size of customary units of weight and convert from a larger unit to a smaller unit
4. Equivalence with Metric Units of Length
 - Recognize the relative size of metric units of length and convert from a larger unit to a smaller unit
5. Equivalence with Metric Units of Capacity and Mass
 - Recognize the relative size of metric units of capacity and mass, and convert from a larger unit to a smaller unit
6. Solve Perimeter and Area Problems
 - Find the unknown length or width of a rectangle using the known area or perimeter
7. Math Practices: Precision
 - Be precise when solving measurement problems
8. Find Equivalence in Units of Measure Unit Test

11. Geometric Measurement

1. Lines, Rays, and Angles
 - Recognize and draw lines, rays, and angles with different measures.
2. Measure and Draw Angles
 - Use a protractor to measure and draw angles
3. Lines
 - Draw and identify perpendicular, parallel, and intersecting lines
4. Classify Triangles
 - Classify triangles by line segments and angles

5. Classify Quadrilaterals

- Classify quadrilaterals by lines and angles

6. Line Symmetry

- Recognize and draw lines of symmetry; identify line symmetric figures

7. Math Practices: Critique Reasoning

- Use understanding of two-dimensional shapes to critique the reasoning of others

8. Geometric Measurement Unit Test

Math 4

Math 4 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In Math 4 A, the student will learn mathematical concepts related to place value, adding and subtracting multi-digit whole numbers, strategies for multiplication and division, factors, multiples, algebra, and patterns. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

In Math 4 B, the student will learn mathematical concepts related to fraction equivalence, adding, subtracting, and multiplying fractions, comparing decimals, interpreting data, angles, lines, shapes, and measurement. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

Course Outline

Math 4 A

1. Welcome to Math 4

1. Get Ready to Learn Math

- Meet Clara the cat, your learning buddy for the course
- Describe the different parts of a lesson
- Describe the different types of assessments
- Locate and describe lesson icons and assets

2. Generalize Place Value Understanding

1. Numbers Through One Million

- Read and write numbers in expanded form, with numerals, and using number names

2. Place Value Relationships

- Recognize the relationship between adjacent digits in a multi-digit number

3. Compare Whole Numbers

- Use place value to compare multi-digit numbers

4. Round Whole Numbers

- Use place value to round multi-digit numbers

5. Math Practices: Construct Arguments
 - Use previously learned concepts and skills to construct arguments about place value
6. Generalize Place Value Understanding Unit Test

3. **Fluently Add and Subtract Multi-Digit Numbers**

1. Mental Math: Find Sums and Differences
 - Add and subtract whole numbers mentally using a variety of methods
2. Mental Math: Estimate Sums and Differences
 - Round greater whole numbers to estimate sums and differences
3. Add Whole Numbers
 - Add numbers to one million with and without regrouping using the standard algorithm
4. Subtract Whole Numbers
 - Use place value and an algorithm to subtract whole numbers
5. Subtract Across Zeros
 - Use number sense and regrouping to subtract across zeros
6. Math Practices and Problem Solving: Reasoning
 - Use previously learned concepts and skills to reason abstractly and make sense of quantities and their relationships in problem situations
7. Unit Test

4. **Multiply by 1-Digit Numbers**

1. Multiply by Multiples of 10, 100, and 1,000
 - Multiply multiples of 10, 100, and 1,000 using mental math and place-value strategies
2. Round to Estimate Products
 - Use rounding to estimate products and check if answers are reasonable
3. The Distributive Property
 - Use the Distributive Property to multiply larger numbers
4. Mental Math Strategies for Multiplication
 - Use place value and properties of operations to multiply mentally
5. Arrays and Partial Products
 - Use arrays and partial products to multiply 3- and 4-digit numbers by 1-digit numbers
6. Multiply by 1-Digit Numbers: Partial Products
 - Use place value and partial products to multiply 3- and 4-digit numbers by 1-digit numbers
7. Multiply 2- and 3-Digit Numbers by 1-Digit Numbers
 - Use place value and the standard algorithm to multiply 2- and 3-digit numbers by 1-digit numbers
8. Multiply 4-Digit by 1-Digit Numbers
 - Use the standard algorithm to multiply 4-digit numbers by 1-digit numbers
9. Multiply by 1-Digit Numbers
 - Use the standard algorithm to multiply 2-, 3-, and 4-digit numbers by 1-digit numbers. Estimate to check if answers are reasonable.

10. Math Practices: Model with Math

- Use previously learned concepts and skills to represent and solve problems

11. Multiply by 1-Digit Numbers Unit Test

5. Multiply by 2-Digit Numbers

1. Mental Math: Multiply Multiples of 10

- Use mental math strategies to multiply 2-digit by 2-digit multiples of ten

2. Multiply 2-Digit Numbers by Multiples of 10

- Use models and properties of operations to multiply 2-digit numbers by multiples of ten

3. Estimate: Use Rounding

- Estimate products for 2-digit by 2-digit multiplication by rounding the factors to multiples of ten

4. Use Compatible Numbers

- Use compatible numbers to estimate products of 2-digit by 2-digit multiplication problems

5. Arrays and Partial Products

- Use arrays, place value, partial products and properties of operations to multiply two 2-digit numbers

6. Multiply Using the Distributive Property

- Use the Distributive Property and an area model to multiply two 2-digit numbers

7. Multiply by 2-Digit Numbers: Partial Products

- Use place value and partial products to calculate products of 2-digit by 2-digit multiplication problems

8. Multiply 2-Digit Numbers by Multiples of 10

- Use area models and place-value strategies to multiply 2-digit numbers by multiples of 10

9. Multiply 2-Digit by 2-Digit Numbers

- Use the expanded and the standard algorithm to multiply 2-digit by 2-digit numbers and estimate to check if the products are reasonable
- Use models and algorithms to solve 2-digit by 2-digit multiplication problems

10. Math Practices: Make Sense and Persevere

- Make sense of problems and persevere in solving them

11. Multiply by 2-Digit Numbers Unit Test

6. Divide by 1-Digit Numbers

1. Mental Math: Find Quotients

- Use mental-math and place-value strategies to divide multiples of 10 and 100 by 1-digit divisors

2. Mental Math: Estimate Quotients

- Use compatible numbers to estimate quotients

3. Estimate Quotients for Greater Dividends

- Use place-value patterns and division facts to estimate quotients for 4-digit dividends

4. Interpret Remainders

- Solve division problems and interpret remainders

5. Division as Sharing
 - Use place value and drawings to divide 2- and 3- digit numbers by 1-digit numbers
6. Use Partial Quotients to Divide
 - Use partial quotients to divide
7. Use Partial Quotients to Divide Greater Dividends
 - Use partial quotients and place-value understandings to divide with greater dividends
8. Divide with 1-Digit Numbers
 - Divide 2- and 3-digit numbers by 1-digit numbers using the standard division algorithm
 - Divide 4-digit numbers by 1-digit numbers using the standard division algorithm
9. Math Practices: Model with Math
 - Use previously-learned concepts and skills to model and solve problems
10. Divide by 1-Digit Numbers Unit Test

7. Solve Problems with Whole Numbers

1. Solve Comparison Situations
 - Interpret comparisons as multiplication or addition equations
 - Use multiplication and division to compare two quantities
2. Solve Multi-Step Problems
 - Solve two-step problems by finding and solving the hidden question first
3. Solve More Multi-Step Problems
 - Solve multi-step problems by finding and solving hidden questions first
4. Math Practices: Make Sense and Persevere
 - Make sense of a multi-step problem and keep working until it is solved
5. Solve Problems with Whole Numbers Unit Test

8. Algebra: Generate and Analyze Patterns

1. Number Sentences
 - Create or extend a number sequence based on a rule
 - Identify features of the pattern in the sequence that are not described by the rule
2. Patterns: Number Rules
 - Use a rule to extend a number pattern and solve a problem
 - Identify features of the pattern
3. Patterns: Repeating Shapes
 - Generate a shape pattern that follows a given rule and predict a shape in the pattern
4. Math Practices: Look for and Use Structure
 - Solve problems by using patterns
5. Algebra: Generate and Analyze Patterns Unit Test

9. Factors and Multiples

1. Understand Factors
 - Use arrays to find the factors of a given whole number
2. Factors

- Use multiplication to find all the factor pairs for a whole number
- 3. Prime and Composite Numbers
 - Use factors to determine whether a whole number greater than 1 is a prime or composite
- 4. Multiples
 - Use multiplication to find multiples of a given number
- 5. Math Practices: Repeated Reasoning
 - Use repeated reasoning to generalize how to solve problems that are similar
- 6. Factors and Multiples Unit Test

Math 4 B

1. Welcome to Math 4

1. Get Ready to Learn Math
 - Meet Clara the cat, your learning buddy for the course
 - Describe the different parts of a lesson
 - Describe the different types of assessments
 - Locate and describe lesson icons and assets

2. Fraction Equivalence and Ordering

1. Equivalent Fractions: Area Models
 - Use area models to recognize and generate equivalent fractions
2. Equivalent Fractions: Number Lines
 - Use a number line to locate and identify equivalent fractions
3. Generate Equivalent Fractions: Multiplication
 - Use multiplication to find equivalent fractions
4. Generate Equivalent Fractions: Division
 - Use division to find equivalent fractions
5. Compare Fractions
 - Use benchmarks, area models, and number lines to compare fractions
 - Use models or rename fractions to compare
6. Math Practices: Construct Arguments
 - Construct arguments about fractions
7. Fraction Equivalence and Ordering Unit Test

3. Addition and Subtraction of Fractions

1. Model Addition of Fractions
 - Use fraction strips and number lines to add fractions
2. Decompose Fractions
 - Decompose a fraction or mixed number into a sum of fractions in more than one way
3. Add Fractions with Like Denominators
 - Solve problems involving joining parts of the same whole by adding fractions
4. Model Subtraction of Fractions
 - Use tools such as fraction strips, area models, and number lines to subtract fractions

5. Subtract Fractions with Like Denominators
 - Solve problems involving separating parts of the same whole by subtracting fractions
6. Add and Subtract Fractions with Like Denominators
 - Count forward or backward on a number line to add or subtract
7. Estimate Fraction Sums and Differences
 - Use number lines and benchmark fractions to estimate fraction sums and differences
8. Model Addition and Subtraction of Mixed Numbers
 - Use models and equivalent fractions to add and subtract mixed numbers
9. Add Mixed Numbers
 - Use equivalent fractions and properties of operations to add mixed numbers with like denominators
10. Subtract Mixed Numbers
 - Use equivalent fractions, properties of operations, and the relationship between addition and subtraction to subtract mixed numbers with like denominators
11. Math Practices: Model with Math
 - Use previously learned concepts and skills to represent and solve problems
12. Addition and Subtraction of Fractions Unit Test

4. Multiplication Concepts with Fractions

1. Fractions as Multiples of Unit Fractions
 - Use a model to understand a fraction as a multiple of a unit fraction
2. Multiply a Fraction by a Whole Number
 - Use models to multiply fractions by whole numbers
 - Use symbols and equations to multiply a fraction by a whole number
3. Multiply a Whole Number and a Mixed Number
 - Use drawings and equations to represent and solve problems involving a whole number and a mixed number
4. Solve Time Problems
 - Use the four operations to solve problems involving time
5. Math Practices: Model with Math
 - Use previously learned concepts and skills to represent and solve problems
6. Multiplication Concepts with Fractions Unit Test

5. Understand and Compare Decimals

1. Fractions and Decimals
 - Relate fractions and decimals with denominators of 10 and 100
 - Locate and describe fractions and decimals on number lines
2. Compare Decimals
 - Compare decimals by reasoning about their size
3. Add Fractions with Denominators of 10 and 100
 - Add fractions with denominators of 10 and 100 by using equivalent fractions

4. Solve Word Problems Involving Money

- Use fractions or decimals to solve word problems involving money

5. Math Practices: Look for and Use Structure

- Use the structure of the place-value system for decimals to solve problems

6. Understand and Compare Decimals Unit Test

6. Show and Interpret Data on Line Plots

1. Read Line Plots

- Read and interpret data using line plots

2. Make Line Plots

- Represent data using line plots and interpret data in line plots to solve problems

3. Use Line Plots to Solve Problems

- Solve problems involving line plots and fractions

4. Math Practices: Critique Reasoning

- Critique the reasoning of others using an understanding of line plots

5. Show and Interpret Data on Line Plots Unit Test

7. Angles and Angle Measurement

1. Lines, Rays, and Angles

- Recognize and draw lines, rays, and angles with different measures.

2. Understand Angles and Unit Angles

- Find the measure of an angle that turns through a fraction of a circle

3. Measure with Unit Angles

- Use known angle measures to measure unknown angles

4. Measure and Draw Angles

- Use a protractor to measure and draw angles

5. Add and Subtract Angle Measures

- Use addition and subtraction to solve problems with unknown angle measures

6. Math Practices: Use Appropriate Tools

- Use appropriate tools, such as a protractor and ruler, to solve problems

7. Angles and Angle Measurement Unit Test

8. Lines, Angles, and Shapes

1. Lines

- Draw and identify perpendicular, parallel, and intersecting lines

2. Classify Triangles

- Classify triangles by line segments and angles

3. Classify Quadrilaterals

- Classify quadrilaterals by lines and angles

4. Line Symmetry

- Recognize and draw lines of symmetry; identify line symmetric figures

5. Draw Shapes with Line Symmetry

- Draw figures that have symmetry

6. Math Practices: Critique Reasoning

- Use understanding of two-dimensional shapes to critique the reasoning of others

7. Lines, Angles, and Shapes Unit Test

9. Find Equivalence in Units of Measure

1. Equivalence with Customary Units of Length

- Recognize the relative size of customary units of length and convert from a larger unit to a smaller unit

2. Equivalence with Customary Units of Capacity

- Recognize the relative size of customary units of capacity and convert from a larger unit to a smaller unit

3. Equivalence with Customary Units of Weight

- Recognize the relative size of customary units of weight and convert from a larger unit to a smaller unit

4. Equivalence with Metric Units of Length

- Recognize the relative size of metric units of length and convert from a larger unit to a smaller unit

5. Equivalence with Metric Units of Capacity and Mass

- Recognize the relative size of metric units of capacity and mass, and convert from a larger unit to a smaller unit

6. Solve Perimeter and Area Problems

- Find the unknown length or width of a rectangle using the known area or perimeter

7. Math Practices: Precision

- Be precise when solving measurement problems

8. Find Equivalence in Units of Measure Unit Test

10. Step Up to Grade 5

1. Understand Decimal Place Value

- Read and write numbers with decimals through thousandths using standard form, expanded form, and number names; identify equivalent decimals

2. Compare Decimals

- Use place value to compare decimals through thousandths

3. Use Models to Add and Subtract Decimals

- Model sums and differences of decimals

4. Estimate Products of a Decimal and a Whole Number

- Use rounding and compatible numbers to estimate the product of a decimal and a whole number

Math 4 Accelerated

Accelerated Math 4 A/B

Course Summary: 170 hours

Instructional Activities: Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary: In Accelerated Math 4 A, the student will learn mathematical concepts related to place value, adding and subtracting multi-digit whole numbers, adding and subtracting decimals, using models to multiply and divide, the coordinate plane, algebra, patterns, and relationships.

Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

In Accelerated Math 4 B, the student will learn mathematical concepts related to angles, shapes and measurement, 2D figures, operations with fractions, volume, converting measurements, interpreting data, equivalent expressions, the coordinate plane, patterns and relationships.

Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

Course Outline

Accelerated Math 4 A

1. Welcome to Accelerated Math 4
 1. Welcome to Accelerated Math 4
 - Meet Clara the cat, your learning buddy for the course
 - Describe the different parts of a lesson
 - Describe the different types of assessments
 - Locate and describe lesson icons and assets
 - Describe the Making a Difference with Math Project
 2. Generalize Place Value Understanding
 1. Numbers Through One Million
 2. Place Value Relationships
 - Recognize the relationship between adjacent digits in a multi-digit number
 3. Compare Whole Numbers
 - Use place value to compare multi-digit numbers
 4. Round Whole Numbers
 - Use place value to round multi-digit numbers
 5. Math Practices: Construct Arguments
 - Use previously learned concepts and skills to construct arguments about place value
 6. Generalize Place Value Understanding Test

3. **Add and Subtract Multi-Digit Numbers**

1. Mental Math: Find Sums and Differences
 - Add and subtract whole numbers mentally using a variety of methods
2. Mental Math: Estimate Sums and Differences
 - Round greater whole numbers to estimate sums and differences
3. Add Whole Numbers
 - Add numbers to one million with and without regrouping using the standard algorithm
4. Subtract Whole Numbers
 - Use place value and an algorithm to subtract whole numbers
5. Subtract Across Zeros
 - Use number sense and regrouping to subtract across zeros
6. Math Practices: Reasoning
 - Use previously learned concepts and skills to reason abstractly and make sense of quantities and their relationships in problem situations
7. Add and Subtract Multi-Digit Numbers Test

4. **Understand Decimal Place Value**

1. Patterns with Exponents and Powers of 10
 - Use exponents to write powers of 10 and calculate products
2. Understand Whole-Number Place Value
 - Read and write whole numbers using standard form, expanded form, and number names
3. Decimals to Thousandths
 - Represent decimals to thousandths as fractions and fractions with denominators of 1,000 as decimals
4. Understand Decimal Place Value
 - Read and write decimals through thousandths in different ways
5. Compare Decimals
 - Use place value to compare decimals through thousandths
6. Round Decimals
 - Round decimals to different places
7. Math Practices: Look For and Use Structure
 - Use the structure of the decimal place value system in order to solve problems involving patterns
8. Understand Place Value Unit Test

5. **Add and Subtract Decimals to Hundredths**

1. Mental Math
 - Use properties of addition and strategies to solve problems mentally
2. Estimate and Model Decimal Sums and Differences
 - Use rounding or compatible numbers to estimate sums and differences
 - Model sums and differences of decimals

3. Add Decimals

- Add decimals to the hundredths using the standard algorithm

4. Subtract Decimals

- Subtract decimals to the hundredths using the standard algorithm

5. Add and Subtract Decimals

- Add and subtract decimals

6. Math Practices: Model with Math

- Use prior math knowledge and equations or bar diagrams to solve problems

7. Add and Subtract Decimals to Hundredths Unit Test

6. Multiply Multi-Digit Whole Numbers

1. Multiply Greater Numbers by Powers of 10

- Use place-value understandings and patterns to mentally multiply whole numbers and powers of 10

2. Estimate products

- Use rounding and compatible numbers to estimate products

3. Multiply 3-Digit by 2-Digit Numbers

- Multiply 3-digit by 2-digit numbers by combining equal groups and adding partial products

4. Multiply Whole Numbers with Zeros

- Use knowledge about place value and multiplying with 2-digit and 3-digit numbers to multiply with zeros

5. Multiply Multi-Digit Numbers

- Use properties and the standard algorithm for multiplication to find the product of multi-digit numbers

6. Solve Word Problems Using Multiplication

- Use models and strategies to solve word problems

7. Math Practices: Critique Reasoning

- Critique the reasoning of others by asking questions, looking for flaws, and using prior knowledge of estimating products

8. Multiply Multi-Digit Whole Numbers Unit Test

7. Strategies to Multiply Decimals

1. Multiply Decimals by Powers of 10

- Use knowledge about place value and patterns to find the product of a decimal number and a power of 10

2. Estimate Decimal and Whole Number Products

- Use rounding and compatible numbers to estimate the product of a decimal and a whole number
- Use models to represent multiplying a decimal and a whole number

3. Multiply a Decimal by a Whole Number

- Use place-value understanding and the standard multiplication algorithm to multiply a decimal by a whole number

4. Use Models to Multiply a Decimal and a Decimal
 - Use grids to model decimals and find the product of a decimal and a decimal
5. Multiply Decimals Using Partial Products
 - Multiply decimals using partial products and models
6. Use Number Sense to Multiply Decimals
 - Use number sense and reasoning to place the decimal point in a product
7. Math Practices: Model with Math
 - Use previously-learned concepts and skills to represent and solve problems
8. Strategies to Multiply Decimals Unit Test

8. Strategies to Divide Whole Numbers

1. Use Patterns and Mental Math to Divide
 - Use place-value patterns and mental math to find quotients
2. Estimate 2-Digit Divisor Quotients
 - Use compatible numbers and place-value patterns to estimate quotients
 - Use models to find quotients
3. Use Partial Quotients to Divide
 - Solve division problems using partial quotients
4. Divide by Multiples of 10
 - Find the quotient when the divisor is a multiple of 10
5. Estimate to Place the First Digit of a Quotient
 - Decide where to place the first digit of the quotient when dividing whole numbers
6. Divide by 2-Digit Divisors
 - Use estimation to decide whether a quotient is reasonable when dividing a 2-digit divisor
7. Math Practices: Make Sense and Persevere
 - Make sense of problems and keep working
8. Strategies to Divide Whole Numbers Unit Test

9. Strategies to Divide Decimals

1. Patterns for Dividing with Decimals
 - Use mental math and place-value patterns to divide a decimal by a power of 10
2. Estimate and Model Decimal Quotients
 - Use reason and strategies such as rounding and compatible numbers to estimate quotients in problems with decimals
 - Use models to help find quotients in problems involving decimals
3. Divide by a 1-Digit Whole Number
 - Use the standard algorithm for division to divide decimals by a whole number
4. Divide by a 2-Digit Whole Number

- Use models to visualize the relationship between division and multiplication to divide decimals by a 2-digit whole number
- 5. Use Number Sense to Divide Decimals
 - Use number sense and reasoning to place the decimal point in the quotient when dividing two decimals
- 6. Divide by a Decimal
 - Use the standard algorithm and place-value patterns to divide a decimal by another decimal
 - Use the standard algorithm to divide decimals, annexing zeros as needed
- 7. Math Practices: Reasoning
 - Use reasoning to solve problems by making sense of quantities and relationships in the situation
- 8. Strategies to Divide Decimals Unit Test

10. Classify Two-Dimensional Figures

1. Classify Triangles
 - Classify triangles by their angles and sides
2. Classify Quadrilaterals
 - Classify quadrilaterals by their properties
3. Continue to Classify Quadrilaterals
 - Classify quadrilaterals using a hierarchy
4. Math Practices: Construct Arguments
 - Construct arguments about geometric figures
5. Classify Two-Dimensional Figures Unit Test

Accelerated Math 4 B

1. Welcome to Accelerated Math 4

1. Welcome to Accelerated Math 4
 - Meet Clara the cat, your learning buddy for the course
 - Describe the different parts of a lesson
 - Describe the different types of assessments
 - Locate and describe lesson icons and assets
 - Describe the Making a Difference with Math Project

2. Add and Subtract Fractions

1. Estimate Sums and Differences of Fractions
 - Estimate sums and differences of fractions by using the nearest half or whole number
2. Find Common Denominators
 - Find common denominators for fractions with unlike denominators
3. Add Fractions with Unlike Denominators
 - Add fractions with unlike denominators using equivalent fractions with a common denominator
4. Subtract Fractions with Unlike Denominators

- Subtract fractions with unlike denominators
- 5. Add and Subtract with Equivalent Fractions
 - Write equivalent fractions to add and subtract fractions with unlike denominators
- 6. Estimate Sums and Differences of Mixed Numbers
 - Estimate sums and differences of fractions and mixed numbers
- 7. Add Mixed Numbers
 - Add mixed numbers using models
 - Add mixed numbers using equivalent fractions and a common denominator
- 8. Subtract Mixed Numbers
 - Use models to subtract mixed numbers
 - Subtract mixed numbers using equivalent fractions and a common denominator
- 9. Add and Subtract Mixed Numbers
 - Add and subtract mixed numbers using equivalent fractions and a common denominator
- 10. Math Practices: Model with Math
 - Represent a problem situation with a mathematical model
- 11. Add and Subtract Fractions Unit Test

3. **Multiply Fractions**

1. Multiply a Whole Number by a Fraction
 - Multiply a whole number by a fraction
 - Multiply a fraction by a whole number
2. Multiply Fractions and Whole Numbers
 - Multiply fractions and whole numbers
3. Multiply Two Fractions
 - Use models to multiply two fractions
 - Multiply two fractions
4. Area of a Rectangle
 - Find the area of a rectangle using fractions and diagrams
5. Multiply Mixed Numbers
 - Use models, equations, and previously learned strategies to multiply mixed numbers
6. Multiplication as Scaling
 - Compare the size of the product to the size of one factor without multiplying to consider multiplication as scaling
7. Math Practices: Make Sense and Persevere
 - Use previously learned knowledge to make sense of problems and persevere in solving them
8. Multiply Fractions Unit Test

4. **Divide Fractions**

1. Fractions and Division
 - Understand how fractions are related to division

2. Fractions and Mixed Numbers as Quotients

- Implement division of fractions to show quotients as fractions and mixed numbers

3. Use Multiplication to Divide

- Use multiplication to divide a whole number by a unit fraction

4. Divide Whole Numbers by Unit Fractions

- Use models such as pictorial models or a number line to show dividing a whole number by a unit fraction

5. Divide Unit Fractions by Non-Zero Whole Numbers

- Use models to divide unit fractions by nonzero whole numbers

6. Divide Whole Numbers and Unit Fractions

- Use models to divide whole numbers and unit fractions. Check your answer using multiplication

7. Solve Problems Using Division

- Solve multi-step problems involving division with unit fractions

8. Math Practices: Repeated Reasoning

- Notice repetition in calculations and generalize about how to divide whole numbers and unit fractions

9. Divide Fractions Unit Test

5. Understand Volume Concepts

1. Model Volume

- Find the volume of solid figures

2. Develop a Volume Formula

- Find the volume of rectangular prisms using a formula

3. Volumes of Prisms

- Find the volume of prisms in different ways

4. Combine Volumes of Prisms

- Find the volume of a solid figure that is the combination of two or more rectangular prisms

5. Solve Word Problems Using Volume

- Use models, prior knowledge of volumes, and previously learned strategies to solve word problems involving volume

6. Math Practices: Use Appropriate Tools

- Use previously learned knowledge about volumes to choose the appropriate tools to solve volume problems

7. Understand Volume Concepts Unit Test

6. Convert Measurements

1. Convert Customary Units of Length

- Convert customary units of length

2. Convert Customary Units of Capacity

- Convert customary units of capacity

3. Convert Customary Units of Weight

- Convert customary units of weight
- 4. Convert Metric Units of Length
 - Convert metric units of length
- 5. Convert Metric Units of Capacity
 - Convert metric units of capacity
- 6. Convert Metric Units of Mass
 - Convert metric units of mass
- 7. Solve Word Problems Using Measurement Conversions
 - Solve real-world problems with measurement conversions
- 8. Math Practices: Precision
 - Be precise when solving measurement problems
- 9. Convert Measurements Unit Test

7. Represent and Interpret Data

1. Analyze Line Plots
 - Read and analyze line plots
2. Make Line Plots
 - Organize and display data in a line plot
3. Solve Word Problems Using Measurement Data
 - Solve problems using data in a line plot
4. Math Practices: Critique Reasoning
 - Critique the reasoning of others using understanding of line plots and fractions
5. Represent and Interpret Data Unit Test

8. Algebra: Numerical Expressions

1. Order of Operations
 - Use the order of operations to evaluate expressions
2. Evaluate Expressions
 - Evaluate expressions with parentheses, brackets, and braces
3. Write Numerical Expressions
 - Write simple expressions that show calculations with numbers
4. Interpret Numerical Expressions
 - Interpret numerical expressions without evaluating them
5. Math Practices: Reasoning
 - Use reasoning to solve problems by making sense of quantities and relationships in the situation
6. Algebra: Numerical Expressions Unit Test

9. Graph Points on the Coordinate Plane

1. The Coordinate System
 - Locate points on a coordinate grid

2. Graph Data Using Ordered Pairs

- Graph points on a coordinate grid

3. Solve Problems Using Ordered Pairs

- Solve real-world problems by graphing points

4. Math Practices: Reasoning

- Use reasoning to solve problems by making sense of quantities and relationships in the situation

5. Graph Points on the Coordinate Plane Unit Test

10. Algebra: Patterns and Relationships

1. Numerical Patterns

- Analyze numerical patterns

2. More Numerical Patterns

- Use tables to identify relationships between patterns

3. Analyze and Graph Relationships

- Analyze patterns and graph ordered pairs generated from number sequences

4. Math Practices: Make Sense and Persevere

- Make sense of problems and persevere in solving them

5. Algebra: Patterns and Relationships Unit Test

Math 5

Math 5 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In Math 5 A, the student will learn mathematical concepts related to place value, adding and subtracting decimals, using models to multiply and divide, the coordinate plane, algebra, patterns, and relationships. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

In Math 5 B, the student will learn mathematical concepts related to 2-D figures, operations with fractions, volume, converting measurements, interpreting data, and equivalent expressions. Concepts are developed using mathematical processes of problem-solving, reasoning, communicating, representing, and making connections. Building both conceptual knowledge and procedural fluency supports the student's development of mathematical thinking and reasoning in solving various problems of authentic contexts.

Course Outline

Math 5 A

1. Welcome to Math 5

1. Get Ready to Learn Math
 - Meet Clara the cat, your guide for the course
 - Describe the different parts of a lesson
 - Describe the different types of assessments
 - Locate and describe lesson icons and assets

2. Classify Two-Dimensional Figures

1. Classify Triangles
 - Classify triangles by their angles and sides
2. Classify Quadrilaterals
 - Classify quadrilaterals by their properties
3. Continue to Classify Quadrilaterals
 - Classify quadrilaterals using a hierarchy
4. Math Practices: Construct Arguments
 - Construct arguments about geometric figures
5. Classify Two-Dimensional Figures Unit Test

3. Understand Place Value

1. Patterns with Exponents and Powers of 10
 - Use exponents to write powers of 10 and calculate products
2. Understand Whole-Number Place Value
 - Read and write whole numbers using standard form, expanded form, and number names
3. Decimals to Thousandths
 - Represent decimals to thousandths as fractions and fractions with denominators of 1,000 as decimals
4. Understand Decimal Place Value
 - Read and write decimals through thousandths in different ways
5. Compare Decimals
 - Use place value to compare decimals through thousandths
6. Round Decimals
 - Round decimals to different places
7. Math Practices: Look For and Use Structure
 - Use the structure of the decimal place value system in order to solve problems involving patterns
8. Understand Place Value Unit Test

4. Add and Subtract Decimals to Hundredths

1. Mental Math
 - Use properties of addition and strategies to solve problems mentally
2. Estimate and Model Decimal Sums and Differences

- Use rounding or compatible numbers to estimate sums and differences
 - Model sums and differences of decimals
3. Add Decimals
 - Add decimals to the hundredths using the standard algorithm
 4. Subtract Decimals
 - Subtract decimals to the hundredths using the standard algorithm
 5. Add and Subtract Decimals
 - Add and subtract decimals
 6. Math Practices: Model with Math
 - Use prior math knowledge and equations or bar diagrams to solve problems
 7. Add and Subtract Decimals to Hundredths Unit Test
- 5. Multiply Multi-Digit Whole Numbers**
1. Multiply Greater Numbers by Power of 10
 - Use place-value understandings and patterns to mentally multiply whole numbers and powers of 10
 2. Estimate Products
 - Use rounding and compatible numbers to estimate products
 3. Multiply 3-Digit by 2-Digit Numbers
 - Multiply 3-digit by 2-digit numbers by combining equal groups and adding partial products
 4. Multiply Whole Numbers with Zeros
 - Use knowledge about place value and multiplying with 2-digit and 3-digit numbers to multiply with zeros
 5. Multiply Multi-Digit Numbers
 - Use properties and the standard algorithm for multiplication to find the product of multi-digit numbers
 6. Solve Word Problems Using Multiplication
 - Use models and strategies to solve word problems
 7. Math Practices: Critique Reasoning
 - Critique the reasoning of others by asking questions, looking for flaws, and using prior knowledge of estimating products
 8. Multiply Multi-Digit Whole Numbers Unit Test
- 6. Strategies to Multiply Decimals**
1. Multiply Decimals by Powers of 10
 - Use knowledge about place value and patterns to find the product of a decimal number and a power of 10
 2. Estimate Decimal and Whole Number Products
 - Use rounding and compatible numbers to estimate the product of a decimal and a whole number
 - Use models to represent multiplying a decimal and a whole number
 3. Multiply a Decimal by a Whole Number

- Use place-value understanding and the standard multiplication algorithm to multiply a decimal by a whole number
- 4. Use Models to Multiply a Decimal and a Decimal
 - Use grids to model decimals and find the product of a decimal and a decimal
- 5. Multiply Decimals Using Partial Products
 - Multiply decimals using partial products and models
- 6. Use Properties to Multiply Decimals
 - Use properties to multiply decimals
- 7. Use Number Sense to Multiply Decimals
 - Use number sense and reasoning to place the decimal point in a product
- 8. Multiply Decimals
 - Multiply decimals using the standard algorithm for multiplication and multiplication strategies
- 9. Math Practices: Model with Math
 - Use previously-learned concepts and skills to represent and solve problems
- 10. Strategies to Multiply Decimals Unit Test

7. Strategies to Divide Whole Numbers

- 1. Use Patterns and Mental Math to Divide
 - Use place-value patterns and mental math to find quotients
- 2. Estimate and Model 2-Digit Divisor Quotients
 - Use compatible numbers and place-value patterns to estimate quotients
 - Use models to find quotients
- 3. Use Partial Quotients to Divide
 - Solve division problems using partial quotients
- 4. Divide by Multiples of 10
 - Find the quotient when the divisor is a multiple of 10
- 5. Estimate to Place the First Digit of a Quotient
 - Decide where to place the first digit of the quotient when dividing whole numbers
- 6. Divide by 2-Digit Divisors
 - Use estimation to decide whether a quotient is reasonable when dividing a 2-digit divisor
- 7. Math Practices: Make Sense and Persevere
 - Make sense of problems and keep working
- 8. Strategies to Divide Whole Numbers Unit Test

8. Strategies to Divide Decimals

- 1. Patterns for Dividing with Decimals
 - Use mental math and place-value patterns to divide a decimal by a power of 10
- 2. Estimate and Model Decimal Quotients
 - Use reason and strategies such as rounding and compatible numbers to estimate quotients in problems with decimals
 - Use models to help find quotients in problems involving decimals

3. Divide by a 1-Digit Whole Number
 - Use the standard algorithm for division to divide decimals by a whole number
4. Divide by a 2-Digit Whole Number
 - Use models to visualize the relationship between division and multiplication to divide decimals by a 2-digit whole number
5. Use Number Sense to Divide Decimals
 - Use number sense and reasoning to place the decimal point in the quotient when dividing two decimals
6. Divide by a Decimal
 - Use the standard algorithm and place-value patterns to divide a decimal by another decimal
 - Use the standard algorithm to divide decimals, annexing zeros as needed
7. Math Practices: Reasoning
 - Use reasoning to solve problems by making sense of quantities and relationships in the situation
8. Strategies to Divide Decimals Unit Test
- 9. Graph Points on the Coordinate Plane**
 1. The Coordinate System
 - Locate points on a coordinate grid
 2. Graph Data Using Ordered Pairs
 - Graph points on a coordinate grid
 3. Solve Problems Using Ordered Pairs
 - Solve real-world problems by graphing points
 4. Math Practices: Reasoning
 - Use reasoning to solve problems by making sense of quantities and relationships in the situation
 5. Graph Points on the Coordinate Plane Unit Test

Math 5 B

- 1. Welcome to Math 5**
 1. Get Ready to Learn Math
 - Meet Clara the cat, your guide for the course
 - Describe the different parts of a lesson
 - Describe the different types of assessments
 - Locate and describe lesson icons and assets
- 2. Add and Subtract Fractions**
 1. Estimate Sums and Differences of Fractions
 - Estimate sums and differences of fractions by using the nearest half or whole number
 2. Find Common Denominators
 - Find common denominators for fractions with unlike denominators
 3. Add Fractions with Unlike Denominators

- Add fractions with unlike denominators using equivalent fractions with a common denominator
 - 4. Subtract Fractions with Unlike Denominators
 - Subtract fractions with unlike denominators
 - 5. Add and Subtract with Equivalent Fractions
 - Write equivalent fractions to add and subtract fractions with unlike denominators
 - 6. Estimate Sums and Differences of Mixed Numbers
 - Estimate sums and differences of fractions and mixed numbers
 - 7. Add Mixed Numbers
 - Add mixed numbers using models
 - Add mixed numbers using equivalent fractions and a common denominator
 - 8. Subtract Mixed Numbers
 - Use models to subtract mixed numbers
 - Subtract mixed numbers using equivalent fractions and a common denominator
 - 9. Add and Subtract Mixed Numbers
 - Add and subtract mixed numbers using equivalent fractions and a common denominator
 - 10. Math Practices: Model with Math
 - Represent a problem situation with a mathematical model
 - 11. Add and Subtract Fractions Unit Test
- 3. Multiply Fractions**
- 1. Multiply a Whole Number by a Fraction
 - Multiply a whole number by a fraction
 - Multiply a fraction by a whole number
 - 2. Multiply Fractions and Whole Numbers
 - Multiply fractions and whole numbers
 - 3. Multiply Two Fractions
 - Use models to multiply two fractions
 - Multiply two fractions
 - 4. Area of a Rectangle
 - Find the area of a rectangle using fractions and diagrams
 - 5. Multiply Mixed Numbers
 - Use models, equations, and previously learned strategies to multiply mixed numbers
 - 6. Multiplication as Scaling
 - Compare the size of the product to the size of one factor without multiplying to consider multiplication as scaling
 - 7. Math Practices: Make Sense and Persevere
 - Use previously learned knowledge to make sense of problems and persevere in solving them
 - 8. Multiply Fractions Unit Test
- 4. Divide Fractions**

1. Fractions and Division

- Understand how fractions are related to division

2. Fractions and Mixed Numbers as Quotients

- Implement division of fractions to show quotients as fractions and mixed numbers

3. Use Multiplication to Divide

- Use multiplication to divide a whole number by a unit fraction

4. Divide Whole Numbers by Unit Fractions

- Use models such as pictorial models or a number line to show dividing a whole number by a unit fraction

5. Divide Unit Fractions by Non-Zero Whole Numbers

- Use models to divide unit fractions by nonzero whole numbers

6. Divide Whole Numbers and Unit Fractions

- Use models to divide whole numbers and unit fractions. Check your answer using multiplication

7. Solve Problems Using Division

- Solve multi-step problems involving division with unit fractions

8. Math Practices: Repeated Reasoning

- Notice repetition in calculations and generalize about how to divide whole numbers and unit fractions

9. Divide Fractions Unit Test

5. Understand Volume Concepts

1. Model Volume

- Find the volume of solid figures

2. Develop a Volume Formula

- Find the volume of rectangular prisms using a formula

3. Volumes of Prisms

- Find the volume of prisms in different ways

4. Combine Volumes of Prisms

- Find the volume of a solid figure that is the combination of two or more rectangular prisms

5. Solve Word Problems Using Volume

- Use models, prior knowledge of volumes, and previously learned strategies to solve word problems involving volume

6. Math Practices: Use Appropriate Tools

- Use previously learned knowledge about volumes to choose the appropriate tools to solve volume problems

7. Understand Volume Concepts Unit Test

6. Convert Measurements

1. Convert Customary Units of Length

- Convert customary units of length

2. Convert Customary Units of Capacity

- Convert customary units of capacity
- 3. Convert Customary Units of Weight
 - Convert customary units of weight
- 4. Convert Metric Units of Length
 - Convert metric units of length
- 5. Convert Metric Units of Capacity
 - Convert metric units of capacity
- 6. Convert Metric Units of Mass
 - Convert metric units of mass
- 7. Solve Word Problems Using Measurement Conversions
 - Solve real-world problems with measurement conversions
- 8. Math Practices: Precision
 - Be precise when solving measurement problems
- 9. Convert Measurements Unit Test

7. Represent and Interpret Data

- 1. Analyze Line Plots
 - Read and analyze line plots
- 2. Make Line Plots
 - Organize and display data in a line plot
- 3. Solve Word Problems Using Measurement Data
 - Solve problems using data in a line plot
- 4. Math Practices: Critique Reasoning
 - Critique the reasoning of others using understanding of line plots and fractions
- 5. Represent and Interpret Data Unit Test

8. Algebra: Numerical Expressions

- 1. Order of Operations
 - Use the order of operations to evaluate expressions
- 2. Evaluate Expressions
 - Evaluate expressions with parentheses, brackets, and braces
- 3. Write Numerical Expressions
 - Write simple expressions that show calculations with numbers
- 4. Interpret Numerical Expressions
 - Interpret numerical expressions without evaluating them
- 5. Math Practices: Reasoning
 - Use reasoning to solve problems by making sense of quantities and relationships in the situation
- 6. Algebra: Numerical Expressions Unit Test

9. Look How Far You've Come!

1. See How Much You've Learned!

- See how your knowledge of several math concepts developed over time

10. Algebra: Patterns and Relationships

1. Numerical Patterns

- Analyze numerical patterns

2. More Numerical Patterns

- Use tables to identify relationships between patterns

3. Analyze and Graph Relationships

- Analyze patterns and graph ordered pairs generated from number sequences

4. Math Practices: Make Sense and Persevere

- Make sense of problems and persevere in solving them

5. Algebra: Patterns and Relationships Unit Test

Math 5 Accelerated

Accelerated Math 5 A/B

Course Instructional Times: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Course Summary:

In this course, the student will use the four operations with decimals, fractions, and integers to solve equations and inequalities. The student will simplify expressions with exponents and rational numbers. In the study of number theory, the student will further strengthen his or her skills as he solves problems involving factors and multiples by using divisibility tests and prime factorization. The student will apply ratios, rates, proportions, and scale drawings to solve various problems and then solve percent problems, including percent of change and commission.

Semester B Course Summary:

In this course, the student will explore concepts in geometry including identifying and describing the properties of geometric figures, as well as the relationships that exist between them. The student will find perimeter, area, and volume of two-dimensional figures and extend measurement skills to determine surface area and volume of three-dimensional figures. Next, the student will use tables, graphs, formulas, and functions to identify and extend number patterns. The student will graph linear and nonlinear relationships, identify slope, and explore translations. In the study of statistics, the student will create, analyze, and interpret different data displays. At the end of the course, the student will study probability and explore dependent events, compound events, and combinations.

Semester A Outline

1. Focus on Success in Accelerated Math 5

1. Planning Ahead

- Describe the characteristics of quality goals
- Set goals for success in mathematics
- Reflect on strengths, weaknesses, and how to apply them
- Recognize the importance of being an active learner

2. Resources for Success

- Identify the various resources that you can use in the course
- Modify goals to include using resources effectively

2. Decimals and Integers

1. Adding and Subtracting Decimals

- Add and subtract decimals
- Apply properties of addition to add decimal numbers using mental math

2. Multiplying Decimals

- Multiply decimals
- Apply properties of multiplication to multiply decimal numbers using mental math

3. Dividing Decimals

- Divide decimals

4. Comparing and Ordering Integers

- Compare and order integers
- Find absolute values

5. Adding Integers

- Add integers with the same sign
- Add integers with different signs

6. Subtracting Integers

- Subtract integers with the same sign
- Subtract integers with different signs

7. Multiplying and Dividing Integers
 - Multiply and divide integers with the same sign
 - Multiply and divide integers with different signs
8. Mean, Median, Mode, and Range
 - Describe data using mean, median, mode, and range
9. Box-and-Whisker Plots
 - Construct and interpret box-and-whisker plots
10. Decimals and Integers Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
11. Decimals and Integers Unit Test

3. Exponents, Factors, and Fractions

1. Exponents and Order of Operations
 - Write and simplify expressions with exponents
2. Divisibility Tests
 - Apply divisibility rules to integers
3. Prime Factorization
 - Determine factors and multiples of numbers by applying prime factorization
4. Simplifying Fractions
 - Determine equivalent fractions by simplifying
5. Comparing and Ordering Fractions
 - Compare and order fractions
6. Mixed Numbers and Improper Fractions
 - Convert between improper fractions and mixed numbers
7. Mid-Unit Review
 - Review the concepts, keywords, and all important concepts covered so far in this unit
8. Fractions and Decimals
 - Convert between fractions and decimals
9. Rational Numbers
 - Compare and order rational numbers
10. Scientific Notation
 - Convert numbers between scientific notation and standard form
11. Exponents, Factors, and Fractions Review
 - Decide which strategies you will use to prepare for your exam

- Organize your time and study materials
- Review your notes, key words, formulas, and other important information that may be covered on this exam

12. Exponents, Factors, and Fractions Unit Test

4. Operations with Fractions and Rational Numbers

1. Estimating With Fractions and Mixed Numbers
 - Estimate sums, differences, products, and quotients of fractions
2. Adding and Subtracting Fractions
 - Add and subtract fractions and solve problems involving fractions
3. Adding and Subtracting Mixed Numbers
 - Add and subtract mixed numbers
4. Adding and Subtracting Rational Numbers
 - Add and subtract rational numbers
5. Multiplying Fractions and Mixed Numbers
 - Multiply fractions and mixed numbers
6. Multiplication of Rational Numbers
 - Multiply rational numbers
7. Dividing Fractions and Mixed Numbers
 - Divide fractions and mixed numbers
8. Division of Rational Numbers
 - Divide rational numbers
9. Changing Units in the Customary System
 - Convert standard units of length, weight, and capacity
10. Changing Units in the Metric System
 - Convert metric units of length, weight, and capacity
11. Operations with Fractions Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, key words, formulas, and all important concepts that may be covered on this exam
12. Operations with Fractions Unit Test

5. Equations and Inequalities

1. Evaluating and Writing Algebraic Expressions
 - Write and evaluate algebraic expressions
2. Simplifying Expressions
 - Apply the Distributive Property to expand expressions
 - Simplify expressions by combining like terms and applying order of operations
3. Using Number Sense to Solve Equations
 - Solve one-step equations using substitution, mental math, and estimation

4. Solving One-Step Equations by Adding/Subtracting
 - Solve equations by adding or subtracting
5. Solving One-Step Equations by Multiplying/Dividing
 - Solve equations by multiplying or dividing
6. Exploring Two-Step Problems
 - Write and evaluate expressions with two operations
 - Solve two-step equations using number sense
7. Solving Two-Step Equations
 - Solve two-step equations using inverse operations
8. Solving Equations of the Form $p(x + q) = r$
 - Apply the Distributive Property to solve equations
9. Graphing and Writing Inequalities
 - Graph and write algebraic inequalities
10. Solving Inequalities by Adding and Subtracting
 - Solve inequalities by adding or subtracting
11. Solving Inequalities by Multiplying or Dividing
 - Solve inequalities by multiplying or dividing
12. Solving Two-Step Inequalities
 - Solve two-step inequalities and graph the solutions on a number line
13. Equations and Inequalities Review
 - Discuss the meaning of an equation and how to keep an equation balanced
 - Review notes, Key Words, and homework
 - Use online tools to practice skills studied in this unit
14. Equations and Inequalities Unit Test

6. Ratios, Rates, and Proportions

1. Ratios
 - Create ratios to compare given quantities
 - Recognize equivalent ratios
2. Unit Rates and Proportional Reasoning
 - Apply proportional reasoning to compute unit rates and unit costs
3. Unit Rates and Ratios of Fractions
 - Apply proportional reasoning to compute unit rates associated with ratios of fractions
4. Using Conversion Factors
 - Apply conversion factors to convert measures to varying units
5. Proportions
 - Evaluate ratios to determine if they form a proportional relationship
6. Solving Proportions
 - Identify the unit rate in proportional relationships

- Use unit rates, cross products, and number sense to solve proportions

7. Mid-Unit Review

- Review and reinforce understanding of ratios, rates, and proportions

8. Similar Figures

- Evaluate figures for similarity
- Formulate and solve proportions to discover missing side lengths of similar polygons

9. Maps and Scale Drawings

- Apply proportions to interpret scale drawings and solve problems based on scale ratios

10. Ratios, Rates, and Proportions Unit Review

- Organize your time and study materials
- Review your notes, key words, steps, and other important information that may be covered on the exam

11. Ratios, Rates, and Proportions Unit Test

7. Percents

1. Understanding Percents

- Create graphic models of percents
- Rewrite percents as equivalent ratios

2. Percents, Fractions, and Decimals

- Convert fractions, decimals, and percents to equivalent fractions, decimals, or percents

3. Percents Greater Than 100% or Less than 1%

- Evaluate and convert percents greater than 100%
- Evaluate and convert percents less than 1%

4. Finding a Percent of a Number

- Estimate and calculate the percent of a given number

5. Mid-Unit Review

- Review and reinforce understanding of percents

6. Solving Percent Problems Using Proportions

- Solve percent problems by applying proportions

7. Solving Percent Problems Using Equations

- Solve percent problems by generating and solving equations

8. Applications of Percent

- Generate and solve equations involving real-world applications of percents
- Estimate solutions to problems involving real-world applications of percents

9. Finding Percent of Change

- Solve applications of percent problems by determining percents of increase and decrease

10. Percents Review

- Review your notes, key words, steps, and other important information that may be covered on the exam

11. Percents Unit Test

Semester B Outline

1. Geometry

1. Lines and Planes
 - Identify planes and points
 - Distinguish between parallel, perpendicular, and skew lines
1. Identifying and Classifying Angles: 1
 - Classify acute, right, obtuse, and straight angles
 - Classify pairs of angles as supplementary and complementary angles
 - Write and solve equations to determine missing angle measures
2. Identifying and Classifying Angles: 2
 - Classify sets of angles as vertical and adjacent angles
 - Apply knowledge of angle theorems to determine missing angle measures
3. Classifying Triangles
 - Classify triangles by side length and angle measure
 - Write and solve equations to determine missing angle measures
4. Drawing Triangles
 - Construct triangles from three measures of angles or sides
 - Evaluate triangle characteristics to distinguish unique triangles
5. Classifying Polygons
 - Identify polygons according to side and angle measures
 - Distinguish between regular and irregular polygons
6. Classifying Quadrilaterals
 - Identify special quadrilaterals according to side and angle measures
7. Congruent Figures
 - Recognize congruent figures
 - Analyze congruent figures to determine missing measures
8. Circles
 - Recognize the parts of a circle and their relationships to one another

9. Circle Graphs

- Construct circle graphs with given conditions
- Analyze data contained in a circle graph

10. Constructions

- Create congruent line segments and perpendicular bisectors using a compass and straight edge

11. Geometry Unit Review

- Organize your time and study materials
- Review your notes, key words, steps, and other important information that may be covered on the exam

12. Geometry Unit Test

2. Measurement

1. Area and Perimeter of Parallelograms

- Calculate the area and perimeter of parallelograms

2. Area and Perimeter of Triangles

- Calculate the area and perimeter of triangles

3. Area of Trapezoids and Other Figures

- Apply area formulas to calculate areas of trapezoids and other irregular polygons

4. Circumference and Area of a Circle

- Apply appropriate formulas to calculate circumference and area of a circle

5. Square Roots and Irrational Numbers

- Determine square roots of perfect squares
- Estimate square roots
- Distinguish between rational and irrational numbers

6. The Pythagorean Theorem Part 1

- Apply the Pythagorean Theorem to find missing lengths of right triangle legs or hypotenuse

7. The Pythagorean Theorem Part 2

- Apply the Pythagorean Theorem to calculate solutions to real-world situations

8. Mid-Unit Review

- Review and reinforce your understanding of measurement

9. Three-Dimensional Figures

- Identify three-dimensional figures according to faces, edges, and vertices
- Sketch three-dimensional figures on graph paper

10. Three Views of an Object

- Create two-dimensional sketches of the top, front, and side views of three-dimensional objects

11. Cross-Sections

- Recognize and describe cross sections of three-dimensional objects

12. Drawing Nets

- Sketch nets of three-dimensional figures
- Recognize nets of three-dimensional figures

13. Surface Area of Prisms and Cylinders

- Apply knowledge of nets to calculate surface area of prisms and cylinders

14. Volume of Prisms and Cylinders

- Apply appropriate formulas to calculate the volume of prisms and cylinders

15. Efficiency Expert Portfolio

- Apply knowledge of dimensions, area, and volume

16. Measurement Review

- Organize your time and study materials
- Review your notes, Key Words, steps, and other important information that may be covered on the exam

17. Measurement Unit Test

3. Patterns and Rules

1. Number Sequences

- Recognize patterns in arithmetic and geometric sequences and write rules to describe them
- Analyze patterns to find missing terms in sequences

2. Patterns and Tables

- Create tables to represent patterns
- Interpret patterns in tables to find missing terms

3. Function Rules

- Generate rules for functions
- Apply function rules to find missing terms

4. Using Tables, Rules, and Graphs

- Create tables, function rules, and graphs and apply them to solve real-world problems

5. Interpreting Graphs

- Create graphs to analyze real-world situations

6. Simple Interest

- Apply the appropriate formula to compute simple interest

7. Compound Interest

- Apply appropriate formula to compute compound interest

8. Transforming Formulas

- Evaluate formulas to find solutions to problems

9. Patterns and Rules Review

- Organize your time and study materials
- Review your notes, key words, steps, and other important information that may be covered on the exam

10. Patterns and Rules Unit Test

4. Graphing in the Coordinate Plane

1. Graphing Points in Four Quadrants
 - Identify points on all four quadrants of a coordinate plane
 - Graph points on all four quadrants of a coordinate plane
 2. Graphing Linear Equations
 - Determine solutions and graph to test solutions of linear equations
 3. Finding the Slope of a Line
 - Determine the slope of a line
 - Recognize characteristics of slope
 - Apply slope to problem solving
 4. Graphs and Proportional Relationships
 - Analyze graphs and tables to determine whether or not two quantities have a proportional relationship
 5. Constant of Proportionality
 - Identify the constant of proportionality (unit rate) in tables, graphs, and equations
 6. Graphing Nonlinear Relationships
 - Graph nonlinear equations and absolute value equations
 7. Translations
 - Graph translations on a coordinate plane
 - Generate rules to describe translations
 8. Line Symmetry and Reflections
 - Recognize lines of symmetry and apply them to graph reflections
 9. Exploring Tessellations
 - Create a tessellation of a figure
 10. Rotational Symmetry and Rotations
 - Recognize rotational symmetry by identifying the center of rotation
 - Determine the angle of rotation and graph a rotation of a figure
 11. Graphing in the Coordinate Plane Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam
 12. Graphing in the Coordinate Plane Unit Test
- 5. Displaying and Analyzing Data**
1. Reporting Frequency
 - Generate frequency tables, histograms, and line plots to represent data
 - Interpret frequency tables, histograms, and line plots
 2. Stem-and-Leaf Plots
 - Generate stem-and-leaf plots to represent data
 - Interpret data represented on stem-and-leaf plots
 3. Choosing the Best Data Display

- Determine the most accurate and appropriate way to display data
- 4. Data Variability
 - Interpret data displays according to the visual overlap of two data sets
 - Compare two data sets according to mean, median, and variability
- 5. Random Samples and Surveys
 - Compose a survey question
 - Identify biased questions
 - Recognize a random sample of a population
- 6. Estimating Population Size
 - Apply proportions to estimate population sizes
 - Draw inferences about a population
 - Generate simulated random samples
- 7. Using Data to Persuade
 - Identify misleading graphs and statistics
- 8. Exploring Scatter Plots
 - Create scatter plots
 - Interpret scatter plots
- 9. Displaying and Analyzing Data Unit Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam
- 10. Displaying and Analyzing Data Unit Test

6. Using Probability

1. Probability
 - Determine the probability of an event
 - Determine the complement of an event
 - Find the probability of the complement of an event
2. Experimental Probability
 - Find experimental probability
 - Use simulations
3. Sample Spaces
 - Make and use sample spaces
 - Use the counting principle
4. Compound Events
 - Find the probability of independent and dependent events
5. Simulating Compound Events
 - Design and use a simulation to generate frequencies for compound events
6. Permutations

- Determine permutations using the counting principle or factorials
7. Combinations
 - Determine combinations of objects
 8. Unit Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the unit test
 9. Using Probability Unit Test

Math 6

Math 6 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

In this course, the student will use the four operations with decimals, fractions, and integers. The student will study patterns and variables as a precursor to solving equations and inequalities. The study of number theory will help the student understand divisibility, prime numbers, factors, and multiples. The student will learn about ratios, proportions, and percents and apply them in scale drawings.

Throughout the course, the student will engage in many problem-solving strategies, make real-world connections, and participate in mathematical discussions with peers.

SEMESTER B

In this course, the student will explore the foundations of geometry, such as classifying polygons, and use measurement skills to find the perimeter, area, and volume of geometric figures. Then the student will study basic probability and explore permutations. By the end of the course, the student will work with integers using all four operations, solve equations and inequalities, and solve problems using the Pythagorean Theorem.

Course Outline:

SEMESTER A

1. Focus on Success in Math 6

1. Looking Ahead

- Describe the characteristics of quality goals
- Set goals for success in mathematics
- Reflect on strengths, weaknesses, and how to apply them
- Recognize the importance of personal effort to learning

2. Gearing Up

- Identify the various resources that you can use in the course
- Modify goals to include using resources effectively

2. Whole Numbers and Decimals

1. Identifying the Value of Whole Numbers

- Identify the place value of a digit in the given number
- Compare the value of two whole numbers

2. Whole Number Estimation

- Apply strategies for estimation to find sums, differences, products, or quotients

3. Computing with Whole Numbers

- Calculate to find the sum, difference, product, or quotient of two whole numbers

4. Properties of Addition and Multiplication

- Apply the Commutative Property, Associative Property, or Identity Property of Addition or Multiplication to solve computation problems

5. Order of Operations in Numerical Expressions

- Apply the order of operations to solve numerical expressions

6. Whole Numbers and Operations Mid-Unit Review

- Utilize estimation strategies, properties of operations, and the order of operations to solve computation problems with whole numbers

7. Identifying the Value of Decimals

- Identify the value of a specified digit in a decimal
- Apply the rules of rounding to decimals

8. Comparing and Ordering Decimals

- Compare the value of decimals
- Identify the order of decimals based on their numerical value

9. Decimal Addition and Subtraction

- Identify sums and differences by adding and subtracting decimals

10. Decimal Multiplication

- Identify the product when a decimal is multiplied by a whole number or another decimal

11. Multiplying and Dividing Decimals by Powers of Ten

- Identify the product or quotient when multiplying or dividing a decimal by a power of ten

12. Decimal Division

- Identify the quotient when dividing a decimal by a whole number or another decimal

13. Problem Solving: The Four-Step Plan

- Apply the four-step plan to solve word problems

14. Whole Numbers and Decimals Review

- Identify how to use place value and computation skills in solving a real-world problem
- Find the answers to computation problems involving whole numbers and decimals

15. Whole Numbers and Decimals Unit Test

3. Data and Graphs

1. Mean and Outliers

- Compute the mean when given a set of numbers

2. Median and Mode

- Identify the median and mode of a given set of numbers
- Explain which measure of central tendency is best in a given situation

3. Tables and Plots

- Identify the range, middle value, upper value, and lower value of a set of numbers
 - Read a frequency table, line plot, or a box-and-whisker plot to find the mean, median, mode, or range
4. Bar Graphs and Line Graphs
 - Create a double bar graph when given a set of data
 - Create and read a single line graph
 5. Histograms
 - Identify the value of a bar in a given histogram
 6. Shape and Variability of Data
 - Find the mean and range of a given data set
 - Identify the degree of variability in a chart, graph, or plot
 7. Stem-and-Leaf Plots
 - Order data to create a stem-and-leaf plot
 - Read a stem-and-leaf plot in order to compute the range and measures of central tendency
 8. Misleading Graphs and Statistics
 - Analyze graphs for misleading information
 9. Statistical Questions
 - Differentiate between a statistical question and a question that is not statistical
 10. Data and Graphs Review
 - Explain preferred methods for representing data and identify real-world scenarios that could be represented in this manner
 11. Data and Graphs Unit Test

4. **Patterns and Variables**

1. Patterns, Rules, and Numerical Expressions
 - Identify numerical patterns
 - Define the rule for a sequence
2. What Is an Exponent?
 - Identify the exponent for a given expression
 - Apply the order of operations to solve expressions with exponents
3. Scientific Notation
 - Identify the standard and scientific forms for a numerical value
4. Algebraic Expressions
 - Differentiate between a numerical and algebraic expression
 - Evaluate algebraic expressions for the given quantity
5. From Words to Algebraic Expressions
 - Translate words into algebraic expressions
6. What Are Equations?
 - Calculate the answer to a one-step question by utilizing mental math strategies
7. Equations with Addition

- Demonstrate the Subtraction Property of Equality when solving equations with addition

8. Equations with Subtraction

- Demonstrate the Addition Property of Equality when solving equations with subtraction

9. Equations with Multiplication and Division

- Demonstrate the Division Property of Equality when solving an equation with multiplication
- Demonstrate the Multiplication Property of Equality when solving an equation with division

10. Distributive Property

- Apply the distributive property in order to generate equivalent expressions

11. Problem Solving and Equations

- Develop and solve an equation to solve a word problem

12. Patterns and Variables Review

- Identify numerical patterns and their rules
- Simplify a numerical expression through the use of exponents
- Evaluate expressions using the given values
- Apply the Distributive Property to solve computation problems
- Generate an equation and use it to solve problems

13. Patterns and Variables Unit Test

5. Number Theory and Fractions

1. Divisibility and Mental Math

- Identify whether a number is divisible by a second number
- Identify whether a number is even or odd

2. Prime Time

- Distinguish between prime and composite numbers
- Identify the factors of a composite number

3. Greatest Common Factor

- Identify the greatest common factor of two or more numbers

4. Writing Expressions that Are Equivalent

- Generate equivalent numerical and algebraic expressions using the Distributive Property

5. Equivalent Fractions

- Identify fractions that are equivalent to the original fraction

6. Fractions Greater Than 1

- Convert mixed numbers into improper fractions and improper fractions into mixed numbers

7. Multiples

- Identify the least common multiple of at least two numbers

8. Comparing and Ordering Fractions

- Compare the value of the given fractions and mixed numbers
- Identify the numerical order of a given set of fractions and/or mixed numbers

9. Fractions and Decimals

- Convert decimals into fractions and fractions into decimals
- Identify the order of a set of fractions and decimals from least to greatest and greatest to least

10. Number Theory and Fractions Review

- Identify factors of numbers and apply them to identify the prime factorization of numbers
- Use factors and multiples to find the least common denominator
- Generate equivalent fractions and expressions
- Convert between forms of numbers, such as mixed numbers into fractions and fractions into decimals
- Compare and order fractions and decimals

11. Number Theory and Fractions Unit Test

6. **Adding and Subtracting Fractions**

1. Estimating Fractions/Mixed Numbers

- Demonstrate rounding fractions and mixed numbers to the nearest one-half
- Calculate the estimated sum or difference of fractions and mixed numbers

2. Add and Subtract Fractions with Like Denominators

- Find the sum or difference when two or more fractions with like denominators are added or subtracted.

3. Addition of Fractions with Unlike Denominators

- Calculate the sum of two or more fractions with unlike denominators added together

4. Subtraction of Fractions with Unlike Denominators

- Calculate the difference of two fractions with unlike denominators

5. Adding and Subtracting Fractions Mid-Unit Review

- Add and subtract fractions with like and unlike denominators

6. Addition with Mixed Numbers

- Calculate the sum when adding with mixed numbers.

7. Subtraction with Mixed Numbers

- Calculate the difference when subtracting with mixed numbers

8. Solving Equations with Fractions

- Calculate the answer to an equation with fractions

9. Elapsed Time

- Calculate the time that has elapsed between the start and end times

10. Adding and Subtracting Fractions Review

- Explain the method for solving problems with addition and subtraction of fractions and mixed numbers.

11. Adding and Subtracting Fractions Unit Test

7. **Multiplying and Dividing Fractions**

1. Multiplying a Whole Number and a Fraction

- Calculate the product of a whole number and a fraction

2. Multiplying Two or More Fractions

- Calculate the product of two or more fractions
- 3. Multiplication with Mixed Numbers
 - Calculate the product of mixed numbers
- 4. Multiplication of Fractions Review
 - Calculate the product of fractions, whole numbers, and mixed numbers
- 5. Division with Fractions
 - Identify the reciprocal of a given fraction
 - Calculate the quotient of two fractions
- 6. Division with Mixed Numbers
 - Calculate the quotient of mixed numbers
- 7. Solving Equations with Fractions
 - Calculate the answer to an equation with fractions through multiplication
- 8. What Is the Customary System?
 - Identify the best customary unit for a given object
- 9. Changing Units in the Customary System
 - Convert measurements written in customary units into other customary units
- 10. Multiplying and Dividing Fractions Review
 - Calculate the product of whole numbers, fractions, and mixed numbers
 - Identify the reciprocal
 - Calculate the quotient of fractions and mixed numbers
 - Identify customary units of measurement
 - Calculate how to convert between units of measurement in the customary system
- 11. Multiplying and Dividing Fractions Test

SEMESTER B

1. Ratios, Proportions, and Percents

1. Ratios and Equivalent Ratios
 - Identify the ratio for a given situation
 - Identify at least one equivalent ratio for the given ratio
2. Understanding and Using Unit Rates
 - Calculate the unit rate given two amounts
 - Find and use unit rates and unit costs
3. Proportions
 - Determine whether or not two ratios form a proportion
 - Identify the missing value in a proportion
4. Scale Drawings
 - Calculate the distance of an actual item or the model using a scale
5. Putting It All Together: Ratios, Rates, Proportions
 - Calculate ratios, unit rates, equivalent rates, and the missing value in proportions

6. Writing Percents, Fractions, and Decimals

- Identify the decimal, fractional form, and percent form for a given value
- Ordering percents, fractions, and decimals

7. What Is the Percent of that Number?

- Calculate a percentage of a given number
- Identify the whole number when given the part and percentage

8. Circle Graphs

- Use a circle graph to solve problems

9. Using Percents in Everyday Life

- Calculate sales tax, amount to tip, discounts, and sale price

10. Ratios, Proportions, and Percents Review

- Use your knowledge of ratios, rates, proportions, and percents to solve problems
- Review Key Words and assessments from the unit

11. Ratios, Proportions, and Percents Unit Test

2. Geometry and Measurement

1. Metric Units

- Identify the best metric unit of measure for a given situation

2. Conversions in the Metric System

- Calculate a measurement in a metric unit, given the measurement in another metric unit in the same category

3. Perimeters and Areas of Rectangles and Squares

- Calculate the perimeter and area of rectangles and squares

4. Areas of Parallelograms, Trapezoids, and Triangles

- Calculate the area of parallelograms, trapezoids, and triangles

5. Finding the Area of Composite Figures

- Find the area of a composite figure

6. Mid-Unit Review

- Identify the best metric unit of measure for a given situation
- Calculate the perimeter or area of a figure given the formula

7. Circumference of a Circle

- Calculate the circumference of a circle

8. Area of a Circle

- Calculate the area of a circle when given the length of the radius or diameter.

9. Three-Dimensional Figures

- Name three-dimensional figures

10. Prisms and Surface Area

- Find the surface area of prisms

11. Rectangular Prisms and Volume

- Calculate the volume of a rectangular prism

12. Geometry and Measurement Review

- Calculate the perimeter, area, surface area, and/or volume of a given figure
- Name two-dimensional and three-dimensional figures
- Identify metric units and convert from one unit to another

13. Geometry and Measurement Unit Test

3. Integers

1. What Is an Integer?

- Locate an integer on the number line

- Identify the absolute value of an integer
- 2. Comparing and Ordering Integers
 - Compare two integers
 - Identify the order of a set of integers
- 3. Addition of Integers
 - Calculate the sum of integers
- 4. Subtraction of Integers
 - Calculate the difference of integers
- 5. Multiplication of Integers
 - Calculate the product of integers
- 6. Division of Integers
 - Calculate the quotient of integers
- 7. Solving Equations with Integers
 - Solve equations with integers
- 8. Applications of Integers
 - Calculate the sum or difference of integers to solve application problems.
- 9. Integers Review
 - Identify the absolute value of an integer and locate where integers fall on the number line
 - Compare and order a set of integers from least to greatest
 - Calculate the sum, difference, product, and quotient of integers
 - Solve equations with integers
- 10. Integers Unit Test
- 4. **Graphing, Equations, and Inequalities**
 - 1. Understanding the Coordinate Plane
 - Name points by their ordered pairs
 - Graph points in the coordinate plane
 - 2. Using Rational Numbers on the Coordinate Plane
 - Plot ordered pairs consisting of rational numbers on a coordinate plane
 - 3. Finding Distances on the Coordinate Plane
 - Calculate the distance between two points on a coordinate plane
 - Create a polygon in the coordinate plane from a set of ordered pairs
 - 4. What Are Functions?
 - Identify the output or y-value when given an input or x-value and the rule
 - Calculate the rule when given the input and output
 - Graph the function on a coordinate plane
 - 5. Independent and Dependent Variables
 - Identify the independent and dependent variable in a function
 - Generate an equation for the function
 - 6. Graphing and Functions Review
 - Discuss the definition of a function and identify an example to support the definition
 - 7. Solving Equations with Two Steps
 - Solve two-step equations
 - Use two-step equations to solve problems
 - 8. Writing and Graphing Inequalities
 - Represent a situation by writing and/or graphing an inequality
 - 9. Solving One-Step Inequalities
 - Solve one-step inequalities
 - 10. Graphing, Equations, and Inequalities Review
 - Locate and name the ordered pair for points on the coordinate plane
 - Write rules and equations for functions
 - Evaluate functions
 - Identify the solution to a two-step equation
 - Name, graph, and solve inequalities
 - 11. Graphing, Equations, and Inequalities Unit Test
- 5. **Exploring Probability**

1. Counting Outcomes
 - Identify the total number of possible outcomes using either a tree diagram or the counting principle
2. What Is Probability?
 - Identify the probability that an event will or will not occur
3. Theoretical and Experimental Probability
 - Identify the theoretical and experimental probability of a situation
 - Conduct a series of experiments and communicate their findings in writing
4. Using Data to Make Predictions
 - Make a prediction based on data
5. Probability of Independent Events
 - Calculate the probability of independent events for a given situation
6. Exploring Probability Review
 - Calculate the total number of outcomes
 - Calculate theoretical and/or experimental probability
 - Predict the probability of an event based on data
 - Calculate the probability of independent events
7. Exploring Probability Unit Test

6. Tools of Geometry

1. Points, Segments, Rays, Lines, and Planes
 - Identify the specified point, segment, ray, line, or plane when given a figure
2. Types of Angles
 - Classify the type of angle and/or the name of the angle when given a figure
3. Special Angles
 - Identify and classify special angle pairs in a figure
 - Calculate the measure of an angle in a special angle pair
4. Types of Triangles
 - Classify a triangle based on its angle measures or by its sides
5. Points, Lines, Angles, and Triangles Review
 - Classify lines, angles, and triangles when given a figure
6. Classifying Quadrilaterals and Other Polygons
 - Classify a polygon based on the number and length of its sides
 - Determine missing angle measures in a quadrilateral
7. Figures that are Congruent or Similar
 - Classify figures as being congruent, similar, or neither
8. Line Symmetry
 - Identify lines of symmetry
9. Translations, Reflections, and Rotations
 - Classify transformations as translations, reflections, or rotations
10. Tools of Geometry Review
 - Classify lines, angles, and figures
 - Identify congruent and similar figures
 - Identify lines of symmetry

- Classify transformations

11. Tools of Geometry Unit Test

Math 6 Accelerated

Accelerated Math 6 A/B

Course Instructional Times: 170 hours

Instructional Activities: Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, the student will be introduced to basic algebraic principles. The student will review properties of expressions and integers. The student will solve one-step equations and inequalities with positive and negative integers, decimals, fractions, and exponents. Then the student will explore problems involving operations of fractions and will apply knowledge of algebra to solve real-world ratio, proportion, and percentage problems. Finally, the student will examine and evaluate two-step and multi-step equations and inequalities.

Semester A Outline

1. **Focus on Success in Algebra Readiness**
 1. Preparing for Success
 - Describe the characteristics of quality goals
 - Set goals for success in mathematics
 - Reflect on strengths, weaknesses, and how to apply them
 - Recognize the importance of personal effort to learning
 2. Resources for Success
 - Identify the various resources that you can use in the course
 - Modify goals to include using resources effectively
2. **Integers and Algebraic Expressions**
 1. Order of Operations
 - Apply the order of operations to correctly solve an equation
 - Evaluate variable expressions when the value of the variable is given
 - Translate phrases into mathematical expressions
 2. Integers and Absolute Value
 - Identify the absolute value of a given integer
 - Identify the opposite of a given integer
 - Evaluate expressions with absolute value
 - Order integers
 3. Adding and Subtracting Integers
 - Apply the rules of addition and subtraction of integers
 - Change subtraction problems to involve addition of an opposite
 4. Multiplying and Dividing Integers
 - Apply the rules of multiplication and division of integers
 5. Properties of Numbers

- Identify the additive and multiplicative inverse of a number
- Use the Distributive Property to make mental math easier
- 6. Solving Equations by Adding and Subtracting
 - Write and solve equations using addition and subtraction
- 7. Solve Equations by Multiplying and Dividing
 - Write and solve equations using multiplication and division
- 8. Integers and Algebra Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam
- 9. Integers and Algebraic Expressions Unit Test

3. Rational Numbers

1. Rational and Irrational Numbers
 - Differentiate between rational and irrational numbers
2. Fractions and Decimals
 - Convert between fractions and decimals
3. Adding and Subtracting Fractions
 - Add and subtract fractions
 - Add and subtract mixed numbers
4. Multiplying and Dividing Fractions
 - Multiply and divide fractions
 - Multiply and divide mixed numbers
 - Scale up a favorite recipe $2\frac{1}{2}$ times
 - Scale down a different favorite recipe by $\frac{1}{4}$
5. Exponent Basics
 - Use powers and exponents in expressions
 - Evaluate expressions using exponents
6. Properties of Exponents
 - Multiply powers
 - Divide powers
 - Apply negative and zero exponents
7. Scientific Notation Basics
 - Convert between scientific notation and standard form
 - Convert between standard form and scientific notation
8. Scientific Notation Comparison
 - Compare relative size of numbers in scientific notation
9. Operations and Applications of Scientific Notation
 - Perform operations expressed in scientific notation

- Apply scientific notation to real world problems

10. Unit Review

- Organize your time and study materials
- Review your notes, key words, steps, and other important information that may be covered on the exam

11. Rational Numbers Unit Test

4. Real Numbers and the Coordinate Plane

1. Squares and Square Roots

- Find the square and square roots of numbers

2. Real Numbers

- Identify rational and irrational numbers

3. Estimating Irrationals

- Estimate the value of an irrational number by comparing it to rational numbers

4. Roots as Solutions to Equations, Cube Roots

- Evaluate perfect squares and cubes
- Use roots to represent solutions to equations

5. Pythagorean Theorem

- Solve problems using the Pythagorean Theorem

6. Converse of Pythagorean Theorem

- Apply the converse of the Pythagorean Theorem
- Identify a right triangle
- Prove the Pythagorean Theorem

7. Coordinate Plane

- Graph points on the coordinate plane
- Use the Pythagorean Theorem to find the distance between two graphed points
- Apply the Distance Formula

8. Movement in the Coordinate Plane

- Graph and describe translations in the coordinate plane
- Graph reflections in the coordinate plane and identify lines of symmetry

9. Rotations in the Coordinate Plane

- Graph rotations and identify rotational symmetry

10. Real Numbers and the Coordinate Plane Unit Review

- Organize your time and study materials
- Review your notes, key words, steps, and other important information that may be covered on the exam

11. Real Numbers and the Coordinate Plane Unit Test

5. Applications of Proportions

1. Ratios and Rates

- Write ratios and unit rates

- Use rates to solve problems
- 2. Proportions
 - Identify and solve proportions
- 3. Similar Figures
 - Identify similar figures
 - Use proportions to find missing measurements in similar figures
- 4. Ratios of Similar Figures
 - Compare the lengths, perimeters, and areas of similar rectangles
 - Calculate the perimeter and area of a similar figure
- 5. Dilations
 - Graph dilations on the coordinate plane
 - Determine the scale factor of a dilation
- 6. Scale Drawings
 - Use proportions to solve problems involving scale
- 7. Unit Review
 - Review information from previous lessons to prepare for the test
 - Submit the scale drawing of your room
- 8. Applications of Proportions Unit Test

6. Applications of Percents

1. Fractions, Decimals, and Percents
 - Convert between fractions, decimals, and percents
 - Order rational numbers
2. Estimating with Percents
 - Estimate percents using decimals and fractions
3. Percents and Proportions
 - Use proportions to find part of a whole, a whole amount, or a percent
4. Percent Equations
 - Use equations to solve problems involving percents
5. Percent of Change
 - Find percent of change
 - Solve problems involving percent of increase and percent of decrease
6. Markup, Discount, and Sales Tax
 - Use percent of change to find markup, discount, and selling price
7. Simple Interest
 - Find simple interest and account balances
8. Unit Review
 - Organize your time and study materials

- Review your notes, key words, steps, and other important information that may be covered on the exam

9. Applications of Percent Unit Test

7. Equations and Inequalities

1. Solving Two-Step Equations

- Solve two-step equations
- Use two-step equations to solve problems

2. Simplifying Algebraic Expressions

- Simplify algebraic expressions by combining like terms

3. Solving Multi-Step Equations

- Write and solve multi-step equations

4. Variables on Both Sides

- Write and solve equations with variables on both sides

5. Transforming Equations

- Transform equations into simpler forms to determine the number of solutions

6. Graphing and Solving Inequalities

- Write and solve inequalities

7. Solving Inequalities by Multiplying or Dividing

- Solve inequalities by multiplication and division

8. Unit Review

- Review materials within this unit

9. Equations and Inequalities Unit Test

Semester B Summary:

In this course, the student will explore basic algebraic principles. The student will examine and evaluate two-step and multi-step equations and inequalities and then explore and use graphs to solve linear relations and functions. Next, the student will explore basic concepts of geometry including angle relationships, parallel lines, polygons, circles, and transformations. Next, the student will apply knowledge of geometry and algebra to solve area and volume problems. Then the student will explore nonlinear functions and polynomials. Finally, the student will examine properties of right triangles, data analysis, and probability.

