Re: Highmark Health Insurance Company 2019 ACA Rate Filing (Individual Market)
Filing # 1A-DP-18-HHIC (SERFF # HGHM-131475752)

This constitutes Notice pursuant to Section 707 of the Pennsylvania Right-to-Know Law that the attached Highmark Health Insurance Company (HHIC) 2019 Individual Market Rate Filing contains Trade Secret and Confidential Proprietary Information. Therefore, HHIC must, prior to the release of any portion of this Filing, be notified of any request by a third party for access to this Filing, and the Trade Secret and/or Confidential Proprietary Information identified by HHIC should be redacted before release.

Dear Ms. Gray:

This Filing includes the Highmark Health Insurance Company (“HHIC”, “Company”) Individual Market rates and the supporting rate development for policies with effective dates on or after January 1, 2019.

In the event the Department decides to publish this Filing in the PA Bulletin, the company information requested in the Department’s 2019 ACA-Compliant Health Insurance Rate Filing Guidance, Section B, is provided below:

Requested Company Information

1. Company Name & NAIC #: **Highmark Health Insurance Company, NAIC # 71768**
2. Market: **Individual**
3. On or Off Exchange: **This filing reflects that the Company anticipates selling plans on and off of the exchange.**
4. Effective date of coverage: **January 1, 2019**

5. Average rate change requested: **0.3% increase**
6. Range of rate change requested: **-22.6% to 20.0%**
7. Total additional annual revenue generated from the proposed rate change: **\$578,000**
8. Product(s): **PPO, EPO**
9. Rating Areas and the change from 2018: **Rating Areas 1, 2, 4, 5, 6, 7, and 9**

There are no changes in our covered Rating Areas from the 2018 rate filing.

10. Metal Levels and Catastrophic Plans: This filing reflects that the Company anticipates selling the following Metal Levels in the indicated Market: **Gold, Silver, Bronze, and Catastrophic**
11. Current number of covered lives and of policyholders as of February 1, 2018: **17,118 covered lives; 12,102 policyholders**
12. Number of plans offered in 2019 and the change this represents from 2018: **18**

The Company offered 16 plans in 2018. For 2019, the Company is offering 6 new plans in the Market and removing 4 plans from the Market.

Please note that inclusion of premium rates in this filing for a given offering should not be construed to mean that the offering will ultimately be made available for sale in the Market. Final offering decisions will be made consistent with and within the timelines set forth in CMS rules and/or ACA regulations.

13. Corresponding contract form #, SERFF and Binder ID#s: **The corresponding SERFF binder number is HGHM-PA19-125079996 affecting the following Company products and forms:**

Product Name / Type	Contract Form & SERFF#
Shared Cost Blue PPO	PPO/HHIC/DP-4; HGHM-131468186
my Direct Blue [Lehigh Valley] EPO	DB/EPO/HHIC/DP-1; HGHM-131468126
my Direct Blue [Lehigh Valley] EPO-HDHP	DB/EPO/HDHP/HHIC/DP-1; HGHM-131468205
my Direct Blue [Lehigh Valley] Major Events EPO	CAT/EPO/HHIC/DP-1; HGHM-131468213

14. HIOS Issuer ID # and submission tracking number: **HIOS Issuer ID #70194, Company Filing #1A-DP-18-HHIC (SERFF Filing # HGHM-131475752)**

Additional Filing Disclosures

The Company has submitted all Required Documents stipulated by the Department, including the federal documents related to this filing, in its SERFF submission. In addition to the Required Documents, the Company has submitted a Supplemental Exhibits file containing additional detailed exhibits on items referenced in the PA Actuarial Memorandum. All tables, exhibits, and detail in support of this filing and the PA Actuarial Memorandum have been included in Excel format. To assist in the Department's review, the Excel files have retained their formulas to the extent possible.

CMS has instructed issuers that it no longer requires any interim changes to the URRT to be submitted to HIOS. CMS is requesting that only the initial URRT and the final URRT be submitted to HIOS.

Potential Changes to Federal Regulations

In accordance with the filing instructions specified by the Pennsylvania Insurance Department, the rate development in this filing is based on certain assumptions we have had to make at this point in time. In accordance with the Department's guidance, we have assumed that the ACA health insurance coverage mandate is eliminated and the CSR payments remain ceased for 2019. We have also included an assumed load for expected adverse selection due to the Short Term Limited Durational Insurance market expansion based on HHS recently proposed rule modifying federal requirements for this market.

Additional assumptions include that advance payment of premium credits (APTCs) will continue until the end of 2019, there will be no significant changes in legislation, regulations or otherwise (i.e. rules, regulatory guidance, etc.) impacting the ACA market, and all Pennsylvania QHP issuers currently participating on the Marketplace will continue to do so throughout 2019. In addition, there are other uncertainties that may directly or indirectly affect an already unstable insurance market and ultimately, rates. If any of these assumptions are ultimately incorrect or additional developments occur that similarly have a detrimental impact to the market, modifications to the rate development may be necessary. As a result, HHIC reserves the right to submit a revised filing.

Request for Confidentiality

Please note that the rates and the supporting rate development contained in this Filing are competitively sensitive, are not in the public domain, and constitute business confidential proprietary/trade secret information that would cause harm to the competitive position of HHIC if disclosed to the public.

Public disclosure of any information contained in this Filing would allow HHIC competitors to better understand or discover its confidential and proprietary rating, pricing and/or marketing practices, would undermine competition in the Individual market and could have negative

consequences for the operation of HHIC's business. Therefore, HHIC asserts that this Filing, in its entirety, constitutes Trade Secret and Confidential Proprietary Information and should not be disclosed.

It is our understanding that the Department does not intend to publish the confidential & proprietary information contained in this Filing or to otherwise permit this Filing and its confidential information, other than the redacted information and final approved rates, to be disclosed or released.

Furthermore and pursuant to the Pennsylvania Right-to-Know Law ("RTKL"), HHIC must be notified prior to release of information contained in this Filing and be given the opportunity to respond to requests for such information. Should the Department receive such request or require the release of information contained in this Filing for its own purposes, HHIC asserts its right to release a redacted version of the Filing. In accordance with the RTKL, please contact the HHIC RTKL representative identified below prior to release of any information contained in this Filing:

Lisa Martinelli, Esq.
RTKL Representative
VP Chief Privacy Officer
Highmark Health
120 Fifth Avenue, Suite 2114
Pittsburgh, PA 15222

Furthermore, it should be noted that HHIC is equally concerned that even if this information is released in aggregate form, it still may be easy to identify the carrier that submitted it.

Should you have any questions regarding the attached Filing, please feel free to contact me at (717) 302-2143 or via e-mail at: jeffrey.scheib@highmark.com.

Sincerely,

Jeffrey Scheib, ASA, MAAA

Re: Highmark Health Insurance Company 2019 ACA Rate Filing (Individual Market)
Filing # 1A-DP-18-HHIC (SERFF # HGHM-131475752)

This constitutes Notice pursuant to Section 707 of the Pennsylvania Right-to-Know Law that the attached Highmark Health Insurance Company (HHIC) 2019 Individual Market Rate Filing contains Trade Secret and Confidential Proprietary Information. Therefore, HHIC must, prior to the release of any portion of this Filing, be notified of any request by a third party for access to this Filing, and the Trade Secret and/or Confidential Proprietary Information identified by HHIC should be redacted before release.

Dear Ms. Gray:

This Filing includes the Highmark Health Insurance Company (“HHIC”, “Company”) Individual Market rates and the supporting rate development for policies with effective dates on or after January 1, 2019.

In the event the Department decides to publish this Filing in the PA Bulletin, the company information requested in the Department’s 2019 ACA-Compliant Health Insurance Rate Filing Guidance, Section B, is provided below:

Requested Company Information

1. Company Name & NAIC #: **Highmark Health Insurance Company, NAIC # 71768**
2. Market: **Individual**
3. On or Off Exchange: **This filing reflects that the Company anticipates selling plans on and off of the exchange.**
4. Effective date of coverage: **January 1, 2019**

5. Average rate change requested: **5.2% decrease**
6. Range of rate change requested: **-25.0% to 8.9%**
7. Total additional annual revenue generated from the proposed rate change: **(\$10,668,998)**
8. Product(s): **PPO, EPO**
9. Rating Areas and the change from 2018: **Rating Areas 1, 2, 4, 5, 6, 7, and 9**

There are no changes in our covered Rating Areas from the 2018 rate filing.

10. Metal Levels and Catastrophic Plans: This filing reflects that the Company anticipates selling the following Metal Levels in the indicated Market: **Gold, Silver, Bronze, and Catastrophic**
11. Current number of covered lives and of policyholders as of February 1, 2018: **17,118 covered lives; 12,102 policyholders**
12. Number of plans offered in 2019 and the change this represents from 2018: **18**

The Company offered 16 plans in 2018. For 2019, the Company is offering 6 new plans in the Market and removing 4 plans from the Market.

Please note that inclusion of premium rates in this filing for a given offering should not be construed to mean that the offering will ultimately be made available for sale in the Market. Final offering decisions will be made consistent with and within the timelines set forth in CMS rules and/or ACA regulations.

13. Corresponding contract form #, SERFF and Binder ID#s: **The corresponding SERFF binder number is HGHM-PA19-125079996 affecting the following Company products and forms:**

Product Name / Type	Contract Form & SERFF#
Shared Cost Blue PPO	PPO/HHIC/DP-4; HGHM-131468186
my Direct Blue [Lehigh Valley] EPO	DB/EPO/HHIC/DP-1; HGHM-131468126
my Direct Blue [Lehigh Valley] EPO-HDHP	DB/EPO/HDHP/HHIC/DP-1; HGHM-131468205
my Direct Blue [Lehigh Valley] Major Events EPO	CAT/EPO/HHIC/DP-1; HGHM-131468213

14. HIOS Issuer ID # and submission tracking number: **HIOS Issuer ID #70194, Company Filing #1A-DP-18-HHIC (SERFF Filing # HGHM-131475752)**

Additional Filing Disclosures

The Company has submitted all Required Documents stipulated by the Department, including the federal documents related to this filing, in its SERFF submission. In addition to the Required Documents, the Company has submitted a Supplemental Exhibits file containing additional detailed exhibits on items referenced in the PA Actuarial Memorandum. All tables, exhibits, and detail in support of this filing and the PA Actuarial Memorandum have been included in Excel format. To assist in the Department's review, the Excel files have retained their formulas to the extent possible.

CMS has instructed issuers that it no longer requires any interim changes to the URRT to be submitted to HIOS. CMS is requesting that only the initial URRT and the final URRT be submitted to HIOS.

Potential Changes to Federal Regulations

In accordance with the filing instructions specified by the Pennsylvania Insurance Department, the rate development in this filing is based on certain assumptions we have had to make at this point in time. In accordance with the Department's guidance, we have assumed that the ACA health insurance coverage mandate is eliminated and the CSR payments remain ceased for 2019. The company has chosen to remove the STLDI load from the rate development at this time, however, forthcoming guidance and the ongoing filing review process may make it necessary to revisit this assumption.

