Re: Highmark Coverage Advantage (HCA) 2021 ACA Rate Filing (Small Group Market)
HCA Filing # 1A-SG-HCA-2020 (SERFF Filing # HGHM-132380500)

This constitutes Notice pursuant to Section 707 of the Pennsylvania Right-to-Know Law that the attached Highmark Coverage Advantage 2021 Small Group Market Rates Filing contains Trade Secret and Confidential Proprietary Information. Therefore, Highmark Coverage Advantage must, prior to the release of any portion of this Filing, be notified of any request by a third party for access to this Filing, and the Trade Secret and/or Confidential Proprietary Information identified by Highmark Coverage Advantage should be redacted before release.

Dear Ms. Gray:

This Filing revises the Highmark Coverage Advantage (HCA) (NAIC # 15507; HIOS Issuer ID # 79279) Small Group Market Off Exchange ACA rate filing and the supporting rate development for policies with effective dates on or after **January 1, 2021**. The Company proposes to revise its morbidity assumptions in response to the PA Insurance Department's COVID-19 Impact Guidance. This revision changes the Company's average rate change requested from -1.14% to 0.78%.

In the event the Department decides to publish this Filing in the PA Bulletin, the company information requested as per the Department's 2021 ACA-Compliant Health Insurance Rate Filing Guidance, Section B, is provided below:

1. Company Name & NAIC #: **Highmark Coverage Advantage, NAIC # 15507**
("Company")
2. Market: **Small Group ("Market")**

3. On or Off Exchange: This Company's products are offered **Off Exchange only**
4. Effective date of coverage: **January 1, 2021**
5. Average rate change requested: **0.78% increase**
6. Range of rate change requested: **-1.24% to 2.93%**
7. Total additional annual revenue generated from the proposed rate change: **\$58,062**
8. Product(s): **PPO**
9. Rating Areas and the change from 2020: **Regions 1, 2, 4, 5, 6** (Western, PA only)

There are no changes in our covered Rating Areas from the 2020 rate filing.

10. Metal Levels and Catastrophic Plans: This filing reflects that the Company anticipates selling the following Metal Levels of coverage in the indicated Market: **Platinum, Gold, and Silver**
11. Current number of covered lives and of policyholders as of February 1, 2020: **1,715 covered lives; 951 policyholders**
12. Number of plans offered in 2021 and the change this represents from 2020: **11**

The Company offered 11 plans in 2020. For 2021, the Company is offering 0 new plans in the Market, and removing 0 plans from the Market.

Please note that inclusion of premium rates in this filing for a given offering should not be construed to mean that the offering will ultimately be made available for sale in the market. Final offering decisions will be made consistent with and within the timelines set forth in CMS rules and/or ACA regulations.

13. Corresponding contract form number, SERFF and Binder ID numbers: The corresponding SERFF binder number is **HGHM-PA21-125098241** affecting the following Company products and forms:

Product Name / Type	Contract Form & SERFF #
PPO	HCA/PPO-7; HGHM-132367093
HDHP	HCA/HDHP-7; HGHM-132367082

14. HIOS Issuer ID # and submission tracking number: **HIOS Issuer ID # 79279, Company Filing # 1A-SG-HCA-2020 (SERFF Filing # HGHM-132380500)**

Additional Filing Disclosures

The Company has submitted all Required Documents stipulated by the Department, including the federal documents related to this filing, in its SERFF submission. In addition to the Required Documents, the Company has submitted a Supplemental Exhibits file containing additional detailed exhibits on items referenced in the PA Actuarial Memorandum. All tables, exhibits, and detail in support of this filing and the PA Actuarial Memorandum have been included in Excel format. For the Department's benefit, the Excel files have retained their formulas to the extent possible.

CMS has instructed issuers that it no longer requires any interim changes to the URRT to be submitted to HIOS. CMS is requesting that only the initial URRT and the final URRT be submitted to HIOS.

Potential for Material Unforeseen Impacts: This filing assumes that there will be no significant changes in legislation, regulations or otherwise (i.e. rules, regulatory guidance, etc.) impacting the ACA market, and that there are no significant changes in the participation of QHP issuers that would materially change risk adjustment transfer amounts. Modifications to the rate development may be necessary if significant unforeseen events occur. Examples include, but are not limited to, repeal or invalidation of the ACA or material developments in the course of the COVID-19 pandemic. As a result, Highmark reserves the right to submit a revised filing.

Request for Confidentiality

Please note that the rates and the supporting rate development contained in this Filing are competitively sensitive, are not in the public domain, and constitute business confidential proprietary/trade secret information that would cause harm to the competitive position of Highmark Coverage Advantage if disclosed to the public.

Public disclosure of any information contained in this Filing would allow Highmark Coverage Advantage competitors to better understand or discover its confidential and proprietary rating, pricing and/or marketing practices, would undermine competition in the Small Group market, and could have negative consequences for the operation of Highmark Coverage Advantage's business. Therefore, Highmark Coverage Advantage asserts that this Filing, in its entirety, constitutes Trade Secret and Confidential Proprietary Information and should not be disclosed.

It is our understanding that the Department does not intend to publish the confidential and proprietary information contained in this Filing or to otherwise permit this Filing and its confidential information, other than the redacted information and final approved rates, to be disclosed or released.

Furthermore and pursuant to the Pennsylvania Right-to-Know Law ("RTKL"), Highmark Coverage Advantage must be notified prior to release of information contained in this Filing and

Ms. Tracie Gray, Director
Highmark Coverage Advantage 2021 Small Group Market Rates
July 20, 2020
Page 4 of 4

be given the opportunity to respond to requests for such information. Should the Department receive such request or require the release of information contained in this Filing for its own purposes, Highmark Coverage Advantage asserts its right to release a redacted version of the Filing. In accordance with the RTKL, please contact the Highmark Coverage Advantage RTKL representative identified below prior to release of any information contained in this Filing:

Lisa Martinelli, Esq.
RTKL Representative
VP Chief Privacy Officer
120 Fifth Avenue, FAP Suite 2114
Pittsburgh, PA 15222

Furthermore, it should be noted that Highmark Coverage Advantage is equally concerned that even if this information is released in aggregate form, it still may be easy to identify the carrier that submitted it.

Should you have any questions regarding the attached Filing, please feel free to contact me at (412) 544-3845 or via e-mail at: Cory.Orzak@highmark.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Cory Orzak', with a long horizontal flourish extending to the right.

Cory Orzak, FSA, MAAA
Vice President, Actuarial Services
Highmark Inc.

Pennsylvania Actuarial Memorandum

1. Basic Information and Data

A. Company Information (Table 0)

Table 0 has been completed as per the instructions. Please refer to the Excel file “2021_SmGrp_HCA_PAAMExhibits_072020.xlsm” submitted with this filing containing the department’s required tables.

Note that for the remainder of this document, “Company” refers to Highmark Coverage Advantage (HCA), “Market” refers to Small Group, and “Rating Area” refers to Pennsylvania Rating Regions 1, 2, 4, 5, and 6 (Western, PA only). No Service Area changes were made since the last approved filing.

B. Rate History and Proposed Variations in Rate Changes

The most recent three years of historical rate changes in the Pennsylvania Small Group Market for the Company are as follows:

Year	Avg. Increase	SERFF ID#
2020	-0.9%	HGHM-131937188
2019	12.3%	HGHM-131496215
2018	-1.1%	HGHM-131014753

Rate changes vary by plan, as plan benefits need adjusted to help maintain compliance with metal level requirements. Other base rate components (pricing actuarial factor and network discount) are also re-evaluated each year. For 2021, the Company’s proposed rate revisions vary by plan, according to the detail presented in the URRT, Worksheet 2, and the PA Rate Template Table 10.

C. Average Rate Change

The average rate change from Table 10, column AC is a 0.78% increase. This rate change reflects the change for first quarter 2021 rates over first quarter 2020 rates.

For comparison, the change in 21-year-old non-tobacco premium PMPM calculated in Table 11, cell AN13, is a 0.8% increase.

D. Membership Count (Table 1)

Table 1 has been completed according to the instructions with the average age, age breakdown and total number of members or member months, as indicated in the table. For the 2/1/2020 data, this table reflects all Small Group enrollment, including enrollment from 2019 and 2020 plan year plans.

E. Benefit Changes

Most plans required benefit changes because of the new Actuarial Value (AV) calculator released for 2021 effective dates. The plan changes were mostly required so that the plans remained within the defined

metal level AV requirements, and were enacted by adjusting member cost sharing and the maximum out of pocket levels.

For the 2021 plan year, there were no benefit changes necessary to the Company's plans to cover the benefits contained in the state's Essential Health Benefit (EHB) benchmark plan.

F. Experience Period Claims and Premium (Table 2)

Please see Table 2 for the experience period data for the most recent calendar year, for the Company and Market. The experience period paid claims data represents the 2019 calendar year results for all non-grandfathered policies in the single risk pool, with run out through February 2020 (2 months). This data is consistent with the data reported in Section I of Worksheet I of the URRT (see below commentary). The Company has offered only ACA-compliant policies in the Market in the experience period. As such, there is no transitional policy experience to report.

The components of this exhibit were developed as follows:

- The Earned Premium represents actual revenues earned in the experience period.
- The Allowed Claims represent our best estimate of the total claims prior to member cost sharing incurred during the experience period. The Allowed Claims include:
 - Two months of run out from the end of the experience period,
 - Claims processed outside of the Company's claims system (e.g., settlements), and
 - Our best estimate of claims incurred but not paid as of the end of the run out period.

Note that the Incurred Claims and Allowed Claims presented in the URRT are net of the Prescription Drug Rebates, while Table 2 has the Prescription Drug Rebates separately identified. As per the URR instructions, Allowed Claims do not include reinsurance recoveries or pooling charges, nor do they include quality incentive payments.