Semester B Outline

1. Geometry

1. Pairs of Angles

- Explore and classify angles
- Determine angle measures based on angle relationships

2. Parallel Lines and Angles

- Identify parallel lines
- Identify the types of angles formed by a transversal
- Find the measures of angles formed by parallel lines

3. Congruent Polygons

- Determine if figures are congruent or similar to one another
- Describe a sequence of transformations for congruent and similar figures
- 4. Classifying Polygons
 - Classify certain polygons
- 5. Polygons and Angles
 - Classify polygons
 - Find the interior angle measure of polygons
- 6. Area of Polygons
 - Find the area of parallelograms, triangles, and trapezoids
- 7. Area and Circumference of Circles
 - Calculate the circumference and area of circles
 - Calculate the area of an irregular figure
- 8. Geometric Constructions
 - Perform geometric constructions
- 9. Geometry Unit Review
- 10. Geometry Unit Test

2. Measurement

1. Polyhedrons, 3-D Figures, and Solids
 - Identify solids, parts of solids, and skewed line segments
2. 3-D Views
 - Draw 3-D figures, base plans, and isometric views
3. 3-D Figures and Nets
 - Identify nets of solids
4. Surface Area of Prisms and Cylinders
 - Find surface area of prisms and cylinders using nets and formulas
5. Surface Area of Pyramids and Cones
 - Find surface area of pyramids and cones using nets and formulas
6. Using Pythagorean Theorem with 3-D Figures
 - Apply the Pythagorean Theorem in three-dimensional figures
7. Volumes of Prisms and Cylinders
 - Calculate the volume of prisms and cylinders
8. Volumes of Pyramids and Cones
 - Calculate the volume of pyramids and cones
9. Spheres
 - Find the surface area and volume of a sphere
10. Similar Solids
 - Apply proportional reasoning to find the missing measurement in similar solids
11. Surface Area and Volume in the Real World

- Calculate the surface area and volume (in appropriate units) of three-dimensional objects found in the home, such as a can of food, box of tissues, shoebox, etc.

12. Measurement Unit Review

- Review previously studied material

13. Measurement Unit Test

3. Using Graphs to Analyze Data

1. Measures of Center

- Compute mean, median, mode, range and select appropriate measure of tendency

2. Frequency

- Utilize line plots, frequency tables, and histograms to display data

3. Venn Diagrams

- Examine relationships between data with Venn diagrams

4. Stem-and-Leaf Plots

- Represent and interpret data using stem-and-leaf plots

5. Box-and-Whisker Plots

- Represent and interpret data using box-and-whisker plots

6. Scatter Plots

- Create scatter plots and analyze trends to make predictions

7. Bivariate Data

- Analyze bivariate data
- Describe patterns of association in bivariate data

8. Modeling Data with Lines

- Examine data to determine accuracy of models

9. Circle Graphs

- Interpret data using circle graphs
- Present data by creating circle graphs

10. Choosing the Right Graph

- Choose the best graph to represent various data

11. Relative Frequency

- Create and analyze data using a two-way table

12. Using Graphs to Analyze Data Unit Review

- Review for unit test

13. Using Graphs to Analyze Data Unit Test

4. Probability

1. Theoretical and Experimental Probability

- Find theoretical probabilities, experimental probabilities, and odds

2. Independent and Dependent Events

- Find the probabilities of independent and dependent events

3. Making Predictions
 - Make predictions based on theoretical and experimental probabilities
4. Permutations
 - Find the number of permutations of a set of objects
5. Combinations
 - Find the number of combinations of a set of objects using lists and combination notation
6. Unit Review
 - Review the unit
7. Probability Unit Test

5. Functions

1. Sequences
 - Write rules for sequences and use the rules to find terms
2. Relating Graphs and Events
 - Interpret and sketch graphs that represent real-world situations
3. Functions
 - Identify functions
 - Represent functions with equations, tables, and function notation
4. Understanding Slope
 - Calculate slope of a line from different representations
5. Slope and Similar Triangles
 - Demonstrate that the slope between any two points on a line is the same
 - Derive the equation for a line in slope-intercept form: $y = mx + b$
6. Graphing Linear Functions
 - Use tables and equations to graph linear functions
7. Graphing Proportional Relationships
 - Graph proportional relationships
 - Explore the relationship between the slope of a line on a graph and unit rate
8. Writing Rules for Linear Functions
 - Write function rules from words, tables, and graphs
9. Solving Systems of Equations
 - Solve systems of equations by graphing and by substitution
10. Nonlinear Functions
 - Graph and write quadratic functions and other nonlinear functions
11. Comparing Functions
 - Compare functions represented in various ways
12. Functions Unit Review
 - Review for unit test
13. Functions Unit Test

6. Polynomials and Properties of Exponents

1. Polynomials
 - Write algebraic expressions and simplify polynomials
2. Adding and Subtracting Polynomials
 - Add and subtract polynomials
3. Exponents and Multiplication
 - Multiply powers with the same base
 - Multiply numbers in scientific notation
4. Multiplying Polynomials
 - Multiply monomials and binomials
5. Exponents and Division
 - Divide powers with the same base
 - Simplify expressions with negative exponents
6. Polynomials and Properties of Exponents Review
 - Review problems and terms
7. Polynomials and Properties of Exponents Unit Test

There are no objectives for this lesson.

Math 7

Math 7 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

In this course, the student will use the four operations with decimals, fractions, and integers to solve equations and inequalities. The student will simplify expressions with exponents and rational numbers. In the study of number theory, the student will further strengthen his or her skills as he solves problems involving factors and multiples by using divisibility tests and prime factorization. The student will apply ratios, rates, proportions, and scale drawings to solve various problems and then solve percent problems, including percent of change and commission.

SEMESTER B

In this course, the student will explore concepts in geometry including identifying and describing the properties of geometric figures, as well as the relationships that exist between them. The student will find perimeter, area, and volume of two-dimensional figures and extend measurement skills to determine surface area and volume of three-dimensional figures. Next, the student will use tables, graphs, formulas, and functions to identify and extend number patterns. The student will graph linear and nonlinear relationships, identify slope, and explore translations. In the study of statistics, the student will create, analyze, and interpret different data displays. At the end of the course, the student will study probability and explore dependent events, compound events, and combinations.

Course Outline:

SEMESTER A

1. Focus on Success in Math 7

1. Planning Ahead

- Describe the characteristics of quality goals
- Set goals for success in mathematics
- Reflect on strengths, weaknesses, and how to apply them
- Recognize the importance of being an active learner

2. Resources for Success

- Identify the various resources that you can use in the course
- Modify goals to include using resources effectively

2. Decimals and Integers

1. Adding and Subtracting Decimals

- Add and subtract decimals

- Apply properties of addition to add decimal numbers using mental math
- 2. Multiplying Decimals
 - Multiply decimals
 - Apply properties of multiplication to multiply decimal numbers using mental math
- 3. Dividing Decimals
 - Divide decimals
- 4. Comparing and Ordering Integers
 - Compare and order integers
 - Find absolute values
- 5. Adding Integers
 - Add integers with the same sign
 - Add integers with different signs
- 6. Subtracting Integers
 - Subtract integers with the same sign
 - Subtract integers with different signs
- 7. Multiplying and Dividing Integers
 - Multiply and divide integers with the same sign
 - Multiply and divide integers with different signs
- 8. Mean, Median, Mode, and Range
 - Describe data using mean, median, mode, and range
- 9. Box-and-Whisker Plots
 - Construct and interpret box-and-whisker plots
- 10. Decimals and Integers Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam

11. Decimals and Integers Unit Test

3. Exponents, Factors, and Fractions

1. Exponents and Order of Operations
 - Write and simplify expressions with exponents
2. Divisibility Tests
 - Apply divisibility rules to integers
3. Prime Factorization
 - Determine factors and multiples of numbers by applying prime factorization
4. Simplifying Fractions
 - Determine equivalent fractions by simplifying
5. Comparing and Ordering Fractions

- Compare and order fractions
 - 6. Mixed Numbers and Improper Fractions
 - Convert between improper fractions and mixed numbers
 - 7. Mid-Unit Review
 - Review the concepts, keywords, and all important concepts covered so far in this unit
 - 8. Fractions and Decimals
 - Convert between fractions and decimals
 - 9. Rational Numbers
 - Compare and order rational numbers
 - 10. Scientific Notation
 - Convert numbers between scientific notation and standard form
 - 11. Exponents, Factors, and Fractions Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, key words, formulas, and other important information that may be covered on this exam
 - 12. Exponents, Factors, and Fractions Unit Test
4. **Operations with Fractions and Rational Numbers**
- 1. Estimating With Fractions and Mixed Numbers
 - Estimate sums, differences, products, and quotients of fractions
 - 2. Adding and Subtracting Fractions
 - Add and subtract fractions and solve problems involving fractions
 - 3. Adding and Subtracting Mixed Numbers
 - Add and subtract mixed numbers
 - 4. Adding and Subtracting Rational Numbers
 - Add and subtract rational numbers
 - 5. Multiplying Fractions and Mixed Numbers
 - Multiply fractions and mixed numbers
 - 6. Multiplication of Rational Numbers
 - Multiply rational numbers
 - 7. Dividing Fractions and Mixed Numbers
 - Divide fractions and mixed numbers
 - 8. Division of Rational Numbers
 - Divide rational numbers
 - 9. Changing Units in the Customary System
 - Convert standard units of length, weight, and capacity
 - 10. Changing Units in the Metric System
 - Convert metric units of length, weight, and capacity

11. Operations with Fractions Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, key words, formulas, and all important concepts that may be covered on this exam

12. Operations with Fractions Unit Test

5. Ratios, Rates, and Proportions

1. Ratios

- Create ratios to compare given quantities
- Recognize equivalent ratios

2. Unit Rates and Proportional Reasoning

- Apply proportional reasoning to compute unit rates and unit costs

3. Unit Rates and Ratios of Fractions

- Apply proportional reasoning to compute unit rates associated with ratios of fractions

4. Using Conversion Factors

- Apply conversion factors to convert measures to varying units

5. Proportions

- Evaluate ratios to determine if they form a proportional relationship

6. Solving Proportions

- Identify the unit rate in proportional relationships
- Use unit rates, cross products, and number sense to solve proportions

7. Mid-Unit Review

- Review and reinforce understanding of ratios, rates, and proportions

8. Similar Figures

- Evaluate figures for similarity
- Formulate and solve proportions to discover missing side lengths of similar polygons

9. Maps and Scale Drawings

- Apply proportions to interpret scale drawings and solve problems based on scale ratios

10. Ratios, Rates, and Proportions Unit Review

- Organize your time and study materials
- Review your notes, key words, steps, and other important information that may be covered on the exam

11. Ratios, Rates, and Proportions Unit Test

6. Equations and Inequalities

1. Evaluating and Writing Algebraic Expressions

- Write and evaluate algebraic expressions

2. Simplifying Expressions

- Apply the Distributive Property to expand expressions
- Simplify expressions by combining like terms and applying order of operations

3. Using Number Sense to Solve Equations

- Solve one-step equations using substitution, mental math, and estimation

4. Solving One-Step Equations by Adding/Subtracting

- Solve equations by adding or subtracting

5. Solving One-Step Equations by Multiplying/Dividing

- Solve equations by multiplying or dividing

6. Exploring Two-Step Problems

- Write and evaluate expressions with two operations
 - Solve two-step equations using number sense
7. Solving Two-Step Equations
 - Solve two-step equations using inverse operations
 8. Solving Equations of the Form $p(x + q) = r$
 - Apply the Distributive Property to solve equations
 9. Graphing and Writing Inequalities
 - Graph and write algebraic inequalities
 10. Solving Inequalities by Adding and Subtracting
 - Solve inequalities by adding or subtracting
 11. Solving Inequalities by Multiplying or Dividing
 - Solve inequalities by multiplying or dividing
 12. Solving Two-Step Inequalities
 - Solve two-step inequalities and graph the solutions on a number line
 13. Equations and Inequalities Review
 - Discuss the meaning of an equation and how to keep an equation balanced
 - Review notes, Key Words, and homework
 - Use online tools to practice skills studied in this unit
 14. Equations and Inequalities Unit Test

7. Percents

1. Understanding Percents
 - Create graphic models of percents
 - Rewrite percents as equivalent ratios
2. Percents, Fractions, and Decimals
 - Convert fractions, decimals, and percents to equivalent fractions, decimals, or percents
3. Percents Greater Than 100% or Less than 1%
 - Evaluate and convert percents greater than 100%
 - Evaluate and convert percents less than 1%
4. Finding a Percent of a Number
 - Estimate and calculate the percent of a given number
5. Mid-Unit Review
 - Review and reinforce understanding of percents
6. Solving Percent Problems Using Proportions
 - Solve percent problems by applying proportions
7. Solving Percent Problems Using Equations
 - Solve percent problems by generating and solving equations
8. Applications of Percent
 - Generate and solve equations involving real-world applications of percents

- Estimate solutions to problems involving real-world applications of percents
9. Finding Percent of Change
 - Solve applications of percent problems by determining percents of increase and decrease
 10. Percents Review
 - Review your notes, key words, steps, and other important information that may be covered on the exam
 11. Percents Unit Test

SEMESTER B

1. Patterns and Rules

1. Number Sequences
 - Recognize patterns in arithmetic and geometric sequences and write rules to describe them
 - Analyze patterns to find missing terms in sequences
2. Patterns and Tables
 - Create tables to represent patterns
 - Interpret patterns in tables to find missing terms
3. Function Rules
 - Generate rules for functions
 - Apply function rules to find missing terms
4. Using Tables, Rules, and Graphs
 - Create tables, function rules, and graphs and apply them to solve real-world problems
5. Interpreting Graphs
 - Create graphs to analyze real-world situations
6. Simple Interest
 - Apply the appropriate formula to compute simple interest
7. Compound Interest
 - Apply appropriate formula to compute compound interest
8. Transforming Formulas
 - Evaluate formulas to find solutions to problems
9. Patterns and Rules Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam
10. Patterns and Rules Unit Test

2. Graphing in the Coordinate Plane

1. Graphing Points in Four Quadrants
 - Identify points on all four quadrants of a coordinate plane
 - Graph points on all four quadrants of a coordinate plane
2. Graphing Linear Equations
 - Determine solutions and graph to test solutions of linear equations
3. Finding the Slope of a Line
 - Determine the slope of a line
 - Recognize characteristics of slope
 - Apply slope to problem solving
4. Graphs and Proportional Relationships
 - Analyze graphs and tables to determine whether or not two quantities have a proportional relationship
5. Constant of Proportionality
 - Identify the constant of proportionality (unit rate) in tables, graphs, and equations
6. Graphing Nonlinear Relationships
 - Graph nonlinear equations and absolute value equations
7. Translations

- Graph translations on a coordinate plane
- Generate rules to describe translations
- 8. Line Symmetry and Reflections
 - Recognize lines of symmetry and apply them to graph reflections
- 9. Exploring Tessellations
 - Create a tessellation of a figure
- 10. Rotational Symmetry and Rotations
 - Recognize rotational symmetry by identifying the center of rotation
 - Determine the angle of rotation and graph a rotation of a figure
- 11. Graphing in the Coordinate Plane Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam
- 12. Graphing in the Coordinate Plane Unit Test

3. **Geometry**

1. Lines and Planes
 - Identify planes and points
 - Distinguish between parallel, perpendicular, and skew lines
2. Identifying and Classifying Angles: 1
 - Classify acute, right, obtuse, and straight angles
 - Classify pairs of angles as supplementary and complementary angles
 - Write and solve equations to determine missing angle measures
3. Identifying and Classifying Angles: 2
 - Classify sets of angles as vertical and adjacent angles
 - Apply knowledge of angle theorems to determine missing angle measures
4. Classifying Triangles
 - Classify triangles by side length and angle measure
 - Write and solve equations to determine missing angle measures
5. Drawing Triangles
 - Construct triangles from three measures of angles or sides
 - Evaluate triangle characteristics to distinguish unique triangles
6. Classifying Polygons
 - Identify polygons according to side and angle measures
 - Distinguish between regular and irregular polygons
7. Classifying Quadrilaterals
 - Identify special quadrilaterals according to side and angle measures
8. Congruent Figures
 - Recognize congruent figures
 - Analyze congruent figures to determine missing measures
9. Circles
 - Recognize the parts of a circle and their relationships to one another
10. Circle Graphs

- Construct circle graphs with given conditions
- Analyze data contained in a circle graph

11. Constructions

- Create congruent line segments and perpendicular bisectors using a compass and straight edge

12. Geometry Unit Review

- Organize your time and study materials
- Review your notes, key words, steps, and other important information that may be covered on the exam

13. Geometry Unit Test

4. Measurement

1. Area and Perimeter of Parallelograms

- Calculate the area and perimeter of parallelograms

2. Area and Perimeter of Triangles

- Calculate the area and perimeter of triangles

3. Area of Trapezoids and Other Figures

- Apply area formulas to calculate areas of trapezoids and other irregular polygons

4. Circumference and Area of a Circle

- Apply appropriate formulas to calculate circumference and area of a circle

5. Square Roots and Irrational Numbers

- Determine square roots of perfect squares
- Estimate square roots
- Distinguish between rational and irrational numbers

6. The Pythagorean Theorem Part 1

- Apply the Pythagorean Theorem to find missing lengths of right triangle legs or hypotenuse

7. The Pythagorean Theorem Part 2

- Apply the Pythagorean Theorem to calculate solutions to real-world situations

8. Mid-Unit Review

- Review and reinforce your understanding of measurement

9. Three-Dimensional Figures

- Identify three-dimensional figures according to faces, edges, and vertices
- Sketch three-dimensional figures on graph paper

10. Three Views of an Object

- Create two-dimensional sketches of the top, front, and side views of three-dimensional objects

11. Cross-Sections

- Recognize and describe cross sections of three-dimensional objects

12. Drawing Nets

- Sketch nets of three-dimensional figures

- Recognize nets of three-dimensional figures
- 13. Surface Area of Prisms and Cylinders
 - Apply knowledge of nets to calculate surface area of prisms and cylinders
- 14. Volume of Prisms and Cylinders
 - Apply appropriate formulas to calculate the volume of prisms and cylinders
- 15. Efficiency Expert Portfolio
 - Apply knowledge of dimensions, area, and volume
- 16. Measurement Review
 - Organize your time and study materials
 - Review your notes, Key Words, steps, and other important information that may be covered on the exam
- 17. Measurement Unit Test

5. Using Probability

1. Probability
 - Determine the probability of an event
 - Determine the complement of an event
 - Find the probability of the complement of an event
2. Experimental Probability
 - Find experimental probability
 - Use simulations
3. Sample Spaces
 - Make and use sample spaces
 - Use the counting principle
4. Compound Events
 - Find the probability of independent and dependent events
5. Simulating Compound Events
 - Design and use a simulation to generate frequencies for compound events
6. Permutations
 - Determine permutations using the counting principle or factorials
7. Combinations
 - Determine combinations of objects
8. Unit Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the unit test
9. Using Probability Unit Test

6. Displaying and Analyzing Data

1. Reporting Frequency
 - Generate frequency tables, histograms, and line plots to represent data
 - Interpret frequency tables, histograms, and line plots
2. Stem-and-Leaf Plots
 - Generate stem-and-leaf plots to represent data
 - Interpret data represented on stem-and-leaf plots
3. Choosing the Best Data Display
 - Determine the most accurate and appropriate way to display data

4. Data Variability

- Interpret data displays according to the visual overlap of two data sets
- Compare two data sets according to mean, median, and variability

5. Random Samples and Surveys

- Compose a survey question
- Identify biased questions
- Recognize a random sample of a population

6. Estimating Population Size

- Apply proportions to estimate population sizes
- Draw inferences about a population
- Generate simulated random samples

7. Using Data to Persuade

- Identify misleading graphs and statistics

8. Exploring Scatter Plots

- Create scatter plots
- Interpret scatter plots

9. Displaying and Analyzing Data Unit Review

- Organize your time and study materials
- Review your notes, key words, steps, and other important information that may be covered on the exam

10. Displaying and Analyzing Data Unit Test

Algebra Readiness (Pre-Algebra)

Algebra Readiness (Pre-Algebra)

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Semester A

This is the first of two courses that comprise Algebra Readiness. In this course, the student will be introduced to basic algebraic principles. The student will review properties of expressions and integers. The student will solve one-step equations and inequalities with positive and negative integers, decimals, fractions, and exponents. Then the student will explore problems involving operations of fractions and will apply his knowledge of algebra to solve real-world ratio, proportion, and percent problems. Finally, the student will examine and evaluate two-step and multi-step equations and inequalities.

Semester B

This is the second of two courses that comprise Algebra Readiness. In this course, the student will explore basic algebraic principles. The student will also examine and evaluate two-step and multi-step equations and inequalities and then explore and use graphs to solve linear relations and functions. Next, the student will be introduced to basic concepts of geometry including angle relationships, parallel lines, polygons, circles, and transformations. The student will continue to apply his knowledge of geometry and algebra to solve area and volume problems. Then the student will explore nonlinear functions and polynomials. Finally, the student will examine properties of right triangles, data analysis, and probability.

Course Outline

SEMESTER A

1. Focus on Success in Algebra Readiness

1. Preparing for Success

- Describe the characteristics of quality goals
- Set goals for success in mathematics
- Reflect on strengths, weaknesses, and how to apply them
- Recognize the importance of personal effort to learning

2. Resources for Success

- Identify the various resources that you can use in the course
- Modify goals to include using resources effectively

2. Integers and Algebraic Expressions

1. Order of Operations

- Apply the order of operations to correctly solve an equation
 - Evaluate variable expressions when the value of the variable is given
 - Translate phrases into mathematical expressions
2. Integers and Absolute Value
 - Identify the absolute value of a given integer
 - Identify the opposite of a given integer
 - Evaluate expressions with absolute value
 - Order integers
 3. Adding and Subtracting Integers
 - Apply the rules of addition and subtraction of integers
 - Change subtraction problems to involve addition of an opposite
 4. Multiplying and Dividing Integers
 - Apply the rules of multiplication and division of integers
 5. Properties of Numbers
 - Identify the additive and multiplicative inverse of a number
 - Use the Distributive Property to make mental math easier
 6. Solving Equations by Adding and Subtracting
 - Write and solve equations using addition and subtraction
 7. Solve Equations by Multiplying and Dividing
 - Write and solve equations using multiplication and division
 8. Integers and Algebra Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam

9. Integers and Algebraic Expressions Unit Test

3. Rational Numbers

1. Rational and Irrational Numbers
 - Differentiate between rational and irrational numbers
2. Fractions and Decimals
 - Convert between fractions and decimals
3. Adding and Subtracting Fractions
 - Add and subtract fractions
 - Add and subtract mixed numbers
4. Multiplying and Dividing Fractions
 - Multiply and divide fractions
 - Multiply and divide mixed numbers
 - Scale up a favorite recipe $2\frac{1}{2}$ times
 - Scale down a different favorite recipe by $\frac{1}{4}$

5. Exponent Basics

- Use powers and exponents in expressions
- Evaluate expressions using exponents

6. Properties of Exponents

- Multiply powers
- Divide powers
- Apply negative and zero exponents

7. Scientific Notation Basics

- Convert between scientific notation and standard form
- Convert between standard form and scientific notation

8. Scientific Notation Comparison

- Compare relative size of numbers in scientific notation

9. Operations and Applications of Scientific Notation

- Perform operations expressed in scientific notation
- Apply scientific notation to real world problems

10. Rational Numbers Unit Review

- Organize your time and study materials
- Review your notes, key words, steps, and other important information that may be covered on the exam

11. Rational Numbers Unit Test

4. Real Numbers and the Coordinate Plane

1. Squares and Square Roots

- Find the square and square roots of numbers

2. Real Numbers

- Identify rational and irrational numbers

3. Estimating Irrationals

- Estimate the value of an irrational number by comparing it to rational numbers

4. Roots as Solutions to Equations, Cube Roots

- Evaluate perfect squares and cubes
- Use roots to represent solutions to equations

5. Pythagorean Theorem

- Solve problems using the Pythagorean Theorem

6. Converse of Pythagorean Theorem

- Apply the converse of the Pythagorean Theorem
- Identify a right triangle
- Prove the Pythagorean Theorem

7. Coordinate Plane

- Graph points on the coordinate plane

- Use the Pythagorean Theorem to find the distance between two graphed points
- Apply the Distance Formula
- 8. Movement in the Coordinate Plane
 - Graph and describe translations in the coordinate plane
 - Graph reflections in the coordinate plane and identify lines of symmetry
- 9. Rotations in the Coordinate Plane
 - Graph rotations and identify rotational symmetry
- 10. Real Numbers and the Coordinate Plane Unit Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam
- 11. Real Numbers and the Coordinate Plane Unit Test

5. Applications of Proportions

1. Ratios and Rates
 - Write ratios and unit rates
 - Use rates to solve problems
2. Proportions
 - Identify and solve proportions
3. Similar Figures
 - Identify similar figures
 - Use proportions to find missing measurements in similar figures
4. Ratios of Similar Figures
 - Compare the lengths, perimeters, and areas of similar rectangles
 - Calculate the perimeter and area of a similar figure
5. Dilations
 - Graph dilations on the coordinate plane
 - Determine the scale factor of a dilation
6. Scale Drawings
 - Use proportions to solve problems involving scale
7. Applications of Proportions Unit Review
 - Review information from previous lessons to prepare for the test
 - Submit the scale drawing of your room
8. Applications of Proportions Unit Test

6. Equations and Inequalities

1. Solving Two-Step Equations
 - Solve two-step equations
 - Use two-step equations to solve problems
2. Simplifying Algebraic Expressions

- Simplify algebraic expressions by combining like terms
- 3. Solving Multi-Step Equations
 - Write and solve multi-step equations
- 4. Variables on Both Sides
 - Write and solve equations with variables on both sides
- 5. Transforming Equations
 - Transform equations into simpler forms to determine the number of solutions
- 6. Graphing and Solving Inequalities
 - Write and solve inequalities
- 7. Solving Inequalities by Multiplying or Dividing
 - Solve inequalities by multiplication and division
- 8. Unit Review
 - Review materials within this unit
- 9. Equations and Inequalities Unit Test

SEMESTER B

1. Geometry

1. Pairs of Angles
 - Explore and classify angles
 - Determine angle measures based on angle relationships
2. Parallel Lines and Angles
 - Identify parallel lines
 - Identify the types of angles formed by a transversal
 - Find the measures of angles formed by parallel lines
3. Congruent Polygons
 - Determine if figures are congruent or similar to one another
 - Describe a sequence of transformations for congruent and similar figures
4. Classifying Polygons
 - Classify certain polygons
5. Polygons and Angles
 - Classify polygons
 - Find the interior angle measure of polygons
6. Area of Polygons
 - Find the area of parallelograms, triangles, and trapezoids
7. Area and Circumference of Circles
 - Calculate the circumference and area of circles
 - Calculate the area of an irregular figure

8. Geometric Constructions

- Perform geometric constructions

9. Geometry Unit Review

10. Geometry Unit Test

2. Measurement

1. Polyhedrons, 3-D Figures, and Solids

- Identify solids, parts of solids, and skewed line segments

2. 3-D Views

- Draw 3-D figures, base plans, and isometric views

3. 3-D Figures and Nets

- Identify nets of solids

4. Surface Area of Prisms and Cylinders

- Find surface area of prisms and cylinders using nets and formulas

5. Surface Area of Pyramids and Cones

- Find surface area of pyramids and cones using nets and formulas

6. Using Pythagorean Theorem with 3-D Figures

- Apply the Pythagorean Theorem in three-dimensional figures

7. Volumes of Prisms and Cylinders

- Calculate the volume of prisms and cylinders

8. Volumes of Pyramids and Cones

- Calculate the volume of pyramids and cones

9. Spheres

- Find the surface area and volume of a sphere

10. Similar Solids

- Apply proportional reasoning to find the missing measurement in similar solids

11. Surface Area and Volume in the Real World

- Calculate the surface area and volume (in appropriate units) of three-dimensional objects found in the home, such as a can of food, box of tissues, shoebox, etc.

12. Measurement Unit Review

- Review previously studied material

13. Measurement Unit Test

3. Functions

1. Sequences

- Write rules for sequences and use the rules to find terms

2. Relating Graphs and Events

- Interpret and sketch graphs that represent real-world situations

3. Functions

- Identify functions
- Represent functions with equations, tables, and function notation

4. Understanding Slope

- Calculate slope of a line from different representations

5. Slope and Similar Triangles
 - Demonstrate that the slope between any two points on a line is the same
 - Derive the equation for a line in slope-intercept form: $y = mx + b$
6. Graphing Linear Functions
 - Use tables and equations to graph linear functions
7. Graphing Proportional Relationships
 - Graph proportional relationships
 - Explore the relationship between the slope of a line on a graph and unit rate
8. Writing Rules for Linear Functions
 - Write function rules from words, tables, and graphs
9. Solving Systems of Equations
 - Solve systems of equations by graphing and by substitution
10. Nonlinear Functions
 - Graph and write quadratic functions and other nonlinear functions
11. Comparing Functions
 - Compare functions represented in various ways
12. Functions Unit Review
 - Review for unit test
13. Functions Unit Test

4. Using Graphs to Analyze Data

1. Measures of Center
 - Compute mean, median, mode, range and select appropriate measure of tendency
2. Frequency
 - Utilize line plots, frequency tables, and histograms to display data
3. Venn Diagrams
 - Examine relationships between data with Venn diagrams
4. Stem-and-Leaf Plots
 - Represent and interpret data using stem-and-leaf plots
5. Box-and-Whisker Plots
 - Represent and interpret data using box-and-whisker plots
6. Scatter Plots
 - Create scatter plots and analyze trends to make predictions
7. Bivariate Data
 - Analyze bivariate data
 - Describe patterns of association in bivariate data
8. Modeling Data with Lines
 - Examine data to determine accuracy of models
9. Circle Graphs
 - Interpret data using circle graphs
 - Present data by creating circle graphs
10. Choosing the Right Graph
 - Choose the best graph to represent various data
11. Relative Frequency
 - Create and analyze data using a two-way table

12. Using Graphs to Analyze Data Unit Review

- Review for unit test

13. Using Graphs to Analyze Data Unit Test

5. **Polynomials and Properties of Exponents**

1. Polynomials

- Write algebraic expressions and simplify polynomials

2. Adding and Subtracting Polynomials

- Add and subtract polynomials

3. Exponents and Multiplication

- Multiply powers with the same base
- Multiply numbers in scientific notation

4. Multiplying Polynomials

- Multiply monomials and binomials

5. Exponents and Division

- Divide powers with the same base
- Simplify expressions with negative exponents

6. Polynomials and Properties of Exponents Review

- Review problems and terms

7. Polynomials and Properties of Exponents Unit Test

Pre-Algebra

Pre-Algebra

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

Semester A

This is the first of two courses that comprise Pre-Algebra. In this course, the student will be introduced to basic algebraic principles. The student will review properties of expressions and integers. The student will solve one-step equations and inequalities with positive and negative integers, decimals, fractions, and exponents. Then, the student will explore problems involving decimals and fractions and learn to apply the rules of divisibility to solving expressions. Finally, the student will apply their knowledge of algebra to solve real-world ratio, proportion, and percent problems. The semester ends with lessons devoted specifically to test-taking skills and strategies, which reinforce the skills taught throughout the semester.

Semester B

This is the second of two courses that comprise Pre-Algebra. In this course, the student will explore basic algebraic principles. The student will examine and evaluate two-step and multi-step equations and inequalities and then explore and use graphs to solve linear relations and functions. Next, the student will be introduced to basic concepts of geometry including angle relationships, parallel lines, polygons, circles, and transformations. Next, the student will apply their knowledge of geometry and algebra to solve area and volume problems. Then, the student will explore nonlinear functions and polynomials. Finally, the students will examine properties of right triangles, data analysis, and probability.

Course Outline

SEMESTER A

1. Focus on Success in Algebra Readiness

1. Preparing for Success
 - Describe the characteristics of quality goals
 - Set goals for success in mathematics
 - Reflect on strengths, weaknesses, and how to apply them
 - Recognize the importance of personal effort to learning
2. Resources for Success
 - Identify the various resources that you can use in the course
 - Modify goals to include using resources effectively

2. Integers and Algebraic Expressions

1. Order of Operations

- Apply the order of operations to correctly solve an equation
 - Evaluate variable expressions when the value of the variable is given
 - Translate phrases into mathematical expressions
2. Integers and Absolute Value
 - Identify the absolute value of a given integer
 - Identify the opposite of a given integer
 - Evaluate expressions with absolute value
 - Order integers
 3. Adding and Subtracting Integers
 - Apply the rules of addition and subtraction of integers
 - Change subtraction problems to involve addition of an opposite
 4. Multiplying and Dividing Integers
 - Apply the rules of multiplication and division of integers
 5. Properties of Numbers
 - Identify the additive and multiplicative inverse of a number
 - Use the Distributive Property to make mental math easier
 6. Solving Equations by Adding and Subtracting
 - Write and solve equations using addition and subtraction
 7. Solve Equations by Multiplying and Dividing
 - Write and solve equations using multiplication and division
 8. Integers and Algebra Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam

9. Integers and Algebraic Expressions Unit Test

3. Rational Numbers

1. Rational and Irrational Numbers
 - Differentiate between rational and irrational numbers
2. Fractions and Decimals
 - Convert between fractions and decimals
3. Adding and Subtracting Fractions
 - Add and subtract fractions
 - Add and subtract mixed numbers
4. Multiplying and Dividing Fractions
 - Multiply and divide fractions
 - Multiply and divide mixed numbers
 - Scale up a favorite recipe $2\frac{1}{2}$ times
 - Scale down a different favorite recipe by $\frac{1}{4}$

5. Exponent Basics
 - Use powers and exponents in expressions
 - Evaluate expressions using exponents
6. Properties of Exponents
 - Multiply powers
 - Divide powers
 - Apply negative and zero exponents
7. Scientific Notation Basics
 - Convert between scientific notation and standard form
 - Convert between standard form and scientific notation
8. Scientific Notation Comparison
 - Compare relative size of numbers in scientific notation
9. Operations and Applications of Scientific Notation
 - Perform operations expressed in scientific notation
 - Apply scientific notation to real world problems
10. Unit Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam
11. Rational Numbers Unit Test

4. **Real Numbers and the Coordinate Plane**

1. Squares and Square Roots
 - Find the square and square roots of numbers
2. Real Numbers
 - Identify rational and irrational numbers
3. Estimating Irrationals
 - Estimate the value of an irrational number by comparing it to rational numbers
4. Roots as Solutions to Equations, Cube Roots
 - Evaluate perfect squares and cubes
 - Use roots to represent solutions to equations
5. Pythagorean Theorem
 - Solve problems using the Pythagorean Theorem
6. Converse of Pythagorean Theorem
 - Apply the converse of the Pythagorean Theorem
 - Identify a right triangle
 - Prove the Pythagorean Theorem
7. Coordinate Plane
 - Graph points on the coordinate plane

- Use the Pythagorean Theorem to find the distance between two graphed points
- Apply the Distance Formula
- 8. Movement in the Coordinate Plane
 - Graph and describe translations in the coordinate plane
 - Graph reflections in the coordinate plane and identify lines of symmetry
- 9. Rotations in the Coordinate Plane
 - Graph rotations and identify rotational symmetry
- 10. Real Numbers and the Coordinate Plane Unit Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam
- 11. Real Numbers and the Coordinate Plane Unit Test

5. Applications of Proportions

1. Ratios and Rates
 - Write ratios and unit rates
 - Use rates to solve problems
2. Proportions
 - Identify and solve proportions
3. Similar Figures
 - Identify similar figures
 - Use proportions to find missing measurements in similar figures
4. Ratios of Similar Figures
 - Compare the lengths, perimeters, and areas of similar rectangles
 - Calculate the perimeter and area of a similar figure
5. Dilations
 - Graph dilations on the coordinate plane
 - Determine the scale factor of a dilation
6. Scale Drawings
 - Use proportions to solve problems involving scale
7. Unit Review
 - Review information from previous lessons to prepare for the test
 - Submit the scale drawing of your room
8. Applications of Proportions Unit Test

6. Applications of Percents

1. Fractions, Decimals, and Percents
 - Convert between fractions, decimals, and percents
 - Order rational numbers
2. Estimating with Percents

- Estimate percents using decimals and fractions
- 3. Percents and Proportions
 - Use proportions to find part of a whole, a whole amount, or a percent
- 4. Percent Equations
 - Use equations to solve problems involving percents
- 5. Percent of Change
 - Find percent of change
 - Solve problems involving percent of increase and percent of decrease
- 6. Markup, Discount, and Sales Tax
 - Use percent of change to find markup, discount, and selling price
- 7. Simple Interest
 - Find simple interest and account balances
- 8. Unit Review
 - Organize your time and study materials
 - Review your notes, key words, steps, and other important information that may be covered on the exam
- 9. Applications of Percent Unit Test

7. Equations and Inequalities

1. Solving Two-Step Equations
 - Solve two-step equations
 - Use two-step equations to solve problems
2. Simplifying Algebraic Expressions
 - Simplify algebraic expressions by combining like terms
3. Solving Multi-Step Equations
 - Write and solve multi-step equations
4. Variables on Both Sides
 - Write and solve equations with variables on both sides
5. Transforming Equations
 - Transform equations into simpler forms to determine the number of solutions
6. Graphing and Solving Inequalities
 - Write and solve inequalities
7. Solving Inequalities by Multiplying or Dividing
 - Solve inequalities by multiplication and division
8. Unit Review
 - Review materials within this unit
9. Equations and Inequalities Unit Test

SEMESTER B

1. Geometry

1. Pairs of Angles
 - Explore and classify angles
 - Determine angle measures based on angle relationships
2. Parallel Lines and Angles
 - Identify parallel lines
 - Identify the types of angles formed by a transversal
 - Find the measures of angles formed by parallel lines
3. Congruent Polygons
 - Determine if figures are congruent or similar to one another
 - Describe a sequence of transformations for congruent and similar figures
4. Classifying Polygons
 - Classify certain polygons
5. Polygons and Angles
 - Classify polygons
 - Find the interior angle measure of polygons
6. Area of Polygons
 - Find the area of parallelograms, triangles, and trapezoids
7. Area and Circumference of Circles
 - Calculate the circumference and area of circles
 - Calculate the area of an irregular figure
8. Geometric Constructions
 - Perform geometric constructions
9. Geometry Unit Review

There are no objectives for this lesson.
10. Geometry Unit Test

There are no objectives for this lesson.

2. Measurement

1. Polyhedrons, 3-D Figures, and Solids
 - Identify solids, parts of solids, and skew line segments
2. 3-D Views
 - Draw 3-D figures, base plans, and isometric views
3. 3-D Figures and Nets
 - Identify nets of solids
4. Surface Area of Prisms and Cylinders
 - Find surface area of prisms and cylinders using nets and formulas
5. Surface Area of Pyramids and Cones
 - Find surface area of pyramids and cones using nets and formulas
6. Using Pythagorean Theorem with 3-D Figures

- Apply the Pythagorean Theorem in three-dimensional figures
- 7. Volumes of Prisms and Cylinders
 - Calculate the volume of prisms and cylinders
- 8. Volumes of Pyramids and Cones
 - Calculate the volume of pyramids and cones
- 9. Spheres
 - Find the surface area and volume of a sphere
- 10. Similar Solids
 - Apply proportional reasoning to find the missing measurement in similar solids
- 11. Surface Area and Volume in the Real World
 - Calculate the surface area and volume (in appropriate units) of three-dimensional objects found in the home, such as a can of food, box of tissues, shoebox, etc.
- 12. Measurement Unit Review
 - Review previously studied material
- 13. Measurement Unit Test

There are no objectives for this lesson.

3. Using Graphs to Analyze Data

1. Measures of Center
 - Compute mean, median, mode, range and select appropriate measure of tendency
2. Frequency
 - Utilize line plots, frequency tables, and histograms to display data
3. Venn Diagrams
 - Examine relationships between data with Venn diagrams
4. Stem-and-Leaf Plots
 - Represent and interpret data using stem-and-leaf plots
5. Box-and-Whisker Plots
 - Represent and interpret data using box-and-whisker plots
6. Scatter Plots
 - Create scatter plots and analyze trends to make predictions
7. Bivariate Data
 - Analyze bivariate data
 - Describe patterns of association in bivariate data
8. Modeling Data with Lines
 - Examine data to determine accuracy of models
9. Circle Graphs
 - Interpret data using circle graphs
 - Present data by creating circle graphs
10. Choosing the Right Graph

- Choose the best graph to represent various data

11. Relative Frequency

- Create and analyze data using a two-way table

12. Using Graphs to Analyze Data Unit Review

- Review for unit test

13. Using Graphs to Analyze Data Unit Test

There are no objectives for this lesson.

4. Functions

1. Sequences

- Write rules for sequences and use the rules to find terms

2. Relating Graphs and Events

- Interpret and sketch graphs that represent real-world situations

3. Functions

- Identify functions
- Represent functions with equations, tables, and function notation

4. Understanding Slope

- Calculate slope of a line from different representations

5. Slope and Similar Triangles

- Demonstrate that the slope between any two points on a line is the same
- Derive the equation for a line in slope-intercept form: $y = mx + b$

6. Graphing Linear Functions

- Use tables and equations to graph linear functions

7. Graphing Proportional Relationships

- Graph proportional relationships
- Explore the relationship between the slope of a line on a graph and unit rate

8. Writing Rules for Linear Functions

- Write function rules from words, tables, and graphs

9. Solving Systems of Equations

- Solve systems of equations by graphing and by substitution

10. Nonlinear Functions

- Graph and write quadratic functions and other nonlinear functions

11. Comparing Functions

- Compare functions represented in various ways

12. Functions Unit Review

- Review for unit test

13. Functions Unit Test

There are no objectives for this lesson.

5. Polynomials and Properties of Exponents

1. Polynomials
 - Write algebraic expressions and simplify polynomials
2. Adding and Subtracting Polynomials
 - Add and subtract polynomials
3. Exponents and Multiplication
 - Multiply powers with the same base
 - Multiply numbers in scientific notation
4. Multiplying Polynomials
 - Multiply monomials and binomials
5. Exponents and Division
 - Divide powers with the same base
 - Simplify expressions with negative exponents
6. Polynomials and Properties of Exponents Review
 - Review problems and terms
7. Polynomials and Properties of Exponents Unit Test

There are no objectives for this lesson.

6. Probability

1. Theoretical and Experimental Probability
 - Find theoretical probabilities, experimental probabilities, and odds
2. Independent and Dependent Events
 - Find the probabilities of independent and dependent events
3. Making Predictions
 - Make predictions based on theoretical and experimental probabilities
4. Permutations
 - Find the number of permutations of a set of objects
5. Combinations
 - Find the number of combinations of a set of objects using lists and combination notation
6. Unit Review
 - Review the unit
7. Probability Unit Test

Algebra 1 A

Algebra I A, Part 1/2

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This course includes the first half of the Algebra 1 A course content. In this course, the student will gain a foundational understanding of the real number system, expressions, equations, and inequalities. The student will solve simple and multi-step equations and inequalities and represent those solutions graphically.

There are many opportunities for review and reflection in the course and the student is encouraged to monitor progress with the course content. Throughout the course, problem solving, critical thinking, and real-world application of mathematical concepts will be required.

This course includes the second half of the Algebra 1 A course content. In this course, the student will study functions that are either linear or nonlinear in nature and represent those functions on the coordinate plane. Also, the student will solve systems of equations and inequalities and represent those solutions graphically.

There are many opportunities for review and reflection in the course and the student is encouraged to monitor progress with the course content. Throughout the course, problem solving, critical thinking, and real-world application of mathematical concepts will be required.

Course Outline

SEMESTER A

1. Ready, Set, Algebra

1. Preparation for Success

- Examine organizational skills and learning strategies
- Set goals in the context of mathematical learning
- Reflect on strengths, weaknesses, and the value of goal-setting
- Distinguish between effort-based and ability-based models of learning

2. Be Your Own Best Resource

- Identify the various resources that you can use in the course
- Discuss strategies for using resources effectively

2. Foundations for Algebra

1. Variables and Expressions
 - Write algebraic expressions
2. Order of Operations and Evaluating Expressions
 - Simplify expressions involving exponents
 - Use the order of operations to evaluate expressions
3. Real Numbers and the Number Line
 - Classify, graph, and compare real numbers
 - Find and estimate square roots
4. Properties of Real Numbers
 - Identify and use properties of real numbers, including Associative Properties of Addition and Multiplication, Commutative Properties of Addition and Multiplication, Identity Properties of Addition and Multiplication, and Zero Property of Multiplication
5. Mid-Unit Review
 - Review concepts from Lessons 1–4 of the Foundations for Algebra unit
6. Adding and Subtracting Real Numbers
 - Find sums and differences of real numbers
7. Multiplying and Dividing Real Numbers
 - Find products and quotients of real numbers
8. The Distributive Property
 - Use the Distributive Property to simplify expressions
9. Foundations for Algebra Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study
10. Foundations for Algebra Unit Test
 - Demonstrate understanding of Unit 1 concepts

3. Solving Equations

1. Introduction to Equations
 - Solve equations using tables and mental math
2. Patterns, Equations, and Graphs
 - Use tables, equations, and graphs to describe relationships
3. Solving One-Step Equations
 - Solve one-step equations in one variable
4. Solving Two-Step Equations
 - Solve two-step equations in one variable
5. Mid-Unit Review
 - Review concepts from Lessons 1–4 of the Solving Equations unit
6. Solving Multi-Step Equations
 - Solve multi-step equations in one variable
7. Solving Equations with Variables on Both Sides

- Solve equations with variables on both sides
- Identify equations that are identities or have no solution

8. Literal Equations and Formulas

- Rewrite and use literal equations and formulas

9. Solving Equations Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam

10. Solving Equations Unit Test

4. Solving Inequalities

1. Graphing Inequalities

- Write, graph, and identify solutions of inequalities

2. Solving Inequalities Using Addition or Subtraction

- Use addition or subtraction to solve inequalities

3. Solving Inequalities by Multiplying and Dividing

- Use multiplication or division to solve inequalities

4. Solving Multi-Step Inequalities

- Solve multi-step inequalities

5. Mid-Unit Review

- Review concepts from Lessons 1–4 of the Solving Inequalities unit

6. Working with Sets

- Write sets and identify subsets
- Find the complement of a set

7. Compound Inequalities

- Solve and graph inequalities containing the word "and"
- Solve and graph inequalities containing the word "or"

8. Absolute Value Equations and Inequalities

- Solve equations and inequalities involving absolute value

9. Unions and Intersections of Sets

- Find the unions and intersections of sets

10. Solving Inequalities Review

- Decide which strategies you will use to prepare for your exam.
- Organize your time and study materials.
- Review your notes, keywords, formulas, and all important concepts that may be covered on this exam.

11. Solving Inequalities Unit Test

5. Semester Review and Exam

1. Semester Review

- Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, key words and vocabulary terms, formulas, and all important concepts that may be covered on this exam
2. Semester Exam

SEMESTER B

1. Introduction to Functions

1. Using Graphs to Relate Two Quantities
 - Represent mathematical relationships using graphs
2. Patterns and Linear Functions
 - Identify and represent patterns that describe linear functions
3. Patterns and Nonlinear Functions
 - Identify and represent patterns that describe nonlinear functions
4. Mid-Unit Review
 - Review concepts from the first three lessons of the Introduction to Functions unit
5. Graphing a Function Rule
 - Graph equations that represent functions
6. Writing a Function Rule
 - Write equations that represent functions
7. Formalizing Relations and Functions
 - Determine whether a relation is a function
 - Find domain and range and use function notation
 - Find the inverse of a function
8. Sequences and Functions
 - Identify and extend patterns in sequences
 - Represent arithmetic sequences using function notation
9. Introduction to Functions Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, keywords, formulas, and all important concepts that may be covered on this exam
10. Functions Unit Test

2. Linear Functions

1. Rate of Change and Slope
 - Find rates of change from tables
 - Find slope
2. Direct Variation

- Write and graph an equation of a direct variation
 - 3. Slope-Intercept Form
 - Write linear equations using slope-intercept form
 - Graph linear equations in slope-intercept form
 - 4. Point Slope Form
 - Write and graph linear equations using point-slope form
 - 5. Mid-Unit Review
 - Review concepts from Lessons 1–4
 - 6. Standard Form
 - Graph linear equations using intercepts
 - Write linear equations in standard form
 - 7. Parallel and Perpendicular Lines
 - Determine whether lines are parallel, perpendicular, or neither
 - Write equations of parallel lines and perpendicular lines
 - 8. Graphing Absolute Value Functions
 - Graph an absolute value function
 - Translate the graph of an absolute value function
 - 9. Scatter Plots and Regression Lines
 - Describe the direction and strength of the relationship between two variables on a scatter plot
 - Make predictions about a data set and evaluate the reliability of predictions
 - 10. Linear Functions Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
 - 11. Linear Functions Unit Test
- 3. Systems of Equations and Inequalities**
- 1. Solving Systems by Graphing
 - Analyze special systems
 - Solve systems of equations by graphing
 - 2. Solving Systems Using Substitution
 - Solve systems of equations using substitution
 - 3. Solving Systems Using Elimination
 - Solve systems by adding or subtracting to eliminate a variable
 - 4. Applications of Linear Systems
 - Choose the best method for solving a system of linear equations
 - 5. Mid-Unit Review
 - Review material from Lessons 1–4

6. Linear Inequalities

- Solve systems of linear inequalities by graphing
- Model real-world situations using systems of linear inequalities

7. Systems of Linear Inequalities

- Solve systems of linear inequalities
- Model real-world situations using systems of linear inequalities

8. Systems of Equations and Inequalities Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, keywords, formulas, and all important concepts that may be covered on this exam

9. Systems of Equations and Inequalities Unit Test

4. **Semester Review and Exam**

1. Algebra 1 A, Part 2 Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, key words and vocabulary terms, formulas, and all important concepts that may be covered on this exam

2. Algebra 1 A Semester Exam

Algebra 1 B

Algebra I B, Part 1/2

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This course includes the first half of the Algebra 1 B course content. The course begins with a review of concepts and skills from Algebra 1 A. Then, the student will be introduced to operations involving exponents and then explore exponential functions. The student will learn how to identify and solve polynomial equations using a variety of methods including factoring. Lastly, the student will graph quadratic equations and solve them using a variety of methods, including the quadratic formula.

There are many opportunities for review and reflection in the course and the student is encouraged to monitor progress with the course content. Throughout the course, problem solving, critical thinking, and real-world application of mathematical concepts will be required.

This course includes the second half of the Algebra 1 B course content. In this course, the student will perform operations with radical expressions, graph square root functions, and explore trigonometric ratios. The student will solve both radical and rational equations and explore the graphs of rational functions. Finally, the student will be introduced to statistics and learn how to organize and display data. Lastly, the student will solve problems involving probability.

There are many opportunities for review and reflection in the course and the student is encouraged to monitor progress with the course content. Throughout the course, problem solving, critical thinking, and real-world application of mathematical concepts will be required.

Course Outline

SEMESTER A

1. Review of Algebra 1 A

1. Resources for Success

- Identify the various resources that you can use in the course
- Discuss strategies for using resources effectively
- Set goals in the context of mathematical learning

2. Review of Foundations for Algebra

- Add and subtract integers
- Use the Order of Operations to simplify an expression

- Apply the Distributive Property
- 3. Review of Solving Equations
 - Solve one-step and two-step equations
 - Solve equations with variables on both sides
- 4. Review of Linear Functions
 - Graph linear equations
- 5. Review of Graphing and Systems of Equations
 - Graph functions using the slope-intercept form
 - Solve systems of equations by graphing
 - Solve systems of equations by substitution
 - Solve systems of equations by elimination
- 6. Review of Algebra 1 A Quiz

2. Exponents and Exponential Functions

1. Zero and Negative Exponents
 - Simplify expressions involving zero and negative exponents
2. Scientific Notation
 - Write numbers in scientific and standard notation
 - Compare and order numbers using standard notation
3. Multiplying Powers with the Same Base
 - Multiply powers with the same base
4. More Multiplication Properties of Exponents
 - Raise a power to a power
 - Raise a product to a power
5. Mid-Unit Review
 - Review the concepts covered so far in the Exponents and Exponential Functions unit
 - Determine which skills need further review and practice before proceeding to the next lesson
6. Division Properties of Exponents
 - Divide powers with the same base
 - Raise a quotient to a power
7. Exponential Functions
 - Evaluate and graph exponential functions
8. Exponential Growth and Decay
 - Model exponential interest
9. Exponents and Exponential Functions Unit Review
 - Decide which strategies you will use to prepare for your test
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on the test

10. Exponents and Exponential Functions Unit Test

3. Polynomials and Factoring

1. Adding and Subtracting Polynomials

- Classify, add, and subtract polynomials

2. Multiplying and Factoring Polynomials

- Multiply a monomial by a polynomial
- Factor a monomial from a polynomial

3. Multiplying Binomials

- Multiply two binomials or a binomial by a trinomial

4. Multiplying Special Cases

- Find a square of a binomial
- Find the product of a sum and a difference

5. Mid-Unit Review

- To review the concepts covered so far in Unit 2, lessons 1–4
- To determine which skills need further review and practice before proceeding to the next lesson

6. Factoring $x^2 + bx + c$

- Factor trinomials in the form $x^2 + bx + c$

7. Factoring $ax^2 + bx + c$

- Factor trinomials of the form $ax^2 + bx + c$

8. Factoring Special Cases

- Factor perfect-square trinomials and the differences of two squares

9. Polynomials and Factoring Unit Review

- Decide which strategies you will use to prepare for your test
- Organize your time and study materials
- Review your notes, Key Words, formulas, and all important concepts that may be covered on this test

10. Polynomials and Factoring Unit Test

4. Semester Review and Exam

1. Algebra 1B, Part 1 Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, key words and vocabulary terms, formulas, and all important concepts that may be covered on this exam

2. Semester Exam

SEMESTER B

1. Quadratic Functions and Equations

1. Quadratic Graphs and Their Properties

- Graph quadratic functions of the form $y = ax^2$ and $y = ax^2 + c$

2. Quadratic Functions

- Graph quadratic functions of the form $y = ax^2 + bx + c$

3. Solving Quadratic Equations

- Solve quadratic equations by graphing and using square roots

4. Factoring to Solve Quadratic Equations

- Solve quadratic equations by factoring

5. Mid-Unit Review

- Review the concepts covered so far in this unit
- Determine which skills need further review and practice before proceeding to the next lesson

6. Completing the Square

- Solve quadratic equations by completing the square

7. The Quadratic Formula and the Discriminant

- Solve quadratic equations by using the quadratic formula

8. Linear, Quadratic, and Exponential Models

- Choose a linear, quadratic, or exponential model for data

9. Systems of Linear and Quadratic Equations

- Solve systems of linear and quadratic equations

10. Quadratic Functions and Equations Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam

11. Quadratic Functions and Equations Unit Test

2. Radical Expressions and Data Analysis

1. Simplifying Radicals

- Simplify radicals involving products and quotients

2. Operations with Radical Expressions

- Simplify sums and differences of radical expressions
- Simplify products and quotients of radical expressions

3. Graphing Square Root Functions

- Graph square root functions
- Translate graphs of square root functions

4. Mid-Unit Review

- Review the concepts covered so far in this unit.
- Determine which skills need further review and practice before proceeding to the next lesson.

5. Frequency and Histograms

- Make and interpret frequency tables and histograms

6. Measures of Central Tendency and Dispersion
 - Find mean, median, mode, and range
7. Box-and-Whisker Plots
 - Find quartiles and percents
 - Make and interpret box-and-whisker plots
8. Radical Expressions and Data Analysis Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
9. Radical Expressions and Equations Test

3. Rational Expressions and Functions

1. Simplifying Rational Expressions
 - Simplify rational expressions
2. Multiplying and Dividing Rational Expressions
 - Multiply and divide rational expressions
 - Simplify complex fractions
3. Dividing Polynomials
 - Divide polynomials
4. Adding and Subtracting Rational Expressions
 - Add and subtract rational expressions
5. Mid-Unit Review
 - Review the concepts covered so far in this unit
 - Determine skills that need further review and practice these skills before proceeding to the next lesson
6. Solving Rational Equations
 - Solve rational equations and proportions
7. Inverse Variation
 - Write and graph equations for inverse operations
 - Compare direct and inverse variations
8. Rational Expressions and Functions Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
9. Rational Expressions and Functions Unit Test

4. Semester Review and Exam

1. Algebra 1 B, Part 2 Review
 - Decide which strategies you will use to prepare for your exam

- Organize your time and study materials
- Review your notes, key words and vocabulary terms, formulas, and all important concepts that may be covered on this exam

2. Algebra 1 B, Part 2 Exam

Algebra 1

Algebra 1 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This course is the first of two that comprise Algebra 1. In this course, the student will gain a foundational understanding of the real number system, expressions, equations, and inequalities. The student will be taught to solve simple and multi-step equations and inequalities and represent those solutions graphically. In addition, students will explore linear or nonlinear functions and represent those functions on the coordinate plane. Finally, the student will solve systems of equations and inequalities and represent those solutions graphically.

Throughout the course, problem solving, critical thinking, and real-world application of mathematical concepts will be required.

This course is the second part of a two-part sequence covering Algebra 1. The student will use his knowledge of real number operations, expressions, equations, inequalities, and functions to solve algebra concepts. This course will introduce the student to exponents and use those exponent rules to solve exponential functions. The student will learn how to identify and solve polynomial equations using a variety of methods including factoring. The student will also learn how to work with quadratic functions and equations and represent both of those on a coordinate plane. The student will work with radical and rational expressions and solve rational equations.

Throughout the course, problem solving, critical thinking, and real-world application of mathematical concepts will be required.

Course Outline

SEMESTER A

1. Ready, Set, Succeed

1. Preparation for Success

- Examine organizational skills and learning strategies
- Set goals in the context of mathematical learning
- Reflect on strengths, weaknesses, and the value of goal-setting
- Distinguish between effort-based and ability-based models of learning

2. Be Your Own Best Resource

- Identify the various resources that you can use in the course
- Discuss strategies for using resources effectively

2. Foundational Concepts

1. Variables and Expressions

- Write algebraic expressions
- 2. Order of Operations and Evaluating Expressions
 - Simplify expressions involving exponents
 - Use the order of operations to evaluate expressions
- 3. Real Numbers and the Number Line
 - Classify, graph, and compare real numbers
 - Find and estimate square roots
- 4. Properties of Real Numbers
 - Identify and use properties of real numbers, including Associative Properties of Addition and Multiplication, Commutative Properties of Addition and Multiplication, Identity Properties of Addition and Multiplication, and Zero Property of Multiplication
- 5. Adding and Subtracting Real Numbers
 - Find sums and differences of real numbers
- 6. Multiplying and Dividing Real Numbers
 - Find products and quotients of real numbers
- 7. The Distributive Property
 - Use the Distributive Property to simplify expressions
- 8. Foundational Concepts Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study
- 9. Foundational Concepts Unit Test
 - Demonstrate understanding of Unit 1 concepts

3. Solving Equations

1. Introduction to Equations
 - Solve equations using tables and mental math
2. Patterns, Equations, and Graphs
 - Use tables, equations, and graphs to describe relationships
3. Solving One-Step Equations
 - Solve one-step equations with one variable
4. Solving Two-Step Equations
 - Solve two-step equations with one variable
5. Solving Multi-Step Equations
 - Solve multi-step equations with one variable
6. Solving Equations with Variables on Both Sides
 - Solve equations with variables on both sides
 - Identify equations that are identities or have no solution
7. Literal Equations and Formulas
 - Rewrite and use literal equations and formulas
8. Solving Equations Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam

9. Solving Equations Unit Test

4. Solving Inequalities

1. Graphing Inequalities

- Write, graph, and identify solutions of inequalities

2. Solving Inequalities Using Addition or Subtraction

- Use addition or subtraction to solve inequalities

3. Solving Inequalities Using Multiplication/Division

- Use multiplication or division to solve inequalities

4. Solving Multi-Step Inequalities

- Solve multi-step inequalities

5. Working with Sets

- Write sets and identify subsets
- Find the complement of a set

6. Compound Inequalities

- Solve and graph inequalities containing the word and
- Solve and graph inequalities containing the word or

7. Absolute Value Equations and Inequalities

- Solve equations and inequalities involving absolute value

8. Unions and Intersections of Sets

- Find the unions and intersections of sets

9. Solving Inequalities Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, keywords, formulas, and all important concepts that may be covered on this exam

10. Solving Inequalities Unit Test

5. Introduction to Functions

1. Using Graphs to Relate Two Quantities

- Represent mathematical relationships using graphs

2. Patterns and Linear Functions

- Identify and represent patterns that describe linear functions

3. Patterns and Nonlinear Functions

- Identify and represent patterns that describe nonlinear functions

4. Graphing a Function Rule

- Graph equations that represent functions

5. Writing a Function Rule

- Write equations that represent functions

6. Formalizing Relations and Functions

- Determine when a relation is a function
- Find the domain and range of a function and use function notation with functions
- Find inverse functions
- Determine the output of a function given an input

7. Sequences and Functions

- Identify and extend patterns in sequences
- Represent arithmetic sequences using function notation

8. Introduction to Functions Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam

9. Introduction to Functions Unit Test

6. Linear Functions

1. Rate of Change and Slope

- Find rates of change from tables
- Find slope

2. Direct Variation

- Write and graph an equation of a direct variation

3. Slope-Intercept Form

- Write linear equations using slope-intercept form
- Graph linear equations in slope-intercept form

4. Point-Slope Form

- Write and graph linear equations using point-slope form

5. Standard Form

- Graph linear equations using intercepts
- Write linear equations in standard form

6. Parallel and Perpendicular Lines

- Determine whether lines are parallel, perpendicular, or neither
- Write equations of parallel lines and perpendicular lines

7. Graphing Absolute Value Functions

- Graph an absolute value function
- Translate the graph of an absolute value function

8. Scatter Plots and Regression Lines

- Describe the direction and strength of the relationship between two variables on a scatter plot

- Make predictions about a data set and evaluate the reliability of predictions

9. Linear Functions Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam

10. Linear Functions Unit Test

7. **Systems of Equations and Inequalities**

1. Solving Systems by Graphing

- Analyze special systems
- Solve systems of equations by graphing

2. Solving Systems Using Substitution

- Solve systems of equations using substitution

3. Solving Systems Using Elimination

- Solve systems by adding or subtracting to eliminate a variable

4. Applications of Linear Systems

- Choose the best method for solving a system of linear equations

5. Linear Inequalities

- Solve systems of linear inequalities by graphing
- Model real-world situations using systems of linear inequalities

6. Systems of Linear Inequalities

- Solve systems of linear inequalities
- Model real-world situations using systems of linear inequalities

7. Systems of Equations and Inequalities Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, key words, formulas, and all important concepts that may be covered in this exam

8. Systems of Equations and Inequalities Unit Test

8. **Semester A Review and Exam**

1. Semester A Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, keywords and vocabulary terms, and all important concepts that may be covered on this exam

2. Semester A Exam

SEMESTER B

1. **Mid-Year Refresher**

1. Resources for Success
 - Identify the various resources that you can use in the course
 - Discuss strategies for using resources effectively
 - Set goals in the context of mathematical learning
2. Review of Foundational Concepts
 - Add and subtract integers
 - Use the Order of Operations to simplify an expression
 - Apply the Distributive Property
3. Review of Solving Equations
 - Solve one-step and two-step equations
 - Solve equations with variables on both sides
4. Review of Linear Functions
 - Graph linear equations
5. Review of Graphing and Systems of Equations
 - Graph functions using the slope-intercept form
 - Solve systems of equations by graphing
 - Solve systems of equations by substitution
 - Solve systems of equations by elimination
6. Mid-Year Refresher Review

2. Exponents and Exponential Functions

1. Zero and Negative Exponents
 - Simplify expressions involving zero and negative exponents
2. Scientific Notation
 - Express numbers in scientific and standard notation
 - Compare numbers in standard notation and order them
 - Choose appropriate levels of accuracy when reporting quantities
3. Multiplying Powers with the Same Base
 - Multiply powers with the same base
4. More Multiplication Properties of Exponents
 - Raise a power to a power
 - Raise a product to a power
5. Division Properties of Exponents
 - Divide powers with the same base
 - Raise a quotient to a power
6. Exponential Functions
 - Evaluate and graph exponential functions
7. Exponential Growth and Decay
 - Model exponential growth or decay

8. Exponents and Exponential Functions Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam

9. Exponents and Exponential Functions Unit Test

3. **Polynomials and Factoring**

1. Adding and Subtracting Polynomials

- Classify, add, and subtract polynomials
- Add and subtract polynomial functions

2. Multiplying and Factoring Polynomials

- Multiply a monomial by a polynomial
- Factor a monomial from a polynomial
- Multiply polynomial functions

3. Multiplying Binomials

- Multiply two binomials or a binomial by a trinomial

4. Multiplying Special Cases

- Find a square of a binomial
- Find the product of a sum and a difference

5. Factoring $x^2 + bx + c$

- Factor trinomials in the form $x^2 + bx + c$

6. Factoring $ax^2 + bx + c$

- Factor trinomials of the form $ax^2 + bx + c$

7. Factoring Special Cases

- Factor perfect-square trinomials and the differences of two squares

8. Polynomials and Factoring Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam

9. Polynomials and Factoring Unit Test

4. **Radical Expressions and Data Analysis**

1. Simplifying Radicals

- Simplify radicals involving products and quotients

2. Operations with Radical Expressions

- Simplify sums and differences of radical expressions
- Simplify products and quotients of radical expressions

3. Graphing Square Root Functions

- Graph square root functions
- Translate graphs of square root functions
- 4. Frequency and Histograms
 - Make and interpret frequency tables and histograms
- 5. Measures of Central Tendency and Dispersion
 - Find mean, median, mode, and range
- 6. Box-and-Whisker Plots
 - Find quartiles and percents
 - Make and interpret box-and-whisker plots
- 7. Radical Expressions and Data Analysis Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
- 8. Radical Expressions and Data Analysis Unit Test

5. Rational Expressions and Functions

1. Simplifying Rational Expressions
 - Simplify rational expressions
2. Multiplying and Dividing Rational Expressions
 - Multiply and divide rational expressions
 - Simplify complex fractions
3. Dividing Polynomials
 - Divide polynomials
4. Adding and Subtracting Rational Expressions
 - Add and subtract rational expressions
5. Solving Rational Equations
 - Solve rational equations and proportions
6. Inverse Variation
 - Write and graph equations for inverse operations
 - Compare direct and inverse variations
7. Rational Expressions and Functions Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
8. Rational Expressions and Functions Unit Test

6. Quadratic Functions and Equations

1. Quadratic Graphs and Their Properties

- Graph quadratic functions of the form $y = ax^2$ and $y = ax^2 + c$

2. Quadratic Functions

- Graph quadratic functions of the form $y = ax^2 + bx + c$
- Use functions, tables, and graphs to determine and compare rates of change presented in various forms

3. Solving Quadratic Equations

- Solve quadratic equations by graphing and using square roots

4. Factoring to Solve Quadratic Equations

- Solve quadratic equations by factoring

5. Completing the Square

- Solve quadratic equations by completing the square

6. The Quadratic Formula and the Discriminant

- Solve quadratic equations by using the quadratic formula

7. Linear, Quadratic, and Exponential Models

- Choose a linear, quadratic, or exponential model for data

8. Systems of Linear and Quadratic Equations

- Solve systems of linear and quadratic equations

9. Quadratic Functions and Equations Unit Review

- Decide which strategies you will use to prepare for your exam
- Organize your time and study materials
- Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam.

10. Quadratic Functions and Equations Unit Test

7. Semester B Exam and Review

1. Semester B Review
2. Semester B Exam

Algebra 1 Honors

Honors Algebra 1 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

This course is the first of two that comprise Honors Algebra 1. In this course, the student will be exposed to higher-level mathematics. The student will begin by reviewing basic real number operations and properties before learning how to translate between verbal descriptions of real-life situations and data presented in tables, graphs, and equations. Next the student will solve multi-step equations and inequalities. The student will write and graph linear equations in various forms. Other topics in the course include sequences and series, absolute value, rate of change, and set notation. By the end of the course, the student will solve linear systems of equations and inequalities. Throughout the course, the student will solve real-world problems and model real-world scenarios.

Throughout the course, the student will be introduced to multiple problem-solving strategies and will be exposed to various technologies that can be utilized when solving algebra problems.

SEMESTER B

This course is the second of two that comprise Honors Algebra 1. In this course, the student will explore additional concepts in higher-level mathematics. The student will review the properties of exponents before learning how to add, subtract, multiply, divide, and factor polynomials. Next the student will learn how to write, solve, and graph quadratic and radical functions. Other topics in the course include simplifying scientific notation, simplifying radicals, and rational expressions. The course also includes several lessons about data analysis, where the student will interpret histograms, calculate and interpret the measures of central tendency, and display data using box-and-whisker plots. Throughout the course, the student will solve real-world problems and model real-world scenarios.

Throughout the course, the student will be introduced to multiple problem-solving strategies and will be exposed to various technologies that can be utilized when solving algebra problems.

Course Outline:

SEMESTER A

1. Ready, Set, Algebra

1. Preparation for Success

- Examine organizational skills and learning strategies
- Set goals in the context of mathematical learning
- Reflect on strengths, weaknesses, and the value of goal-setting
- Distinguish between effort-based and ability-based models of learning

2. Be Your Own Best Resource
 - Identify the various resources that you can use in the course
 - Discuss strategies for using resources effectively

2. Foundations for Algebra

1. Variables and Expressions
 - Write algebraic expressions
2. Order of Operations and Evaluating Expressions
 - Simplify expressions involving exponents
 - Use the order of operations to evaluate expressions
3. Real Numbers and the Number Line
 - Classify, graph, and compare real numbers
 - Find and estimate square roots
4. Properties of Real Numbers
 - Identify and use properties of real numbers, including Associative Properties of Addition and Multiplication, Commutative Properties of Addition and Multiplication, Identity Properties of Addition and Multiplication, and Zero Property of Multiplication
5. Adding and Subtracting Real Numbers
 - Find sums and differences of real numbers
6. Multiplying and Dividing Real Numbers
 - Find products and quotients of real numbers
7. The Distributive Property
 - Use the Distributive Property to simplify expressions
8. Foundations for Algebra Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study
9. Foundations for Algebra Unit Test
 - Demonstrate understanding of Unit 1 concepts

3. Solving Equations

1. Introduction to Equations
 - Solve equations using tables and mental math
2. Patterns, Equations, and Graphs
 - Use tables, equations, and graphs to describe relationships
3. Solving One-Step Equations
 - Solve one-step equations in one variable
4. Solving Two-Step Equations
 - Solve two-step equations in one variable
5. Solving Multi-Step Equations
 - Solve multi-step equations in one variable
6. Solving Equations with Variables on Both Sides

- Solve equations with variables on both sides
 - Identify equations that are identities or have no solution
7. Literal Equations and Formulas
 - Rewrite and use literal equations and formulas
 8. Solving Equations Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, key words, formulas, and all important concepts that may be covered on this exam
 9. Solving Equations Unit Test

There are no objectives for this lesson.

4. Solving Inequalities

1. Solving Inequalities Using Addition or Subtraction
 - Use addition or subtraction to solve inequalities
2. Solve Inequalities with Multiplication & Division
 - Use multiplication or division to solve inequalities
3. Solving Multi-step Inequalities
 - Solve multi-step inequalities
4. Working with Sets
 - Write sets and identify subsets
 - Find the complement of a set
5. Compound Inequalities
 - Solve and graph inequalities containing the word "and"
 - Solve and graph inequalities containing the word "or"
6. Absolute Value Equations and Inequalities
 - Solve equations and inequalities involving absolute value
7. Unions and Intersections of Sets
 - Find the unions and intersections of sets
8. Solving Inequalities Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
9. Solving Inequalities Unit Test

There are no objectives for this lesson.

5. Introduction to Functions

1. Using Graphs to Relate Two Quantities
 - Represent mathematical relationships using graphs

2. Patterns and Linear Functions
 - Identify and represent patterns that describe linear functions
3. Patterns and Nonlinear Functions
 - Identify and represent patterns that describe nonlinear functions
4. Graphing a Function Rule
 - Graph equations that represent functions
5. Writing a Function Rule
 - Write equations that represent functions
6. Formalizing Relations and Functions
 - Determine when a relation is a function
 - Find the domain and range of a function and use function notation with functions
 - Find inverse functions
 - Determine the output of a function given an input
7. Sequences and Functions
 - Identify and extend patterns in sequences
 - Represent arithmetic sequences using function notation
8. Introduction to Functions Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, key words, formulas, and all important concepts that may be covered on this exam
9. Introduction to Functions Unit Test

There are no objectives for this lesson.

