Account Classification and Coding Structure

The Manual of Accounting and Related Financial Procedures for Pennsylvania School Systems provides for classification of three basic types of financial activity: revenues and other financing sources; expenditures and other financing uses; and transactions affecting the balance sheet only. For each type of transaction, (i.e. revenue, expenditure, balance sheet), the account code is made up of a combination of dimensions. Each dimension describes one way of classifying financial activity. The dimensions provided in the manual for each type of transaction are:

Revenues: Fund, Revenue Code, Funding Source

Expenditure: Fund, Function, Object, Funding Source, Instructional Organization, Operational Unit, Subject Matter, Job Classification, Special Cost Center

Balance Sheet: Fund, Balance Sheet Account

A numerical coding structure has been developed for each dimension; however, an LEA may not necessarily need to use the numerical coding provided to identify and use a dimension. An example of this situation would be the identification of the dimension for fund. LEAs that keep records of financial transactions for all funds in one set of ledgers and journals should use the numerical coding provided in the Manual for fund identification. LEAs using a separate set of ledgers and journals for keeping record of financial transactions of each fund would use the physical separation of the records for fund identification instead of a numerical coding.

Digits within the numerical coding structure developed for each dimension represent a specific subdivision of the dimension. Subdivisions are arranged in a hierarchical order from left to right. The following is an example of the construction of the Functional dimension for accumulating costs for the payroll section of the business office. Costs may be accumulated at any one or all levels within this dimension.

| | |
|--|------|
| Function – Support Services | 2000 |
| Subfunction – Business | 2500 |
| Service Area – Fiscal Services..... | 2510 |
| Area of Responsibility – Payroll Services..... | 2514 |

Note: LEAs must utilize certain dimensions in order to meet State and Federal reporting requirements; however, use of any additional dimensions and the structural ordering of all dimensions is at the discretion of LEAs.

❖ *Explanation of Dimensions and Coding Structures*

REVENUE DIMENSIONS

Fund

(Use Required For State Reporting Purposes)

A fund is a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources. It also contains all related liabilities and residual equities or balances or changes therein.

Funds are established to carry on specific activities or attain certain objectives of an LEA according to special legislation, regulations or other restrictions.

Revenue Code

(Use Required For State Reporting Purposes)

This dimension permits segregation of revenues by source. The primary classification differentiates Local, State, and Federal revenue sources. Other Financing Sources are included in the dimension breakdown, although in a strict accounting sense, these are not revenues. (See the Revenue Section for a more detailed explanation.)

Revenue Coding Example for Current Real Estate Taxes

Revenue Code 6111

| Local Revenue | Taxes Levied | Real Estate Taxes | Current Real Estate Taxes |
|---------------|--------------|-------------------|---------------------------|
| 6 | 1 | 1 | 1 |

Funding Source

This dimension is recommended for program reporting and district-wide reporting when classifying revenues and related expenditures.

Revenue dimensions required for reporting to the Commonwealth of PA are:

| Fund | Revenue Account | Funding Source |
|------|-----------------|----------------|
| XX | XXXX | XXX |

EXPENDITURE DIMENSIONS

Fund

(Use Required For State Reporting Purposes)

See description in Revenue Dimension.

Function

(Use Required For State Reporting Purposes)

The Function describes the activities for which a service or material is acquired. The functions of an LEA are classified into five broad areas: 1) Instruction, 2) Support Services, 3) Operation of Non-instructional Services, 4) Facilities Acquisition, Construction, and Improvement Services, and 5) Other Financing Uses. Functions consist of activities, which have somewhat the same general operational objectives. For example, the subfunctions (the first major subdivision of a function), of the function Support Services consist of such areas as transportation, pupil personnel services, administration, etc. The function for Instruction is broken down by program (e.g., regular, special, vocational, etc.). Construction of the functional coding structure beyond the subfunction classification is based on the principle that the classification of activities should be combinable, comparable, relatable, and mutually exclusive.

Object

(Use Required For State Reporting Purposes)

The Object Dimension is the service or commodity bought. This manual identifies nine (9) major object categories: (1) Personnel Services – Salaries, (2) Personnel Services – Employee Benefits, (3) Purchased Professional and Technical Services, (4) Purchased Property Services, (5) Other Purchased Services, (6) Supplies, (7) Property, (8) Other Objects, (9) Other Financing Uses.