- There are no non-EHB benefits or costs in the experience period.
- The EHB coverage for pediatric vision benefits are provided by our vision coverage vendor under a capitation arrangement. These costs are \$0.62 PMPM uniform across each member in the experience period and are reflected in Table 2 under the Total EHB Capitation section.
- The Estimated Risk Adjustment represents our best estimate of the year end risk adjustment transfer payment that the Company will incur based on the results in the experience period. This amount reflects the Department's calculated revised risk adjustment transfer amount sent to the Company on June 30, 2020.
- The calculated loss ratio is 71.21%.

G. Credibility of Data (Tables 2b, 3b, 4b)

We do not use a rigid credibility formula or pre-defined manual rate in the small group market. Based on professional judgment, if the experience can be used to produce reasonable results, it will be considered fully credible in lieu of a rigid formula. The experience period data for this Company is large enough to be fully credible. The results are based 100% on the experience period data, adjusted as described herein. Given the Company's fully credible rate development, Tables 2b, 3b, and 4b have not been populated.

H. Trend Identification (Table 3)

Table 3 identifies the annual medical and prescription drug allowed claims cost and utilization trends, as requested by the Pennsylvania Insurance Department. The definitions of service categories, cost, and utilization in Table 3 are consistent with the URRT instructions. The numbers entered in the Cost and Utilization columns are consistent with those entered in Worksheet I, Section 2 of the URRT, except as noted below.

To arrive at our trend assumption, the experience period cost and utilization data were pulled from the Company's claims systems by the defined benefit categories. For the trend component development, the Company uses results from the combined experience of the following companies within the Highmark corporate family: Highmark Inc., Highmark Choice Company, Highmark Health Insurance Company, and Highmark Coverage Advantage. The combined experience used is limited to the Company's Rating Area and Market, and provides a more credible base to analyze the trend components impacting the business in the Company's Market. The trend development uses a projection of allowed claim PMPMs by service category that takes into account many factors, including the Company's expectations of changes in in-network provider contracting levels, changes in out-of-network costs, changes in utilization from medical management programs, and changes in drug costs from impacts such as generic drug development and new drug treatments. To reflect the impact of provider contracting on trend, changes in in-network provider contracting levels, either known or anticipated, are factored into the cost component of trend using detailed analysis of the impact on claim levels from each material provider arrangement.

These projected costs measure and normalize for benefit leveraging, population aging, and historical changes in fee schedules, as well as company-wide utilization management programs, and external trend drivers. Based upon the coverage and demographics of our membership, our historical claim levels, adjusted for these factors and projected forward, represent the best estimates of trend for this block of business. Please note that since these historical claim levels are normalized throughout to account for these forces impacting claim utilization and costs, the claim levels presented will not reflect actual experience claim levels.

For the rate development, the Company uses the aggregate claim trend for all types of service, applied to the experience period. This is done so that the combined trend is reasonable in consideration of the various pricing trend components and the overall anticipated trend level. Based on a review of the projected normalized annual trends for 2020 and 2021, an overall claim trend of 9.6% (8.5% cost; 1.0% utilization) was selected for the 2021 rate development. Please refer to the "Trend Support" exhibit in the "2021 Supplemental Exhibits - HCA.xlsx" file showing the historical and projected normalized claim values for the Company's trend determination, along with the Company's proposed rate trend.

For this Small Group Market filing, quarterly rates are proposed, with rates adjusted each quarter based on the Total Annual Trend presented in Table 3, excluding the Induced Utilization trend. The quarterly trend is based on the cost and utilization trend from Table 3. Note that we zeroed out the impact of the Capitation trend in the Composite URRT Trend. The change in the Capitation charge is reflected in the Change in Benefits adjustment discussed below.

I. Historical Experience (Table 4)

Table 4 presents the most recent 48 months (4 calendar years) of Company data with run-out through February 2020. Allowed claims are sourced from claim records with adjustments for claims that are outside of the claims processing system such as hospital settlements. This data, combined with the data from other companies within Highmark's corporate family, was used to develop the trend in Table 3. Please see Section H for further details.

The Company has offered only ACA-compliant policies in the Market in the experience period. As such, there is no transitional policy experience to report.

2. Rate Development & Change

A. Projected Index Rate, Market-Adjusted Index Rate, & Total Allowed Claims (Table 5)

The development of the Projected Index Rate, Projected Market-Adjusted Index Rate, and Projected Total Allowed Claims, shown in Table 5, closely follows that utilized in the development presented in Worksheet 1 of the URRT, a discussion of which can be found in the Part III Actuarial Memorandum submitted in the Rate Filing Justification. Some of the items separately identified in Table 5 include:

- The Change in Morbidity represents an adjustment from the experience period claims to the projection period. Pursuant to the Department's COVID-19 Impact Guidance, the Company has included a 1.9% morbidity adjustment due to the impact of COVID-19 on 2021 claims costs. See below for additional commentary related to the projection period assumptions.
- The Change in Demographics adjustment reflects the change in age and geography factors we expect from the experience period to the projection period.
- The Change in Network adjustment reflects the change in the allowed claims we anticipate due to changes in in-network discount levels between the experience period and the projection period.
- The Change in Benefits adjustment reflects the change in the EHB benefits (pediatric benefits) we anticipate between the experience period and the projection period, as well as the change in expected pharmacy rebates. See below for additional commentary related to these cost changes.

Please see the worksheet named "Table 5 Support" in the "2021 Supplemental Exhibits - HCA.xlsx" file for the calculation of these factors from our experience period data and projected rate results.

Our initial step in developing the index rates is to determine the expected covered membership for the rating period. We estimate the covered member base by adjusting for those groups known to have lapsed during the experience period, and those that we expect will lapse prior to the projection period. Then we add in expected new business from groups with current transitional coverage moving to ACA plans, and groups currently with another carrier.

As we have seen through the transitional coverage availability period, many of the Small Group market customers have retained their pre-ACA coverage, and have yet to join the ACA risk pool. With the transitional coverage provisions extension through the end of 2021 for groups that renew on or prior to October 1, 2021, we continue to believe that many groups, especially lower-risk groups, will continue to retain their current transitional coverage until required to transfer coverage. We are expecting that enrollment drops slightly and that we lose some of the better risk groups. Also, with the continued availability of transitional coverage, we expect any new groups moving into ACA products from transitional coverage will be of higher morbidity.

Impact of COVID-19

The Change in Morbidity – All Other factor was increased by 1.9% to reflect the estimated impact of COVID-19 on 2021 claim costs. The drivers of the increase are costs directly related to COVID-19, such as a possible vaccine and continued cost sharing waivers, as well as other care delivery changes. Due to these factors we are currently estimating an impact to 2021 claim costs of 1.9% in the PA Small Group ACA market. The components of the adjustment are discussed below.

COVID-19 Treatment Costs (1.6% increase in 2021 claims): The primary driver for 2021 is the cost of a potential new vaccine. We assume a vaccine is available and 90% of members get it in 2021, either in the office or at a retail pharmacy. Additionally, we assume some vaccines will be administered in an additional office visit with waived cost sharing. Also, we assume COVID-19 testing will be required before any outpatient procedure.

Care Delivery Change (0.3% increase in 2021 claims): We assume some increase in cost of care due to member health deteriorating slightly. Additionally, we assume a higher intensity of services per visit as providers re-engage with their patients. Finally, we assume some care will be shifted to more expensive sites of service.

Total Morbidity Adjustment

In total, the Company expects that morbidity will worsen from the experience period, and reflect this with a Change in Morbidity – All Other adjustment of 1.043.

The Change in Benefits adjustment reflects our estimate of the additional costs associated with the addition of EHBs from the experience period to the coverage period, as well as a change in expected Pharmacy rebates, resulting in a Change in Benefits factor of 0.998.

The development of the Projected Paid to Allowed Ratio shown in Table 5 is presented in the “2021 Supplemental Exhibits - HCA.xlsx” file in the “Table 5 Paid-to-Allowed” worksheet. This value is consistent with the paid-to-allowed ratio in the URRT Worksheet 2, line 4.15 Incurred Claims, divided by line 4.11 Allowed Claims.

Table 5 reflects that we are assuming a Projected Risk Adjustment receipt in the projection period of \$70.05 PMPM. To arrive at the anticipated risk transfer for 2021, we bring in the risk adjustment calculation components for the projected 2021 Company portfolio (as discussed above), and use our

current knowledge of the Pennsylvania Small Group market profile to estimate the risk adjustment components for the entire state Market. This Market-wide profile is developed from available Market data, including the Interim Summary Report on Risk Adjustment for the 2019 Benefit Year published by CMS, the PA Insurance Department's calculation of 2019 risk adjustment transfer amounts using the final RATEE files, prior years' risk adjustment transfer results, publicly available data (such as MLR reports and rate filings), and outside expertise from actuarial consultants.

The Company considered the impact of the high-cost risk pooling payment for the Small Group market, first implemented in 2018, in its development of its anticipated risk transfer for 2021, and is assuming that the net cost (payments less recoveries) will be negligible for the 2021 projection period.

The Projected Paid Exchange User Fees are developed from the Exchange user fees to be charged by CMS in 2021, multiplied by the percentage of business we expect to purchase Market coverage through the Exchange for this Company. For this Company, all business will be offered Off Exchange in 2021, so there are no Exchange User Fees charged in the rate development.

For this Small Group Market filing, Table 5A has been completed, showing the number of member months renewing by quarter, and the quarterly Single Risk Pool Projected Allowed Claims.

B. Retention Items (Table 6)

Table 6 has been completed with the requested retention elements for the proposed rates for the rating period. The administrative expenses and taxes and fees presented in the rate development in Table 6 cell C53 equal the Taxes and Fees in Table 10.

Administrative costs reflect internal costs that the Company is projected to incur in the projected experience period, and are developed from standard expense allocation methods. Agent/broker fees and commissions reflect our anticipated costs for these items in the experience period.

The development of internal administrative costs utilizes an allocation of Company costs back to lines of business. The allocation method uses measureable stats such as claims worked, inquiries worked, contracts, and members to allocate the majority of expenses. When possible, expenses are direct charged if they can be identified by product instead of going through an allocation method. For corporate allocations, a TCI (total costs incurred) methodology is generally used to allocate by product.