Additional assumptions include that advance payment of premium credits (APTCs) will continue until the end of 2019, there will be no significant changes in legislation, regulations or otherwise (i.e. rules, regulatory guidance, etc.) impacting the ACA market, and all Pennsylvania QHP issuers currently participating on the Marketplace will continue to do so throughout 2019. In addition, there are other uncertainties that may directly or indirectly affect an already unstable insurance market and ultimately, rates. If any of these assumptions are ultimately incorrect or additional developments occur that similarly have a detrimental impact to the market, modifications to the rate development may be necessary. As a result, HHIC reserves the right to submit a revised filing.

Request for Confidentiality

Please note that the rates and the supporting rate development contained in this Filing are competitively sensitive, are not in the public domain, and constitute business confidential proprietary/trade secret information that would cause harm to the competitive position of HHIC if disclosed to the public.

Public disclosure of any information contained in this Filing would allow HHIC competitors to better understand or discover its confidential and proprietary rating, pricing and/or marketing practices, would undermine competition in the Individual market and could have negative

consequences for the operation of HHIC's business. Therefore, HHIC asserts that this Filing, in its entirety, constitutes Trade Secret and Confidential Proprietary Information and should not be disclosed.

It is our understanding that the Department does not intend to publish the confidential & proprietary information contained in this Filing or to otherwise permit this Filing and its confidential information, other than the redacted information and final approved rates, to be disclosed or released.

Furthermore and pursuant to the Pennsylvania Right-to-Know Law ("RTKL"), HHIC must be notified prior to release of information contained in this Filing and be given the opportunity to respond to requests for such information. Should the Department receive such request or require the release of information contained in this Filing for its own purposes, HHIC asserts its right to release a redacted version of the Filing. In accordance with the RTKL, please contact the HHIC RTKL representative identified below prior to release of any information contained in this Filing:

Lisa Martinelli, Esq.
RTKL Representative
VP Chief Privacy Officer
Highmark Health
120 Fifth Avenue, Suite 2114
Pittsburgh, PA 15222

Furthermore, it should be noted that HHIC is equally concerned that even if this information is released in aggregate form, it still may be easy to identify the carrier that submitted it.

Should you have any questions regarding the attached Filing, please feel free to contact me at (717) 302-2143 or via e-mail at: jeffrey.scheib@highmark.com.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey Scheib". The signature is fluid and cursive, with a large loop at the end.

Rate Change Summary

Highmark Health Insurance Company – Individual Plans

Rate request filing ID # 1A-DP-18-HHIC (SERFF # HGHM-131475752) - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at <http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

Initial requested average rate change:	-5.2% ¹
Revised requested average rate change:	N/A ¹
Range of requested rate change:	-25.0% to 8.9%
Effective date:	January 1, 2019
People impacted:	17,118
Available in:	1, 2, 4, 5, 6, 7, and 9

Key information

Jan. 2017-Dec. 2017 financial experience

Premiums	\$242,612,542
Claims	\$180,093,209
Administrative expenses	\$15,491,136
Taxes & fees	\$11,052,160
Company made (after taxes)	\$35,976,037

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2019:

Claims:	87%
Administrative:	8%
Taxes & fees:	5%
Profit:	0%

The company expects its annual medical costs to increase **9.5%**.

Explanation of requested rate change

These premium rates are being set at a level that is required to adequately cover rising costs, primarily due to increasing medical and pharmacy services in the Individual market. The unanticipated financial gains realized in 2017, which followed three years of significant financial losses, are not indicative of future performance.

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

Actuarial Memorandum

1. Basic Information and Data

A. Company Information

The appropriate company information has been provided in Table 0.

B. Rate History and Proposed Variations in Rate Changes

The three most recent rate changes in Pennsylvania for HHIC are as follows:

Year	Avg. Increase	SERFF ID#
2018	9.7%	HGHM-131020572
2017	55.1%	HGHM-130540841
2016	26.2%	HGHM-130061791

In 2016, increases varied by plan due to cost sharing alterations required to maintain federal AV levels as well as for updates to other pricing factors. In 2017 and 2018 the rate change varied by product due to updated cost sharing levels to meet federal AV requirements as well as updates in the pricing AV factors.

The proposed 2019 increase varies by plan. This is primarily due to updates in the pricing AV factors. The plan level increases can be found in Table 10.

C. Average Rate Change

The average rate changes as presented in the filing are:

- Table 10: -5.2%
- Table 11: -4.6%
- URRT Worksheet 1 Cell V45: 5.5%
- URRT Worksheet 1 Cell V46: 2.7 %

Table 10 calculates the percentage change in the member weighted average rate for 2018 and the member weighted average rate for 2019. Table 11 calculates the percentage increase for each plan and then member weights the percentage increases. These two methods produce slightly different results. HHIC feels that the best representation of the rate increase is the value from Table 10.

Please note that the two values above from the URRT Worksheet 1 are changes in the projected average premium, which also includes the substantial impacts of changes in the distribution of members by plan, as well as changes in the covered population's average age and mix of members by rating area. They do not represent changes in premium rates for a fixed population from 2018 to 2019.

Worksheet 2 of the URRT also shows plan level rate changes. These values are used in the development of the average rate change shown in the Federal Part II justification. A demonstration of this calculation is included in Attachment F.

In accordance with the filing instructions specified by the Pennsylvania Insurance Department, the rate development in this filing is based on certain assumptions we have had to make at this point in time. In accordance with the Department's guidance, we have assumed that the ACA health insurance coverage mandate is eliminated and the CSR payments remain ceased for 2019 (See Sections 2.A. and 3. below for a discussion on the impacts). The company has chosen to remove the STLDI load from the rate development at this time, however, forthcoming guidance and the ongoing filing review process may make it necessary to revisit this assumption.

Additional assumptions include that advance payment of premium credits (APTCs) will continue until the end of 2019, there will be no significant changes in legislation, regulations or otherwise (i.e. rules, regulatory guidance, etc.) impacting the ACA market, and all Pennsylvania QHP issuers currently participating on the Marketplace will continue to do so throughout 2019. In addition, there are other uncertainties that may directly or indirectly affect an already unstable insurance market and ultimately, rates. If any of these assumptions are ultimately incorrect or additional developments occur that similarly have a detrimental impact to the market, modifications to the rate development may be necessary. As a result, HHIC reserves the right to submit a revised filing.

D. Membership Count

Please see Table 1 for the average age, age breakdown, and total membership for the periods shown.

E. Benefit/Cost Sharing Changes

The majority of HHIC's 2019 plan offering consists of renewing plans with benefits that differ from the 2018 offering.

The screenshots from the HHS AV calculator, showing the plan benefits and the resulting actuarial values, can be found as a separate attachment within the *Supporting Documentation* section in SERFF. Also, the PA Plan Design Summary and Rate Tables along with the HIOS Plan IDs can be found within the *Rate/Rule Schedule* section in SERFF.

F. Experience Period Claims and Premium

Please see Table 2 for the experience period data for the most recent calendar year. The experience period paid claims data represents the 2017 calendar year results for all policies in the single risk pool, with run out through February 2018. This data is consistent with the data reported in Section I of Worksheet I of the URRT.

The components of this exhibit were developed as follows:

- The Earned Premium represents actual revenues earned in the experience period.
- Incurred Claims represent claims paid by HHIC net of expected CSR recoveries. Note that the URRT includes capitated services and is net of Rx Rebates. Those values are not included here as they are listed as separate items.
- The Allowed Claims represent our best estimate of the total claims prior to member cost sharing incurred during the experience period. The Allowed Claims include:
 - Two months of run out from the end of the experience period,

- Claims processed outside of the Company's claims system (e.g., claim settlement costs), and
- Our best estimate of claims incurred but not paid as of the end of the run out period.

Note that allowed claims in the URRT include capitation and are net of drug rebates. They are not included here as they are called out separately in the exhibit.

- Allowed Charges for non EHB services are included in column G. The amount of non EHB included is shown in column H.
- Prescription Drug Rebates are used to reduce the level of Incurred Claims in the experience period.
- Total EHB capitation includes amounts for the pediatric vision benefit (\$0.34 PMPM).
- The Estimated Risk Adjustment for the experience period represents our best estimate of the year end risk adjustment transfer payment that HHIC will incur. This amount is developed based on an analysis of HHIC data (risk scores as defined in the HHS Notice of Benefit and Payment Parameters, as well as other risk transfer formula components), and an estimate as to the Market-wide risk profile. This Market-wide risk profile is developed from available Market data, including prior years' risk adjustment transfer results, publicly available data (such as MLR reports), and outside expertise from actuarial consultants.

G. Credibility of Data

The experience period data for HHIC is large enough to be fully credible. The results are based 100% on the experience period data.

H. Trend Identification

Table 3 identifies the annual medical and prescription drug allowed claims cost and utilization trends. The underlying total annual trend is 9.5%. Additionally, there is an induced utilization adjustment of 0.01% per year applied to reach the overall trend of 9.50% shown in Table 3 column G. The definitions of service categories, cost, and utilization in Table 3 are consistent with the URRT instructions. The numbers entered in the Cost and Utilization columns are consistent with those entered in Worksheet I, Section 2 of the URRT, except as noted below.

The cost trends presented in Table 3 reflect HHIC's expectations regarding increases in in-network contractual reimbursement, as well as projected out-of-network costs. These estimates measure and normalize for benefit leverage, population aging, and historical changes for fee schedules, as well as company-wide utilization management programs, and external trend drivers.

The significant changes observed in the volume, demographics and morbidity of the ACA population from 2014 to 2017 yields component trends that are not directly applicable for trend analysis. The trend components in Table 3 therefore represent the same blended average for all types of service and are applied to the aggregate experience for pricing. Component data was not used in the development of the trend.

A separate regression study was developed by the HHIC valuation team to analyze the ACA trend levels of continuously enrolled cohorts of ACA members in order to normalize for population change. That

continuous enrollment period covers a significant portion of both 2016 and 2017. The analysis took into consideration seasonality and adjusted for step changes that were included in the network factors in the two periods. Resulting r-squared levels were compared to determine confidence levels of the resulting regression trends to develop a reasonable range of trend assumptions.

The regression study resulted in a composite trend of 8.5%. This continuous enrollment approach addresses the unstable population concerns in the underlying ACA experience, but it does not reflect the impact of partial year population changes that are inherent to an individual market. The pricing trend was set at 9.5% in consideration of that factor. This trend level was deemed reasonable when compared to Highmark group business and industry available ACA data. These benchmarks include publicly available trend studies (e.g., Aon study focused on group business), along with trade association trend surveys received that include an individual market view.

I. Historical Experience

Table 4 presents the most recent 48 months (4 calendar years) of HHIC data with run-out through February 2018. This data was not used to develop the trend in Table 3. Please see Section H for further details.

