

INJURIES IN PENNSYLVANIA: 2023 County Profiles

**Violence and Injury
Prevention Program**

November 2024

pennsylvania
DEPARTMENT OF HEALTH

List of Abbreviations

E-code	External cause of injury code
ICD-10-CM	International Classification of Diseases, Tenth Edition, with Clinical Modification
PHC4	Pennsylvania Health Care Cost Containment Council
NEC	Not elsewhere classifiable
MVT	Motor vehicle traffic

Acknowledgments

Data used in this report were provided to the Pennsylvania Department of Health by the Pennsylvania Health Care Cost Containment Council. The Pennsylvania Health Care Cost Containment Council specifically disclaims responsibility for any interpretations or conclusions. Contents may be republished or reproduced whole or in part, with attribution.

Overview

Please utilize the bookmarks included in the electronic document to navigate directly to the data for a desired county.

This report provides detailed county-specific hospitalization data for 2023. This overview highlights several key variables for hospitalized Pennsylvanians as distributed among seven age groups: 1) under 5 years; 2) 5 to 14 years; 3) 15 to 24 years; 4) 25 to 44 years; 5) 45 to 64 years; 6) 65 to 74 years; and 7) 75 years and more. The median and total charges for the hospitalizations are also provided for each of the variables examined. The selected variables included demographic features on gender and race, cause of hospitalization or injury mechanism categories, the intent of the injury, whether a fatality resulted, and the payer source. The frequency or number of discharges is provided in the table. However, rates were not calculated, since, in many cases, the low counts when stratified by county did not warrant rate computations.

The total hospital charges for all injuries exceeded \$15.0 billion -- more than \$8.3 billion from falls alone and approximately \$896.7 million from injuries related to occupants of motor vehicles. Of the total hospital charges for all injuries, over 77 percent were paid by governmental sources such as Medicare/Medicaid, with 21 percent paid by non-governmental sources, such as Blue Cross and other commercial insurance. The top injury causes, in terms of median charge, were those due to motor vehicle traffic, firearm, suffocation, and drowning/submersion.

Data Source

The 2023 statewide hospital discharge data compiled by the Pennsylvania Health Care Cost Containment Council (PHC4) was the primary data source for this report. PHC4 compiles data on inpatient discharges from all hospitals in Pennsylvania. The data set contains patient-specific data with numerous fields of interest for injury surveillance, including: patient demographics (age, gender and race); discharge diagnoses (principal diagnosis, seventeen secondary diagnoses); type and source of admission; and characteristics of admission and discharge (admission quarter and year, discharge quarter and year). Data used for this report include all 2023 hospital discharges in acute care hospitals due to injuries to Pennsylvania residents.

Injury Definition Used

An injury hospital discharge was defined as one occurring in the Commonwealth of Pennsylvania that was assigned an ICD-10-CM code between T17 and T75 and between V01 and Y98 as its primary diagnosis, or one with any diagnosis outside ICD-10-CM codes T17-T75 and V01-Y98, but with a valid E-code. A few cases were excluded, including late effects and medical/surgical misadventures.

Data Limitations

There were several data limitations that should be considered when interpreting the results presented in this report, including the following:

- Coders may have inconsistently utilized the E-code field, particularly in cases with multiple discharge diagnoses.
- E-codes vary in specificity, with some that are non-specific or ambiguous.
- Medical record injury documentation may be lacking in some cases.
- Intentional injuries may be underreported, since undetermined intent might be coded as “unintentional” per national E-code assignment guidelines.
- Due to readmissions or transfers, some injury events may be double counted.
- The PHC4 editing process may not capture all errors in hospital coding.
- Non-residents are excluded from analysis.
- Finally, due to missing or out-of-range data, some tables may not add up to the total number of injury hospital discharges.

Due to the limitations mentioned above, readers are cautioned about extrapolation of this data and comparison of 2023 data with those of other years.