Funding Source

(Use Required to track Federally funded expenditures for State Reporting)

The Funding Source dimension permits LEAs to accumulate expenditures to meet a variety of specialized reporting requirements at Local, State, and Federal levels. The first two digits of this dimension identify the funding source (e.g., Local, State or Federal), authority (e.g., Title I or Title II), or expenditure purpose (e.g., Child Nutrition Projects) for which a special record or report of revenues, expenditures or both is required. The third digit of this three digit dimensional code is available to identify particular projects (e.g., Part A of a Title I project). Use of Funding Sources is not required but is recommended particularly for federal revenue sources. LEAs must have the ability to identify expenditures funded with any specific revenue source upon request or for various required reports.

Instructional Organization

(Use Required For State Reporting Purposes)

The Instructional Organization dimension segregates expenditures by organizational level (i.e., elementary, secondary, etc.).

Operational Unit

The Operational Unit dimension segregates costs by school.

Subject Matter

This dimension describes a group of related subjects and allows the accumulation of costs for providing instruction for particular subject areas.

Job Classification

This dimension enables LEAs to categorize in more detail the job classification identified in the Object Dimension for Salaries. This dimension should only be used with objects 100 and 200.

Special Cost Center

The Special Cost Center dimension is used by LEAs for classifying expenditures in any other manner needed. Some examples of possible uses of special cost center dimensions are the classifications of costs by term, work, order, bus route, fiscal year, etc.

Expenditure dimensions required for reporting to the Commonwealth of PA are:

| Fund | Function | Object | Funding Source | Instructional Organization |
|------|----------|--------|----------------|----------------------------|
| XX | XXXX | XXX | XXX | XX |

The full system of expenditure dimensions is as follows:

| Fund | Function | Object | Funding Source | Instructional Organization | Operational Unit | Subject Matter | Job Classification | Special Cost Center |
|------|----------|--------|----------------|----------------------------|------------------|----------------|--------------------|-------------------------|
| XX | XXXX | XXX | XXX | XX | XXX | XXX | XXX | Number of Digits Varies |

Expenditure Dimension Code Example: General Fund purchase of mathematics textbooks, for regular instruction, at the secondary education level, at ABC Senior High School.

| Fund | Function | Object | Funding Source | Instructional Organization | Operational Unit | Subject Matter |
|------|---------------------------------------|--------|----------------|----------------------------|------------------|----------------|
| 10 | 1110 | 640 | 000 | 30 | 810 | 110 |
| 10 | General Fund | | | | | |
| 1110 | Instruction – Regular Programs | | | | | |
| 640 | Supplies – Books & Periodicals | | | | | |
| 000 | Non-categorical | | | | | |
| 30 | Secondary Level | | | | | |
| 810 | ABC Senior High School (3 Digit Code) | | | | | |
| 110 | Mathematics (3 Digit Code) | | | | | |

BALANCE SHEET DIMENSIONS

Fund

(Use Required For State Reporting Purposes)

See description in Revenue Dimension.

Balance Sheet Account

(Use Required For State Reporting Purposes)

The Balance Sheet Account dimension consists of asset, deferred outflows of resources, liability, deferred inflows of resources, and fund balance accounts. When presented together in statement presentation, those accounts form the Balance Sheet, which is the basic financial statement used to disclose an LEA’s financial position at a specific date.

Balance Sheet Coding Example – Cash in the bank for the General Fund.

| Fund | Balance Sheet Account |
|------|-----------------------|
| 10 | 0101 |
| 10 | General Fund |
| 0101 | Current Asset – Cash |

Balance sheet dimensions required for reporting to the Commonwealth of PA are:

| Fund | Balance Sheet Account |
|------|-----------------------|
| XX | XXXX |

❖ *Assigned Serial Number (ASN)*

The concept of an Assigned Serial Number (ASN) is the same concept as an account code number being assigned to a verbal account description.

An example would be: The LEA wishes to accumulate cost for General Fund expenditures for secondary textbooks used for regular instruction and paid by non-categorical funds. Rather than record this descriptive information on purchase orders, invoices, ledger cards or account cards, the description is assigned a numerical designation.

| General Fund | Regular Instruction | Books & Periodicals | Non-categorical | Secondary |
|--------------|---------------------|---------------------|-----------------|-----------|
| 10 | 1100 | 640 | 000 | 30 |

Therefore, 10-1100-640-000-30 means General Fund expenditures for secondary textbooks used for regular instruction and paid by non-categorical funds.

The assigned numerical designation of 14 digits may not appear to be any more convenient than the verbal description.