2. Rate Development & Change

A. Development of Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims

The development of the Projected Index Rate, Projected Market-Adjusted Index Rate, and Projected Total Allowed Claims, shown in Table 5, closely follows that utilized in the development presented in Worksheet 1 of the URRT, a discussion of which can be found in the Part III Actuarial Memorandum submitted in the Rate Filing Justification. Some of the items separately identified in Table 5 include:

- The Change in Morbidity adjustment of 1.057 reflects the change in the population mix/claim levels from the experience period to the projection period. This factor also takes into consideration the effects of adverse selection inherent to guaranteed issue markets. The Individual ACA risk pool continues to have a significantly higher proportion of older members than the group business with a high prevalence of chronic conditions. This remains a national concern and questions the long-term viability of this guaranteed issue market which adds to the uncertainty of any future claim projections.

Impact of Health Insurance Coverage Mandate Elimination

In accordance with the Department's guidance, the morbidity factor was increased by 6.0% to reflect the market uncertainty from the elimination of the health insurance coverage mandate. This deterioration is reflected in the filing by multiplying the original morbidity factor of 0.997 by 1.06 to arrive at a final morbidity factor of 1.057.

- The Change in Demographics adjustment of 1.008 reflects the change in age and geography factors we expect from the experience period to the projection period.
- The Change in Network adjustment of 0.988 reflects the change in the allowed claims we anticipate due to network contracting changes between the experience period and the projection period.
- There is no Change in Benefits adjustment.
- The Change in Other adjustment of 0.991 reflects changes in pharmacy rebates and changes in hospital/physician settlements.

Please see Attachments A and E for a more detailed calculation of these factors. These factors can also be found in the accompanying spreadsheet.

The \$21.05 Risk Adjustment assumption in cell C31 represents our best estimate of the year end risk adjustment transfer payment for HHIC as developed in Attachment B adjusted for the (\$0.15) PMPM risk adjustment user fee and the impact of the catastrophic eligibility factor. This amount is developed based on an analysis of HHIC data (risk scores as defined in the HHS Notice of Benefit and Payment Parameters, as well as other risk transfer formula components), and an estimate as to the Market-wide risk profile. This Market-wide risk profile is developed from available Market data, including prior years' risk adjustment transfer results, publicly available data (such as MLR reports), and outside expertise from actuarial consultants.

The development of the projected *gross* risk adjustment assumption of \$21.20 PMPM is shown in Attachment B. Since HHIC is offering catastrophic metal level plans and these plans are pooled separately for the purpose of risk adjustment transfers, we developed both catastrophic and non-catastrophic risk transfer assumptions for 2019. These assumptions were then blended together using the projected enrollment by pool to arrive at a single assumption to use for pricing. Our expected *gross* receivable of \$21.20 reflects that we anticipate HHIC's average risk score (net of allowable rating factors) to be higher than the statewide average.

The exchange user fee in cell C32 is developed by taking the required user fee percentage of 3.5% and multiplying by the percentage of total members expected to be on exchange of 84%. This results in a percentage of 2.9%. The PMPM of \$23.01 is calculated as 2.9% of the total required premium in cell C63 adjusted for the effect of catastrophic eligibility.

B. Retention Items

Table 6 has been completed with the requested retention elements for the proposed rates for the rating period. The amounts presented separately sum to the total administrative expenses and taxes and fees presented in the rate development. Administrative costs reflect internal costs that HHIC is projected to incur in the projected experience period, and are developed from standard expense allocation methods. Agent/broker fees and commissions reflect our anticipated costs for these items in the experience period.

Note the following regarding plan level retention items:

- The Profit/Contingency for all plans is set to 0%.
- The administrative expenses do not vary by plan.
- 2% Pennsylvania Premium Tax was included.
- The \$0.16 PMPM PCORI fee was factored into the administrative expense percentage of premium.
- Expenses for Quality Improvement Initiatives are 0.22%.

HHIC has voluntarily refrained from adding a risk and contingency factor in this filing. By this voluntary restraint, HHIC is not waiving any right to include a risk and contingency factor which HHIC believes is consistent with historical and legal interpretations of HHIC and the Pennsylvania Insurance Department.

The proposed rate development assumes an average broker commission of \$0.50 PMPM for 2019. A schedule of the current broker commission amounts is included in Attachment D.

C. Normalized Market-Adjusted Projected Allowed Total Claims

The normalization factors presented in Table 7 are each determined from the underlying membership demographics expected in the projected rating period. The 2018 values are pulled from the prior year's filing, while the 2019 values represent our projection for 2019 assumed in the 2019 rate development.

D. Components of Rate Change

Table 8 presents the components of change in the proposed 2019 Calibrated Plan Adjusted Index Rate (PMPM). Cell C72 is populated with the base period allowed charges found in the 2018 plan year rate filing (\$838.71). The difference between Row H (-10.7%) and Row A (-5.2%) is caused primarily by the exclusion of the 2019 CSR load from the specific eligibility component of rate change. Including this factor would change row H to -5.4%.

Table 9 presents the data elements supporting the calculations in Table 8. Note the following differences between the Table 9 values and the URRT values:

- Taxes and Fees shown in Table 9 differ from the Taxes and Fees from the URRT as Table 9 separates out the Exchange User Fee into a separate line item. In the URRT the Exchange User Fee is included in the Taxes and Fees line item.

The 2018 values are populated using the 2018 filed factors adjusted for the membership mix as of February 1, 2018.

3. Plan Rate Development

Table 10 shows the plan rate development for 2019. This table shows the plans that HHIC intends to offer in 2019, as well as all plans offered in 2018 portfolio. The calibrated plan adjusted index rates for 2018 are calculated according to the instructions. The 2019 rating factors are consistent with the factors found in Exhibit II of the Part III URRT memorandum with the pricing effect further broken out into pricing AV and benefit richness. Admin effect is broken into admin costs, taxes and fees, and profit or contingency.

The benefit richness factors in column L are populated with the factors found in Attachment C. The table in Attachment C can also be found in the attached spreadsheet. The derivation of the AV and Cost Sharing factors can also be found in Attachment C. The values in column 8 of the attachment represent the pure induced utilization for each plan. HHIC's utilization factors are consistent with those used in the Federal Risk Adjustment program. Each plan's factor was then normalized by the average utilization factor. The average is a weighted average using projected membership as the weight. After normalization the average factor as shown in Attachment C is 1.000.

Note that the HHS Actuarial Value Calculator was unable to accommodate all of HHIC's benefit designs. Plans needing certification are marked in column I of Table 10. Screen shots of all of the AV calculations and the appropriate certifications are included as a separate attachment within the *Supporting Documentation* section in SERFF.

For discontinuing plans where members are being mapped into a new plan, an effective rate increase is calculated by comparing the 2018 rate of the discontinuing plan to the 2019 rate of the plan to which the member is being mapped. As requested, some plans are being listed multiple times since these plans have different mappings based on the exchange status of the member.

Columns AG through AP are populated with the February 1, 2018 enrollment by 2019 plan and rating area.

Impact of Non-Payment of Cost Sharing Reduction Subsidies

In accordance with the Department's guidance, we have applied an additional adjustment for those Silver plans not offered exclusively off-exchange. This adjustment factor was 1.2 and represents the non-payment of Cost Sharing Reduction subsidies. Consistent with the Department's guidance, this adjustment was reflected in Table 10 in Column P.

4. Plan Premium Development for 21-Year-Old Non-Tobacco User

Table 11 presents HHIC's 21-year-old non-tobacco premium in the Individual Market. As mentioned in Section 1.C above, the change in 21-year-old non-tobacco premium PMPM calculated in this table is -4.6%.

5. Plan Factors

A. Age and Tobacco Factors

Please see Table 12 for HHIC's age and tobacco factors.

B. Geographic Factors

Please see Table 13 for HHIC's geographic factors. HHIC's factors for the rating period are unchanged from the currently approved factors. Note that rating areas 3 and 8 are left blank as HHIC does not offer plans in these regions.

C. Network Factors

Please see Table 14 for HHIC's network rating factors. The current factors represent the medical network adjustment factors from the prior approved rate filing. The projected factors are set 1.000 for the plans where the effective medical network adjustments are now reflected in the claims experience and 0.980 for plans where the incremental adjustments are not yet reflected in the claims data.

D. Service Area Composition

HHIC's offerings are split into multiple service areas. The Plan Design Summary exhibit uploaded as a separate document contains the service areas related to this filing. As requested, service area maps are included.

6. Actuarial Certifications

I, [REDACTED], am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared on behalf of HHIC to accompany its rate filing (for calendar year 2019) for the Individual Market on and off the Pennsylvania Exchange.

I hereby certify that the projected index rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Neither excessive nor deficient.

I certify that the index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates. The allowable modifiers used to generate plan-level rates were:

- The actuarial value and cost-sharing design of the plan.
- The plan's provider network, delivery system characteristics, and utilization management practices.
- The benefits provided under the plan that are in addition to the essential health benefits. These estimated benefits were pooled with similar benefits within the single risk pool and the claims experience from those benefits was utilized to determine rate variations.
- Administrative costs, excluding Exchange user fees.

I certify that all factors, benefit and other changes from the prior approved filing have been disclosed in the 2018 PA Actuarial Memorandum Rate Exhibits.

I certify that the benefits included in HHIC's plans are substantially equivalent to the Essential Health Benefits (EHBs) in the State of Pennsylvania's benchmark plans. I certify that any benefit substitutions are:

- Actuarially equivalent to the benefits being replaced,
- Are made within only the same essential health benefit category,
- Are based on a standardized plan population,
- Are determined regardless of cost-sharing,
- Are not prescription drug benefits, and
- Are based on an analysis performed in accordance with generally accepted actuarial principles and methodologies.

I certify that new plans are not considered modifications of existing plans (per the uniform modification standards in 45 CFR 147.106).

I certify that the AV Metal Values included in Table 10 were based entirely on the Federal AV Calculator or one of the approved alternative approaches.

I certify that the geographic rating factors reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

I certify that the information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2019 Part II Rate Filing Justification.

ACTUARIAL MEMORANDUM

Highmark Health Insurance Company

Revised Individual Rate Filing - January 1, 2019

I, [REDACTED], am a member of the American Academy of Actuaries and meet its qualification standards for preparing individual rate filings. As a consulting actuary, I was requested by Highmark Health Insurance Company (“HHIC”) to review the development of the market-wide base rate for the individual market on and off the Pennsylvania Exchange. The confidential material presented in this revised filing was prepared for the specific purpose of submitting the rating formula for the Pennsylvania Insurance Department and may not be appropriate for other purposes. This filing represents premium rates for individuals sold or renewed effective January 1, 2019. The rates are guaranteed until December 31, 2019.