6. Linear Functions

1. Rate of Change and Slope
 - Find rates of change from tables
 - Find slope
2. Direct Variation
 - Write and graph an equation of a direct variation
3. Slope-Intercept Form
 - Write linear equations using slope-intercept form
 - Graph linear equations in slope-intercept form
4. Point-Slope Form
 - Write and graph linear equations using point-slope form
5. Standard Form
 - Graph linear equations using intercepts
 - Write linear equations in standard form
6. Parallel and Perpendicular Lines

- Determine whether lines are parallel, perpendicular, or neither
 - Write equations of parallel lines and perpendicular lines
7. Graphing Absolute Value Functions
 - Graph an absolute value function
 - Translate the graph of an absolute value function
 8. Scatter Plots and Regression Lines
 - Describe the direction and strength of the relationship between two variables on a scatter plot
 - Make predictions about a data set and evaluate the reliability of predictions
 9. Linear Functions Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, key words, formulas, and all important concepts that may be covered on the exam
 10. Linear Functions Unit Test

There are no objectives for this lesson.

7. Systems of Equations and Inequalities

1. Solving Systems by Graphing
 - Analyze special systems
 - Solve systems of equations by graphing
2. Solving Systems Using Substitution
 - Solve systems of equations using substitution
3. Solving Systems Using Elimination
 - Solve systems by adding or subtracting to eliminate a variable
4. Applications of Linear Systems
 - Choose the best method for solving a system of linear equations
5. Linear Inequalities
 - Solve systems of linear inequalities by graphing
 - Model real-world situations using systems of linear inequalities
6. Systems of Linear Inequalities
 - Solve systems of linear inequalities
 - Model real-world situations using systems of linear inequalities
7. Systems of Equations and Inequalities Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, key words, formulas, and all important concepts that may be covered on this exam
8. Systems of Equations and Inequalities Unit Test

There are no objectives for this lesson.

8. Honors Algebra 1 A Exam

1. Honors Algebra 1 A Exam Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, keywords and vocabulary terms, and all important concepts that may be covered on this exam
2. Honors Algebra 1 A Semester Exam

There are no objectives for this lesson.

SEMESTER B

1. Preparation for Honors Algebra 1 B

1. Resources for Success
 - Identify the various resources that you can use in the course
 - Discuss strategies for using resources effectively
 - Set goals in the context of mathematical learning

2. Exponents and Exponential Functions

1. Zero and Negative Exponents
 - Simplify expressions involving zero and negative exponents
2. Scientific Notation
 - Write numbers in scientific and standard notation
 - Compare and order numbers using standard notation
 - Choose appropriate levels of precision when reporting quantities
3. Multiplying Powers with the Same Base
 - Multiply powers with the same base
4. More Multiplication Properties of Exponents
 - Raise a power to a power
 - Raise a product to a power
5. Division Properties of Exponents
 - Divide powers with the same base
 - Raise a quotient to a power
6. Exponential Functions
 - Evaluate and graph exponential functions
7. Exponential Growth and Decay
 - Model exponential growth or decay
8. Exponents and Exponential Functions Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
9. Exponents and Exponential Functions Unit Test

3. Polynomials and Factoring

1. Adding and Subtracting Polynomials
 - Classify, add, and subtract polynomials
 - Add and subtract polynomial functions
2. Multiplying and Factoring Polynomials
 - Multiply a monomial by a polynomial
 - Factor a monomial from a polynomial
 - Multiply polynomial functions
3. Multiplying Binomials
 - Multiply two binomials or a binomial by a trinomial
4. Multiplying Special Cases
 - Find a square of a binomial
 - Find the product of a sum and a difference
5. Factoring $x^2 + bx + c$
 - Factor trinomials in the form $x^2 + bx + c$
6. Factoring $ax^2 + bx + c$
 - Factor trinomials of the form $ax^2 + bx + c$
7. Factoring Special Cases
 - Factor perfect square trinomials and the differences of two squares
8. Polynomials and Factoring Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
9. Polynomials and Factoring Unit Test

There are no objectives for this lesson.

4. Radical Expressions and Data Analysis

1. Simplifying Radicals
 - Simplify radicals involving products and quotients
2. Operations with Radical Expressions
 - Simplify sums and differences of radical expressions
 - Simplify products and quotients of radical expressions
3. Graphing Square Root Functions
 - Graph square root functions
 - Translate graphs of square root functions
4. Frequency and Histograms
 - Make and interpret frequency tables and histograms
5. Measures of Central Tendency and Dispersion

- Find mean, median, mode, and range
6. Box-and-Whisker Plots
 - Find quartiles and percents
 - Make and interpret box-and-whisker plots
 7. Radical Expressions and Data Analysis Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
 8. Radical Expressions and Data Analysis Unit Test

5. Rational Expressions and Functions

1. Simplifying Rational Expressions
 - Simplify rational expressions
2. Multiplying and Dividing Rational Expressions
 - Multiply and divide rational expressions
 - Simplify complex fractions
3. Dividing Polynomials
 - Divide polynomials
4. Adding and Subtracting Rational Expressions
 - Add and subtract rational expressions
5. Solving Rational Equations
 - Solve rational equations and proportions
6. Inverse Variation
 - Write and graph equations for inverse operations
 - Compare direct and inverse variations
7. Rational Expressions and Functions Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review the assigned problems from the textbook for each lesson, as well as any quiz questions that you had trouble with
8. Rational Expressions and Functions Unit Test

6. Quadratic Functions and Equations

1. Quadratic Graphs and Their Properties
 - Graph quadratic functions of the form $y = ax^2$ and $y = ax^2 + c$
2. Quadratic Functions
 - Graph quadratic functions of the form $y = ax^2 + bx + c$
3. Solving Quadratic Equations
 - Solve quadratic equations by graphing and using square roots
4. Factoring to Solve Quadratic Equations

- Solve quadratic equations by factoring
- 5. Completing the Square
 - Solve quadratic equations by completing the square
- 6. The Quadratic Formula and the Discriminant
 - Solve quadratic equations by using the quadratic formula
- 7. Linear, Quadratic, and Exponential Models
 - Choose a linear, quadratic, or exponential model for data
- 8. Systems of Linear and Quadratic Equations
 - Solve systems of linear and quadratic equations
- 9. Quadratic Functions and Equations Unit Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words, formulas, and all important concepts that may be covered on this exam
- 10. Quadratic Functions and Equations Unit Test

7. Semester B Exam and Review

1. Honors Algebra 1B Semester Review
 - Decide which strategies you will use to prepare for your exam
 - Organize your time and study materials
 - Review your notes, Key Words and vocabulary terms, and all important concepts that may be covered on this exam
2. Honors Algebra 1B Semester Exam

Algebra 1 Prescriptive

Algebra 1A Syllabus

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Variable and Function Patterns

Lesson	Description	Time (min)	Objective(s)
 Using Variables	This lesson describes how to write an algebraic expression with variables. It also shows how to write an equation using variables and includes writing an equation for data in a table.	45	Model relationships with variables Model relationships with equations
 Quiz: Using Variables			
 Exponents and Order of Operations	This lesson shows how to use the order of operations to evaluate and simplify an expression. It also discusses evaluating and simplifying expressions that include grouping symbols and exponents.	45	Simplify and evaluate expressions and formulas Simplify and evaluate expressions containing grouping symbols
 Quiz: Exponents and Order of Operations			

Lesson	Description	Time (min)	Objective(s)
 Exploring Real Numbers	This lesson identifies integers, natural, whole, rational, and irrational numbers. It shows how to determine which set of numbers is most reasonable in a real-world situation. It also explains inequalities, opposites, and absolute value.	45	Classify numbers Compare numbers
 Quiz: Exploring Real Numbers			
 Patterns and Functions	This lesson demonstrates how to write an equation that describes a functional relationship. It also discusses dependent and independent variables and the domain and range of a function.	45	Write a function rule Understand relationships of quantities in a function
 Quiz: Patterns and Functions			
 Analyzing Data	This lesson shows how to analyze and interpret data using scatter plots, mean, median, mode, range, and stem-and-leaf plots. It also discusses how to decide which measure of central tendency best describes a set of real-world data.	45	Analyze data using scatter plots Find mean, median, mode, and range Make and use stem-and-leaf plots
 Quiz: Analyzing Data			
 Posttest 1			

Module 2: Rational Numbers

Lesson	Description	Time (min)	Objective(s)
 Adding Rational Numbers	This lesson presents the identity and inverse properties of addition, and rules about adding numbers with the same or different signs. It shows how to use number lines to add integers and how to add rational numbers using matrices.	45	Add rational numbers using models and rules Apply addition
 Quiz: Adding Rational Numbers			
 Subtracting Rational Numbers	This lesson models the subtraction of rational numbers by using number lines and tiles. It presents the “add its opposite” rule for subtraction and applies subtraction when evaluating expressions with variables.	45	Subtract rational numbers Apply subtraction
 Quiz: Subtracting Rational Numbers			
 Multiplying and Dividing Rational Numbers	This lesson notes patterns that occur when multiplying and dividing rational numbers. It also presents properties and rules based on those patterns.	45	Multiply rational numbers Divide rational numbers
 Quiz: Multiplying and Dividing Rational Numbers			
 Posttest 2			

Module 3: Identifying and Using Properties

Lesson	Description	Time (min)	Objective(s)
 The Distributive Property	This lesson explains how to simplify an expression by using the Distributive Property, by using the Multiplication Property of -1 , and by combining like terms. It also describes how to translate a verbal expression into a mathematical one.	45	Use the Distributive Property Simplify algebraic expressions
 Quiz: The Distributive Property			
 Properties of Numbers	This lesson reviews the properties of real numbers. It also shows how to justify each step in simplifying an expression with reasons.	45	Identify properties Use deductive reasoning
 Quiz: Properties of Numbers			
 Theoretical and Experimental Probability	This lesson describes how to find the theoretical probability of an event when all possible outcomes are equally likely, its complement, and its odds. It also shows how to find the experimental probability of an event based on collected data.	45	Find theoretical probabilities Find experimental probabilities
 Quiz: Theoretical and Experimental Probability			

 Probability of Compound Events	This lesson distinguishes between independent and dependent events, and discusses the rules about the probability of two events in each case. It also shows the result of selecting with and without replacement.	45	Find the probability of independent events Find the probability of dependent events
 Quiz: Probability of Compound Events			
 Posttest 3			

Module 4: Solving Equations

Lesson	Description	Time (min)	Objective(s)
 Solving Two-Step Equations	This lesson models solving two-step equations using the properties of equality. It also uses real-world examples to show how to translate words into a mathematical function. Using deductive reasoning to justify steps when solving is also included.	45	Solve two-step equations Use deductive reasoning
 Quiz: Solving Two-Step Equations			
 Solving Multi-Step Equations	This lesson explains combining like terms and using the Distributive Property to solve multi-step equations. It also shows solving equations that have grouping symbols, fractions, or decimals. It concludes by summarizing the five steps for solving.	45	Use the Distributive Property when combining like terms Use the Distributive Property when solving equations
 Quiz: Solving Multi-Step Equations			

 Equations With Variables on Both Sides	This lesson discusses using addition or subtraction to get the variable on one side of an equation. It also shows how some equations are always true or never true.	45	Solve equations with variables on both sides Identify equations that are identities or have no solution
 Quiz: Equations With Variables on Both Sides			
 Posttest 4			

Module 5: Solving Proportions

Lesson	Description	Time (min)	Objective(s)
 Ratio and Proportion	This lesson defines ratio, rate, unit rate, and proportion. It explains how to calculate and use unit rates and how to use conversion factors when needed. For proportions, it covers using cross products and solving multi-step proportions.	45	Find ratios and rates Solve proportions
 Quiz: Ratio and Proportion			
 Proportions and Similar Figures	This lesson demonstrates how to use proportions to solve problems involving similar figures. Examples cover dilation, indirect measurements, and scale drawings.	45	Find missing measures of similar figures Use similar figures when measuring indirectly
 Quiz: Proportions and Similar Figures			

 Equations and Problem Solving	This lesson explains how to solve problems that contain two unknown quantities by defining one variable in terms of another. It presents several distance-rate-time problems that involve objects in uniform motion.	45	Define a variable in terms of another Model distance-rate-time problems
 Quiz: Equations and Problem Solving			
 Posttest 5			

Module 6: Square Roots

Lesson	Description	Time (min)	Objective(s)
 Percent of Change	This lesson describes percent of change and percent error. It demonstrates finding the greatest possible error, finding maximum and minimum areas, and finding the percent error when measuring or calculating volume.	45	Find percent of change Find percent error
 Quiz: Percent of Change			
 Finding and Estimating Square Roots	This lesson introduces square roots, both principal and negative square roots, as well as rational and irrational square roots. It shows how to estimate square roots by using perfect squares and by using a calculator.	45	Find square roots Estimate and use square roots
 Quiz: Finding and Estimating Square Roots			

<p> The Pythagorean Theorem</p>	<p>This lesson demonstrates the Pythagorean Theorem and applies it and its converse to real-world problem solving. It also presents the terms conditional, hypothesis, and conclusion.</p>	<p>45</p>	<p>Solve problems using the Pythagorean Theorem Identify right triangles</p>
<p> Quiz: The Pythagorean Theorem</p>			
<p> Posttest 6</p>			

Module 7: Solving Inequalities

Lesson	Description	Time (min)	Objective(s)
<p> Inequalities and Their Graphs</p>	<p>This lesson explains what it means to identify solutions of an inequality. It shows finding solutions with mental math or by evaluation. It also shows how to graph a one-variable inequality on a number line and how to write an inequality for a graph.</p>	<p>45</p>	<p>Identify solutions of inequalities Graph and write inequalities</p>
<p> Quiz: Inequalities and Their Graphs</p>			
<p> Solving Inequalities: Addition and Subtraction</p>	<p>This lesson discusses using addition or subtraction to solve an inequality. It also explains how to check the solution by first checking the computations and then checking the direction of the inequality symbol.</p>	<p>45</p>	<p>Use addition to solve inequalities Use subtraction to solve inequalities</p>
<p> Quiz: Solving Inequalities: Addition and Subtraction</p>			

 Solving Inequalities: Multiplication and Division	This lesson shows how to use multiplication and division to solve an inequality. It emphasizes that the direction of the inequality symbol must be reserved when multiplying or dividing by a negative number.	45	Use multiplication to solve inequalities Use division to solve inequalities
 Quiz: Solving Inequalities: Multiplication and Division			
 Posttest 7			

Module 8: More Equations and Inequalities

Lesson	Description	Time (min)	Objective(s)
 Solving Multi-Step Inequalities	This lesson models how to solve multiple-step inequalities when variables appear on one side or both sides of an inequality. It also shows how to use the Distributive Property and to combine like terms to simplify.	45	Solve multi-step inequalities with variables on one side Solve multi-step inequalities with variables on both sides
 Quiz: Solving Multi-Step Inequalities			
 Compound Inequalities	This lesson demonstrates how to solve compound inequalities. It emphasizes graphing the solutions and works through a real-world problem involving a compound inequality.	45	Solve and graph inequalities containing and Solve and graph inequalities containing or
 Quiz: Compound Inequalities			

 Absolute Value Equations and Inequalities	This lesson focuses on absolute values. It covers how to solve equations and inequalities that include absolute values, how to graph them using number lines, and how to check the solutions.	45	Solve equations that involve absolute value Solve inequalities that involve absolute value
 Quiz: Absolute Value Equations and Inequalities			
 Posttest 8			

Module 9: Graphs and Functions

Lesson	Description	Time (min)	Objective(s)
 Relations and Functions	This lesson analyzes graphs based solely on the shape of the graph and shows how to label, sketch, and interpret such graphs. It also explains function notation and shows various ways to determine whether a relation is a function.	45	Interpret, sketch, and analyze graphs from situations Identify relations and functions Evaluate functions
 Quiz: Relations and Functions			
 Function Rules, Tables, and Graphs	This lesson uses rules, tables, and graphs to model functions. It explains continuous versus discrete data and demonstrates how to write a function rule based on a table. It also shows how to translate a real-world problem into a function rule.	45	Model functions using rules, tables, and graphs Write a function rule given a table or real-world situation
 Quiz: Function Rules, Tables, and Graphs			

Lesson	Description	Time (min)	Objective(s)
 Direct Variation	This lesson discusses how to determine if an equation is a direct variation and how to write an equation of a direct variation given a point. It also shows how to tell whether a table of data shows a direct variation.	45	Write an equation of a direct variation Use ratios and proportions with direct variations
 Quiz: Direct Variation			
 Inverse Variation	This lesson describes how to write an equation of an inverse variation and how to find a missing coordinate on the graph of an inverse variation. It also demonstrates how to determine whether data in a table represent a direct or inverse variation.	45	Solve inverse variations Compare direct and inverse variation
 Quiz: Inverse Variation			
 Describing Number Patterns	This lesson explains inductive reasoning, conjecture, sequence, terms, and arithmetic difference. It shows how to find the common difference in an arithmetic sequence and how to find specific terms of a sequence.	45	Use inductive reasoning in continuing number patterns Write rules for arithmetic sequences
 Quiz: Describing Number Patterns			
 Posttest 9			

Module 10: Linear Equations and Graphs

Lesson	Description	Time (min)	Objective(s)
 Rate of Change and Slope	This lesson shows how to find the rate of change (or slope) given a table or graph. Given a graphed line or two coordinate points of a line, this lesson shows how to find the slope. It also discusses the slope of horizontal and vertical lines.	45	Find rates of change from tables and graphs Find slope
 Quiz: Rate of Change and Slope			
 Slope-Intercept Form	This lesson teaches the slope-intercept form, including how to write the slope-intercept form from a graph of a linear function and how to graph equations stated in slope-intercept form. It also shows how to interpret linear graphs.	45	Write linear equations in slope-intercept form Graph linear equations Interpret linear graphs
 Quiz: Slope- Intercept Form			
 Standard Form	This lesson presents the standard form of a linear equation. It demonstrates how to find intercepts, given an equation in standard form, and how to graph lines using intercepts. It also teaches how to transform an equation into standard form.	45	Graph equations using intercepts Write equations in standard form
 Quiz: Standard Form			
 Posttest 10			

Module 11: Writing Equations of Lines

Lesson	Description	Time (min)	Objective(s)
 Point-Slope Form and Writing Linear Equations	This lesson addresses the point-slope form, including how to graph and how to write equations in point-slope form. It concludes with how to model a table of data, if linear, with a linear equation.	45	Graph and write linear equations using point-slope form Write a linear equation using data
 Quiz: Point-Slope Form and Writing Linear Equations			
 Parallel and Perpendicular Lines	This lesson notes that lines are parallel if they have the same slope and different y -intercepts, and that lines are perpendicular if the product of their slopes is -1 . Equations of lines are determined to be parallel, perpendicular, or neither.	45	Determine whether lines are parallel Determine whether lines are perpendicular
 Quiz: Parallel and Perpendicular Lines			
 Graphing Absolute Value Equations	This lesson looks at graphs of absolute value equations. It demonstrates how to graph a vertical or horizontal translation and how to write an absolute value equation for a translation.	45	Translate the graph of an absolute value equation vertically Translate the graph of an absolute value equation horizontally
 Quiz: Graphing Absolute Value Equations			
 Posttest 11			

Review Test

Lesson	Description	Time (min)	Objective(s)
★ Review Test			

Algebra 1B Syllabus

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Systems of Equations and Inequalities

Lesson	Description	Time (min)	Objective(s)
 Solving Systems by Graphing	This lesson introduces systems of linear equations and shows how to solve them by graphing. It also discusses how to tell from the graphs whether there is one solution, no solution, or infinitely many solutions.	45	Solve systems by graphing Analyze Analyze special types of systems
 Quiz: Solving Systems by Graphing			
 Solving Systems Algebraically	This lesson explains substitution and elimination of a variable as additional ways to solve a system of equations. It concludes by applying the different methods (graphing, substitution, or elimination) to solve word problems.	45	Solve systems using substitution Solve systems by adding or subtracting Write systems of linear equations

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Solving Systems Algebraically			
📁 Linear Inequalities	This lesson teaches how to model and solve situations using linear inequalities. It shows how to graph an inequality and how to rewrite an inequality in slope- intercept form.	45	Graph linear inequalities Write and use linear inequalities when modeling real-world situations
🔍 Quiz: Linear Inequalities			
★ Posttest 1			

Module 2: Exponents

Lesson	Description	Time (min)	Objective(s)
📁 Exponential Expressions	This lesson defines zero and negative exponents, and presents how to simplify these types of powers. It also discusses how to simplify and evaluate exponential expressions with zero and negative exponents.	45	Simplify expressions with zero and negative exponents Evaluate exponential expressions
🔍 Quiz: Exponential Expressions			
📁 Scientific Notation	This lesson defines scientific notation and reviews how to write a number in scientific or standard notation. It also demonstrates how to multiply numbers in scientific notation and use scientific notation to order numbers.	45	Write numbers in scientific and standard notation Use scientific notation

 Quiz: Scientific Notation			
 Multiplication Properties of Exponents	<p>This lesson explains how to multiply powers with the same base. It also presents how to multiply numbers in scientific notation.</p>	45	<p>Multiply powers Work with scientific notation</p>
 Quiz: Multiplication Properties of Exponents			
 More Multiplication Properties of Exponents	<p>This lesson continues the discussion of the multiplication properties of exponents. It covers how to simplify a product raised to a power and how to simplify a power raised to a power.</p>	45	<p>Raise a power to a power Raise a product to a power</p>
 Quiz: More Multiplication Properties of Exponents			
 Division Properties of Exponents	<p>This lesson explains how to divide powers with the same base. It also teaches how to raise a quotient to a power and demonstrates how to simplify an exponential expression that contains quotients raised to powers.</p>	45	<p>Divide powers with the same base Raise a quotient to a power</p>
 Quiz: Division Properties of Exponents			
 Posttest 2			

Module 3: Exponential Functions

Lesson	Description	Time (min)	Objective(s)
 Geometric Sequences	This lesson introduces geometric sequences. It covers how to find the common ratio of a geometric sequence to find the next term. It also demonstrates how to define the rule for a geometric sequence and concludes with using the rule to find any term.	45	Form geometric sequences; Use formulas when describing geometric sequences
 Quiz: Geometric Sequences			
 Exponential Functions	This lesson introduces exponential functions. It demonstrates how to evaluate these functions for a specific value or domain. It also shows how to graph exponential functions.	45	Evaluate exponential functions: Graph exponential functions
 Quiz: Exponential Functions			
 Exponential Growth and Decay	This lesson presents how to model exponential growth and exponential decay with functions. It includes real-world examples, including interest compounded annually and quarterly.	45	Model exponential growth; Model exponential decay
 Quiz: Exponential Growth and Decay			
★ Posttest 3			

Module 4: Polynomials

Lesson	Description	Time (min)	Objective(s)
 Polynomials	This lesson describes polynomials, explaining the terms monomial, degree, polynomial, binomial, trinomial, and standard form. It explains how to classify polynomials using the degree and number of terms, as well as how to add or subtract polynomials.	45	Describe polynomials Add and subtract polynomials
 Quiz: Polynomials			
 Multiplying and Factoring	This lesson introduces the multiplying of polynomials by focusing on how to multiply a polynomial by a monomial. It also explains how to find the GCF of a polynomial and how to use the GCF to factor a polynomial completely.	45	Multiply a polynomial by a monomial Factor a monomial from a polynomial
 Quiz: Multiplying and Factoring			
 Multiplying Binomials	This lesson uses models to present the multiplication of two binomials. It applies FOIL when multiplying two binomials. It concludes with using the vertical or horizontal method to multiply a trinomial and a binomial.	45	Multiply binomials using FOIL Multiply trinomials by binomials
 Quiz: Multiplying Binomials			

 Multiplying Special Cases	This lesson demonstrates that FOIL or a rule can be used to square a binomial. The result is a special pattern. It also shows that the product of the sum and difference of the same two terms results in the difference of their squares.	45	Find the square of a binomial Find the difference of squares
 Quiz: Multiplying Special Cases			
 Posttest 4			

Module 5: Polynomials and Factoring

Lesson	Description	Time (min)	Objective(s)
 Factoring Trinomials	This lesson shows how to factor trinomials of the type $ax^2 + bx + c$, including those with a negative constant and/or middle term. It teaches how to factor trinomials with two variables.	45	<ul style="list-style-type: none"> Factor trinomials Factor trinomials of the type $ax^2 + bx + c$
 Quiz: Factoring Trinomials			
 Factoring Special Cases	This lesson explains how to recognize a perfect-square trinomial and factor it quickly. It also discusses factoring the difference of two squares.	45	Factor perfect-square trinomials Factor the difference of squares
 Quiz: Factoring Special Cases			
 Factoring by Grouping	This lesson uses the Distributive Property to factor four-term polynomials by looking for two groups of terms with the same factor. It then applies this same technique to trinomials of the type $ax^2 + bx + c$ as another available factoring method.	45	Factor polynomials with four terms Factor trinomials by grouping

🔍 Quiz: Factoring by Grouping			
★ Posttest 5			

Module 6: Quadratic Equations and Functions

Lesson	Description	Time (min)	Objective(s)
📁 Exploring Quadratic Graphs	This lesson discusses the standard form of quadratic functions and demonstrates how to graph quadratic functions of the type $y = ax^2$ and $y = ax^2 + c$. It defines terms such as parabola, discusses how to identify a vertex, and compares parabola widths.	45	
🔍 Quiz: Exploring Quadratic Graphs			
📁 Quadratic Functions	This lesson presents graphs of quadratic functions, $y = ax^2 + bx + c$. It provides formulas for the axis of symmetry and x-coordinate of the vertex, and shows how to use this information when graphing. It also covers graphing quadratic inequalities.	45	Graph quadratic functions of the form $y = ax^2 + bx + c$ Graph quadratic inequalities
🔍 Quiz: Quadratic Functions			
📁 Solving Quadratic Equations	This lesson teaches solving a quadratic equation by graphing the related function and finding the x-intercepts. It also discusses using square roots to solve certain quadratic equations and a real-world problem.	45	Solve quadratic equations by graphing Solve quadratic equations using square roots
🔍 Quiz: Solving Quadratic Equations			

Lesson	Description	Time (min)	Objective(s)
 Factoring to Solve Quadratic Equations	This lesson presents the zero-product property. It shows how to use this property to solve quadratic equations if the expression can be factored. It also reviews adding or subtracting terms to write the expression in standard form before factoring.	45	Solve quadratic equations using the Zero-Product Property; Solve quadratic equations by factoring
 Quiz: Factoring to Solve Quadratic Equations			
 Posttest 6			

Module 7: Solving Quadratic Equations

Lesson	Description	Time (min)	Objective(s)
 Completing the Square	This lesson models completing the square of a quadratic expression using algebra tiles. It teaches how to find a value that completes the square and applies the method of completing the square to any quadratic equation.	45	Find the value that completes the square Solve quadratic equations by completing the square
 Quiz: Completing the Square			
 The Quadratic Formula	This lesson shows how the quadratic formula is derived and applies it to solving any quadratic equation. Although the quadratic formula always works, the lesson also discusses how to choose the easiest method for a particular equation.	45	Use the quadratic formula when solving quadratic equations; Choose an appropriate method for solving a quadratic equation

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: The Quadratic Formula			
📁 The Discriminant and Modeling Data	This lesson explains how to use the discriminant to determine the number of solutions for a quadratic equation. It also covers choosing between linear, exponential, or quadratic functions to model data and applies this to a real-world example.	45	Find the number of solutions of a quadratic equation Choose a linear, quadratic, or exponential model for data
🔍 Quiz: The Discriminant and Modeling Data			
★ Posttest 7			

Module 8: Radical Expressions and Equations

Lesson	Description	Time (min)	Objective(s)
📁 Simplifying Radicals	This lesson introduces the multiplication and division properties of square roots. It shows how to use them to simplify radical expressions involving products or quotients. It also covers rationalizing the denominator when it is not a perfect square.	45	Simplify radicals involving products Simplify radicals involving quotients
🔍 Quiz: Simplifying Radicals			

Lesson	Description	Time (min)	Objective(s)
 Operations With Radical Expressions	This lesson demonstrates how to simplify operations with radical expressions. It shows how to combine like radicals when adding or subtracting and how to use the Distributive Property and FOIL when multiplying or dividing.	45	Simplify sums and differences Simplify products and quotients
 Quiz: Operations With Radical Expressions			
 Radical Equations	This lesson shows how to solve radical equations by isolating the radical. It progresses to equations with radicals on both sides and includes a real-world example. It also covers how to identify extraneous solutions.	45	Solve equations containing radicals Identify extraneous solutions
 Quiz: Radical Equations			
 Square Root Functions	This lesson introduces square root functions and shows how to graph them for real numbers. It also shows how to graph vertical and horizontal translations of the simplest square root function.	45	Graph square root functions Translate graphs of square root functions
 Quiz: Square Root Functions			

Lesson	Description	Time (min)	Objective(s)
 Trigonometric Ratios	This lesson introduces sine, cosine, and tangent. It teaches how to find these when given the lengths of the sides of a triangle or by using a calculator. It concludes with how to find missing triangle side lengths using a trigonometric ratio.	45	Find trigonometric ratios Find missing lengths in a right triangle
 Quiz: Trigonometric Ratios			
 Posttest 8			

Module 9: Rational Functions and Expressions

Lesson	Description	Time (min)	Objective(s)
 Rational Functions	This lesson uses a real-world example of traveling in a car to show how to graph a rational function. It explains what asymptotes are, how to identify them, and how to use them. It concludes by reviewing the six families of functions studied so far.	45	Graph rational functions Identify types of functions
 Quiz: Rational Functions			
 Rational Expressions	This lesson demonstrates how to simplify a rational expression by factoring the numerator and denominator, and then eliminating common factors. It also discusses recognizing opposite factors and how to simplify a rational expression containing them.	45	Simplify rational expressions Evaluate rational expressions

 Quiz: Rational Expressions			
Lesson	Description	Time (min)	Objective(s)
 Multiplying and Dividing Rational Expressions	<p>This lesson explains how to multiply and divide rational expressions. It shows how to use factoring to divide out the common factors before multiplying. It teaches how to multiply a rational expression by a polynomial and how to divide a rational expression by a polynomial.</p>	45	<p>Multiply rational expressions Divide rational expressions</p>
 Quiz: Multiplying and Dividing Rational Expressions			
 Polynomial Division	<p>This lesson shows how to divide a polynomial by a monomial or a binomial. It progresses to dividing polynomials with a zero coefficient. It concludes with a summary of steps for dividing polynomials.</p>	45	<p>Divide polynomials by a monomial Divide polynomials</p>
 Quiz: Polynomial Division			
 Posttest 9			

Module 10: Rational Equations

Lesson	Description	Time (min)	Objective(s)
 Adding and Subtracting Rational Expressions	This lesson demonstrates how to add and subtract rational expressions with like denominators. Then it shows how to add and subtract with unlike denominators by finding the least common denominator (LCD).	45	<p>Add and subtract rational expressions with like denominators</p> <p>Add and subtract rational expressions with unlike denominators</p>
Lesson	Description	Time (min)	Objective(s)
 Quiz: Adding and Subtracting Rational Expressions			
 Rational Equations	This lesson shows how to solve rational equations. It also explains how to solve rational proportions by using cross products. Checking the answers is emphasized since there may be extraneous solutions.	45	<p>Solve rational equations</p> <p>Solve proportions</p>
 Quiz: Rational Equations			
 Counting Methods and Permutations	This lesson demonstrates how to find the possible orders of objects by using a tree diagram and using the multiplication counting principle. It also covers finding permutations and introduces permutation notation.	45	<p>Use the multiplication counting principle</p> <p>Find permutations</p>
 Quiz: Counting Methods and Permutations			

 Combinations	This lesson explains how to find combinations and introduces combination notation. It also teaches how to use permutations and combinations in probability.	45	Find combinations Find probability with counting techniques
 Quiz: Combinations			
 Posttest 10			

Review Test

Lesson	Description	Time (min)	Objective(s)
 Review Test			

Algebra 2

Algebra 2 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

In the first semester of this algebra course, the student will review and expand on her learning from previous algebra courses. The beginning units will focus mostly on the equation and the inequality. The student will write, solve, and graph these in a variety of real-world scenarios. The last few units will focus on types of functions. The student will continue her study of quadratic functions from previous algebra courses, but will expand this to include exponential and logarithmic functions. As before, the student will write, solve, and graph these functions. Use of a graphing calculator is encouraged.

In this second semester of this algebra course, the student will strengthen his algebraic problem-solving abilities and deepen an understanding of mathematics. The student will, among other things, explore operations, graphs, and real-world applications related to both radical and rational functions, observe different types of geometric and arithmetic patterns, examine graphs and equations of conic sections, and calculate probabilities. The course will conclude with an introduction to trigonometry and its associated functions.

Course Outline

SEMESTER A

1. Focus on Success

1. Get in Shape for Math
 - Examine organizational skills and learning strategies
 - Set goals in the context of mathematical learning
 - Reflect on strengths, weaknesses, and the value of goal-setting
 - Distinguish between effort-based and ability-based models of learning
2. Resources for Success
 - Identify the various resources that can be used to promote active learning
 - Discuss strategies for using resources effectively

2. Expressions, Equations, and Inequalities

1. Patterns and Expressions
 - Identify and describe patterns
 - Make predictions based on patterns
2. Properties of Real Numbers

- Identify and use properties of real numbers
 - Write numerical expressions in different forms
 - Plot real numbers on a number line
3. Algebraic Expressions
 - Rewrite algebraic expressions
 - Solve algebraic expressions
 - Model situations using algebraic expressions
 4. Solving Equations
 - Solve multi-step equations
 - Write and use equations to solve problems
 - Rewrite and solve literal equations
 5. Solving Inequalities
 - Solve and graph inequalities
 - Write and solve compound inequalities
 6. Absolute Value Equations and Inequalities
 - Write and solve equations and inequalities involving absolute value
 7. Expressions, Equations, and Inequalities Review
 - Use variables to model real-world situations
 - Use the properties of real numbers to simplify and evaluate algebraic expressions
 - Solve an equation or inequality, including absolute value and compound inequalities
 - Review concepts in order to prepare for the unit test
 8. Expressions, Equations, and Inequalities Unit Test
3. **Functions, Equations, and Graphs**
 1. Relations and Functions
 - Graph relations in the coordinate plane
 - Determine if relation is a function
 - Write and use functions to solve problems
 2. Direct Variation
 - Create and summarize direct variation equations
 - Graph direct variation equations
 3. Linear Functions and Slope Intercept
 - Create the graph of a linear equation
 - Derive the equation of a line from its graph
 - Interpret key features of graphs of linear functions
 4. More About Linear Equations
 - Derive the equation of a line given its slope and a point on the line
 - Write an equation of a line given two points on the line
 - Write the equation of a line in different forms

5. Families of Functions
 - Analyze transformations of functions
6. Two-Variable Inequalities
 - Graph two-variable inequalities
7. Functions, Equations, and Graphs Unit Review
 - Review concepts in order to prepare for the unit test
8. Functions, Equations, and Graphs Unit Test

4. Linear Systems

1. Solving Systems Using Tables and Graphs
 - Solve a linear system of equations by using a graph or a table of values
 - Write and use a linear system to solve problems
2. Solving Systems Algebraically
 - Solve a linear system of equations using algebra
 - Write and use a linear system to solve problems
3. Systems of Inequalities
 - Solve a system of linear inequalities by graphing
 - Use systems of linear inequalities to model situations
4. Linear Programming
 - Solve problems using linear programming
5. Systems With Three Variables
 - Solve systems in three variables using elimination
 - Solve systems in three variables using substitution
6. Solving Systems Using Matrices
 - Represent a system of linear equations with a matrix
 - Solve a system of linear equations using matrices
7. Linear Systems Unit Review
 - Review concepts in order to prepare for the unit test
8. Linear Systems Unit Test

5. Quadratic Functions and Equations

1. Quadratic Functions and Transformations
 - Identify quadratic functions
 - Graph quadratic functions
 - Write and use quadratic functions to solve problems
 - Graph translations of quadratic functions
2. Standard Form of a Quadratic Function
 - Graph quadratic functions
 - Write and use quadratic functions to solve problems
3. Modeling with Quadratic Functions

- Use quadratic functions to model data sets
 - Interpret the domain of a function and relate the domain to its graph
4. Factoring Quadratic Expressions
 - Find common and binomial factors of quadratic expressions
 - Factor special quadratic expressions
 5. Quadratic Equations
 - Solve quadratic equations by graphing and factoring
 - Write and use quadratic equations to solve problems
 6. The Quadratic Formula
 - Solve quadratic equations using the quadratic formula
 - Determine the number of solutions by using the discriminant
 7. Complex Numbers
 - Identify, graph, and perform operations with complex numbers
 - Find complex number solutions of quadratic equations
 8. Quadratic Systems
 - Solve and graph systems of linear and quadratic equations
 - Solve and graph systems of quadratic inequalities
 9. Quadratic Functions and Equations Unit Review
 - Review concepts in order to prepare for the unit test
 10. Quadratic Functions and Equations Unit Test

6. **Polynomials and Polynomial Functions**

1. Polynomial Functions
 - Classify polynomials by degree and number of terms
 - Graph polynomial functions
 - Describe the end behavior of the graph of a polynomial function
 - Use polynomial expressions to model situations
2. Polynomials, Linear Factors, and Zeroes
 - Factor polynomial expressions
 - Derive a polynomial function from its zeroes
 - Interpret features of the graphs of polynomial functions
3. Solving Polynomial Equations
 - Solve polynomial equations by factoring
 - Solve polynomial equations by graphing
4. Dividing Polynomials
 - Divide polynomials using long division
 - Divide polynomials using synthetic division
5. Theorems About Roots of Polynomial Equations
 - Solve polynomial equations using the Rational Root and Conjugate Root Theorems

- Solve quadratic equations that have complex solutions
- Rewrite complex numbers using polynomial identities
- 6. The Fundamental Theorem of Algebra
 - Use the Fundamental Theorem of Algebra to solve polynomial equations with complex numbers
- 7. The Binomial Theorem
 - Expand a binomial using Pascal's Triangle
 - Apply the Binomial Theorem
- 8. The Polynomial Models in the Real World
 - Fit data to linear, quadratic, cubic, or quartic models
- 9. Transforming Polynomial Functions
 - Transform graphs of polynomials
 - Find zeroes of a transformed polynomial function
- 10. Polynomials and Polynomial Functions Unit Review
 - Review concepts in order to prepare for the unit test
- 11. Polynomials and Polynomial Functions Unit Test

7. Exponential and Logarithmic Functions

1. Exploring Exponential Models
 - Identify exponential growth and decay functions
 - Write exponential functions to solve problems
 - Use exponential growth and decay functions to model situations
2. Properties of Exponential Functions
 - Explore the properties of exponential functions
 - Graph exponential functions, including those that have base e
 - Use exponential functions to solve problems
3. Logarithmic Functions as Inverses
 - Write and solve logarithmic expressions
 - Draw the graph of a logarithmic function
 - Use logarithmic functions and their inverses to solve problems
4. Properties of Logarithms
 - Use the properties of logarithms
5. Exponential and Logarithmic Equations
 - Solve exponential and logarithmic equations
6. Natural Logarithms
 - Evaluate and simplify natural logarithmic expressions
 - Solve equations using natural logarithms
7. Exponential and Logarithmic Functions Unit Review
 - Review concepts in order to prepare for the unit test

8. Semester A Review and Exam

1. Semester A Review
 - Review concepts in order to prepare for the semester exam
2. Semester A Exam

SEMESTER B

1. Mid-Year Review

1. Resources for Success
 - Identify the various resources that can be used to promote active learning
 - Discuss strategies for using resources effectively
 - Set goals in the context of mathematical learning
2. Review of Expressions, Equations, and Inequalities
 - Review evaluating expressions
 - Review solving linear equations
 - Review solving inequalities in one variable
3. Review of Linear Systems
 - Review systems of linear equations
 - Review systems of linear inequalities
4. Review of Quadratic Functions and Equations
 - Review graphing quadratic functions
 - Review solving quadratic equations by factoring
 - Review solving quadratic equations using the quadratic formula
 - Review using the discriminant to determine the number of solutions to a quadratic equation
5. Review of Polynomials and Polynomial Functions
 - Review the definition of a polynomial
 - Review factoring polynomials
 - Review solving polynomial equations
6. Review of Exponential and Logarithmic Functions
 - Review exponential functions
 - Review logarithmic functions

2. Radical Functions and Rational Exponents

1. Roots and Radical Expressions
 - Find n th roots of numbers and expressions
 - Write radical expressions in different forms
2. Multiplying and Dividing Radical Expressions
 - Multiply and divide radical expressions

3. Binomial Radical Expressions
 - Add and subtract radical equations
4. Rational Exponents
 - Simplify expressions with rational exponents
5. Solving Square Root and Other Radical Equations
 - Solve square root and other radical equations
6. Function Operations
 - Add, subtract, multiply, and divide functions
 - Find the composite of two functions
7. Inverse Relations and Functions
 - Find the inverse of a relation or function
8. Graphing Radical Functions
 - Graph square root and other radical functions
9. Radical Functions and Rational Exponents Review
 - Review concepts in order to prepare for the unit test
10. Radical Functions and Rational Exponents Unit Test

3. Rational Functions

1. Inverse Variation
 - Recognize and apply inverse variation to solve problems
 - Apply joint and other variations to solve problems
2. The Reciprocal Function Family
 - Draw the graph of reciprocal functions
 - Perform translations on the graph of reciprocal functions
 - Write and graph functions to solve problems
3. Rational Functions and Their Graphs
 - Identify properties of rational functions
 - Graph rational functions
4. Rational Expressions
 - Change rational expressions to simpler forms
 - Divide and multiply rational expressions
 - Use and interpret rational expressions to solve problems
5. Adding and Subtracting Rational Expressions
 - Add and subtract rational expressions
6. Solving Rational Equations
 - Use rational equations to solve problems
7. Rational Functions Unit Review
 - Review concepts in order to prepare for the unit test
8. Rational Functions Unit Test

4. Sequences and Series

1. Mathematical Patterns
 - Identify mathematical patterns found in a sequence
 - Use a formula to find the n th term of a sequence
2. Arithmetic Sequences
 - Define, identify, and apply arithmetic sequences
3. Geometric Sequences
 - Define, identify, and apply geometric sequences
4. Arithmetic Series
 - Define arithmetic series and find their sums
5. Geometric Series
 - Define geometric series and find their sums
6. Sequences and Series Unit Review
 - Review concepts in order to prepare for the unit test
7. Sequences and Series Unit Test

5. Quadratic Relations and Conic Sections

1. Exploring Conic Sections
 - Graph and identify conic sections
2. Parabolas
 - Write the equation of a parabola and graph parabolas
3. Circles
 - Write and graph the equation of a circle
 - Find the center and radius of a circle and use them to graph the circle
4. Ellipses
 - Write the equation of an ellipse
 - Find the foci of an ellipse
 - Graph an ellipse
5. Hyperbolas
 - Graph hyperbolas
 - Find and use the foci of a hyperbola
6. Quadratic Relations and Conic Sections Unit Review
 - Review concepts in order to prepare for the unit test
7. Quadratic Relations and Conic Sections Unit Test

6. Probability and Statistics

1. Permutations and Combinations
 - Count permutations
 - Count combinations
2. Probability

- Find the probability of an event using theoretical, experimental, and simulation methods
- 3. Probability of Multiple Events
 - Become familiar with several terms related to probability
 - Calculate the probability of multiple events happening
 - Distinguish between dependent and independent events
 - Distinguish between mutually exclusive and not mutually exclusive events
- 4. Conditional Probability
 - Find conditional probabilities
 - Use tables and tree diagrams to determine conditional probabilities
- 5. Analyzing Data
 - Calculate measures of central tendency
 - Draw and interpret box-and-whisker plots
- 6. Standard Deviation
 - Find the standard deviation and variance of a set of values
 - Apply standard deviation and variance
- 7. Samples and Surveys
 - Identify and name sampling methods
 - Distinguish between fair and biased survey questions and methods
 - Use data from a sample survey to make estimates about the population
- 8. Binomial Distributions
 - Find binomial probabilities and use binomial distributions
- 9. Normal Distributions
 - Use a normal distribution
- 10. Statistics Unit Review
 - Review concepts in order to prepare for the unit test
- 11. Statistics Unit Test

7. Periodic Functions and Trigonometry

1. Exploring Periodic Data
 - Identify cycles and periods of periodic functions
 - Find the amplitude of periodic functions
2. Angles and the Unit Circle
 - Work with angles in standard position
 - Find coordinates of points on the unit circle
3. Radian Measure
 - Use radian measure for angles
 - Find the length of an arc of a circle
4. The Sine Function
 - Identify properties of the sine function

- Graph sine curves
 - 5. The Cosine Function
 - Graph and write cosine functions
 - Solve trigonometric equations
 - 6. The Tangent Function
 - Graph the tangent function
 - 7. Reciprocal Trigonometric Functions
 - Evaluate reciprocal trigonometric functions
 - Graph reciprocal trigonometric functions
 - 8. Trigonometric Identities
 - Verify trigonometric identities
 - 9. Solving Trigonometric Equations Using Inverses
 - Evaluate inverse trigonometric functions
 - Solve trigonometric equations
 - 10. Periodic Functions and Trigonometry Unit Review
 - Review concepts in order to prepare for the Unit Test
 - 11. Periodic Functions and Trigonometry Unit Test
- 8. Semester B Review and Exam**
1. Semester B Review
 - Review concepts in order to prepare for the semester exam
 2. Semester B Exam

Algebra 2 Honors

Honors Algebra 2 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

In this first semester of Honors Algebra 2, the student will review and expand on their learning from previous math courses. This honors-level course will challenge the student to work at an accelerated pace and to take learning beyond what is required in the standard-level course. The beginning units will focus mostly on the equation and the inequality, which the student will write, solve, and graph in a variety of real-world scenarios. The last few units will focus on types of functions. The student will continue their study of quadratic functions from Algebra 1, but will expand this to include exponential and logarithmic functions. As before, the student will write, solve, and graph these functions. Use of a graphing calculator is encouraged.

1. Focus on Success in Algebra 2

1. Get in Shape for Algebra 2

- Examine organizational skills and learning strategies
- Set goals in the context of mathematical learning
- Reflect on strengths, weaknesses, and the value of goal-setting
- Distinguish between effort-based and ability-based models of learning

1. Resources for Success

- Identify the various resources that can be used to promote active learning
- Discuss strategies for using resources effectively

2. Expressions, Equations, and Inequalities

1. Patterns and Expressions

- Identify and describe patterns
- Make predictions based on patterns

2. Properties of Real Numbers

- Identify and use properties of real numbers
- Write numerical expressions in different forms
- Plot real numbers on a number line

3. Algebraic Expressions

- Evaluate algebraic expressions
- Simplify algebraic expressions

- Model situations using algebraic expressions
- 4. Solving Equations
 - Solve multi-step equations
 - Write and use equations to solve problems
 - Rewriting and solving literal equations
- 5. Solving Inequalities
 - Solve and graph inequalities
 - Write and solve compound inequalities
- 6. Absolute Value Equations and Inequalities
 - Write and solve equations and inequalities involving absolute value
- 7. Expressions, Equations, and Inequalities Review
 - Use variables to model real-world situations
 - Use the properties of real numbers to simplify and evaluate algebraic expressions
 - Solve an equation or inequality, including absolute value and compound inequalities
 - Review concepts in order to prepare for the unit test
- 8. Expressions, Equations, and Inequalities Unit Test

3. Functions, Equations, and Graphs

1. Identifying Functions
 - Graph relations
 - Identify functions
 - Write and use functions to solve problems
2. Direct Variation
 - Write and interpret direct variation equations
 - Graph direct variation equations
3. Linear Functions and Slope-Intercept
 - Graph linear equations
 - Write equations of lines
 - Interpret key features of graphs of linear functions
4. More About Linear Equations
 - Write an equation of a line given its slope and a point on the line
 - Write an equation of a line given two points on the line
 - Write the equation of a line in different forms
5. Piecewise-Defined Functions
 - Evaluate a piecewise function
 - Identify and interpret parts of a piecewise, absolute value, polynomial, exponential and rational expressions including terms, factors, coefficients, and exponents.

- Use function notation to evaluate piecewise defined functions for inputs in their domains, and interpret statements that use function notation in terms of a context.
6. Families of Functions
 - Analyze transformations of functions
 7. Absolute Value Functions
 - Graph absolute value functions
 - Graph transformations of absolute value functions
 8. Two-Variable Inequalities
 - Graph two-variable inequalities
 9. Functions, Equations, and Graphs Unit Review
 - Review concepts in order to prepare for the unit test
 10. Functions, Equations, and Graphs Unit Test

4. Linear Systems

1. Solving Systems Using Tables and Graphs
 - Solve a linear system using a graph or a table
 - Write and use a linear system to solve problems
2. Solving Systems Algebraically
 - Solve linear systems algebraically
 - Write and use a linear system to solve problems
3. Systems of Inequalities
 - Solve systems of linear inequalities
 - Use systems of linear inequalities to model situations
4. Linear Programming
 - Solve problems using linear programming
5. Systems With Three Variables
 - Solve systems in three variables using elimination
 - Solve systems in three variables using substitution
6. Solving Systems Using Matrices
 - Represent a system of linear equations with a matrix
 - Solve a system of linear equations using matrices
7. Linear Systems Unit Review
 - Review concepts in order to prepare for the unit test
8. Linear Systems Unit Test

5. Quadratic Functions and Equations

1. Quadratic Functions and Transformations
 - Identify and graph quadratic functions

- Write and use quadratic functions to solve problems
- Graph translations of quadratic functions
- 2. Standard Form of a Quadratic Function
 - Graph quadratic functions written in standard form
 - Write and use quadratic functions to solve problems
- 3. Modeling with Quadratic Functions
 - Model data with quadratic functions
 - Interpret the domain of a function and relate the domain to its graph
- 4. Factoring Quadratic Expressions
 - Find common and binomial factors of quadratic expressions
 - Factor special quadratic expressions
- 5. Quadratic Equations
 - Solve quadratic equations by factoring
 - Solve quadratic equations by graphing
 - Write and use quadratic equations to solve problems
- 6. The Quadratic Formula
 - Solve quadratic equations using the quadratic formula
 - Determine the number of solutions by using the discriminant
- 7. Complex Numbers
 - Identify, graph, and perform operations with complex numbers
 - Find complex number solutions of quadratic equations
- 8. Quadratic Systems
 - Solve and graph systems of linear and quadratic equations
 - Solve and graph systems of quadratic inequalities
- 9. Quadratic Functions and Equations Unit Review
 - Review concepts in order to prepare for the unit test
- 10. Quadratic Functions and Equations Unit Test

6. Polynomials and Polynomial Functions

1. Polynomial Functions
 - Classify polynomials
 - Graph polynomial functions and describe end behavior
 - Use polynomial expressions to model situations
2. Polynomials, Linear Factors, and Zeroes
 - Analyze the factored form of a polynomial
 - Write a polynomial function from its zeroes
 - Interpret features of the graphs of polynomial functions
3. Solving Polynomial Equations

- Solve polynomial equations by factoring
- Solve polynomial equations by graphing
- 4. Dividing Polynomials
 - Divide polynomials using long division
 - Divide polynomials using synthetic division
- 5. Theorems About Roots of Polynomial Equations
 - Solve polynomial equations using the Rational Root and Conjugate Root Theorems
 - Solve quadratic equations that have complex solutions
 - Rewrite complex numbers using polynomial identities
- 6. The Fundamental Theorem of Algebra
 - Use the Fundamental Theorem of Algebra to solve polynomial equations with complex numbers
- 7. The Binomial Theorem
 - Expand a binomial using Pascal's Triangle
 - Apply the Binomial Theorem
- 8. The Polynomial Models in the Real World
 - Fit data to linear, quadratic, cubic, or quartic models
- 9. Transforming Polynomial Functions
 - Apply transformations to graphs of polynomials
 - Find zeroes of a transformed polynomial function
- 10. Polynomials and Polynomial Functions Unit Review
 - Review concepts in order to prepare for the unit test
- 11. Polynomials and Polynomial Functions Unit Test

7. Exponential and Logarithmic Functions

1. Exploring Exponential Models
 - Identify exponential growth and decay functions
 - Write exponential functions to solve problems
 - Use exponential growth and decay functions to model situations
2. Properties of Exponential Functions
 - Explore the properties of functions of $y = ab^x$
 - Graph exponential functions that have base e
 - Use exponential functions to solve problems
3. Logarithmic Functions as Inverses
 - Write and evaluate logarithmic expressions
 - Graph logarithmic functions
 - Use logarithmic functions and their inverses to solve problems
4. Properties of Logarithms

- Use the properties of logarithms
 - 5. Exponential and Logarithmic Equations
 - Solve exponential and logarithmic equations
 - 6. Natural Logarithms
 - Evaluate and simplify natural logarithmic expressions
 - Solve equations using natural logarithms
 - 7. Exponential and Logarithmic Functions Unit Review
 - Review concepts in order to prepare for the unit test
 - 8. Exponential and Logarithmic Functions Unit Test
 - To review concepts in order to prepare for the semester exam
- 8. Semester A Review and Exam**
1. Semester A Review
 - To review concepts in order to prepare for the semester exam
 2. Semester A Exam

In this second semester of Honors Algebra 2, the students will strengthen his algebraic problem-solving abilities and deepen his understanding of mathematics. An emphasis will be placed on rigorous instruction to prepare students for success in higher-level mathematics courses like Statistics and Calculus. The student will, among other things, explore operations, graphs, and real-world applications related to both radical and rational functions, observe different types of geometric and arithmetic patterns, examine graphs and equations of conic sections, and calculate probabilities. The course will conclude with an introduction to trigonometry and its associated functions.

1. Preparation for Honors Algebra 2 B

1. Resources for Success
 - Identify the various resources that can be used to promote active learning
 - Discuss strategies for using resources effectively
 - Set goals in the context of mathematical learning

1. Radical Functions and Rational Exponents

1. Roots and Radical Expressions
 - Find n th roots
 - Write radical expressions in different forms
2. Multiplying and Dividing Radical Expressions
 - Multiply and divide radical expressions
3. Binomial Radical Expressions
 - Add and subtract radical equations
4. Rational Exponents
 - Simplify expressions with rational exponents
5. Solving Square Root and Other Radical Equations
 - Solve square root and other radical equations
6. Function Operations
 - Add, subtract, multiply, and divide functions

- Find the composite of two functions
- 7. Inverse Relations and Functions
 - Find the inverse of a relation or function
- 8. Graphing Radical Functions
 - Graph square root and other radical functions
- 9. Radical Functions and Rational Exponents Review
 - Review concepts in order to prepare for the unit test
- 10. Radical Functions and Rational Exponents Unit Test

2. Rational Functions

1. Inverse Variation
 - Recognize and apply inverse variation to solve problems
 - Apply joint and other variations to solve problems
2. The Reciprocal Function Family
 - Graph reciprocal functions
 - Graph translations of reciprocal functions
 - Write and graph functions to solve problems
3. Rational Functions and Their Graphs
 - Identify properties of rational functions
 - Graph rational functions
4. Rational Expressions
 - Simplify rational expressions
 - Multiply and divide rational expressions
 - Use and interpret rational expressions to solve problems
5. Adding and Subtracting Rational Expressions
 - Add and subtract rational expressions
6. Solving Rational Equations
 - Use rational equations to solve problems
7. Rational Functions Unit Review
 - Review concepts in order to prepare for the unit test
8. Rational Functions Unit Test

3. Sequences and Series

1. Mathematical Patterns
 - Identify mathematical patterns found in a sequence
 - Use a formula to find the n th term of a sequence
2. Arithmetic Sequences

- Define, identify, and apply arithmetic sequences
- 3. Geometric Sequences
 - Define, identify, and apply geometric sequences
- 4. Arithmetic Series
 - Define arithmetic series and find their sums
- 5. Geometric Series
 - Define geometric series and find their sums
- 6. Sequences and Series Unit Review
 - Review concepts in order to prepare for the unit test
- 7. Sequences and Series Unit Test

4. Quadratic Relations and Conic Sections

1. Exploring Conic Sections
 - Graph and identify conic sections
2. Parabolas
 - Write the equation of a parabola and graph parabolas
3. Circles
 - Write and graph the equation of a circle
 - Find the center and radius of a circle and use them to graph the circle
4. Ellipses
 - Write the equation of an ellipse
 - Find the foci of an ellipse
 - Graph an ellipse
5. Hyperbolas
 - Graph hyperbolas
 - Find and use the foci of a hyperbola
6. Quadratic Relations and Conic Sections Unit Review
 - Review concepts in order to prepare for the unit test
7. Quadratic Relations and Conic Sections Unit Test

5. Probability and Statistics

1. Permutations and Combinations
 - Count permutations
 - Count combinations
2. Probability
 - Find the probability of an event using theoretical, experimental, and simulation methods
3. Probability of Multiple Events

- Find the probability of the event A and B
- Find the probability of the event A or B
- 4. Conditional Probability
 - Find conditional probabilities
 - Use tables and tree diagrams to determine conditional probabilities
- 5. Analyzing Data
 - Calculate measures of central tendency
 - Draw and interpret box-and-whisker plots
- 6. Standard Deviation
 - Find the standard deviation and variance of a set of values
 - Apply standard deviation and variance
- 7. Samples and Surveys
 - Identify sampling methods
 - Recognize bias in samples and surveys
 - Use data from a sample survey to make estimates about the population
- 8. Binomial Distributions
 - Find binomial probabilities and use binomial distributions
- 9. Normal Distributions
 - Use a normal distribution
- 10. Probability and Statistics Unit Review
 - Review concepts in order to prepare for the unit test
- 11. Statistics Unit Test

6. Periodic Functions and Trigonometry

1. Exploring Periodic Data
 - Identify cycles and periods of periodic functions
 - Find the amplitude of periodic functions
2. Angles and the Unit Circle
 - Work with angles in standard position
 - Find coordinates of points on the unit circle
3. Radian Measure
 - Use radian measure for angles
 - Find the length of an arc of a circle
4. The Sine Function
 - Identify properties of the sine function
 - Graph sine curves
5. The Cosine Function
 - Graph and write cosine functions

- Solve trigonometric equations
- 6. The Tangent Function
 - Graph the tangent function
- 7. Reciprocal Trigonometric Functions
 - Evaluate reciprocal trigonometric functions
 - Graph reciprocal trigonometric functions
- 8. Trigonometric Identities
 - Verify trigonometric identities
- 9. Solving Trigonometric Equations Using Inverses
 - Evaluate inverse trigonometric functions
 - Solve trigonometric equations
- 10. Periodic and Trigonometric Functions Unit Review
 - Review concepts in order to prepare for the unit test
- 11. Periodic Functions and Trigonometry Unit Test

7. Semester B Review and Exam

1. Semester B Review
 - Review concepts in order to prepare for the semester exam
2. Semester B Exam

Geometry

Geometry A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

This is the first of two courses that comprise Geometry. Throughout the course, the student will use virtual manipulatives and tools to explore the principles of logic, proofs, and constructions. The student will use the midpoint and distance formulas to solve a variety of problems involving the coordinate plane. The student will also study parallel and perpendicular lines, including special angle pairs. The student will explore transformations in the coordinate plane and apply them to other geometrical concepts. This course will conclude with the use of triangle concepts to find angle measures, prove triangles congruent, and discover relationships within one and two triangles. Throughout the course, the student will learn concepts through a variety of instructional strategies, solve real-world applications, and complete an assortment of activities.

This is the second of two courses that comprise Geometry. Throughout the course, the student will use virtual manipulatives and tools to explore area, surface area, and volume, and study the concept of similarity as it relates to various figures. The student will begin with an exploration of polygons, with a focus on different types of quadrilaterals. The student will use Trigonometry and right triangle concepts, such as 30-60-90, 45-45-90, and the Pythagorean Theorem to solve problems. The student will learn to use formulas to find the areas of a variety of two-dimensional shapes. This course concludes with an exploration of concepts related to circles, such as arcs, angles, and intersecting lines such as chords, secants, and tangents.

Throughout the course, the student will learn concepts through a variety of instructional strategies, solve real-world applications, and complete an assortment of activities.

Course Outline Semester A

1. Focus on Success in Geometry

1. Get in Shape for Geometry
 - Examine organizational skills and learning strategies
 - Set goals in the context of mathematical learning
 - Reflect on strengths, weaknesses, and the value of goal-setting
 - Distinguish between effort-based and ability-based models of learning

2. Resources for Success

- Identify the various resources that can be used to promote active learning
- Discuss strategies for using resources effectively

2. Tools of Geometry

1. Nets and Drawings for Visualizing Geometry
 - Make nets and drawings of three-dimensional figures
2. Points, Lines, and Planes
 - Understand basic terms and postulates of geometry
3. Measuring Segments
 - Find and compare lengths of segments
4. Measuring Angles
 - Find and compare the measures of angles
5. Exploring Angles
 - Identify special angle pairs and use their relationships to find angle measures
6. Basic Constructions
 - Make basic constructions using a straightedge and a compass
7. Midpoint and Distance in the Coordinate Plane
 - Find the midpoint of a segment
 - Find the distance between two points in the coordinate plane
8. Perimeter, Circumference, and Area
 - Find the perimeter or circumference of basic shapes
 - Find the area of basic shapes
9. Tools of Geometry Unit Review
 - Review lesson material from Tools of Geometry to prepare for the unit test
10. Tools of Geometry Unit Test

3. Reasoning and Proof

1. Conditional Statements
 - Recognize conditional statements and their parts
 - Write converses, inverses, and contrapositives of conditionals
2. Biconditionals and Definitions
 - Write biconditionals and recognize good definitions
3. Reasoning in Algebra and Geometry
 - Connect reasoning in algebra and geometry
4. Proving Angles Congruent
 - Prove and apply theorems about angles
5. Reasoning and Proof Unit Review
 - Review lesson material associated with this unit on reasoning and proof to prepare for the unit test
6. Reasoning and Proof Unit Test

4. Parallel and Perpendicular Lines

1. Lines and Angles
 - Identify relationships between figures in space
 - Identify angles formed by two lines and a transversal
2. Properties of Parallel Lines
 - Prove theorems about parallel lines
 - Use properties of parallel lines to find angle measures
3. Proving Lines Parallel
 - Determine whether two lines are parallel
 - Write a flow proof to prove lines are parallel
4. Parallel and Perpendicular Lines
 - Relate parallel and perpendicular lines
5. Lines and Triangles
 - Use parallel lines to prove a theorem about triangles
 - Find measures of angles of triangles
6. Constructing Parallel and Perpendicular Lines
 - Construct parallel and perpendicular lines
 - Construct special quadrilaterals and a regular polygon inscribed in a circle
7. Constructions
 - Perform constructions using a straightedge and a compass.
8. Parallel and Perpendicular Lines Unit Review
 - Review lesson material associated with parallel and perpendicular lines to prepare for the unit test
9. Parallel and Perpendicular Lines Unit Test

5. Transformations

1. Translations
 - Identify isometries
 - Find translation images of figures
2. Reflections
 - Find reflection images of figures
3. Rotations
 - Draw and identify rotation images of figures
4. Symmetry
 - Identify the type of symmetry in a figure
5. Dilations
 - Understand dilation images of figures
6. Compositions of Isometries
 - Find compositions of reflections, including glide reflections

- Classify isometries
- 7. Personal Logo
 - Find examples of transformations in the real world.
 - Create a personal logo demonstrating two transformations.
- 8. Transformations Unit Review
 - Review concepts associated with transformations to prepare for the unit test
- 9. Transformations Unit Test

6. Congruent Triangles

1. Congruent Figures
 - Recognize congruent figures and their corresponding parts
2. Triangle Congruence by SSS and SAS
 - Prove two triangles congruent using the SSS and SAS Postulates
3. Triangle Congruence by ASA and AAS
 - Prove two triangles congruent using the ASA Postulate and the AAS Theorem
4. Using Corresponding Parts of Congruent Triangles
 - Use triangle congruence and corresponding parts of congruent triangles to prove that parts of two triangles are congruent
5. Isosceles and Equilateral Triangles
 - Use and apply properties of isosceles and equilateral triangles
6. Congruence in Right Triangles
 - Prove right triangles congruent using the Hypotenuse-Leg Theorem
7. Congruence in Overlapping Triangles
 - Identify congruent overlapping triangles
 - Prove two triangles congruent using other congruent triangles
8. Exploring Congruent Triangles
 - Illustrate SSS, SAS, and ASA using string and a protractor.
 - Create a method of illustrating AAS using string and a protractor.
9. Congruent Triangles Unit Review
 - Review lesson material associated with congruent triangles to prepare for the unit test
10. Congruent Triangles Unit Test

7. Triangles

1. Midsegments of Triangles
 - Use properties of midsegments to solve problems
2. Perpendicular and Angle Bisectors
 - Use properties of perpendicular bisectors and angle bisectors
3. Bisectors in Triangles
 - Identify properties of perpendicular bisectors and angle bisectors
4. Medians and Altitudes

- Identify properties of medians and altitudes of a triangle
- 5. Inequalities in One Triangle
 - Use inequalities involving angles and sides of triangles
- 6. Triangles Unit Review
 - Review lesson material associated with relationships within triangles to prepare for the unit test
- 7. Triangles Unit Test
- 8. **Geometry A Semester Exam**
 1. Geometry A Semester Review
 2. Geometry A Semester Exam

Semester B

1. **Review of Geometry A**
 1. Resources for Success
 - Identify the various resources that can be used to promote active learning
 - Discuss strategies for using resources effectively
 - Set goals in the context of mathematical learning
 2. Review of the Tools of Geometry
 - Review the basic terms and postulates of geometry
 - Identify special angle pairs and solve problems involving them
 - Solve problems involving midpoint and distance in the coordinate plane
 - Calculate the perimeter (or circumference) and the area of basic shapes
 3. Review of Reasoning and Proof
 - Write conditional statements and their converses, inverses, and contrapositives
 - Write biconditional statements
 - Prove statements about angles using properties
 4. Review of Parallel and Perpendicular Lines
 - Describe angle pairs formed by parallel lines and a transversal
 - Determine whether lines are parallel, perpendicular, or neither
 - Use relationships between lines to prove statements
 5. Review of Congruent Triangles
 - Identify corresponding parts in congruent triangles
 - Prove triangles congruent using postulates and theorems
2. **Polygons and Quadrilaterals**
 1. The Polygon-Angle Sum Theorems
 - Find the sum of the measures of the interior angles of a polygon
 - Find the sum of the measures of the exterior angles of a polygon
 2. Properties of Parallelograms
 - Use relationships among sides and angles of parallelograms.

- Use relationships among diagonals of parallelograms.
 - 3. Proving That a Quadrilateral Is a Parallelogram
 - Determine whether a quadrilateral is a parallelogram
 - 4. Properties of Rhombuses, Rectangles, and Squares
 - Define and classify special types of parallelograms
 - Use properties of diagonals of rhombuses and rectangles
 - 5. Conditions for Rhombuses, Rectangles, and Squares
 - Determine whether a parallelogram is a rhombus or rectangle
 - 6. Trapezoids and Kites
 - Verify and use properties of trapezoids and kites
 - 7. Polygons in the Coordinate Plane
 - Classify polygons in the coordinate plane
 - 8. Applying Coordinate Geometry
 - Name coordinates of special figures by using their properties
 - 9. Proofs Using Coordinate Geometry
 - Prove theorems using figures in the coordinate plane
 - 10. Blueprint Project
 - Create a blueprint of an ideal room in your house using a coordinate plane
 - Classify three of the shapes in your blueprint and justify your classification using theorems about quadrilaterals and triangles
 - Use coordinates to calculate the perimeter and area of the room in your blueprint
 - 11. Polygons and Quadrilaterals Unit Review
 - Review concepts associated with polygons and quadrilaterals to prepare for the unit test.
 - 12. Polygons and Quadrilaterals Unit Test
- 3. Similarity**
- 1. Ratios and Proportions
 - Write ratios and solve problems
 - 2. Similar Polygons
 - Identify and apply similar polygons
 - Identify similarity transformations and verify properties of similarity
 - 3. Proving Triangles Similar
 - Use the AA Similarity Postulate and the SAS Similarity and SSS Similarity Theorems
 - Use similarity to find indirect measurements
 - 4. Similarity in Right Triangles
 - Find and use relationships in similar right triangles
 - 5. Proportions in Triangles
 - Use the Side-Splitter Theorem and the Triangle-Angle-Bisector Theorem
 - 6. Similarity Unit Review

- Review lesson material associated with similarity to prepare for the unit test

7. Similarity Unit Test

4. Right Triangles and Trigonometry

1. The Pythagorean Theorem and Its Converse
 - Use the Pythagorean Theorem and its converse
2. Special Right Triangles
 - Use the properties of 45° - 45° - 90° triangles and 30° - 60° - 90° triangles
3. Trigonometry
 - Use the sine, cosine, and tangent ratios to determine side lengths and angle measures in right triangles
4. Angles of Elevation and Depression
 - Use angles of elevation and depression to solve problems
5. Law of Sines and Law of Cosines
 - Use the Law of Sines
 - Use the Law of Cosines in finding the measures of sides and angles of a triangle
6. Right Triangles and Trigonometry Unit Review
 - Review lesson material associated with right triangles and trigonometry to prepare for the unit test
7. Right Triangles and Trigonometry Unit Test

5. Area

1. Areas of Parallelograms and Triangles
 - Find the area of parallelograms and triangles
2. Areas of Trapezoids, Rhombuses, and Kites
 - Find the area of a trapezoid, rhombus, or kite
3. Areas of Regular Polygons
 - Find the area of a regular polygon
4. Perimeters and Areas of Similar Figures
 - Find the perimeters and areas of similar polygons
5. Trigonometry and Area
 - Find the areas of regular polygons and triangles using trigonometry
6. Circles and Arcs
 - Find the measures of central angles and arcs
 - Find the circumference and arc length
7. Areas of Circles and Sectors
 - Find the areas of circles, sectors, and segments of circles
8. Car Wheel Project
 - Determine the number of rotations of a circle of a specified size it takes to cover a given distance
9. Area Unit Review

- Review lesson material associated with area to prepare for the unit test

10. Area Unit Test

6. Surface Area and Volume

1. Space Figures and Cross Sections
 - Recognize polyhedrons and their parts
 - Visualize cross sections of space figures
2. Surface Areas of Prisms and Cylinders
 - Find the surface area of a prism and a cylinder
3. Surface Areas of Pyramids and Cones
 - Find the surface area of a pyramid and a cone
4. Volumes of Prisms and Cylinders
 - Find the volume of a prism and the volume of a cylinder
5. Volumes of Pyramids and Cones
 - Find the volume of a pyramid and a cone
6. Surface Areas and Volumes of Spheres
 - Find the surface area and volume of a sphere
7. Areas and Volumes of Similar Solids
 - Compare and find the areas and volumes of similar solids
8. Cereal Box Design Project
 - Use properties of surface area and volume to improve packaging design
9. Surface Area and Volume Unit Review
 - Review lesson material associated with the surface area and volume to prepare for the unit test
10. Surface Area and Volume Unit Test

7. Circles

1. Tangent Lines
 - Use properties of a tangent to a circle
2. Chords and Arcs
 - Use congruent chords, arc, and central angles
 - Use perpendicular bisector to chords
3. Inscribed Angles
 - Find the measure of an inscribed angle
 - Find the measure of an angle formed by a tangent and a chord
4. Angle Measures and Segment Lengths
 - Find the measures of angles formed by chords, secants, and tangents
 - Find the lengths of segments associated with circles
5. Circles in the Coordinate Plane
 - Write the equation of a circle

- Find the center and radius of a circle

6. Circles Unit Review

- Review lesson material associated with circles to prepare for the unit test

7. Circles Unit Test

8. Geometry B Semester Exam

1. Semester B Exam Review

2. Semester B Exam

Geometry Honors

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

This course is the first of two that comprise Honors Geometry. In this course, the student will explore geometry concepts and apply them to real-world problems. The student will begin by defining basic geometric terms, postulates, and theorems before learning how to apply them to parallel and perpendicular lines. Next, the student will learn about the different types of transformations and apply them to geometry. Finally, the student will explore relationships in triangles, quadrilaterals, and other polygons.

Throughout the course, the student will be introduced to many higher mathematical concepts and applications.

SEMESTER B

This course is the second of two that comprise Honors Geometry. In this course, the student will expand his or her knowledge of geometric relationships. The student will begin with an exploration of polygons, with a particular focus on different types of quadrilaterals. The student will also develop relationships between similar figures. Next, the student will be introduced to the trigonometric relationships in right triangles, and the area and volume of figures. Finally, the student will explore characteristics of circles. Throughout the course, the student will be introduced to many higher mathematical concepts and applications.

Course Outline:

SEMESTER A

1. Focus on Success in Geometry

1. Get in Shape for Geometry
 - Examine organizational skills and learning strategies
 - Set goals in the context of mathematical learning
 - Reflect on strengths, weaknesses, and the value of goal-setting
 - Distinguish between effort-based and ability-based models of learning
1. Resources for Success
 - Identify the various resources that can be used to promote active learning
 - Discuss strategies for using resources effectively

2. Tools of Geometry

1. Nets and Drawings for Visualizing Geometry
 - Make nets and drawings of three-dimensional figures
2. Points, Lines, and Planes
 - Understand basic terms and postulates of geometry

3. Measuring Segments
 - Find and compare lengths of segments
4. Measuring Angles
 - Find and compare the measures of angles
5. Exploring Angles
 - Identify special angle pairs and use their relationships to find angle measures
6. Basic Constructions
 - Make basic constructions using a straightedge and a compass
7. Midpoint and Distance in the Coordinate Plane
 - Find the midpoint of a segment
 - Find the distance between two points in the coordinate plane
8. Perimeter, Circumference, and Area
 - Find the perimeter or circumference of basic shapes
 - Find the area of basic shapes
9. Tools of Geometry Unit Review
 - Review lesson material from the Tools of Geometry unit to prepare for the unit test
10. Tools of Geometry Unit Test

There are no objectives for this lesson.

3. Reasoning and Proof

1. Conditional Statements
 - Recognize conditional statements and their parts
 - Write converses, inverses, and contrapositives of conditionals
2. Biconditionals and Definitions
 - Write biconditionals and recognize good definitions
3. Reasoning in Algebra and Geometry
 - Connect reasoning in algebra and geometry
4. Proving Angles Congruent
 - Prove and apply theorems about angles
5. Reasoning and Proof Unit Review
 - Review lesson material associated with this unit on reasoning and proof to prepare for the unit test
6. Reasoning and Proof Unit Test

There are no objectives for this lesson.

4. Parallel and Perpendicular Lines

1. Lines and Angles
 - Identify relationships between figures in space
 - Identify angles formed by two lines and a transversal
2. Properties of Parallel Lines

- Prove theorems about parallel lines
- Use properties of parallel lines to find angle measures
- 3. Proving Lines Parallel
 - Determine whether two lines are parallel
 - Write a flow proof to prove lines are parallel
- 4. Parallel and Perpendicular Lines
 - Relate parallel and perpendicular lines
- 5. Lines and Triangles
 - Use parallel lines to prove a theorem about triangles
 - Find measures of angles of triangles
- 6. Constructing Parallel and Perpendicular Lines
 - Construct parallel and perpendicular lines
 - Construct special quadrilaterals and a regular polygon inscribed in a circle
- 7. Constructions
 - Perform constructions using a straightedge and a compass.
- 8. Parallel and Perpendicular Lines Unit Review
 - Review lesson material associated with parallel and perpendicular lines to prepare for the unit test
- 9. Parallel and Perpendicular Lines Unit Test

There are no objectives for this lesson.

5. Transformations

1. Translations
 - Identify isometries
 - Find translation images of figures
2. Reflections
 - Find reflection images of figures
3. Rotations
 - Draw and identify rotation images of figures
4. Symmetry
 - Identify the type of symmetry in a figure
5. Dilations
 - Understand dilation images of figures
6. Compositions of Isometries
 - Find compositions of reflections, including glide reflections
 - Classify isometries
7. Personal Logo
 - Find examples of transformations in the real world.
 - Create a personal logo demonstrating two transformations.