The Health Insurance Provider Fee has been repealed for calendar years beginning after December 31, 2020. As such, a charge for this fee is no longer reflected in the rate development.

In addition, the Patient-Centered Outcomes Research Institute (PCORI) Fee was extended for an additional 10 years, and will be collected for all 2021 policy years. As such, the taxes and fees reflected in this filing include the anticipated PCORI fee to be collected.

The following Taxes and Fees were included in the rate development:

- \$0.23 PMPM for the PCORI Fee; and

- \$0.25 PMPM for the Risk Adjustment User Fee

Note the following regarding plan level retention items:

- The rate development reflects a 0% profit and risk load for all products and plans. The Company has voluntarily refrained from including a profit and risk load in this filing. By this voluntary action, the Company is not waiving any right to include a profit and risk load which the Company believes is consistent with historical and legal interpretations of the Company and the Department.
- The administrative expenses as a percentage of expected claims do not vary by plan.
- Expenses for Quality Improvement Initiatives are estimated to be 7% of internal Company expenses, based upon historical analysis of these costs.

C. Normalized Market-Adjusted Projected Allowed Total Claims (Table 7)

The normalization factors presented in Table 7 are each determined from the underlying membership demographics expected in the projected rating period. The 2020 values are pulled from the prior year's filing, while the 2021 values represent our projection for 2021 assumed in the 2021 rate development.

The Age Factor is the weighted average of the Average Age Factors for the Current ACA Book of Business as of the End of Year 2019 and for the Membership Moving to the ACA Book (from transitional and new business).

The Geographic Calibration Factor is the weighted average of the Area Factors by County. This average is weighted by membership.

The Tobacco Surcharge is not applicable since the Company does not use one.

D. Components of Rate Change (Tables 8 and 9)

Table 8 presents the components of change in the proposed 2021 Calibrated Plan Adjusted Index Rate (PMPM). The 2020 base period allowed claims is carried over from the 2020 rate filing. Row H of Table 8 may differ from Row A due to the detailed breakdown of all the components of the increases in rows B through G not calculating exactly to the change in the calibrated plan adjusted index rate in Row A, which is the more accurate percentage change based on the rate development.

Table 9 presents the data elements supporting the calculations in Table 8. The amounts shown in the 2020 Column match those entered in the 2020 Column in the plan year 2020 rate filing.

3. Plan Rate Development (Table 10)

Table 10 showing the plan rate development has been completed following the instructions in the 2021 ACA-Compliant Health Insurance Rate Filing Guidance. This table shows the plans that the Company intends to offer in 2021, as well as plans discontinued from the 2020 portfolio for 2021. Since many Small Group market enrollees as of 2/1/2020 are still in plan year 2019 plans, the enrollees in plan year 2019 plans were mapped to the plan year 2020 plan that we anticipate they will renew into in 2020. The

calibrated plan adjusted index rates for 2021 and 2020, and all of the supporting factors, are calculated according to the instructions.

Each plan takes the Market Adjusted Index Rate and multiplies by the Pricing AV, Benefit Richness Factor, Benefits in Addition to EHB Factor, Provider Network Factor, Catastrophic Eligibility Factor, and Non-Funding of CSR Adjustment Factor (not applicable to Small Group) in order to calculate the Pure Premium. The Pure Premium is then grossed up to account for expenses (Admin Costs, Taxes & Fees, and Profit or Contingency) in order to calculate the Calibrated Plan Adjusted Index Rate. Since each component of the Calibrated Plan Adjusted Index Rate is applied multiplicatively (including the Plan AV Pricing Value), plan premiums are in proportion to the Plan AV Pricing Values.

Note that the HHS Actuarial Value Calculator was able to accommodate all of the Company's benefit designs, and that no adjustments were needed from the values produced by the calculator.

The requested Induced Utilization Exhibit was completed and is presented within the "2021 Supplemental Exhibits - HCA.xlsx" file submitted with this filing (worksheet named "Induced Utilization"). Note that the calculated Induced Utilization factor in Column (8) is a component of the Actuarial Value Allowable Modifier. As such, it is adjusted by the Average Benefit Richness normalization factor of 1.129. In multiplying the Induced Utilization column (8) result by the Average Benefit Richness normalization factor, the result is the Induced Utilization factor appropriate for the plan's metal level (before normalization). These induced demand factors are consistent with the methodology described in the Department's rate filing guidance, which utilizes each plan's actuarial value to establish the appropriate induced demand factor for the plan.

The member-weighted average of the pure plan-level Induced Utilization factors in the last column of the induced utilization exhibit against the projected membership does match the 1.000 expectation of the Department. This calculation can be seen at the bottom of the Induced Utilization Exhibit, where the formulas used in the calculation have been retained.

The Child Capping Adjustment is applied to the Age Calibration Factor in Table 10 to reflect the limitation on the number of children allowed in rating. This factor is determined by estimating the amount of lost revenue due to this restriction, and applying the resulting factor to the normalized age factor in the base rate development. Support for the calibration factors is shown in the "2021 Supplemental Exhibits - HCA.xlsx" file on the worksheet named "Table 10 Calibration Factors".

4. Plan Premium Development for 21-Year-Old Non-Tobacco User (Table 11)

Table 11 presents the Company's 21-year-old non-tobacco premium in the Market for each rating quarter in 2021. As mentioned in Section 1.C above, the change in 21-year-old non-tobacco premium PMPM calculated in this table is a 0.8% increase, while the "percent rate change requested" from the SERFF Rate Review Detail Screen (and Table 10) is 0.78%.

5. Plan Factors

A. Age and Tobacco Factors (Table 12)

Please see Table 12 for the Company's age and tobacco factors.

B. Geographic Factors (Table 13)

Please see Table 13 for the Company's geographic factors. The Company's factors for the rating period are unchanged from the currently approved factors.

As mentioned in the Cover Letter, the Company is not changing its product offerings by Rating Area.

C. Network Factors (Table 14)

Please see Table 14 for the Company's network rating factors.

D. Service Area Composition

The Company follows the Rating Area designations created by the state. All counties within a Rating Area are serviced by the Company, according to the Rating Areas specified in Table 14. The Company has submitted its current 2020 service area and its proposed 2021 service area in the file "Pennsylvania Counties Map - 2021 Filings - HCA.pdf" submitted with this filing. There are no proposed changes to the Company's service area from 2020 to 2021.

E. Composite Rating

The Company is currently not planning to use CMS's composite rating method for any of its off-SHOP plans offered during the rating period.

6. Actuarial Certifications

I am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared on behalf of the Company to accompany its rate filing (for calendar year 2021) for the Small Group Market off the Pennsylvania Exchange.

I hereby certify that the projected Index Rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102)
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Neither excessive nor deficient.

I certify that the Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.

I certify that all factor, benefit and other changes from the prior approved filing have been disclosed in the 2021 PA Actuarial Memorandum Rate Exhibits.

I certify that new plans are not considered modifications of existing plans (per the uniform modification standards in 45 CFR 147.106).

I certify that the geographic rating factors reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

I certify that the AV Calculator was used to determine the AV Metal Values shown in Part I of Worksheet 2 in the URRT for all plans.

The Unified Rate Review Template does not demonstrate the process used by the Company to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Exchanges, and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

I certify that the information presented in the PA Actuarial Memorandum and PA Actuarial Memorandum Rate Exhibits is consistent with the information presented in the 2021 Rate Filing Justification.

Signed: [Redacted]

Rate Change Summary

Highmark Coverage Advantage (HCA) – Small Group Plans

Rate request filing ID # HGHM-132380500 - This document is prepared by the insurance company submitting the rate filing as a consumer tool to help explain the rate filing. It is not intended to describe or include all factors or information considered in the review process. For more information, see the filing at

<http://www.insurance.pa.gov/Consumers/ACARelatedFilings/>

Overview

Initial requested average rate change:	0.78% ¹
Revised requested average rate change:	N/A ¹
Range of requested rate change:	-1.24% to 2.93%
Effective date:	January 1, 2021
Mapped Members:	1,715
Available in:	Rating Areas 1, 2, 4, 5, 6

Key information

Jan. 2019-Dec. 2019 financial experience

Premiums	\$12,585,596
Claims	\$8,961,646
Administrative expenses	\$1,195,758
Taxes & fees	\$6,009
<hr/>	
Company made (after taxes)	\$2,422,183

How it plans to spend your premium

This is how the insurance company plans to spend the premium it collects in 2021:

Claims:	91.1%
Administrative:	8.8%
Taxes & fees:	0.1%
Profit:	0.0%

The company expects its annual medical costs to increase **9.60%**.

Explanation of requested rate change

The proposed increases are being driven by rising medical care costs, which are expected to continue through the remainder of 2020 and throughout 2021 as a result of both higher utilization and the increasing cost of healthcare services.

¹ Note that insurers will have the opportunity to revise their rate change request in July, after they are scheduled to receive updated information about the impact of a federal program called risk adjustment. This document will be updated accordingly at that time.

Part II of the Preliminary Justification

Highmark Coverage Advantage – Small Group Market

Scope and Range:

Highmark Coverage Advantage (HCA) is requesting a weighted average rate change of 1.12% weighted on the current premium for renewing plans shown in the Unified Rate Review Template for its 2021 ACA qualifying small group products with effective dates from January 1, 2021 to December 31, 2021. This will impact 1,715 individuals.

Due to changes in benefits, metal levels and plan design pricing relativities, average rate changes at the plan level differ and range from -1.08% to 3.25% as shown in the Unified Rate Review Template.

The proposed increases are being driven by rising medical care costs, which are expected to continue through the remainder of 2020 and throughout 2021 as a result of both higher utilization and the increasing cost of healthcare services.