To the best of my knowledge and judgment, the following are true with respect to this filing:

1. Premium rates are established in accordance with generally accepted actuarial principles and the applicable Actuarial Standards of Practice. They are not excessive, inadequate, or unfairly discriminatory. Rates are reasonable in relationship to the benefits provided. However, it is certain that actual experience will not conform exactly to the assumptions used in this analysis. To the extent that actual experience is different from the assumptions used in developing the rates, the actual results will also deviate from the projected amounts.
2. In compliance with all applicable Pennsylvania and Federal Statutes and Regulations (45 CFR 156.80 and 147.102).
3. The rating factors and rating methodology are reasonable and consistent with HHIC’s business plan at the time of the filing.

Re: Highmark Health Insurance Company 2019 ACA Rate Filing (Individual Market)
Filing # 1A-DP-18-HHIC (SERFF # HGHM-131475752)

Dear Ms. Sanders-Jones:

The filing has been revised to reflect the removal of the 1% load for the Short Term Limited Duration policies as well as modifying the CSR defunding factor to align it with the projected experience.

It is important to note the ultimate impact of specific factor changes on overall rate adequacy cannot be fully assessed in isolation. It is our understanding and expectation that the reasonability of the overall rates will be discussed when the filing review is complete, which could result in revisiting these factors.

Additionally, the filing has been revised to include formulas in Table 6 where applicable (in response to Question 3) and to explicitly add plans 70194PA0530010 and 70194PA0540010 to Table 10.

Should you have any questions regarding the attached Filing, please feel free to contact me at [REDACTED] or via e-mail at: [REDACTED]

Sincerely,

[REDACTED]

Pennsylvania Insurance Department

FROM: [REDACTED], Actuarial Manager
Highmark Inc.

DATE: June 22, 2018

SUBJECT: HM Health Insurance Company 2019 Individual ACA-Compliant Rate Filing
Response to June 15, 2018 Objection Letter
Filing Number: 1A-DP-18-HHIC
SERFF Tracking Number: HGHM-131475752

Below are HHIC's responses to your objection letter dated June 15, 2018. We have included the questions along with the responses for your convenience.

1. In the 2019 Guidance published on the Department's website, the Department required that all issuers file uniform factors for the Individual Adjustment of 1.06 and the CSR Defunding Adjustment of 1.28. In addition, the Department indicated that as the rate review process moves forward and federal healthcare reform efforts are clarified, the Department would consider issuer specific requests. We can now advise that the aforementioned factors of 1.06 for the Individual Adjustment and 1.28 for CSR Defunding Adjustment constitute ceilings. If your company desires lower adjustments than those stated in the Department's 2019 Guidance, you may provide updated materials (PA Actuarial Memorandum and Exhibits, Part III Actuarial Memorandum, Part I URRT and corresponding rate tables – State and Federal) and justification for the lower Adjustment factor(s) with your first-round response due June 22, 2018. The Department will not consider adjustment factors greater than those stated in the 2019 Guidance.

Response:

The revised filing documents reflect the 1.20 factor to provide a scenario for the Department to consider as the 2019 CSR loading approach is evaluated. As future discussions on this ACA filing develop, it may be necessary to revise this assumption. The development of the 1.20 factor is included in the exhibit labeled Q1 Response.

Highmark has elected to maintain the 6% factor related to the elimination of the Individual Mandate.

Highmark believes the Department's 2018 approach of using a uniform factor for all issuers maintains market stability more so than issuer-specific factors. Variations by issuer could result in unanticipated shifts in enrollment that destabilize the market and introduce more uncertainty for issuers to consider.

2. The PA actuarial memorandum, page 2, indicates that Highmark has included a 1% load for expected adverse selection due to the Short Term Limited Durational Insurance market expansion. Please remove this load as the rule has not yet been finalized.

Response:

The STLDI final rule has not been released, but the prevailing industry expectation based on the proposed rule is adverse selection will occur as low-cost consumers opt for these less expensive alternatives. We believe the impact of the STLDI policies would be in addition to the impact of the Individual mandate

factor since these market forces are not the same. Many consumers were expected to drop coverage to avoid the penalty even when there were no viable STLDI policies to fill the void. More robust STLDI policies will likely entice more consumers to leave the market.

The company has chosen to remove the STLDI load from the rate development at this time, however, forthcoming guidance and the ongoing filing review process may make it necessary to revisit this assumption.

3. Per Department guidance, the input, in cells C15 and D15 for the change in morbidity in Table 5 and Table 6, must be a formula. Please comply.

Response:

With respect to Table 5, our initial submission did include a formula in cell C15 showing the multiplication of our change in morbidity assumption with the 1.06 individual mandate factor. Cell D15 was set to 0 since this filing did not utilize the Manual Data section.

With respect to Table 6, we interpreted the Department's guidance to mean that formulas were being requested where applicable. For most of the retention items, we did not believe that a formula was applicable. The bullets below provide additional context for the values shown:

- *General & Claims Expense* – We assumed a \$62.78 PMPM value. This value represents the base administrative expense PMPM assumption provided by our Cost Accounting department less the portion attributable to Quality Improvement Initiatives. The percentage shown in cell C50 is simply the PMPM value divided by the total Projected Required Revenue PMPM.
- *Commission Expense* – We assumed a \$0.50 PMPM value. Additional support for this assumption can be found in the response to Question 17. The percentage shown in cell C51 is simply the PMPM value divided by the total Projected Required Revenue PMPM.
- *Quality Improvement Expense* – We assumed 0.22% of premium based on the percentage of premium value found in the 2017 SHCE.
- *PCORI Fee* – We assumed a \$0.16 PMPM value. Additional support for this assumption can be found in the response to Question 18. The percentage shown in cell C54 is simply the PMPM value divided by the total Projected Required Revenue PMPM.
- *PA Premium Tax & Health Insurance Provider Fee* – These are known values and so there is no formula to show.
- *Federal Income Tax* – We do not expect to owe Federal Income Tax for this business and so the value was set to 0%.

Please note that the Projected Required Revenue of \$807.93 PMPM in cell C63 is slightly overstated because the formula in Table 6 of the template does not account for the specific eligibility factor that is applied to the catastrophic plans on Table 10. This factor lowers the required revenue for the catastrophic plans and consequently lowers the composite Projected Required Revenue to a value of \$807.74 PMPM. Where the PMPM values referenced above are converted to a percentage of premium in column C of Table 6, the denominator used is \$807.74 PMPM.

4. As I discussed with Gregory Amspacher on May 25, 2018, please submit a revised Rate Change Summary Attachment that reflects the number of “People Impacted”. The Department acknowledges that the instructions shown on the Attachment erroneously reference Table 1 for the reporting of the People Impacted. The Attachment should have indicated Table 10, cell V15.

Response:

In this rate filing, the values in Table 1, cell D18 and Table 10, cell V15 are equal. Thus, we do not believe that a revision to the Rate Change Request Summary is necessary.

5. For the expanded Bronze plans, please demonstrate that the copay is less than or equal to 50% coinsurance for that category.

Response:

The Prescription Drug Benefit Plan provides three major services of coverage (as defined on page 94142 of the 2018 Notice of Benefit and Payment Parameters) that are less than or equal to 50% coinsurance and available prior to any deductible. These services include: generic drugs, specialty drugs, and preferred branded drugs. The coinsurance percentages and certifications of the values corresponding to these categories can be found in the AV Screenshots and Certifications document which was provided as a separate attachment during the initial SERFF submission.

6. The PA actuarial memorandum, page 2, indicates that the 2019 plan offerings consists of renewing plans with benefits that differ from the 2018 offering. Please provide an Excel exhibit that shows the benefit for each year and the quantitative impact of these changes.

Response:

We acknowledge the use of the reference to benefit change is confusing. A better word choice would have been cost sharing as the changes from 2019 to 2018 primarily centered around differences in cost sharing elements. The composite of these changes is quantified by both the pricing AV's and the CMS AV's due to their interdependencies.

7. The underlying annual trend supporting the filing is 9.5%, which is further adjusted by an induced utilization adjustment of 0.01% per year, to develop the overall trend assumption of 9.50% per year.

- a) **Please provide quantitative support for the 9.50% trend assumption (e.g. demonstrate that it is reasonably consistent with recent historical changes in claim costs).**
- b) **Please provide quantitative support for the annual induced utilization adjustment of 0.01%.**
- c) **Discuss and show quantitatively the development of the normalized benefit leverage, population aging, historical changes for fee schedules as well as company-wide utilization management programs and external trend driver adjustments.**
- d) **The actuarial memorandum indicates that the data in Table 4 was not used in trend development. Please explain why. Also, provide the unnormalized data used in trend development in Table 4b and the normalized adjustments in a separate Excel exhibit.**

Response:

- a) An exhibit with the underlying results of the regression study describe in the actuarial memorandum has been included in this response. This separate regression study was developed by the HHIC valuation team to analyze the ACA trend levels of continuously enrolled cohorts of ACA members in order to normalize for population change, along with adjusting for material step changes that were included in the network factors in the two periods. Resulting r-squared levels were compared to determine confidence levels of the resulting regression trends to develop a reasonable range of trend assumptions. The requested trend falls within recent trade association survey results for Individual markets. Additionally, the recent AON trend study is attached as a reference point for the prospective 2018 trend for more stable group market.

As seen from the exhibit the regression study resulted in a composite trend of 8.5%. As described in the memorandum, the continuous enrollment approach addresses the unstable population concerns in the underlying ACA experience, but it does not reflect the impact of partial year population changes that are inherent to an individual market. The pricing trend was set at 9.5% in consideration of that factor.

- b) The utilization adjustment is a function of the change in average metal distribution between the two periods. $2019 \text{ Projected Benefit Richness} / 2017 \text{ Average Benefit Richness} = 1.0310 / 1.0309 = 1.0001$. $0.01\% = (1.0001)^{(.5)} - 1$.
- c) As discussed in the response to section a, the regression study took into consideration the material step changes. The attached exhibit includes the unadjusted data.
- d) Discussed above in response a and c.

8. The actuarial memorandum states that “the \$21.05 Risk Adjustment assumption in cell C31 represents our best estimate of the year end risk adjustment transfer payment for HHIC as developed in Attachment B adjusted for the (\$0.15) PMPM risk adjustment user fee and the impact of the catastrophic eligibility factor.”

- a) **Please provide an exhibit that includes all of the same components as are provided in Attachment B, but which provides the development of the estimated 2017 risk transfer amount (i.e., rather than the projected 2019 risk transfer amount).**
- b) **Focusing on the Non-Catastrophic Pool, to the extent any of the values included in rows 11 to 13 (e.g., statewide average premium, HHS risk score) for the 2017 estimate are significantly different than those being assumed for the 2019 projection, please reconcile those differences and provide quantitative justification for them.**

Response:

- a) The estimated 2017 risk transfer amount of ██████████ shown in Table 2 was based on our financial accrual and underlying assumptions as of a February 2018 valuation date. We chose this valuation date in order to (1) tie to the claims run-out period requested by the Department and (2) more closely align the reported value to the value booked in the CY2017 year-end financials. The financial accrual development took the detailed plan and rating area data as of the February 2018 valuation date and applied the transfer formula at this level. This methodology is different from the Attachment B approach. The Attachment B approach is useful for projections when detailed plan and rating area data does not exist. Therefore, replicating the Attachment B structure for 2017 would generate a different value (i.e. a “sum of products” approach vs. a “product of sums” approach).
- b) It is important to note that the issuer-specific factors and the statewide average factors used in the development of the 2017 estimate and discussed in Question 8a above were not used as the starting point for the 2019 projection.