8. Transformations Unit Review

- Review concepts associated with transformations to prepare for the unit test

9. Transformations Unit Test

There are no objectives for this lesson.

6. Congruent Triangles

1. Congruent Figures

- Recognize congruent figures and their corresponding parts

2. Triangle Congruence by SSS and SAS

- Prove two triangles congruent using the SSS and SAS Postulates

3. Triangle Congruence by ASA and AAS

- Prove two triangles congruent using the ASA Postulate and the AAS Theorem

4. Using Corresponding Parts of Congruent Triangles

- Use triangle congruence and corresponding parts of congruent triangles to prove that parts of two triangles are congruent

5. Isosceles and Equilateral Triangles

- Use and apply properties of isosceles and equilateral triangles

6. Congruence in Right Triangles

- Prove right triangles congruent using the Hypotenuse-Leg Theorem

7. Congruence in Overlapping Triangles

- Identify congruent overlapping triangles
- Prove two triangles congruent using other congruent triangles

8. Exploring Congruent Triangles

- Illustrate SSS, SAS, and ASA using string and a protractor.
- Create a method of illustrating AAS using string and a protractor.

9. Congruent Triangles Unit Review

- Review lesson material associated with congruent triangles to prepare for the unit test

10. Congruent Triangles Unit Test

There are no objectives for this lesson.

7. Triangles

1. Midsegments of Triangles

- Use properties of midsegments to solve problems

2. Perpendicular and Angle Bisectors

- Use properties of perpendicular bisectors and angle bisectors

3. Bisectors in Triangles

- Identify properties of perpendicular bisectors and angle bisectors

4. Medians and Altitudes

- Identify properties of medians and altitudes of a triangle

5. Inequalities in One Triangle

- Use inequalities involving angles and sides of triangles
6. Triangles Unit Review
 - Review lesson material associated with relationships within triangles to prepare for the unit test
 7. Triangles Unit Test

There are no objectives for this lesson.

8. Semester A Exam and Review

1. Semester A Review

There are no objectives for this lesson.

2. Semester A Exam

There are no objectives for this lesson.

SEMESTER B

1. Preparation for Honors Geometry B

1. Resources for Success

- Identify the various resources that can be used to promote active learning
- Discuss strategies for using resources effectively
- Set goals in the context of mathematical learning

1. Polygons and Quadrilaterals

1. The Polygon-Angle Sum Theorems

- Find the sum of the measures of the interior angles of a polygon
- Find the sum of the measures of the exterior angles of a polygon

2. Properties of Parallelograms

- Use relationships among sides and angles of parallelograms
- Use relationships among diagonals of parallelograms

3. Proving that a Quadrilateral is a Parallelogram

- Determine whether a quadrilateral is a parallelogram

4. Properties of Rhombuses, Rectangles, and Squares

- Define and classify special types of parallelograms
- Use properties of diagonals of rhombuses and rectangles

5. Conditions for Rhombuses, Rectangles, and Squares

- Determine whether a parallelogram is a rhombus or rectangle

6. Trapezoids and Kites

- Verify and use properties of trapezoids and kites

7. Polygons in the Coordinate Plane

- Classify polygons in the coordinate plane

8. Applying Coordinate Geometry

- Name coordinates of special figures by using their properties

9. Proofs Using Coordinate Geometry

- Prove theorems using figures in the coordinate plane

10. Blueprint Project

- Create a blueprint of an ideal room in your house using a coordinate plane
- Classify three of the shapes in your blueprint and justify your classification using theorems about quadrilaterals and triangles
- Use coordinates to calculate the perimeter and area of the room in your blueprint

11. Polygons and Quadrilaterals Unit Review

- Review concepts associated with polygons and quadrilaterals to prepare for the unit test.

12. Polygons and Quadrilaterals Unit Test

There are no objectives for this lesson.

2. Similarity

1. Ratios and Proportions

- Write ratios and solve problems

2. Similar Polygons

- Identify and apply similar polygons
- Identify similarity transformations and verify properties of similarity

3. Proving Triangles Similar

- Use AA Similarity Postulate and the SAS Similarity and SSS Similarity Theorems
- Use similarity to find indirect measurements

4. Similarity in Right Triangles

- Find and use relationships in similar right triangles

5. Proportions in Triangles

- Use the Side-Splitter Theorem and the Triangle-Angle-Bisector Theorem

6. Similarity Unit Review

- Review lesson material associated with similarity to prepare for the unit test

7. Similarity Unit Test

There are no objectives for this lesson.

3. Right Triangles and Trigonometry

1. The Pythagorean Theorem and Its Converse

- Use the Pythagorean Theorem and its converse

2. Special Right Triangles

- Use the properties of 45° - 45° - 90° triangles and 30° - 60° - 90° triangles

3. Trigonometry

- Use the sine, cosine, and tangent ratios to determine side lengths and angle measures in right triangles

4. Angles of Elevation and Depression

- Use angles of elevation and depression to solve problems

5. Law of Sines and Law of Cosines

- Use the Law of Sines
 - Use the Law of Cosines in finding the measures of sides and angles of a triangle
6. Right Triangles and Trigonometry Unit Review
 - Review lesson material associated with right triangles and trigonometry to prepare for the unit test
 7. Right Triangles and Trigonometry Unit Test

There are no objectives for this lesson.

4. Area

1. Areas of Parallelograms and Triangles
 - Find the area of parallelograms and triangles
2. Areas of Trapezoids, Rhombuses, and Kites
 - Find the area of a trapezoid, rhombus, or kite
3. Areas of Regular Polygons
 - Find the area of a regular polygon
4. Perimeters and Areas of Similar Figures
 - Find the perimeters and areas of similar polygons
5. Trigonometry and Area
 - Find the areas of regular polygons and triangles using trigonometry
6. Circles and Arcs
 - Find the measures of central angles and arcs
 - Find the circumference and arc length
7. Areas of Circles and Sectors
 - Find the areas of circles, sectors, and segments of circles
8. Car Wheel Project
 - Determine the number of rotations of a circle of a specified size it takes to cover a given distance
9. Area Unit Review
 - Review lesson material associated with area to prepare for the unit test
10. Area Unit Test

There are no objectives for this lesson.

5. Surface Area and Volume

1. Spaces Figures and Cross Sections
 - Recognize polyhedra and their parts
 - Visualize cross sections of space figures
2. Surfaces Areas of Prisms and Cylinders
 - Find the surface area of a prism and a cylinder
3. Surface Areas of Pyramids and Cones
 - Find the surface area of a pyramid and a cone
4. Volumes of Prisms and Cylinders

- Find the volume of a prism and the volume of a cylinder
- 5. Volumes of Pyramids and Cones
 - Find the volume of a pyramid and a cone
- 6. Surface Areas and Volumes of Spheres
 - Find the surface area and volume of a sphere
- 7. Areas and Volumes of Similar Solids
 - Compare and find the areas and volumes of similar solids
- 8. Cereal Box Design Project
 - Use properties of surface area and volume to improve packaging design
- 9. Surface Area and Volume Unit Review
 - Review lesson material associated with surface area and volume to prepare for the unit test
- 10. Surface Area and Volume Unit Test

There are no objectives for this lesson.

6. Circles

1. Tangent Lines
 - Use properties of a tangent to a circle.
2. Chords and Arcs
 - Use congruent chords, arc, and central angles
 - Use perpendicular bisectors to chords
3. Inscribed Angles
 - Find the measure of an inscribed angle
 - Find the measure of an angle formed by a tangent and a chord
4. Angle Measures and Segment Lengths
 - Find the measures of angles formed by chords, secants, and tangents
 - Find the lengths of segments associated with circles
5. Circles in the Coordinate Plane
 - Write the equation of a circle
 - Find the center and radius of a circle
6. Circles Unit Review
 - Review lesson material associated with circles to prepare for the unit test
7. Circles Unit Test

There are no objectives for this lesson.

7. Geometry B Semester Exam

1. Geometry Semester B Exam Review
 - *There are no objectives for this lesson.*
2. Geometry Semester B Exam
 - *There are no objectives for this lesson.*

Geometry Prescriptive

Geometry A/B Prescriptive

Time allocations:

Each lesson in the Course Outline provides an estimated time to complete.

Instructional Activities

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary

Prescriptive courses are designed as credit recovery for students. Teachers will work with students to identify the content students have not mastered. Students will only complete those lessons or units within the course. This will ensure that students have mastered all standards for graduation requirements.

Geometry A Syllabus

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Tools of Geometry

Lesson	Description	Time (min)	Objective(s)
 Patterns and Inductive Reasoning	This lesson introduces patterns in a sequence. It also teaches how to use inductive reasoning to make conjectures about subsequent terms in a sequence.	45	Find the next term in a pattern Use inductive reasoning
 Quiz: Patterns and Inductive Reasoning			
 Drawings, Nets and Other Models	This lesson teaches how to represent a three-dimensional figure on a two-dimensional surface using isometric and orthographic drawings. It also teaches how a net can be folded to form a three-dimensional figure.	45	Make isometric and orthographic drawings Draw nets for three-dimensional figures

<p> Quiz: Drawings, Nets and Other Models</p>			
<p> Points, Lines, and Planes</p>	<p>This lesson describes basic terms such as point line and plane. It also teaches four postulates that relate to lines and planes.</p>	45	<p>Understand basic terms of geometry Understand basic postulates of geometry</p>
<p> Quiz: Points, Lines, and Planes</p>			
<p> Segments, Rays, and Parallel Figures</p>	<p>This lesson introduces line segments and rays. It also teaches how to identify parallel lines and skew lines.</p>	45	<p>Identify the differences between lines, rays, and line segments Identify parallel and skew lines</p>
<p> Quiz: Segments, Rays, and Parallel Figures</p>			
<p> Measuring Segments and Angles</p>	<p>This lesson how to find the lengths of segments. It also instructs how to classify angles according to their measures and how to identify special angle pairs.</p>	45	<p>Find the lengths of segments Find the measures of angles Identify special angle pairs</p>
<p> Quiz: Measuring Segments and Angles</p>			
<p> Basic Constructions</p>	<p>The lesson instructs how to construct a congruent segment and a perpendicular bisector of a segment using a compass and a straightedge. It also teaches how to construct a congruent angle and an angle bisector using a compass and a straightedge.</p>	45	<p>Use a compass and a straightedge to construct congruent segments and congruent angles Use a compass and a straightedge to construct bisectors of segments and angles</p>
<p> Quiz: Basic Constructions</p>			

Lesson	Description	Time (min)	Objective(s)
 The Coordinate Plane	This lesson teaches how to find the distance between two points using the Distance Formula. It also instructs how to find the midpoint of a segment using the Midpoint Formula. These skills are used to find the coordinates of the endpoint of a segment.	45	Find the distance between two points in the coordinate plane Find the coordinates of the midpoint of a segment in the coordinate
 Quiz: The Coordinate Plane			
 Perimeter, Circumference, and Area	This lesson teaches how to find the perimeter of a polygon and the circumference of a circle. It also instructs how to find the area of a square rectangle and circle. It also explains how to find areas of irregular shapes.	45	Find perimeter of polygons and circumference of circles Find the areas of rectangles, squares, and circles
 Quiz: Perimeter, Circumference, and Area			
 Posttest 1			

Module 2: Reasoning and Proof

Lesson	Description	Time (min)	Objective(s)
 Conditional Statements	This lesson teaches how to write conditional statements and its converse. It also instructs how to identify the hypothesis and conclusion of a conditional statement.	45	Recognize conditional statements Write converses of conditional statements
 Quiz: Conditional Statements			

Lesson	Description	Time (min)	Objective(s)
 Biconditionals and Definitions	This lesson teaches how to write a biconditional statement using a conditional statement and its converse. It also instructs how to identify and write good definitions using biconditionals.	45	Write biconditional statements Write good definitions
 Quiz: Biconditionals and Definitions			
 Deductive Reasoning	This lesson introduces two laws of deductive reasoning the Law of Detachment and the Law of Syllogism. It also instructs how to use these laws to form conclusions.	45	Use the Law of Detachment Use the Law of Syllogism
 Quiz: Deductive Reasoning			
 Reasoning in Algebra	This lesson reviews the properties of equality and the Distributive Property from algebra. It introduces the properties of congruence and compares them to the properties of equality. It also shows how to use the properties from algebra and geometry to justify the steps used in solving a problem or constructing a proof.	45	Identify the Properties of Equality and the Distributive Property from algebra Identify the Properties of Congruence Identify similarities between the idea of congruence and the idea of equality Identify the properties that justify the steps you use to solve a problem
 Quiz: Reasoning in Algebra			

Lesson	Description	Time (min)	Objective(s)
 Proving Angles Congruent	This lesson teaches how to use the Vertical Angles Theorem to find angle measures. It also introduces proofs. This lesson also instructs how to use theorems related to supplementary angles, complementary angles, and right angles to find angle measures.	45	Prove and apply theorems about angles
 Quiz: Proving Angles Congruent			
 Posttest 2			

Module 3: Parallel and Perpendicular Lines

Lesson	Description	Time (min)	Objective(s)
 Properties of Parallel Lines	This lesson introduces the types of angles formed when a transversal intersects two lines. It also teaches how to use theorems and postulates to find missing angles that are formed when a transversal intersects two parallel lines.	45	Identify angles formed by two lines and a transversal Prove and use properties of parallel lines
 Quiz: Properties of Parallel Lines			
 Proving Lines Parallel	This lesson teaches the converses of postulates and theorems for parallel lines and transversals. It instructs how to apply these postulates and theorems to find the measures of angles.	45	Use a transversal in proving lines parallel
 Quiz: Proving Lines Parallel			

Lesson	Description	Time (min)	Objective(s)
 Parallel and Perpendicular Lines	This lesson teaches the relationship between two parallel lines and a third parallel line. It also teaches the relationship between two parallel lines and a perpendicular transversal.	45	Relate parallel and perpendicular lines
 Quiz: Parallel and Perpendicular Lines			
 Triangle Angle-Sum Theorem	This lesson applies the Triangle Angle-Sum Theorem to find the measures of the angles in a triangle. It also teaches how to use exterior angles of a triangle to find the measures of two remote angles. In addition the lesson describes how to classify an triangle by its angles and sides.	45	Classify triangles by their angles and sides Find missing angle measures in a triangle
 Quiz: Triangle Angle-Sum Theorem			
 The Polygon Angle-Sum Theorems	This lesson teaches how to classify polygons. It also instructs how to find the sums of the measures of the interior and exterior angles of polygons.	45	Classify polygons Find the sums of the measures of the interior and exterior angles of polygons
 Quiz: The Polygon Angle-Sum Theorems			

Lesson	Description	Time (min)	Objective(s)
--------	-------------	------------	--------------

<p> Lines in the Coordinate Plane</p>	<p>This lesson teaches how to graph a line given a linear equation in slope-intercept form or standard form. It also instructs how to graph a line using intercepts. This lesson also teaches how to write an equation of a line when given a point and the slope or given two points.</p>	<p>45</p>	<p>Graph lines given their equations Write equations of lines</p>
<p> Quiz: Lines in the Coordinate Plane</p>			
<p> Slopes of Lines</p>	<p>This lesson teaches how to determine if two lines are parallel or perpendicular. It instructs how to write an equation of a line parallel to a given line. It also teaches how to write an equation of a line perpendicular to a given line.</p>	<p>45</p>	<p>Relate slope and parallel lines Relate slope and perpendicular lines</p>
<p> Quiz: Slopes of Lines</p>			
<p> Constructing Parallel and Perpendicular Lines</p>	<p>This lesson teaches how to construct parallel lines. It also instructs how to construct perpendicular lines.</p>	<p>45</p>	<p>Use a compass and a straightedge to construct parallel lines Use a compass and a straightedge to construct perpendicular lines</p>
<p> Quiz: Constructing Parallel and Perpendicular Lines</p>			
<p> Posttest 3</p>			

Module 4: Congruent Triangles

Lesson	Description	Time (min)	Objective(s)
 Congruent Figures	This lesson introduces congruent polygons. It also instructs how to identify their congruent parts.	45	Recognize congruent figures and their corresponding parts
 Quiz: Congruent Figures			
 Triangle Congruence by SSS and SAS	This lesson teaches how to prove two triangles are congruent using the SSS Postulate and the SAS Postulate. It also instructs how to determine if enough information has been provided to prove two triangles are congruent.	45	Prove triangles congruent using the Side-Side-Side Postulate and the Side-Angle-Side Postulate
 Quiz: Triangle Congruence by SSS and SAS			
 Triangle Congruence by ASA and AAS	This lesson teaches how to use the ASA Postulate and the AAS Theorem to prove that two triangles are congruent. It also reinforces planning and developing a proof.	45	Prove two triangles congruent using the ASA Postulate and the AAS Theorem
 Quiz: Triangle Congruence by ASA and AAS			
 Using Congruent Triangles: CPCTC	This lesson uses the definition that corresponding parts of congruent triangles are congruent CPCTC to make conclusions that all parts of congruent triangles are congruent.	45	Prove that parts of two triangles are congruent using congruent triangles and CPCTC

<p> Quiz: Using Congruent Triangles: CPCTC</p>			
<p> Isosceles and Equilateral Triangles</p>	<p>This lesson instructs how to use theorems and postulates that relate to isosceles triangles. It also teaches how to apply the Isosceles Triangle Theorem and its converse to find missing sides and angles of isosceles triangles.</p>	<p>45</p>	<p>Use and apply properties of isosceles triangles, including equilateral triangles</p>
<p> Quiz: Isosceles and Equilateral Triangles</p>			
<p> Congruence in Right Triangles</p>	<p>This lesson teaches how to use the Hypotenuse-Leg Theorem to prove two right triangles are congruent.</p>	<p>45</p>	<p>Prove right triangles congruent using the Hypotenuse-Leg Theorem</p>
<p> Quiz: Congruence in Right Triangles</p>			
<p> Using Corresponding Parts of Triangles</p>	<p>This lesson teaches how to separate overlapping triangles. It also instructs how to prove two triangles are congruent by first proving two other triangles are congruent and then applying their congruent corresponding parts.</p>	<p>45</p>	<p>View overlapping triangles separately Use corresponding parts of two congruent triangles to prove other triangles congruent</p>
<p> Quiz: Using Corresponding Parts of Triangles</p>			
<p> Posttest 4</p>			

Module 5: Relationships within Triangles

Lesson	Description	Time (min)	Objective(s)
 Midsegments of Triangles	This lesson teaches the Triangle Midsegment Theorem and how to apply the theorem to find the length of a segment and the measure of an angle.	45	Use properties of triangle midsegments to solve problems
 Quiz: Midsegments of Triangles			
 Bisectors of Triangles	This lesson teaches the Perpendicular Bisector Theorem and the Angle Bisector Theorem. It instructs how to use these theorems to find missing lengths and angles.	45	Use properties of perpendicular bisectors and angle bisectors
 Quiz: Bisectors of Triangles			
 Concurrent Lines, Medians, and Altitudes	This lesson introduces special line segments in triangles. It uses inductive reasoning to make generalizations about altitudes medians angle bisectors and perpendicular bisectors.	45	Identify properties of perpendicular bisectors of a triangle Identify properties of angle bisectors of a triangle Identify properties of medians of a triangle Identify properties of altitudes of a triangle
 Quiz: Concurrent Lines, Medians, and Altitudes			

 Indirect Reasoning	This lesson teaches how to write the negation of a statement and the inverse and contrapositive of a conditional statement. It also instructs how to use indirect reasoning to write an indirect proof.	45	Write the negation of a conditional statement Write the inverse and contrapositive of a conditional statement Use indirect reasoning
--	---	----	--

Lesson	Description	Time (min)	Objective(s)
 Quiz: Indirect Reasoning			
 Inequalities in Triangles	This lesson describes how the longer side of a triangle is opposite the largest angle. It teaches how to use inequalities to compare the angles and sides of triangles. It also shows how to use inequalities to determine the possible lengths of a side.	45	Use inequalities involving angle measures of triangles Use inequalities involving side lengths of triangles
 Quiz: Inequalities in Triangles			
★ Posttest 5			

Module 6: Quadrilaterals

Lesson	Description	Time (min)	Objective(s)
 Classifying Quadrilaterals	This lesson defines special quadrilaterals and their properties. It also instructs how to classify quadrilaterals and use their properties to find side lengths.	45	Classify special quadrilaterals Use inequalities involving side lengths of triangles
 Quiz: Classifying Quadrilaterals			

 Properties of Parallelograms	This lesson teaches that opposite sides and opposite angles of a parallelogram are congruent. It also teaches that the diagonals of a parallelogram bisect each other. These properties are used to find missing lengths and angle measures.	45	Use relationships between sides and angles of parallelograms to solve problems Use relationships involving diagonals of parallelograms and transversals of parallel lines
 Quiz: Properties of Parallelograms			

Lesson	Description	Time (min)	Objective(s)
 Proving Parallelograms	This lesson teaches how to prove that a quadrilateral is a parallelogram.	45	Determine whether a quadrilateral is a parallelogram Use the properties of parallelograms to solve problems
 Quiz: Proving Parallelograms			
 Special Parallelograms	This lesson teaches how to determine if a parallelogram is a rhombus or a rectangle. It also instructs how to use properties of diagonals to find missing lengths and angle measures.	45	Use properties of diagonals of rhombuses and rectangles Determine whether a parallelogram is a rhombus or a rectangle
 Quiz: Special Parallelograms			
 Trapezoids and Kites	This lesson describes the properties of isosceles trapezoids and kites. It also instructs how to find missing angle measures of isosceles trapezoids and kites.	45	Verify and use properties of trapezoids and kites
 Quiz: Trapezoids and Kites			

 Figures in the Coordinate Plane	This lesson teaches how to illustrate quadrilaterals on a coordinate plane. It instructs how to find the midpoints of the sides of a quadrilateral and how to find the missing coordinates of a vertex for a given figure.	45	Place figures in the coordinate plane Find and name the coordinates of figures by using their properties
 Quiz: Figures in the Coordinate Plane			

Lesson	Description	Time (min)	Objective(s)
 Proofs Using Coordinate Geometry	This lesson instructs how to plan and develop coordinate proofs using figures in the coordinate plane. One of the figures is a trapezoid and its midsegment.	45	Prove theorems using figures in the coordinate plane
 Quiz: Proofs Using Coordinate Geometry			
★ Posttest 6			

Module 7: Similarity

Lesson	Description	Time (min)	Objective(s)
 Ratios and Proportions	This lesson teaches how to write ratios and proportions. It instructs how to solve proportions using the Cross-Product Property.	45	Write ratios and solve proportions
 Quiz: Ratios and Proportions			

 Similar Polygons	This lesson teaches how to identify similar polygons and how to use proportions to solve problems. It also instructs how to use similarity to solve real-world problems.	45	Identify and apply similar polygons
 Quiz: Similar Polygons			
 Proving Triangles Similar	This lesson teaches the AA Similarity Postulate the SAS Similarity Theorem and the SSS Similarity Theorem. It also instructs how to solve real-world problems using triangle similarity.	45	Use the Angle-Angle Similarity Postulate, the Side-Angle-Side Similarity Theorem, and the Side-Side-Side Similarity Theorem to make similarity statements Apply the similarity postulate and theorems to find missing side lengths

Lesson	Description	Time (min)	Objective(s)
 Quiz: Proving Triangles Similar			
 Similarity in Right Triangles	This lesson teaches how to find and use relationships in similar right triangles. It instructs how to find geometric means and use them to find side lengths of triangles.	45	Find and use relationships between similar right triangles
 Quiz: Similarity in Right Triangles			
 Proportions in Triangles	This lesson teaches how to use proportions in triangles to solve problems. It also instructs how to use the Side-Splitter Theorem and the Triangle-Angle Bisector Theorem to find missing segment lengths.	45	Use the Side-Splitter Theorem Use the Triangle-Angle-Bisector Theorem
 Quiz: Proportions in Triangles			

★ Posttest 7			
--------------	--	--	--

Review Test

Lesson	Description	Time (min)	Objective(s)
★ Review Test			

Geometry B Syllabus

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Right Triangles and Trigonometry

Lesson	Description	Time (min)	Objective(s)
 The Pythagorean Theorem	This lesson teaches how to use the Pythagorean Theorem and Pythagorean triples to solve problems. In addition this lesson teaches how to use the Converse of the Pythagorean Theorem to determine if a triangle is a right triangle.	45	Use the Pythagorean Theorem Use the Converse of the Pythagorean Theorem
 Quiz: The Pythagorean Theorem			
 Special Right Triangles	This lesson teaches how to use the properties of special right triangles. It instructs how to use the theorems to find the length of a leg or hypotenuse.	45	Use the properties of Use the properties of 45° - 45° - 90° triangles Use the properties of 0° - 60° - 90° triangles

<p>? Quiz: Special Right Triangles</p>			
---	--	--	--

Lesson	Description	Time (min)	Objective(s)
<p>📁 The Tangent Ratio</p>	<p>This lesson teaches how to use the tangent ratio to find the length of a leg of a right triangle. It also instructs how to use the inverse of tangent to find the measure of an acute angle of a right triangle.</p>	<p>45</p>	<p>Use tangent ratios to determine side lengths in triangles Use the inverse of tangent to determine angle measures in triangles</p>
<p>? Quiz: The Tangent Ratio</p>			
<p>📁 Sine and Cosine Ratios</p>	<p>This lesson teaches how to use sine and cosine ratios and their inverses to solve problems involving right triangles. It also introduces trigonometric identities.</p>	<p>45</p>	<p>Use sine and cosine ratios to determine side lengths and angle measures in right triangles</p>
<p>? Quiz: Sine and Cosine Ratios</p>			
<p>📁 Angles of Elevation and Depression</p>	<p>This lesson teaches how to identify angles of elevation and angles of depression. It also instructs how to determine which trigonometric ratio to use to solve problems with angles of elevation and depression.</p>	<p>45</p>	<p>Recognize angles of elevation and depression Solve real-life problems using trigonometric ratios and angles of elevation and depression</p>
<p>? Quiz: Angles of Elevation and Depression</p>			
<p>★ Posttest 1</p>			

Module 2: Transformations

Lesson	Description	Time (min)	Objective(s)
 Translations	This lesson teaches basic transformations and how to identify isometries. It also instructs how to find translation images using rules.	45	Identify isometries Find translations of figures
 Quiz: Translations			
 Reflections	This lesson defines a reflection. It teaches how to identify images that are reflections. It also instructs how to reflect an image across a given line.	45	Find reflection images of figures
 Quiz: Reflections			
 Rotations	This lesson defines a rotation. It teaches how to identify the rotation image of a regular polygon about its center.	45	Identify rotation images of figures
 Quiz: Rotations			
 Symmetry	This lesson teaches the meaning of symmetry. It instructs how to identify reflectional symmetry line symmetry rotational symmetry and point symmetry.	45	Identify the types of symmetry in a figure
 Quiz: Symmetry			
 Dilations	This lesson defines dilation and teaches how to use scale factor to describe a dilation as an enlargement or reduction. It also instructs how to draw a dilation on a coordinate plane.	45	Locate dilation images of figures
 Quiz: Dilations			

Lesson	Description	Time (min)	Objective(s)
 Compositions of Reflections	This lesson teaches how to recognize the composition of reflections across parallel lines or intersecting lines. It also instructs how to identify a glide reflection. These skills are used to classify isometries.	45	Use a composition of reflections Identify glide reflections
 Quiz: Compositions of Reflections			
 Tessellations	This lesson teaches how to identify a transformation in a tessellation. It also instructs how to identify a figure that will tessellate.	45	Identify polygons that tessellate a plane Identify transformations in tessellations
 Quiz: Tessellations			
 Posttest 2			

Module 3: Area

Lesson	Description	Time (min)	Objective(s)
 Areas of Parallelograms and Triangles	This lesson teaches how to find areas of parallelograms and triangles.	45	Find the area of a parallelogram Find the area of a triangle
 Quiz: Areas of Parallelograms and Triangles			
 Areas of Special Quadrilaterals	This lesson teaches how to find the area of trapezoid. It also instructs how to find the area of a rhombus or a kite.	45	Find the area of trapezoids, kites, and rhombuses
 Quiz: Areas of Special Quadrilaterals			

Lesson	Description	Time (min)	Objective(s)
 Areas of Regular Polygons	This lesson teaches how to find the measures of the angles of a regular polygon. It also instructs how to find the area of a regular polygon.	45	Find the area of regular polygons
 Quiz: Areas of Regular Polygons			
 Perimeters and Areas of Similar Figures	This lesson teaches how to find ratios of perimeters of similar figures. It also teaches how to find ratios of areas of similar figures. It instructs how to determine these ratios without calculating the perimeters or areas of the similar figures.	45	Find the perimeters and areas of similar figures
 Quiz: Perimeters and Areas of Similar Figures			
 Circles and Arcs	This lesson teaches the parts of a circle including central angles and arcs. It also instructs how to find the circumference and arc lengths of a circle.	45	Find the measures of central angles in a circle graph Identify arcs of a circle Find the circumference of a circle Find the lengths of arcs of a circle
 Quiz: Circles and Arcs			
 Areas of Circles and Sectors	This lesson teaches how to find the area of a circle. It also instructs how to find the area of a sector and the area of a segment of a circle.	45	Find the area of circles Find the area of sectors Find the area of segments of a circle
 Quiz: Areas of Circles and Sectors			

Lesson	Description	Time (min)	Objective(s)
 Geometric Probability	This lesson teaches how to use a geometric probability model such as the segment model and the area model to find probabilities of events.	45	Find the probability of events using a segment model Find the probability of events using an area model
 Quiz: Geometric Probability			
 Posttest 3			

Module 4: Surface Area and Volume

Lesson	Description	Time (min)	Objective(s)
 Space Figures and Cross Sections	This lesson teaches how to identify the vertices edges and faces of a polyhedron. It also instructs how to describe cross sections formed between a solid and a plane.	45	Recognize polyhedra and their parts Visualize cross sections of three-dimensional figures
 Quiz: Space Figures and Cross Sections			
 Surface Areas of Prisms and Cylinders	This lesson teaches how to find the surface area of a prism. It also instructs how to find the surface area of a cylinder.	45	Find the surface area of a prism Find the surface area of a cylinder
 Quiz: Surface Areas of Prisms and Cylinders			
 Surface Areas of Pyramids and Cones	This lesson teaches how to identify the parts of a pyramid and a cone. It also instructs how the find the lateral areas and surface areas of regular pyramids and cones.	45	Find the surface area of a pyramid Find the surface area of a cone

Lesson	Description	Time (min)	Objective(s)
<p> Quiz: Surface Areas of Pyramids and Cones</p>			
<p> Volumes of Prisms and Cylinders</p>	<p>This lesson teaches how to find volumes of prisms and cylinders. It also teaches how to find volumes of composite space figures by finding the sum of the individual volumes.</p>	45	<p>Find the volumes of prisms and cylinders Find the volumes of composite space figures</p>
<p> Quiz: Volumes of Prisms and Cylinders</p>			
<p> Volumes of Pyramids and Cones</p>	<p>This lesson teaches how to find the volume of a pyramid. It also teaches how to find the volume of a cone.</p>	45	<p>Find the volume of pyramids Find the volume of cones</p>
<p> Quiz: Volumes of Pyramids and Cones</p>			
<p> Surface Areas and Volumes of Spheres</p>	<p>This lesson teaches how to find the surface area of a sphere. It also teaches how to find the volume of a sphere.</p>	45	<p>Find the surface area and volume of a sphere</p>
<p> Quiz: Surface Areas and Volumes of Spheres</p>			
<p> Areas and Volumes of Similar Solids</p>	<p>This lesson teaches how to identify similar solids. It also instructs how to find the relationships between ratios of areas and volumes of similar solids.</p>	45	<p>Find relationships between the ratios of the areas and volumes of similar solids</p>
<p> Quiz: Areas and Volumes of Similar Solids</p>			
<p> Posttest 4</p>			

Module 5: Circles

Lesson	Description	Time (min)	Objective(s)
 Tangent Lines	This lesson teaches how to use the relationship between a radius of a circle and a tangent. It also instructs how to use the relationship between two tangents from one point outside of a circle.	45	<p>Use the relationship between a radius and a tangent</p> <p>Use the relationship between two tangents from one point</p>
 Quiz: Tangent Lines			
 Chords and Arcs	This lesson teaches how to use congruent chords arcs and central angles to find the length of a segment or the measure of an angle. It also instructs how to recognize properties of lines through the center of a circle.	45	<p>Use congruent chords, arcs, and central angles</p> <p>Recognize properties of lines through the center of a circle</p>
 Quiz: Chords and Arcs			
 Inscribed Angles	This lesson teaches how to find the measures of inscribed angles and arcs. It also instructs how to find the measure of an angle formed by a tangent and a chord.	45	<p>Find the measure of an inscribed angle</p> <p>Find the measure of an angle formed by a tangent and a chord</p>
 Quiz: Inscribed Angles			
 Angle Measures and Segment Lengths	This lesson teaches how to find the measures of angles formed by chords secants and tangents of a circle. It also instructs how to find the lengths of segments in circles.	45	<p>Find the measures of angles formed by chords, secants, and tangents to circles</p> <p>Find the lengths of segments formed by chords, secants, and tangents to circles</p>
 Quiz: Angle Measures and Segment Lengths			

Lesson	Description	Time (min)	Objective(s)
📖 Circle in the Coordinate Plane	This lesson teaches how to write the equation of a circle in standard form. It also teaches how to determine the center and radius of a circle from an equation in standard form.	45	Write an equation of a circle Find the center and radius of a circle
🔍 Quiz: Circle in the Coordinate Plane			
★ Posttest 5			

Review Test

Lesson	Description	Time (min)	Objective(s)
★ Review Test			

Pre-Calculus

Precalculus A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

This is the first of two courses that comprise Precalculus. In this course, the student will continue to study higher-level mathematics. The student will begin by reviewing the fundamental concepts in algebra that serve as building blocks for an in-depth study of functions and graphs. Next, the student will explore and analyze polynomial, rational, radical, exponential, logarithmic, and piecewise functions. The student will further delve into quadratics with a unit on the conic sections. Finally, the student will explore sequences and series.

A content thread throughout the course focuses on ways mathematics is applied in the real world and is essential to everyday life. These real-world connections, combined with an emphasis on mathematical reasoning and critical thinking skills, prepare the student for future college and career opportunities.

SEMESTER B

This is the second of two courses that comprise Precalculus. In this course, the student will continue to study higher-level mathematics. The student will expand knowledge of trigonometric concepts, including trigonometric functions and identities, before being introduced to polar coordinates and equations. Next, the student will explore vectors and parametric equations. Finally, the student will examine calculus concepts including limits and derivatives in preparation for studying calculus.

A content thread throughout the course focuses on ways mathematics is applied in the real world and is essential to everyday life. These real-world connections, combined with an emphasis on mathematical reasoning and critical thinking skills, prepare the student for future college and career opportunities.

Course Outline:

SEMESTER A

1. Welcome to Precalculus

1. Introduction to Precalculus

- Assess personal readiness for studying and learning
- Discuss strategies for using resources effectively
- Distinguish between previous mathematics courses and precalculus
- Identify the various resources that can be used to promote active learning
- Set goals in the context of mathematical learning

2. Algebraic Expressions and Equations

- Simplify algebraic expressions

- Solve algebraic equations
- 3. Relations and Functions
 - Apply the definition of a relation and a function
 - Determine whether a relation is a function from its graph using the vertical line test
 - Represent relations and functions in tables and graphs
- 4. The Complex Number System
 - Identify the subsets of complex numbers and their relationships
 - Simplify a number using the imaginary unit, i
 - Graph complex numbers on a complex number plane
- 5. Operations with Complex Numbers
 - Add, subtract, multiply, and divide complex numbers
 - Show that the set of complex numbers is closed under all four operations
 - Solve equations that have imaginary solutions

2. Function Algebra

1. Domain and Range of a Function
 - Use set builder and interval notation to represent ranges of numbers
 - Determine the domain of a function from its algebraic expression
 - Determine the domain and range of a function from its graph
2. Algebra of Functions
 - Compute, graph, and interpret the sum, difference, product, and quotient of two functions
 - Determine the domain and range of the sum, difference, product, and quotient of two functions
3. Composition of Functions
 - Compute and interpret the composition of two functions
 - Find the domain of the composition of functions
4. Inverse Functions
 - Identify one-to-one functions using either the horizontal line test or the equation
 - Find the inverse of a function
 - Determine the domain and range of a function and its inverse
5. Verifying Inverse Functions
 - Determine if two functions are inverses of one another algebraically
6. Graphs of Inverse Functions
 - Determine the graph of the inverse function by observing the graph of a one-to-one function
 - Restrict a function's domain to find its inverse function
7. Function Algebra Review
 - Review concepts from this unit in preparation for completing the unit test
8. Function Algebra Unit Test
 - Determine the domain and range of a function given its algebraic representation or its graph

- Compute, graph, and interpret the sum, difference, product, quotient, and composition of two functions
- Determine whether a function has an inverse that is also a function and, if so, find the inverse algebraically or by graphing
- Use the composition of functions to verify the inverse
- Restrict a function's domain to find its inverse function

3. Graph Behavior

1. Analyzing Functions

- Find the intervals over which a function is increasing, decreasing, and constant
- Describe the analysis of the graph of a function
- Identify the x- and y-intercepts of a function from its graph

2. Even and Odd Functions

- Determine whether a function is even, odd, or neither

3. Asymptotes and End Behavior

- Recognize and describe the asymptotes of a function
- Recognize and describe the end behavior of a function

4. Continuous and Discontinuous Functions

- Identify continuous and discontinuous functions
- Identify types of discontinuity

5. Linear, Absolute Value, and Reciprocal Functions

- Recognize the graphs of the parent functions of the linear, absolute value, and reciprocal functions

6. Power, Root, Exponential, Logarithmic Functions

- Recognize the graphs of the parent functions of power, root, exponential, and logarithmic functions

7. Transformations of Functions

- Identify horizontal and vertical shifts by analyzing the equation of the function
- Identify horizontal and vertical stretches and compressions by analyzing the equation of the function
- Identify reflections across the x- and y-axes by analyzing the equation of the function

8. Multiple Transformations of Functions

- Determine the order of transformations of a function
- Identify multiple transformations of a function by observing the algebraic structure of the function

9. Graph Behavior Review

- Review concepts from this unit in preparation for completing the unit test

10. Graph Behavior Test

- Identify and interpret significant points on a graph
- Identify types of discontinuities in a graph
- Interpret function transformations graphically

- Identify the parent graphs of common functions

4. Polynomial and Rational Functions

1. Polynomial Functions

- Identify a polynomial function, its degree, and leading coefficient
- Determine the end behavior of a function and the number of turning points of its graph
- Find the local and global extreme values of a polynomial function

2. Real Zeroes of a Polynomial Function

- Determine the behavior at the x-intercepts of a polynomial function
- Find all rational numbers that are possible zeroes of a polynomial function
- Use the Intermediate Value Theorem to determine if a function has a zero over a closed interval

3. Dividing Polynomials

- Use the Remainder Theorem to find the remainder in a division problem
- Use the Rational Zero Theorem and synthetic division to find the zeroes of a polynomial function
- Use the Factor Theorem to determine the linear factors of a polynomial

4. Complex Zeroes of a Polynomial Function

- Use synthetic division to solve for all zeroes of a polynomial function where two solutions are complex

5. Graphs of Rational Functions

- Identify the domain of a rational function and the vertical asymptotes of its graph
- Identify the horizontal asymptotes of the graph of a rational function
- Identify the slant asymptotes of the graph of a rational function

6. Operations with Rational Expressions

- Add, subtract, multiply, and divide rational expressions
- Prove that the set of rational expressions is closed under addition, subtraction, multiplication, and division by nonzero values

7. Polynomial and Rational Functions Review

- Review concepts from this unit in preparation for completing the unit test

8. Polynomial and Rational Functions Unit Test

- Determine the domain and range of polynomial and rational functions from their equations or their graphs
- Determine the number and nature of the solutions of polynomial equations with real coefficients over the complex numbers
- Use arithmetic operations with complex numbers, polynomial expressions, and rational expressions, and confirm that the set of complex numbers is closed under addition, subtraction, multiplication, and division
- Compare and contrast the polynomial, rational, and radical families of functions and translate among their verbal, tabular, graphical, and symbolic representations
- Apply the Intermediate and Extreme Value Theorems to identify key points on the graph of a function

5. Exponential, Logarithmic, Piecewise Functions

1. Exponential Functions and Graphs
 - Determine if a function is an exponential function
 - Analyze the graphs of exponential functions
 - Identify and graph transformations of exponential functions
 - Identify the graphs of exponential functions with base e
2. Logarithmic Notation
 - Convert between logarithmic and exponential forms
 - Evaluate a logarithm without a calculator
3. Graphs of Logarithmic Functions
 - Identify and graph transformations of logarithmic functions
 - Compare and contrast the graphs of logarithmic functions containing different bases
 - Graph logarithmic functions
4. Logarithm Rules and Solving Logarithmic Equations
 - Expand a logarithmic expression
 - Rewrite a multi-term logarithmic expression as a single logarithm
 - Solve logarithmic equations
 - Solve logarithmic equations containing composite functions of logarithms
5. Solving Exponential Equations
 - Solve exponential equations, including those containing powers with different bases
 - Solve exponential equations in quadratic form
 - Use the change of base formula to evaluate a logarithm with a calculator
6. Piecewise Functions
 - Evaluate a piecewise function
 - Write the equation of a piecewise function
 - Graph a piecewise function
 - Identify discontinuities in the graph of a piecewise function
7. Exponential, Logarithmic, Piecewise Fcns. Review
 - Review concepts from the unit in preparation for completing the unit test
8. Exponential, Logarithmic, Piecewise Functions Test
 - Review semester topics, concepts, and processes

6. Conic Sections

1. Analytic Geometry
 - Apply the distance and midpoint formulas to find the distance and midpoint between two points on the coordinate plane
 - Prove geometric relationships among points and lines using analytical methods
2. Introduction to Conic Sections
 - Recognize circles, ellipses, parabolas, and hyperbolas

- Use the general equation of a conic section to identify the conic section

3. Circles

- Write the equation of a circle in both standard form and general form and identify its center and radius
- Graph a circle when given both the standard and general form and identify its center and radius
- Use circles to model and solve problems in real-world scenarios

4. Ellipses

- Graph an ellipse when given both the standard and general forms, and recognize its center, vertices, and foci
- Write the equation of an ellipse in both standard form and general form and identify its center, vertices, and foci
- Write and graph the equation of an ellipse when provided center, vertices, and foci
- Use ellipses to model and solve problems in real-world scenarios

5. Parabolas

- Write and graph the equation of a parabola when provided the vertex and focus
- Graph a parabola when given both the standard and general forms of the equation, and recognize its focus and directrix
- Write the equation of a parabola in both standard form and general form and identify its focus and directrix
- Use parabolas to model and solve problems in real-world scenarios

6. Hyperbolas

- Graph a hyperbola when given both its standard and general form, and recognize its vertices, foci, and asymptotes
- Write the equation of a hyperbola in both standard form and general form and identify its center, vertices, foci, and asymptotes
- Write and graph the equation of an ellipse when its center, vertices, and foci are provided
- Use hyperbolas to model and solve problems in real-world scenarios

7. Conic Sections Review

- Review concepts from the unit in preparation for completing the unit test

8. Conic Sections Test

- Determine the equation for a conic section from its locus
- Analyze and graph quadratic equations
- Model real-world scenarios with conic sections

7. Sequences and Series

1. Sequences

- Find the first five terms of a sequence defined explicitly
- Find the first five terms of a sequence defined recursively
- Apply factorial notation

2. Arithmetic Sequences

- Determine whether or not a sequence is arithmetic

- Find a formula for an arithmetic sequence
 - Use an arithmetic sequence to model a real-world scenario
3. Terms of an Arithmetic Sequence
- Find a specific term and find the n th term of an arithmetic sequence
 - Find the first term of an arithmetic sequence given another term and the common difference
 - Determine the missing terms of an arithmetic sequence using the arithmetic mean
 - Use an arithmetic sequence to model a real-world scenario
4. Finite Arithmetic Series
- Find the sum of the first n terms of an arithmetic sequence
5. Arithmetic Series Summation Formulas
- Use summation formulas to evaluate a partial sum of an arithmetic sequence
 - Express a given arithmetic series in summation notation
 - Identify and use the properties of summations
 - Use summation formulas to evaluate sigma expressions
6. Equations of a Geometric Sequence
- Determine if a sequence is arithmetic, geometric, or neither
 - Find the first five terms of a geometric sequence
 - Use a geometric sequence to model a real-world scenario
7. Terms of a Geometric Sequence
- Find the n th term of a geometric sequence
 - Find the first term and common ratio given any two terms of a geometric sequence
 - Determine the missing terms of a geometric series using the geometric mean
 - Use a geometric sequence to model a real-world scenario
8. Convergent and Divergent Sequences and Series
- Determine if a series is convergent or divergent
9. Finite Geometric Series
- Find the sum of the first n terms of a geometric sequence
10. Infinite Geometric Series
- Find the sum of an infinite geometric series
11. Sequences and Series Review
- Review concepts from the unit in preparation for completing the unit test
12. Sequences and Series Test
- Distinguish between arithmetic and geometric sequences
 - Define sequences and series in terms of functions (notation, range, domain, general term)
 - Apply sigma and factorial notation to a series
 - Determine convergence and divergence of a series and calculate sums of convergent series
 - Model real-world patterns and situations with recursive relationships, sequences, and series

8. Semester Review and Exam

1. Semester Review
 - Review semester topics, concepts, and processes
2. Semester Exam

There are no objectives for this lesson.

SEMESTER B

1. Introduction to Trigonometry

1. Right Triangle Trigonometry
 - Identify trigonometric ratios on a given right triangle
 - Apply trigonometric ratios to find missing side lengths of right triangles
 - Use complementary angles to demonstrate the relationship between a trigonometric function and its cofunction
2. Solving Right Triangles
 - Apply trigonometric ratios to find all missing sides and angles of a right triangle
3. Angle Measurements
 - Differentiate between degree and radian measures
 - Convert angle measurements between degrees and radians
 - Use the concept of arc length to develop the relationship between degree and radian measures
4. The Unit Circle
 - Identify the standard position of an angle on the coordinate plane
 - Use the unit circle and right triangles to define and evaluate trigonometric functions of real numbers
5. Special Right Triangles
 - Identify relationships of side lengths in special triangles
 - Develop the values of trigonometric functions at special angles in both radians and degrees
6. Trigonometric Functions in Quadrants I–IV
 - Identify the reference angle of an angle in standard position on the unit circle
 - Identify the relationship between the values of trigonometric functions in each quadrant of the unit circle
 - Evaluate trigonometric functions of quadrantal angles in any position
7. Introduction to Trigonometry Review
 - Review concepts from unit in preparation for completing the unit test
8. Introduction to Trigonometry Test
 - Use the unit circle and right triangles to define and evaluate trigonometric functions of real numbers.
 - Use degree and radian measures for angles and convert between them.
 - Develop the values of trigonometric functions at special angles in both radians and degrees.

2. Trigonometric Functions

1. Graphs of Trigonometric Functions
 - Graph trigonometric functions on the coordinate plane using a table of values
2. Domain and Range of Trigonometric Functions
 - Determine the domain and range of trigonometric functions
3. Behavior of Trigonometric Functions
 - Describe the behavior of the trigonometric functions, including periodicity, amplitude, zeroes, asymptotes, and symmetries
 - Use periodic and even and odd identities to find values of trigonometric functions
4. Properties of Trigonometric Functions
 - Identify and interpret amplitude, frequency, period, and vertical and phase shift
5. Graphing Transformations of Trigonometric Function
 - Graph transformations of trigonometric functions
 - Compare and contrast characteristics of trigonometric functions with transformations of other families of functions
6. Writing Equations of Trigonometric Functions
 - Write the equation of a trigonometric function by identifying the properties and behavior of its graph
7. Modeling with Trigonometric Functions
 - Write and graph a trigonometric function that accurately models a real-world scenario
8. Inverse Trigonometric Functions
 - Use domain restriction to make trigonometric functions invertible
 - Graph inverse trigonometric functions on the coordinate plane
 - Evaluate inverse trigonometric functions at real-number values
9. Composition of Trigonometric Functions
 - Compose two given trigonometric functions
 - Use composition of functions to verify inverse trigonometric functions
10. Applications of Trigonometric Functions
 - Solve real-world problems with trigonometric functions
11. Trigonometric Functions Review
 - Review concepts from this unit in preparation for completing the unit test
12. Trigonometric Functions Test

There are no objectives for this lesson.

3. Trigonometric Identities and Applications

1. Trigonometric Identities
 - Identify reciprocal, quotient, and Pythagorean identities
 - Use the fundamental identities to verify other identities and to simplify trigonometric expressions
2. Sum and Difference Formulas
 - Develop and apply the sum and difference formulas to simplify trigonometric expressions

- Use the sum and difference formulas to find exact values of trigonometric expressions
 - Use the sum and difference formulas to verify trigonometric identities
3. Double-Angle Formulas
 - Develop and apply double-angle formulas to simplify trigonometric expressions, find exact values, and verify trigonometric identities
 4. Law of Sines
 - Prove and apply the Law of Sines
 - Identify conditions necessary for zero, one, or two triangles
 5. Law of Cosines
 - Prove and apply the Law of Cosines
 6. Trigonometric Equations
 - Solve trigonometric equations and interpret them graphically.
 7. Trigonometric Identities and Applications Review
 - Review concepts from this unit in preparation for completing the unit test
 8. Trigonometric Identities and Applications Test

There are no objectives for this lesson.

4. Polar Coordinates and Functions

1. Polar Coordinates
 - Locate and plot points in the polar coordinate system
 - Identify additional representations of a point in polar form
 - Convert coordinates between rectangular and polar forms
2. Polar Equations
 - Convert equations between rectangular and polar form
3. Graphs of Polar Equations
 - Graph a polar equation using point plotting
 - Identify graphs of polar equations of circles
 - Write polar equations of a circle given its graph
 - Use polar symmetry tests to determine if the graph is symmetric about the x-axis, the y-axis, or the origin
4. Conic Sections in Polar Coordinates
 - Identify and graph the polar equations of conic sections
5. Limaçons
 - Identify the graphs of limaçons
 - Identify and graph the polar equations of limaçons
6. Rose Curves and Lemniscates
 - Identify the graph and equation of a rose curve expressed in polar form
 - Identify the graph and equation of a lemniscate curve in polar form
7. Complex Numbers in Polar Form
 - Convert complex numbers between rectangular and polar forms

8. Operations of Complex Numbers in Polar Form
 - Find the product of complex numbers in polar form
 - Find the quotient of complex numbers in polar form
9. DeMoivre's Theorem
 - Prove and apply DeMoivre's Theorem
 - Find powers of complex numbers in polar and rectangular form
 - Find roots of complex numbers in polar and rectangular form
10. Polar Coordinates and Functions Review
 - Review concepts from the unit in preparation for completing the unit test
11. Polar Coordinates and Functions Test

There are no objectives for this lesson.

5. Vectors

1. Representing Vectors
 - Represent vectors geometrically and in component form
 - Determine the components of a vector
 - Find the magnitude of a vector
 - Determine whether two vectors are equal
2. Operations with Vectors
 - Represent operations on vectors geometrically
 - Perform vector addition and subtraction and find the resultant vector
 - Perform scalar multiplication
3. Unit Vectors
 - Represent vectors in the rectangular coordinate system in terms of i and j
 - Find a unit vector
4. Direction Angle
 - Find the direction angle of a vector
 - Represent a vector in terms of magnitude and direction
5. Dot Product
 - Find the dot product of two vectors
 - Apply the properties of the dot product
6. Angle Between Two Vectors
 - Use the alternative form of the dot product to find the angle between two vectors
 - Use the dot product to determine if two vectors are orthogonal, parallel, or neither
 - Use the dot product to solve real-world problems
7. Vectors Review
 - Review concepts from this unit in preparation for completing the unit test
8. Vectors Test

There are no objectives for this lesson.

6. Parametric Functions

1. Plane Curves and Parametric Functions
 - Analyze plane curves in parametric form
2. Plotting Points and Eliminating the Parameter
 - Graph plane curves by plotting points
 - Graph plane curves by eliminating the parameter
 - Graph plane curves by solving for x or y
3. Using Trigonometric Identities
 - Graph plane curves by using trigonometric identities
 - Identify advantages of using parametric equations
4. Finding Parametric Equations
 - Find parametric equations for functions
 - Analyze different parametric equations for the same functions
5. Polar and Parametric Equations
 - Convert between polar and parametric forms
6. Modeling Linear and Projectile Motion
 - Model linear and projectile motion using parametric equations
7. Parametric Functions Review
 - Review concepts from the unit in preparation for completing the unit test
8. Parametric Functions Test

There are no objectives for this lesson.

7. Looking Ahead to Calculus

1. Limit of a Function
 - Apply the definition of a limit of a function to specific examples
 - Determine the limit of a function for a given value using various methods
2. Properties of Limits
 - Use the properties of limits to find limits of functions
3. Continuity of Functions and Limits
 - Use the criteria for continuity to determine if a function, f , is continuous at a
4. Rate of Change
 - Define the instantaneous rate of change of a function at a point
 - Find the slope of a tangent line at a given point on a curve
 - Write the equation of a tangent line
 - Define the derivative of a function, f , at $x = a$.
5. Applications of the Derivative
 - Solve real-world problems involving the derivatives of functions
 - Find average and instantaneous velocity of an object in motion
 - Use the velocity of an object to find its acceleration

8. Semester Review and Exam

1. Semester Review
 - Review semester topics, concepts, and processes
2. Semester Exam

There are no objectives for this lesson.

Pre-Calculus Honors

Honors Precalculus

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise Honors Precalculus. In this course, the student will continue to study higher-level mathematics. The student will begin by reviewing the fundamental concepts in algebra that serve as building blocks for an in-depth study of functions and graphs. Next, the student will explore and analyze polynomial, rational, radical, exponential, logarithmic, and piecewise functions. The student will further delve into quadratics with a unit on the conic sections. Finally, the student will explore sequences and series.

A semester-long project will give the Honors Precalculus student the opportunity to apply math in an engineering setting. The student will devote time during each unit to work on this project and submit the final product before the semester review unit.

A content thread throughout the course focuses on ways mathematics is applied in the real world and is essential to everyday life. These real-world connections, combined with an emphasis on mathematical reasoning and critical thinking skills, prepare the student for future college and career opportunities.

Semester A Outline

1. Welcome to Precalculus

1. Introduction to Precalculus

- Assess personal readiness for studying and learning
- Discuss strategies for using resources effectively
- Distinguish between previous mathematics courses and precalculus
- Identify the various resources that can be used to promote active learning
- Set goals in the context of mathematical learning

2. Algebraic Expressions and Equations

- Simplify algebraic expressions
- Solve algebraic equations

3. Relations and Functions

- Apply the definition of a relation and a function
- Determine whether a relation is a function from its graph using the vertical line test
- Represent relations and functions in tables and graphs

4. The Complex Number System
 - Identify the subsets of complex numbers and their relationships
 - Simplify a number using the imaginary unit, i
 - Graph complex numbers on a complex number plane
5. Operations with Complex Numbers
 - Add, subtract, multiply, and divide complex numbers
 - Show that the set of complex numbers is closed under all four operations
 - Solve equations that have imaginary solutions
6. Honors Full STEAM Ahead Project
 - Describe the interrelatedness of the STEM areas with art, creating the STEAM acronym
 - Review the requirements for the project and the schedule

2. Function Algebra

1. Domain and Range of a Function
 - Use set builder and interval notation to represent ranges of numbers
 - Determine the domain of a function from its algebraic expression
 - Determine the domain and range of a function from its graph
2. Algebra of Functions
 - Compute, graph, and interpret the sum, difference, product, and quotient of two functions
 - Determine the domain and range of the sum, difference, product, and quotient of two functions
3. Composition of Functions
 - Compute and interpret the composition of two functions
 - Find the domain of the composition of functions
4. Inverse Functions
 - Identify one-to-one functions using either the horizontal line test or the equation
 - Find the inverse of a function
 - Determine the domain and range of a function and its inverse
5. Verifying Inverse Functions
 - Determine if two functions are inverses of one another algebraically
6. Graphs of Inverse Functions
 - Determine the graph of the inverse function by observing the graph of a one-to-one function
 - Restrict a function's domain to find its inverse function
7. Function Algebra Review
 - Review concepts from this unit in preparation for completing the unit test
8. Function Algebra Unit Test
 - Determine the domain and range of a function given its algebraic representation or its graph
 - Compute, graph, and interpret the sum, difference, product, quotient, and composition of two functions

- Determine whether a function has an inverse that is also a function and, if so, find the inverse algebraically or by graphing
- Use the composition of functions to verify the inverse
- Restrict a function's domain to find its inverse function

3. Graph Behavior

1. Analyzing Functions

- Find the intervals over which a function is increasing, decreasing, and constant
- Describe the analysis of the graph of a function
- Identify the x- and y-intercepts of a function from its graph

2. Even and Odd Functions

- Determine whether a function is even, odd, or neither

3. Asymptotes and End Behavior

- Recognize and describe the asymptotes of a function
- Recognize and describe the end behavior of a function

4. Continuous and Discontinuous Functions

- Identify continuous and discontinuous functions
- Identify types of discontinuity

5. Linear, Absolute Value, and Reciprocal Functions

- Recognize the graphs of the parent functions of the linear, absolute value, and reciprocal functions

6. Power, Root, Exponential, Logarithmic Functions

- Recognize the graphs of the parent functions of power, root, exponential, and logarithmic functions

7. Transformations of Functions

- Identify horizontal and vertical shifts by analyzing the equation of the function
- Identify horizontal and vertical stretches and compressions by analyzing the equation of the function
- Identify reflections across the x- and y-axes by analyzing the equation of the function

8. Multiple Transformations of Functions

- Determine the order of transformations of a function
- Identify multiple transformations of a function by observing the algebraic structure of the function

9. Graph Behavior Review

- Review concepts from this unit in preparation for completing the unit test

10. Graph Behavior Test

- Identify and interpret significant points on a graph
- Identify types of discontinuities in a graph
- Interpret function transformations graphically
- Identify the parent graphs of common functions

4. Polynomial and Rational Functions

1. Polynomial Functions
 - Identify a polynomial function, its degree, and leading coefficient
 - Determine the end behavior of a function and the number of turning points of its graph
 - Find the local and global extreme values of a polynomial function
2. Real Zeroes of a Polynomial Function
 - Determine the behavior at the x-intercepts of a polynomial function
 - Find all rational numbers that are possible zeroes of a polynomial function
 - Use the Intermediate Value Theorem to determine if a function has a zero over a closed interval
3. Dividing Polynomials
 - Use the Remainder Theorem to find the remainder in a division problem
 - Use the Rational Zero Theorem and synthetic division to find the zeroes of a polynomial function
 - Use the Factor Theorem to determine the linear factors of a polynomial
4. Complex Zeroes of a Polynomial Function
 - Use synthetic division to solve for all zeroes of a polynomial function where two solutions are complex
5. Graphs of Rational Functions
 - Identify the domain of a rational function and the vertical asymptotes of its graph
 - Identify the horizontal asymptotes of the graph of a rational function
 - Identify the slant asymptotes of the graph of a rational function
6. Operations with Rational Expressions
 - Add, subtract, multiply, and divide rational expressions
 - Prove that the set of rational expressions is closed under addition, subtraction, multiplication, and division by nonzero values
7. Polynomial and Rational Functions Review
 - Review concepts from this unit in preparation for completing the unit test
8. Polynomial and Rational Functions Unit Test
 - Determine the domain and range of polynomial and rational functions from their equations or their graphs
 - Determine the number and nature of the solutions of polynomial equations with real coefficients over the complex numbers
 - Use arithmetic operations with complex numbers, polynomial expressions, and rational expressions, and confirm that the set of complex numbers is closed under addition, subtraction, multiplication, and division
 - Compare and contrast the polynomial, rational, and radical families of functions and translate among their verbal, tabular, graphical, and symbolic representations
 - Apply the Intermediate and Extreme Value Theorems to identify key points on the graph of a function

5. Exponential, Logarithmic, Piecewise Functions

1. Exponential Functions and Graphs

- Determine if a function is an exponential function
 - Analyze the graphs of exponential functions
 - Identify and graph transformations of exponential functions
 - Identify the graphs of exponential functions with base e
2. Logarithmic Notation
 - Convert between logarithmic and exponential forms
 - Evaluate a logarithm without a calculator
 3. Graphs of Logarithmic Functions
 - Identify and graph transformations of logarithmic functions
 - Compare and contrast the graphs of logarithmic functions containing different bases
 - Graph logarithmic functions
 4. Logarithm Rules and Solving Logarithmic Equations
 - Expand a logarithmic expression
 - Rewrite a multi-term logarithmic expression as a single logarithm
 - Solve logarithmic equations
 - Solve logarithmic equations containing composite functions of logarithms
 5. Solving Exponential Equations
 - Solve exponential equations, including those containing powers with different bases
 - Solve exponential equations in quadratic form
 - Use the change of base formula to evaluate a logarithm with a calculator
 6. Piecewise Functions
 - Evaluate a piecewise function
 - Write the equation of a piecewise function
 - Graph a piecewise function
 - Identify discontinuities in the graph of a piecewise function
 7. Exponential, Logarithmic, Piecewise Fcns. Review
 - Review concepts from the unit in preparation for completing the unit test
 8. Exponential, Logarithmic, Piecewise Functions Test
 - Review semester topics, concepts, and processes

6. Conic Sections

1. Analytic Geometry
 - Apply the distance and midpoint formulas to find the distance and midpoint between two points on the coordinate plane
 - Prove geometric relationships among points and lines using analytical methods
2. Introduction to Conic Sections
 - Recognize circles, ellipses, parabolas, and hyperbolas
 - Use the general equation of a conic section to identify the conic section
3. Circles

- Write the equation of a circle in both standard form and general form and identify its center and radius
- Graph a circle when given both the standard and general form and identify its center and radius
- Use circles to model and solve problems in real-world scenarios

4. Ellipses

- Graph an ellipse when given both the standard and general forms, and recognize its center, vertices, and foci
- Write the equation of an ellipse in both standard form and general form and identify its center, vertices, and foci
- Write and graph the equation of an ellipse when provided center, vertices, and foci
- Use ellipses to model and solve problems in real-world scenarios

5. Parabolas

- Write and graph the equation of a parabola when provided the vertex and focus
- Graph a parabola when given both the standard and general forms of the equation, and recognize its focus and directrix
- Write the equation of a parabola in both standard form and general form and identify its focus and directrix
- Use parabolas to model and solve problems in real-world scenarios

6. Hyperbolas

- Graph a hyperbola when given both its standard and general form, and recognize its vertices, foci, and asymptotes
- Write the equation of a hyperbola in both standard form and general form and identify its center, vertices, foci, and asymptotes
- Write and graph the equation of an ellipse when its center, vertices, and foci are provided
- Use hyperbolas to model and solve problems in real-world scenarios

7. Conic Sections Review

- Review concepts from the unit in preparation for completing the unit test

8. Conic Sections Test

- Determine the equation for a conic section from its locus
- Analyze and graph quadratic equations
- Model real-world scenarios with conic sections

7. Sequences and Series

1. Sequences

- Find the first five terms of a sequence defined explicitly
- Find the first five terms of a sequence defined recursively
- Apply factorial notation

2. Arithmetic Sequences

- Determine whether or not a sequence is arithmetic
- Find a formula for an arithmetic sequence
- Use an arithmetic sequence to model a real-world scenario

3. Terms of an Arithmetic Sequence
 - Find a specific term and find the n th term of an arithmetic sequence
 - Find the first term of an arithmetic sequence given another term and the common difference
 - Determine the missing terms of an arithmetic sequence using the arithmetic mean
 - Use an arithmetic sequence to model a real-world scenario
4. Finite Arithmetic Series
 - Find the sum of the first n terms of an arithmetic sequence
5. Arithmetic Series Summation Formulas
 - Use summation formulas to evaluate a partial sum of an arithmetic sequence
 - Express a given arithmetic series in summation notation
 - Identify and use the properties of summations
 - Use summation formulas to evaluate sigma expressions
6. Equations of a Geometric Sequence
 - Determine if a sequence is arithmetic, geometric, or neither
 - Find the first five terms of a geometric sequence
 - Use a geometric sequence to model a real-world scenario
7. Terms of a Geometric Sequence
 - Find the n th term of a geometric sequence
 - Find the first term and common ratio given any two terms of a geometric sequence
 - Determine the missing terms of a geometric series using the geometric mean
 - Use a geometric sequence to model a real-world scenario
8. Convergent and Divergent Sequences and Series
 - Determine if a series is convergent or divergent
9. Finite Geometric Series
 - Find the sum of the first n terms of a geometric sequence
10. Infinite Geometric Series
 - Find the sum of an infinite geometric series
11. Sequences and Series Review
 - Review concepts from the unit in preparation for completing the unit test
12. Sequences and Series Test
 - Distinguish between arithmetic and geometric sequences
 - Define sequences and series in terms of functions (notation, range, domain, general term)
 - Apply sigma and factorial notation to a series
 - Determine convergence and divergence of a series and calculate sums of convergent series
 - Model real-world patterns and situations with recursive relationships, sequences, and series

8. Semester Review and Exam

1. Semester Review
 - Review semester topics, concepts, and processes

2. Semester Exam

Semester B Summary:

This is the second of two courses that comprise Honors Precalculus. In this course, the student will continue to study higher-level mathematics. The student will expand knowledge of trigonometric concepts, including trigonometric functions and identities, before being introduced to polar coordinates and equations. Next, the student will explore vectors and parametric equations. Finally, the student will examine calculus concepts including limits and derivatives in preparation for studying calculus.

A semester-long project will give the Honors Precalculus student the opportunity to apply math in an engineering setting. The student will devote time during each unit to work on this project and submit the final product before the semester review unit.

A content thread throughout the course focuses on ways mathematics is applied in the real world and is essential to everyday life. These real-world connections, combined with an emphasis on mathematical reasoning and critical thinking skills, prepare the student for future college and career opportunities.

Semester B Outline

1. Introduction to Trigonometry

1. Right Triangle Trigonometry
 - Identify trigonometric ratios on a given right triangle
 - Apply trigonometric ratios to find missing side lengths of right triangles
 - Use complementary angles to demonstrate the relationship between a trigonometric function and its cofunction
2. Solving Right Triangles
 - Apply trigonometric ratios to find all missing sides and angles of a right triangle
3. Angle Measurements
 - Differentiate between degree and radian measures
 - Convert angle measurements between degrees and radians
 - Use the concept of arc length to develop the relationship between degree and radian measures
4. The Unit Circle
 - Identify the standard position of an angle on the coordinate plane
 - Use the unit circle and right triangles to define and evaluate trigonometric functions of real numbers
5. Special Right Triangles
 - Identify relationships of side lengths in special triangles
 - Develop the values of trigonometric functions at special angles in both radians and degrees
6. Trigonometric Functions in Quadrants I–IV
 - Identify the reference angle of an angle in standard position on the unit circle
 - Identify the relationship between the values of trigonometric functions in each quadrant of the unit circle
 - Evaluate trigonometric functions of quadrantal angles in any position

7. Introduction to Trigonometry Review
 - Review concepts from unit in preparation for completing the unit test
8. Introduction to Trigonometry Test
 - Use the unit circle and right triangles to define and evaluate trigonometric functions of real numbers.
 - Use degree and radian measures for angles and convert between them.
 - Develop the values of trigonometric functions at special angles in both radians and degrees.
9. Honors Geodesy Odyssey Project
 - Describe geodesy, a branch of applied mathematics and earth science
 - Review the project topic and schedule

2. Trigonometric Functions

1. Graphs of Trigonometric Functions
 - Graph trigonometric functions on the coordinate plane using a table of values
2. Domain and Range of Trigonometric Functions
 - Determine the domain and range of trigonometric functions
3. Behavior of Trigonometric Functions
 - Describe the behavior of the trigonometric functions, including periodicity, amplitude, zeroes, asymptotes, and symmetries
 - Use periodic and even and odd identities to find values of trigonometric functions
4. Properties of Trigonometric Functions
 - Identify and interpret amplitude, frequency, period, and vertical and phase shift
5. Graphing Transformations of Trigonometric Function
 - Graph transformations of trigonometric functions
 - Compare and contrast characteristics of trigonometric functions with transformations of other families of functions
6. Writing Equations of Trigonometric Functions
 - Write the equation of a trigonometric function by identifying the properties and behavior of its graph
7. Modeling with Trigonometric Functions
 - Write and graph a trigonometric function that accurately models a real-world scenario
8. Inverse Trigonometric Functions
 - Use domain restriction to make trigonometric functions invertible
 - Graph inverse trigonometric functions on the coordinate plane
 - Evaluate inverse trigonometric functions at real-number values
9. Composition of Trigonometric Functions
 - Compose two given trigonometric functions
 - Use composition of functions to verify inverse trigonometric functions
10. Applications of Trigonometric Functions
 - Solve real-world problems with trigonometric functions

11. Trigonometric Functions Review

- Review concepts from this unit in preparation for completing the unit test

12. Trigonometric Functions Test

3. Trigonometric Identities and Applications

1. Trigonometric Identities

- Identify reciprocal, quotient, and Pythagorean identities
- Use the fundamental identities to verify other identities and to simplify trigonometric expressions

2. Sum and Difference Formulas

- Develop and apply the sum and difference formulas to simplify trigonometric expressions
- Use the sum and difference formulas to find exact values of trigonometric expressions
- Use the sum and difference formulas to verify trigonometric identities

3. Double-Angle Formulas

- Develop and apply double-angle formulas to simplify trigonometric expressions, find exact values, and verify trigonometric identities

4. Law of Sines

- Prove and apply the Law of Sines
- Identify conditions necessary for zero, one, or two triangles

5. Law of Cosines

- Prove and apply the Law of Cosines

6. Trigonometric Equations

- Solve trigonometric equations and interpret them graphically.

7. Trigonometric Identities and Applications Review

- Review concepts from this unit in preparation for completing the unit test

8. Trigonometric Identities and Applications Test

4. Polar Coordinates and Functions

1. Polar Coordinates

- Locate and plot points in the polar coordinate system
- Identify additional representations of a point in polar form
- Convert coordinates between rectangular and polar forms

2. Polar Equations

- Convert equations between rectangular and polar form

3. Graphs of Polar Equations

- Graph a polar equation using point plotting
- Identify graphs of polar equations of circles
- Write polar equations of a circle given its graph
- Use polar symmetry tests to determine if the graph is symmetric about the x-axis, the y-axis, or the origin

4. Conic Sections in Polar Coordinates

- Identify and graph the polar equations of conic sections
- 5. Limaçons
 - Identify the graphs of limaçons
 - Identify and graph the polar equations of limaçons
- 6. Rose Curves and Lemniscates
 - Identify the graph and equation of a rose curve expressed in polar form
 - Identify the graph and equation of a lemniscate curve in polar form
- 7. Complex Numbers in Polar Form
 - Convert complex numbers between rectangular and polar forms
- 8. Operations of Complex Numbers in Polar Form
 - Find the product of complex numbers in polar form
 - Find the quotient of complex numbers in polar form
- 9. DeMoivre's Theorem
 - Prove and apply DeMoivre's Theorem
 - Find powers of complex numbers in polar and rectangular form
 - Find roots of complex numbers in polar and rectangular form
- 10. Polar Coordinates and Functions Review
 - Review concepts from the unit in preparation for completing the unit test
- 11. Polar Coordinates and Functions Test

5. Vectors

1. Representing Vectors
 - Represent vectors geometrically and in component form
 - Determine the components of a vector
 - Find the magnitude of a vector
 - Determine whether two vectors are equal
2. Operations with Vectors
 - Represent operations on vectors geometrically
 - Perform vector addition and subtraction and find the resultant vector
 - Perform scalar multiplication
3. Unit Vectors
 - Represent vectors in the rectangular coordinate system in terms of i and j
 - Find a unit vector
4. Direction Angle
 - Find the direction angle of a vector
 - Represent a vector in terms of magnitude and direction
5. Dot Product
 - Find the dot product of two vectors
 - Apply the properties of the dot product

6. Angle Between Two Vectors

- Use the alternative form of the dot product to find the angle between two vectors
- Use the dot product to determine if two vectors are orthogonal, parallel, or neither
- Use the dot product to solve real-world problems

7. Vectors Review

- Review concepts from this unit in preparation for completing the unit test

8. Vectors Test

6. Parametric Functions

1. Plane Curves and Parametric Functions

- Analyze plane curves in parametric form

2. Plotting Points and Eliminating the Parameter

- Graph plane curves by plotting points
- Graph plane curves by eliminating the parameter
- Graph plane curves by solving for x or y

3. Using Trigonometric Identities

- Graph plane curves by using trigonometric identities
- Identify advantages of using parametric equations

4. Finding Parametric Equations

- Find parametric equations for functions
- Analyze different parametric equations for the same functions

5. Polar and Parametric Equations

- Convert between polar and parametric forms

6. Modeling Linear and Projectile Motion

- Model linear and projectile motion using parametric equations

7. Parametric Functions Review

- Review concepts from the unit in preparation for completing the unit test

8. Parametric Functions Test

7. Looking Ahead to Calculus

1. Limit of a Function

- Apply the definition of a limit of a function to specific examples
- Determine the limit of a function for a given value using various methods

2. Properties of Limits

- Use the properties of limits to find limits of functions

3. Continuity of Functions and Limits

- Use the criteria for continuity to determine if a function, f , is continuous at a

4. Rate of Change

- Define the instantaneous rate of change of a function at a point

- Find the slope of a tangent line at a given point on a curve
- Write the equation of a tangent line
- Define the derivative of a function, f , at $x = a$.

5. Applications of the Derivative

- Solve real-world problems involving the derivatives of functions
- Find average and instantaneous velocity of an object in motion
- Use the velocity of an object to find its acceleration

8. Semester Review and Exam

1. Semester Review
 - Review semester topics, concepts, and processes
2. Semester Exam

Calculus

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

Calculus A introduces limits, differentiation, and applications of differentiation. The student will find and evaluate finite and infinite limits graphically, numerically, and analytically. The student will find derivatives using a variety of methods including the chain rule and implicit differentiation. Then the student will use the first derivative test and the second derivative test to analyze and sketch functions. Finally, the student will find derivatives using a variety of methods including substitution.