Lower cost small groups are expected to remain outside the ACA single-risk pool for most of 2021 due to more favorable premium rates afforded to them in the pre ACA rating formula. The remaining population expected to enroll in the ACA qualifying products represents a small portion of the pool, and those groups generally have unfavorable demographics and higher than average claim costs.

Historical Financial Experience:

Highmark Coverage Advantage reported a financial gain in 2019.

Change in Medical Service Costs:

The projected average cost of medical care for the projected population is expected to increase. The increase will emerge in utilization and average cost per service, and is spread across all types of services.

Change in Benefits:

Some cost sharing parameters were changed in order to maintain compliance with Federal AV requirements. Additionally, some out of pocket maximum parameters were changed to keep up with the rising cost of health care. These out of pocket maximum changes also aided in mitigating the rate increase.

Administrative Costs, Anticipated Operating Results, and Medical Loss Ratio:

Relative to the 2020 rate filing, taxes and fees are lower since the Health Insurance Provider Fee was repealed for 2021. The anticipated operating results are not excessive or unreasonable. In accordance with regulations, the projected medical loss ratio is over 80%.

I. General Information

Document Overview

This document contains the Part III Actuarial Memorandum for Highmark Coverage Advantage (HCA) Small Group block of business rate filing (“Filing”), for products with effective dates in calendar year 2021. This actuarial memorandum is submitted in conjunction with the Part I Unified Rate Review Template.

The purpose of the actuarial memorandum is to provide certain information related to the submission, including support for the values entered into the Part I Unified Rate Review Template, which supports compliance with the market rating rules and reasonableness of applicable rate increases. This information may not be appropriate for other purposes.

This information is intended for use by the State of Pennsylvania Department of Insurance, the Center for Consumer Information and Insurance Oversight (CCIIO), and their subcontractors to assist in the review of HCA’s Filing. However, we recognize that this certification may become a public document. HCA makes no representations or warranties regarding the contents of this letter to third parties. Likewise, third parties are instructed that they are to place no reliance upon this actuarial memorandum prepared by HCA that would result in the creation of any duty or liability under any theory of law by HCA or its employees to third parties.

The results are actuarial projections. Actual experience is likely to differ for a number of reasons, including population changes, claims experience, and random deviations from assumptions.

I.1 Company Identifying Information:

- Company Legal Name: Highmark Coverage Advantage (HCA)
- State: The State of Pennsylvania has regulatory authority over these policies
- HIOS Issuer ID: 79279
- Market: Small Group
- Effective Date: January 1, 2021

II. Proposed Rate Changes

For all rate increases by plan please see the ‘Cumulative Rate Change % (over 12 mos prior)’ found in line 1.11 of the URRT Worksheet 2. Rate changes vary by plan, as plan benefits need adjusted to help maintain compliance with metal level requirements. Other base rate components (pricing actuarial factor and network discount) are also re-evaluated each year. For 2021, the Company’s proposed rate revisions vary by plan, according to the detail presented in the URRT, Worksheet 2.

The primary drivers of the 1.12% rate increase (weighted on the current premium for renewing plans in the URRT) are:

- 1.6% is due to the increase in claim levels from the base experience period
- 2.3% is due to changes in our claims trend
- 2.0% is due to changes in the risk adjustment transfer
- 4.8% from a change in the pricing of benefits and benefit richness
- 1.9% is due to the projected impact of COVID-19 on 2021 claim levels

These increases are being partially offset by the following to produce the net average increase:

- (-1.2%) from an increase in pharmaceutical rebates
- (-2.7%) is due to decreases in administrative costs, taxes and fees
- (-7.2%) from an improvement in morbidity

III. Experience and Current Period Premium, Claims, and Enrollment

III.1 Paid through Date:

Experience period claims were based on incurred calendar year 2019, paid through February 29, 2020. We included only the non-grandfathered, insured members in HCA’s book-of-business.

III.2 Current Date:

The current date used for enrollment and premium is February 29, 2020.

III.3 Allowed and Incurred Claims Incurred During the Experience Period:

- Historical Experience: To complete the URRT historical experience section we chose HCA’s current experience for the small group block of business for the period January 1, 2019 through December 31, 2019, with claims paid through February 29, 2020

- Claims Incurred During the 12-month experience period: Worksheet 1, Section I shows our best estimate of the amount of claims that were incurred during the 12-month experience period for HCA’s book-of-business. This section includes:
 - The amount of claims which were processed through our claims system,
 - Claims processed outside of our claims system (Rx rebates, settlements, capitated benefits), and
 - Our best estimate of claims incurred but not paid as of the Paid through Date stated above.
- Method for Determining Allowed Claims: For non-capitated claims, the allowed charges are summarized from HCA’s detailed claim-level historical data. We only include the non-grandfathered, insured members from HCA’s book-of-business.
- Paid Claims: We also summarized the paid claims from detailed member records. The paid-to-allowed ratio for the experience period reflects the underlying benefit plan designs chosen by each member.
- Incurred but Not Paid (IBNR) Claims Estimate: HCA’s estimate of the remaining incurred but not recorded (IBNR) claims reflects the anticipated IBNR as of the end of the paid claim run out period. The IBNR completion factor of 0.980 was developed for HCA’s total small group business through analysis of historical claim completion factors. The completion factor was applied equally to both paid and allowed total claims (as a change in utilization) to complete the experience.

IV. Benefit Categories

Experience period claims data were pulled from HCA’s claims systems, and categorized into benefit category components according to types of services associated with each claim. The resulting categories closely adhere to the preferred definitions of the Benefit Categories included in the URRT instructions, including the “Other Medical” category. The “Other Medical” category units reflect visits for PDN/home health, trips for ambulance and procedures for DME/prosthetics. The “Capitation” category represents the monthly charge paid to our Vision benefit provider for covering pediatric vision benefits.

V. Projection Factors

V.1 Trend Factors (cost/utilization)

This development of the CY 2021 rates reflects an annual trend rate of 9.6% (8.5% cost, 1.0% utilization). The annual trend estimates include the impact of provider contracting and

anticipated utilization changes to both projected in-network and out-of-network costs. These estimates measure and normalize for benefit leverage, population aging, and historical changes for fee schedules, as well as company-wide utilization management programs, and external trend drivers.

The allowed claims used for the development of the trend are adjusted and normalized to obtain a claim basis appropriate for trend development. These adjustments include changes for in-network provider contracting levels, changes for out-of-network costs, changes in utilization from medical management programs, and changes in drug costs from impacts such as generic drug development and new drug treatments. In addition, the trend estimates normalize for benefit leveraging, population aging, changes in fee schedules, and external trend drivers. The projection of claim costs into the rating period utilizes the same categories of adjustment factors, adjusts for seasonality, and uses a statistical regression of historical trend levels to project monthly claim levels. This normalized and adjusted claim progression is then used to provide the basis for our trend regression model, which will be used to establish the Company's rating trend.

The regression trend model is used to smooth out noise in the historical claim levels and to provide an appropriate jumping off point for our projected claim levels. Using the factors discussed above to adjust our projected claim levels, we can establish an appropriate assumption for trend using our experience period claim levels as the starting point. Since our historical experience would encompass the expected coverage and demographic makeup of our membership, our historical claim levels, adjusted for these factors and projected forward, would represent the best estimates of trend for this block of business.

The trend represents a blended average for all types of service and is applied to the aggregate experience for pricing. These trends represent assumed community-wide expectations. Claim variations due to the specific projected enrolled population in this single risk pool are reflected in the morbidity adjustment.

V.2 Morbidity Adjustment

The morbidity adjustment reflects the anticipated changes in the average morbidity of the covered population (beyond allowable rating factors) from the experience period to the rating period. As we have seen through the transitional coverage availability period, many of the Small Group market customers have retained their pre-ACA coverage, and have yet to join the ACA risk pool. With the transitional coverage provisions extension through the end of 2021 for groups that renew on or prior to October 1, 2021, we continue to believe that many groups, especially lower-risk groups, will continue to retain their current transitional coverage until required to transfer coverage. We are expecting that enrollment drops slightly and that we lose some of the better risk groups. Also, with the continued availability of transitional coverage, we expect any new groups moving into ACA products from transitional coverage will be of higher morbidity.

Impact of COVID-19

The Morbidity Adjustment was increased by 1.9% to reflect the estimated impact of COVID-19 on 2021 claim costs. The drivers of the increase are costs directly related to COVID-19, such as a possible vaccine and continued cost sharing waivers, as well as other care delivery changes. Due to these factors we are currently estimating an impact to 2021 claim costs of 1.9% in the PA Small Group ACA market. The components of the adjustment are discussed below.

COVID-19 Treatment Costs (1.6% increase in 2021 claims): The primary driver for 2021 is the cost of a potential new vaccine. We assume a vaccine is available and 90% of members get it in 2021, either in the office or at a retail pharmacy. Additionally, we assume some vaccines will be administered in an additional office visit with waived cost sharing. Also, we assume COVID-19 testing will be required before any outpatient procedure.

Care Delivery Change (0.3% increase in 2021 claims): We assume some increase in cost of care due to member health deteriorating slightly. Additionally, we assume a higher intensity of services per visit as providers re-engage with their patients. Finally, we assume some care will be shifted to more expensive sites of service.

Total Morbidity Adjustment

In total, the Company expects that morbidity will worsen from the experience period. For the development of the CY 2021 rates, this is reflected with a 1.043 Morbidity Adjustment factor in the URRT Worksheet 1.

V.3 Demographic Shifts

We are projecting a slight increase in the average age from the experience period to the projection period as business migrates into ACA plans from transitional plans and other plans in the Small Group market. There is no change assumed in the projected area factor. For the development of the CY 2021 rates, this is reflected with a 1.010 Demographic Shift factor in the URRT Worksheet 1.

V.4 Plan Design Changes

We made the following adjustments to reflect the expected differences in benefits between the experience period and projection period:

- We reflected anticipated changes in the average utilization of services due to differences in average cost sharing requirements during the experience period and average cost sharing requirements in the projection period: -0.8%.
- We reflected a reduction in the capitation costs for the pediatric vision benefits: -\$0.01.
- We reflected the following newly mandated benefits required under state law, which are not reflected in the experience period claims: None.