The issuer-specific factors included in row 11 of Attachment B for the 2019 projection were developed for the population of members that comprised the morbidity factor development discussed in the response to Question 9 below. For sources of members where we had 2017 (or 2016) claims experience and diagnosis data, we utilized their risk scores in the calculation. For the “New” source of members where we did not have claims experience, we made an assumption regarding this category’s risk score based on a review of the claim level and risk score relativities of the other sources.

The statewide factors included in row 13 of Attachment B for the 2019 projection were developed by starting with information from the following sources: (1) the PID's 2017 RATEE study released on May 9, 2018, (2) the PID's 1Q2018 Enrollment Survey released on April 27, 2018, and (3) the CMS Interim Summary Report for 2017 released on April 27, 2018. The attached exhibit labeled Q8b Response demonstrates how we used the information from these sources in order to derive the 2019 statewide average estimates shown in Attachment B. We assumed the statewide average premium will increase █% in 2018 based on knowledge of approved rates and assumed an additional █% increase in 2019. We assumed the statewide average risk score will increase █% due to the individual mandate removal (██) and an additional █% increase due to anticipated general deterioration of the pool as observed historically. We assumed the statewide average allowable rating factor will increase █%. For the statewide average actuarial value and induced demand factors, we assumed some buy-down among metals from the PID's 1Q2018 Enrollment Survey. All of these calculations can be found in the Q8b Response exhibit.

9. In developing the morbidity adjustment equal to 1.021 (i.e., prior to the 6% increase to reflect the market uncertainty from the elimination of the health insurance coverage mandate), please describe how the 2017 Normalized Allowed PMPMs were calculated for each member segment (i.e. HHIC ACA, Other Highmark, Prior ACA, and New-to-Blue) in Attachment A.

Response:
Please see the attached exhibit for the morbidity calculation.

We classified the 2/1/2018 enrollment into the following categories:

Renewal

- This represents our 2017 ACA members that reenrolled in HHIC. The normalized allowed PMPM was calculated by normalizing the allowed PMPM for demographic, network, and benefit richness factors.

Other Highmark

- This represents the 2017 members from other Highmark markets such as group markets that enrolled in HHIC. The normalized PMPM was calculated by reviewing its allowed claims, adjusted for benefit differential if needed and then normalized for demographic, network, and benefit richness factors.

Prior ACA

- This represents our 2016 ACA members that lapsed in 2017 and now reenrolled in HHIC. We reviewed its 2016 ACA claims, trended to 2017, and used this as starting point to approximate the 2017 allowed claims. The normalized allowed PMPM was then calculated by normalizing the allowed PMPM for demographic, network, and benefit richness factors.

New

- This represents the catchall category of the remaining members that enrolled in HHIC. The 2017 allowed PMPM was set using a combination of the “Renewal” and “Other Highmark” segments as a starting point. The normalized allowed PMPM was then calculated by normalizing the allowed PMPM for demographic, network, and benefit richness factors.

In setting the normalized PMPMs, we also reviewed risk score assumptions such that they moved directional with the claims PMPMs. Additional consideration included the relationship of the claims PMPM in each respective category to its average 2018 premium PMPM.

10. Please describe and demonstrate quantitatively how the proposed demographic and morbidity adjustments were taken into account in calculating the projected 2019 HHIC Non-Catastrophic Pool risk adjustment transfer.

Response:

The issuer-specific factors included in row 11 of Attachment B for the 2019 projection were developed for the population of members that comprised the morbidity factor development discussed in the response to Question 9 above. The demographic component was used to normalize the allowed PMPM and the combined risk score (Non-Catastrophic and Catastrophic) was considered directionally in setting the normalized PMPMs. That is, both the risk scores and the allowed PMPMs are moved in tandem. This does not imply that the risk scores and normalized allowed PMPMs move in the exact proportion but they are directional.

11. Please demonstrate quantitatively how the CY2019 Network Factor in Attachment A equal to 0.988 was developed and describe what specific network contracting changes are expected to result in a 1.2% decrease in projected costs relative to the base experience.

Response:

Please see the attached exhibit labeled Q11 Response for a quantitative development of the 0.988 factor. There is a 2% improvement in the medical cost structure for the my Direct Blue EPO designs as compared to the base experience due to improvement in facility contracting.

12. With respect to the “Change in Other” adjustment equal to 1.001, please provide the factors for each of the following components of the “Change in Other” adjustment and provide quantitative support for them:

- i. Changes in pharmacy rebates**
- ii. Changes in hospital/physician settlements.**

Response:

The Change in Other adjustment of 1.001 included a 1.01 factor for STLDI. After removing this factor, the Change in Other adjustment becomes 0.991. The 0.991 factor is comprised of the following components:

- Change in Rx Rebates = 0.9901
- Change in Hospital/Physician Settlements = 1.001

13. It appears that the Pricing AVs for a number of plans increased significantly relative to last year. For example, for plan 70194PA0530001, the Pricing AV increased from 0.850 in the 2018 rate development to 0.897 in the 2019 rate development. Similarly, for plan 70194PA0530007, the Pricing AV increased from 0.607 in the 2018 rate development to 0.686 in the 2019 rate development. Please describe how the revised Pricing AVs for 2019 were developed, specifically addressing and providing justification for the changes to the Pricing AVs for the two plans referenced above.

Response:

The pricing AV's are based on our internal pricing model and compared for reasonability to the group model. The model has been re-calibrated to more align the anticipated pricing AVs to expected paid to allowed ratios. Previous years, the morbidity change captured this difference and was discussed in detail in last year's Q&A process. This re-calibration adjustment was worth on average 5% and the change is revenue neutral as it no longer is included in the morbidity change like previous filings. In addition to the re-calibration, the impact of cost sharing leveraging will be a factor in year to year comparisons.

For 2019, HHIC made enhancements to many of its plans to include 2 free PCP visits. This product feature provides an enhancement to the 2018 version of the plan.

For plan 70194PA0530001, we added the 2 free PCP visits and 2 free Mental Health/Substance Abuse visits. Several other small cost sharing changes occurred in order to limit the cost sharing leveraging impact seen in both HHIC's pricing model and CMS' AV model. The combination of the recalibration and the cost sharing changes account for the change from 2018.

For plan 70194PA0530007, this plan went from a \$6,950 deductible with most benefits after deductible to a \$4000 deductible plan with more benefits prior to deductible coverage. Changes in deductible levels have material impact to both HHIC's pricing model and CMS' AV model, along with the change in coverage for items prior to the deductible.

14. The required Rate Change Summary form shows experienced administrative expenses of roughly 6.39% in 2017, compared to an assumed 6.74% for 2018 and 8.05% in 2019. Please explain why the administrative expense assumption has increased to 8.05% for 2019 and provide quantitative support for the change relative to 2018.

Response:

Historically, several general expense categories were not allocated explicitly to the product line, and therefore not part of the requested administrative expense. HHIC recently revised the allocation of expenses to the product line which has impacted the requested assumption. The result is the requested administrative expense better aligns to the forecasted amounts for this product line compared to previous years.

15. We note that the calculated average age factor for the projection period in Attachment E is 1.825 and the projected Allowable Rating Factor for HCC (Non-Catastrophic Pool and Catastrophic Pool combined) is approximately 1.841 in Attachment B. Please reconcile the differences between the two factors described above and, if correct, describe why each is appropriate.

Response:

Please refer to the exhibit labeled Q15 Response in the attached file for the reconciliation. The primary difference between the two factors is the way in which the four sources, used to project morbidity and demographics, are aggregated. The average age factor in Attachment E is used in the projection of 2019 allowed claims; therefore, the demographic factors of the four sources are claim-weighted. This is appropriate for showing a composite factor at an intermediate step in projecting aggregate claims. The Allowable Rating Factor in Attachment B represents the composition of the same four sources. However, because the demographic factors are weighted by billable member months in the risk adjustment formula, we have used a member weighted average here.

Note that there is an immaterial difference between the two calculations of the age factors by source due to the member-level age factors by source in Attachment E being averaged using 2017 member months and the factor in Attachment B being weighted using a 2/1/18 snapshot of unique members. The reason that unique members were used for the 2/1/18 snapshot is that member months were not available for two of the four sources when developing the risk adjustment.

16. Per Tables 10 and 14 of the Actuarial Memorandum Exhibits it appears that the Company no longer intends to vary rates by provider network for Zones C, K, and N. With respect to the Network Factors, it is noted in the Actuarial Memorandum that "the projected factors are set 1.00 for plans where the effective medical network adjustments are now reflected in the claims

experience and 0.98 for plans where the incremental adjustments are not yet reflected in the claims data.” While we understand that the effective network adjustments may now be reflected in the 2017 single risk pool claims experience, please clarify why the Company no longer believes that the rates between Zones C, K, and N should vary as a result of network differences between them. Otherwise, if the rates specific to each for the three zones do still reflect the corresponding network differences between them, please explain.

Response:

We recognize that historically there has been a material network cost differential between zones. However, the product offering for HHIC has changed materially over the history of ACA, along with the provider network that underlies the products and metal offerings. The adjustment to 1.0 for Zone C and K was more to align their materiality with the composite seen in the experience. Not only has the proportion of membership in Zone C and K diminished over the years, but Zone C and K are now only being used for an off exchange bronze PPO. The combination of the minimal enrollment and low anticipated claim levels due to the bronze-only offering has made the cost differential immaterial. Therefore, we assumed the cost differential will remain roughly at the same level as what is in the experience period. Zone N is for an EPO product offering that does have a material impact to the composite, but the impact to the average cost is not anticipated to change as it remained rather stable.

17. Please show the development of the average commission as shown in Table 6. Additionally, the current and 2019 broker agreements should be included and used to develop the percent shown in Table 6 as well as the associated pmpm.

Response:

The average projected commission is provided by the Cost Allocation department and is a function of the recent commission amount experienced in HHIC’s financials. As a point of reference, CY2017 was \$■■■■ PMPM, but that was at a less generous broker commission schedule. The current value is running around \$■■■■ PMPM. The current broker commission schedule was included as Attachment D in the initial submission. The 2019 broker agreement is not available at this time.

18. Please note that carriers should not be pricing for the PCORI fee in the 2019 calendar year rate development as the fee ends for plan years ending September 30, 2019 (i.e., policies issued before October 1, 2018). Please remove this non-benefit expense assumption, reprice, and resubmit revised filing materials.

Response:

Based on Highmark’s current method of calculating the PCORI fee (Member Month method), we would have to pay about three fourths of the estimated \$2.52 per member per year fee for calendar year 2019 on Fully Insured business. Therefore, Highmark built into the rates the expected amount of our PCORI liability assuming the Member Month counting method.