Semester A Outline

1. Course Overview

1. Getting Started in Calculus

- Analyze the structure and content of the Calculus course
- Identify course expectations and how to be successful in the course
- Identify the materials you will use

2. Prerequisites for Calculus

1. Linear Functions

- Model and solve problems involving linear functions
- Determine the slope of a line through two points
- Use point-slope and slope-intercept forms to write and graph linear equations
- Apply the properties of parallel and perpendicular lines to solve problems
- Determine solutions for pairs of linear equations simultaneously

2. Functions and Graphs

- Use the language, notation, and graphical representation of functions to express relationships between variable quantities
- Analyze functions and their properties, including domain, range, and symmetry, and even and odd functions
- Graph functions in the coordinate plane
- Graph and analyze piecewise-defined and absolute value functions
- Evaluate and simplify compositions of functions

3. Exponential Functions

- Analyze exponential functions and equations graphically, numerically, and algebraically
- Solve problems involving exponential growth and decay
- Solve compound interest and continuous compound interest problems

4. Inverse Functions and Logarithms

- Analyze relations and their inverses algebraically and graphically
- Find inverses of one-to-one functions graphically and algebraically
- Analyze logarithmic functions algebraically, graphically, and numerically as inverses of exponential functions
- Use logarithms and their properties to solve exponential equations algebraically

5. Trigonometric Functions

- Apply transformations of trigonometric functions to solve problems
- Solve trigonometric equations graphically and algebraically
- Graph and analyze sinusoidal functions and their properties (domain, range, symmetry, amplitude, period, frequency) with and without technology
- Evaluate inverse trigonometric functions
- Evaluate the trigonometric functions for any angle

3. Limits and Continuity

1. Overview of Limits

- Determine average and instantaneous rates of change using the idea of limits
- Estimate limits from information given in tables and graphs

2. Using Properties of Limits

- Use properties of limits to calculate limits
- Find right- and left-hand limits
- Use the Squeeze Theorem or algebraic manipulation to find a limit

3. Limits Involving Infinity

- Calculate limits involving infinity
- Use limits to determine end behavior of functions

4. Continuity and Discontinuity

- Find the points at which a function is continuous and discontinuous
- Determine intervals over which a function is continuous
- Apply continuity to calculus theorems

5. Secant Lines and Average Rate of Change

- Find average rates of change
- Use secant lines to calculate average rates of change
- Apply concepts learned to solve real-world problems involving average rates of change and secant lines

6. Tangent Lines and Instantaneous Rate of Change

- Find instantaneous rates of change
- Use tangent lines to calculate instantaneous rates of change
- Apply concepts learned to solve real-world problems involving instantaneous rates of change and tangent lines

7. Unit Review

- Calculate limits of functions at a point and interpret their meaning
- Calculate limits of functions at infinity and interpret their meaning
- Calculate infinite limits of functions and interpret their meaning
- Identify intervals of continuity and points of discontinuity for a function
- Apply the concept of slope to tangent lines and rates of change

8. Unit Test

- Calculate limits of functions at a point and interpret their meaning
- Calculate limits of functions at infinity and interpret their meaning
- Calculate infinite limits of functions and interpret their meaning
- Identify intervals of continuity and points of discontinuity for a function
- Apply the concept of slope to tangent lines and rates of change

4. Derivatives

1. Using the Definition of a Derivative

- Use the definition of a derivative to find the derivative of a differentiable function
- Use the alternate definition of a derivative to find the derivative at a point

2. Graphs of Derivatives

- Identify the graph of the derivative of a function shown graphically

3. Differentiability at a Point

- Determine points at which a function is not differentiable

4. Differentiability on an Interval

- Determine intervals on which a function is differentiable

5. The Intermediate Value Theorem for Derivatives

- Use the Intermediate Value Theorem to determine differentiability

6. Numerical Derivatives

- Use numerical derivatives to approximate the derivative at a point

7. Using Differentiation Rules

- Use differentiation rules to find derivatives
- Use rules for differentiation to find higher-order derivatives
- Use rules for differentiation to find slopes and equations of tangent lines at a point

8. Rates of Change

- Find instantaneous rates of change
- Solve problems involving rectilinear motion
- Solve free-fall and projectile motion problems

9. Derivatives of Trigonometric Functions

- Find derivatives involving trigonometric functions
- Solve simple harmonic motion problems (speed, acceleration, jerk)
- Use rules for differentiation to find slopes and equations of tangent lines at points of a sinusoidal function

10. Unit Review

- Determine the conditions necessary for a function to be differentiable
- Use the definition of a derivative to find derivatives of differentiable functions and derivatives at a point
- Apply the Intermediate Value Theorem for derivatives
- Apply differentiation rules to find derivatives of functions
- Solve problems involving rates of change

11. Unit Test

- Determine the conditions necessary for a function to be differentiable
- Use the definition of a derivative to find derivatives of differentiable functions and derivatives at a point
- Apply the Intermediate Value Theorem for derivatives
- Apply differentiation rules to find derivatives of functions
- Solve problems involving rates of change

5. Mid-Semester Check

1. Mid-Semester Review

- Calculate limits at a point and at infinity, and calculate infinite limits involving graphs and function equations
- Identify points and intervals of continuity (including the Intermediate Value Theorem)
- Determine intervals over which a function is differentiable or nondifferentiable from graphs and function equations
- Find derivatives of functions and use them to solve problems
- Solve problems involving slopes of tangent lines and rates of change

2. Mid-Semester Check

- Calculate limits at a point, at infinity, and infinite limits involving graphs and function equations
- Identify points and intervals of continuity (including the Intermediate Value Theorem)
- Determine intervals over which a function is differentiable or non-differentiable, from graphs and function equations
- Find derivatives of functions and use them to solve problems
- Solve problems involving slopes of tangent lines and rates of change

6. More Derivatives

1. The Chain Rule

- Use the Chain Rule to differentiate compositions of two or more functions
- Use the Chain Rule in conjunction with the Product and Quotient Rules to differentiate functions

2. Applications of the Chain Rule

- Find and interpret a derivative using the Chain Rule in the context of a model
- Find the equation of a tangent or normal line at a point on the graph of a function

3. Implicit Differentiation

- Use the Chain Rule to differentiate both sides of an equation that defines a function implicitly
- Use implicit differentiation to compute the slope of a tangent line to the graph of an equation at a given point

4. Applications of Implicit Differentiation

- Use implicit differentiation to find higher-order derivatives of implicitly defined functions

5. Derivatives of Inverse Trigonometric Functions

- Find derivatives of invertible functions and their inverses
- Find derivatives of functions involving inverse trigonometric functions

6. Derivatives of Exponential Functions

- Find derivatives of exponential functions

7. Derivatives of Logarithms

- Find derivatives of functions involving logarithms

8. Logarithmic Differentiation

- Use logarithmic differentiation to find derivatives of functions

9. Unit Review

- Use the Chain Rule to find derivatives of composite and implicitly defined functions
- Determine derivatives of inverse trigonometric functions
- Determine derivatives of exponential functions
- Determine derivatives of logarithmic functions
- Use implicit differentiation to find derivatives of implicitly defined functions and solve problems

10. Unit Test

- Use the Chain Rule to find derivatives of composite and implicitly defined functions
- Determine derivatives of inverse trigonometric functions
- Determine derivatives of exponential functions
- Determine derivatives of logarithmic functions
- Use implicit differentiation to find derivatives of implicitly defined functions and to solve problems

7. Applications of Derivatives

1. Extreme Values of Functions

- Determine the maximum or minimum value of a function over a given interval using derivatives
- Use the Extreme Value Theorem to analyze functions

2. Mean Value Theorem

- Describe the behavior of a function over an interval using the Mean Value Theorem
- Apply the concept of antiderivatives to solve real-world problems

3. Connecting Derivatives of f with the Graph of f

- Describe functions in terms of characteristics (slope, concavity, inflection points)
- Analyze the properties of functions using derivatives

4. More Function Analysis Using Derivatives

- Describe functions in terms of characteristics (slope, concavity, inflection points)
- Analyze the properties of functions using derivatives
- Document relationships between graphs of a function, its first derivative, and its second derivatives

5. Modeling and Optimization

- Develop models of real-world situations expressed in terms of mathematical functions
- Solve optimization problems using derivatives

6. Linearization, Sensitivity, and Differentials

- Solve problems involving the slopes of tangent lines
- Develop linear and quadratic approximations for functions in the vicinity of a given point
- Evaluate sensitivities using differentials
- Determine approximate zeros of functions using Newton's Method

7. Related Rates

- Create equations that relate known rates of change to unknown rates of change
- Solve problems involving rates of change in applied contexts

8. Unit Review

- Identify local and global extreme values of a function
- Identify intervals over which a continuous function is increasing, decreasing, or constant
- Relate the graph of a function with the graphs of its first and second derivatives
- Apply the Mean Value Theorem to solve problems
- Solve problems involving related rates

9. Unit Test

- Identify local and global extreme values of a function
- Identify intervals over which a continuous function is increasing, decreasing, or constant
- Relate the graph of a function with the graphs of its first and second derivatives
- Apply the Mean Value Theorem to solve problems
- Solve problems involving related rates

8. Semester Review and Exam

1. Semester Review

- Use limits at a point, limits at infinity, and limits involving infinity to interpret function behavior
- Use limits to determine continuity at a point and over intervals in the domain of a function
- Find derivatives using the definition of derivatives and derivative formulas
- Analyze function behavior using first and higher-order derivatives
- Use derivatives to solve problems involving optimization, related rates, and instantaneous rates of change
- Use the Mean Value Theorem to analyze the behavior of a differentiable function over an interval in its domain
- Find functions that have a given derivative

2. Semester Exam

- Use limits at a point, limits at infinity, and limits involving infinity to interpret function behavior
- Use limits to determine continuity at a point and over intervals in the domain of a function
- Find derivatives using the definition of derivatives and derivative formulas
- Analyze function behavior using first and higher-order derivatives
- Use derivatives to solve problems involving optimization, related rates, and instantaneous rates of change
- Use the Mean Value Theorem to analyze the behavior of a differentiable function over an interval in its domain
- Find functions that have a given derivative

Semester B Summary:

Calculus B introduces integration of functions, differential equations, and applications of integration. The student will calculate antiderivatives using a variety of methods including substitution. The student will evaluate integrals using a variety of methods including numerical integration. Then the student will understand and apply Riemann sums, definite integrals, and the Fundamental Theorem of Calculus. In particular, the student will differentiate and integrate logarithmic, exponential, and inverse trigonometric functions. The student will solve simple differential equations, which can be solved by separation of variables, and use the calculations to solve applied problems. The student will use integration to determine the area between two curves, volume, and surface area. Finally, the student will apply integration to determine work, center of mass, and fluid force.

Semester B Outline

1. Limits and Differentiation Review

1. Limits and Continuity

- Review the interpretation, estimation, and determination of limits of function values
- Review the interpretation, estimation, and determination of infinite limits and limits at infinity
- Review the analysis of functions to find intervals of continuity and points of continuity, and the determination of the applicability of the Intermediate Value Theorem

2. Rates of Change, Tangent Lines, and Derivatives

- Review the use of limits to determine instantaneous rates of change, slopes of tangent lines, and sensitivity to change
- Review the computation of the derivative of a function at a point using both forms of limit definitions, and explain its relationship to slope
- Review the analysis of the differentiability of functions and the rules for differentiation
- Review the interpretation of derivatives as representing rates of change

3. Using Differentiation Rules

- Review the differentiation of composite functions using the Chain Rule
- Review the determination of derivatives of implicitly defined functions
- Review the derivatives of inverse trigonometric, exponential, and logarithmic functions
- Review the determination of various properties of functions using the Extreme Value Theorem and Mean Value Theorem
- Review the use of derivatives to solve optimization problems and problems involving the slope of the tangent line

2. The Definite Integral

1. Estimating with Finite Sums

- Estimate areas under curves using rectangular approximation methods
- Estimate distances, volumes, and accumulations using finite sums

2. Definite Integrals and Antiderivatives I

- Write the limit of a Riemann sum as a definite integral
- Express the limit of a Riemann sum in integral notation
- Calculate a definite integral using areas and properties of definite integrals
- Interpret the meaning of a definite integral within a problem
- Apply definite integrals to problems involving area and volume

3. Antiderivatives

- Compute indefinite integrals

4. Definite Integrals and Antiderivatives II

- Calculate and apply integrals of piecewise constant and linear functions
- Determine the average value of a function using integrals
- Justify and apply the Mean Value Theorem for Definite Integrals
- Establish and apply the connections between differential and integral calculus

5. Fundamental Theorem of Calculus I

- Analyze functions defined by an integral

- Evaluate definite integrals using antiderivatives

6. Fundamental Theorem of Calculus II

- Determine areas analytically using definite integrals
- Analyze antiderivatives graphically

7. Trapezoidal Rule

- Justify and apply trapezoidal approximations to integrals
- Justify and apply other numerical approximations and compare results to the Trapezoidal Rule
- Determine the bounded error in the Trapezoidal Rule

8. Unit Review

- Write the limit of a Riemann sum in integral notation and find definite integrals using area
- Apply the rules for definite integrals to evaluate definite integrals
- Apply the Fundamental Theorem of Calculus to find antiderivatives
- Apply the evaluation part of the Fundamental Theorem of Calculus to evaluate definite integrals
- Use the Trapezoidal Rule to approximate areas under a curve

9. Unit Test

- Write the limit of a Riemann sum in integral notation and find definite integrals using area
- Apply the rules for definite integrals to evaluate definite integrals
- Apply the Fundamental Theorem of Calculus to find antiderivatives
- Apply the evaluation part of the Fundamental Theorem of Calculus to evaluate definite integrals
- Use the Trapezoidal Rule to approximate areas under a curve

3. Differential Equations and Mathematical Modeling

1. Introduction to Differential Equations

- Determine if a given function is a solution to a differential equation
- Solve exact differential equations and initial value problems
- Identify the domain on which a solution to an initial value problem is valid

2. Slope Fields

- Use a slope field to approximate the graph of a solution of a differential equation
- Generate a slope field for a given differential equation

3. Integration by Substitution

- Use the method of substitution to find antiderivatives

4. Other Integration Techniques

- Evaluate integrals using other integration techniques
- Use L'Hospital's Rule to evaluate limits in indeterminate form

5. Separable Differential Equations

- Solve separable differential equations

6. Modeling with Differential Equations

- Use differential equations to model exponential growth and decay

7. Unit Review

- Determine if a given function is a solution to a differential equation
- Determine general and particular solutions to a differential equation
- Solve initial value problems
- Identify the domain on which a solution to an initial value problem is valid
- Generate a slope field for a given differential equation
- Use a slope field to approximate the graph of a solution of a differential equation
- Compute indefinite integrals

8. Unit Test

- Use substitution methods to evaluate definite and indefinite integrals
- Evaluate definite integrals using a calculator
- Determine general and particular solutions to a differential equation
- Solve initial value problems
- Solve separable differential equations and apply them to solving problems relating to exponential growth and decay

4. Mid-Semester Check

1. Mid-Semester Review

- Apply finite-sum methods to approximate areas under curves and other quantities represented by definite integrals
- Apply the Fundamental Theorem of Calculus to find antiderivatives and evaluate definite integrals
- Apply rules for definite integrals and substitution methods to evaluate definite and indefinite integrals
- Evaluate definite integrals using a calculator
- Determine general and particular solutions to a differential equation and apply them to solving problems

2. Mid-Semester Check

- Apply finite-sum methods to approximate areas under curves and other quantities represented by definite integrals
- Apply the Fundamental Theorem of Calculus to find antiderivatives and evaluate definite integrals
- Apply rules for definite integrals and substitution methods to evaluate definite and indefinite integrals
- Evaluate definite integrals using a calculator
- Determine general and particular solutions to a differential equation and apply them to solving problems

5. Applications of Definite Integrals

1. Introduction to Accumulation and Net Change

- Apply definite integrals to linear-motion problems involving displacement and total distance
- Justify and apply a general strategy for modeling with integrals

2. Applications of Accumulation and Net Change

- Use definite integrals to solve problems involving accumulation
- Find net changes given graphical, tabular, or functional representations of rate of change

- Determine the total amount of a quantity given a density-vs-location function
- Determine the net work done given the force as a function of distance

3. Areas in the Plane I

- Interpret areas as limits of Riemann sums
- Apply the definite integral to solve problems involving areas
- Determine areas between curves over a given x-interval
- Determine areas enclosed by intersecting curves

4. Areas in the Plane II

- Determine areas for regions bounded by more than one function
- Determine areas of regions more easily described by functions of y than x
- Determine areas of regions in cases where geometry formulas can be used to expedite the process

5. Introduction to Volumes

- Interpret volumes as limits of Riemann sums
- Apply the definite integral to solve problems involving volumes
- Determine volumes of solids with known cross sections

6. Circular Cross-Sections

- Determine volumes of solids of revolution using disks and washers

7. Cylindrical Shells

- Determine volumes of solids of revolution using cylindrical shells

8. Unit Review

- Solve problems involving accumulation and net change
- Apply definite integrals to determine areas in the coordinate plane
- Apply definite integrals to determining volume of three-dimensional solids
- Integrate with respect to y to solve area and volume problems determined by functions of y

9. Unit Test

- Solve problems involving accumulation and net change
- Apply definite integrals to determine areas in the coordinate plane
- Apply definite integrals to determining volume of three-dimensional solids
- Integrate with respect to y to solve area and volume problems determined by functions of y

6. Semester Project: Response to a Letter

1. Letter from a Client

- Analyze a real-world problem that has more than one solution

2. Research Solutions

- Analyze a real-world problem that has more than one solution

3. Presentation of Findings

- Analyze a real-world problem that has more than one solution

7. Semester Review and Exam

1. Integrals and Differential Equations

2. Semester Review

- Use Riemann sums to approximate areas under a curve and, as limiting cases, find definite integrals
- Apply the Fundamental Theorem of Calculus to find antiderivatives and evaluate definite integrals
- Determine general and particular solutions to a differential equation
- Apply differential equations and their solutions to exponential growth and decay problems
- Apply definite integrals to determining accumulations, net changes, areas, and volumes

3. Semester Exam

- Use Riemann sums to approximate areas under a curve and, as limiting cases, find definite integrals
- Apply the Fundamental Theorem of Calculus to find antiderivatives and evaluate definite integrals
- Determine general and particular solutions to a differential equation
- Apply differential equations and their solutions to exponential growth and decay problems
- Apply definite integrals to determining accumulations, net changes, areas, and volumes

Consumer Math

Consumer Math A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary:

This is the first of two courses that comprise Consumer Math. In this course, the student will learn that money is lost or gained depending upon the information a consumer has to help him make informed decisions. Retailers, banks, and credit card companies may not provide consumers with all the information they need to make good decisions. By the end of this course, the student will understand the history of money, define fixed costs and discretionary spending, understand the importance of savings, and recognize the dangers of debt. This course will ask the student to look hard at his financial choices including spending patterns, purchasing motivations, and how to make some difficult decisions.

Semester A Outline

1. Money and Spending

1. The History of Money: Introducing Trade
 - Explore how the need for trade led to bartering and eventually the development of currency
 - Trace the history of money across the centuries
 - Compute a basic exchange
2. History of Money: Using Metal & Paper as Currency
 - Justify the development of metal and paper currencies
 - Explore how exchanges occur in current economies
 - Compute basic money exchange problems
3. History of Money Activity: Exchanging Currency
 - Discover how currency values are established globally
 - Determine where to find exchange rates
 - Use currency exchange formulas to compute values
4. Department Store Sales
 - Explore how money is used in shopping
 - Determine what items fit within a limited amount of money
5. Calculating Change and Discounts
 - Explore how money is used in shopping
 - Calculate how to save money by using discounts and sales
6. The Department Store: Getting the Best Deal

- Compare the results of using two different buying scenarios
 - Calculate how you can save money by using discounts and sales
7. History of Money and Department Store
 - Calculate exchange rates using multiplication of decimals
 - Compare the results of using two different buying scenarios
 - Calculate how you can save money by using discounts and sales
 8. The Grocery Store
 - Use multiplication to quickly calculate a total
 - Calculate the cost of a single item by using division
 9. The Grocery Store: Shopping with Coupons
 - Use multiplication to quickly calculate a total
 - Calculate the cost of a single item by using division
 - Add and subtract money in order to compare cost savings
 10. The Electronics Store: Percentages and Sales Tax
 - Use a percentage discount to calculate savings
 - Compute how sales tax increases the amount you pay for something
 11. The Electronics Store: Online vs In-Store Savings
 - Use a percentage discount to compare savings
 - Review the use of percentages, adding and subtracting money, and discounts
 12. What's My Total Bill?
 - Use various methods of discounting to compare savings
 - Compute two different scenarios each for a grocery store and electronics store purchase
 13. The Outlet Mall
 - Explore real-world examples of effective shopping
 - Calculate the impact of discounts and taxes on a total payment
 14. Unit Review
 - Review some of the early history of money
 - Complete problems involving foreign exchange rates
 - Compare savings using coupons or percentage discounts
 15. Unit Test
2. **Controlling Expenses**
 1. The Restaurant: The Bill
 - Use estimation to calculate the total bill before ordering
 - Calculate the individual items that go into the restaurant's "grand total"
 2. Discounts and Tip
 - Use percentages in order to calculate sales tax and tip
 - Complete calculations to determine the total cost of a restaurant visit
 3. Paying Retailers

- Examine different ways of paying for something
 - Consider the advantages and disadvantages of paying with cash, debit cards, checks, and credit cards
4. Cash, Check, or Charge
- Examine different ways of paying for something
 - Consider the advantages and disadvantages of paying with cash, debit cards, checks, and credit cards
5. Controlling Your Checkbook
- Calculate purchases including discounts and sales tax
 - Complete entries in a checkbook register and submit the completed entries as a part of the portfolio
6. Reviewing and Paying the Power Bill
- Analyze the information on a customer statement such as a bill
 - Use steps for calculating a bill in order to pay by check
7. Time to Pay the Power Bill
- Analyze the information on a customer statement such as a bill
 - Use steps for calculating a bill in order to pay by check
 - Calculate the cost of various plans and their benefits
8. Comparing Choices
- Calculate savings on various plans
 - Compare plans and determine the best choice for a given situation
9. Estimating Your Expenses
- Tally monthly expenses
 - Learn to estimate expenses that vary from month to month
 - Calculate monthly expenses and make a savings plan
10. Other Types of Expenses
- Tally monthly expenses
 - Learn to estimate expenses that vary from month to month
 - Calculate monthly expenses and make a savings plan
11. Receipts, Bills, and Estimates, Oh My!
- Calculate how much money is earned when working
 - Compute the amount of time worked and how that translates into wages
12. Interest Rates
- Calculate how much money is earned when working
 - Identify key information for calculating interest earned
13. Time is Money
- Calculate wages earned
 - Compute the amount of time saved with interest earned
14. Unit Review

- Calculate problems using estimation
- Compute wages using multiplication of decimals
- Determine “time saved” through analyzing interest rates

15. Unit Test

3. Finances: Income and Debt

1. Hourly vs. Salaried

- Explain the differences between gross pay and net income
- Identify the differences between a salaried employee and an hourly employee
- Calculate the gross pay differences based on hourly wage rates and salary information

2. Withholdings

- Explain the differences between gross pay and net income
- Identify the differences between a salaried employee and an hourly employee
- Calculate the gross pay and net pay differences based on various deductions

3. How Much Money Do I Spend?

- Recognize the difference between fixed expenses and discretionary spending
- Explore the importance of savings in planning a healthy financial future

4. Discretionary and Fixed Expenses

- Recognize the difference between fixed expenses and discretionary spending
- Calculate savings based on income and expenses

5. Am I Financially Healthy? Planning

- Explore the problems caused by spending more than you make
- Define surplus and deficit as applied to personal spending
- Calculate fixed expenses and discretionary income

6. Buyer Beware

- Explore the problems caused by spending more than you make
- Define surplus and deficit as applied to personal spending
- Calculate the true cost of some special finance deals

7. CD Investments

- Explore the problems caused by spending more than you make
- Compute interest on savings using online CD calculators

8. Saving Is Stability: Controlling Spending

- Identify the long-term benefits of following a savings plan
- Explore some of the roadblocks to savings—and see how to overcome them
- Calculate interest on savings accounts versus credit cards

9. Spendaholics

- Identify the long-term benefits of following a savings plan
- Explore some of the roadblocks to savings—and see how to overcome them
- Calculate the impact of choice on savings

10. How Much Have I Saved?

- Explore how banks determine their interest rates
- Calculate interest payments on a savings account based on annual, monthly and daily periods

11. Debt Is Dangerous: Pay More Than the Minimum

- Explain the danger of carrying debt
- Explore how credit card companies and banks determine their interest rates
- Calculate interest payments based on a variety of different payment options

12. Don't Be a Doris

- Explain the danger of carrying debt
- Explore how credit card companies and banks determine their interest rates
- Calculate interest payments based on whole-year, half-year, and quarter-year periods

13. Debt Is Dangerous

- Explain the danger of carrying debt
- Explore how credit card companies and banks determine their interest rates
- Calculate monthly interest earned in a savings account

14. Unit Review

- Calculate the cost of an item using sales tax and interest charges
- Compute the equivalent work hours for purchasing a good
- Review concepts taught in Lessons 1–13 of the unit

15. Unit Test

4. Dealing with Debt

1. Debt Ratio

- Use percentages to determine the maximum amount of money that should be spent on housing costs
- Calculate how to increase savings by reducing expenses

2. Necessity or Luxury

- Calculate the impact of luxury items on debt ratios
- Learn how to increase your savings by reducing your expenses

3. When Debt Is Acceptable: Secured vs. Unsecured

- Identify the difference between secured debt and credit card debt
- Calculate the savings that result from paying off debt rather than investing in a savings account

4. When Debt Is Acceptable: Mortgage Loans

- Describe the specific attributes of mortgage loans that make them good debt
- Compute different interest amounts due based on different principal amounts due

5. When Debt Isn't Acceptable: Minimum Due and Missed

- Identify what types of debt are unacceptable
- Compute the accumulated interest on credit card debt
- Calculate the impact of cash advances on credit card interest

6. When Debt Isn't Acceptable: Credit Cards
 - Identify what types of debt are unacceptable
 - Compute interest on credit cards
7. When Debt Isn't Acceptable: Rewards Programs
 - Identify what types of debt are unacceptable
 - Compare credit and debit card rewards programs
 - Calculate interest on credit card purchases
8. I Already Have Too Many Credit Cards
 - Analyze which of your credit cards to pay off first by calculating and comparing interest due
 - Identify the benefits of zero-rate APR balance transfers
9. I Already Have Too Many Credit Cards: Debt Ratios
 - Calculate debt ratios using various balance information
 - Identify the problems that can arise from closing credit accounts
10. Give Yourself Credit for Avoiding Credit Problems
 - Calculate interest due based on various principal amounts
 - Create a table showing a schedule to pay off a credit card with a given monthly payment plan
 - Compare the impact on principal reduction of changes in monthly payments
11. How a Credit Score Works: Financial Decisions
 - Explain what your credit score means and how it is developed
 - Compare the impact different interest rates (caused by high credit scores and low credit scores) can have on balances
12. How a Credit Score Works: The Payoff
 - Explain what your credit score means and how it is developed
 - Compare the impact different interest rates (caused by high credit scores and low credit scores) can have on balances
13. How a Credit Score Works: The Perfect Score
 - Explain what your credit score means and how it is developed
 - Compare the impact different interest rates (caused by high credit scores and low credit scores) can have on balances
14. Unit Review
 - Identify differences among different types of financial transactions
 - Compute savings based on different interest rates
 - Compare interest accrued based on various scenarios
 - Review information and concepts related to dealing with debt
15. Unit Test

5. Review

1. Unit 1 Review: Money and Spending
2. Unit 2 Review: Controlling Expenses
3. Unit 3 Review: Finances: Income and Debt

4. Unit 4 Review: Dealing with Debt

6. Final Exam

1. Final Exam

Semester B Summary:

This is the second of two courses that comprise Consumer Math. In this course, students will continue to learn how to make good financial decisions. Retailers, banks, and credit card companies may not provide consumers with all the information they need to make good decisions. By the end of this course, the student will differentiate between secured and unsecured debt, learn how to create a budget, examine a credit report, and discover the best way to increase income and decrease expenses. This course will provide the student with the skills to make good financial decisions.

Semester B Outline

1. Debt vs. Savings

1. Secured Debt

- Identify the differences between secured debt and unsecured debt
- Calculate the consequences of defaulting on a secure debt
- Identify the impact of maintaining a good credit score on debt
- Analyze data in a table

2. Unsecured Debt

- Identify the differences between secured debt and unsecured debt
- Calculate the consequences of defaulting on unsecured debt
- Identify the impact of maintaining a good credit score on debt
- Analyze and use data from a table

3. Exploring Other Forms of Debt

- Identify the differences between secured debt and unsecured debt
- Determine trends within data
- Analyze and use data from a table

4. Unsecured Debt Payment

- Identify the steps involved in building a strong credit history and some specific ways of raising your credit score
- Identify how a good credit score can be advantageous to you

5. Future Wealth

- Identify the steps involved in building a strong credit history and some specific ways of raising your credit score
- Determine which debt should be eliminated by comparing several situations
- Explain the relationship between accrued interest and principal balance

6. Good Credit vs. Bad Credit: An Overview

- Identify how a high credit score decreases your fixed expenses
- Calculate how your credit score affects your mortgage payments when you buy a house
- Calculate how your credit score affects your car payments when you purchase an automobile

- Determine other ways that your credit score impacts your financial situation

7. Examples of Good Credit

- Identify how a high credit score decreases your fixed expenses
- Calculate how your credit score affects your mortgage payments when you buy a house
- Calculate how your credit score affects your car payments when you purchase an automobile
- Determine other ways that your credit score impacts your financial situation
- Interpret and analyze data from tables

8. Examples of Bad Credit

- Identify how a high credit score decreases your fixed expenses
- Calculate how your credit score affects your mortgage payments when you buy a house
- Calculate how your credit score affects your car payments when you purchase an automobile
- Determine other ways that your credit score impacts your financial situation

9. Savings vs. Debt

- Calculate interest accrued based on various principal balances
- Compare total accrued interest to determine savings amounts
- Determine the differences and sums for each month's credit payments

10. Cars: Used or New

- Compute how depreciation affects the cost of buying a car
- Compare the advantages (and disadvantages) of buying a used car instead of a new car

11. Cars: Lease or Own

- Compute how depreciation affects the cost of buying a car
- Compare the advantages (and disadvantages) of buying a used car instead of a new car
- Identify the differences between leasing a car and buying a car

12. Homes: Rent

- Identify the advantages and disadvantages of owning a home instead of renting
- Use proportions to work backwards with percentages

13. Homes: Mortgage

- Itemize the various expenses that are a part of the cost of home ownership
- Calculate net income and allowable housing expense ratios
- Use proportions to work backwards to compute realized income requirements

14. Unit Review

- Identify differences among different types of financial transactions
- Compute savings based on different interest rates
- Compare interest accrued based on various scenarios
- Review information and concepts relating to dealing with debt

15. Unit Test

2. Budgeting

1. Budgeting

- Identify how the concepts of budgeting, expenses, saving, credit management, and retirement tie together
 - Calculate the effect that inflation has on your purchasing power
 - Compute how appreciation offsets the effects of inflation
2. Creating a Hypothetical Budget
- Create a budget using income, fixed expenses, and discretionary expenses
 - Calculate realized income
 - Analyze the impact of expenses on savings
3. Fixed Costs
- Determine how much money you need in your own emergency fund
 - Calculate the amount of discretionary monies available
4. Assets and "Net" Savings
- Analyze data for trends in savings
 - Identify ways to create your emergency "safety net"
5. Discretionary Spending: The Extras of Life
- Calculate how you can save money by eliminating a few simple luxuries
 - Analyze why the earlier you start saving for your retirement, the better
 - Compute how paying down credit card debt can save you more money than investing the same amount of money
6. The Second Job
- Calculate how you can save money by eliminating a few simple luxuries
 - Determine how a low interest rate, when compounded over a long period of time, can generate a significant return on your investment
 - Analyze why the earlier you start saving for your retirement, the better
 - Compute why reducing discretionary spending doesn't mean you have to eliminate luxuries altogether
7. Emergency Funds: Cash Reserves
- Identify the important reasons for having an emergency fund
 - Compute the different forms your emergency fund can take
 - Calculate the impact different types of investments can have on total interest accrued
8. Emergency Funds: Insurance Policies
- Determine the benefits insurance can have in emergency situations
 - Perform percentage computations involving money and interest compounding
 - Compare accrued interest given different scenarios
9. Emergencies – A Brainstorming Activity
- Identify different situations that may require an emergency fund
 - Calculate the different impacts that using an emergency fund can have on savings
10. Budgeting Summary: Reviewing the Process
- Determine the steps of creating your own budget

- Identify the steps you should take when you are finally able to create a budget surplus
11. Budgeting Summary: The Never-ending Budget Process
 - Determine the steps of creating your own budget
 - Calculate steps you can take to turn a deficit situation into a surplus
 - Identify the steps you should take when you are finally able to create a budget surplus
 12. Budgeting Summary: Learning from Experience
 - Determine the steps of creating your own budget
 - Calculate steps you can take to turn a deficit situation into a surplus
 - Identify the steps you should take when you are finally able to create a budget surplus
 13. Unit Review
 - Identify different parts of a budget
 - Compute fixed expenses based on various types of data
 - Use percentages and proportions to calculate realized income
 14. Unit Test

3. Finances

1. A Part-Time Job
 - Calculate the ways to increase your income
 - Compute the increase to your income from getting a part-time job
 - Compare net hourly income wage
2. Promotions and Merit Pay
 - Calculate the ways to increase your income
 - Compute increases to your income from getting a job or taking a second job
3. A New Job
 - Calculate the ways to increase your income
 - Compute changes in realized income and discretionary monies
4. Labor Statistics
 - Identify the single best way to increase your income
 - Calculate the actual monetary advantage to getting your high school diploma
 - Compare the benefits of following further educational paths beyond high school
 - Interpret and analyze data in a table using various mathematical operations
5. Investigating Labor Statistics
 - Identify the single best way to increase your income
 - Calculate the actual monetary advantage to getting your high school diploma
 - Compare the benefits of following further educational paths beyond high school
 - Interpret and analyze data from a table
6. Degree Effect
 - Identify the single best way to increase your income
 - Calculate the actual monetary advantage to getting your high school diploma

- Compare the benefits of following further educational paths beyond high school
 - Interpret and analyze data from a table using various mathematical processes
7. Gifts and Bulk Buying
- Calculate the impact of using a variety of ways to cut your everyday expenses
 - Determine the financial benefits of using coupons and buying in volume as ways to decrease your expenses
8. Sharing Expenses
- Calculate the impact of using a variety of ways to cut your everyday expenses
 - Determine the financial benefits of carpooling, using coupons, and buying in volume as ways to decrease your expenses
 - Calculate the financial impact of carpooling
9. Benefits of Coupons
- Calculate the impact of using a variety of ways to cut your everyday expenses
 - Determine the financial benefits of carpooling, using coupons, and buying in volume as ways to decrease your expenses
 - Demonstrate proficiency with concepts covered in previous lessons
10. Credit Card Debt Revisited
- Calculate the impact of the single best way to decrease your expenses
 - Determine the financial benefits of paying more than the minimum payment on your credit card bill
 - Compute how a small increase in your monthly payment results in huge savings over time
11. Paying More Than the Minimum
- Calculate the impact of the single best way to decrease your expenses
 - Determine the financial benefits of paying more than the "minimum payment" on your credit card bill
 - Compute how a small increase in your monthly payment results in huge savings over time
12. Balancing Act of Debt
- Identify the first step you should take in your campaign to save money
 - Explain why investing in a savings account is not necessarily the first thing you should do to save money
 - Calculate the impact credit card debt can have on your financial well-being
13. Retirement Savings vs. Debt
- Identify the first step you should take in your campaign to save money
 - Explain why investing in a savings account is not necessarily the first thing you should do to save money
 - Calculate the impact credit card debt can have on your financial well-being
14. Unit Review
- Compute the impact of changing jobs or taking a part-time job
 - Compare benefits of investing in a savings plan versus paying off credit card debt
 - Identify the instances when investing makes sense

- Calculate income implications from attaining different levels of education

15. Unit Test

4. **Savings and Financial Planning**

1. Goal Setting

- Outline the steps in planning your savings strategy
- Computationally compare the differences between short-term and long-term financial goals
- Calculate the significant impacts of long-term financial goals

2. Short-term vs. Long-term

- Outline the steps in planning your savings strategy
- Computationally compare the differences between short-term and long-term financial goals
- Calculate the significant impacts of long-term financial goals

3. An Introduction to Investing: Being Realistic

- Outline the steps in planning your savings strategy
- Computationally compare the differences between short-term and long-term financial goals
- Calculate the significant impacts of long-term financial goals

4. An Introduction to Investing: Risk

- Identify the relationship between risk and reward
- Compute why high-risk investments do not make good savings instruments
- Calculate the differences diversity can have in your savings program

5. Diversifying Your Savings

- Identify the relationship between risk and reward
- Compute why high-risk investments do not make good savings instruments
- Calculate the differences diversity can have in a savings program

6. An Introduction to Investing: Stock Market

- Identify the relationship between risk and reward
- Compute why high-risk investments do not make good savings instruments
- Calculate the differences diversity can have in your savings program

7. Get It in Writing: Renting

- Identify why it's important to get all your agreements in writing
- Differentiate between negotiable agreements and unilateral contracts
- Practice how to write basic contracts
- Calculate the financial impact of different types of contracts

8. Get It in Writing: Unilateral Contracts

- Identify why it is important to get all agreements in writing
- Differentiate between negotiable agreements and unilateral contracts
- Practice how to write basic contracts
- Calculate the financial impact of different types of contracts

9. The Internet Is Your Friend: Online Banking

- Calculate the advantages of online banking
- Identify the financial benefits of direct deposit and paying bills online
- Determine the time and cost savings of using computer-based financial software programs to help you manage finances

10. The Internet Is Your Friend: Direct Deposit

- Calculate some of the advantages of online banking
- Identify the financial benefits of direct deposit and paying bills online
- Determine the time and cost savings of using computer-based financial software programs to help manage finances

11. The Internet Is Your Friend: Financial Software

- Calculate some of the advantages of online banking
- Identify the financial benefits of direct deposit and paying bills online
- Determine the time and cost savings of using computer-based financial software programs to help manage finances

12. Review: Money's Many Uses

- Review the important concepts presented in the Consumer Math course by completing calculations involving a variety of financial situations
- Identify ways you have already changed your thinking involving your finances
- Plan your future financial activities

13. Review: Planning Ahead and Contracts

- Review the important concepts presented in the Consumer Math course by completing calculations involving a variety of financial situations
- Identify ways you have already changed your thinking involving your finances
- Plan your future financial activities

14. Unit Review

- Calculate the amounts needing to be saved over various periods of time
- Compare the effect of different interest rates on savings
- Review concepts taught during the unit to prepare for the unit assessment

15. Unit Test

5. **Review**

1. Review: Debt vs. Saving
2. Review: Budgeting
3. Review: Finances
4. Review: Savings and Financial Planning

6. **Final Exam**

1. Consumer Math B Final Exam

Explorations in Mathematics

Explorations in Mathematics A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary: Semester A

This is the first of two courses that comprise Explorations in Mathematics. This course is designed to provide the student with a solid mathematics foundation. The student will explore properties of rational numbers including divisibility patterns, prime factorization, greatest common factor, and least common multiple. The student will add, subtract, multiply, and divide rational numbers. Then, the student will identify and solve expressions and equations using variables. Finally, the student will use properties, including the Associative Property, Commutative Property, and Distributive Property, to solve and simplify equations.

Semester B

This is the second of two courses that comprise Explorations in Mathematics. This course is designed to provide the student with a solid mathematics foundation. The student will be introduced to the properties of equality to solve one-step and multi-step equations. Then, the student will explore absolute value and how to compare values using absolute value. The student will examine the applications of one-step and multiple step equations. Finally, the student will be introduced to probability and statistics concepts including direct and inverse variation, mean, median, mode, counting principle, permutations, and combinations.

Course Summary: Semester A

1. Working with Rational Numbers

1. Divisibility Patterns
 - Learn what divisible means
 - Understand how to determine whether or not a number is divisible
 - Practice using divisibility patterns
2. Divisibility Patterns Activity
3. Prime Factorization
 - Identify the prime numbers and composite numbers
 - Examine factor trees
 - Learn to do the prime factorization of a number using repeated division
4. Prime Factorization Activity

5. Greatest Common Factor
 - Understand what common factors are
 - Learn how to determine the Greatest Common Factor of two or more whole numbers
 - Practice finding the Greatest Common Factor of two whole numbers
6. Greatest Common Factor Activity
7. Rational Numbers and Reducing
 - Learn to recognize rational numbers
 - Rewrite rational numbers as the ratio of two integers
 - Understand how to simplify the ratio of two integers when necessary
8. Rational Numbers and Reducing Activity
9. Add/Subtract Rationals with Like Denominators
 - Learn to add and subtract rational numbers with like denominators
 - Understand what a remainder is
 - Examine how to reduce an improper fraction to its simplest form
10. Add/Subtract Rationals with Like Denominators Act.
11. Least Common Multiple
 - Understand what the least common multiple of two numbers is
 - Practice finding the least common multiple of two numbers
 - Review what common factors are and how to find the greatest common factor
12. Least Common Multiple Activity
13. Add/Subtract Rationals with Unlike Denominators
 - Add and subtract rational numbers with unlike denominators
 - Learn to add and subtract with improper fractions
 - Understand how to add and subtract with mixed fractions
14. Add/Subtract Rationals with Unlike Denom. Activity
15. More Subtracting Rationals with Unlike Denominator
 - Learn how to subtract rational numbers with unlike denominators by rewriting one or both of the rational numbers
 - Understand how to reduce to the simplest form
16. More Subtracting Rationals Activity
17. Multiplying Rational Numbers
 - Understand how to multiply rational numbers
 - Learn to write rational numbers in simplest form
18. Multiplying Rational Numbers Activity
19. Dividing Rational Numbers
 - Learn to divide rational numbers
 - Understand how to write the quotient in simplest form
20. Dividing Rational Numbers Activity

2. Variables, Equations, and Properties

1. Variables, Expressions, and Equations
 - Recognize variables, expressions, and equations
 - Understand how to use variables, expressions, and equations
2. Variables, Expressions, and Equations Activity
3. Associative Property of Addition/Multiplication
 - Identify the Associative Property of Addition and Multiplication
 - Learn how to use Associative Property to solve your mathematical equations
 - Understand the advantages to using Associative Property
4. Associative Prop. of Multiplication/Addition Act.
5. Commutative Property of Addition/Multiplication
 - Identify the Commutative Property of Addition and Multiplication
 - Learn to use the Commutative Property of Addition and Multiplication
 - Understand why you would use the Commutative Property of Addition and Multiplication
6. Commutative Prop. of Addition/Multiplication Act.
7. Order of Operations
 - Understand the order of operations
 - Use the order of operations to evaluate an expression
 - Look at bases and exponents
8. Order of Operations Activity
9. Additive and Multiplicative Identity Property
 - Identify the Additive Identity Property
 - Use the Additive Identity Property
 - Learn what the Multiplicative Identity Property is
 - Practice using the Multiplicative Identity Property
10. Additive/Multiplicative Identity Property Activity
11. Additive Inverse Property
 - Identify additive inverse
 - Practice using the additive inverse
12. Additive Inverse Property Activity
13. Multiplicative Inverse Property
 - Understand what multiplicative inverse is
 - Practice using the multiplicative inverse
14. Multiplicative Inverse Property Activity
15. Distributive Property
 - Learn what the Distributive Property is
 - Understand how to use the Distributive Property to evaluate an expression
16. Distributive Property Activity

17. Using the Distributive Property

- Learn what the Distributive Property is
- Use the Distributive Property to collect like terms in an expression

18. Using the Distributive Property Activity

19. Using Properties to Simplify Expressions

- Review the properties studied in this unit
- Determine the properties used to simplify an expression

20. Using Properties to Simplify Expressions Activity

3. Explorations of Mathematics A Final

1. Explorations of Mathematics A Final Review
2. Explorations of Mathematics A Final

Semester B

1. Integers and Solving Equations

1. Addition and Subtraction Property of Equality

- Learn how to use the Addition and Subtraction Property of Equality
- Practice solving simple equations using the Addition and Subtraction Property of Equality

2. Addition/Subtraction Property of Equality Activity

3. Multiplication and Division Property of Equality

- Use the Multiplication and Division Property of Equality to solve simple equations
- Understand the importance of using the Multiplication and Division Property of Equality

4. Multiplication/Division Prop. of Equality Activity

5. Integers: Absolute Value and Comparison

- Understand what the absolute value of an integer is
- Compare two or more integers

6. Integers: Absolute Value and Comparison Activity

7. Adding and Subtracting Integers

- Learn to add and subtract integers
- Practice adding and subtracting integers

8. Adding and Subtracting Integers Activity

9. Multiplying and Dividing Integers

- Learn to multiply integers
- Understand how to divide integers
- Practice multiplying and dividing integers

10. Multiplying and Dividing Integers Activity

11. Reflexive, Symmetric, Transitive, and Substitution

- Learn how to use the reflexive, symmetric, transitive, and substitution property of equality to solve simple equations
- Practice using the reflexive, symmetric, transitive, and substitution property of equality to solve simple equations

12. Reflexive/Symmetric/Transitive/Substitution Act.

13. Solving One-Step Equations

- Use the Addition, Subtraction, Multiplication, or Division Property of Equality to solve one-step equations

14. Solving One-Step Equations Activity

15. Applications of One-Step Equations

- Learn the applications of one-step equations
- Use one-step equations to solve application problems

16. Applications of One-Step Equations Activity

17. Solving Multiple-Step Equations

- Learn how to solve multi-step equations
- Practice solving multiple-step equations

18. Solving Multiple-Step Equations Activity

19. Applications of Multiple-Step Equations

- Learn how to use multiple-step equations to solve application problems
- Practice using multiple-step equations to solve application problems

20. Applications of Multiple-Step Equations Activity

2. **Probability and Statistics**

1. Direct Variation

- Understand constant of variation
- Use constant of variation to solve problems involving direct variation

2. Direct Variation Activity

3. Inverse Variation

- Discover what inverse variation means
- Use inverse variation to solve equations

4. Inverse Variation Activity

5. Mean and Mode

- Learn the definitions of the mean and mode of a data set
- Find the mean and mode of a data set

6. Mean and Mode Activity

7. Median and Quartiles

- Discover the median of a set of ordered data
- Understand what the quartiles are

8. Median and Quartiles Activity

9. Box and Whisker Plots

- Learn what box-and-whisker plots are
- Draw the box-and-whisker plot of a data set

10. Box and Whisker Plots Activity

11. Counting Principle

- Understand what the counting principle is
- Find the total number of possible outcomes in multiple events

12. Counting Principle Activity

13. Permutations

- Gain an understanding of permutations
- Find the total number of permutations of n objects
- Look at the factorial of a number

14. Permutations Activity

15. Combinations

- Learn the meaning of combinations
- Find the number of combinations of list of objects

16. Combinations Activity

17. Probability

- Understand how to find the probability of simple events
- Practice finding the probability of simple events

18. Probability Activity

19. Application of Probability

- Use the counting principle to calculate probability
- Work with permutations to calculate probability
- Look at combinations used to calculate probability

20. Application of Probability Activity

3. Explorations in Mathematics B Final

1. Explorations in Mathematics B Final Review.
2. Explorations in Mathematics B Final

Statistics

Statistics A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

In this course, the student will be introduced to the major concepts of collecting, organizing, and drawing conclusions from data. The student will also have the opportunity to observe patterns and departures from patterns, plan a study, produce models using probability and simulation, and use statistical inference to confirm models.

SEMESTER B

In this course, the student will be introduced to the major concepts of collecting, organizing, and drawing conclusions from data. The student will also have the opportunity to observe patterns and departures from patterns, plan a study, produce models using probability and simulation, and use statistical inference to confirm models.

Course Outline:

SEMESTER A

1. Introduction to Statistics

1. Statistical Thinking
 - Determine the factors used to analyze data and the significance of the conclusions
2. Types of Data
 - Recognize different types of data
3. Critical Thinking
 - Identify how statistics can be distorted
4. Collecting Sample Data
 - Identify how data is collected from observational studies and experiments
 - Describe different types of observational studies and experiments
5. Introduction to Statistics Review

There are no objectives for this lesson.
6. Unit Test

There are no objectives for this lesson.

2. Analyzing a Study: Valid or Not?

1. Valid or Not?
 - Use a five-step problem-solving model to analyze, critique, evaluate, and determine the reasonableness of a given study

- Evaluate claims and conclusions in published reports or articles based on data
2. Valid or Not? Assignment

There are no objectives for this lesson.

3. Summarizing and Graphing Data

1. Frequency Distributions
 - Identify the characteristics of a frequency distribution
 - Interpret a frequency distribution
2. Two-Way Tables
 - Analyze categorical data using two-way tables
3. Histograms
 - Interpret a histogram that represents a set of data
4. Statistical Graphics
 - Identify a suitable graph for representing a data set
5. Critical Thinking: Bad Graphs
 - Identify how graphs can be constructed to be misleading
6. Summarizing and Graphing Data Review

There are no objectives for this lesson.

7. Unit Test

There are no objectives for this lesson.

4. Statistics for Describing Data

1. Measures of Center
 - Find the mean, median, mode, and midrange of a data set
2. Measures of Variation
 - Find the range, standard deviation, and variance of a data set
 - Use the range rule of thumb and the empirical rule for interpreting and estimating standard deviation
3. Measures of Relative Standing
 - Compute a z score and use the result to determine whether a given value is unusual
 - Determine percentiles and quartiles for data sets and interpret the results
 - Recognize the characteristics of and interpret boxplots
4. Statistics for Describing Data Review

There are no objectives for this lesson.

5. Unit Test

There are no objectives for this lesson.

5. Probability

1. Basic Concepts of Probability
 - Determine probabilities based on relative frequencies, sample space of equally likely outcomes, and subjective estimation

- Determine probabilities of event complements and state the odds for an event
2. Addition Rule
 - Use the addition rule for probability to find the probability of a compound event or complementary events
 3. Multiplication Rule: Basics
 - Use the multiplication rule to find the probability of independent events and dependent events
 4. Multiplication Rule
 - Determine the conditional probability of an event
 5. Using Simulations
 - Estimate the probability of an event based on output generated from a simulation
 6. Counting
 - Use the fundamental counting rule, factorial rule, permutations rule, and combinations rule to solve problems
 - Use Venn diagrams to determine the number of outcomes
 7. Probability Review

There are no objectives for this lesson.
 8. Unit Test

There are no objectives for this lesson.

6. Choices Project

1. Choices Project
 - Use probabilities to make fair decisions by using a random number generator
 - Use probabilities to make fair decisions by drawing lots

7. Probability Distributions

1. Random Variables
 - Identify a random variable as discrete or continuous, and determine whether a probability distribution is given
 - Calculate the mean, variance, and standard deviation of a probability distribution and recognize unusual results
2. Binomial Distributions
 - Determine whether a given procedure results in a binomial distribution and calculate the binomial probability
 - Derive the binomial theorem by combinatorics
 - Use combinatorial reasoning to solve problems
3. Important Characteristics
 - Compute and interpret the mean, variance, and standard deviation for a binomial distribution
4. Geometric Distributions
 - Determine whether a given procedure results in a geometric distribution and calculate the geometric probability

5. Simulating Probability Distributions

- Use random numbers to simulate binomial and geometric probability distributions

6. Probability Distributions Review

There are no objectives for this lesson.

7. Unit Test

There are no objectives for this lesson.

8. Normal Probability Distributions

1. The Standard Normal Distribution

- Find the probability of an event given normally distributed data
- Find a z score that corresponds to a given probability or the area under a standard normal curve.

2. Applications

- Determine the probability or percentage given a nonstandard normal distribution
- Find a critical value from a given probability or area under a standard normal curve

3. Sampling Distributions

- Find the sampling distribution of mean, variance, and proportion for a target population

4. The Central Limit Theorem

- Apply the central limit theorem to estimate population parameters

5. Normal Probability Distributions Review

There are no objectives for this lesson.

6. Unit Test

There are no objectives for this lesson.

9. Review Test

1. Semester Review

- Review concepts from this course in preparation for completing the review test

2. Review Test

There are no objectives for this lesson.

SEMESTER B

1. Estimates and Sample Sizes

1. Population Proportion

- Understand how a confidence interval and margin of error are related to a population proportion
- Identify sample requirements, construct a confidence interval estimate, and interpret the results for a population proportion

2. Standard Deviation Is Known

- Estimate a population mean given when the value of the population standard deviation is known

3. Standard Deviation Is Not Known

- Use a t distribution to determine a confidence interval for estimating a population mean when the population standard deviation is unknown
 - Choose the appropriate distribution to construct a confidence interval to estimate a population mean, and then interpret the results
4. Estimating a Population Variance
 - Use a chi-square distribution to estimate the population standard deviation
 5. Estimates and Sample Sizes Review

There are no objectives for this lesson.
 6. Unit Test

There are no objectives for this lesson.

2. Designing a Statistical Study

1. Statistical Study Project: Part 1
 - Incorporate the concept of 'randomness' into data collection plan and/or experiment
 - Carry out data collection plan
2. Statistical Study Project: Part 1 Assignment

There are no objectives for this lesson.

3. Hypothesis Testing

1. Basics of Hypothesis Testing
 - Identify the null and alternative hypotheses when given a claim about a population parameter
 - Calculate a test statistic and use a critical value or P-value to interpret the result
 - Test a hypothesis and state the final conclusion
2. Basic Methods of Testing
 - Calculate a test statistic for a proportion, and then use the normal distribution to assess
3. Using Simulations to Test Hypotheses
 - Create a simulation of an event using random number tables
 - Use simulated data to conduct a hypothesis test and find a P-value associated with your results
 - Interpret your P-value in the context of the problem
4. Using Normal Distribution
 - Calculate a test statistic for a mean, and then use the normal distribution to assess
5. Using Student t Distribution
 - Calculate a test statistic for a mean and then use the t distribution to assess
6. Testing a Claim About Variation
 - Calculate a test statistic for the standard deviation or variance, and then use the chi-square distribution to assess
7. Hypothesis Testing Review

There are no objectives for this lesson.
8. Unit Test

There are no objectives for this lesson.

4. Comparing Two Populations or Treatments

1. Differences Between Population Parameters

- Using given data, determine if there is a difference between two population parameters
- Using simulation, determine if there is a difference between two population parameters

2. Differences Between Treatments

- Recognize paired data as opposed to data from two different populations
- Conduct an inference test (t-test) to assess if the difference between pairs is significant
- Simulate the situation given by the paired data, then conduct an inference test to assess if there is a difference between the treatments

3. Comparing Two Populations or Treatments Review

There are no objectives for this lesson.

4. Unit Test

There are no objectives for this lesson.

5. Correlation and Regression

1. Correlation

- Calculate the linear correlation coefficient r and interpret linear correlation of paired data

2. Regression

- Determine the equation for a regression line
- Find the equation of the regression line and make a prediction
- Use a residual plot to analyze linear correlation and regression results

3. More Best Fit Methods

- Compare the median-median and least absolute deviation lines, two alternative best-fit models, to the least-squares regression line

4. Modeling

- Determine the best regression model for the data
- Model and solve problems involving patterns

5. Linear Transformations

Transform data to achieve linearity

6. Correlation and Regression Review

There are no objectives for this lesson.

7. Unit Test

There are no objectives for this lesson.

6. Analyzing Data from a Statistical Study

1. Statistical Study Project: Part 2

- Analyze collected data numerically and graphically
- Choose the appropriate statistical method to employ in your analysis (graphical, numerical, etc.)
- Create an appropriate, simulated sampling distribution (using technology) and develop a margin of error

- Create an appropriate, simulated sampling distribution (using technology) and develop a p-value
2. Statistical Study Project: Part 2 Assignment

There are no objectives for this lesson.

7. Analyzing Data in Tables

1. Goodness-of-Fit
 - Use the chi-square distribution to calculate a critical value for the goodness-of-fit test and state a conclusion about the hypothesis
2. Contingency Tables
 - Use a chi-square distribution to conduct a test of independence for data in a contingency table
3. Analyzing Data in Tables Review

There are no objectives for this lesson.

4. Unit Test

There are no objectives for this lesson.

8. Statistical Process Control

1. Control Charts: Variation and Mean
 - Interpret a run chart to determine if process data is statistically stable
 - Interpret a control chart to determine if the variation or mean of the process data is within statistical control
2. Control Charts: Attributes
 - Interpret a control chart for p to determine if the proportion of some attribute from process data is within statistical control
3. Statistical Process Control Review

There are no objectives for this lesson.

4. Unit Test

There are no objectives for this lesson.

9. Reporting Findings from a Statistical Study

1. Statistical Study Project: Part 3
 - Write and construct a report covering all aspects of a statistical study
2. Statistical Study Project: Part 3 Assignment

There are no objectives for this lesson.

10. Election Theory

1. Preference Ballots and Preference Schedules
 - Read, interpret, and create a preference schedule
2. The Plurality Method and Fairness Criteria
 - Use the plurality method to determine the winner of an election
 - Determine if the plurality winner of an election is also the majority winner
 - Use the Condorcet method to determine the winner of an election
3. The Borda Count Voting Method

- Use the Borda count method to tabulate the winner of an election
- Describe the advantages and disadvantages of using the Borda count method

4. Election Theory Review

There are no objectives for this lesson.

5. Unit Test

There are no objectives for this lesson.

11. Review Test

1. Semester Review

- Review concepts from this course in preparation for completing the review test

2. Review Test

There are no objectives for this lesson.

**APPENDIX A
CURRICULUM**

A.2 COURSE GUIDES

c. SCIENCE

This document is part of Appendix A: Curriculum.

It includes course guides for Science classes for students in Kindergarten through Grade 12.

- Science K
- Science 1
- Science 2
- Science 3
- Science 3 Accelerated
- Science 4
- Science 4 Accelerated
- Science 5
- Science 5 Accelerated
- Science 6
- Science 6 Accelerated
- Science 7
- Science 7 Accelerated
- Science 8
- Science 8 Accelerated
- Biology
- Biology Honors
- Biology (Prescriptive)
- Chemistry
- Chemistry Honors
- Chemistry (Prescriptive)
- Earth Science
- Earth Science Honors
- Earth Science (Prescriptive)
- Environmental Science
- Physical Science – Chemistry/Physics (Prescriptive)
- Physics

Course guides provide detailed information on the curriculum including course descriptions, unit summaries, lesson objectives, activities, and assessment types. Course guides include information on:

- Planned instruction (provided in the unit summary of each unit within individual Course Guides)
- Course objectives (provided in the unit and lesson objectives within individual Course Guides)
- Activities (provided in the unit summary and lesson objectives of each unit within individual Course Guides)

Science K

Science K A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

In this course, the student will explore the nature of science and how to solve problems, as well as investigate living and nonliving things. The student will learn how to study the surrounding world by observing, collaborating, and sharing with others. Using illustrations and labels, the student will identify the steps used to solve problems and use these steps to plan, design, and test a solution to a problem. Finally, the student will examine, describe, compare, and analyze the characteristics of living and nonliving things in order to complete portfolio assessments.

SEMESTER B

In this course, the student will explore life, Earth, and physical science. The student will learn how to investigate using critical thinking skills. The student will answer questions about the Earth and the sky. In the final chapter, physical science, the student will utilize inquiry methods to explore objects, matter, and mixtures. Throughout this course, the student will enhance skills in language arts, mathematics, and computer literacy. In portfolio assessments, students may choose to chart weather observations over a period of time; observe and collect data on how plants and animals depend on the land, air and water; or observe and compare solids and liquids at room temperature.

Course Outline:

SEMESTER A

1. The Nature of Science

1. What Is Science?
 - Define science
 - Identify the five senses as different methods of observation
 - Make accurate observations using the five senses
 - Discuss and illustrate observations made during a nature walk
2. What Questions Can You Ask?
 - Define scientist
 - Explain the advantages of working together
 - Observe an environment
 - Ask and answer questions during observation

3. How Do You Observe?
 - Construct accurate written or illustrated observations using the five senses
 - Determine how and when each sense will be helpful in observations
4. How Do You Learn Together?
 - Define cooperation
 - Explain the importance of cooperating with others to perform a fair test
 - Distinguish between a fair test and an unfair test
5. How Do You Share What You Learn?
 - Discover ways to record, explain, and share information about observations and tests
 - Share information through illustrations, charts, speech, and/or compositions
6. What Do You Use to Observe?
 - Identify scientific tools
 - Demonstrate how to use tools to make observations and collect information
7. How Do You Stay Safe?
 - Select the appropriate tools to use for making safe observations during a science experiment
 - Identify and recognize the importance of safety rules children should use when conducting science experiments
8. Bubble Experiment
 - Formulate questions and make accurate observations using the five senses
 - Identify the importance of collaborating with others to perform a fair scientific test
 - Discover ways to record, explain, and share information about observations and tests
 - Demonstrate how to use tools to make observations and collect information
 - Select the appropriate tools and safety rules children should use when conducting science experiments
9. The Nature of Science Review
 - Formulate questions and make accurate observations using the five senses
 - Identify the importance of collaborating with others to perform a fair scientific test
 - Discover ways to record, explain, and share information about observations and tests
 - Demonstrate how to use tools to make observations and collect information
 - Select the appropriate tools and safety rules to use when conducting science experiments
10. The Nature of Science Unit Test
 - Identify the importance of collaborating with others to perform a fair scientific test
 - Discover ways to record, explain, and share information about observations and tests
 - Demonstrate how to use tools to make observations and collect information
 - Select the appropriate tools and safety rules to use when conducting science experiments

2. Solve Problems

1. How Can You Solve Problems?
 - Identify a problem and predict possible solutions

- Record, display, and share information with others using drawings, photos, writings, and oral presentations
2. What Problems Can You Solve?
 - Identify a problem and predict possible solutions
 - Use illustrations to record observations and demonstrate possible solutions
 3. How Can You Make a Plan?
 - Use illustrations, labels, and writing to make a plan for solving a problem
 4. How Can You Share Your Ideas With Others?
 - Record, display, and share information with others using drawings, photos, writings, and oral presentations
 5. Lifting Experiment
 - Identify a problem and predict possible solutions
 - Plan, create, and conduct an investigation
 - Construct accurate observations using the five senses
 - Select and use appropriate tools to accurately conduct an investigation
 - Record, display, and share information with others using drawings, photos, writings, and oral presentations
 6. Solve Problems Review
 - Identify a problem and predict possible solutions
 - Plan, create, and conduct an investigation
 - Construct accurate observations using the five senses
 - Select and use appropriate tools to accurately conduct an investigation
 - Record, display, and share information with others using drawings, photos, writings, and oral presentations
 7. Solve Problems Unit Test
 - Identify a problem and predict possible solutions
 - Plan, create, and conduct an investigation
 - Construct accurate observations using the five senses
 - Select and use appropriate tools to accurately conduct an investigation
 - Record, display, and share information with others using drawings, photos, writings, and oral presentations

3. Living and Nonliving Things

1. Can You Talk about Living and Nonliving Things?
 - Describe characteristics of living and nonliving things
 - Differentiate between living and nonliving things
2. What Are Nonliving Things?
 - Describe characteristics of living things
 - Differentiate between living and nonliving things
3. What Are Living Things?

- Describe characteristics of living things
 - Differentiate between living and nonliving things
4. What Do Living Things Need?
 - Identify the essential needs of all living things
 5. How Are Animals Alike and Different?
 - Compare characteristics of animals that make them alike and different from other animals
 6. How Are Plants Alike and Different?
 - Compare characteristics of plants that make them alike and different from other plants
 7. Plant and Animal Comparison
 - Describe characteristics of living things
 - Identify the essential needs of all living things
 - Compare characteristics of animals that make them alike and different from other animals
 - Compare characteristics of plants that make them alike and different from other plants
 - Compare characteristics of plants and animals that make them alike and different from each other
 8. Living and Nonliving Things Review
 - Describe characteristics of living things
 - Differentiate between living and nonliving things
 - Identify the essential needs of all living things
 - Compare characteristics of animals that make them alike and different from other animals
 - Compare characteristics of plants that make them alike and different from other plants
 - Compare characteristics of plants and animals that make them alike and different from each other
 9. Living and Nonliving Things Unit Test
 - Describe characteristics of living and nonliving things
 - Differentiate between living and nonliving things
 - Identify the essential needs of all living things
 - Compare characteristics of animals that make them alike and different from other animals
 - Compare characteristics of plants that make them alike and different from other plants
 - Compare characteristics of plants and animals that make them alike and different from each other

4. Plants and Animals

1. How Do Living Things Change As They Grow?
 - Describe how animals, plants, and people change as they grow
2. How Are Animals Like Their Parents?
 - Classify young animals and their parents
 - Compare and contrast a baby animal with its parent
3. How Do Animals Change?

- Classify young animals and their parents
 - Describe how animals change as they grow
4. How Do Plants Change?
- Describe how plants change as they grow using illustrations and writing
5. How Do People Change?
- Describe how people change as they grow

SEMESTER B

1. More Plants and Animals

1. Which Plants and Animals Live on Land?
 - Identify plants and animals that live on land
 - Define what a habitat is
 - Explain how people are changing their environment and tell what people can do to protect it
 - Identify how an animal can change its own environment
2. Which Plants and Animals Live in Water?
 - Identify plants and animals that live in the water
 - Define what a habitat is
 - Explain how people are changing their environment and tell what people can do to protect it
3. My Animal and Habitat Report
 - Describe how animals, plants, and people change as they grow
 - Describe an animal's habitat
 - Gather and share information about an animal and its habitat
4. More Plants and Animals Review
 - Classify young animals and their parents
 - Describe how animals, plants, and people change as they grow
 - Distinguish between plants and animals that live on land and water
 - Observe and collect data to show the interdependence between plants, animals, and the Earth
5. More Plants and Animals Unit Quiz
 - Classify young animals and their parents
 - Describe how animals, plants, and people change as they grow
 - Distinguish between plants and animals that live on land and water
 - Observe and collect data to show the interdependence between plants, animals, and the Earth

2. Earth and Sky

1. Introduction: What Are Earth and the Sky Like?
 - Identify objects found in the sky
 - Summarize the main idea of the unit
2. What Makes Up Earth?

- Investigate Earth's covering
 - Describe ways people interact with Earth's features
3. What Can You See in the Day Sky?
 - Describe characteristics of the day sky
 4. How Does the Sun Seem to Move?
 - Summarize the relationship between the sun's position and the time of day
 5. What Can You See in the Night Sky?
 - Describe characteristics of the night sky
 - Compare and contrast the day and night sky
 6. What Are Some Kinds of Weather?
 - Compare and contrast weather patterns
 - Collect weather data
 7. What Are the Seasons?
 - Identify the four seasons
 - Compare and contrast weather patterns within the four seasons
 - Identify and describe different types of severe weather
 - Explain the importance of a weather forecast
 - Collect weather data
 8. Reporting on Today's Weather!
 - Compare and contrast weather patterns
 - Collect and analyze weather data
 - Develop and create a forecast of the weather
 9. Earth and Sky Review
 - Investigate the Earth's covering
 - Identify characteristics of the day and night sky and seasons
 - Summarize the relationship between the sun's position and the time of day
 - Compare and contrast weather patterns
 - Collect and analyze weather data
 10. Earth and Sky Unit Test
 - Investigate the Earth's covering
 - Identify characteristics of the day and night sky and seasons
 - Summarize the relationship between the sun's position and the time of day
 - Compare and contrast weather patterns
 - Collect and analyze weather data

3. All About Objects

1. What Are Objects Like?
 - Explore the concept of objects

- Describe objects
- 2. What Are Your Five Senses?
 - Observe and tell about objects using the five senses
- 3. What Are Objects Made Of?
 - Analyze and categorize objects by their composition
- 4. What Can You Tell About Objects?
 - Analyze and categorize objects by their composition and characteristics
- 5. How Can You Sort Objects?
 - Analyze and categorize objects by their composition, properties, and use
- 6. How Can You Use Objects?
 - Explore how various objects can be used based on their properties or characteristics
- 7. How Is Sound Made?
 - Compare loud and soft sounds
 - Identify different ways sound is used in everyday life
- 8. Exploring Objects
 - Observe and tell about objects using the five senses
 - Analyze and categorize objects by their composition and characteristics
 - Identify properties by which objects might be categorized
- 9. All About Objects Review
 - Observe and tell about objects using the five senses
 - Analyze and categorize objects by their composition and characteristics
 - Explore how various objects can be used based on their characteristics
 - Compare loud and soft sounds
- 10. All About Objects Unit Test

There are no objectives for this lesson.

4. Matter and Mixtures

1. What Are Matter and Mixtures?
 - Define the concepts of matter and mixtures
2. What Are Solids Like?
 - Describe and measure matter as a solid
 - Discover and investigate the properties of a solid
3. What Are Liquids Like?
 - Discover and investigate the properties of liquids
4. What Are Gases Like?
 - Discover and investigate the properties of gases
5. How Can Water Change?
 - Observe changes in water caused by freezing, melting and boiling

6. What Is a Mixture?

- Create and describe a mixture

7. Matter and Mixtures Review

- Describe and measure matter as a solid
- Discover and investigate the properties of solids, liquids, and gases
- Investigate how gases fill their containers
- Observe changes in water caused by freezing, melting and boiling
- Create and describe a mixture

8. Matter and Mixtures Unit Test

- Describe and measure matter as a solid
- Discover and investigate the properties of solids, liquids, and gases
- Investigate how gases fill their containers
- Observe changes in water caused by freezing, melting and boiling
- Create and describe a mixture

Science 1

Science 1 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

Science provides a way for people to actively learn about the world around them. Throughout this course, the student will perform hands-on activities to explore organisms and habitats and examine the composition of Earth. The McGraw-Hill textbook *Science: A Closer Look* and the science kit are the primary resources for this course. The life science units explore how plants and animals grow and change. The Earth science units analyze Earth's land and resources, as well as how to care for Earth. The student will also explore the scientific method and different careers in science.

In this course, the student will investigate how sunlight affects leaves, design an experiment to discover what plants need to survive, create a model of a mountain, and delve into many more exciting experiments. The lessons in this course are designed to accommodate a variety of learning styles and to provide a variety of opportunities for the entire family to participate in the student's education. Some lessons, or groups of lessons, in each unit are activity-centered, which allows the student to engage the new concepts through exploration and discovery; others are more traditional, requiring the student to read, research, and reflect on the underlying theory.

SEMESTER B

Science provides a way for people to actively learn about the world around them. Throughout this course the student will perform hands-on activities to explore organisms and habitats and examine the composition of Earth. The McGraw-Hill textbook, *Science: A Closer Look*, and the science kit are the primary resources for this course. The Earth science units explore the seasons and the solar system. The physical science units investigate changes in matter and energy. The student will also explore the scientific method and different careers in science.

In this course, the student will investigate which liquids flow faster, how water can change from a liquid to a gas, create a weather chart, and delve into many more exciting experiments. The lessons in this course are designed to accommodate a variety of learning styles and to provide a variety of opportunities for the entire family to participate in the student's education. Some lessons, or groups of lessons, in each unit are activity-centered, which allows the student to engage the new concepts through exploration and discovery; others are more traditional, requiring the student to read, research, and reflect on the underlying theory.

Course Outline:

SEMESTER A

1. Be a Scientist

1. Science Skills
 - Identify and apply the skills used for basic scientific inquiry
2. Scientific Method
 - Apply the method that scientists use to study the natural world
3. Science Safety
 - Identify important safety procedures

2. Plants are Living things

1. Learning About Living Things
 - Compare and classify living and nonliving things
 - Explain what plants need to live and grow
2. Inquiry Skill: Observe
 - Observe a plant
3. Parts of Plants
 - Identify plant parts such as leaves, stems, and roots
 - Describe what different parts do for the plant
4. Different Plants
 - Classify and compare different plants
 - Identify some edible plant parts
5. Unit Review
 - Review and compare the parts of plants
6. Unit Test

There are no objectives for this lesson.

3. Plants Grow and Change

1. Flowers, Fruits, and Seeds
 - Explain why flowers and fruits are important to plants
 - Describe and compare different seeds
2. Inquiry Skill: Classify
 - Categorize different objects by what they have in common
3. How Plants Grow and Change
 - Describe the life cycle of a plant
 - Explain how plants can grow from seeds and other plant parts
4. Lab: How Does Sunlight Affect Leaves?
 - Observe how sunlight affects a plant

5. Plants Live in Many Places
 - Describe how plants survive in different places
 - Identify desert, rain forest, and arctic environments
6. Unit Review
 - Review and compare flowers, fruits, and seeds
7. Unit Test

There are no objectives for this lesson.

4. All About Animals

1. All Kinds of Animals
 - Observe and describe different kinds of animals
 - Explain how animals are alike and different
2. Inquiry Skill: Compare
 - Compare two animals
3. What Animals Need to Live
 - Identify what animals need to survive
 - Explain how different animals meet their needs
4. How Animals Eat Food
 - Relate the shape of an animal's teeth to what it eats
 - Classify animals according to what they eat
5. Animals Grow and Change
 - Describe the life cycles of different kinds of animals
 - Explain what animals can do at different ages
6. Unit Review
 - Review different kinds of animals and what they need
7. Unit Test

There are no objectives for this lesson.

5. Places to Live

1. Land Habitats
 - Describe land habitats
 - Explain how different animals adapt to different environments
2. Inquiry Skill: Communicate
 - Communicate information about a desert habitat
3. Water Habitats
 - Describe water habitats
 - Explain how plants and animals meet their needs in water habitats
4. Plants and Animals Live Together
 - Explain how plants and animals live together in habitats

- Describe why each part of a food chain is important
- 5. Unit Review
 - Review and compare habitats and animals' adaptations for survival
- 6. Unit Test

There are no objectives for this lesson.

6. Looking at Earth

1. What Earth Looks Like
 - Identify different types of land on Earth
 - Describe differences between bodies of water
2. Inquiry Skill: Make a Model
 - Make a model to identify details and learn more about something
3. Rocks and Soil
 - Identify rocks and sort them into groups based on physical properties
 - Classify soil according to color, texture, and composition
4. Changing the Land
 - Describe how and why weathering occurs
 - Explain the process of erosion and how it can be prevented
5. Unit Review
 - Review different forms of land and water
6. Unit Test

There are no objectives for this lesson.

7. Caring for Earth

1. Earth's Resources
 - Identify and describe natural resources
 - Explain how people use natural resources
2. Inquiry Skill: Investigate
 - Identify how much water two kinds of soil will hold
3. Using Earth's Resources
 - Explain why water and air are important resources
 - Define pollution and the need for clean land, water, and air
4. Saving Earth's Resources
 - Describe how to conserve resources by reusing, reducing, and recycling
5. Unit Review
 - Reinforce what natural resources are and why it is important to care for them
6. Unit Test

There are no objectives for this lesson.

1. Weather and Seasons

1. Weather All Around Us
 - Identify different weather conditions
 - Investigate ways to measure different weather conditions
2. Inquiry Skill: Predict
 - Predict what will happen using information from a picture
3. The Water Cycle
 - Explain how clouds form and why water falls back to Earth
 - Identify different kinds of clouds
4. Lab: What is the Weather Like this Week?
 - Measure and record weather conditions
5. Spring and Summer
 - Describe how weather changes as seasons change
 - Identify characteristics of spring and summer
6. Fall and Winter
 - Describe weather conditions in fall and winter
 - Explain how fall and winter affect plants and animals
7. Unit Review
 - Review weather and seasons through independent reading
8. Unit Test

There are no objectives for this lesson.

2. The Sky

1. The Sky Above
 - Classify objects in the sky during day and night
 - Explain why the sun is important for life on Earth
2. Inquiry Skill: Record Data
 - Record data about the sun's warmth at different times of day
3. Earth Moves
 - Recognize Earth's movement by observing shadows and seasons
 - Explain the effects of Earth's rotation and orbit around the sun
4. Lab: How Many Hours of Sunlight Are There?
 - Observe how the amount of sunlight changes each day
5. Earth's Neighbors
 - Observe what the moon looks like from Earth
 - Explain that eight planets, including Earth, move around the sun
6. Unit Review

- Review objects in the sky and the rotation of Earth

7. Unit Test

There are no objectives for this lesson.

3. Matter Everywhere

1. Describing Matter

- Comprehend that all things are made of matter
- Describe the properties of matter

2. Solids

- Identify the properties of solids
- Compare the properties of different solids

3. Inquiry Skill: Measure

- Measure objects using standard and nonstandard units

4. Liquids and Gases

- Describe the properties of liquids and gases
- Compare the properties of different kinds of liquids and gases

5. Unit Review

- Review the three main states of matter and their properties

6. Unit Test

There are no objectives for this lesson.