- We reflected the following new benefits that are not part of the essential health benefit package or required under state law that did not exist in the experience period claims: None.
- We made an adjustment to reflect the removal of benefits covered in the experience period claims that will not be covered in the projection period: None.

For the development of the CY 2021 rates, the combination of the above factors produces a 0.992 Plan Design Changes factor in the URRT Worksheet 1.

V.5 Other Adjustments

We are expecting an increase in savings associated with prescription drug rebates from the experience period to the projection period of \$2.17 PMPM. This increase in rebates is due to new levels of negotiated rebates with our pharmaceutical vendor.

V.6 Manual Rate Adjustments

HCA’s small group experience is fully credible; no manual rate is developed or used in this projection.

V.7 Credibility of Experience

We do not use a rigid credibility formula or pre-defined manual rate in the small group market. Based on professional judgment, if the experience can be used to produce reasonable results, it will be considered fully credible in lieu of a rigid formula. The experience period data for this Company is large enough to be fully credible. The results are based 100% on the experience period data, adjusted as described herein.

V.8 Establishing the Index Rate

The index rates as shown on Worksheet 1 of the URRT are simply the average allowed claims for the Essential Health benefits for the experience and projected populations, respectively, for HCA. It is not adjusted for the risk adjustment program or any other fee. For the projection period, it is the member-weighted average of the quarterly rate indices (Jan 1, Apr 1, Jul 1, and Oct 1) based on the assumed membership distribution effective in each quarter, as shown in the table below.

2021	% of Members	Projected Quarterly Index Rate PMPM
1Q	26.5%	\$750.26
2Q	15.0%	\$767.66
3Q	18.9%	\$785.45
4Q	39.6%	\$803.66
Composite	100.0%	\$780.65

See the sections below for a description of how the projected index rate is adjusted to arrive at each plan adjusted index rate.

V.9 Development of the Market-wide Adjusted Index Rate

The limitations imposed by verifications and rounding in the URRT v5.2 workbook produce a Market Adjusted Index Rate that is slightly different from the one ultimately used in the rate development. Please see Exhibit I for a numerical demonstration of the Market-wide Adjusted Index Rate development that removes these limitations, including the Reinsurance, Risk Adjustment Payment/Charge, and Exchange User Fees discussed below.

V.10 Reinsurance

HCA does not have any reinsurance contracts in effect that would impact this rate development. The consideration for the federal high-cost risk pooling program is discussed in the following Risk Adjustment Payment/Charge section.

V.11 Risk Adjustment Payment/Charge

To determine our estimated risk transfer for 2021, we examined historical risk scores calculated from the factors in the HHS Notice of Benefit and Payment Parameters, and other risk adjustment transfer formula components, for those members anticipated to be covered by HCA in 2021. We then estimate the statewide average risk scores and other transfer formula components by analyzing the available risk adjustment transfer component information: the Interim Summary Report on Risk Adjustment for the 2019 Benefit Year published by CMS, the PA Insurance Department's calculation of 2019 risk adjustment transfer amounts using the final RATEE files, prior years' risk adjustment transfer results, publicly available data (such as MLR reports and rate filings), and outside expertise from actuarial consultants. We do not anticipate significant migration into the small group risk pool from external populations (such as the uninsured).

HCA considered the impact of the high-cost risk pooling payment for the Small Group market, first implemented in 2018, in its development of its anticipated risk transfer for 2021, and is assuming that the net cost (payments less recoveries) will be negligible for the 2021 rating period.

Given the anticipated profile of the membership within HCA in 2021, and the estimated market-wide profile, we are assuming that HCA members will have a risk profile higher than the market-wide averages, and that HCA will receive a contribution from the risk adjustment program in 2021, decreasing premiums in the rate development by \$80.38 PMPM. Note that this value is gross of the paid-to-allowed ratio, and obtained by dividing the expected risk transfer amount of \$70.05 by HCA's expected paid-to-allowed ratio in 2021. Since the projected paid-to-allowed ratio is 87.1%, the URRT Worksheet 1 result is $\$80.38 = \$70.05 / 87.1\%$.

V.12 Exchange User Fees

The projected Exchange User Fees are developed from the Exchange user fees to be charged by CMS in 2021, multiplied by the percentage of business we expect to purchase Market coverage through the Exchange for HCA. For HCA, all business will be offered Off Exchange in 2021, so there are no Exchange User Fees charged in the rate development.

VI. Plan Adjusted Index Rates

Plan Adjusted Index Rates are developed by taking the Market Adjusted Index Rate and adjusting for each plan's actuarial value, relative benefit richness, relative network, and remaining administrative expenses (including profit and risk, and taxes and fees). Please see Exhibit II for the development of the Plan Adjusted Index Rate for each plan. The administrative expenses do not vary by plan.

VI.1 Administrative Expense

The proposed rates reflect internal administrative costs, including commissions and quality improvement admin. This cost was developed based on standard expense allocation methods, as follows:

- Administrative expenses are recorded in our general ledger. Indirect operating expenses are then grouped based upon like functions, responsibilities or cost drivers and allocated to final cost objects via an appropriate cost driver.

VI.2 Taxes and Fees

The Health Insurance Provider Fee has been repealed for calendar years beginning after December 31, 2020. As such, a charge for this fee is no longer reflected in the rate development.

In addition, the Patient-Centered Outcomes Research Institute (PCORI) Fee was extended for an additional 10 years, and will be collected for all 2021 policy years. As such, the taxes and fees reflected in this filing include the anticipated PCORI fee to be collected.

The following taxes and fees were included in the 2021 rate development:

- \$0.23 PMPM for the PCORI Fee; and
- \$0.25 PMPM for the Risk Adjustment User Fee.

In total, these taxes and fees amount to 0.07% of the anticipated premium collected in 2021.

VI.3 Profit & Risk Load

The proposed rates reflect 0% of premium as a profit and risk load. HCA has voluntarily refrained from including a profit and risk load in this filing. By this voluntary action, HCA is

not waiving any right to include a profit and risk load which HCA believes is consistent with historical and legal interpretations of HCA and the Department.

VII. Calibration

VII.1 Age Curve Calibration (to age 21, non-smoker, area with 1.0 geographic factor, January 1 effective date)

The projected weighted average age factor is 1.514. Each Plan Adjusted Index Rate represents the rate for an average member (i.e., a member with an age factor is 1.514). Please note that no member will pay these rates because the age factor of 1.514 is not found on the HHS Age Curve. It only represents the average age factor of the projected population. Please see Exhibit I for the development of the calibration factor, which calibrates the index rate to an Age 21 age factor. The Age Calibration Factor shown in URRT Worksheet 2 is the inverse of weighted average age factor, which for HCA is 0.6604.

VII.2 Geographic Factor Calibration

The projected weighted average geographic factor is 0.971. Each Plan Adjusted Index Rate represents the rate for an average member with a geographic factor of 0.971. Please note that no member will pay these rates because HCA is not using a geographic factor of 0.971 for any of the Pennsylvania rating areas. It only represents the average geographic factor of the projected population. Please see Exhibit I for the development of the calibration factor. The Geographic Calibration Factor shown in URRT Worksheet 2 is the inverse of weighted average geographic factor, which for HCA is 1.0303.

VII.3 Tobacco Use Rating Factor Calibration

HCA does not currently utilize tobacco rating factors.

VIII. Consumer Adjusted Premium Rate Development

The Calibrated Plan Adjusted Index Rate shown in URRT Worksheet 2 represents the rate for a non-smoker member with a 1.0 age factor and 1.0 geographic factor for a 1/1/2021 renewal. The appropriate value to calibrate the Plan Adjusted Index Rate by is located at the bottom of Exhibit I. By applying the 'Combined Calibration Factor' found in Exhibit I or the calibration factors in 3.11, 3.12 and 3.13 of URRT Worksheet II Section III to the Plan Adjusted Index Rates, the resulting value will represent the plan premium for a 21 year old in a 1.0 area on 1/1/2021. The standard HHS Age Curve and area factors of 0.97 for regions 1, 2, 4, and 5; and 1.04 for region 6 can be used to calculate any rate found in the QHP rate template.

HCA is filing quarterly Index Rate trends of 2.32% per quarter. Subsequent quarterly rates can be developed by applying the quarterly Index Rate trend to the first quarter rates.

IX. Projected Loss Ratio

The anticipated medical loss ratio reflected in this annual rate change filing is 91.2% relative to total premium less taxes and fees. This loss ratio is calculated consistent with the federally prescribed MLR methodology.

X. AV Metal Values

The AV Metal Values included in Worksheet 2 of the Part I Unified Rate Review Template were based entirely on the Federal AV Calculator. No adjustments were needed for any benefits from those values produced by the AV calculator.

XI. Membership Projections

Since transitional policy relief was extended through 2021 for groups that renew on or prior to October 1, 2021, we project that the bulk of the members in the small group market will remain outside of the ACA-compliant products, and remain outside the ACA single-risk pool. Any new business anticipated in HCA will come primarily from current ACA customers. HCA is expecting growth in its ACA membership from the experience to the projection period. See line 4.9 of the URRT Worksheet 2 to see projected membership by plan.

XII. Terminated Plans and Products

HCA is terminating 9 QHP plans that were active in the 2019 experience period. These plans are being terminated due to changes in the CMS Actuarial Value calculator, which would have valued these plans outside of the regulated metal level bands. These plans will be mapped to a corresponding QHP of similar metal level and plan design, and the experience period members and allowed charges will be moved to the mapped plans in the URRT.

Exhibit III lists all terminating QHP plans, as well as their URRT plan mappings.

XIII. Plan Type

The Plan types listed in Worksheet 2, Section I of the Part I Unified Rate Review Template describe HCA's plans adequately.