The LEA establishes a chart of accounts sufficient to meet their needs. Each account is then assigned a serial number (ASN). The ASN is subsequently used on all purchase orders and invoices. A dictionary of ASNs and their designated account code and description is maintained in computer memory. Computer input is by ASN but output is by account code and description.

The ASN may be any size the LEA desires. It may be assigned sequentially, or it may be assigned bearing some relationship to the account number and description.

29 Athletic Fund

School sponsored Athletic funds are set up in accordance with Section 511 of the PA School Code. LEAs are permitted to establish an athletic fund as a special revenue fund only if all the following criteria are met:

- The revenue source, typically gate receipts, must comprise a substantial portion (defined as 50% or more in Accounting Bulletin 2010-02) of the inflow of this fund. Note: transfers from other funds may not be considered a revenue source, regardless of their origin
- Expenditures are limited to costs specific to the athletic programs, which may not include expenditures for capital projects or debt service.

If these criteria are met and Fund 29 is utilized, then all athletic expenditures of the school must be accounted for in this fund.

If the criteria are not met, athletic activities must be accounted for in the general fund of the school.

No other transfers out of this fund are allowable for any purpose.

Section 1850: Capital Reserve Funds authorized by Section 1850.4 of the PA School Code are available for use by Area Vocational Technical Schools only. This fund accounts for the accumulation of monies to be expended during a period not to exceed five years from the date when the first payment was made into the fund, for the purpose of purchasing equipment or maintaining facilities. The fund shall consist of monies transferred during any fiscal year from appropriations made for this purpose, and of unencumbered funds remaining in the general fund. No transfers out of this fund are allowable for any purpose.

Although categorized as a capital projects fund, the statutory limitations must be followed when establishing and maintaining this fund.

The balance in this account represents at any time the difference between the total of the estimated revenues and other financing sources and the total of the appropriations in the current fiscal year. This is a temporary account and at the end of the fiscal year, the budgetary accounts except Reserve for Encumbrances are closed to this account and the debit or credit balance is then closed to General Ledger Accounts 0830-Committed Fund Balance, 0840-Assigned Fund Balance, and/or 0850-Unassigned Fund Balance.

0790 NET POSITION

Net position is the difference between total assets plus deferred outflows of resources, and total liabilities plus deferred inflows of resources. Net Position is displayed in three components, which are 1) Invested in Capital Assets, Net of Related Debt, 2) Restricted (distinguishing among major categories of restrictions), and 3) Unrestricted. Each of these components, reported on the Statement of Net Position and the Proprietary Fund Statement of Net Position, is defined below.

0791 Net Investment In Capital Assets

The net investment in capital assets component of net position consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of bonds, mortgages, notes, or other borrowings that are attributable to the acquisition, construction, or improvement of those assets. Deferred outflows of resources and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt also should be included in this component of net position. If there are significant unspent related debt proceeds or deferred inflows of resources at the end of the reporting period, the portion of the debt or deferred inflows of resources attributable to the unspent amount should not be included in the calculation of net investment in capital assets. Instead, that portion of the debt or deferred inflows of resources should be included in the same net position component (restricted or unrestricted) as the unspent amount.

0792 – 0798 Restricted Net Position

The restricted component of net position consists of restricted assets reduced by liabilities and deferred inflows of resources related to those assets. Net Position is restricted because (1) constraints or limits are externally imposed by creditors, grantors, contributors, or laws and regulations by another government, or by (2) constitutional provisions or enabling legislation. Enabling legislation provides authority to assess, levy, charge, or otherwise mandate payments from others and includes a legal requirement that those resources be used only for a specific purpose stated in legislation.

Restricted Net Position distinguishes between major categories of restrictions (i.e., debt service, capital projects, permanent funds, etc.) by separate lines. When reporting permanent fund endowments or fund principal amounts, Restricted Net Position should be segregated accordingly between expendable and nonexpendable amounts. Record restricted net position to the specific accounts listed below:

0792 Restricted for Retirement of Long-Term Debt

An account that represents the amount of net position that is legally obligated for long-term debt.

0793 Restricted for Capital Projects

An account that represents the amount of net position that is legally obligated for capital projects.

An account that represents the amount of net position that is legally obligated for the expendable portion of permanent endowments.

0795 Restricted for Permanent Endowments – Nonexpendable Portion

An account that represents the amount of net position that is legally obligated for the nonexpendable portion of permanent endowments.

0798 Restricted for Other Purposes

An account that represents the amount of net position that is legally obligated for restrictions not mentioned in Accounts 0792 through 0795, above.