Re: Highmark Health Insurance Company 2019 ACA Rate Filing (Individual Market)
Filing # 1A-DP-18-HHIC (SERFF # HGHM-131475752)

Dear Ms. Sanders-Jones:

Based on the objection letter dated July 6, 2018, the filing has been revised to reflect the following change:

- A revision to the change in morbidity assumption in table 5 from 1.082 to 1.057 in order to address the error discovered in researching question 5c of the objection letter. Further details are provided in the response.

HHIC's position regarding the uncertainty with changes in federal regulations or market participation is addressed in the filing cover letter.

Should you have any questions regarding the attached Filing, please feel free to contact me at [REDACTED] or via e-mail at: [REDACTED]

Sincerely,

[REDACTED]

[REDACTED]

Manager, Actuarial Services
Highmark Inc.

TO: Cherri Sanders-Jones
Bureau of Life, Accident & Health Insurance
Pennsylvania Insurance Department

FROM: ██████████, Actuarial Manager
Highmark Inc.

DATE: July 13, 2018

SUBJECT: HM Health Insurance Company 2019 Individual ACA-Compliant Rate Filing
Response to July 6, 2018 Objection Letter
Filing Number: 1A-DP-18-HHIC
SERFF Tracking Number: HGHM-131475752

Below are HHIC's responses to your objection letter dated July 6, 2018. We have included the questions along with the responses for your convenience.

1. As was communicated in my email of July 3, 2018 the Department has determined that an Individual Adjustment Factor of 1.06 and a CSR Defunding Adjustment Factor of 1.20 will be used in the 2019 rate development for the Individual Market. Issuers overwhelmingly recommended standardization of these factors. As such, issuers may not deviate from these factors. Updated materials (PA Actuarial Memorandum and Exhibits and the Plan Design Summary worksheets, including the State rate tables) reflecting these factors, Risk Adjustment updates (based on the June 30th release of the Federal Risk Adjustment Report) and other Department requested changes must be provided with your second-round response due July 13, 2018. Other than these three preceding changes, no other modifications will be accepted.

Response:

The current version of this filing, which was submitted in conjunction with the Objection 1 response, reflects an Individual Mandate Adjustment Factor of 1.06 and a CSR Defunding Adjustment Factor of 1.20. Thus, no additional changes are needed to accommodate the Department's decision regarding these factors.

2. In response to question 17, regarding the average commission, you indicate that the 2019 broker agreement is not yet available. If not available, what is the basis for the 2019 commission pmpm?

Response:

A 2019 broker agreement is not yet available. Consistent with our prior response, the average projected commission was provided by the Cost Allocation department and is a function of the recent commission amount experienced in HHIC's financials. Given that the 2017 average was \$██████ PMPM and the current average is \$██████ PMPM, we determined that a \$██████ PMPM for 2019 is reasonable.

3. The following questions are related to the response to question 7:

- a) **Please provide a quantitative demonstration of the development of the December 2016 and December 2017 normalized allowed charge PMPMs. For example, please demonstrate how the \$569.38 December 2017 normalized allowed charge PMPM is developed from the \$766.58 raw allowed charge PMPM, including a description of each of the components being normalized for (e.g., demographics, benefits) and the corresponding normalization factor associated with each component**

- b) **Please confirm whether the normalized allowed charge PMPM amounts were adjusted for seasonality. If the normalized allowed charge PMPMs were not adjusted for seasonality, please develop proposed seasonal adjustments, provide quantitative justification for the proposed adjustments, and provide an updated version of the regression analysis utilizing seasonally-adjusted normalized allowed PMPMs. If the normalized allowed charge PMPM amounts were adjusted for seasonality, please provide the seasonality factors which were utilized.**
- c) **Please provide quantitative support for the 1% trend load reflecting “the impact of partial year population changes.”**
- d) **Please provide a version of the trend regression analysis which is not limited only to those individuals who were continuously enrolled (i.e., include the claims experience for all individuals who were enrolled over the time period of January 2016 to December 2017).**

Response:

- a. The attached exhibit labeled ‘Q3a Response’ provides the requested data. Normalization factors include demographics, seasonality, and step changes. The demographics factors are based on industry factors. Seasonality is described in part b of this response. The step change factors incorporate material step changes that were included in network factors in the two periods. Please note, as mentioned in the actuarial memorandum, the trend resulting from the cohort study was benchmarked against other sources for reasonability.
- b. The normalized allowed charge PMPM amounts were adjusted for seasonality. Given this is a continuous two-year cohort the primary component of the seasonality factors were the potential service days of each calendar month. The seasonality factors are included in the attached exhibits.
- c. The additional 1% impact of partial year population changes was included in the proposed trend in order to supplement the point estimate provided in the regression study. This market exhibits significant churn thru-out the year and the point estimate generated from the regression study needed to account for this market dynamic. As seen in the attached exhibit as a response for part d of this question, the ACA enrollment thru-out the calendar year is not consistent, thus demonstrating potential selection that can occur within a year.
- d. The attached exhibit labeled ‘Q3d Response’ provides the requested data for the same population as the original regression study, but without the continuously enrolled constraint. The regression analysis shown is based on the raw data as normalization factors are not available for a population with this much volatility. This is the primary reason we chose the continuously enrolled approach.

4. The following questions are related to the response to the risk adjustment calculation:

- a) **Please explain why the projected values for Risk Score, Demographic Factor, and Benefit Richness Factor in cells I13, I18, and I20, respectively, in the ‘Q9 Response’ tab are not equal to the values for HHS Risk Score, Allowable Rating Factor, and Induced Demand Factor in cells J11, K11, and M11, respectively, in Attachment B.**
- b) **We recognize that replicating the Attachment B structure for 2017 would generate a different value than the actual 2017 estimate due to the fact that the “sum of products” is not equal to the “product of sums.” However, please provide the estimated average 2017 values for HHS Risk Score, Allowable Rating Factor, Geo Cost Factor, Induced Demand Factor, and Actuarial Value for each of HHIC and Statewide for the Non-Catastrophic Pool. To the extent any of the HHIC specific 2017 values are significantly different than the**

corresponding values being projected for 2019 in Attachment B, please reconcile those differences.

- c) **Please provide the calculated Transfer PMPM amount for HHIC when using the estimated average 2017 values (both for HHIC and Statewide) in place of the projected 2019 values in the calculation included in Attachment B. To the extent the resulting PMPM amount is significantly different than the actual estimate for 2017 confirm that the only difference is the use of the “product of sums” vs. “sum of products”.**

Response:

- a. The Risk Score shown in cell I13 of the ‘Q9 Response’ tab equals the weighted average composite (using billable member months) of the HHIC non-catastrophic and catastrophic pools from Attachment B. There are several reasons for the difference in the two Demographic Factors. First, the Demographic Factor in cell I18 of the ‘Q9 Response’ tab is the product of age, area, and tobacco factors whereas the Allowable Rating Factor shown in Attachment B represents just the age component. Second, similar to the Risk Score variance, the Demographic Factor shown on the ‘Q9 Response’ tab is a blend of the FPH non-catastrophic and catastrophic pools. Third, the Demographic Factor in cell I18 of the ‘Q9 Response’ tab is weighted differently than the weighting used in the development of the Allowable Rating Factor in Attachment B (please see our Objection 1 Question 15 response for an explanation of the weighting differences). The Benefit Richness Factor in cell I20 of the ‘Q9 Response’ tab represents an assumption used to normalize the claims primarily for the purpose of calculating the change in morbidity. The Induced Demand Factor in cell M11 of Attachment B was derived from the actual metal levels selected by members in each source as of the 2018 snapshot date.
- b. Please refer to the exhibit labeled Q4b Response for the requested estimated 2017 values based on the February 2018 valuation. For ease of comparison, the projected 2019 HHIC values from Attachment B are included in the exhibit. Given the level of membership churn from year to year, the differences in the 2017 and 2019 HHIC values do not appear significant.
- c. Please refer to the exhibit labeled Q4c Response. This exhibit calculates the 2017 HHIC risk adjustment transfer amount in a manner consistent with Attachment B. The only difference between the amount calculated in this exhibit and original estimate for 2017 is the use of the “product of sums” vs. “sum of products”.

5. The following questions are related to the response to question 9:

- a) **Please demonstrate quantitatively how the risk score, completed allowed claims, demographic factor, network factor, and benefit richness factor for the “New” cohort were developed. To the extent the factors/results for the “Renewal” and “Other Highmark” cohorts were used as a starting point, demonstrate quantitatively how the values for those two segments were adjusted to develop the corresponding factors/results for the “New” cohort.**
- b) **In providing your response to (a), please specifically explain and demonstrate quantitatively how it was determined that the assumed risk score for the “New” cohort should be approximately 12% higher than that of the “Renewal” cohort, but the completed allowed claims PMPM for the “New” cohort should be approximately 34% higher than the Renewal cohort.**
- c) **Why are the ratios of the 2019 to 2017 demographic (1.007), network (.981), and benefit richness (1.018) factors different than assumed in index rate development for the demographic (1.008), network (.988), and change in benefits (1.000) factors? Please provide quantitative support for the factors supporting the projected 2019 membership.**

- d) Please explain why the projected 2019 demographic factor equal to 1.900 in cell I18 of the 'Q9 Response' tab is different than the projected 'Rating Age Factor' of 1.825 in cell G14 of the 'Q15 Response' tab.

Response:

- a. We recognize that the Objection 1 Question 9 response pertaining to the development of the "New" cohort implied that the normalized allowed PMPM was developed from the top down (as it was for the other cohorts). In reality, the normalized allowed PMPM for the "New" cohort was developed by simply taking a straight average of the normalized allowed PMPMs from the "Renewal" and "Other Highmark" cohorts ($\$474.33 = [\$346.00 + \$602.66] / 2$). The normalization factors (Demographics, Network, and Benefit Richness) for the "New" cohort were shown in the exhibit for informational purposes and to derive an underlying implied un-normalized allowed PMPM. This also allowed for composite factors using all four sources to be calculated. In the end, this was for informational purposes only as the "New" cohort normalization factors had no influence on the morbidity factor development.
- b. Similar to our approach for developing the normalized allowed PMPM for the "New" cohort, we first calculated a straight average of the risk scores for the "Renewal" and "Other Highmark" cohorts. The straight average of the risk scores is roughly \blacksquare ($\blacksquare = [\blacksquare + \blacksquare] / 2$). We then looked at the claim relativity between the "New" cohort and the "Renewal" cohort to ensure the risk scores moved directionally with the claim PMPMs. We determined from this analysis that a reasonable risk score assumption would be \blacksquare for the non-catastrophic pool and \blacksquare for the catastrophic pool. Weighted together, these two assumptions form the basis for the "New" cohort risk score value of \blacksquare . As evidenced by the variance in the actual risk score and actual claim relationships between the "Other Highmark" and "Renewal" cohorts (i.e. $\sim \blacksquare$ for risk score and ~ 1.8 for claims), we would not expect to see an exact one-to-one relationship between the "New" cohort and the "Renewal" cohort.
- c. The 1.900 demographic factor, the 0.981 network factor, and the 1.050 benefit richness factor are the estimates of these factors on a 2017 equivalent basis for the 2019 projection members. The ratio of the 2017 BEP to the 2017 equivalent is primarily used for purpose of morbidity calculation.