4. Changes in Matter

1. Lab: How Can Water Change to Gas?

- Observe evaporation

2. Matter Can Change

- Observe and describe how solids can change

3. Making Mixtures

- Prepare mixtures of different solids and liquids
- Explain why some mixtures can be separated and others cannot

4. Heat Can Change Matter

- Describe how heat changes solids, liquids, and gases
- Explain the process of freezing, melting, and evaporation

5. Unit Review

- Reinforce the characteristics of different mixtures

6. Unit Test

There are no objectives for this lesson.

5. On the Move

1. Position and Motion

- Describe the position of an object in relation to other objects

- Observe an object's motion and speed by recording its change in position
- 2. Inquiry Skill: Infer
 - Infer how body structure affects an animal's speed
- 3. Pushes and Pulls
 - Identify pushes, pulls, gravity, and friction as forces
 - Explain how different forces change the motion of objects
- 4. Lab: Which Liquid Flows the Fastest?
 - Evaluate how quickly different liquids flow
- 5. Simple Machines
 - Discover how simple machines make it easier to move objects
 - Explain the functions of pulleys, levers, and ramps
- 6. Magnets
 - Explain why magnets attract some objects and not others
 - Identify the two poles on a magnet
- 7. Unit Review
 - Review motion and forces that affect motion
- 8. Unit Test

There are no objectives for this lesson.

6. Energy Everywhere

- 1. Energy and Heat
 - Describe different sources of energy and heat
- 2. Inquiry Skill: Draw Conclusions
 - Draw conclusions about heat energy
- 3. Sound
 - Identify vibration as the cause of sound
 - Describe the volume and pitch of sounds
- 4. Light
 - Explain that light passes through some objects but not others
 - Describe how people use different light sources
- 5. Electricity
 - Describe how people use electricity
- 6. Unit Review
 - Review different kinds of energy
- 7. Unit Test

There are no objectives for this lesson.

Science 2

Science 2 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary:

SEMESTER A

Studying science helps us understand the world around us as well as the world that existed before us. The McGraw-Hill textbook *Science: A Closer Look* and the science kit are the primary resources for this course. The student will study the major branches of science as he performs hands-on activities. The life science units explore different organisms and their habitats. The Earth science units investigate Earth's resources and physical composition.

The lessons in this course are designed to accommodate a variety of learning styles and to provide a variety of opportunities for the entire family to participate in the student's education. Some lessons, or groups of lessons, in each unit are activity-centered, which allows the student to engage the new concepts he encounters through exploration and discovery; others are more traditional, requiring the student to read, research, and reflect on the underlying theory.

SEMESTER B

Studying science helps us understand the world around us as well as the world that existed before us. The McGraw-Hill textbook, *Science: A Closer Look*, and the science kit are the primary resources for this course. The student will study the major branches of science as he performs hands on activities. The Earth science units investigate Earth's weather patterns and seasons as well as the solar system. The physical science units analyze changes in matter and explore different forms of energy.

In this course, the student will compare the strength of different magnets, analyze the affect of sunlight on temperature, and do much, much more! The lessons in this course are designed to accommodate a variety of learning styles and to provide a variety of opportunities for the entire family to participate in the student's education. Some lessons, or groups of lessons, in each unit are activity-centered, which allow the student to engage the new concepts he encounters through exploration and discovery; others are more traditional, requiring the student to read, research, and reflect on the underlying theory.

Course Outline:

SEMESTER A

1. Be a Scientist

1. Science Skills

- Identify skills scientists use to investigate questions
- Explain how science skills are used to learn about pond animals

2. Scientific Method
 - Explain the steps scientists use to investigate questions
3. Science Safety
 - Identify important safety procedures

2. Plants

1. What Living Things Need
 - Identify living and nonliving things
 - Explain why plants are living things and describe their parts
2. Plants Make New Plants
 - Describe seeds and their origins
 - Identify the stages in a plant's life cycle
3. How Plants Are Alike and Different
 - Recognize that plants look and act like their parent plants
 - Describe ways that plants change to meet their needs
4. Unit Review
 - Review and describe how plants grow and change throughout their life cycle
5. Unit Test

3. Animals

1. Animal Groups
 - Describe, classify, and compare animals
 - Explain how animal parts help animals meet their needs
2. Animals Grow and Change
 - Explain that every animal has a life cycle
 - Describe and compare the life cycles of animals
3. Staying Alive
 - Identify how camouflage helps animals stay safe
 - Explain how animals protect themselves
4. Unit Review
 - Review the needs, traits, and survival behaviors of animals
5. Unit Test

4. Looking at Habitats

1. Places to Live
 - Describe different habitats
 - Explain how plants and animals use their habitats
2. Inquiry Skill: Putting Things in Order
 - Put in order the way a beaver creates a dam
3. Food Chains and Food Webs

- Describe a food chain
- Describe a food web
- 4. Habitat Change
 - Explain why habitats change
 - Describe what happens when habitats change
- 5. Unit Review
 - Review habitats
- 6. Unit Test

There are no objectives for this lesson.

5. **Kinds of Habitats**

1. Forests
 - Compare and contrast woodland forests and rain forests
 - Explain how different animals live in forest habitats
2. Hot and Cold Deserts
 - Describe desert habitats
 - Explain how plants and animals survive in a dry habitat
3. Oceans and Ponds
 - Describe oceans and ponds
 - Explain how plants and animals live in oceans and ponds
4. Unit Review
 - Review and compare different kinds of habitats
5. Unit Test

6. **Land and Water**

1. Earth's Land
 - Compare the different landforms on Earth's surface
 - Identify Earth's layers
2. Earth's Water
 - Identify sources of Earth's water
 - Classify how people use water
3. Changes on Earth
 - Explain slow and fast changes on Earth
 - Describe how wind and water can change rocks
4. Unit Review
 - Review Earth's landforms, water, and changes
5. Unit Test

7. **Earth's Resources**

1. Rocks and Minerals

- Explain what rocks are and how they are used
- Explain what minerals are and how they are used
- 2. Inquiry Skill: Compare
 - Compare two rocks using a Venn diagram
- 3. Soil
 - Describe what things make up soil
 - Explain how soil is formed
- 4. Lab: Which Soil Holds More Water?
 - Predict and measure how much water different soils can hold
- 5. Using Earth's Resources
 - Describe how people use natural resources
 - Explain why people should take care of Earth's resources
- 6. Unit Review
 - Review rocks, soils, and natural resources
- 7. Unit Test

SEMESTER B

1. Observing Weather

1. Weather
 - Describe temperature, wind, and precipitation
 - Identify and use tools to measure weather
2. The Water Cycle
 - Identify the different stages of the water cycle
 - Describe and illustrate the water cycle
3. Changes in Weather
 - Predict weather by observing clouds
 - Identify different types of clouds and storms
4. Unit Review
 - Review the water cycle
5. Unit Test

2. Earth and Space

1. Day and Night
 - Identify how Earth rotates to make day and night
 - Explain how shadows change as Earth moves
2. Why Seasons Happen
 - Describe seasonal and annual patterns on Earth
 - Relate seasonal patterns to Earth's orbit around the sun

3. The Moon and Stars
 - Observe the moon and its phases as it orbits Earth
 - Recognize that the sun is the closest star to Earth
4. Lab: How Does the Moon Seem to Change?
 - Observe and record the moon's phases
5. The Solar System
 - Explain the relationship between the planets and the sun
 - Describe the planets in the solar system
6. Unit Review
 - Review how the sun and Earth interact to create day, night, and the seasons
7. Unit Test

3. Looking at Matter

1. Describing Matter
 - Identify matter as anything that has mass and takes up space
 - Compare and contrast different properties of matter
2. Solids
 - Compare and contrast the properties of solids
 - Use different ways to measure solids
3. Liquids and Gases
 - Describe the properties of liquids and gases
 - Compare and contrast liquids and gases
4. Unit Review
 - Reinforce the properties of matter
5. Unit Test

4. Changes in Matter

1. Matter Changes
 - Identify chemical and physical changes
2. Inquiry Skill: Communicate
 - List the steps taken to do something in order
3. Mixtures
 - Observe how solids, liquids, and gases mix
4. Unit Review
 - Review the concepts of physical and chemical changes
5. Unit Test

5. How Things Move

1. Position and Motion
 - Describe an object's position in relation to another object

- Measure and record changes in an object's position
- 2. Inquiry Skill: Investigate
 - Investigate the speeds of different objects
- 3. Forces
 - Identify a force as a push or a pull
 - Describe the forces of gravity and friction
- 4. Using Simple Machines
 - Identify simple tools
 - Discover that simple machines change force to make work easier
- 5. Exploring Magnets
 - Observe magnets attract and repel objects
 - Identify magnet poles and explain how they function
- 6. Unit Review
 - Review simple machines, forces, and movement
- 7. Unit Test

6. Using Energy

- 1. Heat
 - Recognize that the sun supplies heat and energy to Earth
- 2. Inquiry Skill: Measure
 - Measure and compare temperatures by using thermometers
- 3. Sound
 - Discover how different sounds are produced
 - Describe the volume of pitch and sounds
- 4. Light
 - Identify the composition and properties of light
- 5. Lab: How Does Sunlight Affect Temperature?
 - Compare how sunlight affects the temperature of light and dark objects
- 6. Exploring Electricity
 - Identify forms of electricity and their uses
- 7. Unit Review
 - Review types of energy
- 8. Unit Test

Science 3

Science 3 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, the student will explore forces and motion, magnets, and several topics related to life science. These topics include plant and animal life cycles, heredity, and animal groups. The student will have many opportunities to test hypotheses, experiment, and make real world connections.

Semester A Outline

1. Course Overview

1. Science 3 A Course Overview

2. States of Matter

1. States of Matter Introduction
2. States of Matter

- In this section, you will identify characteristics of states of matter.
- In this section, you will explain how the particles of matter are arranged.

3. Properties of Matter

- In this section, you will describe the different states of matter.

4. Physical Properties of Matter

- In this section, you will list the physical properties of matter.
- In this section, you will describe and compare the physical properties of matter.

5. Heating and Cooling Matter

- In this section, you will define the process of freezing, melting, boiling, and condensing.
- In this section, you will examine times when heating and cooling changes cannot be undone.

6. Changing States

- In this section, you will create a written or visual explanation of how heating and cooling can sometimes be undone.

7. States of Matter Apply

- In this section, you will investigate the states of matter by performing an experiment with vinegar and baking soda.

8. States of Matter Review

9. States of Matter Unit Test

2. Forces and Motion

1. Force and Motion Introduction

2. Objects in Motion and at Rest

- In this section, you will describe objects in motion.

3. Tug of War

- In this section, you will describe how unbalanced forces affect moving and non-moving objects.

4. Changes in Motion

- In this section, you will analyze data collected regarding an object's motion at different speeds and directions.

5. Patterns of Motion

- In this section, you will predict how an object's motion will behave.

6. Energy

- In this section, you will observe how energy can be found in moving objects and light.
- In this section, you will observe how energy can be found in heat and sound.

7. Characteristics of Magnets

- In this section, you will describe characteristics of magnets.
- In this section, you will classify objects and materials as magnetic or non-magnetic.
- In this section, you will classify objects and materials as conductors or insulators of electricity

8. Moving a Feather Part 1 Portfolio

- In this section, you will investigate how balanced and unbalanced forces affect the motion of an object.

9. Moving a Feather Part 2 Portfolio

- In this section, you will record how balanced and unbalanced forces affect the motion of an object.

10. Moving a Feather Part 3 Portfolio

- In this section, you will summarize the results of your investigation about how balanced and unbalanced forces affect the motion of an object.

11. Forces and Motion Apply

- In this section, you will design a museum activity to teach people about balanced and unbalanced forces.

12. Forces and Motion Review and Reflect

13. Forces and Motion Unit Test

4. Plant and Animal Life Cycles

1. Plant and Animal Life Cycle Introduction

2. Animal Life Cycles

- In this section, you will identify parts of the life cycle of animals.

3. Plant Life Cycles

- In this section, you will identify parts of the life cycle of plants.

4. Life Cycle Comparison

- In this section, you will compare the life cycles of living things in a venn diagram.
- In this section, you will model the life cycles of living things.

5. Plant Needs

- In this section, you will identify what plants need to grow, develop, and reproduce.

6.Environmental Changes

- In this section, you will explain how living in a group can help an animal survive if the environment changes.

7. Plant Needs Portfolio: Plan

- In this section, you will investigate what a plant needs to grow and change.

8. Plant Needs Portfolio: Investigate

- In this section, you will investigate what a plant needs to grow and change.

9. Plant Needs Portfolio: Communicate

- In this section, you will explain what a plant needs to grow, change, and reproduce.

10. Plants and Animal Life Cycles Apply

- In this section, you will create a display about the life cycles of plants and animals as well as the basic needs of plants.

11. Plant and Animal Life Cycles Review

12. Plant and Animal Life Cycles Unit Test

5. Plant Structures

1. Plant Structures Introduction

2. Plant Parts

- In this section, you will describe external structures and their functions that help plants grow and survive.

3. Internal Plant Structures

- In this section, you will describe how a plant's internal structures help it to grow and survive.

4. Plant Adaptations and Reproduction

- In this section, you will identify external structures and their functions that help plants respond to their environment.

5. Plant Reproduction

- In this section, you will show how plant structures allow plants to reproduce.

6. Inherited Traits of Plants

- In this section, you will compare data to find differences in inherited traits among offspring of different plant parents.
- In this section, you will analyze graphs to compare data.
- In this section, you will examine seeds to determine possible traits of trees and seeds.

7. Comparing Offspring to Parent

- In this section, you will explain why offspring may be similar to or different from their parents.

8. Plant Structure Portfolio: Plan

- In this section, you will use evidence to make a claim about how a plant's structures help it to survive, grow, respond, or reproduce.
9. Plant Structure Portfolio: Investigate
 - In this section, you will plan an investigation that examines how a plant survives, grows, responds, or reproduces.
 10. Plant Structure Portfolio: Communicate
 - In this section, you will plan and carry out an investigation that examines how a plant survives, grows, responds, or reproduces. You will also collect data from your investigation and use it to support a claim about how plants use certain structures to function.
 11. Plant Structures Review
 12. Plant Structures Unit Test

Semester B Summary: In this course, the student will explore variation and change, such as the characteristics of living versus non-living organisms and environmental change, and life science topics. These include habitats, fossils, and weather and climate. The student will have many opportunities to test hypotheses, experiment, and make real world connections.

Semester B Outline

1. Course Overview

1. Science 3 B Course Overview

2. Variation and Change

1. Variation and Change Introduction
2. Features of Living Things
 - In this section, you will make a list of common features of living things.
3. Living Things and Non Living Thing
 - In this section, you will distinguish between living things and nonliving things.
4. Compare Living and Non Living Things
 - In this section, you will examine nonliving things that seem to be alive and living things that do not seem to be alive.
5. Characteristics of Living Things
 - In this section, you will explain what characteristics living things have.
6. Trait Variation
 - In this section, you will identify how a variation in a trait may allow an organism to survive in an environment.
7. Variation and Reproduction
 - In this section, you will research how a variation may help an organism find a mate and reproduce.
8. Variation and Change Apply
 - In this section, you will use data to explain how an organism's variation may help the organism survive, find a mate, and reproduce.
9. Variation and Change Review

10. Variation and Change Unit Test

3. Fossils

1. Fossils Introduction

2. Fossil Formation

- In this section, you will collect information about how fossils form.

3. Fossil Clues

- In this section, you will make a list of the information that fossils tell us about time periods in the past.

4. Fossil Discovery

- In this section, you will record observations about organisms that no longer exist.

5. Extinction

- In this section, you will research an organism that no longer exists. You will also research the organism's environment.

6. Minerals

- In this section, you will describe the physical features used to identify minerals.
- In this section, you will use physical features to classify minerals.
- In this section, you will explain what soil is made of and how it forms.

7. Characteristics of Organisms

- In this section, you will describe the unusual features of an organism that lived long ago in a different environment.

8. Fossils Apply

- In this section, you will make a model to show how fossils form and what they tell us about the past.

9. Fossils Review and Reflect

10. Fossils Unit Test

4. Weather and Climate

1. Weather and Climate Introduction

2. Climate

- In this section, you will identify the characteristics of climate in different areas of Earth.

3. Climate Data

- In this section, you will interpret climate data in four different regions of the world.

4. Comparing Climates

- In this section, you will compare the climates in different parts of the world using tables and charts.
- In this section, you will compare the climates in different parts of the world.

5. Weather Data

- In this section, you will measure a weather feature over time.

6. Comparing Weather Data

- In this section, you will analyze the pattern of a weather feature during a season.

7. Weather Trends

- In this section, you will create a bar graph to track a single weather feature during a season.

8. Earth's Rotation

- In this section, your student will explain the rotation of the earth and day/night.
- In this section, your student will explain the apparent movement of the sun, moon, and stars across the sky.
- In this section, your student will learn to describe the changes that occur in the observable shape of the moon over the course of a month.

9. Weather Hazards Portfolio: Research

- In this section, you will make a list of dangerous kinds of weather.

10. Weather Hazards Portfolio: Design

- In this section, you will research how humans can reduce the effects of dangerous weather.

11. Weather Hazards Portfolio: Analyzing

- In this section, you will make a claim about how a solution to reducing the effects of dangerous weather can be both good and bad.

12. Weather Hazards Portfolio: Feedback

- In this section, you will analyze a friend's solution for reducing the effects of dangerous weather.

13. Weather and Climate Review and Reflect

14. Weather and Climate Unit Test

5. Technology

1. Technology Introduction

2. Introduction Technology and Engineering

- In this section, you will identify how the natural made world and the human made world are different.
- In this section, you will describe how using technology can be good or bad.

3. Engineering and the Design Process

- In this section, you will explain how materials are re-used or recycled.
- In this section, your student will identify and define products made to meet individual needs versus wants.
- In this section, your student will illustrate how people have made tools to provide food, clothing, and shelter.

4. Products, Procedures, and Processes

- In this section, your student will explain how design is a creative process and everyone can design solutions to problems.
- In this section, your student will explain why the design process requires creativity and consideration of all ideas.
- In this section, your student will identify that all products and systems are subject to failure.
- In this section, your student will recognize that many products and systems can be fixed.

5. Technology and Industry

- In this section, you will explore how technology devices can transfer information.

- In this section, your student will identify the technologies that support and improve quality of life.
- In this section, your student will identify processes used in agriculture that require different procedures, products, or systems.
- In this section, you will recognize that tools, machines, products, and systems use energy in order to do work.

6. Transportation and Construction

- In this section, you will explain how a system uses energy to do work.
- In this section, you will explain how transportation has many parts that work together to help people travel.
- In this section, you will explain how manufacturing systems design and produce products in quantity.

7. Construction and Design

- In this section, you will identify the different structures of buildings that people use for living, working, school, and travel.
- In this section, you will define problems that can be solved through the design process.

8. Technology Apply

- In this section, you will design a bridge that will hold a toy car.

9. Technology Review

10. Technology Unit Test

Science 3 Accelerated

Science 3 Accelerated A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, the student will explore forces and motion, magnets, and several topics related to life science. These topics include plant and animal life cycles, heredity, and animal groups. The student will have many opportunities to test hypotheses, experiment, and make real world connections.

Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester A Outline

1. Course Overview

1. Science 3 A Course Overview

2. States of Matter

1. States of Matter Introduction
2. States of Matter

- In this section, you will identify characteristics of states of matter.
- In this section, you will explain how the particles of matter are arranged.

3. Properties of Matter

- In this section, you will describe the different states of matter.

4. Physical Properties of Matter

- In this section, you will list the physical properties of matter.
- In this section, you will describe and compare the physical properties of matter.

5. Heating and Cooling Matter

- In this section, you will define the process of freezing, melting, boiling, and condensing.
- In this section, you will examine times when heating and cooling changes cannot be undone.

6. Changing States

- In this section, you will create a written or visual explanation of how heating and cooling can sometimes be undone.

7. States of Matter Apply

- In this section, you will investigate the states of matter by performing an experiment with vinegar and baking soda.

8. States of Matter Review

9. States of Matter Unit Test

3. Forces and Motion

1. Force and Motion Introduction

2. Objects in Motion and at Rest

- In this section, you will describe objects in motion.

3. Tug of War

- In this section, you will describe how unbalanced forces affect moving and non-moving objects.

4. Changes in Motion

- In this section, you will analyze data collected regarding an object's motion at different speeds and directions.

5. Patterns of Motion

- In this section, you will predict how an object's motion will behave.

6. Energy

- In this section, you will observe how energy can be found in moving objects and light.
- In this section, you will observe how energy can be found in heat and sound.

7. Characteristics of Magnets

- In this section, you will describe characteristics of magnets.
- In this section, you will classify objects and materials as magnetic or non-magnetic.
- In this section, you will classify objects and materials as conductors or insulators of electricity

8. Moving a Feather Part 1 Portfolio

- In this section, you will plan an investigation to explore how balanced and unbalanced forces affect the motion of an object.

9. Moving a Feather Part 2 Portfolio

- In this section, you will explore how balanced and unbalanced forces affect the motion of an object.

10. Moving a Feather Part 3 Portfolio

- In this section, you will summarize the results of your investigation about how balanced and unbalanced forces affect the motion of an object.

11. Forces and Motion Apply

- In this section, you will design a museum activity to teach people about balanced and unbalanced forces.

12. Forces and Motion Review and Reflect

13. Forces and Motion Unit Test

4. Plant and Animal Life Cycles

1. Plant and Animal Life Cycle Introduction

2. Animal Life Cycles

- In this section, you will identify parts of the life cycle of animals.
3. Plant Life Cycles
 - In this section, you will identify parts of the life cycle of plants.
 4. Life Cycle Comparison
 - In this section, you will make a model to compare the life cycles of living things.
 - In this section, you will compare the life cycles of living things in a venn diagram.
 5. Plant Needs
 - In this section, you will identify what plants need to grow, develop, and reproduce.
 6. Environmental Changes
 - In this section, you will explain how living in a group can help an animal survive if the environment changes.
 7. Plant Needs Portfolio: Plan
 - In this section, you will investigate what a plant needs to grow and change.
 8. Plant Needs Portfolio: Investigate
 - In this section, you will investigate what a plant needs to grow and change.
 9. Plant Needs Portfolio: Communicate
 - In this section, you will explain what a plant needs to grow, change, and reproduce.
 10. Plants and Animal Life Cycles Apply
 - In this section, you will create a display about the life cycles of plants and animals as well as the basic needs of plants.
 11. Plant and Animal Life Cycles Review
 12. Plant and Animal Life Cycles Unit Test

5. Plant Structures

1. Plant Structures Introduction
2. Plant Parts
 - In this section, you will describe external structures and their functions that help plants grow and survive.
3. Internal Plant Structures
 - In this section, you will describe how a plant's internal structures help it to grow and survive.
4. Plant Adaptations and Reproduction
 - In this section, you will identify external structures and their functions that help plants respond to their environment.
5. Plant Reproduction
 - In this section, you will show how plant structures allow plants to reproduce.
6. Inherited Traits of Plants
 - In this section, you will compare data to find differences in inherited traits among offspring of different plant parents.
 - In this section, you will analyze graphs to compare data.

- In this section, you will examine seeds to determine possible traits of trees and seeds.
7. Comparing Offspring to Parent
 - In this section, you will explain why offspring may be similar to or different from their parents.
 8. Plant Structure Portfolio: Plan
 - In this section, you will collect data from an investigation about how plants survive, grow, respond, or reproduce. You will also show how structure is related to function.
 9. Plant Structure Portfolio: Investigate
 - In this section, you will plan and carry out an investigation that examines how a plant survives, grows, responds, or reproduces. You will also collect data from your investigation.
 10. Plant Structure Portfolio: Communicate
 - In this section, you will plan and carry out an investigation that examines how a plant survives, grows, responds, or reproduces. You will also collect data from your investigation and use it to support a claim about how plants use certain structures to function.
 11. Plant Structures Review
 12. Plant Structures Unit Test

Semester B Summary: In this course, the student will explore variation and change, such as the characteristics of living versus non-living organisms and environmental change, and life science topics. These include habitats, fossils, and weather and climate. The student will have many opportunities to test hypotheses, experiment, and make real world connections.

Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester B Outline

1. Course Overview

1. Science 3 B Course Overview

2. Variation and Change

1. Variation and Change Introduction
2. Features of Living Things
 - In this section, you will make a list of common features of living things.
3. Living Things and Non Living Thing
 - In this section, you will distinguish between living things and nonliving things.
4. Compare Living and Non Living Things
 - In this section, you will examine nonliving things that seem to be alive and living things that do not seem to be alive.
5. Characteristics of Living Things
 - In this section, you will explain what characteristics living things have.
6. Trait Variation

- In this section, you will identify how a variation in a trait may allow an organism to survive in an environment.

7. Variation and Reproduction

- In this section, you will research how a variation may help an organism find a mate and reproduce.

8. Variation and Change Apply

9. Variation and Change Review

10. Variation and Change Unit Test

3. Fossils

1. Fossil Introduction

2. Fossil Formation

- In this section, you will collect information about how fossils form.

3. Fossil Clues

- In this section, you will make a list of the information that fossils tell us about time periods in the past.

4. Fossil Discovery

- In this section, you will record observations about organisms that no longer exist.

5. Extinction

- In this section, you will research an organism that no longer exists. You will also research the organism's environment.

6. Minerals

- In this section, you will describe the physical features used to identify minerals.
- In this section, you will use physical features to classify minerals.
- In this section, you will explain what soil is made of and how it forms.

7. Characteristics of Organisms

- In this section, you will describe the unusual features of an organism that lived long ago in a different environment.

8. Fossil Apply

- In this section, you will make a model to show how fossils form and what they tell us about the past.

9. Fossils Review

10. Fossils Unit Test

4. Weather and Climate

1. Weather and Climate Introduction

2. Climate

- In this section, you will identify the characteristics of climate in different areas of Earth.

3. Climate Data

- In this section, you will interpret climate data in four different regions of the world.

4. Comparing Climates

- In this section, you will compare the climates in different parts of the world using tables and charts.
- In this section, you will compare the climates in different parts of the world.

5. Weather Data

- In this section, you will measure a weather feature over time.

6. Comparing Weather Data

- In this section, you will analyze the pattern of a weather feature during a season.

7. Weather Trends

- In this section, you will create a bar graph to track a single weather feature during a season.

8. Earth's Rotation

- In this section, your student will explain the rotation of the earth and day/night.
- In this section, your student will explain the apparent movement of the sun, moon, and stars across the sky.
- In this section, your student will learn to describe the changes that occur in the observable shape of the moon over the course of a month.

9. Weather Hazards Portfolio: Research

- In this section, you will make a list of dangerous kinds of weather.

10. Weather Hazards Portfolio: Design

- In this section, you will research how humans can reduce the effects of dangerous weather.

11. Weather Hazards Portfolio: Analyzing

- In this section, you will make a claim about how a solution to reducing the effects of dangerous weather can be both good and bad.

12. Weather Hazards Portfolio: Feedback

- In this section, you will analyze a friend's solution for reducing the effects of dangerous weather.

13. Weather and Climate Review and Reflect

14. Weather and Climate Unit Test

5. Technology

1. Technology Introduction

2. Introduction Technology and Engineering

- In this section, you will identify how the natural made world and the human made world are different.
- In this section, you will describe how using technology can be good or bad.

3. Engineering and the Design Process

- In this section, you will explain how materials are re-used or recycled.
- In this section, your student will identify and define products made to meet individual needs versus wants.
- In this section, your student will illustrate how people have made tools to provide food, clothing, and shelter.

4. Products, Procedures, and Processes

- In this section, your student will explain how design is a creative process and everyone can design solutions to problems.
- In this section, your student will explain why the design process requires creativity and consideration of all ideas.
- In this section, your student will identify that all products and systems are subject to failure.
- In this section, your student will recognize that many products and systems can be fixed.

5. Technology and Industry

- In this section, you will explore how technology devices can transfer information.
- In this section, your student will identify the technologies that support and improve quality of life.
- In this section, your student will identify processes used in agriculture that require different procedures, products, or systems.
- In this section, you will recognize that tools, machines, products, and systems use energy in order to do work.

6. Transportation and Construction

- In this section, you will explain how a system uses energy to do work.
- In this section, you will explain how transportation has many parts that work together to help people travel.
- In this section, you will explain how manufacturing systems design and produce products in quantity.

7. Construction and Design

- In this section, you will identify the different structures of buildings that people use for living, working, school, and travel.
- In this section, you will define problems that can be solved through the design process.

8. Technology Apply

- In this section, you will design a bridge that will hold a toy car.

9. Technology Review

10. Technology Unit Test

Science 4

Science 4 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, the student will explore multiple concepts related to earth. Topics include the solar system, earth's layers and features, and light and sound. In addition, the student will study properties of matter.

Throughout the course, the student will have many opportunities to plan, test hypotheses, experiment, organize and analyze data, and make real world connections.

Semester A Outline

1. Course Overview

1.Science 4A Course Overview

2. The Solar System

1. The Solar System Introduction

2. Objects in the Solar System

- In this section, you will identify the objects in the solar system.
- In this section, you will explain that the universe contains many billions of galaxies each containing billions of stars.

3. Properties of Objects in Solar System

- In this section, you will compare the properties of the objects in the solar system.
- In this section, you will identify the major lunar phases.

4. Motion of Objects in Solar System

- In this section, you will analyze the properties and motion of objects in the solar system.

5. Size of Objects in the Solar System

- In this section, you will compare the sizes of the objects in the solar system.
- In this section, you will identify the basic characteristics and uses of telescopes.

6. The Solar System Apply

- In this section, you will develop a model of the objects in the solar system, their characteristics, and their relative sizes.

7. The Solar System Review

8. The Solar System Unit Test

3. Earth's Layers and Features

1. Earth's Layers and Features Introduction

2. Patterns and Fossil Identification

- In this section, you will describe patterns and fossils in rock layers.

3. Rock Layers

- In this section, you will investigate how rock layers change over time.

4. Changes in Environment

- In this section, you will observe and make predictions about fossils and rock formations.

5. Earth's Features

- In this section, you will identify several different landscape features on a map.

6. Identify Patterns

- In this section, you will analyze a map to identify patterns in Earth's features.

7. Earth's Major Systems

- In this section, you will define and identify the parts of Earth's major systems: the geosphere, the hydrosphere, the atmosphere, and the biosphere.

8. Water on Earth

- In this section, you will graph data about the amounts of freshwater and saltwater found on Earth.
- In this section, you will use graphs to describe where saltwater and freshwater are found on Earth.

9. Weather on Earth

- In this section, you will describe elements of the weather.
- In this section, you will identify weather patterns.
- In this section, you will describe how weather is measured.

10. Earth's Layers and Features Apply

- In this section, you will hypothesize how tectonic plates might have interacted to form the Andes Mountains.

11. Earth's Layers and Features Review

12. Earth's Layers and Features Unit Test

4. Light and Sound

1. Light and Sound Introduction

2. Light Interactions

- In this section, you will describe how light reflects off some objects.
- In this section, you will describe how light bends when it hits some objects.
- In this section, you will describe how light is absorbed when it hits some objects.

3. Classify Light Interactions

- In this section, you will make a model to explain what light does when it hits objects.

- In this section, you will sort objects as opaque, transparent, or translucent.
4. Mirror Investigation
 - In this section, you will describe how mirrors interact with light.
 - In this section, you will describe how to test how light reflects from a mirror.
 - In this section, you will test how light reflects from a mirror.
 5. Refraction Investigation
 - In this section, you will identify which materials can refract light and describe the phenomenon.
 - In this section, you will describe how to test refraction of light.
 - In this section, you will test refraction of light.
 6. Sound Investigation
 - In this section, you will use print and video sources to describe how vibrations produce sounds depending on how strong and fast they are.
 - In this section, you will plan an investigation to make sound and predict how a change in the strength or speed of the vibrations will affect the sound.
 - In this section, you will use everyday objects to make sound and predict how changing the strength and speed of the vibrations will affect the sound.
 7. Light and Sound: Design
 - In this section, you will use print and video sources to explain how devices use sound and light to communicate.
 - In this section, you will design a device that uses light and/or sound to communicate across a distance.
 8. Light and Sound: Create
 - In this section, you will make a device that uses light and/or sound to communicate across a distance.
 9. Light and Sound Apply
 10. Light and Sound Review
 11. Light and Sound Unit Test

5. Properties of Matter

1. Properties of Matter Introduction
2. Solids, Liquids, and Gases
 - In this section, you will explain how matter is organized into solids, liquids, and gases.
3. Matter Composition
 - In this section, you will model how tiny particles make up matter.
4. Modeling Matter
 - In this section, you will conduct an investigation and model the tiny particles that make up bulk matter.

5. Color, Hardness, and Reflectivity

- In this section, you will describe properties of matter and identify materials based on these properties.

6. Thermal and Electrical Conductivity

- In this section, you will compare thermal and electrical conductivity.

7. Freezing and Boiling

- In this section, you will describe the properties of freezing point and boiling point and examine the behavior of particles at these temperatures.

8. Solubility

- In this section, you will identify the solute and solvent in a solution.

9. Matter Portfolio: Plan

- In this section, you will identify materials based on their properties.

10. Matter Portfolio: Investigate

- In this section, you will identify materials based on their properties.

11. Matter Portfolio: Conclude

- In this section, you will analyze data from an investigation about the properties of certain materials.

12. Properties of Matter Unit Review

13. Properties of Matter Unit Test

Semester B Summary: In this course, the student will explore both physical and life science topics. The physical topics include changes in matter and electricity and magnets. Students will also be introduced to animal structures, habitats, environmental changes, and technology.

Throughout the course, the student will have many opportunities to plan, test hypotheses, experiment, organize and analyze data, and make real world connections.

Semester B Outline

1. Course Overview

1. Science 4 B Course Overview

2. Changes in Matter

1. Changes in Matter Introduction

2. Physical and Chemical Change

- In this section, you will compare physical change and chemical change.
- In this section, you will explain why the mass of a substance does not change after heating, cooling, or mixing with other substances.

3. Conserving Mass

- In this section, you will confirm that the total weight of substances undergoing a physical or chemical change remains the same.

4. Mixing Substances Portfolio: Plan

- In this section, you will determine whether the mixing of substances results in new substances being formed.
5. Mixing Substances Portfolio: Investigate
 - In this section, you will determine whether the mixing of substances results in new substances being formed.
 6. Mixing Substances Portfolio: Conclude
 7. Changes in Matter Appy
 - In this section, you will explain why a substance weighed less after being mixed with acid than it did before being mixed.
 8. Changes in Matter Review
 9. Changes in Matter Unit Test

3. Electricity and Magnets

1. Electricity and Magnets Introduction
2. Types of Circuits
 - In this section, you will identify and describe parallel and series circuits.
 - In this section, you will compare and contrast series and parallel circuits.
3. Insulators and Conductors
 - In this section, you will identify materials that speed up or slow down the conduction of electricity.
 - In this section, you will describe examples of insulators and conductors of electricity.
 - In this section, you will plan an investigation to determine whether common materials are insulators or conductors of electricity.
4. Magnets
 - In this section, you will observe and list characteristics of magnets.
 - In this section, you will ask questions about the causes of electric interactions between two objects that are not touching.
 - In this section, you will test magnets.
5. Energy
 - In this section, you will identify the importance of energy conservation.
 - In this section, you will explain how an object's change in motion can be measured.
 - In this section, you will identify the ability of energy to be stored and changed from one form to another.
 - In this section, you will give examples of how energy can be transformed from one form to another.
6. Electricity and Magnets Apply
7. Electricity and Magnets Review
8. Electricity and Magnets Unit Test

4. Animal Structures

1. Animal Structures Introduction

2. External and Internal Animal Structures

- In this section, you will identify external parts of animals that help them to survive and grow.
- In this section, you will identify internal structures and their functions that help animals survive and grow.

3. Adaptations

- In this section, you will identify external structures that help animals respond to their environment.

4. Adaptations for Reproduction

- In this section, you will identify structures and behaviors that help animals reproduce.

5. Animal Structure Apply

- In this section, you will use evidence to make a claim about how animal structures affect their survival, growth, behavior, or reproduction.

6. Animal Structure Review

7. Animal Structures Unit Test

5. Habitats

1. Habitats Introduction

2. Types of Resources in Habitats

- In this section, you will identify the things in a habitat that organisms need to live.
- In this section, you will identify resources as basic materials, produce materials, or nonmaterials.

3. Living Things in Habitats

- In this section, you will find examples of relationships between living things and their habitat.
- In this section, you will analyze data to explain which organisms in a group have the best chance of survival.

4. Habitats

- In this section, you will explain how the parts of a habitat depend on each other.

5. Plants and Animals

- In this section, your student will classify plants and animals according to the physical characteristics that they share.
- In this section, your student will identify differences in the life cycles of plants and animals.
- In this section, your student will construct models of animal and plant life cycles.
- In this section your student will interpret diagrams of animal and plant life cycles.

6. Habitats Apply

7. Habitats Review

8. Habitats Unit Test

6. Environmental Changes

1. Environmental Changes Introduction

2. Population Survival

- In this section, you will analyze how a population’s survival is affected when organisms reproduce less often.
 - In this section, you will make a claim about how reproduction rates affect the survival of a population.
3. Environmental Changes: Research
 - In this section, you will research a solution to a problem caused when people change the environment, harming plant and animal life.
 4. Environmental Changes: Analyzing
 - In this section, you will make a claim about how well your solution solves the problem of humans harming plants and animals.
 5. Environmental Changes: Discussion
 - In this section, you will give effective feedback to peers.
 6. Environmental Changes Discussion
 7. Environmental Changes Apply
 8. Environmental Changes Review
 9. Environmental Changes Unit Test

7. Technology

1. Technology Introduction
2. Working Together
 - In this section, you will describe tools, materials, and skills that are used to make things and carry out tasks.
 - In this section, you will explain that systems have parts and components that work together.
 - In this section, you will identify how simple hand tools are used correctly and safely.
3. Impact of Technology
 - In this section, you will explain how various relationships exist between technology and other fields.
 - In this section, you will describe how technology affects humans in various ways.
 - In this section, you will explain how the use of technology affects the environment in good and bad ways.
4. Development of Technology
 - In this section, you will explain why technologies are developed and improved based on needs and wants.
 - In this section, you will describe how the history of civilization is linked closely to technological development.
5. Repairs and Improvements
 - In this section, you will explain how asking questions and making observations help a person understand how things work and can be repaired.
 - In this section, you will investigate how things are made and how they can be improved.
 - In this section, you will use everyday symbols to communicate key ideas.
6. The Design Process

- In this section, you will explain why there is no perfect design.
- In this section, you will describe the engineering design process.
- In this section, you will identify tools and devices that have been designed to provide information about a healthy lifestyle.
- In this section, you will identify the technologies in agriculture that make it possible for food to be available year-round.

7. Transportation and Manufacturing

- In this section, you will identify that a transportation system h
- In this section, you will identify key aspects of manufacturing processes. as many parts that work together to move people and goods from place to place.
- In this section, you will explain how structures rest on foundations and that some structures are temporary, while others are permanent.

8. Technology Apply

- In this section, you will apply what you have learned about technology.

9. Technology Review

10. Technology Unit Test

- In this section, you will identify several plans for reducing the impact of natural Earth events on humans.

Science 4 Accelerated

Science 4 Accelerated A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: In this course, the student will explore multiple concepts related to energy and the structures of plants and animals. Topics include the transfer and forms of energy such as mechanical energy, speed, sound, light, heat, and electric currents. In addition, the student will study the internal structures of plants and animals. These comprise systems of reproduction and adaptation.

Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways and apply their ideas.

Semester A Outline

1. Course Overview

1. Course Overview

2. The Solar System

1. The Solar System Introduction

2. Objects in the Solar System

- In this section, you will identify the objects in the solar system.
- In this section, you will explain that the universe contains many billions of galaxies each containing billions of stars.

3. Properties of Objects in Solar System

- In this section, you will compare the properties of the objects in the solar system.
- In this section, you will identify the major lunar phases.

4. Motion of Objects in Solar System

- In this section, you will analyze the properties and motion of objects in the solar system.

5. Size of Objects in the Solar System

- In this section, you will compare the sizes of the objects in the solar system.
- In this section, you will identify the basic characteristics and uses of telescopes.

6. The Solar System Apply

- In this section, you will develop a model of the objects in the solar system, their characteristics, and their relative sizes.

7. The Solar System Review
8. The Solar System Unit Test

3. Earth's Layers and Features

1. Earth's Layers and Features Introduction
2. Patterns and Fossil Identification
 - In this section, you will describe patterns and fossils in rock layers.
3. Rock Layers
 - In this section, you will investigate how rock layers change over time.
4. Changes in Environment
 - In this section, you will observe and make predictions about fossils and rock formations.
5. Earth's Features
 - In this section, you will identify several different landscape features on a map.
6. Identify Patterns
 - In this section, you will analyze a map to identify patterns in Earth's features.
7. Earth's Major Systems
 - In this section, you will define and identify the parts of Earth's major systems: the geosphere, the hydrosphere, the atmosphere, and the biosphere.
8. Water on Earth
 - In this section, you will graph data about the amounts of freshwater and saltwater found on Earth.
 - In this section, you will use graphs to describe where saltwater and freshwater are found on Earth.
9. Weather on Earth
 - In this section, you will describe elements of the weather.
 - In this section, you will identify weather patterns.
 - In this section, you will describe how weather is measured.
10. Earth's Layers and Features Apply
 - In this section, you will hypothesize how tectonic plates might have interacted to form the Andes Mountains.
11. Earth's Layers and Features Review
12. Earth's Layers and Features Unit Test

4. Light and Sound

1. Light and Sound Introduction
2. Light Interactions
 - In this section, you will describe how light reflects off some objects.
 - In this section, you will describe how light bends when it hits some objects.
 - In this section, you will describe how light is absorbed when it hits some objects.

3. Classify Light Interactions

- In this section, you will make a model to explain what light does when it hits objects.
- In this section, you will sort objects as opaque, transparent, or translucent.

4. Mirror Investigation

- In this section, you will describe how mirrors interact with light.
- In this section, you will describe how to test how light reflects from a mirror.
- In this section, you will test how light reflects from a mirror.

5. Refraction Investigation

- In this section, you will identify which materials can refract light and describe the phenomenon.
- In this section, you will describe how to test refraction of light.
- In this section, you will test refraction of light.

6. Sound Investigation

- In this section, you will use print and video sources to describe how vibrations produce sounds depending on how strong and fast they are.
- In this section, you will plan an investigation to make sound and predict how a change in the strength or speed of the vibrations will affect the sound.
- In this section, you will use everyday objects to make sound and predict how changing the strength and speed of the vibrations will affect the sound.

7. Light and Sound: Design

- In this section, you will use print and video sources to explain how devices use sound and light to communicate.
- In this section, you will design a device that uses light and/or sound to communicate across a distance.

8. Light and Sound: Create

- In this section, you will make a device that uses light and/or sound to communicate across a distance.

9. Light and Sound Apply

10. Light and Sound Review

11. Light and Sound Unit Test

5. Properties of Matter

1. Properties of Matter Introduction

2. Solids, Liquids, and Gases

- In this section, you will explain how matter is organized into solids, liquids, and gases.

3. Matter Composition

- In this section, you will model how tiny particles make up matter.

4. Modeling Matter

- In this section, you will conduct an investigation and model the tiny particles that make up bulk matter.

5. Color, Hardness, and Reflectivity

- In this section, you will describe properties of matter and identify materials based on these properties.

6. Thermal and Electrical Conductivity

- In this section, you will compare thermal and electrical conductivity.

7. Freezing and Boiling

- In this section, you will describe the properties of freezing point and boiling point and examine the behavior of particles at these temperatures.

8. Solubility

- In this section, you will identify the solute and solvent in a solution.

9. Matter Portfolio: Plan

- In this section, you will identify materials based on their properties.

10. Matter Portfolio: Investigate

- In this section, you will identify materials based on their properties.

11. Matter Portfolio: Conclude

- In this section, you will analyze data from an investigation about the properties of certain materials.

12. Properties of Matter Unit Review

13. Properties of Matter Unit Test

Semester B Summary: In this course, the student will study the brain in animals and explore multiple areas of earth science. This includes the senses, how the brain processes information, weathering and erosion, Earth's layers and features, natural disasters, and their impact on life. The student will examine natural energy resources including resource conservation and the environment.

Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways and apply their ideas.

Semester B Outline

1. Course Overview

1. Science 4 B Course Overview

2. Changes in Matter

1. Changes in Matter Introduction

2. Physical and Chemical Change

- In this section, you will compare physical change and chemical change.
- In this section, you will explain why the mass of a substance does not change after heating, cooling, or mixing with other substances.

3. Conserving Mass

- In this section, you will confirm that the total weight of substances undergoing a physical or chemical change remains the same.

4. Mixing Substances Portfolio: Plan

- In this section, you will determine whether the mixing of substances results in new substances being formed.

5. Mixing Substances Portfolio: Investigate

- In this section, you will determine whether the mixing of substances results in new substances being formed.

6. Mixing Substances Portfolio: Conclude

7. Changes in Matter Appy

- In this section, you will explain why a substance weighed less after being mixed with acid than it did before being mixed.

8. Changes in Matter Review

9. Changes in Matter Unit Test

3. Electricity and Magnets

1. Electricity and Magnets Introduction

2. Types of Circuits

- In this section, you will identify and describe parallel and series circuits.
- In this section, you will compare and contrast series and parallel circuits.

3. Insulators and Conductors

- In this section, you will identify materials that speed up or slow down the conduction of electricity.
- In this section, you will describe examples of insulators and conductors of electricity.
- In this section, you will plan an investigation to determine whether common materials are insulators or conductors of electricity.

4. Magnets

- In this section, you will observe and list characteristics of magnets.
- In this section, you will ask questions about the causes of electric interactions between two objects that are not touching.
- In this section, you will test magnets.

5. Energy

- In this section, you will identify the importance of energy conservation.
- In this section, you will explain how an object's change in motion can be measured.
- In this section, you will identify the ability of energy to be stored and changed from one form to another.
- In this section, you will give examples of how energy can be transformed from one form to another.

6. Electricity and Magnets Apply

7. Electricity and Magnets Review

8. Electricity and Magnets Unit Test

4. Animal Structures

1. Animal Structures Introduction

2. External and Internal Animal Structures

- In this section, you will identify external parts of animals that help them to survive and grow.
- In this section, you will identify internal structures and their functions that help animals survive and grow.

3. Adaptations

- In this section, you will identify external structures that help animals respond to their environment.

4. Adaptations for Reproduction

- In this section, you will identify structures and behaviors that help animals reproduce.

5. Animal Structure Apply

- In this section, you will use evidence to make a claim about how animal structures affect their survival, growth, behavior, or reproduction.

6. Animal Structure Review

7. Animal Structures Unit Test

5. Habitats

1. Habitats Introduction

2. Types of Resources in Habitats

- In this section, you will identify the things in a habitat that organisms need to live.
- In this section, you will identify resources as basic materials, produce materials, or nonmaterials.

3. Living Things in Habitats

- In this section, you will find examples of relationships between living things and their habitat.
- In this section, you will analyze data to explain which organisms in a group have the best chance of survival.

4. Habitats

- In this section, you will explain how the parts of a habitat depend on each other.

5. Plants and Animals

- In this section, your student will classify plants and animals according to the physical characteristics that they share.
- In this section, your student will identify differences in the life cycles of plants and animals.
- In this section, your student will construct models of animal and plant life cycles.
- In this section your student will interpret diagrams of animal and plant life cycles.

6. Habitats Apply

7. Habitats Review

8. Habitats Unit Test

6. Environmental Changes

1. Environmental Changes Introduction

2. Population Survival

- In this section, you will analyze how a population's survival is affected when organisms reproduce less often.
 - In this section, you will make a claim about how reproduction rates affect the survival of a population.
3. Environmental Changes: Research
 - In this section, you will research a solution to a problem caused when people change the environment, harming plant and animal life.
 4. Environmental Changes: Analyzing
 - In this section, you will make a claim about how well your solution solves the problem of humans harming plants and animals.
 5. Environmental Changes: Discussion
 - In this section, you will give effective feedback to peers.
 6. Environmental Changes Discussion
 7. Environmental Changes Apply
 8. Environmental Changes Review
 9. Environmental Changes Unit Test

7. Technology

1. Technology Introduction
2. Working Together
 - In this section, you will describe tools, materials, and skills that are used to make things and carry out tasks.
 - In this section, you will explain that systems have parts and components that work together.
 - In this section, you will identify how simple hand tools are used correctly and safely.
3. Impact of Technology
 - In this section, you will explain how various relationships exist between technology and other fields.
 - In this section, you will describe how technology affects humans in various ways.
 - In this section, you will explain how the use of technology affects the environment in good and bad ways.
4. Development of Technology
 - In this section, you will explain why technologies are developed and improved based on needs and wants.
 - In this section, you will describe how the history of civilization is linked closely to technological development.
5. Repairs and Improvements
 - In this section, you will explain how asking questions and making observations help a person understand how things work and can be repaired.
 - In this section, you will investigate how things are made and how they can be improved.
 - In this section, you will use everyday symbols to communicate key ideas.
6. The Design Process

- In this section, you will explain why there is no perfect design.
- In this section, you will describe the engineering design process.
- In this section, you will identify tools and devices that have been designed to provide information about a healthy lifestyle.
- In this section, you will identify the technologies in agriculture that make it possible for food to be available year-round.

7. Transportation and Manufacturing

- In this section, you will identify that a transportation system h
- In this section, you will identify key aspects of manufacturing processes. as many parts that work together to move people and goods from place to place.
- In this section, you will explain how structures rest on foundations and that some structures are temporary, while others are permanent.

8. Technology Apply

- In this section, you will apply what you have learned about technology.

9. Technology Review

10. Technology Unit Test

Science 5

Science 5 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: This course is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum engages students in problem-solving and scientific investigation and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will learn about the solar system; the Earth, Sun, and stars; gravity; the properties of matter; and more.

Semester A Outline

1. Course Overview

1. Science 5 A Course Overview

2. Energy Transfer

1. Energy Transfer Introduction

2. Sound and Light

- In this section, you will identify evidence that energy can be transferred through sound waves.
- In this section, you will identify evidence that energy can be transferred through light.

3. Heat Energy

- In this section, you will compare different sources of energy.
- In this section, you will generate a list of ways that might make the transfer of heat energy go up or down.
- In this section, you will identify how to make the transfer of heat go up or down.
- In this section, you will describe how water can be changed from one state to another by adding or taking away heat.

4. Mass and Motion

- In this section, you will explain how changes in mass affect the motion of an object.
- In this section, you will predict the effect of a change in mass on the motion of an object.

5. Electromagnets

- In this section, you will make a plan to discover what affects electromagnets.
- In this section, you will discover what affects electromagnets.

6. Electric Currents

- In this section you will identify evidence that energy can be transferred through electric currents

7. Electrical Circuits

- In this section, you will explain the parts of a circuit.
- In this section, you will design a simple electric circuit to demonstrate the flow of electricity in closed circuits.

8. Converting Energy Portfolio: Day 1

- In this section, you will list some ideas for devices that can change energy from one form to another.

9. Converting Energy Portfolio: Design

- In this section, you will plan a device that can change energy from one form to another.

10. Converting Energy Portfolio: Create

- In this section, you will build a device that changes energy from one form to another.

11. Converting Energy Portfolio: Test

- In this section, you will test a device that changes energy from one form to another.

12. Converting Energy Portfolio: Improve

- In this section, you will modify the device you made.

13. Energy Transfer Review

14. Energy Transfer Unit Test

3. Sound

1. Sound Introduction

2. Pitch, Volume, Vibration

- In this section, you will describe vibration, pitch, and volume.
- In this section, you will explain how the pitch of a sound, vibration, and changes that affect pitch are connected.

3. Changes in Vibration

- In this section, you will use data to show how changes in vibration change pitch and volume.
- In this section, you will explain how vibration affects pitch and volume.

4. How Sound is Produced

- In this section, you will explain how sound energy is made.
- In this section, you will describe how sound is affected by the objects that make it.
- In this section, you will make a plan to see how pitch, volume, and vibration are affected by objects that make sound.

5. Sound Investigation: Conduct

- In this section, you will discover how pitch, volume, and vibration are affected by objects that make sound.

6. Sound Apply

7. Sound Review

8. Sound Unit Test

4. Natural Energy Resources

1. Natural Energy Resources Introduction

- In this lesson, you will learn about being social and sociable.

2. Renewable Resource

- In this section, you will explain how human use renewable resources to make energy.

3. Nonrenewable Resources

- In this section, you will explain how humans use nonrenewable resources to make energy.

4. Natural Resources and the Environment

- In this section, you will explain how using natural resources as fuels affects the environment.

5. Efficiency of Energy Resources

- In this section, you will look at how much energy can be produced from a resource and the cost of different types of energy resources.

6. Comparison of Energy Resources

- In this section, you will compare and contrast the advantages and disadvantages of different energy resources

7. Resource Conservation

- In this section, you will explain why Earth's resources need to be conserved.

8. Natural Energy Resources Apply

- In this section, you will analyze the different renewable and nonrenewable energy choices for a new home.

9. Natural Energy Resources Review

10. Natural Energy Resources Unit Test

5. Ecosystems

1. Ecosystems Introduction

2. Living and Nonliving Components

- In this section, you will identify the living and nonliving parts of an ecosystem.

3. Terrestrial Ecosystems

- Identify and describe the biotic and abiotic factors of different terrestrial ecosystems

4. Aquatic Ecosystems

- In this section, you will describe the living and nonliving parts of different aquatic ecosystems.

5. Comparing Factors in Ecosystems

6. Ecosystems Apply

- In this section, you will design a terrarium for a pet frog using what you've learned about the biotic and abiotic components needed for life.

7. Ecosystems Review

8. Ecosystems Unit Test

6. Transfer of Energy

1. Transfer of Energy Introduction
2. Plant Growth
 - In this section, you will explain why plants do not get most of the materials they need to grow from the soil.
3. Photosynthesis
 - In this section, you will interpret models to explain that plants cannot grow without water or air.
4. Plant Matter
5. Animals and Food
 - In this section, you will describe how food gives animals the energy they need for their life functions.
6. Food Chains
 - In this section, you will describe how the sun's energy moves from plants to animals when plants make food and then animals eat the plants.
7. Energy Flow
 - In this section, you will make a model to show how energy moves from the sun to plants and then to animals.
8. The Water Cycle
 - In this section, you will describe the parts of the water cycle.
 - In this section, you will describe a model of the water cycle.
 - In this section, you will explain the process of Earth's water cycle.
 - In this section, you will learn how the cycling of water, both in and out of the atmosphere, has an effect on climate.
9. Transfer of Energy Apply
10. Transfer of Energy Review
11. Transfer of Energy Unit Test

Semester B Summary: This course is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum, which meets Next Generation Science Standards (NGSS), engages students in problem-solving and scientific investigation and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will learn about physical and chemical changes in matter, the ecosystem, plant growth and photosynthesis, food webs, conservation, among other things.

Semester B Outline

1. Course Overview

1. Science 5 B Course Overview

2. Heredity and Living Cells

1. Heredity and Living Cells Introduction
2. Comparing Life Cycles

- In this section, you will identify different patterns in life cycles.
- In this section, you will identify similar patterns in life cycles.

3. Instincts and Learned Behaviors

- In this section, you will describe different instincts and learned behaviors.
- In this section, you will compare instincts and learned behaviors.
- In this section, you will classify some animal behaviors as instincts or learned behaviors.

4. Inherited and Acquired Traits

- In this section, you will describe some inherited and acquired traits.
- In this section, you will compare inherited and acquired traits.
- In this section, you will classify some traits as inherited or acquired.

5. Inherited Traits

- In this section, you will describe how adaptations help organisms survive in their environment.
- In this section, you will explain that inherited characteristics can be affected by the environment.
- In this section, you will identify external parts of animals that help them to survive and grow.

6. Plant and Animal Cells

- In this section, you will identify the parts of an animal cell.
- In this section, you will identify the parts of a plant cell.

7. Comparing Cells

- In this section, you will use models to compare plant and animal cells.
- In this section, you will explain differences between the structures of plant and animal cells.

8. Advantages and Survival

- In this section, you will describe how a trait helpful in one environment might not be helpful in another.
- In this section, you will explain how physical traits can provide an advantage for survival in a given environment.

9. Heredity and Living Cells Apply

10. Heredity and Living Cells Review

11. Heredity and Living Cells Unit Test

3. Weathering and Erosion

1. Weathering and Erosion Introduction

2. Constructive Forces

- In this section, you will describe some examples of constructive forces.
- In this section, you will identify and describe landforms created by constructive forces.

3. Weathering and Erosion

- In this section, you will explain the difference between two forms of destructive forces, weathering and erosion.

4. Destructive Forces and Landforms

- In this section you will describe landforms created by destructive forces.

5. Physical Weathering

- In this section you will describe the process of weathering.

6. Erosion and Soil

- In this section, you will explain the difference between two forms of constructive forces, weathering and erosion.
- In this section, you will explain how geological processes observed today are similar to those in the past.

7. Weathering and Erosion Apply

- In this section, you will illustrate the journey of destructive and constructive forces that led a piece of soil of your choosing to its current resting place.

8. Weathering and Erosion Review

9. Weathering and Erosion Unit Test

4. Weather and Climate

1. Weather and Climate Introduction

2. Weather and Climate

- In this section, you will describe different types of weather and climate.
- In this section, you will contrast weather and climate.
- In this section, you will explain the difference between weather and climate in writing or with a picture.

3. Weather Data

- In this section, you will investigate weather based on data.
- In this section, you will explain how weather instruments are used to collect weather data and make forecasts.

4. Weather Patterns

- In this section, you will identify different weather patterns.
- In this section, you will explain daily and seasonal changes in weather conditions.
- In this section, you will analyze trends found in weather data collection.

5. Changes in Weather

- In this section, you will describe what causes weather conditions to change.
- In this section, you will examine different ways to measure changes in weather.

6. Tracking Weather Data

- In this section, you will use a data table to measure a single weather indicator over a six-week period.
- In this section, you will analyze data to show patterns in a weather indicator during a season.
- In this section, you will model the data and predicted pattern for a weather indicator during a season.

7. Weather and Climate Apply

8. Weather and Climate Review

9. Weather and Climate Unit Test

5. Earth, Sun, and Stars

1. Earth, Sun, and Stars Introduction

2. The Sun and Other Stars

- In this section, you will describe the sun and other stars as natural bodies that give off their own light.

3. Brightness and Distance

- In this section, you will relate the brightness of the sun and stars to their distance from Earth

4. Patterns of Change Portfolio: Shadows

- In this section, you will graph the daily changes of shadows that are caused by Earth's rotation and orbit around the sun.

5. Patterns of Change Portfolio: Analyze

- In this section, you will analyze how shadows change throughout a day as Earth rotates on its axis.

6. Patterns of Change Portfolio: Daylight

- In this section, you will analyze how shadows change throughout a day as Earth rotates on its axis.

7. Patterns of Change Portfolio: Patterns

- In this section, you will analyze graphs that show how the length of daylight changes throughout the year.

8. Mass and Distance

- In this section, you will explain how the relationship between mass and distance affects gravity.

9. Earth, Sun, and Stars Apply

- In this activity, you will develop a model that shows how the revolution of Earth explains the apparent motion of the sun and stars during a 24-hour day.

10. Earth Sun and Stars Review

11. Earth, Sun, and Stars Unit Test

6. Technology

1. Technology Introduction

2. Introduction Technology and Engineering

- In this section, you will understand what a subsystem is and how it relates to its larger system.
- In this section, you will describe how technologies are often combined.

3. Engineering and the Design Process

- In this section, you will explain how the use of technology can have unintended consequences.
- In this section, you will compare different ways waste may be appropriately recycled or disposed of to prevent unnecessary harm to the environment.
- In this section, you will describe how community concerns support technological developments.
- In this section, you will describe how community concerns limit technological developments.

4. Products, Procedures, and Processes

- In this section, you will identify how the way people live and work has changed history in terms of (influencing/directing/advancements in) technology.
- In this section, you will explain how the design process is a purposeful method of planning practical solutions to problems.
- In this section, you will describe how design can be performed in different sequences and repeated.
- In this section, you will identify how invention and innovation are creative ways to turn ideas into real things.

5. Technology and Industry

- In this section, you will use information provided in manuals, protocols, or by experienced people to understand how things work.
- In this section, you will explain whether the human use of a product or system creates positive or negative results.
- In this section, you will identify how technological advances have made it possible to create new devices.
- In this section, you will identify how technological advances have made it possible to repair or replace certain parts of the human body.

6. Transportation and Construction

- In this section, you will explain why a transportation system may lose efficiency or fail.
- In this section, you will examine how manufacturing technologies have become an integral part of the engineered world.
- In this section, you will describe the importance of guidelines when planning a community.

7. Technology Apply

8. Technology Review

9. Technology Unit Test

Science 5 Accelerated

Science 5 Accelerated A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: This course is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum engages students in problem-solving and scientific investigation and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will learn about the solar system; the Earth, Sun, and stars; gravity; the properties of matter; and more. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways and apply their ideas.

Semester A Outline

1. Course Overview

1. Science 5 A Course Overview

2. Energy Transfer

1. Energy Transfer Introduction
2. Sound and Light

- In this section, you will identify evidence that energy can be transferred through sound waves.
- In this section, you will identify evidence that energy can be transferred through light.

3. Heat Energy

- In this section, you will compare different sources of energy.
- In this section, you will generate a list of ways that might make the transfer of heat energy go up or down.
- In this section, you will identify how to make the transfer of heat go up or down.
- In this section, you will describe how water can be changed from one state to another by adding or taking away heat.

4. Mass and Motion

- In this section, you will explain how changes in mass affect the motion of an object.
- In this section, you will predict the effect of a change in mass on the motion of an object.

5. Electromagnets

- In this section, you will make a plan to discover what affects electromagnets.
- In this section, you will discover what affects electromagnets.

6. Electric Currents

- In this section you will identify evidence that energy can be transferred through electric currents

7. Electrical Circuits

- In this section, you will explain the parts of a circuit.
- In this section, you will design a simple electric circuit to demonstrate the flow of electricity in closed circuits.

8. Converting Energy Portfolio: Day 1

- In this section, you will list some ideas for devices that can change energy from one form to another.

9. Converting Energy Portfolio: Design

10. Converting Energy Portfolio: Create

11. Converting Energy Portfolio: Test

- In this section, you will test a device that changes energy from one form to another, such as from potential energy to kinetic energy.

12. Converting Energy Portfolio: Improve

13. Energy Transfer Review

14. Energy Transfer Unit Test

3. Sound

1. Sound Introduction

2. Pitch, Volume, Vibration

- In this section, you will describe vibration, pitch, and volume.
- In this section, you will explain how the pitch of a sound, vibration, and changes that affect pitch are connected.

3. Changes in Vibration

- In this section, you will use data to show how changes in vibration change pitch and volume.
- In this section, you will explain how vibration affects pitch and volume.

4. How Sound is Produced

- In this section, you will explain how sound energy is made.
- In this section, you will describe how sound is affected by the objects that make it.
- In this section, you will make a plan to see how pitch, volume, and vibration are affected by objects that make sound.

5. Sound Investigation: Conduct

- In this section, you will discover how pitch, volume, and vibration are affected by objects that make sound.
- In this section, you will explain how sound is affected by the objects that make it.

6. Sound Apply

7. Sound Review
8. Sound Unit Test

4. Natural Energy Resources

1. Natural Energy Resources Introduction
 - In this lesson, you will learn about being social and sociable.
2. Renewable Resource
 - In this section, you will explain how human use renewable resources to make energy.
3. Nonrenewable Resources
 - In this section, you will explain how humans use nonrenewable resources to make energy.
4. Natural Resources and the Environment
 - In this section, you will use text and video sources to explain how using natural resources as fuels affects the environment and leads to climate change.
5. Efficiency of Energy Resources
 - In this section, you will look at how much energy can be produced from a resource and the cost of different types of energy resources.
6. Comparison of Energy Resources
 - In this section, you will compare and contrast the advantages and disadvantages of different energy resources
7. Resource Conservation
 - In this section, you will examine why Earth's resources need to be conserved and ways to conserve them.
8. Natural Energy Resources Apply
 - In this section, you will analyze the different renewable and nonrenewable energy choices for a new home.
9. Natural Energy Resources Review
10. Natural Energy Resources Unit Test

5. Ecosystems

1. Ecosystems Introduction
2. Living and Nonliving Components
 - In this section, you will identify the living and nonliving parts of an ecosystem.
3. Terrestrial Ecosystems
 - Identify and describe the biotic and abiotic factors of different terrestrial ecosystems
4. Aquatic Ecosystems
 - In this section, you will describe the living and nonliving parts of different aquatic ecosystems.
5. Comparing Factors in Ecosystems
6. Ecosystems Apply
 - In this section, you will design a terrarium for a pet frog using what you've learned about the biotic and abiotic components needed for life.
7. Ecosystems Review

8. Ecosystems Unit Test

6. Transfer of Energy

1. Transfer of Energy Introduction

2. Plant Growth

- In this section, you will explain why plants do not get most of the materials they need to grow from the soil.

3. Photosynthesis

- In this section, you will interpret models to explain that plants cannot grow without water or air.

4. Plant Matter

5. Animals and Food

- In this section, you will describe how food gives animals the energy they need for their life functions.

6. Food Chains

- In this section, you will describe how the sun's energy moves from plants to animals when plants make food and then animals eat the plants.

7. Energy Flow

- In this section, you will make a model to show how energy moves from the sun to plants and then to animals.

8. The Water Cycle

- In this section, you will describe the parts of the water cycle.
- In this section, you will describe a model of the water cycle.
- In this section, you will explain the process of Earth's water cycle.
- In this section, you will learn how the cycling of water, both in and out of the atmosphere, has an effect on climate.

9. Transfer of Energy Apply

10. Transfer of Energy Review

11. Transfer of Energy Unit Test

Semester B Summary: This course is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum engages students in problem-solving and scientific investigation and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will learn about physical and chemical changes in matter, the ecosystem, plant growth and photosynthesis, food webs, conservation, among other things. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways and apply their ideas.

Semester B Outline

1. Course Overview

1. Science 5 B Course Overview

2. Heredity and Living Cells

1. Heredity and Living Cells Intro

2. Comparing Life Cycles

- In this section, you will identify different patterns in life cycles.
- In this section, you will identify similar patterns in life cycles.

3. Instincts and Learned Behaviors

- In this section, you will identify and describe instinctive and learned behaviors.
- In this section, you will contrast instinctive and learned behaviors.
- In this section, you will classify behavior as instinctive or learned.

4. Inherited and Acquired Traits

- In this section, you will identify and describe inherited and acquired traits.
- In this section, you will contrast inherited and acquired traits.

5. Inherited Traits

- In this section, you will describe how adaptations help organisms survive in their environment.
- In this section, you will explain that inherited characteristics can be affected by the environment.
- In this section, you will identify external parts of animals that help them to survive and grow.

6. Plant and Animal Cells

- In this section, you will identify the parts of an animal cell.
- In this section, you will identify the parts of a plant cell.

7. Comparing Cells

- In this section, you will use models to compare plant and animal cells.
- In this section, you will explain differences between the structures of plant and animal cells.

8. Advantage and Survival

- In this section, you will describe how a trait helpful in one environment might not be helpful in another.
- In this section, you will explain how physical traits can provide an advantage for survival in a given environment.
- In this section, you will explain how physical traits can provide an advantage for survival in a given environment.

9. Heredity and Living Cells Apply

10. Heredity and Living Cells Review

11. Heredity and Living Cells Unit Test

3. Weathering and Erosion

1. Weathering and Erosion Introduction

2. Constructive Forces

- In this section, you will describe some examples of constructive forces.
- In this section, you will identify and describe landforms created by constructive forces.

3. Weathering and Erosion

- In this section, you will explain the difference between two forms of constructive forces, weathering and erosion.

4. Destructive Forces and Landforms

- In this section you will describe landforms created by destructive forces.

5. Physical Weathering

- In this section you will describe the process of weathering.

6. Erosion and Soil

- In this section, you will model the processes of erosion and deposition.
- In this section, you will explain how geological processes observed today are similar to those in the past.

7. Weathering and Erosion Apply

- In this section, you will illustrate the journey of destructive and constructive forces that led a piece of soil of your choosing to its current resting place.

8. Weathering and Erosion Review

9. Weathering and Erosion Unit Test

4. Weather and Climate

1. Weather and Climate Introduction

2. Weather and Climate

- In this section, you will describe different types of weather and climate.
- In this section, you will contrast weather and climate.
- In this section, you will explain the difference between weather and climate in writing or with a picture.

3. Weather Data

- In this section, you will investigate weather based on data.
- In this section, you will explain how weather instruments are used to collect weather data and make forecasts.

4. Weather Patterns

- In this section, you will identify different weather patterns.
- In this section, you will explain daily and seasonal changes in weather conditions.
- In this section, you will analyze trends found in weather data collection.

5. Changes in Weather

- In this section, you will describe what causes weather conditions to change.
- In this section, you will examine different ways to measure changes in weather.

6. Tracking Weather Data

- In this section, you will measure a weather indicator over a period of time.
- In this section, you will analyze patterns in a weather indicator over time.
- In this section, you will explain patterns observed in a weather indicator over time.

7. Weather and Climate Apply
8. Weather and Climate Review
9. Weather and Climate Unit Test

5. Earth, Sun, and Stars

1. Earth, Sun, and Stars Introduction
2. The Sun and Other Stars
 - In this section, you will describe the sun and other stars as natural bodies that give off their own light.
3. Brightness and Distance
 - In this section, you will relate the brightness of the sun and stars to their distance from Earth.
4. Patterns of Change Portfolio: Shadows
 - In this section, you will graph the daily changes of shadows that are caused by Earth's rotation and orbit around the sun.
5. Patterns of Change Portfolio: Analyze
 - In this section, you will analyze how shadows change throughout a day as Earth rotates on its axis.
6. Patterns of Change Portfolio: Daylight
 - In this section, you will analyze how shadows change throughout a day as Earth rotates on its axis.
7. Patterns of Change Portfolio: Patterns
 - In this section, you will analyze graphs that show how the length of daylight changes throughout the year.
8. Mass and Distance
 - In this section, you will explain how the relationship between mass and distance affects gravity.
9. Earth, Sun, and Stars Apply
 - In this activity, you will develop a model that shows how the revolution of Earth explains the apparent motion of the sun and stars during a 24-hour day.
10. Earth Sun and Stars Review
11. Earth, Sun, and Stars Unit Test

6. Technology

1. Technology Introduction
2. Introduction Technology and Engineering
 - In this section, you will understand what a subsystem is and how it relates to its larger system.
 - In this section, you will describe how technologies are often combined.
3. Engineering and the Design Process
 - In this section, you will explain how the use of technology can have unintended consequences.

- In this section, you will compare different ways waste may be appropriately recycled or disposed of to prevent unnecessary harm to the environment.
- In this section, you will describe how community concerns support technological developments.
- In this section, you will describe how community concerns limit technological developments.

4. Products, Procedures, and Processes

- In this section, you will identify how the way people live and work has changed history in terms of (influencing/directing/advancements in) technology.
- In this section, you will explain how the design process is a purposeful method of planning practical solutions to problems.
- In this section, you will describe how design can be performed in different sequences and repeated.
- In this section, you will identify how invention and innovation are creative ways to turn ideas into real things.

5. Technology and Industry

- In this section, you will use information provided in manuals, protocols, or by experienced people to understand how things work.
- In this section, you will explain whether the human use of a product or system creates positive or negative results.
- In this section, you will identify how technological advances have made it possible to create new devices.
- In this section, you will identify how technological advances have made it possible to repair or replace certain parts of the human body.

6. Transportation and Construction

- In this section, you will explain why a transportation system may lose efficiency or fail.
- In this section, you will examine how manufacturing technologies have become an integral part of the engineered world.
- In this section, you will describe the importance of guidelines when planning a community.

7. Technology Apply

8. Technology Review

9. Technology Unit Test

Science 6

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: Science 6A explores natural objects and phenomenon on our planet, in our Solar System, and beyond. This course uses multiple media sources to foster scientific inquiry and spark curiosity. The student will use models to explore the relationship between the Sun, Moon, and Earth and formulate explanations of lunar phases, eclipses, and seasons. Scientific views and evidence of how the earth and other objects in the universe were formed are presented as the student learns about galaxies, asteroids, and stars. The student will analyze and interpret data from rock layers and fossils giving clues to Earth's age. They will also discover how Earth has changed over time as the student makes connections between earth's energy systems and plate tectonics.

Semester A Outline

1. Course Overview

1. Science 6 Course Overview

2. Sun, Moon, Earth

1. Sun, Moon, Earth Introduction
2. Introduction to Space

- In this section, you will develop models to explain how objects in the night sky appear to move because of Earth's motions.
- In this section, you will describe the history of space exploration.
- In this section, you will summarize what we have learned from space exploration.

3. Moon Phases

- In this section, you will explain the interactions in the Earth-Sun-moon system, including lunar phases, using multiple media sources.
- In this section, you will explain the cause of lunar phases.

4. Reason for the Seasons

- In this section, you will explain the reasons for the seasons using models of the sun, the moon, and Earth.

5. Not Enough Hours

- In this section, you will explain how the number of daylight hours is related to seasons.

6. Not Enough Hours Discussion

7. Gravity and Orbits

- In this section, you will describe how gravity keeps less massive objects orbiting around more massive objects in space.

8. Orbiting Bodies' Properties

- In this section, you will examine data to compare characteristics of different planets.
- In this section, you will compare comets and asteroids to planets and moons.
- In this section, you will use evidence to explain how Earth's natural greenhouse effect allows life to exist on Earth.

9. Solar System Scale

- In this section, you will develop a scale model to represent the sizes of the planets.

10. Asteroid Impact Portfolio 1

- In this section, you will examine features of scientific diagrams and determine whether they clearly display information.
- In this section, you will compare diagrams and 3-D models to determine the advantages and disadvantages of each.

11. Asteroid Impact Portfolio 2

- In this section, you will compare diagrams that show lunar phases and how they change.
- In this section, you will compare diagrams that show how Earth's tilt and revolution cause the seasons.
- In this section, you will use a model to predict how lunar phases might change if the moon was hit by an asteroid.

12. Asteroid Impact Portfolio 3

- In this section, you will use a model to predict how seasons might change if an asteroid hit Earth and changed Earth's tilt.

13. Sun, Moon, Earth Review

14. Sun, Moon, Earth Unit Test

3. Earth's Changing Surface

1. Earth's Changing Surface Introduction

2. Plate Tectonics

- In this section, you will explain the theory of plate tectonics.

3. Rocks Under Pressure

- In this section, you will create a visual that shows how tectonic plate motions formed the shapes of the continents and structures on the seafloor.

4. Ring of Fire

- In this section, you will describe how earthquakes and volcanoes are related to plate movement.

5. Volcanoes Change Earth's Surface

- In this section, you will explain that volcanoes have changed Earth's surface in quick events.

6. Earthquakes and Tsunamis

- In this section, you will explain how earthquakes and tsunamis have changed Earth's surface.

7. Physical Weathering

- In this section, you will describe examples of physical weathering of rock.

8. Soil

- In this section, you will explain how the formation of soil is related to the type of rock it comes from and the environment where it forms.
- In this section, you will explain that soil is a loosely arranged material that contains nutrients and weathered rock.
- In this section, you will examine soil characteristics.

9. Chemical Weathering

- In this section, you will describe examples of chemical weathering of rock.