0799 Unrestricted Net Position

The unrestricted component of net position is the net amount of the assets, deferred outflows of resources, liabilities, and deferred inflows of resources that are not included in the determination of net investment in capital assets or the restricted component of net position.

0800 FUND BALANCE

0810 Nonspendable Fund Balance

0820 Restricted Fund Balance

Amounts constrained to be used for a specific purpose per external parties or legislation.

0830 Committed Fund Balance

Amounts constrained to be used for a specific purpose as per government's highest level of decision making authority such as the school board, board of directors, board of trustees, etc. Note: Board Resolution required. Constraint can also be removed or changed by an equal level action.

0840 Assigned Fund Balance

Amounts intended to be used for a specific purpose as per a committee or individual authorized by the governing body. These amounts are not restricted or committed.

0850 Unassigned Fund Balance

Amounts available for any purpose within the General Fund only. Other governmental funds, by their nature would automatically require that funds be classified as nonspendable, restricted, committed or assigned. In the event that a fund, other than the general fund has expenditures that exceed revenues, the unassigned fund balance category may be used to report a negative ending fund balance only.

0900 DEFERRED OUTFLOWS / INFLOWS OF RESOURCES

GASB Statement 63 and Statement 65 primarily address deferred outflows/inflows of resources as created in GASB Concepts Statement 4 Elements of Financial Statements. Deferred outflows/inflows of resources should only be used as specifically required in authoritative GASB pronouncements.

Governments should provide details of the different types of deferred amounts in the notes to the financial statements if significant components of the total deferred amounts are obscured by aggregation.

Record here consumptions of net assets by the LEA that are applicable to a future reporting period.

0950 Deferred Inflows of Resources

Record here acquisitions of net assets by the LEA that are applicable to a future reporting period.

Section E

Expenditures and Other Financing Uses

❖ *Expenditures*

Expenditures and expenses are decreases of net financial resources in the applicable funds. They are classified in this Chart of Accounts by fund, function, object, funding source, instructional organization, and operational unit as required dimensions; subject matter, job classification, and special cost center as LEA optional dimensions. (These dimensions have been defined in Chart of Accounts Introduction)

The expenditure and expense accounting system has been so structured that all the costs within the particular subdivisions of that function can be combined to form a summary total of related costs. Costs are recorded only once so that they are mutually exclusive. The aggregation of mutually exclusive and related costs makes possible comparisons between the various functions and subdivisions of that function.

*** Functions and subfunctions that are required for state reporting purposes have been designated with an asterisk following the function/subfunction number.**

❖ *Other Financing Uses*

Other Financing Uses include outlays for debt service, fund transfers, and similar type transactions. Other financing uses are classified separately from the expenditures in Function 5000.

Note: In this manual, administrative functions are organized within the accounting structure in relation to the magnitude of expenditures usually found in a typical LEA. However, an LEA does not have to structure its administrative organization to conform to this accounting structure.

❖ *Expenditure Function Codes*

5900 BUDGETARY RESERVE

Budgetary Reserve is not an expenditure function or account. It is strictly a budgetary account. This account will not display on the Annual Financial Report.

In addition to the appropriations, it is a sound management practice to provide for operating contingencies through a BUDGETARY RESERVE. Experience indicates that there are certain variables over which control is impossible regardless of the care with which the budget is prepared. These variables include unpredictable changes in the costs of goods and services, and the occurrences of events which are vaguely perceptible during the time of budget preparations, but which nevertheless, may require expenditures by the LEA during the year for which the budget is being prepared.

Even though the operating contingencies for which provision is being made may contain certain unknowns, the BUDGETARY RESERVE should be composed of components for which estimates are made. For example, there may be Federal, State or local programs, which may or may not, require expenditures by the school system in the fiscal year for which the budget is being prepared.

Rather than provide for such contingencies by “padding” the functional appropriations, it is preferable to limit the functional appropriations to amounts that are supportable by estimates based upon financial, enrollment and other statistics as related to the more definite educational plans and programs for the budget year, and earmark a reserve for the less predictable requirements. The BUDGETARY RESERVE should be reasonable in amount and in proper proportion to the known operating requirements of the LEA.

Expenditures may not be made against the BUDGETARY RESERVE, but only against the line items, which appear throughout the functional appropriations. Whatever may be needed from the BUDGETARY RESERVE may not be used until after transfer from the Reserve to the line items against which the expenditures are to be charged. Each such transfer requires the prior authorization of the Board of School Directors, and may be made only during the last nine (9) months of the fiscal year.

