PennDOT Mifflin County Maintenance Work Schedule for the Week of October 14

Clearfield, PA – The Pennsylvania Department of Transportation (PennDOT) announced the following schedule of maintenance activities in Mifflin County the week of October 14. PennDOT performs year-round maintenance in its mission to provide a safe, efficient transportation system, and the scope of work in Mifflin County for the coming week is as follows:

Bridge Maintenance & Cleaning

- Route 1003 (Siglerville Road) bridge spanning Treaster Run one mile North of Locke Mills. Friday, October 18. Flaggers in the roadway will provide traffic control during daylight hours.

Pennsylvania has some of the oldest bridges in the country, with an age of more than 50 years on average. Preventive maintenance is vital in extending the life of the structures. As such, PennDOT maintenance crews perform some bridge deck patching and structural repairs.

Manual Patching

- Route 322 between the Old US 322 crossover in Armagh Township to a bridge spanning Kishacoquillas Creek in Brown Township. Tuesday, October 15, through Thursday, October 17. Single-lane closures will be implemented while this work is completed.

Most permanent pothole patching is completed in the spring/summer when temperatures stay consistently above freezing. If maintenance crews were not repairing potholes, the road surface would break up further and require more expensive corrective measures.

Paving, Mechanized Patching

- Route 4001 from the intersection of Route 1005 (Tea Creek Road) to the intersection of Route 4006 (Back Mountain Road) in Brown Township. Monday, October 14, through Friday, October 18. Flaggers in the roadway will provide traffic control during daylight hours.

Paving or mechanized patching is used to patch limited roadway areas that have extensive potholes, large areas of cracked pavement, and depressions. If mechanized patching was not performed, the damaged road surface would further deteriorate, resulting in PennDOT needing to completely rebuild the road or perform more costly corrective measures.

Pipe Replacing & Cleaning

- Route 103 from the intersection of Adams Lane in Bratton Township to the Huntingdon County line in Wayne Township. Monday, October 14, through Friday, October 18. Flaggers in the roadway will provide traffic control during daylight hours.

Pipe replacement and cleaning are essential in maintaining water flow around state roadways. Controlling water flow is one of the most important aspects of maintaining pavements. Uncontrolled water flow will damage both the pavement surface and the area under the pavement, which causes deterioration across the length of the pipe.

This schedule is subject to change due to weather conditions, emergencies, or other unforeseen interruptions.

Customers can report road concerns by calling 1-800-FIX-ROAD. If calling after hours, please leave a name and phone number.
