

**A Newborn Hearing Screening Roadmap for Families
Pennsylvania Early Hearing Detection and Intervention Program**

Child's name: _____

Child's date of birth: _____

Birth

Hospital or Home Birth

Date of first hearing screening: _____

First screening results

| | | |
|--------------------------|--------------|--------------------------|
| Left ear | | Right ear |
| <input type="checkbox"/> | Pass | <input type="checkbox"/> |
| <input type="checkbox"/> | Did not pass | <input type="checkbox"/> |
| <input type="checkbox"/> | Not screened | <input type="checkbox"/> |

Be sure that your doctor gets all of the test results for your baby!

If your baby does not pass the screening in one or both ears, or was not screened, ask your doctor about an outpatient screening for your baby.

If your baby does not pass the screening in one or both ears, the screening provider should refer your baby for CMV screening. CMV screening should be performed within 21 days of birth.

Most children with hearing loss are born to parents who have normal hearing.

Some babies are born with normal hearing but lose their hearing when they are older.

Schedule a checkup with your health care provider when your baby is 2 to 4 days old.

Before 1 Month of Age

Outpatient Screening

Date of outpatient hearing screening: _____

Outpatient screening results

| | | |
|--------------------------|--------------|--------------------------|
| Left ear | | Right ear |
| <input type="checkbox"/> | Pass | <input type="checkbox"/> |
| <input type="checkbox"/> | Did not pass | <input type="checkbox"/> |
| <input type="checkbox"/> | Not screened | <input type="checkbox"/> |

If your baby did not pass an outpatient or final screening, ask your doctor to schedule an appointment with a pediatric audiologist as soon as possible.

Children as young as 1 month of age can be fitted with hearing aids.

Before 3 Months of Age

Evaluation by a Pediatric Audiologist

Date of evaluation: _____

Audiology evaluation results

| | | |
|--------------------------|-----------------|--------------------------|
| Left ear | | Right ear |
| <input type="checkbox"/> | No hearing loss | <input type="checkbox"/> |
| <input type="checkbox"/> | Hearing loss | <input type="checkbox"/> |

If your baby has a hearing loss, the next steps are:

- ✓ Enroll in early intervention by calling the CONNECT Line at 1-800-692-7288.
- ✓ Enroll in the Family Connections for Language and Learning program by calling 717-580-0839.
- ✓ Learn about communication options.
- ✓ Discuss the use of hearing aids and FM systems with your audiologist.
- ✓ Be sure that your doctor has the audiology test results.

Before 6 Months of Age

Other visits and testing can include:

- ✓ Seeing a pediatric ophthalmologist (eye doctor); an ears, nose and throat (ENT) doctor and a geneticist;
- ✓ Regular visits with your audiologist; and
- ✓ Visits to <https://www.health.pa.gov/topics/programs/Newborn-Screening/Pages/Hearing.aspx>

If you have questions or require additional information about services, please call the Pennsylvania Healthy Baby toll free line at 1-800-986-2229 or the Department of Health Newborn Hearing Screening Program at 717-783-8143.

A Newborn Hearing Screening Roadmap for Families Pennsylvania Early Hearing Detection and Intervention Program

State Resources

Family Connections for Language and Learning™ (FCLL) is dedicated to supporting families of infants and toddlers who are newly identified with hearing loss by offering them an opportunity to talk or meet face-to-face with a trained parent guide who can provide assistance using his or her personal experience and knowledge. For more information about this free service, call the FCLL program coordinator at 717-580-0839 or email agaspich@pattan.net

Pennsylvania Early Hearing Detection and Intervention website:
This website was developed by the Pennsylvania Department of Health and contains information for families who have young children that have not passed a hearing screening test or who have been diagnosed with hearing loss: <https://www.health.pa.gov/topics/programs/Newborn-Screening/Pages/Hearing.aspx>

Early Intervention consists of services and supports for infants, toddlers and preschool children who have special needs due to developmental delays or disabilities, such as a hearing loss. Early intervention also provides support services to families that help them learn how to develop their child's potential. Call the CONNECT Helpline at 1-800-692-7288 (or go to www.connectpa.net) for information about early intervention services or if you have questions about your child's development and specific disabilities.