XIV. Actuarial Certification

I am a member of the American Academy of Actuaries and meet its qualification standards for actuaries issuing statements of actuarial opinions in the United States. This filing is prepared on behalf of HCA to accompany its rate filing (for calendar year 2021) for the Small Group Market off the Pennsylvania Exchange.

I hereby certify that the projected Index Rate is, to the best of my knowledge and understanding:

- In compliance with all applicable State and Federal Statutes and Regulations (45 CFR 156.80 and 147.102),
- Developed in compliance with the applicable Actuarial Standards of Practice
- Reasonable in relation to the benefits provided and the population anticipated to be covered
- Neither excessive nor deficient.

I certify that the Index Rate and only the allowable modifiers as described in 45 CFR 156.80(d)(1) and 45 CFR 156.80(d)(2) were used to generate plan level rates.

I certify that the geographic rating factors reflect only differences in the costs of delivery (which can include unit cost and provider practice pattern differences) and do not include differences for population morbidity by geographic area.

I certify that the AV Calculator was used to determine the AV Metal Values shown in Part I of Worksheet 2 in the URRT for all plans.

The Unified Rate Review Template does not demonstrate the process used by HCA to develop the rates. Rather, it represents information required by Federal regulation to be provided in support of the review of rate increases, for certification of Qualified Health Plans for Federally-facilitated Exchanges and for certification that the Index Rate is developed in accordance with Federal regulation and used consistently and only adjusted by the allowable modifiers.

2021 Rates Table Template v10.0				
All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.				
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.				
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.				
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.				
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.				
HIOS Issuer ID*	79279			
Rate Effective Date*	04/01/2021			
Rate Expiration Date*	06/30/2021

2021 Rates Table Template v10.0		All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.		
		If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.		
		If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.		
		If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.		
		To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.

2021 Rates Table Template v10.0				
All fields with an asterisk (*) are required. To validate press Validate button or Ctrl + Shift + I. To finalize, press Finalize button or Ctrl + Shift + F.				
If you are in a community rating state, select Family-Tier Rates under Rating Method and fill in all columns.				
If you are not in a community rating state, select Age-Based Rates under Rating Method and provide an Individual Rate for every age band.				
If Tobacco is Tobacco User/Non-Tobacco User, you must give a rate for Tobacco Use and Non-Tobacco Use.				
To add a new sheet, press the Add Sheet button, or Ctrl + Shift + H. All plans must have the same dates on a sheet.				
HIOS Issuer ID*	79279			
Rate Effective Date*	10/01/2021			
Rate Expiration Date*	12/31/2021			
Rating Method*	Age-Based Rates			
Plan ID*	Rating Area ID*	Tobacco*	Age*	Individual Rate*
Required: Enter the 14-character Plan ID	Required: Select the Rating Area ID	Required: Select if Tobacco use of subscriber is used to determine if a person is eligible for a rate from a plan	Required: Select the age of a subscriber eligible for the rate	Required: Enter the rate of an Individual Non-Tobacco or No Preference enrollee on a plan

**Highmark Coverage Advantage's Response to Objection Letter Dated
06/16/2020**

Product Name: HCA Small Group 2021 ACA Rate Filing

RE: HCA – 2021 Small Group ACA Compliant Plans (1A-SG-HCA-2020);

Pennsylvania Insurance Department ID #: HGHM-132380500

Objection Letter Status: Additional Information Required

Objection Letter Date: 06/16/2020

Respond By Date: 06/23/2020

Response Date: 06/23/2020

Below please find our responses to the Highmark Coverage Advantage (HCA, "Company") Small Group 2021 ACA Rate Filing Objection Letter dated 06/16/2020. For convenience, the questions have been reproduced below, with our responses immediately following each question.

A supplemental exhibits file has been submitted along with this response. Please see the file named "PID Response Exhibits HCA 06232020.xlsx," which contains additional exhibits and supplemental detail, as referenced in the below responses.

1. Please provide an exhibit displaying the distribution of member months by age (i.e., 0, 1, ..., 63, 64+) for both the actual calendar year 2019 members underlying the experience period and the projected calendar year 2021 population.

Response:

The requested exhibit has been included in the "PID Response Exhibits HCA 06232020.xlsx" file included in this response in a worksheet labeled "Q#1".

Membership distribution is not assumed to change from 2019 to 2021.

2. Please provide an exhibit displaying the distribution of member months by rating region for the actual calendar year 2019 members underlying the experience period.

Response:

The requested exhibit has been included in the “PID Response Exhibits HCA 06232020.xlsx” file included in this response in a worksheet labeled “Q#2”.

3. Per Table 2: Experience Period Claims and Premiums, please update the Estimated Risk Adjustment, in cell L36, to reflect the amount provided in the Department issued RATEE files.

Response:

The experience period risk adjustment amount in Table 2 has been updated to reflect the PA Insurance Department’s calculation of 2019 risk adjustment transfer amounts using the 5/14/2020 RATEE files.

4. In Table 3: Trend Components, the Other Medical Service Category weight has changed dramatically from 2.83% in the 2020 rate filing to 25.92% in the current filing. Please explain.

Response:

The Trend Components in Table 3 for Other Medical and Prescription Drugs were inadvertently switched. These results have been corrected in the filing update submitted with this response.

5. Please explain why the Company believes it is appropriate to assign 100% credibility to approximately 17,500 member months of actual calendar year 2019 experience. In providing your response, please describe any analysis that was performed to confirm that the Company’s determination related to the credibility of 17,500 member months is a reasonable one.

Response:

The base claims used in the development of HCA’s rates include claims data from Highmark Inc., Highmark Coverage Advantage, Highmark Choice Company, and Highmark Health Insurance Company, which is credible. In addition, the experience for this Company was compared to the experience of the other companies to assess the reasonableness of the data after accounting for known differences. For example, final rates of the different entities can be compared and expected to differ for things like network or benefit design.

6. The following questions relate to the trend assumption:

a. Please provide a detailed quantitative exhibit displaying the development of the induced utilization assumption that is included in the trend assumptions and shown in Table 3 of the Pennsylvania Rate Template file.

Response:

The requested exhibit has been included in the “PID Response Exhibits HCA 06232020.xlsx” file included in this response in a worksheet labeled “Q#6a”.

b. Please explain why the Company believes the current trend assumption is appropriate when the average normalized allowed PMPM shown in the “2021 Supplemental Exhibits” file appears to have increased at an annual rate of approximately 3.6% from 2017 to 2019. Specifically, please clearly state and demonstrate quantitatively why the projected trend rate from 2019 to 2021 is expected to be higher than that which was observed from 2017 to 2019, identifying specific drivers and their impact on the assumed difference.

Response:

The claims trend in 2019 was artificially low due to claimants with high claims that incurred claims in 2018, then left coverage in 2019. That, combined with claims being unexpectedly high in 2017, results in an artificially dampened 2 year average trend from 2017-2019. Based on the provided trend support, the 4 year average trend from 2015-2019 is 6.8%, which is closer to the 9.6% filed trend. There is also an expected increase in costs due to more expensive drug treatments and new technologies.

7. The following questions pertain to the morbidity adjustment shown in Table 5 of the Pennsylvania Rate Template file:

a. Please provide a detailed quantitative exhibit and narrative providing support for the following assertions discussed in Section 2A of the Pennsylvania Actuarial Memorandum:

i. That the Company will experience a drop in enrollment from 2019 to 2021.

ii. That the Company will lose some of the better risk groups from 2019 to 2021.

iii. That any new groups insured by 2021 will be of higher morbidity.

Response:

The Company has observed declining enrollment over the past few years, which we expect will continue through the projection period.

The Company is expecting about a 2.4% increase in morbidity from the experience period to the projection period primarily due to a loss of lower morbidity membership through 2019 that the Company has reflected in its projection period.

b. Please provide a quantitative exhibit displaying average calendar year 2019 member months, allowed cost PMPM, average demographic factor, average geographic factor, and average network factor associated with transitional and ACA groups insured through the Company in Pennsylvania, separately.

Response:

The requested exhibit has been included in the “PID Response Exhibits HCA 06232020.xlsx” file included in this response in a worksheet labeled “Q#7”.

c. Please provide a detailed quantitative exhibit displaying the development of the 2019 allowed claims PMPM for members expected to be effective in 2021, as shown in the “2021 Supplemental Exhibits” file. In providing your response, please provide a detailed explanation of the process the Company utilized to determine which members from 2019 are expected to be effective in 2021 and identify the specific quantitative impact of each of the items listed in 2(a).

Response:

The requested exhibit has been included in the “PID Response Exhibits HCA 06232020.xlsx” file included in this response in a worksheet labeled “Q#7”.

To develop the Company’s value for 2019 allowed claims for the members expected to be active in 2021, we blend 3 different types of business together. The first category consists of all of the groups that were active in Highmark’s Western Pennsylvania off-exchange ACA policies as of the end of 2019. We apply a lapse rate to this cohort’s membership that is estimated by our Sales and Finance departments. The second category consists of the expected value of the 2019 experience for groups that currently have Highmark transitional coverage but will move into our ACA block at their 2020 or 2021 renewals. This expected value is calculated by assigning each group a probability of moving based on their prospective risk level as of December 2019 and then taking the

probability weighted average of their member months, claim experience, and demographic experience. The probabilities are estimated using historical Transitional to ACA lapse rates for each risk level. The third category is for business that Highmark is expected to gain throughout 2020 and 2021. For this company, we expect that the new business will have the same allowed claim levels and demographics as the business that Highmark has in its ACA block at the end of 2019. The membership in this category is estimated by our Sales and Finance departments.

The exhibit in the attached file includes the average calendar year 2019 member months, allowed cost PMPM, average demographic factor, average geographic factor, and average network factor, for each of these three groups of business, as requested, as well as the block of business that we use as base experience for our rate development.

d. Please demonstrate that the Company has normalized for demographics, geography, network differences, etc. in developing the morbidity adjustment such that the Company is not double adjusting by applying separate demographic, geographic, network, etc. adjustments in addition to the morbidity adjustment.