To the extent that the contingencies for which the BUDGETARY RESERVE has been provided fail to materialize in the budget year, there will be a balance remaining in the BUDGETARY RESERVE at the close of the budget year. If covered by revenues realized during the budget year, as it should be in all school systems operating on a pay-as-you-go basis, such a balance becomes a part of the total resources available for application against the requirements of the next fiscal year.

Section G

Revenues and Other Financing Sources

❖ *Revenues*

Revenues for governments are defined in general as: Increases in assets without a corresponding increase in liabilities or recovery of expenditure.

Revenues are classified as local, state, or federal sources:

Revenue from local sources is the amount of money produced within the boundaries of the LEA and available to the LEA for its use. It includes tax revenues and other intergovernmental revenues collected by another governmental unit, local tax collector or agent of the LEA (net of collection fees). Shared revenues are revenues levied and / or collected by another governmental unit, and shared with the LEA in proportion to the amount collected on behalf of the LEA. Local source revenues also include investment income, cafeteria revenues, student activity revenues, rental receipts, tuition received from other LEAs or patrons, donations, and gifts. Federal, state, and local revenues received by the LEA through another governmental unit, school entity, consortium, vocational school, alternative school or intermediate unit are also considered local revenue.

An illustration of revenue from another governmental unit is a sales tax levied and collected by a county government, which then distributes the money collected to the LEAs on a flat grant or equalization-aid basis. In this example, on the books of an LEA, the county would be the intermediate source and this revenue would be considered revenue from an intermediate local source, account #6810.

Revenue from state sources includes grants, subsidies, contracts, and entitlements received from the Commonwealth of Pennsylvania. This revenue includes basic instructional and operational subsidies, specific educational program subsidies, non-educational program subsidies, state reimbursements for school employee benefits, nonpublic program funding, vocational training for adults, and school milk, lunch, and breakfast programs. Much of this revenue is based on weighted average daily student attendance, local wealth, and legislated distribution formulas. State revenues received from another local source, rather than directly from the Commonwealth, should be recorded to the 6820 account series.

Revenue from federal sources includes grants, subsidies, contracts, and entitlements received either directly from the Federal Government offices or through the Commonwealth of Pennsylvania. This money is generally program specific with program reporting requirements attached to each program. In determining whether revenue is federal revenue, it is unimportant whether the funds are distributed directly to the LEA by the Federal government or through some intervening State agency. Federal revenue will have a Catalog of Federal Domestic Assistance (CFDA) number and could be received from the Federal government, State government, Local government or another public school. When an LEA does not have a method for determining the prorated share of federal, state, and other sources of revenue in a commingled grant, the distributing agency should provide this information to each recipient. Federal revenues received through another local source, rather than direct from the Federal government or through the Commonwealth of Pennsylvania, should be recorded to the appropriate 6830 account series.

❖ *Other Financing Sources*

Other Financing Sources are not classified as revenues in most fund types because the receipts are not earned by the LEA. Other financing sources for a public school include proceeds from long-term debt financing agreements, receipt from other funds of the school, and proceeds from the sale or compensation for the loss of fixed assets. Other Financing Sources are classified separately under account code series 9000.

The amount of the Farmstead Exclusion may be any amount the district chooses, but may not exceed the amount provided for the Homestead Exclusion. A farm may receive both a Homestead and Farmstead Exclusion at the same time.

For a property to qualify for a Farmstead Exclusion, it must meet several conditions as defined by the Act:

- Farmhouses must be the owner’s primary domicile.
- Farms must be a minimum of ten (10) contiguous acres (multiple parcels may be included but must be contiguous).
- Buildings must be used in “commercial agricultural production.”
- Buildings must not be subject to any other preferential tax treatment.

The Farmstead applies to the buildings only; therefore, the land would be eligible to remain qualified for “clean and green.”

Special Cost Center Dimension

It is recognized that LEAs utilize many other methods of classifying expenditures for particular purposes. None of these methods are used with enough regularity for inclusion here; but when used, they are important. The purpose and coding size of this dimension is at the discretion of the LEA. Some of the possible additional dimensions are:

- Term
- Course
- Work Order
- Bus Route or Vehicle

In addition, in automated systems, there may be a need to add some codes for use by the computer. These might include:

- A transaction code to route the transaction through the system and post the correct files and fields in the data record
- A fiscal year code to assist with closing out one year while beginning to process activity for the new year
- A reporting level code to assist in organizing report contents and subtotals.