10. Shaping Earth's Surface

- In this section, you will use evidence to explain how weathering, erosion, and deposition have changed Earth's surface.

11. Plate Boundaries

- In this section, you will explain how the movement of Earth's plates has affected where minerals and energy resources are found.

12. The Water Cycle

- In this section, you will explain how energy is present in the water cycle and causes water to move in the water cycle.

13. Mining Groundwater

- In this section, you will explain the effects of mining groundwater.

14. Earth's Changing Surface Apply

- In this section, you will draw a cross-section diagram that shows what occurs at the boundary between two plates.

15. Earth's Changing Surface Review

16. Earth's Changing Surface Unit Test

4. Atmosphere

1. Atmosphere Introduction

2. Atmospheric Layers

- In this section, you will interpret diagrams to understand the five layers of Earth's atmosphere.
- In this section, you will interpret diagrams to show that water and gases cycle through Earth's four spheres—the lithosphere, biosphere, hydrosphere, and atmosphere.

3. Fossil Fuels and Climate Change

- In this section, you will describe how burning fossil fuels contributes to climate change.

4. Human Activities and Climate Change

- In this section, you will describe human activities that contribute to climate change.

5. Polar Ice and Climate Change

- In this section, you will explain how melting polar ice contributes to cycles that affect climate change.

6. Atmosphere Apply

- In this activity, you will calculate your own carbon footprint using an online carbon footprint calculator.

7. Atmosphere Review

8. Atmosphere Unit Test

5. Reproductive Success

1. Reproductive Success Introduction

2. Reproduction in Flowering Plants

- In this section, you will identify and describe the reproductive structures of plants that grow flowers.

3. Non-Flowering Plants Reproduction

- In this section, you will identify and describe reproductive structures of plants that do not grow flowers.

4. Successful Plant Reproduction

- In this section, you will argue how certain plant structures affect the probability that plants will reproduce successfully. You will base your argument on factual evidence and scientific reasoning.

5. Animal Structures

- In this section, you will describe basic structures that plants and animals have that help them to make or find food.
- In this section, you will explain the differences between instinctive and learned animal behaviors that relate to survival.

6. Animal Adaptation

- In this section, you will find and use information to explain how animals move using structural adaptations and processes.
- In this section, you will explain how animal responses to environmental stimuli (including hibernation and migration) allow them to survive and reproduce.
- In this section, you will interpret data to compare how endothermic and ectothermic animals respond to changes in the temperature of their environment.

7. Animal Behaviors

- In this section, you will identify and describe the behaviors of animals that affect reproduction.

8. Analyzing Factors

- In this section, you will argue how animal behaviors affect the probability that animals will reproduce successfully. You will base your argument on factual evidence and scientific reasoning.

9. Analyzing Factors Discussion

10. Reproductive Success Apply

- In this section, you will take what you have learned about the reproductive behaviors and characteristics of plants and animals and explain how some plants rely on animals in order to reproduce successfully.

11. Reproductive Success Review

12. Reproductive Success Unit Test

6. Matter and Energy

1. Matter and Energy Introduction

2. Making Food

- In this section, you will explain the steps in the process of photosynthesis.

3. Photosynthesis Portfolio 1

- In this portfolio activity, you will perform two investigations to show that plant leaves take in carbon dioxide and release oxygen at a measurable rate during photosynthesis.
- In this section, you will describe photosynthesis in a labeled drawing.

4. Photosynthesis Portfolio 2

- In this section, you will describe how the data that you plan to collect will be relevant to your investigation.
- In this section, you will conduct an investigation that provides evidence that in photosynthesis, leaves take in carbon dioxide and release oxygen at a measurable rate.

5. Photosynthesis Portfolio 3

- In this section, you will analyze the accuracy and precision of the data, whether the data provides the required evidence required, and the limitations of the investigation.

6. Breaking Down Food

- In this section, you will explain the steps in the process of cellular respiration.

7. Recycling Matter by Plants

- In this section, you will use data to create a written or visual model showing how plants support matter cycling.

8. Flow of Energy

- In this section, you will use data to create a written or visual model showing how plants support energy flow.

9. Recycling of Carbon

- In this section, you will use a diagram to describe the carbon cycle.

10. Recycling of Nitrogen

- In this section, you will use a diagram to describe the nitrogen cycle.

11. Energy and Matter in an Ecosystem

- In this section, you will create a model that connects the cycling of matter with the flow of energy among living and nonliving parts of an ecosystem.

12. Matter and Energy Apply

13. Matter and Energy Review

14. Matter and Energy Unit Test

7. Matter and Atomic Structure

1. The Impact of Synthetic Materials Discussion

Semester B Summary: Science 6B uses multiple media sources to foster scientific inquiry and spark curiosity. The student will discover ways that scientists use data, models, and technology gather information and make predictions. Throughout this course, the student will investigate topics such as weather, climate, and natural resources. The student will collect and analyze data to discover how changes to weather conditions occur. They will also use scientific models to investigate how atmospheric circulation produces climate patterns and how thermal energy transfer affects climate. This course explains renewable and non-renewable resources and the environmental implications associated

with methods of managing and using energy resources. The student will identify and describe human activities that contribute to global climate change. The student will also learn about natural hazards and how scientists use historical data to forecast and prepare for future catastrophic events.

Semester B Outline

1. Course Overview

1. Science 6 Course Overview

2. Biodiversity

1. Biodiversity Introduction

2. Biodiversity Defined

- In this section, you will describe biodiversity of an ecosystem.

3. Unicellular and Multicellular

- In this section, you will compare the cell of a unicellular organism to specialized cells of multicellular organisms.

4. Common Characteristics

- In this section, you will develop a model to classify organisms based on common characteristics.

5. Physical Characteristics

- In this section, you will describe the similarities and differences of major physical characteristics in plants, animals, fungi, protists, and bacteria.

6. Invasive Species

- In this section, you will define and describe invasive species and their effects on biodiversity.

7. Changing Coral Reef

- In this section, you will examine the changing biodiversity of a coral reef ecosystem.

8. Ecosystem Services

- In this section, you will explain the value of biodiversity across ecosystems to humans.

9. Biodiversity and Ecological Health

- In this section, you will explain how to measure the health of an ecosystem through its biodiversity.

10. Biodiversity Portfolio 1

- In this section, you will identify an ecosystem for which to design a solution for maintaining biodiversity.
- In this section, you will identify an ecosystem for which to design a solution for maintaining biodiversity.
- In this section, you will identify solutions for the chosen ecosystem.

11. Biodiversity Portfolio 2

- In this section, you will describe possible issues and general costs of solutions.
- In this section, you will explain your design solution.

12. Biodiversity Portfolio 3

- In this section, you will compare your design solution to other possible solutions for the same ecosystem.
- In this section, you will present your design solution.

13. Biodiversity Review

14. Biodiversity Sample Work

15. Biodiversity Unit Test

3. Properties of Matter

1. Properties of Matter Intro

2. Thermal Energy

- In this section, you will explain how the flow of thermal energy affects climate.
- In this section, you will distinguish the differences in properties of solids, liquids, and gases.

3. A Mystery Investigation

- In this section, you will describe the evidence of an investigation that supports a claim that pure substances can be distinguished based on characteristic properties.

4. Mass, Weight, and Density

- In this section, you will explain the relationship between, mass and weight.

5. Separating Mixtures

- In this section, you will explain that mixtures of substances can be separated based on their chemical and physical properties.

6. Physical vs. Chemical Change

- In this section, you will distinguish between chemical and physical change.

7. Mass in a Closed System

- In this section, you will describe how mass is conserved in a closed system.

8. Properties of Matter Apply

- In this section, you will use your knowledge of the properties of matter to design an explanatory poster about changes to matter.

9. Properties of Matter Review

10. Properties of Matter Unit Test

4. Energy of Motion

1. Energy of Motion Introduction

2. Kinetic and Potential Energy

- In this section, you will describe the relationship between the energy an object possesses when it is in motion and its stored energy because of its position relative to Earth.
- In this section, you will describe the relationship between the energy an object possesses when it is in motion and its stored energy because of its position relative to Earth.
- In this section, you will explain how changes in motion require a force.

3. Factors that Affect Kinetic Energy

- In this section, you will record how changing the mass and the speed of an object affect the energy it possesses because it is in motion.

- In this section, you will record how changing the mass and the speed of an object affect the energy it possesses because it is in motion.

4. Predicting Changes in Kinetic Energy

- In this section, you will predict how changing the mass or speed of an object will change the energy the object possesses because it is in motion.

5. Potential Energy of a System

- In this section, you will design a visual or 3-D model to represent how the positioning of multiple objects in a system can influence the system's stored energy.

6. Energy Transfer and Kinetic Energy

- In this section, you will construct an explanation, by using a real-life example, of how energy transfer can be shown through changes in energy that an object possesses because of its motion.

7. Using Potential and Kinetic Energy

- In this section, you will analyze how humans use technology to store energy resulting from an object's position relative to Earth and/or use energy resulting from an object's motion.

8. Energy of Motion Apply

9. Energy of Motion Review

10. Energy of Motion Unit Test

5. **Non-Contact Forces**

1. Non-Contact Forces Introduction

2. Strength of Electrical Forces

- In this section, you will ask questions about data to determine the factors that affect the strength of electric forces.

3. Conductors and Insulators

- In this section, you will describe the similarities and differences of conductors and insulation material at the atomic level.

4. Electrical Energy Properties

- In this section, you will analyze data to describe the properties of electrical energy.

5. Electric Circuit

- In this section, you will explain how energy is conserved as it is transferred and transformed in electrical circuits.
- In this section, you will describe energy changes from one type to another.
- In this section, you will investigate the relationship between voltage, current and resistance in electrical circuits.

6. Strength of Magnetic Forces

- In this section, you will analyze data to determine the factors that affect the strength of magnetic forces.

7. Non-Contact Forces Portfolio 1

- In this portfolio activity, you will design an investigation to explore magnetic fields, analyze data from the investigation, draw conclusions, and then apply what you have learned.

- In this section, you will collect observations and generate questions about the strength of electric fields from a demonstration.
- In this section, you will collect observations and generate questions about the strength of magnetic fields.

8. Non-Contact Forces Portfolio 2

- In this section, you will perform multiple trials of an investigation to collect data about fields between two non-touching objects.
- In this section, you will analyze data from an investigation to explore magnetic fields and draw conclusions.

9. Non-Contact Forces Portfolio 3

- In this section, you will evaluate an experimental design to provide evidence that fields exist between objects exerting forces on each other even though the objects are not in contact.

10. Electromagnetism in Use

- In this section, you will explain how electric currents and magnetic fields are related to each other in generators, simple electrical motors, and magnets created by the flow of the electric current.

11. Non-Contact Forces Apply

12. Non-Contact Forces Review

13. Non-Contact Forces Unit Test

6. Engineering Design Portfolio

1. Design Portfolio 1

- In this section, you will analyze and compare properties of metals, plastics, woods, and ceramics materials.

2. Design Portfolio 2

- In this section, you will define a problem for which a solution can be designed.
- In this section, you will create a solution to a problem and design the solution, selecting appropriate materials.

3. Design Portfolio 3

- In this section, you will plan to make a prototype of the design for your chosen solution.
- In this section, you will create a prototype of the design for your chosen solution.

4. Design Portfolio 4

- In this section, you will communicate the process of designing a solution.

5. Design Portfolio 5

7. Technology

1. Technology Introduction

2. Technologies for Information Transfer

- In this section, you will describe examples of how waves are absorbed by various materials.
- In this section, you will illustrate how communication systems are made up of a source, encoder, transmitter, receiver, decoder, and destination

3. How are Waves Transmitted?

- In this section, you will describe examples of how waves are transmitted through various materials.
- In this section, you will explain how communications information technologies are used to help humans make decisions and solve problems.

4. Rocks and Mineral Resources

- In this section, you will classify a variety of rocks based on physical characteristics from their origin.
- In this section, you will investigate the properties of minerals.
- In this section, you will describe the specific, measurable properties of minerals.
- In this section, you will identify key aspects of manufacturing systems that use mechanical processes to change the form of natural materials.

5. Development of Technologies

- In this section, you will identify power as the rate at which energy is converted or transferred.
- In this section, you will explain how knowledge from STEM fields of study integrates to create new technologies.
- In this section, you will describe how economic, political, and cultural issues are influenced by the development and use of technology.

6. Technology Usage

- In this section, you will demonstrate how transporting people and goods involves a combination of individuals and sub-systems, such as structural, propulsion, suspension, guidance, control, and support.
- In this section, you will explain how the type of structure determines the way the parts are put together.
- In this section, you will describe how technologies can be used to repair damage caused by natural disasters and to break down waste from the use of various products and systems.

7. Technology and STEM

- In this section, you will explain why some technological problems are best solved through experimentation.
- In this section, you will describe how advances and innovations in medical technologies are used to improve health care.
- In this section, you will interpret how societal and cultural priorities are reflected in technological devices.

8. Technology Apply

- In this section, you will apply what you have learned about different forms of technology, how they are created, and their impact on the world.

9. Technology Review

10. Technology Unit Test

Science 6 Accelerated

Science 6 Accelerated A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: Science 6A explores natural objects and phenomenon on our planet, in our Solar System, and beyond. This course uses multiple media sources to foster scientific inquiry and spark curiosity. The student will use models to investigate the relationship between the Sun, Moon, and Earth as they formulate explanations of lunar phases, eclipses, and seasons. Scientific views and evidence of how the earth and other objects in the universe were formed are presented as the student learns about galaxies, asteroids, and stars. The student will analyze and interpret data from rock layers and fossils giving clues to Earth's age. They will also discover how Earth's surface has changed over time as connections between earth's energy systems and plate tectonics are made. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester A Outline

1. Course Overview

1. Science 6 Course Overview

2. Sun, Moon, Earth

1. Sun, Moon, Earth Introduction
2. Introduction to Space

- In this section, you will develop models to explain how objects in the night sky appear to move because of Earth's motions.
- In this section, you will describe the history of space exploration.
- In this section, you will summarize what we have learned from space exploration.

3. Moon Phases

- In this section, you will explain the interactions in the Earth-Sun-moon system, including lunar phases, using multiple media sources.
- In this section, you will explain the cause of lunar phases.

4. Reason for the Seasons

- In this section, you will explain the reasons for the seasons using models of the sun, the moon, and Earth.

5. Not Enough Hours

- In this section, you will explain how the number of daylight hours is related to seasons.

6. Gravity and Orbits

- In this section, you will describe how gravity keeps less massive objects orbiting around more massive objects in space.

7. Orbiting Bodies' Properties

- In this section, you will examine data to compare characteristics of different planets.
- In this section, you will compare comets and asteroids to planets and moons.
- In this section, you will use evidence to explain how Earth's natural greenhouse effect allows life to exist on Earth.

8. Solar System Scale

- In this section, you will develop a scale model to represent the sizes of the planets.

8. Asteroid Impact Portfolio 1

- In this section, you will examine features of scientific diagrams and determine whether they clearly display information.
- In this section, you will compare diagrams and 3-D models to determine the advantages and disadvantages of each.

9. Asteroid Impact Portfolio 2

- In this section, you will compare diagrams that show lunar phases and how they change.
- In this section, you will compare diagrams that show how Earth's tilt and revolution cause the seasons.
- In this section, you will use a model to predict how lunar phases might change if the moon was hit by an asteroid.

10. Asteroid Impact Portfolio 3

- In this section, you will use a model to predict how seasons might change if an asteroid hit Earth and changed Earth's tilt.

11. Sun, Moon, Earth Review

12. Sun, Moon, Earth Unit Test

3. Earth's Changing Surface

1. Earth's Changing Surface Introduction

2. Plate Tectonics

- In this section, you will explain the theory of plate tectonics.

3. Rocks Under Pressure

- In this section, you will create a visual that shows how tectonic plate motions formed the shapes of the continents and structures on the seafloor.

4. Ring of Fire

- In this section, you will describe how earthquakes and volcanoes are related to plate movement.

5. Volcanoes Change Earth's Surface

- In this section, you will explain that volcanoes have changed Earth's surface in quick events.

6. Earthquakes and Tsunamis

- In this section, you will use evidence to explain how earthquakes and tsunamis have changed Earth's surface and describe the destruction they can cause.

7. Physical Weathering

- In this section, you will describe examples of physical weathering of rock.

8. Soil

- In this section, you will explain how the formation of soil is related to the type of rock it comes from and the environment where it forms.
- In this section, you will explain that soil is a loosely arranged material that contains nutrients and weathered rock.
- In this section, you will examine soil characteristics.

9. Chemical Weathering

- In this section, you will describe examples of chemical weathering of rock.

10. Shaping Earth's Surface

- In this section, you will use evidence to explain how earthquakes and tsunamis have changed Earth's surface and describe the destruction they can cause.

11. Plate Boundaries

- In this section, you will explain how the movement of Earth's plates has affected where minerals and energy resources are found.

12. The Water Cycle

- In this section, you will explain how energy is present in the water cycle and causes water to move in the water cycle.

13. Mining Groundwater

- In this section, you will explain the effects of mining groundwater.

14. Earth's Changing Surface Apply

- In this section, you will draw a cross-section diagram that shows what occurs at the boundary between two plates.

15. Earth's Changing Surface Review

16. Earth's Changing Surface Unit Test

4. Atmosphere

1. Atmosphere Introduction

2. Atmospheric Layers

- In this section, you will interpret diagrams to understand the five layers of Earth's atmosphere.
- In this section, you will interpret diagrams to show that water and gases cycle through Earth's four spheres—the lithosphere, biosphere, hydrosphere, and atmosphere.

3. Fossil Fuels and Climate Change

- In this section, you will describe how burning fossil fuels contributes to climate change.

4. Human Activities and Climate Change

- In this section, you will describe human activities that contribute to climate change.

5. Polar Ice and Climate Change

- In this section, you will explain how melting polar ice contributes to cycles that affect climate change.

6. Atmosphere Apply

- In this activity, you will calculate your own carbon footprint using an online carbon footprint calculator.

7. Atmosphere Review

8. Atmosphere Unit Test

5. Reproductive Success

1. Reproductive Success Introduction

2. Reproduction in Flowering Plants

- In this section, you will identify and describe the reproductive structures of plants that grow flowers.

3. Non-Flowering Plants Reproduction

- In this section, you will identify and describe reproductive structures of plants that do not grow flowers.

4. Successful Plant Reproduction

- In this section, you will argue how certain plant structures affect the probability that plants will reproduce successfully. You will base your argument on factual evidence and scientific reasoning.

5. Animal Structures

- In this section, you will describe basic structures that plants and animals have that help them to make or find food.
- In this section, you will explain the differences between instinctive and learned animal behaviors that relate to survival.

6. Animal Adaptation

- In this section, you will find and use information to explain how animals move using structural adaptations and processes.
- In this section, you will explain how animal responses to environmental stimuli (including hibernation and migration) allow them to survive and reproduce.
- In this section, you will interpret data to compare how endothermic and ectothermic animals respond to changes in the temperature of their environment.

7. Animal Behaviors

- In this section, you will identify and describe the behaviors of animals that affect reproduction.

8. Analyzing Factors

- In this section, you will argue how animal behaviors affect the probability that animals will reproduce successfully. You will base your argument on factual evidence and scientific reasoning.

9. Reproductive Success Apply

- In this section, you will take what you have learned about the reproductive behaviors and characteristics of plants and animals and explain how some plants rely on animals in order to reproduce successfully.

10. Reproductive Success Review
11. Reproductive Success Unit Test

6. Matter and Energy

1. Matter and Energy Introduction
2. Making Food
 - In this section, you will explain the steps in the process of photosynthesis.
3. Photosynthesis Portfolio 1
 - In this portfolio activity, you will perform two investigations to show that plant leaves take in carbon dioxide and release oxygen at a measurable rate during photosynthesis.
 - In this section, you will describe photosynthesis in a labeled drawing.
4. Photosynthesis Portfolio 2
 - In this section, you will describe how the data that you plan to collect will be relevant to your investigation.
 - In this section, you will conduct an investigation that provides evidence that in photosynthesis, leaves take in carbon dioxide and release oxygen at a measurable rate.
5. Photosynthesis Portfolio 3
 - In this section, you will analyze the accuracy and precision of the data, whether the data provides the required evidence required, and the limitations of the investigation.
 - In this section, you will create a diagram to show how water cycles in an ecosystem.
6. Breaking Down Food
 - In this section, you will explain the steps in the process of cellular respiration.
7. Recycling Matter by Plants
 - In this section, you will use data to create a written or visual model showing how plants support matter cycling.
8. Flow of Energy
 - In this section, you will use data to create a written or visual model showing how plants support energy flow.
9. Recycling of Carbon
 - In this section, you will use a diagram to describe the carbon cycle.
10. Recycling of Nitrogen
 - In this section, you will use a diagram to describe the nitrogen cycle.
11. Energy and Matter in an Ecosystem
 - In this section, you will create a model that connects the cycling of matter with the flow of energy among living and nonliving parts of an ecosystem.
12. Matter and Energy Apply
 - In this section, you will create a diagram to show how water cycles in an ecosystem.
13. Matter and Energy Review
14. Matter and Energy Unit Test

Semester B Summary: Science 6B uses multiple media sources to foster scientific inquiry and spark curiosity. The student will discover ways that scientists use data, models, and technology gather information and make predictions. Throughout this course, the student will investigate topics such as weather, climate, and natural resources. The student will collect and analyze data to discover how changes to weather conditions occur. They will also use scientific models to investigate how atmospheric circulation produces climate patterns and how thermal energy transfer affects climate. This course explains renewable and non-renewable resources and the environmental implications associated with methods of managing and using energy resources. The student will identify and describe human activities that contribute to global climate change. The student will also learn about natural hazards and how scientists use historical data to forecast and prepare for future catastrophic events. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester B Outline

1. Course Overview

1. Science 6 Course Overview

2. Biodiversity

1. Biodiversity Introduction

2. Biodiversity Defined and Described

- In this section, you will describe biodiversity of an ecosystem.

3. Unicellular and Multicellular

- In this section, you will compare the cell of a unicellular organism to specialized cells of multicellular organisms.

4. Common Characteristics

- In this section, you will develop a model to classify organisms based on common characteristics.

5. Physical Characteristics

- In this section, you will describe the similarities and differences of major physical characteristics in plants, animals, fungi, protists, and bacteria

6. Invasive Species

- In this section, you will define and describe invasive species and their effects on biodiversity.

7. Changing Coral Reefs

- In this section, you will examine the changing biodiversity of a coral reef ecosystem.

8. Ecosystem Services

- In this section, you will explain the value of biodiversity across ecosystems to humans.

9. Biodiversity and Ecological Health

- In this section, you will explain how to measure the health of an ecosystem through its biodiversity.

10. Biodiversity Portfolio 1

- In this section, you will identify an ecosystem for which to design a solution for maintaining biodiversity.
- In this section, you will identify an ecosystem for which to design a solution for maintaining biodiversity.

- In this section, you will brainstorm design solutions for the chosen ecosystem.

11. Biodiversity Portfolio 2

- In this section, you will describe and explain your design solution.

12. Biodiversity Portfolio 3

- In this section, you will compare your design solution to other possible solutions for the same ecosystem.
- In this section, you will present your design solution.

13. Biodiversity Review

14. Biodiversity Sample Work

15. Biodiversity Unit Test

3. Properties of Matter

1. Properties of Matter Introduction

2. Thermal Energy

- In this section, you will develop a model that predicts and describes changes in particle motion, temperature, and state of a pure substance when thermal energy is added or removed.
- In this section, you will distinguish the differences in properties of solids, liquids, and gases.

3. A Mystery Investigation

- In this section, you will describe the evidence of an investigation that supports a claim that pure substances can be distinguished based on characteristic properties.

4. Mass, Weight, and Density

- In this section, you will explain the relationship between, mass and weight.
- In this section, you will explain the relationship between mass and weight.
- In this section, you will differentiate between volume and mass and investigate that equal volumes of different substances usually have different masses.

5. Separating Mixtures

- In this section, you will explain that mixtures of substances can be separated based on their chemical and physical properties.

6. Physical vs. Chemical Change

- In this section, you will distinguish between chemical and physical change.

7. Mass in a Closed System

- In this section, you will describe how mass is conserved in a closed system.

8. Properties of Matter Apply

- In this section, you will use your knowledge of the properties of matter to design an explanatory poster about changes to matter.

9. Properties of Matter Review

10. Properties of Matter Unit Test

4. Energy of Motion

1. Energy of Motion Introduction

2. Kinetic and Potential Energy

- In this section, you will describe the relationship between the energy an object possesses when it is in motion and its stored energy because of its position relative to Earth.
- In this section, you will describe the relationship between the energy an object possesses when it is in motion and its stored energy because of its position relative to Earth.
- In this section, you will explain how changes in motion require a force.

3. Factors that Affect Kinetic Energy

- In this section, you will record how changing the mass and the speed of an object affect the energy it possesses because it is in motion.
- In this section, you will record how changing the mass and the speed of an object affect the energy it possesses because it is in motion.

4. Predicting Changes in Kinetic Energy

- In this section, you will make predictions about how changing the mass or speed of an object will change the energy the object possesses because it is in motion.

5. Potential Energy of a System

- In this section, you will design a visual or 3-D model to represent how the positioning of multiple objects in a system can influence the system's stored energy.

6. Energy Transfer and Kinetic Energy

- In this section, you will construct an explanation, by using a real-life example, of how energy transfer can be shown through changes in energy that an object possesses because of its motion.

7. Using Potential and Kinetic Energy

- In this section, you will analyze how humans use technology to store energy resulting from an object's position relative to Earth and/or use energy resulting from an object's motion.

8. Energy of Motion Apply

9. Energy of Motion Review

10. Energy of Motion Unit Test

5. Non-Contact Forces

1. Non-Contact Forces Introduction

2. Strength of Electrical Forces

- In this section, you will ask questions about data to determine the factors that affect the strength of electric forces.

3. Conductors and Insulators

- In this section, you will describe the similarities and differences of conductors and insulation material at the atomic level.

4. Electrical Energy Properties

- In this section, you will analyze data to describe the properties of electrical energy.

5. Electric Circuits

- In this section, you will explain how energy is conserved as it is transferred and transformed in electrical circuits.
- In this section, you will explain how energy is conserved as it is transferred and transformed in electrical circuits.

- In this section, you will analyze the accuracy and precision of the data, whether the data provides the required evidence required, and the limitations of the investigation.
- In this section, you will describe energy changes from one type to another.
- In this section, you will investigate the relationship between voltage, current and resistance in electrical circuits.

6. Strength of Magnetic Forces

- In this section, you will ask questions about data to determine the factors that affect the strength of magnetic forces.

7. Non-Contact Forces Portfolio 1

- In this portfolio activity, you will design an investigation to explore magnetic fields, analyze data from the investigation, draw conclusions, and then apply what you have learned.
- In this section, you will collect observations and generate questions about the strength of electric fields from a demonstration.
- In this section, you will collect observations and generate questions about the strength of magnetic fields.

8. Non-Contact Forces Portfolio 2

- In this section, you will identify fields that exist between two objects that are not in contact.
- In this section, you will perform multiple trials of an investigation to collect data about fields between two non-touching objects.
- In this section, you will analyze data from an investigation to explore magnetic fields and draw conclusions.

9. Non-Contact Forces Portfolio 3

- In this section, you will evaluate an experimental design to provide evidence that fields exist between objects exerting forces on each other even though the objects are not in contact.

10. Electromagnetism in Use

- In this section, you will explain how electric currents and magnetic fields are related to each other in generators, simple electrical motors, and magnets created by the flow of the electric current.

11. Non-Contact Forces Apply

12. Non-Contact Forces Review

13. Non-Contact Forces Unit Test

6. Engineering and Design Portfolio

1. Design Portfolio 1

- In this section, you will define a problem for which a solution can be designed.

2. Design Portfolio 2

- In this section, you will create a solution to a problem and design the solution, selecting appropriate materials.
- In this section, you will analyze and compare properties of metals, plastics, woods, and ceramics materials.

3. Design Portfolio 3

- In this section, you will create a prototype of the design for your chosen solution.

4. Design Portfolio 4

- In this section, you will plan to make a prototype of the design for your chosen solution.

5. Design Portfolio 5

- In this section, you will communicate the process of designing a solution.

7. Technology

1. Technology Introduction

2. Technologies for Information Transfer

- In this section, you will describe examples of how waves are absorbed by various materials.
- In this section, you will illustrate how communication systems are made up of a source, encoder, transmitter, receiver, decoder, and destination

3. How are Waves Transmitted?

- In this section, you will describe examples of how waves are transmitted through various materials.

4. Rocks and Mineral Resources

- In this section, you will classify a variety of rocks based on physical characteristics from their origin.
- In this section, you will investigate the properties of minerals.
- In this section, you will describe the specific, measurable properties of minerals.
- In this section, you will identify key aspects of manufacturing systems that use mechanical processes to change the form of natural materials.

5. Development of Technologies

- In this section, you will identify power as the rate at which energy is converted or transferred.
- In this section, you will explain how knowledge from STEM fields of study integrates to create new technologies.
- In this section, you will describe how economic, political, and cultural issues are influenced by the development and use of technology.

6. Technology Usage

- In this section, you will demonstrate how transporting people and goods involves a combination of individuals and sub-systems, such as structural, propulsion, suspension, guidance, control, and support.
- In this section, you will explain how the type of structure determines the way the parts are put together.
- In this section, you will describe how technologies can be used to repair damage caused by natural disasters and to break down waste from the use of various products and systems.

7. Technology and STEM

- In this section, you will explain why some technological problems are best solved through experimentation.

- In this section, you will describe how advances and innovations in medical technologies are used to improve health care.
- In this section, you will interpret how societal and cultural priorities are reflected in technological devices.

8. Technology Apply

- In this section, you will apply what you have learned about different forms of technology, how they are created, and their impact on the world.

9. Technology Review

10. Technology Unit Test

Science 7

Science 7 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: Science 7A uses multiple media sources to foster scientific inquiry and spark curiosity as the student explores topics such as cells, body systems, reproductive strategies, and genetics.

The student will investigate cell structure in plants and animals and discover how organisms use cells to perform complex life functions.

They will also identify and describe the functions of several body systems including the respiratory, circulatory, digestive, and excretory systems.

Additionally, the student will evaluate reproductive strategies and genetics to discover the important roles they play in the survival of organisms.

Semester A Outline

1. Course Overview

1. Science 7 Course Overview

2. Solar System

1. Solar System Introduction

2. Orbiting Bodies' Properties

- In this section, you will examine data to compare characteristics of different planets.
- In this section, you will compare comets and asteroids to planets and moons.
- In this section, you will use evidence to explain how Earth's natural greenhouse effect allows life to exist on Earth.

3. Galaxies and the Universe

- In this section, you will describe patterns that occur between the Earth, Sun, and Moon in relationships to their position in our solar system and to each other.
- In this section, you will identify how telescopes, satellites, and space probes are used to gather evidence about the universe.

4. Solar System Distances

- In this section, you will develop a model to show the distance between objects in the solar system.

- In this section, you will develop a model of the solar system to show distances noting the advantages and limitations of models.

5. Gravity

- In this section, you will describe gravity's role in forming solar systems.

6. Solar System Apply

- In this section, you will develop a model of the objects in the solar system, their characteristics and patterns of motion, and their distances from one another.

7. Solar System Review

8. Solar System Unit Test

3. Earth's Energy Systems

1. Earth's Energy Systems Introduction

2. The Structure of Earth

- In this section, you will summarize Earth's layers based on the position of layers of Earth to each other, what they are made out of, and their densities.
- In this section, you will build a model to illustrate the layers of Earth.

3. Earth's Interior Energy

- In this section, you will develop a model to describe how energy flows into Earth's interior and out from Earth's interior.

4. Radiation from the Sun

- In this section, you will show how the sun's radiation provides energy that is absorbed to warm Earth and its atmosphere.

5. The Rock Cycle

- In this section, you will develop models of the rock cycle.

6. Plate Tectonics and the Rock Cycle

- In this section, you will develop a model to describe the energy flow that causes tectonic plates to move and causes the rock cycle.

7. Energy Systems Portfolio 1

- In this portfolio activity, you will compare and interpret diagrams, then create a diagram or model to account for energy flow and interactions between different Earth processes.
- In this section, you will compare diagrams of the water cycle based on how clearly each presents and describes information.
- In this unit you will compare diagrams of the rock cycle for readability and depth of information provided.

8. Energy Systems Portfolio 2

- In this section, you will identify how symbols and graphics on diagrams contribute to meaning.
- In this section, you will create a diagram or model to describe energy flow and how different Earth processes interact.

9. Earth's Energy Systems Review

10. Earth's Energy Systems Unit Test

4. Geological Processes

1. Geological Processes Introduction

2. Earth's Evolution

- In this section, you will explain how physical evidence, such as fossils, support theories that Earth has changed over geologic time.
- In this section, your student will explain and give examples of how physical evidence, such as surface features of glaciation, support theories that Earth has changed over geologic time

3. Processes Over Time

- In this section, your student will describe geologic time as it relates to earth processes.
- In this section, your student will compare geologic processes over time.
- In this section, your student will locate significant geologic structures using various mapping representations.

4. Water and Soil

- In this section, your student will differentiate among Earth's water systems.
- In this section, your student will describe the motions of tides and identify their causes.
- In this section, your student will describe land use in relation to soil type and topography.

5. Geological Processes Apply

6. Geological Processes Review

7. Geological Processes Unit Test

5. Weather

1. Weather Introduction

2. Relative Humidity

- In this section, you will describe relative humidity.

3. Air Pressure

- In this section, you will explain how data about air pressure is used to describe weather.

4. Air Masses

- In this section, you will describe patterns of how air masses interact and change over time.

5. Air Mass Interactions

- In this section, you will identify how air masses interact and change causing changes in weather.

6. Predicting Weather

- In this section, you will explain that weather can only be predicted based on how likely it is to happen because it is complicated and has multiple causes.

7. Predicting Weather Portfolio 1

- In this section, you will explain how the sun, landforms, and water bodies affect weather.
- In this section, you will interpret the meanings of symbols used to identify pressure systems and precipitation on a weather map.
- In this section, you will interpret a weather map to describe the weather on that day in that region.

8. Predicting Weather Portfolio 2

- In this section, you will describe patterns of movement of pressure systems by interpreting maps that show the movement of a weather system over several days.
- In this section, you will describe patterns of precipitation by interpreting weather maps over several days.

9. Predicting Weather Portfolio 3

- In this section, you will predict the weather for the next day from a sequence of weather maps.
- In this section, you will predict the weather for the next day in a particular region.

10. Weather Review

11. Weather Unit Test

6. Natural Hazards

1. Natural Hazards Introduction

2. Tracking Earthquakes

- In this section, you will identify regions likely to have earthquakes and volcanoes by using seismic data.
- In this section, you will describe how scientists use data to find the epicenter of an earthquake

3. Volcanic Eruptions

- In this section, you will describe technologies that make the effects of volcanoes less severe.
- In this section, you will describe how people can be more prepared for a volcanic eruption.
- In this section, you will describe technologies that make the effects of volcanoes less severe.

4. Tracking Hurricane Dorian

- In this section, you will describe how the intensity and track of a hurricane is predicted.
- In this lesson, you will identify and describe technologies that make the effects of hurricanes less severe.

5. Natural Hazards Apply

- In this section, you will describe a natural hazard that has happened where you live, including the history of the event, how people prepared for it, and how it ended.

6. Natural Hazards Review

7. Natural Hazards Unit Test

7. Cells

1. Cells Introduction

2. Characteristics of Cells

- In this section, you will describe the cell as the smallest living unit.

3. Plant and Animal Cells

- In this section, you will learn how to compare plant and animal cells.

4. Modeling Cells

- In this section, you will describe the parts of a cell.
- In this section, you will develop a model to identify the parts of a cell.

5. Organelles

- In this section, you will explain how the organelles of a cell help the cell's function.

6. Specialized Cells

- In this section, you will make a claim about how multicellular organisms can use single cells to perform complex life functions.

7. Mitosis

- In this section, you will create a model to show how mitosis leads to the growth and repair of cells in multicellular organisms.
- In this section, you will explain how mitosis is related to cancer.

8. Cells Apply

- In this section, you will design an imaginary cell from a multicellular organism and describe what functions this kind of cell will perform.

9. Cells Review

10. Cells Unit Test

8. Body Systems

1. Body Systems Introduction

2. Multicellular Organisms

- In this section, you will make a claim about how multicellular organisms can use single cells to perform complex life functions.

3. Body Systems Hierarchy

- In this lesson, you will learn how the cells of the human body are organized.

4. Respiratory and Circulatory Systems

- In this section, you will describe the respiratory and circulatory systems.

5. Digestive and Excretory Systems

- In this section, you will describe the digestive and excretory systems.

6. Nervous System

- In this section, you will describe the nervous system.

7. Sensory Receptors

- In this lesson, you will dig deeper into the nervous system. You will explore how it senses and processes information.
- In this lesson, we will review which sensory receptors are involved in our use of media. Then we will consider how advertisers use sensory stimuli to sell us products.

8. The Eye

- In this section, you will explain the composition and function of the eye.

9. Homeostasis

- In this section, you will explain how organisms maintain internal stability.
- In this section, you will determine the effect of external factors on organisms' internal stability.

10. Body systems Portfolio 1

- In this section, you will describe all of the major human body systems.

11. Body Systems Portfolio 2

- In this section, you will compare the skeletal system of humans and insects.
 - In this section, you will compare the body systems of any type of organism to human body systems.
 - In this section, you will research features of an organism's major body systems by identifying key search terms.
12. Body Systems Portfolio 3
- In this section, you will contrast each major body system using research from multiple sources.
 - In this section, you will design a presentation of research results.
13. Body Systems Review
14. Body Systems Unit Test

Semester B Summary: Science 7B uses multiple media sources to foster scientific inquiry and spark curiosity. Throughout this course, the student will discover ways that scientists use data, models, and technology to gather and apply information. This course explores the role of plants and photosynthesis in the cycling of matter and the flow of energy into and out of organisms. The student will analyze and interpret data to determine the effects of resource availability on biodiversity among populations in an ecosystem. The topics of evolution, natural selection, and scientific classification are also presented throughout this course. The student will analyze and interpret data for patterns in the fossil record that document the change of life forms and examine genetic variations of a population over time. The student will also learn how scientists classify organisms based on similar characteristics.

Semester B Outline

1. Course Overview

1. Science 7 Course Overview

2. Reproduction and Genetics

1. Reproduction and Genetics Introduction

2. Asexual Reproduction Strategies

- In this section, you will describe asexual reproduction processes.

3. Modeling Asexual Reproduction

- In this section, you will devise a model to describe why asexual reproduction leads to offspring with identical genetic information.

4. Asexual and Sexual Reproduction

- In this section, you will compare sexual and asexual reproduction.

5. Modeling Sexual Reproduction

- In this section, you will use a model to explain why sexual reproduction leads to offspring with genetic variation.
- In this section, you will explain why the life cycles of different organisms have a variety of lengths.

6. Genes and Chromosomes

- In this section, you will describe the relationship between genes and chromosomes, and heredity.
- In this section, you will describe the relationship between genes and chromosomes.

7. Define Genotypes and Phenotypes

- In this section, you will describe genotypes and phenotypes.

8. Relate Genotypes and Phenotypes

- In this section, you will explain the relationship between genotypes and phenotypes.

9. Modeling Mutations

- In this section, you will devise a model to describe why gene mutations on chromosomes may affect proteins.
- In this section, you will explain that mutations can alter a gene and are the original source of new variations in a population.

10. Genetic Factors and Growth

- In this section, you will explain how genetic factors influence the growth of organisms.

11. Traits, Survival, and Reproduction

- In this section, you will describe how genetic variations of traits in a population make it more likely that some individuals will survive and reproduce in a specific environment.

12. Human Influence on Traits

- In this section, you will evaluate technologies that have changed the way humans can affect the inheritance of desired traits in organisms.

13. Human Influence on Traits Discussion

14. Reproduction and Genetics Apply

- In this section, you will apply knowledge of reproduction and genetics.

15. Reproduction and Genetics Review

16. Reproduction and Genetics Unit Test

3. Organism Interactions

1. Organism Interactions Introduction

2. Classification

- In this section, you will develop a model to classify organisms based on common characteristics.
- In this section, you will describe the similarities and differences of major physical characteristics in plants, animals, fungi, protists, and bacteria.
- In this section, you will explain how an organism's scientific name is based on the shared characteristics of certain levels of taxonomy.
- In this section, you will use models to classify organisms based on the current levels of taxonomy.

3. Relationship Among Organisms

- In this section, you will describe specific relationships, such as predator/prey, and symbiotic relationships between organisms.
- In this section, you will explain how you can make predictions about patterns of interactions that develop between organisms in an ecosystem.
- In this section, you will create a model to show how organisms in an environment interact with one another.

- In this section, you will explain why environmental changes may lead to extinctions of some species.

4. Evidence of Evolution

- In this section, you will explain how comparative anatomy provides a basis for the theory of evolution.
- In this section, you will explain how fossils provide a basis for the theory of evolution.
- In this section, you will explain how geology provides a basis for the theory of evolution.

5. Organism Interactions Apply

- In this section, you will design a poster that explains and models how different organisms interact in their environment, illustrates a food chain, and identifies evidence that supports the theory of evolution.

6. Organism Interactions Review

7. Organism Interactions Unit Test

4. Matter Properties

1. Matter Properties Introduction

2. Types of Matter

- In this section, your student will differentiate between elements, compounds, and mixtures.
- In this section, you will explain how materials are characterized by having a specific amount of mass in each unit of volume (density).

3. Elements and Chemical Change

- In this section, you will identify atoms as the basic building blocks of matter and that elements are composed of one type of atom.
- In this section, you will identify groups of elements that have similar properties.
- In this section, you will describe how reactants change into products in simple chemical reactions.
- In this section, you will explain how energy transfer can affect the chemical and physical properties of matter.

4. Synthetic Materials, Natural Resources

- In this section, you will explain how human-made materials come from natural resources.

5. The Impact of Synthetic Materials

- In this section, you will support a claim that creation and use of human-made materials impact society in positive and negative ways.

6. Impact of Synthetic Materials Discussion

7. Matter Properties Apply

8. Matter Properties Review

9. Matter Properties Unit Test

5. Thermal Energy

1. Thermal Energy Introduction

2. Kinetic and Thermal Energy

- In this section, you will explain the relationship between the energy resulting from motion and heat energy.
3. Matter and Temperature
- In this section, you will identify and describe properties of matter in relation to energy resulting from motion and heat energy as measured by temperature.
4. Energy Transfer and Temperature
- In this section, you will analyze data collected about how the transfer of energy resulting from motion affects the matter in relation to the temperature of a sample of the matter.
5. Kinetic Energy Transfer
- In this section, you will analyze data from an investigation about how the energy that results from motion affects matter in relation to the temperature of the sample.
 - In this section, you will explain data from an investigation about how the energy that results from motion affects matter in relation to the temperature of the sample.
 - In this section, you will develop a conclusions from an investigation about how the energy that results from motion affects matter in relation to the temperature of the sample.
6. Energy Transfer Device Portfolio 1
- In this portfolio activity, you will apply scientific principles to design, construct, and test a device that either minimizes or maximizes thermal energy transfer.
 - In this section, you will develop questions and discuss in groups about how to maximize or minimize heat energy transfer.
 - In this section, you will design a device to minimize or maximize heat energy transfer.
 - In this section, you will define the standards and limitations that must be taken into account in the design solution.
7. Energy Transfer Device Portfolio 2
- In this section, you will create a device to minimize or maximize heat energy transfer.
 - In this section, you will test a device to minimize or maximize heat energy transfer.
 - In this section, you will evaluate the effectiveness of a device to minimize or maximize heat energy transfer by using test data.
8. Energy Transfer Device Portfolio 3
- In this section, you will develop a model to generate data for repeated testing and modification of a proposed object, tool, or process such that the best design can be achieved.
 - In this section, you will improve the design of the device to minimize or maximize heat energy transfer.
9. Thermal Energy Transfer
- In this section, you will explain with the aid of a model how heat energy is transferred within fluids from hotter regions into colder ones.
 - In this section, you will explain with the aid of a model how heat energy is transferred from hotter regions or objects and into colder ones, by objects directly touching each other or across a gap.
10. Thermal Energy Apply
11. Thermal Energy Review

12. Thermal Energy Unit Test

6. Waves

1. Waves Introduction

2. Properties of Waves

- In this section, you will identify and describe the properties of a wave.
- In this section, you will recognize that different kinds of waves have common characteristics and unique properties.

3. Light and Sound Waves

- In this section, you will obtain, evaluate, and communicate information to support the claim that light waves behave differently than sound waves.
- In this section, you will explain how the rate of vibration, material through which vibrations travel, sound, and hearing are related.
- In this section, you will explain how visible light, the electromagnetic spectrum, and sight are related.
- In this section, your student will learn that visible light is a mixture of many different colors.

4. Waves Apply

- In this section, you will use what you have learned about waves to explain wave phenomena and uses in your everyday life.

5. Waves Review

6. Waves Unit Test

7. Force Interactions

1. Force Interactions Introduction

2. Position, Distance, and Displacement

- In this section, you will distinguish between various terms that describe how an object's position changes and how fast its position and direction change.
- In this section, you will describe the motion of an object by graphically showing the relationship between time and position.
- In this section, your student will learn how displacement, velocity, and acceleration of objects provide necessary and sufficient evidence for the existence of forces.
- In this section, you will explain that forces have an extent and direction; they affect the motion of objects.

3. Forces that Change Motion

- In this section, you will describe forces that change an object's motion.

4. Force and Motion Portfolio 1

- In this portfolio, you will investigate how a change in an object's motion depends on the sum of the forces on the object and the mass of the object.
- In this section, you will explain how the sum of the forces on an object and its mass influence an object's motion.

5. Force and Motion Portfolio 2

- In this section, you will explain how the sum of the forces on an object and its mass influence an object's motion.
- In this section, you will analyze data from an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the object's mass.
- In this section, you will evaluate information to develop conclusions to support a claim that the change in an object's motion depends on the sum of the forces on the object and the object's mass.

6. Force and Motion Portfolio 3

- In this section, you will present your findings from your investigation to model Newton's First Law of Motion.

7. Electric and Magnetic Forces

- In this section, you will explain how electrical current is produced by the flow of electrons.
- In this section, you will explain how electric current produces magnetic forces and how moving magnets produce electric current.
- In this section, you will demonstrate how electric current produces magnetic forces and how moving magnets produce electric current.

8. Force Interactions Apply

- In this section, you will describe the forces involved in "Tug-of-War" and the possible results of different scenarios.

9. Force Interactions Review

10. Force Interactions Unit Test

8. Design and Technology

1. The Design and Technology Introduction

2. Engineering Design

- In this section, you will describe how design, as a creative planning process, leads to useful products and systems.
- In this section, you will explain how modeling, testing, evaluating, and modifying are used to transform ideas into practical solutions.
- In this section, you will use data collected to analyze and interpret trends in and identify the positive or negative effects of a technology.

3. Design Process

- In this section your student will explain how different technologies involve different sets of processes.
- In this section, your student will identify and collect information about everyday problems that can be solved by technology and generate ideas and requirements for solving a problem.
- In this section your student will describe how troubleshooting as a problem-solving method may identify the cause of a malfunction in a technological system.
- In this section, your student will explain how many inventions and innovations have evolved by using deliberate and methodical processes of tests and refinements.

4. Technology and Society

- In this section, you will explain how the use of technology can have consequences that affect humans in many ways.

- In this section, you will describe how invention and innovation lead to changes in society and the creation of new needs and wants.
- In this section, you will explain how decisions to develop and use technologies may be influenced by environmental and economic concerns.
- In this section, you will illustrate how information can be acquired and sent through a variety of technological sources, including print and electronic media.

5. Technology Applied

- In this section, you will explain how knowledge gained from other fields of study has a direct effect on the development of technological products and systems.
- In this lesson, you will investigate recent advancements in medical technologies and their impact on quality of life.
- In this section, you will examine specialized equipment and practices used to improve the production of food, fiber, fuel, and other useful products and in the care of animals.
- In this section, you will examine the efficiency of energy use in our environment.

6. Manufacturing, Transportation, Construction

- In this section, you will explain how processes, such as receiving, holding, storing, loading, moving, unloading, delivering, evaluating, marketing, managing and communicating are necessary for the entire system to operate efficiently.
- In this section, you will examine the processes involved in extracting (e.g., harvesting, drilling, mining) raw materials from the earth for use in manufacturing processes.
- In this section, you will examine subsystems found in the construction of a building.

7. The Design and Technology Apply

8. The Design and Technology Review

9. The Design and Technology Unit Test

Science 7 Accelerated

Science 7 Accelerated A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: Science 7A uses multiple media sources to foster scientific inquiry and spark curiosity as the student explores topics such as cells, body systems, reproductive strategies, and genetics.

The student will investigate cell structure in plants and animals and discover how organisms use cells to perform complex life functions.

They will also identify and describe the functions of several body systems including the respiratory, circulatory, digestive, and excretory systems.

Additionally, the student will evaluate reproductive strategies and genetics to discover the important roles they play in the survival of organisms.

Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester A Outline

1. Course Overview

1. Science 7 Course Overview

2. Solar System

1. Solar System Introduction
2. Orbiting Bodies' Properties

- In this section, you will examine data to compare characteristics of different planets.
- In this section, you will compare comets and asteroids to planets and moons.
- In this section, you will use evidence to explain how Earth's natural greenhouse effect allows life to exist on Earth.

3. Galaxies and the Universe

- In this section, you will illustrate how Earth and its solar system are part of the Milky Way galaxy, which is one of many galaxies in the universe.
- In this section, you will describe patterns that occur between the Earth, Sun, and Moon in relationships to their position in our solar system and to each other.

- In this section, you will identify how telescopes, satellites, and space probes are used to gather evidence about the universe.

4. Solar System Distances

- In this section, you will develop a model to show the distance between objects in the solar system.
- In this section, you will develop a model of the solar system to show distances noting the advantages and limitations of models.

5. Gravity

- In this section, you will describe gravity's role in forming solar systems.

6. Solar System Apply

- In this section, you will develop a model of the objects in the solar system, their characteristics and patterns of motion, and their distances from one another.

7. Solar System Review

8. Solar System Unit Test

3. Earth's Energy Systems

1. Earth's Energy Systems Introduction

2. The Structure of Earth

- In this section, you will summarize Earth's layers based on the position of layers of Earth to each other, what they are made out of, and their densities.
- In this section, you will build a model to illustrate the layers of Earth.

3. Earth's Interior Energy

- In this section, you will develop a model to describe how energy flows into Earth's interior and out from Earth's interior.

4. Radiation from the Sun

- In this section, you will show how the sun's radiation provides energy that is absorbed to warm Earth and its atmosphere.

5. The Rock Cycle

- In this section, you will develop models of the rock cycle.

6. Plate Tectonics and the Rock Cycle

- In this section, you will develop a model to describe the energy flow that causes tectonic plates to move, causes the rock cycle, and leads to different types of rocks.

7. Energy Systems Portfolio 1

- In this portfolio activity, you will compare and interpret diagrams, then create a diagram or model to account for energy flow and interactions between different Earth processes.
- In this section, you will compare diagrams of the water cycle based on how clearly each presents and describes information.
- In this unit you will compare diagrams of the rock cycle for readability and depth of information provided.

8. Energy Systems Portfolio 2

- In this section, you will identify how symbols and graphics on diagrams contribute to meaning.

- In this section, you will create a diagram or model to describe energy flow and how different Earth processes interact.

9. Earth's Energy Systems Review

10. Earth's Energy Systems Unit Test

4. Geological Processes

1. Geological Processes Introduction

2. Earth's Evolution

- In this section, you will explain how physical evidence, such as fossils, support theories that Earth has changed over geologic time.
- In this section, your student will explain and give examples of how physical evidence, such as surface features of glaciation, support theories that Earth has changed over geologic time.

3. Processes Over Time

- In this section, your student will describe geologic time as it relates to earth processes.
- In this section, your student will compare geologic processes over time.
- In this section, your student will locate significant geologic structures using various mapping representations.

4. Water and Soil

- In this section, your student will differentiate among Earth's water systems.
- In this section, your student will describe the motions of tides and identify their causes.
- In this section, your student will describe land use in relation to soil type and topography.

5. Geological Processes Apply

6. Geological Processes Review

7. Geological Processes Unit Test

5. Weather

1. Weather Introduction

2. Relative Humidity

- In this section, you will describe relative humidity.

3. Air Pressure

- In this section, you will explain how data about air pressure is used to describe weather.

4. Air Masses

- In this section, you will describe patterns of how air masses interact and change over time.

5. Air Mass Interactions

- In this section, you will identify how air masses interact and change causing changes in weather.
- In this section, you will analyze weather-based data to track patterns of how air masses interact and change over time and produce changes in weather

6. Predicting Weather

- In this section, you will explain that weather can only be predicted based on how likely it is to happen because it is complicated and has multiple causes.

- In this section, you will explain how the sun, landforms, and water bodies affect weather.

7. Predicting Weather Portfolio 1

- In this section, you will interpret the meanings of symbols used to identify pressure systems and precipitation on a weather map.
- In this section, you will interpret a weather map to describe the weather on that day in that region.

8. Predicting Weather Portfolio 2

- In this section, you will describe patterns of movement of pressure systems by interpreting maps that show the movement of a weather system over several days.
- In this section, you will describe patterns of precipitation by interpreting weather maps over several days.

9. Predicting Weather Portfolio 3

- In this section, you will predict the weather for the next day from a sequence of weather maps.
- In this section, you will predict the weather for the next day in a particular region.

10. Weather Review

11. Weather Unit Test

6. Natural Hazards

1. Natural Hazards Introduction

2. Tracking Earthquakes

- In this section, you will identify regions likely to have earthquakes and volcanoes by using seismic data.
- In this section, you will describe how scientists use data to find the epicenter of an earthquake

3. Volcanic Eruptions

- In this section, you will describe technologies that make the effects of volcanoes less severe.
- In this section, you will describe how people can be more prepared for a volcanic eruption.
- In this section, you will describe technologies that make the effects of volcanoes less severe.

4. Tracking Hurricane Dorian

- In this section, you will describe how the intensity and track of a hurricane is predicted.
- In this section you will analyze and interpret data to track a hurricane and predict effects at landfall.
- In this lesson, you will identify and describe technologies that make the effects of hurricanes less severe.

5. Natural Hazards Apply

- In this section, you will describe a natural hazard that has happened where you live, including the history of the event, how people prepared for it, and how it ended.

6. Natural Hazards Review

7. Natural Hazards Unit Test

7. Cells

1. Cells Introduction

2. Characteristics of Cells

- In this section, you will describe the cell as the smallest living unit.

3. Plant and Animal Cells

- In this section, you will learn how to compare plant and animal cells.

4. Modeling Cells

- In this section, you will describe the parts of a cell.
- In this section, you will develop a model to identify the parts of a cell.

5. Organelles

- In this section, you will explain how the organelles of a cell help the cell's function.

6. Specialized Cells

- In this section, you will make a claim about how multicellular organisms can use single cells to perform complex life functions.

7. Mitosis

- In this section, you will create a model to show how mitosis leads to the growth and repair of cells in multicellular organisms.
- In this section, you will explain how mitosis is related to cancer.

8. Cells Apply

- In this section, you will design an imaginary cell from a multicellular organism and describe what functions this kind of cell will perform.

9. Cells Review

10. Cells Unit Test

8. Body Systems

1. Body Systems Introduction

2. Multicellular Organisms

- In this section, you will make a claim about how multicellular organisms can use single cells to perform complex life functions.

3. Body Systems Hierarchy

- In this lesson, you will learn how the cells of the human body are organized.

4. Respiratory and Circulatory Systems

- In this section, you will describe the respiratory and circulatory systems.

5. Digestive and Excretory Systems

- In this section, you will describe the digestive and excretory systems.

6. Nervous System

- In this section, you will describe the nervous system.

7. Sensory Receptors

- In this lesson, you will dig deeper into the nervous system. You will explore how it senses and processes information.
- In this lesson, we will review which sensory receptors are involved in our use of media. Then we will consider how advertisers use sensory stimuli to sell us products.

8. The Eye

- In this section, you will explain the composition and function of the eye.

9. Homeostasis

- In this section, you will explain how organisms maintain internal stability.
- In this section, you will determine the effect of external factors on organisms' internal stability.

10. Body systems Portfolio 1

- In this section, you will describe all of the major human body systems.

11. Body Systems Portfolio 2

- In this section, you will compare the skeletal system of humans and insects.
- In this section, you will compare the body systems of any type of organism to human body systems.
- In this section, you will research features of an organism's major body systems by identifying key search terms.

12. Body Systems Portfolio 3

- In this section, you will contrast each major body system using research from multiple sources.
- In this section, you will design a presentation of research results.

13. Body Systems Review

14. Body Systems Unit Test

Semester B Summary: Science 7B uses multiple media sources to foster scientific inquiry and spark curiosity. Throughout this course, the student will discover ways that scientists use data, models, and technology to gather and apply information.

This course explores the role of plants and photosynthesis in the cycling of matter and the flow of energy into and out of organisms. The student will analyze and interpret data to determine the effects of resource availability on biodiversity among populations in an ecosystem.

The topics of evolution, natural selection, and scientific classification are also presented throughout this course. The student will analyze and interpret data for patterns in the fossil record that document the change of life forms and examine genetic variations of a population over time. The student will also learn how scientists classify organisms based on similar characteristics.

Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester B Outline

1. Course Overview

1. Science 7 Course Overview

2. Reproduction and Genetics

1. Reproduction and Genetics Introduction

2. Asexual Reproduction Strategies

- In this section, you will describe asexual reproduction processes.

3. Modeling Asexual Reproduction

- In this section, you will devise a model to describe why asexual reproduction leads to offspring with identical genetic information.

4. Asexual and Sexual Reproduction

- In this section, you will compare sexual and asexual reproduction.

5. Modeling Sexual Reproduction

- In this section, you will use a model to explain why sexual reproduction leads to offspring with genetic variation.
- In this section, you will explain why the life cycles of different organisms have a variety of lengths.

6. Genes and Chromosomes

- In this section, you will describe the relationship between genes and chromosomes, and heredity.
- In this section, you will describe the relationship between genes and chromosomes.

7. Define Genotypes and Phenotypes

- In this section, you will describe genotypes and phenotypes.

8. Relate Genotypes and Phenotypes

- In this section, you will explain the relationship between genotypes and phenotypes.

9. Modeling Mutations

- In this section, you will devise a model to describe why gene mutations on chromosomes may affect proteins.
- In this section, you will explain that mutations can alter a gene and are the original source of new variations in a population.

10. Genetic Factors and Growth

- In this section, you will use scientific evidence to explain how genetic factors influence the growth of organisms.

11. Traits, Survival, and Reproduction

- In this section, you will describe how genetic variations of traits in a population make it more likely that some individuals will survive and reproduce in a specific environment.

12. Human Influence on Traits

- In this section, you will make connections by gathering information about the technologies that have changed the way humans can affect the inheritance of desired traits in organisms.

13. Reproduction and Genetics Apply

- In this section, you will apply knowledge of reproduction and genetics.

14. Reproduction and Genetics Review

15. Reproduction and Genetics Unit Test

3. Organism Interactions

1. Organism Interactions Introduction

2. Classification

- In this section, you will develop a model to classify organisms based on common characteristics.
- In this section, you will describe the similarities and differences of major physical characteristics in plants, animals, fungi, protists, and bacteria.
- In this section, you will explain how an organism's scientific name is based on the shared characteristics of certain levels of taxonomy.
- In this section, you will use models to classify organisms based on the current levels of taxonomy.

3. Relationship Among Organisms

- In this section, you will describe specific relationships, such as predator/prey, and symbiotic relationships between organisms.
- In this section, you will explain how you can make predictions about patterns of interactions that develop between organisms in an ecosystem.
- In this section, you will create a model to show how organisms in an environment interact with one another.
- In this section, you will explain why environmental changes may lead to extinctions of some species.

4. Evidence of Evolution

- In this section, you will explain how comparative anatomy provides a basis for the theory of evolution.
- In this section, you will explain how fossils provide a basis for the theory of evolution.
- In this section, you will explain how geology provides a basis for the theory of evolution.

5. Organism Interactions Apply

- In this section, you will design a poster that explains and models how different organisms interact in their environment, illustrates a food chain, and identifies evidence that supports the theory of evolution

6. Organism Interactions Review

7. Organism Interactions Unit Test

4. Matter Properties

1. Matter Properties Introduction

2. Types of Matter

- In this section, your student will differentiate between elements, compounds, and mixtures.
- In this section, you will explain how materials are characterized by having a specific amount of mass in each unit of volume (density).

3. Elements and Chemical Change

- In this section, you will identify atoms as the basic building blocks of matter and that elements are composed of one type of atom.
- In this section, you will identify groups of elements that have similar properties.
- In this section, you will describe how reactants change into products in simple chemical reactions.

- In this section, you will explain how energy transfer can affect the chemical and physical properties of matter.

4. Synthetic Materials, Natural Resources

- In this section, you will gather and make sense of information to describe that human-made materials come from natural resources.

5. The Impact of Synthetic Materials

- In this section, you will support a claim that creation and use of human-made materials impact society in positive and negative ways.

6. Matter Properties Apply

7. Matter Properties Review

8. Matter Properties Unit Test

5. Thermal Energy

1. Thermal Energy Introduction

2. Kinetic and Thermal Energy

- In this section, you will explain the relationship between the energy resulting from motion and heat energy.

3. Matter and Temperature

- In this section, you will identify and describe properties of matter in relation to energy resulting from motion and heat energy as measured by temperature.

4. Energy Transfer and Temperature

- In this section, you will analyze data collected about how the transfer of energy resulting from motion affects the matter in relation to the temperature of a sample of the matter.
- In this section, you will analyze data collected about how the transfer of energy resulting from motion affects the matter in relation to the temperature of a sample of the matter.
- In this section, you will analyze data collected about how the transfer of energy resulting from motion affects the matter in relation to the temperature of a sample of the matter.

5. Kinetic Energy Transfer

- In this section, you will analyze data from an investigation about how the energy that results from motion affects matter in relation to the temperature of the sample.
- In this section, you will explain data from an investigation about how the energy that results from motion affects matter in relation to the temperature of the sample.
- In this section, you will develop a conclusions from an investigation about how the energy that results from motion affects matter in relation to the temperature of the sample.

6. Energy Transfer Device Portfolio 1

- In this portfolio activity, you will apply scientific principles to design, construct, and test a device that either minimizes or maximizes thermal energy transfer.
- In this section, you will develop questions and discuss in groups about how to maximize or minimize heat energy transfer.
- In this section, you will design a device to minimize or maximize heat energy transfer.
- In this section, you will define the standards and limitations that must be taken into account in the design solution.

7. Energy Transfer Device Portfolio 2

- In this section, you will create a device to minimize or maximize heat energy transfer.
- In this section, you will test a device to minimize or maximize heat energy transfer.
- In this section, you will evaluate the effectiveness of a device to minimize heat energy transfer by using test data.

8. Energy Transfer Device Portfolio 3

- In this section, you will develop a model to generate data for repeated testing and modification of a proposed object, tool, or process such that the best design can be achieved.
- In this section, you will modify and improve the design of the device to minimize heat energy transfer.

9. Thermal Energy Transfer

- In this section, you will explain with the aid of a model how heat energy is transferred within fluids from hotter regions into colder ones.
- In this section, you will explain with the aid of a model how heat energy is transferred from hotter regions or objects and into colder ones, by objects directly touching each other or across a gap.

10. Thermal Energy Apply

11. Thermal Energy Review

12. Thermal Energy Unit Test

6. Waves

1. Waves Introduction

2. Properties of Waves

- In this section, you will identify and describe the properties of a wave.
- In this section, you will recognize that different kinds of waves have common characteristics and unique properties.

3. Light and Sound Waves

- In this section, you will obtain, evaluate, and communicate information to support the claim that light waves behave differently than sound waves.
- In this section, you will explain how the rate of vibration, material through which vibrations travel, sound, and hearing are related.
- In this section, you will explain how visible light, the electromagnetic spectrum, and sight are related.
- In this section, your student will learn that visible light is a mixture of many different colors.

4. Waves Apply

- In this section, you will use what you have learned about waves to explain wave phenomena and uses in your everyday life.

5. Waves Review

6. Waves Unit Test

7. Force Interactions

1. Force Interactions Introduction

2. Position, Distance, and Displacement

- In this section, you will distinguish between various terms that describe how an object's position changes and how fast its position and direction change.
- In this section, you will describe the motion of an object by graphically showing the relationship between time and position.
- In this section, your student will learn how displacement, velocity, and acceleration of objects provide necessary and sufficient evidence for the existence of forces.
- In this section, you will explain that forces have an extent and direction; they affect the motion of objects.

3. Forces that Change Motion

- In this section, you will identify and describe forces that change an object's motion.

4. Force and Motion Portfolio 1

- In this portfolio, you will investigate how a change in an object's motion depends on the sum of the forces on the object and the mass of the object.
- In this section, you will explain how the sum of the forces on an object and its mass influence an object's motion.

5. Force and Motion Portfolio 2

- In this section, you will explain how the sum of the forces on an object and its mass influence an object's motion.
- In this section, you will analyze data from an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the object's mass.
- In this section, you will evaluate information to develop conclusions to support a claim that the change in an object's motion depends on the sum of the forces on the object and the object's mass.

6. Force and Motion Portfolio 3

- In this section, you will present your findings from your investigation to model Newton's First Law of Motion.

7. Electric and Magnetic Forces

- In this section, you will explain how electrical current is produced by the flow of electrons.
- In this section, you will explain how electric current produces magnetic forces and how moving magnets produce electric current.
- In this section, you will demonstrate how electric current produces magnetic forces and how moving magnets produce electric current.

8. Force Interactions Apply

- In this section, you will describe the forces involved in "Tug-of-War" and the possible results of different scenarios.

9. Force Interactions Review

10. Force Interactions Unit Test

8. Design and Technology

1. The Design and Technology Introduction

2. Engineering Design

- In this section, you will describe how design, as a creative planning process, leads to useful products and systems.
- In this section, you will explain how modeling, testing, evaluating, and modifying are used to transform ideas into practical solutions.
- In this section, you will use data collected to analyze and interpret trends in and identify the positive or negative effects of a technology.

3. Design Process

- In this section your student will explain how different technologies involve different sets of processes.
- In this section, your student will identify and collect information about everyday problems that can be solved by technology and generate ideas and requirements for solving a problem.
- In this section your student will describe how troubleshooting as a problem-solving method may identify the cause of a malfunction in a technological system.
- In this section, your student will explain how many inventions and innovations have evolved by using deliberate and methodical processes of tests and refinements.

4. Technology and Society

- In this section, you will explain how the use of technology can have consequences that affect humans in many ways.
- In this section, you will describe how invention and innovation lead to changes in society and the creation of new needs and wants.
- In this section, you will explain how decisions to develop and use technologies may be influenced by environmental and economic concerns.
- In this section, you will illustrate how information can be acquired and sent through a variety of technological sources, including print and electronic media.

5. Technology Applied

- In this section, you will explain how knowledge gained from other fields of study has a direct effect on the development of technological products and systems.
- In this lesson, you will investigate recent advancements in medical technologies and their impact on quality of life.
- In this section, you will examine specialized equipment and practices used to improve the production of food, fiber, fuel, and other useful products and in the care of animals.
- In this section, you will examine the efficiency of energy use in our environment.

6. Manufacturing, Transportation, Construction

- In this section, you will explain how processes, such as receiving, holding, storing, loading, moving, unloading, delivering, evaluating, marketing, managing and communicating are necessary for the entire system to operate efficiently.
- In this section, you will examine the processes involved in extracting (e.g., harvesting, drilling, mining) raw materials from the earth for use in manufacturing processes.
- In this section, you will examine subsystems found in the construction of a building.

7. The Design and Technology Apply

8. The Design and Technology Review

9. The Design and Technology Unit Test

Science 8

Science 8 A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: Science 8A uses multiple media sources to foster scientific inquiry and spark curiosity as the student explores topics in the physical sciences. Throughout this course, the student will discover ways that scientists use data, models, and technology to gather and apply information.

The student will learn about atomic composition and the properties of matter. They will also distinguish between chemical and physical changes in matter and investigate how thermal energy transfer affects particle motion in matter.

This course examines the relationship between potential and kinetic energy as the student explores how mass and speed affect energy transfer.

Additionally, the student will discover how different types of waves transmit light, sound, and other forms of energy both in the presence and absence of matter.

Semester A Outline

1. Science 8 Course Overview

1. Science 8 Course Overview

2. The Universe

1. The Universe Introduction

2. Galaxies

- In this section, you will describe the three types of galaxies in the universe.
- In this section, you will explain how light, measured remotely, can be used to classify objects in the universe.

3. Characteristics of the Universe

- In this section, you will describe characteristics of the universe.

4. Earth's Formation

- In this section, you will use evidence to explain how Earth was formed.

5. Geologic Time Scale

- In this section, you will use evidence from rocks to explain how the geologic time scale is used to organize Earth's history.

6. Theories about the Universe

- In this section, you will describe current scientific views on how the universe formed and how those views were formed.
- In this section, you will compare different scientific views of how the universe formed.
- In this section, you will use evidence to explain that the universe began with a period of rapid expansion.
- In this section, you will describe current scientific views on how the universe formed and how those views were formed.

7. The Universe Apply

8. The Universe Review

9. The Universe Unit Test

3. The Age of Earth

1. The Age of Earth Introduction

2. Physical Weathering of Rock

- In this section, you will describe the physical processes that change rock.

3. Chemical Weathering of Rock

- In this section, you will describe the chemical processes that change rock.

4. How Old is the Grand Canyon?

- In this section, you will describe how the position of rock layers is used to determine relative ages of rocks and fossils in the rock layers.

5. Absolute Age of Rocks and Fossils

- In this section, you will describe how index fossils and carbon dating are used to determine the ages of rocks and fossils.
- In this section, you will explain why most organisms that lived in the past never formed fossils.

6. Could Mesosaurus Swim Across an Ocean?

- In this section, you will describe how the locations of rocks and fossils around the world are due to the movement of tectonic plates.

7. The Growing Atlantic Ocean

- In this section, you will examine data and evidence about Earth's features and identify relationships that can be used to make inferences, through specific study of seafloor spreading and patterns of age of seafloor.
- In this section, you will explain how matter on earth is conserved throughout the geological processes over time.

8. The Age of Earth Apply

- In this section, you will predict how seafloor spreading at the East Pacific Rise will affect plate movement along the North American West Coast.

9. The Age of Earth Review

10. The Age of Earth Unit Test

4. Matter Interactions

1. Matter Interactions Introduction

2. The Composition of Atoms

- In this section, you will develop models to describe the composition of atoms.

3. Molecules and Structures

- In this section, you will develop models to describe the atomic composition of simple molecules and structures formed by the bonding of the same molecules.

4. The Periodic Table

- In this section, you will describe patterns in the properties of similarly grouped elements by asking questions about locations of common elements on the periodic table.
- In this section, you will explain how the physical properties of elements and their reactivity have been used to produce the Periodic Table of elements.
- In this lesson you will explore atoms and the numbers that describe them in detail using the PhET® simulation titled Build an Atom.

5. Physical vs. Chemical Change

- In this section, you will distinguish between chemical and physical change.

6. Chemical Reactions

- In this section, you will describe the law of conservation of mass in chemical reactions.
- In this section, you will describe what takes place during chemical reactions at the atom level.
- In this section, you will describe what takes place during chemical reactions using chemical equations.

7. Matter Interactions Portfolio 1

- In this section, you will develop an investigation question to demonstrate that properties of substances are changed in a chemical reaction.
- In this section, you will plan the investigation, including procedures and data to be collected.

8. Matter Interactions Portfolio 2

- In this section, you will conduct the investigation, collecting appropriate data.
- In this section, you will analyze data from the investigation.
- In this section, you will present findings of a chemical reaction.

9. Matter Interactions Portfolio 3

- In this section, you will evaluate the investigation.

10. Law of Conservation of Matter

- In this section, you will explain the law of conservation of matter.

11. Conservation in Chemical Reactions

- In this section, you will describe how the total number of atoms does not change in a chemical reaction.
- In this section, you will describe the effect on the total number of atoms in a chemical reaction.
- In this section, you will develop a model to describe how the total number of atoms does not change in a chemical reaction.

12. Matter Interactions Apply

13. Matter Interactions Review

14. Matter Interactions Unit Test

5. Climate

1. Climate Introduction

2. Heating Patterns

- In this section, you will describe how and why the sun heats Earth unevenly.

3. Atmospheric Currents

- In this section, you will explain how air currents are caused by the heating and rotation of Earth.
- In this section, you will describe air currents on Earth.
- In this section, you will explain how air currents are caused by the heating and rotation of Earth.
- In this section, your student will describe the differences and similarities among water vapor, clouds, and humidity in the atmosphere.

4. Ocean Currents

- In this section, you will explain how the ocean currents are caused by the heating and rotation of Earth.
- In this section, you will describe the major ocean currents.

5. Atmospheric Circulation

- In this section, you will explain how atmospheric currents affect climate patterns.

6. Ocean Circulation

- In this section, you will explain how ocean currents affect climate patterns.

7. Thermal Energy

- In this section, you will explain how the flow of thermal energy affects climate.

8. The Climate System

- In this section, you will describe how the parts of the climate system are connected.
- In this section, your student will describe the types of energy that drive Earth's systems.

9. Earth's Biomes

- In this section, you will investigate how living things depend on and compete for biotic and abiotic factors within an ecosystem.
- In this section, you will describe the differences between Earth's major biomes.

10. Climate Apply

- In this section, you will analyze factors that affect Earth's climate for a specific location on Earth and use the information to write a narrative about the climate of the area.

11. Climate Review

12. Climate Unit Test

6. Natural Resources

1. Natural Resources Introduction

2. Renewable and Nonrenewable Resources

- In this section, you will distinguish between renewable and nonrenewable resources based on availability and sustainability.
3. Rocks and Minerals
 - In this section, you will describe how rocks and minerals are natural resources.
 4. Fossil Fuels
 - In this section, you will explain why fossil fuels are considered nonrenewable resources by describing how they form.
 5. Energy Exploration
 - In this section, you will explain the environmental dangers of obtaining energy resources from Earth.
 6. Using Energy Resources
 - In this section, you will explain the environmental dangers of managing and using energy resources from Earth.
 7. Land and Soil Resources
 - In this section, you will describe how land and soil are natural resources.
 8. Conservation
 - In this section, you will describe ways to conserve natural resources.
 9. Resource Processing
 - In this section, you will describe processes involved in removing raw materials from the earth for use in manufacturing.
 - In this section, you will explain how processes, such as receiving and unloading, are necessary for the entire system to operate efficiently.
 - In this section, you will examine subsystems found in the construction of a building.
 10. Natural Resources Apply
 - In this section, you will develop a plan for a new park and playground that has a sustainable design and uses renewable resources as much as possible.
 11. Natural Resources Review
 12. Natural Resources Unit Test

7. Impact of Humans

1. Impact of Humans Introduction
2. Consumption of Mineral Resources
 - In this section, you will interpret data that shows how an increasing human population and increasing use of natural mineral resources impacts Earth.
3. Conserving Mineral Resources
 - In this section, you will examine ways of monitoring and reducing the impact of the use of mineral resources on the environment.
4. Consumption of Bioresources
 - In this section, you will interpret data that shows how an increasing human population and increasing use of natural bioresources impact Earth.
5. Conserving Bioresources

- In this section, you will examine ways of monitoring and reducing the impact of the use of bioresources on the environment.