The projected 2019 demographic, network, and benefit richness factors are 1.901, 0.988, and 1.031, respectively. Thus, the changes from 2017 to 2019 are 1.008 (= 1.901/1.886) for demographics, 0.988 (= 0.988/1.000) for network, and 1.0001 (= 1.031/1.0309 - See Objection 1, 7b Response) for benefit richness. The reference of the 1.000 in Table 5, cell C19 is the "change in benefits" which is not the same as the change in benefit richness factor.

As discussed, in researching this question along with a similar question in the FPLIC objection letter, we uncovered a lookup error in the network factor that was used to normalize the 2017 allowed PMPM. This factor should have been 1.0 rather than the composite 0.981. The correction for this error resulted in the morbidity on table 5 to change from 1.082 to 1.057. The revised filing reflects the correction to this assumption.

- d. The demographic factors that composite to 1.900 in cell I18 of the Objection 1 'Q9 Response' tab are products of age, area, and tobacco factors. The 'Rating Age' factors that composite to 1.825 in cell G14 of the Objection 1 'Q15 Response' tab represent age factors only.

Part II of the Preliminary Justification

Highmark Health Insurance Company – Individual Market

Scope and Range:

Highmark Health Insurance Company (HHIC) is requesting an average rate increase of 3.3% ranging from -7.2% to 12.4% for the 2019 ACA-qualifying individual products with effective dates from January 1, 2019 to December 31, 2019. This is projected to affect 20,024 members.

These premium rates are being set at a level that is required to adequately cover rising costs, primarily due to increasing medical and pharmacy services in the Individual market.

Historical Financial Experience:

HHIC experienced an unanticipated financial gain in its Individual ACA programs in 2017 following several years of significant losses.

Change in Medical Service Costs:

The projected average cost of medical care for the projected population is expected to increase. The increase will emerge in utilization and average cost per service, and is spread across all types of services.

Change in Benefits and Cost Sharing:

Some cost sharing parameters were changed in order to maintain compliance with Federal AV requirements. Additionally, some out of pocket maximum parameters were changed to keep up with the rising cost of health care. These out of pocket maximum changes also aided in mitigating the rate increase.

Administrative Costs and Anticipated Operating Results:

The anticipated administrative costs and operating results are not excessive or unreasonable. In accordance with regulations, the projected medical loss ratio is over 80%.

I. General Information

Document Overview

This document contains the Part III Actuarial Memorandum for Highmark Health Insurance Company's (HHIC) individual block of business rate filing, for products with an effective date of January 1, 2019. This actuarial memorandum is submitted in conjunction with the Part I Unified Rate Review Template.

The purpose of the actuarial memorandum is to provide certain information related to the submission, including support for the values entered into the Part I Unified Rate Review Template, which supports compliance with the market rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes.

This information is intended for use by the Pennsylvania Insurance Department, the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of HHIC's rate filing. However, we recognize that this certification may become a public document. HHIC makes no representations or warranties regarding the contents of this letter to third parties. Likewise, third parties are instructed that they are to place no reliance upon this actuarial memorandum that would result in the creation of any duty or liability under any theory of law by HHIC.

The results are actuarial projections. Actual experience is likely to differ for a number of reasons, including population changes, claims experience, and random deviations from assumptions.

I.1 Company Identifying Information:

- Company Legal Name: Highmark Health Insurance Company.
- State: The Commonwealth of Pennsylvania has regulatory authority over these policies.
- HIOS Issuer ID: 70194
- Market: Individual
- Effective Date: January 1, 2019

I.2 Company Contact Information:

- Primary Contact Name: [REDACTED]
- Primary Contact Telephone Number: [REDACTED]
- Primary Contact Email Address: [REDACTED]

II. Proposed Rate Increase(s)

For all rate increases by plan see the 'Cum'tive Rate Change % (over 12 mos prior)' found in Worksheet 2 Row 27 of the URRT. The rate increase varies by plan due to an update in several of our pricing factors and changes in cost sharing required to meet Actuarial Value and other cost sharing restrictions under the Affordable Care Act as well as mappings between discontinued and new plans.

The primary drivers of the rate increase are increasing medical and pharmacy services in the Individual market.

In accordance with the filing instructions specified by the Pennsylvania Insurance Department, the rate development in this filing is based on certain assumptions we have had to make at this point in time. In accordance with the Department's guidance, we have assumed that the ACA health insurance coverage mandate will be eliminated, and that cost sharing reduction (CSR) payments will remain ceased for 2019. In prior versions we included an assumed load for expected adverse selection due to the Short Term Limited Durational Insurance market expansion based on HHS recently proposed rule modifying federal requirements for this market. The company has chosen to remove the STLDI load from the rate development at this time, however, forthcoming guidance and the ongoing filing review process may make it necessary to revisit this assumption. Additional assumptions include that advance payment of premium credits (APTCs) will continue until the end of 2019, there will be no significant changes in legislation, regulations or otherwise (i.e. rules, regulatory guidance, etc.) impacting the ACA market, and all Pennsylvania QHP issuers currently participating on the Marketplace will continue to do so throughout 2019. In addition, there are other uncertainties that may directly or indirectly affect an already unstable insurance market and ultimately, rates. If any of these assumptions are ultimately incorrect or additional developments occur that similarly have a detrimental impact to the market, modifications to the rate development may be necessary. As a result, HHIC reserves the right to submit a revised filing.

III. Experience Period Premium and Claims

III.1 Paid through Date:

Experience Period claims were based on incurred calendar year 2017, paid through February 2018. This includes 2017 experience in Affordable Care Act compliant plans. HHIC did not offer any transitional plans in 2017.

III.2 Premiums (net of MLR Rebate) in Experience Period:

The premiums shown for the experience period were based on calendar year 2017 actual revenues.

Based on preliminary information for calendar year 2017, no MLR rebates are anticipated to be refunded to enrollees. Therefore, we did not include an adjustment for MLR rebates in the 2017 premium amounts.

III.3 Allowed and Paid Claims Incurred During the Experience Period:

- **Historical Experience:** We chose HHIC's current experience for the individual block of business for the period January 1, 2017 through December 31, 2017, with claims paid through February, 2018 as the basis for the 2019 projected individual market pricing.
- **Claims Incurred During the 12-month Experience Period:** Worksheet 1, Section I shows our best estimate of the amount of claims that were incurred during the 12-month experience period for HHIC's individual book-of-business. This section includes:
 - The amount of claims which were processed through Company's claims system,
 - Claims processed outside of the Company's claims system, and
 - Our best estimate of claims incurred but not paid as of the paid through date stated above.
- **Method for Determining Allowed Claims:** For non-capitated claims, the allowed charges are summarized from HHIC's detailed claim-level historical data. This experience includes 2017 claims for Affordable Care Act compliant business. For capitated and other off-system claims, historical capitations and experience were tabulated and added to the claims.
- **Paid Claims:** We also summarized the paid claims from detailed member records. The paid-to-allowed ratio for the experience period reflects the 2017 plan designs chosen by each member.
- **Incurred but Not Paid (IBNR) Claims Estimate:** HHIC is using a completion factor of 0.974 to include IBNR claims in allowed charges. The IBNR completion factor was developed using our corporate reserving system for HHIC's individual business. We applied it equally to both paid and allowed total claims (as a change to utilization) to complete the experience.

IV. Benefit Categories

Historical cost and utilization data was summarized at the defined benefit categories included in Worksheet 1, Section II of the URRT. This data was used to allocate total claims into its components on the URRT.

The data provided in this section closely adheres to the preferred definitions of the Benefit Categories included in the URRT instructions, including the "Other Medical" category. The "Other Medical" category units reflect visits for PDN/home health, trips for ambulance and procedures for DME/prosthetics. Prescription drugs utilization were converted to a "per 30-day" script count.

V. Projection Factors

V.1 Changes in the Morbidity of the Population Insured

We applied an adjustment of approximately -0.3% to reflect the anticipated changes in the average morbidity of the covered population (beyond allowable rating factors). This morbidity adjustment reflects multiple changes including blending of the ACA business with new members from multiple sources including uninsured and the employer markets.

Impact of Health Insurance Coverage Mandate

In accordance with the Department's guidance, the morbidity factor was increased by 6.0% to reflect the market uncertainty from the elimination of the health insurance coverage mandate. This deterioration is reflected in the filing by multiplying the original morbidity factor of -0.3% by 6.0% to arrive at a final morbidity factor of 5.7%.

V.2 Changes in Benefits

All known benefit changes pertained to changes in cost sharing which are captured in the paid to allowed ratio discussed in Section VIII.

V.3 Changes in Demographics

We project that the average rating factor (age, tobacco load and area combined) will increase by about 0.8% due to the change in the population. This is primarily due to the expectation that the new members from the group and/or uninsured populations to be slightly older than the population in the underlying experience. This increases the projected allowed claims (utilization) by the same amount.

V.4 Trend Factors (cost/utilization)

This development of the CY2019 rates reflects an annual trend rate of 9.5% (5% cost, 4.3% utilization). These trends reflect HHIC's expectations regarding increases in in-network contractual reimbursement and out-of-network costs. These estimates measure and normalize for benefit leverage, population aging, and historical changes for fee schedules, as well as company-wide utilization management programs, and external trend drivers.

The trend represents a blended average for all types of service and is applied to the aggregate experience for pricing. These trends represent assumed community-wide expectations. Claim variations due to the specific projected enrolled population in this single risk pool are reflected in the morbidity adjustment.

Please note that while the underlying utilization trend is expected to be 4.3%, HHIC has included the anticipated change in utilization due to cost sharing requirements in the utilization trend column as instructed. The utilization adjustment is 0.01% per year. This brings the final utilization trend to 4.3% as found in the URRT.

VI. Credibility Manual Rate Development

VI.1 Source and Appropriateness of Experience Data Used

HHIC's individual experience is fully credible. No manual rate is developed or used in this projection. The Credibility Manual section of the URRT has been populated with zeroes to allow for finalization of the URRT Workbook.

VII. Credibility of Experience

The experience is from HHIC's individual book of business in 2017. It is large enough to be fully credible. Our results are based 100% on the experience rate, as adjusted.

VIII. Paid to Allowed Ratio

The paid to allowed ratio of 0.770 is a weighted average of the 2019 plan level paid to allowed ratios. Plan level paid to allowed factors were developed using an internal model based on HHIC individual claims experience.