Response:

As demonstrated in the attached Excel sheet, we normalize the claims from each group with their corresponding network, pricing, and induced demand factors, so that we do not double count those effects.

e. To the extent that the morbidity adjustment reflects anticipated changes in morbidity of the Company's internal small group book of business rather than changes in the morbidity of the overall Pennsylvania small group market, please explain how the morbidity adjustment was considered in the development of the Company's projected 2021 risk transfer assumption.

Response:

Although we do expect higher morbidity in the projection period compared to the experience period, the anticipated changes in morbidity within the covered ACA population are small enough to not warrant an adjustment to the Company's projected 2021 risk transfer assumption.

8. [Question and response redacted]

9. Per Table 5: Development of the Projected Index Rate, Market-Adjusted Index Rate, and Total Allowed Claims, Projected Incurred Risk Adjustment PMPM, please update the amount, as necessary. Please remember to update the URRT as well.

Response:

We have made the necessary updates to the Table 5 values, as well as the URRT. Note that the values are different between the URRT and PAAM exhibits because the URRT rounds its population adjustment factors to three decimal places.

10. Please reconcile the Trended EHB Allowed claims, in cell H30, Worksheet 1, of the URRT with Table 5, cell C13, Unadjusted Projected Allowed EHB Claims PMPM, of the PA AM Exhibits.

Response:

These values are different between the URRT and PAAM exhibits because the URRT rounds its population adjustment factors to three decimal places.

11. Per Table 6: Retention:

a. [Question and response redacted]

b. [Question and response redacted]

c. Using the 2019 SCHE in the Annual Statement, please quantitatively show the development of the Quality Improvements initiatives percent and PMPM amount.

Response:

Please see the worksheet labeled “Q#11c” in the “PID Response Exhibits HCA 06232020.xlsx” file included with this response for this development.

12. Per the Department’s published guidance, the Benefit Richness factors in Table 10 Column L should be developed based upon the following formula: $(\text{Plan Pricing AV in column K} * \text{CSR Defunding Adjustment in column P})^2 - (\text{Plan Pricing AV in column K} * \text{CSR Defunding Adjustment in column P}) + 1.24$. Further, the value developed by the quadratic formula must then be multiplied by a normalization constant such that the value in Cell L15 or L16 balances back to 1.000. Please modify the cells in Column L to explicitly show the quadratic formula and normalizing constant to demonstrate compliance with our guidance.

Response:

Table 10 has been updated and resubmitted along with this response.

13. If the requested rate increase is not the same across all products and plans, provide an explanation as to why the rate changes vary by product or plan, given they are based on the same single risk pool of experience for the market. Explain how the impact of morbidity was removed from impacting the variance in the rates changes across products or plans.

Response:

The requested rate increase is not the same across all products and plans. Projected rates are based on the projected claim levels and underlying benefits for each plan, and the resulting plan actuarial values. The relationships among plan actuarial values can change from year to year due to medical inflation and changes to plan parameters. Financial dynamics such as deductible leveraging and induced utilization tend to shift more costs to the Company, while some individual plan parameters, such as deductible levels, may need to be changed from the prior year's parameters in order to comply with metal level requirements. As these changes are not necessarily uniform across all plans and products, these will result in changes to the actuarial value relationships among plans, and therefore different requested rate increases.

When developing the actuarial values and cost sharing design for each plan, the Company utilizes experience data from the entire Small Group risk pool and does not consider the morbidity of the population expected to enroll in any plan. Additionally, geographic rating factors used for pricing do not include differences in population morbidity by geographic area. Thus any variance in rate changes among the plans are due solely to the changes in covered benefits and the financial dynamics discussed above, and would not reflect any expected plan morbidity.

14. Please provide an exhibit that shows quantitatively the calculation for the projected medical loss ratio of 91.3%.

Response:

Please note that with the change to the projected risk adjustment transfer, the projected medical loss ratio was changed to 91.0% in the filing documents resubmitted along with

this data call. The requested exhibit has been included in the “PID Response Exhibits HCA 06232020.xlsx” file included in this response in a worksheet labeled “Q#14”.

15. Please provide an exhibit showing the average quarterly rate change (Q1 2021/Q1 2020 – approved, etc.) groups will see if the proposed rates are approved.

Response:

The requested exhibit has been included in the “PID Response Exhibits HCA 06232020.xlsx” file included in this response in a worksheet labeled “Q#15”.

16. Please provide, by service category, the emerging claims data for this policy for the calendar year y-t-d as on end of May and discuss how this data may impact the resulting trend.

Response:

The requested exhibit has been included in the “PID Response Exhibits HCA 06232020.xlsx” file included in this response in a worksheet labeled “Q#16”. Please note that these are not normalized. The emerging 2020 claims data has seen many disruptions due to the emergence of COVID-19, while the impact from COVID-19 would not have impacted the 2019 experience period claims data. Thus since the Department has required that our initial rate filing exclude the impact of COVID-19, we are comfortable using our initially developed trend assumptions to project 2021 experience.

17. Please confirm that you have tested the rates in Table 11 of the PA AM Exhibits, PA Plan Design Summary and Rate Tables, Federal Rate Template, and the binder to ensure that rates are identical.

Response:

We have thoroughly tested the rates and can confirm that the rates in Table 11 of the PA AM Exhibits, PA Plan Design Summary and Rate Tables, Federal Rate Template, and the binder are identical.

18. Please provide an exhibit that quantitatively shows a comparison of the actual to projected claim cost PMPMs for calendar years 2015-2019, as applicable.

Response:

The requested exhibit has been included in the “PID Response Exhibits HCA 06232020.xlsx” file included in this response in a worksheet labeled “Q#18”.

19. Please provide an exhibit showing the financial gains and losses for calendar years 2015-2019 for the following categories: Member Months, Total Administrative Expenses, Total Incurred Claims, Total Premium, Total Actual Paid Taxes and Fees, Profit, Annual Underwriting gain/loss and Underwriting gain/loss PMPY.

Response:

The requested exhibit has been included in the “PID Response Exhibits HCA 06232020.xlsx” file included in this response in a worksheet labeled “Q#19”.

[Unnumbered] The Department will contact the company shortly with information regarding the opportunity and parameters for the company to provide and support an updated COVID-19 impact assessment, if desired.

Response:

The Company looks forward to receiving the COVID-19 impact assessment from the Department.

**Highmark Coverage Advantage's Response to Objection Letter Dated
07/07/2020**

Product Name: HCA Small Group 2021 ACA Rate Filing

RE: HCA – 2021 Small Group ACA Compliant Plans (1A-SG-HCA-2020);

Pennsylvania Insurance Department ID #: HGHM-132380500

Objection Letter Status: Data Request Sent

Objection Letter Date: 07/07/2020

Respond By Date: 07/16/2020

Response Date: 07/16/2020

Below please find our responses to the Highmark Coverage Advantage (“HCA”, “Company”) Small Group 2021 ACA Rate Filing Objection Letter dated 07/07/2020. For convenience, the questions have been reproduced below, with our responses immediately following each question.

A supplemental exhibits file has been submitted along with this response. Please see the file named “PID Response Exhibits HCA 07162020.xlsx,” which contains additional exhibits and supplemental detail, as referenced in the below responses.

1. On July 13th, the Department will communicate our guidance based upon updated survey information from the issuers on their best estimate of the COVID-19 impact on 2021 rates. Responses to the round two questions are due on July 16th. Please be sure that all documents in SERFF, after that date, reflect the impact of COVID-19 and are consistent with the Department’s July 13th guidance.

Response:

The Company will be submitting updated filing documents that reflect the impact of Covid-19 consistent with the Department’s guidance within the timeframe agreed upon between the Company and the Department.

2. Please update the 2019 experience period risk adjustment amount, in Table 2, to reflect the Department calculated revised risk adjustment transfer amount sent to your company on June

30th, 2020, or the final CMS transfer amount published on or before July 16th, if it differs from the Department calculation.

Response:

Table 2 of the Department's Actuarial Memorandum exhibits will be updated along with the updated filing submission that reflects the impact of Covid-19 consistent with the Department's guidance (see Question #1).

3. If the projected risk adjustment transfer amount in Table 5 will be modified, due to the June 30th revisions, or the final CMS transfer amount published on or before July 16th, if it differs from the Department calculation, please provide narrative and detailed supporting data to justify the proposed changes.

Response:

As discussed in the responses to Questions #5d and #7 below, the Company has some concerns regarding the appropriateness of the 2019 results for a basis of projection and does not intend to update its projected risk adjustment transfer amount due to the final CMS transfer amount.

4. The following questions relate to the response provided to question 6 from the objection responses dated 6/23/2020:

a. Please provide a detailed quantitative exhibit displaying the development of the 2019 and 2021 average benefit richness factors. In providing your response, please provide an exhibit displaying the distribution of members by metal for actual calendar year 2019 experience and projected 2021 members. Please demonstrate that the distributions align with the distributions shown on the 'Wksh 2 – Plan Product Info' tab of the URRT. If they do not align, please explain why.

Response:

Please see the worksheet titled "Question #4a" in the workbook submitted with this response. The benefit richness factor is applied after the age and area factors in the base rate development, so it is important to take the average benefit richness with respect to membership, average age factor in a plan, and average area factor in a plan, not just the membership. We calculated the 2019 induced demand factors with the new PID formula so there would not be false change in benefit richness caused by the formula change. The 2021 benefit richness factor is just membership weighted because in rating, it must be

assumed that each plan has the same demographics. The claims base for the morbidity adjustment uses the regional benefit richness factor, which is why we use the change in benefit richness to go from the regional benefit richness factor to this company's projected benefit richness factor.

The 2019 experience in the exhibit will not match the URRT because the 2019 experience in the exhibit is based on all small group data in WPA, but the URRT is just HCA experience. The projected 2021 enrollment matches the projected enrollment on the URRT.

b. Please update the trend support exhibit shown in the "Supplemental Exhibits" excel file to normalize for the impact of large claims (defined as the company believes reasonable for the purpose of trend analysis) for calendar years 2017 through 2019. If the average annual change in normalized allowed claim PMPM from 2017 to 2019 is lower than the filed 9.6% trend assumption, please provide quantitative support (including, but not limited to, expected increase in cost due to more expensive drug treatments and new technologies as specifically discussed in the response to question 6) demonstrating that the filed 9.6% trend is reasonable.