6. Mitigating Human Impact Portfolio 1

- In this section, you will propose questions about a specific design problem related to human impact on the environment.
- In this section, you will develop and write questions about a specific design problem related to human impact on the environment.
- In this section, you will design two ways to monitor and reduce your impact, or the impact of a group's behavior, on the environment.

7. Mitigating Human Impact Portfolio 2

- In this section, you will identify and describe what your design needs to be successful and what limitations there are to your design.
- In this section, you will create and use a rubric to check how well your two designs meet the standards.

8. Mitigating Human Impact Portfolio 3

- In this section, you will examine the data you collect for each design method and determine how to present it so that other people can use it.
- In this section, you will examine data from tests of different design solutions to identify the best characteristics of each to combine into a new solution that better meets the standards.

9. Impact of Humans Review

10. Impact of Humans Unit Test

8. Evolution

1. Evolution Introduction

2. Walking and Swimming Whales

- In this section, you will examine fossil record examples that demonstrate the existence, diversity, extinction, and change of life forms throughout the history of life on Earth, assuming that natural laws are the same today as in the past.

3. Are Dinosaurs Still With Us?

- In this section, you will explain how the patterns in fossil records show the existence, diversity, extinction, and change of life forms throughout the history of life on Earth, assuming that natural laws are the same today as in the past.

4. Understanding Human Evolution

- In this section, you will model the relationship between humans and other primates.
- In this section, you will interpret data about patterns in the fossil record to compare and contrast hominins.
- In this section, you will explain how scientists' understanding about human evolution changes as they find new evidence.

5. Are Whales and Hippos Related?

- In this section, you will use scientific ideas to explain how the similarities and differences of the anatomies of modern organisms suggest evolutionary relationships.

6. Evolution of the Horse

- In this section, you will use scientific ideas to explain how the similarities and differences between the anatomies of modern and fossil organisms suggest evolutionary relationships.

7. Comparing Vertebrate Embryos

- In this section, you will use pictures to identify and interpret linear and nonlinear relationships, including patterns of similarities in the embryos of multiple species.

8. Stages of Development

- In this section, you will use patterns of similarities and changes in embryo development to describe evidence for how diverse species are related.

9. Evolution Apply

- In this section, you will use evidence and reasoning like scientists do to explain how a vertebrate animal evolved.

10. Evolution Review

11. Evolution Unit Test

Semester B Summary: Science 8B uses multiple media sources to foster scientific inquiry and spark curiosity as the student studies elements of the physical sciences. Throughout this course, the student will discover ways that scientists use data, models, and technology to gather and apply information.

This course investigate the relationship between Force and Motion as the student explores Newton's Laws of Motion. The student will learn about the unseen forces of gravity, magnetism, and electricity as they determine factors that affect the strength of these forces.

The role of design in machines are also explored as the student investigates the relationship between force and work with regards to the transfer of mechanical energy.

Semester B Outline

1. Science 8 Course Overview

1. Science 8 Course Overview

2. Natural Selection

1. Natural Selection Introduction

2. Define Natural Selection

- In this section, you will describe the process of natural selection.

3. Explain Natural Selection

- In this section, you will explain how natural selection leads to certain traits being more common than others in a population.

4. Genetic Variation Over Time

- In this section, you will explain the genetic variations of a population over time due to natural selection.

5. Probability of Survival

- In this section, you will describe how genetic variations of traits in a population make it more likely that some individuals will survive and reproduce in a specific environment.

6. Mathematics of Natural Selection

- In this section, you will calculate how natural selection may lead to increases and decreases of specific traits in populations over time.

7. Natural Selection Apply

8. Natural Selection Review

9. Natural Selection Unit Test

3. Matter Interactions

1. Matter Interactions Introduction

2. The Composition of Atoms

- In this section, you will develop models to describe the composition of atoms.

3. Molecules and Structures

- In this section, you will develop models to describe the atomic composition of simple molecules and structures formed by the bonding of the same molecules.

4. The Periodic Table

- In this section, you will describe patterns in the properties of similarly grouped elements by asking questions about locations of common elements on the periodic table.
- In this section, you will explain how the physical properties of elements and their reactivity have been used to produce the Periodic Table of elements.
- In this lesson you will explore atoms and the numbers that describe them in detail using the PhET[®] simulation titled Build an Atom.

5. Chemical Reactions

- In this section, you will use models to explain how atoms in original substances are regrouped into different molecules during a chemical reaction, and these new substances have different properties from those of the original substances.

6. Matter Interactions Portfolio 1

- In this section, you will develop an investigation question to demonstrate that properties of substances are changed in a chemical reaction.

7. Matter Interactions Portfolio 2

- In this section, you will plan the investigation, including procedures and data to be collected.
- In this section, you will conduct the investigation, collecting appropriate data.
- In this section, you will analyze data from the investigation.

8. Matter Interactions Portfolio 3

- In this section, you will present findings of a chemical reaction.
- In this section, you will evaluate the investigation.

9. Law of Conservation of Matter

- In this section, you will explain the law of conservation of matter.

10. Conservation in Chemical Reactions

- In this section, you will describe how the total number of atoms does not change in a chemical reaction.
- In this section, you will describe the effect on the total number of atoms in a chemical reaction.

- In this section, you will develop a model to describe how the total number of atoms does not change in a chemical reaction.

11. Matter Interactions Apply

12. Matter Interactions Review

13. Matter Interactions Unit Test

4. Gravity

1. Gravity Introduction

2. Gravitational Force

- In this section, you will define and describe gravitational force and explain the gravitational relationship between Earth and objects on Earth.

3. Gravitational Attraction and Mass

- In this lesson, you will be introduced to some skills that can be used to help you identify and ask significant questions.

4. Investigating Gravity

- In this lesson you will explore this concept in detail using a PhET® simulation titled Gravity Force Lab: Basics which can be accessed below.

5. Analyzing Gravitational Data

- In this section, you will analyze data from an investigation to provide evidence that the acceleration due to gravity of objects near Earth is the same, regardless of the mass of those objects.

6. Gravity and Air Resistance

- In this lesson, you will learn about how air resistance and gravity affect the motion of a falling object.

7. Gravity Apply

8. Gravity Review

9. Gravity Unit Test

5. Newton's Laws

1. Newton's Laws Introduction

2. Newton's First Law

- In this section, you will explain Newton's First Law of Motion supported by real-life examples as evidence.

3. Newton's Second Law

- In this section, you will explain Newton's Second Law of Motion supported by real-life examples as evidence.
- In this section, you will describe how momentum is related to the forces acting on an object.

4. Newton's Third Law

- In this section, you will explain how Newton's Third Law applies to problems involving the motion of two colliding objects.

5. Potential and Kinetic Energy

- In this section, you will describe situations where kinetic energy is transformed into potential energy and vice versa.
- In this section, you will describe how temperature changes are related to changes in kinetic energy.

6. Newton's Laws Apply

7. Newton's Laws Review

8. Newton's Laws Unit Test

6. Force and Work

1. Force and Work Introduction

2. Force and Work Relationships

- In this section, you will scientifically describe the relationship between force and work.

3. Pulleys and Inclined Planes

- In this section, you will describe pulleys and inclined planes, including specialized inclined planes like the screw.
- In this section, you will develop diagrams to show how the design of pulleys and inclined planes helps transfer mechanical energy by reducing the amount of force required to do work.

4. Levers

- In this section, you will plan and conduct controlled scientific investigations to provide evidence for how levers help transfer mechanical energy by reducing the amount of force required to do work.
- In this section, you will analyze data from investigations to provide evidence for how levers help transfer mechanical energy by reducing the amount of force required to do work.

5. Efficiency of Machines

- In this section, you will explain how the efficiency of a machine can be improved by reducing the effort or the amount of energy transferred to the surrounding environment as it moves an object.
- In this section, you will design solutions that improve the efficiency of a machine by reducing the effort or the amount of energy transferred to the surrounding environment as it moves an object.
- In this section, you will describe methods for testing solutions that improve the efficiency of a machine by reducing the effort or the amount of energy transferred to the surrounding environment as it moves an object.

6. Force and Work Apply

7. Force and Work Review

8. Force and Work Unit Test

7. The Design World

1. The Design World Introduction

2. Design Technology

- In this lesson, you will learn about how different materials can be affected by changes in heat.
- In this lesson, you will learn about how tech design requires engineers to use materials that conduct electricity and are safe.

- In this lesson, you will learn about how tech designs need to include materials that transform electric energy.

3. Physics and Chemistry in Design

- In this lesson, you will learn about the importance of chemistry in designing technology.

4. Transportation Design

- In this lesson, we are going to identify and describe structural and propulsion subsystems of a transportation vehicle.
- In this lesson, we are going to examine a few subsystems of a vehicle, including guidance, suspension, and control systems.

5. The Design World Apply

6. The Design World Review

7. The Design World Unit Test

Science 8 Accelerated

Science 8 Accelerated A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: Science 8A uses multiple media sources to foster scientific inquiry and spark curiosity as the student explores topics in the physical sciences. Throughout this course, the student will discover ways that scientists use data, models, and technology to gather and apply information. The student will learn about atomic composition and the properties of matter. They will also distinguish between chemical and physical changes in matter and investigate how thermal energy transfer affects particle motion in matter. This course examines the relationship between potential and kinetic energy as the student explores how mass and speed affect energy transfer. Additionally, the student will discover how different types of waves transmit light, sound, and other forms of energy both in the presence and absence of matter. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester A Outline

1. Science 8 Course Overview

1. Science 8 Course Overview

2. The Universe

1. The Universe Introduction

2. Galaxies

- In this section, you will describe the three types of galaxies in the universe.
- In this section, you will explain how light, measured remotely, can be used to classify objects in the universe.

3. Characteristics of the Universe

- In this section, you will describe characteristics of the universe.

4. Earth's Formation

- In this section, you will use evidence to explain how Earth was formed, how Earth got its water, and what is at Earth's center.

5. Geologic Time Scale

- In this section, you will use evidence from rocks to explain how the geologic time scale is used to explore events such as extinctions.

6. Theories about the Universe

- In this section, you will describe current scientific views on how the universe formed and how those views were formed.
- In this section, you will compare different scientific views of how the universe formed.
- In this section, you will use evidence to explain that the universe began with a period of rapid expansion.
- In this section, you will describe current scientific views on how the universe formed and how those views were formed.

7. The Universe Apply

8. The Universe Review

9. The Universe Unit Test

3. The Age of Earth

1. The Age of Earth Introduction

2. Physical Weathering of Rock

- In this section, you will describe the physical processes that change rock.

3. Chemical Weathering of Rock

- In this section, you will describe the chemical processes that change rock.

4. How Old is the Grand Canyon?

- In this section, you will describe how the position of rock layers is used to determine relative ages of rocks and fossils in the rock layers.

5. Absolute Age of Rocks and Fossils

- In this section, you will describe how index fossils and carbon dating are used to determine the ages of rocks and fossils.
- In this section, you will explain why most organisms that lived in the past never formed fossils.

6. Could Mesosaurus Swim Across an Ocean?

- In this section, you will describe how the locations of rocks and fossils around the world are due to the movement of tectonic plates.

7. The Growing Atlantic Ocean

- In this section, you will examine data and evidence about Earth's features and identify relationships that can be used to make inferences, through specific study of seafloor spreading and patterns of age of seafloor.
- In this section, you will explain how matter on earth is conserved throughout the geological processes over time.

8. The Age of Earth Apply

- In this section, you will predict how seafloor spreading at the East Pacific Rise will affect plate movement along the North American West Coast.

9. The Age of Earth Review

10. The Age of Earth Unit Test

4. Climate

1. Climate Introduction

2. Heating Patterns

- In this section, you will describe how and why the sun heats Earth unevenly.

3. Atmospheric Currents

- In this section, you will explain how air currents are caused by the heating and rotation of Earth.
- In this section, you will describe air currents on Earth.
- In this section, you will explain how air currents are caused by the heating and rotation of Earth.
- In this section, your student will describe the differences and similarities among water vapor, clouds, and humidity in the atmosphere.

4. Ocean Currents

- In this section, you will explain how the ocean currents are caused by the heating and rotation of Earth.
- In this section, you will describe the major ocean currents.

5. Atmospheric Circulation

- In this section, you will explain how atmospheric currents affect climate patterns.

6. Ocean Circulation

- In this section, you will explain how ocean currents affect climate patterns.

7. Thermal Energy

- In this section, you will explain how the flow of thermal energy affects climate.

8. The Climate System

- In this section, you will describe how the parts of the climate system are connected.
- In this section, your student will describe the types of energy that drive Earth's systems.

9. Earth's Biomes

- In this section, you will investigate how living things depend on and compete for biotic and abiotic factors within an ecosystem.
- In this section, you will describe the differences between Earth's major biomes.

10. Climate Apply

- In this section, you will analyze factors that affect Earth's climate for a specific location on Earth and use the information to write a narrative about the climate of the area.

11. Climate Review

12. Climate Unit Test

5. Natural Resources

1. Natural Resources Introduction

2. Renewable and Nonrenewable Resources

- In this section, you will distinguish between renewable and nonrenewable resources based on availability and sustainability.

3. Rocks and Minerals

- In this section, you will describe how rocks and minerals are natural resources.

4. Fossil Fuels

- In this section, you will explain why fossil fuels are considered nonrenewable resources by describing how they form.
5. Energy Exploration
 - In this section, you will explain the environmental dangers of obtaining energy resources from Earth.
 6. Using Energy Resources
 - In this section, you will explain the environmental dangers of managing and using energy resources from Earth.
 7. Land and Soil Resources
 - In this section, you will describe how land and soil are natural resources.
 8. Conservation
 - In this section, you will describe ways to conserve natural resources.
 9. Resource Processing
 - In this section, you will describe processes involved in removing raw materials from the earth for use in manufacturing.
 - In this section, you will explain how processes, such as receiving and unloading, are necessary for the entire system to operate efficiently.
 - In this section, you will examine subsystems found in the construction of a building.
 10. Natural Resources Apply
 - In this section, you will develop a plan for a new park and playground that has a sustainable design and uses renewable resources as much as possible.
 11. Natural Resources Review
 12. Natural Resources Unit Test

6. Impact of Humans

1. Impact of Humans Introduction
2. Consumption of Mineral Resources
 - In this section, you will interpret data that shows how an increasing human population and increasing use of natural mineral resources impacts Earth.
3. Conserving Mineral Resources
 - In this section, you will examine ways of monitoring and reducing the impact of the use of mineral resources on the environment.
4. Consumption of Bioresources
 - In this section, you will interpret data that shows how an increasing human population and increasing use of natural bioresources impact Earth.
5. Conserving Bioresources
 - In this section, you will examine ways of monitoring and reducing the impact of the use of bioresources on the environment.
6. Mitigating Human Impact Portfolio 1
 - In this section, you will propose questions about a specific design problem related to human impact on the environment.

- In this section, you will develop and write questions about a specific design problem related to human impact on the environment.
- In this section, you will design two ways to monitor and reduce your impact, or the impact of a group's behavior, on the environment.

7. Mitigating Human Impact Portfolio 2

- In this section, you will identify and describe what your design needs to be successful and what limitations there are to your design.
- In this section, you will create and use a rubric to check how well your two designs meet the standards.

8. Mitigating Human Impact Portfolio 3

- In this section, you will examine the data you collect for each design method and determine how to present it so that other people can use it.
- In this section, you will examine data from tests of different design solutions to identify the best characteristics of each to combine into a new solution that better meets the standards.

9. Impact of Humans Review

10. Impact of Humans Unit Test

7. Evolution

1. Evolution Introduction

2. Walking and Swimming Whales

- In this section, you will examine fossil record examples that demonstrate the existence, diversity, extinction, and change of life forms throughout the history of life on Earth, assuming that natural laws are the same today as in the past.

3. Are Dinosaurs Still With Us?

- In this section, you will explain how the patterns in fossil records show the existence, diversity, extinction, and change of life forms throughout the history of life on Earth, assuming that natural laws are the same today as in the past.

4. Understanding Human Evolution

- In this section, you will model the relationship between humans and other primates.
- In this section, you will interpret data about patterns in the fossil record to compare and contrast hominins.
- In this section, you will explain how scientists' understanding about human evolution changes as they find new evidence.

5. Are Whales and Hippos Related?

- In this section, you will use scientific ideas to explain how the similarities and differences of the anatomies of modern organisms suggest evolutionary relationships.

6. Evolution of the Horse

- In this section, you will use scientific ideas to explain how the similarities and differences between the anatomies of modern and fossil organisms suggest evolutionary relationships.

7. Comparing Vertebrate Embryos

- In this section, you will use pictures to identify and interpret linear and nonlinear relationships, including patterns of similarities in the embryos of multiple species.

8. Stages of Development

- In this section, you will use patterns of similarities and changes in embryo development to describe evidence for how diverse species are related.

9. Evolution Apply

- In this section, you will use evidence and reasoning like scientists do to explain how a vertebrate animal evolved.

10. Evolution Review

11. Evolution Unit Test

Semester B Summary:

Science 8B uses multiple media sources to foster scientific inquiry and spark curiosity as the student learns. Throughout this course, the student will discover ways that scientists use data, models, and technology to gather and apply information. Students build on their knowledge on topic such as natural selection, matter, gravity and non-contact forces, and the design world. Throughout the course, the student will engage in activities that promote critical thinking, explore increasingly complex conceptual relationships, and encourage them to be curious about the world they live in and explore ways to test and apply their ideas.

Semester B Outline

1. Science 8 Course Overview

1. Science 8 Course Overview

2. Natural Selection

1. Natural Selection Introduction

2. Define Natural Selection

- In this section, you will describe the process of natural selection.

3. Explain Natural Selection

- In this section, you will explain how natural selection leads to certain traits being more common than others in a population.

4. Genetic Variation Over Time

- In this section, you will explain the genetic variations of a population over time due to natural selection.

5. Probability of Survival

- In this section, you will describe how genetic variations of traits in a population make it more likely that some individuals will survive and reproduce in a specific environment.

6. Mathematics of Natural Selection

- In this section, you will calculate how natural selection may lead to increases and decreases of specific traits in populations over time.

7. Natural Selection Apply

8. Natural Selection Review

9. Natural Selection Unit Test

3. Matter Interactions

1. Matter Interactions Introduction

2. The Composition of Atoms

- In this section, you will develop models to describe the composition of atoms.

3. Molecules and Structures

- In this section, you will develop models to describe the atomic composition of simple molecules and structures formed by the bonding of the same molecules.

4. The Periodic Table

- In this section, you will describe patterns in the properties of similarly grouped elements by asking questions about locations of common elements on the periodic table.
- In this section, you will explain how the physical properties of elements and their reactivity have been used to produce the Periodic Table of elements.
- In this lesson you will explore atoms and the numbers that describe them in detail using the PhET® simulation titled Build an Atom.

5. Chemical Reactions

- In this section, you will use models to explain how atoms in original substances are regrouped into different molecules during a chemical reaction, and these new substances have different properties from those of the original substances.

6. Matter Interactions Portfolio 1

- In this section, you will develop an investigation question to demonstrate that properties of substances are changed in a chemical reaction.

7. Matter Interactions Portfolio 2

- In this section, you will plan the investigation, including procedures and data to be collected.
- In this section, you will conduct the investigation, collecting appropriate data.
- In this section, you will analyze data from the investigation.

8. Matter Interactions Portfolio 3

- In this section, you will present findings of a chemical reaction.
- In this section, you will evaluate the investigation.

9. Law of Conservation of Matter

- In this section, you will explain the law of conservation of matter.

10. Conservation in Chemical Reactions

- In this section, you will describe how the total number of atoms does not change in a chemical reaction.
- In this section, you will describe the effect on the total number of atoms in a chemical reaction.
- In this section, you will develop a model to describe how the total number of atoms does not change in a chemical reaction.

11. Matter Interactions Apply

12. Matter Interactions Review

13. Matter Interactions Unit Test

4. Gravity

1. Gravity Introduction

2. Gravitational Force

- In this section, you will define and describe gravitational force and explain the gravitational relationship between Earth and objects on Earth.

3. Gravitational Attraction and Mass

- In this lesson, you will be introduced to some skills that can be used to help you identify and ask significant questions.

4. Investigating Gravity

- In this lesson you will explore this concept in detail using a PhET® simulation titled Gravity Force Lab: Basics which can be accessed below.

5. Analyzing Gravitational Data

- In this section, you will analyze data from an investigation to provide evidence that the acceleration due to gravity of objects near Earth is the same, regardless of the mass of those objects.

6. Gravity and Air Resistance

- In this lesson, you will learn about how air resistance and gravity affect the motion of a falling object.

7. Gravity Apply

8. Gravity Review

9. Gravity Unit Test

5. Newton's Laws

1. Newton's Laws Introduction

2. Newton's First Law

- In this section, you will explain Newton's First Law of Motion supported by real-life examples as evidence.

3. Newton's Second Law

- In this section, you will explain Newton's Second Law of Motion supported by real-life examples as evidence.
- In this section, you will describe how momentum is related to the forces acting on an object.

4. Newton's Third Law

- In this section, you will explain how Newton's Third Law applies to problems involving the motion of two colliding objects.

5. Potential and Kinetic Energy

- In this section, you will describe situations where kinetic energy is transformed into potential energy and vice versa.
- In this section, you will describe how temperature changes are related to changes in kinetic energy.

6. Newton's Laws Apply

7. Newton's Laws Review

8. Newton's Laws Unit Test

6. Force and Work

1. Force and Work Introduction

2. Force and Work Relationships

- In this section, you will scientifically describe the relationship between force and work.

3. Pulleys and Inclined Planes

- In this section, you will describe pulleys and inclined planes, including specialized inclined planes like the screw.
- In this section, you will develop diagrams to show how the design of pulleys and inclined planes helps transfer mechanical energy by reducing the amount of force required to do work.

4. Levers

- In this section, you will plan and conduct controlled scientific investigations to provide evidence for how levers help transfer mechanical energy by reducing the amount of force required to do work.
- In this section, you will analyze data from investigations to provide evidence for how levers help transfer mechanical energy by reducing the amount of force required to do work.

5. Efficiency of Machines

- In this section, you will explain how the efficiency of a machine can be improved by reducing the effort or the amount of energy transferred to the surrounding environment as it moves an object.
- In this section, you will design solutions that improve the efficiency of a machine by reducing the effort or the amount of energy transferred to the surrounding environment as it moves an object.
- In this section, you will describe methods for testing solutions that improve the efficiency of a machine by reducing the effort or the amount of energy transferred to the surrounding environment as it moves an object.

6. Force and Work Apply

7. Force and Work Review

8. Force and Work Unit Test

7. The Design World

1. The Design World Introduction

2. Design Technology

- In this section, you will explain the suitability of materials for use in technological design based on their response to heat. These responses to heat include conduction, expansion, and contraction.
- In this section, you will explain the suitability of materials, conductors, and insulators for use in technological design based on their response to electrical energy.
- In this section, you will analyze data from investigations about the effectiveness of different materials to increase or reduce electrical energy transfer.
- In this section, you will explain how societal and cultural priorities and values are reflected in technological devices.

3. Physics and Chemistry in Design

- In this section, you will explain the use of physics principles in important technologies used in construction.
- In this section, you will explain the use of chemistry principles in important technologies used for the creation of materials.
- In this section, you will analyze how a multi-disciplinary (STEM) approach to problem solving will yield greater results.

4. Biotechnology

- In this section, you will describe how biotechnology applies the principles of biology to create commercial products or processes.
- In this section, you will describe how biotechnology applies the principles of biology to create commercial products or processes.
- In this section, you will compare how a product, system, or environment developed for one setting may be applied to another setting.

5. Making Compost

- In this section, you will identify and describe design solutions for maintaining biodiversity and ecosystem services.

6. Reducing Food Waste

- In this section, you will determine the value of competing design solutions for maintaining biodiversity and ecosystem services.

7. Transportation Design

- In this section, you will identify and describe how transportation systems are designed to move people and goods using a variety of vehicles and devices.
- In this section, you will identify and describe structural and propulsion systems that are part of a transportation vehicle.
- In this section, you will identify and describe guidance, suspension, and control systems that are part of a transportation vehicle.
- In this section, you will describe how governmental regulations influence the design, operation, and efficiency of transportation systems.

8. Construction Design

- In this section, you will analyze factors that determine structural design (e.g., building laws and codes, style, convenience, cost, climate, and function).
- In this section, you will describe how the design of the message is influenced by such factors as the intended audience, medium, purpose, and nature of the message.

9. The Design World Apply

10. The Design World Review

11. The Design World Unit Test

Biology

Biology A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: Biology A is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum, which meets Next Generation Science Standards (NGSS), engages students in problem-solving and scientific investigation and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will study the science of life. The student will explore the idea that living things are extremely diverse in form, yet are unified by certain core characteristics that they all share. In learning about these core characteristics, the student will be able to critically evaluate data and information related to biological problems, connect many ideas to the student's own life, and see the world in a new way.

Semester A Outline

1. Course Overview

1. Biology Course Overview

2. Biochemistry

1. Biochemistry Unit Introduction
2. The Building Blocks of Life
 - In this section, you will explain the relationship between atoms in sugar molecules formed in or ingested by an organism and atoms found in large carbon-based molecules.
3. What All Biomolecules Have in Common
 - In this section, you will use evidence to explain that sugar molecules are composed of carbon, oxygen, and hydrogen atoms, and that amino acids and other complex carbon-based molecules are composed largely of carbon, oxygen, and hydrogen atoms.
4. The Essential Sugar Molecule
 - In this section, you will explain that larger carbon-based molecules and amino acids can be a result of chemical reactions between sugar molecules and other atoms.
5. You Are What You Eat
 - In this section, you will use evidence to explain that all organisms take in matter and rearrange the atoms in chemical reactions.
 - In this section, you will use evidence to explain that cellular respiration involves chemical reactions between sugar molecules and other molecules in which energy is released that can

be used to drive other chemical reactions.

6. Chemical Reactions

- In this section, you will use evidence to explain that chemical reactions can create products that are more complex than the reactants, and that chemical reactions involve changes in the energies of the molecules included in the reaction.

7. Matter Conservations Matters

- In this section, you will explain how atoms from sugar molecules combine with other elements to form large carbon-based molecules while conserving matter.

8. Respiration Overview

- In this section, you will use evidence to explain that cellular respiration involves chemical reactions between sugar molecules and other molecules in which energy is released that can be used to drive other chemical reactions.

9. Reliable Sources

- In this section, you will use a variety of valid and reliable sources as the evidence to explain how carbon, hydrogen, and oxygen from sugar molecules may combine with other elements to form amino acids or other large carbon-based molecules.

10. Biochemistry Apply

- In this section, you will explain how each organism of a food chain receives the food matter it needs to create the biomolecules for food and growth.

11. Biochemistry Review and Reflect

12. Biochemistry Unit Test

3. Cells and Body Systems

1. Cells and Body Systems Unit Introduction

2. What Goes In Must Come Out

- In this section, you will model how cell membranes help to regulate the transport of materials into and out of the cell.

3. Structures of the Cell

- In this section, you will model how different cell structures work together in order to create proteins. You will also show how proteins are modified, packaged, and transported to different parts of the cell.

4. Cell Structures

- In this section, you will describe the various types of organelles found in cells and compare the cell structures found in different organisms.

5. Parts of a Multicellular Organism

- In this section, you will make a model that shows the parts of human body systems and how they function.

6. Modeling Body Systems

- In this section, you will explore how different body systems work together to help an organism survive and describe ways that different systems affect each other.

7. Interactions Between Systems

- In this section, you will use a model to show how different body systems interact.

8. Models Versus Actual Body Systems

- In this section, you will compare models of body systems with actual body systems and describe how they differ.

9. Cells and Body Systems Apply

10. Cells and Body Systems Review

11. Cells and Body Systems Unit Test

4. Homeostasis Portfolio

1. Homeostasis Portfolio 1

- In this portfolio activity, you will plan and conduct an investigation that provides evidence of a feedback mechanism that maintains homeostasis.
- In this section, you will identify an area of research that shows how feedback mechanisms help an organism maintain homeostasis.
- In this section, you will plan an investigation and identify evidence that will show how feedback mechanisms help an organism maintain homeostasis.

2. Homeostasis Portfolio 2

- In this section, you will describe the data that will be collected during your investigation of homeostasis. You will also explain why the data you will collect is relevant.
- In this section, you will carry out an investigation that shows how feedback mechanisms help organisms maintain homeostasis.

3. Homeostasis Portfolio 3

- In this section, you will review your investigation and evaluate the quality of the data you collected.

5. Cell Work

1. Cell Work Unit Introduction

2. Photosynthesis

- In this section, you will model how photosynthesis transforms light into stored chemical energy by converting carbon dioxide and water into sugars and oxygen.

3. Photosynthesis: Energy Conversion

- In this section, you will model photosynthesis as a process that stores energy equal to the difference between the energies of the chemical bonds of the inputs and outputs of the process.
- In this section, you will model how photosynthesis transforms light into stored chemical energy by converting carbon dioxide and water into sugars and oxygen.

4. Photosynthesis Portfolio 1

- In this portfolio activity, you will think about how to design, conduct, and evaluate an investigation to gather evidence that photosynthesis converts light energy to stored chemical energy by showing how leaves take in carbon dioxide and release oxygen at a measurable rate.
- In this section, you will describe carbon dioxide absorption and oxygen release in photosynthesis.
- In this section, you will develop an investigation that would give evidence of the absorption of carbon dioxide and release of oxygen in photosynthesis.

5. Photosynthesis Portfolio 2

- In this section, you will describe the connection between data collected and the phenomenon of carbon dioxide absorption and oxygen release in photosynthesis.
- In this section, you will complete an investigation of the absorption of carbon dioxide and release of oxygen in photosynthesis.

6. Photosynthesis Portfolio 3

- In this section, you will assess the accuracy and precision of data collected in an investigation.

7. Cellular Respiration and Matter

- In this section, you will model the parts of cellular respiration.

8. Making and Breaking Bonds for Energy

- In this section, you will model the breaking and forming of chemical bonds in cellular respiration.

9. Cellular Respiration

- In this section, you will model the release of energy in cellular respiration.

10. Energy and Matter Conservation

- In this section, you will model the flow of matter and energy in the chemical reactions of oxygen and food molecules.

11. Heat and Cellular Respiration

- In this section, you will model the transfer of energy from food and oxygen to the cell to sustain life processes, including the maintenance of body temperature.

12. Cell Work Apply

13. Cell Work Review

14. Cell Work Unit Test

6. DNA

1. DNA Unit Introduction

2. Genes, Chromosomes, and DNA

- In this section, you will describe the structure and function of DNA, explain the relationships between DNA and the genes that are made of DNA, and determine the structure of the proteins that carry out the functions of life and the chromosomes that package the genes into cells.
- In this section, you will explore how what we know about the molecular structure of DNA has changed throughout history.

3. How Cells Make Proteins

- In this section, you will use reasoning to connect evidence that shows the relationship between the structures and functions of DNA and proteins.

4. Gene Expression

- In this section, you will use models of DNA to form questions and provide answers that show the cause and effect relationship between DNA, proteins, and traits.

5. Gene Expression and Gene Regulation

- In this section, you will use models of DNA to form questions and provide answers that show

how gene function is controlled by the cell.

6. Genetic Research

- In this section, you will identify questions and provide answers that describe the role of DNA in the formation of traits that pass from parents to offspring.

7. Genetic Factors in Inheritance

- In this section, you will use scientific information to show that traits are often the result of various genetic factors that interact with each other.

8. Genetically Modified Organisms

- In this section, you will explore and communicate information about the use of biotechnology in forensics, medicine, and agriculture.

9. Genetically Modified Organisms Discussion

10. What is a Virus

- In this section, you will compare and contrast viruses and living things, using evidence.
- In this section, you will describe the different ways viruses reproduce.
- In this section, you will describe how viruses cause disease.
- In this section, you will learn how viruses depend on their hosts to replicate, which requires energy gained from the hosts.

11. DNA Apply

12. DNA Review and Reflect

13. DNA Unit Test

7. Mitosis

1. Mitosis Unit Introduction

2. Complex Organisms

- In this section, you will model how cells of complex organisms duplicate and become more specialized through the processes of mitosis and differentiation.

3. Inputs and Outputs of Mitosis

- In this section, you will use a model to describe how the processes of mitosis and cellular differentiation result in a complex organism.

4. Mitosis in Complex Organisms

- In this section, you will model how complex organisms use mitosis for the growth, replacement, and repair of cells. You will also describe how differentiation produces specialized cells that each have different functions within organisms.

5. Mitosis and Genetic Information

- In this section, you will use a model to show how eukaryotes use mitosis to grow new cells that contain identical genetic information.

6. Gene Expression

- In this section, you will use a model to show that although cells within a multicellular organism have the same genes, the cells differ based on which genes are expressed.

7. How Cells Are Used in the Body

- In this section, you will use a model to show how mitosis allows organisms to grow in size and

replace old or damaged cells. You will also describe how the process of differentiation allows stem cells to become a variety of specialized cells.

8. Disruptions of the Cell Cycle

- In this section, you will explain that disruptions of the cell cycle lead to diseases such as cancer.

9. The Map is Not the Territory

- In this section, you will analyze the differences between a model of mitosis and the actual process of mitosis as it occurs in cells.

10. Mitosis Apply

- In this section, you will apply the phases of mitosis to develop a plan to repair damage to an organism.

11. Mitosis Review and Reflect

12. Mitosis Unit Test

8. Genetic Variation

1. Genetic Variation Unit Introduction

2. Genetic Variation from Meiosis

- In this section, you will describe how inheritable genetic variations may result from new genetic combinations through meiosis.

3. Genetic Variation from Errors

- In this section, you will apply the idea that inheritable genetic variations may result from viable errors occurring during replication.

4. Environmental Genetic Variation

- In this section, you will apply the idea that inheritable genetic variations may result from mutations caused by environmental factors.

5. Genetic Mutations Produce Variation

- In this section, you will describe the links between evidence and a claim, such as that genetic mutations produce genetic variations between cells or organisms.

6. Genetic Variations Can Be Inherited

- In this section, you will describe the links between evidence and a claim, such as that genetic variations produced by mutation and meiosis can be inherited.

7. Sources of New DNA Combinations

- In this section, you will explain that new combinations of DNA can arise from several sources, including meiosis, errors during replication, and mutations caused by environmental factors.

8. Sources of New DNA Combinations Discussion

9. Organizing Data About Expressed Traits

- In this section, you will organize population data by the frequency, distribution, and variation of expressed traits.

10. Analyzing Data About Traits

- In this section, you will use statistical analyses of data to determine the relationship between a trait's occurrence within a population and environmental factors.

11. Expressed Traits

- In this section, you will analyze data to explain the distribution of expressed traits.

12. Genetic Variation Apply

- In this section, you will draw a model that represents each of the mutations learned in this unit.

13. Genetic Variation Review and Reflect

14. Genetic Variation Unit Test

9. Biology A Semester Review and Exam

1. Biology A Semester Review

2. Biology A Semester Exam

Semester B Summary: Biology B is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum, which meets Next Generation Science Standards (NGSS), engages students in problem-solving and scientific investigation and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will study the science of life. The student will explore the idea that living things are extremely diverse in form, yet are unified by certain core characteristics that they all share. In learning about these core characteristics, the student will be able to critically evaluate data and information related to biological problems, connect many ideas to the student's own life, and see the world in a new way.

Semester B Outline

1. Course Overview

1. Biology B Course Overview

2. Biological Evolution

1. Biological Evolution Unit Introduction

2. How Resources Affect Evolution

- In this section, you will identify and describe factors that affect evolution, including that competition for limited resources can arise as a species increases in number.

3. Genetic Variation and Evolution

- In this section, you will identify and describe factors that affect evolution, including that individuals in a species have genetic variation that is passed on to their offspring.

4. Differential Reproduction

- In this section, you will identify and describe factors that affect evolution, including that individuals can have specific traits that give them a competitive advantage relative to other individuals in the species.

5. Modeling Evolution

- In this section, you will describe the four factors that affect the process of evolution.

6. Evolution Versus Natural Selection

- In this section, you will explain the difference between natural selection and biological evolution.

7. Environmental Change

- In this section, you will examine how changes in environmental conditions may result in an increase in the number of individuals of some species, the emergence of new species over time, and the extinction of other species.

8. Group Behavior

- In this section, you will assess the validity, reliability, strengths, and weaknesses of evidence about the outcomes of group behavior.

9. Effects of Change

- In this section, you will analyze the effects of environmental changes on the number of individuals of a species, the number of species in an environment, and the emergence or extinction of a species.

10. Biological Evolution Apply

11. Evolution Review and Reflect

12. Biological Evolution Unit Test

3. Natural Selection

1. Natural Selection Unit Introduction

2. Natural Selection Over Time

- In this section, you will organize data to support the claim that organisms with an advantageous heritable trait tend to increase in a population in proportion to organisms lacking this trait.

3. Heredity and Reproductive Success

- In this section, you will use data analyses as evidence to support claims about natural selection as the cause of increases and decreases in heritable traits in a population over time.

4. High Altitude Living

- In this section, you will use data analyses as evidence to support claims about the changes in distribution of adaptations of traits in a population.

5. Competitive Advantage

- In this section, you will use evidence to explain that individuals can have specific traits that give a competitive advantage relative to other individuals in the species.

6. Evolution of the Influenza Virus

- In this section, you will use a variety of valid and reliable sources to support the claim that natural selection leads to adaptations of populations.

7. Color and Natural Selection

- In this section, you will distinguish between cause and correlation in an explanation of how natural selection allows species to adapt to changes in their environment.

8. Transitional Fossils

- In this section, you will distinguish between cause and correlation in an explanation of how natural selection allows species to adapt to changes in their environment.

9. Natural Selection Apply

- In this section, you will describe how the pocket mouse has adapted to changes in its environment and any influences on genetics that may have occurred.

10. Natural Selection Review and Reflect

11. Natural Selection Unit Test

4. Biological Evolution Evidence

1. Evolution Evidence Unit Introduction
2. Biological Evolution Evidence
 - In this section, you will identify and communicate evidence for common ancestry and biological evolution, including information derived from DNA sequences.
3. Fossil Record and Embryology
 - In this section, you will identify and communicate evidence for common ancestry and biological evolution, including patterns in the fossil record and in anatomy and embryos.
4. Animal Phylogenetic Tree Portfolio 1
 - In this portfolio activity, you will learn how evolutionary biologists use the characteristics of organisms to explain how they evolved. You will take the role of an evolutionary biologist to explain the ancestry and evolution of an imaginary alien species. You will then apply your knowledge of evolution and model the lineage of this alien species.
 - In this section, you will define and describe animal phylogeny.
 - In this section, you will define and describe cladograms.
5. Animal Phylogenetic Tree Portfolio 2
 - In this section, you will interpret a phylogenetic tree diagram of an animal in order to identify common ancestry and biological evolution.
 - In this section, you will create a phylogenetic tree for an imaginary animal and explain the possible common ancestry and biological evolution.
6. Animal Phylogenetic Tree Portfolio 3
 - In this section, you will evaluate and update the phylogenetic tree based on new evidence and explain the rationale for the changes.
7. Evidence of Evolution
 - In this section, you will observe and communicate the patterns of evidence for causal relationships relating to biological evolution and common ancestry.
8. Evolution Evidence Apply
9. Biological Evolution Evidence Review
10. Biological Evolution Evidence Unit Test

5. Carbon Cycle

1. Carbon Cycle Unit Introduction
2. Modeling the Carbon Cycle
 - In this section, you will identify parts of a model for the cycling of carbon.
3. Living Things and the Carbon Cycle
 - In this section, you will describe the exchange of carbon between organisms and the environment in a model for the cycling of carbon.
4. Storage of Carbon
 - In this section, you will describe the role of carbon storage in organisms in a model for the cycling of carbon.

5. Cell Work and Carbon

- In this section, you will describe the roles of photosynthesis and cellular respiration in a model for the cycling of carbon.

6. Model Versus Real Life

- In this section, you will distinguish between models of the carbon cycle and the actual carbon cycle.

7. Carbon Cycle Apply

- In this section, you will describe how animals and plants perform cellular respiration and photosynthesis, how carbon is cycled, and how it relates to the global carbon cycle.

8. Carbon Cycle Review and Reflect

9. Carbon Cycle Unit Test

6. Energy Flow

1. Energy Flow Unit Introduction

2. Cycling of Matter and Energy

- In this section, you will identify claims about the cycling of matter and flow of energy among organisms in an ecosystem.
- In this section, you will explain how microorganisms affect the health of both organisms and ecosystems.

3. Cycling of Matter and Energy Flow

- In this section, you will describe how claims about the cycling of matter and flow of energy among organisms in an ecosystem can be expressed as a mathematical relationship.

4. Trophic Levels

- In this section, you will describe the transfer of matter and flow of energy between organisms and their environment.

5. Ten Percent Rule

- In this section, you will identify the relative proportion of organisms at each trophic level.

6. Life Processes

- In this section, you will describe the energy not transferred to higher trophic levels and the inefficiencies in the transfer of matter and energy.

7. Recycling of Matter

- In this section, you will explain how energy from photosynthesis and respiration drives the cycling of matter and flow of energy under aerobic or anaerobic conditions within an ecosystem.

8. Describing the Flow of Energy

- In this section, you will explain the cycling of matter and flow of energy in aerobic and anaerobic conditions in terms of the conservation of matter and energy.

9. Chemosynthesis

- In this section, you will justify a revised explanation about the cycling of matter and the flow of energy in aerobic and anaerobic conditions.

10. Energy Flow Apply

11. Energy Flow Review and Reflect

12. Energy Flow Unit Test

7. Biodiversity

1. Biodiversity Unit Introduction

2. Classification of Living Things

- In this section, you will define taxonomy.
- In this section, you will describe the importance of a standardized taxonomic system to the scientific community.

3. History of Classification

- In this section, you will explain the historical development of classification systems.

4. Carrying Capacity

- In this section, you will describe a mathematical model of the carrying capacity of an ecosystem.

5. Affecting Carrying Capacity

- In this section, you will describe the effects of various factors on mathematical models of carrying capacities of ecosystems.

6. Impacting Carrying Capacity

- In this section, you will identify the interdependence of factors in a mathematical model of carrying capacity.

7. Biodiversity at Population Levels

- In this section, you will explain the effects of various factors on biodiversity and population levels in a model of an ecosystem.

8. Biodiversity at Different Scales

- In this section, you will identify changes over time in biodiversity of an ecosystem using a mathematical model.

9. Disturbances in Ecosystems

- In this section, you will describe the effects of disturbances in ecosystems using mathematical models.

10. Ecosystem Interactions

- In this section, you will evaluate an explanation for ecosystem behavior in stable conditions.

11. Complex Ecosystem Transformations

- In this section, you will evaluate an explanation for ecosystem behavior in changing conditions.

12. Effects of Changing Conditions

- In this section, you will evaluate an explanation for changes in an ecosystem.

13. Modest Disturbances in Ecosystems

- In this section, you will evaluate an explanation for ecosystem response to modest disturbance.

14. Extreme Disturbances in Ecosystems

- In this section, you will evaluate an explanation for ecosystem response to extreme disturbance.

15. Biodiversity Apply

- In this section, you will develop a plan to protect coral reefs and counteract climate change.

16. Biodiversity Review and Reflect

17. Biodiversity Unit Test

8. Biodiversity Portfolio

1. Biodiversity Portfolio 1

- In this portfolio activity, you will use databases to develop, research, and analyze a solution to an environmental problem.

2. Biodiversity Portfolio 2

- In this section, you will evaluate a solution for reducing impacts of human activities on the environment.
- In this section, you will identify possible solutions for reducing impacts of human activities on the environment.
- In this section, you will design a solution for reducing impacts of human activities on the environment.

3. Biodiversity Portfolio 3

- In this section, you will construct a solution for reducing impacts of human activities on the environment.

4. Biodiversity Portfolio 4

- In this section, you will use test results to design improvements to the solution for reducing impacts of human activities on the environment.

5. Biodiversity Portfolio 5

- In this section, you will analyze the effectiveness of a solution for reducing impacts of human activities on the environment.
- In this section, you will evaluate a solution for reducing impacts of human activities on the environment.

9. Biology B Semester Review and Unit Exam

1. Biology B Semester Review

2. Biology B Semester Exam

Biology Honors

Biology Honors A/B

Course Instructional Time: 170 hours

Instructional Activities:

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Semester A Summary: Honors Biology A is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum, which meets Next Generation Science Standards (NGSS), engages students in problem-solving and scientific investigation and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will study the science of life. The student will explore the idea that living things are extremely diverse in form, yet are unified by certain core characteristics that they all share. In learning about these core characteristics, the student will be able to critically evaluate data and information related to biological problems, connect many ideas to the student's own life, and see the world in a new way. Throughout the course, the student will engage in activities to encourage critical thinking, including using multiple examples to generate broader generalizations, exploring an increased complexity of conceptual relationships, and studying content appropriate for college preparation studies.

Semester A Outline

1. Course Overview

1. Biology Course Overview

2. Biochemistry

1. Biochemistry Unit Introduction
2. The Building Blocks of Life
 - In this section, you will explain the relationship between atoms in sugar molecules formed in or ingested by an organism and atoms found in large carbon-based molecules.
3. What All Biomolecules Have in Common
 - In this section, you will use evidence to explain that sugar molecules are composed of carbon, oxygen, and hydrogen atoms, and that amino acids and other complex carbon-based molecules are composed largely of carbon, oxygen, and hydrogen atoms.
4. The Essential Sugar Molecule
 - In this section, you will explain that larger carbon-based molecules and amino acids can be a result of chemical reactions between sugar molecules and other atoms.
5. You Are What You Eat
 - In this section, you will use evidence to explain that all organisms take in matter and rearrange the atoms in chemical reactions.

6. Chemical Reactions

- In this section, you will use evidence to explain that chemical reactions can create products that are more complex than the reactants, and that chemical reactions involve changes in the energies of the molecules included in the reaction.

7. Matter Conservations Matters

- In this section, you will explain how atoms from sugar molecules combine with other elements to form large carbon-based molecules while conserving matter.

8. Respiration Overview

- In this section, you will use evidence to explain that cellular respiration involves chemical reactions between sugar molecules and other molecules in which energy is released that can be used to drive other chemical reactions.

9. Reliable Sources

- In this section, you will use a variety of valid and reliable sources as the evidence to explain how carbon, hydrogen, and oxygen from sugar molecules may combine with other elements to form amino acids or other large carbon-based molecules.

10. Biochemistry Apply

- In this section, you will explain how each organism of a food chain receives the food matter it needs to create the biomolecules for food and growth.

11. Biochemistry Review and Reflect

12. Biochemistry Unit Test

3. **Cells and Body Systems**

1. Cells and Body Systems Unit Introduction

2. What Goes In Must Come Out

- In this section, you will model how cell membranes help to regulate the transport of materials into and out of the cell.

3. Structures of the Cell

- In this section, you will model how different cell structures work together in order to create proteins. You will also show how proteins are modified, packaged, and transported to different parts of the cell.

4. Cell Structures

- In this section, you will describe the various types of organelles found in cells and compare the cell structures found in different organisms.

5. Parts of a Multicellular Organism

- In this section, you will make a model that shows the parts of human body systems and how they function.

6. Modeling Body Systems

- In this section, you will explore how different body systems work together to help an organism survive and describe ways that different systems affect each other.

7. Interactions Between Systems

- In this section, you will use a model to show how different body systems interact.

8. Models Versus Actual Body Systems

- In this section, you will compare models of body systems with actual body systems and describe how they differ.

9. Cells and Body Systems Apply

10. Cells and Body Systems Review

11. Cells and Body Systems Unit Test

4. Homeostasis Portfolio

1. Homeostasis Portfolio 1

- In this portfolio activity, you will plan and conduct an investigation that provides evidence of a feedback mechanism that maintains homeostasis.
- In this section, you will identify an area of research that shows how feedback mechanisms help an organism maintain homeostasis.
- In this section, you will plan an investigation and identify evidence that will show how feedback mechanisms help an organism maintain homeostasis.

2. Homeostasis Portfolio 2

- In this section, you will describe the data that will be collected during your investigation of homeostasis. You will also explain why the data you will collect is relevant.
- In this section, you will carry out an investigation that shows how feedback mechanisms help organisms maintain homeostasis.

3. Homeostasis Portfolio 3

- In this section, you will review your investigation and evaluate the quality of the data you collected.

5. Cell Work

1. Cell Work Unit Introduction

2. Photosynthesis

- In this section, you will model how photosynthesis transforms light into stored chemical energy by converting carbon dioxide and water into sugars and oxygen.

3. Photosynthesis: Energy Conversion

- In this section, you will model photosynthesis as a process that stores energy equal to the difference between the energies of the chemical bonds of the inputs and outputs of the process.
- In this section, you will model how photosynthesis transforms light into stored chemical energy by converting carbon dioxide and water into sugars and oxygen.

4. Photosynthesis Portfolio 1

- In this portfolio activity, you will think about how to design, conduct, and evaluate an investigation to gather evidence that photosynthesis converts light energy to stored chemical energy by showing how leaves take in carbon dioxide and release oxygen at a measurable rate.
- In this section, you will describe carbon dioxide absorption and oxygen release in photosynthesis.
- In this section, you will develop an investigation that would give evidence of the absorption of carbon dioxide and release of oxygen in photosynthesis.

5. Photosynthesis Portfolio 2

- In this section, you will describe the connection between data collected and the phenomenon of carbon dioxide absorption and oxygen release in photosynthesis.
- In this section, you will complete an investigation of the absorption of carbon dioxide and release of oxygen in photosynthesis.

6. Photosynthesis Portfolio 3

- In this section, you will assess the accuracy and precision of data collected in an investigation.

7. Cellular Respiration and Matter

- In this section, you will model the parts of cellular respiration.

8. Making and Breaking Bonds for Energy

- In this section, you will model the breaking and forming of chemical bonds in cellular respiration.

9. Cellular Respiration

- In this section, you will model the release of energy in cellular respiration.

10. Energy and Matter Conservation

- In this section, you will model the flow of matter and energy in the chemical reactions of oxygen and food molecules.

11. Heat and Cellular Respiration

- In this section, you will model the transfer of energy from food and oxygen to the cell to sustain life processes, including the maintenance of body temperature.

12. Cell Work Apply

13. Cell Work Review

14. Cell Work Unit Test

6. DNA

1. DNA Unit Introduction

2. Genes, Chromosomes, and DNA

- In this section, you will describe the structure and function of DNA, explain the relationships between DNA and the genes that are made of DNA, and determine the structure of the proteins that carry out the functions of life and the chromosomes that package the genes into cells.
- In this section, you will explore how what we know about the molecular structure of DNA has changed throughout history.

3. How Cells Make Proteins

- In this section, you will use reasoning to connect evidence that shows the relationship between the structures and functions of DNA and proteins. You will also sequence the steps in the formation of proteins within cells.

4. Gene Expression

- In this section, you will use models of DNA to form questions and provide answers that show the cause and effect relationship between DNA, proteins, and traits.

5. Gene Expression and Gene Regulation

- In this section, you will use models of DNA to form questions and provide answers that show how gene function is controlled by the cell.

6. Genetic Research

- In this section, you will identify questions and provide answers that describe the role of DNA in the formation of traits that pass from parents to offspring.

7. Genetic Factors in Inheritance

- In this section, you will use scientific information to show that traits are often the result of various genetic factors that interact with each other.

8. Genetically Modified Organisms

- In this section, you will explore and communicate information about the use of biotechnology in forensics, medicine, and agriculture.

9. Genetically Modified Organisms Discussion

10. What is a Virus

- In this section, you will compare and contrast viruses and living things, using evidence.
- In this section, you will describe the different ways viruses reproduce.
- In this section, you will describe how viruses cause disease.

11. DNA Apply

12. DNA Review and Reflect

13. DNA Unit Test

7. Mitosis

1. Mitosis Unit Introduction

2. Complex Organisms

- In this section, you will model how cells of complex organisms duplicate and become more specialized through the processes of mitosis and differentiation.

3. Inputs and Outputs of Mitosis

- In this section, you will use a model to describe how the processes of mitosis and cellular differentiation result in a complex organism.

4. Mitosis in Complex Organisms

- In this section, you will model how complex organisms use mitosis for the growth, replacement, and repair of cells. You will also describe how differentiation produces specialized cells that each have different functions within organisms.

5. Mitosis and Genetic Information

- In this section, you will use a model to show how eukaryotes use mitosis to grow new cells that contain identical genetic information.

6. Gene Expression

- In this section, you will use a model to show that although cells within a multicellular organism have the same genes, the cells differ based on which genes are expressed.

7. How Cells Are Used in the Body

- In this section, you will use a model to show how mitosis allows organisms to grow in size and replace old or damaged cells. You will also describe how the process of differentiation allows stem cells to become a variety of specialized cells.

8. Disruptions of the Cell Cycle

- In this section, you will explain that disruptions of the cell cycle lead to diseases such as cancer.

9. The Map is Not the Territory

- In this section, you will analyze the differences between a model of mitosis and the actual process of mitosis as it occurs in cells.

10. Mitosis Apply

- In this section, you will apply the phases of mitosis to develop a plan to repair damage to an organism.

11. Mitosis Review and Reflect

12. Mitosis Unit Test

8. Genetic Variation

1. Genetic Variation Unit Introduction

2. Genetic Variation from Meiosis

- In this section, you will describe how inheritable genetic variations may result from new genetic combinations through meiosis.

3. Genetic Variation from Errors

- In this section, you will apply the idea that inheritable genetic variations may result from viable errors occurring during replication.

4. Environmental Genetic Variation

- In this section, you will apply the idea that inheritable genetic variations may result from mutations caused by environmental factors.

5. Genetic Mutations Produce Variation

- In this section, you will describe the links between evidence and a claim, such as that genetic mutations produce genetic variations between cells or organisms.

6. Genetic Variations Can Be Inherited

- In this section, you will describe the links between evidence and a claim, such as that genetic variations produced by mutation and meiosis can be inherited.

7. Sources of New DNA Combinations

- In this section, you will explain that new combinations of DNA can arise from several sources, including meiosis, errors during replication, and mutations caused by environmental factors.

8. Sources of New DNA Combinations Discussion

9. Organizing Data About Expressed Traits

- In this section, you will organize population data by the frequency, distribution, and variation of expressed traits.

10. Analyzing Data About Traits

- In this section, you will use statistical analyses of data to determine the relationship between a trait's occurrence within a population and environmental factors.

11. Expressed Traits

- In this section, you will analyze data to explain the distribution of expressed traits.

12. Genetic Variation Apply

- In this section, you will draw a model that represents each of the mutations learned in this

unit.

13. Genetic Variation Review and Reflect

14. Genetic Variation Unit Test

9. Biology A Semester Review and Exam

1. Biology A Semester Review

2. Biology A Semester Exam

Semester B Summary: Biology B is designed to give the student a strong basis for understanding the world. The course consists of a varied curriculum that provides the student the opportunity to explore, compare, research, reflect, and make real-world connections. The curriculum, which meets Next Generation Science Standards (NGSS), engages students in problem-solving and scientific investigation and provides opportunities for both hands-on exploration and virtual simulation.

During this course, the student will study the science of life. The student will explore the idea that living things are extremely diverse in form, yet are unified by certain core characteristics that they all share. In learning about these core characteristics, the student will be able to critically evaluate data and information related to biological problems, connect many ideas to the student's own life, and see the world in a new way.

Semester B Outline

1. Course Overview

1. Biology B Course Overview

2. Biological Evolution

1. Biological Evolution Unit Introduction

2. How Resources Affect Evolution

- In this section, you will identify and describe factors that affect evolution, including that competition for limited resources can arise as a species increases in number.

3. Genetic Variation and Evolution

- In this section, you will identify and describe factors that affect evolution, including that individuals in a species have genetic variation that is passed on to their offspring.

4. Differential Reproduction

- In this section, you will identify and describe factors that affect evolution, including that individuals can have specific traits that give them a competitive advantage relative to other individuals in the species.

5. Modeling Evolution

- In this section, you will describe the four factors that affect the process of evolution.

6. Evolution Versus Natural Selection

- In this section, you will explain the difference between natural selection and biological evolution.

7. Environmental Change

- In this section, you will examine how changes in environmental conditions may result in an increase in the number of individuals of some species, the emergence of new species over time, and the extinction of other species.

8. Group Behavior

- In this section, you will assess the validity, reliability, strengths, and weaknesses of evidence about the outcomes of group behavior.

9. Effects of Change

- In this section, you will analyze the effects of environmental changes on the number of individuals of a species, the number of species in an environment, and the emergence or extinction of a species.

10. Biological Evolution Apply

11. Evolution Review and Reflect

12. Biological Evolution Unit Test

3. Natural Selection

1. Natural Selection Unit Introduction

2. Natural Selection Over Time

- In this section, you will organize data to support the claim that organisms with an advantageous heritable trait tend to increase in a population in proportion to organisms lacking this trait.

3. Heredity and Reproductive Success

- In this section, you will use data analyses as evidence to support claims about natural selection as the cause of increases and decreases in heritable traits in a population over time.

4. High Altitude Living

- In this section, you will use data analyses as evidence to support claims about the changes in distribution of adaptations of traits in a population.

5. Competitive Advantage

- In this section, you will use evidence to explain that individuals can have specific traits that give a competitive advantage relative to other individuals in the species.

6. Evolution of the Influenza Virus

- In this section, you will use a variety of valid and reliable sources to support the claim that natural selection leads to adaptations of populations.

7. Color and Natural Selection

- In this section, you will distinguish between cause and correlation in an explanation of how natural selection allows species to adapt to changes in their environment.

8. Transitional Fossils

- In this section, you will distinguish between cause and correlation in an explanation of how natural selection allows species to adapt to changes in their environment.

9. Natural Selection Apply

- In this section, you will describe how the pocket mouse has adapted to changes in its environment and any influences on genetics that may have occurred.

10. Natural Selection Review and Reflect

11. Natural Selection Unit Test

4. Biological Evolution Evidence

1. Evolution Evidence Unit Introduction

2. Biological Evolution Evidence

- In this section, you will identify and communicate evidence for common ancestry and biological evolution, including information derived from DNA sequences.
3. Fossil Record and Embryology
 - In this section, you will identify and communicate evidence for common ancestry and biological evolution, including patterns in the fossil record and in anatomy and embryos.
 4. Animal Phylogenetic Tree Portfolio 1
 - In this portfolio activity, you will learn how evolutionary biologists use the characteristics of organisms to explain how they evolved. You will take the role of an evolutionary biologist to explain the ancestry and evolution of an imaginary alien species. You will then apply your knowledge of evolution and model the lineage of this alien species.
 - In this section, you will define and describe animal phylogeny.
 - In this section, you will define and describe cladograms.
 5. Animal Phylogenetic Tree Portfolio 2
 - In this section, you will interpret a phylogenetic tree diagram of an animal in order to identify common ancestry and biological evolution.
 - In this section, you will create a phylogenetic tree for an imaginary animal and explain the possible common ancestry and biological evolution.
 6. Animal Phylogenetic Tree Portfolio 3
 - In this section, you will evaluate and update the phylogenetic tree based on new evidence and explain the rationale for the changes.
 7. Evidence of Evolution
 - In this section, you will observe and communicate the patterns of evidence for causal relationships relating to biological evolution and common ancestry.
 8. Evolution Evidence Apply
 9. Biological Evolution Evidence Review
 10. Biological Evolution Evidence Unit Test

5. Carbon Cycle

1. Carbon Cycle Unit Introduction
2. Modeling the Carbon Cycle
 - In this section, you will identify parts of a model for the cycling of carbon.
3. Living Things and the Carbon Cycle
 - In this section, you will describe the exchange of carbon between organisms and the environment in a model for the cycling of carbon.
4. Storage of Carbon
 - In this section, you will describe the role of carbon storage in organisms in a model for the cycling of carbon.
5. Cell Work and Carbon
 - In this section, you will describe the roles of photosynthesis and cellular respiration in a model for the cycling of carbon.
6. Model Versus Real Life

- In this section, you will distinguish between models of the carbon cycle and the actual carbon cycle.

7. Carbon Cycle Apply

- In this section, you will describe how animals and plants perform cellular respiration and photosynthesis, how carbon is cycled, and how it relates to the global carbon cycle.

8. Carbon Cycle Review and Reflect

9. Carbon Cycle Unit Test

6. Energy Flow

1. Energy Flow Unit Introduction

2. Cycling of Matter and Energy

- In this section, you will identify claims about the cycling of matter and flow of energy among organisms in an ecosystem.
- In this section, you will explain how microorganisms affect the health of both organisms and ecosystems.

3. Cycling of Matter and Energy Flow

- In this section, you will describe how claims about the cycling of matter and flow of energy among organisms in an ecosystem can be expressed as a mathematical relationship.

4. Trophic Levels

- In this section, you will describe the transfer of matter and flow of energy between organisms and their environment.

5. Ten Percent Rule

- In this section, you will identify the relative proportion of organisms at each trophic level.

6. Life Processes

- In this section, you will use the mathematical representation of a food web to account for the energy not transferred to higher trophic levels. You will also describe the inefficiencies in the transfer of matter and energy.

7. Recycling of Matter

- In this section, you will explain how energy from photosynthesis and respiration drives the cycling of matter and flow of energy under aerobic or anaerobic conditions within an ecosystem.

8. Describing the Flow of Energy

- In this section, you will explain the cycling of matter and flow of energy in aerobic and anaerobic conditions in terms of the conservation of matter and energy.

9. Chemosynthesis

- In this section, you will justify a revised explanation about the cycling of matter and the flow of energy in aerobic and anaerobic conditions.

10. Energy Flow Apply

11. Energy Flow Review and Reflect

12. Energy Flow Unit Test

7. Biodiversity

1. Biodiversity Unit Introduction

2. Classification of Living Things
 - In this section, you will define taxonomy.
 - In this section, you will describe the importance of a standardized taxonomic system to the scientific community.
3. History of Classification
 - In this section, you will explain the historical development of classification systems.
4. Carrying Capacity
 - In this section, you will describe a mathematical model of the carrying capacity of an ecosystem.
5. Affecting Carrying Capacity
 - In this section, you will describe the effects of various factors on mathematical models of carrying capacities of ecosystems.
6. Impacting Carrying Capacity
 - In this section, you will identify the interdependence of factors in a mathematical model of carrying capacity.
7. Biodiversity at Population Levels
 - In this section, you will explain the effects of various factors on biodiversity and population levels in a model of an ecosystem.
8. Biodiversity at Different Scales
 - In this section, you will identify changes over time in biodiversity of an ecosystem using a mathematical model.
9. Disturbances in Ecosystems
 - In this section, you will describe the effects of disturbances in ecosystems using mathematical models.
10. Ecosystem Interactions
 - In this section, you will evaluate an explanation for ecosystem behavior in stable conditions.
11. Complex Ecosystem Transformations
 - In this section, you will evaluate an explanation for ecosystem behavior in changing conditions.
12. Effects of Changing Conditions
 - In this section, you will evaluate an explanation for changes in an ecosystem.
13. Modest Disturbances in Ecosystems
 - In this section, you will evaluate an explanation for ecosystem response to modest disturbance.
14. Extreme Disturbances in Ecosystems
 - In this section, you will evaluate an explanation for ecosystem response to extreme disturbance.
15. Biodiversity Apply
 - In this section, you will develop a plan to protect coral reefs and counteract climate change.
16. Biodiversity Review and Reflect
17. Biodiversity Unit Test

8. Biodiversity Portfolio

1. Biodiversity Portfolio 1

- In this portfolio activity, you will use databases to develop, research, and analyze a solution to an environmental problem.

2. Biodiversity Portfolio 2

- In this section, you will gather information about examples of the negative impact of human activities on the environment.
- In this section, you will brainstorm possible solutions for reducing impacts of human activities on the environment.
- In this section, you will design a solution for reducing impacts of human activities on the environment.

3. Biodiversity Portfolio 3

- In this section, you will create or revise a simulation that can be used to test the solution for reducing impacts of human activities on the environment.

4. Biodiversity Portfolio 4

- In this section, you will use test results to design improvements to the solution for reducing impacts of human activities on the environment.

5. Biodiversity Portfolio 5

- In this section, you will analyze the effectiveness of a solution for reducing impacts of human activities on the environment.
- In this section, you will evaluate a solution for reducing impacts of human activities on the environment.

9. Biology B Semester Review and Exam

1. Biology B Semester Review

2. Biology B Semester Exam

Biology (Prescriptive)

Biology A/B Prescriptive

Time allocations:

Each lesson in the Course Outline provides an estimated time to complete.

Instructional Activities

Throughout the course, students will have regular instructional contact with their teachers and with other students through a combination of phone calls, WebMail messages, synchronous learning sessions, message boards, discussion boards, teacher virtual office hours, face-to-face interaction, and the daily review of assignments via the electronic grade book.

Course Summary

Prescriptive courses are designed as credit recovery for students. Teachers will work with students to identify the content students have not mastered. Students will only complete those lessons or units within the course. This will ensure that students have mastered all standards for graduation requirements.

Course Home

Lesson	Description	Time (min)	Objective(s)
 Student Resources	Helpful information for students.		
 Teacher Resources	Helpful information for teachers.		

Module 1: Introduction to Biology

Lesson	Description	Time (min)	Objective(s)
 Introduction to Biology	This lesson contains a video about Earth's biosphere and a module graphic organizer.	15	
 The Scientific Method	This lesson discusses the scientific method. Laboratory safety is also covered.	45	Name each step of the scientific method Explain why it is important to work safely in biology
 Quiz: The Scientific Method			
 Scientific Skills	This lesson introduces science process skills, standard units of measurement in the SI system, and different types of microscopes.	45	List the skills that scientists use Describe the measurement system most scientists use Explain how scientists communicate results Compare light microscopes and electron microscopes
 Quiz: Scientific Skills			

Lesson	Description	Time (min)	Objective(s)
 Biology Basics	In this lesson students learn about the science of biology and the characteristics of organisms.	45	Recall that biology is the study of life Describe some characteristics of living things
 Quiz: Biology Basics			
 Cycles of Life	In this lesson students learn about the four cycles of life and what occurs during each cycle.	45	List the four cycles of life Describe energy and understand what happens in an energy cycle Describe what happens in the growth cycle Explain what happens during the evolutionary cycle Describe an ecological cycle
 Quiz: Cycles of Life			
 Posttest 1			

Module 2: Basic Chemistry

Lesson	Description	Time (min)	Objective(s)
 Basic Chemistry	This lesson contains a video about blood and pH and a module graphic organizer.	15	
 Matter, Energy, and Chemical Processes of Life	In this lesson students learn that all things are made of matter and that the smallest form of matter is an atom. The physical and chemical properties of matter are presented.	45	Recognize that living things are made of matter Recognize that matter has physical and chemical properties
 Quiz: Matter, Energy, and Chemical Processes of Life			

Lesson	Description	Time (min)	Objective(s)
 Atoms and Molecules	In this lesson students learn about elements, compounds, and subatomic particles. They also learn how to read a periodic table.	45	Explain that matter is composed of combinations of chemical elements Recall that atoms are composed of subatomic particles
 Quiz: Atoms and Molecules			
 Bonding Patterns	In this lesson students learn that bonding occurs to increase atom stability. They learn the difference between covalent and ionic bonds.	45	Explain that chemical elements combine and are held together by bonds that contain energy Explain that when atoms share electrons, the bond between them is a covalent bond Explain how ions form chemical bonds
 Quiz: Bonding Patterns			
 Chemical Formulas	This lesson teaches students how to interpret a chemical formula. Students learn how to identify and name binary compounds.	45	Interpret a chemical formula Give examples of binary compounds
 Quiz: Chemical Formulas			
 Properties of Water	This lesson explains why water molecules are polar. It also discusses the unique properties of water.	45	Explain why water molecules are polar Name and describe each property of water
 Quiz: Properties of Water			

 Acids, Bases, and pH	This lesson describes acids and bases, introduces students to the pH scale, and explains what buffers do.	45	Describe the roles of acids and bases in the chemistry of living things Identify acids and bases on a pH scale Explain what buffers do
---	---	----	--

Lesson	Description	Time (min)	Objective(s)
🔍 Quiz: Acids, Bases, and pH			
★ Posttest 2			

Module 3: Chemistry of Life

Lesson	Description	Time (min)	Objective(s)
📁 Chemistry of Life	This lesson contains a video about vitamin A and blindness and a module graphic organizer.	15	
📁 Introduction to Organic Molecules	This lesson reminds students that organic compounds contain carbon. Students will identify the four classes of organic compounds essential for living things. They will also learn how cells break down and synthesize organic macromolecules.	45	<p>Explain what buffers do</p> <p>Identify the four classes of organic compounds essential for living things</p> <p>Describe how cells break down and put together macromolecules</p>
🔍 Quiz: Introduction to Organic Molecules			
📁 Carbohydrates	In this lesson students classify saccharides and learn that carbohydrates store energy used to carry out cellular functions.	45	<p>Recall that saccharides are carbohydrates</p> <p>Recognize that carbohydrates store energy used to carry out the many functions of cells</p>
🔍 Quiz: Carbohydrates			
📁 Investigating Carbohydrates	In this lesson students will observe and respond to a laboratory investigation about carbohydrates.	20	Investigate Carbohydrates via a laboratory simulation

Lesson	Description	Time (min)	Objective(s)
 Lipids	The lesson describes lipids as water-insoluble molecules used for food storage, membranes, and hormones. It also describes the three main types of lipids.	45	Recognize that lipids are water-insoluble molecules used for food storage, membranes, and hormones Describe the three main types of lipids
 Quiz: Lipids			
 Investigating Lipids	In this lesson students will observe and respond to a laboratory investigation about lipids.	20	Investigate lipids via a laboratory simulation
 Proteins	This lesson addresses the importance of amino acids and describes the various uses of proteins in the body.	45	Recognize that amino acids are the monomers of proteins Describe ways that proteins are used in the body
 Quiz: Proteins			
 Investigating Proteins	In this lesson students will observe and respond to a laboratory investigation about proteins.	20	Investigate proteins via a laboratory simulation
 Nucleic Acids	This lesson discusses the structure and function of nucleic acids.	45	Recognize that nucleic acids are informational macromolecules Recognize that the monomers of nucleic acids are nucleotides
 Quiz: Nucleic Acids			
 Enzymes: One Type of Protein	In this lesson students discover the importance of enzymes in living organisms. They learn about activation energy and its importance in chemical reactions.	45	Recognize that enzymes act as catalysts for chemical reactions Define activation energy and explain its importance
 Quiz: Enzymes: One Type of Protein			
 Posttest 3			

Lesson	Description	Time (min)	Objective(s)
 Cells: The Basic Units of Life	This lesson contains a video about the development of cell theory and a module graphic organizer.	15	
 Introduction to Cells	In this lesson students learn about the different types of molecules found in a cell. In addition, students learn how cells were discovered and how the discoveries relate to cell theory.	45	List the types of molecules found in a cell Explain how cells were discovered
 Quiz: Introduction to Cells			
 Homeostasis, Diffusion, and Osmosis	In this lesson students learn about homeostasis and how it is maintained through diffusion and osmosis. The three kinds of osmotic environments are presented.	45	Define homeostasis Predict the direction of diffusion Identify the three kinds of osmotic environments
 Quiz: Homeostasis, Diffusion, and Osmosis			
 Investigating Osmosis	In this lesson students will observe and respond to a laboratory investigation about osmosis.	20	Investigate osmosis via a laboratory simulation
 Prokaryotic and Eukaryotic Cells	This lesson describes the features of prokaryotic and eukaryotic cells. It presents the various levels of organization in a multicellular organism.	45	Describe the features of prokaryotic cells Describe the features of eukaryotic cells List the four levels of organization in complex organisms
 Quiz: Prokaryotic and Eukaryotic Cells			

Lesson	Description	Time (min)	Objective(s)
 The Cell Membrane	In this lesson students learn about the cell membrane structure, the functions of molecules found in the membrane, and the environment inside the cell membrane.	45	Describe the bilayer structure of cellular membranes Identify the function of other molecules found in a cellular membrane Describe a cell's interior environment
 Quiz: The Cell Membrane			
 Transport Across Membranes	This lesson shows how molecules are moved across the plasma membrane. It discusses active and passive transport, as well as endocytosis and exocytosis.	45	Compare active and passive transport Compare exocytosis and endocytosis
 Quiz: Transport Across Membranes			
 Posttest 4			

Module 5: Eukaryotic Cell Structure

Lesson	Description	Time (min)	Objective(s)
 Eukaryotic Cell Structure	This lesson contains a video about stem cells and a module graphic organizer.	15	
 Information Organelles	This lesson describes the structures and functions of information organelles such as the cell nucleus, the nucleolus, and ribosomes.	45	Describe the structures found in the nucleus Describe the structure and function of ribosomes
 Quiz: Information Organelles			

Lesson	Description	Time (min)	Objective(s)
 Additional Organelles	This lesson describes energy organelles, such as chloroplasts and mitochondria, and the structures and functions of the endomembrane system.	45	<p>Explain the role of chloroplasts</p> <p>Explain the role of mitochondria</p> <p>Explain the role of the endoplasmic reticulum and Golgi apparatus</p> <p>Explain the role of vacuoles and lysosomes</p>
 Quiz: Additional Organelles			
 Cytoskeleton and Plant Cells	This lesson describes the structure and function of the cytoskeleton. It also discusses organelles in a plant cell, including the unique structures of plant cells.	45	<p>Describe the primary function of the cytoskeleton</p> <p>Identify three types of fibers in the cytoskeleton</p> <p>Identify special structures found in plant cells</p>
 Quiz: Cytoskeleton and Plant Cells			
 Investigating Plant Cells	In this lesson students will observe and respond to a laboratory investigation about plant and animal cells.	20	Investigate plant cells via a laboratory simulation
 Posttest 5			

Module 6: Cellular Respiration

Lesson	Description	Time (min)	Objective(s)
 Cellular Respiration	This lesson contains a video about boosting cellular respiration and a module graphic organizer.	15	

Lesson	Description	Time (min)	Objective(s)
 ATP	This lesson describes how energy is used in cells and how food is a source for some of this energy. It shows how ADP is used to make ATP.	45	Describe how ATP acts as energy currency at the cellular level Explain how food molecules provide a source of energy to living things Explain how ATP is made from ADP
 Quiz: ATP			
 Cellular Respiration	In this lesson students learn about cellular respiration and the major chemical reactions it involves.	45	Connect cellular respiration to human breathing Discuss the purpose of redox reactions
 Quiz: Cellular Respiration			
 The Stages of Cellular Respiration	In this lesson students explore the stages of cellular respiration. Glycolysis, the Krebs cycle, and the electron transport chain are discussed in detail.	45	Describe the activity of glycolysis Describe the activity of the Krebs cycle Describe the activity of the electron transport chain
 Quiz: The Stages of Cellular Respiration			
 Investigating Cellular Respiration	In this lesson students will observe and respond to a laboratory investigation about cellular respiration in plants.	20	Investigate cellular respiration in plants
 Fermentation	This lesson teaches students about fermentation. It describes the products of lactic acid and ethyl alcohol fermentation. Students also learn how cellular respiration is controlled in the body.	45	Relate fermentation to cellular respiration Describe different products of fermentation <ul style="list-style-type: none"> • Discuss how an organism controls respiration to meet its energy needs
 Quiz: Fermentation			

Lesson	Description	Time (min)	Objective(s)
★ Posttest 6			

Module 7: Photosynthesis

Lesson	Description	Time (min)	Objective(s)
 Photosynthesis	This lesson contains a video about worldwide photosynthesis and a module graphic organizer.	15