IX. Risk Adjustment and Reinsurance

IX.1 Projected Risk Adjustments PMPM:

The estimated average risk score for HHIC's projected 2019 population was developed by using HHIC's 2017 claim diagnoses and the risk adjustment coefficients as finalized in the Notice of Benefit and Payment Parameters. Similarly, allowable rating factors, actuarial value factors and induced demand factors were estimated for HHIC based upon its projected 2019 population.

We estimated the statewide average risk transfer factors based on current market assumptions. We estimated the statewide average premium using current market premium assumptions with adjustments for anticipated rate changes for 2019.

The actual calculation of the risk transfer followed the risk transfer methodology as prescribed.

The analysis resulted in HHIC receiving from the risk adjustment pool. This value is reflected in worksheet 1 net of the risk adjuster fee (\$0.15 PMPM) consistent with the single risk pool regulations.

X. Non-Benefit Expenses and Profit & Risk

X.1 Administrative Expense Load:

The proposed rates reflect internal administrative costs including quality improvement administrative expenses. This cost was developed based on standard expense allocation methods.

X.2 Profit (or Contribution to Surplus) & Risk Margin:

HHIC has voluntarily refrained from including a risk and contingency factor in this filing. By this voluntary restraint, HHIC is not waiving any right to include a risk and contingency factor which HHIC believes is consistent with historical and legal interpretations of HHIC and the Pennsylvania Insurance Department.

X.3 Taxes and Fees:

The following fees were added:

- \$0.16 Per Member Per Month for the Patient Centered Outcomes Research Fee.
- 0.0% for the Health Insurance Provider Fee
- 2.0% for the PA Premium Tax
- 3.5% Exchange Fee x 84% assumed on exchange percentage (= 2.9% included in the single risk pool base rate)

XI. Projected Loss Ratio

The anticipated medical loss ratio is about 91.3% relative to total premium less taxes and fees. This loss ratio is calculated consistently with the federally prescribed MLR methodology.

XII. Single Risk Pool

As described above, the base experience used includes all HHIC individual members in accordance with the Single Risk Pool regulations. The projected membership and their corresponding premiums and claims only include those members who will be enrolled in a fully ACA-compliant plan in 2019.

XIII. Index Rate

Please see Exhibit I for the numerical development of the projected index rate. The index rates as shown on Worksheet I of the URRT are simply the average allowed claims for the Essential Health Benefits for the experience and projected populations, respectively, for HHIC. For the experience period, only non-grandfathered plans are included. The projection period Index Rate is not adjusted for reinsurance or risk adjustment programs or any other fee.

XIV. Market Adjusted Index Rate

Please see Exhibit I for a numerical demonstration of the Market Adjusted Index Rate development. The Market Adjusted Index Rate is the Index Rate further adjusted for risk adjustment and the exchange fee. The Risk Adjustment factor is developed by taking one minus the expected risk transfer (net of the fee) and dividing by the projected incurred claims before risk adjustment. The Exchange User Fee factor is developed by adding the expected average exchange fee PMPM and the projected incurred claims after risk adjustment and reinsurance, then dividing by the projected incurred claims after risk adjustment and reinsurance. These adjustments were developed as factors in accordance with the Part III instructions.

XV. Plan Adjusted Index Rates

A Plan Adjusted Index Rate is developed by taking the Market Adjusted Index Rate and adding a plan's actuarial value, relative benefit richness, relative network, any non EHB benefits, and retention. Please see Exhibit II for the development of the Plan Adjusted Index Rate for each plan.

XVI. Calibration

XVI.1 Age Curve Calibration:

The projected weighted average age factor for billable members is 1.826. This factor is calculated by dividing the all members age factor of 1.825 by the ratio of billable members to total members (0.999). Each Plan Adjusted Index Rate represents the rate for an average member with an age factor of 1.826. Please note that no member will pay these rates because the age factor of 1.826 is not found on the HHS Age Curve. It only represents the average age factor of the projected population. The nearest age to that factor is for age 51, which has a factor of 1.865. Please see Exhibit I for the development of the calibration factor.

XVI.2 Geographic Factor Calibration:

The projected weighted average geographic factor is 1.032. Each Plan Adjusted Index Rate represents the rate for an average member with a geographic factor of 1.032. Please see Exhibit I for the development of the calibration factor.

XVI.3 Tobacco Factor Calibration:

The projected weighted average tobacco factor is 1.009. Each Plan Adjusted Index Rate represents the rate for an average member with a tobacco factor of 1.009. Please see Exhibit I for the development of the calibration factor.

XVII. Consumer Adjusted Premium Rate Development

The plan adjusted index rate represents the rate for an average age and average geographic member with a mix of tobacco users and non-tobacco users. Multiplying by the Combined Calibration Factor found in Exhibit I results in the value for a 51 year old non-tobacco user in a 1.0 geographical area. The standard HHS Age Curve along with the filed tobacco factors and geography factors can be used to calculate any rate found in the QHP rate template.

XVIII. AV Metal Values

The AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based the Federal AV Calculator. Some plans did require an adjustment to the inputs entered into the AV calculator. Screen shots and certifications for these plans were submitted as part of HHIC's QHP application.

XIX. AV Pricing Values

Please see Exhibit II for the portion of each AV pricing value that is attributable to each of the allowable modifiers. The utilization due to differences in cost sharing is based on the factors adopted by the risk adjustment methodology. No differences due to health status are in these adjustments.

Impact of Non-Payment of Cost Sharing Reduction Subsidies

In accordance with the Department's guidance, we have applied an additional adjustment to our AV pricing values for those Silver plans not offered exclusively off-exchange. This adjustment factor was 1.20 and represents the non-payment of Cost Sharing Reduction subsidies. Consistent with the Department's guidance, this adjustment factor was reflected in Column (v) of Exhibit II for the impacted plans.

XX. Membership Projections

Membership projections reflect HHIC's expectations for 2019. These projections reflect expected changes in market share due to market competition and changes in HHIC's plan offerings.

HHIC expects membership in 2019 to follow a similar metal level distribution as the Individual ACA experience period in the markets where plans will continue to be offered.

For the Silver level plans, the projected membership by cost sharing subsidy levels is based on the observed distribution of ACA members that were eligible under the federal poverty levels as determined by the federal health insurance exchange. The projected enrollment by plan and subsidy level is as follows:

CSR Silver Plan Membership Distribution			
FPL	Subsidy Level	% of Silver Membership	% of Total Membership
<150%	94%	36.0%	13.4%
150%-200%	87%	44.7%	16.6%
200%-250%	73%	6.8%	2.5%
>250%	70%	12.6%	4.7%
Total		100.0%	37.2%

XXI. Terminated Plans and Products

Plans in the 2017 experience period that will no longer be available in 2019 can be found in Exhibit III.

HHIC also has some plans that were offered only in 2018 (not offered in the experience period or in the projection period). For two of these plans, some members will be mapped to a renewing plan and others will be mapped to a new plan, depending on whether the members are currently on or off the exchange. These plans are shown in Exhibit III. In instances where there are multiple plans being mapped to a single HIOS ID, the increases are weighted by the mapped members and the experience period information is populated with zeros.

XXII. Plan Type

The Plan types listed in Worksheet 2, Section I of the Part I Unified Rate Review Template describe HHIC's plans adequately.

XXIII. Warning Alerts

Section IV – Total Premium does not match Worksheet 1: In accordance with the Department's guidance, we have applied an additional adjustment to our AV pricing values for those Silver plans not offered exclusively off-exchange. This adjustment factor was 1.20 and represents the non-payment of Cost Sharing Reduction subsidies. Consistent with the Department's guidance, this adjustment factor was reflected in Column (v) of Exhibit II for the impacted plans. Column (v) pertains to specific eligibility, which is not captured on Worksheet I of the URRT and thus creates the variance shown in Section IV.

XXIV. Actuarial Certification

I, [REDACTED], am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared to accompany HHIC's rate filing for the individual combined market on and off the Pennsylvania Exchange.

I hereby certify that the projected index rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80(d)(1) and 147.102),
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Neither excessive nor deficient.

I certify that the index rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates. The allowable modifiers used to generate plan-level rates were:

- The actuarial value and cost-sharing design of the plan.
- The plan's provider network, delivery system characteristics, and utilization management practices.
- The benefits provided under the plan that are in addition to the essential health benefits. These estimated benefits were pooled with similar benefits within the single risk pool and the claims experience from those benefits was utilized to determine rate variations.
- Administrative costs, excluding Exchange user fees.
- With respect to catastrophic plans, the expected impact of the specific eligibility categories for those plans.

I certify that the percent of total premium that represents essential health benefits included in Worksheet 2, Sections III and IV were calculated in accordance with actuarial standards of practice.

I certify that the benefits included in HHIC's plans are substantially equivalent to the Essential Health Benefits (EHBs) in the Commonwealth of Pennsylvania's benchmark plans. I certify that any benefit substitutions are:

- Actuarially equivalent to the benefits being replaced,
- Are made within only the same essential health benefit category,

- Are based on a standardized plan population,
- Are determined regardless of cost-sharing,
- Are not prescription drug benefits, and
- Are based on an analysis performed in accordance with generally accepted actuarial principles and methodologies.

I certify that the AV Calculator was used to determine the AV Metal Values shown in Worksheet 2 of the Part I Unified Rate Review Template for all plans. The AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based on the Federal AV Calculator. If any adjustments were required outside of the AV Calculator, appropriate certification has been provided to CMS through the QHP application process.

I certify that the geographic rating reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

The Part I Unified Rate Review Template does not demonstrate the process used by HHIC to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of qualified health plans for Federally facilitated exchanges and for certification that the index rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

ACTUARIAL MEMORANDUM**Highmark Health Insurance Company****Revised Individual Rate Filing - January 1, 2019**

I, [REDACTED], am a member of the American Academy of Actuaries and meet its qualification standards for preparing individual rate filings. As a consulting actuary, I was requested by Highmark Health Insurance Company ("HHIC") to review the development of the market-wide base rate for the individual market on and off the Pennsylvania Exchange. The confidential material presented in this revised filing was prepared for the specific purpose of submitting the rating formula for the Pennsylvania Insurance Department and may not be appropriate for other purposes. This filing represents premium rates for individuals sold or renewed effective January 1, 2019. The rates are guaranteed until December 31, 2019.

To the best of my knowledge and judgment, the following are true with respect to this filing:

1. Premium rates are established in accordance with generally accepted actuarial principles and the applicable Actuarial Standards of Practice. They are not excessive, inadequate, or unfairly discriminatory. Rates are reasonable in relationship to the benefits provided. However, it is certain that actual experience will not conform exactly to the assumptions used in this analysis. To the extent that actual experience is different from the assumptions used in developing the rates, the actual results will also deviate from the projected amounts.
2. In compliance with all applicable Pennsylvania and Federal Statutes and Regulations (45 CFR 156.80 and 147.102).
3. The rating factors and rating methodology are reasonable and consistent with HHIC's business plan at the time of the filing.

2019 Rates Table Template v8.1

All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.
 If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.
 If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.
 If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.
 To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.