Response:

The Company's trend analysis and the supporting trend exhibits normalize for large claims by establishing a regression for the incurred large claim experience over time.

As discussed in the Actuarial Memorandum, to get to the adjusted allowed claims used for the development of the trend, the experience allowed claims for the Small Group ACA business is normalized for such effects as benefit leveraging, population demographics, changes in fee schedules, high dollar claims and external trend drivers. A statistical regression is applied to the historical claim levels to establish an appropriate starting point for the claims projection. The projection of claims would consider such things as anticipated changes in in-network provider contracting levels, changes in out-of-network costs, changes in utilization from medical management programs, and changes in drug costs from impacts such as generic drug development and new drug treatments. By performing a regression study of the underlying trend on normalized claim levels, the Company is able to develop an appropriate base claim level for the projection period, which can then be adjusted for some of the known trend drivers. Please see the exhibit named "Question #4b" in the supplemental exhibits file submitted with this response for a reproduction of the Trend exhibit, with specific drivers identified.

Some of the specific items impacting our pricing trend of 9.6% (8.5% cost, 1.0% utilization) include:

- 3.7% due to changes in claims costs arising out of negotiated provider contracts
- 1.3% due to new treatment options anticipated in pharmacy claims from pharmaceuticals in the drug pipeline
- 3.8% due to underlying regression trend levels that would capture such additional items as provider cost-shifting, aging, and changes in utilization patterns

The average normalized allowed claims from 2017 to 2019 is 3.6%. While this is lower than the filed trend assumption of 9.6%, it would not be prudent to fully rely on historical trend levels to establish the projected trend, especially when consideration is made for the other significant items impacting trend discussed above. By performing a regression study of the underlying trend on normalized claim levels, the Company is able to develop an appropriate base claim level for the projection period, which can then be adjusted for these additional drivers of trend.

c. Please explain why the Company believes it is reasonable to utilize experience as old as calendar year 2015 experience in the development of the trend assumption instead of limiting the trend analysis to more recent experience that may better reflect the current state of the Company's small group block (e.g., calendar years 2017 through 2019).

Response:

As discussed in the Actuarial Memorandum, and further expounded upon in the answer to Question #4b above, the Company's trend assumptions are derived from a projection of allowed claim cost levels that consider the many factors that can impact the projected experience, including, but not limited to, such impacts as provider contracting changes, changes in utilization patterns, and changes in available treatment options. The historical experience shown in the development of the trend assumption is analyzed to provide an appropriate level of support for the Company's regression analysis. Actuarial judgment is used to determine which time period is used to establish the appropriate window for regression. Wherever the more recent experience provides a sufficient base, it is utilized over any prior historical results.

5. The following questions relate to the response provided to question 7 from the objection responses dated 6/23/2020:

a. Please provide a detailed quantitative exhibit that demonstrates that enrollment has declined in recent years and through year-to-date 2020. Additionally, please provide a detailed quantitative exhibit that demonstrates that the Company experienced lower risk groups have lapsed in 2019 and through year-to-date 2020.

Response:

Please refer to PID Table 4, submitted with our latest filing documents, which illustrates the witnessed membership decline at the end of calendar year 2019, with a slight recovery in Decemeber. As can be seen in PID Table 1, the membership in this company as of February 2020 has increased from the end of calendar year 2019. However, based on our internal membership forecast, which relies on input from our Enrollment Forecast and Sales departments, our membership outlook is anticipated to decrease throughout the rest of 2020 and into 2021 driven by more aggressive rate actions taken by other carriers in the market in 2020, as well as aggressive rate actions anticipated to be taken for 2021.

The development of our morbidity adjustment was provided in the prior round of questions, and is resubmitted in this response on the worksheet titled "Question #5". We calculate a 2019 claims PMPM for the members that are either active at the end of the year or expected to join our block by the rating period, at the total western PA Small Group block's demographics. The morbidity factor is used to adjust HCA's experience to that claims amount. Being that this factor is greater than 1.00, this implies an expectation that our morbidity will increase from 2019 to 2021. In other words, as can be seen in cell B22 of the provided worksheet, we anticipate a portion of our business to lapse, and subsequently gain membership of higher morbidity, as shown in the development of our morbidity adjustment.

b. For each cohort (e.g., CY 2019 Experience for those in Highmark's WPA ACA block at the end of the year), please provide a detailed quantitative exhibit displaying the development of the assumed 2021 expected member months and describe the approach which was utilized to develop the assumption.

Response:

Our membership assumptions are sourced from Highmark's internal membership forecast, which is based on input from our Enrollment Forecast and Sales departments in determining reasonable expectations of lapse rates, new business, and transitions from our transitional block to our ACA block. This forecast considers items such as historical

persistence, new business expectations, changes in market competitiveness based on anticipated rate relativities to other carriers, as well as the potential impact of movement from Transitional business. Our internal forecast modeling has suggested a 30.71% lapse rate from 2019 to 2021, which is used to project how much of our current block will still be active in 2021. The starting point for the active cohort is the active cohort's 106,929 member months in the experience period.

For the Transitional to ACA cohort, we estimate this membership by assigning each group a probability of movement to our ACA market based on their indicated Transitional premium level relative to comparable ACA rates. The 2021 expected member months is an expectation calculated with respect to those probabilities. The transition probabilities are estimated based on historical transition rates at different premium relativities.

The amount of new business we expect is simply an assumption taken from our internal forecast modeling that is largely driven by our sales team's judgement based on their historical performance at similar market rate relativities.

c. Please provide a detailed quantitative exhibit displaying the development of the "Base allowed claims PMPM for Transitional and ACA business in 2021, rebate adjusted, excluding capitations" allowed claim cost PMPM figure.

Response:

This value was mislabeled. It should have read "Base allowed claims PMPM for Transitional and ACA business in 2019, rebate adjusted, excluding capitations". We have resubmitted the original exhibit (name "Question 2") with this fix, along with a calculation of that PMPM. It is the total 2019 experience PMPM in cell B14 with Value Based Reimbursement payments added in and prescription drug rebates applied.

d. Question and response redacted.

6. The following questions relate to the response provided to question 1 from the objection responses dated 6/23/2020:

a. Please explain why the "changes in demographics" assumption shown in Table 5 of the PA Rate Template file indicates that the Company's block will increase in age from 2019 to 2021,

but the Company stated in the response to question 1 that the “membership distribution is not assumed to change from 2019 to 2021”.

Response:

The change in demographics factor is not indicative of a change in average age factor from 2019 to 2021. The change in demographics factor represents the known difference between the average age factor in the base experience and the average age factor of the active population at the end of 2019 that are expected to be in our ACA block in 2021 in this region. We assume that the 2021 age distribution will be the same as the age distribution of the active population at the end of 2019. Note that the change in demographics also includes the change in area factor, which follows the same logic as the change in age.

b. Please provide a detailed quantitative exhibit displaying the development of the “changes in demographics” assumption shown in Table 5 of the PA Rate Template file. In providing your response, please include the development of the calendar year 2019 average age factor underlying the calculation and demonstrate that the distribution of member months by age for the experience period is consistent with the distribution of member months provided in the response to question 1.

Response:

The change in demographics factor in Table 5 takes changes the demographics from being representative of the total Western PA small group population to being representative of the members in the active population at the end of 2019 that are expected to be in our ACA block in 2021. Our response to question 1 included just HCA’s experience for both lapsed and in-force members. We use regional data for the change in demographics calculation. These won’t be consistent for that reason. Please see the “Question #6” worksheet in the workbook submitted with this response for the detail behind the change in demographics factor. As mentioned in the response to 6a, it represents the change in age factor between the total 2019 experience and that of the members active at the end of 2019 that are expected to be in our ACA block in 2021. Note that the change in demographics also includes the change in area factor, which follows the same logic as the change in age factor.

7. Question and response redacted.

8. Please confirm that Actuarial Standard of Practice #25, “Credibility Procedures,” was considered when determining the credibility of the base experience.

Response:

The credibility of the data, including the credibility procedures discussed in ASOP #25, was considered when determining the credibility of the base experience. In general, the Highmark corporate family of companies would include enrollment in the experience period that is above what we would consider to be fully credible based on professional judgment. Additionally, since the Highmark health plan has multiple entities, the experience for this entity was compared to the experience of other entities to assess the reasonableness of the data after accounting for known differences. For example, final rates of the different entities can be compared and expected to differ for things like network or benefit design.

9. Please confirm that you have tested to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rates Template are identical.

Response:

The Company confirms that they thoroughly test the rates of each rate filing submission to ensure that the rates in Table 11 of the Actuarial Memorandum Exhibits, PA Plan Design Summary and Rate Tables, and Federal Rates Template are identical.

10. Please ensure that the 7/16/20 versions of the following items are posted in SERFF with your July 16th response to this data call:

- a. Cover letter identifying all changes made and the reason for the change. Also, show the revised rate change
- b. PA Actuarial Memorandum
- c. PA Actuarial Memorandum Exhibits
- d. Department’s Plan Design Summary and Rate Template Exhibits (please ensure that the rate template by county is populated with only numeric values – no “NA”)
- e. URRT
- f. Federal Rate Template
- g. Part III: Actuarial Memorandum
- h. Updated Rate Change Request Summary (Attachment 1)
- i. Public filing PDF with limited redactions as previously directed in the Guidance (includes all

correspondence and supporting exhibits subsequent to the initial submission, in addition to all the above items).

Response:

The Company will be submitting updated filing documents that reflect the impact of Covid-19 consistent with the Department's guidance within the timeframe agreed upon between the Company and the Department. All above-referenced documents will be updated as appropriate.
